Introduction

The benefits of education and of useful knowledge, generally diffused through a community, are essential to the preservation of a free government.

Sam Houston

Cultivated mind is the guardian genius of Democracy, and while guided and controlled by virtue, the noblest attribute of man. It is the only dictator that freemen acknowledge, and the only security which freemen desire.

Mirabeau B. Lamar

Where liberty has arisen, learning must be cherished—or liberty itself becomes a fragile thing.

Lyndon B. Johnson

Mission

The mission of the University of Texas at Austin is to achieve excellence in the interrelated areas of undergraduate education, graduate education, research, and public service. The University provides superior and comprehensive educational opportunities at the baccalaureate through doctoral and special professional educational levels.

The University contributes to the advancement of society through research, creative activity, scholarly inquiry, and the development of new knowledge. The University preserves and promotes the arts, benefits the state's economy, serves the citizens through public programs, and provides other public service.

Student Honor Code

As a student of The University of Texas at Austin, I shall abide by the core values of the University and uphold academic integrity.

University Code of Conduct

The core values of the University of Texas at Austin are learning, discovery, freedom, leadership, individual opportunity, and responsibility. Each member of the University is expected to uphold these values through integrity, honesty, trust, fairness, and respect toward peers and community.

Officers of the Administration

The University of Texas at Austin

William Powers Jr., JD, *President*

Gregory L. Fenves, PhD, *Executive Vice President and Provost*

Kevin P. Hegarty, MPA, CPA, *Vice President and Chief Financial Officer*

Gregory J. Vincent, JD, EdD, *Vice President for Diversity and Community Engagement*

Patricia C. Ohlendorf, JD, *Vice President for Legal Affairs*

Juan M. Sanchez, PhD, *Vice President for Research*

Gage E. Paine, PhD, *Vice President for Student Affairs*

Patricia L. Clubb, PhD, *Vice President for University Operations*

Stephen W. Patterson, JD, *Athletic Director*

Christine A. Plonsky, BS, *Athletic Director*

Nancy A. Brazzil, BS, *Deputy to the President*

Senior Associate Vice President for Development (vacant at time of publication)

Gwen W. Grigsby, MPA, *Associate Vice President for Governmental Relations*

Carlos E. Martinez, JD, *Associate Vice President for Governmental Relations*

Administrative Officers of the Colleges and Schools

Judith Langlois, PhD, *Senior Vice Provost and Dean of Graduate Studies*

Frederick R. Steiner, PhD, *Dean, School of Architecture*

Thomas W. Gilligan, PhD, *Dean, Red McCombs School of Business*

Roderick P. Hart, PhD, *Dean, Moody College of Communication*

Manuel J. Justiz, PhD, *Dean, College of Education*

Sharon L. Wood, PhD, PE, *Dean, Cockrell School of Engineering*

Douglas Dempster, PhD, *Dean, College of Fine Arts*

Sharon Mosher, PhD, *Dean, John A. and Katherine G. Jackson School of Geosciences*

Andrew P. Dillon, PhD, *Dean, School of Information*

Ward Farnsworth, JD, *Dean, School of Law*

Randy L. Diehl, PhD, *Dean, College of Liberal Arts*

S. Claiborne Johnston, MD, PhD, *Vice President for Medical Affairs and Dean, Dell Medical School*

Linda Hicke, PhD, *Dean, College of Natural Sciences*

Alexa K. Stuijbergen, PhD, RN, FAAN, *Dean, School of Nursing*

M. Lynn Crismon, PharmD, *Dean, College of Pharmacy*
Robert L. Hutchings, PhD, *Dean, Lyndon B. Johnson School of Public Affairs*
Luis Zayas, PhD, *Dean, School of Social Work*
Brent Iverson, PhD, *Dean, School of Undergraduate Studies*

The University of Texas System

Francisco G. Cigarroa, MD, *Chancellor*
Pedro Reyes, PhD, *Executive Vice Chancellor for Academic Affairs*
Scott C. Kelley, EdD, *Executive Vice Chancellor for Business Affairs*
Raymond Greenberg, PhD, *Executive Vice Chancellor for Health Affairs*
Dan Sharporn, JD, *Vice Chancellor and General Counsel*
Barry McBee, JD, *Vice Chancellor and Chief Governmental Relations Officer*
Randa S. Safady, PhD, *Vice Chancellor for External Relations*
Amy Shaw Thomas, JD, *Vice Chancellor and Counsel for Health Affairs*
William H. Shute, JD, *Vice Chancellor for Federal Relations*
Stephanie Bond Huie, *Vice Chancellor for Strategic Initiatives*
Patricia Hurn, PhD, *Vice Chancellor for Research and Innovation*
Terry A. Hull, *Associate Vice Chancellor for Finance*

Board of Regents

Officers

Paul L. Foster, *Chairman*
Wm. Eugene Powell, *Vice Chairman*
R. Steven Hicks, *Vice Chairman*
Francie A. Frederick, *General Counsel to the Board of Regents*

Members

Terms scheduled to expire February 1, 2015

Wm. Eugene Powell, San Antonio
R. Steven Hicks, Austin
Robert L. Stillwell, Houston

Terms scheduled to expire February 1, 2017

Alex M. Cranberg, Houston
Wallace L. Hall, Jr., Dallas
Brenda Pejovich, Dallas

Terms scheduled to expire February 1, 2019

Paul L. Foster, El Paso
Ernest Aliseda, McAllen
Jeffery D. Hildebrand, Houston

Student regent with term to expire May 31, 2015

Max Richards, The University of Texas at Austin

Each Regent's term expires when a successor has been appointed and qualified and has taken the oath of office. The Student Regent serves a one-year term.

Directory of Offices

The following list includes some University offices of general interest. A complete directory of offices on campus is published at <http://www.utexas.edu/directory/offices/>.

Academic Calendar

The academic calendar is published in General Information and at <http://registrar.utexas.edu/calendars/>

The University of Texas at Austin, Office of the Registrar, PO Box 7216, Austin TX 78713-7216

Admission

Undergraduate Admissions Center, John Hargis Hall, (512) 475-7440, fax (512) 475-7475; <http://bealonghorn.utexas.edu/>

Ave Stop F5025, Austin TX 78705-1715

The University

Statement on Equal Educational Opportunity

The University of Texas at Austin is committed to an educational and working environment that provides equal opportunity to all members of the University community. In accordance with federal and state law, the University prohibits unlawful discrimination, including harassment, on the basis of race; color; religion; national origin; gender, including sexual harassment; age; disability; citizenship; and veteran status. Discrimination on the basis of sexual orientation, gender identity, and gender expression is also prohibited pursuant to University policy. Any member of the University community who feels he or she has been subject to discrimination, harassment, or retaliation should contact the Office of Institutional Equity in person at NOA 4.302, Austin TX 78713; via e-mail at oi@atx.utexas.edu; or by phone at (512) 471-1849.

Accreditation

The University of Texas at Austin is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award bachelor's, master's, first-professional, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur GA 30033-4097 or call (404) 679-4500 for questions about the accreditation of the University of Texas at Austin.

The University of Texas at Austin

The University of Texas was established by the state legislature in 1881; by popular vote, the main University was located at Austin and the Medical Branch at Galveston. The Austin campus was opened in September, 1883, with a faculty of eight and a student body of 218; about three-quarters of the students were registered in the Academic Department and the remainder in the Law Department. In the intervening decades, the central campus has grown from forty to more than 360 acres, while the student body has increased to about 39,000 undergraduates and 11,000 graduate students. In 1967, with the creation of The University of Texas System, the name of the main University was changed to the University of Texas at Austin.

University students represent both the diverse population of the state and the full range of contemporary scholarship: an undergraduate may choose courses from more than 200 fields of study while pursuing any of more than 150 majors. Undergraduate study is supported by extensive computer facilities and by one of the largest academic libraries in the nation. Students also benefit from the broad range of scholarly and technical research conducted by the faculty and the research staff.

The city of Austin, with a population of about 1.8 million, is a relaxed and cosmopolitan setting for the University. The city is home to respected professional communities in theatre, dance, the visual arts, and classical and popular music that offer a wide range of cultural events. Students may also take part in recreational activities made possible by the temperate climate and Austin's location in the Hill Country of central Texas.

For further historical and current information about the University, see *General Information* (<http://catalog.utexas.edu/general-information>).

The University of Texas System

The University of Texas at Austin is the largest component of The University of Texas System. The system is governed by a nine-member Board of Regents appointed by the governor with the advice and consent of the state Senate. In addition to the University, the system

consists of the following institutions. Information about the system and its components is published at <http://www.utsystem.edu/>.

- The University of Texas at Arlington
- The University of Texas at Brownsville
- The University of Texas at Dallas
- The University of Texas at El Paso
- The University of Texas - Pan American
- The University of Texas of the Permian Basin
- The University of Texas at San Antonio
- The University of Texas at Tyler
- The University of Texas Southwestern Medical Center at Dallas
- The University of Texas Medical Branch at Galveston
- The University of Texas Health Science Center at Houston
- The University of Texas Health Science Center at San Antonio
- The University of Texas M. D. Anderson Cancer Center
- The University of Texas Health Science Center at Tyler

Organization of the University

Academic Affairs

Subject to the supervision of the Board of Regents and to the authority the board has vested in administrative officers, the general faculty is responsible for the governance of the University. The president is the chief executive officer; the executive vice president and provost is the chief academic officer. The administration of each college or school is the responsibility of that division's dean; in most colleges and schools, an associate or assistant dean for academic affairs oversees the day-to-day academic life of the division. Several colleges are further divided into departments and academic centers; academic and administrative matters in these units are the responsibility of the department chair or center director. A list of the University's colleges and schools and their constituent departments and academic centers is given in *General Information* (<http://catalog.utexas.edu/general-information>).

Student Services

Student services are provided by the Division of Student Affairs, under the direction of the vice president for student affairs. The division consists of several units, which administer the University's programs in such areas as financial aid, student record management, counseling and learning support, housing and food, recreation, health services, and student media. The services of these units are described in *General Information* (<http://catalog.utexas.edu/general-information>). Services provided by the colleges and schools are described in the college/school sections of this catalog.

Undergraduate Degrees

The University offers the following undergraduate degrees.

Bachelor of Architecture	BArch
Bachelor of Arts	BA
Bachelor of Arts in Art	BAArt
Bachelor of Arts in Geological Sciences	BAGeoSci
Bachelor of Arts in Music	BAMusic
Bachelor of Arts in Theatre and Dance	BATD
Bachelor of Business Administration	BBA
Bachelor of Fine Arts	BFA
Bachelor of Journalism	BJ
Bachelor of Music	BMusic

Bachelor of Science and Arts	BSA
Bachelor of Science in Advertising	BSAdv
Bachelor of Science in Aerospace Engineering	BSAsE
Bachelor of Science in Applied Learning and Development	BSALD
Bachelor of Science in Architectural Engineering	BSArchE
Bachelor of Science in Architectural Studies	BSArchStds
Bachelor of Science in Astronomy	BSAst
Bachelor of Science in Athletic Training	BSAthTrng
Bachelor of Science in Biochemistry	BSBioch
Bachelor of Science in Biology	BSBio
Bachelor of Science in Biomedical Engineering	BSBiomedE
Bachelor of Science in Chemical Engineering	BSChE
Bachelor of Science in Chemistry	BSCh
Bachelor of Science in Civil Engineering	BSCE
Bachelor of Science in Communication Sciences and Disorders	BSCSD
Bachelor of Science in Communication Studies	BSCommStds
Bachelor of Science in Computer Science	BSCS
Bachelor of Science in Electrical Engineering	BSEE
Bachelor of Science in Environmental Science	BSEnviroSci
Bachelor of Science in Geological Sciences	BSGeoSci
Bachelor of Science in Geosystems Engineering and Hydrogeology	BSGEH
Bachelor of Science in Human Development and Family Sciences	BSHDFS
Bachelor of Science in Interdisciplinary Science	BSIntrdiscSci
Bachelor of Science in Interior Design	BSID
Bachelor of Science in Kinesiology and Health	BSKinHealth
Bachelor of Science in Mathematics	BSMath
Bachelor of Science in Mechanical Engineering	BSME
Bachelor of Science in Medical Laboratory Science	BSMedLabSci
Bachelor of Science in Neuroscience	BSNeurosci
Bachelor of Science in Nursing	BSN
Bachelor of Science in Nutrition	BSNtr
Bachelor of Science in Petroleum Engineering	BSPE
Bachelor of Science in Physics	BSPhy
Bachelor of Science in Psychology	BSPsy
Bachelor of Science in Public Health	BSPublicHealth
Bachelor of Science in Public Relations	BSPR
Bachelor of Science in Radio-Television-Film	BSRTF
Bachelor of Science in Textiles and Apparel	BSTA
Bachelor of Social Work	BSW
Doctor of Pharmacy	PharmD

SCHOOL OF SOCIAL WORK

Social work	BSW
-------------	-----

Simultaneous Majors

With proper approval, an undergraduate may pursue two majors simultaneously. The two majors may lead either to a single degree or to two degrees. For example, a student who majors simultaneously in history and government is awarded a single Bachelor of Arts degree; a student who majors simultaneously in journalism and government receives the Bachelor of Journalism and the Bachelor of Arts.

The student is admitted to the University with a single major. He or she may choose a second major after completing thirty semester hours of coursework in residence at the University. The student must follow any application procedures and meet any admission requirements that have been established for the second major; information about these and other relevant college policies is available from the dean. Approval of the student's application for simultaneous major will take into account the student's ability to graduate within four years¹ of entering the university.

Students with simultaneous majors must pay all applicable major-related fees for both fields, and they have the right to use the advising and student services provided by both colleges. Decisions about admission to programs, honors, scholastic probation, and dismissal are based independently on the criteria for each major.

A student who chooses to pursue two majors simultaneously is expected to take responsibility for his or her educational development. The student must know and abide by all policies of each of the colleges in which he or she is enrolled. The student must also know and meet the requirements of both degree programs, enroll in courses appropriate to both, meet prerequisites and take courses in the proper sequence, and seek advice from both colleges about degree requirements and other University policies when necessary.

¹For programs requiring more than four years, the projected length of the program will be used instead of the four-year standard.

Interdisciplinary Opportunities

Several of the majors listed in the section "Degree Programs" above are interdisciplinary in nature. The Bachelor of Science in Biomedical

Engineering, for example, is offered by the Cockrell School of Engineering but involves substantial coursework in the life and physical sciences; in the various area studies programs in the College of Liberal Arts, such as Latin American studies and Middle Eastern studies, students examine a geographic area from the viewpoints of several traditional disciplines.

In addition to interdisciplinary majors, the simultaneous major option (p. 13), and the formal dual degree programs described later in this catalog, the University provides various ways for students to add breadth and diversity to their studies. These include the transcript-recognized certificate programs (p. 13); other concentrations, not reflected on the graduate's transcript, are described in the later chapters of this catalog. The Study Abroad program, described in *General Information* (<http://catalog.utexas.edu/general-information/student-services/international-office/study-abroad>), allows students to consider their own field from the unique viewpoint of another culture. The Bridging Disciplines Programs and other initiatives of the School of Undergraduate Studies help students traverse the traditional boundaries between colleges and disciplines.

Cross-disciplinary initiatives of the colleges and schools are often described on their Web sites, which may be reached via <http://www.utexas.edu/dept/>.

Transcript-Recognized Certificate Programs

Transcript-recognized certificate programs offer interdisciplinary curricula that support and extend a student's major. Undergraduates who complete certificate requirements in conjunction with their degree requirements or within one year after earning the degree receive recognition on the University transcript; students in integrated undergraduate/graduate programs must complete certificate requirements within one year after they complete their undergraduate degree requirements. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree. At least half of the required certificate coursework must be completed in residence at the University.

A student may not earn a certificate in the same field as his or her major, and at least one certificate course must be outside the requirements of the major. However, certificate courses outside the major may be counted toward other degree requirements.

Students should apply for the certificate when they apply for graduation or when they complete the certificate program, whichever is later. Transcript recognition is awarded at the end of that semester or summer session.

Each of the following transcript-recognized certificate programs is described in the catalog section for the college that sponsors it. Certificate programs that do not lead to transcript recognition are also described in the following sections of this catalog.

- School of Undergraduate Studies
 - Bridging Disciplines Programs (see Degrees and Programs (p. 23))
- McCombs School of Business
 - Business Foundations
 - Business and Public Policy
 - Energy Management
 - Global Management
 - Real Estate
 - Supply Logistics Optimization (see Degrees and Programs (p. 51))

- College of Communication
 - Communication and Society: Science Communication
 - Sports Media
 - US Latino and Latin American Media Studies (see Academic Policies and Procedures (p. 78))
- School of Engineering
 - National Academy of Engineering Grand Challenges
- College of Liberal Arts
 - African Studies
 - Core Texts and Ideas
 - Creative Writing
 - History and Philosophy of Science
 - Indigenous Studies
 - Lesbian, Gay, Bisexual, Transgender, and Queer/Sexualities Study
- College of Natural Sciences
 - Elements of Computing
 - Evidence and Inquiry
 - Food and Society
 - Forensic Science
 - Pre-Health Professions
 - Scientific Computation
 - Textile Conservation and Museum Studies (see Degrees and Programs (p. 543))
 - UTeach Natural Sciences Secondary Teaching Option

Students must complete the following eighteen semester hours of coursework with a grade of at least B in each course:

1. Three semester hours in numerical computing chosen from the following: Computer Science 323E, 323H, 367, Mathematics 348.
2. Three semester hours in numerical applications chosen from the following: Aerospace Engineering 347, Biology 337J, 342, 346, Chemical Engineering 348, Economics 363C, Geological Sciences 325K, Mathematics 374M, Mechanical Engineering 369L, Physics 329, Statistics and Data Sciences 339.
3. Nine semester hours chosen from the following: Computer Science 377, Engineering Mechanics 360, Mathematics 346, 368K, 372K, 376C, Statistics and Data Sciences 374C, 374E.
4. A scientific computing project supervised by a member of the computational science, engineering, and mathematics (CSEM) graduate program faculty. The research project is completed in a three-semester-hour research methods or individual instruction course, which the student should take during the senior year. The research project may include mentoring by ICES postdoctoral fellows and CSEM graduate students as part of a vertical instructional research team.

With the approval of the certificate program's faculty adviser, course substitutions may be made within the broad area of computational science and engineering.

More information about the certificate is available at <http://www.ices.utexas.edu/programs/cse-certificate/> and in the Institute for Computational Engineering and Sciences, ACE 4.110

Certificate in Computational Science and Engineering

The foundations of science and engineering are under rapid, dramatic, and irreversible change brought on by the advent of the computer. Steady growth in computer capabilities, and enormous expansion in the scope and sophistication of computational modeling and simulation, have added computation as the third pillar of scientific discovery and have revolutionized engineering practice. Computational science and engineering can affect virtually every aspect of human existence, including the health, security, productivity, and competitiveness of nations.

The Computational Science and Engineering Certificate program is sponsored by the Cockrell School of Engineering, the Jackson School of Geosciences, the College of Liberal Arts, and the College of Natural Sciences; it is administered by the Institute for Computational Engineering and Sciences (ICES). The program offers highly qualified upper-division students an opportunity for in-depth study and research in computational science and engineering, including computational and applied mathematics, numerical simulation, scientific computation, and visualization. A student who completes the general requirements listed on Transcript-Recognized Programs (p. 13) and the specific requirements below receives recognition on his or her University transcript and a letter from the director of ICES that describes the program and the work completed. Along with supporting letters from supervising faculty and graduate mentors, these are valuable assets for students applying to graduate school and pursuing competitive job opportunities.

To apply for admission, students must have completed sixty semester hours of coursework and must have a grade point average of at least 3.00. Students are expected to have broad training in quantitative methods, comparable to that provided by Mathematics 408D or 408M, Computer Science 303E or Statistics and Data Sciences 222, Mathematics 427K, and Mathematics 340L.

Preparation for Health Professions

The rapid expansion and diversification of services designed to meet the health needs of society provide students with a variety of career opportunities in health care. However, since competition for admission to professional school programs is keen, it is important to maintain a strong academic record.

Advisory Services

Students interested in a health career should contact Health Professions Advising, PAI 5.03, for course and career advising designed to prepare them for admission to professional schools. Health Professions Advising (<http://cns.utexas.edu/health-professions>) maintains a Web site, a reference collection of information on health careers, and an e-mail distribution list. The office sponsors a lecture series, an annual Health Professions Fair, and other programs.

In general, professional schools do not indicate a preferred undergraduate major, leaving the student free to choose a degree program suited to his or her interests and abilities. The student should complete minimum professional school course requirements before taking a nationally standardized admission test such as the Dental Admission Test, Medical College Admission Test, Pharmacy College Admission Test, or Graduate Record Examinations. Health Professions Advising provides guidance concerning courses that meet professional school admission requirements; advising for degree requirements is available in the student's major department. Students are encouraged to register using the special advising area code appropriate to the health career they are pursuing.

A student planning to pursue a degree in dietetics, medical laboratory science, nursing, or public health at the University should consult an adviser in the appropriate department or school.

Transfer of Professional School Coursework Toward an Undergraduate Degree

All students preparing for graduate health professions schools should plan to complete a bachelor's degree in the field of their choice before entering professional school, since the number of students admitted without a degree is small. Most professional pharmacy programs, including those in Texas, do not require a bachelor's degree for admission.

If a preprofessional student undertakes work leading to an established undergraduate degree in the College of Liberal Arts or the College of Natural Sciences but is accepted into the professional school before finishing the degree, it may be possible by special petition for the student to use professional school coursework toward the degree as transfer hours. In this instance, to graduate the student must meet, without exception, all requirements for the degree. If the petition is approved, limited transfer of unspecified upper-division credit in chemistry and biology is allowed as applicable and necessary to the degree.

In a few cases in which a bachelor's degree is not required to enroll in a professional program, a student who completes his or her studies at a University of Texas System school of health professions may be either eligible or required to receive a bachelor's degree jointly awarded by UT Austin and the health professions school. If a student has received an undergraduate or graduate degree from a UT System general academic institution before enrolling at a UT System health science center to pursue a second bachelor's degree, the health science center awards the second degree. For more information, students should contact their college's advising office.

Applying to Professional School

The Health Professions Advising Web site (<http://cns.utexas.edu/health-professions>) lists the minimum admission requirements for most dental, medical, occupational therapy, optometry, pharmacy, physical therapy, physician assistant, and veterinary programs in the state. Articles of current interest, admission statistics, and information on application procedures are available for reference in Health Professions Advising.

All applicants to health professions programs should consult the schools' Web sites and catalogs as well as the most recent editions of admissions guides such as *Admissions Requirements of United States and Canadian Dental Schools*, *Medical School Admission Requirements*, *Veterinary Medical School Admission Requirements*, and *Pharmacy School Admission Requirements*. These publications are available in the Health Professions Advising resource library.

Preparation for Law

There is no sequential arrangement of courses prescribed for a pre-law program, nor is any particular major specified. For answers to specific questions about a pre-law program, the student should consult the pre-law adviser in his or her major department.

Services for pre-law students in the College of Liberal Arts are provided by Liberal Arts Career Services (LACS), Peter T. Flawn Academic Center 18. These include the annual fall law fair, information on how to research law schools, and assistance with the application procedure, including the personal statement. Pre-law students in all majors may consult the pre-law adviser in LACS. Additional information about preparation for law is available at <http://www.utexas.edu/cola/orgs/lacs/Students/PL-GS/PreLaw.php>.

Information about admission to the School of Law at the University is given in *General Information* and in the *Law School Catalog* (<http://>

catalog.utexas.edu/law). Like most professional schools, the University's law school has a number of specific requirements and limitations. For example, the applicant must have completed a bachelor's degree. Students are admitted only at the beginning of the fall semester. Each applicant for admission must take the Law School Admission Test, administered by the Law School Admission Council. This is usually taken by December of the senior year. The applicant's test score and undergraduate academic performance are important in determining eligibility for admission to law school; but all law schools consider a variety of factors in their admission policies, and no single factor by itself will guarantee admission or denial.

Preparation for Teacher Certification

Students who plan to teach in the early grades in Texas public schools must earn the Bachelor of Science in Applied Learning and Development in the College of Education and must meet the appropriate state certification requirements.

Students who plan to teach in Texas public middle schools or high schools must earn a bachelor's degree in the field they intend to teach and must meet the requirements for teacher certification. Students pursuing either middle grades or secondary math or science certification must follow the curriculum prescribed by the UTeach-Natural Sciences program. Students pursuing either middle grades or secondary certification in English language arts, social studies, or languages other than English must follow the curriculum prescribed by the UTeach-Liberal Arts program. Students pursuing other areas of certification should consult an adviser in the major department about degree requirements and an adviser in the College of Education about certification requirements.

Coursework in the Graduate School and the School of Law

Graduate Work for Undergraduate Credit

An undergraduate may enroll in a graduate course under the following conditions:

1. He or she must be an upper-division student and must fulfill the prerequisite for the course (except graduate standing).
2. He or she must have a University grade point average of at least 3.00.
3. He or she must receive the consent of the instructor of the course and of the graduate adviser for the field in which the course is offered. Some colleges and schools may also require the approval of the dean's office. Individual divisions may impose additional requirements or bar undergraduates from enrolling in graduate courses.
4. Students in most colleges must have their dean's approval before they register for a graduate course.

Undergraduate students may not enroll in graduate courses that have fewer than five graduate students enrolled.

A graduate course taken by an undergraduate is counted toward the student's bachelor's degree in the same way that upper-division courses are counted, unless the course is reserved for graduate credit as described in the next section. Courses reserved for graduate credit may not also be used to fulfill the requirements of an undergraduate degree.

An undergraduate student enrolled in a graduate course is subject to all University regulations affecting undergraduates.

Reservation of Work by Undergraduates for Graduate Credit

Under the following conditions, a degree-seeking undergraduate may enroll in a graduate course and reserve that course for credit toward a graduate degree.

1. The student must have a University grade point average of at least 3.00.
2. The student must have completed at least ninety semester hours of coursework toward an undergraduate degree.
3. The student may not register for more than fifteen semester hours in the semester or for more than twelve semester hours in the summer session in which the course is reserved.
4. No more than twelve semester hours may be reserved for graduate credit.
5. All courses reserved for graduate credit must be approved by the twelfth class day of the semester or the fourth class day of the summer session by the course instructor, the student's undergraduate adviser, the graduate adviser in the student's proposed graduate major area, the dean of the student's undergraduate college, and the graduate dean. A form for this purpose is available in the Office of Graduate Studies.

An undergraduate student enrolled in a graduate course is subject to all University regulations affecting undergraduates.

A student who reserves courses for graduate credit must be admitted to a University graduate program through regular channels before the credit may be applied toward a graduate degree. By allowing the student to earn graduate credit while still an undergraduate, the University makes no guarantee of the student's admissibility to any graduate program.

Courses in the School of Law

Undergraduate students may not take courses in the School of Law.

Honors

Honors programs and organizations are described in college/school sections of this catalog; the programs of the University Honors Center (<http://www.utexas.edu/ugs/uhc>) are described in the School of Undergraduate Studies (p. 22) section. *General Information* gives the requirements for recognition as a College Scholar or Distinguished College Scholar, inclusion on the University Honors list, and graduation with University honors.

Academic Advising

The University views sound academic advising as a significant responsibility in educating students. Academic advisers assist students in developing intellectual potential and exploring educational opportunities and life goals. Many people in the campus community contribute to the advising process, including faculty, staff, student, and professional advisers. Through the relationship established between adviser and student within a friendly, helpful, and professional atmosphere, a student has the opportunity to learn about educational options, degree requirements, and academic policies and procedures; to clarify educational objectives; to plan and pursue programs consistent with abilities, interests, and life goals; and to use all resources of the University to best advantage.

Ultimately, the student is responsible for seeking adequate academic advice, for knowing and meeting degree requirements, and for enrolling in appropriate courses to ensure orderly and timely progress toward a

degree. Frequent adviser contact provides students with current academic information and promotes progress toward educational goals. The University supports that progress and encourages effective academic advising campus-wide.

The advising systems are described in the college/school sections of this catalog.

Student Responsibility

While University faculty and staff members give students academic advice and assistance, each student is expected to take responsibility for his or her education and personal development. The student must know and abide by the academic and disciplinary policies given in this catalog and in *General Information* (<http://catalog.utexas.edu/general-information>), including rules governing quantity of work, the standard of work required to continue in the University, scholastic probation and dismissal, and enforced withdrawal. The student must also know and meet the requirements of his or her degree program, including the University's basic education requirements; must enroll in courses appropriate to the program; must meet prerequisites and take courses in the proper sequence to ensure orderly and timely progress; and must seek advice about degree requirements and other University policies when necessary.

The student must give correct local and permanent postal addresses, telephone numbers, and e-mail address to the Office of the Registrar and to the offices of the student's deans and must notify these offices immediately of any changes. Official correspondence is sent to the postal or e-mail address last given to the registrar; if the student has failed to correct this address, he or she will not be relieved of responsibility on the grounds that the correspondence was not delivered.

The student must verify his or her schedule of classes each semester, must see that necessary corrections are made, and must keep documentation of all schedule changes and other transactions.

All students should be familiar with the following sources of information:

The University Catalog

The catalog of the University is the document of authority for all students. Any academic unit may issue additional or more specific information that is consistent with approved policy. However, the information in the catalog supersedes that issued by any other unit if there is a conflict between the two. The University reserves the right to change the requirements given in the catalog at any time.

The catalog consists of four issues: the *Undergraduate Catalog*, the *Graduate Catalog*, the *Law School Catalog*, and *General Information*. Each issue is published online by the Office of the Registrar at <http://registrar.utexas.edu/catalogs/>.

The *Undergraduate Catalog* is published in August of even-numbered years; the *Graduate Catalog* is published in August of odd-numbered years; the *Law School Catalog* is published in February of even-numbered years. These issues contain regulations and degree requirements that apply to undergraduates, graduate students, and students in the School of Law. Regulations are valid only for the two academic years indicated by the dates in the title of each publication; for an explanation of the period for which degree requirements are valid, see the section "Graduation under a Particular Catalog" in each issue. The lists of available course offerings for each academic unit are correct at the time of publication but are subject to change. They are superseded by course offerings published each semester and summer session in the *Course Schedule*.

General Information, published every August, contains current and historical information about the University's organization and physical

facilities. It gives important information about academic policies and procedures that apply to all students for the academic year indicated in title of the publication. It includes the official academic calendar, admission procedures and residence requirements, information about tuition and fees, and policies on quantity of work, grades and the University grade point average, credit by examination and correspondence, adding and dropping courses, withdrawal from the University, and scholastic probation and dismissal. *General Information* is meant to be used along with each of the other issues; each student must be familiar with the regulations given there and with those given in the issue that covers his or her degree program.

Assistance in obtaining information about the University—including costs, refund policies, withdrawal, academic programs, the faculty, accreditation, and facilities and services for disabled persons—is available from V. Shelby Stanfield, Vice Provost and Registrar, at (512) 475-7510 and at The University of Texas at Austin, Office of the Registrar, P.O. Box 7216, Austin TX 78713-7216.

The Course Schedule

The *Course Schedule* is published by the Office of the Registrar and is available before registration for each semester and summer session at <http://registrar.utexas.edu/schedules/>. It includes information about registration procedures; times, locations, instructors, prerequisites, and special fees of classes offered; and advising locations.

Dean's Offices

In each college, the office of the assistant or associate dean for student affairs serves as a central source of information about academic affairs and student services. The student should consult the dean's office staff for information not provided in the publications listed above; a student who is in doubt about any University regulation should always seek clarification in the dean's office before proceeding.

Graduation

The University holds commencement exercises at the end of the spring semester. Each college and school also holds a commencement ceremony in the spring, and many hold graduation exercises in the fall. Graduating students are encouraged to participate. Those who graduate in the summer or fall may attend commencement the following spring. Each student should consult his or her dean early in the semester of graduation for information about commencement activities and procedures.

No degree will be conferred except on publicly announced dates.

General Requirements

To receive an undergraduate degree from the University of Texas at Austin, a student must fulfill the Core Curriculum (p. 20) requirements and all requirements for the degree as set forth in a catalog under which he or she is eligible to graduate and any special requirements of the college or school and department offering the degree, as well as the following minimum general requirements:

1. The student must have a grade point average of at least 2.00 on all courses undertaken at the University (including credit by examination, correspondence, and extension) for which a grade or symbol other than Q, W, X, or CR is recorded. Additional requirements imposed by a college or school, if any, are given in the college's chapter of this catalog.
2. The student must fulfill the following requirements regarding coursework taken in-residence. Residence credit includes only courses taken at the University of Texas at Austin; it does not include

credit by examination, courses taken by extension or correspondence, and online courses that are recorded as transfer credit. Coursework in University-approved affiliated study abroad programs (international provider programs) is treated as residence credit for requirements 2a below. However, coursework in University-approved affiliated study abroad programs may not be used to fulfill requirement 2b.

- a. The student must complete in-residence at least sixty semester hours of coursework counted toward the degree. (This requirement is waived for students in the Associate Degree in Nursing to Bachelor of Science in Nursing (ADNBSN), a degree program for registered nurses who hold associate's degrees or diplomas in nursing.)
- b. At least six semester hours of advanced coursework in the major must be completed in residence.

Additional requirements imposed by a college or school, if any, are given in the college/school sections of this catalog. Many degree plans include residence rules in addition to the above University-wide requirements; the appropriate academic units have the discretion to determine applicability of University-approved affiliated study abroad credit toward all college- and school-specific requirements for coursework in-residence. Course equivalency and University approval of study abroad courses are determined by the appropriate academic units.

3. Coursework in American government and American history (the legislative requirement):
 - a. Each student must complete six semester hours of coursework in American government, including Texas government. Because these courses are not electives, they may not be taken on the pass/fail basis at the University. Credit by examination may be counted toward the requirement.

The six hours of coursework used to fulfill the requirement must cover both the United States and the Texas constitutions. Texas colleges and universities differ in the way they include this material in the courses they offer. As a result, some combinations of government courses taken at different institutions do not fulfill the requirement, even though they provide six hours of credit. The following combinations of coursework, some of which include transferred work, fulfill the government requirement at the University:

- i Government 310L and 312L
- ii Government 310L and three hours of transfer credit in United States government (entered into the student's University record as "GOV 3 US")
- iii Government 310L and three hours of transfer credit in Texas government ("GOV 3 TX")
- iv Three hours of transfer credit in United States government ("GOV 3 US") and three hours of transfer credit in Texas government ("GOV 3 TX")

A number of sections of Government 312L are offered each semester. Because some of these sections deal with state government and some deal with federal government, credit for Government 312L in combination with transfer credit in United States government ("GOV 3 US") or in Texas government ("GOV 3 TX") may fail to fulfill the legislative requirement. If a student has such a combination of credit, his or her dean's office will evaluate the coursework to determine whether both the state and the federal components of the requirement have been met.

- b. Each student must complete six semester hours of coursework in American history. Up to three hours in Texas history may be counted toward this requirement. Because these courses are

not electives, they may not be taken on the pass/fail basis at the University. Credit by examination may be counted toward the requirement.

ROTC courses may not be counted toward the legislative requirement in history or government. Policies about the use of ROTC courses are given in each of the college/school sections of this catalog.

4. A candidate for a degree must be registered at the University either in-residence or in absentia the semester or summer session the degree is to be awarded and must apply to the dean for the degree no later than the date specified in the official academic calendar. Some colleges require that their students be registered in that college the semester of graduation; these rules are given in the college/school sections of this catalog.

Multiple Degrees

A student may not receive more than one degree with the same title.

Graduation under a Particular Catalog

To receive a bachelor's degree, a student must fulfill all the degree requirements in a catalog under which he or she is eligible to graduate; the choices open to students in each college and school are explained below. The student must complete degree requirements within a specified time period; if he or she leaves school to enter military service during a national emergency, the time required to meet the military obligation is excluded from the time allowed for completion of the degree.

A student who transfers to the University from another Texas public institution of higher education has the same catalog choices that he or she would have had if the dates of attendance at the University had been the same as the dates of attendance at the other institution.

Since each college and school must retain the flexibility to improve its curriculum, course offerings may be changed during the student's education. If a course required under a previous catalog is no longer offered, students eligible to graduate according to that catalog should consult the dean of the college to learn whether another course may be used to fulfill the requirement.

Catalog Choices

The catalog choices open to business, engineering, and pharmacy students are described below. In all other divisions, a student may graduate under the catalog covering any academic year in which he or she was enrolled at the University. Whichever catalog the student chooses, all degree requirements must be completed within six years (seven years for the Bachelor of Architecture) of the end of the two-year period covered by that catalog. For example, a student who chooses to graduate according to the requirements in the 2012-2014 catalog must do so by the end of the summer session 2020 (2021 for the bachelor of architecture).

McCombs School of Business

A business student may graduate under the catalog covering any academic year in which he or she was enrolled at the University. A business honors student who adds a second business major must graduate under the same catalog for both majors.

Whichever catalog the student chooses, all degree requirements must be completed within six years of the end of the two-year period covered by that catalog. For example, a student who chooses to graduate according

to the requirements in the 2012-2014 catalog must do so by the end of the summer session 2020.

Cockrell School of Engineering

An engineering student may graduate under the catalog covering any academic year in which he or she was enrolled in the school. Whichever catalog the student chooses, all degree requirements must be completed within six years of the end of the two-year period covered by that catalog. For example, a student who chooses to graduate according to the requirements in the 2012-2014 catalog must do so by the end of the summer session 2020.

Course substitutions in the degree program are permitted only with the approval of the departmental undergraduate adviser and the dean.

College of Pharmacy

A pharmacy student may graduate under the catalog in effect immediately preceding the student's admission to the college or the catalog covering any academic year in which he or she was enrolled in the professional curriculum in the college. Whichever catalog they choose, students must complete all degree requirements within seven years of the end of the two-year period covered by that catalog. For example, a student who chooses to graduate according to the requirements in the 2012-2014 catalog must do so by the end of the summer session 2021.

Strategic Advising & Career Counseling

<http://www.utexas.edu/ugs/>

General Information

Mission

The School of Undergraduate Studies oversees the components of a college education that are shared by all undergraduates at the University. The mission of the school includes the responsibility for sustaining a dynamic common curriculum and enriching the undergraduate experience through innovative advising, career counseling, academic assistance, learning communities, interdisciplinary programs, and undergraduate research. The overall functions of the school are organized as follows:

Common Curriculum

- To instill in each student the distinctive traits of a University of Texas at Austin graduate and broadly educated person.
- To ensure a high-quality core curriculum by working closely with the other colleges and schools to set and enforce standards for the courses required of all undergraduate students.
- To develop and maintain innovative classes for first-year students.
- To set standards for and to evaluate courses that satisfy campus-wide requirements in writing and speaking, ethics and leadership, global cultures, cultural diversity, quantitative reasoning, and independent inquiry.
- To assess and support ongoing curricular innovation and teaching excellence in these courses and throughout the undergraduate curriculum.

Strategic Advising & Career Counseling

- To offer advising services that help students find coherent paths through the University that suit their academic and career interests, focusing on students who are unsure of their majors or who are considering a change.
- To provide training and resources for advisers from every college and school.
- To prepare students for graduate school or their careers with the workplace knowledge needed for making sound choices.

Academic Assistance

- To provide multiple avenues by which students can develop the ability to succeed academically.
- To help students improve performance inside and outside traditional classrooms.

Learning Communities

- To support student success by cultivating community-based academic experiences, especially for first-year students.
- To foster leadership among students in these communities.

Interdisciplinary Programs

- To create and coordinate interdisciplinary certificate and degree-granting programs, working closely with the other colleges and schools.
- To develop integrated strands of courses for satisfying campus-wide requirements.

Undergraduate Research

- To foster undergraduate participation in the University's creative activity and research.

Admission and Registration

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Students who wish to explore more than one field of study before choosing a major are encouraged to apply for admission to the School of Undergraduate Studies. Students who are not admitted into their desired major in another college or school may also be offered admission into the School of Undergraduate Studies.

Detailed information about the admission process is provided in *General Information* (<http://catalog.utexas.edu/general-information>), which also includes information about registration, adding and dropping courses, transferring from one division of the University to another, and the academic calendar. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published before registration each semester, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are available through the registrar's Web site, <http://registrar.utexas.edu/>.

Academic Policies and Procedures

Basic Education Requirements

The University strives to enroll exceptionally well-prepared, highly motivated students and to produce self-reliant graduates who will become leaders in both their chosen professions and their communities. The University must not only equip its graduates with occupational skills, but also educate them broadly enough to enable them to adapt to and cope with the accelerated process of change occurring in business, professional, and social institutions today. Students must be exposed to a broad spectrum of arts and science so that they may be educated beyond vocational requirements and thus be prepared for responsible citizenship in an increasingly complex world.

All graduates of the University are expected to

- communicate clearly and accurately, defend an idea on the basis of evidence, draw conclusions, and evaluate the arguments of others;
- have a critical understanding of the society in which we live and the ways it has evolved through time;
- be able to analyze ethical issues and their possible resolutions;
- understand facets of science and the ways in which knowledge of the universe is gained and applied;
- understand aspects of mathematics and apply quantitative skills to problem solving;
- have a critical understanding of how human cultures are expressed in literature, philosophy, or language;
- participate in and/or critically analyze some area of the visual and performing arts; and

- participate in the process of inquiry through research, creative endeavors, or related activities.

To help students in all majors acquire the traits of an educated person, the general faculty of the University has adopted the core curriculum outlined below. All students, regardless of major, must complete the core curriculum prior to earning an undergraduate degree.

Often, courses required by the student's degree program may be used concurrently to fulfill one or more of the core curriculum requirements listed below. When possible, students should select core courses that also satisfy specific requirements of their intended degrees. For more information, students should consult their advisers and the degree requirements given in the college/school sections of this catalog.

Core Curriculum

All students pursuing an undergraduate degree at the University must complete the following required coursework. These requirements are consistent with statewide core curriculum guidelines; the area of the statewide core that each requirement meets is given in parentheses in the following table. A single course may not be counted toward more than one core area.

Courses used to fulfill core curriculum requirements must be taken for a letter grade; the minimum acceptable grade is *D-*. Individual degree plans may not require a higher minimum standard for core courses in general. However individual degree plans may set a higher minimum grade standard for core courses that are also required in the major field or are required as prerequisites for courses in the major.

State law requires that courses fulfilling a core component area (including the institutionally designated option) at one Texas public institution must transfer and substitute for the receiving institution's requirements. However, this only applies to courses taken when a student does not hold degree-seeking status at UT Austin. While a student holds degree-seeking status at UT Austin, courses taken to fulfill core curriculum requirements must meet UT Austin core definitions in the relevant UT Austin undergraduate catalog, regardless of where they are taken.

Core Area

Sem
Hrs

First-year signature course (Texas Core Code 090)

One of the following courses, completed during the student's first year in residence:

> Undergraduate Studies 302, 303

Students in the Plan II Honors Program may complete this requirement by taking Tutorial Course 302.

English Composition and Writing Flag (Texas Core Code 010)

Six hours are required.

> Rhetoric and Writing 306

Nonnative speakers of English may complete three hours of this requirement by taking Rhetoric and Writing 306Q. Students in the Plan II Honors Program may complete three hours of this requirement by taking English 603A or Tutorial Course 603A.

> A three-hour course with a writing flag designation

The writing flagged course counted toward this area of the core may also be used to satisfy other flag and major requirements outside the core, but may not be used to satisfy any other requirement of the core.

Humanities (Texas Core Code 040)

One of the following courses

> English 316L, 316M, 316N, 316P

Students in the Plan II Honors Program may complete this requirement by taking English 603B or Tutorial Course 603B.

American and Texas Government (Texas Core Code 070)

Six hours are required. This coursework partially fulfills the legislative requirement (p. 17). ROTC courses may not be substituted for the core courses in government.

>Government 310L is required for all students and

>Government 312L or 312P may be used to satisfy the second half of this requirement.

Transfer students with five or more hours of coursework in American government may complete this requirement of the core by taking Government 105, which includes Texas government content that is consistent with the legislative requirement (p. 17).

U.S. History (Texas Core Code 060)

Six hours are required; three hours may be in Texas history. This coursework partially fulfills the legislative requirement (p. 17).

ROTC courses may not be substituted for the core courses in history.

The following courses may be counted:

History 314K, 315G, 315K, 315L, 317L, 320L, 320P, 320R, 333L, 333M, 334L, 340S, 345J, 345L, 350R, 351P, 355F, 355M, 355N, 355P, 355S, 356G, 356K, 356P, 356R, 357C, 357D, 365G, 376F

Social and behavioral sciences (Texas Core Code 080)

One of the following courses:

> African and African Diaspora Studies 324E

> Anthropology 302, 305, 307, 318L

> Core Texts and Ideas 302, 365

> Economics 301, 304K, 304L

> Geography 305, 306C, 307C, 319

> Health and Society 301

> History 329U

> Human Development and Family Sciences 304, 304H

> Linguistics 306, 312D, 312E

> Psychology 301

> Religious Studies 310

> Sociology 302, 307C, 307D, 307E, 307F, 307G, 307J, 307K, 307L, 307M, 307N, 307P, 307S, 307T, 308D, 308E, 308F, 308G, 308J, 308K, 308L, 308M, 308N, 309, 313K, 318, 319

Students in the Plan II Honors Program may complete this requirement by taking Social Science 301.

Mathematics (Texas Core Code 020)

One of the following courses:

> Mathematics 302, 305G, 408C, 408K, 408N, 408R, 316

> Statistics and Data Sciences 302, 303, 304, 305, 306, 328M

Students in the Plan II Honors Program may complete this requirement by taking Mathematics 310P.

6

6

3

3

6

3

Natural Science and Technology Part I (Texas Core Code 030)

Six hours in a single field of study.

The following courses may be counted and should be paired as indicated below:

> Astronomy 301, 307, 309G, 309L, 309N, 309R, 309S

Choose either Astronomy 301 or 307 and one course from Astronomy 309G, 309L, 309N, 309R, and 309S.

> Biology 301D, 301E, 301L, 301M, 311C, 311D, 315H, 325H, 326M, 446L, 365S

Choose two courses chosen from Biology 301D, 301L, and 301M;

or complete one of the following recommended pairs: Biology 311C and 311D, Biology 311C and 326M, Biology 311C and 446L, Biology 311C and 365S, or Biology 315H and 325H.

Students in the Plan II honors program may pair Biology 301E with Biology 301D, 311C, or 315H*.

> Chemistry 301, 301H, 302, 302H, 304K, 305

Students should complete one of the following pairs of courses: Chemistry 301 and 302; Chemistry 301H and 302H; Chemistry 304K and 305.*

> Geological Sciences 401, 302C, 302D, 302E, 302M, 303, 303C, 404C, 405

Only one of the following may be counted: Geological Sciences 401 or 303. Geological Sciences 404C may not be paired with Geological Sciences 405.*

> Marine Science 307, 308

> Natural Sciences 306J, 306K, 306L, and 306M

Students who use Natural Sciences 306J and Natural Sciences 306K to fulfill Natural Science and Technology, Part I may also use either Natural Sciences 306L or Natural Sciences 306M to fulfill the requirements for Natural Science and Technology, Part II.

> Physics 301, 302K, 302L, 303K, 303L, 309K, 309L, 316, 317K, 317L, 321; Physical Science 303, 304

Students should complete one of the following pairs of courses: Physics 301 and 316; Physics 302K and 302L; Physics 303K and 303L; Physics 309K and 309L; Physics 317K and 317L; Physical Science 303 and 304. Physical Science 303 may not be counted with Physics 301, 302K, 303K, 309K, and 317K to complete Science and Technology, Part I; Physical Science 304 may not be counted with Physics 302L, 303L, 309L, 316, and 317L to complete Science and Technology, Part I. Students in the Plan II Honors Program may pair Physics 321 with any of the Physics or Physical Science courses listed above.*

If Plan II students do not use Biology 301E or Physics 321 to fulfill Natural Science and Technology, Part I, they may use one of them to fulfill the Natural Science and Technology, Part II requirement as long as the two parts are in different fields of study.

Students who take the Natural Sciences 306J and 306K sequence to complete Natural Science and Technology, Part I may not use physical science or physics coursework to satisfy Natural Science and Technology, Part II. Students who use physical science or physics coursework to satisfy Natural Science and Technology, Part I may not use Natural Sciences 306J to complete Natural Science and Technology, Part II.

*See <http://www.utexas.edu/ugs/core/sciencepairings> for complete listing of allowed 6 hour pairing.

6 Natural Science and Technology, Part II (Texas Core Code 031)

3

Three hours in a field of study different from the field counted toward the preceding requirement.

Courses listed under *Natural Science and Technology, Part I*, may be counted toward this requirement; the following courses may also be counted:

> Anthropology 301, 304, 304T

> Biology 305E, 305F, 307D, 309D, 309F

> Computer Science 302, 312

> Geography 301C, 301K, 304E

> Natural Sciences 306J, 306K, 306L, 306M

Students who use Natural Sciences 306J and 306K to fulfill Natural Science and Technology, Part I may also use either Natural Sciences 306L or 306M to fulfill the requirements for Natural Science and Technology, Part II.

> Nutrition 306

Students who take the Natural Sciences 306J and 306K sequence to complete Natural Science and Technology, Part I may not use physical science or physics coursework to satisfy Natural Science and Technology, Part II. Students who use physical science or physics coursework to satisfy Natural Science and Technology, Part I may not use Natural Sciences 306J to complete Natural Science and Technology, Part II.

Visual and Performing Arts (Texas Core Code 050)

3

One of the following courses:

> African and African Diaspora Studies 311C, 356C, 356D, 356E

> American Studies 330

> Architecture 308, 318K, 318L

> Art History 301, 302, 303, 325, 327N, 327R, 327S, 328J, 329J, 329N, 329R, 330G, 331J, 331K, 332K, 332L, 333L, 335J, 337K, 338L, 338M, 339J, 339K, 339L, 339M, 339P, 341K, 341L, 342J, 345J, 346L, 347K, 347L, 347M, 347N, 349K

> Classical Civilization 301, 302, 303, 307C, 307D

> Core Texts and Ideas 350, 351

> Design 308

> English 321P, 379P

> Fine Arts 308, 311, 330, 331, 332, 333

> Music 302L, 303M, 306M, 307, 313, 334

> Philosophy 317K, 346K

> Radio-Television-Film 305, 314, 316

> Theatre and Dance 301, 317C, 317D

Total 42**Signature Courses**

The Signature Courses at The University of Texas at Austin connect students with distinguished faculty members in unique learning environments. By way of this rigorous intellectual experience, students develop college-level skills in research, writing, speaking, and discussion through an approach that is both interdisciplinary and contemporary. As of the 2010 Undergraduate Catalog, all students are required to take a Signature Course to fulfill university core requirements.

The Signature Courses (Undergraduate Studies 302 and 303) introduce students to college-level learning through a myriad of subjects and topics. These classes range from the arts and humanities to the hard sciences, but every class has unique components that help students throughout their college career and beyond. The Signature Courses:

- put new students in contact with top faculty from across the University;
- help guide students as they strive to become better writers, speakers, and problem solvers;

- assist students in using research methods and critical thinking skills that are necessary to perform well in all of their other courses;
- familiarize students with the gems of the University; and
- engage students in a university-wide academic event.

More information about signature courses is available at <http://www.utexas.edu/ugs/sig/>.

Additional Basic Education Requirements Skills and Experience Flags

In the process of fulfilling the core curriculum and other degree requirements, all undergraduates are expected to complete courses with content in the following six areas:

- Writing: three flagged courses beyond Rhetoric and Writing 306 or its equivalent
- Quantitative reasoning: one flagged course
- Global cultures: one flagged course
- Cultural diversity in the United States: one flagged course
- Ethics and leadership: one flagged course
- Independent inquiry: one flagged course

Courses used to fulfill flag requirements must be taken for a letter grade unless the flagged course is only offered on a pass/fail basis; the minimum acceptable grade is *D-*. Individual degree plans may not require a higher minimum standard for flagged courses in general. However, individual degree plans may set a higher minimum grade standard for flagged courses that are also required in the major field or are required as prerequisites for courses in the major.

Courses with sufficient content in these areas will be identified in the *Course Schedule* by the appropriate flags. The School of Undergraduate Studies monitors flagged courses to ensure that they meet the guidelines set by the general faculty. When a course is approved to carry more than one flag, enrolled students may use all of those flags to fulfill degree requirements, except that the global cultures flag and the cultural diversity in the United States flag must be earned in separate courses.

While many degree programs require all of these flags, some are still in the process of implementing selected flag requirements. Students who choose to graduate according to the requirements of the *2014–2016 Undergraduate Catalog* should consult their advisers and the degree requirements listed in chapters 3 through 16 of this catalog to determine which of the flag requirements apply to them.

Foreign Language

In addition to the core curriculum requirements above, undergraduates are expected to have completed two years in a single foreign language in high school. Students without at least two years of high school foreign language coursework in the same foreign language must earn credit for the beginning level proficiency course or sequence in a foreign language; this credit does not count toward the student's degree. For the description of beginning level proficiency in a specific foreign language, please see <http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/foreign-language-requirement.php>. Students should consult their advisers and the degree requirements listed in chapters 3 through 16 of this catalog to determine whether additional foreign language requirements apply to them.

Programs and Centers

James W. Vick Center for Strategic Advising & Career Counseling

The James W. Vick Center for Strategic Advising & Career Counseling in the School of Undergraduate Studies provides learning-centered, developmentally based academic advising and career counseling services to students in the School of Undergraduate Studies and students interested in changing majors at The University of Texas at Austin.

The Vick Center is an integrated advising and career counseling center in which students are assigned both an academic adviser and career counselor and is the only place on campus to assist students with major and career exploration. Academic advisers and career counselors serve on cross-functional teams who bring knowledge and expertise about major and career exploration together to better assist students with educational and career planning.

Academic advisers and career counselors help students define short and long term goals and identify satisfying and fulfilling major and career options. Through purposeful and intentional interaction with academic advising and career counseling professionals, students learn about themselves, their skills, their personalities, and their values on the path to determining a choice of major and career.

After a period of exploration and strategic advising, students enrolled in the School of Undergraduate Studies choose a major in one of the University's other colleges or schools. Students have up to four semesters to select a major. More information about the James W. Vick Center for Strategic Advising & Career Counseling is available at <http://www.utexas.edu/ugs/csacc/>.

Sanger Learning Center

The Sanger Learning Center is the primary provider of academic assistance to University students. To help students reach their highest potential in their personal and academic development, the center provides a variety of services and resources in the areas of mathematics, science, learning strategies, and graduate and professional school planning and preparation. The center also offers content-based discussion sections, study groups, and tutoring for difficult courses. Services are free to currently enrolled students in all schools and colleges (some restrictions may apply).

Programs

- Appointment Tutoring provides one-on-one tutoring for more than 70 courses as well as writing consultation for graduate students. Appointments help students tackle difficult homework problems and review course concepts in one-hour sessions. Tutors work with students on a consultancy-basis after passing a rigorous hiring and training process certified by the College Reading and Learning Association (CRLA).
- Drop-in Tutoring provides tutoring for lower-level math, physics, and chemistry courses without the need to make an appointment. Tutors assist students in a small group setting in the David Drum Tutoring Center during designated hours. Sanger's Tutorial Services also creates small group tutoring opportunities by request.
- Supplemental Instruction is a nationally recognized program aimed at improving student performance, increasing retention, and enhancing teaching. The program targets historically difficult entry-level courses by offering students regularly scheduled discussion sections led by trained undergraduate and/or graduate students.
- The Sanger Learning Center's classes and workshops also meet a broad spectrum of student needs, ranging from mathematics

and science reviews to general study strategies as well as writing consultation for graduate students.

- Peer-Led Undergraduate Studying (PLUS), a program that aims to support student performance and motivation in historically difficult courses by offering class-specific weekly study groups. Group leaders offer a collaborative group study experience tailored to the needs of their classmates.
- In addition to managing its programs, Sanger Learning Center's professional staff members take individual appointments assisting students with study-related questions or concerns.
- Peer Academic Coaching, a program certified by the CRLA at the master tutor level, offers structured guidance over time to students needing assistance with skills such as reading efficiency, note-taking, time and project management, test taking, and test preparation.

More information about the Sanger Learning Center is available at <http://lifelearning.utexas.edu/>.

360 Connections

The 360 Connections initiative strives to help first-year students integrate socially, academically, and developmentally to ensure a smooth transition to college life on our campus, leading to academic success and on-time graduation. By participating in a 360 Connection (which may be a cohort, program, community, group, class, or similar group), students receive a holistic, 360° view of life as a Longhorn.

More information about the 360 Connections is available at <http://www.utexas.edu/ugs/360>.

First-year Interest Groups

A First-year Interest Group (FIG) is a group of 18-25 first-year students who take two to four classes together during their first fall semester at UT. Each group attends a weekly seminar led by a peer mentor and a staff facilitator. FIG students develop a sense of community as they attend classes, study, and participate in various activities and events with their mentor and fellow first-years.

More information about FIGs is available at <http://www.utexas.edu/ugs/fig/>.

Bridging Disciplines Programs

The Bridging Disciplines Programs (BDPs) support students in becoming versatile thinkers with the skills to collaborate across disciplines and cultures. The BDPs are designed to complement a student's major with an individualized plan of study leading to an interdisciplinary certificate in one of the following areas:

- Children and Society
- Conflict Resolution and Peace Studies
- Cultural Studies
- Digital Arts and Media
- Environment
- Ethics and Leadership
- Film Studies
- Global Studies
- Human Rights and Social Justice
- Innovation, Creativity, and Entrepreneurship
- Public Policy
- Social Entrepreneurship and Nonprofits
- Social Inequality, Health, and Policy

Each BDP is overseen by an interdisciplinary faculty panel that sets policy, approves courses, and selects students. Within each broad area, students choose a strand of specialized courses drawn from disciplines across the University. Students are encouraged to use the BDP theme to select courses and integrate degree requirements; to this end, courses taken to fulfill core curriculum requirements, courses fulfilling major requirements, and electives may also be counted toward a BDP. Participation in undergraduate research and internships is also central to the design of the BDPs.

All degree-seeking undergraduates at the University are eligible to apply for the BDPs. With careful planning, a BDP can complement most degree plans. However, because the BDPs build on core requirements and electives, students are encouraged to start early in their University careers.

Undergraduates who complete BDP requirements in conjunction with their degree requirements or within one year after earning the degree receive a certificate and recognition on the University transcript; students in integrated undergraduate/graduate programs must complete certificate requirements within one year after they complete their undergraduate degree requirements. A maximum of nine semester hours of the certificate coursework may be taken after the student has earned the undergraduate degree. At least half of the required certificate coursework must be completed in residence at the University.

A student may not earn a certificate in the same field as his or her major, and at least one certificate course must be outside the requirements of the major. However, certificate courses outside the major may be counted toward other degree requirements.

Students should apply for the certificate when they apply for graduation or when they complete the certificate program, whichever is later. Transcript recognition is awarded at the end of that semester or summer session.

In order to earn a BDP certificate, students must satisfy the following requirements:

1. At least nineteen semester hours of coursework. The distribution of coursework varies by specialization, and students should consult the BDP office for the requirements of each program. For all specializations, the coursework requirements consist of the following:
 - a. *Foundation Courses*: One to ten hours in foundation courses that introduce key concepts and methodologies related to the interdisciplinary concentration.
 - b. *Connecting Experiences*: Three to nine hours in undergraduate research, internships, and/or independent creative project courses that connect students' interdisciplinary concentration to their major.
 - c. *Courses in a Strand*: Six to twelve hours in courses in a strand, which allows students to focus their remaining BDP coursework. Course listings for BDP strands are located on the BDP Web site at <http://www.utexas.edu/ugs/bdp/>.
2. A three- to four-page integration essay in which students reflect on what they have learned and accomplished through their BDP experience. These essays will be reviewed by members of a BDP faculty panel. Additional guidelines are available from the BDP advisers.
3. Students must earn a grade of at least C- in each of the courses taken to fulfill BDP requirements and the cumulative grade point average in all courses counting toward a student's BDP certificate must be at least 2.00. All but one of the courses taken to fulfill BDP requirements must be taken on the letter-grade basis.
4. At least half of the required course work in the BDP certificate must be completed in residence at The University of Texas at Austin.

5. Completion of the requirements of a major.

More information about BDPs is available at <http://www.utexas.edu/ugs/bdp/>.

Office of Undergraduate Research

The Office of Undergraduate Research (OUR) supports student engagement in the research and creative activity of the University. We foster undergraduate participation in research across the disciplines by raising the visibility of undergraduate research on campus, facilitating students' searches for research opportunities related to their interests and goals, and helping students share their work with others.

Services offered through the Office of Undergraduate Research include weekly information sessions on how to get involved in research, individual advising sessions, and workshops on a variety of topics tailored to the needs of student groups and advisers. The office also offers a workshop series that guides students through the process of designing and presenting a poster about their research, and it coordinates the University's annual Research Week, a week-long celebration of undergraduate research and creative activity across the disciplines.

To facilitate involvement in undergraduate research, the Office of Undergraduate Research offers several courses that students may take to receive credit for research experiences with University faculty members: Undergraduate Studies 310, and 320, and Undergraduate Studies 320F. Undergraduate Studies 320F satisfies the Independent Inquiry flag requirement. Enrollment in these courses is coordinated through the Office of Undergraduate Research.

The Office of Undergraduate Research also oversees EUREKA (<http://www.utexas.edu/research/eureka>), a Web site devoted to undergraduate research resources and opportunities at the University. The site provides a searchable database of about three thousand faculty research profiles and a list of faculty projects with opportunities for undergraduates.

More information on the Office of Undergraduate Research is available at <http://www.utexas.edu/ugs/ugr/> or by phone at (512) 471-7152.

University Honors Center

The University Honors Center in the School of Undergraduate Studies is a focal point for interdisciplinary honors activities at the University. The center offers a variety of enrichment programs for undergraduate honors students and support to the campus activities of several national honor societies including: Alpha Lambda Delta, Phi Eta Sigma, National Society of Collegiate Scholars, Phi Beta Kappa, and Phi Kappa Phi.

More information about the University Honors Center is available at <http://www.utexas.edu/ugs/uhc/>.

Discovery Scholars Program

The Discovery Scholars Program (DSP) is a four-year, learning community program for select students in the School of Undergraduate Studies. Students are invited to participate, and the DSP staff provides support for their transition from high school to college and connects them to campus resources. Students are also encouraged to take responsibility for their individual educational journey. Benefits include individualized educational planning and advising, small-section course options, tutoring, mentoring, community programming, and a focus on academic and civic development.

More information about the Discovery Scholars Program is available at <http://www.utexas.edu/ugs/dsp>.

Texas Success Initiative

The Texas Success Initiative is a state-legislated program designed to improve student success in college. The two components of the program are:

- Assessment of each student's basic skills in reading, mathematics, and writing, and
- Developmental instruction to strengthen academic skills that need improvement.

More information about the Texas Success Initiative is available in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/the-texas-success-initiative>) and at <http://www.utexas.edu/ugs/tsi>.

Courses

Bridging Disciplines: BDP

Lower-Division Courses

BDP 101, 201, 301. Forum Seminar Series.

Restricted to freshmen and sophomores, and to students in the Bridging Disciplines Programs. Discussion of various contemporary issues, with an emphasis on interdisciplinary perspectives and critical discourse. For 101, two lecture hours a week for eight weeks; for 201, two lecture hours a week for one semester; for 301, three lecture hours a week for one semester. Some topics are offered on the letter-grade basis only. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

BDP 306. Fundamentals of Ethical Leadership.

Restricted to freshmen and sophomores, and to students in the Bridging Disciplines Programs. Discussion of various contemporary issues related to ethical leadership, with an emphasis on interdisciplinary perspectives and critical discourse. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

BDP 306C. Principles of Business.

Restricted to nonbusiness students. Interdisciplinary examination of how businesses function in the Western world. Discusses the development of the corporation in the United States, ethical issues, and the primary areas of business. Three lecture hours a week for one semester. Bridging Disciplines 301 (Topic: Principles of Business) and 306C may not both be counted. Offered on the letter-grade basis only.

BDP 110, 210, 310. Connecting Research Experience.

Restricted to students in the Bridging Disciplines Programs. Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program. Research may consist of an individual project or assisting a faculty research project. Individual instruction. With consent of the Bridging Disciplines research coordinator, may be repeated for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 310S. Connecting Research Experience: Service Learning.

Restricted to students in the Bridging Disciplines Programs. Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program and including an academic service-learning component. Research may consist of an individual project involving service to the community or assisting a faculty research project with a community service component. Individual instruction. With consent of the Bridging Disciplines research coordinator, may be repeated

for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 111, 211, 311. Connecting Internship Experience.

Restricted to students in the Bridging Disciplines Programs. Supervised internship experience related to the interdisciplinary themes of a Bridging Disciplines Program. Internships may be paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. For 111, three hours of fieldwork a week for one semester; for 211, six hours of fieldwork a week for one semester; for 311, ten hours of fieldwork a week for one semester. With consent of the Bridging Disciplines research coordinator, may be repeated once for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 311S. Connecting Internship Experience: Service Learning.

Restricted to students in the Bridging Disciplines Programs. Supervised internship experience related to the interdisciplinary themes of a Bridging Disciplines Program and including an academic service-learning component. Internships must be unpaid and may include work with nonprofit organizations or other organized community service entities. Ten hours of fieldwork a week for one semester. With consent of the Bridging Disciplines research coordinator, may be repeated once for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 119, 219, 319. Specialized Forum Seminar Series.

Restricted to freshmen and sophomores. Discussion of various contemporary issues, with an emphasis on multidisciplinary perspectives and critical discourse. For 119, two lecture hours a week for eight weeks or one lecture hour a week for one semester; for 219, two lecture hours a week for one semester; for 319, three lecture hours a week for one semester; additional hours may be required for some topics. Some topics are offered on the letter-grade basis only. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

BDP 319D. Introduction to Digital Media Production.

Introduction to digital media production, including the fundamentals of software programs used for digital design, web production, animation, and other functions. Three lecture hours a week for one semester. Bridging Disciplines 319 (Topic: Introduction to Digital Media Production) and 319D may not both be counted.

Upper-Division Courses

BDP 120, 220, 320. Connecting Research Experience.

Restricted to students in the Bridging Disciplines Programs. Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program. Research may consist of an individual project or assisting a faculty research project. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. With consent of the Bridging Disciplines research coordinator, may be repeated for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 320F. Connecting Research Experience.

Restricted to students in the Bridging Disciplines Programs. Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program. Research may consist of an individual project and must meet the criteria for the Independent Inquiry flag. The equivalent of three lecture hours a week for one semester. With consent of the Bridging Disciplines research coordinator, may be repeated for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 320S. Connecting Research Experience: Service Learning.

Restricted to students in the Bridging Disciplines Programs. Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program and including an academic service-learning component. Research may consist of an individual project involving service to the community or assisting a faculty research project with a community service component. Individual instruction. With consent of the Bridging Disciplines research coordinator, may be repeated for credit. Prerequisite: Upper-division standing and consent of the Bridging Disciplines research coordinator.

BDP 121, 221, 321. Connecting Internship Experience.

Restricted to students in the Bridging Disciplines Programs. Supervised internship experience related to the interdisciplinary themes of a Bridging Disciplines Program. For 121, three hours of fieldwork a week for one semester; for 221, six hours of fieldwork a week for one semester; for 321, ten hours of fieldwork a week for one semester. With consent of the Bridging Disciplines research coordinator, may be repeated once for credit. Prerequisite: Consent of the Bridging Disciplines research coordinator.

BDP 321S. Connecting Internship Experience: Service Learning.

Restricted to students in the Bridging Disciplines Programs. Supervised internship experience related to the interdisciplinary themes of a Bridging Disciplines Program and including an academic service-learning component. Internships must be unpaid and may include work with nonprofit organizations or other organized community service entities. Ten hours of fieldwork a week for one semester. With consent of the Bridging Disciplines research coordinator, may be repeated once for credit. Prerequisite: Upper-division standing and consent of the Bridging Disciplines research coordinator.

BDP 322. Team-Based Research Experience.

Collaborative or team-based research or creative project, under the supervision of a faculty member. Topics are related to the interdisciplinary themes of the Bridging Disciplines Programs. Individual instruction. With consent of the Bridging Disciplines research coordinator, may be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of the Bridging Disciplines research coordinator. Additional prerequisites may vary with the topic.

BDP 126, 226, 326. Advanced Forum Seminar Series.

Discussion of contemporary issues related to the topics of a Bridging Disciplines Program, with an emphasis on interdisciplinary perspectives and critical discourse. For 126, two lecture hours a week for eight weeks or one lecture hour a week for one semester; for 226, two lecture hours a week for one semester; for 326, three lecture hours a week for one semester; additional hours may be required for some topics. Some topics are offered on the letter-grade basis only. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites may vary with the topic.

BDP 129, 229, 329. Specialized Advanced Forum Seminar Series.

Discussion of contemporary issues related to the topics of a Bridging Disciplines Program, with an emphasis on interdisciplinary perspectives, research, and critical discourse. For 129, two lecture hours a week for eight weeks or one lecture hour a week for one semester; for 229, two lecture hours a week for one semester; for 329, three lecture hours a week for one semester; additional hours may be required for some topics. Some topics are offered on the letter-grade basis only. May be repeated

for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

Developmental Studies: DEV

Lower-Division Courses

DEV 000M. Basic Mathematics and Algebra Skills.

Developmental mathematics instruction. Emphasis on fundamental mathematics, including computation skills, graphing, and solving word problems, and on algebraic graphing, equations, operations, and quadratics. Three lecture hours a week for one semester. Offered on the satisfactory/unsatisfactory basis only. With consent of the Texas Success Initiative office, may be repeated for credit. May not be counted toward any degree.

DEV 000R, 300R. Basic Reading Skills.

Developmental reading instruction, with emphasis on strategies for improving vocabulary, reading comprehension, and reading study skills. Three lecture hours a week for one semester. Offered on the satisfactory/unsatisfactory basis only. With consent of the Texas Success Initiative office, may be repeated for credit. May not be counted toward any degree.

DEV 000W, 300W. Basic Writing Skills.

Developmental writing instruction, with emphasis on the elements of composition, sentence structure, and standard English usage and mechanics. Three lecture hours a week for one semester. Offered on the satisfactory/unsatisfactory basis only. With consent of the Texas Success Initiative office, may be repeated for credit. May not be counted toward any degree.

DEV 301M. Developmental Mathematics I.

The first of a two-course sequence. Combines arithmetic skills, including operations with whole numbers, fractions, and decimals, and ratios, proportions, and percents; with beginning algebra, including variables, straight-line graphs, setting up and solving word problems, and relating simple algebraic concepts to geometry. Three lecture hours a week for one semester. Offered on the satisfactory/unsatisfactory basis only. With consent of the Texas Success Initiative office, may be repeated for credit. May not be counted toward any degree.

DEV 302M. Developmental Mathematics II.

Continuation of Developmental Studies 301M. Includes linear equations, systems of equations, integers, exponents and scientific notation, factoring polynomials, rational expressions and equations, radical expressions, and geometric problems. Three lecture hours a week for one semester. Offered on the satisfactory/unsatisfactory basis only. With consent of the Texas Success Initiative office, may be repeated for credit. May not be counted toward any degree.

DEV 303M. Basic Mathematics and Algebra Skills Review.

Three lecture hours a week for one semester. Offered on the satisfactory/unsatisfactory basis only. With consent of the Texas Success Initiative office, may be repeated for credit. May not be counted toward any degree.

Upper-Division Courses

Undergraduate Studies: UGS

Lower-Division Courses

UGS 302. First-Year Signature Course.

Restricted to first-year students. Seminar class focusing on a contemporary issue. Designed to introduce undergraduates to scholarly analysis from an interdisciplinary perspective. Includes an introduction to University resources, such as research facilities, museums, and attendance at University lectures or performances as assigned. Multiple

sections may be offered in the fall and spring with various topics and instructors. Three lecture hours a week for one semester. Some sections may require additional meeting times; these are identified in the Course Schedule. Only one of the following may be counted: Tutorial Course 302, Undergraduate Studies 302, 303.

UGS 303. First-Year Signature Course.

Restricted to first-year students. Large-group lecture and discussion class focusing on a contemporary issue. Designed to introduce undergraduates to scholarly analysis from an interdisciplinary perspective. Includes an introduction to University resources, such as research facilities, museums, and attendance at University lectures or performances as assigned. Multiple sections may be offered in the fall and spring with various topics and instructors. Three lecture hours a week for one semester. Some sections may require additional meeting times; these are identified in the Course Schedule. Only one of the following may be counted: Tutorial Course 302, Undergraduate Studies 302, 303.

UGS 104. First-Year Interest Group Mentor Seminar.

Restricted to students selected as mentors for the First-Year Interest Group program. Issues and research in various areas of leadership, communication, student development, and the transition from high school to college. One lecture hour a week for one semester. Offered on the pass/fail basis only. Prerequisite: Consent of the program coordinator of the First-Year Interest Group program office.

UGS 309. Analytical Reading and Writing.

Examination of fundamental concepts in analytical reading from different disciplinary perspectives, with an emphasis on sociocultural influences on comprehension and writing styles. Three lecture hours a week for one semester. Prerequisite: Consent of the Texas Success Initiative coordinator.

UGS 110, 210, 310. Undergraduate Research Experience.

Restricted to freshmen and sophomores. Supervised research with a faculty member. Research may consist of an individual project or assisting a faculty research project. Individual instruction. With consent of the undergraduate studies research coordinator, may be repeated for credit. Prerequisite: Consent of the undergraduate studies research coordinator.

UGS 111, 211, 311. Undergraduate Internship Experience.

Supervised internship experience. Internships may be on or off campus, be paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. For 111, three hours of fieldwork a week for one semester; for 211, six hours of fieldwork a week for one semester; for 311, ten hours of fieldwork a week for one semester. With consent of the undergraduate studies research coordinator, may be repeated once for credit. Prerequisite: Consent of the undergraduate studies research coordinator.

UGS 312. Research Methods.

Interdisciplinary introduction to research methods, designed to lead students through the process of designing an undergraduate research project. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of the undergraduate research coordinator.

UGS 017. First-Year Connection Seminar.

Restricted to students in a First-Year Connection seminar program. Basic issues in various interdisciplinary fields of study. One lecture hour a week for one semester. May not be counted toward any University of Texas at Austin degree. May be repeated for credit.

UGS 018. First-Year Interest Group Seminar.

Restricted to students in the First-Year Interest Group Program. Basic issues in various interdisciplinary fields of study. One lecture hour a week for one semester.

UGS 018S. Sophomore Interest Group Seminar.

Restricted to students in the Sophomore Interest Group program. Basic issues in various interdisciplinary fields of study. One lecture hour a week for one semester. May not be counted toward any University of Texas at Austin degree. May be repeated for credit.

UGS 018T. Transfer Interest Group Seminar.

Restricted to students in the Transfer Interest Group Program. Basic issues in various interdisciplinary fields of study. One lecture hour a week for one semester. May not be counted toward any University of Texas at Austin degree. May be repeated for credit.

UGS 119. International Learning Seminar.

Restricted to students registered in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of studying abroad in particular locations. Two lecture hours a week for eight weeks, or as required by the topic. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses**UGS 120, 220, 320. Undergraduate Research Experience.**

Supervised research with a faculty member. Research may consist of an individual project or assisting a faculty research project. Individual instruction. With consent of the undergraduate studies research coordinator, may be repeated for credit. Prerequisite: Upper-division standing and consent of the undergraduate studies research coordinator.

UGS 320F. Undergraduate Research Experience.

Supervised research with a faculty member. Research may consist of an individual project and must meet the criteria for the independent inquiry flag. The equivalent of three lecture hours a week for one semester. With consent of the undergraduate studies research coordinator, may be repeated for credit. Prerequisite: Upper-division standing and consent of the undergraduate studies research coordinator.

UGS 121, 221, 321. Undergraduate Internship Experience.

Supervised internship experience. Internships may be on or off campus, be paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. For 121, three hours of fieldwork a week for one semester; for 221, six hours of fieldwork a week for one semester; for 321, ten hours of fieldwork a week for one semester. With consent of the undergraduate studies research coordinator, may be repeated once for credit. Prerequisite: Upper-division standing and consent of the undergraduate studies research coordinator.

UGS 122. DemTex.

Student-facilitated research and discussion-based course, under the supervision of a faculty adviser. One lecture hour a week for one semester. With the consent of the research coordinator in the School of Undergraduate Studies, may be repeated for credit when the topics vary. May not be counted toward any degree. Offered on the pass/fail basis only. Prerequisite: Consent of the research coordinator in the School of Undergraduate Studies.

School of Architecture

Frederick R. Steiner, PhD, *Dean*

Elizabeth Danze, MArch, *Associate Dean, Graduate Programs*

Michael Oden, PhD, *Associate Dean, Research and Operations*

Juan Miro, MArch, *Associate Dean, Undergraduate Programs*

<http://soa.utexas.edu/>

General Information

Accreditation

The School of Architecture is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning. The Bachelor of Architecture and Master of Architecture are accredited by the National Architectural Accrediting Board and satisfy the registration requirements of the Texas Board of Architectural Examiners. The Bachelor of Science in Interior Design satisfies the interior design registration requirements of the Texas Board of Architectural Examiners; it is accredited by the Council for Interior Design Accreditation and the National Association of Schools of Art and Design. The Master of Science in Community and Regional Planning is accredited by the American Planning Association.

Mission

The School of Architecture seeks to assist those who wish to develop knowledge, sensitivity, and skill in design, planning, and construction, so that as architects, interior designers, and planners they may improve the human environment. The curriculum offers opportunities for a broad education in professional subjects and in the arts and the humanities. Through avenues that stress solving actual and theoretical problems, the school seeks to enhance the knowledge and skill necessary to link understanding to experience, theory to practice, and art to science in ways that respond to human needs, aspirations, and sensibilities. Through its consortium of architects, interior designers, planners, and educators and scholars in these fields, the school provides a service to society and to the architecture, interior design, and planning professions by advancing the state of the art in design and technology.

History

The University began offering professional degrees in architecture in 1910 within the Department of Engineering. The School of Architecture was established in 1948 as a division of the College of Engineering and became an autonomous school of the University in September 1951. Graduate study in architecture began at the University in 1912. More than five thousand undergraduate and graduate degrees in architecture and planning have been conferred.

Education in community and regional planning was first offered as an undergraduate study option in the School of Architecture from 1948 to 1957. The Master of Science in Community and Regional Planning was formally approved in October 1959; the Doctor of Philosophy, in April 1995.

Education in interior design was first offered in 1939 within the degree of Bachelor of Science in Home Economics. In 1992 the College of Natural Sciences created the Bachelor of Science in Interior Design degree program; in the fall of 1998 this program was transferred to the School of Architecture. The first interior design degrees were conferred by the school in May 2001.

Facilities

The School of Architecture is centrally located on campus in four adjacent buildings: the historically significant Battle Hall (1911); Sutton Hall (1918, renovated in 1982), designed by distinguished American architect Cass Gilbert; Goldsmith Hall (1933, expanded and renovated in 1988), designed by noted architect Paul Philippe Cret, one of the primary planners of the forty-acre campus; and the West Mall Office Building (1961).

The Architecture and Planning Library, a branch of the top-tier University of Texas Libraries system, provides reference and instructional services through expert staff to researchers who have access to over 100,000 volumes, including 20,000 rare volumes in Special Collections; 300 periodicals; and a wealth of online resources.

The Alexander Architectural Archive joins the library as a research center of national importance with nearly half a million drawings, 1,800 linear feet of papers, photographs, and other formats acquired, preserved, and made available for scholarship.

The Visual Resources Collection (VRC) curates a growing collection of over 130,000 digital images of the built environment including significant works of architecture, art, interior design, and landscape architecture. The VRC manages a fully equipped black-and-white darkroom for use by students and faculty.

The University Co-op Materials Resource Center offers an inspirational environment of material systems and technologies. The more than 25,000 material samples include traditional as well as smart, innovative, emerging, and sustainable design materials.

Digital Fabrication includes both digital input and output tools such as 3-D scanners, 3-D printers, CNC routers, and laser cutters, enabling students to utilize modern technology in architecture and design.

IO Central and Computer Lab is the technological environment for individual, group, and classroom work. The laboratory has computer work stations formatted with the most up-to-date software as well as large-format color scanners, laser-jet printers, and high-resolution plotters.

The Thermal Lab is the testing facility of the Center for Sustainable Development that simulates a full-scale room with a south-facing façade, allowing for the thermal experiments which include innovative applications in the fields of light-control, ventilation, and the direct and indirect use of solar energy.

The Wood Shop plays an integral role in the creation of design, ranging from models to full-scale applications, by providing equipment and training, primarily in wood, but also in metal, plastic, and glass.

The Center for American Architecture and Design regularly stages symposia; publishes *CENTER*, *Centerline*, and the *O'Neil Ford Monograph* and *Duograph* book series; and supports independent research and scholarship in architecture and design. In addition, the center hosts the bi-weekly *Friday Lunch Forum Series*.

The Center for Sustainable Development supports the study and practice of sustainable development in Texas, the nation, and the world through complementary programs of research, education, and community outreach. Associated faculty and students strive to better understand the connections between the environment, economic prosperity and social justice.

The Lady Bird Johnson Wildflower Center exists to introduce people to the beauty and diversity of wildflowers and other native plants. The mission

of the center is to increase the sustainable use and conservation of native wildflowers, plants, and landscapes.

The Harry Ransom Center, one of the world's foremost institutions for literary and cultural research, houses a large collection of rare architecture books, including the classics of architectural literature.

The Teresa Lozano Long Institute of Latin American Studies and the Benson Latin American Collection provide exceptional opportunities for the study of Latin American architecture.

Financial Assistance Available through the School

Scholarship funds established by individuals, foundations, and the University are available to current undergraduates in the School of Architecture. These include:

Scholarships

ARCHITEXAS Endowed Scholarship
Yvette Atkinson Memorial Scholarship in Architecture
Snøhøtta Endowed Scholarship in Architecture established by Craig Dykers and Elaine Molinar
Matt Casey Memorial Scholarship in Architecture
Dick Clark Student Travel Fund
Marvin E. and Anne Price Beck Endowed Scholarship
Carl O. Bergquist Endowed Scholarship
Myron Geer Blalock Endowed Presidential Scholarship
Hal Box Endowed Scholarship in Architecture
C. William Brubaker/Perkins+Will Endowed Presidential Scholarship
John Buck Company and First Chicago Investment Advisors for Fund F Endowed Scholarship in Architecture
John S. Chase Endowed Presidential Scholarship
Fred W. and Laura Weir Clarke Endowed Presidential Scholarships in Architecture Honoring Carl Bergquist and Alan Y. Taniguchi
Fred Winfield Day, Jr. Endowed Scholarship in Architecture
Jorge Luis Divino Centennial Scholarship in Architecture
Amy Dryden Endowed Scholarship
William H. Emis III Traveling Scholarship in Architecture
Ford, Powell and Carson Endowed Scholarship
Ted Freedman Endowed Scholarship
Suzie Friedkin Endowed Scholarship in Interior Design
Lily Rush Walker and Coulter Hoppess Scholarship in Architecture
the HDR Architecture Endowed Scholarship
the Janet C. and Wolf E. Jessen Endowed Presidential Scholarship
Henrietta Chamberlain King Endowed Scholarship
Lake/Flato Endowed Scholarship
Lynne Brundrett Maddox Scholarship in Interior Design
Mike and Maxine Mebane Endowed Traveling Scholarship in Architecture
Jack H. Morgan Endowed Scholarship; the Charles M. Nettles Endowed Presidential Scholarship
Oglesby Prize Endowment
Overland Partners Endowed Presidential Scholarship
Barbara and Donald Pender Endowed Scholarship
Edward J. Perrault Endowed Presidential Scholarship in Interior Design
Alma Piner Scholarship in Architecture
Brandon Shaw Memorial Endowed Scholarship
Debbie Ann Rock Scholarship in Interior Design
School of Architecture Scholarship and Fellowship Award Endowment

Louis F. Southerland Endowed Scholarship

Lance Tatum Endowed Scholarship

University of Texas at Austin School of Architecture's Advisory Council Women's Endowed Scholarship

Wilmington "Vic" Vickrey Endowed Scholarship

Robert Leon White Memorial Fund—Architecture

Roxanne Williamson Endowed Scholarship

Additionally, there are several scholarships provided by the American Institute of Architects, the American Architectural Foundation, the Texas Society of Architects, the Texas American Planning Association, and the Texas Architectural Foundation. Additional information is available in the Office of the Dean.

Incoming students may wish to contact local chapters of the American Institute of Architects, the American Society of Interior Designers, the International Interior Design Association, and the University's Texas Exes, as well as other civic organizations, for information about locally sponsored scholarships. Students are also encouraged to contact the University's Office of Student Financial Services for information about other merit- and need-based scholarships.

Student Services

Academic Advising

In the School of Architecture, the undergraduate dean's office, located in Goldsmith Hall 2.116, and the academic adviser's office, located in Goldsmith Hall 2.118, are responsible for providing information and advice to undergraduate students. An important aspect of the advising system is the third-year portfolio requirement described in the section Third-year Portfolio Review Requirement (p. 31) later in Admission and Registration. The student should also consult Degree Audit in the Graduation (p. 32) section.

Career Services

The Career Services Center, located in Sutton Hall 2.126, serves the students and alumni of the School of Architecture by offering career development and job search resources, connecting them to employers, mentors, and key professionals.

Student Organizations

The Undergraduate Architecture Student Council (UASC) represents all School of Architecture undergraduate students through the promotion and development of an awareness of the built environment and serves as a nucleus for student activities. The UASC acts as a liaison between students and faculty members as well as administrators.

Alpha Rho Chi (APX) is a professional/social co-ed fraternity for architecture and the allied arts that promotes the artistic, scientific, and practical proficiency of its members and the profession. The Dinocrates Chapter at The University of Texas at Austin unites students from various years and studies through philanthropic and professional activities.

American Institute of Architecture Students (AIAS) is a professional organization whose mission is to promote excellence, appreciation, and advancement of architecture, and to enrich communities in a spirit of collaboration. AIAS strives to provide a sense of community and a forum for sharing different views.

Ampersand is a student organization that combines the student chapters of the International Interior Design Association (IIDA) and the American Society of Interior Designers (ASID), provides students with networking

opportunities, and promotes involvement within the interior design community.

Global Architecture Brigades, University of Texas at Austin Chapter, is a student-led design/build organization that seeks to improve the quality of life in developing nations through the design of sustainable, socially responsible solutions to architectural problems.

The National Organization of Minority Architecture Students (NOMAS) is The University of Texas at Austin Student Chapter of the National Organization of Minority Architects. The organization strives to enhance education and professional networking as well as engage solutions to ensure a healthy living and working environment for the community at large.

Tau Sigma Delta is an honors society for advanced students pursuing architectural study and the allied arts. The national chapter originated in 1913, and the School of Architecture established its own chapter, Mu, in 1931. In 2013, the 100th year anniversary of the original honors society, the School of Architecture reactivated the Mu chapter. This organization recognizes the significant level of academic achievement present in The University of Texas School of Architecture.

Study Abroad and Internship Opportunities

The School of Architecture encourages first-hand experiences of diverse peoples, places and cultures, nationally and internationally, so that we might better engage the world in which we live. Educational travel experiences can be integrated into degree plans in several ways, including, but not limited to, the following:

Study in Italy is a semester at the Santa Chiara Study Center in Tuscany, approximately an hour's drive from Florence. The program allows for an intensive study of design, history, and visual communication, while the center's historic structure provides a congenial campus environment and a base for travel throughout Italy.

The Europe Program is a semester of study that emphasizes a broad and integrated experience covering the buildings and landscapes as well as the urban fabric across Europe. With a unique itinerary every fall, the program gives students special study opportunities with regard to design, history, and visual communication in each city visited.

Studio Mexico is an advanced studio for architecture and landscape architecture students that explores the rich cultural and built environment of Mexico. During a nine-day trip to Mexico, students visit a project site and other significant places, and enjoy rich interaction with Mexican students working on the same project. Students participating in the studio are required to take the Mexican architecture class taught by Professor Juan Miro, either concurrently with the studio or in the previous year.

The professional residency program provides upper-level architecture students with a unique opportunity to expand their education through work experience in the architectural profession. The program has provided work experience to honors students in the school since 1974, and over the past twenty years our students have been linked with 260 firms in twenty-nine countries.

Admission and Registration

Admission

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in *General Information*.

Students who are not admitted to the School of Architecture may not pursue any degree offered by the school. Information about admission is published by the school at <http://soa.utexas.edu/>.

The School of Architecture is one of the smallest academic units at The University of Texas at Austin. Our undergraduate student body exemplifies the diverse constitution of the communities we strive to serve. In support of unique perspectives and experiences, all applications are reviewed with an understanding that excellence may manifest itself in many areas and may be expressed in different forms, such as compelling essays, strong academic preparation, extracurricular activities, excellent test scores, life experiences, as well as other accomplishments.

Freshman Admission

The School of Architecture is unable to accommodate all qualified applicants, and preference is given to candidates considered to have best demonstrated the interest, aptitude, and dedication to pursuing a design education. All applicants are evaluated with emphasis on the following areas: SAT or ACT scores, class rank, essays, academic preparation, extracurricular activities, and other achievements. Texas-resident high school students have priority over nonresidents in admission decisions. All applicants must fulfill the high school unit requirements given in *General Information*.

To be considered for admission to the School of Architecture, applicants should select the appropriate degree program on the ApplyTexas application: architecture, interior design, the architecture/architectural engineering dual degree program, the architecture/Plan II dual degree program, architectural studies, or architectural studies with an emphasis on architectural history. All application materials must be submitted to the Office of Admissions by the deadline to apply for admission to the University for the fall semester; this date is given in *General Information*. Applicants to the dual degree program offered with the Plan II Honors Program must submit an additional application; more information about Plan II (p. 308) is provided within the Liberal Arts section of the *Undergraduate Catalog*.

Transfer

Internal Transfer

Students currently or formerly enrolled in other University degree programs who wish to enroll in a degree program in the School of Architecture must submit an Internal Transfer Application to the undergraduate dean's office in the School of Architecture by March 1 to be considered for admission for the following fall semester. To request a major change, students applying for internal transfer must have completed a minimum of twenty-four semester hours of credit in residence (excluding credit-by-exam) by the end of a spring semester, with a University grade point average of at least 3.25. Emphasis is given to strong performance in University courses, especially courses relevant to the degree program to which the applicant is applying. Meeting these requirements is no guarantee for admission.

External Transfer

Transfer applicants from architecture and interior design programs in other universities will be evaluated with emphasis given to excellence in design (portfolio required), academic preparation, essays, and other achievements. Course credit and placement in studio sequence is determined upon acceptance. External transfer admission is offered to a few qualified applicants each year.

Students applying to transfer from another university to the School of Architecture should select the appropriate degree program on the ApplyTexas application. All application materials must be submitted to the Office of Admissions by the deadline to apply for admission to the

University for the fall semester; this date is given in *General Information*. To be considered for transfer admission to the School of Architecture, the applicant must have completed at least thirty semester hours of transferable college coursework with a grade point average of at least 3.25, and must submit a portfolio which includes architecture or interior design studio work from another university; information about the portfolio is given on the University's transfer admission Web site (<http://bealonghorn.utexas.edu/transfer/admission/majors/architecture>). All admission decisions are made before the end of the spring semester; the Office of Admissions cannot consider spring coursework in progress.

Transfer Credit

External transfer students with credit from another school must submit samples of their design work and, if applicable, visual communication work, transcripts, course descriptions and/or syllabi for courses in their majors. On the basis of the information submitted, the undergraduate dean's office determines the level at which students enter the design sequence and assigns credit toward the degree if appropriate.

Registration

General Information gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The online *Course Schedule*, published before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the registrar's Web site (<http://registrar.utexas.edu>).

Students should carefully verify that they have completed all course prerequisites, should consult the undergraduate dean's office, and should be sure to include in each semester's work the courses that are prerequisites for those to be taken in later semesters.

Minimum Number of Hours in the Long Session

Students must register each semester for at least twelve semester hours of coursework prescribed for the degree. Registration for fewer hours must be approved by the undergraduate dean's office.

Third-Year Portfolio Review Requirement

On the first day of class in the second semester of the third year, students entering Architecture 530T, *Design VI*, are required to submit a portfolio that summarizes the work completed in all the previous design and visual communication courses. Guidelines for submission of the portfolio, including deadline, are available from the undergraduate dean's office.

A successful completion of the Architecture 530T, *Design VI* studio and a satisfactory Third-Year Portfolio Review are required for entry into Architecture 560R, *Advanced Design*. The portfolio provides critical information to the reviewing committee in evaluating the student's progress toward the degree. The reviewing committee, at its discretion, may require the student to complete additional work, including courses prior to or after registering for advanced studios.

Academic Policies and Procedures

Equipment and Supplies

Students are responsible for their own tools and supplies, which include, but are not limited to, laptop computer and software, hand drawing and

modeling equipment, and materials. More information on the Student Computer Policy is available at <http://soa.utexas.edu/>.

Academic Standards

To progress in all degree programs offered by the School of Architecture and to qualify for graduation, a student must earn a grade of at least C in all architecture, interior design, and community and regional planning courses. In a case where a student earns a grade below C, the course may only be repeated once.

In the process of fulfilling the requirements for degrees in the School of Architecture, including the core curriculum, students must earn credit for one flag in cultural diversity in the United States, one flag in ethics and leadership, one flag in global cultures, one flag in independent inquiry, one flag in quantitative reasoning, and three flags in writing beyond Rhetoric and Writing 306 or its equivalent. Courses used to fulfill flag requirements may be used simultaneously to fulfill other degree requirements. Courses with flags are identified in the *Course Schedule*. Students should consult with their academic adviser to determine how to fulfill flag requirements in the process of fulfilling other degree requirements.

Honors

University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information*.

Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information*.

School of Architecture Recognition Awards

Award: Alpha Rho Chi Medal

Donor: Alpha Rho Chi, professional architectural fraternity

Eligibility: Graduating student who has shown an ability for leadership, has performed willing service to the school, and gives promise of professional merit through attitude and personality.

Award: American Institute of Architects' Medal

Donor: American Institute of Architects

Eligibility: Graduating student, in recognition of scholastic achievement, character, and promise of professional ability.

Award: Boone Powell Family Prize in Urban Design

Donor: Boone Powell, Leilah Powell, and the Catherine H. Powell Family Trust

Eligibility: Non-graduating undergraduate or graduate student pursuing a degree in architecture or planning from The University of Texas at Austin; based on merit in urban design.

Award: The Oglesby Traveling Fellowship

Donor: Oglesby Family

Eligibility: Students graduating from The University of Texas at Austin with either a Bachelor of Architecture or Master of Architecture; based on merit in architectural design.

Graduation

All students must fulfill the general requirements (p. 17) for graduation given in The University section. Students in the School of Architecture must also fulfill the following requirements.

1. The University requires that the student complete in residence at least sixty semester hours of the coursework counted toward the degree. In the School of Architecture, thirty of these sixty hours must be in the major or in a field closely related to the major as approved by the dean.
2. A candidate for a degree must be registered at the University either in residence or in absentia the semester or summer session the degree is to be awarded, and must file an application for the degree in the undergraduate dean's office. Students are encouraged to file the application at the beginning of the semester or summer session in which they intend to graduate; they must file it by the deadline given in the official academic calendar.

Degree Audit

The undergraduate dean's office prepares a degree audit for each currently enrolled student each semester. The degree audit lists the courses the student has taken, the degree requirements he or she has fulfilled, and the requirements that remain to be met. The student may also use the University's interactive degree audit system, IDA, at any time. IDA is available at <http://registrar.utexas.edu/students/degrees/ida/>. It is the student's responsibility to know the requirements for the degree as stated in a catalog under which he or she is eligible to graduate and to register so as to fulfill those requirements.

Degrees and Programs

Degrees Offered

Five undergraduate degree programs are offered by the School of Architecture: Bachelor of Architecture; Bachelor of Architecture/Bachelor of Science in Architectural Engineering; Bachelor of Architecture/Bachelor of Arts, Plan II; Bachelor of Science in Architectural Studies; and Bachelor of Science in Interior Design. Specific requirements and suggested arrangement of courses for each degree program are given under individual major degree requirements.

Applicability of Certain Courses

Extension Courses

A student in residence may be allowed to take coursework by extension. Credit that the student in residence earned by extension will not be counted toward the degree unless it is approved in advance by the undergraduate dean's office. No more than 30 percent of the semester hours required for any degree may be taken by extension.

Courses Taken on the Pass/Fail Basis

An undergraduate may count toward the degree up to fifteen hours of coursework in electives completed on the pass/fail basis; credit earned by examination is not counted toward the fifteen hours. If a student chooses to major in a subject in which he or she has taken a course pass/fail, the major department decides whether the course may be counted toward the student's major requirements. Complete rules on registration on the pass/fail basis are given in *General Information*.

Physical Activity Courses

Physical activity (PED) courses are offered by the Department of Kinesiology and Health Education. They may not be counted toward

the number of hours required for a degree in the School of Architecture. However, they are counted among courses for which the student is enrolled, and the grades are included in the grade point average.

ROTC Courses

No more than six semester hours of air force science, military science, or naval science coursework may be counted toward any degree in the School of Architecture. These courses may be used only as lower-division electives (in degree programs that have such electives) and only by students who complete the third and fourth years of the ROTC program.

Admission Deficiencies

Students admitted to the University with deficiencies in high school units must remove them as specified in *General Information*. Course credit used to remove deficiencies may not be counted toward the student's degree.

Bachelor of Science in Interior Design

As a four-year professional degree, the Bachelor of Science in Interior Design (BSID) is a rigorous design-oriented curriculum with a strong theoretical basis to integrate creative problem-solving skills with an understanding of the aesthetic, technological, and behavioral aspects of design.

Curriculum

A total of at least 126 hours of coursework is required for the Bachelor of Science in Interior Design.

All students must complete the University's Core Curriculum (p. 20) as well as the courses listed in the following table. In some cases, a course that is required for the BSID degree may also be counted toward the core curriculum; these courses are identified below.

Bachelor of Architecture Curriculum

As a five-year professional degree program, the Bachelor of Architecture features a rigorous design-oriented curriculum with a solid foundation in technology and the history and theory of architecture. The curriculum prepares students for the challenges and demands of professional practice.

A total of at least 161 hours of coursework is required for the Bachelor of Architecture. All students must complete the University's Core Curriculum (p. 20) as well as the courses listed in the following table. In some cases, a course that is required for the BArch may also be counted toward the core curriculum; these courses are identified below.

Bachelor of Architecture/Bachelor of Science in Architectural Engineering Dual Degree Program

As a six-year dual professional degree program, the Bachelor of Architecture/Bachelor of Science in Architectural Engineering is founded upon the mutual interests of both architecture and architectural engineering.

For admission to the dual degree program, a student must meet the Admission Requirements (p. 30) of the School of Architecture and the requirements given in Admission and Registration (p. 150) for the Cockrell School of Engineering. Students are advised to contact both the School of Architecture and the Cockrell School of Engineering for specific information about the dual degree program.

Students in the dual degree program complete the requirements of the Bachelor of Architecture and the Bachelor of Science in Architectural Engineering degrees. See the descriptions for the the five-year Bachelor of Architecture (p. 33) degree program and the Bachelor of Science in Architectural Engineering (p. 160) for more information.

The following outline of courses is the suggested method for completing the requirements for both degrees simultaneously. Dual degree students must also consult the additional requirements of the Bachelor of Science in Architectural Engineering (p. 160) degree. Dual degree students are responsible for fulfilling the requirements of both degrees.

A student who follows the suggested arrangement of courses completes all requirements for both degrees at the end of the spring semester of the sixth year.

Curriculum

A total of at least 197 hours of coursework is required for this dual degree program.

All students must complete the University's Core Curriculum (p. 20) as well as the courses listed in the following table. In some cases, a course that is required for the dual degree program may also be counted toward the core curriculum; these courses are identified below.

of Liberal Arts. The five-year program, which includes summer sessions, offers the academic and professional advantage of a strong liberal arts background.

Students interested in this program should consult the Plan II Program (p. 308) description given in the College of Liberal Arts.

The following outline of courses is a suggested method for simultaneously completing the requirements for both degree programs. Students should consult their advisers, the lists below, and the Bachelor of Arts, Plan II (p. 308) degree program given in the College of Liberal Arts to ensure that their coursework plans will fulfill all requirements of both degrees.

Curriculum

A total of at least 186 hours of coursework is required for this dual degree program.

All students must complete the University's Core Curriculum (p. 20) as well as the courses listed in the following table. In some cases, a course that is required for the dual degree program may also be counted toward the core curriculum; these courses are identified below.

Bachelor of Science in Architectural Studies

The four-year, pre-professional Bachelor of Science in Architectural Studies (BSArchStds) degree program, with an optional architectural history track, is an excellent platform for future graduate studies in architecture and associated fields. The required coursework is concentrated in the first three years, leaving the fourth year to develop the student's career interests.

Applicants for admission to this program must fulfill the Requirements for Admission (p. 30) to the School of Architecture.

The Bachelor of Science in Architectural Studies alone does not fulfill the educational requirements for registration as an architect. Students interested in pursuing registration must complete a first-professional degree in architecture.

Curriculum

A total of at least 125 hours of coursework is required for the Bachelor of Science in Architectural Studies.

All students must complete the University's Core Curriculum (p. 20) as well as the courses listed in the following table. In some cases, a course that is required for the BSArchStds may also be counted toward the core curriculum; these courses are identified below.

Requirements

Architecture

Design			
ARC 310K	Design I		3
ARC 310L	Design II		3

ARC 320K	Design III		3
ARC 520L	Design IV		5
ARC 520M	Design V		5
Visual communication			
ARC 311K	Visual Communication I		3
ARC 311L	Visual Communication II		3
ARC 221K	Visual Communication III		2
Design theory			
ARC 350R	Topics in Design Theory		3
Site design			
ARC 333	Site Design		3
Environmental controls			
ARC 334K	Environmental Controls I		3
Construction			
ARC 415K	Construction I		4
ARC 415L	Construction II		4
ARC 435K	Construction III		4
History			
ARC 308	Architecture and Society (visual and performing arts)		3
ARC 318K	World Architecture: Origins to 1750		3
ARC 318L	World Architecture: The Industrial Revolution to the Present		3
ARC 368R	Topics in the History of Architecture		3

Core Curriculum Requirements

M 408C	Differential and Integral Calculus (mathematics)		4
PHY 302K	General Physics--Technical Course: Mechanics, Heat, and Sound (physics sequence meets part I science and technology)		3
or PHY 303K	Engineering Physics I		
PHY 102M	Laboratory for Physics 302K		1
or PHY 103M	Laboratory for Physics 303K		
PHY 302L	General Physics--Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics		3
or PHY 303L	Engineering Physics II		
PHY 102N	Laboratory for Physics 302L		1
or PHY 103N	Laboratory for Physics 303L		
	Upper-division humanities elective in literature, foreign language, philosophy, or another field approved by the undergraduate dean's office		3
	Philosophy elective		3
	Electives (foreign language courses that are used to remove an admission deficiency may not be used to fulfill this requirement and may not be counted toward the degree)		20
	Additional coursework to satisfy the core curriculum		27
	Total Hours		125

Electives

Twenty-six semester hours of electives are required for the completion of the Bachelor of Science in Architectural Studies degree program. These electives consist of three hours of upper-division coursework in humanities, three hours in philosophy, and twenty additional open elective hours, generally completed outside the School of Architecture. Students pursuing the architectural history track must take eighteen of their twenty hours of open electives in architectural history. Up to six hours of related coursework taken at the University, and approved by the program director, may be used to fulfill the elective requirement.

Suggested Arrangement of Courses

Courses

The faculty has approval to offer the following courses in the academic years 2012-2013 and 2013-2014; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* at <http://registrar.utexas.edu/schedules/> to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog. For current information, students should consult the schedule posted in the School of Architecture.

A full explanation of course numbers is given in *General Information* (<http://registrar.utexas.edu/catalogs>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University

courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Architectural Interior Design: ARI

Lower-Division Courses

ARI 310K. Design I.

Same as Architecture 310K. Restricted to students in the School of Architecture. An introduction to the forms and methods of design for architects and interior designers, with an emphasis on inhabitation including body, light, and movement. Taught in a studio format by faculty members under the direction of a faculty coordinator. Three lecture hours and six laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Registration for Architectural Interior Design 311K or Architecture 311K.

ARI 310L. Design II.

Same as Architecture 310L. Restricted to students in the School of Architecture. An introduction to the forms and methods of design for architects and interior designers, with an emphasis on environment, including color, material, and texture. Taught in a studio format by faculty members under the direction of a faculty coordinator. Three lecture hours and six laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310K and 311K, or Architecture 310K and 311K; and registration for Architectural Interior Design 311L.

ARI 311K. Visual Communication I.

Same as Architecture 311K. Restricted to students in the School of Architecture. Study and application of drawing and other communication skills for designers, including formal and spatial studies, life drawing, and perspective. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Registration for Architectural Interior Design 310K or Architecture 310K.

ARI 311L. Visual Communication II.

Same as Architecture 311L. Restricted to students in the School of Architecture. Study and application of drawing and other communication skills for designers, including color, light and shadow, and projections. Employs manual and digital techniques. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310K and 311K, or Architecture 310K and 311K; and registration for Architectural Interior Design 310L or Architecture 310L.

ARI 318K. Interiors and Society.

Concepts, principles, and elements of interior design, presented in artistic, philosophical, and professional contexts. Includes a basic historical overview of the development of interior design. Three lecture hours a week for one semester. Prerequisite: For students in the School of Architecture, none; for others, consent of instructor.

ARI 318M. Interior Design History.

Survey of interior design from antiquity through the eighteenth century, including theoretical, social, technical, and environmental forces. Three lecture hours a week for one semester. Prerequisite: Architectural Interior Design 318K with a grade of at least C.

Upper-Division Courses

ARI 320K. Design III--Interiors.

Restricted to students in the School of Architecture. Focus on the physical and psychological needs of the inhabitants of interior space, with an emphasis on conceptual process and diagrammatic techniques. Projects

deal with real building situations and introduce implications of fenestration, structure, and materials. Nine hours of lecture and studio a week for one semester. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310L and 311L, or Architecture 310L and 311L; and registration for Architectural Interior Design 221K or Architecture 221K.

ARI 520L. Design IV--Interiors.

Restricted to students in the School of Architecture. Explores linkages between multiple interior spaces and the study of spatial thresholds. Investigates individual spaces in relation to the body and the surrounding environment, utilizing a clearly defined program. Fifteen hours of lecture and studio a week for one semester. Prerequisite: Architectural Interior Design 320K, Architecture 415K, and Architectural Interior Design 221K or Architecture 221K, with a grade of at least C in each.

ARI 221K. Visual Communication III.

Same as Architecture 221K. Restricted to students in the School of Architecture. Introduction to digital modeling as well as principles of digital fabrication. Includes various modes of output such as drawings, renderings, and physical models. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310L and 311L, or Architecture 310L and 311L; and registration for Architectural Interior Design 320K or Architecture 320K.

ARI 324K. Environmental Controls I.

Same as Architecture 334K. Restricted to students in the School of Architecture. A survey of acoustics, color, light, illumination, and electrical and information systems in architectural interiors. Includes techniques of documentation. Three lecture hours and three laboratory hours a week for one semester. Architectural Interior Design 324K and Architecture 334K may not both be counted. Prerequisite: Architectural Interior Design 520L or Architecture 520L with a grade of at least C.

ARI 130. Interior Design Internship.

Restricted to students in the School of Architecture. Practical application of design procedures in a professional design office. At least 250 hours of work in one semester. Prerequisite: Architectural Interior Design 530T.

ARI 530K. Design V--Interiors.

Restricted to students in the School of Architecture. Examination of the elements of interior space and scale, including specific human factors. Particular emphasis on the design, documentation, production, and placement of objects in interiors. Fifteen hours of lecture and studio a week for one semester. Prerequisite: Architectural Interior Design 520L and 434K with a grade of at least C in each.

ARI 530T. Design VI--Interiors.

Restricted to students in the School of Architecture. Capstone studio with specific design projects from current markets. Application of code issues, regulatory restraints, fire safety, and regulations for accessibility in interiors. Fifteen hours of lecture and studio a week for one semester. Prerequisite: Architectural Interior Design 324K and 530K with a grade of at least C in each.

ARI 434K. Construction II--Interior Materials and Assemblies.

Restricted to students in the School of Architecture. Core concepts in interior materials, assemblies, and systems. Includes material properties, environmental and sustainable issues, attachment, detailing, and product specifications. Projects encourage manipulation and assembly of various material systems. Case studies using material samples, and field trips to sites of fabrication. Six hours of lecture and laboratory a week for one semester. Prerequisite: Architecture 415K with a grade of at least C.

ARI 338. Designing for Human Behavior.

Issues of mood, privacy, perception, proxemics, and preferences applied to the design of interiors. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

ARI 350R. Topics in Interior Design Theory.

Seminar in a variety of topics. Designed to broaden the student's knowledge of interior design and to encourage critical and theoretical thinking in the discipline. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For students in the School of Architecture, upper-division standing; for others, upper-division standing and consent of instructor.

ARI 560R. Advanced Interior Design.

Restricted to students in the School of Architecture. Synthesis of components covered in other interior design courses, such as human aspects, place-making, the interior envelope, transitional spaces, and conceptual processes. Fifteen hours of lecture and studio a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Architectural Interior Design 530T with a grade of at least C and satisfactory completion of a third-year portfolio review.

ARI 362. Interior Design Practice.

Restricted to students in the School of Architecture. Business procedures, professional practice, design project control and management, and professional ethics. Documents procedures for interior design. Three lecture hours a week for one semester. Prerequisite: Upper-division standing or consent of instructor.

ARI 368R. Interior Design History II.

Study of function and aesthetics, and decoration and use, emphasizing interiors from the nineteenth century to the present. Three lecture hours a week for one semester. Prerequisite: Architectural Interior Design 318M with a grade of at least C.

ARI 279, 379. Interior Design Research.

Investigation of problems selected by the student with approval of the supervising instructor. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. Prerequisite: Upper-division standing and consent of instructor and the dean.

Architecture: ARC

Lower-Division Courses

ARC 001F. First-Year Interest Group Seminar.

Restricted to students in the First-Year Interest Group Program. Basic issues in various School of Architecture disciplines. One lecture hour a week for one semester.

ARC 308 (TCCN: ARCH 1311). Architecture and Society.

Introduction to the social contexts, potential, and consequences of architecture and interior design. Three lecture hours and one laboratory hour a week for one semester.

ARC 310K. Design I.

Same as Architectural Interior Design 310K. Restricted to students in the School of Architecture. An introduction to the forms and methods of design for architects and interior designers, with an emphasis on inhabitation including body, light, and movement. Taught in a studio format by faculty members under the direction of a faculty coordinator. Three lecture hours and six laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Registration for Architectural Interior Design 311K or Architecture 311K.

ARC 310L. Design II.

Same as Architectural Interior Design 310L. Restricted to students in the School of Architecture. An introduction to the forms and methods of design for architects and interior designers, with an emphasis on environment, including color, material, and texture. Taught in a studio format by faculty members under the direction of a faculty coordinator. Three lecture hours and six laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310K and 311K, or Architecture 310K and 311K; and registration for Architectural Interior Design 311L.

ARC 311K. Visual Communication I.

Same as Architectural Interior Design 311K. Restricted to students in the School of Architecture. Study and application of drawing and other communication skills for designers, including formal and spatial studies, life drawing, and perspective. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Registration for Architectural Interior Design 310K or Architecture 310K.

ARC 311L. Visual Communication II.

Same as Architectural Interior Design 311L. Restricted to students in the School of Architecture. Study and application of drawing and other communication skills for designers, including color, light and shadow, and projections. Employs manual and digital techniques. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310K and 311K, or Architecture 310K and 311K; and registration for Architectural Interior Design 310L or Architecture 310L.

ARC 415K. Construction I.

Restricted to students in the School of Architecture. Introduction to building construction, materials, and structures. Three lecture hours and three laboratory hours a week for one semester.

ARC 415L. Construction II.

Restricted to students in the School of Architecture. Analysis of building assemblies, envelope design, and structures. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Architecture 415K with a grade of at least C; Mathematics 408C or 408K; and Physics 302K and 102M, or 303K and 103M.

ARC 318K (TCCN: ARCH 1301). World Architecture: Origins to 1750.

Comparative study of the architecture of the ancient world, including Asia, Africa, the Americas, and Europe. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Architecture 308 with a grade of at least C.

ARC 318L (TCCN: ARCH 1302). World Architecture: The Industrial Revolution to the Present.

Three lecture hours a week for one semester. Prerequisite: Architecture 318K with a grade of at least C.

ARC 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Architecture.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the academic advising coordinator in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May not be counted toward a degree in the School of Architecture. May be repeated for credit when the topics vary.

Upper-Division Courses

ARC 320K. Design III.

Restricted to students in the School of Architecture. Intermediate-level studio addressing spatial, tectonic, environmental, social, and theoretical issues in architectural design. Taught in a studio format by faculty members under the direction of a faculty coordinator. Nine hours of lecture and studio a week for one semester. Prerequisite: Architectural Interior Design 310L and 311L, or Architecture 310L and 311L, with a grade of at least C in each.

ARC 520L. Design IV.

Restricted to students in the School of Architecture. Intermediate-level studio addressing urban design and building design. Taught in a studio format by faculty members under the direction of a faculty coordinator. Fifteen studio hours a week for one semester. Prerequisite: Architecture 415K, 320K, and Architectural Interior Design 221K or Architecture 221K, with a grade of at least C in each.

ARC 520M. Design V.

Restricted to students in the School of Architecture. Intermediate-level studio with an emphasis on theory and research. Taught in a studio format by faculty members under the direction of a faculty coordinator. Fifteen studio hours a week for one semester. Prerequisite: Architecture 415L and 520L with a grade of at least C in each.

ARC 221K. Visual Communication III.

Same as Architectural Interior Design 221K. Restricted to students in the School of Architecture. Introduction to digital modeling as well as principles of digital fabrication. Includes various modes of output such as drawings, renderings, and physical models. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C in each: Architectural Interior Design 310L and 311L, or Architecture 310L and 311L; and registration for Architectural Interior Design 320K or Architecture 320K.

ARC 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Architecture.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the academic advising coordinator in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May not be counted toward a degree in the School of Architecture. May be repeated for credit when the topics vary.

ARC 530T. Design VI.

Restricted to students in the School of Architecture. Intermediate-level studio addressing the requirements of sound buildings--their programmatic, spatial, and tectonic resolution and their relationships to the physical and social context of the site. Taught in a studio format by faculty members under the direction of a faculty coordinator. Fifteen studio hours a week for one semester. Prerequisite: Architectural Interior Design 324K, and Architecture 520M and 435K, with a grade of at least C in each.

ARC 333. Site Design.

Restricted to students in the School of Architecture. History, theory, and technique of landscape design, with emphasis on the relationship of a building to its landscape. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

ARC 334K. Environmental Controls I.

Same as Architectural Interior Design 324K. Restricted to students in the School of Architecture. A survey of acoustics, color, light, illumination, and electrical and information systems in architectural interiors. Includes techniques of documentation. Three lecture hours and three laboratory hours a week for one semester. Architectural Interior Design 324K and Architecture 334K may not both be counted. Prerequisite: Architectural Interior Design 520L or Architecture 520L with a grade of at least C.

ARC 334L. Environmental Controls II.

Restricted to students in the School of Architecture. A survey of heating, ventilating, air conditioning, vertical transportation, and wiring and plumbing systems in buildings, including techniques of documentation. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Architectural Interior Design 324K with a grade of at least C.

ARC 435K. Construction III.

Restricted to students in the School of Architecture. Building construction and materials theories; structural component analysis and design. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Architecture 415L with a grade of at least C; Mathematics 408C or 408L; and Physics 302L and 102N, or 303L and 103N.

ARC 435L. Construction IV.

Restricted to students in the School of Architecture. Theories of building behavior and materials; structural system analysis and design. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Architecture 435K with a grade of at least C.

ARC 335M. Construction V.

Restricted to students in the School of Architecture. Advanced analysis of building envelope, assemblies, detailing, and specifications. Three lecture hours a week for one semester. Prerequisite: Architecture 435L with a grade of at least C.

ARC 350R. Topics in Design Theory.

Advanced topics in architecture and associated disciplines to encourage critical and theoretical thinking. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For students in the School of Architecture, upper-division standing; for others, upper-division standing and consent of instructor; additional prerequisites may vary with the topic.

Topic 1: The Modern American City. Same as Geography 337 and Urban Studies 352 (Topic 1: The Modern American City). Issues facing residents of United States cities, such as transportation and housing, poverty and crime, metropolitan finance, environmental and architectural design; historical/comparative urban evolution. Prerequisite: Upper-division standing.

Topic 2: American Dream: Status Quo and Alternatives. Same as Urban Studies 352 (Topic 2: American Dream: Status Quo and Alternatives).

Topic 3: Urban Design Practice. Same as Urban Studies 352 (Topic 3: Urban Design Practice).

Topic 4: Economy/Value/Quality of Life. Same as Urban Studies 352 (Topic 4: Economy/Value/Quality of Life).

ARC 351R. Visual Communication.

Advanced topics in various methods of visual communication. Three lecture hours or six laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Architecture 520L with a grade of at least C, or consent of instructor.

Topic 1: Computer Applications in Design. Six studio hours a week for one semester.

Topic 2: Introduction to Computer Applications. Six studio hours a week for one semester.

Topic 4: Composition, Presentation, and Portfolio. Three lecture hours a week for one semester.

Topic 5: Descriptive Geometry. Three lecture hours a week for one semester.

Topic 6: Drawing Clinic. Three lecture hours a week for one semester.

Topic 7: Introduction to Computer Imaging. Three lecture hours a week for one semester.

Topic 8: Seeing Things: General Drawing. Three lecture hours a week for one semester.

Topic 9: Solid Geometry Drawing. Three lecture hours a week for one semester.

Topic 10: Visual Communication Exercises. Three lecture hours a week for one semester.

Topic 11: Wood Design. Three lecture hours a week for one semester.

ARC 560R. Advanced Design.

Restricted to students in the School of Architecture. Advanced problems in architectural design. Three lecture hours and twelve laboratory hours a week for one semester. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Architecture 530T with a grade of at least C and satisfactory completion of third-year portfolio review.

ARC 560T, 660T. Advanced Design.

For 560T, restricted to students in the School of Architecture; for 660T, restricted to students participating in the School of Architecture's professional residency program. Comprehensive studio to develop the student's ability to combine the elements of a thorough building design. For 560T, fifteen laboratory hours a week for one semester; for 660T, eighteen laboratory hours a week for one semester. Prerequisite: Architecture 560R with a grade of at least C and registration for Architecture 361T.

ARC 361T. Technical Communication.

Restricted to students in the School of Architecture. Studio to produce construction documents for buildings designed in Architecture 560T. Six studio hours a week for one semester. Prerequisite: Architecture 560R with a grade of at least C, and registration for Architecture 560T or 660T.

ARC 362. Professional Practice.

Restricted to students in the School of Architecture. Ethical, legal, and administrative responsibilities of the architect; organizations, processes, and roles in architecture. Three lecture hours a week for one semester. Prerequisite: Architecture 560R with a grade of at least C.

ARC 368R. Topics in the History of Architecture.

Seminars and lecture/seminars on advanced topics in the history of architecture. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For students in the School of Architecture, Architecture 318L with a grade of at least C; for others, consent of instructor.

ARC 279, 379, 479, 579. Architectural Research.

Investigation of problems selected by the student with the approval of the supervising instructor and the associate dean for undergraduate programs. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. A grade of at least C is required for degree credit. Prerequisite: Consent of instructor.

Community and Regional Planning: CRP

Lower-Division Courses

Upper-Division Courses

CRP 369K. Principles of Physical Planning.

Same as Urban Studies 352 (Topic 6). Introductory course in the physical dimension of urban planning. Three lecture hours a week for one semester. Only one of the following may be counted: Community and Regional Planning 369K, Urban Studies 352 (Topic: Principles of Physical Planning), 352 (Topic 6). Prerequisite: For students in the School of Architecture: Architecture 560R with a grade of at least C; for others, consent of instructor.

Red McCombs School of Business

Thomas W. Gilligan, PhD, *Dean*

Jay C. Hartzell, PhD, *Senior Associate Dean, Academic Affairs*

David E. Platt, PhD, *Associate Dean, Undergraduate Program*

Arthur T. Allert, BA, BSEd, *Assistant Dean, Undergraduate Program*

<http://www.mcombs.utexas.edu/bba>

General Information

Mission

The undergraduate program of the Red McCombs School of Business seeks to educate its students through an innovative curriculum, excellent teaching, cutting-edge research, and involvement with industry and society. Through an environment that emphasizes opportunity, diversity, and ethical behavior, the McCombs School seeks to transform the lives of its students as it prepares them to become the business leaders of tomorrow.

History

Courses in business were first offered at the University in 1912; there were a total of nine courses and two faculty members. The Bachelor of Business Administration (BBA) was created as a degree in 1916 with nine students graduating in the inaugural class of 1917. The business program became a charter member in 1916 of the American Association of Collegiate Schools of Business, the accrediting agency for business schools, and is currently fully accredited for both business and accounting.

The School of Business Administration was created in 1922, the outgrowth of the work in business administration first offered in the College of Arts and Sciences in the fall of 1912. In 1945, the school was reorganized as a college; in 2000, the college was renamed in honor of University alumnus and benefactor Red McCombs. The school includes the departments of accounting; business, government, and society; finance; information, risk, and operations management; management; and marketing. Coursework in business may lead to the degree of Bachelor of Business Administration and to several advanced degrees, described in the *Graduate Catalog*.

Facilities

The McCombs School is housed in the George Kozmetsky Center for Business Education. This three-building complex includes modern classrooms and offices, lecture rooms with multimedia equipment, conference and communal study rooms, as well as lounges for informal student and teacher interaction. Computer classrooms, computer laboratories, the Financial Trading and Technology Center, and a behavioral science laboratory are also available. Computer and computer-access facilities are available to students, faculty members, and staff members. The McCombs School of Business has its own computer network that links to the school's laboratories and computing resources. The network is also connected to the University's computing infrastructure.

Students enrolled in a degree program at the McCombs School of Business will be expected to own a portable computing device suitable for use in the classroom and on the University wireless network.

Financial Assistance Available through the School

Students who are enrolled in the McCombs School of Business are eligible for scholarships and awards funded by industry, foundations, and individuals. Some of these awards are available school-wide, while others are restricted to students in one department. Since funds are limited, students selected to receive an award must demonstrate outstanding academic aptitude and a firm commitment to a business education.

Most scholarships for continuing students are reserved for students who have declared a business major. Generally, one hundred to two hundred school scholarships are awarded annually, in amounts of \$500 to \$2,500; some are renewable. Criteria for awarding scholarships vary to meet the wishes of the donors but often include financial need, academic performance, major area of study, and hometown. Descriptions of school scholarships and applications for them are available on the BBA Program Office Web site in February of each year. The deadline for submission is the end of February for scholarships for the following academic year. Recipients are selected by the BBA Program Office of the school and are usually notified during the summer.

Departmental scholarships are generally reserved for juniors and seniors majoring in a program of the department. Because departmental scholarships are normally funded by annual contributions, the number of scholarships and the amounts awarded vary among departments and over time. Criteria for departmental awards are specified by the donors and include the same kinds of characteristics as those established for school-wide awards; deadlines and other elements of the selection process also vary among departments. Interested students should contact the major department for further information.

Student Services

The BBA Program Office provides administrative support and a wide array of student services for the school. Student services are offered to all enrolled BBA students to enhance their academic experience and professional development, and include academic advising, career services, study abroad, and leadership development.

Academic Advising

Upon admission to the McCombs School every undergraduate student is assigned to a professional academic adviser. Academic advisers in the BBA Program Office provide individualized, comprehensive advising and serve as a referral resource to students to ensure timely progress toward degree completion. Faculty advisers are also available in each academic department to help students explore their educational and career goals.

All students are encouraged to meet regularly with their assigned advisers. However, those who have been enrolled in the school for at least one semester are permitted to self-advise and register without consulting an academic adviser. To be eligible to self-advise, the student must have a University grade point average of at least 2.00. Like all undergraduate students, those who self-advise are responsible for knowing the requirements of the degree program they have chosen, for enrolling in courses appropriate to that degree program, for meeting the prerequisites of the courses selected, and for taking courses in the proper sequence to ensure timely progress toward the degree. See Student Responsibility (p. 16) in The University section for more information.

Career Services

BBA Career Services offers job search assistance to enrolled business students. The purpose of the office is to help students determine their career goals, develop a plan for achieving these goals, and select and obtain employment commensurate with their goals, interests, and training.

To help students prepare for their career search, the office presents workshops on résumé writing, interviewing, conducting a job search, evaluating offers, and other career interest areas.

In addition to the career-related workshops, the BBA Career Advising team also teaches the required courses Business Administration 101S, 101H, and 101T to freshmen and transfer students. These courses will present the foundations for executing a successful job search and will focus on career management as a lifelong process. This course assists business students with **planning, implementing and evaluating** their careers. After completing these courses, students can implement job search strategies and interviewing techniques in pursuing internship and full-time employment opportunities.

Most students obtain their internship, which is a required part of the undergraduate business curriculum, at the end of their junior year. However, BBA Career Services encourages freshmen and sophomores to attend its recruiting activities and events, which can help them obtain various internships prior to the required internship. These experiences can help students develop their résumés and job search skills.

BBA Career Services maintains additional career resources and general business publications in their office. About fourteen thousand individual interviews for internships and full-time opportunities are arranged annually with employers in business, industry, government, and not-for-profit organizations. Several hundred firms conduct on-campus interviews at the McCombs School each year.

Another resource for employers, students, and alumni is the online *McCombs Job Board*. The *Job Board* helps recruiters reach business alumni and current students. It complements the on-campus recruiting program by allowing companies to recruit candidates for a wide variety of roles in their organizations throughout the calendar year.

More information about BBA Career Services is provided by the McCombs School at <http://www.mcombs.utexas.edu/BBa/Career-Services>.

As a complement to the assistance available from the school, the Center for Strategic Advising & Career Counseling (<http://www.utexas.edu/ugs/csacc>) serves students across campus who are exploring majors and careers. The center helps students learn more about their interests, skills and values; define short and long term goals; identify suitable major and career options; seek an internship; and plan for their job search or for graduate study.

The University makes no promise to secure employment for each graduate, but rather provides the tools and resources to ensure that students have access to employment opportunities.

Student Organizations

Student organizations play a vital role in the educational experience offered by the University. Students who become involved in organizations gain experience in leadership, teamwork, networking, time management, and other practical areas. This experience, when combined with the theoretical knowledge gained in the classroom, helps students develop a well-rounded set of skills for use academically, professionally, and personally.

The Undergraduate Business Council (UBC) is the governing student body in the school. It is made up of representatives from McCombs Affiliated Student Organizations, an executive board, representatives elected by the student body, and members appointed by the executive board. The UBC represents all undergraduate business students in university affairs, and sponsors programs such as McCombs Kickoff,

Family Weekend, the VIP Distinguished Speaker Series, and the Faculty Honor Roll.

Business student organizations sponsor professional activities such as guest lectures, field trips, and faculty chats; many offer social activities as well. The McCombs Affiliated Student Organizations are:

Student Organizations

American Marketing Association
Asian Business Students Association
ALPFA
Alpha Kappa Psi
Beta Alpha Psi
Black Business Student Association
Business Engineering Association
Business Healthcare Association
Delta Sigma Pi
Freshman Business Association
GLBTQA Business Student Association
Global Business Brigades
Hispanic Business Students Association
Honors Business Association
Investment Banking Industry Group
Jewish Business Students Association
Management Consulting Association
Management Information Systems Association
McCombs Diversity Council
National Association of Black Accountants
Phi Chi Theta
Student Consulting Initiative
Supply Chain Management Student Organization
Texas Analyst Association
Texas Enactus
Texas Energy Forum
Texas Sports Business Council
Texas Startup and Venture Capital Group
University Accounting Association
Undergraduate Business Council, University Finance Association
University Investors Association
University Management Association
University Real Estate Society
Universities Securities Investment Team
Women in Business Association

Study Abroad

BBA International Programs offer McCombs School of Business students the opportunity to study abroad in two main ways: on an exchange program (summer, semester or academic year) at one of our many partner schools around the world; and on short-term, faculty-led summer programs, offering pre-determined McCombs courses which are taught abroad in various international locations. Both types of study abroad opportunities enable students to make progress toward their University degree requirements while gaining valuable intercultural experiences. More information is available at <http://www.mcombs.utexas.edu/bba/ip/>.

Leadership Development Program

The Leadership Program (LP) gives students access to unique leadership development programs and activities. All business majors who are not in

the Business Honors Program and are freshmen, sophomores, or transfer students may apply. The LP requires a four-year commitment from freshmen and a three-year commitment from sophomores and transfer students. The primary goal of the Leadership Program is to enhance student learning and development as it relates to self-knowledge and leadership competence, and to expand the student's leadership portfolio during his or her time at the McCombs School of Business.

Admission to the Leadership Program is limited to a small number of students who are chosen on a competitive basis each year. More information and an online application form are available at <http://www.mcombs.utexas.edu/BBA/OSL/Leadership-Development/Leadership-Program.aspx>.

Admission and Registration

Admission

Admission Policies of the School

Admission and readmission of undergraduate students to the University is the responsibility of the University director of admissions. Information about admission to the University is given in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission>).

Each year there are more qualified applicants to the McCombs School than can adequately be instructed by the faculty or accommodated within existing facilities. To provide students with the best educational experience possible, the school must limit undergraduate admission. Therefore, admission to the school is extremely competitive and admission requirements are more stringent than those of the University. As a result, a student may be admitted to the University but denied admission to the school. The student must be admitted to the school to pursue a degree program described in this catalog.

Admission to the school is granted for the fall semester only; summer session admission may be possible for freshmen. Students admitted for fall are expected to attend Orientation the summer before they enter the school.

Freshman Admission Requirements for Texas Residents

To be considered for admission to the school, Texas-resident high school students must be granted regular admission to the University. However, because enrollment is limited by the availability of instructional resources, admission requirements for business degree programs are more restrictive than those of the University. High school rank, SAT Reasoning Test or American College Testing Program (ACT) scores, extracurricular activities, and essays are among the factors used in making admission decisions. A student who is admitted to the University but denied admission to the school may seek admission to another academic program at the University.

Freshman Admission Requirements for Nonresidents

Because of enrollment restrictions dictated by the availability of faculty and facilities in the school and by the limitations on nonresident enrollment imposed by the Board of Regents, nonresident applicants may find the admission process extremely competitive.

Application Procedures for Freshman Admission

Students may apply for admission through the Office of Admissions Web site, <http://bealonghorn.utexas.edu>. To be considered for admission to the McCombs School of Business, the student should specify business as his or her intended major. All application materials must be submitted to the Office of Admissions by the deadline to apply for admission to the University for the summer session or fall semester; these dates are given in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission>).

Admission with Deficiencies

Students who were admitted to the University with deficiencies in high school units must remove them by the means prescribed in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission/freshman-admission>). Credit used to remove a deficiency may not be counted toward the degree. It may be earned on the pass/fail basis. Students may not declare a major until high school unit deficiencies have been removed.

Foreign Language Proficiency

A student who transfers to the university must provide evidence that he or she has fulfilled the foreign language proficiency requirement for the Bachelor of Business Administration degree. Students may not declare a major until the foreign language proficiency requirement has been met.

Admission-to-Major Requirements for Students Previously Enrolled in the School

A former student who was most recently enrolled in the McCombs School of Business and who is readmitted to the University reenters the major in which he or she was last enrolled. However, a former business student who has earned a Bachelor of Business Administration degree at the University is readmitted with the classification "non-degree seeking student."

A former student who was most recently classified as a prebusiness student will be readmitted to the transitional student classification. The student may then apply for admission to a business major according to the procedures given in the section Internal Transfer.

Transfer

Internal Transfer

Students enrolled in other degree programs at the University who wish to enter a degree program described in this catalog must submit an application for a change of major to the BBA Program Office by May 15 to be considered for admission in the following fall semester. The following minimum requirements for consideration are in addition to the requirements to transfer from one division to another that are given in *General Information* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees/transfer-from-one-division-to-another-within-the-university>).

1. Completion of twenty-four semester hours of coursework in residence on the letter-grade basis by the end of the preceding spring semester
2. Completion of Mathematics 408K and 408L, Mathematics 408N and 408S, or Mathematics 408C and 408D, or the equivalent
3. Completion of Economics 304K and 304L
4. Completion of the foreign language proficiency requirement of two years of a single foreign language in high school or one year of a single foreign language in college

5. A grade point average of at least 3.00 on University in-residence coursework

An applicant's disciplinary record, as maintained by the Office of the Dean of Students, will be reviewed for academic dishonesty or other violations of University policy. Violations will be reported to the Admissions Committee and taken into account as part of the application process. Violations may exclude a student from admission depending on the nature and severity of the offense(s).

Admission is granted on a space-available basis and may not be possible if instructional resources are not compatible with enrollment demands. A student with a grade point average of less than 3.40 is unlikely to be admitted to the school.

External Transfer

A student seeking to transfer to the McCombs School of Business from another university should list business as his or her intended major on the admission application. Because students are not admitted to the school for the spring, application materials must be submitted to the Office of Admissions by the appropriate deadline for the student to be considered for admission in the following fall semester. The following minimum requirements for consideration are in addition to the requirements for transfer admission that are given in *General Information*.

1. Completion of Mathematics 408K and 408L, Mathematics 408N and 408S, Mathematics 408C and 408D, or Mathematics 403K and 403L, or the equivalent
2. Completion of Economics 304K and 304L
3. Completion of the foreign language proficiency requirement of two years of a single foreign language in high school or one year of a single foreign language in college
4. A grade point average of at least 3.00 on transferable college credit

Because of enrollment restrictions dictated by the availability of faculty and facilities in the school and by the limitations on nonresident enrollment imposed by the Board of Regents, an applicant may be denied admission to the McCombs School even though he or she meets University transfer requirements. Such an applicant may seek admission to another academic program at the University. A student with a grade point average of less than 3.50 is unlikely to be admitted to the McCombs School.

Declaring a Major

Each student is admitted to the McCombs School with an unspecified major. The student may declare a specific business major when he or she has completed thirty semester hours of coursework, including Business Administration 101H, 101S, or 101T, Economics 304K and 304L, Mathematics 408C, 408K, or 408N, and Mathematics 408D, 408L, or 408S; has registered with BBA Career Services; and has fulfilled the foreign language proficiency requirement for the Bachelor of Business Administration degree. All students are required to declare a major before completing seventy-five semester hours. Students may declare their majors online at <https://utdirect.utexas.edu/business/bba/>. A student seeking admission to the integrated MPA or the Business Honors Program must complete a separate application; requirements for admission to these programs are given in the Accounting (p. 54) and Business Honors Program (p. 55) sections, respectively.

Registration

General Information gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://www.registrar.utexas.edu/schedules>), published before registration

each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the registrar's Web site, <http://registrar.utexas.edu/>. Registration information specific to BBA students can be found at <http://www.mcombs.utexas.edu/BBA/Registration>.

Academic Policies and Procedures

Honors

University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/university-honors>).

Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/graduation-with-university-honors>). Historical honors information for the McCombs School of Business BBA Program can be found on the college Web site.

School Honors Program

The Business Honors Program is available to outstanding students who have distinguished themselves inside the classroom and out by superior performance during high school or in their first year at the University. The program is described in Business Honors Program (p. 55).

Graduation

Special Requirements of the School

All students must fulfill the minimum General Requirements (p. 17) for graduation given in The University section. Business students must also fulfill the following requirements:

1. All University students must have a grade point average of at least 2.00 to graduate. Business students must also have a grade point average in business courses of at least 2.00. Students in the Business Honors Program must have a University grade point average and a grade point average in business courses of at least 3.25. Students in the integrated BBA/MPA program must have a grade point average of at least 3.00 in all coursework taken as part of the minimum thirty-five-hour graduate program; they must also have a grade point average of at least 3.00 in graduate accounting coursework.
2. The University requires that at least six semester hours of advanced coursework in the major field of study be completed in residence. The McCombs School of Business requires that at least twelve semester hours of upper-division coursework in the major must be completed in residence at the University on the letter-grade basis.
3. A candidate for a degree must be registered in the McCombs School of Business either in residence or in absentia the semester or summer session the degree is to be awarded. Students must apply for the degree no later than the date specified in the official academic calendar. An **exception** is that eligible students in the integrated BBA/

MPA program will **automatically** be granted their BBA accounting degrees at the end of four years unless they opt out. Integrated BBA/MPA students are expected to complete their BBA accounting degrees within four years as a milestone toward their MPA degrees. Integrated BBA/MPA students who are not automatically granted their BBA accounting degrees at the end of four years must apply when they are eligible for the degree no later than the date specified in the official academic calendar.

Degree Audit

All McCombs students are advised to monitor their degree progress through regular use of the online Interactive Degree Audit. IDA provides the student with a report of his or her progress toward completion of requirements for a specific degree program. In addition to using IDA, students are encouraged to meet regularly with their academic adviser in the BBA Program Office. The degree audit is not a substitute for individual advising.

Applying for Graduation

A degree candidate must apply for the degree no later than the date given in the official academic calendar, except for the integrated BBA/MPA program as noted above under Special Requirements of the School. No degree will be conferred unless the diploma application form has been properly filed. Further information, resources, and a link to the graduation application are available at <http://www.mcombs.utexas.edu/BBA/Graduation>. Freshmen are expected to complete their degree within four years, and transfer students are expected to complete their degree in a timely manner.

Degrees and Programs

Degree requirements are listed below under BBA Degree Requirements and under individual major degree requirements (<http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration>). For a complete list of requirements for a degree, the student should combine the degree requirements in these two sections with the University's minimum General Requirements (p. 17) for graduation.

The Minor*

While a minor is not required as part of the BBA degree program, the student may choose to complete a minor in either a second business field or a field outside the school. A student may complete only one minor. The minor consists of at least twelve semester hours in a single field, including at least nine hours of upper-division coursework. Students who minor in management information systems may count Management Information Systems 304 toward the requirement of nine hours of upper-division coursework. Students who minor in any area of finance must take Finance 367 as three of the required twelve hours.

Six of the required hours must be completed in residence. A course used to fulfill the requirements of a minor may not be taken on the pass/fail basis unless the course is offered only on that basis. An internship course may not be counted toward the minor.

The McCombs School allows the student to minor in any field in which the University offers a major. However, prerequisites and other enrollment restrictions may prevent the student from minoring in some fields.

Applicability of Certain Courses

Physical Activity Courses

Physical activity (PED) courses are offered by the Department of Kinesiology and Health Education. They may not be counted toward the Bachelor of Business Administration degree. However, they are counted among courses for which the student is enrolled, and the grades are included in the grade point average.

ROTC Courses

No more than twelve semester hours of air force science, military science, or naval science coursework may be counted toward the Bachelor of Business Administration degree. ROTC courses may be used only as nonbusiness electives and may be counted toward the degree only by students who complete the third and fourth years of the ROTC program and accept a commission in the service.

Courses Taken on the Pass/Fail Basis*

A business student may count toward the degree up to four one-semester courses in elective subjects outside the major taken on the pass/fail basis; only electives, nonbusiness electives, and upper-division nonbusiness electives may be taken on the pass/fail basis. Business courses taken on the pass/fail basis cannot be counted toward the major, unless they are offered only on the pass/fail basis. Credit earned by examination is not counted toward the total number of courses that the student may take pass/fail.

Complete rules on registration on the pass/fail basis are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/evaluation/symbols/#passfail>).

University Extension Self-Paced and Semester-Based Courses*

Students planning to take self-paced or semester-based University Extension courses should consult with the BBA Program Office before doing so to ensure compliance with the following restrictions:

1. Credit that an in-residence University student earns simultaneously through University Extension or similar means from another institution should be discussed in advance with the student's academic adviser to determine business degree applicability.
2. A student may not be enrolled concurrently for courses from University Extension or another institution during his or her last semester without jeopardizing graduation eligibility.
3. With regard to registration on the pass/fail basis, extension courses are subject to the same restrictions as courses taken in residence; these restrictions are given in the section Courses Taken on the Pass/Fail Basis.

Concurrent Enrollment*

To ensure degree applicability, students are urged to consult with their academic adviser before registering concurrently at another institution, either for resident coursework or for a distance education course, and before enrolling in University Extension self-paced or semester-based coursework. A student may not be enrolled concurrently during his or her last semester in any course to be counted toward the degree without jeopardizing graduation eligibility.

Certificate Programs

Certificate programs in the McCombs School are designed to allow undergraduate students to develop an area of expertise in addition to their major program. The required number of hours to earn any certificate may

vary but may not be fewer than eighteen and may not exceed twenty-four. Undergraduates who complete transcript-recognized certificate requirements in conjunction with their degree requirements or within one year after earning the degree, receive recognition on the University transcript. At least half of the required certificate coursework must be completed in residence at the University. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree.

A student may not earn any transcript-recognized certificate in the same field as his or her major, and at least one certificate course must be outside the requirements of the major. However, certificate courses outside the major may be counted toward other degree requirements.

The Business Foundations Program*

The Business Foundations Program (BFP) is designed to provide a foundation in business concepts and practice for students in other majors. Any nonbusiness student with a University grade point average of at least 2.00 may take any BFP course for which he or she meets the prerequisite. Students who intend to complete the BFP certificate program should apply online (<http://www.mcombs.utexas.edu/Business-Foundations/Business%20Foundations%20Certificate>) for admission by March 1 for fall or summer, and by October 1 for spring.

To fulfill the certificate program, students must complete eighteen semester hours of coursework as described below; students must also complete the following corequisite courses: one economics course selected from Economics 304K, 304L, 301, or the equivalent, and a three hour statistics course chosen from the list of approved courses available on the BFP Web site (<http://www.mcombs.utexas.edu/Business-Foundations/Business%20Foundations%20Certificate>). Students are encouraged to complete these classes before taking Finance 320F.

Students who complete the certificate requirements in either the general track or the global track must apply on the BFP Web site (<http://www.mcombs.utexas.edu/Business-Foundations/Business%20Foundations%20Certificate>) for a certificate and a letter verifying completion of the program, by November 1 for fall, April 1 for spring, or by August 1 for summer. At least half the required certificate coursework must be completed in residence at The University of Texas at Austin.

General Track*

The certificate requirements are:

- Accounting 310F; or both Accounting 311 and 312 (may fulfill the quantitative reasoning flag).
- Management Information Systems 302F, or equivalent. See list of equivalents on the BFP Web site (<http://www.mcombs.utexas.edu/Business-Foundations/Business%20Foundations%20Certificate/Coursework>).
- Finance 320F.
- Three of the following five courses:
 - International Business 320F or 350 (International Business 350 may fulfill the independent inquiry flag),
 - Legal Environment of Business 320F or 323 (may fulfill the ethics and leadership flag),
 - Management 320F or 336 (Management 336 may fulfill the ethics and leadership flag),
 - Marketing 320F or 337,
 - Business Administration 320F or Management 337 (entrepreneurship topic).
- No more than nine of the required eighteen hours may be taken on an approved study abroad program. A list of approved

programs is available in the University Study Abroad Office (<https://world.utexas.edu/abroad/programs>).

- The student must satisfy the corequisite courses and the courses used to fulfill requirements 1 through 4 on the letter-grade basis. He or she must maintain a grade point average of at least 2.00 in these courses. Credit by exam is allowed for the economics and statistics corequisite courses.

Global Track*

The certificate requirements are:

- Proficiency in a language other than English is required. An intermediate level of competency is determined by the completion of any one of the following options:
 - Certified proficiency on a placement or credit-by-exam test;
 - Students with previous experience in the language they plan to use to meet the language requirement must take a language placement test. A student may not select for credit a language course below this placement level without departmental permission; or
 - A passing grade in a language course listed below:

Requirements		Hours
ASL 611C	Accelerated Second-Year American Sign Language	6
ASL 311D	American Sign Language III: Intermediate	3
ASL 312L	Second-Year American Sign Language II	3
ARA 611C	Intensive Arabic II	6
BEN 312L	Second-Year Bengali II	3
CHI 612	Accelerated Second-Year Chinese	6
CHI 412L	Second-Year Chinese II	4
CZ 611C	Intensive Czech II	6
CZ 412L	Second-Year Czech II	4
DAN 612	Accelerated Second-Year Danish	6
FR 611C	Intermediate French	6
GER 612	Accelerated Second-Year German: Readings in Modern German	6
GK 312K	Intermediate Greek II	3
GK 312L	Intermediate Greek II: Biblical Greek	3
GK 610C	Intermediate Modern Greek	6
GK 310K	Second-Year Modern Greek II	3
HEB 612C	Intensive Biblical Hebrew II	6
HEB 611C	Intensive Hebrew II	6
HIN 312L	Second-Year Hindi II	3
ITL 611C	Intermediate Italian	6
JPN 611D	Intermediate Japanese	6
KOR 412L	Second-Year Korean II	4
LAT 311	Intermediate Latin I	3
MAL 312L	Second-Year Malayalam II	3
NOR 612	Accelerated Second-Year Norwegian	6
PSH 312L	Second-Year Pashto II	3
PRS 611C	Intensive Persian II	6
PRS 612C	Intensive Persian for Heritage Speakers	6
POL 611C	Intensive Polish II	6
POL 312L	Second-Year Polish II	3
POR 611D	Intermediate Portuguese II	6
RUS 611C	Intensive Russian II	6
RUS 412L	Second-Year Russian II	4

TEL 312L	Second-Year Telugu II	3
TUR 611C	Intensive Turkish II	6
URD 312L	Second-Year Urdu II	3
YID 612	Accelerated Second-Year Yiddish	6
YOR 312L	Second-Year Yoruba II	3
YOR 611C	Intermediate Yoruba	6

Students who wish to meet the requirement with proficiency in a language not listed in the table above should contact the Texas Language Center.

2. Completion of at least three hours of academic credit while on an approved study abroad program. A list of approved programs is available in the University Study Abroad Office (<https://world.utexas.edu/abroad/programs>).
3. Accounting 310F; or both Accounting 311 and Accounting 312 (these courses may fulfill the quantitative reasoning flag).
4. Management Information Systems 302F or the equivalent; a list of available courses is available on the Business Foundations Program (<http://www.mcombs.utexas.edu/Business-Foundations/Business%20Foundations%20Certificate/Coursework>) Web site.
5. International Business 320F or 350 (International Business 350 may fulfill the independent inquiry flag); or Business Administration 320F or Management 337 (entrepreneurship topic). One of the international business or entrepreneurship courses is required to complete the global track.
6. Finance 320F
7. Two of the following courses:
 - a. Legal Environment of Business 320F or 323 (both classes may fulfill the ethics and leadership flag);
 - b. Management 320F or 336 (Management 336 may fulfill the ethics and leadership flag);
 - c. Marketing 320F or 337
 - d. Business Administration 320F or Management 337 (entrepreneurship topic); or International Business 320F or 350; whichever topic, international business or entrepreneurship, that was not used to fulfill the requirement 5 above.
8. No more than nine of the required eighteen hours may be taken while on an approved study abroad program. A list of approved programs is available in the University Study Abroad Office (<https://world.utexas.edu/abroad/programs>).
9. The student must satisfy the corequisite courses and the courses used to fulfill requirements 3 through 7 on the letter-grade basis. He or she must maintain a grade point average of at least 2.00 in these courses. Credit by exam is allowed of the economics and statistics corequisite courses.

Students should apply online to request their BFP certificate the semester they will complete the program; by November 1 for fall, April 1 for spring, or by August 1 for summer. Students have up to one year after

graduation to complete the certificate program for transcript purposes. <http://www.mcombs.utexas.edu/BBA/Business-Foundations>

Business & Public Policy Certificate

The Business & Public Policy (BPP) Certificate provides undergraduate students with the opportunity to have an officially recognized concentration in the study of business and public policy. Because firms' actions are increasingly influenced by the interests and demands of numerous stakeholders, including owners, employees, suppliers, customers, NGOs, communities, and especially government regulators, it is increasingly important that businesses hire employees who can strategically respond to and influence these constituencies. Certificate holders will be well-equipped to understand the political process and its influence on firms and to work for those firms or for consulting firms that are increasingly important in this area. This certificate is also well-suited for undergraduates with an interest in careers in law, in governmental and public service, and/or in nonprofit organizations.

The Business & Public Policy Certificate Program requires eighteen semester hours of coursework as described below. Students who have completed twenty-four hours in residence with upper-division standing may formally apply to the certificate program. Admission to the program is based on students' overall academic record. To gain admission the following semester, students must apply by March 1 for fall and by October 1 for spring.

At least half of the required certificate coursework must be completed in residence at The University of Texas at Austin. Students must contact the BPP certificate office to request the BPP certificate the semester they will complete the program; by November 1 for fall, by April 1 for spring, or by August 1 for summer. Students have up to one year after graduation to complete the certificate program for transcript purposes. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree.

The certificate requirements are:

Required courses:

1. Business, Government, and Society 371, *Corporate Political Strategy*
2. Business, Government, and Society 372, *Strategic Corporate Social Responsibility*
3. Business, Government, and Society 373, *Strategic Corporate Communication*
4. Government 312L, *Issues and Policies in American Government*

Elective courses. Choose **two** of the following:

1. Advertising 353 or Public Relations 353, *Advertising and Public Relations Law and Ethics*
2. American Studies 310, *Introduction to American Studies*
3. American Studies 311S, *Introductory Seminar in American Studies*
4. American Studies 321 (Topic 5: *Asian American Jurisprudence*)
5. Business, Government, and Society 370 (Topic 1: *Energy Technology & Policy*)
6. Communication Studies 342K, *Political Communication*
7. Economics 321, *Public Economics*
8. Economics 341K, *Introduction to Econometrics*
9. Economics 333K, *Development Economics*
10. Economics 334K, *Urban Economics*
11. Economics 339K, *International Trade and Investment*, or International Business 350 or European Studies 348 (Topic 2: *International Trade*); or International Business 320F, *Foundations of International Business*
12. Economics 351K, *Current Issues in Business Economics*

13. Finance 371M, *Money and Capital Markets*
14. Finance 372, *Advanced Topics in Finance*
15. Government 325, *Political Parties*
16. Government 351D, *The Theoretical Foundations of Modern Politics*
17. Government 357M (Topic 7: *Constitutional Structures of Power*)
18. Government 358, *Introduction to Public Policy*
19. Government 360N, *Topics in International Relations*
20. Government 365N, *Topics in Comparative Politics*
21. Government 370L (Topic 21: *Politics of Food in America*)
22. Government 370L (Topic 7: *The United States Congress*)
23. Government 379S *Money in Politics - Honors*
24. History 350L (Topic 49: *History of Imperialism*)
25. Legal Environment of Business 320F, *Foundations of the Legal Environment of Business*, or Legal Environment of Business 323, *Business Law and Ethics* or Legal Environment of Business 323H, *Business Law and Ethics: Honors*
26. Legal Environment of Business 363, *Real Estate Law*
27. Legal Environment of Business 370 (Topic 1: *Antitrust Law*)
28. Legal Environment of Business 370 (Topic 2: *Environmental Law*)
29. Legal Environment of Business 370 (Topic 3: *Employer-Employee Relations*)
30. Legal Environment of Business 370 (Topic 5: *The Law and the Multinational Corporation*)
31. Legal Environment of Business 370 (Topic 14: *Oil and Gas Law*)
32. Philosophy 325L, *Business, Ethics, and Public Policy*
33. Public Relations 305, *Fundamentals of Public Relations*
34. Public Relations 317, *Writing for Public Relations*
35. Public Relations 319, *Principles of Public Relations*
36. Public Relations 352, *Strategies in Public Relations*
37. Public Relations 367, *Integrated Communications Management*
38. Public Relations 378 (Topic 5: *Integrated Communications for Nonprofit Organizations*)

Energy Management Certificate

The certificate in Energy Management (EM) is designed to develop decision makers, leaders, and policy builders who have the technical expertise and business acumen to participate in the interdisciplinary teams that will be required to address our energy future.

The Energy Management Certificate requires eighteen semester hours of coursework as described below. Once students achieve upper-division standing they may formally apply to the certificate program. Admission to the program is based on students' overall academic record. To gain admission the following semester, students must apply by March 1 for fall and by October 1 for spring.

At least half of the required certificate coursework must be completed in residence at The University of Texas at Austin. Students must contact the Energy Management certificate office to request the EM certificate the semester they will complete the program; by November 1 for fall, by April 1 for spring, or August 1 for summer. Students have up to one year after graduation to complete the certificate program for transcript purposes. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree.

The certificate requirements are:

Required courses:

1. Geological Sciences 303, *Introduction to Geology*, Geological Sciences 401, *Physical Geology*, or Geological Sciences 420H, *Honors Introductory Geology*
2. Business, Government, and Society 370 (Topic 10: *Non-Technical Exploration and Production*)
3. Geological Sciences 316P, *Sedimentary Rocks* (for nongeology students) or Geological Sciences 416M, *Sedimentary Rocks*
4. Legal Environment of Business 370 (Topic 13: *Contracts and Real Property*)
5. Legal Environment of Business 370 (Topic 14: *Oil and Gas Law*)
6. Business, Government, and Society 370 (Topic 1: *Energy Technology and Policy*)

Global Management Certificate

Certificate will be offered pending approval of grant funding.

The Certificate in Global Management offers an officially recognized concentration in the study of international management. In today's workplace, managers lead global teams, interface with international suppliers and customers, and collaborate with international partners. It is vital for firms and organizations to have access to employees who understand global political and economic dynamics, who are able to recognize and adapt to the cultural orientations of multiple constituencies, and who can operate effectively in countries around the world.

Admission to the program is based on students' overall academic record. To gain admission the following semester, students must apply by March 1 for fall and by October 1 for spring.

At least half of the required certificate coursework must be completed in residence at The University of Texas at Austin. Students must contact the CIBER (<http://www.mcombs.utexas.edu/Centers/CIBER>) office to request the certificate the semester they will complete the program; by November 1 for fall, by April 1 for spring, or by August 1 for summer. Students have up to one year after graduation to complete the certificate program for transcript purposes. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree.

The certificate requirements are:

Required courses:

1. International Relations and Global Studies 320F, *Foundations of International Relations and Global Studies*
2. Management 336, *Organizational Behavior* or Management 320F, *Foundations of Organizational Behavior and Administration*
3. Management 137C, *Introduction to Management in a Global Environment*
4. Management 237D, *Global Management Capstone*

Elective courses:

1. Three hours of upper division coursework selected from any of the following:
 - a. Asian studies
 - b. European studies
 - c. French civilization
 - d. German, Scandinavian, and Dutch studies
 - e. Latin American studies
 - f. Middle Eastern studies
 - g. Portuguese civilization
 - h. Russian, East European and Eurasian studies

- i. African and African Diaspora studies, selected from these courses only:
 - i African and African Diaspora Studies 372G (Topic 10: *Afro-Latin America*)
 - ii African and African Diaspora Studies 372G (Caribbean Literature and Environment topic)
 - iii African and African Diaspora Studies 372G (Generating African Literature topic)
 - iv African and African Diaspora Studies 372G (Topic 24: *Jesus, Africa, and History*)
 - v African and African Diaspora Studies 372G (Topic 33: *Sex and Power in the African Diaspora*)
 - vi African and African Diaspora Studies 372G (Visual Arts of the Caribbean topic)
 - vii African and African Diaspora Studies 373, *Independent Research*
 - viii African and African Diaspora Studies 374C (Topic 6: *Apartheid: South African History*)
 - ix African and African Diaspora Studies 374C (Topic 4: *History of Southern Africa*)
 - x African and African Diaspora Studies 374E (Topic 4: *Reimagining Cuba, 1868-Present*)
 - xi African and African Diaspora Studies 374E (Topic 2: *The Politics of Race and Violence in Brazil*)
 - xii African and African Diaspora Studies 374F (Topic 13: *Diaspora Visions*)
 - xiii African and African Diaspora Studies 374F (Music of Mexico and Caribbean topic)
 - xiv African and African Diaspora Studies 679H, *Honors Tutorial Course (Part A)*

2. Three hours of economics coursework
3. Three hours upper-division coursework in international business, trade, and investment selected from the following:
 - a. International Business 350, *International Trade* or International Business 320F, *Foundations of International Business*
 - b. European Studies 348 (Topic 2: *International Trade*)
 - c. Economics 339K, *International Trade and Investment*

Other Certificate Requirements:

Six hours of “international experience” credit earned on an approved study abroad program and/or pre-approved international internships. Any of the courses above completed abroad can satisfy requirements for both coursework and the international experience.

Real Estate Certificate*

The Undergraduate Real Estate Certificate program (Texas URE) offers degree-seeking undergraduate students from any major the opportunity to explore the commercial real estate industry, and supplement their primary degree with an officially recognized certificate in real estate.

The Real Estate Certificate program requires eighteen semester hours of coursework as described below; students must also complete the following prerequisite courses: for nonbusiness students, Accounting 310F (may fulfill the quantitative reasoning flag) and Finance 320F; for business students, Finance 357. In addition, nonbusiness students are strongly urged to complete Economics 301, or 304K and 304L. Upon obtaining credit or registration for the designated prerequisite course(s), a student with upper-division standing may formally apply to the certificate program. Admission (<http://www.mcombs.utexas.edu/BBA/Certificate-Programs/Real-Estate-Certificate-Program/Current-Texas-URE-Students>) to the program is based on students’ overall academic

record and their performance in the required prerequisite course(s). The courses necessary to complete the Texas URE may have additional prerequisites, and admission to the program and instructor approval is required as a condition of enrollment in some courses. At least half the required certificate coursework must be completed in residence at The University of Texas at Austin.

The certificate requirements are:

1. Real Estate 358 and 378K.
2. Real Estate 376G or Legal Environment of Business 363.
3. Three of the following:
 - a. Accounting 378 (approved topics in real estate accounting); or 326 for finance majors only,
 - b. Architectural Engineering 323K, 358, 366 (may fulfill the ethics and leadership flag), or 377K (*Building Information Modeling for Project Management* topic),
 - c. Architecture 308 (may fulfill the global cultures flag), 318K (may fulfill the global cultures and writing flags), 318L (may fulfill the global cultures and writing flags), 350R (may be repeated where topics vary. Credit for topics is subject to approval), or 368R (*History and Theory of Landscape Architecture I* and *History and Theory of Landscape Architecture II* topics),
 - d. Community and Regional Planning 369K (may fulfill the writing flag),
 - e. Economics 330T, 334K, or 334L,
 - f. Finance 377 (Topic 3: *Security Analysis*) (for finance majors in the REIT Fund Program or the Financial Analysis Program only),
 - g. Geography 310C, 337, 356T [Topic 1: *The Culture of Cities* (may fulfill the cultural diversity in the United States flag)], or 360G (may fulfill the quantitative reasoning flag),
 - h. Legal Environment of Business 363 (for non-finance majors only),
 - i. Real Estate 376G (for non-finance majors only)
 - j. Urban Studies 301 (for urban studies majors only) (may fulfill the cultural diversity in the United States flag), or 305 (*Experiencing the City* topic).

Students must request transcript certification by emailing the program adviser at the time of application for graduation or upon completion of the program requirements, whichever is later. Students have up to one year after graduation to complete the certificate program for transcript purposes. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree.

Supply Logistics Optimization Certificate*

The Supply Logistics Optimization Certificate (SLO) offers both business and nonbusiness students an opportunity to study supply logistics using the best resources of both the McCombs School of Business and the Cockrell School of Engineering. The certificate is designed to develop supply chain and logistics business managers who have the technical expertise to interface with industrial and manufacturing engineers. For engineering students, the certificate provides supply chain and logistics management expertise, particularly for those involved in product development, process innovation, and manufacturing systems engineering. Science and engineering technology enterprises have a great demand for managers and engineers who understand business as well as the underlying science, technology, and engineering principles on which their operations are based. Employers have indicated their desire to hire students who approach the industry from a more well-rounded, interdisciplinary perspective.

The following four courses for business and nonbusiness students are prerequisites for application to the Supply Logistics Optimization Certificate Program:

1. Mathematics 408C (may fulfill the quantitative reasoning flag) and 408D or the equivalent (for business and nonbusiness students).

2a. Mechanical Engineering 318M and 335, or the equivalent (for nonbusiness students).

2b. Statistics 309 (may fulfill the quantitative reasoning flag) and Management Information Systems 301 or the equivalent (for business students).

Upon completion of these courses, a student with upper-division standing and a University grade point average of at least 3.00 may formally apply to the certificate program. Admission to the program is based on students' overall academic record and their performance in the four prerequisite courses. To gain admission the following semester students must apply by March 1 for fall and by October 1 for spring. At least half of the required certificate coursework must be completed in residence at The University of Texas at Austin.

The certificate requirements are twenty-one semester hours of coursework as described below:

1. Operations Management 335, 337 (Topic 3: *Procurement and Supplier Management*) (may fulfill the writing flag), and 368.
2. Nine semester hours chosen from Mechanical Engineering 366L, 367S, 373K, 375K.
3. Three semester hours chosen from Operations Management 337 (Topic 1: *Total Quality Management*); (Topic 2: *Supply Chain Modeling and Optimization*) (may fulfill the quantitative reasoning flag); (Topic 4: *Supply Chain Design, Planning, and Control*); (Topic 5: *Project Management*), 366P, or 367.

Students must apply online (<http://www.mcombs.utexas.edu/Departments/IROM/Academic-Information/BBA/SCM/SLO>) to request the SLO certificate the semester they will complete the program; by November 1 for fall, April 1 for spring, or by August 1 for summer. Students have up to one year after graduation to complete the certificate program for transcript purposes. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree. A maximum of nine hours of certificate coursework may be taken after the student has earned the undergraduate degree.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20) and the following specific requirements for the BBA, including the requirements of a major. In some cases, a course that is required for the BBA or for a major may also be counted toward the Core Curriculum; these courses are identified below.

Flags*

Each student must complete the University's Core Curriculum (<http://catalog.utexas.edu/undergraduate/undergraduate-studies/academic-policies-and-procedures/#corecurriculum>). In the process of completing Core Curriculum and BBA degree requirements, students must earn credit for seven flags as listed below; most of the required flags are attached to the business core and major courses students must complete to earn a BBA degree. Courses may simultaneously satisfy flag and other degree requirements. As applicable, students are advised to fulfill the cultural diversity and the global cultures flag requirements through courses that meet other requirements of the Core Curriculum such as the first-year

signature course, American history, government, or visual and performing arts requirements, or BBA degree requirements such as the human behavior requirement or electives. *Please note, students may not earn the cultural diversity and global cultures flag from the same course.*

Two writing flags: one flag requirement is typically satisfied by Business Administration 324 or 324H, a second by the capstone class in the major when taken in residence.

One quantitative reasoning flag: flag requirement typically satisfied by Accounting 311 or 311H, Accounting 312 or 312H, Statistics 309 or 309H, or 371G when taken in residence.

One global cultures flag: BBA students should find a course that satisfies one of the University Core requirements, human behavior requirement, or an elective, which carries the global cultures flag.

One cultural diversity in the United States flag: BBA students should find a course that satisfies one of the University Core requirements, human behavior requirement, or an elective, which carries the cultural diversity in the United States flag.

One ethics and leadership flag: typically satisfied by Management 336 or 336H, or Legal Environment of Business 323 or 323H when taken in residence.

One independent inquiry flag: typically satisfied by classes required for the degree; Finance 370, International Business 350, Management 374, 374H, Management Information Systems 375, and Operations Management 337 (Topic 3: *Procurement and Supplier Management*), when taken in residence.

Flags may be added to courses periodically; courses with flags are identified in the *Course Schedule*. More information is available in the section on Skills and Experience Flags (<http://catalog.utexas.edu/undergraduate/undergraduate-studies/academic-policies-and-procedures/#skillsandexperienceflags>).

BBA Degree Requirements*

1. A grade point average of at least 2.00 is required on all work undertaken at the University for which a grade or symbol other than Q, W, X, or CR is recorded. In addition, a grade point average of at least 2.00 in business courses is required.

The official grade in a course is the last one made; however, if a student repeats a course and has two or more grades, all grades and all semester hours are used to calculate the University grade point average and to determine the student's scholastic eligibility to remain in the University and his or her academic standing in the McCombs School of Business.

A student may not repeat for credit or grade points any course in which he or she has earned a grade of C- or higher (or the symbol CR, if the course was taken on the pass/fail basis).

2. A candidate for the BBA degree must be enrolled in the McCombs School in the semester or summer session in which the degree is awarded.
3. Each student is expected to complete the courses required for his or her major and to meet the curriculum requirements described in items 4 through 7 below in the year specified.
4. During their freshman and sophomore years, students must complete the University's Core Curriculum (p. 20) requirements.

5. Students must complete the following BBA degree requirements during the freshman year:

- a. Mathematics 408K (may fulfill the quantitative reasoning flag) and 408L ; or 408C (may fulfill the quantitative reasoning flag) and 408D; or 408N (may fulfill the quantitative reasoning flag), and 408S; or the equivalent. This coursework may also be used to fulfill the mathematics requirement of the Core Curriculum.
- b. Economics 304K and 304L. Economics 304K may also be used to fulfill the social and behavioral sciences requirement of the Core Curriculum.
- c. Management Information Systems 301, a business core course.
- d. Three semester hours of coursework in anthropology, psychology, or sociology, chosen from approved courses; courses dealing primarily with statistics or data processing may not be used to fulfill this requirement.
- e. Business Administration 101H, 101S, or 101T. Entering freshmen take Business Administration 101S, entering transfer students take Business Administration 101T, and entering business honors students take Business Administration 101H. Because each course is offered only once a year, failure to take the course in the proper semester will prevent the student from declaring a major and progressing toward the degree.

6. Students must complete the following business core courses during the sophomore year:

- a. Accounting 311 and 312 (both courses may fulfill the quantitative reasoning flag).
- b. Statistics 309 (may fulfill the quantitative reasoning flag).
- c. Business Administration 324 (may fulfill the writing flag).

7. Eighteen semester hours beyond the first two years are specified as follows:

- a. Business core courses:
 - i. Legal Environment of Business 323 (may fulfill the ethics and leadership flag).
 - ii. Finance 357.
 - iii. Marketing 337.
 - iv. Operations Management 335 or Management 336 (may fulfill the ethics and leadership flag).
 - v. Statistics 371G (may fulfill the quantitative reasoning flag). Finance majors pursuing the quantitative finance track take Statistics 375 to fulfill this requirement.
- b. A professional, business-related internship or practicum course chosen from the following: Accounting 353J, 366P, Business Administration 353, 353H, Finance 353, 366P, Management 353, Management Information Systems 353, 366P, Marketing 353, 366P, Operations Management 353, 366P. Only one internship course may be counted toward the degree.

8. The following requirements apply in addition to those in items 4 through 7 above:

- a. Additional coursework to provide a total of at least sixty semester hours outside the McCombs School. At least six of these hours

must be at the upper-division level. Students should consult the requirements of their major department for additional information about coursework to be taken outside the school.

- b. Completion of the requirements of one of the majors listed in the section Program Degree Requirements. In no event is a degree of Bachelor of Business Administration awarded to a student with fewer than forty-eight semester hours in business, at least twenty-four of which have been completed in residence on the letter-grade basis at the University. At least twelve semester hours of upper-division coursework in the major must be completed in residence at the University on the letter-grade basis. For additional residence requirements, see the University's minimum General Requirements (p. 17) for graduation given in The University section. Please also see footnote below.

Proficiency in a foreign language equivalent to one year competency is required. This requirement may be fulfilled either by completion of the two high school units in a single foreign language that are required for admission to the University as a freshman or by the demonstration of proficiency at the second-semester level. Credit earned at the college level to achieve the proficiency may be taken on the pass/fail basis, and the credit may count towards the degree. Due to the variety in the way language classes are taught at the University, students should consult their academic adviser.

The following are the courses that may be counted towards the residence requirement for each major:

- Accounting (BBA): Accounting 326, 327, 329, 362, and 364.
- Accounting (Integrated BBA/MPA): Accounting 151, 152, 355, 356, 358C, and 359.
- Business honors program: Business Administration 324H, Finance 357H, Legal Environment of Business 323H, Management 336H and 374H, Marketing 337H, Operations Management 335H, and Statistics 371H or 375H.
- Science and technology management: Accounting 329, Finance 374C or 374S, Management 374 or Management Information Systems 375, Operations Management 335 and 337 (Topic 5: *Project Management*).
- Finance: Accounting 326, Finance 357, 367, 370, and the courses required for the student's track.
- International business: International Business 350 and 378, and the courses specified in requirements 4 and 6 of the major (<http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration/international-business>) (six hours international business electives and nine hours area studies).
- Management (general management track): Management 336 and 374, Operations Management 335, and the twelve hours of track courses specified in requirement 3 of the major (p. 59), general management.
- Management (consulting and change management track): Management 328, 336, and 374, Operations Management 335, and the nine hours of track courses specified in requirement 3 of the major. ([http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration/management-consulting & change management](http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration/management-consulting-&-change-management)).
- Management information systems: Management Information Systems 325, 333K, 374, 375, and the six additional hours of upper-division management information systems coursework in requirement 3 of the major (<http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration/management-information-systems>).

- Marketing: International Business 350 and Marketing 337, 460, 370, and the courses specified for nine additional semester hours in requirement 3 of the major (<http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration/marketing>).
- Supply chain management: Management 336, Operations Management 335, 337 (Topic 3: *Procurement and Supplier Management*), 337 (Topic 2: *Supply Chain Modeling and Optimization*), 367, 368, and the courses specified for six additional semester hours in requirement 4 of the major. (<http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/bachelor-of-business-administration/supply-chain-management>)

*Changes pending approval by the University of Texas System

Bachelor of Business Administration

Accounting

Two programs are available to students who wish to study accounting at the University. The first is the four-year major in accounting leading to the Bachelor of Business Administration degree. The second is the five-year integrated approach to the Master in Professional Accounting degree, which leads to the award of both the BBA and the Master in Professional Accounting degrees. The objective of the BBA accounting curriculum is to provide students with a broad overall education, solid grounding in the common body of knowledge of business administration, and exposure to accounting in sufficient depth to help them achieve entry-level competence for pursuit of a career in industry. The integrated approach is designed for students who wish to concentrate in accounting and obtain education in an accounting specialization.

Bachelor of Business Administration

The requirements of this program are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. Fifteen additional semester hours of accounting: Accounting 326, 327 (may fulfill the quantitative reasoning flag), 329, 362, and 364.
3. Economics 420K.
4. Operations Management 335 and Management 336 (may fulfill the ethics and leadership flag) and 374 (may fulfill the writing and independent inquiry flags).
5. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

BBA/MPA: Integrated Approach

The integrated approach to the Master in Professional Accounting is a five-year program of undergraduate and graduate coursework that allows the student to earn the BBA and the Master in Professional Accounting (MPA) degrees. The professional curriculum, which usually begins in the student's junior year, includes specially designed accounting courses taught in relatively small classes by full-time faculty members.

The accounting faculty has designed three concentrations within this program: auditing/financial reporting, managerial accounting/control, and taxation. Each concentration is a sequence of courses that offers strong preparation for a particular career path. In addition, the student may choose a generalist curriculum.

Because MPA graduates are expected to become leaders in the accounting profession, highly motivated students with the personal

qualities and intellectual capacity to establish successful careers in public accounting, industry, not-for-profit organizations, and higher education are encouraged to apply.

Admission

Students are admitted to the integrated approach according to the following requirements. Admission is granted only for the fall semester; June 1 is the application deadline for those who wish to begin the program the following fall. Students interested in this program must have met the following requirements by the June 1 deadline: the foreign language proficiency requirement for the BBA degree; and completion of at least sixty semester hours of coursework, including Accounting 311 and 312; Business Administration 101H, 101S, or 101T; Economics 304K and 304L with a grade of C- or better; Mathematics 408C, 408K, or 408N with a grade of C- or better; and Mathematics 408D, 408L, or 408S with a grade of C- or better. As stated in the BBA Degree Requirements, "A student may not repeat for credit or grade points any course in which he or she has earned a grade of C- or higher."

International students pursuing the BBA/MPA degree: English skills are essential for success in the MPA program. As a result, it is important to demonstrate the ability to speak, read, write, and understand English through the TOEFL or IELTS. Official scores for either the internet-based TOEFL or IELTS must be on the student's record prior to the application deadline, even if s/he was allowed to waive the TOEFL or IELTS for admission to the University. Only applicants from English-speaking countries are allowed to waive this requirement. Please visit the GIAC website (http://www.utexas.edu/ogs/admissions/test_scores.html) for a list of countries which qualify for the waiver. The preferred minimum for the TOEFL is 105 overall, with a minimum of 24 for each individual section or a minimum band score of 7.5 for the IELTS. If previously-submitted test scores do not accurately reflect the applicant's current English proficiency, it is strongly recommended to retake the test to increase scores.

Admission is based on the applicant's University grade point average and SAT Reasoning Test or ACT scores, as well as other relevant examples of academic ability and leadership. An applicant with a University grade point average of less than 3.00 is unlikely to be admitted to this program. Admission may be restricted by the availability of instructional resources. An applicant's disciplinary record, as maintained by the Office of the Dean of Students, will be reviewed for academic dishonesty or other violations of University policy. Violations will be reported to the Admissions Committee and taken into account as part of the application process. Violations may exclude a student from admission depending on the nature and severity of the offense(s). Application materials and information about deadlines are available at <http://www.mcombs.utexas.edu/mpa/integrated-mpa>.

Before beginning the fifth year, integrated approach students must be admitted to the MPA program. Students must complete at least two long-session semesters in residence in the MPA program. Application forms must be submitted by February 1 of the student's fourth year. Students must have completed the following BBA degree requirements before the application deadline: the University Core Curriculum (<https://www.utexas.edu/ugs/core/requirements>), courses needed to declare a major, the human behavior requirement, the lower-division business core, and Business Administration 324. They must also earn an acceptable score on the Graduate Management Admission Test (GMAT) and have their test scores sent to the University's Office of Admissions. Students usually take the GMAT in the fall or winter of their fourth year.

Satisfactory Progress

Students are expected to make continuous progress toward the degree by completing required accounting coursework each semester. Students who fail to take required accounting coursework two long-session semesters

in a row will be removed from the program and placed in the unspecified business major. Students will be notified before this action is taken; they must meet with their academic adviser upon being notified.

Probation

A student is placed on probation if his or her grade point average in core undergraduate accounting courses falls below 3.00. Except with the consent of the MPA Program Office, a student on probation may not take graduate accounting courses.

Dismissal

The student is dismissed from the integrated approach if (1) he or she fails to improve his or her academic performance significantly while on probation, or (2) he or she will not achieve a grade point average of 3.00 even by earning grades of *A* in all remaining core undergraduate accounting courses.

Graduation

Students pursuing the integrated approach to the MPA degree are expected to complete their BBA accounting degrees within four years as a milestone towards their MPA degree. Students who are eligible will **automatically** be granted their BBA accounting degrees at the end of four years unless they opt out. Integrated BBA/MPA students who are not automatically granted their BBA accounting degrees at the end of four years must apply when they are eligible for the degree, by the date specified in the official academic calendar. The additional requirements for graduation pertaining to the BBA degree are given in Graduation (p. 46). To receive an MPA degree, a student must have a grade point average of at least 3.00 in all coursework taken as part of the minimum thirty-five hour MPA degree. He or she must also have a grade point average in graduate accounting coursework of at least 3.00.

Degree Requirements

The requirements for the BBA/MPA program are:

1. Undergraduate coursework
 - a. The Core Curriculum (<https://www.utexas.edu/ugs/core/requirements>) requirements and the BBA Degree Requirements (<http://catalog.utexas.edu/undergraduate/business/degrees-and-programs/#bbadegreerequirements>). Because the integrated approach includes a graduate-level internship course, students may forgo the undergraduate internship course described in requirement 7.2 of the BBA Degree Requirements.
 - b. Economics 420K.
 - c. Operations Management 335 and Management 336 (may fulfill the ethics and leadership flag) and 374 (may fulfill the writing and independent inquiry flags).
 - d. The following courses: Accounting 151, 152, 355, 356, 358C, and 359.
 - e. For students in the auditing/financial reporting, managerial accounting/control, or generalist concentration, Finance 367 and a business elective; for students in the taxation concentration, Finance 367 and three semester hours of coursework in legal environment of business or business, government, and society approved by the student's academic adviser.
 - f. Additional elective work, if necessary, to provide a total of at least 120 semester hours of undergraduate coursework.
2. Graduate coursework
 - a. Accounting 380K (Topic 1: *Financial Accounting Standards and Analysis I*) and 380K (Topic 13: *Information Technology for Accounting and Control*).

- b. Twenty-nine additional semester hours of graduate coursework, including at least twelve hours in accounting and no more than six hours outside business. The student's academic adviser must approve coursework in the student's concentration in advance.

More information is available at <http://www.mcombs.utexas.edu/mpa/integrated-mpa>.

Business Honors Program

The Business Honors Program is designed to provide an intellectual challenge for students who have distinguished themselves academically and in leadership roles outside the classroom. The student may choose a general program of study or choose to combine the general program of study with an additional major. Business Honors Program students take fourteen business courses in special sections open only to them. Additional information is available from the Business Honors Program Office.

Admission

Admission to the Business Honors Program is limited to a small number of exceptional students who are chosen on a competitive basis. Admission decisions are made by the Business Honors Program Committee. Most students enter the program as freshmen, but some are admitted as sophomores.

Students entering the University and the McCombs School of Business as freshmen may apply to the Business Honors Program by completing a separate online application available through the UT Office of Admissions. The Business Honors Program Committee considers the student's SAT Reasoning Test or ACT scores, high school class rank, preparatory courses, extracurricular activities, evidence of leadership ability, and other objective criteria.

Students may also seek admission to the Business Honors Program during the spring semester of their freshman year to begin taking courses as a sophomore. To be considered for admission, the student must have completed in the fall and spring semesters of the freshman year at least twenty-four semester hours of college-level coursework; this coursework must include Economics 304K and 304L, Mathematics 408C (may fulfill the quantitative reasoning flag) or 408K (may fulfill the quantitative reasoning flag), and Mathematics 408D or 408L. In addition to the criteria listed above for freshman applicants, the Business Honors Program Committee considers the student's grade point average in courses taken in residence at the University and the number, type, and rigor of the courses the student has taken at the University. Students will also be evaluated based upon evidence of their extracurricular activities and leadership abilities. An applicant's disciplinary record, as maintained by the Office of the Dean of Students, will be reviewed for academic dishonesty or other violations of University policy. Violations will be reported to the Admissions Committee and taken into account as part of the application process. Violations may exclude a student from admission depending on the nature and severity of the offense(s).

Students applying to the Business Honors Program are permitted to have received credit for Business Administration 101S and/or Management Information Systems 301; however, no credit will be accepted for other courses normally taken as part of the honors core.

Application materials and information about deadlines are available at <http://www.mcombs.utexas.edu/programs/bhp/>.

Continuance

A student who enters the Business Honors Program as a freshman must have a grade point average of at least 3.50 on the courses taken in residence during the fall and spring semesters of the first year to continue in the program. The student must complete at least twelve semester hours in residence on the letter-grade basis during each of those two semesters. After the freshman year, each student, whether admitted as a freshman or as a sophomore, is dismissed from the program if his or her overall or business grade point average drops below 3.25. Exceptions are granted only by the Business Honors Program Committee.

Graduation

To graduate under the Business Honors Program, the student must earn a University grade point average of at least 3.25 and a grade point average of at least 3.25 in business courses.

Degree Requirements

Business Honors Program students may choose a general program of study, or choose to combine the general program of study with an additional major. Requirements for the general program of study are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. Completion of the following business core courses and other business courses in special Honors Program sections:

Accounting 311H (may fulfill the quantitative reasoning flag)
Accounting 312H (may fulfill the quantitative reasoning flag)

- Business Administration 101H
Business Administration 324H (may fulfill the writing flag)
Business Administration 151H
Finance 357H
Legal Environment of Business 323H (may fulfill the ethics and leadership flag)
Management 336H (may fulfill the ethics and leadership flag)
Management 374H (may fulfill the writing and independent inquiry flags)
Management Information Systems 301H
Marketing 337H
Operations Management 335H
Statistics 309H (may fulfill the quantitative reasoning flag)
Statistics 371H (may fulfill the quantitative reasoning flag) or 375H
3. Nine semester hours of upper-division business electives.
 4. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

- 1 This course must be taken within the year and semester it is listed under.
- 2 This course is only offered in the fall semester.

Science and Technology Management

Science and engineering technology enterprises have a great demand for managers who are not only skilled at business, but who also understand the principles underlying the science, technology, and engineering ventures they must manage. To fill this need, the program of study for the BBA in science and technology management provides a sound foundation in mathematics, in science, and in business, qualifying the student for more advanced study in the management of technological, engineering, and scientific enterprises.

Students work closely with the faculty adviser in the Department of Information, Risk, and Operations Management.

All students must take the courses listed below, with a minimum of forty-eight semester hours in the McCombs School of Business. Prerequisites for all courses are given in this catalog. Other requirements of the Cockrell School of Engineering must also be fulfilled.

The requirements of this program are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52), with the following specifications:
 - a. Students in this program must complete Mathematics 408C (may fulfill the quantitative reasoning flag) and 408D; or 408K (may fulfill the quantitative reasoning flag), 408L, and 408M.
 - b. Operations Management 335 or 335H is required
 - c. Students are expected to take one of the following to satisfy the professional internship requirement: Management Information Systems 353 or 366P; Operations Management 353 or 366P. If a student transfers from a different major with credit for another internship or practicum as listed in the BBA Degree Requirements, that class can be counted for this requirement.
2. The following business courses: Accounting 329, Operations Management 337 (Topic 5: *Project Management*), and either Management 374 (may fulfill the writing and independent inquiry flags) or Management Information Systems 375 (may fulfill the writing flag)
3. One of the following courses: Finance 374C or Finance 374S
4. Three additional hours of business coursework
5. The following nonbusiness courses: Chemistry 301 (may fulfill the quantitative reasoning flag), and Physics 303K, 303L (both may fulfill the quantitative reasoning flag), 103M, and 103N. The physics sequence also meets part I of the core curriculum science and technology requirement. Chemistry 301 also fulfills part II of the core curriculum science and technology requirement.
6. Mathematics 427K (may fulfill the quantitative reasoning flag)
7. The following engineering courses:
 - a. Engineering Mechanics 306 or Mechanical Engineering 320
 - b. Electrical Engineering 302 and 306
 - c. One of the following courses: Aerospace Engineering 374K, Mechanical Engineering 375K, or Engineering Studies 377
8. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

Finance

Finance is the study of resource allocation—the process, markets, institutions, and instruments that provide for the transfer of money and wealth. The finance degree program offers students an opportunity to study the finance function in the business firm, the financial services firm, and the financial system.

The finance major presents students with the theoretical framework and analytical tools and techniques to handle a variety of finance and business functions. Students may choose one of seven tracks: corporate finance and investment banking, energy finance, investment management, financial markets/banking, quantitative finance, or real estate; students who do not wish to specialize may choose the general finance track.

Corporate finance and investment banking courses are designed to prepare students for careers as associates of corporate treasury departments, as corporate financial analysts, and as management consultants. Energy finance courses are designed to prepare students for positions in project financing, valuation, and risk management in the energy sector. Investment management courses are designed to give students a background suitable for starting positions as financial analysts with investment funds, investment banks, and other financial institutions.

Financial markets/banking courses are designed to prepare students for a variety of financial institution–related careers, such as lending officer and financial analyst. Quantitative finance courses are designed to prepare students for financial analyst positions in research departments of financial institutions and for graduate study in finance. Real estate courses are designed to give students a broad background in valuing and managing real estate; the track is intended to prepare students for positions in real estate commercial brokerage and appraisal, mortgage banking, loan underwriting, real estate development and investment, and property management.

Finance majors may specialize further by completing the Financial Analyst Program (FAP). This one year program allows competitively selected business students to work closely with finance faculty members and industry professionals to develop their skills and experience as analysts. The program may be combined with any of the finance options. More information about FAP is available in the Department of Finance office and at <http://www.mcombs.utexas.edu/Centers/AIM/Financial-Analyst-Program.aspx>.

The requirements of this program are:

1. The Core Curriculum (p. 20) and the BBA Degree Requirements (p. 52).
2. Accounting 326, Finance 367 or 367Q (students pursuing the quantitative finance option must choose 367Q), and 370 (may fulfill writing and independent inquiry flags).
3. Only one independent study may be counted toward the finance major with the exception of the general finance track and the real estate track, which do not allow independent study, as noted below.
4. One of the following:
 - a. *Corporate Finance and Investment Banking*
 - i Finance 374C.
 - ii One of the following courses: Accounting 327 (may fulfill the quantitative reasoning flag), 329, 362, or 364.
 - iii Two of the following courses: Finance 366P, 371M, 372, 373, 376, 377 (Topic 1: *Portfolio Analysis and Management*), either 377 (Topic 2: *Financial Risk Management*) or 377 (Topic 5: *Energy Financial Risk Management*), and either 377 (Topic 3: *Security Analysis*) or 377 (Topic 4: *Financial Analysis*).
 - b. *Energy Finance*
 - i Finance 374C and Finance 377 (Topic 5: *Energy Financial Risk Management*).
 - ii Two of the following courses: Finance 366P, 371M, 372, 373, 375F, 376, 377 (Topic 1: *Portfolio Analysis and Management*), and either 377 (Topic 3: *Security Analysis*) or 377 (Topic 4: *Financial Analysis*).
 - c. *Investment Management*
 - i Finance 377 (Topic 1: *Portfolio Analysis and Management*).
 - ii Three of the following courses: Finance 366P, 371M, 372, 373, 374C or 374S, 375F, 376, either 377 (Topic 2: *Financial Risk Management*) or 377 (Topic 5: *Energy Financial Risk Management*), either 377 (Topic 3: *Security Analysis*) or 377 (Topic 4: *Financial Analysis*), and Real Estate 378K.
 - d. *Financial Markets/Banking*
 - i Finance 354 or 371M.
 - ii Three of the following courses: Finance 366P, 372, 373, 374C or 374S, 375F, 376, 377 (Topic 1: *Portfolio Analysis and Management*), either 377 (Topic 2: *Financial Risk Management*) or 377 (Topic 5: *Energy Financial Risk Management*), either 377 (Topic 3: *Security Analysis*) or 377 (Topic 4: *Financial Analysis*), and Real Estate 378K.
 - e. *General Finance*

- i Twelve semester hours of upper-division coursework in finance; up to three hours may be taken in real estate. The following courses may not be used to fulfill this requirement: Finance 353, 357, 367, and 370. Finance 354 and 371M may not both be used. Finance 374C and 374S may not both be used. Finance 377 (Topic 2: *Financial Risk Management*) and 377 (Topic 5: *Energy Financial Risk Management*) may not both be used. Finance 377 (Topic 3: *Security Analysis*) and 377 (Topic 4: *Financial Analysis*) may not both be used; Topic 3 is open only to students in the Financial Analyst Program.
- ii An independent research course may not be counted toward the general finance option.
- f. *Quantitative Finance*
 - i Statistics 375 or 375H. Completing this requirement will also fulfill the requirement for the statistics course listed in item 7.1.5 of the BBA degree requirements (p. 52).
 - ii Finance 367Q. Completing this requirement will also fulfill the requirement listed in item 2 of the finance program requirements given above.
 - iii Finance 374C.
 - iv Finance 377 (Topic 2: *Financial Risk Management*) or 377 (Topic 5: *Energy Financial Risk Management*).
 - v One of the following courses: Finance 371M, 372, 373, 376, 377 (Topic 1: *Portfolio Analysis and Management*), and either 377 (Topic 3: *Security Analysis*) or 377 (Topic 4: *Financial Analysis*).
 - vi One of the following courses: Statistics 372 (Topic 5: *Financial and Econometric Time Series Modeling*), 372 (Topic 6: *Optimization Methods in Finance*), 372 (Topic 7: *Computational Finance*), Management Information Systems 373 (Topic 17: *Data Mining for Business Intelligence*), Finance 366P.
- g. *Real Estate*
 - i Finance 354 or 371M.
 - ii One of the following courses: Finance 377 (Topic 3: *Security Analysis*) or 377 (Topic 4: *Financial Analysis*), 374S or 374C.
 - iii Six semester hours of coursework in real estate.
 - iv An independent research course may not be counted toward the real estate option.

5. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

International Business

Recognizing the role of the United States in world affairs and the importance of international operations to American business enterprise, this major offers a combination of basic business knowledge with an interdisciplinary study of international policies and practices. The curriculum is designed to develop competency to function effectively in a specific region of the world and to prepare students for positions in global business operations, government, or international agencies in the fields of economic development and/or international trade.

The requirements of this program are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. Twelve semester hours of coursework beyond the freshman level in a foreign language associated with the area studies specialization used to fulfill requirement 6 below. A minimum of six of the twelve required hours must be at the upper-division level.
3. International Business 350 (may fulfill the independent inquiry flag) and 378 (certain sections may fulfill the writing, independent inquiry, and global cultures flags).
4. Six semester hours chosen from the following courses: Finance 376, International Business 340S, 372, and Marketing 372 (Topic 4: *Global Marketing*). Other courses on the global dimensions of key business areas (e.g. "International Accounting and Taxation" or "Intercultural Management") may also be used for this requirement when available, as approved by the international business faculty adviser.
5. Three semester hours of business electives.
6. Nine semester hours of upper-division coursework focused on a specific geographic region. These courses must be approved by the international business faculty adviser. Examples of acceptable fields of study are Latin American studies; Middle Eastern studies; Asian studies; and Russian, East European, and Eurasian studies or other areas related to the student's geographic region.
7. All international business majors must study or intern abroad for at least one semester or summer session of no less than six weeks. Students should study or intern in a country or region associated with their foreign language and area studies specialization. Ideally, the study abroad experience should be in an immersion program that includes courses taken with local students.

The international business faculty adviser must approve all study abroad programs and area studies courses in advance. Any McCombs School program is acceptable if it takes place in a country in which English is not the dominant language (the faculty-led

Summer Study Abroad programs will not fulfill this requirement). In addition, most affiliated study abroad programs available through the University's Study Abroad Office are acceptable, depending on the course of study.

Students must complete the equivalent of at least six semester hours during their study abroad period. Credit earned abroad may be used to fulfill other degree requirements if appropriate. An international internship in the appropriate geographic region which meets the basic internship requirements for all business majors may be used in place of the study abroad requirement with satisfactory documentation and faculty adviser approval.

8. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

International business majors should note that each student must submit information using the IB Planner (<https://utdirect.utexas.edu/business/ib/planner.WBX>) for approval of language courses, area studies courses, and study abroad experience.

Management

The Department of Management offers courses in such areas as consulting, change management, human capital management, and entrepreneurship. Students may either choose from the available courses to customize a major in general management, or follow the focused curriculum in consulting and change management.

The major objective of the general management track is to train broadly competent administrators for service in a wide variety of organizations—public or private, product- or service-oriented, profit or not-for-profit. To accomplish this basic objective, the program offers the student the opportunity to acquire knowledge about the management of human and physical resources and to acquire skills useful in the management of any organization.

The consulting and change management track is designed to prepare students to become leaders in consulting firms, firms that require consulting advice, and firms implementing important changes. At times, every organization must renew its ability to compete; many firms use external advisers to assist in the renewal process. The consulting process often involves extensive analysis of the firm's competitive position, capabilities, organizational processes, and culture. Once a new direction is developed, the implementation of change must be managed. Such changes include introduction of new competitive thrusts, revision of organizational structures, incorporation of new technologies, and expansion into new geographic markets.

The requirements of the general management track are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. The following courses: Management 336 (may fulfill the ethics and leadership flag), 374 (may fulfill the writing and independent inquiry flags), and Operations Management 335.
3. Twelve semester hours chosen from the following courses: Management 325, 337 (any topic), and 340S.
4. Six semester hours of upper-division coursework in social science (anthropology, economics, government, history, linguistics, geography, psychology, sociology).
5. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

The requirements of the consulting and change management track are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. The following courses: Management 328, 336 (may fulfill the ethics and leadership flag), 374 (may fulfill the writing and independent inquiry flags), and Operations Management 335.
3. Nine semester hours chosen from the following courses: Accounting 329, Management 325, 337 (any topic), 340S, Operations Management 337 (Topic 1: *Total Quality Management*). The following topics of Management 337 are recommended: *Groups and Teams*, Topic 9: *Leadership Issues*, Topic 22: *Women in Management*, Topic 21: *Art and Science of Negotiation*, Topic 20: *Entrepreneurial Management*, and *Strategic Change and Innovation*.
4. Six semester hours of upper-division coursework in social science (anthropology, economics, government, history, linguistics, geography, psychology, sociology).
5. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

Management Information Systems

There is a great demand for individuals with knowledge about both business and computer applications. Through a series of business core courses and business computer courses, the program in management information systems is intended to prepare a professional who can fully appreciate the complexity of information system design. The graduate is expected to have both the technical and the managerial knowledge to solve fundamental business problems in inventory control, production, forecasting, finance, cost accounting, and other areas. Courses are designed to provide a foundation in the integration of hardware, software, networking, and business functional analysis for business systems.

The requirements of this program are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. The following courses: Management Information Systems 304, 325, 333K, 374, and 375 (may fulfill the writing and independent inquiry flags).
3. Six additional semester hours of upper-division coursework in management information systems.
4. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

Marketing

Marketers help the firm discover and utilize new technological and market opportunities. Their motivation is to create strong brands and loyal customers in the ever-shifting competitive landscape. This is possible through the efforts of marketers to identify the customers with needs the firm is best positioned to meet. Marketers ensure the firm is offering customers well-designed products and services at just the right price, and makes the products available through the right distribution channels, while promoting product offerings through innovative, informative, and persuasive communications. Career opportunities in marketing exist in every industry, no matter the type and size of business.

The requirements of this program are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. International Business 350 (may fulfill the independent inquiry flag), Marketing 460 (may fulfill the quantitative reasoning flag), and 370 (may fulfill the writing flag).
3. Nine semester hours chosen from Marketing 338, 340S, 363, 366P (may be used as an elective or to satisfy the internship requirement, but not both), 370K, and 372 (any topic).
4. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

Marketing majors should carefully consider the prerequisites for Marketing 370, for course planning: Ninety semester hours of college coursework, including Marketing 460; credit or registration for an approved internship or practicum course; and six additional semester hours of elective coursework in marketing.

Supply Chain Management

The supply chain management major is designed to prepare students to become leaders in supply chain management, a total systems approach taken by companies, suppliers, and partners to deliver manufactured products and services to the end customer. Information technology is used to integrate all elements of the supply chain from sourcing parts to coordination of retailers; this integration gives the enterprise a competitive advantage that is not available in traditional logistics systems. Entry-level positions in supply chain management include buyer, materials manager, risk management analyst, logistics planner, and staff consultant. Students work closely with the faculty adviser in the Department of Information, Risk, and Operations Management.

The requirements of this program are:

1. The Core Curriculum (p. 20) requirements and the BBA Degree Requirements (p. 52).
2. Management 336 or 336H (both may fulfill the ethics and leadership flag).
3. The following courses:
 - a. Operations Management 335 or 335H
 - b. Operations Management 337 (Topic 2: *Supply Chain Modeling and Optimization*) (may carry the quantitative reasoning flag)

- c. Operations Management 337 (Topic 3: *Procurement and Supplier Management*) (may carry the writing and independent inquiry flags)
 - d. Operations Management 367
 - e. Operations Management 368
4. Six semester hours chosen from:
 Operations Management 337 (Topic 1: *Total Quality Management*)
 Operations Management 337 (Topic 4: *Information Technology for Supply Chains*)
 Operations Management 337 (Topic 5: *Project Management*)
 Operations Management 340S
 Management 337 (Topic 21: *The Art and Science of Negotiation*)
5. Additional elective coursework, if necessary, to provide a total of at least 120 semester hours.

Courses

The faculty has approval to offer the following courses in the academic years 2014–2015 and 2015–2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information*. In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Business Administration

Business Administration: B A

Lower-Division Courses

B A 001F. First-Year Interest Group Seminar.

Restricted to students in the First-Year Interest Group Program. Basic issues in various McCombs School of Business disciplines. One lecture hour a week for one semester.

B A 101H. Professional Development and Career Planning: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Professional development issues including self-assessment, identification of personal life goals, identification of business majors and exploration of potential career fields for each major, and analysis and discussion of the academic planning process and how it relates to professional development and career planning. One lecture hour a week for one semester. Only one of the following may be counted: Business Administration 101H, 101S, 101T. Offered on the letter-grade basis only.

B A 101S. Professional Development and Career Planning.

Restricted to freshmen students in the McCombs School of Business. Discussion of issues surrounding career planning, implementation, and evaluation in order to establish career goals. Strategies for executing a successful job search, including interviewing techniques, resumes, networking, and job search ethics. Focus on career management as a lifelong process. One lecture hour a week for one semester. Only one of the following may be counted: Business Administration 101H, 101S, 101T. Offered on the letter-grade basis only.

B A 101T. Professional Development and Career Planning.

Restricted to transfer students in the McCombs School of Business. Discussion of issues surrounding career planning, implementation, and evaluation. One lecture hour a week for one semester. Only one of the following may be counted: Business Administration 101, 101H, 101S, 101T, 102. Offered on the letter-grade basis only.

B A 119, 219, 319, 419, 519, 619. International Learning Seminar.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Business Administration 119, 219, 319, 419, 519, 619 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

B A 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Business Administration.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the Bachelor of Business Administration's study abroad director in the McCombs School of Business. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

B A 320F. Foundations of Entrepreneurship.

Restricted to non-business majors. Introduction to the mechanics and strategies for starting a business. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

B A 321L. Contemporary Leadership Issues.

Focuses on leadership topics such as ethics, diversity, and sustainability. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

B A 324. Business Communication: Oral and Written.

Restricted to students in the McCombs School of Business. Theory and practice of effective communication, using models from business situations. Students practice what they learn with a variety of in-class activities, written assignments, and oral presentations. Teamwork and use of interpersonal skills are included. Three lecture hours a week for one semester. Business Administration 324 and 324H may not both be counted. Prerequisite: English 603A, Rhetoric and Writing 306, 306Q, 309K, or Tutorial Course 603A, and credit or registration for Business Administration 101H, 101S, or 101T.

B A 324H. Business Communication: Oral and Written: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Theory and practice of effective communication, using models from business situations. Students practice what they learn with a variety of in-class activities, written assignments, and oral presentations. Teamwork and use of interpersonal skills are included. Three lecture hours a week for one semester. Business Administration 324 and 324H may not both be counted. Prerequisite: English 603A, Rhetoric and Writing 306, 306Q, 309K, or Tutorial Course 603A; and Business Administration 101H or 101S, or credit or registration for Business Administration 101T.

B A 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Business Administration.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the Bachelor of Business Administration's study abroad director in the McCombs School of Business. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

B A 149, 249, 349, 449, 549, 649. International Learning Seminar.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. Business Administration 149, 249, 349, 449, 549, 649 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

B A 151H. Honors Lyceum in Business Administration.

Restricted to students admitted to the McCombs School of Business Honors Program. Presentations by professionals from various fields of business. One lecture hour a week for one semester. May be repeated for credit. Prerequisite: Business Administration 101H or 101S, or credit or registration for Business Administration 101T.

B A 352F. Internship in Business Administration.

Restricted to non-business majors. Focuses on students' career goals through academic discussion and evaluations, while students are working in professional internships with public and private enterprises. Internship to be arranged by the student and approved by the director of the Business Foundations Program. The equivalent of eight lecture hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Completion of at least forty-five semester hours of coursework, Accounting 310F with a grade of at least C, and consent of the director of the Business Foundations Program.

B A 353. Internship in Business Administration.

Restricted to students in the McCombs School of Business. Focuses on career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. The equivalent of three lecture hours a week for one semester; hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not be counted toward the student's major requirement. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

B A 353H. Internship in Business Administration-Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Focuses on career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Three lecture hours a week for one semester. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not be counted toward the student's major requirement. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

B A 366F. Business Administration Practicum.

Restricted to non-business majors. Students apply skills related to the Business Foundations certificate program curriculum and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. The equivalent of three lecture hours a week for one semester. Prerequisite: Upper-division standing and completion of at least forty-five semester hours of coursework.

B A 179F, 379F. Independent Research in Business Administration.

Restricted to non-business majors. Conference course. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Accounting 310F with a grade of at least C, consent of instructor, and written approval before the first meeting of the course on forms provided for that purpose from the director of the Business Foundations Program.

Department of Accounting

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Accounting: ACC

Lower-Division Courses

ACC 310F. Foundations of Accounting.

Restricted to non-McCombs School of Business majors. An introduction to financial and managerial accounting, with emphasis on the content, interpretation, and uses of accounting reports. Discussion of the determination and reporting of net income and financial position, and the theories underlying business financial statements; consideration of managerial accounting topics designed to extend the student's knowledge to the planning and controlling of the operations of the firm. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree.

ACC 311 (TCCN: ACCT 2301). Fundamentals of Financial Accounting.

Restricted to students in the McCombs School of Business. Concepts and their application in transaction analysis and financial statement preparation; analysis of financial statements. Three lecture hours a week for one semester. Accounting 311 and 311H may not both be counted. Prerequisite: Twenty-four semester hours of college credit.

ACC 311H. Fundamentals of Financial Accounting: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. An exploration of concepts and their application in transaction analysis and financial statement preparation; and analysis of financial statements. Three lecture hours a week for one semester. Accounting 311 and 311H may not both be counted. Prerequisite: Twenty-four semester hours of college credit, Management Information Systems 301 or its equivalent, and credit or registration for Business Administration 324 or 324H.

ACC 312 (TCCN: ACCT 2302). Fundamentals of Managerial Accounting.

Restricted to students in the McCombs School of Business. Introduction to cost behavior, budgeting, responsibility accounting, cost control, and product costing. Three lecture hours a week for one semester. Accounting 312 and 312H may not both be counted. Prerequisite: Accounting 311 or 311H.

ACC 312H. Fundamentals of Managerial Accounting: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Introduction to cost behavior, budgeting, responsibility accounting, cost control, and product costing. Three lecture hours a week for one semester. Accounting 312 and 312H may not both be counted. Prerequisite: Accounting 311 or 311H, and credit or registration for Business Administration 151H.

Upper-Division Courses

ACC 326. Financial Accounting--Intermediate.

Restricted to students in a business major. Theoretical foundation, concepts, and principles underlying financial statements; current assets; current liabilities; property, plant, and equipment; short-term investments; present value analysis. Three lecture hours a week for one semester. Accounting 326 and 380K (Topic 1: Financial Accounting Standards and Analysis I) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Accounting 311 or 311H, and 312 or 312H, with a grade of at least C- in each.

ACC 327. Financial Statement Analysis.

Restricted to students in a business major. Study of financial statements and their related footnotes; tools and procedures common to financial statement analysis; the relationships among business transactions, environmental forces (political, economic, and social), and reported

financial information; and how financial statement information can help solve certain business problems. Three lecture hours a week for one semester. Accounting 327 and 380K (Topic 7: Financial Statement Analysis) may not both be counted. Prerequisite: Accounting 326 with a grade of at least C-.

ACC 329. Managerial Accounting and Control.

Restricted to students in a business major. The origination, processing, reporting, and use in business operations of accounting information for management purposes. Three lecture hours a week for one semester. Only one of the following may be counted: Business Administration 382T, Accounting 329, 359, 387 (Topic 1), 287 (Topic 5). Prerequisite: Accounting 311 or 311H, and 312 or 312H, with a grade of at least C- in each.

ACC 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Accounting.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Accounting. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

ACC 151. Accounting Careers Exploration.

Restricted to students admitted to the integrated approach to the Master in Professional Accounting. Presentations by professional accountants and managers. One and one-half lecture hours a week for one semester. Offered on the letter-grade basis only.

ACC 152. MPA Distinguished Speaker Lyceum.

Restricted to students admitted to the integrated approach to the Master in Professional Accounting. Discussion of current issues confronting the accounting profession. The equivalent of two lecture hours a week for one semester. Offered on the pass/fail basis only.

ACC 353J. Internship in Accounting.

Restricted to students in a business major. Focuses on students' career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Internship and discussion hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not be counted toward the student's major requirement. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

ACC 355. Introduction to Taxation.

Restricted to students admitted to the integrated approach to the Master in Professional Accounting. The role of taxes in contemporary society and their impact on individuals and business. Three lecture hours a week for one semester. Only one of the following may be counted: Accounting 355, 364, 380K (Topic 11: Introduction to Taxation). Offered on the letter-grade basis only.

ACC 356. Financial Accounting Concepts and Research.

Restricted to students admitted to the integrated approach to the Master in Professional Accounting. Conceptual framework of financial accounting; research methods in financial reporting; and financial reporting institutions and regulations. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

ACC 358C. Auditing and Other Assurance Services.

Restricted to students admitted to the integrated approach to the Master in Professional Accounting. Information quality assurance, auditing, and control, considered from the perspective of a business manager who must decide the type and amount of assurance to acquire. Three lecture hours a week for one semester. Only one of the following may be counted: Accounting 358C, 362, 380K (Topic 4). Offered on the letter-grade basis only. Prerequisite: Accounting 356 or the equivalent.

ACC 359. Managerial/Cost Accounting.

Restricted to students admitted to the integrated approach to the Master in Professional Accounting. Analysis of manufacturing costs, development of cost estimates, and preparation of relevant information for management decision making. Three lecture hours a week for one semester. Only one of the following may be counted: Accounting 329, 359, 287 (Topic 5), 287 (Topic 1), 387 (Topic 1), 387 (Topic 5), Business Administration 382T. Offered on the letter-grade basis only.

ACC 362. Auditing and Control.

Restricted to students in a McCombs School of Business major. Professional practice standards and procedures of auditing: ethics, legal liability, sampling methods, control systems, control design, and control evaluation. Three lecture hours a week for one semester. Only one of the following may be counted: Accounting 358C, 362, 380K (Topic 4: Introduction to Auditing). Prerequisite: Accounting 311 or 311H, and 312 or 312H, with a grade of at least C- in each.

ACC 364. Fundamentals of Taxation.

Restricted to students in a business major. Introduction to the role of taxes in contemporary society and their impact on individuals and business entities; emphasis on federal income taxation. Three lecture hours a week for one semester. Only one of the following may be counted: Accounting 355, 364, 380K (Topic 11: Introduction to Taxation). Prerequisite: Accounting 311 or 311H, and 312 or 312H, with a grade of at least C- in each.

ACC 366P. Accounting Practicum.

Restricted to business majors. Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. The equivalent of three lecture hours a week for one semester. Accounting 366P and 384 (Topic: Tax Practicum) may not both be counted. Prerequisite: Forty-five semester hours of college coursework.

ACC 378. Contemporary Accounting Topics.

Restricted to students in a business major. In-depth study of selected accounting topics. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Accounting 311 or 311H, and 312 or 312H, with a grade of at least C- in each. Some topics have additional prerequisites; these are given in the Course Schedule.

ACC 179C, 379C. Independent Research in Accounting.

Restricted to students in a McCombs School of Business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business Government and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; Accounting 311 or 311H, and 312 or 312H, with a grade of at least C- in each; consent of instructor; and written approval on

forms provided for that purpose before the first meeting of the course from the department chair's office.

Department of Finance

Finance: FIN

Lower-Division Courses

Upper-Division Courses

FIN 320F. Foundations of Finance.

Restricted to non-McCombs School of Business majors. Principles of effective financial management, including planning, organization, and control; financial intermediaries; securities markets; evaluating alternative assets, debt, and capital structures. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree. Prerequisite: Upper-division standing; Accounting 310F, or 311 or 311H and 312 or 312H, or 6 hours of accounting coursework.

FIN 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Finance.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

FIN 353. Internship in Finance.

Restricted to students in a business major. Focuses on students' career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Internship and discussion hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not be counted toward the student's major requirement. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

FIN 354. Money, Banking, and Economic Conditions.

Restricted to students in a business major. The monetary system, financial markets, national income components, and their relationship to business activity. Three lecture hours a week for one semester. Only one of the following may be counted: Economics 322, Finance 354, 354H. Prerequisite: Accounting 311 or 311H; Economics 304K and 304L; and credit or registration for Business Administration 324 or 324H.

FIN 357. Business Finance.

Restricted to students in a McCombs School of Business major. Principles of finance, with application to all aspects of the business firm; particular attention to cost of capital, investment decisions, management of assets, and procurement of funds. Three lecture hours a week for one semester. Finance 357 and 357H may not both be counted. Prerequisite: Statistics 309 or 309H, credit or registration for Accounting 312 or 312H, and Business Administration 324 or 324H.

FIN 357H. Business Finance: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. An investigation of the principles of finance, with application to all aspects of the business firm; particular attention to cost of capital, investment decisions, management of assets, and procurement

of funds. Three lecture hours a week for one semester. Finance 357 and 357H may not both be counted. Prerequisite: Economics 304K and 304L, and credit or registration for Accounting 312 or 312H, Business Administration 324 or 324H, and Statistics 371H or 375H.

FIN 165P, 365P. Energy Finance Practicum.

Restricted to students accepted to the Helios Challenge. Students apply skills in the energy industry and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. May not be used to satisfy the professional, business related internship or practicum course degree requirement for the Bachelor of Business Administration. Prerequisite: Consent of instructor.

FIN 366P. Finance Practicum.

Restricted to students accepted to the Financial Analyst Program. Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. The equivalent of three lecture hours a week for one semester. Prerequisite: Forty-five semester hours of college coursework and consent of instructor.

FIN 367. Investment Management.

Restricted to students in a business major. Investment theory, alternatives, and decision making under differing uncertainties and constraints; formulation of objectives and strategies; development of conceptual managerial perspectives and philosophies for investment environments. Three lecture hours a week for one semester. Finance 367 and 367Q may not both be counted. Prerequisite: Finance 357 or 357H; and credit or registration for Statistics 371G, 371H, 375, or 375H.

FIN 367Q. Investment Management: Quantitative.

Restricted to students in a business major. Quantitative approach to investments; decision making under differing uncertainties and constraints; portfolio theory and applications; formulation of investment strategies; introduction to option pricing; Monte Carlo simulation; and development of conceptual managerial perspectives and philosophies for investment environments. Three lecture hours a week for one semester. Finance 367 and 367Q may not both be counted. Prerequisite: Finance 357 or 357H, and credit or registration for Statistics 375 or 375H.

FIN 370. Integrative Finance.

Restricted to students in a McCombs School of Business major. Integrates financial decision making in functional areas of finance; utilizes various concepts to promulgate strategies, policies, and procedures in managing funds to achieve objectives. Three lecture hours a week for one semester. Prerequisite: Ninety semester hours of college coursework; Finance 367 or 367Q; credit or registration for one of the following: Accounting 353J, 366P, Business Administration 353, 353H, Finance 353, 366P, Management 353, Management Information Systems 353, 366P, Marketing 353, 366P, Operations Management 353, or 366P; and three additional semester hours of coursework in finance or real estate.

FIN 371M. Money and Capital Markets.

Restricted to students in a business major. Development of modern financial markets, with emphasis on the factors that determine interest rates; institutional characteristics and pricing mechanisms of various interest-sensitive securities. Three lecture hours a week for one semester. Prerequisite: Finance 357 or 357H.

FIN 372. Advanced Topics in Finance.

Restricted to students in a McCombs School of Business major. Advanced topics in finance with emphasis on theoretical and quantitative analysis. Three lecture hours a week for one semester, or as required by

the topic. May be repeated for credit when the topics vary. Prerequisite: Credit or registration for Finance 367 or 367Q.

FIN 373. Research Topics in Finance.

Restricted to students in a business major. The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Finance 357 or 357H, and consent of instructor.

Topic 1: Advanced Studies in International Finance. Students work in small research groups to write academic papers on topics in international finance and business. Designed to develop critical thinking skills, writing skills, sophisticated use of technology, and experience working across different cultures.

FIN 374C. Financial Planning and Policy for Large Corporations.

Restricted to students in a business major. An in-depth study of theory and practice of corporate financial management in establishing major financial and investment policies; techniques for analysis, evaluation, and control. Three lecture hours a week for one semester. Prerequisite: Finance 357 or 357H.

FIN 374S. Entrepreneurial Finance.

Restricted to students in a business major. Development, implementation, and control of financial plans, strategies, and policies by owner-managers of small and medium-sized firms; analysis of alternatives and decision making. Three lecture hours a week for one semester. Prerequisite: Finance 357 or 357H.

FIN 375F. Banking and Financial Intermediation.

Restricted to students in a business major. Theory of financial intermediation, regulatory environment, interest rates, and asset/liability management with a focus on commercial banking; depository and contractual intermediation. Three lecture hours a week for one semester. Prerequisite: Finance 357 or 357H.

FIN 376. International Finance.

Restricted to students in a business major. The international financial environment, with emphasis on the factors affecting exchange rates and how exchange rate changes affect the firm. Three lecture hours a week for one semester. Prerequisite: Finance 357 or 357H.

FIN 377. Advanced Investment Analysis.

Second course in investments, with emphasis on quantitative applications and the underlying theory in the analysis and management of securities and portfolios. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Portfolio Analysis and Management. Restricted to students in a business major. Additional prerequisite: Finance 367 or 367Q.

Topic 2: Financial Risk Management. Restricted to students in a McCombs School of Business major. Finance 377 (Topic 2) and 377 (Topic 5: Energy Financial Risk Management) may not both be counted. Prerequisite: Credit or registration for Finance 367 or 367Q.

Topic 3: Security Analysis. Restricted to students accepted to the Financial Analyst Program. Finance 377 (Topic 3) and 377 (Topic 4: Financial Analysis) may not both be counted. Prerequisite: Credit or registration for Finance 367 or 367Q, and consent of instructor.

Topic 4: Financial Analysis. Restricted to students in a business major. Application of fundamental analysis and valuation techniques. Finance 377 (Topic 3) and 377 (Topic 4) may not both be counted. Additional prerequisite: Credit or registration for Finance 367 or 367Q.

Topic 5: Energy Financial Risk Management. Restricted to students in a business major. Finance 377 (Topic 2) and 377 (Topic 5) may not both be counted. Additional prerequisite: Finance 367 or 367Q.

FIN 377L. Portfolio Analysis and Management.

Restricted to students in a McCombs School of Business major. An exploration of quantitative applications and the underlying theory in the analysis and management of securities and portfolios; designed for students with career goals in investment. Three lecture hours a week for one semester. Prerequisite: Finance 367 or 367Q.

FIN 179C, 379C. Independent Research in Finance.

Restricted to students in a business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business Government & Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; Finance 357 or 357H with a grade of at least C-; and consent of instructor. A student registering for this course must obtain written approval from the department chair's office, on forms provided for that purpose, before the first meeting of the course.

Real Estate: R E

Lower-Division Courses

Upper-Division Courses

R E 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Real Estate.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

R E 358. Introduction to Real Estate and Urban Land Development.

Same as Urban Studies 351 (Topic 5). Restricted to students in a McCombs School of Business major. An examination of the principles of real estate and urban land economics. Topics include investment, valuation, financing, and public policy in real estate and mortgage markets. Three lecture hours a week for one semester. Only one of the following may be counted: Real Estate 358, Urban Studies 351 (Topic: Introduction to Real Estate and Urban Land Development), 351 (Topic 5). Prerequisite: Credit or registration for Finance 357 or 357H.

R E 360. Special Topics in Real Estate.

Restricted to students in a business major. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Real Estate 358.

R E 376G. Real Estate Investment.

Study of the setting and measurement of property values in real estate markets and an analysis of real estate assets as investments. Three lecture hours a week for one semester. Prerequisite: Real Estate 358.

R E 378K. Real Estate Finance and Syndication.

An examination of debt and equity financing of residential and commercial properties; mortgage markets and instruments; lender and investor decisions in real estate financing. Three lecture hours a week for one semester. Prerequisite: Finance 367 or Real Estate 358.

Department of Business, Government and Society

Business, Government, and Society: BGS

Lower-Division Courses

Upper-Division Courses

BGS 325. Social and Ethical Responsibility of Business.

Restricted to students in a business major. Examines ethical aspects of the decision-making processes of managers and employees. Also explores responsibility of firms to society and other constituencies. Three lecture hours a week for one semester.

BGS 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Business, Government, and Society.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office, or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

BGS 370. Topics in Business, Government, and Society.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Topic 1: Energy Technology and Policy. Designed to give students an understanding of the broad context of energy production and consumption in the U.S. and the world. Discusses past energy trends and fundamentals of energy and power, including fossil fuels and renewable energy sources and technologies. Explores different energy resources, environmental impacts, and societal uses of energy, and concludes with an evaluation of future energy technology options. Additional prerequisite: Upper-division standing.

Topic 10: Nontechnical Exploration and Production. Restricted enrollment; contact the Energy Management and Innovation Center for permission to register. Introduction to the oil and gas exploration and production business for nontechnical personnel. Subjects include prospect generation and leasing, drilling, production, processing, transportation, and closing out a project. Business Government and Society 370 (Topic: Oil and Gas Exploration for Nontechnical Personnel) and 370 (Topic 10) may not both be counted. Additional prerequisite: Sophomore standing.

BGS 371. Corporate Political Strategy.

A study of how the political and regulatory environment enables and constrains business activity and how individual firms and groups of firms can ethically yet effectively lobby legislatures, negotiate with regulators, create industry associations, make campaign contributions, and engage in other political activity to gain competitive advantage. Three lectures hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

BGS 372. Strategic Corporate Social Responsibility.

A study of how corporations can engage in corporate social responsibility and sustainable activities to improve the world with strategic considerations kept in mind. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

BGS 373. Strategic Corporate Communication.

Studies corporate efforts to inform, motivate, and persuade various constituencies, including investors, employees, communities, and regulators. Subjects include public relations, investor relations, and government relations. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

BGS 179, 379. Independent Research in Business, Government, and Society.

Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business Government and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Sophomore standing and written consent from the department chair's office; forms are available in the department office for that purpose.

Legal Environment of Business: LEB

Lower-Division Courses

Upper-Division Courses

LEB 320F. Foundations of the Legal Environment of Business.

Restricted to non-McCombs School of Business majors. Not open to law students. Introduction to the legal problems confronting businesses in the global environment. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree. Prerequisite: Upper-division standing.

LEB 323. Business Law and Ethics.

Restricted to students in a McCombs School of Business major. An investigation of the role of law in society; introduction to legal reasoning, dispute resolution, judicial process, constitutional law, agency, torts, government regulations; business ethics; study of contracts. Three lecture hours a week for one semester. Legal Environment of Business 323 and 323H may not both be counted.

LEB 323H. Business Law and Ethics: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. An investigation of the role of law in society; introduction to legal reasoning, dispute resolution, judicial process, constitutional law, agency, torts, government regulations; business ethics; study of contracts. Three lecture hours a week for one semester. Legal Environment of Business 323 and 323H may not both be counted. Prerequisite: Upper-division standing, ninety semester hours of college coursework, Accounting 312 or 312H, and credit or registration for Business Administration 324 or 324H.

LEB 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in the Legal Environment of Business.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or by the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

LEB 361. Law of Business Organizations.

Restricted to students in a business major. Study of basic legal principles of business organizations and operations, including practical comparison and assessment of advantages and disadvantages of different types of organization. Three lecture hours a week for one semester. Prerequisite: Thirty semester hours of undergraduate coursework, or consent of instructor.

LEB 363. Real Estate Law.

An examination of law pertaining to estates and interests in land, conveyances and mortgages, brokers, easements, contracts, default and foreclosure. Three lecture hours a week for one semester. Prerequisite: Thirty semester hours of undergraduate coursework, or consent of instructor.

LEB 366. Commercial Transactions.

Restricted to students in a business major. Applied business transactions, with emphasis on the Uniform Commercial Code; emphasis on bailments, sales of goods, commercial paper, bank-customer relationships, creditor security devices, and bankruptcy. Three lecture hours a week for one semester. Prerequisite: Thirty semester hours of undergraduate coursework, or consent of instructor.

LEB 370. Topics in the Legal Environment of Business.

Selected topics on legal constraints affecting managerial decision making and business behavior. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Thirty semester hours of undergraduate coursework, or consent of instructor.

Topic 1: Antitrust Law.

Topic 2: Environmental Law.

Topic 3: Employer-Employee Relations.

Topic 4: Social and Ethical Responsibilities of Business.

Topic 5: The Law and the Multinational Corporation.

Topic 6: Law of the Entertainment Business.

Topic 7: Business Torts.

Topic 8: Constitutional Issues in Business.

Topic 9: Business Dispute Resolution.

Topic 10: Intellectual Property.

Topic 11: Sports, Sports Management, and Entertainment Law.

Survey of the law as it relates to amateur and professional sports and sports management. Includes an entertainment law component that examines the legal aspects of the film industry.

Topic 12: Law of the European Union. Introduction to the rapidly evolving law of the European Union, with particular emphasis on business applications and comparisons to American law.

Topic 13: Contracts and Real Property. Restricted enrollment; contact the Energy Management and Innovation Center for permission to register. General real property interests, including land, mineral, and riparian interests. Subjects include duty of landowners; nonpossessory interest in real property; fixtures; liens; co-ownership of real property; the real estate contract; the broker's listing agreements; deeds; and mortgages. Legal Environment of Business 363 and 370 (Topic 13) may not both be counted.

Topic 14: Oil and Gas Law. Restricted enrollment; contact the Energy Management and Innovation Center for permission to register. Ownership interests in the oil and gas mineral estate. Subjects include conveyance and partition of the mineral estate; trespass and third party claims; and oil and gas lease provisions. Legal Environment of Business 370 (Topic 14) and 372 may not both be counted. Additional prerequisite: For non-energy management or non-public policy program students, consent of instructor.

LEB 179, 379. Independent Research in the Legal Environment of Business.

Restricted to students in a McCombs School of Business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business Government and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; Legal Environment of Business 323 or 323H with a grade of at least C-; consent of instructor; and written approval before the first meeting of the course from the department chair's office, on forms provided for that purpose.

Department of Information, Risk, and Operations Management

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Management Information Systems: MIS

Lower-Division Courses

MIS 301. Introduction to Information Technology Management.

Restricted to students in the McCombs School of Business. Explores how information technology helps to achieve competitive advantage and improve decision making, business processes, operations, and organizational design. Uses a cross-functional perspective to recognize the role of technology across business activities of management, finance, marketing, human resources, and operations. Three lecture hours a week for one semester. Management Information Systems 301 and 301H may not both be counted.

MIS 301H. Introduction to Information Technology Management: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Explores how information technology helps to achieve competitive advantage and improve decision making, business processes, operations, and organizational design. Uses a cross-functional perspective to recognize the role of technology across business activities of management, finance, marketing, human resources, and operations. Three lecture hours a week for one semester. Management Information Systems 301 and 301H may not both be counted.

MIS 302F. Introduction to Information Technology Management.

Restricted to nonbusiness students. Explores how information technology helps to achieve competitive advantage and improve decision making, business processes, operations, and organizational design. Uses a cross-functional perspective to recognize the role of technology across business activities of management, finance, marketing, human resources, and operations. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree. Management Information Systems 302F and 311F may not both be counted.

MIS 304. Introduction to Problem Solving and Programming.

Restricted to students in the McCombs School of Business. Programming skills for creating easy-to-maintain systems for business applications. Object-oriented and structured methodologies with Visual Basic. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

MIS 310 (TCCN: BCIS 1305). Introduction to Management Information Systems.

Basic computer terminology, hardware and software, communications technology, graphics, systems analysis and design, and issues arising out of the rapidly evolving field of information systems. Students are expected to achieve a working knowledge of personal computer software, including operating system software and environments, as well as spreadsheets, analytical graphics, databases, and presentation software. Hands-on experience with the Internet and use of electronic mail. Three lecture hours a week for one semester.

Upper-Division Courses

MIS 325. Database Management.

Restricted to students in the McCombs School of Business. Beginning and intermediate topics in data modeling for relational database management systems. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

MIS 333K. Web Application Development.

Restricted to students in a business major. Concepts and practices of information systems. Advanced programming techniques used to generate menu-driven applications. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 304 and 325.

MIS 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Management Information Systems.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

MIS 353. Internship in Management Information Systems.

Restricted to students in a business major. Focuses on students' career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Internship and discussion hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not count toward the student's major requirement. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

MIS 366P. Management Information Systems Practicum.

Restricted to students in a business major. Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. The equivalent of three lecture hours a week for one semester. Prerequisite: Forty-five semester hours of college coursework and consent of instructor.

MIS 373. Topics in Management Information Systems.

Restricted to students in a business major. Provides in-depth treatment of business data processing concerns such as database management, telecommunications, and development of commercial systems. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Varies with the topic.

Topic 6: Advanced Application of Software Development. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 333K and consent of instructor.

Topic 8: Advanced Data Communication Systems. Development issues for intranet- and internet-based systems. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 365.

Topic 9: Health Care Management. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 325.

Topic 12: Technical Consulting. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 304 and consent of instructor.

Topic 13: Information Technology for Supply Chains. Same as Operations Management 337 (Topic 4). Provides an understanding of how information technology is used to coordinate supply chain activities across different industries. Students work in teams and undertake hands-on exercises to learn how to plan and coordinate operations. Management Information Systems 373 (Topic 13) and Operations Management 337 (Topic 4) may not both be counted. Offered on the letter-grade basis only. Additional prerequisite: Management Information Systems 301 with a grade of at least C-.

Topic 14: Web Systems Development. Concepts underlying Web development tools, page and site design, and building Web-based business sites. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 304 and 325.

Topic 15: Systems Analysis for E-Business. Applications of technology for creating e-business systems and process redesign. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 325.

Topic 16: Information Technology Security, Privacy, and Survivability. Offered on the letter-grade basis only. Prerequisite: For business majors, Management Information Systems 333K or the equivalent; for others, consent of instructor.

Topic 17: Data Mining for Business Intelligence. Introduces the data mining process and primary data mining techniques employed to extract intelligence from data and evaluates the strengths and weaknesses of data mining techniques applied to challenges in various business domains. Offered on the letter-grade basis only. Prerequisite: Statistics 309 or 309H.

Topic 18: Business Process Excellence. Provides in-depth coverage of business process change and management with information technology (IT) in today's organizations. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

Topic 19: Enterprise Computing. Offered on the letter-grade basis only. Prerequisite: Management Information Systems 333K.

Topic 20: Managing the Future. Addresses the management of uncertainty. Introduces managerial concepts and methods for structuring decisions about the uncertainties in the future of industries, products, markets, and technologies. Includes scenario analysis, technology roadmaps, and dynamic innovation models. Students work in teams and undertake hands-on exercises aimed at developing a set of alternative futures for industries and technologies. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

Topic 21: Open Innovation.

Topic 22: IT Audit and Security. Offered on the letter-grade basis only.

Topic 23: Social Media Analytics. Introduction to social network analysis for business value using statistical optimization and decision

theory; and foundation for analyzing online search and conversation data for market sensing, sentiments, product quality, reputation, recommendations, and brand awareness. Offered on the letter-grade basis only.

Topic 24: Mobile Apps and Web Services. An overview of mobile and web services technology models and architectures. Management Information Systems 365 and 373 (Topic 24) may not both be counted. Additional prerequisite: Management Information System 333K.

MIS 374. Business System Development.

Restricted to students in a McCombs School of Business major. Provides foundation in business system analysis, project management, planning, design, and implementation, using basic business knowledge and computer skills. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Seventy-five semester hours of college coursework, including Management Information Systems 333K.

MIS 375. Strategic Information Technology Management.

Restricted to students with a major in business. Designed to develop an understanding and appreciation for the role of information technology in the context of a firm's strategy. Explores the impact of information technology on the economy and business performance, the emergence of electronic business applications and organizational and market transformation, and the nature of technology-driven business models and strategies. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

MIS 179, 379. Independent Research in Management Information Systems.

Restricted to students in a business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business Government and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C Risk Management 179, 379. Prerequisite: Management Information Systems 304 and 325 with a grade of at least B- in each, and consent of instructor; and written approval before the first meeting of the course from the department chair's office, on forms provided for that purpose.

Operations Management: O M

Lower-Division Courses

Upper-Division Courses

O M 335. Operations Management.

Restricted to students in a business major. The operations or production function and the skills required for analyzing and solving related problems. Three lecture hours a week for one semester. Operations Management 335 and 335H may not both be counted. Prerequisite: Credit or registration for Business Administration 324 or 324H and credit or registration for Statistics 309 or 309H.

O M 335H. Operations Management: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. An investigation of the operations or production function, and the skills required for analyzing and solving related problems. Three lecture hours a week for one semester. Operations Management 335 and 335H may not both be counted. Prerequisite: Business Administration 324 or 324H and Statistics 309 or 309H.

O M 337. Special Topics in Operations Management.

Restricted to students in a business major. Analysis of contemporary management problems. Three lecture hours or two lecture hours and one

laboratory/discussion hour a week for one semester. Management 337 and Operations Management 337 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Topic 1: Total Quality Management. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Additional prerequisite: For business majors, Operations Management 335 or 335H with a grade of at least C-; for others, admission to an appropriate major sequence in engineering.

Topic 2: Supply Chain Modeling and Optimization. Formulating models of decision-making situations, the appropriate use of quantitative techniques, and finding solutions to the models that optimize objective measures of merit using readily available computer software. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Additional prerequisite: Credit or registration for Operations Management 335 or 335H.

Topic 3: Procurement and Supplier Management. Strategic issues in procurement and supplier management; review of competitive analysis and benchmarking; the purchasing role in fulfilling a firm's operational and competitive strategies; supplier evaluation, development, and relationship management; negotiating with suppliers for results; and commodity planning. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Additional prerequisite: Operations Management 335 or 335H with a grade of at least C-.

Topic 4: Information Technology for Supply Chains. Same as Management Information Systems 373 (Topic 13). Provides an understanding of how information technology is used to coordinate supply chain activities across different industries. Students work in teams and undertake hands-on exercises to learn how to plan and coordinate operations. Management Information Systems 373 (Topic 13) and Operations Management 337 (Topic 4) may not both be counted. Offered on the letter-grade basis only. Additional prerequisite: Management Information Systems 301 with a grade of at least C-.

Topic 5: Project Management. Offered on the letter-grade basis only. Additional prerequisite: Seventy-five semester hours of coursework, including Operations Management 335 or 335H with a grade of at least C-.

O M 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Operations Management.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

O M 353. Internship in Operations Management.

Restricted to students in a business major. Focuses on students' career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Internship and discussion hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

O M 366P. Operations Management Practicum.

Restricted to students in a business major. Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. The equivalent of three lecture hours a week for one semester. Management 366P and Operations Management 366P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Completion of at least forty-five semester hours of college coursework, and credit or registration for Operations Management 335 or 335H.

O M 367. Strategic Supply Chain Management.

Restricted to students in a business major. Management of manufacturing process technology in international competition. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Operations Management 335 or 335H.

O M 368. Logistics and Inventory Management.

Restricted to students in a business major. Analysis of the entire flow of information, materials, and services from suppliers through factories and warehouses to the end customer. Includes logistics, supplier selection, and inventory management, using case studies, optimization, and simulation. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Operations Management 335 or 335H.

O M 179, 379. Independent Research in Operations Management.

Restricted to students in a business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business, Government, & Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; Management 336, 336H, Operations Management 335, or 335H with a grade of at least C-; and consent of instructor and written approval from the department chair's office on forms available for that purpose.

Risk Management: R M

Lower-Division Courses

Upper-Division Courses

R M 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Risk Management.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

R M 357E. Introduction to Risk Management.

Principles of risk management for individuals and organizations, financial aspects of insurance companies and markets, industry structure, managerial aspects of underwriting and pricing, and public policy issues. Three lecture hours a week for one semester.

R M 369K. Managing Employee Risks and Benefits.

Risk management issues involving financial consequences of life and health contingencies, health care finance, company management, pension planning, economics of industry structure, and public policy issues. Three lecture hours a week for one semester.

R M 376. Quantitative Methods in Finance.

Explores quantitative methods and techniques in optimization and simulation, and their use in financial decision making. Discusses theory and application in portfolio selection, options and other derivative pricing, index tracking, risk measures, volatility estimating. Specific topics will include linear, quadratic, nonlinear, and integer programming; dynamic programming; robust optimization; Monte Carlo methods and variance reduction techniques. Emphasis will be placed on problem solving with advanced computational programming languages. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

R M 377. Property-Liability Risk Management and Planning.

Analysis of property-liability risks of businesses, risk management tools, risk financing, and insurance contracts for financial planning purposes; investment and underwriting operations, market structures, and insurance regulation. Three lecture hours a week for one semester.

R M 179, 379. Independent Research in Risk Management.

Restricted to students in a McCombs School of Business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business Government and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, including Risk Management 357E; consent of instructor; written approval before the first meeting of the course from the department chair's office, on forms provided for that purpose.

Statistics: STA

Lower-Division Courses

STA 309. Elementary Business Statistics.

Restricted to students in the McCombs School of Business. Training in the use of data to gain insight into business problems; describing distributions (center, spread, change, and relationships), producing data (experiments and sampling), probability and inference (means, proportions, differences, regression and correlation). Three lecture hours a week for one semester. Only one of the following may be counted: Economics 329, Statistics 309, 309H. Prerequisite: Mathematics 408D, 408L, or 408S.

STA 309H. Elementary Business Statistics: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Training in the use of data to gain insight into business problems; describing distributions (center, spread, change, and relationships), producing data (experiments and sampling), probability and inference (means, proportions, differences, regression and correlation). Three lecture hours a week for one semester. Only one of the following may be counted: Economics 329, Statistics 309, 309H. Prerequisite: Twenty-four semester hours of college credit, including Mathematics 408D, 408L, or 408S.

Upper-Division Courses

STA 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S.

Topics in Statistics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

STA 371G. Statistics and Modeling.

Restricted to students in a McCombs School of Business major. Focuses on methods used to model and analyze data. Explores multiple regression models and their application in the functional areas of business, time-series models, decision analysis and the value of information, and simulation-based methods. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics 371G, 371H, 375, 375H. Prerequisite: Management Information Systems 301, 301H, or 310; Statistics 309 or 309H; and credit or registration for Business Administration 324 or 324H.

STA 371H. Statistics and Modeling: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Focuses on methods used to model and analyze data. Explores multiple regression models and their application in the functional areas of business, time-series models, decision analysis and the value of information, and simulation-based methods. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics 371G, 371H, 375, 375H. Prerequisite: Management Information Systems 301, 301H, or 310; Mathematics 408D, 408L, 408M or 408S; Statistics 309 or 309H; and credit or registration for Business Administration 324 or 324H.

STA 372. Topics in Statistics.

Restricted to students in the McCombs School of Business. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and Statistics 309 with a grade of at least C-.

Topic 1: Statistical Computer Packages.

Topic 2: Sampling.

Topic 3: Statistical Decision Making for Business.

Topic 4: Multivariate Statistical Analysis.

Topic 5: Financial and Econometric Time Series Modeling. Applied skills course that focuses on statistical forecasting methods used in business. Subjects may include Box-Jenkins models; exponential smoothing models; ARCH/GARCH models for varying volatility in financial returns; seasonal adjustment of time series; tests for nonstationarity of time series; and modeling multiple time series. Each subject is illustrated with real data using series such as interest rates and stock returns. Additional prerequisite: Statistics 371G, 371H, 375, or 375H.

Topic 6: Optimization Methods in Finance. Focuses on deterministic and stochastic optimization methods used to analyze problems in finance, including linear, nonlinear, quadratic, and integer programming, and dynamic and stochastic programming. Additional prerequisite: Mathematics 408D, 408L, or 408M.

Topic 7: Computational Finance. A systematic introduction to the analysis and implementation of numerical methods used in finance. Covers numerical techniques used in derivative pricing and optimal asset allocation, such as Monte Carlo and quasi-Monte Carlo simulation, methods for solving partial differential equations, and

dynamic programming. Additional prerequisite: Mathematics 408D, 408L, or 408M.

Topic 8: Time Series Forecasting Models. An applied skills approach to statistical forecasting methods used in business. Topics may include seasonal adjustment of time series; exponential smoothing models; ARCH/GARCH models for varying volatility in financial returns; diffusion models for new product forecasting; Box-Jenkins models; and modeling multiple time series. Each topic is illustrated with real data. Additional prerequisite: Statistics 371G, 371H, 375, or 375H.

STA 375. Statistics and Modeling for Finance.

Restricted to students in the McCombs School of Business. Methods used to model and analyze data, especially as applied to problems related to finance. Explores regression models, time-series models, decision analysis and simulation-based methods. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics 371G, 371H, 375, 375H. Prerequisite: Management Information Systems 301, 301H, or 310; Mathematics 408D, 408L, 408M or 408S; Statistics 309 or 309H; and credit or registration for Business Administration 324 or 324H.

STA 375H. Statistics and Modeling for Finance: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Methods used to model and analyze data, especially as applied to problems related to finance. Explores regression models, time-series models, decision analysis and simulation-based methods. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics 371G, 371H, 375, 375H. Prerequisite: Management Information Systems 301, 301H, or 310; Mathematics 408D, 408L, 408M or 408S; Statistics 309 or 309H; and credit or registration for Business Administration 324 or 324H.

STA 376. Intermediate Statistics.

Restricted to students in a business major. Analysis of forecasting techniques and theory; macroeconomic models; long-range and short-term forecasting; forecasting for the firm, using case material. Three lecture hours a week for one semester. Prerequisite: Statistics 309 or 309H.

Department of Management

Management: MAN

Lower-Division Courses

Upper-Division Courses

MAN 320F. Foundations of Organizational Behavior and Administration.

Restricted to non-McCombs School of Business majors. An introduction to the management of organizations. Issues are addressed from the perspectives of strategy and planning, organizational behavior, and operations management. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree. Prerequisite: Upper-division standing.

MAN 325. Strategic Human Resources Management.

Restricted to students in a business major. Overview of the personnel function, covering recruitment, compensation, equal employment, job analysis, training, benefits, employee discipline, collective bargaining, safety, and health. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Management 336 or 336H.

MAN 328. Consulting and Change Management.

Restricted to students in a business major. Designed to develop the fundamental change knowledge and consulting skills of students who plan to work with organizations as change agents, whether internally as

managerial employees or externally as outside consultants. Three lecture hours a week for one semester. Prerequisite: Management 336 or 336H with a grade of at least C-.

MAN 336. Organizational Behavior.

Restricted to students in a business major. The process of managing organizations and the behavior of individuals and groups within the organizational setting. Three lecture hours a week for one semester. Management 336 and 336H may not both be counted. Prerequisite: Credit or registration for Business Administration 324 or 324H; and credit or registration for three semester hours of coursework in anthropology, psychology, or sociology.

MAN 336H. Organizational Behavior: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. An exploration of the process of managing organizations and the behavior of individuals and groups within the organizational setting. Three lecture hours a week for one semester. Management 336 and 336H may not both be counted. Prerequisite: Accounting 312H; credit or registration for Business Administration 324 or 324H; and thirty semester hours of coursework, including credit or registration for three semester hours of coursework in anthropology, psychology, or sociology.

MAN 337. Special Topics in Management.

Analysis of contemporary management problems. Three lecture hours or two lecture hours and one laboratory/discussion hour a week for one semester. Some sections are offered on the letter-grade basis only; these are identified in the Course Schedule. Management 337 and Operations Management 337 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 9: Leadership Issues. Restricted to students in a business major. Three lecture hours a week for one semester. Prerequisite: Management 336 or 336H with a grade of at least C-.

Topic 20: Entrepreneurial Management. Restricted to students in a business major. Covers the life cycle of an entrepreneurial business, including evaluating the attractiveness of an idea, launching and growing the business, and harvesting the profits. Three lecture hours a week for one semester. Additional prerequisite: Accounting 311 or 311H; Management 336 or 336H with a grade of at least C-; and credit or registration for Finance 357 or 357H.

Topic 21: The Art and Science of Negotiation. Restricted to students in a business major. Designed to help students develop a broad array of negotiation skills and to understand negotiations in useful analytical frameworks. Emphasis is placed on simulations, role-playing, and cases. Three lecture hours a week for one semester. Prerequisite: Management 336 or 336H with a grade of at least C-.

Topic 22: Women in Management. Additional prerequisite: Completion of forty-five semester hours of coursework.

MAN 137C. Introduction to Management in a Global Environment.

Restricted to students accepted to the Global Management Certificate program. Develops students' skills in recognizing cultural tendencies, both in themselves and in new geographic locations; introduces observation and reflection techniques to maximize learning while abroad. Course must be taken before participation in the international experience component required by the Global Management Certificate. One lecture hour a week for one semester. Only one of the following may be counted toward the Global Management Certificate: Applied Learning and Development 119, 219, 319, 419, 519, 619, 179, 279, Liberal Arts 119, 219, 319, 129, 229, 329, Management 137C, 337 (Topic: Intercultural Management), 379, 479, 579, 679. Offered on the letter-grade basis only.

MAN 237D. Global Management Capstone.

Restricted to students accepted to the Global Management Certificate program. Develops students' ability to process and articulate learning from intercultural experience; develops skills in applying knowledge and strategies gained in one region/country to new cultural and geopolitical contexts. Two lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Management 137C, completion of required international experience component of the Global Management Certificate, and consent of instructor.

MAN 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Management.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

MAN 353. Internship in Management.

Restricted to students in a business major. Focuses on students' career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Internship and discussion hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not be counted toward the student's major requirement. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

MAN 374. General Management and Strategy.

Restricted to students in a McCombs School of Business major. Designed to enable students to analyze business situations from the point of view of the practicing general manager. Addresses key tasks involved in general management, including strategic decisions that ensure the long-term health of the entire firm or a major division. Three lecture hours a week for one semester. Management 374 and 374H may not both be counted. Prerequisite: Upper-division standing; seventy-five semester hours of coursework, including: Management 336 or 336H; credit or registration for Finance 357 or 357H, and Marketing 337 or 337H; and credit or registration for one of the following: Accounting 353J, 366P, Business Administration 353, 353H, Finance 353, 366P, Management 353 (or 366P), Management Information Systems 353, 366P, Marketing 353, 366P, Operations Management 353, or 366P.

MAN 374H. General Management and Strategy: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Designed to enable students to analyze business situations from the point of view of the practicing general manager. Addresses key tasks involved in general management, including strategic decisions that ensure the long-term health of the entire firm or a major division. Three lecture hours a week for one semester. Management 374 and 374H may not both be counted. Prerequisite: Upper-division standing; ninety semester hours of college coursework; Finance 357 or 357H; Management 336 or 336H; Marketing 337 or 337H; and credit or registration for one of the following: Accounting 353J, 366P, Business Administration 353, 353H, Finance 353, 366P, Management 353 (or 366P), Management Information Systems 353, or 366P.

MAN 179C, 379C. Independent Research in Management.

Restricted to students in a McCombs School of Business major. Conference course. Only two of the following may be counted toward

the Bachelor of Business Administration: Accounting 179C, 379C, Business, Government, and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; Management 336 or 336H with a grade of at least C-; consent of instructor; written approval before the first meeting of the course from the department chair's office on forms provided for that purpose.

Department of Marketing

International Business: I B

Lower-Division Courses

Upper-Division Courses

I B 320F. Foundations of International Business.

Restricted to non-McCombs School of Business majors. Fundamentals of international trade and the international economy; international dimensions of several functional areas of business, including management, marketing, finance, and human resource management; theoretical, institutional, and functional foundations of international business. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree. Only one of the following courses may be counted: Economics 339K, European Studies 348 (Topic 2: International Trade), International Business 320F or 350. Prerequisite: Upper-division standing.

I B 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in International Business.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Marketing. University credit is awarded for work in an exchange program; it may be counted a coursework taken in residence. May be repeated for credit when the topics vary.

I B 350. International Trade.

Same as European Studies 348 (Topic 2). Study of the principles, policies, and problems of the international exchange of goods and investments. Three lecture hours a week for one semester. Only one of the following may be counted: Economics 339K, European Studies 348 (Topic 2), International Business 320F, 350. Prerequisite: Upper-division standing.

I B 372. Seminar in International Business.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic and are given in the Course Schedule.

Topic 1: International Marketing.

Topic 2: Business in Emerging Markets. Same as Latin American Studies 322 (Topic 9: Business in Emerging Markets) and Middle Eastern Studies 341 (Topic 2: Business in Emerging Markets). Only one of the following may be counted: International Business 372 (Topic 2), Latin American Studies 322 (Topic 9), Middle Eastern Studies 322K (Topic 4: Business in Emerging Markets), 341 (Topic 2).

Topic 3: Managing the Global Corporation.

Topic 4: Competing with the Japanese.

Topic 5: Business in Latin America.

Topic 6: Business German. German 356W and International Business 372 (Topic 6) may not both be counted. Additional prerequisite: German 312K or 312V with a grade of at least C-, or appropriate score on the placement test.

Topic 7: Advanced Business German. Designed for students who have taken German 328. Taught in German. Normally meets with German 336W. German 336W and International Business 372 (Topic 7) may not both be counted. May be counted toward the international business elective requirement. Additional prerequisite: Three courses beyond German 506, or equivalent credit on the placement test.

Topic 8: Business Spanish. International Business 372 (Topic 8) and Mexican American Studies 350 may not both be counted. Additional prerequisite: Spanish 327G.

Topic 9: Business French. Taught in French. Additional prerequisite: French 320E and one additional upper-division French course, or consent of instructor.

I B 378. International Business Operations.

Restricted to students in a McCombs School of Business major. Establishment and conduct of international business operations: trade, investments, branch and subsidiary management, intermediary functions; case studies in international enterprise. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; at least seventy-five semester hours of coursework, including Economics 339K or International Business 350; and credit or registration for one of the following: Accounting 353J, 366P, Business Administration 353, 353H, Finance 353, 366P, Management 353, (366P), Management Information Systems 353, 366P, Marketing 353, 366P, Operations Management 353, 366P.

I B 179C, 379C. Independent Research in International Business.

Restricted to students in a business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business, Government, and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; International Business 350 with a grade of at least C-; and consent of instructor. A student registering for this course must obtain written approval from the department chair's office, on forms provided for that purpose, before the first meeting of the course.

Marketing: MKT

Lower-Division Courses

Upper-Division Courses

MKT 320F. Foundations of Marketing.

Restricted to non-McCombs School of Business majors. Introduction to basic concepts and terminology in marketing: the process of developing marketing strategy, the role of marketing activities within the firm, external influences that affect the development of marketing strategy, and basic analytical tools appropriate to marketing decision making. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Business Administration degree. Prerequisite: Upper-division standing.

MKT 337. Principles of Marketing.

Restricted to students in a McCombs School of Business major. Designed to expand understanding of the marketing system and basic marketing activities and to provide a framework for marketing strategy development and implementation of marketing tools and tactics. Three lecture hours

a week for one semester. Marketing 337 and 337H may not both be counted. Prerequisite: Credit or registration for Business Administration 324 or 324H, and Statistics 309 or 309H.

MKT 337H. Principles of Marketing: Honors.

Restricted to students admitted to the McCombs School of Business Honors Program. Designed to expand understanding of the marketing system and basic marketing activities and to provide a framework for marketing strategy development and implementation of marketing tools and tactics. Three lecture hours a week for one semester. Marketing 337 and 337H may not both be counted. Prerequisite: Credit or registration for Accounting 312H, Business Administration 324H, and Statistics 309 or 309H.

MKT 338. Promotional Policies.

Restricted to students in a business major. Analysis of the use of promotional methods in marketing: advertising, personal selling, sales promotion, and indirect promotion; their social and economic consequences; their coordination and relationship to other business functions. Three lecture hours a week for one semester. Prerequisite: Marketing 337 or 337H.

MKT 140S, 240S, 340S, 440S, 540S, 640S, 740S, 840S, 940S. Topics in Marketing.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Marketing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary.

MKT 353. Internship in Marketing and International Business.

Restricted to students in a business major. Focuses on students' career goals through academic discussion and evaluations, while placing students in professional internships with public and private enterprises. Internship and discussion hours to be arranged. Only one of the following may be counted toward the Bachelor of Business Administration: Accounting 353J, Business Administration 353, 353H, Finance 353, Management 353, Management Information Systems 353, Marketing 353, Operations Management 353. May not be counted toward the student's major requirement. Offered on the pass/fail basis only. Prerequisite: Completion of forty-five semester hours of college coursework and consent of the departmental internship coordinator.

MKT 460. Information and Analysis.

Restricted to students in a business major. The development and analysis of information for marketing management sources. Three lecture hours and one recitation hour a week for one semester. Prerequisite: Marketing 337 or 337H, and Statistics 309 or 309H.

MKT 363. Professional Selling and Sales Management.

Restricted to students in a business major. Policies, operation, coordination, and control of personal selling activities in marketing organizations. Three lecture hours a week for one semester. Prerequisite: Marketing 337 or 337H.

MKT 366P. Special Projects in Marketing Practicum.

Restricted to business majors. Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise. The equivalent of three lecture hours a week for one semester. Prerequisite: Completion of forty-five semester hours of college coursework, and Marketing 337 or 337H.

MKT 370. Marketing Policies.

Restricted to students in a McCombs School of Business major. A capstone course focusing on case studies of advanced marketing problems, including analysis of markets, promotional planning, pricing, and distribution coordination. Designed to help the student develop a comprehensive understanding of marketing policy and strategy formulation. Three lecture hours a week for one semester. Prerequisite: Ninety semester hours of college coursework, including Marketing 460; credit or registration for one of the following: Accounting 353J, 366P, Business Administration 353, 353H, Finance 353, 366P, Management 353, 366P, Management Information Systems 353, 366P, Marketing 353, 366P, Operations Management 353, 366P; and six additional semester hours of elective coursework in marketing.

MKT 370K. Retail Merchandising.

Restricted to students in a business major. Designed to familiarize the student with all the activities associated with the sale of goods and services for final consumption and to provide an overview of the decisions involved in merchandising and management, including factors that influence and determine those decisions. Three lecture hours a week for one semester. Prerequisite: Marketing 337 or 337H.

MKT 372. Marketing Seminar.

Restricted to students in a business major. Three lecture hours a week for one semester. Some sections are offered on the letter-grade basis only. May be repeated for credit when the topics vary. Prerequisite: Marketing 337 or 337H. Additional prerequisites may be required for some topics; these are given in the Course Schedule.

Topic 1: Market Area Decisions.**Topic 2: Consumer Behavior.**

Topic 3: Implementing Marketing Concepts. Implementation of marketing concepts in a real-world setting through participation in marketing projects with area companies. Additional prerequisite: Consent of instructor.

Topic 4: Global Marketing. May be used in place of International Business 372 in fulfilling the requirements of the major in international business.

MKT 179C, 379C. Independent Research in Marketing.

Restricted to students in a business major. Conference course. Only two of the following may be counted toward the Bachelor of Business Administration: Accounting 179C, 379C, Business, Government, and Society 179, 379, Finance 179C, 379C, International Business 179C, 379C, Legal Environment of Business 179, 379, Management 179C, 379C, Management Information Systems 179, 379, Marketing 179C, 379C, Operations Management 179, 379, Real Estate 179C, 379C, Risk Management 179, 379. Prerequisite: Eighteen semester hours of coursework in business and economics, six of which must be upper-division; Marketing 337 or 337H with a grade of at least C-; and consent of instructor. A student registering for this course must obtain written approval from the department chair's office, on forms provided for that purpose, before the first meeting of the course.

General Information

Mission

In an increasingly crowded and complex world, communication plays many roles. Accurate communication from person to person and from individual to public is essential to understanding, and understanding is basic to intelligent agreement or disagreement. The swift exchange of information permits business to grow, stimulates public taste, and brings about change while helping individuals and institutions to adapt to change. Decreasing the time between the discovery of new knowledge by scientist, scholar, or industrial experimenter and the comprehension of this knowledge by large segments of the public counteracts inertia and spreads the benefits of such discoveries. Communication makes possible the marshaling of public opinion and increases the effectiveness of forces for political progress.

The academic discipline of communication combines the characteristics of an art and of a science. Those who study communication as an art seek to improve in themselves and in others the oral, written, and visual skills of exchanging information. As a science, communication emphasizes the objective study and investigation of this fundamental aspect of human behavior.

The degree programs of the Moody College of Communication do not represent all of the academic disciplines concerned with the process of communication or the effects of communication on the individual and society. Engineering and physics shape and design the instruments by which communication is transmitted, and in the process become involved with human desires and reactions. Linguistics investigates the symbols by which human beings convey messages to each other. All language study bears on the process of communication. Art, drama, music, and literature are forms of communication. Psychology studies the relationship of communication to the individual, and sociology examines the impact of communication on society. Education relies heavily on effective communication. Thus the student who majors in the College of Communication should find relationships between the major and every course in the program. The major should give focus to the student's educational experience at the University. Those who minor in one of the communication fields should find means of increasing their personal effectiveness through developing skill in writing and speaking and in discerning the role of the mass media in the communication process in society.

Facilities

In addition to the extensive library and computer resources of the University, certain special resources provide support for work in communication. Chief among them is the Jesse H. Jones Communication Center. Communication Building A (CMA) is a six-level building housing classrooms, offices, and sophisticated technology facilities. All facilities offer pervasive wireless Internet access and all instructional and production spaces feature high-definition equipment. Communication

Building B (CMB), a nine-level production building, houses Austin's public television station, KLRU. Also housed in Communication Building B are teaching and production facilities for the School of Journalism and the Department of Radio-Television-Film.

These facilities provide opportunities for academic programs that cross disciplinary lines, interrelate traditional and online media, and otherwise combine the resources of the College in ways not feasible within any one of the component units.

Although students have access to numerous computer labs across campus, they are encouraged to purchase personal laptop computers for their own use.

The Belo Center for New Media (BMC), which opened in summer 2012, is a 5-level 120,000 square-foot facility that weds cutting-edge technology with innovative teaching and research methods. The Belo Center is home to the KUT Public Broadcast Center, the School of Journalism, the Department of Advertising, and the College of Communication Dean's Office. With base funding provided by the Belo Foundation and the Dechard and Moroney families, the Belo Center serves as a striking gateway to the northwest side of the University of Texas campus. The Belo Center houses a multitude of instructional, research, and meeting spaces including a 300-seat auditorium, a 120-seat lecture hall, and an executive briefing facility, as well as a theatrical-grade 75-seat presentation room. The KUT Public Broadcast center is housed in a two-story, 20,000 square-foot wing which includes a 72-seat, glass-walled performance studio that incorporates the community into some of KUT's 300 annual in-studio performances.

Financial Assistance Available through the College

The Moody College of Communication and each academic unit have a large number of scholarships that are awarded annually. Students interested in receiving one of these scholarships should apply online early in the spring semester for scholarships to be awarded the following academic year. More information about college scholarships is available at <http://moody.utexas.edu/students/scholarships> and from the Student Advising Office.

Student Services

Academic Advising

The Student Advising Office, in collaboration with the academic departments, oversees all advising in the college. To allow in-depth advising on specific programs of study, courses, and career choices in the major, each student is assigned an adviser. Students should meet with their advisers to select courses appropriate to the degree and to ensure that all degree requirements are met. In addition, students should consult their advisers for assistance in preparing for graduation.

Career Services

Communication Career Services (CCS) provides a variety of career development and job/internship search assistance programs for students and alumni. The office's online systems link clients to the CCS job and internship databases and on-campus interviewing and résumé referral programs. Communication job and internship fairs, on-campus interviews, and a wide range of job search workshops and career exploration programs provide networking opportunities and allow students to explore their career options, gain experience, and build their career management skills. Individual career counseling, prelaw advising, and an extensive library and Web site offer additional resources to help candidates research and prepare for the job market in a wide variety of media, communication, and related industries.

As a complement to the assistance available from the college, the University's Sanger Learning Center and the Center for Strategic Advising and Career Counseling in the School of Undergraduate Studies provide career counseling services to all students. The centers offer professional career counseling, skill and interest inventories and tests, and assistance to students in choosing or changing their majors and considering graduate study.

The University makes no promise to secure employment for each graduate.

Student Organizations

Student organizations provide an opportunity for students to meet fellow students within their major, learn about a major or career, hear from professionals in the field, and gain hands-on experience in club administration and leadership. One organization students may join is the Communication Council, the governing body for student activities in the college. The Communication Council acts as a representative of all undergraduate communication students and sponsors college-wide programs such as Communication Week and Senior Celebration as well as other events throughout the year. A complete list of student organizations in the college is available at <http://moody.utexas.edu/ccs>.

Admission and Registration

Admission

Admission to the University

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission>). Admission to a major may be restricted by the availability of instructional resources.

Admission Policies of the College

Students admitted to the University with deficiencies in high school units must remove them by the means prescribed in *General Information*. Course credit used to remove deficiencies may not be counted toward the student's degree.

A few students who already have a bachelor's degree and who are not candidates for an advanced degree are admitted to the college each year as nondegree students. Such students are admitted only with the approval of the appropriate academic unit head and the dean.

Registration

General Information gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the registrar's Web site, <http://registrar.utexas.edu/>.

Enrollment in upper-division courses in the Moody College of Communication may be restricted because of limitations on instructional resources.

Academic Policies and Procedures

Honors

University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information*.

Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information*.

Senior Fellows Program

The Senior Fellows Program is a college-wide honors program providing a broad, interdisciplinary supplement to the student's major. The program is designed for students with the talent and interest to go beyond the usual undergraduate experience. Participants who complete four honors courses in communication with a grade of at least *B* in each course earn the distinction of Senior Fellow. The coursework is undertaken in conjunction with the student's degree requirements. Students with a grade point average of at least 3.30 are invited to apply to participate during their junior and/or senior years. Requirements for admission include completion of the formal application process, which includes a written statement of purpose indicating why the student wishes to be part of the program, and an interview with members of the faculty committee that oversees the program. Twenty-five to thirty students are selected for the program each year.

College Honors Programs

Each academic unit in the Moody College of Communication offers an honors program to students majoring in the unit. Requirements for the programs vary, but all include (1) minimum grade point averages for admission to and continuance in the program; (2) three to six semester hours of honors coursework; and (3) completion in residence at the University of at least sixty semester hours of coursework counted toward the degree.

Each academic unit encourages eligible students to apply for admission to the honors program. Students who complete the program receive a certificate indicating "Special Honors in (name of field)." This notation also appears on the student's academic record.

Advertising Honors Program

Students who plan to seek special honors in advertising should apply to the department undergraduate adviser for admission to the honors program upon completion of sixty semester hours of coursework; they must apply no later than upon completion of ninety semester hours. A University grade point average of at least 3.50 and a grade point average in advertising of at least 3.50 are required for admission. The requirements for graduation with special honors are (1) Advertising 373H, *Integrated Communications Campaigns: Honors*, and Advertising 379H, *Honors Tutorial Course*, with a grade of at least *B* in each; (2) a University grade point average of at least 3.50 and a grade point average in advertising of at least 3.50; and (3) completion in residence at the

University of at least sixty semester hours of coursework counted toward the degree of Bachelor of Science in Advertising.

Communication Sciences and Disorders Honors Program

Students who plan to seek special honors in communication sciences and disorders should apply to the department undergraduate adviser for admission to the honors program upon completion of ninety semester hours of coursework. A University grade point average of at least 3.00 and a grade point average in communication sciences and disorders of at least 3.50 are required for admission. The requirements for graduation with special honors are (1) Communication Sciences and Disorders 359H, *Honors Tutorial Course: Reading*, with a grade of at least B-; (2) Communication Sciences and Disorders 379H, *Honors Tutorial Course: Special Project*, with a grade of at least B-; (3) a University grade point average of at least 3.00 and a grade point average in communication sciences and disorders of at least 3.50; and (4) completion in residence at the University of at least sixty semester hours of coursework counted toward the degree of Bachelor of Science in Communication Sciences and Disorders.

Communication Studies Honors Program

Students who plan to seek special honors in communication studies should consult the communication studies undergraduate adviser upon completion of seventy-five semester hours of coursework. A University grade point average of at least 3.00 and a grade point average in communication studies of at least 3.50 are required for admission to the honors program. The requirements for graduation with special honors are (1) a major in communication studies; (2) Communication Studies 359H, *Honors Tutorial Course: Reading*, with a grade of at least B-; (3) Communication Studies 379H, *Honors Tutorial Course: Special Project*, with a grade of at least B-; (4) a University grade point average of at least 3.00 and a grade point average in communication studies of at least 3.50; and (5) completion in residence at the University of at least sixty semester hours of coursework counted toward the degree of Bachelor of Science in Communication Studies.

Journalism Honors Program

Students who plan to seek special honors in journalism should apply to the School of Journalism adviser for admission to the honors program upon completion of sixty semester hours of coursework; they must apply no later than upon completion of ninety semester hours. A University grade point average of at least 3.50 and a grade point average in journalism of at least 3.50 are required for admission. The requirements for graduation with special honors are (1) Journalism 379H, *Honors Tutorial Course*, with a grade of at least B; (2) a University grade point average of at least 3.50 and a grade point average in journalism of at least 3.50; and (3) completion in residence at the University of at least sixty semester hours of coursework counted toward the degree of Bachelor of Journalism.

Public Relations Honors Program

Students who plan to seek special honors in public relations should apply to the public relations adviser for admission to the honors program upon completion of sixty semester hours of coursework; they must apply no later than upon completion of ninety semester hours. A University grade point average of at least 3.50 and a grade point average in public relations of at least 3.50 are required for admission. The requirements for graduation with special honors are (1) Public Relations 377H, *Integrated Communications Campaigns: Honors*, and Public Relations 379H, *Honors Tutorial Course*, with a grade of at least B in each; (2) a University grade point average of at least 3.50 and a grade point average in public relations of at least 3.50; and (3) completion in residence at the University

of at least sixty semester hours of coursework counted toward the degree of Bachelor of Science in Public Relations.

Radio-Television-Film Honors Program

Students who plan to seek special honors in radio-television-film should apply to the department chair for admission to the honors program upon completion of seventy-five semester hours of coursework; they must apply no later than upon completion of ninety semester hours. A University grade point average of at least 3.00 and a grade point average in radio-television-film of at least 3.50 are required for admission to and continuation in the honors program. The requirements for graduation with special honors are (1) two semesters of Radio-Television-Film 378H, *Honors Tutorial Course*, with a grade of at least B- each semester; (2) a University grade point average of at least 3.00 and a grade point average in radio-television-film of at least 3.50; and (3) completion in residence at the University of at least sixty semester hours of coursework counted toward the degree of Bachelor of Science in Radio-Television-Film.

Concentrations and Certificates

Communication and Society Concentration

This concentration is designed for consumers and creators of messages in public contexts. It is open only to students in majors outside the Moody College of Communication; any noncommunication student may enroll in any of these courses for which he or she meets the prerequisite. In addition to fulfilling the prerequisite, the student must have a University grade point average of at least 2.25 to enroll in any upper-division course in the Moody College of Communication.

The communication and society concentration requires eighteen semester hours of coursework, consisting of two required courses and twelve hours of electives; nine hours of the elective work must be in upper-division courses. Of the eighteen semester hours required for the concentration, at least twelve must be completed in residence. At any time after enrolling in his or her last concentration course, the student should fill out a concentration completion form in the Student Advising Office. The form must be submitted by the deadline to apply for graduation in the student's final semester. Students who complete the concentration will receive verification.

A student who wishes to use the concentration to fulfill minor requirements should make certain these courses meet the requirements of his or her college.

Concentration Courses

Required Courses

Communication 309, *Communication Technology and Society*
Radio-Television-Film 305, *Introduction to Media Studies*

Electives

Advertising 315, *History and Development of Advertising*
Communication 316M, *Race, Ethnicity, and the Media*
Communication Studies 306M, *Professional Communication Skills*
Communication Studies 332K, *Theories of Persuasion*
Communication Studies 342K, *Political Communication*
Journalism 350F, *Media Law*
Journalism 364E, *The Mass Media and Society*

Certificate in Communication and Society: Science Communication

The certificate in Communication and Society: Science Communication is designed to help prepare students with undergraduate studies in a sciences-related field to effectively communicate science topics to a variety of audiences by utilizing professional communication techniques and tools. Students will gain an understanding of contemporary

communication issues that may impact their field, and gain advanced skills to enhance their communication with the public, whether through traditional media, new media, or in person. This program is open only to students with majors in the College of Natural Sciences.

The certificate program requires eighteen semester hours of coursework. Nine hours must be taken at the upper-division level and at least nine hours must be taken in residence. The certification requirements are:

1. Six hours of coursework chosen from the list of approved *Issues in Communication* courses available in the Moody College of Communication;
2. Nine additional hours of coursework chosen from the list of approved *Communication Tools* courses available in the Moody College of Communication;
3. Communication 350, *Communication Internship* (requires approval of the certificate committee; prior approval is recommended.)
4. All courses must be taken for a letter grade, and only courses with a grade of C or better will be counted.

Students pursuing the certificate may enroll in any of the approved courses for which he or she meets the prerequisite. The student must have a University grade point average of at least 2.25 to enroll in any upper-division course in the college.

The student must submit an application form online to the Student Advising Office in order to enroll in the Communication and Society: Science Communication certificate program.

Students must apply for the transcript-recognized academic certificate at the time they complete their degree or the certificate program, whichever comes later.

Students should consult the Student Advising Office for additional information about the program and the coursework that meets certificate requirements. The courses that may be counted toward the certificate include, but are not limited to, the following:

Issues in Communication group

Communication Studies 315M, *Interpersonal Communication Theory*
Communication Studies 322E, *Communication Ethics*
Communication Studies 334K, *Nonverbal Communication*
Communication Studies 338, *Leadership Stories*
Communication Studies 344K, *Lying and Deception*
Communication Studies 353S, *Social Media and Organizations*
Journalism 301F, *Fundamental Issues in Journalism*
Journalism 346F, *Reporting on the Environment*
Journalism 346G, *Domestic Issues and Global Perspective*
Communication 319S, *Topics in Communication* (requires approval of the certificate committee; prior approval is recommended.)

Sports Media Certificate

The Sports Media Certificate is designed to complement a student's education by developing his or her proficiency and knowledge in the area of sports media. A student may enroll in any of the certificate-accepted courses for which he or she meets the prerequisites, including a University grade point average of at least 2.25 to enroll in any upper-division course in the Moody College of Communication. Undergraduates who complete certificate requirements in conjunction with their degree requirements or within one year after earning the degree receive recognition on the University transcript; students in integrated undergraduate/graduate programs must complete certificate requirements within one year after they complete their undergraduate degree requirements. A maximum of nine semester hours of the certificate coursework may be taken after the student has earned the undergraduate degree. At least half of the required certificate coursework must be completed in residence at the University.

Advertising and public relations majors may count these courses towards their degree but are ineligible for the certificate because University policy precludes a student from earning any transcript-recognized certificate in the same field as his or her major. Kinesiology majors may not count Kinesiology 350, *Sociological Aspects of Sport and Physical Activity*, and Kinesiology 354, *Sport and Event Marketing*, towards the certificate. Sport management majors may not count Advertising 378S (Topic 1: *Advertising and Public Relations for Sport*), Public Relations 378S (Advertising and Public Relations for Sports topic), and Kinesiology 355, *Media and Public Relations in Sport*, towards the certificate.

Students should apply for the certificate when they apply for graduation or when they complete the certificate program, whichever is later. Transcript recognition is awarded at the end of that semester or summer session.

The certificate program requires eighteen semester hours of coursework as described below. Nine hours must be taken at the upper-division level and at least nine hours must be taken in residence. The certificate requirements are:

1. Advertising 305, *Fundamentals of Advertising*
2. Advertising 350, *Advertising Internship*
3. Approved topic of Advertising 378, *Advanced Studies in Advertising*, or Journalism 348G, *The Business of Sports Media*
4. Nine hours of coursework to be selected from:
 - a. Advertising 378S (Topic 1: *Advertising and Public Relations for Sports*) or Public Relations 378S (Topic 1: *Advertising and Public Relations for Sports*), or Kinesiology 355, *Media and Public Relations in Sport*
 - b. Advertising 378S (Topic 2: *Legal Aspects of Sports and Media*) or Public Relations 378S (Topic 2: *Legal Aspects of Sports and Media*)
 - c. Advertising 378S (Topic 3: *Return on Investment for Sports Media*) or Public Relations 378S (Topic 3: *Return on Investment for Sports Media*)
 - d. Advertising 378S (Topic 4: *Analysis of Sports and Entertainment Audiences*) or Public Relations 378S (Topic 4: *Analysis of Sports and Entertainment Audiences*)

- e. Advertising 378S (Topic 5: *Ethics and Social Issues in Sports Branding*) or Public Relations 378S (Topic 5: *Ethics and Social Issues in Sports Branding*)
- f. Communication 325S (Topic 1: *Sports, Media and the Integration of American Society*)
- g. Communication Studies 347K, *Rhetoric of Popular Culture*
- h. Journalism 326F, *Reporting Sports*
- i. Journalism 349G, *Sports Journalism*
- j. Radio-Television-Film 359 (Topic: *Youth and Social Media*)
- k. Kinesiology 350, *Sociological Aspects of Sport and Physical Activity*
- l. Kinesiology 354, *Sport and Event Marketing*

5. Earn a grade of at least C in each course

Additional electives may be offered on a semester-by-semester basis.

US Latino and Latin American Media Studies Certificate

This concentration is designed to introduce students to United States Latino and Latin American issues in communication and the media and to give them the opportunity to prepare for professional work related to these areas in addition to their major. The certificate program requires eighteen hours of coursework, including at least nine hours completed in residence. Students must fulfill the following requirements:

1. Communication 316M, *Race, Ethnicity, and the Media*, or Radio-Television-Film 316M, *Race, Ethnicity, and the Media*
2. Nine hours of upper-division elective coursework chosen from the list of approved electives available in the Moody College of Communication
3. Six additional hours (upper or lower division) of elective coursework in Latin American studies or Mexican American studies
4. All courses must be taken for a letter grade, and only courses with a grade of C or better will be counted.

Any Moody College of Communication student may enroll in any of the concentration courses for which he or she meets the prerequisite. The student must have a University grade point average of at least 2.25 to enroll in any upper-division course in the college.

The student must submit an application form online to the Office of Student Affairs in order to enroll in the US Latino and Latin American Media Studies Certificate Program. Certain course prerequisites, for approved courses in the Moody College of Communication, may be waived once the student is accepted to the program.

Each degree program in the college imposes a limit on the number of hours in the college that may be counted toward the degree; each also imposes limits on the number of hours in the major that may be counted. For students who complete the US Latino and Latin American Media Studies certificate, these limits may be modified with the approval of the Student Advising Office.

Students must apply for the transcript-recognized academic certificate at the time they complete their degree or the certificate program, whichever comes later.

Students should consult the Student Advising Office for additional information about the program and the coursework that meets concentration requirements. The courses that may be counted toward the certificate include, but are not limited to, the following:

Required Course

Communication 316M, *Race, Ethnicity, and the Media* or Radio-Television-Film 316M, *Race, Ethnicity, and the Media*

Electives

Advertising 334, *International Advertising*
 Advertising 378, *Advanced Studies in Advertising*
 Advertising 378 (Topic 2: *Advanced Issues in Multicultural Markets*)
 Advertising 378 (Topic 9: *Consumer Discrimination in the Marketplace*)
 Journalism 340C (Topic 1: *Mass Media and Minorities*)
 Journalism 349T (Topic 4: *International Reporting*)
 Journalism 349T (Topic 7: *Oral History as Journalism*)
 Journalism 349T (Topic 10: *Covering the US Latino Community*)
 Journalism 367E, *Journalism in Latin America*
 Public Relations 378, *Advanced Studies in Public Relations*
 Radio-Television-Film 359S (Topic: *Brazilian Media and Culture*)
 Radio-Television-Film 359S (Topic: *Brazilian Film: Documentary vs. Narrative Interpretation*)
 Radio-Television-Film 365 (Topic: *Immigrant Media*)
 Radio-Television-Film 365 (Topic 6: *Contemporary Issues: Latinos and Media*)
 Radio-Television-Film 365 (Topic: *Race, Class, and Media*)
 Radio-Television-Film 366K (Topic 4: *East Austin Stories*)

Six additional hours to be selected from Latin American studies and/or Mexican American studies are also required.

Courses for Teacher Preparation

The college does not currently offer a teaching certification program for any of its degrees. Students who wish to pursue teacher certification should consult the teacher certification officer in the College of Education.

Graduation

Special Requirements of the College

All students must fulfill the General Requirements (p. 17) for graduation given in The University section. Students in the Moody College of Communication must also fulfill the following requirements.

1. All University students must have a grade point average of at least 2.00 to graduate. In the Moody College of Communication, a student who fails to achieve this grade point average in the normal 120 hours required for a degree may register for up to forty additional hours in order to do so.
2. All communication majors must have a grade of at least C in each course taken in the College of Communication that is counted toward the degree; if the course is offered on the pass/fail basis only, the student must have the symbol CR.
3. The University requires that the student complete in residence at least sixty semester hours of the coursework counted toward the degree. In the Moody College of Communication, these sixty hours must include at least eighteen hours of upper-division coursework and at least six hours of upper-division coursework in the major.
4. A candidate for a degree must be registered in the Moody College of Communication either in residence or in absentia the semester or summer session the degree is to be awarded and must apply to the dean for the degree no later than the date specified in the official academic calendar. Information about applying for graduation is given below.
5. An Air Force, Army, or Naval Reserve Officer Training Corps student who elects the basic and/or advanced program in air force science, military science, or naval science will not be approved for graduation until the student's government contract is completed or the student is released from the ROTC.

6. Each degree program is arranged to provide for the orderly progress of the student's coursework. A beginning student (including a transfer student with fewer than forty-eight semester hours of transferable credit) who registers for twelve semester hours or more must take at least nine semester hours, in at least three courses, of the coursework listed as prescribed work for one of the degrees in the Moody College of Communication. The student must continue to take at least nine semester hours of the prescribed work each long-session semester until he or she has completed forty-eight semester hours of credit. The dean may adjust this rule in exceptional circumstances, or when the student has earned credit by examination, or when the student registers for fewer than twelve hours in a long-session semester.
7. No student in the Moody College of Communication may repeat for credit a course in which he or she has earned a grade of C or better.

Degree Audit

Students should verify the coursework they have completed and the coursework still needed for the degree by reviewing a degree audit at least once each semester with an adviser in the Student Advising Office. The degree audit is a computer-generated report of the student's progress in completing degree requirements. He or she may also create, print, and review an audit online through IDA, the Interactive Degree Audit system; information about IDA is available at <http://registrar.utexas.edu/students/degrees/ida/>.

Although the degree audit normally provides an accurate statement of requirements, the student is responsible for knowing the requirements for the degree as stated in a catalog under which he or she is eligible to graduate and for registering so as to fulfill those requirements. Because the student is responsible for registering for the courses needed to fulfill degree requirements, he or she should seek an official ruling in the Student Advising Office before registering if in doubt about any requirement.

Applying for Graduation

To graduate, a student must be registered in the Moody College of Communication and must file a graduation application with the Student Advising Office. A student who is enrolled in residence must submit the application online at <http://moody.utexas.edu/students/graduation-information>. A student who is not currently enrolled should contact the Student Advising Office about the process to graduate in absentia.

The graduation application should be filed at the beginning of the student's last semester; it must be filed no later than the deadline given in the official academic calendar. No degree will be conferred unless the graduation application form has been filed on time.

Degrees and Programs

Degrees Offered

In the Moody College of Communication, six undergraduate degrees are offered: Bachelor of Science in Advertising, Bachelor of Science in Communication Sciences and Disorders, Bachelor of Science in Communication Studies, Bachelor of Journalism, Bachelor of Science in Public Relations, and Bachelor of Science in Radio-Television-Film. In addition to the core curriculum, the requirements of each degree consist of special requirements, prescribed work, and major requirements; these are given later in this chapter under the heading for the degree. In addition, the student must fulfill the University-wide Graduation Requirements (p. 17) and the Special Requirements of the College (p. 81) of Communication.

A student may not earn more than two undergraduate degrees from the Moody College of Communication. A student may not earn both the Bachelor of Science in Advertising and the Bachelor of Science in Public Relations.

The Minor

While a minor is not required as part of any communication degree program, the student may choose to complete a minor in a field outside the Moody College of Communication. A student may complete only one minor. The minor consists of at least fifteen semester hours in a single field of study, including at least nine hours of upper-division coursework. Nine of the fifteen hours must be completed in residence. A course to be counted toward the minor may not be taken on the pass/fail basis unless the course is offered only on that basis. Only one course counted toward the core curriculum, prescribed work, and major requirements for the student's degree may also be counted toward the minor.

If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the fifteen hours may be lower-division but must include at least nine hours beyond course 507 or the equivalent.

All minors must be approved by the student's academic adviser.

The Moody College of Communication allows the student to minor in any field outside the college in which the University offers a major. However, prerequisites and other enrollment restrictions may prevent the student from pursuing a minor in some fields. Before planning to use specific courses to make up the minor, the student should consult the department that offers those courses.

Degree Requirements

Flag Requirements

As part of the prescribed work for all degrees in the college, students must complete three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics and leadership flag; and one course with an independent inquiry flag. A single course may not carry both the cultural diversity in the United States and the global cultures flags simultaneously. If the flag requirements are not fulfilled by courses specified for the degree, the student must complete courses as electives or in addition to the number of hours required for the degree. Courses that carry flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).

Communication and Culture Requirements

As part of the prescribed work for all degrees, students must complete three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or nondominant group within the United States. Courses used to fulfill this requirement may also be used to fulfill the cultural diversity in the United States flag requirement and other degree requirements. Multicultural courses include, but are not limited to, the following; all courses that fulfill this requirement are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).

Advertising 316, *Creativity and American Culture*
 Advertising 353, *Advertising and Public Relations Law and Ethics*
 Advertising 378 (Topic: *Integrated Communication in Latino Entertainment*)
 Advertising 378 (Topic: *Sports/Media/Integration of American Society*)
 Advertising 378 (Topic 2: *Advanced Issues in Multicultural Markets*)
 Advertising 378 (Topic: *African Americans and the Media*)
 Communication 316M, *Race, Ethnicity, and the Media*
 Communication Studies 314L, *Language, Communication, and Culture*

Communication Studies 340K, *Communication and Social Change*
 Communication Studies 355K, *Intercultural Communication*
 Communication Studies 365K, *Male-Female Communication*
 Communication Studies 367 (Topic: *Language and Culture*)
 Communication Sciences and Disorders 308K, *Perspectives on Deafness*
 Communication Sciences and Disorders 314L, *Sociocultural Bases of Communication*
 Communication Sciences and Disorders 360M, *Communication and Deaf People*
 Journalism 335, *Narrative Journalism*
 Journalism 340C (Topic 1: *Mass Media and Minorities*)
 Journalism 340C (Topic 2: *African Americans and the Media*)
 Journalism 340C (Topic 3: *Journalism and Religion*)
 Journalism 340C (Topic 4: *Leadership, Management, and the Media*)
 Journalism 340C (Topic 5: *Women and the News*)
 Journalism 340C (Topic 10: *Covering Latino Community in the United States*)
 Journalism 340C (Topic: *African American Athletes and the Media*)
 Journalism 359T (Topic: *Sports/Media/Integration of American Society*)
 Public Relations 353, *Advertising and Public Relations Law and Ethics*
 Public Relations 378 (Topic: *Integrated Communication in Latino Entertainment*)
 Public Relations 378 (Topic: *Sports/Media/Integration of American Society*)
 Radio-Television-Film 331K (Topic 1: *Cult Movies and Gender Issues*)
 Radio-Television-Film 331K (Topic 2: *Television and Theories of Gender*)
 Radio-Television-Film 335 (Topic: *Race/Class/Gender in American Television*)
 Radio-Television-Film 345 (Topic: *History of Black American Cinema*)
 Radio-Television-Film 359 (Topic: *Asian American Media Cultures*)
 Radio-Television-Film 359S (Topic 1: *Hispanic Images and Counterimages*)
 Radio-Television-Film 365 (Topic 4: *History of United States Latino Media*)
 Radio-Television-Film 359S (Topic 2: *Women and Media Culture*)
 Radio-Television-Film 365 (Topic 6: *Latinos and Media*)
 Radio-Television-Film 370 (Topic: *Women and Film*)

Applicability of Certain Courses

Internship Credit

Some communication degree programs require an internship; in other programs, students may elect to complete an internship. In either case, the student must be a communication major and must meet the prerequisite for the internship course. Up to but no more than four semester hours of credit in internship courses may be counted toward the student's degree.

Physical Activity Courses

Physical activity (PED) courses are offered by the Department of Kinesiology and Health Education. They are counted among courses for which a student is enrolled, and the grades are included in the grade point average. However, these courses may not be counted toward a degree in the Moody College of Communication.

ROTC Courses

No more than nine semester hours of credit for air force science, military science, or naval science courses may be counted toward any degree in the Moody College of Communication. Such coursework may be counted only as lower-division electives in degree programs that have room for such electives, and only by students who have completed the third and fourth years of the ROTC program. ROTC courses may not be substituted for any specific required course.

Concurrent Enrollment and Correspondence and Extension Courses

Credit that a University student in residence earns simultaneously by correspondence or extension from the University or elsewhere or in residence at another school will not be counted toward a degree in the Moody College of Communication unless specifically approved in advance by the dean. Requests to take communication courses by correspondence or extension are normally disapproved. A student in his or her final semester may not enroll concurrently at another institution in any course that is to be counted toward the degree. No more than 30 percent of the semester hours required for any degree offered in the Moody College of Communication may be taken by correspondence.

Courses Taken on the Pass/Fail Basis

A student in the Moody College of Communication may count toward the degree up to fifteen semester hours of coursework in elective subjects outside the Moody College of Communication taken on the pass/fail basis. No course required for the degree and taken in residence may be taken pass/fail, unless the course is offered only on that basis. The student may also take examinations for credit in elective subjects on the pass/fail basis; credit earned by examination is not counted toward the total of five courses that the student may take on this basis. If a student chooses to major in a subject in which he or she has taken a course pass/fail, the academic unit that offers the major determines whether the course may be counted toward the student's major requirements. Complete rules on registration on the pass/fail basis are given in *General Information*.

Bible Courses

No more than twelve semester hours of Bible courses may be counted toward a degree.

Bachelor of Science in Advertising

To be awarded the degree of Bachelor of Science in Advertising, the candidate must complete 120 semester hours of coursework and must fulfill the University's General Requirements (p. 17) for graduation and Core Curriculum (p. 20) requirements, the college graduation requirements given in Special Requirements of the College (p. 81), and the requirements given in Special Requirements, Prescribed Work, and Major Requirements below.

Areas of Study

Students majoring in advertising specialize in one of four programs: Texas Advertising Management, Texas Creative, Texas Media, or Texas Sports and Entertainment. Admission to the Texas Creative and Texas Media programs is by an application process; students who are not interested in or accepted into either of these programs will complete either the Texas Advertising Management or the Texas Sports and Entertainment program. All advertising majors must complete the requirements of their specialization, as well as the requirements listed in the preceding paragraph.

Texas Advertising Management Program

This program is designed for students interested in a variety of professional careers, including account planning and advertising management positions in a wide range of advertising, sales promotion, direct response, promotional products, and related agencies. Students planning to work for advertisers, such as manufacturing or service companies, rather than for agencies, may also meet their goals through the Texas Advertising Management program. The program focuses on an integrated approach in which communication problems are addressed

with a variety of tools, including advertising, public relations, sales promotion, and direct response. Students must complete:

1. Advertising 378 (Topic 20: *Account Planning*)
2. Three hours chosen from:
 - a. Advertising 378 (Topic 4: *Direct Marketing*)
 - b. Advertising 378 (Topic 11: *Leadership and Ethics*)
 - c. Advertising 378 (Topic 17: *Integrated Communication for Nonprofit Organizations*)
 - d. Advertising 378 (Topic 19: *Online Consumer Research*)
3. Three hours chosen from:
 - a. Advertising 377M (Topic 1: *Advanced Media Research*)
 - b. Advertising 377M (Topic 2: *Advanced Studies in Media Sales*)
 - c. Advertising 377M (Topic 3: *Digital Metrics*)
 - d. Advertising 377M (Topic 4: *Nontraditional New Media Concepts*)
 - e. Advertising 377M (Topic 8: *Digital Insights*)
 - f. Advertising 377M (Topic 9: *Media Investments*)
 - g. Advertising 377M (Topic 10: *Media Showcase*)

Texas Creative Program

This program is designed to mold talented students into skilled advertising copywriters and art directors. To achieve that goal, it focuses on the creative and strategic thinking required to make the highest quality advertising messages. The program consists of Advertising 343K, *Portfolio I*; Advertising 468K, *Portfolio II*; and Advertising 468L, *Portfolio III*. In these three courses, students are expected to learn conceptual and critical thinking skills, computer design and page layout skills, and copywriting. The sequence also helps students develop the portfolio of creative work that is required of those seeking jobs in advertising.

Students who complete Advertising 325 with a grade of at least *B* may apply for admission to the Texas Creative program. Applications are generally distributed during the last week of class, and decisions are posted the following week. Students who are accepted into the program may enroll in Advertising 343K the following semester; those who are not accepted may apply again the following semester, but students may apply only twice. Student work is reviewed each semester, and advancement through the program is contingent upon the quality of portfolio development.

Texas Media Program

This program is designed to help students develop the characteristics that define success in advertising media planning, buying, sales, new media development, and metrics. Because advertising media is a broad and quickly evolving industry, the program offers a variety of courses, allowing students to focus their training and allowing the program itself to adapt to industry developments.

Students who complete Advertising 345J with a grade of at least *B* may apply for admission to the Texas Media program. Applications are distributed during the last week of classes. Admission decisions are made at the end of the semester and students admitted to the program are notified by a Secure Academic Note prior to the next add/drop registration period. Those who are not admitted may apply again the following semester, but students may apply only twice.

All Texas Media students must complete Advertising 377 (Topic 1: *Advanced Media Strategies*), 377 (Topic 3: *Digital Media*), and 377M (Topic 7: *Media Negotiation*). In addition, Texas Media students may choose to take at least one additional media upper-division course, which can be counted as an advertising elective. Advertising 377 or 377M may

be taken concurrently if all prerequisites are met. Most students complete the program in two semesters.

Texas Sports and Entertainment Program

This program is designed to give students the knowledge to develop decisions in sports communication. The program complements the student's education by developing their proficiency and knowledge in this area of specialization. Students must complete Advertising 305S, 348S, and at least one other 378S topic.

The Consent Procedure

Part of the prerequisite for some advertising courses is consent of the instructor received prior to registering. To be able to register for such a course, a student must first ask for and receive the instructor's consent. The student may be invited to an interview with the instructor or may be asked to provide supporting materials, such as an application or an essay. The student is responsible for knowing the deadline to apply. Consent forms are available from the student's adviser and in the Department of Advertising.

Special Requirements

To enroll in upper-division advertising courses, a student must have completed Advertising 318J in residence with a grade of at least *B*, and must have a University grade point average of at least 2.25 and a grade point average in courses in the Moody College of Communication of at least 2.00. Students who do not fulfill these requirements will be dropped from upper-division advertising courses, normally before the twelfth class day. The grade point average requirement is waived for the transfer student during the first semester of coursework, while he or she is establishing a University grade point average. Students may enroll in Advertising 318J no more than twice.

In addition, advertising majors must have a grade of at least *C* in each course taken in the Moody College of Communication that is counted toward the degree and a grade of at least *C* in each course counted toward the major requirements; if the course is offered on the pass/fail basis only, the student must have the symbol *CR*.

Advertising majors must take Advertising 370J and 373 or 373H in residence.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20), as well as the requirements for the Bachelor of Science in Advertising listed below under Prescribed Work. In some cases, a course required for the BSAdv may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work*

1. Three semester hours in English or rhetoric and writing in addition to the courses required by the core curriculum.
2. Three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics and leadership flag; and one course with an independent inquiry flag. The same course cannot be used to satisfy the global cultures and cultural diversity flags even if the course carries both flags. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.
3. Three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or nondominant group within the United States. Courses that fulfill this requirement may also be

used to fulfill other degree requirements. A partial list of these communication and culture courses is given in the Communication and Culture Requirement (p. 82) section under the Moody College of Communication's Degrees and Programs section; a complete list is available in the college's Student Advising Office before registration for each semester and summer session. The courses are also identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).

4. Students must demonstrate intermediate proficiency in a single foreign language. Courses taken to meet this requirement may not be taken on the pass/fail basis.

Credit may be earned by examination for any part of a foreign language sequence. An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult with an academic adviser for information on testing.

5. Statistics and Data Sciences 306, completed in residence. This course also meets the core curriculum mathematics requirement.
6. Twelve semester hours of coursework in the McCombs School of Business, preferably three hours in marketing, three hours in accounting, three hours in either legal environment of business or finance, and three hours in management. At least six of the twelve hours must be in upper-division coursework. Marketing 338 may not be used to fulfill this requirement.
7. At least thirty-six semester hours of upper-division coursework.
8. No more than twelve semester hours of transfer credit in advertising may be counted toward the degree.
9. Enough additional coursework to make a total of 120 semester hours. No more than forty-two hours in advertising and no more than thirty-six hours in any other single field may be counted toward the degree.

Major Requirements

1. At least thirty-six, but no more than forty-two semester hours of advertising, of which at least twenty-four hours must be upper-division. The following courses are required: Advertising 318J, 325, 344K, 345J, 350 or 468L, 370J, 353, and 373. The student must complete Advertising 318J, 370J, and 373 or 373H in residence; 318J must be completed with a grade of at least *B*.
2. At least six semester hours of coursework must be taken in the Moody College of Communication but outside the department. However, no student may count toward the degree more than forty-eight hours (including transfer credit) in Moody College of Communication coursework.
3. No Moody College of Communication course to be counted toward the degree and no course to be counted toward major requirement 1 above may be taken on the pass/fail basis, unless the course is offered only on that basis.

In addition, the following coursework is required to complete the following programs:

Texas Advertising Management: Advertising 378 (Topic 20); 378 (Topic 4, 11, 17, or 19); and 377M (Topic 1, 2, 3, 4, 8, 9, or 10).

Texas Creative: Advertising 343K, 468K, and 468L (note: Advertising 468L is part of the twenty-four required advertising hours for Creative students).

Texas Media: Advertising 377 (Topics 1 and 3), and 377M (Topic 7).

Texas Sports and Entertainment: Advertising 305S, 348S, and any 378S topic.

Order and Choice of Work

First Year

1. The student must take three courses from the following group each semester:
 - a. Rhetoric and Writing 306.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in a foreign language.
 - d. Courses that meet flag requirements.
2. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college adviser.

First-year students may not take two beginning foreign language courses in the same semester. First-year students may not take more than eight semester hours in one department.

Second Year

1. The student must take three courses from the following group each semester; four are recommended:
 - a. English 316L, 316M, 316N, or 316P, and any three-semester-hour course in English or rhetoric and writing.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in the foreign language, unless the language requirement has been fulfilled.
 - d. courses that meet flag requirements.
2. Advertising 318J.
3. Statistics and Data Sciences 306.
4. Enough additional coursework, if needed, to raise the student's course load to fifteen or sixteen hours each semester. Basic courses in business, studio art, and computer sciences are especially recommended.

Third and Fourth Years

1. Any remaining courses in the core curriculum and the prescribed work.
2. The remaining courses listed as major requirements.
3. Upper-division electives chosen to support the major. Advertising majors normally emphasize economics, government, history, English, sociology, psychology, marketing, or management.

***Changes pending approval by the University of Texas System**

Bachelor of Science in Communication Sciences and Disorders

To be awarded the degree of Bachelor of Science in Communication Sciences and Disorders, the candidate must complete 120 semester hours of coursework and must fulfill the University's General Requirements (p. 17) for graduation and the Core Curriculum (p. 20) requirements, the college graduation requirements given in Special

Requirements of the College (p. 81), and the requirements given in Special Requirements, Prescribed Work, and Major Requirements below.

Special Requirements

To enroll in upper-division communication sciences and disorders courses, a student must have a University grade point average of at least 2.25 and a grade point average in courses in the Moody College of Communication of at least 2.00. Students who do not fulfill this requirement will be dropped from upper-division communication sciences and disorders courses, normally before the twelfth class day. This requirement is waived for the transfer student during the first semester of coursework, while he or she is establishing a University grade point average.

In addition, a student with a major in communication sciences and disorders must have a grade of at least C in each course taken in the Moody College of Communication that is counted toward the degree; if the course is offered on the pass/fail basis only, the student must have the symbol CR.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20), as well as the requirements for the Bachelor of Science in Communication Sciences and Disorders (BSCSD) listed below under Prescribed Work. In some cases, a course required for the BSCSD may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work*

1. Three semester hours in English or rhetoric and writing in addition to the courses required by the core curriculum.
2. Three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics and leadership flag; and one course with an independent inquiry flag. The same course cannot be used to satisfy the global cultures and cultural diversity flags even if the course carries both flags. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.
3. Three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or nondominant group within the United States. Courses that fulfill this requirement may also be used to fulfill other degree requirements. A partial list of these communication and culture courses is given in the Communication and Culture Requirement (p. 82) section under the Moody College of Communication's Degrees and Programs section; a complete list is available in the college's Student Advising Office before registration for each semester and summer session. The courses are also identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).
4. Students must demonstrate intermediate proficiency in a single foreign language. Courses taken to meet this requirement may not be taken on a pass/fail basis. Credit may be earned by examination for any part of a foreign language sequence.

An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult with an academic adviser for information on testing.

5. At least thirty-six semester hours of upper-division coursework.

6. No more than twelve semester hours of transfer credit in communication sciences and disorders may be counted toward the degree.
7. Enough additional coursework to make a total of 120 semester hours. No more than thirty-six semester hours in one field of study may be counted toward the degree.

Special Emphases in Communication Sciences and Disorders

Students majoring in communication sciences and disorders may specialize in speech/language pathology, audiology, or education of the deaf/hearing-impaired. After completing the necessary undergraduate coursework, they may seek the graduate degrees that are required for professional accreditation by the American Speech-Language-Hearing Association (for those in speech/language pathology and audiology) or the Council on Education of the Deaf (for those in education of the deaf/hearing-impaired). Students in speech/language pathology and audiology who wish to practice in Texas must be licensed by the Texas Department of State Health Services; those in education of the deaf/hearing-impaired must be certified by the Texas State Board for Educator Certification.

Major Requirements

1. Students specializing in speech/language pathology must complete at least thirty-seven semester hours of coursework in communication sciences and disorders; those specializing in audiology must complete at least thirty-seven hours; those specializing in education of the deaf/hearing-impaired must complete at least thirty-two hours. For students in all three specializations, fifteen hours of this coursework must be upper-division. No more than forty-three semester hours of coursework in communication sciences and disorders may be counted toward the degree. The following courses are required:
 - a. Speech/language pathology: Communication Sciences and Disorders 306K, 308K, 311K, 313L, 318K, 118L, 341, 350, 358, 358S, 367K, 371, and 373.
 - b. Audiology: Communication Sciences and Disorders 306K, 308K, 311K, 313L, 318K, 118L, 341, 350, 358, 358S, 367K, 371, and 373.
 - c. Education of the deaf/hearing-impaired: Communication Sciences and Disorders 308K, 311K, 313L, 314L, 318K, 118L, 341, 360M, 367K, 373, and four hours of 175N.
2. At least six semester hours of coursework must be taken in the Moody College of Communication but outside communication sciences and disorders. However, no student may count toward the degree more than forty-nine semester hours (including transfer credit) in Moody College of Communication coursework.
3. No Moody College of Communication course to be counted toward the degree may be taken on the pass/fail basis, unless the course is offered only on that basis.

Order and Choice of Work

First Year

1. The student must take three courses from the following group each semester:
 - a. Rhetoric and Writing 306.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.

- c. Courses in a foreign language. Students in education of the deaf/hearing-impaired are encouraged to take American Sign Language.
 - d. Courses that meet flag requirements.
2. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college adviser.

First-year students may not take two beginning foreign language courses in the same semester. First-year students may not take more than eight semester hours in one department.

Second Year

1. The student must take three courses from the following group each semester; four are recommended:
 - a. English 316L, 316M, 316N, or 316P, and any three-semester-hour course in English or rhetoric and writing.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in the foreign language, unless the language requirement has been fulfilled.
 - d. courses that meet flag requirements.
2. Communication Sciences and Disorders 306K (for students in speech/language pathology or audiology) or 308K (for students in education of the deaf/hearing-impaired) and other lower-division courses in communication sciences and disorders recommended by the student's adviser.
3. Enough additional coursework, if needed, to raise the student's course load to fifteen or sixteen hours each semester.

Third and Fourth Years

1. Any remaining courses in the core curriculum and the prescribed work.
2. The remaining courses listed as major requirements.
3. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester.'

*Changes pending approval by the University of Texas System

Bachelor of Science in Communication Studies

To be awarded the degree of Bachelor of Science in Communication Studies, the candidate must complete 120 semester hours of coursework and fulfill the University's General Requirements (p. 17) for graduation and the Core Curriculum (p. 20) requirements, the college graduation requirements given in Special Requirements of the College (p. 81), and the requirements given in Special Requirements, Prescribed Work, and Major Requirements below.

Special Requirements

Students may take no more than nine hours of communication studies coursework, including transfer work, before they have declared a major in communication studies. Exceptions may be made for students who have officially declared a communication studies minor with their colleges, and for communication studies courses taken during a summer session. Students minoring in communication studies may take only the number of hours required for the minor.

To enroll in upper-division communication studies courses, a student must have a University grade point average of at least 2.25 and a grade point average in courses in the Moody College of Communication of at least 2.00. Students who do not fulfill this requirement will be dropped from upper-division communication studies courses, normally before the twelfth class day. This requirement is waived for the transfer student during the first semester of coursework, while he or she is establishing a University grade point average.

In addition, a student with a major in communication studies must have a grade of at least C in each course taken in the Moody College of Communication that is counted toward the degree; if the course is offered on the pass/fail basis only, the student must have the symbol CR.

A student majoring in communication studies may not register for more than nine semester hours of communication studies in one semester or summer session.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20), as well as the requirements for the Bachelor of Science in Communication Studies listed below under Prescribed Work. In some cases, a course required for the BSCommStds may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work*

1. Three semester hours in English or rhetoric and writing in addition to the courses required by the core curriculum.
2. Three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics and leadership flag; and one course with an independent inquiry flag. The same course cannot be used to satisfy the global cultures and cultural diversity flags even if the course carries both flags. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.
3. Three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or nondominant group within the United States. Courses that fulfill this requirement may also be used to fulfill other degree requirements. A partial list of these communication and culture courses is given in the Communication and Culture Requirement (p. 82) section under the Moody College of Communication's Degrees and Programs section; a complete list is available in the college's Student Advising Office before registration for each semester and summer session. The courses are also identified in the *Course Schedule*.
4. Students must demonstrate intermediate proficiency in a single foreign language. Courses taken to meet this requirement may not be taken on the pass/fail basis. Credit may be earned by examination for any part of a foreign language sequence. An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult with an academic adviser for information on testing.

An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult and academic adviser for information on testing.

5. At least thirty-six semester hours of upper-division coursework.
6. No more than twelve semester hours of transfer credit in communication sciences and disorders may be counted toward the degree.
7. Enough additional coursework to make a total of 120 semester hours. No more than thirty-six semester hours in one field of study may be counted toward the degree.

Major Requirements

1. At least thirty but no more than thirty-six semester hours of communication studies. At least fifteen hours must be in upper-division coursework. Each student must complete one of the following tracks:
 - a. *Corporate Communications*
 - i *Communication Studies 306M, 313M, and 332K.*
 - ii Six semester hours chosen from the following courses: *Communication Studies 310K, 316L, 320, 335, 336D, 337, 338, 339L, 341, 346, 350M, 353S, 370K, and 372T.*
 - iii Fifteen additional semester hours of communication studies.
 - b. *Human Relations*
 - i *Communication Studies 306M and 332K.*
 - ii Nine semester hours chosen from the following courses: *Communication Studies 314L, 315M, 330, 334K, 344K, 354, 355K, 357, 358, 370K, and 371K.*
 - iii Fifteen additional semester hours of communication studies.
 - c. *Political Communication*
 - i *Communication Studies 306M, 317C, and 332K.*
 - ii Nine semester hours chosen from the following courses: *Communication Studies 320, 331K, 332, 333, 340K, 342C, 342K, 345, and 370K.*
 - iii Twelve additional semester hours of communication studies.
2. At least six semester hours of coursework must be taken in the College of Communication but outside communication studies. However, no student may count toward the degree more than forty-two semester hours (including transfer credit) in College of Communication coursework.
3. No College of Communication course to be counted toward the degree may be taken on the pass/fail basis, unless the course is offered only on that basis.

Order and Choice of Work

First Year

1. The student must take three courses from the following group each semester:
 - a. Rhetoric and Writing 306.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in a foreign language.
 - d. Courses that meet flag requirements.
2. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college adviser.

First-year students may not take two beginning foreign language courses in the same semester. First-year students may not take more than eight semester hours in one department.

Second Year

1. The student must take three courses from the following group each semester; four are recommended:
 - a. English 316L, 316M, 316N, or 316P, and any three-semester-hour course in English or rhetoric and writing.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in the foreign language, unless the language requirement has been fulfilled.
 - d. Courses that meet flag requirements.
2. Lower-division communication studies courses recommended by the student's adviser.
3. Enough additional coursework, if needed, to raise the student's course load to fifteen or sixteen hours each semester.

Third and Fourth Years

1. Any remaining courses in the core curriculum and the prescribed work.
2. The remaining courses listed as major requirements. Students should note that some upper-division courses have a series of prerequisite courses that takes up to three semesters to complete.
3. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester.

***Changes pending approval by the University of Texas System**

Bachelor of Journalism

To be awarded the degree of Bachelor of Journalism, the candidate must complete 120 semester hours of coursework and must fulfill the University's General Requirements (p. 17) for graduation and the Core Curriculum (p. 20) requirements, the college graduation requirements given in Special Requirements of the College (p. 81), and the requirements given in Special Requirements, Prescribed Work, and Major Requirements below.

Journalism courses are divided into five levels of coursework and more narrowly within the levels according to their skill set and writing content. Not all courses are offered every semester.

Level I, Foundations: Journalism 301F and 302F

Level II, Applications: Journalism 310F and 311F

Level III, Specialized Issues and Skills:

- *Category 1-Public Affairs Reporting:* Journalism 320F, 321F, 322F, 323F, 324F, 325F, 326F
- *Category 2-Specialized Journalistic Skills:* Journalism 330F, 331F, 332F, 333F, 334F, 335F, 336F, 336D, 338F, 339F, 330G, 331G, 332G, 333G, 334G, 335G, 336G, 337G
- *Category 3-Understanding and Reporting Social Issues:* Journalism 340F, 341F, 342F, 343F, 344F, 346F, 347F, 348F, 349F, 340G, 341G, 342G, 343G, 344G, 345G, 346G, 347G, 348G, 349G, 340J, 341J

Level IV, Professional Principles: Journalism 350F, 351F, 352F, 353F

Level V, Professional Practices: Journalism 360F, 160G, 361F, 362F, 379,

Courses in Levels II – V have prerequisites appropriate to their skill level. Prerequisites may include testing, an interview, or other procedures. Information about these additional requirements is available from the School of Journalism adviser.

Special Requirements

All students in the journalism program are strongly encouraged to have a laptop computer meeting certain specifications as they enter Level II courses. Computer parameters will be designated by the School of Journalism on the department Web site at <http://journalism.utexas.edu>.

Students will be required to take Journalism 302F, 310F, and 311F in residence. In addition, Journalism 310F and 311F require a grade of at least *B-*.

Students who are interested in completing advanced photojournalism courses are required to take Communication 316, *Photographic Communication*, as part of their required six hours of coursework in communication.

To enroll in upper-division journalism courses, a student must have a University grade point average of at least 2.25, a grade point average in courses in the College of Communication of at least 2.00, and credit for Journalism 310F and 311F with a grade of at least *B-*. Students who do not fulfill this requirement will be unable to register for upper-division journalism courses. The 2.25 grade point average requirement is waived for the transfer student during the first semester of coursework, while he or she is establishing a University grade point average.

Journalism majors must complete Journalism 360F or Journalism 361F in order to graduate. Internships can be taken for course credit as soon as a student completes the two Level II courses with a grade of at least *B* in each.

The student must complete at least eighty-four semester hours outside journalism. At least sixty-five hours must be in liberal arts and natural sciences.

A student majoring in journalism may not register for more than nine semester hours in journalism in one semester or summer session. The director or associate director may make exceptions to this rule for students who need additional journalism courses in order to graduate on time.

A student with a major in journalism must have a grade of at least *C* in each course taken in the College of Communication that is counted toward the degree; if the course is offered on the pass/fail basis only, the student must have the symbol *CR*.

Additional information about the preceding requirements is available from the School of Journalism at <http://journalism.utexas.edu/> or (512) 471-1845.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20) as well as the prescribed work for the Bachelor of Journalism listed below. In some cases, a course required for the Bachelor of Journalism may also be counted toward the core curriculum; these courses are identified below. Flag descriptions can also be found in Core Curriculum (p. 20).

Prescribed Work*

1. Three semester hours in English or rhetoric and writing in addition to the courses required by the core curriculum.
2. Three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics and leadership flag; and one course with an independent inquiry flag. The same course cannot be used to satisfy the global cultures and cultural diversity flags even if the course carries both flags. Courses

that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

3. Three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or non-dominant group within the United States. Courses that fulfill this requirement may also be used to fulfill other degree and flag requirements. A partial list of these communication and culture courses is given in the Communication and Culture Requirement (p. 82) section under the Moody College of Communication's Degrees and Programs section; a complete list is available in the college's Student Advising Office before registration for each semester and summer session. The courses are also identified in the *Course Schedule*.
4. Students must demonstrate intermediate proficiency in a single foreign language. Courses taken to meet this requirement may not be taken on a pass/fail basis. Credit may be earned by examination for any part of a foreign language sequence.

An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult with an academic adviser for information on testing.
5. At least thirty-six semester hours of upper-division coursework.
6. No more than twelve semester hours of transfer credit in journalism may be counted toward the degree.
7. Enough additional coursework to make a total of 120 semester hours. No more than thirty-six semester hours in one field of study may be counted toward the degree, except as indicated under Major Requirements below.

Major Requirements

1. Journalism students must complete thirty-six semester hours in journalism and no more than thirty-six journalism hours may be counted toward the degree.
2. The following courses are required: Journalism 301F, 302F, 310F, 311F, 350F, and six hours to be chosen from 360F, 361F and 362F. Journalism 302F, 310F, and 311F must be taken in residence and a grade of at least *B-* is required for 310F and 311F.
3. At least nine semester hours but not more than fifteen semester hours from Level III, Specialized Issues and Skills, as follows:
 - a. at least three semester hours to be chosen from Journalism 320F, 321F, 322F, 323F, 324F, 325F, 326F
 - b. at least three semester hours to be chosen from Journalism 330F, 331F, 332F, 333F, 334F, 335F, 336F, 337F, 338F, 339F, 330G, 331G, 332G, 333G, 334G, 335G, 336G, 337G
 - c. at least three semester hours to be chosen from Journalism 340F, 341F, 342F, 343F, 344F, 345F, 346F, 347F, 348F, 349F, 340G, 341G, 343G, 344G, 345G, 346G, 347G, 348G, 349G, 340J, 341J
4. At least six semester hours of coursework must be taken in the College of Communication but outside the School of Journalism. No more than forty-two hours (including transfer credit) in College of Communication coursework may be counted toward the degree.
5. No College of Communication course to be counted toward the degree may be taken on the pass/fail basis, unless the course is offered only on that basis.

Order and Choice of Work

First Year

1. The student must take three courses from the following group each semester:

- a. Rhetoric and Writing 306
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum. Students who plan to concentrate in photojournalism are encouraged to take courses in chemistry, physics, and mathematics to fulfill the science and technology areas.
 - c. Courses in a foreign language.
2. Journalism 301F and 302F.
 3. Students who plan to take advanced photojournalism courses are encouraged to take Communication 316 in their second semester as part of their required six hours of coursework in communication but outside of journalism.
 4. Two courses that meet flag requirements.
 5. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college academic adviser.

First-year students may not take two beginning foreign language courses in the same semester. First-year students may not take more than eight semester hours in one department.

Second Year

1. The student should take three courses from the following group each semester; four are recommended:
 - a. English 316L, 316M, 316N, or 316P and any three-semester-hour course in English or rhetoric and writing.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in the foreign language, unless the language requirement has been fulfilled.
2. Journalism 310F and 311F and additional coursework to fulfill the major requirements.
3. Two courses that meet flag requirements.
4. Enough additional coursework, if needed, to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college academic adviser.

Third Year

1. Two courses that meet flag requirements.
2. Any remaining courses in the core curriculum and the prescribed work.
3. Journalism Level III and IV coursework to fulfill the major requirements. Courses should be chosen with the guidance of a college academic adviser.
4. Journalism 360F or 361F, if the prerequisites have been met.
5. Upper-division electives chosen to support the major.

Fourth Year

1. Upper-division electives chosen to support the major.
2. Any remaining major requirements from Levels III, IV, and V. Courses should be chosen with the guidance of a college academic adviser.
3. Any remaining flag requirements.
4. Any remaining courses in the core curriculum and the prescribed work.

***Changes pending approval by the University of Texas System**

Bachelor of Science in Public Relations

To be awarded the degree of Bachelor of Science in Public Relations, the candidate must complete 120 semester hours of coursework and must fulfill the University's General Requirements (p. 17) for graduation and the Core Curriculum (p. 20) requirements, the college graduation requirements given in Special Requirements of the College (p. 81), and the requirements given in Special Requirements, Prescribed Work, and Major Requirements below.

Areas of Study (optional)

Texas Media Program

This program is designed to help students develop the characteristics that define success in advertising media planning, buying, sales, new media development, and metrics. Because advertising media is a broad and quickly evolving industry, the program offers a variety of courses, allowing students to focus their training and allowing the program itself to adapt to industry developments.

Students who complete Advertising 345J with a grade of at least *B* may apply for admission to the Texas Media program. Applications are distributed during the last week of classes. Admission decisions are made at the end of the semester and students admitted to the program are notified by a Secure Academic Note prior to the next add/drop registration period. Those who are not admitted may apply again the following semester, but students may apply only twice.

All Texas Media students must complete Advertising 377 (Topic 1: *Advanced Media Strategies*), Advertising 377 (Topic 3: *Digital Media*), and Advertising 377M (Topic 7: *Media Negotiation*). In addition, Texas Media students may choose to take at least one additional media upper-division course, which can be counted as an advertising elective. Advertising 377 or 377M may be taken concurrently if all prerequisites are met. Most students complete the program in two semesters.

Texas Sports and Entertainment Program

This program is designed to give students the knowledge to develop decisions in sports communication. The program complements the student's education by developing their proficiency and knowledge in this area of specialization. Students must complete Public Relations 305S, 348S, and at least one other Advertising 378S or Public Relations 378S topic.

The Consent Procedure

Part of the prerequisite for some advertising and public relations courses is consent of the instructor received prior to registering. To be able to register for such a course, a student must first ask for and receive the instructor's consent. The student may be invited to an interview with the instructor or may be asked to provide supporting materials, such as an application or an essay. The student is responsible for knowing the deadline to apply. Consent forms are available online and in the Department of Advertising.

Special Requirements

To enroll in upper-division public relations courses, a student must have completed Advertising 318J in residence with a grade of at least *B* and must have a University grade point average of at least 2.25 and a grade point average in courses in the Moody College of Communication of at least 2.00. Students who do not fulfill these requirements will be dropped from upper-division public relations courses, normally before the twelfth class day. The grade point average requirement is waived for the

transfer student during the first semester of coursework, while he or she is establishing a University grade point average. Students may enroll in Advertising 318J no more than twice.

In addition, a student with a major in public relations must have a grade of at least C in each course taken in the Moody College of Communication that is counted toward the degree and a grade of at least C in each course counted toward the major requirements; if the course is offered on the pass/fail basis only, the student must have the symbol CR.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20) as well as the requirements for the Bachelor of Science in Public Relations (BSPR) listed below under Prescribed Work. In some cases, a course required for the BSPR may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work*

1. Rhetoric and Writing 309K, 309S, or 310.
2. Three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics and leadership flag; and one course with an independent inquiry flag. The same course cannot be used to satisfy the global cultures and cultural diversity flags even if the course carries both flags. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.
3. Three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or nondominant group within the United States. Courses that fulfill this requirement may also be used to fulfill other degree requirements. A partial list of these communication and culture courses is given in the Communication and Culture Requirement (p. 82) section under the Moody College of Communication's Degrees and Programs section; a complete list is available in the college's Student Advising Office before registration for each semester and summer session. The courses are also identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).
4. Students must demonstrate intermediate proficiency in a single foreign language. Courses taken to meet this requirement may not be taken on the pass/fail basis. Credit may be earned by examination for any part of a foreign language sequence. An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult with an academic adviser for information on testing.
5. Statistics and Data Sciences 306, completed in residence. This course also meets the core curriculum mathematics requirement.
6. Twelve semester hours of coursework in business, preferably three hours in marketing, three hours in management, three hours in accounting, and three hours in either legal environment of business or finance. At least six of the twelve hours must be in upper-division coursework. Marketing 338 may not be counted toward this requirement.
7. At least thirty-six semester hours of upper-division coursework.
8. No more than twelve semester hours of transfer credit may be counted toward the major requirements given below.
9. Enough additional coursework to make a total of 120 semester hours. No more than thirty-six semester hours in one field of study may be counted toward the degree.

Major Requirements

1. At least thirty-six but no more than forty-two semester hours of coursework, of which at least twenty-four hours must be upper-division. The following courses are required:
 - a. Advertising 318J, 344K, 345J, Public Relations 317, 348, 350, 352, 353, 367, and 377K. The student must take Advertising 318J, Public Relations 367 and 377K in residence; Advertising 318J must be completed with a grade of at least B.
 - b. Six additional hours in public relations or advertising.
2. At least six semester hours of coursework must be taken in the College of Communication but outside advertising and public relations. No student may count toward the degree more than forty-eight hours (including transfer credit) in College of Communication coursework.
3. No College of Communication course to be counted toward the degree and no course to be counted toward major requirement 1 above may be taken on the pass/fail basis, unless the course is offered only on that basis.

Order and Choice of Work

First Year

1. The student must take three courses from the following group each semester:
 - a. Rhetoric and Writing 306.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in a foreign language.
 - d. Courses that meet flag requirements.
2. Advertising 318J and Public Relations 317.
3. Additional coursework to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college adviser.

First-year students may not take two beginning foreign language courses in the same semester. First-year students may not take more than eight semester hours in one department.

Second Year

1. The student must take three courses from the following group each semester; four are recommended:
 - a. Rhetoric and Writing 306; English 316L, E 316M, E 316N, or E 316P; and Rhetoric and Writing 309K, 309S, or 310.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in the foreign language, unless the language requirement has been fulfilled.
 - d. Courses that meet flag requirements.
2. Statistics and Data Sciences 306
3. Enough additional coursework, if needed, to raise the student's course load to fifteen or sixteen hours each semester. Basic courses in writing are especially recommended.

Third Year

1. Any remaining courses in the core curriculum and the prescribed work.

2. Public Relations 348, Advertising 344K, 345J, Marketing 320F, and additional coursework to fulfill the major requirements.
3. Upper-division electives chosen to support the major. Public relations majors normally emphasize writing courses, such as those in English, journalism, and liberal arts; public speaking courses, such as those in communication studies; psychology; marketing; and/or management.

Fourth Year

1. The remaining courses listed as major requirements.
2. Upper-division electives chosen to support the major.

*Changes pending approval by the University of Texas System

Bachelor of Science in Radio-Television-Film

To be awarded the degree of Bachelor of Science in Radio-Television-Film, the candidate must complete 120 semester hours of coursework and must fulfill the University's General Requirements (p. 17) for graduation and the Core Curriculum (p. 20) requirements, the college graduation requirements given in Special Requirements of the College (p. 81), and the requirements given in Special Requirements, Prescribed Work, and Major Requirements below.

Special Requirements

To enroll in upper-division radio-television-film courses, a student must have a University grade point average of at least 2.25 and a grade point average in courses in the Moody College of Communication of at least 2.00. Students who do not fulfill this requirement will be dropped from upper-division radio-television-film courses, normally before the twelfth class day. The grade point average requirement is waived for the transfer student during the first semester of coursework, while he or she is establishing a University grade point average.

In addition, a student with a major in radio-television-film must have a grade of at least *C* in each course taken in the Moody College of Communication that is counted toward the degree; if the course is offered on the pass/fail basis only, the student must have the symbol *CR*.

To enroll in some upper-division radio-television-film courses, the student must earn specific grades in prerequisite courses. In addition, enrollment in a few upper-division courses requires the consent of the instructor. Course prerequisites and the departmental consent process are described in Department of Radio-Television-Film (p. 115).

It is not recommended that a student majoring in radio-television-film register for more than nine semester hours in radio-television-film in one long-session semester or more than six semester hours in a summer session.

Core Curriculum

All students must complete the University's Core Curriculum (p. 20), as well as the requirements for the Bachelor of Science in Radio-Television-Film listed below under Prescribed Work. In some cases, a course required for the BSRTF may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work*

1. Three semester hours in English or rhetoric and writing in addition to the courses required by the core curriculum.
2. Three courses with a writing flag; one course with a quantitative reasoning flag; one course with a global cultures flag; one course with a cultural diversity in the United States flag; one course with an ethics

and leadership flag; and one course with an independent inquiry flag. The same course cannot be used to satisfy the global cultures and cultural diversity flags even if the course carries both flags. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

3. Three semester hours of coursework in the Moody College of Communication dealing with the study of communication issues concerning at least one minority or nondominant group within the United States. Courses that fulfill this requirement may also be used to fulfill other degree requirements. A partial list of these communication and culture courses is given in the Communication and Culture Requirement (p. 82) section under the Moody College of Communication's Degrees and Programs section; a complete list is available from the college's Student Advising Office before registration for each semester and summer session. The courses are also identified in the *Course Schedule*.
4. Students must demonstrate intermediate proficiency in a single foreign language. Courses taken to meet this requirement may not be taken on the pass/fail basis. Credit may be earned by examination for any part of a foreign language sequence. An extensive foreign language testing program is available at the University. Students with knowledge of a language are encouraged to take appropriate tests both to earn as much credit as possible and to be placed at the proper level for further study. Students should consult with an academic adviser for information on testing.
5. At least thirty-six semester hours of upper-division coursework.
6. No more than twelve semester hours of transfer credit in radio-television-film may be counted toward the degree.
7. Enough additional coursework to make a total of 120 semester hours. No more than forty-two hours in radio-television-film and no more than thirty-six hours in any other single field may be counted toward the degree.

Major Requirements

1. At least thirty but no more than forty-two semester hours of radio-television-film, of which at least eighteen hours must be upper-division. All students must take twelve hours of lower-division coursework in radio-television-film, and two courses chosen from the following: Radio-Television-Film 324F, 330K, 331J, 331K, 331M, 331N, 331P, 334, 335, 342, 342T, 345, 347C, 348, 359, 359S, 365, and 370.
2. At least six semester hours of coursework must be taken in the Moody College of Communication but outside the department. However, no student may count toward the degree more than forty-eight hours (including transfer credit) in Moody College of Communication coursework.
3. No Moody College of Communication course to be counted toward the degree may be taken on the pass/fail basis, unless the course is offered only on that basis.

Areas of Study

The curriculum in radio-television-film is designed to prepare students to be versatile and well-equipped for positions in fields related to media. The program aims to train students to analyze the role of communication media in societies, to write and speak well, and to create media projects and programs. The curriculum is multidisciplinary and includes courses in the history and analysis of media systems, including film, television, and new media; global media; production and screenwriting; digital media; critical and cultural studies; ethnic, gender, and minority studies; and communication technologies and policies. Each student's program of study is planned by the student and an undergraduate adviser to meet the student's academic and professional goals. Because upper-division

courses require specific lower-division prerequisites, students should consider their lower-division preparation carefully. For example, many production courses require completion of Radio-Television-Film 317 and 318 with a grade of *B-* or better, while nonproduction courses may require either Radio-Television-Film 314 or 316, or 309.

Students who plan to take production courses should be aware that these courses may require five to ten hours of independent production or studio time a week in addition to the class meetings listed in the *Course Schedule*. All costs of production, such as the cost of film and film processing, actors' fees, and location fees, are borne by the student. The cost of most equipment is covered by tuition.

Order and Choice of Work

First Year

1. The student must take three courses from the following group each semester:
 - a. Rhetoric and Writing 306.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in a foreign language.
 - d. Courses that meet flag requirements.
2. Two of the following: Radio-Television-Film 305, 309, 312C, 314, 316, 316M.
3. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester. Courses should be chosen with the guidance of a college adviser.

First-year students may not take two beginning foreign language courses in the same semester. First-year students may not take more than eight semester hours in one department.

Second Year

1. The student must take three courses from the following group each semester; four are recommended:
 - a. English 316L, 316M, 316N, or 316P, and any three-semester-hour course in English or rhetoric and writing.
 - b. Courses to be counted toward the American history, American and Texas government, social and behavioral sciences, mathematics, and science and technology requirements of the core curriculum.
 - c. Courses in the foreign language, unless the language requirement has been fulfilled.
 - d. Courses that meet the flag requirements.
2. Two lower-division courses in radio-television-film, including those that are prerequisite to the area(s) in which the student plans to take upper-division courses.
3. Enough additional coursework, if needed, to raise the student's course load to fifteen or sixteen hours each semester.

Third and Fourth Years

1. Any remaining courses in the core curriculum and the prescribed work.
2. Two upper-division radio-television-film courses to be counted toward requirement 1 of the major requirements.
3. Twelve to twenty-four semester hours of upper-division coursework in radio-television-film.
4. Enough additional coursework to raise the student's course load to fifteen or sixteen hours each semester.

***Changes pending approval by the University of Texas System**

Courses

The faculty has approval to offer the following courses in the academic years 2014–2015 and 2015–2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Communication

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Communication: COM

Lower-Division Courses

COM 301C. Freshman Seminar.

Restricted to first-semester freshmen. Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors. Two lecture hours and one discussion hour a week for one semester.

COM 102D, 202D, 302D. Connecting Internship Experience.

Supervised internship experience related to interdisciplinary themes of a Bridging Disciplines Program. Internships may be on or off campus, be paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. For 102D, three hours of fieldwork a week for one semester; for 202D, six hours of fieldwork a week for one semester; for 302D, ten hours of fieldwork a week for one semester. With consent of the Bridging Disciplines Program research coordinator, may be repeated once for credit. May not be counted toward any College of Communication degree. Prerequisite: Admission to the Bridging Disciplines Programs.

COM 309. Communication Technology and Society.

Same as Radio-Television-Film 309. Study of communication technologies, from writing to the Internet; their uses in interpersonal, group, mass, and international contexts; and the impact of technologies on work. Three lecture hours and one discussion hour a week for one semester.

COM 310. Topics in Texas Sports and Media.

Introduction to various contemporary and historical issues, emphasizing interdisciplinary perspectives and critical discourse. Three lecture hours a week for one semester. Communication 310 and Journalism 313S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

COM 314. Special Topics in Communication.

Contemporary issues and practices in communication. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

COM 115, 215, 315. Topics in Leadership and Communication.

Restricted to students in the College of Communication. Contemporary issues, practices, and skills related to leadership and communication. For 115, two lecture hours a week for eight weeks; for 215, two lecture hours a week for one semester; for 315, three lecture hours a week for one semester. May be repeated for credit when the topics vary.

COM 316 (TCCN: COMM 1316). Photographic Communication.

Introduction to photographic technique and recent trends, evaluation, visual design, and use of images in the media. Students must provide their own 35-mm single-lens reflex or digital camera that can be operated under manual mode and with off-camera flash. Three lecture hours and one and one-half laboratory hours a week for one semester. Communication 316 and Journalism 316 may not both be counted.

COM 316M. Race, Ethnicity, and the Media.

Same as Radio-Television-Film 316M. Critical review of contemporary and historical media images of, and discourses on, race and ethnicity. Introduction to relevant communication research and institutions. Three lecture hours and one discussion hour a week for one semester. Fulfills the communication and culture requirement in the College of Communication.

COM 118C, 218C, 318C. Forum Seminar Series.

Restricted to freshmen and sophomores. Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse. For 118C, two lecture hours a week for eight weeks; for 218C, two lecture hours a week for one semester; for 318C, three lecture hours a week for one semester, or two lecture hours and one hour of supervised research a week for one semester. May be repeated for credit when the topics vary.

COM 119, 219, 319. International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Communication 119, 219, 319, and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

COM 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Communication.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

COM 320. Advanced Topics in Texas Sports and Media.

Critical assessment of various contemporary and historical issues, emphasizing interdisciplinary perspectives. Three lecture hours a week for one semester. Communication 320 and Journalism 326S may not both be counted unless the topics vary. May be repeated for credit when the

topics vary. Prerequisite: Completion of at least sixty semester hours of coursework and a University grade point average of at least 2.25.

COM 324. Topics and Skills in Communication.

Contemporary issues, practices, and skills related to communication and the entertainment industries, including studies in the business of entertainment, the creative process, and contemporary Hollywood cinema. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, three hours of lower-division coursework in radio-television-film, admission to the Semester in Los Angeles program, and a University grade point average of at least 2.25.

Topic 2: Development Process of Film and Television. Only one of the following may be counted: Communication 324 (Topic: Development Process of Film and Television), 324 (Topic 2), Radio-Television-Film 348 (Topic: Development Process of Film and Television).

Topic 3: Inside the Music Industry. Only one of the following may be counted: Communication 324 (Topic: Inside The Music Industry), 324 (Topic 3), Radio-Television-Film 348 (Topic: Inside The Music Industry).

Topic 4: New Media and Emerging Entertainment. Only one of the following may be counted: Communication 324 (Topic: New Media and Emerging Entertainment), 324 (Topic 4), Radio-Television-Film 348 (Topic: New Media and Emerging Entertainment).

Topic 5: Careers in Entertainment. Only one of the following may be counted: Communication 324 (Topic: Careers in Entertainment), 324 (Topic 5), Radio-Television-Film 324L (Topic: Careers in Entertainment)

COM 125, 225, 325. Topics in Leadership and Communication.

Restricted to students in the College of Communication. Contemporary issues, practices, and skills related to leadership and communication. For 125, two lecture hours a week for eight weeks; for 225, two lecture hours a week for one semester; for 325, three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

COM 325S. Issues in Sports Media.

Special topics in the role and convergence of sports and the media. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Sports, Media, and the Integration of American Society.

Role and convergence of sports, entertainment, and the media in American society and culture from Reconstruction through the present, including the role of institutions in these categories and their relationship to the integration of American society. Only one of the following may be counted: Advertising 378 (Topic: Sports, Media, and the Integration of American Society), Communication 325 (Topic: Sports, Media, and the Integration of American Society), 325S (Topic 1), Journalism 359T (Topic: Sports, Media, and the Integration of American Society), Public Relations 378 (Topic: Sports, Media, and the Integration of American Society). Prerequisite: Upper-division standing and a University grade point average of at least 2.25.

COM 129, 229, 329, 429, 529, 629. International Learning Seminars.

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Communication 129, 229, 329, 429, 529, 629 and Undergraduate Studies 119 may not both be counted unless the topics

vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

COM 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Communication.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

COM 330. Research in Texas Sports and Media.

Same as Journalism 339S. Restricted to journalism majors. Supervised research with a faculty member; research may consist of an individual project or assisting a faculty research project. Hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing and a University grade point average of at least 2.25; and Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

COM 350. Communication Internship.

Restricted to students in the College of Communication. Practical work experience related to the student's area of interest in the communication field. An average of 10 hours of work a week, for a total of at least 150 hours a semester or summer term. May not be taken by students who have credit for any three-semester-hour communication internship course. Offered on the pass/fail basis only. Prerequisite: Completion of the prerequisite for the three-semester-hour internship course in the student's major department.

COM 350L. Semester in Los Angeles Internship.

Practical work experience in the entertainment industry in Los Angeles. An average of 10 hours of work a week, for a total of at least 150 hours a semester or summer term. Offered on the pass/fail basis only. Prerequisite: Upper-division standing, three hours of lower-division coursework in radio-television-film, admission to the Semester in Los Angeles program, and a University grade point average of at least 2.25.

COM 360. Communication Research Design.

An introduction to sampling, measurement, data collection, and analytic procedures as applied to research problems in communication. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

COM 370. Advanced Study in Communication.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, admission to the College of Communication Senior Fellows Program, and consent of instructor.

COM 178. Communication Internship.

Restricted to students in the College of Communication. Practical work experience related to the student's area of interest in the communication field. An average of 10 hours of work a week, for a total of at least 150 hours a semester or summer term. May be repeated, but only one hour may be counted toward a degree in the College of Communication. Offered on the pass/fail basis only. Prerequisite: Completion of a three-hour internship course in the College of Communication.

Department of Advertising

Because prerequisites are subject to change, students should consult the *Course Schedule* before registering.

To enroll in any upper-division advertising course, an advertising major must have fulfilled the Special Requirements (p. 84) for the Bachelor of Science in Advertising.

Advertising: ADV

Lower-Division Courses

ADV 303. Advertising and Popular Culture.

An introduction to the role advertising plays in American society, and the values and relationships offered in the messages that are delivered. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising degree or the Bachelor of Science in Public Relations degree.

ADV 304. Advertising on the Internet.

The defining concepts, differences, and current practices of advertising on the Internet. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. May not be counted toward the Bachelor of Science in Advertising degree or the Bachelor of Science in Public Relations degree.

ADV 305. Fundamentals of Advertising.

Fundamentals and practices of advertising in relation to economies, societies, and mass communication. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising or Bachelor of Science in Public Relations degrees.

ADV 305S. Introduction to Integrated Communication for Sports.

Same as Public Relations 305S. Examination of the mass media industry in relation to the field of sports. Focus on the "off-the-field" industries of advertising, marketing, and public relations that impact sports; rights fees contracts; pre-game shows; gameday production; in-stadium activities; and press coverage. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 305S, 378 (Topic 7: Integrated Communication for Sports), Kinesiology 352K (Topic: Integrated Communication for Sports), Public Relations 305S.

ADV 309R. Introduction to Advertising and Public Relations Research.

Same as Public Relations 309. Restricted to advertising and public relations majors. Introduction to concepts and methods of statistics, with emphasis on analyzing personal and group behaviors. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 309R, 378 (Topic: Introduction to Advertising and Public Relations Research), Public Relations 309, 378 (Topic: Topic: Introduction to Advertising and Public Relations Research).

ADV 314. Social and Ethical Issues.

Designed to prepare students to identify, analyze, and respond to social and ethical issues in advertising and public relations. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising or the Bachelor of Science in Public Relations degrees.

ADV 315. History and Development of Advertising.

The evolution and development of advertising in the United States in a social, historical, economic, and cultural context. Three lecture hours a week for one semester.

ADV 316. Creativity and American Culture.

Same as Public Relations 316. A cross-disciplinary view of the creative process and creative products. The conceptual core of film, fine arts, advertising, architecture, and literature. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising or the Bachelor of Science in Public Relations. Fulfills the communication and culture requirement in the College of Communication.

ADV 318J. Introduction to Advertising and Integrated Brand Communication.

The functions of advertising; role in marketing/communications mix; economic and social influence; advertising institutions and media; campaigns and appropriations; retail and business-to-business aspects. Three lecture hours and one discussion hour a week for one semester. Students may not enroll in Advertising 318J more than twice.

ADV 319. Psychology of Advertising.

A review of basic findings of the behavioral sciences dealing with perception, personality, group behavior, psychological appeals, and their application to advertising as persuasive communication. Three lecture hours a week for one semester.

Upper-Division Courses

ADV 325. Introduction to Advertising Creativity.

Restricted to advertising and public relations majors. Development of concepts and problem-solving techniques for print and broadcast advertising design and copywriting. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Advertising 318J with a grade of at least B.

ADV 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Advertising.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Advertising. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

ADV 334. International Advertising.

Major issues in international advertising and advertising directed at cultural minorities within countries. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

ADV 336. Multicultural Issues in Advertising and Public Relations.

Special topics exploring the impact of the major social, economic, and cultural aspects of advertising and public relations on ethnic and cultural groups in the United States. The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Advanced Issues in Multicultural Markets. Research in diversity in advertising; understanding human diversity; trends in United States demographics. Three lecture hours a week for one semester. Advertising 336 (Topic 1) and 378 (Topic 2: Advanced Issues in Multicultural Markets) may not both be counted. Prerequisite: Upper-division standing.

Topic 2: Consumer Discrimination in the Marketplace. Consumer discrimination of ethnic and racial groups in the marketplace. Three lecture hours a week for one semester. Advertising 336 (Topic 2) and 378 (Topic 9: Consumer Discrimination in the Marketplace) may not both be counted. Prerequisite: Upper-division standing.

Topic 3: Advertising and Black Representation. Focus on the opportunities created by the growing number of African American consumers who express their social identities in the marketplace. Three lecture hours a week for one semester. Advertising 336 (Topic 3) and 378 (Topic 12: Advertising and Black Representation) may not both be counted. Prerequisite: Upper-division standing.

Topic 4: Consumer Insight. A framework for analyzing consumer cognition, attitudes, and behavior by looking at both material from the behavioral sciences and techniques of consumer analysis used in marketing practice. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 336 (Topic 4), 378 (Topic 25: Consumer Insight), 391K (Topic: Consumer Insight). Prerequisite: Upper-division standing.

ADV 341S. Research in Sports Communication and Media.

Same as Public Relations 341S. An introduction to advertising and public relations research and methodology for sports. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and a University grade point average of at least 2.25.

ADV 342. Advertising Copywriting.

Copywriting for print and broadcast media. Methods for developing creative advertising concepts, strategies, and executions for print, radio, and television. Emphasis on writing rather than on art direction. Three lecture hours a week for one semester. Prerequisite: Advertising 325 with a grade of at least C, and instructor's approval of the student's previous work in advertising courses.

ADV 343K. Portfolio I.

Basic advertising art direction and copywriting skills, including indications for graphics, headlines, and body copy. Three lecture hours and three studio hours a week for one semester. Prerequisite: Advertising 325 with a grade of at least B, and admission to the Texas Creative program.

ADV 344K. Advertising Research.

Introduction to social science research methods as used in advertising and marketing; emphasis on survey research and secondary data. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Upper-division standing; Advertising 318J with a grade of at least B; and Advertising 309R, Public Relations 309, Statistics 309, or Statistics and Scientific Computation 306 with a grade of at least C. Advertising majors must also have credit or registration for Advertising 325.

ADV 345J. Advertising Media Planning Foundations.

Media characteristics and media-market measurements; development of media plans. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Upper-division standing; Advertising 318J with a grade of at least B; and Advertising 309R, Public Relations 309, Statistics 309, or Statistics and Scientific Computation 306 with a grade of at least C. Advertising majors must also have credit or registration for Advertising 325.

ADV 447. Computer Imaging Topics.

Introduction to computer graphics with applications to advertising and other disciplines. Students interact with computer systems to produce artwork and design portfolios. Three lecture hours and three laboratory hours a week for one semester. May be repeated for credit when the

topics vary. Prerequisite: Advertising 318J with a grade of at least B and consent of instructor received prior to registering.

Topic 1: Advertising Design for Interactive Media.

ADV 348. Design of Integrated Communications.

Theory and practice of the graphic arts and production, including conception and design; typography; engraving; preparation of copy, art, and photographs; paper; color psychology; and printing. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

ADV 348S. The Business of Sports Media.

Same as Journalism 348G and Public Relations 348S. Examination of the business of sports-related media, including over-the-air television, cable, satellite television, print, radio, social media, and internet-based media, and the impact of such media on sports presentation and development, professional franchises, colleges, and conferences. Emphasis on how the business of sports media generates revenue and content, and the business models for each type of media, the challenges to such models, and the likely future changes to them. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 348S, 378 (Topic: The Business of Sports Media), Communication 325 (Topic: The Business of Sports Media), Journalism 348G, 349T (Topic: The Business of Sports Media), Public Relations 348S, 378 (Topic: The Business of Sports Media). Prerequisite: Upper-division standing and a University grade point average of at least 2.25; additional prerequisite for journalism majors: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

ADV 350. Advertising Internship.

Practical work experiences in advertising sales, creative management, and research with advertisers, agencies, media, or auxiliary services. An average of twelve hours of work a week, for a total of 180 hours a semester or summer session. Offered on the pass/fail basis only. Prerequisite: Advertising 344K and 345J with a grade of at least C in each.

ADV 350S. Internship in Sports Media.

Same as Public Relations 350S. Restricted to Texas Program in Sports and Media students. Practical work experience in sports media. Internship to be arranged by student and approved by instructor. The equivalent of three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising or the Bachelor of Science in Public Relations degrees. Offered on the pass/fail basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.25; Advertising 305S or Public Relations 305S; and three additional hours from the Sports Media Certificate approved coursework list.

ADV 151. Advertising Practicum.

Internship and discussion hours to be arranged. Offered on the pass/fail basis only. Prerequisite: Advertising 350 or 468K, consent of departmental internship coordinator, and completion of department requirements for enrollment in an internship course.

ADV 353. Advertising and Public Relations Law and Ethics.

Same as Public Relations 353. The equivalent of three lecture hours a week for one semester. Only one of the following may be counted: Advertising 353, 371J, 376, Public Relations 353, 371J, 376. Fulfills the communication and culture requirement in the College of Communication. Prerequisite: For advertising majors, Advertising 318J with a grade of at least B; for public relations majors, Public Relations 319; for others, none.

ADV 366. Special Topics in Advertising.

Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising degree. May be repeated for credit when the topics vary.

ADV 368C. Advertising Senior Seminar.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Credit or registration for Advertising 344K and 345J, and written consent of instructor received prior to registering.

Topic 1: Agency Practices.

Topic 2: Affect and Emotion.

Topic 3: Advertising Ethics.

ADV 468K. Portfolio II.

Intermediate advertising art direction and copywriting; special emphasis on execution skills and concepts. Three lecture hours and three studio hours a week for one semester. Prerequisite: Advertising 343K and consent of the Texas Creative program faculty.

ADV 468L. Portfolio III.

Advanced advertising art direction and advertising creative concepts. Three lecture hours and three studio hours a week for one semester. With consent of instructor, may be repeated once for credit. Prerequisite: Advertising 468K and consent of the Texas Creative program faculty.

ADV 370J. Integrated Communications Management.

Cases and problems dealing with the management of advertising and promotional programs; media and creative strategies; consumer, retail, industrial, and public service applications. Three lecture hours a week for one semester. Advertising 370J and Public Relations 367 may not both be counted. Prerequisite: Advertising 344K and 345J with a grade of at least C in each; and Marketing 320F or 337 with a grade of at least C.

ADV 373. Integrated Communications Campaigns.

Concept of media mix; matching product, consumer, media profiles; conception, research, planning, and execution of advertising campaigns; special emphasis on advanced copywriting, layout, and production for print and broadcast media. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 373, 373H, Public Relations 377H, 377K. Prerequisite: Advertising 370J.

ADV 373H. Integrated Communications Campaigns: Honors.

Restricted to students in the Advertising or Public Relations Honors program. The concept of media mix; matching product, consumer, and media profiles; and the conception, research, planning, and execution of advertising campaigns. Special emphasis on advanced copywriting, layout, and production for print and broadcast media. Students usually participate in major national contests involving brand development in advertising strategies. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 373, 373H, Public Relations 377H, 377K. Offered on the letter-grade basis only. Prerequisite: Upper-division standing, Advertising 370J or Public Relations 367, a University grade point average of at least 3.50, admission to the departmental honors program, and consent of the undergraduate adviser.

ADV 374. Advanced Studies in Media and Negotiations.

ADV 475. Portfolio IV.

Designed to enhance the intellectual and philosophical framework of students in the Texas Creative program. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Advertising 468L and consent of the Texas Creative program faculty.

ADV 377. Advertising Media Topics.

Three lecture hours a week for one semester or as required by the topic. May be repeated for credit when the topics vary. Prerequisite: Admission to the Texas Media program and consent of instructor. Additional prerequisites vary with the topic and are given in the Course Schedule.

Topic 1: Advanced Media Strategies. Required for students in the Texas Media program.

Topic 2: One-to-One Advertising on the Internet. Students may be added to the class on the first class day. Additional prerequisite: Experience using HTML.

Topic 3: Digital Media. Students may be added to the class on the first class day. Additional prerequisite: Experience using HTML.

Topic 4: Media Alliances. Focuses on the partnerships and tools used in generating, investigating, and evaluating unique brand contact points such as product placement, sponsorships, and other promotional media activities. Includes co-branding efforts, client-generated media venues, and public relations alliances from a media planning perspective.

Topic 5: Media Show. Designed to help students remove the traditional barriers between message development and delivery in their media work. Students have the opportunity to show their work to industry professionals across a variety of venues. Three lecture hours and three studio hours a week for one semester.

Topic 6: Advanced Media Research. Only one of the following may be counted: Advertising 377 (Topic: Media Research), 377 (Topic 6), 377M (Topic 6: Media Research).

ADV 377M. Media Studies.

Topics in media and its effects on advertising and public relations strategies. The equivalent of three lecture hours a week for one semester; additional hours may be required for some topics. Advertising 377M and Public Relations 377M may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Advertising 345J with a grade of at least C, and consent of instructor.

Topic 1: Advanced Media Research. Development of data analysis skills using various analytical techniques. Three lecture hours a week for one semester. Advertising 377M (Topic 1) and 378 (Topic 13: Advanced Media Research) may not both be counted. Additional prerequisite: Upper-division standing.

Topic 2: Advanced Studies in Media Sales. Same as Public Relations 377M (Topic 2: Advanced Studies in Media Sales). Examination of advertising media sales beyond audience measurement techniques, and quantitative and qualitative data. The equivalent of three lecture hours a week for one semester. Only one of the following may be counted: Advertising 377M (Topic 2), 378 (Topic 14: Advanced Studies in Media Sales), Public Relations 377M (Topic 2), 378 (Topic 2: Advanced Studies in Media Sales). Additional prerequisite: Upper-division standing, Advertising 345J with a grade of at least C, and consent of instructor.

Topic 3: Digital Metrics. Examines the evolving scope of digital metrics and analytics by looking at three dimensions of digital media: business, communications, and technology. Three lecture hours a week for one semester. Advertising 377M (Topic 3) and 378 (Topic 16: Digital Metrics) may not both be counted. Additional prerequisite: Upper-division standing.

Topic 4: Nontraditional New Media Concepts. Restricted to students in the Texas Creative program. Examination of how we consume and respond to media as it changes with new technology. Three lecture hours a week for one semester. Advertising 377M (Topic 4) and 378 (Topic 18: Nontraditional New Media Concepts) may not both be counted. Additional prerequisite: Upper-division standing.

Topic 5: Media Metrics. Three lecture hours a week for one semester. Additional prerequisite: Upper-division standing.

Topic 7: Media Negotiations. Restricted to advertising and public relations majors in the Texas Media program. Additional prerequisite: Upper-division standing.

Topic 8: Digital Insights. Exploration of the terminology, measurement methods, and tools necessary for developing actionable management insights for digital content creation, promotion, and public relations. The equivalent of three lecture hours a week for one semester.

Topic 9: Media Investments. An examination of media investments, from both a buying and selling perspective, for management of an activation role on the agency, vendor, or client side of the media business. The equivalent of three lecture hours a week for one semester.

Topic 10: Media Showcase. Designed to help students remove the traditional barriers between message development and delivery in their media work. Students have the opportunity to show their work to industry professionals across a variety of venues. The equivalent of three lecture hours a week for one semester.

ADV 378. Advanced Studies in Advertising.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, and a University grade point average of at least 2.25; additional prerequisites vary with the topic.

Topic 4: Direct Marketing. Additional prerequisite: Marketing 320F.

Topic 10: Copywriting. Additional prerequisite: Advertising 325 with a grade of at least C, and consent of instructor.

Topic 11: Leadership and Ethics.

Topic 15: Creative Project: Writing. Additional prerequisite: Advertising 325 with a grade of at least C, and consent of instructor.

Topic 17: Integrated Communication for Nonprofit Organizations.

Topic 19: Online Consumer Research. Additional prerequisite: Advertising 344K and consent of instructor.

Topic 20: Account Planning. Additional prerequisite: Advertising 344K and 345J.

Topic 22: Psychology of Video Game Advertising.

Topic 23: Technology Marketing and Advertising.

Topic 24: Digital Creative Portfolio. Additional prerequisite: Advertising 325 with a grade of at least C, and consent of instructor.

Topic 26: Consumer Psychology and New Media.

Topic 27: Advanced Media Research, Insights, and Analysis. Additional prerequisite: Advertising 344K and consent of instructor.

Topic 28: Online Consumer Behavior and Research. Additional prerequisite: Advertising 344K and consent of instructor.

ADV 378S. Special Topics in Sports Media.

Topics in sports media related to issues in traditional and new media as they effect sports and entertainment advertising and public relations. The equivalent of three lecture hours a week for one semester, or as required by the topic. Advertising 378S and Public Relations 378S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and a University grade point average of at least 2.25; additional prerequisites vary with the topic.

Topic 1: Advertising and Public Relations for Sports. Same as Public Relations 378S (Topic 1: Advertising and Public Relations for Sports). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 30: Advertising and Public Relations for Sports), 378S (Topic 1), Public Relations 378 (Topic 30: Advertising and Public Relations for Sports), 378S (Topic 1). **Topic 2: Legal Aspects of Sports and Media.** Same as Public Relations 378S (Topic 2: Legal Aspects of Sports and Media). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 31: Legal Aspects of Sports and

Media), 378S (Topic 2), Public Relations 378 (Topic 31: Legal Aspects of Sports and Media), 378S (Topic 2).

Topic 3: Return on Investment of Sports Media. Same as Public Relations 378S (Topic 3: Return on Investment of Sports Media). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 32: Sponsorships, Endorsements, Advertising, and Promotional Events for Sports and Entertainment), 378S (Topic 3), Public Relations 378 (Topic 32: Sponsorships, Endorsements, Advertising, and Promotional Events for Sports and Entertainment), 378S (Topic 3).

Topic 4: Analysis of Sports and Entertainment Audiences. Same as Public Relations 378S (Topic 4: Analysis of Sports and Entertainment Audiences). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 33: Analysis of Sports and Entertainment Audiences), 378S (Topic 4), Public Relations 378 (Topic 33: Analysis of Sports and Entertainment Audiences), 378S (Topic 4).

Topic 5: Ethics and Social Issues in Sports Branding. Same as Public Relations 378S (Topic 5: Ethics and Social Issues in Sports Branding). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 34: Sports, Ethics, and Social Issues), 378S (Topic 5), Public Relations 378 (Topic 34: Sports, Ethics, and Social Issues), 378S (Topic 5).

Topic 6: Sports Audiences and Nontraditional Media. Same as Public Relations 378S (Topic 6: Sports Audiences and Nontraditional Media). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 35: Sports Audiences and Nontraditional Media), 378S (Topic 6), Public Relations 378 (Topic 35: Sports Audiences and Nontraditional Media), 378S (Topic 6).

Topic 7: Contributions of Sports and Entertainment to Education and Health. Same as Public Relations 378S (Topic 7: Contributions of Sports and Entertainment to Education and Health). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 36: Contribution of Sports and Entertainment to Education and Health), 378S (Topic 7), Public Relations 378 (Topic 36: Contribution of Sports and Entertainment to Education and Health), 378S (Topic 7).

Topic 8: College Sports Media. Same as Public Relations 378S (Topic 8). An examination of the history of college sports media, with an emphasis on the evolution of sports coverage from NCAA-controlled limited broadcasting of football and basketball, to present day intercollegiate athletics coverage available via multiple outlets.

Topic 9: Sports Contract Negotiation Techniques. Same as Public Relations 378S (Topic 9). Strategies and techniques for successfully negotiating contracts, with a special emphasis on the negotiation of sports contracts.

Topic 10: Leadership and Administration in Sports Organizations. Same as Public Relations 378S (Topic 10). Designed to develop marketing skills related to events, programs, products, and facilities in the sports management field.

Topic 11: Sports and Social Media. Same as Public Relations 378S (Topic 11). Designed to provide an understanding of and experience with the components and best practices of social media, marketing, and communications as they relate to sports entities and the sports field as a whole.

Topic 12: Sports Audiences. Same as Public Relations 378S (Topic 12). An exploration of marketing innovations in sports to attract audiences, and the use of sports media by advertisers, sponsors, and other entities to target various customer groups.

ADV 379. Integrated Communication for Sports and Entertainment.

Three lecture hours a week for one semester.

ADV 379H. Honors Tutorial Course.

Conference course of intensive study, planned by the Advertising Honors Committee; research and the writing of a substantial paper on a special advertising topic. Supervised individual special studies. Prerequisite: Admission to the departmental honors program and consent of the undergraduate adviser.

ADV 179J, 279J, 379J, 479J. Advertising Problems.

Individual instruction. Some topics may require additional laboratory hours. May be repeated for credit when the topics vary. Prerequisite: Written consent of instructor received prior to registering.

Topic 1: Supervised Individual Special Studies. Supervised individual special studies for which separate courses are not available.

Topic 2: Supervised Individual Creative Studies. Supervised individual creative studies for which separate courses are not available. Additional laboratory hours to be arranged.

Topic 3: Supervised Individual Media Studies. Supervised individual media studies for which separate courses are not available. Additional laboratory hours to be arranged. Additional prerequisite: Advertising 345J.

Public Relations: P R

Lower-Division Courses

P R 305. Fundamentals of Public Relations.

Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Public Relations degree or the Bachelor of Science in Advertising degree.

P R 305S. Introduction to Integrated Communication for Sports.

Same as Advertising 305S. Examination of the mass media industry in relation to the field of sports. Focus on the "off-the-field" industries of advertising, marketing, and public relations that impact sports; rights fees contracts; pre-game shows; gameday production; in-stadium activities; and press coverage. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 305S, 378 (Topic 7: Integrated Communication for Sports), Kinesiology 352K (Topic: Integrated Communication for Sports), Public Relations 305S.

P R 309. Introduction to Advertising and Public Relations Research.

Same as Advertising 309R. Restricted to advertising and public relations majors. Introduction to concepts and methods of statistics, with emphasis on analyzing personal and group behaviors. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 309R, 378 (Topic: Introduction to Advertising and Public Relations Research), Public Relations 309, 378 (Topic: Introduction to Advertising and Public Relations Research).

P R 316. Creativity and American Culture.

Same as Advertising 316. A cross-disciplinary view of the creative process and creative products. The conceptual core of film, fine arts, advertising, architecture, and literature. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising or the Bachelor of Science in Public Relations. Fulfills the communication and culture requirement in the College of Communication.

P R 317. Writing for Public Relations.

Restricted to public relations majors. Introduction to writing skills for the media, including readability, clarity, verification, and style. Three lecture

hours and one laboratory hour a week for one semester. Prerequisite: Advertising 318J with a grade of at least B.

P R 319. Principles of Public Relations.

Restricted to public relations majors. Principles, theory, history, ethics, and practice of public relations in a variety of organizational settings; elements of strategic management. Three lecture hours a week for one semester. Public Relations 319 and 331 may not both be counted. Prerequisite: Advertising 318J with a grade of at least B.

Upper-Division Courses

P R 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Public Relations.

Enrollment in this course is to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Public Relations; transfer credit is awarded for work in an affiliated studies program. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

P R 331. Fundamentals of Media Relations.

Strategic public relations decisions as they relate to media; investigation of ethical principles and norms regulating activity of public relations. Three lecture hours a week for one semester. May not be counted toward the major requirement for the Bachelor of Science in Public Relations degree. Public Relations 319 and 331 may not both be counted. Prerequisite: Advertising 318J with a grade of at least B.

P R 341S. Research in Sports Communication and Media.

Same as Advertising 341S. An introduction to advertising and public relations research and methodology for sports. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and a University grade point average of at least 2.25.

P R 348. Public Relations Techniques.

Analysis and production of print, electronic, and oral messages to achieve organizational objectives; fundamentals of media relations; Internet applications. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Upper-division standing; Public Relations 319 (or 333) or 331; and Journalism 315 or Public Relations 317 with a grade of at least C.

P R 348S. The Business of Sports Media.

Same as Advertising 348S and Journalism 348G. Examination of the business of sports-related media, including over-the-air television, cable, satellite television, print, radio, social media, and internet-based media, and the impact of such media on sports presentation and development, professional franchises, colleges, and conferences. Emphasis on how the business of sports media generates revenue and content, and the business models for each type of media, the challenges to such models, and the likely future changes to them. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 348S, 378 (Topic: The Business of Sports Media), Communication 325 (Topic: The Business of Sports Media), Journalism 348G, 349T (Topic: The Business of Sports Media), Public Relations 348S, 378 (Topic: The Business of Sports Media). Prerequisite: Upper-division standing and a University grade point average of at least 2.25; additional prerequisite for journalism majors: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

P R 350. Public Relations Internship.

Restricted to public relations majors. Internship to be arranged by student and approved by instructor. Internship to be arranged. May be taken only

once. Offered on the pass/fail basis only. Prerequisite: Advertising 344K, 345J, and Public Relations 348 with a grade of at least C in each.

P R 350S. Internship in Sports Media.

Same as Advertising 350S. Restricted to Texas Program in Sports and Media students. Practical work experience in sports media. Internship to be arranged by student and approved by instructor. The equivalent of three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Advertising or the Bachelor of Science in Public Relations degrees. Offered on the pass/fail basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.25; Advertising 305S or Public Relations 305S; and three additional hours from the Sports Media Certificate approved coursework list.

P R 151. Public Relations Internship.

Designed for students who have completed a three-semester-hour internship in public relations. Internship and discussion hours to be arranged. Offered on the pass/fail basis only. Prerequisite: Public Relations 350; consent of the public relations internship coordinator; and completion of the major requirements for enrollment in an internship course.

P R 352. Strategies in Public Relations.

Restricted to public relations majors. Strategies relating to public relations disciplines, including the management of external, internal, community, nonprofit, and media issues, and public relations marketing programs. Three lecture hours a week for one semester. Prerequisite: Public Relations 319 or 331, and 348 with a grade of at least C in each.

P R 353. Advertising and Public Relations Law and Ethics.

Same as Advertising 353. The equivalent of three lecture hours a week for one semester. Only one of the following may be counted: Advertising 353, 371J, 376, Public Relations 353, 371J, 376. Fulfills the communication and culture requirement in the College of Communication. Prerequisite: For advertising majors, Advertising 318J with a grade of at least B; for public relations majors, Public Relations 319; for others, none.

P R 367. Integrated Communications Management.

Public relations as a managerial problem-solving process; strategic management of programs to enhance public-organizational relationships. Three lecture hours a week for one semester. Advertising 370J and Public Relations 367 may not both be counted. Prerequisite: Advertising 344K, 345J, Marketing 320F, and Public Relations 348 with a grade of at least C in each.

P R 374. Public Relations Publications.

Production of controlled public relations media for internal and external publics; analysis of annual reports, trade magazines, and electronic publishing. Three lecture hours a week for one semester. Prerequisite: Public Relations 319 or 331, and 348, or consent of instructor; and Journalism 315 or one of the following courses: Rhetoric and Writing 309K, 309S, 325M, 379C (Topic: Grammar and Style for Writers).

P R 377H. Integrated Communications Campaigns: Honors.

Restricted to students in the Advertising or Public Relations Honors Program. The concept of media mix; matching product, consumer, and media profiles; and the conception, research, planning, and execution of advertising campaigns. Special emphasis on advanced copywriting, layout, and production for print and broadcast media. Students usually participate in major national contests involving brand development in advertising strategies. Three lecture hours a week for one semester, with additional hours to be arranged. Only one of the following may be counted: Advertising, 373, 373H, Public Relations 377H, 377K. Offered on the letter-grade basis only. Prerequisite: Upper-division standing, Advertising 370J or Public Relations 367, Public Relations

352, a University grade point average of at least 3.50, admission to the Advertising or Public Relations Honors Program, and consent of the undergraduate adviser.

P R 377K. Integrated Communications Campaigns.

Integration of theory, research methods, and communication techniques for planning, implementing, and evaluating public relations campaigns; client proposal writing and presentation. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising, 373, 373H, Public Relations 377H, 377K. Prerequisite: Public Relations 367.

P R 377M. Media Studies.

Topics in media and its effects on advertising and public relations strategies. The equivalent of three lecture hours a week for one semester; additional hours may be required for some topics. Advertising 377M and Public Relations 377M may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Topic 2: Advanced Studies in Media Sales. Same as Advertising 377M (Topic 2: Advanced Studies in Media Sales). Examination of advertising media sales beyond audience measurement techniques, and quantitative and qualitative data. The equivalent of three lecture hours a week for one semester. Only one of the following may be counted: Advertising 377M (Topic 2), 378 (Topic 14: Advanced Studies in Media Sales), Public Relations 377M (Topic 2), 378 (Topic 2: Advanced Studies in Media Sales). Additional prerequisite: Upper-division standing, Advertising 345J with a grade of at least C, and consent of instructor.

P R 378. Advanced Studies in Public Relations.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and a University grade point average of at least 2.25.

Topic 1: Ethics in Advertising and Public Relations.

Topic 3: Black Music and the Media.

Topic 4: Health Communication: Theory and Practice.

Topic 5: Integrated Communication for Nonprofit Organizations.

Topic 6: Public Relations in Entertainment.

P R 378S. Special Topics in Sports Media.

Topics in sports media related to issues in traditional and new media as they affect sports and entertainment advertising and public relations. The equivalent of three lecture hours a week for one semester or as required by the topic. Advertising 378S and Public Relations 378S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Advertising 305S or Public Relations 305S with a grade of at least C; and a University grade point average of at least 2.25.

Topic 1: Advertising and Public Relations for Sports. Same as Advertising 378S (Topic 1: Advertising and Public Relations for Sports). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 30: Advertising and Public Relations for Sports), 378S (Topic 1), Public Relations 378 (Topic 30: Advertising and Public Relations for Sports), 378S (Topic 1).

Topic 2: Legal Aspects of Sports and Media. Same as Advertising 378S (Topic 2: Legal Aspects of Sports and Media). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 31: Legal Aspects of Sports and Media), 378S (Topic 2), Public Relations 378 (Topic 31: Legal Aspects of Sports and Media), 378S (Topic 2).

Topic 3: Return on Investment of Sports Media. Same as Advertising 378S (Topic 3: Return on Investment of Sports Media).

Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 32: Sponsorships, Endorsements, Advertising, and Promotional Events for Sports and Entertainment), 378S (Topic 3), Public Relations 378 (Topic 32: Sponsorships, Endorsements, Advertising, and Promotional Events for Sports and Entertainment), 378S (Topic 3).

Topic 4: Analysis of Sports and Entertainment Audiences. Same as Advertising 378S (Topic 4: Analysis of Sports and Entertainment Audiences). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 33: Analysis of Sports and Entertainment Audiences), 378S (Topic 4), Public Relations 378 (Topic 33: Analysis of Sports and Entertainment Audiences), 378S (Topic 4).

Topic 5: Ethics and Social Issues in Sports Branding. Same as Advertising 378S (Topic 5: Ethics and Social Issues in Sports Branding). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 34: Sports, Ethics, and Social Issues), 378S (Topic 5), Public Relations 378 (Topic 34: Sports, Ethics, and Social Issues), 378S (Topic 5).

Topic 6: Sports Audiences and Nontraditional Media. Same as Advertising 378S (Topic 6: Sports Audiences and Nontraditional Media). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 35: Sports Audiences and Nontraditional Media), 378S (Topic 6), Public Relations 378 (Topic 35: Sports Audiences and Nontraditional Media), 378S (Topic 6).

Topic 7: Contributions of Sports and Entertainment to Education and Health. Same as Advertising 378S (Topic 7: Contributions of Sports and Entertainment to Education and Health). Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 378 (Topic 36: Contribution of Sports and Entertainment to Education and Health), 378S (Topic 7), Public Relations 378 (Topic 36: Contribution of Sports and Entertainment to Education and Health), 378S (Topic 7).

Topic 8: College Sports Media. Same as Advertising 378S (Topic 8). An examination of the history of college sports media, with an emphasis on the evolution of sports coverage from NCAA-controlled limited broadcasting of football and basketball, to present day intercollegiate athletics coverage available via multiple outlets.

Topic 9: Sports Contract Negotiation Techniques. Same as Advertising 378S (Topic 9). Strategies and techniques for successfully negotiating contracts, with a special emphasis on the negotiation of sports contracts.

Topic 10: Leadership and Administration in Sports Organizations. Same as Advertising 378S (Topic 10). Designed to develop marketing skills related to events, programs, products, and facilities in the sports management field.

Topic 11: Sports and Social Media. Same as Advertising 378S (Topic 11). Designed to provide an understanding of and experience with the components and best practices of social media, marketing, and communications as they relate to sports entities and the sports field as a whole.

Topic 12: Sports Audiences. Same as Advertising 378S (Topic 12). An exploration of marketing innovations in sports to attract audiences, and the use of sports media by advertisers, sponsors, and other entities to target various customer groups.

P R 179, 279, 379. Public Relations Problems.

Individual instruction. Prerequisite: Public Relations 352.

P R 379H. Honors Tutorial Course.

Conference course of intensive study, planned by the Advertising Honors Committee; research and the writing of a substantial paper on a special public relations topic. Individual instruction. Prerequisite: Admission to the departmental honors program and consent of the undergraduate adviser.

Department of Communication Sciences and Disorders

Because prerequisites are subject to change, students should consult the *Course Schedule* before registering.

Communication Sciences and Disorders: CSD Lower-Division Courses

CSD 306K. Introduction to Communication Disorders.

Introduction to the study of processes and disorders of speech, language, and hearing; observation in the University Speech and Hearing Center. Three lecture hours a week for one semester.

CSD 308K. Perspectives on Deafness.

Examination of deafness from a number of perspectives: social and psychological meanings of deafness, the deaf community, education of deaf children, sign languages, and historical trends. Three lecture hours a week for one semester. Fulfills the communication and culture requirement in the College of Communication.

CSD 311K. Phonetic Description of Speech.

Speech production, physiological analysis and description of speech sounds, voice quality, and voice dynamics; notation; phonetic theory; applications of phonetics. Three lecture hours a week for one semester.

CSD 313L. Hearing Science.

Acoustical, physiological, and psychological bases of normal human hearing; theories of audition; laboratory techniques in hearing science research. Three lecture hours a week for one semester.

CSD 314L. Sociocultural Bases of Communication.

An introduction to the influences of social and cultural factors, such as ethnicity, socioeconomic status, and geographic region, on communication acquisition and use, with a focus on cross-cultural communication issues in a diverse society. Three lecture hours a week for one semester.

CSD 318K. Acquisition of Communicative Abilities in Children.

Introduction to assessment procedures and treatment strategies for children with speech and language disorders. Three lecture hours a week for one semester. Prerequisite: Communication Sciences and Disorders 306K or 308K with a grade of at least C, and Communication Sciences and Disorders 311K with a grade of at least C.

CSD 118L. Acquisition of Communicative Abilities in Children: Laboratory.

Clinical laboratory experience in child language. One lecture hour a week for one semester. Prerequisite: Communication Sciences and Disorders 306K or 308K with a grade of at least C, and Communication Sciences and Disorders 311K with a grade of at least C.

Upper-Division Courses

CSD 140L. Professional Issues in Communication Disorders.

Restricted to communication sciences and disorders majors. Issues in ethics, licensure, certification, and professional practice in communication disorders. One lecture hour a week for one semester. May not be counted toward a degree. Offered on the pass/fail basis only. Prerequisite: Upper-division standing and twelve semester hours of coursework in communication sciences and disorders.

CSD 341. Principles of Audiology.

Causes of hearing disorders; diagnostic procedures and treatment. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, a University grade point average of at least 2.25, and Communication Sciences and Disorders 313L with a grade of at least C.

CSD 350. Language and the Brain.

Same as Linguistics 350 (Topic 1: Language and the Brain). Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CSD 358. Anatomy and Physiology of the Speech and Hearing Mechanism.

In-depth study of the anatomy and physiology of structures involved in speech, language, hearing, and swallowing. Includes anatomical and physiological mechanisms of respiration, phonation, articulation, and hearing; and the central nervous system and blood supply to the speech and hearing mechanism. Three lecture hours a week for one semester. Communication Sciences and Disorders 358 and 393E (Topic 8: Anatomy and Physiology of the Speech and Hearing Mechanism) may not both be counted. Prerequisite: Upper-division standing, Communication Sciences and Disorders 311K with a grade of at least C, and a University grade point average of at least 2.25.

CSD 358S. Fundamentals of Speech Science.

Same as Linguistics 358S. Neurophysiological mechanisms underlying the encoding and decoding of speech. Three lecture hours a week for one semester. Only one of the following may be counted: Communication Sciences and Disorders 358S, 396N, Linguistics 358S. Prerequisite: Upper-division standing and a University grade point average of at least 2.25; for Communication Sciences and Disorders majors, Communication Sciences and Disorders 313L and 358 with a grade of at least C in each.

CSD 359H. Honors Tutorial Course: Reading.

Restricted to senior communication sciences and disorders majors. Intensive reading and research as planned by the departmental honors committee. Individual instruction. Prerequisite: Upper-division standing; twenty-four semester hours of coursework in communication sciences and disorders, twelve of which must be upper-division; and admission to the Communication Sciences and Disorders Honors Program.

CSD 360M. Communication and Deaf People.

Forms of face-to-face communication used with deaf people, including speech/listening, systems of manual communication, and natural sign language. Emphasis is on child development issues and the use of different methods in educational practice. Three lecture hours a week for one semester. Fulfills the communication and culture requirement in the College of Communication. Prerequisite: Upper-division standing, Communication Sciences and Disorders 308K with a grade of at least C, and a University grade point average of at least 2.25.

CSD 367. Topics in Communication Sciences and Disorders.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

CSD 367C. Communication, Culture, and Disability.

Through examination of historical trends, current law and practices, and family and ethical issues, explores how societies have interacted with people who are disabled. Emphasis placed on alternative methods of communication. Three lecture hours a week for one semester. Communication Sciences and Disorders 367 (Topic: Communication, Culture, and the Disabled) and 367C may not both be counted. Fulfills the communication and culture requirement. Prerequisite: Upper-division standing and a University grade point average of at least 2.25.

CSD 367K. Introduction to Speech and Language Disorders Assessment and Treatment in Children.

Restricted to senior communication sciences and disorders majors. Introduction to assessment procedures and treatment strategies for children with speech and language disorders. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, a University grade point average of at least 2.25, and the following coursework with a grade of at least C in each course: Communication Sciences and Disorders 306K or 308K; 311K and 313L; 318K and 118L (or 368K and 168L); 358 and 358S (or 315S).

CSD 167M, 367M. Clinical Practicum.

Restricted to communication sciences and disorders majors specializing in audiology or speech/language pathology. Supervised clinical practicum in speech/language pathology and audiology. For 167M, one lecture hour and three practicum hours a week for one semester; for 367M, one lecture hour and nine practicum hours a week for one semester. No more than four hours of clinical practicum may be counted towards the Bachelor of Science in Communication Sciences and Disorders. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: For communication sciences and disorders majors specializing in audiology or speech/language pathology: upper-division standing, eighteen semester hours of coursework in communication sciences and disorders, a University grade point average of at least 3.00, and an upper-division grade point average of at least 3.50; additional prerequisite for audiology majors: Communication Sciences and Disorders 341 with a grade of A, credit with a grade of A or registration for Communication Sciences and Disorders 378, and consent of instructor; additional prerequisite for speech/language pathology majors: credit with a grade of A for Communication Sciences and Disorders 367K or 371, and consent of instructor.

CSD 367R. Clinical Research in Speech/Language Pathology.

Three lecture hours a week for one semester. Communication Sciences and Disorders 367 (Topic 2: Clinical Research in Speech Language Pathology) and 367R may not both be counted. Prerequisite: Upper-division standing, Communication Sciences and Disorders 358S with a grade of at least C, and a University grade point average of at least 2.25.

CSD 371. Introduction to Speech and Language Disorders Assessment and Treatment in Adults.

Restricted to senior communication sciences and disorders majors. Introduction to assessment procedures and treatment strategies for adults with speech and language disorders. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, a University grade point average of at least 2.25, and the following coursework with a grade of at least C in each course: Communication Sciences and Disorders 306K or 308K; 311K, 313L, and 350; and 358 and 358S (or 315S).

CSD 373. Principles of Aural Rehabilitation.

Rationale, methods, materials, procedures, and criteria for aural rehabilitation for hearing-impaired persons. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; the following coursework with a grade of at least C in each: Communication Sciences and Disorders 306K or 308K, 311K, 313L, 341, 358, and 358S; and a University grade point average of at least 2.25.

CSD 175N. Deaf Education Seminar.

Discussion of selected topics in social, political, and educational aspects of deafness. One lecture hour a week for one semester. Communication sciences and disorders majors specializing in education of the deaf/hearing-impaired may count no more than four semester hours in this course toward the degree; communication sciences and disorders majors specializing in audiology or specializing in speech/language pathology may count no more than two semester hours in this course toward the

degree; other students with majors in the College of Communication may count no more than one semester hour in this course toward the degree. May be repeated for credit. Prerequisite: Upper-division standing.

CSD 378. Clinical Audiology.

Differential diagnostic procedures for evaluation of auditory disorders--theoretical concepts and clinical applications. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and Communication Sciences and Disorders 341.

CSD 178K, 278K, 378K. Studies in Communication Sciences and Disorders.

Restricted to communication sciences and disorders majors. Supervised individual research. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. May be repeated for credit with consent of the department chair. Only three semester hours may count toward a degree in the College of Communication. No more than three semester hours may be taken on the letter-grade basis. Prerequisite: Upper-division standing; eighteen semester hours of coursework in communication sciences and disorders, including at least six hours of upper-division coursework; a University grade point average of at least 2.50; a grade point average in all College of Communication coursework of at least 3.00; and approval of a project in advance of registration.

CSD 178L. Clinical Audiology Laboratory.

Clinical laboratory experience in audiology. One lecture hour a week for one semester. Prerequisite: Upper-division standing.

CSD 379H. Honors Tutorial Course: Special Project.

Restricted to senior communication sciences and disorders majors. The writing of a thesis or the presentation of a creative project; final comprehensive examination. Individual instruction. Prerequisite: Communication Sciences and Disorders 359H.

Department of Communication Studies

Because prerequisites are subject to change, students should consult the *Course Schedule* before registering.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Communication Studies: CMS

Lower-Division Courses

CMS 301. Topics in Communication Studies.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

CMS 306M (TCCN: SPCH 1321). Professional Communication Skills.

Designed to help students develop skills in one-on-one interactions, small group communication, and presentation skills. Basic communication theories as they relate to skill development are explored. Three lecture hours a week for one semester.

CMS 210. Forensics Workshop.

Open to all University students. Training for participation in extracurricular speech activities, including intercollegiate debate. Two lecture hours and

eight laboratory hours a week for one semester. Communication Studies 210 may be taken three times for credit.

CMS 310K (TCCN: SPCH 2333). Team-Based Communication.

Analysis of small-group communication: cohesiveness, social climate, role structure, leadership, conformity, dynamics of interaction; participation in small-group communication situations. Three lecture hours a week for one semester.

CMS 313M. Organizational Communication.

Communication processes within government, private, and volunteer organizations. Three lecture hours a week for one semester.

CMS 314L. Language, Communication, and Culture.

The role of language in communication. Analysis of the complexity of human languages, languages in contact, language modality, and communication interaction. Three lecture hours a week for one semester.

CMS 315M (TCCN: SPCH 1318). Interpersonal Communication Theory.

Introduction to the study of communication in relationships; topics include self-disclosure, conflict, long-distance relationships, stereotyping, and persuasion. Three lecture hours a week for one semester.

CMS 316L (TCCN: SPCH 2316). Interviewing Principles and Practices.

Introduction to interviewing theory, emphasizing the acquisition and application of interviewing skills. Three lecture hours a week for one semester.

CMS 317C. Speechmaking and Society.

The impact of public discourse on the ideas and issues of culture and history in the United States. Three lecture hours a week for one semester.

CMS 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Communication Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

CMS 320. Advanced Presentation Skills.

Designed to help students develop skills in delivering informative and persuasive presentations and speeches. Study of major theories related to oral presentations. Focus on audience analysis and adaptation, building strong arguments, speech organization, and use of new technologies. Three lecture hours a week for one semester. Only one of the following may be counted: Communication Studies 312C, 317M, 320, 367 (Topic: Advanced Presentation Skills). Prerequisite: Upper-division standing and Communication Studies 306M with a grade of at least C.

CMS 321D. Communicating for Development and Philanthropy.

An exploration of the special communicative dimensions of the development and philanthropy fields, including how to apply theories of building relationships and persuasion to the context of development and philanthropy for nonprofit organizations. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 322E. Communication Ethics.

Examination of the ethical issues involved in communication. Subjects addressed include our role in interactions we are party to; media coverage of issues of a sensitive or potentially harmful nature; and how our interactions with others reflect and shape who we are. Three lecture hours a week for one semester. Communication Studies 322E and 367 (Topic 4: Communication Ethics) may not both be counted. Prerequisite: Upper-division standing.

CMS 323R. Rhetoric: East and West.

Examination of the ways people from different cultures communicate and argue, and how cultures use logic, stories, myth, images, and the spoken word to make their points. Three lecture hours a week for one semester. Communication Studies 323R and 367 (Topic: Rhetoric East and West) may not both be counted. Prerequisite: Upper-division standing.

CMS 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Communication Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

CMS 330. Interpersonal Health Communication.

The fundamental interpersonal communication processes that are involved in managing physical and mental health. Includes stigma and illness identity, social support, patient-provider communication, end-of-life care, and health education. Three lecture hours a week for one semester. Communication Studies 330 and 367 (Topic: Interpersonal Health Communication) may not both be counted. Prerequisite: Upper-division standing.

CMS 331K. Speech Writing and Criticism.

Composition and analysis of oral messages; emphasis on creating and arranging ideas, style, delivery, critical method. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Communication Studies 306M or the equivalent, or consent of instructor.

CMS 332. Argumentation and Advocacy.

Nature of argumentative controversy; variables of form, method, and ethics; analysis of argumentative rhetorical works. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 332K. Theories of Persuasion.

A study of motivational factors involved in persuasive speaking to secure belief and action. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 333. Case Studies in Argumentation.

Study of argumentation theories. Includes analysis of case studies taken from areas of law, public policy, popular culture, and history. Three lecture hours a week for one semester. Communication Studies 333 and 367 (Topic: Case Studies in Argumentation) may not both be counted. Prerequisite: Upper-division standing.

CMS 334K. Nonverbal Communication.

Survey of the effects of space, physical appearance, movement, eye behavior, and vocal behavior on interpersonal communication. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 335. Strategic Sales and Event Planning.

Theory and practice related to the preparation of large-scale sales events and conferences. Designed to develop communication skills and planning techniques. May include client research, investigation of potential venues, telephone-based information interviews, individual or group sales presentations, and event overviews. Three lecture hours a week for one semester. Communication Studies 335 and 367 (Topic: Strategic Sales and Event Planning) may not both be counted. Prerequisite: Upper-division standing.

CMS 336D. Career Dynamics and Corporate Communication.

An exploration of work and career from an interdisciplinary perspective, employing a variety of definitions, cases, theories, strategies, and popular culture materials to address issues of employability, entrepreneurship, advancement, and objective/external and subjective/psychological success and their relationships with organizational life. Topics may include effects of technologies on work and careers, professionalism and professional identity, networks, teamwork, work-life balance, managing one's boss, and criteria for success. Three lecture hours a week for one semester. Communication Studies 336D and 367 (Topic: Career Dynamics and Corporate Communication) may not both be counted. Prerequisite: Upper-division standing.

CMS 337. Building Sales Relationships.

Explores the theoretical and practical role of communication in the development of long-term client relationships. Explores the consultative sales process, including prospecting, assessing needs, handling objections, presenting, closing, and following up with clients. Focuses on how technology can help or hinder communication. Three lecture hours a week for one semester. Communication Studies 337 and 367 (Topic: Communication to Build Sales Relationships) may not both be counted. Prerequisite: Upper-division standing.

CMS 338. Leadership Stories.

Uses fictional and nonfictional stories, as well as examples taken from virtual reality, to explore the meaning of leadership. Designed to help students develop a conceptual, practical, and personal understanding of the meaning of leadership. Three lecture hours a week for one semester. Communication Studies 338 and 367 (Topic: Stories of Leadership) may not both be counted. Prerequisite: Upper-division standing.

CMS 339L. Social Interaction in Virtual Environments.

Examines fundamental principles connected to the uses and effects of new technologies. Covers social networking sites, online dating, virtual group collaboration, and video games. Three lecture hours a week for one semester. Communication Studies 339L and Communication Studies 367 (Topic: Social Interaction in Virtual Environments) may not both be counted. Prerequisite: Upper-division standing.

CMS 340K. Communication and Social Change.

Analysis of how persuasion is used in mass movements: civil rights, consumerism, feminism, pacifism, religious sects. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 341. Computer-Mediated Communication.

Uses principles related to communication and social psychology to explore online interactions. May include the study of impression formation and management, group communication, trust and deception, Internet dating, online video gaming, social support, Internet addiction, and impacts of new communication technology. Three lecture hours a week for one semester. Communication Studies 341 and 367 (Topic: Computer-Mediated Communication) may not both be counted. Prerequisite: Upper-division standing.

CMS 342C. Communication and Civic Participation.

An exploration of the status of American democracy, particularly as it pertains to those born between 1960 and 1990. Subjects include the meaning of citizenship and democratic participation, and the strengths and limitations of marketing efforts targeted at getting youth involved in the democratic system. Three lecture hours a week for one semester. Communication Studies 342C and 367 (Topic: Communication and Civic Participation) may not both be counted. Prerequisite: Upper-division standing.

CMS 342K. Political Communication.

A study of the role of symbols in political communication and the techniques and strategies employed by politicians; special attention is given to recent election campaigns. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 344K. Lying and Deception.

Examines lying and deception as civil, strategic, and manipulative behavior. Secrets, privacy, disclosures, and confidentiality are examined in a variety of familiar contexts. Three lecture hours a week for one semester. Communication Studies 344K and 367 (Topic: Lying and Deception) may not both be counted. Prerequisite: Upper-division standing.

CMS 345. Media Effects and Politics.

The theoretical models and research methods used to study media effects. Emphasis on the political implications of media-effects research and on how media-effects theories can help clarify political issues. May include television violence, the political impact of the news, and the use of media for educational purposes. Three lecture hours a week for one semester. Communication Studies 345 and 367 (Topic: Media Effects and Politics) may not both be counted. Prerequisite: Upper-division standing.

CMS 345K. Perspectives on Rhetoric.

Four different meanings of rhetoric; how these meanings contribute to the current understanding of communication studies. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 345P. Communication and Public Opinion.

An investigation of the definition and measurement of public opinion. Explores the relationship between communication and public opinion, how changes to public opinion are affected, and the influence of perception of public opinion on personal opinion. Communication Studies 345P and 367 (Topic: Communication and Public Opinion) may not both be counted. Prerequisite: Upper-division standing.

CMS 346. Using Communication Technology at Work.

Examines how communication technologies affect workplace communication. Considers case studies involving the use of social networking, handheld devices, and e-mail by for-profit and nonprofit organizations. Three lecture hours a week for one semester. Communication Studies 346 and 367 (Topic: Using Communication Technology at Work) may not both be counted. Prerequisite: Upper-division standing.

CMS 347K. Rhetoric of Popular Culture.

The ways that film, television, music, fashion, the Internet, and other discourses of popular culture influence public attitudes, perceptions, and social relations. Three lecture hours a week for one semester. Communication Studies 347K and 367 (Topic: Rhetoric of Popular Culture) may not both be counted. Prerequisite: Upper-division standing.

CMS 348. Communication Research Methods.

A practical introduction to research methods, focusing on designing a study, conducting research, analyzing data, and presenting results.

Studies survey design, interviews, focus groups, and experiments. Three lecture hours a week for one semester. Communication Studies 348 and 367 (Topic: Communication Research Methods) may not both be counted. Prerequisite: Upper-division standing.

CMS 348K. Visual Media and Interaction.

The role of visual resources and symbols in social interaction and public life; the representation of interaction and human relationships in visual media (photography, advertising, fine arts, and film). Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 349M. Advanced Analysis of Popular Culture.

Advanced critique and analysis of rhetorical dimensions in texts of popular culture. Readings in theory and methods for understanding persuasive influence in television, film, music videos, and the Internet. Web-based instruction; no class meetings. Prerequisite: Upper-division standing, and Advertising 303, Communication Studies 347K, or Radio-Television-Film 305.

CMS 350M. Field Study in Organizational Communication.

Students acquire information through interviews and observation, devise appropriate coding schemes, and compose synoptic reports of their findings and recommendations. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 351. Communication for Cooperation and Competition.

Theoretical perspectives and experiential learning on the ways people reconcile the need to be individualistic (competitive) with the need to be community members (cooperative). Individual aggression and submission; the rewards of competition and cooperation; and organizational structures that lead to cooperation and competition. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 353S. Social Media and Organizations.

Explores the relationship between social media use and organizational communication. Subjects include how organizations use social media for communication with external stakeholders and to facilitate internal communications processes. Three lecture hours a week for one semester. Communication Studies 353S and 367 (Topic: Social Media and Organizations) may not both be counted. Prerequisite: Upper-division standing.

CMS 354. Conflict Resolution.

Systematic analysis of conflict and communication to examine some of the effects of communication on conflict and of conflict on communication. Readings, analysis of conflicts, and practice with and evaluation of communication behaviors thought to be effective in conflict talk. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 355K. Intercultural Communication.

Theories of speech and language that concern interaction between persons from different cultures who speak different languages or dialects. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 357. Family Communication.

Some of the common issues that face those who live in, counsel, and conduct research with families. The development of traditional families in the United States, different family structures that make up modern society, current issues that affect families, and the impact of communication on family experiences. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 358. Communication and Personal Relationships.

The nature of human interaction in various types of relationships (friends, dates, spouses, roommates), the nature of communication at different stages in a relationship, and the nature of communication at different life stages. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 359. Language, Culture, and Communication of Hip-Hop.

Uses hip-hop music as a model for understanding a speech community. Focuses on language innovation and the creation of new social networks, forms of communication, and cultural meaning and values. Three lecture hours a week for one semester. Communication Studies 359 and 367 (Topic: Language, Culture, and Communication in the Hip-Hop Nation) may not both be counted. Prerequisite: Upper-division standing.

CMS 359H. Honors Tutorial Course: Reading.

Intensive reading and research as planned by the departmental honors committee. Individual instruction. Prerequisite: Upper-division standing and admission to the Communication Studies Honors Program.

CMS 360. Analyzing Social Interaction.

Introduction to concepts and research methods related to the study of how verbal and nonverbal communication is used in everyday situations. Includes collecting and analyzing sound and video data. Designed to help students develop skills in interpreting human social interactions. Three lecture hours a week for one semester. Communication Studies 360 and 367 (Topic: Language and the Body in Social Interaction) may not both be counted. Prerequisite: Upper-division standing.

CMS 364K. Gender and Communication.

Focuses on how communication influences ideas about sex, gender, and identity, from interpersonal relationships to the mass media, and from legislative debates to social movements. Three lecture hours a week for one semester. Communication Studies 364K and 367 (Topic: Gender and Communication) may not both be counted. Prerequisite: Upper-division standing.

CMS 164M, 264M, 364M. Pre-Graduate School Mentorship.

Introduction for undergraduates to graduate study in a discipline of their choosing. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. With consent of the department chair, may be repeated for credit, but no more than three hours may be taken. Prerequisite: Consent of instructor.

CMS 365K. Male-Female Communication.

Same as Women's and Gender Studies 345 (Topic 21: Male-Female Communication). Studies of speech patterns related to the concepts of male and female, including sexism in speaking, patterns of male and female speaking, patterns of listening to males and females, speech in courtship and family, speech and sexual discrimination in careers. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

CMS 365L. Communication, Controversy, and Citizenship.

Designed to help students develop the listening, speaking, and argumentation skills used to deliberate over controversial and sensitive subjects. Deliberations focus primarily on the meaning of citizenship. Three lecture hours a week for one semester. Communication Studies 365L and 367 (Topic: Communication, Controversy, and Citizenship) may not both be counted. Prerequisite: Upper-division standing.

CMS 366. Rhetoric, Love, and Democracy.

Covers ideas about human symbolism and discourse; focuses on the effects of rhetorical perspectives on how people make meaning of the

world. Three lecture hours a week for one semester. Communication Studies 366 and 367 (Topic: Love, Democracy, and Rhetoric) may not both be counted. Prerequisite: Upper-division standing.

CMS 366C. Celebrity Culture.

Examines the importance of fame and celebrity throughout the nineteenth, twentieth, and twenty-first centuries, in relation to education, entertainment, and politics. Three lecture hours a week for one semester. Communication Studies 366C and 367 (Topic: Celebrity Culture) may not both be counted. Prerequisite: Upper-division standing.

CMS 366F. Rhetoric of Film.

Film theory and history taught from a rhetorical perspective. Covers the film industry, technology, and the elements of narrative, image, and sound. Emphasis on theory about film and film criticism. Three lecture hours a week for one semester. Communication Studies 366F and 367 (Topic: Rhetoric of Film) may not both be counted. Prerequisite: Upper-division standing.

CMS 366M. Rhetoric and Popular Music.

Explores music and its relation to identity; how gender, race, and sexual identity are constructed with and within musical texts; meanings and importance of authenticity; and the effectiveness of music as a political tool. Three lecture hours a week for one semester. Communication Studies 366M and 367 (Topic: Rhetoric and Popular Music) may not both be counted. Prerequisite: Upper-division standing.

CMS 366R. Rhetoric and Religion.

Explores secular and religious instances of ambivalence, and its uses and effects. Three lecture hours a week for one semester. Communication Studies 366R and 367 (Topic: Rhetoric and Religion) may not both be counted. Prerequisite: Upper-division standing.

CMS 367. Topics in Communication Studies.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing. Additional prerequisites may vary with the topic and are given in the Course Schedule.

Topic 1: Applied Interpersonal Communication.

Topic 2: Campaign Communication.

Topic 3: Communication and Thought. Investigates the emergence of collaborative thought from human communication.

Topic 5: Ethnography of Live Music in Austin. Explores music and musicians in Austin, with a focus on ethnographic research through observation, interviews, analysis, and writing.

Topic 6: Pragmatism and Group Dynamics. Explores how individual beliefs and expectations determine the quality of group communication.

CMS 369V. Political Research.

Students conduct research with Project Vote Smart, a nonpartisan, nonprofit political research organization. Offered on the pass/fail basis only. Prerequisite: Students must apply by sending a cover letter and resume to projectvotesmart@austin.utexas.edu.

CMS 370K. Internship in Communication Studies.

Restricted to senior communication studies majors. Focuses on career goals of students through classroom discussions and places students in communication positions with public and private organizations. The equivalent of three lecture hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Twelve semester hours of communication studies (or speech), including at least three hours of upper-division coursework; a University grade point average of at least 2.50; a grade point average in communication studies of at least 3.00; and consent of instructor.

CMS 371K. Practicum in Conflict Mediation.

Two lecture hours and three discussion hours a week for one semester. Students must also attend one weekend workshop at the beginning of the semester. With consent of instructor, may be repeated once for credit. Offered on the pass/fail basis only.

CMS 171M. Communication Studies Internship.

Internship and discussion hours to be arranged. Offered on the pass/fail basis only. Prerequisite: Communication Studies 370K; consent of departmental internship coordinator; and completion of departmental requirements for enrollment in an internship course.

CMS 372K. Advanced Organizational Communication.

In-depth discussion and treatment of advanced organizational communication topics, including socialization and role development, workplace attachments, organizational culture, ethics, structure, conflict, power, decision making and empowerment, technology, and various forms of external communication with relevant organizational stakeholders. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and Communication Studies 313M.

CMS 372T. Time Matters.

An exploration of twentieth and twenty-first century time management issues resulting from the development of communication technologies. Subjects include the concept of twenty-four-hour, seven-day-a-week availability; information overload; increased work hours; sleep deprivation; hurry sickness; multitasking; the human experience of time across diverse social, cultural, and historical contexts; and other time-related issues that shape, and are shaped by, communication behaviors. Three lecture hours a week for one semester. Communication Studies 367 (Topic: Time Matters) and 372T may not both be counted. Prerequisite: Upper-division standing.

CMS 373D. Advocacy in Applied Settings.

An introduction to the issues faced when advocating for an issue, idea, or one's self. The course aims to have students grasp concepts they will see and experience during their internship in Washington, DC. Eight conference hours a day for six days, for the equivalent of three lecture hours a week for one semester. Taught in Washington, DC. Prerequisite: Consent of the department.

CMS 374D. Beyond Congress and the White House.

Explores issues of power in our nation's capital. Students study Washington, DC via visits to sites around the city. One three-hour field trip a week for one semester. Taught in Washington, DC. Prerequisite: Consent of the department.

CMS 177K, 377K, 477K. Faculty-Initiated Research.

Supervised research on a project designed by a faculty member. Individual instruction. No more than six semester hours in the following courses may be counted: Communication Studies 177K, 377K, 477K, 178K, 278K, 378K, 478K, 578K, 678K. Prerequisite: Upper-division standing, twelve semester hours of coursework in communication studies, a University grade point average of at least 2.50, and consent of instructor and the department.

CMS 178K, 278K, 378K, 478K, 578K, 678K. Student-Initiated Research.

Supervised independent research on a project initiated, designed, and implemented by the student. Student secures consent of a faculty member willing to supervise the project prior to registering. Individual instruction. No more than six semester hours in the following courses may be counted: Communication Studies 177K, 377K, 477K, 178K, 278K, 378K, 478K, 578K, 678K. Prerequisite: Upper-division standing, twelve semester hours of coursework in communication studies, a University

grade point average of at least 2.50, and consent of instructor and the department; Communication Studies 177K, 377K, 477K is recommended.

CMS 379H. Honors Tutorial Course: Special Project.

The writing of a thesis or the presentation of a creative project; final comprehensive examination. Individual instruction. Prerequisite: Communication Studies 359H.

School of Journalism

Journalism majors may not register for more than nine semester hours in journalism in one semester or summer session. The director or associate director may make exceptions to this rule for seniors who need additional journalism courses in order to graduate on time.

Any student enrolled in a journalism course who does not attend the first class meeting or laboratory session may be dropped from that course.

In addition to the prerequisites given below, several policies described in this catalog and specifically those listed in the section Special Requirements (p. 81) affect registration in journalism courses.

Because prerequisites are subject to change, students should consult the *Course Schedule* before registering.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Journalism: J

Lower-Division Courses

J 301F. Fundamental Issues in Journalism.

Examination of major issues facing the news media in a democratic society and the exploration of digital technology on the future of news gathering, including ethics, institutions, effects, and standards of journalistic performance. Three lecture hours a week for one semester. Journalism 301F and 310 may not both be counted.

J 302F. Digital Storytelling Basics.

Restricted to journalism majors. Introduction to multiple technologies for digital delivery of text, photos, audio, and video news across journalism platforms. Includes a module on grammar, spelling, and punctuation. Students must pass the grammar, spelling, and punctuation module to pass the course. Three lecture hours and three laboratory hours a week for one semester. Journalism 302F and 315 may not both be counted.

J 310F. Reporting: Words.

Restricted to journalism majors. Reporting, writing, and editing skills for print, online, and broadcast. Three lecture hours and three laboratory hours a week for one semester. Journalism 310F and 320D may not both be counted. Prerequisite: Journalism 301F (or 310) and 302F (or 315) with a grade of at least C in each.

J 310K. Visual Literacy.

Introduction to the visual concerns of message design and interpretation, including their bases in theories of visual perception, semiotics, and media practice. Three lecture hours a week for one semester.

J 311F. Reporting: Images.

Restricted to journalism majors. Photography, video, and design for print, web, and broadcast, including design principles, visual perception, typography, manipulation of images, and photographs. Three lecture hours and three laboratory hours a week for one semester. Only one of

the following may be counted: Journalism 311F, 318C, 321C. Offered on the letter-grade basis only. Prerequisite: Journalism 301F (or 310) and 302F (or 315) with a grade of at least C in each.

J 313S. Topics in Texas Sports and Media.

Introduction to various contemporary and historical issues, emphasizing interdisciplinary perspectives and critical discourse. Three lecture hours a week for one semester. Communication 310 and Journalism 313S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

J 318. Photography I.

Intensive training in basic digital and black-and-white photography; darkroom techniques; and fundamental approaches to producing images. Three lecture hours and four laboratory hours a week for one semester. Journalism 318 and 325 may not both be counted. Prerequisite: Journalism 316 with grade of at least C, and a major in journalism or consent of instructor.

J 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Journalism.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

J 320F. Covering Law Enforcement and Courts.

Restricted to journalism majors. Specialized reporting, research, and writing skills for investigating and covering incidents and issues occurring in law enforcement, public safety, and criminal justice. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 321F. Reporting on City and County Government.

Restricted to journalism majors. Basic beat reporting skills to navigate city and county governments, and conducting reporting, research, and writing on issues and people at the local level. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 322F. Navigating State Government.

Restricted to journalism majors. Training and instruction in specialized reporting, research, and writing skills as applicable to covering state governments. Analysis of enduring issues and politics at the state level. Fieldwork at the Texas Capitol and state agencies. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 323F. Education Reporting.

Restricted to journalism majors. Covering school districts and higher education to produce stories that humanize the bureaucracy of public education and compellingly depict issues, structures, and policies. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 324F. Business and Financial Reporting.

Restricted to journalism majors. Instruction in how to conceptualize, source, and prepare news reports on global financial markets, commercial transactions, and company performance. The course is global, with the United States a subset of the material covered. Hands-on course during which students produce multiple news packages for publication.

Three lecture hours a week for one semester. Journalism 324F and 349T (Topic 2: Business Journalism) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 325F. Covering Politics.

Restricted to journalism majors. Specialized research, reporting, and writing skills to cover political issues, candidates, and campaigns. Three lecture hours a week for one semester. Journalism 325F and 349T (Topic 16: Politics and the Press) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 326F. Reporting Sports.

Restricted to journalism majors. Contemporary professional skills and techniques in sports journalism. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 326S. Advanced Topics in Texas Sports and Media.

Restricted to journalism majors. Critical assessment of various contemporary and historical issues, emphasizing interdisciplinary perspectives. Three lecture hours a week for one semester. Communication 320 and Journalism 326S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 327. Feature Writing.

Practice in researching, reporting, writing, structuring, and editing feature stories and news features for the print media. Identifying and contacting appropriate freelance markets regarding queries and stories. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 327, Latin American Studies 322 (Topic 4: Feature Writing), Mexican American Studies 374 (Topic 6: Feature Writing). Prerequisite: Journalism 310F (or 320D) with a grade of at least C, and admission to a journalism area of concentration.

J 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Journalism.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

J 329T. Topics in Public Affairs Reporting.

Restricted to journalism majors. Contemporary social, professional, and intellectual concerns in the practice of public affairs reporting. Three lecture hours a week for one semester. Some topics may require additional laboratory hours. May be repeated for credit when the topics vary. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 330F. Television Reporting and Producing.

Restricted to journalism majors. Basic television news gathering skills, including shooting and editing videotape, planning and executing visual storytelling, and writing and producing news packages. Students assist in the production of a television news program. Three lecture hours and three laboratory hours a week for one semester. Journalism 330F and 353D may not both be counted. Prerequisite: Journalism 310F (or 320D)

and 311F (or 321C) with a grade of at least B- in each, and Journalism 331G (or 322D) with a grade of at least C.

J 330G. Creative Nonfiction for Magazines and Books.

Restricted to journalism majors. Reporting and writing skills for narrative nonfiction, including writing book proposals, magazine pitches, and sample chapters. Three lecture hours a week for one semester. Journalism 330G and 359T (Topic 6: Narrative Storytelling) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 330J. Advanced Photo Editing and Design.

Restricted to students in the Maymester Abroad Program. Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of photo stories, photo essays, and feature stories, with editing and page layout. Taught abroad; location may vary by semester. Only one of the following may be counted: Journalism 330J, 370K (Topic 1: Advanced Photo Editing and Design), 395 (Topic 2: Advanced Photo Editing and Design).

J 331. Web Publishing.

Advanced skills in Web design and in publishing multimedia content. Emphasis on collaborative work in creating an ongoing Web information product. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with grade of at least C in each, and admission to a journalism area of concentration.

J 331F. Entrepreneurial Journalism.

Restricted to journalism majors. Creating for-profit and nonprofit journalistic enterprises in the news media ecosystem; the impact of digital technology on the news industry, with emphasis on changes to business and distribution models, and ways people consume and produce news and information; and projects and prototypes that include business plans and content planning. Three lecture hours a week for one semester. Journalism 331F and 359T (Topic: Entrepreneurial Journalism) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 331G. Audio Storytelling.

Restricted to journalism majors. Examination and practice of writing news for podcast. Three lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Journalism 322D, 331G, 359T (Topic 7: Podcasting). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 331J. Studio Photography.

Restricted to journalism majors. An investigation of the principles of studio lighting, theory and practice of contemporary color, location lighting, and production of portfolio-quality work, as applicable to advertising, photographic illustration, and photojournalism. Three lectures and four lab hours a week for one semester. Journalism 331J and 371K (Topic 2: Studio Photography) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each; Communications 316 or Journalism 316 with a grade of at least C.

J 332F. News Editing for Online and Print.

Restricted to journalism majors. Advanced multimedia editing and production techniques. Emphasis on news judgment, language use, editing of textual elements, and use of digital software for print and web publication of text, audio, and visual imagery. Three lecture hours and three laboratory hours a week for one semester. Journalism 332F and 330 may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 332G. Explanatory Journalism: Storytelling in a Digital Age.

Restricted to journalism majors. Examination of the evolution of long-form explanatory storytelling from print and film to new forms of Web-based and interactive storytelling. Three lecture hours a week for one semester. Journalism 332G and 359T (Topic: Explanatory Journalism: Storytelling in a Digital Age) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 332J. Sports for Reporting Texas.

Restricted to journalism majors. Students work as sports reporters for the School of Journalism's Reporting Texas Web site. Three lecture hours a week for one semester. Additional hour(s) to be arranged. Journalism 332J and Journalism 339T (Topic: Sports for Reporting Texas) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each..

J 333F. Data-Driven Reporting.

Restricted to journalism majors. Electronic document retrieval and manipulation; spreadsheet and database management; and Internet skills. Includes collaborative work on major investigative projects. Three lecture hours a week for one semester. Journalism 333F and 338 may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 333G. Advanced Visual Journalism: Photo.

Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of photo stories, photo essays, and feature stories, with editing and page layout. Three lecture hours and three laboratory hours a week for one semester. Journalism 333G and 355 may not both be counted. Prerequisite: Communication 316 or Journalism 316 with a grade of at least C.

J 333J. Photography for Reporting Texas.

Restricted to journalism majors. Students work as photographers for the School of Journalism's Reporting Texas Web site. Three lecture hours and three lab hours a week for one semester. Additional hour(s) to be arranged. Journalism 333J and Journalism 359T (Topic: Photography for Reporting Texas) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 334. Multimedia Journalism.

Review of online reporting techniques, advanced multimedia skills, and current issues in new media. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least C in each, and admission to a journalism area of concentration.

J 334F. Oral History as Journalism.

Restricted to journalism majors. Instruction in the use of oral history to generate journalistic coverage. Modules include concepts and methods of gathering oral history; illustration of the techniques using the Vietnam War as a topic; and generating oral history-based coverage focusing on the Mexican American experience. Three lectures hours a week for one semester. Only one of the following may be counted: Journalism 334F, 349T (Topic 7: Oral History as Journalism), 395 (Topic 20: Oral History as Journalism). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 334G. Advanced Visual Journalism: Video.

Restricted to journalism majors. Explores intensive video reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of video news and feature stories. Three lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Journalism 334G, 370K, 371K.

Prerequisite: Communication 316 or Journalism 316 with a grade of at least C; and Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 335. Narrative Journalism.

Students develop and produce a publication, focusing particularly on underrepresented groups and issues. Three lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Journalism 335, Latin American Studies 322 (Topic 11: Latino Community Journalism), 322 (Topic 11: Narrative Journalism), Mexican American Studies 374 (Topic 4: Latino Community Journalism), 374 (Topic 4: Narrative Journalism). Prerequisite: Journalism 310F (or 320D) with a grade of at least C, admission to a journalism area of concentration, and consent of instructor.

J 335F. Magazine Writing and Production.

Restricted to journalism majors. Instruction in and supervised practice of magazine writing and production. Laboratory hours include production of a magazine online and in print. Three lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Journalism 335F, 349T (Topic 15: Magazine Production), 359T (Topic 2: Magazine Production). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 335G. Advanced Television Reporting and Producing.

Restricted to journalism majors. Advanced writing and reporting skills for the collaborative production of television news programs on deadline. Students assist in producing a television news program. Three lecture hours and three laboratory hours a week for one semester. Journalism 335G and 372D may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each, and Journalism 330F (or 353D) with a grade of at least C.

J 335J. Mobile Programming for Journalists.

Restricted to journalism majors. Students will learn coding and other skills in preparation for designing mobile news apps. Three lecture hours a week for one semester. Additional hour(s) to be arranged. Journalism 335J and 339T (Topic: Introduction to Mobile Programming for Journalists) may not both be counted. Prerequisite: Upper-division standing and Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 336D. Graphic Design for Print and Online.

Restricted to journalism majors. Overview, design, and production of materials for online and print storytelling. Subjects include design principles, visual perception, typography, manipulation of images and photographs, and page design for media platforms. Three lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Journalism 303F, 319, 336, 336D. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 336F. Social Media Journalism.

The role of journalism in emerging digital social networks, examining current and traditional theories about social media as a form of journalism. Practice in the use of live chatting, tagging, geotagging, wikis, Twitter, Flickr, and digital avatars as news-gathering techniques. Three lecture hours a week for one semester. Journalism 336F and 349T (Topic: Social Media Journalism) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 336G. Producing Social Documentaries for Television News.

Restricted to journalism majors. Instruction in the production of social documentaries for television, with emphasis on social issues often ignored

by television news. Includes production of a twenty-minute long-form story. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each; Journalism 331G or 359T (Topic 7: Podcasting) with a grade of at least C.

J 337F. Long-Form Feature Writing.

Restricted to journalism majors. Advanced instruction in reporting and writing long-form narratives, including lessons in analyzing story-telling tools, strategies, and techniques. Examination of narrative strategies and techniques across different media platforms. Three lecture hours a week for one semester. Journalism 337F and 374D may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 337G. Opinion Writing.

Restricted to journalism majors. Examines opinion writing and commentary in traditional print and evolving online formats. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 337J. Writing for Online News Audiences.

Restricted to journalism majors. Students will learn how to write informatively and effectively for online audiences, and how to repurpose traditional print journalism for online publication. Three lectures a week for one semester. Journalism 337J and 349T (Topic 22) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 338F. Advanced Visual Design.

Restricted to journalism majors. Advanced exploration of principles and processes of visual design, including design principles, visual perception, typography, image making, uses of color, printing techniques, and publication design. Three lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Journalism 338F, 359T (Topic 3: Advanced Visual Design), 395 (Topic 5: Advanced Visual Design). Prerequisite: Journalism 303F, (or 319), or 336D with a grade of at least C, and Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 338G. Data Visualization.

Restricted to journalism majors. An investigation of how to tell stories through data and data visualization. Subjects include finding compelling data sets, cleaning and analyzing the contents, and presenting results online through a variety of methods, including online interactive charts and maps. Journalism 338G and 359T (Topic: Data Visualization) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 339D. News Documentaries and Public Affairs.

Study and practice of researching, writing, and producing short-form and magazine documentaries for television. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) with a grade of at least C, and admission to a journalism area of concentration.

J 339F. Investigative Reporting.

Restricted to journalism majors. Emphasis on determining what an investigative story is, finding investigative stories, and basic tactics in pursuing such stories. Three lecture hours and three laboratory hours a week for a semester. Journalism 339F and 359T (Topic 5: Investigative Reporting) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 339G. Mobile News App Design.

Restricted to journalism majors. Planning and building a mobile app, whether for Android, iOS, or web-based, and personal communication in the news business and in various other journalism-related topics. Journalism 339G and Journalism 359T (Topic: Mobile News App Design) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each, and consent of instructor.

J 339S. Research in Texas Sports and Media.

Same as Communication 330. Restricted to journalism majors. Supervised research with a faculty member; research may consist of an individual project or assisting a faculty research project. Hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing and a University grade point average of at least 2.25; and Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 339T. Topics in Specialized Journalistic Skills.

Restricted to journalism majors. Contemporary social, professional, and intellectual concerns in the practice of specialized journalistic skills. Three lecture hours a week for one semester. Some topics may require additional laboratory hours. May be repeated for credit when the topics vary. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 340C. Topics in Journalism, Communication, and Culture.

Issues concerning minority or nondominant groups within the United States. Three lecture hours a week for one semester. Some topics may require additional laboratory hours. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 4: Leadership, Management, and the Media. Prerequisite: Admission to a journalism area of concentration.

J 340F. Covering the Global Economy.

Restricted to journalism majors. Examines the enduring financial, economic, and business issues journalists confront in covering the global economy. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 340G. Reporting Asia: A Foreign Correspondent's Framework.

Restricted to journalism majors. Explores dynamic ways of looking at, thinking about, and reporting the world, and establishes a framework for analyzing how the news media cover key events, issues, and processes that shape our lives in a global society. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 340G, 349T (Topic 17: Reporting Asia), 395 (Topic 17: Reporting Asia). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 340J. Documentary Tradition of Latin America.

Restricted to journalism majors. Contemporary social, professional, and intellectual concerns with the practice of journalism. Study of still photographic and video documentary work by Latin Americans about Latin America. Production of photographic essays on Latin American culture. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 340J, 349T (Topic: Documentary Tradition in Latin America), 395 (Topic 4: Documentary Tradition of Latin America). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 341F. Understanding African Americans and the Media.

Restricted to journalism majors. Examination of documentaries and films, readings and discussions, writing and research assignments, and group projects to increase understanding of the historical context of African Americans in United States society. Focuses on evaluating media representation and coverage of African Americans. Three lecture hours a week for one semester. Journalism 341F and 340C (Topic 2: African Americans and the Media) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 341G. Reporting China: A Foreign Correspondent's Workshop.

Restricted to journalism majors. Contemporary social, professional, and intellectual concerns with the practice of journalism. Three lecture hours a week for one semester. Journalism 341G and 349T (Topic 18: Reporting China) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 341J. Minorities and the Media.

Restricted to journalism majors. Issues concerning minority or nondominant groups in the United States. Survey of minority communication problems, including alienation, fragmentation, and media and Internet access. Criticism and feedback for minority groups based on racial/ethnic background, age, sex, disability, social or economic class, and sexual orientation. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 340C (Topic 1: Mass Media and Minorities), 341J, Latin American Studies 322 (Topic 10: Minorities and the Media), Mexican American Studies 374 (Topic 22: Minorities and the Media), Urban Studies 354 (Topic: Mass Media and Minorities), Women's and Gender Studies 340 (Topic 21: Minorities and the Media). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 342F. Women and the News.

Restricted to journalism majors. Historical and contemporary exploration of women and the news. Examination of the role of women in producing news and the construction of women within news texts. Three lecture hours a week for one semester. Journalism 340C (Topic 5: Women and the News) and 342F may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 342G. Reporting the World: A Critical Examination of the United States News Media.

Restricted to journalism majors. Dynamic ways of looking at, thinking about, and reporting the world, both abroad and at home. Establishes a framework for analyzing how the news media cover key events, issues, and processes that shape our lives in a global society. Three lecture hours a week for one semester. Journalism 342G and 349T (Topic 19: Reporting the World) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 343F. Journalism and Religion.

Restricted to journalism majors. Critical examination of how religion traditionally has been covered in the United States, and guidelines for developing individual thinking and reporting on religious issues. Three lecture hours a week for one semester. Journalism 340C (Topic 3: Journalism and Religion) and 343F may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 343G. Exploring Digital Media and Society.

Restricted to journalism majors. Examines the connection between new media and society through a variety of theoretical and practical perspectives to explore the implications of the use of technology and

new media in influencing community, social relationships, and public and private spaces, as well as the profession of journalism. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 343J. Globalization and Social Media.

Restricted to journalism majors. An investigation of new communication technologies as they pertain to globalization and social media. Three lecture hours a week for one semester. Only one of the following may be counted: Asian American Studies 320 (Topic: Globalization and Social Media), Journalism 343J, 349T (Topic: Globalization and Social Media), Radio-Television-Film 331M (Topic: Globalization and Social Media), Sociology 321K (Topic: Globalization and Social Media). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 344F. Reporting on Gender and Sexuality.

Restricted to journalism majors. Instruction on how to cover controversial issues around gender and sexuality. Review of the sociology of gender and sexuality, with a focus on political, economic, and cultural implications. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 344G. Urban Journalism.

Restricted to journalism majors. Studies of basic city functions and how to detect urban dysfunctions before crises become news. Topics include infrastructure decay, traffic congestion, poverty and homelessness, digital divides, school dropouts, conflict and crime, riots and protests, obesity and disease, recreation, and pollution. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 344J. Media Images and Society.

Restricted to journalism majors. The power of mediated images in culture and society; exploration of the way images, language, and human activity shape visual messages; and the historical relationship between technology and image creation. Three lecture hours a week for one semester. Journalism 344J and 349T (Topic: Media Images and Society) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 345F. Social Issues Reporting.

Restricted to journalism majors. Coverage of social issues such as immigration, health care, and child welfare. Examination of stereotypes, how they affect reporting, and how they change as student reporters encounter new subjects. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 345G. Human Rights Journalism.

Restricted to journalism majors. Exploration of the role of journalists in exposing human rights abuses. Modules include case studies from El Salvador, South Africa, Zimbabwe, Rwanda, Bosnia, Sudan, Israel, and Russia, as well as the legal and moral obligations of journalists as witnesses to atrocities and genocide. Examination of the Bush Administration's global War on Terror and the legacy confronting the Obama Presidency. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 345J. Web Design for Journalists.

Restricted to journalism majors. An overview of Web technologies used for publishing and marketing purposes, and an analysis of the evolution and potential of digital publishing. Designed to familiarize

students with systems commonly used in Web development such as HTML and CSS coding; content management systems; graphic design; usability and search engine optimization (SEO); online advertising and marketing(Google AdWords/AdSense and social media); and audience tracking (Google Analytics). Meets three hours a week for one semester. Journalism 345J and 359T (Topic: Web Design for Journalism) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 346F. Reporting on the Environment.

Restricted to journalism majors. Instruction and supervised fieldwork in environmental coverage. Topics include interviewing, elements and structures of good environment writing, the concepts of scientific certainty and uncertainty, and communicating complex science to lay audiences. Issues covered include climate change, energy, air and water quality, and sustainability. Three lecture hours a week for one semester. Journalism 346F and 349T (Environmental Journalism) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 346G. Domestic Issues and Global Perspective.

Restricted to journalism majors. Comparative reporting and covering social issues from global and intercultural perspectives. Proper positioning of the United States globally in terms of recession, food, health care, education, energy consumption, and climate change. Three lecture hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 347F. Reporting Latin America.

Restricted to journalism majors. Foreign reporting and international news production processes, with special emphasis on Latin America. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 347F, 349T (Topic 4: International Reporting), 395 (Topic 4: Documentary Tradition of Latin America). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 347G. Cultural Survey of Photography.

Restricted to journalism majors. Development of photojournalism and commercial, documentary, amateur, and art photography, including historical processes, the evolution of stylistic trends, and the careers of major photographers. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 347G, 362E, 387P. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each; and Communication 316 or Journalism 316 with a grade of at least C.

J 347S. Magazine Management.

Study of the business of launching and maintaining successful publications. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Journalism 310F (or 320D) and 327 with a grade of at least C in each, and admission to a journalism area of concentration.

J 348D. Gender and the News.

Restricted to Journalism majors. Historical and contemporary exploration of gender and the news. Examination of the role of marginalized gender groups in producing news and the construction of gender within news texts. Three lecture hours a week for one semester. Journalism 340C (Topic 5: Women and the News) and Journalism 342F may not both be counted. Fulfills the communication and culture requirement in the College of Communication. May be counted toward the cultural diversity flag requirement. Offered on the letter-grade basis only. Prerequisite: Upper-division standing, and Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 348F. Covering the Latino Community in the United States.

Restricted to journalism majors. Challenging and developing views of the contemporary Latino community and other underrepresented people in the United States. Topics include a history of ethnic groups in the United States and their politics, education, organization, immigration, culture, power, and media. Three lecture hours a week for one semester. Journalism 348F and 349T (Topic 10: Covering the Latin Community in the United States) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 348G. The Business of Sports Media.

Same as Advertising 348S and Public Relations 348S. Examination of the business of sports-related media, including over-the-air television, cable, satellite television, print, radio, social media, and internet-based media, and the impact of such media on sports presentation and development, professional franchises, colleges, and conferences. Emphasis on how the business of sports media generates revenue and content, and the business models for each type of media, the challenges to such models, and the likely future changes to them. Three lecture hours a week for one semester. Only one of the following may be counted: Advertising 348S, 378 (Topic: The Business of Sports Media), Communication 325 (Topic: The Business of Sports Media), Journalism 348G, 349T (Topic: The Business of Sports Media), Public Relations 348S, 378 (Topic: The Business of Sports Media). Prerequisite: Upper-division standing and a University grade point average of at least 2.25; additional prerequisite for journalism majors: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 348S. Media Management.

Print and broadcast management and planning in operations, personnel, content, marketing, finance, technology, and regulation. Three lecture hours a week for one semester. Prerequisite: Admission to a journalism area of concentration.

J 349F. Reporting Public Health and Science.

Restricted to journalism majors. Specialty reporting to help news consumers understand complex health and medicine issues. Considers the lack of critical perspective, balanced reporting, and grasp of fundamental issues that afflict much health reporting. Focuses on the latest reporting techniques and narrative skills to illuminate an intellectually demanding field that also includes public health policy. Three lecture hours a week for one semester. Journalism 349F and 349T (Topic: Reporting Public Health and Science) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 349G. Sports Journalism.

Restricted to journalism majors. Contemporary professional skills and techniques in covering sports and athletics, including interviewing coaches and athletes, reporting, the business side of sports, ethical issues for sports journalists, and writing sidebars and color stories. Three lecture hours and three laboratory hours a week for one semester. Journalism 349G and 359T (Topic 1: Sports Journalism) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 349T. Topics in Understanding and Reporting Social Issues.

Restricted to journalism majors. Contemporary social, professional, and intellectual concerns in the practice of journalism. Three lecture hours a week for one semester. Some topics may require additional laboratory hours. May be repeated for credit when the topics vary. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

Topic 1: Senior Seminar. Capstone experience in analysis of current journalism issues. Students complete a major research project.

Additional prerequisite: Consent of instructor.

Topic 5: Broadcast News Practices and Analysis.

Topic 8: Alternative Media. Journalism 349T (Topic 8) and 395 (Topic 22: Alternative Media) may not both be counted.

Topic 9: Covering Technology and Innovation.

Topic 11: Editorial Column Writing.

Topic 14: Latino Policy Issues.

Topic 20: Video Journalism for the Web.

Topic 21: Writing for Magazines and Specialty Publications.

Topic 22: Writing for Online Publications.

J 350F. Media Law.

Examination of legal rights and restrictions for online and print journalism, including Constitutional guarantees, libel, invasion of privacy, and contempt of court. Three lecture hours a week for one semester.

Journalism 350F and 360 may not both be counted. Required for all journalism majors. Prerequisite: For journalism majors, Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 351F. Journalism, Society, and the Citizen Journalist.

Restricted to journalism majors. Social and ethical responsibilities; and legal rights and restrictions, including Constitutional guarantees, libel, invasion of privacy, and contempt of court. Three lecture hours a week for one semester. Journalism 351F and 349T (Topic 13: Journalism, Society, and the Citizen Journalist) may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 352F. Ethics in Journalism.

Restricted to journalism majors. In-depth examination of the ethical choices individual journalists face and the ethical implications of how news media operate in a larger social and political framework. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 352F, 349T (Topic 12: Ethics in Journalism), 395 (Topic 23: Ethics in Journalism). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 353F. Historical Perspectives in Journalism.

Restricted to journalism majors. Evolution of journalism and mass media, including the social, economic, and political factors that have contributed to changes in news gathering and distribution. Three lecture hours a week for one semester. Journalism 353F and 366E may not both be counted. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 354F. Journalism and Press Freedom in Latin America.

Restricted to journalism majors. Focus on journalism in Latin America with an emphasis on the struggle for democracy and press freedom in the region through country-by-country survey of historical, political, economic, cultural, ethnic and geographical aspects. Examination of the evolution of professional journalism in Latin America, including topics such as the legal framework for freedom of expression, ethical principles, concentration of media ownership and the emergence of digital media. Knowledge of Spanish language is recommended, but it is not a requirement. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 354F, Journalism 367E, or Latin American Studies 322 (Topic 14). Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 359T. Topics in Journalism, Skills, and Techniques.

Restricted to journalism majors. Contemporary professional skills and techniques in the practices of journalism. Three lecture hours and two to four laboratory hours a week for one semester, as required by the topic.

May be repeated for credit when the topics vary. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

Topic 4: Advanced News Editing.

J 360F. Internship.

Restricted to journalism majors. Internships to be arranged by student and approved by instructor. Internship hours to be arranged. Journalism 331K and 360F may not both be counted. Offered on the pass/fail basis only. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

J 160G. Journalism Practicum.

Restricted to journalism majors. Internship hours to be arranged. Journalism 131P and 160G may not both be counted. May be repeated for credit, but only one hour may be counted toward the Bachelor of Journalism degree. Offered on the pass/fail basis only. Prerequisite: Communication 350 or Journalism 360F.

J 361F. Reporting Texas.

Restricted to journalism majors. Students work as online reporters, photographers, and editors for the School of Journalism's Reporting Texas website. Three lecture hours and three laboratory hours a week for one semester. Journalism 361F and 359T (Topic: Reporting Texas) may not both be counted. Prerequisite: Six semester hours of upper-division coursework in journalism with a grade of at least B in each course.

J 362F. Journalism Portfolio.

Restricted to journalism majors. A synthesis experience to polish journalism skills, showcase reporting and production abilities across multiple journalistic platforms, and complete a professional online portfolio. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Six semester hours of upper-division coursework in journalism with a grade of at least B in each course.

J 363. Theories of Mass Communication.

Comparative survey of perspectives, research, and theories on communication through the mass media; theories on media effects and the construction of social reality, especially regarding the news media. Three lecture hours a week for one semester.

J 364E. The Mass Media and Society.

Readings, lectures, films, guest speakers, and panel discussions on the function, role, and responsibility of the mass media in modern society. Three lecture hours a week for one semester. Prerequisite: Admission to a journalism area of concentration, or consent of instructor.

J 367E. Journalism in Latin America.

Study of the practice of journalism in Latin America. Survey of the region, including historical, political, economic, cultural, ethnic, and geographical aspects. Three lecture hours a week for one semester. Journalism 367E and Latin American Studies 322 (Topic 14) may not both be counted. Prerequisite: Upper-division standing and a major in journalism, or consent of instructor.

J 370K. Advanced Photojournalism.

Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of photo stories, photo essays, and feature stories, with editing and page layout. Three lecture hours and four laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Journalism 355 with a grade of at least C, and acceptance into the photojournalism area of concentration; or consent of instructor.

Topic 1: Advanced Photo Editing and Design. Taught abroad; location may vary by semester. Only one of the following may

be counted: Journalism 370K (Topic 1), 370K (Topic: Advanced Photojournalism in Czechoslovakia), 395 (Topic 2: Advanced Photo Editing and Design).

Topic 2: Documentary Video.

Topic 3: Picture Editing.

J 371K. Photographic Illustration.

Principles of studio lighting, theory and practice of contemporary color, location lighting, and the production of portfolio-quality work, as applied to advertising, photographic illustration, and photojournalism. Three lecture hours and four laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Journalism 355 with a grade of at least C, and acceptance into the photojournalism area of concentration; or consent of instructor.

Topic 1: Location Lighting.

Topic 2: Studio Photography.

J 373D. Advanced News Reporting.

Study of community and institutional news sources; reporting on courts and city, county, and state governments; emphasis on fact-finding and skill in writing; in-depth reporting of significant events. Three lecture hours and six hours of laboratory reporting a week for one semester. Prerequisite: Journalism 310F (or 320D) with a grade of at least C, and admission to a journalism area of concentration.

J 375. Magazine Editing and Publishing.

Restricted to journalism majors. Advanced magazine design and layout; critical analysis of the magazine in society. Three lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Journalism 375, 376D, 377D. Prerequisite: Journalism 330 and 319 (or 336) with a grade of at least C in each.

J 376D. Newspaper Editing and Layout.

Restricted to journalism majors. Advanced newspaper typography, layout, and editing. Graphics techniques and production processes; planning content and format of newspapers; copydesk management. Three lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Journalism 375, 376D, 377D. Prerequisite: Journalism 330 and 319 (or 336) with a grade of at least C in each.

J 377D. Print Design.

Advanced print design and layout. Graphics techniques and production processes; planning content and format of newspapers and magazines. Three lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Journalism, 375, 376D, 377D. Prerequisite: Journalism 319 (or 336) with a grade of at least C, credit with a grade of at least C or registration for Journalism 330, and admission to a journalism area of concentration.

J 379. Journalism Independent Study.

Restricted to journalism majors. Designed to give students the opportunity to pursue special studies for which separate courses have not been organized. The equivalent of nine laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each, and consent of the director of the school.

J 379H. Honors Tutorial Course.

Restricted to journalism majors. Conference course of intensive study, planned by Journalism Honors Committee; research and the writing of a substantial paper on a special journalism topic. Individual instruction. May be repeated for credit. Prerequisite: Admission to the Journalism Honors Program and consent of the director of the school.

J 379P. Photojournalism Research Projects.

Restricted to journalism majors. Designed to give photojournalism students the opportunity to pursue special studies for which separate courses have not been organized. The equivalent of nine laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Journalism 310F (or 320D) and 311F (or 321C) with a grade of at least B- in each.

Department of Radio-Television-Film

Most upper-division radio-television-film courses are restricted to radio-television-film majors. Non-majors interested in taking an upper-division course in radio-television-film should contact the instructor after the fourth class day to request permission to be added to the class. For Radio-Television-Film 317 and 318, the department restricts enrollment during the first registration period to radio-television-film majors. During later registration periods, courses in which space is available may be opened to nonmajors.

Attendance is required at the first class meeting of Radio-Television-Film 317 and 318 and all upper-division radio-television-film courses. At the discretion of the instructor, students who do not attend the first class meeting may be dropped from the course, even if they have registered and paid their tuition.

The Department of Radio-Television-Film reserves the right to retain and to use for noncommercial purposes copies of all work completed by students as part of departmental course assignments.

Because prerequisites are subject to change, students should consult the *Course Schedule* before registering.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Radio-Television-Film: RTF

Lower-Division Courses

RTF 301N. Introductory Topics in Radio-Television-Film.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

RTF 305 (TCCN: COMM 1307). Introduction to Media Studies.

Introduction to historical, cultural, political, economic, and international characteristics of film, television, and other media in society. Two lecture hours, one discussion hour, and one two-and-one-half-hour film screening a week for one semester. Required of all radio-television-film majors.

RTF 309. Communication Technology and Society.

Same as Communication 309. Study of communication technologies, from writing to the Internet; their uses in interpersonal, group, mass, and international contexts; and the impact of technologies on work. Three lecture hours and one discussion hour a week for one semester.

RTF 312C. Introduction to Global Media.

A world perspective on information, news, and entertainment communication systems; politics, technology, economics, and culture. Three lecture hours a week for one semester.

RTF 314 (TCCN: COMM 2366). The Development of the Motion Picture.

Survey of significant movements and schools of filmmaking through viewings and discussions of representative motion pictures; critical approaches to performance, sociological impact, visual aesthetics, and industry structure. Three lecture hours and one two-hour film screening a week for one semester. A one-hour discussion section may also be required.

RTF 316 (TCCN: COMM 1335). History of Television and Radio.

Survey of evolution of U.S. television and radio programming, aesthetics, production, and policy. Three lecture hours a week for one semester, with one screening of up to two hours a week as required.

RTF 316M. Race, Ethnicity, and the Media.

Same as Communication 316M. Critical review of contemporary and historical media images of, and discourses on, race and ethnicity. Introduction to relevant communication research and institutions. Three lecture hours and one discussion hour a week for one semester. Fulfills the communication and culture requirement in the College of Communication.

RTF 317. Narrative Strategies.

Study of the way meaning is structured and perceived in the screen image; introduction to basic narrative techniques. Includes viewing and analysis of narrative examples. Three lecture hours and two and one-half hours of film screening a week for one semester. Some sections may require an additional discussion hour. Required of all students in the production area. Students may not enroll in this course more than twice. Prerequisite: Three semester hours of lower-division coursework in radio-television-film.

RTF 318. Introduction to Image and Sound.

Exploration of fundamental production concepts and techniques through lectures, projects, and laboratory work. Three lecture hours and three laboratory hours a week for one semester. Students may not enroll in this course more than twice. Prerequisite: Six semester hours of lower-division coursework in radio-television-film and consent of instructor.

RTF 319. Introduction to Digital Media.

Basic information, skills, and theories of digital media. Includes the study of computer-based image construction, Web-based tools for research and production, and theories of interactivity. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Three semester hours of lower-division coursework in radio-television-film.

RTF 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

RTF 321F. Media Analysis and Criticism.

Restricted to radio-television-film majors. A foundational course devoted to the critical analysis of media in a variety of contexts. Three lecture hours a week for one semester. Additional hours may be required for some topics. May be repeated for credit when the topics vary.

Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 324F. Social Theories of Media.

A foundational course exploring social theories of media. Three lecture hours a week for one semester. Additional hours may be required for some topics. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, upper-division standing and twelve semester hours of lower-division coursework in radio-television-film; for others, upper-division standing.

RTF 124L, 224L, 324L. Topics in the Entertainment Professions.

Restricted to radio-television-film majors. Contemporary issues, practices, and skills related to communication and the entertainment industries, including studies in the business of entertainment, the entertainment professions, the creative process, and contemporary Hollywood cinema. One, two, or three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, three hours of lower-division coursework in radio-television-film, a University grade point average of at least 2.25, and admission to the Semester in Los Angeles program.

RTF 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

RTF 330G. Topics in Media Research.

Restricted to radio-television-film majors. Applied research investigating specific media topics. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 305 with a grade of at least C, and nine additional semester hours of lower-division coursework in radio-television-film with a grade of at least C.

RTF 330K. Introduction to Research Methods.

Restricted to radio-television-film majors. Introduction to applied media research and research criticism; fundamentals of audience analysis, survey design, experimental and field research, content analysis. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305 and nine additional semester hours of lower-division coursework in radio-television-film.

RTF 330L. Internship in Film and Electronic Media.

Restricted to radio-television-film majors. Practical work experience related to the study of film, television, radio, or other media. Students must make their own arrangements to secure relevant internships. The equivalent of ten lecture hours a week for one semester. Radio-Television-Film 330L and 330M may not both be counted. Offered on the pass/fail basis only. Prerequisite: Upper-division standing, twelve semester hours of lower-division coursework in radio-television-film, and consent of the internship coordinator.

RTF 330M. Internship in Digital Media.

Position availability depends on qualifications of student and number of internships open at time of enrollment. Practical work experience in digital media and postproduction media. One and one-half lecture hours and at least ten hours of fieldwork a week for one semester. Radio-Television-

Film 330L and 330M may not both be counted. Offered on the pass/fail basis only. Prerequisite: Upper-division standing, twelve semester hours of coursework in the College of Communication with a grade of at least C in each course, and consent of instructor.

RTF 331J. Policy Issues in New Communication Technologies.

Overview of policy and regulation of communication systems in the United States, with emphasis on contemporary technologies. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing, and the following coursework with a grade of at least C in each course: Radio-Television-Film 305, 309, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 331K. Film, Video, and Television Theory.

Restricted to radio-television-film majors. Survey of basic theories that seek to explain the relationships between film, video, television, and their respective audiences. Three lecture hours a week for one semester, with one two-hour film screening a week if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305, either 314 or 316, and six additional semester hours of lower-division coursework in radio-television-film.

Topic 1: Cult Movies and Gender Issues.

Topic 2: Television and Theories of Gender.

Topic 4: Feminist Media Theory. Survey of basic feminist media theory.

Topic 5: Screen Theory. Survey of basic screen theory.

RTF 331L. Corporate and Instructional Video.

Restricted to radio-television-film majors. Study, design, production, use, and evaluation of corporate and instructional video materials. Three lecture hours a week for one semester, with studio hours to be arranged. Prerequisite: Upper-division standing; Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B in each.

RTF 331M. New Communication Technologies.

Restricted to radio-television-film majors. Survey of history of new communication technologies. Analysis of regulation, policy, economics, and programming of new communication technologies. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305, 309, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 331N. The Information Society.

Introduction to information technologies such as the Internet, telephones, and computers and their relation to existing media; includes history, policy, economics, and social impact. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, upper-division standing and twelve semester hours of lower-division coursework in radio-television-film; for others, upper-division standing.

RTF 331P. Topics in New Communication Technologies.

Restricted to radio-television-film majors. Applications and potential effects of new telecommunications and information technologies in the home, workplace, and in education, social services, and politics. Three lecture hours a week for one semester; additional hours may be required for some topics. May be repeated for credit when the topics vary.

Prerequisite: Radio-Television-Film 309 and nine additional semester hours of lower-division coursework in radio-television-film.

RTF 331Q. Topics in Digital Media.

Laboratory explorations of the spatial and narrative dimensions of the digital environment. Three lecture hours and three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, the following coursework with a grade of at least C in each course: Radio-Television-Film 305, 318 or 319, and six additional semester hours of coursework chosen from Radio-Television-Film 309, 314, 316, 317, 318, and 319; for others, upper-division standing.

RTF 331R. Topics in New Media.

Students produce projects in either film, video, computer animation, collage, sculpture, assemblage, soundscape, or performance. Prior experience in one or more media is helpful but not necessary. Three lecture hours and one and one-half studio hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, the following coursework with a grade of at least C in each course: Radio-Television-Film 305, 318 or 319, and six additional semester hours of coursework chosen from Radio-Television-Film 309, 314, 316, 317, 318, and 319; for others, upper-division standing.

RTF 331T. Topics in Digital Media: Audio.

Explorations of the auditory dimensions of the digital environment. Three lecture hours a week for one semester; additional hours may be required for some topics. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, Radio-Television-Film 318 or 319, and nine additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing.

RTF 333. Introduction to Screenwriting.

Restricted to radio-television-film majors. An introduction to screenwriting for features, short films, documentaries, and television. Lectures explore the basic theory of story, character, and structure. Students write original screenplays during workshop hours. One and one-half lecture hours and two workshop hours a week for one semester. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 334. Programming and Audiences.

Study of media programming and its cognitive and behavioral impact on audiences. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 335. Television Analysis and Criticism.

Analysis of critical methods, selected television programs, and selected critics. Practice in written criticism required of all students. Three lecture hours a week for one semester, with two hours of film screening a week if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 336. Special Projects in Radio-Television-Film.

Restricted to radio-television-film majors. Comprehensive research or creative projects in areas of special interest developed and executed by the student under faculty supervision. Individual instruction. May be repeated once for credit. Prerequisite: Upper-division standing, twelve semester hours of lower-division coursework in radio-television-film, and consent of the department.

RTF 337. Radio Fundamentals.

Restricted to radio-television-film majors. Fundamentals of audio program production. Students create either brief or long audio programs. Three lecture hours a week for one semester, with studio hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B- in each.

RTF 337P. Multitrack Audio Production.

Restricted to radio-television-film majors. Principles and practice of multitrack audio production. Three lecture hours a week for one semester, with studio hours to be arranged. Prerequisite: Upper-division standing; Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B- in each.

RTF 340. Studio Production.

Restricted to radio-television-film majors. Introduction to production of television programs, including the multicamera format. Three lecture hours and six laboratory hours a week for one semester. May not be taken concurrently with Radio-Television-Film 366 or 366K. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, and six additional semester hours of lower-division coursework in radio-television-film.

Topic 1: Drama/Music Production.

Topic 2: Public Affairs Production.

RTF 341. Audio Production: Sound for Picture.

Restricted to radio-television-film majors. Theory and practice of producing quality audio for television, film, and other picture media. Includes basic editing on a digital audio workstation. Three lecture hours a week for one semester, with studio hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 341C. Advanced Audio: Sound Design and Postproduction.

Restricted to radio-television-film majors. Sound design and editing, and fundamentals of postproduction audio mixing. Three lecture hours a week for one semester, with studio hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 337, 337P, or 341.

Topic 1: Sound Design and Mixing. Restricted to radio-television-film majors. Sound design and editing, and fundamentals of postproduction audio mixing. Three lecture hours a week for one semester, with studio hours to be arranged. Radio-Television-Film 341C (Topic: Sound Design and Mixing) and 341C (Topic 1) may not both be counted. Additional prerequisite: Upper-division standing.

RTF 342. Topics in Global Media.

Study of political, social, cultural, and economic factors affecting the use and impact of communication systems in an international context. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

Topic 1: National Media Systems.

Topic 2: Comparative Media Systems.

Topic 3: International Communication: Third World Issues. Same as Latin American Studies 322 (Topic 7) and Mexican American Studies 374 (Topic 17). Additional prerequisite: For radio-television-film majors, upper-division standing; consent of instructor; and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305 and nine additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing and consent of instructor.

Topic 4: Participatory Media.

Topic 6: Development Communication. Same as Middle Eastern Studies 341 (Topic 4: Development Communication). Only one of the following may be counted: Middle Eastern Studies 322K (Topic 14: Development Communication), 341 (Topic 4), Radio-Television-Film 342 (Topic 6).

Topic 7: Global Media Systems.

RTF 342T. International Telecommunications.

Restricted to radio-television-film majors. Overview of issues and history of international telecommunication systems, focusing on the roles of business and government. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305, 309, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 343. Advanced Video Production.

Restricted to radio-television-film majors. Advanced study in film, television, and media production. Three lecture hours and three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 340, 366, or 366K; additional prerequisites vary with the topic.

Topic 1: Advanced Narrative Production. Restricted to students in radio-television-film. Individual and group production of short films using high-definition video. Three lecture hours and three laboratory hours a week for one semester. Offered on the letter-grade basis only. Additional prerequisite: Upper-division standing and Radio-Television-Film 340 or 366K (Topic 2: Narrative Production).

Topic 2: Advanced Documentary Production. Individual and group production of a documentary, from research and preproduction to completion.

Topic 3: Advanced Soundstage Production. Group production of short films using the Hollywood soundstage as the primary model.

Topic 4: Creating Cross-Platform Fundraising Media. Small group production of client-commissioned fundraising media and an exploration of the realm of independent production contracting. Radio-Television-Film 343 (Topic 4) and 344M (Topic: Cross-Platform Content Creation) may not both be counted. Additional prerequisite: Upper-division standing, and Radio-Television-Film 346, 366D, 366K, or 368 with a grade of at least B.

Topic 5: Developing Independent Feature Films. Restricted to radio-television-film majors. Group research and lectures about producing an independent feature film. Three lecture hours and three laboratory hours a week for one semester. Radio-Television-Film 343 (Topic: Developing Indie Feature Films) and 343 (Topic 5) may not both be counted. Offered on the letter-grade basis only. Additional prerequisite: Upper-division standing and Radio-Television-Film 340 or 366K.

Topic 7: Film Funding and Promotion. Restricted to radio-television-film majors. Creation and implementation of social media presence, crowd funding, publicity, and festival exposure for independent films. Three lecture hours a week for one semester Offered on the letter-grade basis only. Additional prerequisite: Upper-division standing.

RTF 343M. Master Class.

Restricted to radio-television-film majors. Incorporates a guest speaker series, focused on a particular topic for the semester. Students conduct research, coordinate and attend the speaker series, and pursue creative projects related to the semester's topic. Three lecture hours and three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 343N. Advanced Three-Dimensional Production.

Restricted to radio-television-film majors. Carries the principles developed in Radio-Television-Film 366M into a variety of hands-on production settings and projects, including large-crew productions at Austin City Limits Live at the Moody Theater, as well as smaller shoots in a variety of other studios and locations. Three lecture hours and three laboratory hours a week for one semester, with additional hours to be arranged. Offered on the letter-grade basis only. Prerequisite: Upper-division standing, Radio-Television-Film 366M, and consent of instructor.

RTF 343S. Soundstage Production for Television and Film.

Restricted to radio-television-film majors. Study of the skills and aesthetics related to professional-level productions in the soundstage format. Three lecture hours and three laboratory hours a week for one semester. Radio-Television-Film 343 (Topic: Soundstage Production for Television and Film) and 343S may not both be counted. Prerequisite: Radio-Television-Film 340 or 366K with a grade of at least C.

RTF 344. Special Applications of Media Production.

Restricted to radio-television-film majors. Special problems involved in audio, film, and video production. Three lecture hours a week for one semester, with studio hours to be arranged if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B- in each. Additional prerequisites vary with the topic.

RTF 344M. Special Applications of Digital Media Production.

Special topics in digital media theory, design, or development. May include visual effects and motion graphics or digital media and digital art. Three lecture hours a week for one semester, with studio hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, Radio-Television-Film 318 or 319, and nine additional semester hours of coursework in radio-television-film; for others, upper-division standing.

Topic 1: Interactive Digital Storytelling. Use of digital tools to create original web-based audiovisual productions and the study of impact of digital media and technology on traditional film and video production. Three lecture hours a week, with studio hours to be arranged. Additional prerequisite: Upper-division standing

Topic 2: Computer Graphics for Film and Games. Restricted to radio-television-film majors. Three lecture hours a week for one semester. Radio-Television-Film 344M (Topic: Computer Animation and 3-D Modeling) and 344M (Topic 2) may not both be counted. Offered on the letter-grade basis only. Additional prerequisite: Upper-division standing.

Topic 3: Visual Effects and Motion Graphics. A production course designed to introduce students to the core concepts and techniques used in visual effects and motion graphics. Topics include, but are not limited to, compositing, animation, particles, and greenscreen. Three

lecture hours a week for one semester. Radio-Television-Film 344M (Topic: Visual Effects) and 344M (Topic 3) may not both be counted.

RTF 344N. Advanced Applications of Digital Media Production.

Restricted to radio-television-film majors. Advanced topics in digital media theory, design, and development. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and Radio-Television-Film 344M (Topic 3); additional prerequisites may vary with the topic.

Topic 1: Advanced Visual Effects. Production course that explores advanced topics, concepts and techniques in compositing, image and projection, digital painting, and animation. Radio-Television-Film 344N (Topic: Advanced Visual Effects) and 344N (Topic 1) may not both be counted. Only one of the following may be counted: Radio-Television-Film 344N (Topic: Advanced Visual Effects), 344N (Topic 1), 344N (Topic 2). Only one of the following may be counted: Radio-Television-Film 344N (Topic: Advanced Visual Effects), 344N (Topic 1), 344N (Topic 3). Offered on the letter-grade basis only.

Topic 2: Advanced Effects: Modeling. Radio-Television-Film 344N (Topic 1: Advanced Visual Effects) and 344N (Topic 2) may not both be counted. Offered on the letter-grade basis only.

Topic 3: Advanced Effects: Rigging. Radio-Television-Film 344N (Topic 1: Advanced Visual Effects) and 344N (Topic 3) may not both be counted. Offered on the letter-grade basis only.

Topic 4: Undergraduate Animation Thesis. Each student will produce a two- to ten-minute animated short film. Radio-Television-Film 344N (Topic: Undergraduate Animation Thesis) and 344N (Topic 4) may not both be counted. Offered on the letter-grade basis only. Additional prerequisite: One of the following: Radio-Television-Film 343N, 344M (Topic 3), 344N (Topic 1), 351C, 351D, or 366M.

Topic 5: Character Animation in 3D. Restricted to radio-television-film majors. Hands-on approach to learning character animation in Maya. Introduction to the fundamental methods needed to create animated characters, including techniques used to create motion. Three lecture hours a week for one semester. Radio-Television-Film 344N (Topic: Character Animation in 3D) and 344N (Topic 5) may not both be counted. Additional prerequisite: Radio-Television-Film 344M (Topic 2).

RTF 345. Studies in Film History.

Restricted to radio-television-film majors. Critical assessment of major genres, periods, movements, and personalities in United States and international film history. Three lecture hours a week for one semester, with one two-hour film screening a week if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305, either 314 or 316, and six additional semester hours of lower-division coursework in radio-television-film.

Topic 1: Third World Cinema: Asia and the Middle East.

Topic 2: Israeli Cinema and Television. Only one of the following may be counted: Jewish Studies 363 (Topic 16: Israeli Cinema and Television), Middle Eastern Studies 325 (Topic 2: Israeli Cinema and Television), Radio-Television-Film 345 (Topic 2).

Topic 3: History of Mexican Cinema. Additional prerequisite: Upper-division standing, Radio-Television-Film 314 or 316, and nine additional semester hours of lower-division coursework in radio-television-film.

Topic 4: Latin American Cinema.

Topic 5: Third World Cinema: Africa and the Americas.

Topic 6: Experimental Film and Video. Critical assessment of the history and current trends in experimental film and video. Radio-

Television-Film 331K (Topic: Experimental Film and Video) and 345 (Topic 6) may not both be counted.

RTF 346. Introduction to Editing.

Restricted to radio-television-film majors. Theory and practice of video and film editing techniques. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 346E. Advanced Editing.

Restricted to radio-television-film majors. In-depth look at the principles, techniques, and aesthetics of editing; building a broad background for students' future professional development. Designed to provide a basic-to-intermediate level of familiarity with Avid editing software, by discussing and working on provided narrative, documentary, and technical exercises; various approaches to editing style in each case. Three lecture hours and two and one-half hours for film screenings a week for one semester, with additional laboratory hours to be arranged. Only one of the following may be counted: Radio-Television-Film 344 (Topic: Advanced Editing), 346C, 346E. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and Radio-Television-Film 346 with a grade of at least B.

RTF 347C. The Business of Media.

Restricted to radio-television-film majors. Survey of business practices in film, television, and music industries: development, production, distribution, and exhibition. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 348. Studies in Media Industries.

Examination of the economics and the production, research, management, and distribution practices of the film and electronic media industries. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 351C. Introduction to Two-Dimensional Animation.

Restricted to radio-television-film majors. Theory and practice of digital graphics and animation techniques. Three lecture hours a week for one semester, with studio hours to be arranged. Offered on the letter-grade basis only. Prerequisite: For majors, Radio-Television-Film 318 or 319, and nine additional semester hours of coursework in radio-television-film; for others, upper-division standing.

RTF 351D. Advanced Two-Dimensional Animation.

Restricted to radio-television-film majors. In-depth study of two-dimensional animation techniques and an introduction to stop-motion animation, green screen techniques, and postproduction effects. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Only one of the following may be counted: Radio-Television-Film 344M (Topic: Advanced Digital Animation), 344M (Topic: Two-Dimensional Animation and Motion Graphics), 351D. Prerequisite: Upper-division standing and Radio-Television-Film 351C.

RTF 351T. Three-Dimensional Animation.

Restricted to radio-television-film majors. Introduction to the art of three-dimensional animation using lectures, workshops, screenings, and labs. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Radio-Television-Film 344M (Topic: Three-

Dimensional Animation) and 351T may not both be counted. Prerequisite: Radio-Television-Film 351D.

RTF 359. Studies in Media and Culture.

Special topics related to the critical analysis of media in cultural contexts. Three lecture hours a week for one semester. Radio-Television-Film 359 and 359S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 314 or 316, and nine additional semester hours of lower-division coursework in radio-television-film.

RTF 359S. Studies in Media and Culture.

Restricted to radio-television-film majors. Special topics related to the critical analysis of media in cultural contexts. Three lecture hours and two hours of film screening a week for one semester. Radio-Television-Film 359 and 359S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 314 or 316, and nine additional semester hours of lower-division coursework in radio-television-film.

Topic 1: Hispanic Images and Counterimages. Same as Latin American Studies 322 (Topic 1: Hispanic Images and Counterimages) and Mexican American Studies 374 (Topic 9: Hispanic Images and Counterimages). The critical analysis of Hispanic images in media. Three lecture hours and one two-hour film screening a week for one semester. Only one of the following may be counted: Latin American Studies 322 (Topic 1), Mexican American Studies 374 (Topic 9), Radio-Television-Film 359S (Topic 1). Additional prerequisite: For radio-television-film majors: upper-division standing, Radio-Television-Film 314 or 316, and nine additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing.

Topic 2: Women and Media Culture. Critical analysis of media and its interrelation with issues of gender. Radio-Television-Film 359 (Topic: Women and Media Culture) and 359S (Topic 2) may not both be counted.

Topic 3: Gender and Rock Culture. Critical analysis of issues relating to media, gender, and rock culture. Radio-Television-Film 331K (Topic: Gender, Sexuality, and Rock Culture) and 359S (Topic 3) may not both be counted.

Topic 4: Media, Memory, and History. Critical analysis of the relationship between historical events and media.

RTF 365. Topics in Media and Society.

Restricted to radio-television-film majors. Advanced topics addressing media, communication, and society. Three lecture hours a week for one semester, with additional hours to be arranged if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

Topic 2: Latino Audiences. Same as Latin American Studies 322 (Topic 2: Latino Audiences) and Mexican American Studies 374 (Topic 10: Latino Audiences). Prerequisite: For radio-television-film majors: upper-division standing and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305 and nine additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing and consent of instructor.

Topic 3: Mass Media and Ethnic Groups. Same as Latin American Studies 322 (Topic 3: Mass Media and Ethnic Groups) and Mexican American Studies 374 (Topic 11: Mass Media and Ethnic Groups). Prerequisite: For radio-television-film majors: upper-division standing and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305 and nine additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing and consent of instructor.

Topic 4: History of United States Latino Media. Prerequisite: Upper-division standing, Radio-Television-Film 305 with a grade of at least C, and nine additional semester hours of coursework in radio-television-film.

Topic 5: Latin American Media. Prerequisite: Upper-division standing, Radio-Television-Film 305 with a grade of at least C, and nine additional semester hours of lower-division coursework in radio-television-film.

Topic 6: Latinos and Media. Same as Latin American Studies 322 (Topic 12: Latinos and Media) and Mexican American Studies 374 (Topic 24: Latinos and Media). Prerequisite: For radio-television-film majors, upper-division standing and the following coursework, with a grade of at least C in each course: Radio-Television-Film 305 and nine additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing and consent of instructor.

Topic 7: Narrowcasting. Prerequisite: Upper-division standing, Radio-Television-Film 305 with a grade of at least C, and nine additional semester hours of lower-division coursework in radio-television-film.

Topic 8: Migration and Media. Advanced study of global media issues, including traditional and digital media use, social inclusion, and migration to the United States from Latin America, Asia, and elsewhere. Students conduct research on the relationships between media and migration. Prerequisite: Upper-division standing, Radio-Television-Film 305 with a grade of at least C, and nine additional semester hours of coursework in radio-television-film.

Topic 9: Media Industries and Entrepreneurship. Same as Sociology 352E. Examination of the social, political, and economic contexts in which media and culture are produced, distributed, and monetized. Emphasis on new media and communication technologies. Three lecture hours a week for one semester. Only one of the following may be counted: Radio-Television-Film 365 (Topic: Media Industries and Entrepreneurship), 365 (Topic 9), Sociology 352E, 352M (Topic: Media Industries and Entrepreneurship). Additional prerequisite: For radio-television-film majors, upper-division standing and twelve semester hours of lower-division coursework in radio-television-film; for others, consent of instructor.

Topic 10: Globalization and Social Media. Same as Sociology 352S. Issues surrounding the hype, myth, paradox, and reality of social media in a global context. Three lecture hours a week for one semester. Only one of the following may be counted: Asian American Studies 320 (Topic: Globalization and Social Media), Journalism 349T (Topic: Globalization and Social Media), Radio-Television-Film 331M (Topic: Globalization and Social Media), 365 (Topic 10), Sociology 321K (Topic: Globalization and Social Media), 352S. Additional prerequisite: For radio-television-film majors, upper-division standing and twelve semester hours of lower-division coursework in radio-television-film; for others, consent of instructor.

RTF 365C. Media and Policy.

Advanced topics addressing media and policy in society. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, the following coursework with a grade of at least C in each course: Radio-Television-Film 305, either 314 or 316, and six additional semester hours of lower-division coursework in radio-television-film; for others, consent of instructor.

Topic 1: Media, Communication Law, and Ethics. Contemporary ethical and policy issues facing the transforming media industries and the American public. Rooted in an understanding of the First Amendment as well as the development of communication industries, the course examines a range of topics that new media and the Internet have complicated. Radio-Television-Film 365 (Topic: Media, Communication Law, and Ethics) and 365C (Topic 1) may not both be

counted. Additional prerequisite: Upper-division standing and twelve semester hours of lower-division coursework in radio-television-film.

RTF 365D. Media Literacy.

Advanced topics addressing media literacy and education. Three lecture hours a week for one semester; some topics require additional hours. May be repeated for credit when the topics vary. Prerequisite: For radio-television-film majors, upper-division standing and the following coursework with a grade of at least C in each: Radio-Television-Film 305, and nine additional semester hours of lower-division coursework in radio-television-film; for others, consent of instructor.

Topic 1: Digital and Information Literacy. Exploration of the expanding nature of literacy in a digital world. Study of the ability to strategically access, analyze, evaluate, and produce communication in a variety of forms through media literacy. Three lecture hours a week for one semester. Radio-Television-Film 365 (Topic: New Media Literacy) and 365D (Topic 1) may not both be counted. Additional prerequisite: For radio-television-film majors, twelve semester hours of lower-division coursework in radio-television-film; for others, consent of instructor.

RTF 366. Introduction to Field and Studio Production.

Restricted to radio-television-film majors. Basic theory and techniques in single-camera video production; individual and collective production assignments, with emphasis on technical proficiency, examination of the entire production process, visualization of ideas, and critical evaluation of the visual text. Three lecture hours and six laboratory hours a week for one semester. May not be taken concurrently with Radio-Television-Film 340 or 366K. Prerequisite: Upper-division standing; Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B in each.

RTF 366D. Directing Workshop.

Restricted to radio-television-film majors. Explores the role of the director, focusing on the director-actor relationship, narrative structure, and visual language. Three lecture hours and three laboratory hours a week for one semester. Radio-Television-Film 344 (Topic: Directing Workshop) and 366D may not both be counted. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, and six additional semester hours of lower-division coursework in radio-television-film.

RTF 366K. Introductory Production.

Restricted to radio-television-film majors. Workshops in narrative and documentary production. Three lecture hours and three laboratory hours a week for one semester. May not be taken concurrently with Radio-Television-Film 340 or 366. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B- in each.

Topic 2: Narrative Production. A workshop in visual storytelling and making non-dialogue films. Additional prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, and six additional semester hours of lower-division coursework in radio-television-film.

Topic 3: Documentary Production. Workshop in contemporary documentary practice, including directing, producing, cinematography, editing, sound recording, and distribution.

Topic 4: East Austin Stories. Students work in small production groups and make documentaries in and about East Austin for public screening at the end of the semester and for Webcasting.

RTF 366M. Introduction to Three-Dimensional Production.

Restricted to students in radio-television-film. An introduction to the aesthetics, science, theory and practice of three-dimensional production via lectures, screenings, and some hands-on production work in groups. No previous three-dimensional experience is required. Three lecture hours and three laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing, Radio-Television-Film 317 and 318 with a grade of at least B- in each, six additional semester hours of lower-division coursework in radio-television-film, and consent of instructor.

RTF 367K. Producing Film and Television.

Restricted to radio-television-film majors. Comprehensive consideration of the production process from the producer's standpoint regarding fiscal and creative management. Includes development and preproduction and production planning using computer budgeting and scheduling. Three lecture hours a week for one semester, with computer laboratory hours to be arranged. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; Radio-Television-Film 305 and three additional semester hours of lower-division coursework in radio-television-film with a grade of at least C in each course; and Radio-Television-Film 317 and 318 with a grade of at least B- in each.

RTF 367L. Narrative Filmmaking: 16-mm.

Restricted to radio-television-film majors. Theory and techniques in 16-mm film synchronous sound production; individual and collective production assignments, with emphasis on technical proficiency, examination of entire production process, visualization of ideas, and critical evaluation of the visual text. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Radio-Television-Film 366K.

RTF 367P. Advanced Producing.

Restricted to radio-television-film majors. Advanced practical application of the business and creative skills used to produce and distribute media projects in the marketplace. Three lecture hours a week for one semester. Radio-Television-Film 344 (Topic: Advanced Producing) and 367P may not both be counted. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 367K.

RTF 368. Advanced Production Topics.

Restricted to radio-television-film majors. Advanced study of production crafts in film, television, and other digital media. Three lecture hours and three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 343 or 367L.

Topic 2: Cinematography. Restricted to radio-television-film majors. Three lecture hours and three laboratory hours a week for one semester. Offered on the letter-grade basis only. Additional prerequisite: Upper-division standing; and Radio-Television-Film 343 (Topic 1: Advanced Narrative Production), 343 (Topic 2: Advanced Documentary Production), or 367L.

Topic 3: Advanced Production.

RTF 368C. Advanced Directing.

Restricted to radio-television-film majors. Creation of collaborative, performance-based works, such as the co-direction of a Dogme-style film, that emphasize simplicity and ingenuity in image and sound choices using the Dogme 95 meets Meisner technique. Works will adhere to the production code that is a modified version of the Dogme 95 Vow of Cinematic Chastity. Three lecture hours and three laboratory hours a week for one semester. Radio-Television-Film 368 (Topic 4: Advanced Directing) and 368C may not both be counted. Offered on the letter-grade

basis only. Prerequisite: Upper-division standing, Radio-Television-Film 333, and 366D.

RTF 368S. Undergraduate Thesis.

Restricted to radio-television-film majors. Advanced film production or media studies research. Three lecture hours a week for one semester, with studio hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 343, 367L, or 368; and consent of instructor.

Topic 1: Film Production Thesis. Intensive production workshop, designed for students who wish to produce a film for a portfolio.

Topic 2: Media Studies Thesis. An independent research project based on primary data, resulting in a written summary of theoretical foundations, methodological approach, results, and a discussion. Additional prerequisite: Upper-division standing and consent of instructor.

RTF 369. Advanced Screenwriting.

Restricted to radio-television-film majors. Students develop and write original screenplays. Includes advanced study of screenplay structure, critical analysis of student and professional work, and intensive writing each week toward a completed script. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Radio-Television-Film 333 with a grade of at least B-.

Topic 1: Advanced Screenwriting for Feature Films.

Topic 2: Advanced Screenwriting for Television.

RTF 370. Film Analysis and Criticism.

Restricted to radio-television-film majors. Analysis of critical methods, selected films, and selected critics. Three lecture hours a week for one semester, with two hours of film screening a week if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, Radio-Television-Film 314 or 316, and nine additional semester hours of lower-division coursework in radio-television-film.

RTF 178. Radio-Television-Film Internship.

Restricted to radio-television-film majors. Practical work experience related to the study of film, television, radio, or other media. Students must make their own arrangements to secure relevant internships. The equivalent of ten lecture hours a week for one semester. May be repeated, but only one hour may be counted toward the Bachelor of Science in Radio-Television-Film. Offered on the pass/fail basis only. Prerequisite: Radio-Television-Film 330L and consent of the internship coordinator.

RTF 378H. Honors Tutorial Course.

Restricted to radio-television-film majors. Intensive reading, research, and/or production project. Individual instruction. May be repeated once for credit. Prerequisite: Upper-division standing, twelve semester hours of lower-division coursework in radio-television-film, a University grade point average of at least 3.00, a grade point average in radio-television-film of at least 3.50, and consent of the department.

College of Education

Manuel J. Justiz, PhD, *Dean*
Marilyn C. Kameen, EdD, *Senior Associate Dean*
Beth Maloch, PhD, *Associate Dean*
<http://www.edb.utexas.edu/education/>

General Information

Mission

The University of Texas at Austin, through the College of Education, is committed to the preparation of teachers and other educators who are dedicated to the employment and advancement of education for all people. In pursuing this mission, the College of Education performs several functions.

It is a professional school offering two teacher certification degrees. The first degree, the Bachelor of Science in Applied Learning and Development, allows students to pursue early childhood through grade six generalist, bilingual generalist teacher certification, or generic special education certification for early childhood through grade twelve. The second degree, the Bachelor of Science in Kinesiology and Health, offers a major that leads to all-level physical education certification.

The college provides the professional sequence of education courses and serves as the certification agent for all University students pursuing certification to teach in Texas, whether they are enrolled in the College of Education or in another division of the University. Accountability information for the teacher preparation program is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/teacher-certification>).

The college also offers degree programs that do not lead to teacher certification. These programs, in youth and community studies, athletic training, exercise science, health promotion, sport management, and physical culture and sports, are designed to meet the professional needs of public and private educational and community service agencies and to prepare students for advanced study.

As a unit of the Graduate School, the College of Education offers courses and curricula leading to advanced professional certificates and to master's and doctoral degrees in education. It also provides in-service training and consulting services for those engaged in the educational professions.

Departments in the college offer courses in general education as well as in various specialties suitable for students pursuing vocational objectives other than teaching.

The college is also a center for research, experimentation, and a wide variety of direct services to school systems and other educational and public service enterprises.

Facilities

The instructional and research programs of the College of Education are carried out in six buildings. The primary facility, the George I. Sánchez Building, contains classrooms, extensive computer facilities, electronic media resources, observation rooms, a learning technology center, a distance learning classroom, and faculty offices. Belmont Hall, the primary facility for the Department of Kinesiology and Health Education, houses classrooms, research and computer laboratories, gymnasium and locker facilities, racquet sport courts, and faculty offices. College of Education faculty members and programs are also housed in Anna

Hiss Gymnasium, Gregory Gymnasium, the Lee and Joe Jamail Texas Swimming Center, and the North End Zone.

Financial Assistance Available through the College

Scholarships as well as graduate fellowships and assistantships are available to students in the College of Education. Application for all undergraduate awards and some graduate awards should be made to the Office of the Dean, George I. Sánchez Building 216; graduate students should also inquire in their departmental offices. Generally, applications are accepted online in March for the following academic year.

Student Services

The Office of the Dean of the College of Education provides a variety of student services, including maintenance of student records, academic counseling, certification counseling, and official evaluations of the student's academic standing and progress toward a degree. Students are encouraged to contact the office whenever they have questions about degree requirements, academic standing, teacher certification, general University regulations, or registration. The office is also a good source of general information and referral that students are urged to use when they have questions or problems of any nature.

Academic Advising

The College of Education encourages all students to see their advisers at least once a semester for a comprehensive discussion of their programs. Academic advisers are available in George I. Sánchez Building 216 and Belmont Hall 1005.

Career Services

The College of Education offers career services to assist University students in making informed career choices. Education Career Services makes job search materials, events, and counseling accessible to students on a regular basis. Information about these services is available at <http://www.edb.utexas.edu/education/edservices/career/>.

As a complement to the assistance available from the college, the University's Sanger Learning Center and the Center for Strategic Advising and Career Counseling in the School of Undergraduate Studies provide comprehensive career services to all students. The centers offer professional assistance to all University students in choosing or changing their majors or careers, seeking an internship, and planning for the job search or for graduate study.

Student Organizations

The Education Council is the official channel for student participation in policy formulation and evaluation and in development of student activities in the college. Voluntary organizations in the college include the Bilingual Education Student Organization, the Kinesiology Club, Longhorn Athletic Training Student Association, Minorities in Education, the Student Council for Exceptional Children, and Teachers of Tomorrow. Pi Lambda Theta, Phi Delta Kappa, and Kappa Delta Pi are honorary organizations for men and women.

Admission and Registration

Admission*

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in *General Information* (<http://>

catalog.utexas.edu/general-information/admission/undergraduate-admission).

Information about admission to teacher preparation programs and to majors in the Department of Kinesiology and Health is available in the Office of the Dean, George I. Sánchez Building 216 and the Kinesiology Advising Center, Belmont Hall 1005.

Admission to majors in kinesiology is restricted for internal transfer students. Students should see an adviser in the Office of the Dean, George I. Sánchez Building 216 or the Kinesiology Advising Center for information.

Admission to the Professional Development Sequence*

All students seeking teacher certification must complete a sequence of professional development courses. Admission to the Professional Development Sequence is restricted. Space availability may be a factor in the admission decision, as well as academic performance, completion of prerequisite courses, documented evidence of proficiency in reading and in oral and written communication, and the number of hours the student needs, at the time of application, to complete the program.

For students seeking early childhood through grade six, all-level generic special education, or all-level physical education certification, admission to the Professional Development Sequence is competitive and there is a specific University grade point average, as well as mandated grades in prerequisite courses required. Additionally, students seeking early childhood through grade six and all-level generic special education certification may only lack one class outside the sequence when they enter the Professional Development Sequence. To progress within the sequence, and to complete the sequence, the student must maintain a specific University grade point average and must earn the appropriate grade in each course in the sequence. Students are encouraged to speak to an adviser in the Office of the Dean, George I. Sánchez Building 216 or the Kinesiology Advising Center, Belmont Hall 1005 for additional information about these requirements.

For students in other teacher certification programs, requirements for admission to and continuation in the Professional Development Sequence are set by the college in which the student majors.

Registration

General Information gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* (<http://registrar.utexas.edu/schedules>) and *General Information* are published on the registrar's Web site, <http://registrar.utexas.edu/>.

*Changes pending approval by the University of Texas System.

Academic Policies and Procedures

Honors

University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done

are considered. Criteria for University Honors are given in *General Information*.

Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information*.

Graduation

Special Requirements of the College

All students must fulfill the General Requirements (p. 17) for graduation. In addition, students in the College of Education must be registered in the college either in residence or in absentia the semester or summer session the degree is to be awarded and must apply to the dean for the degree no later than the date specified in the official academic calendar. The student must have an official degree audit on file prior to applying for the degree.

Applying for Graduation

Each student seeking a degree from the College of Education should apply for an official degree audit in the Student Dean's Office, George I. Sánchez Building 216 or the Kinesiology Advising Center, Belmont Hall 1005. The degree audit is essential to ensure that the student meets all the degree requirements given in a catalog under which he or she is eligible to graduate.

In the final semester or summer session, a candidate for graduation must apply for the degree by the deadline given in the official academic calendar.

Degrees and Programs

General Requirements

1. All College of Education students seeking teacher certification must complete the entire Professional Development Sequence of coursework in residence. Residence credit includes only courses taken at the University; it does not include credit by examination, courses taken by extension or correspondence, or courses taken at another institution.
2. Students seeking teacher certification must adhere to current state requirements, even if they differ from the degree requirements described in this catalog.
3. Except as otherwise indicated, credit by examination is treated like any other earned credit in meeting degree requirements.
4. With the exception of credit earned by examination, each course counted toward the degree or toward certification requirements must be taken on the letter-grade basis, unless the course is offered only on the pass/fail basis.
5. To graduate, all students must have a University grade point average of at least 2.00.

Applicability of Certain Courses

Physical Activity Courses

Physical activity (PED) courses are offered by the Department of Kinesiology and Health Education. Up to three semester hours of physical activity coursework may be counted as electives toward any College of Education degree. All physical activity courses are counted among courses for which the student is enrolled, and the grades are included in the grade point average.

ROTC Courses

A maximum of twelve semester hours of credit in air force science, military science, or naval science may be used as free electives in any degree plan of the College of Education.

Concurrent Enrollment and University Extension Courses

In the semester they plan to graduate, students may not take any course to be counted toward the degree at another institution or through University Extension; students who plan to graduate at the end of the summer session may request approval to take transfer work only in the first summer term.

Bachelor of Science in Applied Learning and Development

The curriculum for the degree has four components: (a) the University-wide core curriculum; (b) prescribed work for the Bachelor of Science in Applied Learning and Development; (c) major requirements; and (d) electives. Students choose one of three majors: early childhood through grade six generalist, which can lead to early childhood through grade six generalist certification or early childhood through grade six bilingual generalist certification; all-level generic special education, which can lead to all-level generic special education certification; or youth and community studies, which does not lead to teacher certification.

The youth and community studies major requires 120 hours of coursework; the early childhood through grade six ESL generalist major requires 124 hours of coursework; and the all-level generic special education major requires 127 hours of coursework. Students in all majors must complete at least 36 hours of upper-division coursework.

Core Curriculum

All students must complete the University's Core Curriculum. In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the Skills and Experience flags (p. 22).

1. Writing: three flagged courses beyond Rhetoric and Writing 306 or its equivalent. Applied Learning and Development 328 carries a writing flag.
2. Quantitative Reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course. Applied Learning and Development 327 carries a cultural diversity in the United States flag.
5. Ethic and Leadership: one flagged course
6. Independent Inquiry: one flagged course

In some cases, a course that is required for the Bachelor of Science in Applied Learning and Development may also be counted toward the core curriculum; these courses are identified above. Courses used to fulfill flag requirements may also be used to fulfill other requirements.

Prescribed Work

All students must complete the following requirements. The youth and community studies major requires modifications to the prescribed work; these are described in the section for the major below.

1. Information Studies 322T.
2. Psychology 301. This course may also be used to fulfill the social and behavioral sciences requirement of the core curriculum.

3. Natural Sciences 306J, 306K, and 306L. These courses may also be used to fulfill parts I and II of the science and technology requirement of the core curriculum. In addition, students must complete Natural Sciences 306M.
4. Mathematics 316K and 316L.
5. Foreign language: Students must demonstrate proficiency in a single foreign language equivalent to that shown by completion of the second college semester in the language; proficiency is usually shown by earning credit for language courses 601D and 610D or the equivalent. Prospective Texas teachers are strongly encouraged to take Spanish to fulfill the language requirement.

Although the foreign language requirement is the attainment of a certain proficiency, rather than the completion of a specified number of hours, the courses taken to gain this proficiency are not electives and may not be taken on the pass/fail basis. Any part of the requirement may be fulfilled by credit by examination.

Students who completed two years of a single foreign language in high school and who are not pursuing teacher certification may substitute three courses in specific multicultural and language/communication courses for the foreign language requirement. A list of the acceptable substitute courses is available in the Student Dean's Office, George I. Sánchez Building 216, and in the Kinesiology Advising Center, Belmont Hall 1005.

Major Requirements

Early Childhood Through Grade Six ESL Generalist

Students who have completed the early childhood through grade six ESL generalist major are eligible to teach pre-kindergarten through grade six after meeting additional state requirements.

For this major, students must complete the following:

1. Coursework in applied learning and development:
 - a. Three semester hours in cognition and learning chosen from Applied Learning and Development 320 and 321
 - b. Applied Learning and Development 322
 - c. Applied Learning and Development 327
 - d. Applied Learning and Development 328
 - e. Applied Learning and Development 329
 - f. Health Education 329K
 - g. Kinesiology 314
2. A curricular specialization consisting of Curriculum and Instruction 370E (Topic 1: *Reading*), 370E (Topic 2: *Language Arts*), 370E (Topic 20: *Teaching English as a Second Language*), and either Special Education 378T (Topic: *Reading Difficulties*) or Curriculum and Instruction 371R
3. The Professional Development Sequence described below. Admission to the Professional Development Sequence is restricted; admission requirements are given in Admission to the Professional Development Sequence (p. 124).
 - a. Methods courses: Curriculum and Instruction 370E (Topic 3: *Science*), 370E (Topic 4: *Social Studies*), and 370E (Topic 5: *Mathematics*)
 - b. Curriculum and Instruction 331E
 - c. Curriculum and Instruction 371G
 - d. Curriculum and Instruction 950E

All-Level Generic Special Education

Students who have completed the all-level generic special education major are eligible to teach in special education classrooms from pre-kindergarten through grade twelve after meeting additional state requirements.

For this major, students must complete the following:

1. Coursework in applied learning and development and related areas:
 - a. Three semester hours in human development chosen from Human Development and Family Sciences 313 and Psychology 304
 - b. Three semester hours in cognition and learning chosen from Applied Learning and Development 320 and 321
 - c. Applied Learning and Development 322, 326, 327, and 328
2. Prescribed work in special education: Special Education 332, 337, 372, 375C, 376, 378D, 378E, 378R, and 378S
3. The Professional Development Sequence described below. Admission to the Professional Development Sequence is restricted; admission requirements are given in Admission to the Professional Development Sequence (p. 124).
 - a. Curriculum and Instruction 370E (Topic 5: *Mathematics*), 370E (Topic 1: *Reading*), and 370E (Topic 2: *Language Arts*)
 - b. Curriculum and Instruction 331E
 - c. Special Education 960

Youth and Community Studies

Completion of a major in youth and community studies does not entitle the student to receive a teaching certificate.

1. The Prescribed Work, with the following modifications:
 - a. A course in English or rhetoric and writing may be counted in place of Information Studies 322T. The course used to fulfill the humanities requirement of the core curriculum may not also be counted toward this requirement.
 - b. Students must complete a three-semester-hour course in anthropology, economics, geography, linguistics, or sociology in addition to the course used to fulfill the social and behavioral sciences requirement of the core curriculum.
 - c. Students are not required to take Natural Sciences 306J, 306K, 306L, and an additional natural sciences or computer science course. However, they must complete the science and technology, part I and part II, requirements of the core curriculum.
 - d. Mathematics 316K and 316L are not required.
 - e. Students must take a three-semester-hour computer applications course.
2. Coursework in applied learning and development and related fields:
 - a. Applied Learning and Development 320, 322, 327, and 329
 - b. Applied Learning and Development 321 or Educational Psychology 363M
 - c. Health Education 329K
 - d. Three semester hours of coursework in kinesiology or health education
3. A minor of at least fifteen semester hours, six of which must be upper-division, in any approved field of study in the University outside of the College of Education. At least six of the required fifteen hours must be completed in residence. No more than six hours in the minor may also be counted toward other degree requirements. Information about approved areas of study and specific courses that may be used is available in the Student Dean's Office, George I. Sánchez Building 216 and in the Kinesiology Advising Center, Belmont Hall 1005.

4. Professional concentration: Fifteen semester hours selected from one of the following four concentrations: Early Childhood, Special Populations, Coaching, and Youth and Social Services. A list of courses in each concentration is available in the Student Dean's Office, George I. Sánchez Building 216, and in the Kinesiology Advising Center, Belmont Hall 1005.

Electives

Additional elective coursework may be needed to provide the total number of semester hours required for the student's major. Students in all majors must complete at least thirty-six hours of upper-division coursework.

Bachelor of Science in Athletic Training

Students who plan to major in athletic training must be admitted to the Athletic Training Program (ATP). Admission is based on a competitive application process. The student's grade point average and completion of prescribed coursework are factors in the admission decision. Applicants must also participate in the Directed Observation Program, meet a set of technical standards, pass a health assessment/physical examination, provide proof of immunizations and vaccinations, submit letters of recommendation, and submit additional application documents. More information about the admission process and requirements is available from an academic adviser and at <http://www.edb.utexas.edu/education/departments/undergrad/at/atep/>.

In addition to completing the coursework associated with the athletic training major, students in the ATP must participate in clinical rotations and become adept in a set of educational competencies and clinical proficiencies. Students who plan to take the Board of Certification (BOC) examination or the state licensure examination for athletic trainers must complete the ATP.

The curriculum for the degree has four components: (a) the University-wide core curriculum; (b) prescribed work; (c) major requirements; and (d) electives. A total of at least 120 semester hours of coursework is required; at least thirty-six hours must be in upper-division courses.

Core Curriculum

All students must complete the University's Core Curriculum. In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the Skills and Experience flags (p. 22).

1. Writing: three flagged courses beyond Rhetoric and Writing 306 or its equivalent. Kinesiology 346 carries a writing flag.
2. Quantitative Reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course. Health Education 329K carries a cultural diversity in the United States flag
5. Ethic and Leadership: one flagged course. Kinesiology 347 carries an ethics and leadership flag
6. Independent Inquiry: one flagged course

In some cases, a course that is required for the Bachelor of Science in Athletic Training may also be counted toward the core curriculum; these courses are identified below. Courses used to fulfill flag requirements may also be used to fulfill other requirements.

Prescribed Work

1. *Writing*: Three courses with a writing flag. These courses are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).

2. *Social science*
 - a. Psychology 301, which may also be counted toward the social and behavioral sciences requirement of the core curriculum.
3. *Mathematics*: Mathematics 305G, calculus, or coursework in statistics. Mathematics 305G and several calculus and statistics courses may also be counted toward the mathematics requirement of the core curriculum.
4. *Natural science*: Many courses that fulfill this natural science requirement may also be counted toward the science and technology requirements of the core curriculum.
 - a. Biology 301L and 309D, or 309D and 311C
 - b. Six hours of coursework in chemistry (304K and 305, or 301 and 302), physics (302K and 302L, or 309K and 309L, or 317K and 317L), or physical science (303 and 304).
 - c. Nutrition 306 or 312
5. Classical Civilization 306M
6. *Foreign language*: In addition to the core curriculum requirements above, undergraduates are expected to have completed two years in a single foreign language in high school. Students without two years of high school foreign language coursework must earn credit for the second college-level course in a foreign language; **this credit does not count toward the student's degree**. Students can consult with their adviser and the degree requirements to determine whether additional foreign language requirements apply to them.

Major Requirements

1. The following courses:
 - a. Kinesiology 312 (Topic 2: *Care and Prevention of Athletic Injuries*)
 - b. Kinesiology 219K (Topic 3: *Introduction to Athletic Training*)
 - c. Kinesiology 324K, *Applied Human Anatomy*
 - d. Kinesiology 325K, *Physiology of Exercise*
 - e. Kinesiology 320, *Applied Biomechanics of Human Movement*; or Kinesiology 326K, *Kinesiology: Biomechanical Analysis of Movement*
 - f. Kinesiology 341, *Therapeutic Modalities in Athletic Training*
 - g. Kinesiology 342, *Clinical Evaluation of Athletic Injuries in the Lower Body*
 - h. Kinesiology 343, *Clinical Evaluation of Athletic Injuries in the Upper Body*
 - i. Kinesiology 344, *Therapeutic Exercise and Rehabilitation Techniques*
 - j. Kinesiology 345, *Topics in Athletic Training*
 - k. Kinesiology 346, *Athletic Training Program Administration*
 - l. Kinesiology 119 (Topic 10: *Conditioning*)
 - m. Kinesiology 363, *Theory and Practice in Strength Coaching*
2. Students enrolled in the Athletic Training Program must complete a practicum course, determined by the faculty adviser, for each semester of their clinical rotations.
3. Nine hours of coursework in kinesiology, health education, or allied health profession prerequisites.

Electives

Additional elective coursework may be required to provide the 120 semester hours required for the degree. Up to six hours of fieldwork may be counted toward the degree as electives. Up to three hours in physical education activity coursework (PED) may be counted as electives.

Bachelor of Science in Kinesiology and Health

The field of kinesiology consists of biomechanical, physiological, psychological, managerial, epidemiological, rehabilitative, and sociocultural approaches to the study of human movement and personal and public health. The Bachelor of Science in Kinesiology and Health degree program offers five majors: exercise science, physical culture and sports, health promotion, sport management, and applied movement science.

The applied movement science program is designed for students interested in studying human movement as a background for helping others develop motor skills, physically active lifestyles and fitness. Students who successfully complete the program can be recommended for teacher certification in physical education. The exercise science program is appropriate preparation for further study in sport and exercise sciences or in movement-related areas such as physical therapy and sport medicine. The health promotion major is designed to prepare graduates for a number of professions involving wellness, fitness, rehabilitation, public health, and disease prevention. The sport management major is designed for students who are interested in the organization, marketing, and management of sports programs. The physical culture and sports major is designed to prepare students for graduate school and/or careers related to a social science approach to sport and exercise.

The curriculum for the degree has four components: (a) the University-wide core curriculum; (b) prescribed work for the Bachelor of Science in Kinesiology and Health; (c) major requirements, which include a minor or specialization; and (d) electives. More information, including a list of specializations and minors, is available from the College of Education Student Dean's Office, George I. Sánchez Building 216, and the Kinesiology Advising Center, Belmont Hall 1005.

A total of at least 120 semester hours of coursework is required for the Bachelor of Science in Kinesiology and Health. For all majors, at least thirty-six hours must be in upper-division coursework.

Core Curriculum

All students must complete the University's Core Curriculum. In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the Skills and Experience flags (p. 22).

1. Writing: three flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative Reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course. Health Education 329K carries a cultural diversity in the United States flag
5. Ethics and Leadership: one flagged course. Kinesiology 347 carries an ethics and leadership flag
6. Independent Inquiry: one flagged course

In some cases, a course that is required for the Bachelor of Science in Kinesiology and Health may also be counted toward the core curriculum; these courses are identified above. Courses used to fulfill flag requirements may also be used to fulfill other requirements.

Prescribed Work

All students must complete the following requirements. Some majors require modifications to the prescribed work; these are described in the section for each major below.

1. *Writing*: Three courses with a writing flag. These courses are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).
2. *Social science*:
 - a. Psychology 301.
 - b. Three hours of coursework in anthropology, economics, geography, linguistics, or sociology.

Psychology 301 and several social science courses that fulfill requirement b may also be counted toward the social and behavioral sciences requirement of the core curriculum.
3. *Mathematics*: Three hours of coursework in mathematics. Several courses that fulfill this requirement may also be counted toward the mathematics requirement of the core curriculum.
4. *Natural science*:
 - a. Biology 301L or 311C.
 - b. Six hours of coursework in chemistry.
 - c. Six additional hours chosen from astronomy, biology, chemistry, computer applications, computer science, geological sciences, mathematics, physical science, physics, experimental psychology, physical anthropology, physical geography, history of science, and philosophy of science.

Many courses that fulfill this natural science requirement may also be counted toward the science and technology requirements of the core curriculum.
5. *Foreign language*: Students must demonstrate proficiency in a single foreign language equivalent to that shown by completion of the second college semester in the language; proficiency is usually shown by earning credit for language courses 506 and 507 or the equivalent. Prospective Texas teachers are strongly encouraged to take Spanish to fulfill the language requirement. Although the foreign language requirement is the attainment of a certain proficiency rather than the completion of a specified number of hours, the courses taken to gain this proficiency are not electives and may not be taken on the pass/fail basis. Any part of the requirement may be fulfilled by credit by examination.

Students who completed two years of a single foreign language in high school and are not pursuing teacher certification may substitute three courses in specific multicultural and language/communication courses for the foreign language requirement. A list of acceptable substitute courses is available in the Student Dean's Office, George I. Sánchez Building 216, and in the Kinesiology Advising Center, Belmont Hall 1005.

Major Requirements

All students seeking the Bachelor of Science in Kinesiology and Health must complete the following eighteen-semester-hour core, so that they are exposed to all aspects of the fields of kinesiology and health. Each student then takes a set of courses, called the cognate, that is unique to the major; and either a specialization in the Department of Kinesiology and Health or a minor in another department.

1. Health Education 329K
2. Kinesiology 310
3. Kinesiology 312M
4. Kinesiology 315
5. Three semester hours in Kinesiology 119 or physical education courses. The courses must require substantial physical activity.
6. Kinesiology 347

Exercise Science

Exercise science majors must complete the following:

1. The Prescribed Work described above, with the following modifications:
 - a. To fulfill the mathematics requirement, exercise science majors must complete Mathematics 408C or 408K. Either course may also be counted toward the mathematics requirement of the core curriculum.
 - b. To fulfill the natural science requirement, exercise science majors must complete Biology 311C, Chemistry 301 and 302, and Physics 302K and 302L. Biology 311C may also be counted toward part I of the science and technology requirement of the core curriculum; either the chemistry or the physics coursework may also be counted toward part II of that requirement.
 - c. In addition to the core curriculum requirements above, exercise science undergraduates are expected to have completed two years in a single foreign language in high school. Students without two years of high school foreign language coursework must earn credit for the second college-level course in a foreign language; **this credit does not count toward the student's degree.** Students should consult their advisers to determine whether additional foreign language requirements apply to them.
2. Eighteen semester hours in the cognate in exercise science:
 - a. Kinesiology 321M
 - b. Kinesiology 322
 - c. Kinesiology 324K
 - d. Kinesiology 325K
 - e. Kinesiology 326K
 - f. Kinesiology 336
3. Either a specialization in the Department of Kinesiology and Health Education or a minor outside the department; minors consist of fifteen hours of coursework, six of which must be upper-division. Students planning to attend medical school, physical therapy school, or graduate school in exercise physiology are encouraged to complete the pre-health sciences specialization to ensure that they complete the science coursework required for admission to those programs.

Health Promotion*

Health promotion majors must complete the following:

1. The Prescribed Work above, with the following modifications:
 - a. In addition to the core curriculum requirements above, health promotion undergraduates are expected to have completed two years in a single foreign language in high school. Students without two years of high school foreign language coursework must earn credit for the second college-level course in a foreign language; **this credit does not count toward the student's degree.** Students should consult their advisers to determine whether additional foreign language requirements apply to them.
 - b. Communication Studies 306M
2. Eighteen semester hours in the cognate in health promotion:
 - a. Health Education 343
 - b. Health Education 370K
 - c. Health Education 371K
 - d. Health Education 373
 - e. Kinesiology 324K
 - f. Kinesiology 325K

3. Either a specialization in the Department of Kinesiology and Health Education or a minor outside the department; minors consist of fifteen hours of coursework, six of which must be upper-division.

A student planning a career as a physician, physical therapist, physician assistant, chiropractor, or other health professional is encouraged to complete the pre-health sciences specialization, to ensure that he or she completes the science coursework required for admission to those programs.

Physical Culture and Sports

Physical culture and sports majors must complete the following:

1. The Prescribed Work, with the following modification to the natural science requirement:
 - a. In place of Biology 301L or 311C: Three hours in one of the fields of study that may be counted toward the science and technology, part II, requirement of the Core Curriculum (p. 20).
 - b. In place of six hours of coursework in chemistry: Six hours in one of the fields of study that may be counted toward the science and technology, part I, requirement of the Core Curriculum. The same field of study may not be used to fulfill both requirement a and requirement b.
 - c. In place of six additional hours of natural science (prescribed work requirement 4c): Three hours of coursework in computer applications.
2. Eighteen semester hours in the cognate in physical culture and sports:
 - a. Kinesiology 349
 - b. Six semester hours chosen from Kinesiology 311K, 348, and 361.
 - c. Kinesiology 350
 - d. Kinesiology 351
 - e. An additional upper-division course in kinesiology or health education.
3. Either a specialization in the Department of Kinesiology and Health Education or a minor outside the department; minors consist of fifteen hours of coursework, six of which must be upper-division.

Sport Management

Students who plan to major in sport management must apply for admission to the program. A student's grade point average, volunteer and work experiences, and completion of prescribed prerequisite coursework are factors in the admission decision. Information about admission requirements is available from an academic adviser.

Sport management majors must complete the following:

1. The Prescribed Work described, with the following modifications:
 - a. Sport management majors must complete an economics course to fulfill the second part of the social science requirement.
 - b. In fulfilling the natural science requirement, the student must complete the following:
 - i. In place of Biology 301L or 311C: Three hours in one of the fields of study that may be counted toward the science and technology, part II, requirement of the Core Curriculum (p. 20).
 - ii. In place of six hours of chemistry: Six hours in one of the fields of study that may be counted toward the science and technology, part I, requirement of the Core Curriculum. The same field of study may not be used to fulfill both requirement i and requirement ii.

- iii. In place of six additional hours of natural science (prescribed work 4c): Three hours in computer applications.

c. Communication Studies 306M.

2. Twenty-four semester hours in the cognate in sport management:

- a. Kinesiology 312 (Topic 5: *The Sport Industry in America*)
- b. Kinesiology 628, or 327L and three semester hours of a kinesiology or health education elective
- c. Kinesiology 350
- d. Kinesiology 353
- e. Kinesiology 354
- f. Kinesiology 355
- g. Kinesiology 357

3. Either a specialization in the Department of Kinesiology and Health Education or a minor outside the department; minors consist of fifteen hours of coursework, six of which must be upper-division.

Applied Movement Science

Students who major in applied movement science must apply for admission to the Professional Development Sequence (PDS) by fall of their junior year. A student's grade point average, completion of prescribed prerequisite coursework, and volunteer and work experiences are factors in the admission decision. Students should see an academic adviser during the first year of coursework to ensure that they understand the application process and the requirements for the PDS.

Applied movement science majors must complete the following:

1. The Prescribed Work (p. 127), with the following modifications:
 - a. Applied movement science majors do not need to complete a course to fulfill the second part of the social science requirement (Prescribed Work 2b).
 - b. To fulfill the mathematics requirement, applied movement science majors must complete Mathematics 305G or a calculus course. Mathematics 305G and some calculus courses may also be counted toward the mathematics requirement of the core curriculum.
 - c. In fulfilling the natural science requirement, the student must complete the following:
 - i. In place of Biology 301L or 311C: Three hours in one of the fields of study that may be counted toward the science and technology, part II, requirement of the Core Curriculum.
 - ii. In place of six hours of chemistry: Six hours in one of the fields of study that may be counted toward the science and technology, part I, requirement of the Core Curriculum. The same field of study may not be used to fulfill both requirement i and requirement ii.
 - iii. Applied movement science majors do not need to complete the six additional hours of natural sciences (Prescribed Work 4c).
 - d. Some of the courses required for the applied movement science major should also be used to meet prescribed work requirements for the Bachelor of Science in Kinesiology and Health; information about these courses is available in the advising offices in George I. Sánchez Building 216 and Belmont Hall 1005.
2. Twenty-one semester hours in the cognate in applied movement science:
 - a. Three of the following topics of Kinesiology 119: (Topic 11: *Rhythmic Activities*); (Topic 14: *Tennis*); (Topic 15: *Volleyball*); (Topic 16: *Social Dance*); (Topic 17: *Basketball*); (Topic 18: *Adventure Activities*); (Topic 19: *Core Body Development*)
 - b. Kinesiology 219T

- c. Kinesiology 320
 - d. Kinesiology 321M or 334
 - e. Kinesiology 322, or 332, or 338
 - f. Kinesiology 324K
 - g. Kinesiology 127L
 - h. Kinesiology 360
3. Movement competency in two areas in addition to those counted toward requirement 2 above. Students may demonstrate competency by completing two additional topics of Kinesiology 119; these courses do not count toward the degree.
 4. Twenty-four hours in the minor in curriculum and instruction. The minor provides the coursework required for all-level physical education teacher certification in Texas.
 - a. Applied Learning and Development 327. This course is required for admission to the Professional Development Sequence.
 - b. Curriculum and Instruction 370E (Topic 21: *Teaching Elementary Physical Education*). Note: This course is required for admission to the Professional Development Sequence.
 - c. Curriculum and Instruction 370S (Topic 12: *Kinesiology*)
 - d. Curriculum and Instruction 345
 - e. Curriculum and Instruction 950W

Electives

Additional electives may be required to provide the total number of semester hours required for the student's major. No more than twelve semester hours in Kinesiology 127L, 227L, 327L, and 627L may be counted toward the degree.

*Changes pending approval by the University of Texas System

Middle Grades, Secondary, and All-Level Teacher Certification

*All middle grades (grades four through eight), secondary (grades eight through twelve), and all-level (prekindergarten through grade twelve) teacher certification programs are based on degrees with academic majors in the student's chosen teaching field. Certification requirements for students seeking middle grades, secondary, and all-level teacher certification include all the courses required for the student's major in the College of Education, Fine Arts, Liberal Arts, Natural Sciences, or the Jackson School of Geosciences, as well as the preprofessional and professional education courses.

UTeach-Urban Teachers (UTUT) is a teacher preparation program for students interested in secondary teacher certification in English or social studies. UTUT offers a three-semester program for undergraduate students, beginning the summer before their senior year, for students working towards a bachelor's degree in English, history, geography, government, economics, or other humanities disciplines. UTUT also offers a Masters of Education degree program with teacher certification for students who are interested in being certified to teach while pursuing a masters. These programs are designed to help English and social studies teacher candidates develop knowledge, skills, and dispositions to support teaching and learning in linguistically and culturally diverse urban settings. Program advising is housed in the College of Education. Information is available at <http://www.edb.utexas.edu/education/departments/ci/utut/> and from the College of Education advising offices.

Students pursuing middle grades or secondary teacher certification in mathematics, computer science, science, or engineering must follow the curriculum prescribed by the UTeach-Natural Sciences program, a collaborative partnership between the College of Education

and the College of Natural Sciences. Program advising is housed in the College of Natural Sciences. Information is available at <http://www.uteach.utexas.edu/>.

UTeach-Liberal Arts is a teacher preparation program for undergraduate liberal arts students pursuing a degree in Arabic, Chinese, economics, English, French, history, geography, German, government, Japanese, Latin, Russian, or Spanish. Students may seek certification to teach middle or high school grades. Program advising is housed in the College of Liberal Arts. Information is available at <http://www.utexas.edu/cola/progs/uteach/>.

Program advising for students seeking all-level certification in art, music, and theatre arts is provided in the College of Fine Arts. Information is available at <http://www.utexas.edu/finearts/students>.

Certification Requirements

Information about legal requirements for certification to teach is available from the teacher certification officer, George I. Sánchez Building 216, or from the Texas Education Agency. Application for the certificate should be made at the Certification Office, George I. Sánchez Building 216. State of Texas teacher certification requirements are governed by the Texas Education Agency and are subject to change. Students must adhere to current certification requirements, even if they differ from those listed in a University catalog.

In accordance with state law, the commissioner of education may suspend or revoke a teaching certificate or refuse to issue a teaching certificate for a person who has been convicted of a felony or misdemeanor for a crime that directly relates to the duties and responsibilities of the teaching profession.

Students who have completed all necessary academic requirements for certification must also achieve a passing level of performance on the required state certification examinations. In addition, students seeking bilingual education certification or certification to teach French or Spanish in elementary or secondary school must earn a passing score at the advanced level on the appropriate language test.

Minimum Scholastic Requirements

In addition to meeting the minimum coursework and scholastic requirements for the degree, students seeking middle grades, secondary, and all-level certification must meet other requirements to take the prescribed work in professional development. Admission to the Professional Development Sequence is restricted; information about admission requirements is available in the Office of the Dean, George I. Sánchez Building 216.

Teaching Fields

All candidates for middle grades, secondary, and all-level teaching certificates must earn a degree in their primary teaching field by meeting all of the requirements for the appropriate major. While completing these requirements, the certification student must take a core set of courses in the major that fulfill certification requirements. This certification core includes at least twenty-four semester hours in a single teaching field or forty-eight semester hours in a composite teaching field, and incorporates the state-specified essential knowledge and skills needed for successful teaching in the field. Often, the student's major department requires more than these twenty-four semester hours, but the certification core in the major field must be taken.

Students seeking middle grades certification may choose from the following teaching fields: English language arts and reading, social studies, mathematics, and science. Students seeking secondary certification may choose from the following teaching fields: science,

social studies, computer science, English language arts and reading, history, and mathematics. Students seeking all-level teacher certification may choose from the following teaching fields: art, physical education, languages other than English (Arabic, Chinese, French, German, Japanese, Latin, Russian, or Spanish), music, special education, and theatre arts.

*Changes pending approval by the University of Texas System

Courses

The faculty has approval to offer the following courses in the academic years 2014–2015 and 2015–2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/credit-value-and-course-numbers>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Applied Learning and Development

Applied Learning and Development: ALD Lower-Division Courses

ALD 301C. Freshman Seminar.

Restricted to first-semester freshmen. Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors. Two lecture hours and one discussion hour a week for one semester.

ALD 301D. Connecting Research Experience.

Restricted to freshmen and sophomores. Supervised research associated with the Connexus Bridging Disciplines Program. The equivalent of three lecture hours a week for one semester. With consent of the Connexus Bridging Disciplines Program, may be repeated for credit. Prerequisite: Admission to the Connexus Bridging Disciplines Program.

ALD 118C, 218C, 318C. Forum Seminar Series.

Restricted to freshmen and sophomores. Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse. For 118C, two lecture hours a week for eight weeks; for 218C, two lecture hours a week for one semester; for 318C, three lecture hours a week for one semester, or two lecture hours and one hour of supervised research a week for one semester. May be repeated for credit when the topics vary.

ALD 119, 219, 319, 419, 519, 619. International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Applied Learning and Development 119, 219, 319, 419, 519, 619 and Undergraduate Studies 119 may not both be counted unless the

topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses

ALD 320. Cognition, Human Learning, and Motivation.

Current and classical theories concerning conditioning paradigms, learning and remembering, attention, knowledge representation and retrieval, comprehension and production of language, problem solving, and the ways emotion influences learning. Three lecture hours a week for one semester. Prerequisite: Three semester hours of coursework in psychology.

ALD 320C. Connecting Research Experience.

Supervised research associated with the Connexus Bridging Disciplines Program. The equivalent of three lecture hours a week for one semester. With consent of the Connexus Bridging Disciplines Program, may be repeated for credit. Prerequisite: Upper-division standing and admission to the Connexus Bridging Disciplines Program.

ALD 321. Play in Early Childhood Development.

Theoretical and empirical bases for observing children in play; cognitive, social, and communicative stages related to developmental theory; children's adjustment related to social and emotional theories; motivational value of play. Three lecture hours a week for one semester, with field hours to be arranged. Prerequisite: Three semester hours of coursework in psychology.

ALD 322. Individual Differences.

Introduction to individual differences among people through the life span. Examines areas of exceptionality within the context of typical development: current research trends; theoretical and legal considerations; and practice-related issues, including family involvement, cultural and linguistic diversity, and educational perspectives. Orientation to assistive technology. Three lecture hours a week for one semester, with field hours to be arranged. Prerequisite: Three semester hours of coursework in psychology.

ALD 323. Language Acquisition.

Language structure; sequence, process, cognitive and social aspects of language acquisition and use; language variation. Three lecture hours a week for one semester. Required for certification in early childhood education. Prerequisite: Three semester hours of coursework in psychology.

ALD 324. Literacy Acquisition.

Processes of becoming literate; cognitive insights that move a child to literacy; relationships between reading and writing and among individual characteristics, social factors, and literacy growth. Three lecture hours a week for one semester. This course or Psychology 338K is required for the reading specialization. Prerequisite: Three semester hours of coursework in psychology.

ALD 325. Second Language Acquisition.

Acquisition by children or adults of English as a second language. Simultaneous acquisition of two languages, adding a second language, language processing, order of acquisition, role of the first language. Three lecture hours a week for one semester, with field hours to be arranged. Required for certification in bilingual education. Applied Learning and Development 325 and 329 may not both be counted. Prerequisite: Three semester hours of coursework in psychology.

ALD 326. Language of Children with and without Disabilities.

Restricted to special education majors. Physiological, prelinguistic, and linguistic components of language; theoretical framework of communication and language development in monolingual and bilingual

populations; problems of language development in special populations; language assessment tools. Technological skills component. Three lecture hours a week for one semester. Required for certification in generic special education.

ALD 327. Sociocultural Influences on Learning.

Human learning in multisocial, multilingual, and multicultural contexts; realities of society and their impact on learning; social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, parent and community involvement. Three lecture hours a week for one semester, with field hours to be arranged. Only one of the following may be counted: African and African Diaspora Studies 374D (Topic: Sociocultural Influences on Learning), 372D (Topic 2), Applied and Learning Development 327. Prerequisite: Three semester hours of coursework in psychology.

ALD 327G. Study Abroad: Education, Culture and Diversity.

Comparative analysis of human learning in multisocial, multilingual, and multicultural contexts in the United States and Latin America. Social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, and parent and community involvement. Particular focus on transnationalism and immigration in the United States from Central America and Mexico. The equivalent of three lecture hours a week for one semester. Taught in Latin America.

ALD 328. Applied Human Learning.

Development, cognition, language, and sociocultural influences in learning contexts; child assessment, identification of learning styles, and tests and measurements. Fieldwork to provide a theoretical basis for professional assessment, referral, and placement. Three lecture hours a week for one semester, with fieldwork to be arranged. Prerequisite: Admission to the professional development sequence of the Bachelor of Science in Applied Learning and Development degree program.

ALD 329. Acquisition of Language and Literacies.

Subjects include initial language and literacy acquisition theory; second language acquisition theory; relations among first and additional languages in literacy and language acquisition; home, school, and learners' perspectives; and current issues in literacy and multilingual classrooms. Three lecture hours a week for one semester. Additional fieldwork hours may be required. Applied Learning and Development 325 and 329 may not both be counted. Required for students seeking certification in early childhood through grade six generalist. Prerequisite: Three semester hours of coursework in psychology and completion of or concurrent enrollment in Applied Learning and Development 327.

ALD 330. Language in Education.

Theoretical and practical perspectives on the nature of language in education, with a focus on implications for English language learners in classroom settings; linguistic structures and functions; discourse, phonology, morphology, syntax, and semantics across languages and throughout development; and language varieties. Three lecture hours a week for one semester. Additional fieldwork hours may be required. Applied Learning and Development 330 and Curriculum and Instruction 371 (Topic 13: Applied Linguistics and Methods in English as a Second Language) may not both be counted. Prerequisite: Three semester hours of coursework in psychology.

ALD 333. Children's Literature.

For future teachers, an investigation of literature written for children from early childhood through age twelve. Includes an investigation of genres, authors, themes, and forms, and an introduction to ways of bringing literature to children, facilitated by extensive discussion. Three lecture hours a week for one semester, with field hours to be arranged.

ALD 179, 279, 379, 479, 579, 679. International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Applied Learning and Development 179, 279, 379, 479, 579, 679 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

Department of Curriculum and Instruction

Admission to the Professional Development Sequence of upper-division courses for teacher certification requires formal acceptance. Information about admission requirements is available from the Office of the Dean, George I. Sánchez Building 216.

Curriculum and Instruction: EDC

Lower-Division Courses

EDC 101E. Orientation to Teaching in the Elementary School.

Open to all University students. Discussion sessions and assignments in public schools; designed to help students make teaching career decisions. One discussion hour and three hours of fieldwork a week for one semester. May be repeated for credit.

EDC 101S. Orientation to Teaching in the Secondary School.

Open to all University students. Discussion sessions and assignments in public schools; designed to help students make teaching career decisions. One discussion hour and three hours of fieldwork a week for one semester. May be repeated for credit.

Upper-Division Courses

EDC 331E. School Organization and Classroom Management in Elementary Schools.

Administrative structure of elementary schools; concepts, principles, and strategies for establishing an orderly classroom environment, preventing inappropriate behavior, and promoting student involvement in academic work. Three lecture hours a week for one semester, and sixteen to twenty hours of fieldwork a week in an elementary school. Prerequisite: Admission to the professional development sequence of courses, completion of seventy-two semester hours of coursework, and a University grade point average of at least 2.50.

EDC 331S. School Organization and Classroom Management in Secondary Schools.

Administrative structure of secondary schools; concepts, principles, and strategies for establishing an orderly classroom environment, preventing inappropriate behavior, and promoting student involvement in academic work. Three lecture hours a week for one semester, with at least sixty hours of fieldwork in a secondary school. Prerequisite: Admission to the professional development sequence of courses, completion of seventy-two semester hours of coursework, and a University grade point average of at least 2.50.

EDC 332S. Designs for Instruction.

One of the beginning courses in the professional development sequence for approved programs in secondary education. Three lecture hours a week for one semester, with a single seven-hour media competency evaluation to be arranged. Prerequisite: Admission to the professional development sequence of courses, completion of seventy-two semester

hours of coursework, a University grade point average of at least 2.50, and concurrent enrollment in Curriculum and Instruction 331S.

EDC 333W. Introduction to Teaching.

Open to all upper-division students. Overview of the objectives, organization, and operation of schools; the teaching process; teaching as a professional career. Two lecture hours and two hours of fieldwork a week for one semester. Prerequisite: Upper-division standing.

EDC 339C. Community Literacy.

Three lecture hours a week for one semester. Curriculum and Instruction 339C and 371 (Topic 1: Community Literacy) may not both be counted. Prerequisite: Admission to the professional development sequence of courses.

EDC 339D. Reading Assessment and Development.

Three lecture hours a week for one semester. Curriculum and Instruction 339D and 371 (Topic 2: Reading Assessment and Development) may not both be counted. Prerequisite: Admission to the professional development sequence of courses.

EDC 339E. Secondary School Literacy across the Disciplines.

Designed for students in a University secondary teacher preparation program. Three lecture hours a week for one semester. Curriculum and Instruction 339E and 371 (Topic 10: Secondary School Reading in the Content Subjects) may not both be counted.

EDC 339F. Adolescent Literacy.

Designed for students in a University secondary teacher preparation program. Social, political, cultural, emotional, and personal perspectives on adolescent literacy. Subjects may include adolescent literacy practices in and out of school; literacy in relation to identity, peer communities, meaning, communication, and social engagement; curricula that emphasize the social and civic purposes of literacy; and motivation, fulfillment, and democratic participation as educational outcomes. Three lecture hours a week for one semester. Curriculum and Instruction 339F and 371 (Topic 25: Adolescent Literacy) may not both be counted.

EDC 339G. Literacy Seminar.

Three lecture hours a week for one semester. Curriculum and Instruction 339G and 371 (Topic: Literacy Seminar) may not both be counted. Prerequisite: Admission to the professional development sequence of courses.

EDC 340C. Spanish Language Methods for the Bilingual Classroom Teacher I.

Restricted to bilingual generalist certification students. Designed primarily to help prospective bilingual education teachers expand their oral Spanish proficiency for instructional purposes in the bilingual education classroom. Three lecture hours a week for one semester, with field hours to be arranged. Curriculum and Instruction 340C and 371 (Topic 4: Spanish Language and Methods for the Bilingual Classroom Teacher I) may not both be counted. Prerequisite: Credit or registration for Spanish 611D or 312L.

EDC 340D. Spanish Language Methods for the Bilingual Classroom Teacher II.

Restricted to bilingual generalist certification students. Intensive practice in the various aspects and conventions governing literacy within the elementary bilingual education curriculum. Three lecture hours a week for one semester, with field hours to be arranged. Curriculum and Instruction 340D and 371 (Topic 6: Spanish Language and Methods for the Bilingual Classroom Teacher II) may not both be counted. Prerequisite: Curriculum

and Instruction 340C, Spanish 611D or 312L, and admission to the professional development sequence of courses.

EDC 340E. Latino Children's Literature for Bilingual Teachers.

Restricted to students seeking certification in bilingual generalist. Covers the use of oral and written literature for children in bilingual programs while examining the history and development of Spanish-language children's literature from social, cultural, and political perspectives. Subjects may include foundational books, authors, and illustrators of Latina/o children's literature; criteria for evaluating culturally authentic children's literature; multimedia and online resources related to bilingual children's literature; and the literary response process. Three lecture hours a week for one semester, with field hours to be arranged. Prerequisite: Knowledge of Spanish and completion of at least thirty-six semester hours of coursework.

EDC 340F. Foundations of Bilingual Education.

Restricted to bilingual generalist certification students. An overview of theory, practice, programs, and policy related to bilingual education as implemented in the United States. Designed to give students an opportunity to learn about and discuss issues related to bilingual education, and the education of linguistically and culturally diverse populations. Three lecture hours a week for one semester, with field hours to be arranged. Curriculum and Instruction 340F and 371 (Topic: Foundations of Bilingual Education) may not both be counted.

EDC 341C. Early Childhood Education.

Introductory exploration of historical antecedents and social and educational issues in early childhood education; analysis of curricula and behavioral practices in early childhood education; and development of sensitivity to particular needs of early childhood populations. Three lecture hours a week for one semester. Curriculum and Instruction 341C and 371 (Topic 7: Early Childhood Education) may not both be counted.

EDC 341D. Early Childhood Program Development.

Preparation for developing appropriate curricula for early childhood education classrooms, including the contexts of curriculum decision making (community, state, culture, and politics); developmentally-appropriate practice and classroom environments; bases for selecting materials; and frameworks for reflecting on decisions. Three lecture hours a week for one semester. Curriculum and Instruction 341D and 371 (Topic 8: Early Childhood Program Development) may not both be counted.

EDC 343. Informal Science Education.

Three lecture hours and one three-hour field laboratory a week for one semester, with one four-hour Saturday field trip to be arranged. Curriculum and Instruction 343 and 371 (Topic 3: Informal Science Education) may not both be counted. Prerequisite: Upper-division standing, six semester hours of coursework in science, or consent of instructor.

EDC 344. Digital Literacy for Teaching and Learning.

Use of digital tools to increase technical, pedagogical, and administrative proficiencies in a series of hands-on laboratory projects involving word-processing, handling of databases and spreadsheets, multimedia presentations, digital image and video editing, web page creation, and tools to create digital storytelling, e-portfolios, and electronic gradebooks. Experiential foundation creates a repertoire of possibilities for content-specific, technology-supported teaching and learning associated with learner-centered, collaborative classrooms. Emphasis on the development of critical perspectives (including pedagogical, social, technical, cultural, ethical, economic, legal, and political) to help youth fully participate in digital learning. Three lecture hours a week for one semester. Curriculum

and Instruction 344 and 371 (Topic 15: Computing Tools for Educators) may not both be counted.

EDC 345. Curriculum Issues in Physical Education.

Study of personal teaching and physical education programs. Accompanies student teaching. Three lecture hours a week for one semester. Curriculum and Instruction 345 and 371 (Topic 26: Curriculum Issues in Physical Education) may not both be counted. Prerequisite: A major in applied movement science, admission to the professional development sequence of courses, and concurrent enrollment in Curriculum and Instruction 950W.

EDC 350. Topics in Educational Studies.

Analysis of selected topics and problems in education. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

EDC 350E, 650E, 950E. Elementary Grade Teaching Practicum.

Supervised practicum in early childhood through grade four classroom teaching, conducted in cooperating schools, as part of the teacher preparation program. Consists of teaching, analysis, and evaluation. Two lecture hours and at least fifteen, thirty, or forty-five hours of fieldwork a week for one semester. Offered on the pass/fail basis only. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

EDC 350M, 650M, 950M. Middle Grade Teaching Practicum.

Supervised practicum in middle grade classroom teaching, conducted in cooperating schools, as part of the teacher preparation program. Consists of teaching, analysis, and evaluation. Two lecture hours and at least fifteen, thirty, or forty-five hours of fieldwork a week for one semester. Some sections are offered on the pass/fail basis only and some sections are offered on the letter-grade basis only; consult the Course Schedule. No more than nine semester hours of this course may be taken for credit. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

EDC 350S, 650S, 950S. Secondary School Teaching Practicum.

Supervised practicum in secondary classroom teaching, conducted in cooperating schools, as part of the teacher preparation program. Consists of teaching, analysis, and evaluation. Two lecture hours and at least fifteen, thirty, or forty-five hours of fieldwork a week for one semester. Some sections are offered on the pass/fail basis only and some sections are offered on the letter-grade basis only; consult the Course Schedule. No more than nine semester hours of this course may be taken for credit. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

EDC 350W, 650W, 950W. All-Level Teaching Practicum.

Supervised practicum in elementary, middle school, and secondary classroom teaching. Conducted in cooperating schools as part of the teacher preparation program. Consists of teaching, analysis, and evaluation. Two lecture hours and at least fifteen, thirty, or forty-five hours of fieldwork a week for one semester. Offered on the pass/fail basis only. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

EDC 364, 664. Internship.

Supervised fieldwork or clinical work in the student's area of study. For 364, at least one conference hour and six hours of fieldwork a week for one semester; for 664, at least one conference hour and twelve hours of

fieldwork a week for one semester. Offered on the pass/fail basis only. Prerequisite: Consent of instructor.

EDC 365C. Knowing and Learning in Math and Science.

Same as UTeach-Natural Sciences 350. Restricted to students in the UTeach-Natural Sciences program. Psychological foundations of learning; problem solving in mathematics and science education utilizing technology; principles of expertise and novice understanding of subject matter; implications of high-stakes testing; and foundations of formative and summative assessment. Three lecture hours a week for one semester; additional hours may be required. Only one of the following may be counted: Curriculum and Instruction 365C, 371 (Topic 21: Knowing and Learning in Math and Science), UTeach-Natural Sciences 350. Prerequisite: Credit with a grade of at least C- or registration for UTeach-Natural Sciences 101.

EDC 365D. Classroom Interactions.

Same as UTeach-Natural Sciences 355. Restricted to students in the UTeach-Natural Sciences program. Principles of delivering effective instruction in various formats (lecture, lab activity, collaborative settings); examination of gender, class, race, and culture in mathematics and science education; overview of policy related to mathematics and science education. Three lecture hours a week for one semester; additional hours may be required. Only one of the following may be counted: Curriculum and Instruction 365D, 371 (Topic 20), UTeach-Natural Sciences 355. Prerequisite: The following courses with a grade of at least C-: Curriculum and Instruction 365C or UTeach-Natural Sciences 350, and UTeach-Natural Sciences 110; and a University grade point average of at least 2.75.

EDC 365E. Project-Based Instruction.

Same as UTeach-Natural Sciences 360. Restricted to students in the UTeach-Natural Sciences program who have earned a passing score on the preliminary portfolio. Foundations of project-based, case-based, and problem-based learning environments; principles of project-based curriculum development in mathematics and science education; classroom management and organization of project-based learning classrooms. Three lecture hours a week for one semester with additional fieldwork hours to be arranged. Only one of the following may be counted: Curriculum and Instruction 365E, 371 (Topic 22: Project-Based Instruction), UTeach-Natural Sciences 360. Prerequisite: Curriculum and Instruction 365D or UTeach-Natural Sciences 355 with a grade of at least C-, and a University grade point average of at least 2.75.

EDC 370E. Elementary School Subjects.

Curriculum content and organization, teaching procedures, materials, and research in elementary school subjects. Three lecture hours a week for one semester, including field hours in elementary schools. May be repeated for credit when the topics vary. Prerequisite: A University grade point average of at least 2.50.

Topic 1: Reading. Additional prerequisite: Admission to the professional development sequence of courses.

Topic 2: Language Arts. Additional prerequisite: Admission to the professional development sequence of courses.

Topic 3: Science. Additional prerequisite: Admission to the professional development sequence of courses.

Topic 4: Social Studies. Additional prerequisite: Admission to the professional development sequence of courses.

Topic 5: Mathematics. Additional prerequisite: Mathematics 316L or consent of the mathematics education faculty; and admission to the professional development sequence of courses.

Topic 15: Special Adaptations for the Deaf.

Topic 19: Reading/Language Arts. Additional prerequisite: Admission to the professional development sequence of courses.

Topic 20: Teaching English as a Second Language. The methods, teaching strategies, and materials for developing and assessing English language proficiency in culturally and linguistically diverse populations within the context of the elementary school curriculum.

Topic 21: Teaching Elementary Physical Education.

EDC 370S. Secondary School Subjects.

Curriculum content and organization, teaching procedures, materials, and research in one secondary school subject. Three lecture hours a week for one semester. The topic in the appropriate field is required for secondary school teacher certification. May be repeated for credit when the topics vary. Prerequisite: Admission to the professional development sequence of courses, completion of ninety semester hours of coursework, and six semester hours of upper-division coursework in the appropriate subject; additional prerequisites vary with the topic.

Topic 1: Advanced Methods in English, Language Arts, and Reading. Restricted to students in a secondary teacher preparation program in the Department of Curriculum and Instruction.

Topic 3: Advanced Methods in Social Studies. Restricted to students in a secondary teacher preparation program in the department of Curriculum and Instruction.

Topic 5: Advanced Methods in Foreign Language. Restricted to students in a secondary teacher preparation program in the Department of Curriculum and Instruction.

Topic 7: Art. Additional prerequisite: Curriculum and Instruction 331S and 332S.

Topic 8: Music (Vocal). Additional prerequisite: Curriculum and Instruction 331S and 332S.

Topic 9: Music (Instrumental). Additional prerequisite: Curriculum and Instruction 331S and 332S.

Topic 10: Drama. Additional prerequisite: Curriculum and Instruction 331S and 332S.

Topic 11: Speech. Additional prerequisite: Consent of instructor.

Topic 12: Teaching Secondary Physical Education.

EDC 370W. All-Level School Subjects.

Curriculum content and organization; teaching procedures, materials, and research in one school subject at all grade levels. Three lecture hours a week for one semester. The topic in the appropriate field is required for all-level school teacher certification. May be repeated for credit when the topics vary. Prerequisite: Admission to the professional development sequence of courses.

Topic 1: English as a Second Language.

Topic 2: Art.

Topic 3: Music.

Topic 4: Theatre.

Topic 5: Foreign Language Education.

EDC 371G. Teaching Young Children.

Designed to provide students with frameworks for observing and interacting with young children in classroom settings, and to acquaint students with the teacher's varied roles in early childhood classrooms. Topics include cultural and linguistic diversity; supervising and interacting with children in a range of instructional groupings, including center-based and play-based learning activities and whole-group experiences; planning and implementing appropriate practices and strategies; and record-keeping and assessment. Three lecture hours a week for one semester, and twelve to sixteen hours of fieldwork a week in a public school. Curriculum and Instruction 371 (Topic 19: Guiding Young Children in Groups) and 371G may not both be counted. Prerequisite: Upper-division standing, twelve semester hours of upper-division coursework in education, or consent of the education adviser; and admission to the

professional development sequence of courses and a University grade point average of at least 2.50.

EDC 371R. Reading Difficulties.

Reading theory, assessment, materials, and instruction with emphasis on struggling readers; field experiences in reading tutoring. Three lecture hours a week for one semester with additional field hours to be arranged. Curriculum and Instruction 371 (Topic 24: Reading Difficulties) and 371R may not both be counted. Prerequisite: Upper-division standing, twelve semester hours of upper-division coursework in education, or consent of the education adviser; and admission to the professional development sequence of courses and a University grade point average of at least 2.50.

EDC 373. African Americans in Sports.

Same as African and African Diaspora Studies 374D (Topic 12). Theoretical and practical complexities in issues surrounding African Americans in sports, including the relationship between athletics and higher education. Focuses on racial stereotyping, identity theory, and how practical knowledge of these theories can aid in understanding the current state of athletics. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374D (Topic: African Americans in Sports), 374D (Topic 12), Curriculum and Instruction 373.

EDC 377. Conference Course in Curriculum and Instruction.

Independent studies in instructional methodology and curriculum. Conference course. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

Department of Educational Psychology

Educational Psychology: EDP

Lower-Division Courses

EDP 110, 210, 310. Introduction to Educational Psychology.

Principles of psychology, human development, learning, and teaching. One, two, or three lecture hours a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit when the topics vary.

Topic 1 (TCCN: EDUC 1300, PSYC 1300): Individual Learning Skills.

Topic 2: Selected Topics.

Topic 3: Intergroup Dialogue. Group discussion of the definitions and implications of social identities. Topics may include gender, race, ethnicity, religion, sexual orientation, physical ability, and age.

EDP 312. Lower-Division Seminar.

Issues and research in various areas of educational psychology and the behavioral sciences. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

Topic 1: Issues and Debates in Life Development. Restricted to students in the Longhorn Scholars Program. Additional prerequisite: Consent of the School of Undergraduate Studies.

Upper-Division Courses

EDP 332. Psychological Foundations of Education.

Scientific contributions to the understanding of human behavior and educational processes: cultural influences, processes of learning and socialization, classroom management, development, intellectual

functioning, and educational achievement. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

EDP 162, 262, 362. The Individual and Education.

Frames of reference for studying human behavior, self-concepts and individual attributes, individual and cultural nature of human learning, societal impacts on the individual personality, individualization of guidance and teaching. One, two, or three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing. Additional prerequisites may be required for some topics; these are given in the Course Schedule.

Topic 1: Emergent Views of Intelligent Behavior.

Topic 2: Early Childhood.

Topic 3: Selected Topics.

Topic 4: Mexican Americans in the Schooling Process. Educational Psychology 362 is same as Mexican American Studies 374 (Topic 8: Mexican Americans in the Schooling Process).

Topic 5: Chicano Educational Struggles. Educational Psychology 362 (Topic 5) is same as Mexican American Studies 374 (Topic 25: Chicano Educational Struggles).

Topic 6: Psychology of Race and Racism. Educational Psychology 362 (Topic 6) is same as African and African Diaspora Studies 372D (Topic 1: Psychology of Race and Racism). Only one of the following may be counted: African and African Diaspora 374D (Topic 8: Psychology of Race and Racism), 372D (Topic 1), Curriculum and Instruction 362 (Topic 6).

Topic 7: Educational Disabilities in Schools.

Topic 8: Mindfulness, Compassion, and the Self. Designed to give students firsthand experiential knowledge of mindfulness and compassion. Subjects include self-compassion, well-being, and self-concept. Additional prerequisite: Psychology 301 or consent of instructor.

Topic 9: Psychology of the African American Experience. Same as African and African Diaspora Studies 374D (Topic 11). Examination of the psychology of people of African descent using an African-centered liberatory model. Only one of the following may be counted: Educational Psychology 362 (Topic: Psychology of the African-American Experience), 362 (Topic 9), African and African Diaspora Studies 374D (Topic: Psychology of the African-American Experience), 374D (Topic 11).

Topic 10: Psychology of Women. Only one of the following may be counted: Educational Psychology 362 (Topic: Psychology of Women), 362 (Topic 10), Women's and Gender Studies 345 (Topic: Psychology of Women).

EDP 362T. Tests and Measurements.

Fundamental psychometric concepts; educational and psychological measurement instruments; constructing, administering, scoring, and interpreting tests for educational and individual evaluation. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Tests and Measurements--Elementary.

Topic 2: Tests and Measurements--Secondary.

Topic 3: Tests and Measurements--Reading.

Topic 4: Tests and Measurements--Elementary/Secondary/Reading.

EDP 363. Personality and Behavior.

Selected approaches to the study of the dynamics of behavior, its antecedents and its appraisal. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Psychology 301 or another introductory behavioral science course.

Topic 1: Selected Topics.

Topic 2: Personality Development.

Topic 3: Human Sexuality.

Topic 4: Dynamics of Interpersonal Communication.

Topic 5: Emotional and Behavioral Disorders. Covers theory and research on several mental disorders with a critical perspective on how social structures and assumptions influence the way we conceptualize and treat mental disorders. Three lecture hours a week for one semester, with additional laboratory hours to be arranged.

Topic 6: Forensic Psychology: Psychological Issues in Legal Contexts. Designed to familiarize students with various psychological roles and influences in the courtroom; case law as related to expert testimony; ethical practice in forensic psychology; and psychological testing and assessment procedures used and considered best practice in various forensic contexts.

EDP 363M. Personality and Mental Health.

Exposition of theories of personality, research literature on mental health and character development, applications of principles and theories to the educative enterprise; applications of personality theory to the guidance of children and youth. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Six semester hours of upper-division coursework in education or other behavioral sciences.

Topic 1: Character Development.

Topic 2: School Promotion of Mental Health.

Topic 3: Adolescent Development. Addresses contemporary adolescent development in relation to major transitions, contextual influences, and psychosocial tasks, with additional emphases on aspects of adolescent identity development. Application to education and teaching adolescents is stressed.

Topic 4: Life Span Adjustment.

Topic 5: Life Span Development of Black Women. Same as African and African Diaspora Studies 321N and Women's and Gender Studies 340 (Topic 41). The psychological and social issues that affect the life span development of Black women. Discusses issues such as socioeconomic status, political climate, social norms, gender and ethnic identity, mental health, family dynamics, academic achievement, and social adjustment. Only one of the following may be counted: African and African Diaspora Studies 321N, 372D (Topic: Life Span Development of Black Women), 374D (Topic: Life Span Development of Black Women), Educational Psychology 363M (Topic 5), Women's and Gender Studies 340 (Topic: Life Span Development of Black Women), 340 (Topic 41). Additional prerequisite: Psychology 301 or another introductory behavioral science course.

EDP 367. Studies in Counseling and Psychotherapy.

Nature of the counseling process, dynamics of behavior change, client-counselor roles and relationships; an experiencing of the group process as a basis for studying dynamics of individual and group behavior. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Completion of ninety semester hours of coursework, twelve semester hours of upper-division coursework in behavioral sciences, and consent of instructor.

Topic 1: Introduction to Individual Counseling and Psychotherapy.

Topic 2: A Multicultural Approach to Counseling and Psychotherapy.

Major theories of counseling, client-counselor roles and relationships, history and development of multicultural counseling as an area of study, cultural competency, and the impact of culture on the counseling process.

Topic 3: Substance Abuse Counseling and Theories. Studies in biological mechanisms of categories of commonly abused substances and treatment approaches to addiction. Includes discussion of other

forms of addiction, including food, sex, and internet, and addiction in diverse populations.

EDP 169K, 269K, 369K, 469K. Upper-Division Seminar.

Issues and research in various areas of educational psychology and the behavioral sciences examined in relation to human development. One, two, three, or four lecture hours a week for one semester. Some topics are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Six semester hours of upper-division coursework in education or other behavioral sciences, and consent of instructor.

Topic 1: Career Planning. Additional laboratory hour to be arranged.

Topic 2: Resident Assistant Development.

Topic 3: Students and Community Involvement.

Topic 4: Selected Topics.

Topic 5: Sorority and Fraternity Leadership Issues. Designed to facilitate development of leaders within University sororities and fraternities. Includes leadership skills development in areas such as academics, risk management, social justice, and community service. Additional prerequisite: Consent of the Office of the Dean of Students.

Topic 6: Minority Student Leadership Issues. Same as African and African Diaspora Studies 348C. Exploration of racial identity development and the psychological impact of racism on all students, regardless of ethnicity. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 348C, 374D (Topic: Minority Student Leadership Issues), Educational Psychology 369K (Topic: Minority Student Leadership Issues), 369K (Topic 6). Additional prerequisite: Six semester hours of upper-division coursework in education or other behavioral sciences, and consent of instructor.

Topic 7: Socially Responsible and Ethical Student Leadership. Additional prerequisite: Consent of the Office of the Dean of Students.

Topic 8: Training Procedures in Intergroup Dialogue. Designed to develop the foundational skills and knowledge required to facilitate discussions in a culturally diverse group, particularly intergroup dialogues. Topics include social identity and group development; prejudice and stereotyping; intergroup communication; conflict intervention; and community-building techniques.

Topic 9: Practicum in Facilitating Intergroup Dialogue. Additional prerequisite: Consent of the Office of the Dean of Students.

Topic 10: Educational Neuroscience. Explores the interactions between neurobiological processes and education, examining how cognitive neuroscience can inform and guide educational practice, as well as how the impact of the educational experience on brain development and functioning can increase understanding of functional neural systems.

EDP 371. Introduction to Statistics.

Measures of central tendency and variability; correlation and regression; probability and statistical inference; analysis of variance; nonparametric statistics. Three lecture hours a week for one semester, with additional laboratory hours to be arranged.

EDP 379L. Problems in Educational Psychology.

Supervised individual research on selected problems in educational psychology. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Educational Psychology 310 or another introductory behavioral science course.

Department of Kinesiology and Health Education

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Health Education: HED

Lower-Division Courses

HED 110. Freshman seminar.

Provides an overview of the life skills that are critical to success, such as academic, social, and health behaviors. Offered on the pass/fail basis only.

Upper-Division Courses

HED 127L, 227L, 327L, 627L. Fieldwork in Health Promotion.

Applied experiences in development, delivery, or evaluation of professional health promotion programs. For 127L, one conference hour and two hours of fieldwork a week for one semester; for 227L, one conference hour and five hours of fieldwork a week for one semester; for 327L, one conference hour and eight hours of fieldwork a week for one semester; for 627L, one conference hour and seventeen hours of fieldwork a week for one semester. No more than twelve semester hours in the following courses may be counted: Health Education 127L, 227L, 327L, 627L, Kinesiology 127L, 227L, 327L, 627L. Prerequisite: Upper-division standing, consent of the director of the degree program in kinesiology, and a University grade point average of at least 2.50. A higher grade point average may be required.

HED 628. Internship in Health Promotion.

Applied experiences in development, delivery, or evaluation of professional health promotion programs. One conference hour and seventeen hours of fieldwork a week for one semester. May be repeated once for credit. Prerequisite: Upper-division standing, consent of the director of the degree program in kinesiology, and a University grade point average of at least 2.50. A higher grade point average may be required.

HED 329K. Child, Adolescent, and Adult Health.

Restricted to students in the College of Education. The foundations of child, adolescent, and adult health; health education; and the biological, environmental, and behavioral health determinants of health. Includes the application of evidence-based child, adolescent, and adult health promotion concepts; prominent health risk behaviors established during youth that increase the risk of morbidity and mortality; and the application of personal health and wellness information. Three lecture hours a week for one semester.

HED 335. Theories of Substance Use and Abuse.

An introduction to the psychological, social, pharmacological, and cultural aspects of substance use and abuse. Includes a study and critique of the theories of substance use and abuse. Three lecture hours a week for one semester.

HED 343. Foundations of Epidemiology.

Designed to familiarize students with the basic tenets of epidemiology, as well as to provide an introduction to the different types of epidemiological study designs. Three lecture hours a week for one semester. Prerequisite: Consent of instructor.

HED 352K. Studies in Health: Topical Studies.

Analysis and synthesis of the literature and discussion of current and specific issues in health. Three lecture hours a week for one semester. Laboratory work is required for some topics; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 2: Psychosocial Issues in Women's Health. Psychosocial issues in women's physical and mental health. Includes a broad definition of women's health that considers traditional reproductive issues, disorders that are more common in women than in men, and the leading causes of death in women. Covers gender influences on health risk behaviors, and societal influences on women's health through a consideration of social norms and roles.

Topic 3: Psychosocial Issues in Adult Development and Health. Examines psychosocial issues in adult physical and mental health within the context of adult psychological development, using a biopsychosocial approach. Examines psychosocial factors in the major health risks in adulthood and in preventative health behavior. Also considers psychosocial factors in stress and coping and their implications for health.

Topic 4: Strategic Health Communication. Introduces essential components of effective communication strategies and persuasive messaging techniques to aid in the development of a strategic health campaign for a client in an allied health field.

HED 366. Human Sexuality.

Analysis of the physiological, psychological, and social factors in human sexuality. Three lecture hours a week for one semester.

HED 370K. Topical Seminar in Health Promotion.

Identification, causes, incidence, prevention, control, and social implications of major problems in health. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: Foundations of Health Promotion I. Restricted to health promotion students. Introduction to the field of health promotion, as applicable in the fields of health and education: theories, processes, activities, and settings for health promotion practice. Additional prerequisite: Upper-division standing and consent of instructor.

Topic 2: Adolescent Health Risk Behavior. Overview of the biological, psychological, social, and environmental determinants of adolescent risk-taking behavior. Risk behaviors of interest will include outcomes stemming from unintentional injuries, intentional injuries (self injury, suicide), tobacco use, alcohol and other drug use, diet, sedentary behavior, and pathological gambling.

Topic 3: Environmental Health. Provides an introduction to the key areas of environmental health in developed and developing countries. Using the perspectives of the population and community, the course will cover factors associated with the development of environmental health problems.

HED 371K. Foundations of Health Promotion II.

Introduction to the processes of planning, implementing, and evaluating health promotion programs. Three lecture hours a week for one semester. Health Education 352K (Topic 1: Foundations of Health Promotion II) and 371K may not both be counted. Prerequisite: Upper-division standing and Health Education 370K (Topic 1: Foundations of Health Promotion I).

HED 373. Evaluation and Research Design.

Restricted to health promotion students. Research methods and program evaluations in health promotion settings. Topics include types of experimental and non-experimental research, validity, reliability, experimental and quasi-experimental research designs, data collection

procedures, measurement of health knowledge, attitudes and behaviors, data analysis, and the presentation of results. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

HED 178C, 278C, 378C, 678C. Fieldwork in Health.

Undergraduate research and/or experience with a health agency in the field attempting to analyze or solve community health problems through education; students are supervised by the health agency and by the kinesiology and health education faculty. For each semester hour of credit earned, two laboratory hours a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Upper-division standing and consent of instructor.

Kinesiology: KIN

Lower-Division Courses

KIN 310. Physiological Basis of Conditioning.

Analysis and discussion of current issues and theories of physical conditioning. Three lecture hours a week for one semester. Kinesiology 310 and 339 may not both be counted.

KIN 311. Water Safety Instruction and Lifeguard Training.

Principles and practical application of water safety instruction and lifeguard training, personal water safety skills sets, professional rescues, first aid, and CPR/AED programs. Successful completion of course sessions, activities, lectures, skill development and evaluation requirements will qualify the student to test for certifications from nationally recognized safety agencies. Three lecture hours and one laboratory hour a week for one semester. Only one of the following may be counted: Kinesiology 311, 213 (Topic 2: Water Safety Instruction), 213 (Topic 4: Lifeguarding Instruction). Offered on the letter-grade basis only.

KIN 311K. Sport Psychology.

The psychological response to sport-related stress and the influence of psychological variables on sport performance and coaching. Three lecture hours a week for one semester.

KIN 312. Issues in Kinesiology: Topical Studies.

Analysis and discussion of current issues within the discipline of kinesiology. Three lecture hours a week for one semester. Additional hours may be required for some topics; these are identified in the Course Schedule. May be repeated for credit when the topics vary.

Topic 2 (TCCN: PHED 2356): Care and Prevention of Athletic Injuries. Principles of athletic training, including mechanisms, signs and symptoms, treatments, and basic rehabilitation of athletic injuries and illnesses. Three lecture hours and one laboratory/discussion hour a week for one semester.

Topic 3: Fundamentals of Coaching. An introduction to the principles and practices of coaching as they relate to the integration of sports science, practice structure and design, and the development of a coaching philosophy. Involves group work and field experience with youth athletic organizations.

Topic 4: Philosophy and Leadership in Sport & Physical Activity.

KIN 312G. Golf Instruction.

Designed to train students to teach the game of golf. Three lecture hours a week for one semester, with additional fieldwork hours to be arranged. Prerequisite: Consent of instructor.

KIN 312M. Management of Physical Activity and Sport Programs.

Introductory survey of the field of sport management. Examines various types of sport organizations and introduces the student to practices in marketing, management, sport law, and basic finance. Includes sport-

specific management challenges, particularly events and facilities, and considerations for the future, such as social issues. Three lecture hours a week for one semester.

KIN 213. Safety Information and Procedures.

Factors affecting human safety; techniques and procedures to promote and ensure safe living. The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1 (TCCN: PHED 1206): First Aid.

Topic 2: Water Safety Instruction. Restricted to Kinesiology and Health Education majors; open to others with consent of instructor. Trains instructor candidates to teach courses in swimming and water safety by developing their understanding of how to use the course materials, conduct training sessions and evaluate participants' progress. Students will be introduced to several swimming strokes, springboard diving, cardiovascular conditioning, exercise physiology, nutrition, personal safety. Elementary rescue skills and basic snorkeling techniques. Culminates in American Red Cross certification. Prerequisite: swimming proficiency and confidence in deep water.

Topic 3: Lifeguarding.

Topic 4: Lifeguarding Instruction.

KIN 314 (TCCN: PHED 1331). Children's Movement.

Introduction to children's movement, physical activity, and fitness; professional standards, policy, and legislation; physiological principles and learning principles. Movement skills and appropriate teaching strategies to provide future teachers with the knowledge and skills to provide and support positive, effective physical education classes for children. Three lecture hours a week for one semester, with additional off-campus service learning project hours to be arranged.

KIN 315. Motor Learning.

Psychological factors affecting performance and acquisition of motor skills. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Psychology 301.

KIN 316. Structure and Organization of Sport Programs.

Introduction to sport management and effective organizational behavior for sport programs. Analysis of the dynamic management process necessary for the improvement of organizational productivity. Three lecture hours a week for one semester. May be repeated once for credit. Prerequisite: Kinesiology 312M and consent of instructor.

KIN 217. Advanced Scuba Diving Leadership.

Designed to prepare experienced scuba divers to instruct, organize, and conduct safe, appropriate-level dives for certified divers. Also designed to prepare students to apply for certification as a National Association of Underwater Instructors (NAUI) Assistant Instructor or Divemaster. Three lecture or open-water hours a week, and three internship hours a week for one semester participating in the training of entry-level students. Prerequisite: Certification as a scuba rescue diver and as a National Association of Underwater Instructor (NAUI) Master Scuba Diver, or equivalent knowledge and experience.

KIN 119. Movement Competence.

Acquisition and knowledge of techniques, with emphasis on learning mechanical and perceptual principles, rules, strategy, and officiating. The equivalent of three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: A major or minor in the Department of Kinesiology and Health Education.

Topic 1: Archery.

Topic 2: Ballet.

Topic 3: Bowling.

Topic 4: Diving.

Topic 5: Fencing.

Topic 6: Golf.

Topic 7: Scuba Diving.

Topic 8: Swimming. Designed for kinesiology and health education majors. Development of swimming techniques including instruction in seven swimming strokes, springboard diving, cardiovascular conditioning, exercise physiology concepts, nutrition, personal safety, elementary rescue skills, CPR/AED and basic snorkeling techniques. Provides preparation for American Red Cross certification. Additional prerequisite: Comfortable in deep water and able to swim two lengths using two strokes, or consent of instructor.

Topic 10: Conditioning. Basic principles involved in designing a sound conditioning program emphasizing resistance training techniques. Additional Prerequisite: Physical Education 106C (Topic 7: Weight Training), or consent of instructor.

Topic 11: Rhythmic Activities and Dance. Designed for applied movement science majors, and kinesiology and health education majors. Introduces a variety of movement and dance activities that can be used to teach rhythm to youth, with an emphasis on grades K-6.

Topic 12: Gymnastics.

Topic 13: Manipulative Activities.

Topic 14: Tennis. Introduction to methods, progressions, strategies, and teaching cues appropriate for playing, teaching, and coaching basic tennis.

Topic 15: Volleyball. Introduction to methods, progressions, and teaching cues appropriate for playing, teaching, and coaching basic volleyball.

Topic 16: Social Dance. Designed for applied movement science majors, and kinesiology and health education majors. Introduction to popular social partner dances, including swing, waltz, salsa, tango, two-step and more. Emphasis on connecting with a dance partner and the art of both leading and following. Optional dance labs for additional practice are offered.

Topic 17: Basketball. Designed for applied movement science majors, and kinesiology and health education majors. Introduces methods, progressions, strategies and teaching cues appropriate for playing, teaching, and coaching basic basketball.

Topic 18: Adventure Activities. Includes basic skills needed to participate in outdoor/adventure activities. Participants will learn methods, progressions, drills, and performance cues appropriate for participating in and leading outdoor/adventure activities. Includes off-campus activities. Additional prerequisite: Kinesiology 119 (Topic 8: Swimming) and lifeguard, water safety instructor, or swimming level II certification.

Topic 19: Kinesthetic Awareness and Core Body Development.

Introduces basic movement skills from simple to more complex, and how they relate to more advanced sport skills through developmental gymnastics, yoga, Pilates, and martial arts. Additional prerequisite: A major in applied movement science.

KIN 219D. Movement Analysis: Dual Activities.

Application of biomechanics and motor learning principles to the analysis of selected movement activities, with particular emphasis on dual sports. Two lecture hours and one laboratory hour a week for one semester. Prerequisite: A major in applied movement science.

KIN 219G. Advanced Golf.

Designed for the advanced golfer. Includes technical swing analysis and instruction, course management and course play, and tournament play. Two lecture hours a week for one semester, with additional fieldwork hours to be arranged. Prerequisite: Consent of instructor, and a certified Professional Golfers Association (PGA) handicap of 15 or below or equivalent proficiency.

KIN 219K. Athletics.

Knowledge and skills required for officials, coaches, and athletic trainers of interschool sports. Two lecture hours and two laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Topic 1: Coaching.

Topic 2: Officiating.

Topic 3: Introduction to Athletic Training. An introduction to athletic training principles and theories, including the prevention, recognition, and management of athletic injuries and illnesses. Includes basic skill development in areas such as first aid, emergency care, and supportive taping, wrapping, and bracing. Requires a one-day first aid and CPR workshop.

KIN 219S. Movement Analysis: Individual Activities.

Restricted to kinesiology and health education majors. Application of movement skill analysis and biomechanical principles, physical laws of movement, fitness training principles and programs, exercise physiology, performance techniques, and skill progressions in individual activities and sport. Two lecture hours and one laboratory hour a week for one semester.

KIN 219T. Movement Analysis: Team Activities.

Restricted to kinesiology and health education majors. Application of scientific and psychosocial aspects of team sports, basic mechanical principles, and basic progressions relevant to performing and teaching selected team sport skills. Students also learn basic strategies and tasks related to coaching and organizing a team. Two lecture hours and one laboratory hour a week for one semester.

Upper-Division Courses

KIN 320. Applied Biomechanics of Human Movement.

Designed to provide students with an understanding of applied scientific analysis of movement. Examines the physiological, structural, and mechanical bases for human movement, with examples drawn from sport and rehabilitation. Lectures concentrate on a scientific approach to mechanisms underlying human movement and to strategies and practices of clinical and sport applications. Laboratory sessions focus on both theoretical and applied aspects of selected mechanical concepts. Three lecture hours and one and one half laboratory hours a week for one semester. Prerequisite: Kinesiology 324K, and Mathematics 305G or the equivalent.

KIN 321M. Motor Development and Performance.

Development of fundamental motor patterns and skills from birth to adolescence; factors that influence motor skill development, such as growth, maturation, and neural and physiological mechanisms. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Upper-division standing.

KIN 322. Diagnosis and Evaluation of Fitness.

Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Kinesiology 310, 324K, and 325K.

KIN 324K. Applied Human Anatomy.

Combines the study of systematic and regional human anatomy. Includes applications of the skeletal system, and attachments and actions of muscles, with an emphasis on the mechanics of support and motion and their clinical applications. Two lecture hours and three laboratory hours a week for one semester. Biology 478L and Kinesiology 324K may not both be counted.

KIN 325K. Physiology of Exercise.

Application of principles of physiology to muscular activities. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Kinesiology 324K or a course in human physiology.

KIN 226. Advanced Weight Training.

Explores various advanced techniques of weight training, with emphasis on the lifts used in the competitive strength sports of weightlifting and powerlifting. Includes plyometrics and functional training movements for athletic enhancement. Two lecture hours a week for one semester. Prerequisite: Weight training experience, or consent of instructor.

KIN 326K. Kinesiology: Biomechanical Analysis of Movement.

Study of the principles of equilibrium, force, and motion as applied to human movement. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Kinesiology 324K, Mathematics 408C, and Physics 302K.

KIN 127L, 227L, 327L, 627L. Fieldwork.

Supervised fieldwork or clinical work in appropriate activities. For 127L, one conference hour and two hours of fieldwork a week for one semester; for 227L, one conference hour and five hours of fieldwork a week for one semester; for 327L, one conference hour and eight hours of fieldwork a week for one semester; for 627L, one conference hour and seventeen hours of fieldwork a week for one semester. May be repeated for credit up to twelve semester hours. No more than twelve semester hours in this course may be counted. No more than twelve semester hours in the following courses may be counted: Health Education 127L, 227L, 327L, 627L, Kinesiology 127L, 227L, 327L, 627L. No more than twelve semester hours in the following courses may be counted: Kinesiology 127L, 227L, 327L, 627L, 628. Students taking Kinesiology 127L, 227L, or 327L as an elective outside the major must register on the pass/fail basis; those using it to fulfill a degree requirement must register on the letter-grade basis; those taking it as an elective within the major may register on either the pass/fail or the letter-grade basis. Prerequisite: Upper-division standing, consent of the director of the degree program in kinesiology, and a University grade point average of at least 2.50. A higher grade point average may be required. Students will be dropped from the course if they have not obtained the director's consent in advance.

Topic 3: Aiding in Fitness Leadership.

Topic 4: Fieldwork in Kinesiology.

Topic 5: Personal Training. Additional prerequisite: Kinesiology 332.

Topic 6: Clinical Exercise Testing. Additional prerequisite: Kinesiology 322 and consent of instructor.

Topic 8: Teaching Physical Education. Introduction to the mission and standards for quality physical education. Designed to aid in career choice and the opportunity to experience teaching with master teachers in the school. Includes off-campus instruction with physical education teachers in elementary and secondary school physical education programs.

Topic 9: Sensory Motor Integration. Students participate in The Autism Project (TAP) to explore evidence-based practices and service learning options used with children and adults on the autism spectrum. Additional prerequisite: Consent of instructor.

Topic 10: Laboratory Research in Kinesiology.

KIN 628. Fieldwork in Sport Management.

Twenty-seven hours of fieldwork a week for one semester. May be repeated once for credit. No more than twelve semester hours in the following courses may be counted: Kinesiology 127L, 227L, 327L, 627L, 628. Prerequisite: Upper-division standing, a University grade point

average of at least 2.50, completion of an online test, and consent of the faculty adviser.

KIN 330E. Sport Nutrition.

The nutritional needs of people whose physical activity ranges from recreational to elite competitive athletics. Development of practical dietary strategies based upon understanding how macronutrients, vitamins, minerals, and water are digested and absorbed for metabolism. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and Chemistry 314N or a course in human physiology.

KIN 331. Physical Aging in America.

Three lecture hours a week for one semester. Kinesiology 331 and 352K (Topic: Physical Aging in America) may not both be counted. Prerequisite: Upper-division standing; Kinesiology 310, 315, or 325K; and six additional semester hours of coursework in kinesiology.

KIN 332. Techniques of Fitness Leadership.

Practical application of theoretical content from exercise physiology, anatomy, and biomechanics. Emphasis on program design and development for healthy adults and special populations. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Prerequisite: Kinesiology 310 or 325K.

KIN 334. Children's Exercise and Physical Activity.

Children's changing capacity for performance in exercise and sport. Includes performance changes as a function of physical growth and maturation, physiological response to activity and training, the relationship between children's health and adult health, and the psychosocial parameters that influence participation in physical activity. Three lecture hours a week for one semester. Prerequisite: Kinesiology 310.

KIN 336. Neuromuscular Control.

Central and peripheral nervous system control of human muscular contractions and limb movement. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Kinesiology 324K, or a course in human physiology.

KIN 338. Motor Development and Assessment.

Training in screening, diagnostic, and programmatic motor assessment instruments. Designed to give students practical experience in assessing physical and motoric development in children with and without disabilities. Three lecture hours a week for one semester. Prerequisite: Kinesiology 321M; Kinesiology 360 is recommended.

KIN 340. Modern Olympic Movement in World Affairs.

Examination of the place of the modern Olympic movement in world affairs. The cultural, political, and economic dynamics of this relationship will receive special emphasis.

KIN 140C. Practicum in Athletic Training: Level 1A.

Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, and immediate care of injuries and illnesses suffered by athletic and physically active populations. Students use cognitive, psychomotor, and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor. One lecture hour and twenty hours of fieldwork a week for one semester. Prerequisite: Consent of instructor.

KIN 140D. Practicum in Athletic Training: Level 1B.

Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, and treatment of injuries and illnesses suffered by athletic and physically active populations. Emphasizes the application of therapeutic

modalities and soft-tissue therapy techniques. Students use cognitive psychomotor and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor. One lecture hour and twenty hours of fieldwork a week for one semester. Prerequisite: Consent of instructor.

KIN 140E. Practicum in Athletic Training: Level 2A.

Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, and diagnosis of injuries and illnesses suffered by athletic and physically active populations. Emphasizes clinical evaluation and assessment techniques. Students use cognitive, psychomotor, and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor. One lecture hour and twenty hours of fieldwork a week for one semester. Prerequisite: Consent of instructor.

KIN 140F. Practicum in Athletic Training: Level 2B.

Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, diagnosis, rehabilitation, and reconditioning of injuries and illnesses suffered by athletic and physically active populations. Emphasizes therapeutic exercise and rehabilitation procedures. Students use cognitive, psychomotor, and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor. One lecture hour and twenty hours of fieldwork a week for one semester. Prerequisite: Consent of instructor.

KIN 140G. Practicum in Athletic Training: Level 3A.

Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, diagnosis, rehabilitation, and reconditioning of injuries and illnesses suffered by athletic and physically active populations. Emphasizes general medical conditions. Students use cognitive psychomotor and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor. One lecture hour and twenty hours of fieldwork a week for one semester. Prerequisite: Consent of instructor.

KIN 140J. Practicum in Athletic Training: Level 3B.

Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, diagnosis, rehabilitation, and reconditioning of injuries and illnesses suffered by athletic and physically active populations. Emphasizes the administrative and professional aspects of managing these conditions. Students use cognitive psychomotor and affective skills and knowledge to complete a prescribed set of education competencies and clinical proficiencies under the direction of an approved clinical instructor. One lecture hour and twenty hours of fieldwork a week for one semester. Prerequisite: Consent of instructor.

KIN 341. Therapeutic Modalities in Athletic Training.

The study and practice of using therapeutic modalities, including soft tissue and manual therapy techniques, to treat athletic injuries. Covers physiological effects, indications, contraindications, protocols, injury pathology, and tissue healing. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Kinesiology 312 (Topic 2), or consent of instructor.

KIN 342. Clinical Evaluation of Athletic Injuries in the Lower Body.

The study and practice of techniques involved in the evaluation of athletic injuries affecting the lower body. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Kinesiology 312 (Topic 2) and 324K, and concurrent enrollment in Kinesiology 343; or consent of instructor.

KIN 343. Clinical Evaluation of Athletic Injuries in the Upper Body.

The study and practice of techniques involved in the evaluation of athletic injuries affecting the upper body. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Kinesiology 312 (Topic 2), 324K, and concurrent enrollment in 342; or consent of instructor.

KIN 344. Therapeutic Exercise and Rehabilitation Techniques.

The study and practice of therapeutic exercise techniques and rehabilitation protocols in treating athletic injuries and illnesses. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Kinesiology 324K and 342, or consent of instructor; credit or registration for Kinesiology 119 (Topic 10) and 226 or 363.

KIN 345. Topics in Athletic Training.

Presentations, including some by medical and allied medical specialists, covering topics in athletic training and sports medicine. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Consent of instructor.

KIN 346. Athletic Training Program Administration.

The study of organizational and administrative principles involved with athletic training programs. Includes legal issues, budgetary concerns, and policies and procedures. Also includes resume development and career planning. Three lecture hours a week for one semester. Prerequisite: Kinesiology 219K (Topic 3), 341, 342, and 344; or consent of instructor.

KIN 347. Historical and Ethical Issues in Physical Culture and Sports.

Designed to provide an overview of the historical antecedents of the modern fitness movement and examine the intellectual and social motivations involved in the pursuit of health and physical fitness. Explores the history of sport science, how laboratory revelations lead to new fitness regimens, and ethical issues in the field of physical culture and sport, such as the use of ergogenic drugs, the social consequences of high performance sport, and professional ethics in the fields of kinesiology and health education. Three lecture hours a week for one semester.

KIN 348. Psychological Aspects of Exercise.

Examines both the psychological benefits that accrue from exercise, such as reduced depression and stress, as well as the psychological predictors of exercise adherence. Three lecture hours a week for one semester.

KIN 349. History of Sport and Physical Activity.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in physical culture and sports or sport management. Significant developments in sport and physical activity since prehistoric time; emphasis on events influencing contemporary American programs and the International Olympic Games. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

KIN 350. Sociological Aspects of Sport and Physical Activity.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in physical culture and sports or sport management. Three lecture hours a week for one semester. Kinesiology 350 and 352K

(Topic: Sociological Aspects of Sport and Physical Activity) may not both be counted.

KIN 351. Philosophy of Sport and Physical Activity.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in physical culture and sports or sport management. Designed to introduce the student to the ideas and methodologies of the philosophic exploration of play, sport, athletics, exercise, and the body. Emphasis on the study of sport and ethics. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

KIN 352K. Studies in Human Movement: Topical Studies.

Analysis and synthesis of the literature and discussion of current and specific issues in kinesiology. Three lecture hours a week for one semester. Laboratory work is required for some topics; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 3: Women and Sport. Same as Women's and Gender Studies 345 (Topic 5: Women and Sport).

Topic 5: Sport, Fitness, and Mass Media. Same as American Studies 322 (Topic 3: Sport, Fitness, and Mass Media).

Topic 6: Race and Sport in African American Life. Same as African and African Diaspora Studies 372E (Topic 19) and Anthropology 324L (Topic 26). Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 19), 374 (Topic 27), Anthropology 324L (Topic 26), Kinesiology 352K (Topic 6) Additional prerequisite: Upper-division standing.

KIN 353. Sport Law.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in sport management. Introduces the legal principles applicable to a variety of sport settings. Topics include tort liability, with a special emphasis on the effective management of risk; and constitutional law issues, focusing on the individual rights of amateur athletes and employees in sport organizations. Three lecture hours a week for one semester.

KIN 354. Sport and Event Marketing.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in sport management. Application of the fundamental principles used in the marketing of sport and events. An introduction to service quality for increasing customer satisfaction and effectiveness of sport organizations. Three lecture hours a week for one semester.

KIN 355. Media and Public Relations in Sport.

Examination and application of the concepts of public and media relations to sport and leisure organizations. Topics include effective interpersonal communication, persuasion, media relations, publicity tactics, and writing and oral communications skills. Three lecture hours a week for one semester.

KIN 356. Revenue and Budgeting in Sport.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in sport management. Introduction to financial analysis and budgeting techniques in the context of sport organizations; conventional and innovative methods for the acquisition of revenue available to sport organizations. Three lecture hours a week for one semester.

KIN 357. Strategic Management of Sport Organizations.

Restricted to students in the Bachelor of Science in Kinesiology and Health with a major in sport management. Examination of management and service delivery systems in sport organizations. Designed to develop specific knowledge and management skills in the areas of human

resources, events, facilities, and risk management. Three lecture hours a week for one semester. Prerequisite: Kinesiology 354 and 356.

KIN 360. Programming for People with Disabilities.

Restricted to students with a major or minor in the Department of Kinesiology and Health Education. Designed for Applied Movement Science majors. Course investigates programming options for people with disabilities in the area of sport, recreation, and community involvement. Three lecture hours a week for one semester, with additional field observation hours to be arranged. Prerequisite: Six semester hours of coursework in kinesiology, or consent of instructor.

KIN 361. Coaching Theory and Principles I.

Examines the philosophy, ethics, strategies, motivational techniques, performance analysis, program organization, contest administration, and facilities management related to coaching. Three lecture hours a week for one semester.

KIN 362. Coaching Theory and Principles II.

Examines the process of becoming a successful coach and developing a coaching protocol for a specific sport. Three lecture hours a week for one semester. Prerequisite: Kinesiology 361 or consent of instructor.

KIN 363. Theory and Practice in Strength Coaching.

Explores the physiology and biomechanics of strength training and conditioning, as well as popular assessment protocols and exercise prescription principles. Additional areas include the organization and administration of a strength/conditioning facility, staff utilization, integration of weight training with other training techniques, and other standard strength coaching practices. Three lecture hours a week for one semester.

KIN 364. Aquatic Facility Operator: Management and Administration.

Designed to prepare the aquatic professional for leadership in the management of indoor and outdoor facilities. Includes aquatic facility operation, administration of programs, physical operations, policies and procedures, and staff development and training. Includes design, pool operation, water chemistry, facility management, safety procedures and risk management, budgeting, and marketing aquatic programs. Studies educational, sport, and recreational aspects of pools, lakes, camps, and beachfronts. Three lecture hours a week for one semester.

KIN 365. The Business of Golf.

Restricted to students in the College of Education. Designed for students pursuing a career in the golf business. Includes clubhouse and links management, sales, agronomy, technology, and equipment. Three lecture hours a week for one semester.

KIN 370K. Topical Seminar in Health Promotion.

Identification, causes, incidence, prevention, control, and social implications of major problems in health. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: Emergency Medical Technology.

KIN 375. Issues and Trends in Developmental Movement Programs.

Introduction to issues related to the goals, organization, and success of developmental movement programs, such as school physical education, youth sports, YMCA, and other recreation programs and community activities. Issues include equity, competition, fitness, social development, safety and liability, and sportsmanship. Involves group work and

observation and involvement in community programs. Two lecture hours and three laboratory hours a week for one semester.

KIN 376. Measurement in Kinesiology.

Measurement and assessment procedures; application of statistical procedures; standards for authentic assessment; measurement/assessment selection and evaluation; use of technology in tracking development of motor skills and fitness. Three lecture hours a week for one semester. Prerequisite: Six semester hours of upper-division coursework in kinesiology.

KIN 178, 278, 378, 678. Fieldwork in Health.

Undergraduate research and/or experience with a health agency in the field attempting to analyze or solve community health problems through education; supervision by the health agency and by the kinesiology and health education faculty. For each semester hour of credit earned, two laboratory hours a week for one semester. Some topics are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

Topic 1: Substance Abuse Prevention I.

Topic 2: Substance Abuse Prevention II.

Topic 3: Sexual Health I.

Topic 4: Substance Abuse Prevention III. Offered on the letter-grade basis only.

KIN 379H. Honors Tutorial Course.

Readings or a research project, under the supervision of a faculty member, in specific areas of research within kinesiology. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: A University grade point average of at least 3.00 and consent of instructor.

Physical Education: PED

Lower-Division Courses

PED 101J. Swimming.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Swimming I. For nonswimmers. Elementary physical and mental adjustments, four basic strokes, water safety.

Topic 2: Beginning Swimming II. For well-adjusted but weak swimmers. Five basic strokes, elementary diving, water safety.

Topic 3: Intermediate Swimming. For the average swimmer. Six power strokes, diving, water safety, introduction to conditioning.

Topic 5: Stroke Technique and Fitness Swimming.

PED 102G (TCCN: PHED 1151, PHED 1152). Skin Diving and Scuba Diving.

Training in underwater safety, skin and scuba skills, care of equipment. Culminates in PADI certification. Three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Advanced-level swimming skills. Strong swimming and survival skills required.

Topic 1: Basic Scuba Diving. Classroom, pool, and open water training with emphasis on underwater safety, the skills of skin and scuba diving, equipment, the underwater environment, planning for a dive. Culminates in nationally recognized certification.

Topic 2: Intermediate Scuba Diving. Open to divers with Basic Certification. Classroom, pool, and open water training with emphasis on navigation, air consumption, emergency procedures, night dives. Culminates in nationally recognized certification.

Topic 3: Advanced Scuba Diving. Open to experienced divers with Intermediate Certification. Classroom, pool, and open water

training with emphasis on deep dives, mapping, search and research diving, equipment rescue work. Culminates in nationally recognized certification.

PED 103L. Social Dance.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Topic 1: Beginning Social Dance. Introduction to popular social partner dances, including swing, waltz, two-step, salsa, tango and more. Emphasis on connecting with a dance partner and the art of leading and following. May not be counted by students with credit for Kinesiology 119.

Topic 2: Intermediate Social Dance. An intermediate survey of popular social dances. Includes more complex partnering and variations in familiar and new dance styles. Additional prerequisite: Kinesiology 119 (Topic 16: Social Dance) or Physical Education 103L (Topic 1).

Topic 3: Advanced Social Dance. An advanced survey of popular social partner dances. Includes advanced partnering, role reversal, and an emphasis on creativity and style. Additional prerequisite: Physical Education 103L (Topic 2: Intermediate Social Dance), and audition on first class meeting.

PED 104P. Tennis.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Tennis. For the nonplayer.

Topic 2: Advanced Beginning Tennis. For players with weak strokes and serves.

Topic 3: Intermediate Tennis. Prerequisite: A steady stroke and consistent serve.

Topic 4: Advanced Intermediate Tennis. Prerequisite: Skilled all-court play.

Topic 5: Advanced Tennis. Prerequisite: Competence for tournament play.

PED 104R. Racquetball.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Racquetball. For the nonplayer.

Topic 2: Intermediate Racquetball. Prerequisite: Racquetball experience.

Topic 3: Advanced Racquetball. Prerequisite: Competence for tournament play.

PED 105C. Handball.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Handball. For the nonplayer.

Topic 2: Intermediate Handball. Prerequisite: Handball experience.

Topic 3: Advanced Handball. Prerequisite: Competence for tournament play.

Topic 4: Handball Doubles. Prerequisite: Handball experience.

PED 105M. Fencing.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Fencing: Foil.

Topic 2: Beginning Fencing: Epee.

Topic 3: Intermediate Fencing: Foil. Prerequisite: Physical Education 105M (Topic 1).

Topic 4: Intermediate Fencing: Epee. Prerequisite: Physical Education 105M (Topic 2).

Topic 5: Intermediate Fencing: Saber. Prerequisite: Physical Education 105M (Topic 1).

Topic 6: Advanced Fencing: Foil. Prerequisite: Any intermediate-level fencing course.

PED 105R. Karate/Tae Kwon Do.

Includes self-defense. Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Karate/Tae Kwon Do. Prerequisite: No experience required.

Topic 2: Intermediate Karate/Tae Kwon Do. Prerequisite: Karate experience.

Topic 3: Advanced Karate/Tae Kwon Do. Prerequisite: Competence for tournament play.

PED 105T. Judo.

Includes self-defense. Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Judo. No experience required.

Topic 2: Intermediate Judo. Prerequisite: Judo experience.

Topic 3: Advanced Judo. Prerequisite: Competence for tournament play.

PED 106C. Conditioning.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Swim Conditioning.

Topic 2: Cardiovascular and Weight Training.

Topic 3: Aerobic Walking.

Topic 4: Aerobics.

Topic 5: Body Works.

Topic 6: Circuit Aerobics.

Topic 7: Weight Training.

Topic 8: Running.

PED 107C. Archery.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Archery. Basic form.

Topic 2: Intermediate Archery. Bow mechanics and competition. Prerequisite: Archery experience.

Topic 3: Intermediate Field Archery. Prerequisite: Archery experience.

Topic 4: Advanced Archery. Tournament shooting and psychology of competition. Prerequisite: Intermediate-level archery skills or 225 FITA average.

PED 107D. Golf.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Golf.

Topic 2: Intermediate Golf. Prerequisite: One semester of beginning golf or an eighteen-hole scoring average of eighty to one hundred.

PED 107L. Gymnastics.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Tumbling and Trampoline.

Topic 2: Intermediate Tumbling and Trampoline. Prerequisite: Tumbling and trampoline experience.

Topic 3: Rhythmic Gymnastics. Combination of gymnastics and dance movements performed to music using the hand apparatus of balls, hoops, ribbons, or ropes.

Topic 4: Beginning Gymnastics I. Apparatus work in either men's or women's Olympic gymnastics events.

Topic 5: Beginning Gymnastics II. Apparatus work in either men's or women's Olympic gymnastics events. Prerequisite: Limited gymnastics experience.

Topic 6: Intermediate Gymnastics. Apparatus work in either men's or women's Olympic gymnastics events. Prerequisite: Gymnastics experience.

Topic 7: Intermediate Advanced Gymnastics. Apparatus work in either men's or women's Olympic gymnastics events. Intense activity. Prerequisite: Gymnastics experience.

Topic 8: Advanced Gymnastics. Apparatus work in either men's or women's Olympic gymnastics events. Intense activity. Prerequisite: Intermediate-level gymnastics experience.

PED 108C. Basketball.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Basketball. For those with little or no basketball experience.

Topic 2: Intermediate Basketball. For those with some skills in the game.

Topic 3: Advanced Basketball. For those with high skill and some competitive experience.

PED 108J. Power Volleyball.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Power Volleyball. For those with few or no volleyball skills.

Topic 2: Intermediate Power Volleyball. For those with good basic skills: bump, set, spike, serve.

Topic 3: Advanced Power Volleyball. For those with high skills and knowledge of multiple offenses.

PED 108S. Softball.

Three laboratory hours a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Beginning Softball. For those with few softball skills.

Topic 2: Intermediate Softball. For those with experience and good basic skills.

Upper-Division Courses Science

Science: SCI

Lower-Division Courses

Upper-Division Courses

SCI 360. Seminar on Recent Advances in Science.

Recent advances in the life, earth/space, and physical sciences. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For certified teachers, a bachelor's degree or consent of instructor; for others, six semester hours of coursework in science, in the biological sciences, in one of the physical sciences, or in one of the earth/space sciences, or consent of instructor.

Topic 1: Life Science.

Topic 2: Earth Science.

Topic 3: Physical Science.

Topic 4: Physics by Inquiry.

Special Education

Special Education: SED

Lower-Division Courses

Upper-Division Courses

SED 332. Field Experiences in Special Education.

Observation and participation in a variety of educational settings that serve children with disabilities. Two lecture hours and two four-hour sessions of fieldwork a week for one semester. Fieldwork sessions must be arranged between 8:00 AM and noon. Required for all undergraduate students seeking special education certification.

SED 337. Intercultural Communication and Collaboration.

Basic principles of interpersonal and intergroup communication in culturally and linguistically diverse educational settings. Designed to help students understand the relationship between culture, language, and disability using a variety of formats, including discussion, dialogue, journals, simulations, case studies, and field-based assignments. Three lecture hours a week for one semester. Required for undergraduate students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 360, 660, 960. Apprenticeship: Research to Practice.

Supervised practicum in special education classroom teaching, conducted in cooperating schools, as part of the teacher preparation program. Consists of teaching, analysis, and evaluation. Two lecture hours and at least fifteen, thirty, or forty-five hours of fieldwork a week for one semester. Required for undergraduate students seeking special education certification. Offered on the pass/fail basis only. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 366. Behavior Management for the Exceptional Learner.

Behavior management procedures used in a variety of educational environments with a wide range of learners. Emphasis on instructional procedures, behavior and program evaluation, and principles of applied behavior analysis. Instructional management, classroom management, functional assessment of behavior, procedures for increasing successful school behavior while decreasing undesirable behavior, social skills instruction, and crisis management. Three lecture hours and two one-hour field placement sessions a week for one semester. Required for students seeking special education certification. Prerequisite: Applied Learning and Development 322 and consent of the undergraduate adviser.

SED 667. Student Teaching in Special Education.

Directed and closely supervised performance in the full range of duties of a teacher, conducted in cooperating schools; accompanying directed study and seminars. Required in the professional development sequence for elementary school teacher candidates also seeking special education certification. Forty hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Completion of the twenty-four hours of coursework required for the special education academic specialization; consent of the undergraduate adviser; and admission to the professional development sequence of courses. Admission by application only, filed in the Office of Student Field Experiences by March 1 for fall semester registration and by October 1 for spring semester registration.

SED 372. Assessment of Individuals with Mild to Moderate Disabilities.

Assessment and high-stakes testing policies, procedures, and practices in special education; curriculum-based measurement used to monitor academic outcomes for students with disabilities; and principles and procedures used to reduce misidentification of individuals from culturally and linguistically diverse backgrounds and with limited English proficiency. Assessment data and individualized education plan development is also covered. Three lecture hours a week for one semester. Required for students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 675. Instructional Methods in Special Education.

Procedures and practice in the instruction of students with mild or moderate exceptionalities. Emphasis on adaptations within the regular classroom and methods specific to exceptionalities. Three lecture hours a week for one semester, and six hours a week in an internship. Required for students seeking special education certification. Prerequisite: Applied Learning and Development 322, Special Education 376, and consent of the undergraduate adviser.

SED 375C. Teaching Individuals with Mild to Moderate Disabilities.

Instructional practices associated with improved outcomes for students with mild to moderate disabilities receiving services in general and special education classrooms, including an emphasis on teaching reading in content areas, such as mathematics, science, and social studies. Three lecture hours and sixteen to twenty internship hours a week for one semester. Required for students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 376. Foundations and Issues in Special Education.

Key issues affecting decision-making and practices by special education teachers, assessment personnel, and administrators related to the treatment and education of students with disabilities. Three lecture hours a week for one semester. Required for students seeking special education certification.

SED 377. Transition and the Exceptional Learner.

An overview of the transitions within the life span, particularly the transition to postsecondary school settings for individuals with disabilities. Designed to help students develop the ability to infuse transition-related topics into curricula, assess transition needs, develop transition plans, and become knowledgeable about existing vocational and community services. Three lecture hours a week for one semester, with fieldwork to be arranged. Required for students seeking special education certification. Prerequisite: Applied Learning and Development 322 and consent of the undergraduate adviser.

SED 378D. Assessment Practices in Autism and Developmental Disabilities.

Assessment practices for developing and evaluating educational programs for individuals with autism and developmental disabilities. Considers the theoretical orientations that underlie the major assessment strategies, including standardized, behavioral, and informal practices. Three lecture hours and three hours of fieldwork a week for one semester. Required for students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 378E. Advanced Early Childhood Intervention.

Designed to assist students in acquiring in-depth knowledge of early childhood intervention, particularly related to services within the state of

Texas, including an understanding of the legal policies related to serving young children with disabilities and their families. Three lecture hours and eight hours of fieldwork a week for one semester. Required for students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 378R. Reading Assessment and Development with Diverse Populations.

The knowledge and skills associated with assessing, instructing, and monitoring the progress of students who experience mild to moderate difficulties with reading, as well as students with dyslexia. The emphasis is on reading, spelling, and writing for kindergarten through grade five. Three lecture hours and four hours of fieldwork a week for one semester. Required for students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 378S. Teaching Individuals with Autism and Developmental Disabilities.

Assessment and instructional strategies for educating students with autism and other developmental and physical disabilities. Focuses on implementation and evaluation of instructional procedures for teaching a range of adaptive behaviors, such as self-care, and communication, social, and community living skills. Three lecture hours and eight hours of fieldwork a week for one semester. Required for students seeking special education certification. Prerequisite: Admission to the teacher preparation program and consent of the Office of Student Field Experiences.

SED 378T. Topics in Special Education.

Three lecture hours and three and one-half hours of fieldwork a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: Language-Minority Students in Special Education.

Prerequisite: Applied Learning and Development 322.

SED 379. Seminar in Special Education.

Specialized study in an identified area of interest in education of the exceptional child. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Applied Learning and Development 322 and consent of the undergraduate adviser.

Cockrell School of Engineering

Sharon L. Wood, *PhD, PE, Dean*

Gerald E. Speitel Jr., *PhD, PE, Associate Dean for Academic Affairs*

John C. Halton III, *MA, Associate Dean for School and Alumni Relations*

John G. Ekerdt, *PhD, PE, Associate Dean for Research*

Patricia A. Gore, *MEd, Assistant Dean for Student Affairs*

Wesley G. Queen, *BBA, Assistant Dean for Business Affairs*

<http://www.engr.utexas.edu/>

General Information

Mission

The mission of the Cockrell School of Engineering is to achieve excellence in undergraduate and graduate education, research, and public service. The school strives to provide an educational experience that inspires students to reach for the highest levels of intellectual attainment and personal growth throughout their lives, to provide a scholarly and professional environment that enables students and faculty members to make lasting contributions to the advancement of knowledge and the creative practice of engineering, to engage in service that enhances the public's understanding of technology and facilitates the use of technology for the betterment of society, and to lead the nation in providing equality of opportunity for engineering education.

Engineering education affords individuals the opportunity to prepare themselves for life in an era when human well-being depends more than ever before on the ability to apply technology for the benefit of society. It has become clear that in producing the goods and services demanded by an expanding population, we must consider the effects of technology on the environment. Solution of many of the problems faced by society today will involve a high level of technology.

Engineers are involved with all the devices and systems made by and for people—buildings and factories, transportation and communication systems, equipment for generating and distributing electrical energy, computers and electronic devices; indeed, all of the manufactured products we see around us. Engineers of diverse backgrounds working together and with other professionals have produced heart pumps, surgical lasers, robotics for manufacturing and construction, polymers, safer and more efficient nuclear reactors, advances in space research and in environmental protection, safe and attractive bridges, satellites and telecommunication systems, and small but powerful computers. Just as much of the technology being applied today has been developed within the past ten years, the solution of tomorrow's problems will require the development of new technology through engineering research.

In addition to its traditional function of giving men and women the opportunity to prepare for careers as professional engineers, the Cockrell School of Engineering also has a second function: providing the opportunity to acquire a technical background to students who plan to continue their education in areas such as business, public affairs, law, medicine, and scientific disciplines related to engineering. The engineering faculty willingly accepts its obligation to enhance cooperation between engineers and others working to improve the quality of life.

The school is organized into academic departments that offer a variety of degrees. Although there are distinct differences among the degree programs, they have much in common; all are based on a foundation of mathematics, natural sciences, and basic engineering subjects. Following the development of an adequate foundation during the first two years, an engineering student begins concentrated study in a particular area.

During the senior year the student delves into practical engineering problems, developing skills in defining a problem, translating available information into equations that can be analyzed logically, creating additional information when necessary, and choosing a course of action that has a reasonable chance of producing the desired results.

The school seeks to give students the knowledge necessary to take advantage of opportunities in a number of areas. The engineer who begins a professional career immediately following graduation usually will find opportunity for a variety of responsible positions in industry and government. The first assignments usually are of a technical nature. Later, one may choose to become a technical specialist or to move into positions involving administration and management. Either choice can lead to a rewarding professional career.

Many engineering graduates elect to continue their education. Studies by the American Society for Engineering Education indicate that nearly 50 percent of all engineering graduates eventually earn a master's degree. Most do their graduate work in engineering, either in a professional program where advanced design techniques are emphasized or in a graduate school where the emphasis is on research. Others elect to enroll in graduate programs in other disciplines. The flexibility to accommodate a broad spectrum of educational objectives has been incorporated into the degree structure of the Cockrell School of Engineering through technical area options and electives that permit students to define programs of study that best suit their needs.

History

The Department of Engineering was established in 1884, an outgrowth of work in applied mathematics first offered in the Department of Literature, Science, and Arts. About 1920, the department became a college; in 2007, the college was renamed the Cockrell School of Engineering in honor of Ernest Cockrell Jr., an alumnus and benefactor of the University. The first degree in engineering, a Bachelor of Science with a major in civil engineering, was conferred in 1888. Civil engineering degrees have been conferred since 1894 and electrical engineering degrees since 1896.

Degrees in architecture were conferred in the College of Engineering from 1909 through 1951, when the School of Architecture became an autonomous division of the University. Degrees in chemical engineering have been conferred since 1916; degrees in mechanical engineering since 1919; degrees in architectural engineering since 1928; degrees in petroleum engineering since 1931; degrees in aeronautical engineering from 1943 to 1959 and in aerospace engineering since 1960; degrees in ceramic engineering from 1948 to 1961; degrees in meteorology from 1951 to 1963; degrees in geosystems engineering and hydrogeology, offered jointly with the College of Natural Sciences, since 1996; and undergraduate degrees in biomedical engineering beginning in 2002. A degree in engineering science was offered from 1960 until 1988.

Facilities

The Cockrell School occupies six buildings on the central campus, with a total of 927,000 square feet for classrooms, laboratories, and offices. The Nuclear Engineering Teaching Laboratory and a substantial number of other engineering research laboratory facilities are housed at the J. J. Pickle Research Campus, about six miles north of the central campus.

Research Organizations

Faculty members and students of the Cockrell School of Engineering may participate in a wide variety of research projects conducted under the Bureau of Engineering Research. The bureau and its component research units are supported by federal, state, and industrial research contracts and grants that provide part-time employment for selected undergraduate and graduate students and for some faculty members.

More than six hundred individual research projects are usually underway at any one time. In addition to providing students with experience in research methodology, these research projects enable faculty members to keep abreast of developments in their principal areas of interest.

Research units currently operating within the Bureau of Engineering Research are the Center for Aeromechanics Research; Center for Energy and Environmental Resources; Center for Energy Security; Center for Mechanics of Solids, Structures, and Materials; Center for Petroleum and Geosystems Engineering; Center for Research in Water Resources; Center for Space Research; Center for Transportation Research; Construction Industry Institute; Phil M. Ferguson Structural Engineering Laboratory; Microelectronics Research Center; Nanomanufacturing Systems for Mobile Computing and Mobile Energy Technologies Center; and the Wireless Networking and Communications Group.

The Nuclear Engineering Teaching Laboratory is an academic unit of the Cockrell School. Interdisciplinary research units operated cooperatively by the school and other colleges are the Energy Institute; Texas Materials Institute; the Center for Construction Industry Studies; the Center for Perceptual Systems; and the Institute for Computational Engineering and Sciences. Research organizations are located both on the main campus and at the J. J. Pickle Research Campus.

Libraries

University libraries include Perry-Castañeda Library (social sciences and humanities), Mallet Chemistry Library, Kuehne Physics Math Astronomy Library, Life Science Library, and Walter Geology Library. The units together make up one of the largest academic libraries in the United States, with more than six million volumes covering almost all fields of academic and scientific research.

The Richard W. McKinney Engineering Library, a branch of the University Libraries located on the sixth floor of the Perry-Castañeda Library (PCL), supports teaching and research in all fields offered by the school. Extensive facilities are available for electronic retrieval of technical literature at <http://www.lib.utexas.edu/>. Special resources, such as the online Ask a Librarian, access to selected industry standards, several information tutorials, and US patent and trademark searching are available at <http://www.lib.utexas.edu/engin/>.

All units of the University Libraries offer reference services, circulation and reserve, access to electronic information, and interlibrary loan services. Reserve materials (such as textbooks) are available at the Kuehne Physics-Mathematics-Astronomy Library (PMA) in Robert Lee Moore Hall (RLM).

Engineering Development Office

In 1955, the University of Texas System Board of Regents authorized establishment of the Engineering Foundation Advisory Council (renamed the Engineering Advisory Board in 2007) to promote academic excellence in engineering education. Since then, with the board's leadership, the Cockrell School of Engineering has received generous support from individuals and corporations to develop programs of excellence. This philanthropy supports academic and leadership programs for students, scholarships for undergraduate students, fellowships for graduate students, facility development, and faculty support in the forms of endowed chairs and professorships, fellowships, and innovations in teaching and research. The Cockrell School's development staff encourages gifts to the school through its Friends of Alec annual giving program, the establishment of endowments, estate planning, and the fostering of long-lasting relationships with alumni, friends, and corporate partners.

Financial Assistance through the School Engineering Scholarship Program

The Engineering Scholarship Program recognizes students in the Cockrell School of Engineering with scholarship awards based primarily on merit and leadership. To be considered for engineering scholarships, future students should complete the scholarship section of the University's ApplyTexas admission application by December 1, marking engineering as their first-choice major.

Current engineering students should complete their online engineering scholarship application by March 1 each year to be considered for scholarship awards from the Cockrell School and from their department for the following year. Additional information, including current scholarship listings, awardee instructions and links to external scholarship resources is available at <http://www.engr.utexas.edu/undergraduate/scholarships>.

Student Services

Engineering Student Services and Advising

Engineering Student Services and Advising (ESSA) serves the University and the public by helping to recruit, retain, and graduate engineering students. The office aims to accomplish this mission by providing personal and responsive guidance and support throughout each student's University experience. The staff strives to provide a foundation for students to develop successful lives, careers, and long-term relationships with the Cockrell School of Engineering and the University of Texas at Austin.

The Assistant Dean for Students and the academic advisers represent the dean in all student matters. Academic advisers strive to build a strong foundation for academic and professional success for all engineering students, through personalized and responsive guidance throughout the four-year college experience. In addition, the ESSA helps students, staff, and faculty navigate the policies and procedures of the Cockrell School and the University. Students may seek assistance in person in the Engineering Student Services Building (ESS), by phone at (512) 471-4321, or by e-mail to student-affairs@engr.utexas.edu. The Engineering Student Services and Advising also provides information online at <http://www.engr.utexas.edu/undergraduate/services/>.

Advising

Academic Advising

There are several offices within the Cockrell School that work together to provide the engineering student with academic advising services. It is the engineering student's responsibility to be aware of these services and to take advantage of them. Faculty, departmental, and Engineering Student Services academic advisers are available throughout the year to discuss matters that affect the student's academic progress toward degree completion.

To facilitate movement through an academic program, each engineering student must be advised in his or her major department before registering for each semester or summer session. Each student should review his or her audit every semester through IDA, the University's Interactive Degree Audit system. The advising audit lists the courses remaining in the student's degree plan and the requirements the student has not yet fulfilled. It normally provides an accurate statement of requirements, but the student is responsible for knowing the exact requirements for the degree as stated in a catalog under which he or she is entitled to graduate.

Another advising tool for the student is the G4 Web-based application, which shows undergraduate students that they can complete a bachelor's degree in engineering from the University in four years. It provides a

visual representation of a student's degree plan, shows progress towards degree, and helps a student forecast the impact of course selection on time to graduation. Engineering students can access G4 online at <http://www.engr.utexas.edu/features/7583-g4-scheduling-for-graduation>.

Counseling and Referral Services

The Office of Student Affairs advises and counsels students about problems or concerns they have about their academic work or life in the school.

In addition, University counseling services are available from the Counseling and Mental Health Center, the Telephone Counseling Service, the Sanger Learning Center, and University Health Services. These offices are described in *General Information*.

Student Organizations and Programs

Engineering Student Life

Founded in 1999, Engineering Student Life (ESL) was the first leadership development office in an academic unit at the University of Texas at Austin. ESL programs provide various opportunities for engineering students to develop skills in leadership, teamwork, communications, and ethics outside the classroom, in addition to involving students in the Cockrell School community. Some of the programs include Gone to Engineering, Ramshorn Retreats, and the LeaderShape Institute. ESL is the Cockrell School's primary liaison to the over eighty-five engineering student organizations. Many organizations are student chapters of national professional engineering organizations.

More information about Engineering Student Life, its programs, and engineering student organizations is available in person in the Engineering Student Services Building, or online at <http://www.engr.utexas.edu/studentlife/>.

Equal Opportunity in Engineering Program

The Equal Opportunity in Engineering (EOE) Program invites students to become part of an exciting community that focuses on academic success and personal growth. EOE initiatives such as the Fall Kick-Off, First-Year Interest Groups (FIGs), and Engineering Peer Leaders help students establish a strong academic foundation and promote the formation of a peer support network. In addition, EOE provides students with access to tutoring, undergraduate research opportunities through the Texas Research Experience (TREX) program, and professional development workshops. In partnership with Pi Sigma Pi Minority Academic Engineering Society, the National Society of Black Engineers, and the Society of Hispanic Professional Engineers, the EOE Program builds a network that makes it easy to meet other engineering students, form study groups, and develop friendships that last well after graduation.

The Cockrell School established the EOE Program in 1970 to promote the recruitment and academic development of African American, Hispanic, and Native American students interested in pursuing careers in engineering. Since that time, EOE has expanded its goals and now seeks to increase the diversity of its student body by supporting students who come from historically underrepresented population groups in Texas or who have backgrounds or experiences that will contribute to the overall diversity of the Cockrell School of Engineering.

Additional information about the EOE Program is available in person on the first floor of the Bridgeway Building (BWY), online at <http://www.engr.utexas.edu/eoe/>; by phone at (512) 475-5953; and by e-mail to eoe@engr.utexas.edu.

Women in Engineering Program

The Women in Engineering Program (WEP) has a goal to increase the overall percentage of women enrolled in and graduating from the Cockrell School of Engineering. WEP connects students, educators, and professionals to the world of engineering through recruitment initiatives, supportive structures, and educational services to promote the success and advancement of women in engineering.

WEP's First-Year Initiative (FYI) provides academic and peer support to connect first-year students to the engineering community. The Women in their Second Year of Engineering (WISE) and Consider Every Option (CEO) programs and workshops provide career exploration opportunities to help second-year students and beyond discover possibilities and make informed decisions for the future. Graduates Linked with Undergraduates in Engineering (GLUE) gives students opportunities to gain practical research experience, and WEP leadership and career development seminars help prepare students for leadership roles in the engineering profession.

Additional information about WEP is available in person in Bridgeway Building (BWY) 109, online at <http://www.engr.utexas.edu/wep/>; by phone at (512) 471-5650; and by e-mail at wep@engr.utexas.edu.

Career Services

The Engineering Career Assistance Center (ECAC) assists engineering students preparing for a job search through counseling, workshops, and a comprehensive on-campus recruiting program. Students should register with ECAC beginning in August each academic year to receive full benefit of the center's services.

ECAC offers individual career counseling services to engineering students on a walk-in basis and by appointment. Topics addressed in individual counseling sessions and workshops include résumé and cover letters, interviews, dressing for success, site visits, evaluating salary offers, job search, and career exploration.

The center hosts interviews in its twenty interview rooms throughout the fall and spring recruiting seasons. Interviewers represent employers that seek graduating students, co-op students, and summer interns in all engineering disciplines.

Students can visit the ECAC Office in person in Ernest Cockrell Jr. Hall (ECJ) 3.256, online at <http://www.engr.utexas.edu/ecac/>, by e-mail at ecac@engr.utexas.edu, or by phone at (512) 471-1915.

Cooperative Engineering Education Program

The Cooperative Engineering Education (Co-op) Program is an academic program that allows undergraduate students to obtain full-time engineering experience before they graduate. Students gain work experience directly related to their field of engineering by alternating semesters of full-time campus study with training in industry.

To realize the full academic and professional value of the Co-op Program, students complete either two or three semesters with the same employer in a cooperative engineering position. Students receive two or three hours of letter-grade credit that may be applied toward the engineering degree. Students should apply for the Co-op Program at least one semester before planning to begin a co-op work term.

Students may apply for the first work term after completing twenty-eight semester hours of basic sequence coursework, which includes eight hours of physics, eight hours of calculus, and at least one course in the selected engineering major. Students must have an overall University grade point average (GPA) of at least 2.50, a GPA in the major area of study of at least 2.00, and at least twelve semester hours of degree-

applicable coursework left to complete after the final co-op term. Students may apply for the program after one semester at the University.

Students can visit the Co-op Program Web site at <http://www.engr.utexas.edu/ecac/coop/>, in person at Ernest Cockrell Jr. Hall (ECJ) 3.256, by e-mail to co-op@engr.utexas.edu, or by phone at (512) 471-5954.

UTeach Engineering

UTeachEngineering is an innovative program that prepares engineering students to teach mathematics, physical science, and engineering to students in grades eight through twelve. The program, a collaboration between the Cockrell School of Engineering, the College of Natural Sciences, the College of Education, and area school districts, seeks to attract interested students to explore teaching in conjunction with their undergraduate experience. Upon completing the program, students graduate with a bachelor's degree and are recommended for a secondary school teaching certificate. The UTeachEngineering program invites students to explore their interest in teaching as early as the freshman year.

Key features of the program include field experience, mentorship, seminar instruction, cohort support and innovative use of technology. UTeachEngineering students gain experience in public school classrooms as they teach progressively longer lessons under the guidance of a mentor teacher. By working with some of Texas's most respected secondary school teachers, students quickly learn whether they are suited for the teaching profession.

More information about UTeachEngineering is available online at <http://www.uteachengineering.org/>

Study Abroad

International Engineering Education has study abroad programs designed specifically for Longhorn Engineers so they can experience a culture first-hand without delaying graduation. Participants remain enrolled at the University while studying abroad and therefore apply their scholarships and financial aid loans to all necessary costs including tuition, travel, insurance and living expenses. All of the engineering courses are taught in English by University and/or local professors. Some of the programs also allow taking a language course and exploring innovation, entrepreneurship, and service.

Engineering is an increasingly international profession with a central role in the globalized marketplace. Industry leaders and government experts want engineers to immerse themselves in other cultures to learn to effectively collaborate with international peers on special projects, products, and solutions for the global challenges of the twenty-first century. Engineers lead the world in developing and managing high technology and find solutions that affect the quality of life, security, and world peace. The Cockrell School of Engineering, as all high-ranking engineering schools, leads in providing international education opportunities for its students.

A variety of programs are available for engineering majors and levels of expertise. Several short summer courses under the mentorship of outstanding University faculty are available to students beginning as early as the end of their first year. Students may study for short or long semester periods and may participate in more than one study abroad program during their time at the University.

The longer semester bilateral exchanges are notable for providing more advanced students with an excellent and affordable opportunity to distinguish themselves from their peers by taking semester courses at a carefully selected, prestigious international partner university.

Apart from traditional short or semester study abroad, International Engineering also offers programs that provide professional experience and research opportunities. Projects in Underserved Communities, a two-course fall and spring civil engineering and mechanical engineering course sequence focuses on project development and project management to prepare students for a summer implementation phase at a community abroad.

Global Research matches students with researchers at laboratories of select partner universities to collaborate and be mentored by research faculty. BE Global Engineering provides a customized professional experience inside an industry, laboratory, or small company while teaching intercultural communication skills and exposing students to the basics of another language.

All engineering students interested in going abroad are encouraged to meet with the International Engineering Education Office program coordinator, who can help them decide which program will best suit their needs. More information is available at <http://www.engr.utexas.edu/undergraduate/iee>.

Admission and Registration

Admission

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. All students who wish to major in engineering must be admitted to the University according to the procedures given in *General Information*.

Information is available from The University of Texas at Austin, Engineering Student Services and Advising, Cockrell School of Engineering, 2407 Speedway, C2108, Austin TX 78712. The telephone number is (512) 471-4321.

Students who have questions about the requirements of a specific degree plan should contact the appropriate departmental advising office. Additional information about academic advising can be found at <http://www.engr.utexas.edu/undergraduate/advising>.

Freshman Admission

Freshman applicants seeking admission to the Cockrell School must meet the calculus readiness requirement by the official admissions application deadline. More information about calculus readiness is available at <http://www.engr.utexas.edu/undergraduate/admission/calculus/>.

Applicants to the Cockrell School should use the online application at <http://www.applytexas.org/> and select engineering as a first-choice major. When selecting a second-choice major, freshman applicants may choose from one of the many other majors offered at the University, but are encouraged to choose a second engineering major when applying to the Cockrell School.

Transfer Admission

Internal Transfer

Internal transfer within the Cockrell School

An engineering student who wants to transfer to another major within the Cockrell School of Engineering must submit an application by the December 15 deadline for spring admission and the May 15 deadline for summer/fall admission. Students who are applying during their first semester enrolled must meet the following requirements to be eligible for consideration:

1. Completion of at least fourteen semester hours of coursework in residence.
2. Completion of Mathematics 408C, or a subsequent calculus course, taken in residence.
3. Completion of a second technical course in residence that counts toward the engineering degree. Technical courses include courses offered in math, physics, chemistry, biology, geology, or engineering.

Engineering students who are applying after completing at least one semester must meet the requirements listed in the internal transfer from another division of the University section below.

Internal transfer from another division of the University

A student may transfer to the Cockrell School of Engineering from another division of the University in accordance with the regulations given in *General Information*. All students must submit an internal transfer application by the May 15 deadline for summer/fall admission.

Internal transfer applicants must meet the following requirements to be eligible for consideration:

1. Completion of at least twenty-eight semester hours of coursework in residence at the University.
2. A cumulative in-residence grade point average of at least 3.00.
3. Completion of Mathematics 408D, Physics 303K, and 103M, or their equivalents.
4. Completion of a minimum of four technical courses in residence that count toward the engineering degree. Technical courses include courses offered in math, physics, chemistry, biology, geology, or engineering.

Additional information for all internal transfer applicants:

- Only currently enrolled students may apply.
- Students may apply during the semester they are completing the minimum requirements to be eligible for consideration.
- Application forms are available online at <http://www.engr.utexas.edu/undergraduate/admissions/changeofmajor>.
- Admission to all engineering majors is offered as space is available to the students who are best qualified. For equally qualified applicants, preference is given to the student who has completed more of the required technical courses for the requested major.

Some degree programs may have additional admission considerations; these are described in the individual degree plans.

External Transfer

External transfer applicants will be required to meet the following minimum criteria to be considered for admission to an engineering major:

- Transfer credit for Mathematics 408L, 408M, or 408D
- Transfer credit for Physics 303K and 103M
- Transfer credit for a minimum of four technical courses. Technical courses include courses offered math, physics, chemistry, biology, geology, computer science, or engineering.

Admission applications that are not complete by the March 1 deadline may be held to a higher admissions standard than those that are complete if enrollment limits are reached.

Guidelines for Transfer Students

1. Students who wish to transfer to the University from another college or university must apply to the Office of Admissions as described

in *General Information*. Requirements for admission as a transfer student vary, but all transfer applicants must submit transcripts of all college and high school coursework.

2. Only courses listed in the student's engineering degree program, or equivalent courses accepted by the department chair and approved by the dean, may be counted toward an engineering degree. A course may therefore be accepted for transfer credit but not be applicable toward an engineering degree.
3. Courses that are common to all degree programs in the Cockrell School are listed in Requirements Included in All Engineering Degree Plans (p. 158). These may be taken at any school offering courses acceptable for transfer to the University.
4. Completion of sequences of technical courses in the major area sometimes requires five or more semesters. Therefore, most transfer students should anticipate a minimum of five semesters or the equivalent in residence at the University.
5. Transfer students with more than forty semester hours of credit in an engineering or pre-engineering program may be eligible for admission to a major sequence as explained in the following section.

Admission to a Major Sequence

The major sequence in an engineering degree program is a set of courses in which the student learns to put to engineering use the concepts learned in the basic sequence. Major sequence courses are normally taken in the last two years of undergraduate study.

Students must apply online for admission to a major sequence. The following requirements apply both to students seeking to transfer to the school from another institution and to those currently enrolled at the University, either in another college or school or in a basic sequence of courses in the Cockrell School. Those in another college or school must also meet the requirements given in *General Information* for transfer from one division to another within the University.

1. Applications for admission to the major sequence are evaluated by the engineering departments each semester. The criteria for admission vary from semester to semester; current criteria are published at <http://www.engr.utexas.edu/undergraduate/policies/sequence/>.
2. To be eligible for admission to a major sequence, the applicant must have received credit from the University for the basic sequence of courses of the degree plan, either by completing the courses at the University or by receiving transfer credit for equivalent courses taken elsewhere. The student must not be on scholastic probation according to University regulations and must not be on engineering probation according to the regulations of the Cockrell School. For the basic sequence of courses in each degree plan, see the outline of the plan later in this section.
3. No engineering student may register for a course identified as a major sequence course in any of the degree plans of the Cockrell School unless the student has been admitted to the major sequence.
4. An applicant who has not previously been registered at the University must be admitted to the University as described in *General Information*. Admission to the University does not imply or guarantee admission to a major sequence in the Cockrell School. A student's application to the major sequence is considered only after the student has been admitted to the University.
5. Application for admission to a major sequence must be made online at <http://www.engr.utexas.edu/undergraduate/policies/sequence/>.
6. Priority deadlines for submitting completed applications for admission to a major sequence are October 1 for entrance in the following spring semester and March 1 for entrance in either the following summer session or the following fall semester.

7. A student who has been admitted to a major sequence but does not enroll, and who wishes to enter in a subsequent semester, must reapply for admission to a major sequence and must meet all requirements in place at the time of reapplication. A student who has been out of the University for at least one long-session semester must apply for readmission to the University.
8. Any student who has been denied admission to a major sequence will not be considered for admission for a subsequent semester unless reapplication is made.

Registration

General Information gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published online before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes.

To register for a course, a student must fulfill the prerequisite given in the catalog or course schedule. If the student has not fulfilled the prerequisite, he or she must obtain the approval of the department offering the course before registering for it.

Concurrent Enrollment

Concurrent enrollment refers to taking courses through The University of Texas at Austin Extension (UEX) program, or taking courses at another university or a community college. An engineering student must have the approval of the dean for concurrent enrollment. Application for this approval should be made online at <http://www.engr.utexas.edu/undergraduate/forms>. A student may not enroll concurrently in any course counted toward the degree in the semester he or she will be graduating. More information about the approval process is available in the Engineering Student Services and Advising Office (ESSA), located in the Engineering Student Services Building (ESS), by email at student-affairs@engr.utexas.edu; or by phone at (512) 471-4321.

Academic Policies and Procedures

Grade Point Average for Academic Decisions

In the Cockrell School of Engineering, the grade point average used in all academic decisions is the average of grades the student has earned in residence in courses applicable to the degree. Academic decisions are decisions about engineering probation, engineering dismissal, internal transfer (change of major), admission to the major sequence, admission to the Engineering Honors Program, designation as an Engineering Scholar, eligibility for graduation, and eligibility for graduation with University Honors.

Quantity of Work Rule

Maximum Number of Hours in the Long Session

As used in items 1 and 2 below, "coursework" includes correspondence courses, extension courses, distance education courses, nonrequired electives, physical activity courses, and courses for which the student is registered concurrently at another institution.

1. An engineering student may not register for more than seventeen semester hours of coursework without an approved application to

do so. Application is made online at <http://www.engr.utexas.edu/undergraduate/forms/>.

2. No student may register for more than twenty-one semester hours of coursework during any long-session semester.

Rules for the Summer Session

A student may not receive credit for more than fourteen semester hours during a twelve-week summer session or for more than eight semester hours in a six-week summer term. These limits apply whether the courses are taken at the University or another institution. For more information about the quantity of work allowed in the summer, see *General Information*.

Repetition of a Course

An undergraduate in the Cockrell School who has not earned admission into the major sequence may not enroll in any course required by the engineering degree plan more than twice. A symbol of Q or W counts as an enrollment unless it is recognized as nonacademic by the dean's office.

To request permission to enroll in a course for a third or more attempt a student must submit a written appeal at https://utdirect.utexas.edu/link2/appeal_entry.WBX. A student may receive departmental adviser approval to enroll in a course a third or more times only if the student has a substantiated nonacademic reason for not successfully completing the course in earlier attempts. Documentation may be required by the departmental adviser to support the substantiated nonacademic reason. If the student is denied approval to enroll in a required course, he or she will be placed in the undeclared major code and must consider other degree options.

A student who is denied approval to repeat a course in residence at the University will also be denied approval to complete the course by transfer, extension, correspondence, distance education, or credit by examination and then count it toward the degree.

A student in the Cockrell School may not repeat for a letter grade a course in which he or she has earned a grade of C- or better.

Attendance

Engineering students are expected to attend all meetings of the classes for which they are registered. Students who fail to attend class regularly are inviting scholastic difficulty. In some courses, instructors may have special attendance requirements; these should be made known to students during the first week of classes. With the approval of the dean, a student may be dropped from a course with a grade of F for repeated unexcused absences.

Portable Computing Devices

The degree programs in the following engineering fields have specific expectations regarding portable computing devices: Aerospace Engineering, Biomedical Engineering, Chemical Engineering, Electrical and Computer Engineering, and Mechanical Engineering. For more information, please see the catalog sections for these programs.

Academic Standards

In addition to the scholastic standards described in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/scholastic-probation-and-dismissal>), the Cockrell School imposes the following academic standards. Students who fail to meet the standards stated in *General Information* are placed on "scholastic

probation” by the University. The probationary status given to those who fail to meet the following school standards is “engineering probation.”

In cases with extenuating circumstances, the student may appeal to the dean for a waiver of any of the following requirements.

A student is placed on academic probation in engineering under the following circumstances:

- If his or her grade point average in courses in the major area of study taken in residence falls below 2.00. The “major area of study” includes all courses in the student’s discipline (biomedical, chemical, electrical, mechanical, or petroleum and geosystems engineering) and required under the student’s engineering degree plan. For architectural engineering and civil engineering majors, the major area includes all courses in both architectural engineering and civil engineering; for aerospace engineering majors, the major area includes all courses in both aerospace engineering and engineering mechanics; for geosystems engineering and hydrogeology majors, the major area includes all courses in both geological sciences and petroleum and geosystems engineering.
- If the student’s grade point average in required technical courses taken in residence falls below 2.00. “Required technical courses” are courses taken in the Cockrell School, the College of Natural Sciences, or the Jackson School of Geosciences and required under the student’s engineering degree plan; they include approved technical elective courses.

Courses required to overcome admission or prerequisite deficiencies are not considered in decisions on engineering probation.

Grades received at the University in all courses in the major area, including grades in courses that have been repeated, are included in computing the student’s grade point average.

A student on engineering probation will be removed from probation at the end of a long-session semester or summer session if the student is no longer subject to engineering probation under either of the criteria above.

After being placed on engineering probation, a student must be removed from probation within the next two long-session semesters in which he or she is registered. A student who fails to be removed from engineering probation within this time will be placed on engineering dismissal from the school.

A student seeking to reenter the school after having been scholastically dismissed from the University must enroll as an undeclared major unless there is a reasonable likelihood that the student can complete the degree plan under which he or she last registered. A student seeking to reenter the school after having been dismissed from engineering must enroll as an undeclared major. Students who are undeclared majors may not enroll in engineering courses.

Any student having academic difficulty should discuss his or her status with an academic adviser in the Engineering Student Services and Advising Office. Call (512) 471-4321 to set up an appointment with an academic adviser.

Pass/Fail Option

All courses required for all engineering degrees must be taken for a letter grade unless the course is offered only on the pass/fail basis. A student may elect to take courses that do not count toward the degree or are being taken to remove a deficiency on the pass/fail basis rather than for a letter grade. To elect the pass/fail system of grading:

1. The student must have received at least thirty hours of college credit before registering for any course on the pass/fail basis, unless the course is offered only on the pass/fail basis.
2. The student may take no more than two courses a semester on the pass/fail basis.
3. The student may take up to five one-semester courses, including correspondence courses, on the pass/fail basis.
4. The student must submit an application no later than the deadline given in the academic calendar at https://utdirect.utexas.edu/engine/pass_fail/index.WBX.

For information on how to receive credit by examination, see *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/center-for-teaching-and-learning/course-placement-and-credit-by-examination>).

Certificates

National Academy of Engineering Grand Challenges Scholars Program*

The National Academy of Engineering Grand Challenges Scholars Program (GCSP) certificate is designed to be complementary, not additive, to a student’s traditional academic path. The GCSP certificate provides students with the scholarship network and formal recognition from the National Academy of Engineering, while typically requiring only one course beyond their standard degree program.

The GCSP certificate program is designed to offer students from all majors and all years an introduction to the program through Engineering Studies 377, an array of university-wide course connections, and mentorship. GC Scholars choose between eighteen and twenty-four hours of approved coursework from a broad range of offerings that align with the five key program components. The five key curriculum components include facing the 21st Century Engineering Grand Challenges with (1) entrepreneurship and (2) service-learning by (3) understanding global dimensions through (4) research and (5) interdisciplinary curriculum. Each Scholar must choose at least one class that emphasizes each one of the components. Scholars will be advised on progress regularly by faculty affiliated with the program, and will present their work at an annual GCSP colloquium.

The certificate requirements are:

1. Complete Engineering Studies 377 Grand Challenges topic
2. At least eighteen hours of approved courses from GC Scholar Coursework Program Plan
3. Be a student of good standing
4. Complete courses, a research project, a community project, a comprehensive reflective report, and a final design, which are evaluated with aligned rubrics.

For more information, students should visit the GCSP Web site at: <http://gcsp.engr.utexas.edu/>.

Certificate in Computational Science and Engineering

The Cockrell School sponsors the transcript-recognized Certificate in Computational Science and Engineering (p. 14) along with the Jackson School of Geosciences, the College of Liberal Arts, and the College of Natural Sciences.

Honors

University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information*.

Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information*.

Cockrell School Honors Program

The Cockrell School of Engineering offers a select group of students the opportunity to participate in the Engineering Honors Program (EHP), a non-curriculum based program designed to enhance the undergraduate experience outside the classroom. Participants gain access to scholarships for first-year students, honors housing, faculty mentors and community building events hosted by the University Honors Center and the EHP.

When submitting an admission application to the University through ApplyTexas, incoming first-year students should mark engineering as their first-choice major and indicate their intent to apply for honors. Students will receive additional instructions to complete the EHP application separately. Both the admission application and the EHP application are due December 1.

The Cockrell School also sends current students invitations to apply for the EHP after they complete twenty-four hours in residence and rank in the top 10 percent of their class and major. Eligible students must have at least sixty hours remaining in their degree program in order to receive an invitation to apply.

To remain in the EHP, students must maintain an in-residence grade point average of at least 3.50. The grade point average is evaluated each year after grades for the spring and summer semester have been awarded.

An EHP student who completes an optional undergraduate honors thesis will receive special honors designation on his or her transcript and is recognized during the graduation ceremony. Additional information about the honors thesis and the EHP is available at <http://www.engr.utexas.edu/undergraduate/services/honors>.

Engineering Scholars

Engineering Scholars are designated each spring semester from the sophomore, junior, and senior classes. To be eligible, a student must be enrolled in the Cockrell School, must have completed at least twenty-four semester hours of coursework in residence while enrolled in the school, must have a grade point average that places him or her in the top 5 percent of the class, be of good character, and show promise of continued success in engineering. The grade point average used to determine the student's class rank includes only courses that the student has completed in residence and that are applicable to the degree.

Professional and Honor Societies

Professional student organizations play an important role in the life of an engineering student. Many of these are student branches of national professional engineering organizations that endeavor to advance the profession of engineering by education, service, professional

development, publication, and support of meetings, activities, and conferences. In addition to a variety of professional development and social activities, engineering student organizations frequently support projects that aid students and benefit the Cockrell School of Engineering, the University, and the community.

Honor societies are also an important part of the Cockrell School student community. Honor societies admit students who have established outstanding scholastic records and have demonstrated desirable character and leadership traits. The engineering honor societies are Beta Mu Epsilon (biomedical engineering); Chi Epsilon (civil engineering); Eta Kappa Nu (electrical and computer engineering); Omega Chi Epsilon (chemical engineering); Phi Alpha Epsilon (architectural engineering); Pi Epsilon Tau (petroleum and geosystems engineering); Pi Tau Sigma (mechanical engineering); and Sigma Gamma Tau (aerospace engineering); Tau Beta Pi selects top students from all engineering disciplines. Only students in the upper-fifth of the senior class or the upper-eighth of the junior class, and a few graduate students, qualify scholastically for Tau Beta Pi membership consideration. Generally, the chapter elects fewer members than the number of eligible students. Kappa Theta Epsilon is the cooperative engineering education honor society for all engineering majors. Students considered for membership must be enrolled in the cooperative engineering program and are in the top 20 percent of their class.

The Student Engineering Council is the governing body representing all undergraduate engineering students. Representatives to the council are elected by the professional student organizations and honor societies in the Cockrell School; members-at-large are elected annually. The Graduate Engineering Council is the governing body representing all graduate engineering students.

Engineering student organizations and honor societies are overseen by Engineering Student Life. A complete list of engineering societies is available at <http://www.engr.utexas.edu/studentlife/learn/>.

***Changes pending approval by the Texas Higher Education Coordinating Board**

Graduation

Special Requirements of the School

All University students must have a grade point average of at least 2.00 to graduate. Students in the Cockrell School must also have an in-residence grade point average of at least 2.00 in all courses applicable to the degree, the major area of study and required technical courses. "Major area of study" and "required technical courses" are defined in the section "Academic Standards."

A candidate for a degree in engineering must be registered in the Cockrell School either in residence or in absentia the semester or summer session the degree is to be awarded. No later than the date given in the official academic calendar, the candidate must complete an online application form for graduation or graduation in absentia at <http://www.engr.utexas.edu/graduation/application/apply>.

All individual degree programs must include at least forty-eight semester hours of engineering coursework.

Residence Rules

All University students must complete in residence at least sixty semester hours of the coursework counted toward the degree. In the Cockrell School, thirty of these sixty hours must be in the major field or in a field

closely related to the major as approved by the major department and the dean.

At least the last twenty-four hours of technical coursework counted toward an engineering degree must be taken while the student is registered as an undergraduate engineering major at the University. A student seeking an exception to this requirement must obtain written approval in advance from the dean. Information about the petition process is available in the Engineering Student Services and Advising Office, located in the Engineering Student Services Building (ESS).

Degree Audit

Each student should review his or her degree audit every semester through IDA (<http://catalog.utexas.edu/undergraduate/engineering/graduation/registrar.utexas.edu/students/degrees/ida>), the University's Interactive Degree Audit system. The degree audit normally provides an accurate statement of requirements, but the student is responsible for knowing the requirements for the degree as stated in a catalog under which he or she is eligible to graduate and for registering so as to fulfill these requirements; see the rules on graduation under a particular catalog. Since the student is responsible for correct registration toward completion of the degree program, he or she should seek an official ruling in the Engineering Student Services and Advising Office before registering if in doubt about any requirement. Avoidance of errors is the main purpose of the degree audit, but it remains the responsibility of the student to fulfill all catalog requirements.

Applying for Graduation

Students must apply for graduation the first semester they are eligible to graduate. Failure to do so will jeopardize the student's future registration in the Cockrell School. Any subsequent registration must be recommended by the undergraduate adviser and approved by the dean.

A student is considered eligible to graduate if he or she can complete all remaining course requirements by registering for twelve semester hours or fewer.

Any student who does not graduate when eligible must contact the Engineering Student Services and Advising Office, located in the Engineering Student Services Building (ESS) or by phone at (512) 471-4321. The degree auditor will advise the student what steps are needed for future registration and graduation.

Nonresidence Coursework

A student in his or her final semester may not enroll concurrently at another institution in any course, including a distance education course, to be counted toward the degree. In the final semester, the student may also not enroll by extension or correspondence in coursework to be counted toward the degree. All transfer, extension, and correspondence coursework must be added to the student's official record before his or her last semester.

Final Degree Audit

The student must complete all procedures associated with the final degree audit.

Any student who does not graduate when eligible must contact the Engineering Student Services and Advising Office in the Engineering Student Services Building (ESS). The degree auditor will advise the student what steps are needed for future registration and graduation.

Second Degrees

A student who completes a bachelor's degree in engineering may receive a second bachelor's degree in a second engineering discipline if the student (1) completes at least twenty-four hours of approved coursework beyond the work counted toward the first bachelor's degree; and (2) meets all the requirements of the second degree that he or she did not meet in completing the first degree. No student may receive two bachelor's degrees in the same discipline of engineering, even if the technical area options are different. For example, a student may receive the degree of Bachelor of Science in Chemical Engineering and that of Bachelor of Science in Mechanical Engineering but may not receive two Bachelor of Science in Chemical Engineering degrees. A student may not receive bachelor's degrees in both architectural engineering and civil engineering.

Commencement

In addition to the University commencement ceremony held each spring, the Cockrell School holds graduation ceremonies in December and May. August degree candidates who have completed a degree audit and online graduation application may participate in the May graduation ceremony. Information about graduation is available at <http://www.engr.utexas.edu/graduation>.

Registration as a Professional Engineer

The practice of engineering has a profound effect on public health, safety, and welfare. Therefore, the commitment to the public good through the licensing or registration provisions available in all states and many foreign countries is an important step in the professional development of an engineer. Becoming licensed in Texas as a professional engineer requires graduation from an approved curriculum in engineering, passage of the examination requirements, and a specific record of an additional four years or more of active practice in engineering work indicating that the applicant is competent to be placed in responsible charge of such work. Additional requirements include good character and reputation.

Engineering students are encouraged to take the Fundamentals of Engineering examination during their last long-session semester and to seek certification as an "engineer in training."

For additional information, contact the Texas Board of Professional Engineers or the equivalent agency in another state.

Degrees and Programs

To satisfy the course requirements for an engineering degree, a student must earn credit for all of the courses listed in the curriculum for that degree.

All University curricula leading to bachelor's degrees in engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700. ABET sets minimum standards for engineering education, defined in terms of curriculum content, the quality of the faculty, and the adequacy of facilities. Graduation from an accredited program is an advantage when applying for membership in a professional society or for registration as a professional engineer.

Dual Degree Programs

Engineering/Plan II Honors Program

A limited number of students whose high school class standing and admission test scores indicate strong academic potential and motivation may pursue a curriculum leading to both a bachelor's degree in

engineering and the Bachelor of Arts, Plan II. This dual degree option, offered jointly by the Cockrell School and the Plan II Honors Program of the College of Liberal Arts, provides the student with challenging liberal arts courses while he or she also pursues a professional degree in engineering. Admission to this program requires at least two separate applications: one to the University and one to the Plan II Honors Program. Students should contact both the Cockrell School Engineering Student Services and Advising Office, located in the Engineering Student Services Building (ESS), and the Plan II office, located in the Liberal Arts Building (CLA), for more information on applications and early deadlines.

Architectural Engineering/Architecture

A program that leads to both the Bachelor of Science in Architectural Engineering degree and the Bachelor of Architecture degree is available to qualified students. The program combines the course requirements of both degrees and requires six years for completion. Students who wish to pursue both degrees must apply for admission to the School of Architecture according to the procedures and deadlines established by the school. The program is described in Bachelor of Architecture/ Bachelor of Science in Architectural Engineering Dual Degree Program (p. 34); additional information is available from the undergraduate adviser for architectural engineering.

Simultaneous Majors

An engineering student may pursue two majors simultaneously. The student must follow all procedures and meet all requirements associated with both majors. An engineering student may not pursue two engineering majors simultaneously.

The simultaneous major option is available only to undergraduates who have completed thirty hours of coursework in residence at the University and who have been admitted to both degree programs.

Technical Area Options

Several engineering degree programs require a student to select a "technical area option" and to complete a specified number of courses in that area. Other degree programs do not require a student to specify a particular option but allow the student to choose courses either within an area of specialty or more broadly across technical areas. Although most options are designed to help the student develop greater competence in a particular aspect of the major, others permit the student to develop background knowledge in areas outside the major. In many cases, students who elect the latter options intend to continue their education in professional or graduate school; these options are particularly appropriate for students who plan to work in those interdisciplinary areas where the creation of new technology through research and development is very important.

Preparation for Professional School

Technical area options also allow the student to fulfill the special course requirements for admission to professional schools. For more information, students should consult an adviser who is familiar with the admission requirements of the professional program in which the student is interested.

Medical School

A properly constructed program in engineering provides excellent preparation for entering medical school. The engineer's strong background in mathematics and natural science--combined with a knowledge of such subjects as applied mechanics, fluid dynamics, heat transfer, thermodynamics, chemical kinetics, diffusion, and electricity and magnetism--enhance the mastery of many aspects of medical science. An engineering background is also useful to those who develop and use

new instruments for detecting and monitoring medical abnormalities. The engineering/premedical programs described in this catalog usually afford opportunities to pursue alternative vocations for those who do not enter medical school. Students who intend to apply for admission to a medical school should contact the University's Health Professions Office for information about admission requirements and application and test deadlines.

Dental School

Much of the information above about medical school applies also to dental school. All applicants must take the Dental Admission Test. Certain courses not taken by all engineers are also required, but these vary markedly from school to school. Students who are interested in dentistry can obtain specific information from the University's Health Professions Office.

Law School

Each year a few graduates, representing all engineering disciplines, elect to enter law school, where they find their training in careful and objective analysis is a distinct asset. Many of these students are preparing for careers in patent or corporate law that will enable them to draw on their combined knowledge of engineering and law. Others may not plan to use their engineering knowledge directly, but they still find that the discipline in logical reasoning acquired in an engineering education provides excellent preparation for the study of law. Students interested in admission to the law school of the University should consult the *Law School Catalog*.

Graduate Study in Business

Since many engineering graduates advance rapidly into positions of administrative responsibility, it is not surprising that they often elect to do graduate work in the area of business administration. In addition to an understanding of the technical aspects of manufacturing, the engineer has the facility with mathematics to master the quantitative methods of modern business administration.

Requirements for admission to the University's graduate business programs are outlined in the *Graduate Catalog*. Many engineering degree programs offer technical area options that include business and management courses. These can be used with advantage by students who plan to do graduate-level work in business.

The Minor

While a minor is not required as part of any engineering degree program, the student may choose to complete a minor in a field outside the Cockrell School. A student may complete only one minor. The minor consists of at least twelve semester hours in a single field, including at least six hours of upper-division coursework. Six of these hours must be completed in residence. A course to be counted toward the minor may not be taken on the pass/fail basis, unless the course is offered only on that basis. Only one course counted toward the standard requirements of the student's degree may also be counted toward the minor.

If the minor is in a foreign language other than that used to fulfill the basic education foreign language requirement, the twelve hours may be lower-division but must include at least six hours completed in residence and at least six hours beyond course 507 or the equivalent.

All minors must be approved by the student's major department faculty adviser and the Office of the Dean.

The Cockrell School allows the student to minor in any field outside the school in which the University offers a major. However, prerequisites and other enrollment restrictions may prevent the student from pursuing a minor in some fields. Before planning to use specific courses to make up

the minor, the student should consult the department that offers those courses.

ABET Criteria

To be accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), a degree plan of the Cockrell School must include the following:

1. One year of a combination of college level mathematics and basic sciences (some with experimental experience) appropriate to the discipline. Basic sciences are defined as biological, chemical, and physical sciences.
2. One and one-half years of engineering topics, consisting of engineering sciences and engineering design appropriate to the student's field of study. The engineering sciences have their roots in mathematics and basic sciences but carry knowledge further toward creative application. These studies provide a bridge between mathematics and basic sciences on the one hand and engineering practice on the other. Engineering design is the process of devising a system, component, or process to meet desired needs. It is a decision-making process (often iterative), in which the basic sciences, mathematics, and the engineering sciences are applied to convert resources optimally to meet these stated needs.
3. A general education component that complements the technical content of the curriculum and is consistent with the program and institution objectives.

Students must be prepared for engineering practice through a curriculum culminating in a major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

Here, one year is defined as either thirty-two semester hours (or equivalent), or one-fourth of the total credits required for graduation, whichever is lesser.

Liberal Education of Engineers

Each student must complete the University's core curriculum (p. 20). The core curriculum includes the first-year signature course and courses in English composition, American and Texas government, American history, mathematics, science and technology, visual and performing arts, humanities, and social and behavioral sciences. It must be an integral part of all engineering degree programs, so that engineering graduates will be aware of their social responsibilities and the effects of technology on society.

With the appropriate selection of courses, the University's core curriculum and ABET general education requirements can be satisfied simultaneously. Particular attention must be paid to course selection for the social and behavioral sciences and visual and performing arts requirements of the core curriculum, such that the courses selected also fulfill the ABET general education requirements. Guidance for courses that fulfill the ABET requirements is given below.

Social and Behavioral Sciences Requirement

As part of the University's core curriculum, each student must complete three semester hours of coursework in social and behavioral sciences. Engineering students should work with an academic adviser to select a social and behavioral sciences course that will fulfill the core curriculum requirement and the ABET criteria given above. Students preparing for the professional practice of engineering are encouraged to select coursework in economics to fulfill this requirement. Engineering students

should not choose courses in logic, cartography, or mapping, because these courses do not meet the ABET criteria given above.

Visual and Performing Arts Requirement

As part of the University's core curriculum, each student must complete three semester hours of coursework in visual and performing arts. Engineering students should work with an academic adviser to select a Visual and Performing Arts course that will fulfill the core curriculum requirement and the ABET criteria given above. Engineering students should not choose performance, studio, or ensemble courses to fulfill this requirement, because these courses do not meet the ABET criteria given above.

Architectural engineering majors must take an approved architectural history course as part of the Bachelor of Science in Architectural Engineering requirement. This course (or its prerequisite) will fulfill the visual and performing arts requirement of the core curriculum.

Foreign Language Requirement

In accordance with the University's basic education requirements, all students must demonstrate proficiency in a foreign language equivalent to that shown by completion of two semesters of college coursework. Credit earned at the college level to achieve the proficiency may not be counted toward a degree. For a student admitted to the University as a freshman, this requirement is fulfilled by completion of the two high school units in a single foreign language that are required for admission; students admitted with a deficiency in foreign language must remove that deficiency as specified in *General Information*.

Applicability of Certain Courses

Physical Activity Courses

Physical activity (PED) courses are offered by the Department of Kinesiology and Health Education. They may not be counted toward a degree in the Cockrell School. However, they are counted as courses for which the student is enrolled, and the grades are included in the University grade point average.

ROTC Courses

The dean, on the recommendation of the department chair, may substitute three semester hours of credit for air force science, military science, or naval science courses for three semester hours of elective coursework in an engineering degree program. The elective for which an ROTC course is substituted must be approved by the student's major department faculty adviser. All ROTC students should consult their undergraduate adviser. The total number of semester hours required for the degree remains unchanged. Substitution is permitted only upon the student's completion of the last two years of ROTC coursework and receipt at the University of a commission in the service.

Correspondence and Extension Courses

Credit that a University student in residence earns simultaneously by correspondence or extension from the University or elsewhere or in residence or through distance education at another school will not be counted toward a degree in the Cockrell School unless specifically approved in advance by the dean. Application for this approval should be made online or at the Engineering Student Services and Advising Office, located in the Engineering Student Services Building (ESS). No more than twenty semester hours required for any degree offered in the Cockrell School may be taken by correspondence and extension.

Requirements Included in All Engineering Degree Plans

Each student must complete the University's core curriculum (p. 20). In the process of fulfilling engineering degree requirements, students must also complete: one independent inquiry flag, one quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the United States flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag and at least one writing flag are carried by courses specifically required for each engineering degree plan. As applicable, students are advised to fulfill the second writing flag and global culture and cultural diversity requirements with a course that meets another requirement of the core curriculum, such as the first-year signature course. Students are encouraged to discuss options with his or her departmental academic adviser. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

In addition, students in all engineering degree plans must complete the following requirements. In some cases, a course that fulfills one of the following requirements may also be counted toward core curriculum or flag requirements; these courses are identified below.

Courses	Sem Hrs
Engineering Communication	
<ul style="list-style-type: none"> • Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T (This course may also be counted toward the writing flag requirement. This course may also be counted toward the ethics and leadership flag requirement, with the exception of Civil Engineering 333T.) 	3
Mathematics	
<ul style="list-style-type: none"> • Mathematics 408C, <i>Differential and Integral Calculus</i> (This course may also be used to fulfill the mathematics requirement of the core curriculum and the quantitative reasoning flag requirement.) 	4
<ul style="list-style-type: none"> • Mathematics 408D, <i>Sequences, Series, and Multivariable Calculus</i> 	4
<ul style="list-style-type: none"> • Mathematics 427K, <i>Advanced Calculus for Applications I</i> (This course may also be used to fulfill the quantitative reasoning flag requirement.) 	4
Physics	
<ul style="list-style-type: none"> • Physics 303K, <i>Engineering Physics I</i> (This course may also be counted toward the science and technology, part I, requirement of the core curriculum and the quantitative reasoning flag requirement.) 	3
<ul style="list-style-type: none"> • Physics 103M, <i>Laboratory for Physics 303K</i> 	1
<ul style="list-style-type: none"> • Physics 303L, <i>Engineering Physics II</i> (This course may also be counted toward the science and technology, part I, requirement of the core curriculum and the quantitative reasoning flag requirement.) 	3
<ul style="list-style-type: none"> • Physics 103N, <i>Laboratory for Physics 303L</i> 	1

Length of Degree Program

An eight-semester arrangement of courses leading to the bachelor's degree is given for each of the engineering degree plans. The exact order in which the courses are taken is not critical, as long as the prerequisite for each course is fulfilled. A student who registers for fewer than the

indicated number of hours each semester will need more than eight semesters to complete the degree. The student is responsible for including in each semester's work any courses that are prerequisite to those he or she will take the following semester.

The first three semesters of all curricula contain many of the same courses. This commonality gives students some freedom to change degree plans without undue loss of credit.

Bachelor of Science in Aerospace Engineering

The field of aerospace engineering developed because of humanity's desire for aircraft systems for military, commercial, and civilian purposes; it was first called aeronautical engineering or aeronautics. When the space age began, it was natural for aeronautical engineers to participate in the development of spacecraft systems for space exploration. This branch of engineering became known as astronautical engineering or astronautics, and the combined field is called aerospace engineering or aeronautics and astronautics. Because of the diverse nature of the work, the aerospace engineer must have a basic knowledge of physics, mathematics, digital computation, and the various disciplines of aerospace engineering: aerodynamics and propulsion, structural mechanics, flight mechanics and orbital mechanics, and control. Because of their extensive education in fundamental disciplines, aerospace engineers can work in areas other than aerospace engineering and are employed in a wide range of careers.

The objectives of the aerospace engineering degree program are to prepare students for professional practice in aerospace engineering and related engineering and scientific fields; to prepare students for such postbaccalaureate study as their aptitudes and professional goals may dictate; to instill in students a commitment to lifelong education and to ethical behavior throughout their professional careers; and to make students aware of the global and societal effects of technology. To meet these objectives, the faculty has designed a rigorous curriculum that emphasizes fundamentals in the basic sciences, mathematics, and the humanities, and integrates classroom and laboratory experiences in the engineering disciplines of aerodynamics and propulsion, structural mechanics, mechanics of materials, flight and orbital mechanics, controls, computation, measurements and instrumentation, design, and technical communication. The curriculum requires students to use modern engineering tools, to work individually, and to practice teamwork.

The first two years of the aerospace engineering curriculum emphasize fundamental material along with engineering sciences, while the third year introduces concepts in the areas of fluid mechanics, structural mechanics, system dynamics and control, and experimentation. The fourth year provides further depth in aerospace engineering, with emphasis on design and laboratory courses. After acceptance into the major sequence, usually during the junior year, the student elects to pursue one of two technical areas, atmospheric flight or space flight. Both area options are complemented by general education courses and courses offered in other engineering disciplines. In addition, the student may choose technical electives that increase the breadth of the program or that provide additional depth within one or more subdisciplines. All of the following subdisciplines are also represented in the required courses for both technical area options.

Aerodynamics and Propulsion

This subdiscipline embraces study in one of the more traditional areas of aerospace engineering. It involves fluid motion, propulsion, lift and drag on wings and other bodies, high-speed heating effects, and wind tunnel investigation of these problems. Topics of study include fluid mechanics,

gas dynamics, heat transfer, aerodynamics, propulsion, and experimental fluid mechanics.

Structural Mechanics

This subdiscipline includes the study of airplane, spacecraft, and missile structures, the materials that make them efficient, and methods for testing, analysis, and design of new structural systems. Course topics include structural analysis, structural dynamics, materials (including advanced composites), aeroelasticity, experimental structural mechanics, and computer-aided design of structures.

Flight Mechanics and Orbital Mechanics

Flight mechanics involves the analysis of the motion of aircraft, missiles, rockets, reentry vehicles, and spacecraft that are subjected to gravitational, propulsive, and aerodynamic forces; the study of uncontrolled motion of satellites and coasting spacecraft is usually referred to as orbital mechanics. Subject matter in these areas includes trajectory analysis and optimization; attitude dynamics, stability, and control; flight test; orbit determination; orbital operations; systems engineering; sensors; satellite hardware applications; and simulation.

Flight Control

Control theory is applied in aerospace engineering to the development of automatic flight control systems for aircraft (autopilots and stability augmentation systems), attitude control systems for satellites, and guidance and control systems for missiles, rockets, reentry vehicles, and spacecraft. Course topics include linear system theory, classical control theory, digital control, and probability theory.

Portable Computing Devices

Students entering aerospace engineering are required to have access to a portable computing device capable of running the software tools required for undergraduate engineering analyses (MatLab, Word, Excel, etc). This device does not need to be brought to campus on a daily basis, but individual courses may require that the device be brought to certain lectures, labs, and/or exams. Once admitted, students will be informed by the Aerospace Engineering and Engineering Mechanics Department office about specific device requirements.

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's Core Curriculum (p. 20). In some cases, a course that fulfills one of the following requirements may also be counted toward core curriculum or flag requirements; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the United States flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and both writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a

major sequence are given in Admission to a Major Sequence (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Courses used to fulfill technical elective requirements must be approved by the aerospace engineering faculty before the student enrolls in them.

The student must take all courses required for the degree on the letter-grade basis and must earn a grade of at least C- in each course, except for those listed as Remaining Core Curriculum Courses. He or she must also maintain grade point averages of at least 2.00 in the major area of study and in required technical courses as described in Academic Standards (p. 152), and a cumulative University grade point average of at least 2.00 as described in *General Information* (<http://registrar.utexas.edu/catalogs>).

Requirements		Hours
Basic Sequence Courses		
Aerospace Engineering		
ASE 301	Introduction to Computer Programming	3
ASE 211K	Engineering Computation	2
ASE 333T	Engineering Communication (writing flag and ethics and leadership flag)	3
Chemistry		
CH 301	Principles of Chemistry I (part II science and technology)	3
Engineering Mechanics

Visual and performing arts		3
UGS 302	First-Year Signature Course (some sections carry writing flag)	3
or UGS 303	First-Year Signature Course	
Total Hours		126

Technical Area Options

The technical area option allows the student to choose thirteen semester hours of technical area courses in either atmospheric flight or space flight. Each student should choose a technical area by the end of the first semester of the junior year and plan an academic program to meet the area requirements in the next three semesters. Many students choose technical electives that will strengthen their backgrounds in one specialty area, but this is not required. It should be noted that a student may choose the technical area courses in the other technical area as technical electives.

Area 1, Atmospheric Flight

Also called aeronautics, this area provides the student with a well-rounded program of study emphasizing the major disciplines of aerodynamics, propulsion, structures, design, performance, and control of aircraft. These subjects are treated at a fundamental level that lays a foundation for work in a broad variety of specialties in the aircraft industry. This option is intended for the undergraduate student whose primary interest is aircraft.

Aerospace Engineering 321K, *Computational Methods for Structural Analysis*

Aerospace Engineering 361K, *Aircraft Design I* (carries an independent inquiry flag)

Aerospace Engineering 361L, *Aircraft Design II* (carries a writing flag)

Aerospace Engineering 119L, *High-Speed Aerodynamics Laboratory*

Aerospace Engineering 364, *Applied Aerodynamics*

Area 2, Space Flight

Also called astronautics, this area offers a well-rounded program of study that provides a background in the traditional areas of fluid mechanics, materials, structures, propulsion, controls, and flight mechanics, while also giving the student a chance to learn about the space environment, attitude determination and control, orbital mechanics, mission design, and spacecraft systems engineering. These subjects are treated at a fundamental level that lays a foundation for work in a broad variety of specialties in space-related industries. This option is intended for the undergraduate student whose primary interest is space and spacecraft.

Aerospace Engineering 366L, *Applied Orbital Mechanics*

Aerospace Engineering 119M, *Spacecraft Systems Laboratory*

Aerospace Engineering 372K, *Attitude Dynamics*

Aerospace Engineering 374K, *Space Systems Engineering Design*

Aerospace Engineering 374L, *Spacecraft/Mission Design* (carries an independent inquiry flag and a writing flag)

Special Projects Laboratories

The department offers students the opportunity to participate in special projects such as student-built radio-controlled aircraft competitions and student satellite-building projects. These time-intensive projects are open to all aerospace engineering students with at least fifteen semester hours of University credit toward the degree and a grade point average of at least 2.50. Academic credit for participation in departmentally approved student projects is available on the pass/fail basis through the course Aerospace Engineering 128 (p. 158). Three such laboratory courses can be combined to count as one three-hour technical elective; one such laboratory course can be combined with a two-hour cooperative program to count as one three-hour technical elective.

Suggested Arrangement of Courses

Bachelor of Science in Architectural Engineering

An unprecedented growth in the building industry, already one of the largest industries in the nation, has created a pressing demand for

engineers with specialized training to plan and direct the activities of the industry. This need has been further intensified by the introduction of new materials, new structural systems, and new methods and management techniques. The curriculum in architectural engineering is designed to meet this demand. It offers training in the fundamentals of engineering, with specialization in structures, building energy and environments, or building construction and materials.

This curriculum affords the student the opportunity to attain competence in the structural design of buildings from high-rise to long-span structures and from commercial buildings to complex industrial facilities. Courses in environmental control systems permit graduates to integrate modern electrical, mechanical, and utility distribution systems with the structural and architectural elements of buildings. Courses in construction methods and project management offer the student an opportunity to obtain a versatile background suitable for all areas of the building industry.

The extensive technical requirements, coupled with courses in arts and sciences, provide the architectural engineering student with an opportunity to obtain a background that is ideally suited for careers and positions of responsibility with consulting engineers, general contractors, manufacturers, government agencies, and architecture firms. The curriculum also serves as an excellent springboard to graduate study in the areas of structural engineering, building energy and environments, construction engineering and project management, or construction materials.

Program Outcomes

Graduates of the architectural engineering program are expected to have

- An ability to apply knowledge of mathematics, science, and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand what impact engineering solutions have in global, economic, environmental, and societal contexts
- Recognition of the need for and an ability to engage in lifelong learning
- Knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Program Educational Objectives

Graduates of the architectural engineering program should solve architectural engineering problems within a greater societal context. They should:

- Act professionally and ethically
- Apply knowledge, strong reasoning, and quantitative skills to design and implement creative and sustainable solutions
- Engage in lifelong learning in order to meet the challenges facing the profession

- Exhibit strong communication, interpersonal, and resource-management skills as leaders in the architectural engineering profession

Dual Degree program in Architectural Engineering and Architecture

A program that leads to both the Bachelor of Science in Architectural Engineering degree and the Bachelor of Architecture degree is available to qualified students. The program combines the course requirements of both degrees and requires six years for completion. Students who wish to pursue both degrees must apply for admission to the School of Architecture according to the procedures and deadlines established by the school. The program is described in Bachelor of Architecture/ Bachelor of Science in Architectural Engineering Dual Degree Program (p. 34); additional information is available from the undergraduate adviser for architectural engineering.

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's Core Curriculum (p. 20). In some cases, a course required for the Bachelor of Science in Architectural Engineering may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the United States flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and one writing flag are carried by courses specifically required for the degree; these courses are identified below. Students are advised to fulfill the second writing flag requirement with a course that meets another requirement of the core curriculum, such as the first-year signature course. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission and Registration (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Requirements		Hours
Basic Sequence Courses		
Architectural Engineering

Technical Electives

Technical electives in architectural engineering are listed in three areas of specialization below. Nine semester hours must be chosen from the following approved technical elective courses or selected with the approval of the department undergraduate adviser. Lower-division courses may not be used as technical electives.

Area 1, Structures

Architectural Engineering 345K, *Masonry Engineering*
 Architectural Engineering 362L, *Structural Design in Wood*
 Civil Engineering 331, *Reinforced Concrete Design* or 335, *Elements of Steel Design*
 Civil Engineering 360K, *Foundation Engineering* (carries an independent inquiry flag)
 Civil Engineering 362M, *Advanced Reinforced Concrete Design* (carries an independent inquiry flag)
 Civil Engineering 362N, *Advanced Steel Design* (carries an independent inquiry flag)
 Civil Engineering 363, *Advanced Structural Analysis*
 Civil Engineering 375, *Earth Slopes and Retaining Structures*
 Engineering Mechanics 339, *Advanced Strength of Materials*

Area 2, Building Energy and Environments

Architectural Engineering 346P, *HVAC Design* or 370, *Design of Energy Efficient and Healthy Buildings*
 Architectural Engineering 371, *Energy Simulation in Building Design*
 Architectural Engineering 372, *Modeling of Air and Pollutant Flows in Buildings*
 Civil Engineering 341, *Introduction to Environmental Engineering*
 Mechanical Engineering 339, *Heat Transfer*
 Mechanical Engineering 374F, *Fire Science*
 Mechanical Engineering 374S, *Solar Energy Systems Design*
 Mechanical Engineering 379N, *Engineering Acoustics*

Area 3, Construction and Materials

Architectural Engineering 358, *Cost Estimating in Building Construction*
 Civil Engineering 351, *Concrete Materials*
 Mechanical Engineering 349, *Corrosion Engineering*
 Mechanical Engineering 378K, *Mechanical Behavior of Materials*
 Mechanical Engineering 378P, *Properties and Applications of Polymers*

Suggested Arrangement of Courses

First Year			
First Term	Hours	Second Term	Hours
ARE 102		1 Approved architectural history elective	3
CH 301		3 GEO 303	3
M 408C		4 M 408D	4
RHE 306		3 PHY 303K	3
UGS 302 or 303		3 PHY 103M	1
		Social and behavioral sciences	3
		14	17
Second Year			
First Term	Hours	Second Term	Hours
C E 311K		3 ARE 217	2
E M 306		3 C E 311S	3
M 427K		4 E M 319	3
PHY 303L		3 C E 319F	3
PHY 103N		1 M E 320	3
American history		3 American history	3
		17	17

Third Year

First Term	Hours	Second Term	Hours
ARE 320K	3	ARE 320L	3
C E 324P	3	ARE 335	3
C E 329	3	ARE 346N	3
ARE 323K	3	C E 331 or 335	3
E 316L, 316M, 316N, or 316P	3	C E 333T	3
	15		15

Fourth Year

First Term	Hours	Second Term	Hours
C E 357	3	ARE 465	4
ARE 346P or 370	3	ARE 366	3
Approved math/science elective	3	American government	3
Approved technical elective	3	Approved technical electives	6

Total credit hours: 126

Bachelor of Science in Biomedical Engineering

The mission of the Department of Biomedical Engineering is to develop clinically translatable solutions for human health by training the next generation of biomedical engineers, cultivating leaders, and nurturing the integration of science, engineering, and medicine in a discovery-centered environment. The main educational objective is to provide a thorough training in the fundamentals of engineering science, design, and biology. The curriculum is designed to provide concepts central to understanding living systems from the molecular and cellular levels to the tissue and organismal levels. The curriculum incorporates principles of vertical integration, leading to the choice of a technical area (biomedical imaging and instrumentation, cell and biomolecular engineering, computational biomedical engineering, or biomechanics), and culminates in a team capstone design experience. Students are expected to develop an understanding of industrial, research, and clinical biomedical engineering environments; an understanding of regulatory issues and biomedical ethics; the ability to create, identify, formulate, and solve biomedical engineering problems; the ability to design systems to meet needs in medical/life science applications; an understanding of life processes at the molecular, cellular, tissue, and organismal levels; the ability to use instrumentation and to make measurements and interpret data in living systems; and an appreciation of the interdisciplinary nature of biomedical engineering research.

Portable Computing Devices

Students entering biomedical engineering are required to have a laptop computer at their disposal. Laptops do not need to be brought to campus on a daily basis, but individual courses may require that a laptop be brought to certain lectures, labs, and/or exams. Minimum requirements for the laptop are listed on the department's website.

Program Outcomes

Graduates of the biomedical engineering program are expected to have:

- An ability to apply knowledge of mathematics, science, and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams

- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand what impact engineering solutions have in global, economic, environmental, and societal contexts
- A recognition of the need for and an ability to engage in lifelong learning
- A knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Program Educational Objectives

Achievement of the preceding program outcomes gives students the foundation for accomplishing the biomedical engineering program educational objectives. A few years after graduation, students are expected to be able to:

- Conduct themselves with exemplary professional ethics and highest integrity
- Demonstrate a quantitative, analytical, and systems approach to problem solving in their professional practice
- Demonstrate a continuous quest for professional excellence and success
- Participate in continuing education to expand their knowledge of contemporary professional issues
- Exhibit effective scientific, technical, communication, and resource management skills in their professional practice

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course that fulfills one of the following requirements may also be counted toward core curriculum or flag requirements; these courses are identified below.

To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in Degrees (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the United States flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and the two writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

The first three long semesters of the curriculum consist of basic sequence and supporting courses for all biomedical engineering students. Subsequent enrollment in major sequence courses starting the fourth semester, and one of four technical areas is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission and Registration (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Prior to registration, students must receive approval from the Biomedical Engineering Academic Advising Office for courses to be used to fulfill technical and nontechnical course requirements. The student must take all courses required for the degree on the letter-grade basis and must earn a grade of at least C- in each, except for those listed as Remaining Core Curriculum Courses.

Requirements

Basic Sequence Courses

Biology		
BIO 206L	Introductory Laboratory Experiments in Biology	2
BIO 311C	Introductory Biology I	3
Biomedical Engineering		
BME 203L	Introduction to Biomedical Engineering Design	2
BME 303	Introduction to Computing	3
BME 311	Network Analysis in Biomedical Engineering	3
BME 113L	Introduction to Numerical Methods in Biomedical Engineering	1
BME 214L	Computational Fundamentals of Biomedical Engineering Design	2
BME 333T	Engineering Communication (writing and an ethics and leadership flag)	3
Chemistry		
CH 301	Principles of Chemistry I	3
CH 302	Principles of Chemistry II	3
CH 204	Introduction to Chemical Practice	2
CH 320M	Organic Chemistry I	3
or CH 328M	Organic Chemistry I	
Mathematics		
M 408C	Differential and Integral Calculus (mathematics; quantitative reasoning flag)	4
M 408D	Sequences, Series, and Multivariable Calculus	4
M 427K	Advanced Calculus for Applications I (quantitative reasoning flag)	4
Physics		
PHY 303K	Engineering Physics I (part I science and technology; quantitative reasoning flag)	3
PHY 303L	Engineering Physics II (part I science and technology; quantitative reasoning flag)	3
PHY 103M	Laboratory for Physics 303K	1
PHY 103N	Laboratory for Physics 303L	1
Rhetoric and Writing		
RHE 306	Rhetoric and Writing (English composition)	3

Major Sequence Courses

Biomedical Engineering		
BME 335	Engineering Probability and Statistics	3
BME 343	Biomedical Engineering Signal and Systems Analysis	3
BME 344	Biomechanics	3
BME 245L	Experimental Principles of Biomedical Engineering Design (writing flag)	2
BME 349	Biomedical Instrumentation	3
BME 352	Engineering Biomaterials	3
BME 353	Transport Phenomena in Living Systems	3
BME 355	Molecular Engineering	3
BME 261L	Development and Analysis in Biomedical Engineering Design	2
BME 365R	Quantitative Engineering Physiology I	3

BME 365S	Quantitative Engineering Physiology II	3
BME 370	Biomedical Engineering Capstone Design I (writing flag)	3
BME 371	Biomedical Engineering Capstone Design II (independent inquiry flag)	3
Approved technical area electives		12

Hours Other Required Courses

CH 128K	Organic Chemistry Laboratory	1
CH 353	Physical Chemistry I	3
or CH 353M	Physical Chemistry I for Life Sciences	
BCH 369	Fundamentals of Biochemistry	3

Remaining Core Curriculum Courses

E 316L	British Literature (humanities)	3
or E 316M	American Literature	
or E 316N	World Literature	
or E 316P	Masterworks of Literature	
American and Texas government		6
American history		6
Social and behavioral sciences		3
Visual and performing arts		3
UGS 302	First-Year Signature Course (some sections carry a writing flag)	3
or UGS 303	First-Year Signature Course	

Minimum Required 133

Technical Area Options

The technical area option allows the student to build on the biomedical engineering core curriculum by choosing twelve semester hours of technical area coursework in biomedical imaging and instrumentation, cell and biomolecular engineering, computational biomedical engineering, or biomechanics. Within some technical areas, career emphases are available for students to focus coursework toward a particular career track. Students have flexibility to take technical elective coursework from more than one career emphasis under the same technical area. Each student should choose a technical area by the end of the sophomore year and plan an academic program to meet the area requirements during the next two years.

Preparation for health professions. Students who plan to attend medical, veterinary, or dental school in Texas must complete coursework in addition to that required for the BS in Biomedical Engineering in order to meet professional school admission requirements; those who plan to attend schools outside Texas may need additional coursework. The student is responsible for knowing and meeting these additional requirements, but assistance and information are available from full-time pre-health professions coaches and part-time peer mentors in the Health Professions Office in the College of Natural Sciences, PAI 5.03. Additional information about preparation for health professions is available online at <http://cns.utexas.edu/careers/health-professions/>.

Preparation for law. There is no sequential arrangement of courses prescribed for a pre-law program. The Association of American Law Schools puts special emphasis on comprehension and expression in words, critical understanding of the human institutions and values with which the law deals, and analytical power in thinking. Courses relevant to these objectives deal with communication of ideas, logic, mathematics, social sciences, history, philosophy, and the physical sciences. Services for pre-law students are provided to students in all colleges by the Center for Strategic Advising & Career Counseling, JES A115 and to engineering

students by the Engineering Career Assistance Center (ECAC) in ECJ 2.400. Additional information about preparation for law is available online.

Plan II Honors Program. Students enrolled in the Plan II Honors Program are encouraged to contact the Biomedical Engineering Academic Advising Office, in addition to the Plan II Office to ensure that requirements for both programs are met. Plan II courses may count toward biomedical engineering program requirements.

Certificate programs. Biomedical engineering students may enrich their education through the following certificate programs.

Business Foundations Program. Students who wish to learn about fundamental business concepts and practices may take supplemental coursework that leads to the Business Foundations Certificate, awarded by the Red McCombs School of Business. The program is described in Degrees and Programs (p. 48) of the McCombs School. More information about the Business Foundations Program is available at <http://new.mcombs.utexas.edu/bba/business-foundations> and from the McCombs School.

Elements of Computing. Students who wish to learn about computer science may take the coursework that leads to the certificate in the Elements of Computing, awarded by the Department of Computer Science. The program is described in Degrees (p. 540) of the College of Natural Science. More information about the Elements of Computing Program is available at <https://www.cs.utexas.edu/undergraduate-program/academics/elements-computing>, and from the Department of Computer Science.

Technical Area 1, Biomedical Imaging and Instrumentation

This technical area is designed for students interested in the general area of medical imaging science and instrumentation design. Two career emphases are available in this area: biomedical imaging and biomedical instrumentation.

Career Emphasis A: Biomedical Imaging

The main objective of this emphasis is to prepare students for a career in biomedical imaging. A solid foundation, practical knowledge, and skills are established in optics, imaging modalities, and image and signal processing.

While students are required to select twelve hours from any of the Technical Area 1 electives, the following are recommended for the biomedical imaging career emphasis:

Biomedical Engineering 347, *Fundamentals of Biomedical Optics*
Biomedical Engineering 357, *Biomedical Imaging Modalities*
Electrical Engineering 347, *Modern Optics*
Electrical Engineering 351M, *Digital Signal Processing*
Electrical Engineering 371R, *Digital Image and Video Processing*
An approved upper-division biomedical engineering, electrical engineering, or physics course

Career Emphasis B: Biomedical Instrumentation

The main objective of this emphasis is to prepare students to design and use biomedical instrumentation for imaging, diagnostic, and therapeutic applications. A solid foundation, practical knowledge, and skills are established in analog and digital network analysis, software and hardware programming, electronic circuits, sensors, data acquisition systems, image and signal processing, and computational analysis of data as it applies to living systems.

While students are required to select twelve hours from any of the Technical Area 1 course options, the following are recommended for the biomedical instrumentation career emphasis:

Biomedical Engineering 374K, *Biomedical Instrument Design*
Biomedical Engineering 374L, *Applications of Biomedical Engineering Laboratory*
Electrical Engineering 312, *Software Design and Implementation I*
Electrical Engineering 319K, *Introduction to Embedded Systems*
Electrical Engineering 438, *Fundamentals of Electronic Circuits I Laboratory*
Electrical Engineering 445L, *Embedded Systems Design Laboratory*
Electrical Engineering 445M, *Embedded and Real-Time Systems Laboratory*
Electrical Engineering 445S, *Real-Time Digital Signal Processing Laboratory*
Electrical Engineering 351M, *Digital Signal Processing*

Technical Area 2, Cellular and Biomolecular Engineering

The major objective of this area is to teach students how to integrate knowledge in cell and molecular biology with engineering analysis, so that they can address problems in molecular-based medicine. Two career emphases are available in this area: biomaterials/regenerative medicine and nanotechnology.

Career Emphasis A: Biomaterials/Regenerative Medicine

The objective of this emphasis is to prepare students for a career in biomaterials and regenerative medicine engineering. This emphasis includes solid foundation in cell and tissue engineering, biomaterials, and pharmacology. While students are required to select twelve hours from any of the Technical Area 2 course options, the following are recommended for the biomaterials/regenerative medicine career emphasis:

Biology 320, *Cell Biology*
Biology 325, *Genetics*
Biology 326M, *Introductory Medical Microbiology and Immunology*
Biomedical Engineering 339, *Biochemical Engineering*
Biomedical Engineering 376, *Cell Engineering*
Biomedical Engineering 379, *Tissue Engineering*
An approved topic of Chemical Engineering 379, *Topics in Chemical Engineering*
Chemistry 320N, *Organic Chemistry II* and 220C, *Organic Chemistry Laboratory*; or 328N, *Organic Chemistry II* and 128L, *Organic Chemistry Laboratory*
Pharmacy 338, *Introduction to Pharmacology*
An approved upper-division biomedical engineering, chemical engineering or mechanical engineering course

Career Emphasis B: Nanotechnology

The objective of this emphasis is to prepare students for a career in nanotechnology. This emphasis includes solid foundation in nanodevices and sensors, biological physics, and nanocomposites. While students are required to select twelve hours from any of the Technical Area 2 course options, the following are recommended for the nanotechnology career emphasis:

Biomedical Engineering 346, *Computational Biomolecular Engineering*
Biomedical Engineering 354, *Molecular Sensors and Nanodevices for Biomedical Engineering Applications*
Chemical Engineering 322, *Thermodynamics*
Chemical Engineering 339P, *Introduction to Biological Physics*

An approved topic of Chemical Engineering 379, *Topics in Chemical Engineering*

Chemistry 320N, *Organic Chemistry II* and 220C, *Organic Chemistry Laboratory*; or 328N, *Organic Chemistry II* and 128L, *Organic Chemistry Laboratory*

An approved topic of Mechanical Engineering 379M, *Topics in Mechanical Engineering*

An approved upper-division biomedical engineering, chemical engineering or mechanical engineering course

Technical Area 3, Computational Biomedical Engineering

The objective of this area is to provide students with the knowledge and skills that will enable them to design and use computational algorithms to address problems in biomedical research and health care. Examples include (a) designing medical decision aids using statistical and machine learning models, (b) dynamic modeling and computer simulation to study the biomechanics and control of movement, (c) development of thermodynamic models of dynamic processes at the microscopic and macroscopic scales in biological systems, and (d) image processing techniques for quantitative measurement and interpretation of biomedical images.

Students must select twelve hours from the following:

Biomedical Engineering 345, *Graphics and Visualization Laboratory*
 Biomedical Engineering 346, *Computational Biomolecular Engineering*
 Biomedical Engineering 348, *Modeling of Biomedical Engineering Systems*
 Biomedical Engineering 358, *Medical Decision Making*
 Electrical Engineering 312, *Software Design and Implementation I*
 Electrical Engineering 319K, *Introduction to Embedded Systems*
 Electrical Engineering 422C, *Software Design and Implementation II*
 Electrical Engineering 360C, *Algorithms*
 Electrical Engineering 371R, *Digital Image and Video Processing*
 Mathematics 325K, *Discrete Mathematics*
 Mathematics 340L, *Matrices and Matrix Calculations*
 A computer science course from an approved list

Technical Area 4, Biomechanics

The major objective of this area is to provide students with knowledge of the structure and function of biological systems by means of the methods of mechanics. Students will learn skills to apply engineering principles to understand how living systems function at all scales of organization and to translate this understanding to the design of devices and procedures that will improve diagnostic and therapeutic methods in health care.

Students must select twelve hours from the following:

Biomedical Engineering 342, *Biomechanics of Human Movement*
 Biomedical Engineering 359, *Cellular and Molecular Biomechanics*
 Biomedical Engineering 362, *Introduction to Nonlinear Dynamics in Biological Systems*
 Chemical Engineering 339P, *Introduction to Biological Physics*
 Kinesiology 326K, *Kinesiology: Biomechanical Analysis of Movement*
 Mechanical Engineering 324, *Dynamics*
 Mechanical Engineering 326, *Thermodynamics*
 Mechanical Engineering 344, *Dynamic Systems and Controls* and 144L, *Dynamic Systems and Controls Laboratory*
 Mechanical Engineering 354, *Introduction to Biomechanical Engineering*
 Mechanical Engineering 372J, *Robotics and Automation*
 An approved upper-division biomedical engineering or mechanical engineering course

Bachelor of Science in Chemical Engineering

Chemical engineering is one of the most broadly based engineering disciplines. Its field of practice covers the development, design, and control of processes and products that involve molecular change, both chemical and biological, and the operation of such processes. Because many of the products that sustain and improve life are produced by carefully designed and controlled molecular changes, the chemical engineer serves in a wide variety of industries. These industries range from chemical and energy companies to producers of all types of consumer and specialty products, pharmaceuticals, textiles, polymers, advanced materials, and solid-state and biomedical devices.

Careers are available in industry, government, consulting, and education. Areas of professional work include research and development, operations, technical service, product development, process and plant design, market analysis and development, process control, and pollution abatement.

The objective of the chemical engineering degree program is to prepare students for professional practice in chemically related careers after the bachelor's degree or an advanced degree. Chemical engineering

graduates are expected to apply fundamentals of science and engineering to solve problems of analysis and design of components, systems, and processes important in chemical engineering practice and research; demonstrate interpersonal skills required to lead and/or participate effectively in interdisciplinary projects; recognize the importance of lifelong learning in meeting professional and personal goals so they can be successful in their chosen profession, including graduate school; exhibit effectiveness in communication skills; and articulate and practice professional, ethical, environmental, and societal responsibilities, and value different global and cultural perspectives. To meet the program objective, the faculty has designed a rigorous, demanding, and state-of-the-art curriculum that integrates lectures and laboratory experience in basic science, mathematics, engineering science, engineering design, and the liberal arts.

Portable Computing Devices

Students entering chemical engineering are required to have a laptop computer at their disposal. Laptops do not need to be brought to campus on a daily basis, but individual courses may require that a laptop be brought to certain lectures, labs, and/or exams. Minimum requirements for the laptop are listed on the department's Web site (<http://www.che.utexas.edu/current-students/undergraduate-students/undergraduate-office/laptop-requirements>).

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition each student must complete the University's core curriculum (p. 20). In some cases a course required for the Bachelor of Science in Chemical Engineering may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in Liberal Education for Engineers (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one course with a quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the United States flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and one writing flag are carried by courses specifically required for the degree; these courses are identified below. Students are advised to fulfill the second writing flag requirement with a course that meets another requirement of the core curriculum, such as the first-year signature course. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission and Registration (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Requirements

Basic Sequence Courses

	Hours
Chemical Engineering	
CHE 210 Introduction to Computing	2
CHE 317 Introduction to Chemical Engineering Analysis	3
CHE 353 Transport Phenomena	3
Chemistry	

CH 302	Principles of Chemistry II (part II science and technology; quantitative reasoning flag)	3
CH 204	Introduction to Chemical Practice (quantitative reasoning flag)	2
CH 128K	Organic Chemistry Laboratory	1
CH 328M	Organic Chemistry I	3
CH 353	Physical Chemistry I (quantitative reasoning flag)	3
Mathematics		
M 408C	Differential and Integral Calculus (mathematics; quantitative reasoning flag)	4
M 408D	Sequences, Series, and Multivariable Calculus	4
M 427K	Advanced Calculus for Applications I (quantitative reasoning flag)	4
Physics		
PHY 303K	Engineering Physics I (part I science and technology; quantitative reasoning flag)	3
PHY 303L	Engineering Physics II (part I science and technology; quantitative reasoning flag)	3
PHY 103M	Laboratory for Physics 303K	1
PHY 103N	Laboratory for Physics 303L	1
Rhetoric and Writing		
RHE 306	Rhetoric and Writing (English composition)	3
Major Sequence Courses		
Chemical Engineering		
CHE 322	Thermodynamics	3
CHE 333T	Engineering Communication (writing flag and ethics and leadership flag)	3
CHE 348	Numerical Methods in Chemical Engineering and Problem Solving	3
CHE 350	Chemical Engineering Materials	3
CHE 253K	Applied Statistics	2
CHE 253M	Measurement, Control, and Data Analysis Laboratory	2
CHE 354	Transport Processes	3
CHE 360	Process Control	3
CHE 363	Separation Processes and Mass Transfer	3
CHE 264	Chemical Engineering Process and Projects Laboratory (writing flag)	2
CHE 372	Chemical Reactor Analysis and Design	3
CHE 473K	Process Design and Operations (independent inquiry flag)	4
Approved technical focus area electives in chemical engineering		
Approved technical focus area electives		
Other Required Courses		
BIO 311C	Introductory Biology I	3
CH 128L	Organic Chemistry Laboratory	1
CH 328N	Organic Chemistry II	3
CH 153K	Physical Chemistry Laboratory (writing flag)	1
Chemistry elective with a laboratory experience chosen from		
CH 431	Inorganic Chemistry	
CH 354 & CH 154K	Quantum Chemistry and Spectroscopy and Physical Chemistry Laboratory	
CH 354L & CH 154K	Physical Chemistry II and Physical Chemistry Laboratory	
CH 455	Fundamentals of Analytical Chemistry	
BCH 369 & CHE 179	Fundamentals of Biochemistry and Topics in Chemical Engineering	

CH 354 & CHE 179	Quantum Chemistry and Spectroscopy and Topics in Chemical Engineering	
Approved advanced mathematics, physics, chemistry or biology elective		3
Remaining Core Curriculum Courses		
E 316L or E 316M or E 316N or E 316P	British Literature (humanities) American Literature World Literature Masterworks of Literature	3

Honors Program

Chemical engineering students who maintain a grade point average of at least 3.50 may take the honors research course, Chemical Engineering 679H. In this course the student performs research over two consecutive semesters under the supervision of a faculty member, makes two oral presentations, and writes a thesis. Chemical Engineering 679H may be used to fulfill either the approved area electives requirement or the approved area electives in chemical engineering requirement.

Technical Focus Areas

Because of the broad training in natural sciences and engineering received by the chemical engineer, opportunities are provided for students also to develop particular talents and interests in one or two areas of emphasis. Each student must complete twelve semester hours in one of the following areas or six semester hours in each of two areas, including at least two chemical engineering courses. The technical focus area courses should be selected in consultation with a faculty adviser and must be approved by the department chair. The courses listed in each area do not constitute a complete list of technical focus area courses but illustrate the types of courses that are generally suitable for a given area. A list of suggested complementary biology, physics, mathematics, and chemistry electives for each of the technical focus areas is available from the Chemical Engineering Undergraduate Office and published on the departmental Web page.

Students with a grade point average of at least 3.50 who are interested in seeking an advanced degree in chemical engineering are encouraged to discuss their plans with the graduate adviser or another faculty member. These students are encouraged to take at least one advanced mathematics course among their electives. They should also inquire about undergraduate research positions in the department.

For all areas, Chemical Engineering 325L and 377K may be counted as chemical engineering electives only with the approval of the student's undergraduate faculty adviser. Chemical Engineering 377K may be counted only once toward the degree.

Area 1, Process Systems and Product Engineering

The chemical process industry is one of the most advanced in the applications of modern design and control techniques and computer technology. Competence in design, economics, fault detection, optimization, control, and simulation is essential in this industry. Chemical

engineers are also frequently involved in the development of new consumer and specialty products, an assignment that requires not only technical skills but also an understanding of the principles of successful marketing and quality control. Chemical engineering courses in this technical focus area cover topics such as optimization and statistical quality control, while courses in mechanical engineering and electrical engineering deal with both theory and applications in statistics, computer control, economic analysis, and operations research.

 Marketing 320F, *Foundations of Marketing*
 International Business 378, *International Business Operations*
 Marketing 460, *Information and Analysis* (carries a quantitative reasoning flag)
 Upper-division mathematics course

Area 2, Materials Engineering

Advances in technology and improvements in our quality of life are linked to the development, processing, and manufacture of engineering materials. Materials span the spectrum from "hard" to "soft" materials and include metals, ceramics, semiconductors, and polymers; all are prepared in carefully controlled chemical processes. These materials are used technologically in objects such as catalysts, fuel cells, microelectronic devices, membranes, solar cells, and high-performance plastics. With advancements in analytical probes and modeling, our understanding of materials has become increasingly more molecular and the traditional boundaries between disciplines have faded to the extent that this is a truly interdisciplinary area. Chemical engineers can assume a creative role in this area when provided with the appropriate fundamentals and applications background.

 Mechanical Engineering 378S, *Structural Ceramics*
 Physics 338K, *Electronic Techniques*
 Physics 355, *Modern Physics and Thermodynamics*
 Physics 375S, *Introductory Solid-State Physics*

Area 3, Environmental Engineering

Chemical engineers are uniquely qualified to contribute to the solution of environmental problems and to design processes and products that minimize environmental hazards. From pollution prevention by process optimization, to new understanding of chemical processes that occur in the environment, to new materials for advanced catalysts and carbon-free energy sources, chemical engineers are creating the “green” technologies needed to sustain the planet.

Mechanical Engineering 379M, *Topics in Mechanical Engineering*

Area 4, Biochemical, Biomolecular, and Biomedical Engineering

Track A: Cellular and Bioprocess Engineering

Chemical engineers are developing innovative solutions to practical problems in biotechnology and in the biochemical, pharmaceutical, and life science industries. This track is designed to prepare students for a career or research in the areas of applied cellular engineering and bioprocess engineering in the chemicals and pharmaceutical industry. Chemical engineering and elective courses are available that cover chemical engineering principles applied to biological systems and the fundamentals of biomolecular, cellular, and metabolic processes. This track is also suitable for students interested in biofuels.

Biology 325, *Genetics*
Biology 326R, *General Microbiology*
Chemical Engineering 339, *Introduction to Biochemical Engineering*
Chemical Engineering 339P, *Introduction to Biological Physics*
Biochemistry 369, *Fundamentals of Biochemistry*
Biochemistry 370, *Physical Methods of Biochemistry*

Track B: Biomedical Engineering

This track is designed to prepare students for careers in the biomedical and pharmaceutical industries that deal with medical systems or improvement of health treatment alternatives. This is also a natural track to be followed by students who plan to attend medical school. Chemical engineering courses and electives are available that cover the application of chemical engineering principles to the design of new medical and therapeutic devices, as well as to the understanding of physiological processes.

Mechanical Engineering 354, *Introduction to Biomechanical Engineering*

Area 5, Energy Technologies

The need for energy sustainability and new energy technologies provides some of the most significant scientific and engineering challenges that face society. Chemical engineers are uniquely qualified to address these issues and contribute new solutions to the problem. Technologies include solar energy utilization in the form of photovoltaics, biofuels and solar fuels; new and more efficient ways to extract fossil fuels from existing reservoirs; alternative power sources like wind, geothermal, and nuclear. Policy is also an important and active area that involves chemical engineers. Chemical engineering and other elective courses are available that teach fundamentals of energy technology and policy.

Electrical Engineering 339, *Solid-State Electronic Devices*
Mechanical Engineering 374S, *Solar Energy Systems Design*
Mechanical Engineering 379M, *Topics in Mechanical Engineering*
Petroleum and Geosystems Engineering 305, *Energy and the Environment*

Area 6, Engineering Economics and Business Leadership

Chemical engineers who understand the economic and policy issues faced by modern chemical and materials companies are needed to solve the challenges of modern industry. Globalization, sustainability, safety and modern labor practices, intellectual property protection, and the process of innovation are all issues facing modern industry. This focus area is designed to prepare students for business leadership in a technical arena.

¹ Optional; students who do not take this course will take fifteen hours of coursework in the fall semester of the first year.

Bachelor of Science in Civil Engineering

Engineering is the application of scientific principles and technical knowledge to real-world problems. Civil engineering is the segment of the engineering profession that strives to provide for the basic needs of humanity. The civil engineer is involved with the physical environment through the planning, design, construction, and operation of building and housing systems, transportation systems, and systems for the protection and use of air and water resources.

The civil engineering student has the opportunity to obtain a broad background in mathematics and the physical sciences and their applications to all areas of civil engineering. This flexible curriculum allows the student to elect eighteen semester hours of approved technical coursework to emphasize the areas of civil engineering of most interest to

the student. In addition, courses in the humanities and social sciences are included.

To excel as a civil engineer, a student should have an aptitude for mathematics and science, an interest in the practical application of technical knowledge to societal problems, the motivation to study and prepare for engineering practice, and the desire to be a professional. Civil engineering graduates of the University may seek a wide variety of positions in planning, design, and construction with government agencies, industry, and private consulting firms. Those who plan to pursue graduate work in engineering, or in other professions such as business, medicine, law, or journalism, have an excellent base on which to build.

Program Outcomes

Graduates of the civil engineering program should attain the following outcomes:

- An ability to apply knowledge of mathematics, science, and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand what impact engineering solutions have in global, economic, environmental, and societal contexts
- Recognition of the need for and an ability to engage in lifelong learning
- Knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Program Educational Objectives

Graduates of the civil engineering program should solve civil engineering problems within a greater societal context. They should:

- Act professionally and ethically
- Apply knowledge, strong reasoning, and quantitative skills to design and implement creative and sustainable solutions
- Engage in lifelong learning in order to meet the challenges facing the profession
- Exhibit strong communication, interpersonal, and resource-management skills as leaders in the civil engineering profession

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course required as part of the basic sequence may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the US flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag and one writing flag are carried by courses specifically required for the degree; these courses are identified below. Students are advised to fulfill the second writing flag requirement with a course that meets another requirement of the core curriculum, such as the first-year signature course. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission to a Major Sequence (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Level I and Level II Technical Electives

The civil engineering curriculum does not require the student to declare a specific technical area option. However, for the guidance of students with particular interests, level I electives in civil engineering are listed in areas of specialization. The fifteen semester hours of level I electives must be chosen from the following civil engineering and architectural engineering courses; in special cases, with the written permission of the department chair, this requirement may be relaxed, provided the student demonstrates in advance that the courses to be substituted for civil engineering or architectural engineering courses are part of a consistent educational plan. To provide a broad general background, at least one technical elective from each of three different areas of specialization must be included in each student's program.

Each student must take at least one technical area option level II elective. Level II electives may be substituted for technical area option level I electives, but the requirement of at least one technical elective from each of three different areas of specialization still applies.

The following lists reflect current course offerings and are subject to change by the faculty. Current lists are available in the departmental undergraduate office.

Level I Electives

Construction Engineering and Project Management
 Architectural Engineering 358, *Cost Estimating in Building Construction*
 Architectural Engineering 366, *Contracts, Liability, and Ethics* (carries an ethics and leadership flag)

Construction Materials
 Civil Engineering 351, *Concrete Materials*
 Civil Engineering 366K, *Design of Bituminous Mixtures*

Environmental Engineering
 Civil Engineering 342, *Water and Wastewater Treatment Engineering*
 Civil Engineering 346, *Solid Waste Engineering and Management*

Civil Engineering 369L, *Air Pollution Engineering*
 Civil Engineering 370K, *Environmental Sampling and Analysis*

Geotechnical Engineering

Civil Engineering 375, *Earth Slopes and Retaining Structures*

Structures

Architectural Engineering 345K, *Masonry Engineering*
 Architectural Engineering 362L, *Structural Design in Wood*
 Civil Engineering 331, *Reinforced Concrete Design*
 Civil Engineering 335, *Elements of Steel Design*
 Civil Engineering 363, *Advanced Structural Analysis*

Transportation

Civil Engineering 367P, *Pavement Design and Performance*
 Civil Engineering 367T, *Traffic Engineering*

Water Resources

Civil Engineering 358, *Introductory Ocean Engineering*
 Civil Engineering 374K, *Hydrology*
 Civil Engineering 374L, *Groundwater Hydraulics*

Level II Electives (Design)

Environmental Engineering

Civil Engineering 364, *Design of Wastewater and Water Treatment Facilities* (carries an independent inquiry flag)

Geotechnical Engineering

Civil Engineering 360K, *Foundation Engineering* (carries an independent inquiry flag)

Structures

Civil Engineering 362M, *Advanced Reinforced Concrete Design* (carries an independent inquiry flag)
 Civil Engineering 362N, *Advanced Steel Design* (carries an independent inquiry flag)

Transportation

Civil Engineering 367G, *Design and Evaluation of Ground-Based Transportation Systems* (carries an independent inquiry flag)

Water Resources

Civil Engineering 365K, *Hydraulic Engineering Design* (carries an independent inquiry flag)

Bachelor of Science in Electrical Engineering

Students seeking the Bachelor of Science in Electrical Engineering pursue one of two curricula—electrical engineering or computer engineering. Both curricula contain the fundamentals of electrical engineering and computer engineering; they differ in their technical core requirements in order to suit different career objectives.

The curricula in electrical engineering and computer engineering are designed to educate students in the fundamentals of engineering, which are built upon a foundation of mathematics, science, communication, and the liberal arts. Graduates should be equipped to advance their knowledge while contributing professionally to a rapidly changing technology. Areas in which electrical and computer engineers contribute significantly are: communications, signal processing, networks and systems, electronics and integrated circuits, energy systems and renewable energy, fields, waves and electromagnetic systems, nanoelectronics and nanotechnology, computer architecture and embedded systems, and software engineering and design. Typical career paths of graduates include design, development, management, consulting, teaching, and research. Many graduates seek further education in law, medicine, business, or engineering.

The core requirements of the Bachelor of Science in Electrical Engineering provide a foundation of engineering fundamentals. Students then build on the core requirements by choosing a primary and a secondary technical core area; students also choose two advanced laboratory courses. Once the primary technical core area is chosen, the student is assigned a faculty adviser with expertise in that area to help the student select technical core courses that are appropriate to his or her career and educational goals. The curriculum thus ensures breadth through the core courses and the choice of a technical elective; technical core area coursework provides additional depth.

Program Outcomes

Electrical and computer engineering graduates should demonstrate:

- An ability to apply knowledge of mathematics, science, and engineering

- An ability to design and conduct experiments, as well as analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand what impact engineering solutions have in global, economic, environmental, and societal contexts
- A recognition of the need for and an ability to engage in lifelong learning
- A knowledge of contemporary issues
- An ability to use techniques, skills, and modern engineering tools necessary for engineering practice

Program Educational Objectives

Within a few years of graduation, electrical and computer engineering graduates should:

- Contribute to the economic development of Texas and beyond through the ethical practice of electrical and computer engineering in industry and public service
- Exhibit leadership in technical or business activity through engineering ability, communication skills, and knowledge of contemporary and global issues
- Continue to educate themselves through professional study and personal research
- Be prepared for admission to, and to excel in, the best graduate programs in the world
- Design systems to collect, encode, store, transmit, and process energy and information, and to evaluate system performance, either individually or in teams
- Use their engineering ability and creative potential to create technology that will improve the quality of life in society

Portable Computing Devices

Students enrolled in a degree program in electrical and computer engineering will be expected to own a portable computing device capable of compiling and running a program suitable for use in the classroom and on the University wireless network. Use of these devices in the classroom and as a general part of the learning experience within our programs is at the discretion of faculty and not all classes or courses of instruction will require the use of these devices. Once admitted, students will be informed by the Electrical and Computer Engineering Department (ECE) office about specific device requirements.

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course required as part of the basic sequence may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one course with a quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the US flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and two writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*. More information about flags is given in Skills and Experiences Flags (p. 22).

Enrollment in major sequence courses is restricted to students who have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission to a Major Sequence (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Pre-approved courses are used to fulfill technical core, advanced math and/or science and core technical electives; other elective courses must be approved by the electrical and computer engineering faculty before the student enrolls in them.

Transfer Coursework: No more than twenty-five semester credit hours of transfer electrical engineering coursework may be counted for credit toward the electrical engineering degree.

Requirements		Hours
Basic Sequence Courses		
Mathematics		
M 408C & M 408D	Differential and Integral Calculus and Sequences, Series, and Multivariable Calculus (mathematics; quantitative reasoning flag)	8

Integrated BSEE/MSE program

The integrated degree program results in simultaneously awarding a Bachelor of Science in Electrical Engineering: Integrated Option (BSEE) degree, and a Master's of Science in Engineering (MSE) degree in any one of the ten graduate tracks offered by the graduate program in electrical and computer engineering (ECE).

There are two stages to admission, an informal non-binding department based stage and a second stage in which the student formally applies to the Graduate School within the integrated BSEE/MSE program and within one of the available ECE graduate tracks. At stage one, undergraduate students in the ECE department may apply to the integrated degree program after qualifying for admission to major sequence. The purpose of stage one is primarily to provide appropriate advising to students interested in and appropriate for the integrated program. Admission to the integrated program at stage one is based on the applicant's grade point average, letters of recommendation, a statement of purpose, and other relevant examples of academic ability and leadership. Students will be advised by the integrated program adviser about the appropriate courses to take and reserve for graduate credit in their senior year in order to complete the integrated program as efficiently as possible. As for admission to the regular standalone MSE program, all admissions decisions at stage two are made by the admissions committee in the respective graduate track, with admission requirements set by the graduate track, with the exception that Graduate Record Exam (GRE) test scores are not required of integrated program participants. While optimal, application and admission at stage one are not required for application and admission to the integrated program at stage two.

The integrated program requires 120 semester credit hours (SCH) for the BSEE portion of the integrated program, as opposed to the 125 SCH minimum required for the BSEE degree alone. Students in the integrated program begin taking graduate courses as seniors. Students admitted to the integrated program will normally take and reserve for graduate credit two graduate courses in place of approved electives from the primary and secondary technical cores that would *otherwise* be required in the regular/standalone BSEE program. However, precisely which BSEE electives are to be replaced by the graduate courses can be adjusted as approved by technical core faculty advisers.

Students in this program will receive the BSEE and MSE degrees simultaneously after successfully completing a minimum total of 150 semester credit hours, thirty of which must qualify for the MSE program of work in electrical and computer engineering. Students unable to successfully complete the integrated program may obtain a BSEE degree by satisfying all of the requirements for the standalone BSEE degree. Since the regular BSEE degree requirements are a subset of the Integrated BSEE/MSE Program degree requirements, an undergraduate student should still be on a trajectory to graduate with the regular BSEE degree in the same timeframe that the student was on when applying to the Integrated BSEE/MSE Program. A student dismissed from the integrated program while a graduate student should already meet the degree requirements for the regular BSEE degree.

Information regarding the integrated program requirements and policies may be obtained from the ECE advising offices.

Upper-Division Technical Core Areas

Both electrical engineering and computer engineering students must choose a primary and a secondary technical core area. Electrical engineering students must choose their primary technical core area from the electrical engineering technical core areas listed below; computer engineering students must choose their primary technical core area from the computer engineering core areas. For the secondary technical core area, students may choose any technical core area, including academic enrichment.

For all technical core areas, the student must complete all courses in the core area on the letter-grade basis. A course may not be counted toward more than one technical core area.

In cases where a single electrical engineering course appears on both the primary and secondary technical core area list, the student must replace the secondary technical core area course with an elective from the same secondary technical core area list or obtain approval from a faculty adviser for course substitution. In the case of a duplicate mathematics course, the student must choose an approved mathematics or science course to replace it.

Academic Enrichment Technical Core Area

A student may choose the academic enrichment technical core area, but only as his or her secondary technical core area. For this core area, the student selects a minimum of fourteen hours of elective coursework to support his or her personal or career goals, which must include an upper-division course in either mathematics or science. Before registering for these courses, the student must prepare a career plan statement and a list of relevant electives; this plan must be approved by the undergraduate adviser.

These electives may include traditional upper-division technical courses in electrical engineering and other engineering fields; courses in other fields at the University that satisfy degree requirements, such as business, economics, communication, music, and philosophy; or research done with a faculty member in Electrical Engineering 160, 260, 360, or 460,

Special Problems in Electrical and Computer Engineering. The courses must be completed in residence; courses in an approved study abroad program require the approval of the undergraduate adviser. A minimum of fourteen semester credit hours is required, which may include Electrical Engineering 155R, *Undergraduate Research Seminar* and 325L, *Cooperative Engineering*, or up to three hours in Electrical Engineering 125S, *Internship in Electrical and Computer Engineering*, but not both. Students selecting software engineering and design as their primary technical core and academic enrichment as their secondary technical core must also ensure that their program of work includes adequate hardware coursework. That is:

1. If the senior design project consists of software only, then the electives include at least two of the following: Electrical Engineering 316, Electrical Engineering 445L, Electrical Engineering 445M.
2. If the senior design project involves a significant hardware design component, then the electives must include at least one of the following: Electrical Engineering 316, Electrical Engineering 445L, Electrical Engineering 445M.

Electrical Engineering Technical Cores

Communications, Signal Processing, Networks, and Systems

Communications, signal processing, networks, and systems broadly encompasses the principles underlying the design and implementation of systems for information transmission. The field considers how information is represented, compressed, and transmitted on wired and wireless links and how communication networks can be, and are, designed and operated. A student who chooses this technical core area should recognize that communications and networking is a broad application domain where many engineering tools come into play: from circuit design for wireless phones to embedded network processors to system and application software for networked systems.

Students complete the following:

1. Electrical Engineering 325, *Electromagnetic Engineering*
2. Either Electrical Engineering 351M, *Digital Signal Processing* or Electrical Engineering 362K, *Introduction to Automatic Control*
3. Core laboratory course: Electrical Engineering 445S, *Real-Time Digital Signal Processing Laboratory*
4. Core mathematics course: Mathematics 427L, *Advanced Calculus for Applications II*
5. Four courses from the following list:
 Electrical Engineering 325K, *Antennas and Wireless Propagation*
 Electrical Engineering 351M, *Digital Signal Processing*
 Electrical Engineering 360C, *Algorithms*
 Electrical Engineering 360K, *Introduction to Digital Communications*
 Electrical Engineering 361M, *Introduction to Data Mining*
 Electrical Engineering 362K, *Introduction to Automatic Control*
 Electrical Engineering 363M, *Microwave and Radio Frequency Engineering*
 Electrical Engineering 370K, *Computer Control Systems*
 Electrical Engineering 370N, *Introduction to Robotics and Mechatronics*
 Electrical Engineering 471C, *Wireless Communications Laboratory*
 Electrical Engineering 371R, *Digital Image and Video Processing*
 Electrical Engineering 372N, *Telecommunication Networks*
 Mathematics 325K, *Discrete Mathematics*
 Mathematics 362M, *Introduction to Stochastic Processes* (carries a quantitative reasoning flag)
 Mathematics 365C, *Real Analysis I*

Electronics and Integrated Circuits

The electronics and integrated circuits technical core area involves the design and analysis of the circuits that provide the functionality of a system. The types of circuits that students encounter include analog and digital integrated circuits, radio frequency circuits, mixed signal (combination of analog and digital) circuits, power electronics, and biomedical electronics. The design and implementation of integrated circuits and systems using analog and digital building blocks are included in this core area. A student should choose this technical core area if he or she is interested in designing chips for applications, such as computing, telecommunications, and signal processing.

Students complete the following:

1. Electrical Engineering 325, *Electromagnetic Engineering*
2. Electrical Engineering 339, *Solid-State Electronic Devices*
3. Core laboratory course: Electrical Engineering 438, *Fundamentals of Electronic Circuits I Laboratory*
4. Core mathematics course: Mathematics 427L, *Advanced Calculus for Applications II*
5. Electrical Engineering 316, *Digital Logic Design*
6. Three courses from the following list:
 Electrical Engineering 321K, *Mixed Signal and Circuits Laboratory*
 Electrical Engineering 438K, *Analog Electronics*
 Electrical Engineering 338L, *Analog Integrated Circuit Design*
 Electrical Engineering 440, *Integrated Circuit Nanomanufacturing Techniques*
 Electrical Engineering 445L, *Embedded Systems Design Laboratory*
 Electrical Engineering 445S, *Real-Time Digital Signal Processing Laboratory*
 Electrical Engineering 460M, *Digital Systems Design Using HDL*
 Electrical Engineering 460N, *Computer Architecture*
 Electrical Engineering 460R, *Introduction to VLSI Design*
 Electrical Engineering 360S, *Digital Integrated Circuit Design*
 Electrical Engineering 361R, *Radio-Frequency Electronics*
 Electrical Engineering 363M, *Microwave and Radio Frequency Engineering*
 Electrical Engineering 374K, *Biomedical Electronic Instrument Design*
 Electrical Engineering 374L, *Applications of Biomedical Engineering*

Energy Systems and Renewable Energy

This technical core area provides the foundation for a career in electric power systems, generation, grid operation, motors and drives, and renewable energy sources. This core area involves the study and design of reliable and economic electric power systems, including both traditional and renewable resources. Energy conversion involves conversion to and from electrical energy, including the study and design of electrical machines.

Students complete the following:

1. Electrical Engineering 325, *Electromagnetic Engineering*
2. Electrical Engineering 368L, *Power Systems Apparatus and Laboratory* or Electrical Engineering 369, *Power Systems Engineering*
3. Core laboratory course: Electrical Engineering 462L, *Power Electronics Laboratory*
4. Core mathematics course: Mathematics 427L, *Advanced Calculus for Applications II*
5. Electrical Engineering 362K, *Introduction to Automatic Control*
6. Three courses from the following list:
 Electrical Engineering 339, *Solid-State Electronic Devices*
 Electrical Engineering 341, *Electric Drives and Machines*
 Electrical Engineering 362Q, *Power Quality and Harmonics*
 Electrical Engineering 362R, *Renewable Energy and Power Systems*

Electrical Engineering 362S, *Development of a Solar-Powered Vehicle*

Electrical Engineering 368L, *Power Systems Apparatus and Laboratory*

Electrical Engineering 369, *Power Systems Engineering*

Electrical Engineering 339S, *Solar Energy Conversion Devices*

Mechanical Engineering 337C, *Introduction to Nuclear Power Systems*

Fields, Waves, and Electromagnetic Systems

Students in this technical core area study different aspects of applied electromagnetics, including antennas, radio wave propagation, microwave and radio frequency circuits and transmission structures, optical components and lasers, and engineering acoustics. A student should choose the electromagnetic engineering core area if he or she is interested in engineering that involves the physical layer in modern communication and radar systems. Graduates are well positioned for jobs in antenna design and testing, propagation channel characterization, microwave and radio frequency circuit design, electromagnetic emission testing from electronic devices and systems, radar system design and development, optical telecommunication, optical information and signal processing systems, and component design and development.

Students complete the following:

1. Electrical Engineering 325, *Electromagnetic Engineering*
2. Electrical Engineering 339, *Solid-State Electronic Devices*
3. Core laboratory course: Electrical Engineering 438, *Fundamentals of Electronic Circuits I Laboratory* or Electrical Engineering 462L, *Power Electronics Laboratory*
4. Core mathematics course: Mathematics 427L, *Advanced Calculus for Applications II*
5. Either Electrical Engineering 325K, *Antennas and Wireless Propagation* or Electrical Engineering 363M, *Microwave and Radio Frequency Engineering*
6. Three courses from the following list:
Electrical Engineering 321K, *Mixed Signal and Circuits Laboratory*
Electrical Engineering 325K, *Antennas and Wireless Propagation*
Electrical Engineering 334K, *Quantum Theory of Engineering Electronic Materials*
Electrical Engineering 341, *Electric Drives and Machines*
Electrical Engineering 347, *Modern Optics*
Electrical Engineering 348, *Laser and Optical Engineering*
Electrical Engineering 361R, *Radio-Frequency Electronics*
Electrical Engineering 363M, *Microwave and Radio Frequency Engineering*
Electrical Engineering 363N, *Engineering Acoustics*
Electrical Engineering 369, *Power Systems Engineering*
Electrical Engineering 374K, *Biomedical Electronic Instrument Design*
Electrical Engineering 374L, *Applications of Biomedical Engineering*

Nanoelectronics and Nanotechnology

Students in this technical core area learn about the materials and devices used in modern electronic and optoelectronic systems. Through required and electives courses, students learn about the fundamentals of charge transport and interactions with light in semiconductors. They learn about devices beginning with diodes and transistors, the building blocks of integrated circuits, and extending to photodiodes, semiconductor lasers, photodetectors and photovoltaic devices. They learn about microelectronics fabrication techniques. And they are introduced to quantum mechanics, particularly as it applies to electronic and optoelectronic materials and devices. Students may also explore device applications through digital and analog circuit design. With exposure to the topics in this area, students are well positioned to work in a wide

variety of fields that rely on semiconductor devices, such as computers, telecommunications, the automotive industry, and consumer electronics.

Students complete the following:

1. Electrical Engineering 325, *Electromagnetic Engineering*
2. Electrical Engineering 339, *Solid-State Electronic Devices*
3. Core laboratory course: Electrical Engineering 440, *Integrated Circuit Nanomanufacturing Techniques*
4. Core mathematics course: Mathematics 427L, *Advanced Calculus for Applications II*
5. Four courses from the following list:
Electrical Engineering 334K, *Quantum Theory of Engineering Electronic Materials*
Electrical Engineering 438, *Fundamentals of Electronic Circuits I Laboratory*
Electrical Engineering 338L, *Analog Integrated Circuit Design*
Electrical Engineering 347, *Modern Optics*
Electrical Engineering 348, *Laser and Optical Engineering*
Electrical Engineering 360S, *Digital Integrated Circuit Design*
Electrical Engineering 339S, *Solar Energy Conversion Devices*
Electrical Engineering 438, *Fundamentals of Electronic Circuits I Laboratory*
Electrical Engineering 460R, *Introduction to VLSI Design*

Computer Engineering Technical Core Areas

Computer Architecture and Embedded Systems

Computer architecture involves understanding the operation and design of computers on many different levels. These levels include the instruction set, microarchitecture, and logic design. Embedded systems represent the combination of software and hardware that are designed to perform specific functions. These systems may be stand-alone items or an integral part of a larger system. Within this technical core area, students are exposed to logic design, programming, computer architecture, systems design, and digital signal processing. The student studying computer architecture will be well positioned to join the microprocessor design industry as a logic designer or a circuit designer. After a good deal of experience on the job, the student would be well positioned to become the chief architect of a new design.

Jobs in embedded systems involve defining, designing, and fabricating application-specific processors and computers in areas such as automotive electronics, consumer devices, and telecommunications.

Students complete the following:

1. Electrical Engineering 316, *Digital Logic Design*
2. Electrical Engineering 460N, *Computer Architecture*
3. Core laboratory course: Electrical Engineering 445L, *Embedded Systems Design Laboratory*
4. Core mathematics course: Mathematics 325K, *Discrete Mathematics*
5. Electrical Engineering 360C, *Algorithms*
6. Three courses from the following list:
Electrical Engineering 422C, *Software Design and Implementation II*
Electrical Engineering 445M, *Embedded and Real-Time Systems Laboratory*
Electrical Engineering 445S, *Real-Time Digital Signal Processing Laboratory*
Electrical Engineering 460M, *Digital Systems Design Using HDL*
Electrical Engineering 360P, *Concurrent and Distributed Systems*
Electrical Engineering 460R, *Introduction to VLSI Design*
Electrical Engineering 362K, *Introduction to Automatic Control*
Computer Science 375, *Compilers*

Software Engineering and Design

Courses in this area cover the engineering life cycle of software systems, including requirement analysis and specification, design, construction/programming, testing, deployment, maintenance, and evolution. Area courses are intended to teach students theory, practical methods, and tools for designing, building, delivering, maintaining, and evolving software to meet stakeholder requirements. Every software engineer must understand how software systems operate and how they can be used to solve engineering problems and deliver solutions. The courses in this area are designed to educate students about a diverse and relevant set of technologies and about the ways that technology can be used to design and build software systems.

Students complete the following:

1. Electrical Engineering 422C, *Software Design and Implementation II*
2. Electrical Engineering 360C, *Algorithms*
3. Core laboratory course: Electrical Engineering 461L, *Software Engineering and Design Laboratory*
4. Core mathematics course: Mathematics 325K, *Discrete Mathematics*
5. Four courses from the following list:
 - Electrical Engineering 316, *Digital Logic Design*
 - Electrical Engineering 445L, *Embedded Systems Design Laboratory*
 - Electrical Engineering 445M, *Embedded and Real-Time Systems Laboratory*
 - Electrical Engineering 360F, *Introduction to Software Engineering*
 - Electrical Engineering 460N, *Computer Architecture*
 - Electrical Engineering 360P, *Concurrent and Distributed Systems*
 - Electrical Engineering 361Q, *Requirements Engineering*
 - Electrical Engineering 372N, *Telecommunication Networks*
 - Electrical Engineering 360T, *Software Testing*
 - Electrical Engineering 361M, *Introduction to Data Mining*

Alternate Mathematics Courses

For students who choose both primary and secondary technical core areas in computer engineering:

Mathematics 427L, *Advanced Calculus for Applications II*
 Mathematics 328K, *Introduction to Number Theory*
 Mathematics 343K, *Introduction to Algebraic Structures*
 Mathematics 344K, *Intermediate Symbolic Logic*
 Mathematics 348, *Scientific Computation in Numerical Analysis* (carries a quantitative reasoning flag)
 Mathematics 358K, *Applied Statistics* (carries a quantitative reasoning flag)
 Mathematics 374M, *Mathematical Modeling in Science and Engineering*
 Computer Science 341, *Automata Theory*
 Computer Science 346, *Cryptography*

For students who choose both primary and secondary technical core areas in electrical engineering:

Mathematics 325K, *Discrete Mathematics*
 Mathematics 328K, *Introduction to Number Theory*
 Mathematics 346, *Applied Linear Algebra*
 Mathematics 348, *Scientific Computation in Numerical Analysis* (carries a quantitative reasoning flag)
 Mathematics 358K, *Applied Statistics* (carries a quantitative reasoning flag)
 Mathematics 361, *Theory of Functions of a Complex Variable*
 Mathematics 362M, *Introduction to Stochastic Processes*
 Mathematics 372K, *Partial Differential Equations and Applications*
 Mathematics 374, *Fourier and Laplace Transforms*
 Mathematics 374M, *Mathematical Modeling in Science and Engineering*

Bachelor of Science in Geosystems Engineering and Hydrogeology

Geosystems engineers and hydrogeologists are concerned with the development and use of engineering approaches in the management of natural resources from the earth's surface and subsurface, environmental restoration of subsurface sites, and other processes related to the earth sciences. This degree program, offered jointly by the Cockrell School of Engineering and the Jackson School of Geosciences, is designed to teach students the geological and engineering principles needed to solve subsurface resource development and environmental problems. The curriculum includes a fundamental sequence of engineering and geological sciences courses in such areas as multiphase fluid flow, physical hydrology, heat and mass transfer, field methods, and engineering design. This interdisciplinary systems approach, combining engineering and geological sciences, is increasingly required to address complex real-world problems such as characterization and remediation of aquifers. The degree program is designed to prepare graduates for employment with environmental, water resource management, and

energy companies in addition to many government agencies. Better-qualified graduates of the program may pursue graduate study in subsurface environmental engineering, petroleum engineering, geology, and other related fields.

The objective of the degree program is to prepare graduates for successful careers in the fields of subsurface environmental engineering (including carbon dioxide sequestration), oil and gas production and services, or similar pursuits. Graduates are expected to understand the fundamental principles of science and engineering behind the technology of geosystems engineering and hydrogeology to keep their education from becoming outdated and to give them the capability of self-instruction after graduation. They should also be prepared to serve society by applying the ideals of ethical behavior, professionalism, and environmentally responsible stewardship of natural resources.

Containing the following elements, the technical curriculum provides both breadth and depth in a range of topics.

- A combination of college-level mathematics and basic sciences (some with experimental work) that includes mathematics through differential equations, physics, chemistry, and geology
- Basic engineering and geologic topics that develop a working knowledge of fluid mechanics, strength of materials, transport phenomena, material properties, phase behavior, and thermodynamics
- Engineering and geosciences topics that develop competence in characterization and evaluation of subsurface geological formations and their resources using geoscientific and engineering methods, including field methods; design and analysis of systems for producing, injecting, and handling fluids; application of hydrogeologic and reservoir engineering principles and practices for water and energy resource development and management; contamination evaluation and remediation methods for hydrologic resources; and use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty
- A major capstone design experience that prepares students for engineering and hydrogeologic practice, based on the knowledge and skills acquired in earlier coursework and incorporating engineering and geological standards and realistic constraints

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course required as part of the basic sequence may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one course with a quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the US flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and both writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a

major sequence are given in Admission to a Major Sequence (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Courses used to fulfill technical and nontechnical elective requirements must be approved by the petroleum and geosystems engineering faculty and the geological sciences faculty before the student registers for them.

Bachelor of Science in Mechanical Engineering

Mechanical engineering is one of the largest and broadest fields of technical study. Mechanical engineers are concerned with the engineering systems used to control and transform energy to meet the needs of humanity. In mechanical engineering, students develop an understanding of basic topics and fundamental principles upon which engineered systems are conceived and developed in a modern society. It is an excellent foundation for a rewarding career in engineering, as well as for further study in business, law, medicine, and other professions that require a solid foundation in science and technology, and the ability to solve problems.

The mechanical engineering department is dedicated to graduating mechanical engineers who practice mechanical engineering in the general stems of thermal/fluid systems, mechanical systems and design, and materials and manufacturing in industry and government settings; pursue advanced education, research and development, and other creative efforts in science and technology; conduct themselves in a responsible, professional, and ethical manner; and participate as leaders in activities that support service to and economic development of the region, state, and nation.

The mechanical engineering faculty has defined ten educational outcomes that students in the program are expected to achieve by the time of graduation. These outcomes are

- Knowledge of and ability to apply engineering and science fundamentals to real problems
- Ability to formulate and solve open-ended problems
- Ability to design mechanical components, systems, and processes
- Ability to set up, conduct, and interpret experiments, and to present the results in a professional manner
- Ability to use modern computer tools in mechanical engineering
- Ability to communicate in written, oral, and graphical forms
- Ability to work in teams and apply interpersonal skills in engineering contexts
- Ability and desire to lay a foundation for continued learning beyond the baccalaureate degree
- Awareness of professional issues in engineering practice, including ethical responsibility, safety, the creative enterprise, and loyalty and commitment to the profession
- Awareness of contemporary issues in engineering practice, including economic, social, political, and environmental issues and global impact

The mechanical engineering curriculum meets these outcomes by providing breadth and depth across a range of topics.

- A combination of college-level mathematics and basic science courses (some with experimental work) that includes mathematics through differential equations, probability and statistics, physics, and chemistry
- Engineering courses that develop a working knowledge of graphics and computer-aided design, engineering mechanics, thermodynamics, kinematics, dynamics and control of mechanical systems, computational methods, fluid mechanics, heat transfer,

PGE 365	3	American history	3

materials science and engineering, mechatronics, technical communication, and engineering economics

- Mechanical engineering project and laboratory experiences that develop competence in measurements and instrumentation, interpretation of data, reverse engineering analysis of mechanical systems, use of computational tools for engineering analysis, integration of multidisciplinary topics in design of complex systems, teamwork and project planning, and written and oral communication
- A sequence of engineering design courses, culminating in a major capstone design experience in collaboration with an industrial sponsor, that draws on the knowledge and skills students have acquired in earlier coursework and incorporates modern engineering standards and realistic constraints
- Core curriculum courses, including social and behavioral sciences, humanities, and visual and performing arts electives, that complement the technical content of the curriculum
- A variety of senior elective options that provide a career gateway to further study and lifelong learning in the practice of engineering and other professions

PROCEED (Project-Centered Education)

The undergraduate curriculum in mechanical engineering is built on the principle of project-centered education, or PROCEED. A number of courses throughout the curriculum are structured to motivate the study of engineering science by challenging students with in-depth analysis of real mechanical components and systems. In PROCEED, students address real-world projects based on current industrial methods and practices. Undergraduate laboratories and computer facilities are integrated into the curriculum to connect theory with practice.

Portable Computing Devices

Students entering Mechanical Engineering are expected to have a laptop computer at their disposal. The use of laptop computers will be necessary in many required courses, and individual instructors may require that a laptop be brought to class or lab sessions. For a list of minimum system requirements see: <http://www.me.utexas.edu/laptopreq>.

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course required as part of the basic sequence may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in [Liberal Education of Engineers](#).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the University's flag requirements: one independent inquiry flag, one course with a quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the United States flag, and three writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and three writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule*.

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission to a Major Sequence (p. 151).

Enrollment in other required courses is not restricted by completion of the basic sequence.

Requirements		Hours
Basic Sequence Courses		
Chemistry		
CH 301	Principles of Chemistry I (part II science and technology)	3
Engineering Mechanics		
E M 306	Statics	3
E M 319	Mechanics of Solids	3
Mathematics		
M 408C	Differential and Integral Calculus (mathematics; quantitative reasoning flag)	4
M 408D	Sequences, Series, and Multivariable Calculus	4
M 427K	Advanced Calculus for Applications I (quantitative reasoning flag)	4
Mechanical Engineering		
M E 302	Introduction to Engineering Design and Graphics	3
M E 318M	Programming and Engineering Computational Methods	3
M E 324	Dynamics	3
M E 326	Thermodynamics	3
M E 330	Fluid Mechanics	3

Bridges to the Future Certificate Program

The Department of Mechanical Engineering offers highly qualified senior-level undergraduate students an opportunity for in-depth study and research in an emerging area of mechanical engineering through the Bridges to the Future Certificate Program. Upon completion of a prescribed series of technical electives and an independent research study under the direction of a faculty member and a doctoral student mentor, students receive a certificate and a letter from the department chair that describes the program and the work completed. The certificate and its supporting documentation, plus supporting letters from supervising faculty and mentors, can be valuable assets for students applying to graduate school or pursuing competitive job opportunities. This certificate will not appear on the student's transcript.

Students must apply for admission to a certificate program during the junior year; they must have completed all basic sequence courses and must have been admitted to the major sequence in mechanical engineering. In some cases, the coursework may include a graduate course, which may be credited toward a University graduate degree.

Details on course offerings and admission procedures are available from the Department of Mechanical Engineering undergraduate office and on the mechanical engineering Web site (<http://www.me.utexas.edu/undergrad>).

Career Gateway Elective Options

The mechanical engineering curriculum includes twelve hours of career gateway electives, which are to be selected by the student to support his or her career goals. These courses should be chosen carefully and must be pertinent to each other and to the student's career goals.

To assist students in thinking about career options, the advising section of the mechanical engineering Web site contains information that describes potential career paths in traditional and nontraditional areas. Students are required to review these materials and to meet with a faculty elective adviser to discuss their options prior to selecting their career gateway elective courses.

Before registering for any career gateway elective courses, students must prepare a career statement and a list of relevant, related courses, and a mechanical engineering faculty elective adviser must provide preliminary approval. Ultimately, the faculty undergraduate adviser in mechanical engineering must provide final approval before the student's first degree audit for graduation.

By the beginning of the semester in which he or she will take the first career gateway elective, the student must have completed all basic sequence courses with a grade of at least C- in each and must have

been admitted unconditionally to the major sequence in mechanical engineering.

Career gateway electives can include approved upper-division courses from mechanical engineering and other engineering departments, as well as upper-division courses from a number of other colleges and departments. A detailed description of courses that satisfy the career gateway elective requirements is available on the advising section of the mechanical engineering Web site. Highly qualified students are encouraged to fulfill career gateway elective requirements as part of the Bridges to the Future Certificate Program described above.

Bachelor of Science in Petroleum Engineering

Energy is a key component to people's everyday lives. Petroleum engineers are able to address and solve important technology challenges that will lead to energy security and societal prosperity, so the position is in high demand. This challenging and rewarding field of engineering requires creative application of a wide spectrum of knowledge, including, but not limited to mathematics, physics, geology, and chemistry.

Worldwide energy demand is growing, and experts agree that oil and gas will continue to play an important role in the world's energy supply. The decision making for complex projects falls to a great extent upon petroleum engineers, providing them with a high degree of responsibility. In addition, since hydrocarbon reserves are found in such diverse areas as Asia, South America, and Europe, petroleum engineers will have opportunities for exciting assignments all over the globe.

Petroleum engineers play a variety of roles within the energy business. They design and monitor the drilling of exploratory and development wells used to locate and produce the oil and gas from the subsurface. They work with technologies that can describe the characteristics of rocks deep beneath the surface and detect the type of fluids contained in those rocks. They install and maintain the equipment that lifts fluids from subsurface reservoirs to the surface, and they design surface collection and treatment facilities to prepare produced hydrocarbons for delivery to a refinery or pipeline. Hydraulic fracturing of shale gas and tight oil is the responsibility of a petroleum engineer, as is the development and implementation of enhanced oil recovery methods that capture stranded or bypassed hydrocarbons from old oilfields. In addition to these traditional petroleum engineering career choices, there are other emerging careers for petroleum engineering graduates in pollution clean up, underground waste disposal (including the subsurface injection of carbon dioxide to reduce atmospheric greenhouse gases), and hydrology.

The objective of the petroleum engineering program is to graduate practical, qualified engineers who can successfully pursue careers in the oil and gas production and services industries or similar areas. Graduates of the program are expected to understand the fundamental principles of science and engineering behind the technology of petroleum engineering to keep their education current and to give them the capability of self-instruction after graduation. They should be prepared to serve society by using the ideals of ethical behavior, professionalism, and environmentally responsible stewardship of natural resources.

The technical curriculum contains the following elements:

- A combination of college-level mathematics and basic sciences (some with experimental work) that includes mathematics through differential equations, probability and statistics, physics, chemistry, and geology
- Engineering topics that develop a working knowledge of fluid mechanics, strength of materials, transport phenomena, material properties, phase behavior, and thermodynamics
- Petroleum engineering topics that develop competence in (1) design and analysis of well systems and procedures for drilling and completing wells; (2) characterization and evaluation of subsurface geological formations and their resources using geoscientific and engineering methods; (3) design and analysis of systems for producing, injecting, and handling fluids; (4) application of reservoir engineering principles and practices to optimize resource development and management; and (5) use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty
- A major capstone design experience that prepares students for engineering practice, based on the knowledge and skills acquired in earlier coursework and incorporating engineering standards and realistic constraints

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course required as part of the basic sequence may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and

behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling engineering degree requirements, students must also complete coursework to satisfy the following flag requirements: one independent inquiry flag, one course with a quantitative reasoning flag, one ethics and leadership flag, one global cultures flag, one cultural diversity in the US flag, and two writing flags. The independent inquiry flag, the quantitative reasoning flag, the ethics and leadership flag, and both writing flags are carried by courses specifically required for the degree; these courses are identified below. Courses that may be used to fulfill flag requirements (p. 22) are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>).

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission to a Major Sequence (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Courses used to fulfill technical and nontechnical elective requirements must be approved by the petroleum and geosystems engineering undergraduate adviser before the student enrolls in them.

Courses

The faculty has approval to offer the following courses in the academic years 2014–2015 and 2015–2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information*. In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Engineering Studies

Engineering Studies: E S

Lower-Division Courses

E S 119, 219, 319. Topics in Engineering.

Restricted to engineering students. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics are offered on the pass/fail basis only. Engineering Studies 119, 219, 319 and General Engineering 119, 219, 319 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Upper-Division Courses

E S 222. Topics in Professional Development.

Restricted to engineering students. Small-group seminar involving reading, discussion, and oral reports. Two lecture hours a week for one semester. Engineering Studies 222 and General Engineering 222 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

E S 160, 260, 360. Service Learning for Engineers.

Supervised participation in a service-learning project that helps meet a community need. May be repeated for credit when the projects vary. With approval of the student's major department, may be counted toward an engineering degree. Prerequisite: Consent of instructor.

E S 370H. Engineering Entrepreneurship.

Principles of engineering entrepreneurship, including legal aspects and the ethics of practice. Three lecture hours a week for one semester. Engineering Studies 370H and General Engineering 370H may not both be counted. Prerequisite: Admission to an appropriate major sequence in engineering and to the Engineering Honors Program.

E S 177, 277, 377. Topics in Engineering.

For each semester hour of credit earned, one lecture hour a week for one semester. Some topics are offered on the pass/fail basis only. May

be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

E S 377E. Interdisciplinary Entrepreneurship: Elective.

Same as Electrical Engineering 377E. Restricted to engineering students. Projects must differ significantly from those developed for Electrical Engineering 364D and 364E. Focus on skill development and mentoring in start-up formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Includes discussion of intellectual property, social issues in design, as well as ethical and safety considerations. Emphasis on written and oral presentation of start-up activities. The equivalent of three lecture hours a week for one semester. Prerequisite: Consent of instructor.

E S 279K. Undergraduate Research Experience.

Restricted to undergraduate students in the Graduates Linking with Undergraduates in Engineering (GLUE) program. Directed study or research in a selected area of engineering. One lecture hour and three laboratory hours a week for one semester. Engineering Studies 279K and General Engineering 279K may not both be counted. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: A major in engineering and a University grade point average of at least 3.00.

E S 279L. Women in Engineering Leadership Seminar.

Restricted to engineering students. Lectures, discussions, and exercises related to various leadership issues. Two lecture hours a week for one semester. Engineering Studies 279L and General Engineering 279L may not both be counted. Offered on the pass/fail basis only.

E S 079M. Undergraduate Research Experience.

Restricted to undergraduate students in the Equal Opportunity in Engineering Program. One lecture hour a week for one semester. Prerequisite: A major in engineering and a University grade point average of at least 3.00.

General Engineering

General Engineering: G E

Lower-Division Courses

G E 206D. Supplemental Instruction for Chemistry 301.

Restricted to engineering students. Development of problem-solving skills in the material covered in Chemistry 301. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Chemistry 301.

G E 206E. Supplemental Instruction for Chemistry 302.

Restricted to engineering students. Development of problem-solving skills in the material covered in Chemistry 302. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Chemistry 302.

G E 207C. Supplemental Instruction for Mathematics 408C.

Restricted to engineering students. Development of problem-solving skills in the material covered in Mathematics 408C. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 408C.

G E 207D. Supplemental Instruction for Mathematics 408D.

Restricted to engineering students. Development of problem-solving skills in the material covered in Mathematics 408D. Two two-hour laboratory

sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 408D.

G E 207E. Supplemental Instruction for Mathematics 340L.

Restricted to engineering students. Development of problem-solving skills in the material covered in Mathematics 340L. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 340L.

G E 207K. Supplemental Instruction for Mathematics 427K.

Restricted to engineering students. Development of problem-solving skills in the material covered in Mathematics 427K. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 427K.

G E 207L. Supplemental Instruction for Mathematics 427L.

Restricted to engineering students. Development of problem-solving skills in the material covered in Mathematics 427L. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 427L.

G E 207R. Supplemental Instruction for Mathematics 408K.

Restricted to engineering students. Four lecture hours a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 408K.

G E 207S. Supplemental Instruction for Mathematics 408L.

Restricted to engineering students. Four lecture hours a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 408L.

G E 207T. Supplemental Instruction for Mathematics 408M.

Restricted to engineering students. Four lecture hours a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Mathematics 408M.

G E 208K. Supplemental Instruction for Physics 303K.

Restricted to engineering students. Development of problem-solving skills in the material covered in Physics 303K. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Physics 303K.

G E 208L. Supplemental Instruction for Physics 303L.

Restricted to engineering students. Development of problem-solving skills in the material covered in Physics 303L. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. Prerequisite: Concurrent enrollment in Physics 303L.

G E 209. Supplemental Instruction for Engineering Courses.

Restricted to engineering students. Development of problem-solving skills in the material covered in selected engineering courses. Two two-hour laboratory sessions a week for one semester. May not be counted toward any engineering degree. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

G E 212. Supplemental Instruction for Electrical Engineering 312.

Restricted to engineering students. Development of problem-solving skills in the material covered in Electrical Engineering 312. Two two-hour laboratory sessions a week for one semester. May not be counted toward

any engineering degree. Prerequisite: Concurrent enrollment in Electrical Engineering 312.

G E 119, 219, 319. Topics in Engineering.

Restricted to engineering students. Topics to supplement lower-division engineering curriculum. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. Some topics are offered on the pass/fail basis only. Engineering Studies 119, 219, 319 and General Engineering 119, 219, 319 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

Upper-Division Courses

G E 222. Topics in Professional Development.

Restricted to engineering students. Small-group seminar involving reading, discussion, and oral reports. Two lecture hours a week for one semester. Engineering Studies 222 and General Engineering 222 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

Department of Aerospace Engineering and Engineering Mechanics

Students should note that all prerequisite courses for the following courses must be completed on the letter-grade basis with a grade of at least C-.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Aerospace Engineering: ASE

Lower-Division Courses

ASE 301. Introduction to Computer Programming.

Basic computer programming concepts for engineering computations. Programming in MATLAB or similar computing environments is emphasized, but more advanced languages may also be discussed. Three lecture hours a week for one semester.

ASE 102. Introduction to Aerospace Engineering.

Restricted to first year students. Introduction to aerospace engineering, including problem solving and study skills. Examines opportunities and responsibilities of careers in aerospace engineering. One lecture hour a week for one semester. May not be counted toward any engineering degree. Offered on the pass/fail basis only.

ASE 211K. Engineering Computation.

Fundamental numerical methods and software tools used in engineering computation. Topics include linear systems of equations, matrix computations, nonlinear equations, least squares approximations, interpolation, numerical integration and numerical solution of differential equations. Two lecture hours a week for one semester. Aerospace Engineering 311 and 211K may not both be counted. Prerequisite: Aerospace Engineering 301 (or 201) and Mathematics 427K with a grade of at least C- in each.

ASE 118. Student Leadership Seminar.

Principles of human development, strategic learning, and teaching. Small-group seminar involving reading, discussion, and written reports. One

lecture hour a week for one semester. Offered on the pass/fail basis only. Prerequisite: Consent of the engineering undergraduate adviser.

ASE 119K. Low-Speed Aerodynamics Laboratory.

Restricted to students in the aerospace engineering major sequence. Wind tunnel and water channel experiments at subsonic speeds; use of instrumentation and written reports. One lecture hour and three laboratory hours a week for one semester. Aerospace Engineering 119K and 120K may not both be counted.

ASE 119L. High-Speed Aerodynamics Laboratory.

Restricted to students in the aerospace engineering major sequence. Experiments using a variable-Mach number supersonic wind tunnel and ballistics range, and an investigation of aerodynamics of blunt bodies and simple airfoils in supersonic flow. One lecture hour and three laboratory hours a week for one semester. Aerospace Engineering 119L and 162M may not both be counted.

ASE 119M. Spacecraft Systems Laboratory.

Restricted to students in the aerospace engineering major sequence. Overview of spacecraft subsystems, mission design tools, numerical techniques, mission planning references, mission constraints, and mission design projects. Includes written reports. One lecture hour and one and one-half laboratory hours a week for one semester. Aerospace Engineering 119M and 166M may not both be counted.

ASE 119N. Flight Dynamics Laboratory.

Restricted to students in the aerospace engineering major sequence. Introduction to flight testing; instrumentation and methodology; performance testing. Computer modeling and dynamic simulation of aircraft motion; aircraft sizing. Written reports. One lecture hour and three laboratory hours a week for one semester. Aerospace Engineering 119N and 167M may not be both counted.

ASE 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Aerospace Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Aerospace Engineering and Engineering Mechanics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses

ASE 320. Low-Speed Aerodynamics.

Fundamental concepts, fluid statics; integral and differential analysis; detailed analysis of inviscid, incompressible flows; aerodynamics of airfoils and wings. Three lecture hours a week for one semester. Prerequisite: Mathematics 427L and Mechanical Engineering 320 with a grade of at least C- in each.

ASE 321K. Computational Methods for Structural Analysis.

Matrix structural analysis of systems that can be idealized as being comprised of axial bar elements, beam elements, and frame elements. Notion of element-by-element assembly of the governing system of algebraic equations. A systematic introduction to (and use of) the fundamental idea of a weak statement of a boundary value problem, particularly as concerns the numerical treatment/approximation of such problems. Interpretation of the weak-statement in terms of the principle of virtual work. Galerkin's method as applied to structural analysis. An introduction to the classical Galerkin finite element method with application to structures and plane elasticity. Energy principles and their utility in solving problems in solid mechanics, as well as their

connection to the finite element method. Three lecture hours a week for one semester, with discussion hours to be arranged. Prerequisite: Aerospace Engineering 211K (or 311) and Engineering Mechanics 319 with a grade of at least C- in each.

ASE 324L. Aerospace Materials Laboratory.

Study of the deformation and fracture behavior of materials used in aerospace vehicles. Structure-property relations, methods of characterizing material behavior, use of properties in the design process. Case histories. Written reports. Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Engineering Mechanics 319 with a grade of at least C-.

ASE 325L. Cooperative Engineering.

This course covers the work period of aerospace engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Aerospace Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. May be repeated for credit. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Aerospace Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Aerospace Engineering 325LY and appointment for a full-time cooperative work tour.

ASE 225M. Cooperative Engineering.

This course covers the work period of aerospace engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Aerospace Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Aerospace Engineering 225MA and appointment for a full-time cooperative work tour.

ASE 125N. Cooperative Engineering.

This course covers the work period of aerospace engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Aerospace Engineering 325LZ or 225MB, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

ASE 128. Aerospace Engineering Projects Laboratory.

Directed work on an organized student project in aerospace engineering or engineering mechanics. The equivalent of one lecture hour a week for one semester. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: At least fifteen semester hours of coursework, a University grade point average of at least 2.50, preparation of a laboratory participation log, and approval by both the faculty member directing the student project and the undergraduate adviser.

ASE 330M. Linear System Analysis.

Fundamentals of signals and systems; convolution; Laplace transforms; response of linear, time-invariant systems to standard inputs; frequency response methods; time-domain analysis; introduction to control systems. Three lecture hours a week for one semester. Prerequisite: Engineering Mechanics 311M and Mathematics 427K with a grade of at least C- in each.

ASE 333T. Engineering Communication.

Open only to aerospace engineering majors. Technical communication skills for engineers: written and oral reports; individual and collaborative composition; online and traditional research; editing techniques; document design for electronic and hard copy. Three lecture hours a week for one

semester. Prerequisite: Rhetoric and Writing 306 or the equivalent with a grade of at least C-.

ASE 339. Advanced Strength of Materials.

Same as Engineering Mechanics 339. Curved beams, shear deformation, beam columns, beams on elastic foundations; inelastic behavior of members; elementary plate bending. Three lecture hours a week for one semester. Prerequisite: Engineering Mechanics 319 with a grade of at least C-.

ASE 346. Viscous Fluid Flow.

Navier-Stokes equations, laminar and turbulent boundary layers, transition, effects of pressure gradients and compressibility. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 320 with a grade of at least C-.

ASE 347. Introduction to Computational Fluid Dynamics.

Development and implementation of finite-difference schemes for numerical solution of subsonic, transonic, and supersonic flows. Emphasis on convection and diffusion equations of fluid dynamics. Evaluation of accuracy, stability, and efficiency. Three lecture hours a week for one semester. Aerospace Engineering 347 and Mechanical Engineering 369L may not both be counted. Prerequisite: Aerospace Engineering 211K (or 311) and 320 with a grade of at least C- in each.

ASE 355. Aeroelasticity.

Studies static aeroelastic phenomena; wing torsional divergence, control reversal, effect of wing sweep, flexibility effects on aircraft stability and control, and design implications; dynamic aeroelasticity; and galloping of transmission lines, flutter, and unsteady aerodynamics. Includes an introduction to experimental aeroelasticity. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 321K and 330M with a grade of at least C- in each.

ASE 357. Mechanics of Composite Materials.

Anisotropic constitutive relationships, lamination theory, failure theories, micromechanical behavior of laminates; laminated composite plates-- bending, vibration, and buckling; composite fabrication, sandwich and other composite lightweight structures. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 321K with a grade of at least C-.

ASE 361K. Aircraft Design I.

Conceptual design of an aircraft to meet a mission specification. Includes estimation of weight, cost from payload, and range requirements; selection of configuration; preliminary sizing of wing, fuselage, and tail/canard; aerodynamic design of wing and tail; weight and balance; and performance estimation. Three lecture hours and four laboratory hours a week for one semester. Prerequisite: Aerospace Engineering 320 with a grade of at least C-, and credit with a grade of at least C- or registration for Aerospace Engineering 367K.

ASE 361L. Aircraft Design II.

Preliminary design of an aircraft from a conceptual design to satisfy a given set of requirements. Includes preliminary structural design; detailed estimates of weight, balance, and performance; and satisfaction of stability, control, and handling quality requirements. Three lecture hours and four laboratory hours a week for one semester. Prerequisite: Aerospace Engineering 119K (or 120K) and 361K with a grade of at least C- in each, and credit with a grade of at least C- or registration for Aerospace Engineering 364.

ASE 362K. Compressible Flow.

Shock and expansion waves, quasi-one-dimensional flow, converging-diverging nozzles, diffusers, wind tunnel operation, linearized flow,

and compressibility effects on aerodynamics of airfoils and bodies. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 320 with a grade of at least C-.

ASE 363L. History of Space Flight.

History and principles of space flight from early Chinese rocket experiments to Apollo 17 and the Space Shuttle; technological benefits from the space program and future space projects, including commercial space activities and those related to national security. Three lecture hours a week for one semester. May not be counted as an aerospace engineering course for the Bachelor of Science in Aerospace Engineering; may not be counted as a technical elective, a technical area course, or an engineering elective for any engineering degree. Prerequisite: Upper-division standing or consent of instructor.

ASE 364. Applied Aerodynamics.

Detailed analysis of aerodynamics of compressible and incompressible flows about wings and airfoils; wing and airfoil parameters and force and moment coefficients; and thin-airfoil theory, lifting-line theory, panel methods, high-lift devices, delta wings, transonic flows, and supersonic flows over wings. Three lecture hours a week for one semester. Aerospace Engineering 364 and 379L (Topic: Airfoil and Wing Design Theory) may not both be counted. Prerequisite: Aerospace Engineering 362K with a grade of at least C-, and credit with a grade of at least C- or registration for Aerospace Engineering 162M.

ASE 365. Structural Dynamics.

Analysis of discrete and continuous vibrating systems; deriving equations of motion; determining response; and natural frequencies and modes of vibration. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 330M with a grade of at least C-.

ASE 366K. Spacecraft Dynamics.

Basic satellite and spacecraft motion, orbital elements, coordinate systems, and transformations; orbit/trajectory design principles; basic three-dimensional spacecraft attitude dynamics. Three lecture hours a week for one semester. Prerequisite: Engineering Mechanics 311M and Mathematics 427K with a grade of at least C- in each.

ASE 366L. Applied Orbital Mechanics.

Selected subjects in satellite motion and satellite applications, including communication and navigation satellites, orbit selection/design for satellite applications, orbital coordinate systems, time, major perturbing forces, rendezvous and intercept, and interplanetary trajectories. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 366K with a grade of at least C-.

ASE 367K. Flight Dynamics.

Equations of motion for rigid aircraft; aircraft performance, weight and balance, static stability and control, and dynamic stability; design implications. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 320 and 330M with a grade of at least C- in each.

ASE 370L. Flight Control Systems.

Fundamentals of linear control analysis and design for single-input, single-output systems; stability and performance measures; Routh Hurwitz analysis; root locus methods; frequency response (Bode and Nyquist); introduction to full-state feedback. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 330M with a grade of at least C-.

ASE 170P. Controls Laboratory.

Three laboratory hours a week for one semester. Prerequisite: Aerospace Engineering 370L with a grade of at least C-.

ASE 372K. Attitude Dynamics.

Studies attitude representations, rotational kinematics, rigid-body dynamics, sensors and actuators, attitude determination, and passive and active attitude control systems. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 366K with a grade of at least C-.

ASE 372L. Satellite Applications.

Classical and modern orbit determination, remote sensors and their outputs, pattern recognition, image enhancement, satellite data analysis projects. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 366K with a grade of at least C-.

ASE 372N. Satellite-Based Navigation.

Satellite-based navigation systems, with focus on the Global Positioning System (GPS), ground and space segments, navigation receivers, satellite signal coordinate/time systems, denial of signal, differential techniques, GPS data analysis. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 366K with a grade of at least C-.

ASE 374K. Space Systems Engineering Design.

Introduction to systems engineering: the systems engineering process, requirements, design fundamentals, trade studies, cost and risk analyses, integration, technical reviews, case studies, and ethics. Includes written reports. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 366K with a grade of at least C-, and credit with a grade of at least C- or registration for Aerospace Engineering 366L and 166M.

ASE 374L. Spacecraft/Mission Design.

Spacecraft systems characteristics, mission requirements, sensors, and consumables analyses; and mission phases, request for proposal, problem definition, ideation, proposal preparation, conceptual design review, preliminary design development and review, and design report preparation. Includes written reports. Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Aerospace Engineering 166M and 374K with a grade of at least C- in each, and credit with a grade of at least C- or registration for Aerospace Engineering 376K.

ASE 375. Electromechanical Systems.

Restricted to aerospace engineering majors. Subjects include basic electronic circuits, operational amplifiers, concepts of impedance and feedback, sensors to measure displacement, strain and acceleration, actuators such as DC motors, stepper motors and servo hydraulics, data acquisition and sampling. These concepts will be implemented via experiments that illustrate interesting phenomena in solids and structures. Two lecture hours and three laboratory hours a week for one semester. Aerospace Engineering 375 and Mechanical Engineering 340 may not both be counted. Prerequisite: Engineering Mechanics 319 and Physics 303L with a grade of at least C- in each.

ASE 376K. Propulsion.

Review of control volume analysis and quasi-one-dimensional compressible flow. Analysis and design of rocket nozzles and air-breathing engines, including performance and cycle analysis; the flow in nozzles, diffusers, compressors, and turbines; and combustion chamber processes and propellants. Includes an introduction to chemical and electric rocket propulsion. Three lecture hours a week for one semester. Prerequisite: Aerospace Engineering 362K with a grade of at least C-.

ASE 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the

Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a Bachelor of Science in Engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Aerospace Engineering 679HA and enrollment in the Engineering Honors Program.

ASE 179K, 279K, 379K. Research in Aerospace Engineering.

Directed study or research in a selected area of aerospace engineering. One, two, or three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing, a University grade point average of at least 3.00, selection of project, and consent of the faculty member directing project and the undergraduate adviser.

ASE 379L. Studies in Aerospace Engineering.

Courses on current topics in aerospace engineering. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: Selected Topics in Fluid Mechanics. Three lecture hours a week for one semester.

Topic 2: Selected Topics in Structural Mechanics. Three lecture hours a week for one semester.

Topic 3: Selected Topics in Flight Mechanics. Three lecture hours a week for one semester.

Topic 4: Selected Topics in Orbital Mechanics. Three lecture hours a week for one semester.

Topic 9: Selected Topics in Controls. Three lecture hours a week for one semester.

ASE 179R. Research Seminar.

Designed for students who plan to pursue a substantial research project or undergraduate honors thesis in aerospace engineering. Department faculty present information and lead discussions about their current research projects so that students can learn about available research opportunities. One lecture hour a week for one semester. May not be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Completion of at least twenty-four semester hours of coursework and a University grade point average of at least 3.50.

ASE 179S, 279S, 379S, 479S, 579S, 679S, 779S, 879S, 979S. Topics in Aerospace Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Aerospace Engineering and Engineering Mechanics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Engineering Mechanics: E M

Lower-Division Courses

E M 306 (TCCN: ENGR 2301). Statics.

Vector algebra, force systems, free-body diagrams; engineering applications of equilibrium, including frames, friction, distributed loads; centroids, moments of inertia. Three lecture hours and two discussion hours a week for one semester. Prerequisite: Mathematics 408D or 408L, and Physics 303K with a grade of at least C- in each.

E M 311M (TCCN: ENGR 2302). Dynamics.

Two- and three-dimensional kinematics and dynamics, applied to a broad class of engineering problems. Three lecture hours and two discussion

hours a week for one semester. Prerequisite: Engineering Mechanics 306, Mathematics 408D or 408M, and Physics 303K with a grade of at least C- in each.

E M 319 (TCCN: ENGR 2332). Mechanics of Solids.

Internal forces and deformations in solids; stress and strain in elastic and plastic solids; application to simple engineering problems. Three lecture hours a week for one semester, with discussion hours if necessary.

Prerequisite: Engineering Mechanics 306, Mathematics 408D or 408M, and Physics 303K with a grade of at least C- in each.

E M 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Engineering Mechanics.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education programs. Credit is recorded as assigned by the study abroad adviser in the Department of Aerospace Engineering and Engineering Mechanics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses

E M 339. Advanced Strength of Materials.

Same as Aerospace Engineering 339. Curved beams, shear deformation, beam columns, beams on elastic foundations; inelastic behavior of members; elementary plate bending. Three lecture hours a week for one semester. Prerequisite: Engineering Mechanics 319 with a grade of at least C-.

E M 360. Studies in Engineering Mechanics.

Advanced work in the various areas of engineering mechanics, based on recent developments. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing in engineering and consent of instructor.

Topic 4: Theory of Material Science.

Topic 13: Applications of Finite Element Methods.

E M 179S, 279S, 379S, 479S, 579S, 679S, 779S, 879S, 979S. Topics in Engineering Mechanics.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Aerospace Engineering and Engineering Mechanics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Department of Biomedical Engineering

Biomedical Engineering: BME

Lower-Division Courses

BME 102L. Introduction to Biomedical Engineering Design Principles.

Restricted to biomedical engineering majors. Introduction to concepts of creative design, engineering analysis, reverse engineering, concept selection, and fabrication of biomedical engineering devices. One lecture hour and three laboratory hours a week for one semester.

BME 303. Introduction to Computing.

Restricted to biomedical engineering majors. Introduction to computing and programming, focusing on arithmetic and logic operations, processor architecture, and programming structures. Programming skills for solving problems using machine and assembly language programming. Emphasis is on biomedical engineering applications of computing. Three lecture hours and two recitation hours a week for one semester.

BME 203L. Introduction to Biomedical Engineering Design.

Restricted to biomedical engineering majors. Biomedical engineering design concepts with hands-on learning applications. Two lecture hours and three laboratory hours a week for one semester. Biomedical Engineering 102L and 203L may not both be counted. Offered on the letter-grade basis only.

BME 311. Network Analysis in Biomedical Engineering.

Restricted to biomedical engineering majors. Basic concepts in circuit analysis and design of systems for biomedical engineering; Ohm's law, Kirchhoff's laws, and nodal and loop analysis; Thevenin's and Norton's theorem; operational amplifiers; high-order circuit and basic AC circuit analysis using Fourier and Laplace transforms. Three lecture hours and two laboratory/project hours a week for one semester. Prerequisite: Biomedical Engineering 303, Physics 303K, and credit or registration for Mathematics 427K.

BME 313. Numerical Methods and Modeling in Biomedical Engineering.

Restricted to biomedical engineering majors. Principles and techniques of numerical analysis of biomedical engineering problems using high-level programming languages such as C++, Java, MATLAB, and LabVIEW. Numerical methods of integration, differentiation, interpolation, curve fitting, data analysis, sampling and estimation, error analysis, and analysis of ordinary differential equations. Numerical modeling of biomedical engineering systems, symbolic computation and scientific visualization, and integration of hardware and software. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 303 and Mathematics 408C.

BME 113L. Introduction to Numerical Methods in Biomedical Engineering.

Restricted to biomedical engineering majors. Introduces principles and techniques of numerical analysis of biomedical engineering problems. Covers numerical methods of integration, differentiation, interpolation, curve fitting, data analysis, sampling and estimation, error analysis, analysis of ordinary differential equations, numerical modeling of biomedical engineering systems, symbolic computation, and scientific visualization. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 303, Mathematics 427K, and credit or registration for Biomedical Engineering 311 and 335.

BME 314. Engineering Foundations of Biomedical Engineering.

Application of engineering and mathematics to analysis and constructive manipulation of biological systems and the development of biomedical therapies. Includes physiological mass and momentum transfer; biomechanics; structure, properties, and behavior of biological materials; electrophysiology and linear circuits; and biomedical imaging. Three lecture hours and two recitation hours a week for one semester. Prerequisite: Biology 311C, Biomedical Engineering 102L, Chemistry 302, Physics 303K and 103M, and credit or registration for Electrical Engineering 312 or 319K, Mathematics 427K, Physics 303L, and 103N.

BME 214L. Computational Fundamentals of Biomedical Engineering Design.

Restricted to biomedical engineering majors. Development of biomedical engineering design concepts, including hands-on learning applications in the lab. Two lecture hours and three laboratory hours a week for one semester. Biomedical Engineering 314 and 214L may not both be counted. Offered on the letter-grade basis only. Prerequisite: Biology 311C, Biomedical Engineering 203L, 303, Chemistry 302, Physics 303K, 103M, and credit or registration for Mathematics 427K, Physics 303L, and 103N.

Upper-Division Courses

BME 221. Measurement and Instrumentation Laboratory.

Restricted to biomedical engineering majors. Introduction to the basics of assembling and using instrumentation for the purposes of recording and displaying electrophysiological signals. Mechanical, chemical, and biological principles for biomedical instrumentation. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 311, 113L, 314, 333T, and 335, and credit or registration for Biomedical Engineering 343 and 365R.

BME 325L. Cooperative Engineering.

Restricted to biomedical engineering majors. This course covers the work period of biomedical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Biomedical Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Biomedical Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Biomedical Engineering 325LY and appointment for a full-time cooperative work tour.

BME 225M. Cooperative Engineering.

Restricted to biomedical engineering majors. This course covers the work period of biomedical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Biomedical Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Biomedical Engineering 225MA and appointment for a full-time cooperative work tour.

BME 125N. Cooperative Engineering.

Restricted to biomedical engineering majors. Covers the work period of biomedical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Biomedical Engineering 325LZ or 225MB, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

BME 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Biomedical Engineering.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Biomedical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

BME 333T. Engineering Communication.

Restricted to biomedical engineering majors. Advanced communication skills for engineers, with emphasis on biomedical engineering topics. Strategies for written, visual, and interpersonal communication, and for oral presentation. Introduction to library research and to ethical decision making in biomedical engineering. Three lecture hours and one recitation hour a week for one semester. Prerequisite: Rhetoric and Writing 306, and credit or registration for Biomedical Engineering 314 or 214L.

BME 335. Engineering Probability and Statistics.

Restricted to biomedical engineering majors. Fundamentals of probability, random processes, and statistics with emphasis on biomedical engineering applications. Includes hypothesis testing, regression, and sample size calculations. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Biomedical Engineering 303 and Mathematics 408D.

BME 339. Biochemical Engineering.

Restricted to biomedical engineering majors. Principles of fermentation and cell culture technologies; introduction to recombinant DNA technology and protein expression; the development of therapeutics, vaccines, and diagnostics using genetic engineering. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 335, Biomedical Engineering 339, Chemical Engineering 339, 379 (Topic: Introduction to Biochemical Engineering). Prerequisite: Biology 311C; Chemistry 353 or 353M; and Chemistry 339K or 369.

BME 342. Biomechanics of Human Movement.

Introduction to computational modeling and simulation of musculoskeletal systems, with emphasis on lumped-parameter models of muscle, bone, tendon, and ligament. Three lecture hours a week for one semester. Prerequisite: Mathematics 340L, and Physics 303K and 103M.

BME 343. Biomedical Engineering Signal and Systems Analysis.

Restricted to biomedical engineering majors. Signals and systems representation; sampling and quantization; time and frequency domains; Laplace and z-transforms, transfer functions, and frequency response; two-port networks; Bode plots; convolution; stability; Fourier series; Fourier transform; AM/FM modulation; filter design; and applications in biomedical engineering. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 314 or 214L, and Mathematics 427K.

BME 344. Biomechanics.

Restricted to biomedical engineering majors. Analysis and modeling of biomechanical systems at the macroscopic scale based on principles of statics, dynamics, and strength of materials. Three lecture hours a week for one semester. Biomedical Engineering 344 and 377T (Topic: Biomechanics) may not both be counted. Prerequisite: Biomedical Engineering 314, Mathematics 427K, and Physics 303K.

BME 345. Graphics and Visualization Laboratory.

Restricted to biomedical engineering majors. Introduction to techniques for graphical display of biological data. Topics include transformations, geometric modeling, and two- and three-dimensional display algorithms. Includes computational projects with biomedical applications. Four and one half laboratory hours a week for one semester. Prerequisite: Electrical Engineering 422C (or 322C) and Mathematics 340L.

BME 245L. Experimental Principles of Biomedical Engineering Design.

Restricted to biomedical engineering majors. Further exploration of biomedical engineering design principles through open-ended hands-on applications. Two lecture hours and three laboratory hours a week for

one semester. Biomedical Engineering 221 and 245L may not both be counted. Offered on the letter-grade basis only. Prerequisite: Biomedical Engineering 311, 113L, 214L, 333T, 335, and credit or registration for Biomedical Engineering 343 and 365R.

BME 346. Computational Biomolecular Engineering.

Introduction to computational structural biology and molecular modeling, including the fundamentals of biomolecular structure and molecular thermodynamics. The principles and applications of biomolecular modeling used to explore the critical relationship between structure, function, and thermodynamic driving forces in molecular biology. Two lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Biology 311C, Biomedical Engineering 113L, and Chemistry 353 or 353M.

BME 347. Fundamentals of Biomedical Optics.

Restricted to biomedical engineering majors. Fundamentals of the interaction of light with tissue for the purpose of imaging and treatment of disease. Focuses on quantitative modeling of tissue optical properties, light propagation in the tissue, heat transfer of laser irradiated tissue, and thermal damage models. Includes discussion of applications in laser surgery, pulse oximetry, and disease diagnosis using spectroscopy. Three lecture hours a week for one semester. Biomedical Engineering 347 and 377T (Topic: Fundamentals of Biomedical Engineering Optical Imaging) may not both be counted. Prerequisite: Biomedical Engineering 251.

BME 348. Modeling of Biomedical Engineering Systems.

Restricted to biomedical engineering majors. Lumped and distributed models of physiological system function from molecular through organismal levels. Linear system steady-state and transient behaviors. Interactions among multiple energy domains, including electrical, chemical, diffusional, mechanical, fluid, and thermal. Introduction to feedback control. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 311, 113L, and 314, and Mathematics 427K.

BME 349. Biomedical Instrumentation.

Restricted to biomedical engineering majors. Biomedical diagnostic and therapeutic instrumentation devices and application. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Biomedical Engineering 343.

BME 251. Biomedical Image, Signal, and Transport Process Laboratory.

Restricted to biomedical engineering majors. Processing and analysis of signals and images recorded from human studies or models. Lab projects are drawn from image digitization and reconstruction, mechanical studies conducted by students, and transport models. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 221 and Mathematics 427K.

BME 352. Engineering Biomaterials.

Restricted to biomedical engineering majors. Overview of properties of metallic, ceramic, polymeric, and composite biomaterials used in biomedical applications. Material synthesis and processing. Analysis of mechanical and chemical properties, including stress-strain. Material interactions with the body and blood. Soft and hard biomaterials applications. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 314 and 221.

BME 353. Transport Phenomena in Living Systems.

Restricted to biomedical engineering majors. Modeling and analysis of momentum, energy, and mass transport in living systems. Three lecture

hours a week for one semester. Prerequisite: Biomedical Engineering 113L, 314, Chemistry 353 or 353M, and Mathematics 427K.

BME 354. Molecular Sensors and Nanodevices for Biomedical Engineering Applications.

Introduction to major types of molecular sensor systems, device miniaturization, and detection mechanisms, including molecular capture mechanisms; electrical, optical, and mechanical transducers; micro-array analysis of biomolecules; semiconductor and metal nanosensors; microfluidic systems; and microelectromechanical systems (MEMS, BioMEMS) fabrication and applications for biomedical engineering. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 314 and 352.

BME 355. Molecular Engineering.

Restricted to biomedical engineering majors. Biomedical applications of molecular engineering, including manufacturing of chemical, protein, and genetic materials. Three hours of lecture a week for one semester. Offered on the letter-grade basis only. Prerequisite: Chemistry 353 or 353M.

BME 357. Biomedical Imaging Modalities.

Introduction to major biomedical imaging modalities, including X-ray radiography, computed tomography (CT), nuclear medicine (SPECT and PET), magnetic resonance imaging (MRI), and ultrasound. Emphasis on principles, approaches, and applications of each imaging modality. Basic physics and imaging equations of the imaging system; hardware and software; sources of noise and primary artifacts; safety and patient risk. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 348 and 251.

BME 358. Medical Decision Making.

Restricted to biomedical engineering majors. Understanding of the nature of expertise and related subjects of cognitive psychology and human-made interaction to be able to design more effective systems for supporting medical decision making. Three lecture hours a week for one semester. Biomedical Engineering 358 and 377T (Topic: Medical Decision-Making) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Biomedical Engineering 335 and 365R.

BME 359. Cellular and Molecular Biomechanics.

Restricted to biomedical engineering majors. Understanding concepts of biomechanics at the cellular and molecular level. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 344 and 353.

BME 261L. Development and Analysis in Biomedical Engineering Design.

Restricted to biomedical engineering majors. Further exploration of biomedical engineering design principles through open-ended hands-on applications. Two lecture hours and three laboratory hours a week for one semester. Biomedical Engineering 251 and 261L may not both be counted. Offered on the letter-grade basis only. Prerequisite: Biomedical Engineering 245L and 343.

BME 362. Introduction to Nonlinear Dynamics in Biological Systems.

Restricted to biomedical engineering majors. Three lecture hours a week for one semester. Biomedical Engineering 362, and 377T (Topic: Introduction to Nonlinear Dynamics in Biological Systems) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Biomedical Engineering 344.

BME 365R. Quantitative Engineering Physiology I.

Restricted to biomedical engineering majors. A quantitative, model-oriented approach to vertebrate systems physiology, including basic cellular physiology, electrophysiology of nerve and muscle, the motor system, the central nervous system, and the cardiovascular system. Three lecture hours and two recitation hours a week for one semester. Prerequisite: Biology 205L or 206L; Biomedical Engineering 311, and 214L or 314; Chemistry 339K or 369; Mathematics 427K; Physics 303L and 103N; and credit or registration for Biomedical Engineering 343.

BME 365S. Quantitative Engineering Physiology II.

Restricted to biomedical engineering majors. Biological control systems: sensory, renal, respiratory, and immune systems. Focuses on a quantitative, model-oriented approach to physiological systems. Three lecture hours and two recitation hours a week for one semester. Prerequisite: Biomedical Engineering 365R.

BME 370. Biomedical Engineering Capstone Design I.

Restricted to biomedical engineering majors. Structured methodologies for designing systems or to interface with living systems. Creative design, analysis, selection, development, and fabrication of biomedical components and systems. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 348, 251, 353, and 365S.

BME 371. Biomedical Engineering Capstone Design II.

Restricted to biomedical engineering majors. Development of team projects in biomedical engineering with emphasis on prototype development and quantitative analysis, and written and oral reporting of the outcome. Two lecture hours and four laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 335 and 370.

BME 374K. Biomedical Instrument Design.

Restricted to biomedical engineering, electrical engineering, or mechanical engineering majors. Application of electrical engineering principles in the design of electronic instrumentation at the circuit-board level for the measurement of pressure, temperature, flow, and impedance. Also includes the study of light intensity, bioelectric potentials, and stimulation devices such as pacemakers and defibrillators. Focus on design considerations specific to electro-medical environments, safety and efficacy, and public policy issues. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 311 and Electrical Engineering 438, or Electrical Engineering 313 and 438.

BME 374L. Applications of Biomedical Engineering Laboratory.

Restricted to biomedical engineering, electrical engineering, or mechanical engineering majors. An in-depth examination of selected topics in biomedical engineering, including optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; and noninvasive cardiovascular measurements. Students have the opportunity to design analog and digital measurements and acquire and process meaningful biomedical signals. Three lecture hours and six laboratory hours a week for one semester. Prerequisite: Biomedical Engineering 374K or Electrical Engineering 374K.

BME 376. Cell Engineering.

Introduction to principles that govern the structure, organization, and processes at cellular and subcellular levels. Special focus on engineering and quantitative aspects of cellular machinery. Employs engineering approaches to study receptors, macromolecular complexes, and cellular signaling; clinical and pharmaceutical approaches to perturb cellular structure and function for disease prevention and drug design. State-

of-the-art experimental and computational techniques to study cellular engineering. Three lecture hours a week for one semester. Prerequisite: Biology 311C, Biomedical Engineering 314, and Mathematics 408C.

BME 177, 277, 377. Undergraduate Research Project.

Restricted to biomedical engineering majors. Recommended for students considering graduate study. Topic is selected in conjunction with a faculty member in the Department of Biomedical Engineering or in another approved University department. A final written report or the equivalent is required. Three, six, or nine laboratory hours a week for one semester.

BME 377M. Medical Internship.

Restricted to biomedical engineering majors. Designed for students considering medical school. Students participate in a variety of medical and clinical activities, including clinical inpatient rounds, outpatient visits, operating room procedures, and medical grand rounds. The equivalent of three lecture hours a week for one semester.

BME 377P. Integrated Clinical Research Internship.

Restricted to biomedical engineering majors. Students perform integrated clinical research at the University of Texas M.D. Anderson Cancer Center and the University of Texas Health Science Center at Houston. Requires a substantial final report. The equivalent of three lecture hours a week for one semester.

BME 377Q. Integrated Clinical Medical Internship.

Restricted to biomedical engineering majors. Students work with physicians at either the University of Texas M.D. Anderson Cancer Center or the University of Texas Health Science Center at Houston and participate in a variety of clinical routines. Requires a substantial final report. The equivalent of three lecture hours a week for one semester.

BME 377R. Research Internship.

Restricted to biomedical engineering majors. Students perform biomedical research with a faculty member at an approved institution. Requires a substantial final report. The equivalent of three lecture hours a week for one semester.

BME 377S. Industrial Internship.

Restricted to biomedical engineering majors. Students conduct research in biomedical companies in Texas and nationwide. Research may include development, management, business administration, and other topics. Requires a substantial final report. The equivalent of three lecture hours a week for one semester.

BME 177T, 277T, 377T. Topics in Biomedical Engineering.

Restricted to biomedical engineering majors. One, two, or three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

BME 678. Undergraduate Thesis in Biomedical Engineering.

Restricted to biomedical engineering majors. Research performed during two consecutive semesters under the supervision of a biomedical engineering faculty member or other approved faculty member; topics are selected jointly by the student and faculty member. The student provides a progress report at the end of the first semester and writes a thesis and gives an oral presentation at the end of the second semester. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a Bachelor of Science in Biomedical Engineering may use this course to fulfill the thesis requirements for the Bachelor of Arts, Plan II. Prerequisite: For 678A, admission to the major sequence in biomedical engineering and a University grade point average of at least

3.50; for 678B, a University grade point average of at least 3.50 and Biomedical Engineering 678A.

BME 379. Tissue Engineering.

Restricted to biomedical engineering majors. Introduction to biomedical research in tissue engineering. Includes case studies of tissues and organs of the body, physiology and biology of tissue, pathologies of tissue, current clinical treatments, the role of engineers in development of new technologies to diagnose and treat pathologies, quantitative cellular and molecular techniques, and applications of synthetic and natural biomaterials. Three lecture hours a week for one semester. Only one of the following may be counted: Biomedical Engineering 379, Chemical Engineering 339T, 379 (Topic: Cell and Tissue Engineering). Prerequisite: Biology 311C and Biomedical Engineering 352 and 365S.

BME 679H. Undergraduate Honors Thesis.

Restricted to biomedical engineering majors. Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Biomedical Engineering 679HA and enrollment in the Engineering Honors Program.

Department of Chemical Engineering

Chemical Engineering: CHE

Lower-Division Courses

CHE 102. Introduction to Chemical Engineering.

Restricted to freshmen. Introduction to chemical engineering, including problem solving and study skills. Opportunities and responsibilities of a career in chemical engineering. One lecture hour and one recitation hour a week for one semester. May not be counted toward any engineering degree. Offered on the pass/fail basis only.

CHE 210. Introduction to Computing.

Computer programming focusing on basics of computing, high-level programming environments, and spreadsheets, with application to chemical engineering. Two lecture hours and one laboratory hour a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: A major in chemical engineering or consent of instructor.

CHE 311. Engineering Sustainable Technologies.

Flows of materials and energy in engineering environments at local, regional, and global scales, and the interaction of those anthropogenic flows with natural cycles of materials and energy. Discusses biogeochemical flows (grand cycles) and anthropogenic material flows at the national level, in industrial sectors, and for consumer products. Three lecture hours a week for one semester. Prerequisite: A high school course in chemistry and experience with Internet searches.

CHE 317. Introduction to Chemical Engineering Analysis.

Principles and applications of material and energy balances in process analysis. Three lecture hours and one to two recitation hours a week for one semester. Chemical engineering majors must make a grade of at least C- in this course in order to take upper-division courses in chemical

engineering. Prerequisite: Chemical Engineering 210, Chemistry 302, and Mathematics 408D with a grade of at least C- in each.

CHE 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Chemical Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the McKetta Department of Chemical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses

CHE 322. Thermodynamics.

Introductory course in thermodynamics with special reference to chemical process applications: basic laws, thermodynamic properties of single component systems, expansion and compression of fluids, heat engines, multicomponent systems, physical equilibrium, chemical equilibrium. Three lecture hours and one recitation hour a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 210, 317, Chemistry 353, and Mathematics 427K with a grade of at least C- in each.

CHE 322M. Molecular Thermodynamics.

Statistical and molecular concepts, especially the role of the microscopic chemical potential. Three lecture hours a week for one semester. Chemical Engineering 322M and 379 (Topic: Molecular Thermodynamics) may not both be counted. Prerequisite: Upper-division standing, Chemical Engineering 322 or the equivalent, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 323. Chemical Engineering for Micro- and Nanofabrication.

Definition and description of the terminology and processes of microelectronics, including semiconductor facilities and chemical processes for integrated circuit manufacture, with an emphasis on unit processes; the major unit process, including thin-film metals and dielectrics deposition and etching, silicon oxidation and etching, ion implantation, diffusion, lithography, planarization, and process control; and an overview of promising nanopatterning and nanofabrication techniques, such as particle-beam imaging, nanoimprint, and near-field probe imaging, implantation, diffusion, lithography, planarization, and process control. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, Chemistry 318M or 310M, and 318N or 310N, and admission to an appropriate major sequence in engineering or consent of department.

CHE 325L. Cooperative Engineering.

This course covers the work period of chemical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Chemical Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. May be repeated for credit. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Chemical Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Chemical Engineering 325LY and appointment for a full-time cooperative work tour.

CHE 225M. Cooperative Engineering.

This course covers the work period of chemical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Chemical Engineering

225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Chemical Engineering 225MA and appointment for a full-time cooperative work tour.

CHE 125N. Cooperative Engineering.

This course covers the work period of chemical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Chemical Engineering 325LZ or 225MB, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

CHE 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Chemical Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the McKetta Department of Chemical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

CHE 333T. Engineering Communication.

Advanced technical communication skills, with emphasis on writing strategies for technical documents, oral presentations, and visual aids. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and admission to an appropriate major sequence in engineering.

CHE 339. Introduction to Biochemical Engineering.

Microorganisms in chemical and biochemical syntheses; genetic manipulation of cells by classical and recombinant DNA techniques. Enzyme technology; design of bioreactors and microbial fermentations; separations of biological products. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 335, Biomedical Engineering 339, Chemical Engineering 339, 379 (Topic: Introduction to Biochemical Engineering). Prerequisite: Upper-division standing; Biology 311C and Chemistry 353; and admission to an appropriate major sequence in engineering or consent of the undergraduate faculty adviser.

CHE 339P. Introduction to Biological Physics.

Diffusion, dissipation, and driving forces in cellular processes. Locomotion of bacteria, basic modeling of biomolecular folding and binding events, osmotic flows, and self-assembly in cells. Three lecture hours a week for one semester. Chemical Engineering 339P and 379 (Topic: Molecular Driving Force in Biology) may not both be counted. Prerequisite: Chemical Engineering 322, 353, and 253K with a grade of at least C- in each, or consent of the department.

CHE 339T. Cell and Tissue Engineering.

Introduction to biomedical research in tissue engineering. Includes case studies of tissues and organs of the body, physiology and biology of tissue, pathologies of tissue, current clinical treatments, the role of engineers in development of new technologies to diagnose and treat pathologies, quantitative cellular and molecular techniques, and applications of synthetic and natural biomaterials. Three lecture hours a week for one semester. Only one of the following may be counted: Biomedical Engineering 379, Chemical Engineering 339T, 379 (Topic: Cell and Tissue Engineering). Prerequisite: Biology 311C and Chemical Engineering 350.

CHE 341. Design for Environment.

Overview of environmental assessment tools for chemical processes and products, including life cycle and risk assessments. Overview of design tools for improving environmental performance of chemical processes, including unit operations and flowsheet analysis methods. Three lecture hours a week for one semester. Only one of the following may be counted: Chemical Engineering 341, 384 (Topic: Design for Environment), 395K. Prerequisite: Upper-division standing, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 342. Chemical Engineering Economics and Business Analysis.

Study of the economic decisions faced by chemical engineers. Discounted cash flow techniques. Personal finance, managerial economics, and other special topics. Three lecture hours a week for one semester. Only one of the following may be counted: Chemical Engineering 342, 384 (Topic: Chemical Engineering Economics and Business Analysis), 395G. Prerequisite: Upper-division standing, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 348. Numerical Methods in Chemical Engineering and Problem Solving.

Numerical solutions to algebraic and differential equations; numerical methods to integration, interpolation, and regression analysis, with application to chemical engineering. Three lecture hours and one recitation hour a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 210, 317, and Mathematics 427K with a grade of at least C- in each.

CHE 350. Chemical Engineering Materials.

Metallic, ceramic, polymeric, and composite materials. Crystal structures, phase diagrams, diffusion, and mechanical properties. Emphasis on structure-property-processing relationships. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; Chemistry 353 with a grade of at least C-; and admission to an appropriate major sequence in engineering or consent of the department.

CHE 353. Transport Phenomena.

Basic study of momentum, energy and mass transport; includes viscous and turbulent flow; heat transfer and mass diffusion. Three lecture hours and one to two recitation hours a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 317 and Mathematics 427K with a grade of at least C- in each.

CHE 253K. Applied Statistics.

Statistical methods such as data exploration and summary, least-squares fitting, probability and probability distributions, statistical inference and hypothesis testing, analysis of variance, design of experiments, statistical quality control, and use of professional statistical software. Two lecture hours a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 210, 317, and Mathematics 427K with a grade of at least C- in each.

CHE 253M. Measurement, Control, and Data Analysis Laboratory.

Laboratory safety; measurement and statistical analysis of transport process variables like temperature, pressure, and flow rate; computer data acquisition; feedback control; statistical process control and design of experiments; and production of professional-level lab reports. Five laboratory hours a week for one semester. Prerequisite: Chemical Engineering 333T, 353, and 253K with a grade of at least C- in each.

CHE 354. Transport Processes.

Design and analysis of heat exchangers, fluid-flow systems and equipment, and interphase-contact devices. Three lecture hours and one recitation hour a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 348 and 353 with a grade of at least C- in each.

CHE 355. Introduction to Polymers.

Synthesis, structural characterization, physical properties, and applications of polymers. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, Chemical Engineering 322, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 356. Optimization: Theory and Practice.

Techniques of optimization, including formulation of optimization problems, one-dimensional search techniques, analytical methods, and n-dimensional search techniques; application of methods to process-industry problems. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, Chemical Engineering 348 and 353, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 357. Technology and Its Impact on the Environment.

Study of sources and fates of environmental pollutants; environmental quality standards--their measurement and regulation; and pollution control design procedures. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 359. Energy Technology and Policy.

Technology and policy related to energy supply and demand, oil and gas production, coal utilization, hydrogen production, fuel cells, transportation, nuclear power, solar and wind energy, biomass utilization, energy conservation, and climate change. Three lecture hours a week for one semester. Only one of the following may be counted: Chemical Engineering 359, 379 (Topic: Energy Technology and Policy), 384 (Topic: Energy Technology and Policy). Prerequisite: Upper-division standing, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 360. Process Control.

Analysis of process dynamics and methods for the design of automatic control systems for chemical process plants. Three lecture hours and one to two recitation hours a week for one semester. Prerequisite: Chemical Engineering 322, 253M, and 354 with a grade of at least C- in each.

CHE 363. Separation Processes and Mass Transfer.

Design and analysis of equilibrium and mass transfer based on separations such as absorption, chromatography, crystallization, distillation, extraction, and membrane-based processes. Three lecture hours and one to two recitation hours a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 322 and 353 with a grade of at least C- in each.

CHE 264. Chemical Engineering Process and Projects Laboratory.

Experimental studies of unit operations. Laboratory safety. Statistical data analysis. Written and oral reports. Six laboratory hours a week for one semester. Prerequisite: Chemical Engineering 253M and 363 with a grade of at least C- in each. Students must register in the undergraduate advising office.

CHE 372. Chemical Reactor Analysis and Design.

Planning and design of commercial chemical and biochemical reaction systems for producing fuels, polymers, specialty and consumer products, pharmaceuticals, solid-state devices, and other products. Three lecture hours and one recitation hour a week for one semester. Chemical engineering majors must make a grade of at least C- in this course. Prerequisite: Chemical Engineering 322, 348, and 354 with a grade of at least C- in each.

CHE 473K. Process Design and Operations.

Process design, economics, and safety; design projects representing a variety of industries and products. Three lecture hours and two recitation hours a week for one semester. Prerequisite: Chemical Engineering 354, 363, and 372 with a grade of at least C- in each.

CHE 376K. Process Evaluation and Quality Control.

Use of statistical techniques to evaluate, compare, and optimize processes. Design of experiments for improved product quality control. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 177K, 277K, 377K. Undergraduate Research Project.

Recommended for students considering graduate study. Topic to be selected in conjunction with individual chemical engineering faculty member, with approval by the department chair. A final written report is required. Three, six, or nine laboratory hours a week for one semester. Prerequisite: A grade point average of at least 3.00 in chemical engineering courses. Students must register in the undergraduate advising office.

CHE 179, 279, 379, 479. Topics in Chemical Engineering.

Special topics of current interest. The equivalent of one, two, three, or four lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, and admission to an appropriate major sequence in engineering or consent of the department.

CHE 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of a chemical engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the department chair. The student makes two oral presentations and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and the Bachelor of Science in Chemical Engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Chemical Engineering Honors Program; for 679HB, enrollment in the Chemical Engineering Honors Program and credit for Chemical Engineering 679HA.

Department of Civil, Architectural, and Environmental Engineering

Architectural Engineering: ARE

Lower-Division Courses

ARE 102. Introduction to Architectural Engineering.

Introduction to architectural engineering as a career by use of case studies. One lecture hour a week for one semester. Offered in the fall semester only. Prerequisite: A major in architectural engineering, civil engineering, or architecture, or consent of instructor.

ARE 217. Computer-Aided Design and Graphics.

Introduction to procedures in computer-aided design and computer graphics used in producing plans and three-dimensional electronic models associated with building design and construction. Three hours of lecture and laboratory a week for one semester.

ARE 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Architectural Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

ARE 320K. Introduction to Design I.

Introduction to design principles, concepts, and problem-solving approaches. Issues addressed by a series of two- and three-dimensional studies. Nine laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Credit or registration for Architectural Engineering 217.

ARE 320L. Introduction to Design II.

Continuation of Architectural Engineering 320K. Focus on building design. Nine laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Architectural Engineering 320K and credit or registration for Architectural Engineering 335.

ARE 323K. Project Management and Economics.

Solving economic problems related to construction and engineering; construction project management techniques; characteristics of construction organizations, equipment, and methods. Three lecture hours a week for one semester. Prerequisite: Mathematics 408D or 408M.

ARE 325L. Cooperative Engineering.

This course covers the work period of architectural engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Architectural Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. May be repeated for credit. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Architectural Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Architectural Engineering 325LY and appointment for a full-time cooperative work tour.

ARE 225M. Cooperative Engineering.

This course covers the work period of architectural engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Architectural Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Architectural Engineering 225MA and appointment for a full-time cooperative work tour.

ARE 125N. Cooperative Engineering.

This course covers the work period of architectural engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Architectural Engineering 325LZ or 225MB, application to become a member of the

Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

ARE 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Architectural Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

ARE 335. Materials and Methods of Building Construction.

Elements and properties of construction materials and components; fabrication and construction technologies, methods, and processes; engineering systems characteristic of commercial buildings such as foundation, structural, and building envelope systems. Three or four lecture and discussion hours a week for one semester. Prerequisite: Architectural Engineering 320K, Civil Engineering 314K, and admission to the major sequence in architectural engineering.

ARE 345K. Masonry Engineering.

Behavior and design of masonry with respect to architectural, economic, and structural criteria. Four and one-half hours a week for one semester, including lecture and laboratory. Prerequisite: Civil Engineering 329 and credit or registration for Civil Engineering 331.

ARE 346N. Building Environmental Systems.

Analysis and design of building air conditioning systems; heating and cooling load calculations, air side systems analysis, air distribution, building electrical requirements, electrical and lighting systems. Three lecture hours a week for one semester. Prerequisite: Physics 303L and 103N, and credit or registration for Mechanical Engineering 320 or 326.

ARE 346P. HVAC Design.

Design and analysis of heating, ventilation, and cooling systems for buildings. Focus on application of fundamental energy and mass transfer principles to HVAC components. Three lecture hours a week for one semester. Prerequisite: Architectural Engineering 346N or consent of instructor.

ARE 358. Cost Estimating in Building Construction.

Building construction estimating from plans and specifications, unit prices, lump sum estimates, job sites, overhead, general overhead, and bidding procedures. Estimating methods throughout the design process. Two lecture hours and three supervised laboratory hours a week for one semester. Prerequisite: Architectural Engineering 335 and admission to the major sequence in architectural engineering. Experience reading construction blueprints is recommended.

ARE 362L. Structural Design in Wood.

Engineering properties of wood; design of glued-laminated and lumber structural members, connections, and simple systems; introduction to shear walls and diaphragms. Five hours of lecture and supervised work a week for one semester. Prerequisite: Civil Engineering 329.

ARE 465. Integrated Design Project.

Design of low-rise buildings, including structural and environmental systems; preparation of contract documents. Six hours a week for one semester, including lecture and laboratory. Prerequisite: Architectural Engineering 217, 320L, 335, and 346N; Civil Engineering 331 or 335, and

357; with approval of the department, Civil Engineering 331, 335, or 357 may be taken concurrently with Architectural Engineering 465.

ARE 366. Contracts, Liability, and Ethics.

Legal aspects of engineering and construction contracts; contract formation, interpretation, rights and duties, and changes; legal liabilities and professional ethics of architects, engineers, and contractors. Two lecture hours and two laboratory hours a week for one semester. Prerequisite: Admission to the major sequence in civil engineering or architectural engineering.

ARE 370. Design of Energy Efficient and Healthy Buildings.

Design and analysis of sustainable buildings, envelopes and facades, and energy and resource use in energy efficient and healthy buildings. Applies building science principles used to avoid moisture problems, minimize sick-building syndrome symptoms, and reduce energy use. Three lecture hours a week for one semester. Prerequisite: Architectural Engineering 346N.

ARE 371. Energy Simulation in Building Design.

Fundamentals of building energy simulations, analytical models for heat transfer in buildings, general numerical methods for solving equations from the analytical models, use of energy simulation tools in building design analysis, and parametric analyses used to study various operational parameters that affect energy use in buildings. Three lecture hours a week for one semester. Prerequisite: Architectural Engineering 346N or consent of instructor.

ARE 372. Modeling of Air and Pollutant Flows in Buildings.

Fundamentals of indoor airflow modeling; use of computational fluid dynamics (CFD) for air quality and thermal comfort analyses; application of CFD for analysis of air velocity, temperature, humidity, and contaminant distributions with different ventilation systems. Three lecture hours a week for one semester. Prerequisite: Architectural Engineering 346N, Civil Engineering 319F, or consent of instructor.

ARE 376. Building Information Modeling for Capital Projects.

Focuses on the skills and information needed to effectively use an existing Building Information Model for a building construction project. In this project-based course, students gain knowledge on the implementation of BIM concepts throughout the life cycle of a building from planning and design to construction and operations. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Architectural Engineering 323K.

ARE 177K, 277K, 377K. Studies in Architectural Engineering.

Various specified topics or conference course. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; additional hours may be required for some topics. Some topics offered on the pass/fail basis only. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

ARE 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Architectural Engineering 679HA and enrollment in the Engineering Honors Program.

Civil Engineering: C E

Lower-Division Courses

C E 301. Civil Engineering Systems.

Introduction to civil engineering as a career; engineering problem solving; use of computers for text, graphics, and data analysis; introduction to civil engineering measurements; breadth of disciplines within civil engineering; engineering ethics, sustainability. Two lecture hours and three laboratory hours a week for one semester.

C E 311K. Introduction to Computer Methods.

Organization and programming of civil engineering problems for computer solutions. Five hours a week for one semester, including lecture and laboratory. Prerequisite: Credit or registration for Mathematics 408D or 308L.

C E 311S. Probability and Statistics for Civil Engineers.

Basic theory of probability and statistics with practical applications to civil engineering problems, including statistical inference and sampling. Additional subjects may include reliability and risk analyses, estimation and regression analyses, and experimental design. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Mathematics 408D or 408M.

C E 319F. Elementary Mechanics of Fluids.

Fluid properties, hydrostatics, elements of fluid dynamics, energy and momentum, boundary layers, similitude, pipe flow, metering instruments, drag forces. Three lecture hours and two laboratory hours a week for one semester. Civil Engineering 319F and Mechanical Engineering 330 may not both be counted. Prerequisite: Engineering Mechanics 306.

C E 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Civil Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

C E 321. Transportation Systems.

Planning, economics, location, construction, operation, maintenance, and design of transportation systems; concepts of various modes of transportation. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 311S.

C E 324P. Properties and Behavior of Engineering Materials.

Structure, properties, and behavior of engineering materials, including concrete and metals. Laboratory exercises illustrate mechanical behavior of typical materials and demonstrate selected principles of mechanics. Six hours of lecture, laboratory, and supervised work a week for one semester. Civil Engineering 314K and 324P may not both be counted. Prerequisite: Chemistry 301 and Engineering Mechanics 319.

C E 325L. Cooperative Engineering.

This course covers the work period of civil engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Civil Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. May be repeated for credit. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean,

and appointment for a full-time cooperative work tour; for 325LY, Civil Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Civil Engineering 325LY and appointment for a full-time cooperative work tour.

C E 225M. Cooperative Engineering.

This course covers the work period of civil engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Civil Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Civil Engineering 225MA and appointment for a full-time cooperative work tour.

C E 125N. Cooperative Engineering.

This course covers the work period of civil engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Civil Engineering 325LZ or 225MB, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

C E 329. Structural Analysis.

Classical methods of analysis for determinate and indeterminate structures under stationary and moving loads. Four hours of lecture and supervised work a week for one semester. Prerequisite: Engineering Mechanics 319 and Civil Engineering 311K.

C E 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Civil Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

C E 331. Reinforced Concrete Design.

Design of reinforced concrete beams and columns. Five hours of lecture and supervised work a week for one semester. Prerequisite: Civil Engineering 314K and 329.

C E 333T. Engineering Communication.

Technical communication skills for engineers, especially researching and writing technical documents for many kinds of readers, managing and documenting sources of information, using and explaining graphics, delivering oral presentations, working collaboratively, and eliciting information from experts and stakeholders. Two lecture hours and one and one half laboratory hours a week for one semester. Civil Engineering 333H and 333T may not both be counted. Prerequisite: Rhetoric and Writing 306 and admission to an appropriate major sequence in architectural or civil engineering.

C E 335. Elements of Steel Design.

Analysis and design of tension members, beams, columns, and bolted and welded connections. Five hours of lecture and supervised work a week for one semester. Prerequisite: Civil Engineering 314K and 329.

C E 341. Introduction to Environmental Engineering.

Quantitative evaluation of the environmental, economic, and technical problems involved in control of pollutants of the air, water, and land. Three

lecture hours a week for one semester. Prerequisite: Chemistry 301 and 302, or consent of instructor.

C E 342. Water and Wastewater Treatment Engineering.

Application of chemical, biological, and physical principles to the analysis and design of treatment processes for drinking water, industrial process water, municipal wastewater, and water reuse applications. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Civil Engineering 319F and credit for Civil Engineering 341, or consent of instructor.

C E 346. Solid Waste Engineering and Management.

Characteristics of municipal and industrial solid wastes, generation rates, collection systems, recycling, processing, and disposal. Three lecture hours a week for one semester, with occasional field trips. Prerequisite: Civil Engineering 341 or consent of instructor.

C E 351. Concrete Materials.

Portland cement, aggregates, supplementary cementing materials, properties of fresh and hardened concrete, concrete durability, mixture proportioning, concrete construction, special concretes. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Civil Engineering 314K.

C E 356. Elements of Hydraulic Engineering.

Flow in closed conduits, hydraulic machinery; open-channel flow; flow measurement; design of storm sewers. Five hours a week for one semester, including lecture and laboratory. Prerequisite: Civil Engineering 319F.

C E 357. Geotechnical Engineering.

Engineering properties of soils; hydraulic conductivity and shear strength of soils; soil compaction and consolidation; stresses with the soil mass; settlement of foundations of structures; laboratory measurements. Six hours a week for one semester, including lecture and laboratory. Prerequisite: Civil Engineering 319F and Engineering Mechanics 319.

C E 358. Introductory Ocean Engineering.

Wave theory and its applications to coastal engineering and offshore structure technology. Includes fundamentals of inviscid and viscous flow of incompressible fluids, and applications of computational fluid dynamics (CFD) in design. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 319F or consent of instructor.

C E 360K. Foundation Engineering.

Effect of geotechnical conditions on the behavior, proportioning, and choice of foundation type; design of shallow and deep foundations; study of foundation case histories. Five hours a week for one semester, including lecture and discussion. Offered in the fall semester only. Prerequisite: Civil Engineering 357.

C E 362M. Advanced Reinforced Concrete Design.

Design of reinforced concrete buildings, including floor systems and structural walls. Five hours of lecture and supervised work a week for one semester. Prerequisite: Civil Engineering 331.

C E 362N. Advanced Steel Design.

Design of steel buildings, beam columns, composite beams, plate girders, and connections. Five hours of lecture and supervised work a week for one semester. Prerequisite: Civil Engineering 335.

C E 363. Advanced Structural Analysis.

Structural analysis for forces and deflections using stiffness and flexibility approaches; application of energy methods in structural analysis; stiffness

methods for computer-based structural analysis. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 329.

C E 364. Design of Wastewater and Water Treatment Facilities.

Analysis, synthesis, and integrated design of municipal wastewater treatment plants and water treatment systems. Three lecture hours a week for one semester; additional hours to be arranged for design laboratory and field trips. Prerequisite: Credit or registration for Civil Engineering 342 and credit for Civil Engineering 356, or consent of instructor.

C E 365K. Hydraulic Engineering Design.

Application of engineering hydraulics to stormwater management; storm sewer design; engineering hydrology; open-channel hydraulics; hydraulic structures; culverts and bridges; stormwater detention facilities. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 356.

C E 366K. Design of Bituminous Mixtures.

Fundamental properties of asphalt and aggregates; design and construction of asphalt mixtures; special mixtures; superpave design method. Three lecture hours a week for one semester. Prerequisite: Upper-division standing or consent of instructor.

C E 367G. Design and Evaluation of Ground-Based Transportation Systems.

Methods for design and evaluation of transportation systems, emphasizing roadway and non-motorized travel, in light of traveler safety, system operations, construction and maintenance costs, environmental impacts, and other considerations. Three lecture hours and two laboratory hours a week for one semester. Civil Engineering 367G and 377K (Topic: Design of Ground-Based Transportation) may not both be counted. Prerequisite: Civil Engineering 321 or consent of instructor.

C E 367P. Pavement Design and Performance.

Basic principles of design of pavements for highways, airfields, and railroads; pavement construction, maintenance, and rehabilitation. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 321, 357, and 366K.

C E 367T. Traffic Engineering.

Driver and vehicle characteristics, traffic studies, traffic laws and ordinances, intersection capacity, signs, markings, signals, bus transit, parking, design of street systems, and operational controls. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 321 or consent of instructor.

C E 369L. Air Pollution Engineering.

Characterization of sources, emissions, transport, transformation, effects, and control of air pollutants. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 341 or consent of instructor.

C E 369R. Indoor Air Quality.

Sources, properties, transport and fate, human exposure, and adverse responses to indoor air pollutants. Control strategies and engineered technologies to mitigate impacts of gaseous and particle phase air pollutants in indoor environments. Three lecture hours a week for one semester. Civil Engineering 369R and 377K (Topic: Indoor Air Quality) may not both be counted. Prerequisite: Civil Engineering 319F and admission to an appropriate major sequence in architectural or civil engineering, or consent of instructor.

C E 370K. Environmental Sampling and Analysis.

Principles of environmental chemistry; measurement of contaminants in air, water, and land environments; applications to municipal, industrial, and ambient samples. Six hours a week for one semester, including lecture and laboratory. Prerequisite: Upper-division standing in engineering and Civil Engineering 341, or consent of instructor.

C E 171P. Engineering Professionalism.

Examines professional engineering licensure, ethics, leadership, public service, and public policy, with an emphasis on multidisciplinary perspectives, legal and business considerations, and the importance of lifelong learning. Includes participation in a public service project. Two lecture hours a week for one semester, with additional fieldwork hours to be arranged. Prerequisite: Admission to the major sequence in civil engineering and credit or registration for one of the following: Civil Engineering 360K, 362M, 362N, 364, 365K, 367, 376.

C E 374K. Hydrology.

Phases of the hydrologic cycle, unit hydrograph, flow routing, hydrologic statistics, design storms and flows, design of storm sewers, detention ponds and water supply reservoirs. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 311S and 356.

C E 374L. Groundwater Hydraulics.

Darcy's law, steady flow in aquifers, aquifer and well testing, regional flow, numerical simulation of groundwater flow, unsaturated flow, and groundwater recharge. Three lecture hours a week for one semester. Prerequisite: Civil Engineering 356 or consent of instructor.

C E 375. Earth Slopes and Retaining Structures.

Earth fills, excavations, and dams; soil compaction and ground improvement, seepage and dewatering; stability of natural slopes and embankments; earth-pressure theories; design of earth retaining structures. Three lecture hours a week for one semester. Offered in the spring semester only. Prerequisite: Civil Engineering 357.

C E 177K, 277K, 377K. Studies in Civil Engineering.

Various specified topics or conference course. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. Additional hours may be required for some topics. Some topics are offered on the pass/fail basis only. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

C E 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Civil Engineering 679HA and enrollment in the Engineering Honors Program.

Department of Electrical and Computer Engineering

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University

courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Electrical Engineering: E E

Lower-Division Courses

E E 302 (TCCN: ENGR 2305). Introduction to Electrical Engineering.

The scope and nature of professional activities of electrical engineers, including problem-solving techniques; analysis and design methods; engineering professional ethics; analysis of analog resistive circuits, including Thevenin/Norton equivalents, mesh analysis, and nodal analysis; and operational amplifiers (DC response). Substantial teamwork is required for laboratory work in this course. Three lecture hours and two laboratory hours a week for one semester. Electrical Engineering 302 and 302H may not both be counted. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 408C or 408K.

E E 302H. Introduction to Electrical Engineering: Honors.

Restricted to students in the Engineering Honors Program. The scope and nature of professional activities of electrical engineers, including problem-solving techniques; analysis and design methods; engineering professional ethics; analysis of analog resistive circuits, including Thevenin/Norton equivalents, mesh analysis, and nodal analysis; and operational amplifiers (DC response). Three lecture hours and two laboratory hours a week for one semester. Electrical Engineering 302 and 302H may not both be counted. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 408C or 408K.

E E 306. Introduction to Computing.

Motivated, bottom-up introduction to computing; bits and operations on bits; number formats; arithmetic and logic operations; digital logic; the Von Neumann model of processing, including memory, arithmetic logic unit, registers, and instruction decoding and execution; introduction to structured programming and debugging; machine and assembly language programming; the structure of an assembler; physical input/output through device registers; subroutine call/return; trap instruction; stacks and applications of stacks. Three lecture hours and one recitation hour a week for one semester. Prerequisite: Credit with a grade of at least a C- or registration for Mathematics 408C or 408K.

E E 107S, 207S, 307S, 407S, 507S, 607S, 707S, 807S, 907S. Topics in Electrical Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Electrical and Computer Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

E E 309K. Topics in Electrical Engineering.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

E E 309S. Development of a Solar-Powered Vehicle.

Analysis, design, and construction of a solar-powered car for national competitions involving other universities. Study of electrical, mechanical, and aerodynamic systems. Three lecture hours and three laboratory hours a week for one semester. Electrical Engineering 309K (Topic: Development of a Solar Car for NASC) and 309S may not both be counted.

E E 411. Circuit Theory.

Capacitance and inductance; first- and second-order transient circuit response, including operational amplifier circuits; sinusoidal steady state analysis; Bode plots; complex power in single and balanced three-phase systems; transformers; two-port networks (Z-parameters and Y-parameters); and computer-aided analysis and design. Three lecture hours and two recitation hours a week for one semester. Prerequisite: Electrical Engineering 302 or 302H with a grade of at least C-; credit with a grade of at least C- or registration for Mathematics 427K; and credit with a grade of at least C- or registration for Physics 303L and 103N.

E E 312. Software Design and Implementation I.

Basic problem solving, design and implementation techniques for imperative programming; structured programming in the C/C++ language; programming idioms; introduction to software design principles, including modularity, coupling and cohesion; introduction to software engineering tools; elementary data structures; asymptotic analysis. Three lecture hours and one recitation hour a week for one semester. Prerequisite: The following coursework with a grade of at least C-: Biomedical Engineering 303 or Electrical Engineering 306, and Electrical Engineering 319K.

E E 313. Linear Systems and Signals.

Representation of signals and systems; system properties; sampling; Laplace and z-transforms; transfer functions and frequency response; convolution; stability; Fourier transform; feedback; and control applications. Computer analysis using MATLAB. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 411, 331, or Biomedical Engineering 311 with a grade of at least C-; Mathematics 427K with a grade of at least C-; and credit with a grade of at least C- or registration for Mathematics 340L.

E E 316. Digital Logic Design.

Boolean algebra; analysis and design of combinational and sequential logic circuits; state machine design and state tables and graphs; simulation of combinational and sequential circuits; applications to computer design; and introduction to hardware description languages (HDLs) and field-programmable gate arrays (FPGAs). Three lecture hours and one recitation hour a week for one semester. Prerequisite: Computer Science 429 or Electrical Engineering 306 with a grade of at least C-.

E E 319K. Introduction to Embedded Systems.

Embedded systems; machine language execution; assembly and C language programming; local variables and subroutines; input/output synchronization; analog to digital conversion and digital to analog conversion; debugging; and interrupts. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Biomedical Engineering 303 or Electrical Engineering 306 with a grade of at least C-.

Upper-Division Courses

E E 321K. Mixed Signal and Circuits Laboratory.

Digital and analog parametric testing of mixed-signal circuits and systems, including frequency response, harmonic and intermodulation, and noise behavior; use of system-level test equipment, including network analyzers, spectrum analyzers, and probe stations; coherent v. noncoherent measurements; design for testability. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 438 with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 422C. Software Design and Implementation II.

Methods for engineering software with a focus on abstraction; specification, design, implementation, and testing of object-oriented code using a modern development tool-set for complex systems; design and implementation of object-oriented programs in Java; abstract data types; inheritance; polymorphism; parameterized types and generic programming; the operation and application of commonly used data structures; exception handling and fault tolerance; introduction to algorithm analysis; teamwork models. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Computer Science 312 or Electrical Engineering 312 with a grade of at least C-.

E E 325. Electromagnetic Engineering.

Electrostatics and magnetostatics; properties of conductive, dielectric, and magnetic materials; solutions of Maxwell's equations; uniform plane wave applications; frequency- and time-domain analyses of transmission lines. Three lecture hours a week for one semester. Prerequisite: Physics 303L, 103N, and Mathematics 427K with a grade of at least C- in each, and credit with a grade of at least C- or registration for Mathematics 427L.

E E 325K. Antennas and Wireless Propagation.

Solutions of time-varying Maxwell's equations with applications to antennas and wireless propagation; antenna theory and design, array synthesis; electromagnetic wave propagation, scattering, and diffraction; numerical methods for solving Maxwell's equations. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 325 with a grade of at least C-.

E E 325L. Cooperative Engineering.

This course covers the work period of electrical and computer engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Electrical Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. May be repeated for credit. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Electrical Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Electrical Engineering 325LY and appointment for a full-time cooperative work tour.

E E 225M. Cooperative Engineering.

This course covers the work period of electrical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Electrical Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Electrical Engineering 225MA and appointment for a full-time cooperative work tour.

E E 125N. Cooperative Engineering.

This course covers the work period of electrical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Electrical Engineering 325LZ or 225MB, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

E E 125S. Internship in Electrical and Computer Engineering.

Practical work experience in industry or a research lab under the supervision of an engineer or scientist. Requires a substantial final report. At least ten hours of work a week, for a total of 150 hours a semester or summer session. May be repeated for credit, but only three hours may be

counted toward an electrical engineering degree. Offered on the pass/fail basis only. Prerequisite: Consent of the undergraduate adviser.

E E 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Electrical Engineering.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Electrical and Computer Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

E E 331. Electrical Circuits, Electronics, and Machinery.

Not open to electrical engineering majors. Brief theory of direct and alternating current circuits; single-phase and three-phase power transmission; electronic devices and instrumentation; electromechanics. Three lecture hours a week for one semester. Prerequisite: Mathematics 408D or 408M with a grade of at least C-, and Physics 303L and 103N with a grade of at least C- in each.

E E 333T. Engineering Communication.

Advanced engineering communication skills, with emphasis on technical documents, oral reports, and graphics; collaborative work involving online communication and research. Three lecture hours a week for one semester. Prerequisite: One of the following with a grade of at least C-: English 316L (or 316K), 316M (or 316K), 316N (or 316K), or 316P (or 316K).

E E 334K. Quantum Theory of Engineering Electronic Materials.

Introduction to quantum mechanics; atoms and molecules; electron statistics; quantum theory of solids; electronic phenomena in semiconductors; and device applications based on these phenomena. Three lecture hours a week for one semester. Prerequisite: Mathematics 427K, Physics 303L, and 103N with a grade of at least C- in each.

E E 438. Fundamentals of Electronic Circuits I Laboratory.

Analysis and design of electronic circuits using semiconductor devices. Basic device physics and small-signal modeling for diodes, bipolar junction transistors, and metal-oxide-semiconductor transistors; operation region and biasing; basic switching circuits; single-stage and multi-stage amplifier design and analysis; input and output impedance characteristics of amplifiers; frequency response; AC and DC coupling techniques; differential amplifiers and output stages. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 411 with a grade of at least C-; credit with a grade of at least C- or registration for Biomedical Engineering 343 or Electrical Engineering 313; and credit with a grade of at least C- or registration for one of the following: Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 438K. Analog Electronics.

Analysis and design of analog electronic circuits; transistor models; single-ended amplifiers; differential amplifiers; operational amplifiers; frequency response; feedback theory; stability analysis; circuit nonidealities; op-amp-based circuits; output stages; power amplifiers; passive and active analog filters; and relaxation oscillators. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 438 with a grade of at least C-.

E E 338L. Analog Integrated Circuit Design.

Analysis and design of analog integrated circuits; transistor models; simple and advanced current mirrors; single-ended amplifiers; differential amplifiers; operational amplifiers; frequency response; feedback theory; stability analysis; circuit nonidealities and noise; output stages; analog filters. CAD tools for circuit analysis and design. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 438 with a grade of at least C-.

E E 339. Solid-State Electronic Devices.

Semiconductor materials; atomic orbitals to energy band structure of semiconductors; charge carrier transport, electron-hole generation and recombination; p-n junctions and Schottky barriers; bipolar and field-effect transistors; and introduction to optoelectronic devices. Three lecture hours a week for one semester. Prerequisite: Mathematics 427K, Physics 303L, and 103N with a grade of at least C- in each.

E E 339S. Solar Energy Conversion Devices.

An investigation of basic principles of photovoltaic devices which convert light into charge carriers (electrons and holes). Topics include electrons and holes in semiconductors, generation and recombination, junctions, analysis of the p-n junction, silicon and III-V semiconductor solar cell design and optimization, thin film solar cell technologies, managing light, strategies for higher efficiency, and a brief overview of non-photovoltaic approaches to solar energy conversion. Electrical Engineering 339S and 379K (Topic 4: Solar Energy Conversion Devices) may not both be counted. Prerequisite: Credit with a grade of at least C- or registration for Electrical Engineering 339.

E E 440. Integrated Circuit Nanomanufacturing Techniques.

Integrated circuit processing; crystal growth and wafer preparation; epitaxial growth; oxidation, diffusion, and ion implantation; thin-film deposition techniques; and lithography and etching. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 339 with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 341. Electric Drives and Machines.

Fundamentals of electric machines. Electromechanical energy conversion; magnetic circuits, transformers, and energy conversion devices; and an introduction to power electronics. Motor drive fundamentals and applications. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 313 or 331 with a grade of at least C-.

E E 445L. Embedded Systems Design Laboratory.

Design of microcontroller-based embedded systems; interfacing from both a hardware and software perspective; and applications, including audio, data acquisition, and communication systems. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 312 and 319K with a grade of at least C- in each; Electrical Engineering 411 and 313, or Biomedical Engineering 311 and 343, with a grade of at least C- in each; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 445M. Embedded and Real-Time Systems Laboratory.

Embedded microcomputer systems; implementation of multitasking, synchronization, protection, and paging; operating systems for embedded microcomputers; design, optimization, evaluation, and simulation of

digital and analog interfaces; real-time microcomputer software; and applications, including data acquisition and robotics. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 445L (or 345L) or 445S (or 345S) with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 445S. Real-Time Digital Signal Processing Laboratory.

Architectures of programmable digital signal processors; programming for real-time performance; design and implementation of digital filters, modulators, data scramblers, pulse shapers, and modems in real time; and interfaces to telecommunication systems. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 312 and 319K with a grade of at least C- in each; Biomedical Engineering 343 or Electrical Engineering 313 with a grade of at least C-; credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T; and credit with a grade of at least C- or registration for Biomedical Engineering 335 or Electrical Engineering 351K.

E E 347. Modern Optics.

Modern optical wave phenomena with applications to imaging, holography, fiber optics, lasers, and optical information processing. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 313 and 325 with a grade of at least C- in each, or Biomedical Engineering 343 with a grade of at least C-.

E E 348. Laser and Optical Engineering.

Principles of operation and applications of lasers, optical modulators, and optical detectors. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 339 with a grade of at least C-.

E E 351K. Probability and Random Processes.

Probability, random variables, statistics, and random processes, including counting, independence, conditioning, expectation, density functions, distributions, law of large numbers, central limit theorem, confidence intervals, hypothesis testing, statistical estimation, stationary processes, Markov chains, and ergodicity. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 313 with a grade of at least C-.

E E 351M. Digital Signal Processing.

Sampling, aliasing, truncation effects; discrete and fast Fourier transform methods; convolution and deconvolution; finite and infinite impulse response filter design methods; Wiener, Kalman, noncausal, linear phase, median, and prediction filters; and spectral estimation. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 343 or Electrical Engineering 313 with a grade of at least a C-, and credit with a grade of at least C- or registration for Biomedical Engineering 335 or Electrical Engineering 351K.

E E 155. Electrical and Computer Engineering Seminar.

Presentations by speakers from industry, government, academia, and professional private practice. Topics include environmental and other ethical concerns, safety awareness, quality management, technical career descriptions, and professionalism. Substantial practice in engineering communication. One lecture hour a week for one semester. Electrical Engineering 155 and 364D may not both be counted. Prerequisite: One of

the following with a grade of at least C-: English 316L (or 316K), 316M (or 316K), 316N (or 316K), or 316P (or 316K).

E E 155L. Engineering Leadership Seminar.

Presentations by speakers from industry, government, academia, and professional private practice. Topics include environmental and other ethical concerns, safety awareness, quality management, technical career descriptions, and professionalism. One lecture hour a week for one semester. Prerequisite: Consent of the dean and one of the following with a grade of at least C-: English 316L (or 316K), 316M (or 316K), 316N (or 316K), or 316P (or 316K).

E E 155R. Undergraduate Research Seminar.

Restricted to students in electrical and computer engineering. Seminar on topics of research in electrical and computer engineering. One lecture hour a week for a semester. Offered on the pass/fail basis only.

E E 160, 260, 360, 460. Special Problems in Electrical and Computer Engineering.

Elective course open to upper-division students in electrical engineering for original investigation of special problems approved by the department. For each semester hour of credit earned, the equivalent of three laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Consent of instructor.

E E 360C. Algorithms.

Advanced problem solving methods; algorithm design principles; complexity analysis; study of the nature, impact, and handling of intractability; study of common algorithmic classes and their applications. Three lecture hours a week for one semester. Prerequisite: Computer Science 312 or Electrical Engineering 312 with a grade of at least C-; and Computer Science 313K or Mathematics 325K with a grade of at least C-.

E E 360F. Introduction to Software Engineering.

Introduction to the discipline of software engineering. Includes software system creation and evolution; fundamental concepts and principles of software product and software process systems, including requirements, architecture and design, construction, deployment, and maintenance; and documentation and document management, measurement and evaluation, software evolution, teamwork, and project management. Three lecture hours a week for one semester. Prerequisite: One of the following with a grade of at least C-: Computer Science 314 or 314H, or Electrical Engineering 422C (or 332C).

E E 360K. Introduction to Digital Communications.

Communication channels and their impairments; modulation; demodulation; probability-of-error analysis; source coding; error control coding; link budget analysis; equalization; synchronization and multiple access; spread spectrum; applications in wireline and wireless communication systems. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 335 or Electrical Engineering 351K with a grade of at least C-, and Biomedical Engineering 343 or Electrical Engineering 313 with a grade of at least C-.

E E 460M. Digital Systems Design Using HDL.

Organization, design, simulation, synthesis, and testing of digital systems; hardware description languages (HDLs); field programmable gate arrays (FPGAs); hardware implementation of arithmetic and other algorithmic processes; state machine charts; microprogramming; and microprocessor design. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 316 and 319K with a grade of at least C- in each.

E E 460N. Computer Architecture.

Characteristics of instruction set architecture and microarchitecture; physical and virtual memory; caches and cache design; interrupts and exceptions; integer and floating-point arithmetic; I/O processing; buses; pipelining, out-of-order execution, branch prediction, and other performance enhancements; design trade-offs; case studies of commercial microprocessors. Laboratory work includes completing the behavioral-level design of a microarchitecture. Three lecture hours and one and one-half laboratory/recitation hours a week for one semester. Prerequisite: Electrical Engineering 316 and 319K with a grade of at least C- in each.

E E 360P. Concurrent and Distributed Systems.

An investigation of concurrency, lock-based and lock-free synchronization, resource allocation, multi-threaded programming, distributed systems programming, mutual exclusion, global snapshots, global property evaluation, message ordering, consensus, Byzantine agreement, commit protocols. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 422C (or 322) with a grade of at least C-.

E E 460R. Introduction to VLSI Design.

Theory and practice of very-large-scale integration (VLSI) circuit design. Metal-oxide-semiconductor (MOS) transistors; static and dynamic complementary metal-oxide-semiconductor (CMOS) combinational and sequential circuits; design of adders, multipliers, and shifters; performance, power consumption and testing. CAD tools for layout, timing analysis, synthesis, physical design, and verification. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 316 and 438 with a grade of at least C- in each.

E E 360S. Digital Integrated Circuit Design.

Circuit-level aspects of metal oxide silicon (MOS) and bipolar integrated circuit technologies. Logic gates and latches; propagation delays; circuit simulation models. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 438 and 339 with a grade of at least C- in each.

E E 360T. Software Testing.

Basic concepts and techniques used in testing software and finding bugs. Includes process, unit, integration, and system testing; manual and automatic techniques for generation of test inputs and validation of test outputs; and coverage criteria. Focus on functional testing. Three lecture hours a week for one semester. Electrical Engineering 360T and 379K (Topic: Software Testing) may not both be counted. Prerequisite: One of the following with a grade of at least C-: Computer Science 314 or 314H, or Electrical Engineering 422C (or 322C).

E E 361D. System Design Metrics.

Survey of engineering design, manufacturing, and lifetime support issues; implications of customer perceptions of quality on design; economics of design; legal implications of design decisions. The equivalent of three lecture hours a week for one semester. Prerequisite: Electrical Engineering 364D with a grade of at least C-.

E E 461L. Software Engineering and Design Laboratory.

The design and development of large-scale software systems using automated analysis tools. Generation of concrete software engineering artifacts at all stages of the software life-cycle. Design principles and methods; design and modeling tools; collaborative development environment; object-oriented design and analysis; design patterns and refactoring; integration and testing tools; debugger and bug finder; program comprehension; software life-cycle and evolution. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Computer Science 314, 314H, or Electrical Engineering 422C (or 322C) with a grade of at least C-; Mathematics 325K with a grade of at least

C-; and credit or registration with a grade of at least C- for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 361M. Introduction to Data Mining.

Goals, methods, and applications of data mining. Includes data preprocessing, sampling, and visualization; algorithms for machine learning; clustering, classification, and predicting and forecasting; mining the Internet for content, link structure, and usage information; search engine design and social network analysis; and statistical methods. Three lecture hours a week for one semester. Electrical Engineering 361M and 379K (Topic: Introduction to Data Mining) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 314 or 314H or Electrical Engineering 422C (or 322C); Electrical Engineering 351K or Mathematics 362K; and Mathematics 340L.

E E 361Q. Requirements Engineering.

Methods and technology for acquiring, representing, documenting, verifying, validating, and maintaining requirements; text-based, graphic-based, and computational requirements model representations; requirements analysis to synthesize and resolve conflicts among disparate stakeholder viewpoints; requirements traceability and evolution, and change management. The equivalent of three lecture hours a week for one semester. Electrical Engineering 361Q and 379K (Topic: Requirements Engineering) may not both be counted. Prerequisite: Computer Science 312, 312H, or Electrical Engineering 312 with a grade of at least C-.

E E 361R. Radio-Frequency Electronics.

Modeling of active and passive devices and transmission line structures at high frequencies. Analysis and design of radio-frequency electronic circuits including amplifiers, mixers, multipliers, detectors, and oscillators; transistor-, circuit-, and system-level design methods, challenges, and topologies; noise and distortion analysis; and evaluation of modern radio systems. The equivalent of three lecture hours a week for one semester. Electrical Engineering 361R and 379K (Topic: Radio Frequency Circuit Design) may not both be counted. Prerequisite: Electrical Engineering 325 and 438 with a grade of at least C- in each.

E E 362K. Introduction to Automatic Control.

Analysis of linear automatic control systems in time and frequency domains; stability analysis; state variable analysis of continuous-time and discrete-time systems; root locus; Nyquist diagrams; Bode plots; sensitivity; lead and lag compensation. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and Electrical Engineering 313 and Mathematics 340L with a grade of at least C- in each.

E E 462L. Power Electronics Laboratory.

Analysis, design, and operation of power electronic circuits; power conversion from AC to DC, DC to DC, and DC to AC; rectifiers, inverters, and pulse width modulated motor drives. Laboratory work focuses on the use of energy from renewable sources such as photovoltaics and wind. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 362Q. Power Quality and Harmonics.

Introduction to and analysis of power quality and harmonic phenomena in electric power systems. Includes characteristics and definitions,

voltage sags, electrical transients, harmonics, mitigation techniques, and standards of power quality and harmonics. The equivalent of three lecture hours a week for one semester. Electrical Engineering 362Q and 379K (Topic: Power Quality and Harmonics) may not both be counted. Prerequisite: Electrical Engineering 331 or 411 with a grade of at least C-.

E E 362R. Renewable Energy and Power Systems.

Introduction to renewable energy sources and their integration into power systems. Includes wind energy: resources, turbines, blades, rotor power characteristics, generators, active and reactive power, variability, and voltage regulation; solar energy: resources, solar radiation measurements, photovoltaic materials and properties, photovoltaic electrical characteristics, and system integration; and demonstrations with commercial-grade solar panels and laboratory-scale wind turbines. Three lecture hours a week for one semester. Electrical Engineering 362R and 379K (Topic: Renewable Energy and Power Systems) may not both be counted. Prerequisite: Electrical Engineering 411 or 331 with a grade of at least C-.

E E 362S. Development of a Solar-Powered Vehicle.

Analysis, design, and construction of a solar-powered car for national competitions involving other universities. Study of electrical, mechanical, and aerodynamic systems. Three lecture hours and three laboratory hours a week for one semester. Electrical Engineering 362S and 379K (Topic: Development of a Solar Car for NASC) may not both be counted. Prerequisite: Upper-division standing.

E E 363M. Microwave and Radio Frequency Engineering.

Design principles in microwave and radio frequency systems; transmission lines and waveguides; S-parameter representation; impedance matching; microwave network analysis; microwave devices and components; electromagnetic effects in high-speed/high-frequency applications. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 325 with a grade of at least C-.

E E 363N. Engineering Acoustics.

Same as Mechanical Engineering 379N. Principles of acoustics, with applications drawn from audio engineering, biomedical ultrasound, industrial acoustics, noise control, room acoustics, and underwater sound. Three lecture hours a week for one semester. Prerequisite: Mathematics 427K with a grade of at least C-.

E E 464C. Corporate Senior Design Project.

Design and experimental projects, done in the laboratories of local companies, for electrical engineering students working full-time in industry; the ethics of design for safety and reliability; emphasis on written and oral reporting of engineering projects. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Prerequisite: Electrical Engineering 364D with a grade of at least C-; and Electrical Engineering 440, 445L (or 345L), 445S (or 345S), 461L, or 462L (or 362L) with a grade of at least C-.

E E 364D. Introduction to Engineering Design.

Introduction to the engineering design process; assessing engineering problems and customer needs; acquiring, documenting, and verifying requirements; high-level system design principles; effects of economic, environmental, ethical, safety, and social issues in design; writing design specifications. Two lecture hours and three laboratory hours a week for one semester. Additional laboratory hours may be required for some sections; these are identified in the Course Schedule. Electrical Engineering 155 and 364D may not both be counted. Prerequisite: Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T, with a grade of at least C-; and credit with a grade of at

least C- or registration for Electrical Engineering 438, 440, 445L (or 345L), 445S (or 345S), 461L, or 462L (or 362L).

E E 364E. Interdisciplinary Entrepreneurship.

First course in a two-semester sequence that concludes with Electrical Engineering 464S. Teams of students starting companies focus on skill development and mentoring in start-up formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Includes discussion of the role of intellectual property, the social issues in design, as well as ethical and safety considerations. Emphasis on written and oral presentation of start-up activities. The equivalent of three lecture hours a week for one semester, with additional hours to be arranged. Only one of the following may be counted: Computer Science 378 (Topic: Interdisciplinary Entrepreneurship), Electrical Engineering 364E, Engineering Studies 377 (Topic: Interdisciplinary Entrepreneurship), Management 337 (Topic: Interdisciplinary Entrepreneurship). Electrical Engineering 364E and 464S may not be counted by students with credit for Electrical Engineering 364D, 464H, 464K, or 464R. Prerequisite: Credit with a grade of at least C- in Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T; credit with a grade of at least C- or registration for Electrical Engineering 440, 445L (or 345L), 445S (or 345S), and 461L or 462L (or 362L); and consent of instructor.

E E 464G. Multidisciplinary Senior Design Project.

Design and experimental projects done with teams of students from multiple engineering disciplines; the ethics of design for safety and reliability; emphasis on written and oral reporting of engineering projects. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Prerequisite: Electrical Engineering 364D with a grade of at least C-; and Electrical Engineering 440, 445L (or 345L), 445S (or 345S), 461L, or 462L (or 362L) with a grade of at least C-.

E E 464H. Honors Senior Design Project.

Restricted to students in the Engineering Honors Program. Design and experimental projects done under the direction of a University faculty member; the ethics of design for safety and reliability; emphasis on written and oral reporting of engineering projects. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Prerequisite: Electrical Engineering 364D with a grade of at least C-, and one of the following with a grade of at least C-: Electrical Engineering 438, 440, 445L (or 345L), 445S (or 345S), 461L, 462L (or 362L).

E E 464K. Senior Design Project.

Design and experimental projects done in Department of Electrical and Computer Engineering laboratories; the ethics of design for safety and reliability; emphasis on written and oral reporting of engineering projects. Three lecture hours and six laboratory hours a week for one semester. Prerequisite: Electrical Engineering 364D with a grade of at least C-, and one of the following with a grade of at least C-: Electrical Engineering 438, 440, 445L (or 345L), 445S (or 345S), 461L, 462L (or 362L).

E E 464R. Research Senior Design Project.

Design and experimental projects done under the supervision of a University faculty member; the ethics of design for safety and reliability; emphasis on written and oral reporting of engineering projects. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Prerequisite: Electrical Engineering 364D with a grade of at least C-, and one of the following with a grade of at least C-: Electrical Engineering 438, 440, 445L (or 345L), 445S (or 345S), 461L, 462L (or 362L).

E E 464S. Start-Up Senior Design Project.

Continuation of Electrical Engineering 364E. Completion of a practical engineering product design; validation of the design through prototype construction and testing, modeling and simulation, and manufacturability analysis. Development of a completed company prospectus, seeking venture funding for the project, and participating in an innovative technology forum to present the proposed start-up company to potential investors. Three lecture hours and six laboratory hours a week for one semester. Electrical Engineering 364E and 464S may not be counted by students with credit for 364D, 464H, 464K, or 464R. Prerequisite: Electrical Engineering 364E with a grade of at least C-; one of the following courses with a grade of at least C-: Electrical Engineering 438, 449, 445L (or 345L), 445S (or 345S), 461L, 462L (or 362L); and consent of instructor.

E E 366. Engineering Economics I.

Business organization; discounted cash flow calculations, including present-worth and rate-of-return calculations; replacement analyses; financial analyses; accounting and depreciation; income taxes; inflation; risk analysis, utility theory, decision models, sequential decision making; value of information. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Electrical Engineering 351K.

E E 366K. Engineering Economics II.

Fundamentals of risk management, including portfolio theory, capital asset pricing theory, and optimal project mix; hedging financial risk; advanced economic analysis of alternative energy systems; and advanced mathematical modeling techniques for economic analysis. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 366 with a grade of at least C-.

E E 366L. Statistics for Manufacturing.

Statistical analysis applied to the development and control of manufacturing operations; quality control, statistical process control, and design of experiments. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 351K with a grade of at least C-.

E E 368L. Power Systems Apparatus and Laboratory.

Fundamentals of power systems emphasized through laboratory experiments; complex power, three-phase circuits, per-unit system, transformers, synchronous machines, transmission line models, steady-state analysis, induction machines, capacitor banks, protective relaying, surge arrestors, and instrumentation. Three lecture hours and three laboratory hours a week for one semester. Electrical Engineering 368L and 379K (Topic: Power Systems Apparatus and Laboratory) may not both be counted. Prerequisite: Electrical Engineering 411 or 331 with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 369. Power Systems Engineering.

Three-phase power systems, system component models, symmetrical components, and admittance and impedance matrices. Formulation and analysis of loadflow, short circuit, and stability for electric grids. Economic operation. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and Electrical Engineering 313 or 331 with a grade of at least C-.

E E 369L. Relay Protection of Power Systems.

Theory, principles, and practices for protecting medium-voltage industrial power systems and high-voltage transmission grids. Includes symmetrical components; fault calculations and grounding; protection of motors,

generators, cables, and transmission lines; and relay settings, fusing, and coordination of multiple protection devices. Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Electrical Engineering 411 with a grade of at least C-.

E E 370. Automatic Control II.

Introduction to modern control theory, nonlinear and optimal control systems; controllability, observability, stability; state feedback, observers, eigenvalue assignment. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Electrical Engineering 362K.

E E 370K. Computer Control Systems.

Analysis and design of linear discrete time control systems; z-transform theory; modified z-transforms; stability; multirate systems; digital simulation of discrete time systems; synthesis of algorithms for computer controllers. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Electrical Engineering 362K.

E E 370L. Introduction to Manufacturing Systems Automation.

Applications of automation techniques to manufacturing systems; robotics and computer vision. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 362K with a grade of at least C-.

E E 370N. Introduction to Robotics and Mechatronics.

Structures for industrial robots; geometry and transformation; direct and inverse kinematics; differential kinematics; dynamics; trajectory planning; actuators and sensors; adaptive control and learning compliance; vision and pattern recognition; expert systems. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 362K with a grade of at least C-.

E E 471C. Wireless Communications Laboratory.

The fundamentals of wireless communication from a digital signal processing perspective; linear modulation, demodulation, and orthogonal frequency division multiplexing; synchronization, channel estimation, and equalization; communication in fading channels; and wireless standards. Three lecture hours and three laboratory hours a week for one semester. Electrical Engineering 371C and 379K (Topic: Wireless Communications Laboratory) may not both be counted. Prerequisite: Electrical Engineering 445S (or 345S), 351M, or 360K with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 371D. Introduction to Neural Networks.

Characteristics of artificial neural networks, feedforward networks, and recurrent networks; learning algorithms; self-organization; biological links; data mining and other applications. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 351K and Mathematics 340L with a grade of at least C- in each.

E E 371M. Communication Systems.

Analog and digital modulation; noise in communication systems; signal-to-noise ratio; coding; optimal receiver design; phase-locked loops; and performance analysis. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biomedical Engineering 335 or Electrical Engineering 351K.

E E 371R. Digital Image and Video Processing.

Digital image acquisition, processing, and analysis; algebraic and geometric image transformations; two-dimensional Fourier analysis;

image filtering and coding. Three lecture hours a week for one semester. Prerequisite: Biomedical Engineering 335 or Electrical Engineering 351K with a grade of at least C-.

E E 372L. Network Engineering Laboratory.

Local, metropolitan, and wide-area operations; telecommunication common carrier organization and services; administrative and political considerations; premise distribution systems; name resolution, address assignment, and mail; datagrams, packets, frames, and cells; addressing and network-level interconnection; internetwork architecture; TCP/IP protocol suite (v. 4 and 6); Ethernet and IEEE 802.3 standards; IEEE 802.11 standards and wireless access points; repeaters, hubs, bridges, routers; local area network emulation; public switched network access through POTS and ISDN; intradomain and interdomain routing; routing protocols, including RIP, OSPF, and BGP; multicast; media testing; local- and wide-area diagnostic tools. The equivalent of three lecture hours a week for one semester. Prerequisite: Electrical Engineering 372N with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 372N. Telecommunication Networks.

Circuit and packet-switched networks; local area networks; protocol stacks; ATM and broadband ISDN; Internet; routing, congestion control, and performance evaluation; multimedia applications. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 351K with a grade of at least C-.

E E 372S. Cryptography and Network Security.

Distributed information system security; cryptographic tools; authentication; message security; system management. The equivalent of three lecture hours a week for one semester. Prerequisite: Mathematics 325K or 340L with a grade of at least C-.

E E 374K. Biomedical Electronic Instrument Design.

Application of electrical engineering principles in the design of electronic instrumentation at the circuit-board level for the measurement of pressure, temperature, flow, and impedance. Also includes the study of light intensity, bioelectric potentials, and stimulation devices such as pacemakers and defibrillators. Focus on design considerations specific to electro-medical environments, safety and efficacy, and public policy issues. Three lecture hours a week for one semester. Prerequisite: Electrical Engineering 438 with a grade of at least C-.

E E 374L. Applications of Biomedical Engineering.

An in-depth examination of selected topics in biomedical engineering, such as optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; noninvasive cardiovascular measurements. Three lecture hours and six laboratory hours a week for one semester. Prerequisite: Electrical Engineering 374K with a grade of at least C-; and credit with a grade of at least C- or registration for Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering 333T, Civil Engineering 333T, Electrical Engineering 333T, Mechanical Engineering 333T, or Petroleum and Geosystems Engineering 333T.

E E 377E. Interdisciplinary Entrepreneurship: Elective.

Same as Engineering Studies 377E. Restricted to engineering students. Projects must differ significantly from those developed for Electrical Engineering 364D and 364E. Focus on skill development and mentoring in start-up formation, technology development, market validation,

marketing, sales, operations, human resources, program management, and finance. Includes discussion of intellectual property, social issues in design, as well as ethical and safety considerations. Emphasis on written and oral presentation of start-up activities. The equivalent of three lecture hours a week for one semester. Prerequisite: Consent of instructor.

E E 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Electrical Engineering 679HA with a grade of at least C- and enrollment in the Engineering Honors Program.

E E 379K. Topics in Electrical Engineering.

The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

Topic 1: Conference Course.

Topic 15: Information Theory. Measures of information; noiseless coding and data compression; discrete memoryless channels and channel capacity; broadcast channels; error-correcting codes.

Additional prerequisite: Electrical Engineering 351K with a grade of at least C-.

Topic 20: Computer Architecture: Personal Computer Design.

Commercial general purpose processors, memory architecture, buses, storage devices, graphics subsystems, I/O devices and peripherals, audio subsystems, operating systems, benchmarking, manufacturing, and testing of personal computer systems. One class meeting may take place outside of normally scheduled class time for a tour of a PC manufacturing site. Additional prerequisite: Electrical Engineering 460N (or 360N) with a grade of at least C-.

Topic 21: Information and Cryptography. Information theory; construction of codes; cryptography, including security and randomized encryption; Kolmogorov complexity; statistics, including large deviations, nonparametrics, and information inequalities; Vapnik-Cervonenkis methods for learning theory. Additional prerequisite: Electrical Engineering 351K with a grade of at least C-.

Department of Mechanical Engineering

Mechanical Engineering: M E

Lower-Division Courses

M E 302. Introduction to Engineering Design and Graphics.

Introduction to mechanical engineering education and practice through lectures and laboratory experiences. Graphics and modeling fundamentals for engineering design: freehand sketching, computer modeling of solid geometry, and generation of engineering drawings. Introduction to reverse engineering, computer-aided design, rapid prototyping, and manufacturing. Application of the design process and problem solving through individual and team projects. Two lecture hours and four laboratory hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 302, 210, 210H. Prerequisite: Credit or registration for Mathematics 408C or 408K (or credit for 308K).

M E 103. Studies in Engineering Design Graphics.

Computer laboratory work in engineering design graphics for students with transfer credit for Mechanical Engineering 210 who need additional work. Three computer laboratory hours a week for one semester. May not be counted by students with credit for Mechanical Engineering 302, 210, or 210H. Prerequisite: Consent of the undergraduate adviser.

M E 205. Introduction to Computers and Programming.

Introduction to computer hardware and software systems; programming using a high-level language; mathematical software programming; and introduction to machine language. Includes significant hands-on programming opportunities. One lecture hour and three laboratory hours a week for one semester. May not be taken concurrently with Mechanical Engineering 302. Prerequisite: Credit or registration for Mathematics 408C or 408K (or credit for 308K).

M E 210. Engineering Design Graphics.

Graphics and modeling fundamentals for engineering design: freehand sketching, computer modeling of solid geometry, and generation of engineering drawings. Introduction to reverse engineering, computer-aided design, rapid prototyping, and manufacturing. Application of the design process to problem solving. Individual and team design projects. Two lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 302, 210, 210H. May not be counted toward the Bachelor of Science in Mechanical Engineering degree. Prerequisite: Credit or registration for Mathematics 408C or 408K (or credit for 308K).

M E 210H. Engineering Design Graphics: Honors.

Graphics and modeling fundamentals for engineering design: freehand sketching, computer modeling of solid geometry, and generation of engineering drawings. Introduction to reverse engineering, computer-aided design, rapid prototyping, and manufacturing. Application of the design process to problem solving. Individual and team design projects. One lecture hour and four laboratory hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 302, 210, 210H. May not be counted toward the Bachelor of Science in Mechanical Engineering degree. Prerequisite: Credit or registration for Mathematics 408C or 408K (or credit for 308K), and admission to an engineering honors program.

M E 311. Materials Engineering.

An exploration of fundamental aspects of the structure, properties, and behavior of engineering materials. Three lecture hours a week for one semester. Prerequisite: The following courses with a grade of at least C- in each: Chemistry 301, Mechanical Engineering 302, Physics 303K, 103M; and credit or registration for Mechanical Engineering 111L, Physics 303L, and 103N.

M E 111L. Materials Engineering Laboratory.

Hands-on experiments in materials science and engineering topics and microstructure-property relationships discussed in Mechanical Engineering 311. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Mechanical Engineering 302 with a grade of at least C-, and credit or registration for Mechanical Engineering 311.

M E 218. Engineering Computational Methods.

Applied numerical analysis, programming of computational algorithms using mathematical software, and applications of computational methods to the solution of mechanical engineering problems. One and one-half lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Mathematics 427K and Mechanical Engineering 205 with a grade of at least C- in each.

M E 318M. Programming and Engineering Computational Methods.

An investigation of applied numerical analysis, programming of computational algorithms using mathematical software, and applications of computational methods to the solution of mechanical engineering problems. Two lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Mathematics 427K with a grade of at least C-.

M E 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Mechanical Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mechanical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

M E 320. Applied Thermodynamics.

First and second laws of thermodynamics; thermodynamic processes, cycles, and heat transfer. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Mechanical Engineering degree. Prerequisite: Chemistry 301, Mathematics 408D, and Physics 303K.

M E 324. Dynamics.

Analysis of motions, forces, momenta, and energies in mechanical systems. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Engineering Mechanics 306 and Mathematics 408D with a grade of at least C- in each.

M E 325L. Cooperative Engineering.

This course covers the work period of mechanical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. Only one of the following may be counted: Mechanical Engineering 325L, 362K, 371K, 377K. The student must complete Mechanical Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. May be repeated for credit. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Mechanical Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Mechanical Engineering 325LY and appointment for a full-time cooperative work tour.

M E 225M. Cooperative Engineering.

This course covers the work period of mechanical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for two semesters. The student must complete Mechanical Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Mechanical Engineering 225MA and appointment for a full-time cooperative work tour.

M E 125N. Cooperative Engineering.

This course covers the work period of mechanical engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Mechanical Engineering 325LZ or 225MB, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

M E 326. Thermodynamics.

Properties, heat and work, first and second laws, thermodynamic processes, introduction to ideal power cycles. Three lecture hours a week for one semester. For some sections, two discussion hours a week are also required. Mechanical Engineering 326 and 326H may not both be counted. Prerequisite: Chemistry 301, Mathematics 408D, and Physics 303K with a grade of at least C- in each.

M E 326H. Thermodynamics: Honors.

Properties, heat and work, first and second laws, thermodynamic processes, introduction to ideal power cycles. Three lecture hours a week for one semester. For some sections, two discussion hours a week are also required. Mechanical Engineering 326 and 326H may not both be counted. Prerequisite: Chemistry 301, Mathematics 408D, and Physics 303K with a grade of at least C- in each, and admission to an engineering honors program.

M E 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Mechanical Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mechanical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary. May be repeated for credit when the topics vary.

M E 330. Fluid Mechanics.

Fluid properties, statics, conservation laws, inviscid and viscous incompressible flow, flow in confined streams and around objects. Three lecture hours a week for one semester. Prerequisite: Mathematics 427K, Engineering Mechanics 306, and Mechanical Engineering 326 or 326H with a grade of at least C- in each; and credit or registration for Mechanical Engineering 130L.

M E 130L. Experimental Fluid Mechanics.

Experimental design concepts, uncertainty analysis, and systems analysis as applied to thermodynamics, fluid mechanics, and heat transfer systems. One lecture hour and two laboratory hours a week for one semester. Prerequisite: Credit or registration for Mechanical Engineering 330, 333T.

M E 333H. Engineering Communication: Honors.

Professional communication skills for engineers, with emphasis on research, writing, editing, and oral presentation on topics of social and technical significance in engineering. Students collaborate to publish an online journal. Two lecture hours and two laboratory hours a week for one semester. Mechanical Engineering 333H and 333T may not both be counted. Prerequisite: Rhetoric and Writing 306 with a grade of at least C-, and admission to an appropriate major sequence in engineering and to an engineering honors program.

M E 333T. Engineering Communication.

Professional communication skills for engineers, with emphasis on research, writing, and oral presentation on topics of social and technical significance in engineering. Two lecture hours and two laboratory hours a week for one semester. Mechanical Engineering 333H and 333T may not both be counted. Prerequisite: Rhetoric and Writing 306 with a grade of at least C-, and credit or registration for Mechanical Engineering 130L.

M E 334. Materials Engineering.

Fundamental aspects of the structure, properties, and behavior of engineering materials. Three lecture hours a week for one semester. Prerequisite: The following courses with a grade of at least C- in each:

Chemistry 301, Mechanical Engineering 302, Physics 303K, Physics 103M; and credit or registration for Mechanical Engineering 134L, Physics 303L, 103N, and Engineering Mechanics 319; and admission to an appropriate major sequence in engineering.

M E 134L. Materials Engineering Laboratory.

Hands-on experiments in materials science and engineering topics and microstructure-property relationships discussed in Mechanical Engineering 334. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Mechanical Engineering 302 with a grade of at least C-, concurrent enrollment in Mechanical Engineering 334, and admission to an appropriate major sequence in engineering.

M E 335. Engineering Statistics.

Fundamentals of probability, distribution theory, data analysis and statistics, interval estimation, hypothesis testing, and statistical quality control. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Mathematics 408D and Mechanical Engineering 205 or 318M with a grade of at least C- in each.

M E 336. Materials Processing.

Effects of processing on materials properties; materials selection. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 334 (or 311) and 134L (or 111L) or the equivalent and Engineering Mechanics 319 with a grade of at least C- in each, concurrent enrollment in Mechanical Engineering 136L, and admission to an appropriate major sequence in engineering.

M E 136L. Materials Processing Laboratory.

Hands-on study of selected materials processing procedures and processing-microstructure-property relationships discussed in Mechanical Engineering 336. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Mechanical Engineering 111L and Engineering Mechanics 319 with a grade of at least C- in each, concurrent enrollment in Mechanical Engineering 336, and admission to an appropriate major sequence in engineering.

M E 136N, 236N. Concepts in Nuclear and Radiation Engineering.

Restricted to students in the Colleges of Engineering, Liberal Arts, and Natural Sciences, and the Jackson School of Geosciences. For Mechanical Engineering 136N, one lecture hour a week for one semester; for 236N, the equivalent of two lecture hours a week for one semester. Prerequisite: Completion of at least thirty semester hours of college coursework, or consent of instructor.

M E 337C. Introduction to Nuclear Power Systems.

Radioactivity, nuclear interactions: fission and fusion, fission reactors, nuclear power systems, nuclear power safety. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 218 and Physics 303L and 103N with a grade of at least C- in each, and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 337F. Nuclear Environmental Protection.

Ionizing radiation and its interactions with matter and living tissues; radioactive decay kinetics; external and internal dose measurement; transportation through the environment; managing radioactive waste streams; and safeguards. Three lecture hours a week for one semester. May not be counted by students with credit for Mechanical Engineering 337D and 337E. Mechanical Engineering 337F and 389C may not both be counted. Prerequisite: For engineering majors, Physics 303L and 103N

with a grade of at least C- in each and admission to an appropriate major sequence in engineering; for others, upper-division standing.

M E 337G. Nuclear Safety and Security.

An investigation of policy and technical aspects related to nuclear safety and security. Participants will evaluate the proliferation of risk from facilities within the nuclear fuel cycle. They will calculate the criticality conditions for a nuclear assembly and derive parent/daughter decay equations. Nuclear forensics evaluations will be conducted on real-world environmental measurements. Three lecture hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 337G, 388H, Operations Research and Industrial Engineering 390R (Topic 15: Nuclear Safety and Security). Prerequisite: For engineering majors, Physics 103N and 303L with a grade of at least C- in each and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 338. Machine Elements.

Analysis for the design and manufacture of basic mechanical elements, and their role in the design of machines; application of finite element modeling. Three lecture hours a week for one semester. Prerequisite: Engineering Mechanics 319 and Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C- in each, and admission to an appropriate major sequence in engineering.

M E 339. Heat Transfer.

Steady and transient heat conduction; forced and natural convection; radiation; introduction to heat exchangers and applications. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 218 or 318M, 330, and 130L with a grade of at least C- in each, concurrent enrollment in Mechanical Engineering 139L, and admission to an appropriate major sequence in engineering.

M E 139L. Experimental Heat Transfer.

Experimental design concepts, uncertainty analysis, and systems analysis as applied to thermodynamics, fluid mechanics, and heat transfer systems. One lecture hour and two laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Mechanical Engineering 339 and admission to an appropriate major sequence in engineering.

M E 340. Mechatronics.

Theory and application of electrical circuits, electronics, and electromechanical devices; concepts in electrical power transmission; instrumentation; feedback; integration of electronics and instrumentation with mechanical engineering systems (mechatronics). Three lecture hours a week for one semester. Prerequisite: Mathematics 408D, Mechanical Engineering 205 or 318M, and Physics 303L and 103N with a grade of at least C- in each, concurrent enrollment in Mechanical Engineering 140L, and admission to an appropriate major sequence in engineering.

M E 140L. Mechatronics Laboratory.

Hands-on laboratory using hand-held and bench-top electronic test and prototyping equipment for circuits and mechatronics applications; computer-aided instrumentation and data acquisition; laboratory study in design, prototyping, and testing with electrical and electronics components and electromechanical devices. One lecture hour and two laboratory hours a week for one semester. Prerequisite: Mechanical Engineering 205 or 318M, concurrent enrollment in Mechanical Engineering 340, and admission to an appropriate major sequence in engineering.

M E 343. Thermal-Fluid Systems.

Analysis and design of integrated systems involving simultaneous application of thermodynamics, heat transfer, and fluid mechanics.

Applications to power generation, vehicle engineering, materials processing, environmental control, and manufacturing. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Mechanical Engineering 330, 130L, 339, and 139L with a grade of at least C- in each; and admission to an appropriate major sequence in engineering.

M E 344. Dynamic Systems and Controls.

Lumped physical system models; electrical, fluid, mechanical, and thermal system analysis; linear system transient, steady-state behavior; introduction to feedback control. Three lecture hours a week for one semester. Prerequisite: Mathematics 427K and Mechanical Engineering 205 or 318M, and 324 with a grade of at least C- in each; Mechanical Engineering 340 and 140L or their equivalents with a grade of at least C- in each; concurrent enrollment in Mechanical Engineering 144L or 244L; and admission to an appropriate major sequence in engineering.

M E 144L, 244L. Dynamic Systems and Controls Laboratory.

Modeling of engineering systems, digital simulation, and assessment of results with experimental study; methods for analysis of first- and second-order systems, system identification, frequency response and feedback control principles; hands-on experimentation with mechanical, fluid, electrical, and magnetic systems; data acquisition and analysis using oscilloscopes and microcomputer-based analog-to-digital and digital-to-analog conversion; theoretical and practical principles governing the design and use of various sensors and transducers. For 144L, one lecture hour and two laboratory hours a week for one semester; for 244L, one lecture hour and three laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Mechanical Engineering 344, and admission to an appropriate major sequence in engineering.

M E 347. Processing of Materials.

Analysis of forces in processing operations; effects of friction and their control; metalworking efficiencies. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For engineering majors, Mechanical Engineering 334 or the equivalent, and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

Topic 1: Powder Processing. Powder particle characterization and size/shape/distribution, powder synthesis, compaction, sintering theory, sintering maps, full-density processing, powder-processed part microstructure and properties.

Topic 2: Deformation Processing. Analysis of forces in processing operations; effects of friction and their control; slab method; upper-bound force theory; slip-line field theory; metalworking efficiencies.

M E 348C. Introduction to Mechatronics I.

Integrated use of mechanical, electrical, and computer systems for information processing and control of machines and devices. System modeling, electromechanics, sensors and actuators, basic electronics design, signal processing and conditioning, noise and its abatement, grounding and shielding, filters, and system interfacing techniques. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 340 or the equivalent and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 348D. Introduction to Mechatronics II.

Interfacing microcomputers with sensors and actuators; hybrid (analog/digital) design; digital logic and analog circuitry; data acquisition and control; microcomputer architecture, assembly language programming; signal conditioning, filters, analog-to-digital and digital-to-analog

conversion. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 340 or the equivalent and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 349. Corrosion Engineering.

Corrosion principles; electrochemical, environmental, and metallurgical effects; types of corrosion; corrosion testing and prevention; modern theories: principles and applications. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C-, Mechanical Engineering 326 (or 326H) or the equivalent with a grade of at least C-, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 350. Machine Tool Operations for Engineers.

Hands-on manual and computer-numerical-controlled machine tool operation. Part design and tool selection for production. One lecture hour and six laboratory hours a week for one semester. Mechanical Engineering 350 and 379M (Topic 7: Machine Tool Operations for Engineers) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to an appropriate major sequence in engineering.

M E 352K. Engineering Computer Graphics.

Introduction to interactive computer graphics as a tool in computer-aided design. Use of graphics software packages. Two lecture hours and three laboratory hours a week for one semester. Prerequisite: For engineering majors, admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 353. Engineering Finance.

Evaluating the financial impact of engineering decisions. Comparing alternatives with cash flow analysis considering rate of return, inflation, and taxes, with emphasis on analyzing risk. Managing complex projects with activity scheduling and resource allocation considering cash flows. Methods include probabilistic analysis and simulation. Three lecture hours and two discussion hours a week for one semester. Prerequisite: Mathematics 408C, Mechanical Engineering 205 or 318M, and 335 with a grade of at least C- in each.

M E 354. Introduction to Biomechanical Engineering.

The application of mechanical engineering principles to problems in the life sciences; transport phenomena of physiological solids and fluids; biosignal analysis and instrumentation; biomaterials design and compatibility; principles of medical imaging, diagnostics, and therapeutics; rehabilitation engineering. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mathematics 427K with a grade of at least C- and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 354M. Biomechanics of Human Movement.

Modeling and simulation of human movement; neuromuscular control; computer applications; introduction to experimental techniques. Three lecture hours a week for one semester. Prerequisite: For engineering majors, admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 355K. Engineering Vibrations.

Time-domain and frequency-domain analysis of vibrating systems; matrix methods, instrumentation, and vibration control; numerical methods. Three lecture hours a week for one semester. Prerequisite: Mechanical

Engineering 324 with a grade of at least C-, Mathematics 427K with a grade of at least C-, and admission to an appropriate major sequence in engineering.

M E 259, 359. Materials Selection.

Description of commercial metals, polymers, ceramics, concrete, and wood for use in mechanical engineering applications. Applications include strength, toughness, stiffness, fatigue, creep, corrosion, casting, forming, machining, and welding. Two or three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 or the equivalent and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 360. Vehicle System Dynamics and Controls.

Fundamentals of ground vehicle dynamics, tire-road mechanics, vehicle control systems, vehicle stability, and simulation of vehicle systems. Three lecture hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 360, 379M (Topic: Vehicle System Dynamics and Controls), 390, 397 (Topic: Vehicle System Dynamics and Controls). Prerequisite: For engineering majors, upper-division standing, admission to an appropriate major sequence in engineering, and Mechanical Engineering 344 with a grade of at least C-; for others, upper-division standing and written consent of instructor.

M E 260K, 360K. Metallurgy of Engineering Alloys.

Microstructure and property relationships of metals and alloys; steel alloys; aluminum alloys; titanium alloys; magnesium alloys; solidification and casting; thermomechanical processing; heat treating and solid-state phase transformations. Two or three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C-, and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 360L. Turbomachinery and Compressible Flow.

Positive displacement and dynamic rotating machinery; pumps, compressors, and turbines; performance characteristics and scaling laws. One-dimensional compressible flow with area change, friction, or heat addition. Normal and oblique shock waves; Prandtl-Meyer expansion. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 330, 130L and 139L, and admission to an appropriate major sequence in engineering.

M E 360N. Intermediate Heat Transfer.

Multidimensional and transient diffusion; laminar and turbulent convection; radiation exchange; special topics. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 339 and admission to an appropriate major sequence in engineering.

M E 361E. Nuclear Reactor Operations and Engineering.

Fission and chain reactions; neutron diffusion and moderation; reactor equations; Fermi Age theory; and multigroup and multiregion analysis. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 218 and Physics 303L and 103N with a grade of at least C- in each, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 361F. Radiation and Radiation Protection Laboratory.

Introduction to the application of radiation and radiation protection instrumentation. Lecture and laboratory topics include personnel monitoring, radiation detection systems, gamma-ray spectroscopy, determination of environmental radiation, counting statistics, gamma and neutron shielding, and air sampling. Two lecture hours and three

laboratory hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 218 with a grade of at least C-, Physics 303L and 103N with a grade of at least C- in each, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 261M, 361M. Materials Thermodynamics.

First and second laws; heat of combustion; heat engine cycles; chemical equilibria and/or phase equilibria; point defects in crystals. Two or three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C-, Mechanical Engineering 326 or 326H with a grade of at least C-, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 362K. Readings in Engineering.

A study of the interrelated problems of society, technology, and energy. Three lecture hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 325L, 362K, 371K, 377K. Prerequisite: Admission to an appropriate major sequence in engineering.

M E 363L. Energy Systems Laboratory.

Experimental analysis of thermal energy systems, including heat transfer equipment, engines, the University chilling station and the University power plant. Use of a variety of industrial instrumentation for assessment of system and component performance and of experimental uncertainty. Written and oral technical communication of experimental results. Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Mechanical Engineering 339, 139L, and admission to an appropriate major sequence in engineering.

M E 364L. Automatic Control System Design.

Feedback principles; control components; industrial compensators; Routh, Nyquist, Bode, and root locus methods; controller design; continuous and discrete time control. Three lecture hours and one-half laboratory hour a week for one semester. Prerequisite: Mechanical Engineering 344 and admission to an appropriate major sequence in engineering.

M E 365K. Finite Element Method.

Introduction and application of the finite element method in engineering analysis and design problems; demonstration of techniques using commercial codes. Three lecture hours a week for one semester. Prerequisite: Engineering Mechanics 319 and Mathematics 427K with a grade of at least C- in each, and admission to an appropriate major sequence in engineering.

M E 365L. Industrial Design for Production.

Current techniques for making transitions from theoretical concepts to cost effective designs suitable for manufacturing. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 338 and admission to an appropriate major sequence in engineering.

M E 366J. Mechanical Engineering Design Methodology.

Restricted to students admitted to an appropriate engineering major sequence. An examination of structured methodologies for designing mechanical systems; reverse engineering/redesign projects and conceptual design projects. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Mechanical Engineering 302, 330, 130L, 335, 338, 339, 139L, 340, and 140L; one of the following with a grade of at least C-: Mechanical Engineering 333H, 333T, Aerospace Engineering 333T, Biomedical Engineering 333T, Chemical Engineering

333T, Civil Engineering 333T, Electrical Engineering 333T, or Petroleum and Geosystems Engineering.

M E 266K. Mechanical Engineering Design Project.

Creative design, analysis, selection, development, and fabrication of engineering components and systems. Development of team project with faculty adviser and sponsoring engineer. Two lecture hours a week for one semester, with additional hours to be arranged. Prerequisite: Mechanical Engineering 344, 144L or 244L, 353, and 366J with a grade of at least C- in each.

M E 366L. Operations Research Models.

Formulation and solution-interpretation for operations research models requiring, for example, optimization, simulation, or analysis of Markov chains or queues. Applications include manufacturing design and control, routing and scheduling, plant location, inventory analysis, and management of queueing systems. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mathematics 408D and Mechanical Engineering 205 with a grade of at least C- in each, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 266P. Design Project Laboratory.

Development of individual team project in association with faculty adviser and sponsoring project engineer. Four laboratory hours a week for one semester. Prerequisite: Mechanical Engineering 344, 144L or 244L, 353, and 366J with a grade of at least C- in each.

M E 366Q. Deterministic Methods for Operations Research.

Theory and algorithms for deterministic operations research methods. Algorithms for solving linear, integer, and nonlinear optimization models. Three lecture hours a week for one semester. Prerequisite: For engineering majors, admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 366R. Stochastic Methods for Operations Research.

Theory and algorithms for stochastic operations research methods. Algorithms related to stochastic processes: Markov chain analysis; queueing theory; stochastic inventory theory and decision analysis. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 335 or the equivalent, and admission to an appropriate major sequence in engineering; for nonengineering majors, upper-division standing and written consent of instructor.

M E 367S. Simulation Modeling.

Basic concepts of discrete-event simulation. Statistical input and output analysis. Application of simulation software. Modeling of systems under uncertainty. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 205 with a grade of at least C-, Mechanical Engineering 335 or the equivalent, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 368J. Computer-Aided Design.

Application of computers to design problems and simulation of mechanical systems; creation of interactive special applications programs. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Credit or registration for Mechanical Engineering 338 and admission to an appropriate major sequence in engineering.

M E 369L. Introduction to Computational Fluid Dynamics.

Applied numerical analysis, including solution of linear algebraic equations and ordinary and partial differential equations; modeling of physical processes, including fluid flow and heat and mass transfer; use of

general purpose computer codes, including commercial computational fluid dynamics software packages. Three lecture hours a week for one semester. Aerospace Engineering 347 and Mechanical Engineering 369L may not both be counted. Prerequisite: Credit or registration for Mechanical Engineering 330 and 339 and admission to an appropriate major sequence in engineering.

M E 369P. Application Programming for Engineers.

Designed for students who have some experience in programming and are interested in the sharing and development of open source software applications. Provides an introduction to the Python Programming language, an open source, flexible, and intuitive debug programming language, with an emphasis on system modeling, simulation, data analysis, and software/data management. Students will create mini projects in Python that demonstrate software design and organization, debugging, open source practices, and data visualization. Three lecture hours a week for one semester. Prerequisite: For engineering majors, upper-division standing, admission to an appropriate major sequence in engineering, and Mechanical Engineering 318M or the equivalent with a grade of at least C-; for others, upper-division standing and written consent of instructor.

M E 371K. Legal Aspects of Engineering Practice.

Legal considerations in the practice of engineering; specifications and contracts for equipment and engineering services. Three lecture hours a week for one semester. Only one of the following may be counted: Mechanical Engineering 325L, 362K, 371K, 377K. Prerequisite: Upper-division standing and admission to an appropriate major sequence in engineering.

M E 372J. Robotics and Automation.

Component technologies for precision machines based on dynamic modeling and motion programming: cams, linkages, planar manipulators. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Mechanical Engineering 324 and admission to an appropriate major sequence in engineering.

M E 372M. Mechanism Design.

Design of planar mechanisms for applications that require rigid body guidance, function generation, and path generation. Graphical and analytical techniques. Computer-aided design projects. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Mechanical Engineering 324 and admission to an appropriate major sequence in engineering.

M E 372N. Design of Smart Mechanisms.

Design of reprogrammable multiple-degree-of-freedom architectures. The course addresses various mechanical configurations and stresses the integrated design approach to sensing/actuation/control architecture and control software. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and consent of instructor.

M E 373K. Basic Industrial Engineering.

Design and analysis of production systems, including plant layout and location, material flow, and flexible manufacturing. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 205 or the equivalent with a grade of at least C-, Mechanical Engineering 335 or the equivalent, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 374C. Combustion Engine Processes.

Principles of internal combustion engines, fuels, carburetion, combustion, exhaust emissions, knock, fuel injection, and factors affecting performance. Three lecture hours a week for one semester. Prerequisite:

Mechanical Engineering 339 or consent of instructor, and admission to an appropriate major sequence in engineering.

M E 374D. Automotive Engineering Laboratory.

Engines and emissions. Students use commercial engine-modeling software to explore effects of valve timing and intake tuning and conduct experiments with vehicle emissions, ignition timing, engine mechanisms, engine controls, and emissions control. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Credit or registration for Mechanical Engineering 374C and admission to an appropriate major sequence in engineering.

M E 374F. Fire Science.

Analysis of the dynamics and consequences of fire in structures. Topics include combustion thermochemistry, premixed and diffusion flames, fluid mechanics of fire, human tenability in burning structures, and computer modeling of fires. Three lecture hours a week for one semester. Prerequisite: For engineering majors, upper-division standing and credit or registration for Mechanical Engineering 339 and 139L with a grade of at least C- in each; for others, upper-division standing and written consent of instructor.

M E 374L. Design of Thermal Systems.

Methodology and approach to design of thermal energy systems; component and system modeling; optimization, including economic considerations. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 339 or the equivalent, and admission to an appropriate major sequence in engineering.

M E 374R. Design of Air Conditioning Systems.

Load calculations, design of thermal distribution systems, component selection and control. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Mechanical Engineering 339.

M E 374S. Solar Energy Systems Design.

Insolation characteristics and measurement, component design, solar energy system modeling, introduction to photovoltaic systems, cost analysis, and case studies. Three lecture hours a week for one semester. Prerequisite: Mechanical Engineering 339 or the equivalent and admission to an appropriate major sequence in engineering.

M E 375K. Production Engineering Management.

Introduction to production and inventory models; basic factory dynamics; analysis of variability; push-and-pull production control; sequencing and dispatching. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 205 or the equivalent with a grade of at least C-, Mechanical Engineering 335 or the equivalent, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 177K, 277K, 377K. Projects in Mechanical Engineering.

Independent project carried out under the supervision of a faculty member in mechanical engineering. Student prepares a project proposal and a final report, each of which is evaluated by the faculty committee on individual projects. For 177K, three to five laboratory hours and one consultation hour with the faculty supervisor a week for one semester; for 277K, five to ten laboratory hours and one consultation hour with the faculty supervisor a week for one semester; for 377K, ten to fifteen laboratory hours and one consultation hour with the faculty supervisor a week for one semester. Only one of the following may be counted: Mechanical Engineering 325L, 362K, 371K, 377K. Prerequisite: A University grade point average of at least 2.50 and a grade point average in the major of at least 2.50; admission to an appropriate major sequence

in engineering; and approval of project proposal by the faculty committee on individual projects.

M E 378C. Electroceramics.

Bonding; crystal structures; defects; phase diagrams; glass ceramics; electrical, dielectric, magnetic, and optical ceramics. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C- and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 378K. Mechanical Behavior of Materials.

Elastic deformation; viscoelasticity; yielding, plastic flow, plastic instability, strengthening mechanisms; fracture, fatigue, creep; significance of mechanical properties tests. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 or the equivalent and 134L with a grade of at least C- in each, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 378P. Properties and Applications of Polymers.

Introduction to polymers as structural materials: polymerization, polymer structure, physical and mechanical properties, processing and fabrication. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C-, Mechanical Engineering 326 or 326H or the equivalent with a grade of at least C-, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 378S. Structural Ceramics.

Powder processing, powder characterization, forming techniques, densification, and development of microstructure; emphasis on understanding materials, selection, and microstructure-mechanical property relationships. Three lecture hours a week for one semester. Prerequisite: For engineering majors, Mechanical Engineering 334 (or 311) or the equivalent with a grade of at least C-, and admission to an appropriate major sequence in engineering; for others, upper-division standing and written consent of instructor.

M E 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Mechanical Engineering 679HA and enrollment in the Engineering Honors Program.

M E 179M, 279M, 379M. Topics in Mechanical Engineering.

One, two, or three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Admission to an appropriate major sequence in engineering; additional prerequisites vary with the topic and are given in the Course Schedule.

M E 379N. Engineering Acoustics.

Same as Electrical Engineering 363N. Principles of acoustics, with applications drawn from audio engineering, biomedical ultrasound, industrial acoustics, noise control, room acoustics, and underwater sound. Three lecture hours a week for one semester. Prerequisite: Mathematics 427K with a grade of at least C-.

Department of Petroleum and Geosystems Engineering

Petroleum and Geosystems Engineering: PGE

Lower-Division Courses

PGE 301. Engineering, Energy, and the Environment.

Enrollment limited to beginning students in petroleum and geosystems engineering. Introduction to the field of petroleum engineering. Overview of energy supply and demand. Studies subsurface engineering and engineering problem-solving methods, with an emphasis on fossil energy exploitation and geologic CO₂ storage. Includes aspects of basic petroleum geology. Two lecture hours and three laboratory hours a week for one semester. May not be counted by students with credit for Petroleum and Geosystems Engineering 102 and 203. Offered on the letter-grade basis only. Prerequisite: Credit with a grade of at least C- or registration for Geological Sciences 401 or 303.

PGE 305. Energy and the Environment.

The forms of current and potential energy sources, and how these might impact the earth's environment. Three lecture hours and one and one-half laboratory hours a week for one semester. May not be counted toward a degree in geological sciences, geosystems engineering and hydrology, or petroleum engineering.

PGE 310. Formulation and Solution of Geosystems Engineering Problems.

Introduction to mathematical equations typically encountered in petroleum and geosystems engineering; methods to solve equations graphically, analytically, and with numerical methods; applications of computers to problem solving. Three lecture hours a week for one semester. Prerequisite: Physics 303K and 103M and credit or registration for Mathematics 427K.

PGE 312. Physical and Chemical Behavior of Fluids I.

Principles of organic chemistry; phase behavior; properties of hydrocarbon gases and liquids and oil field waters; overview of laboratory phase behavior measurements; material balance calculations. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Chemistry 302 with a grade of at least C-.

PGE 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Petroleum and Geosystems Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Petroleum and Geosystems Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses

PGE 421K. Physical and Chemical Behavior of Fluids II.

Applications of thermodynamics and physical chemistry to petroleum and geosystems engineering. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Petroleum and Geosystems Engineering 326, and admission to an appropriate major sequence in engineering or consent of instructor.

PGE 322K. Transport Phenomena in Geosystems.

Applications of mass, heat, and momentum balances to fluid flow problems; shell balances; non-Newtonian fluids; transport processes through permeable media. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Engineering Mechanics 306 and Mathematics 427K with a grade of at least C- in each.

PGE 323K. Reservoir Engineering I: Primary Recovery.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Classification of subsurface reservoirs by type and recovery mechanism; reserve estimates based on material balance; steady-state and transient fluid flow in permeable reservoir rocks as applied to subsurface engineering problems. Three lecture hours a week for one semester. Petroleum and Geosystems Engineering 323K and 331 may not both be counted. Offered on the letter-grade basis only. Prerequisite: The following with a grade of at least C-: Petroleum and Geosystems Engineering 310, 326, and registration or credit with a grade of at least C- for 427.

PGE 323L. Reservoir Engineering II: Secondary and Tertiary Recovery.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Introduction to reservoir displacement processes; water and gas injection; enhanced recovery. Three lecture hours a week for one semester. Petroleum and Geosystems Engineering 323 and 323L may not both be counted. Offered on the letter-grade basis only. Prerequisite: Mathematics 427K, Petroleum and Geosystems Engineering 310, 322K, 323K, and 424.

PGE 323M. Reservoir Engineering III: Numerical Simulation.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Mathematical equations governing fluid flow in reservoirs; numerical methods to solve the equations; numerical reservoir simulation; treatment of wells; history matching; a simulation project performed using a commercial simulator. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Petroleum and Geosystems Engineering 323L.

PGE 424. Petrophysics.

Properties of rocks; measurement and interpretation of petrophysical properties; application of petrophysics to subsurface engineering problems; interaction of resident fluids with rocks. Extensive written reporting. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: For petroleum engineering majors and geosystems engineering and hydrogeology majors, the following coursework with a grade of at least C- in each: Petroleum and Geosystems Engineering 333T and Physics 303L; credit or registration for Petroleum and Geosystems Engineering 322K; and admission to the major sequence; for others, consent of instructor.

PGE 325L. Cooperative Engineering.

This course covers the work period of petroleum engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for three semesters. The student must complete Petroleum and Geosystems Engineering 325LX, 325LY, and 325LZ before a grade and degree credit are awarded. Prerequisite: For 325LX, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 325LY, Petroleum and Geosystems Engineering 325LX and appointment for a full-time cooperative work tour; for 325LZ, Petroleum and Geosystems Engineering 325LY and appointment for a full-time cooperative work tour.

PGE 225M. Cooperative Engineering.

This course covers the work period of petroleum engineering students in the Cooperative Engineering Program. Forty laboratory hours a week for

two semesters. The student must complete Petroleum and Geosystems Engineering 225MA and 225MB before a grade and degree credit are awarded. Prerequisite: For 225MA, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour; for 225MB, Petroleum and Geosystems Engineering 225MA and appointment for a full-time cooperative work tour.

PGE 125N. Cooperative Engineering.

Covers the work period of petroleum engineering students in the Cooperative Engineering Program. One lecture hour a week for one semester. May be repeated for credit. Prerequisite: Petroleum and Geosystems Engineering 325L or 225M, application to become a member of the Cooperative Engineering Program, approval of the dean, and appointment for a full-time cooperative work tour.

PGE 326. Thermodynamics and Phase Behavior.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Basics of phase behavior, classical thermodynamics in terms of material and energy balances, and applications to changes of state of petroleum fluids. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Chemistry 302 with a grade of at least C-, and credit with a grade of at least C- or registration for Mathematics 427K.

PGE 427. Properties of Petroleum Fluids.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Principles of organic chemistry, phase behavior of multicomponent mixtures, properties of hydrocarbon gases and liquids and oil field waters, overview of laboratory phase behavior measurements, and material balance calculations. Three lecture hours and three laboratory hours a week for one semester. Petroleum and Geosystems Engineering 312 and 427 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Chemistry 302 with a grade of at least C-, and credit with a grade of at least C- or registration for Petroleum and Geosystems Engineering 326.

PGE 430. Drilling and Well Completions.

Elements of rock mechanics, drilling fluids, factors affecting rate of penetration, and well completions, including casing and tubing design. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Engineering Mechanics 319 with a grade of at least C-, credit or registration for Petroleum and Geosystems Engineering 322K, and admission to the major sequence.

PGE 333T. Engineering Communication.

Advanced technical communication skills, with emphasis on writing strategies for technical documents, oral presentations, and visual aids. Three lecture hours a week for one semester. Prerequisite: Rhetoric and Writing 306 with a grade of at least C-.

PGE 334. Reservoir Geomechanics.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Basic stress and strain analysis; pore pressure and in situ stress estimation and measurement; deformation mechanisms in rock; rock fracture description and analysis; wellbore stresses and failure; wellbore stability analysis; fault stability analysis; depletion-induced reservoir deformation; and hydraulic fracturing. Emphasis on applications to petroleum engineering. Two lecture hours and three laboratory hours a week for one semester. Petroleum and Geosystems Engineering 432 and 334 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Engineering Mechanics 319 and Petroleum and Geosystems Engineering 301 with a grade of at least C- in each.

PGE 337. Introduction to Geostatistics.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Basic probability and statistics, study of correlated variables, statistical interpolation and simulation, and global optimization. Emphasis is on the ways the results of these procedures are related to geology and fluid flow. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Mathematics 408D or equivalent, and Petroleum and Geosystems Engineering 310 with a grade of at least C- in each.

PGE 361. Advanced Reservoir Engineering.

Secondary recovery methods; computer simulation of reservoir performance; applications to field problems. Three lecture hours a week for one semester. Prerequisite: Petroleum and Geosystems Engineering 326 and 323K (or 331).

PGE 362. Production Technology and Design.

Restricted to students admitted to major sequence in petroleum engineering. Analysis, specification, and characteristics of production systems; inflow performance; wellbore and tubing hydraulics; and artificial lift. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Petroleum and Geosystems Engineering 430.

PGE 363. Petroleum Leasing Regulations and Practices.

Restricted to students admitted to major sequence in petroleum engineering. Domestic and worldwide regulations associated with petroleum leasing, including offshore areas, and environmental provisions concerning petroleum exploration and production. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Petroleum and Geosystems Engineering 365 or the equivalent.

PGE 364. Natural Gas Engineering.

Production, transportation, and storage of gas; metering and gauging; performance of wells; estimation of gas reserves; prevention of waste and utilization of natural gas. Three lecture hours a week for one semester. Prerequisite: For petroleum engineering majors, Petroleum and Geosystems Engineering 326, 323K (or 331), and 362 and admission to the major sequence; for others, upper-division standing and consent of instructor.

PGE 365. Resource Economics and Valuation.

Restricted to students admitted to major sequence in petroleum engineering. Derivation of profitability criteria for earth resource investments, project analysis in terms of the interrelation of technical and economic factors, investment analysis in the presence of uncertainty, and project planning. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Petroleum and Geosystems Engineering 310 with a grade of at least C-, and 323K.

PGE 368. Fundamentals of Well Logging.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Principles, applications, and interpretation of well logs as used in exploration and evaluation of subsurface formations. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Credit for Geological Sciences 316M or 416P, Physics 303L, and 103N with at least a C-; and Petroleum and Geosystems Engineering 424.

PGE 371. Energy Finance.

Restricted to students admitted to major sequence in petroleum engineering. Fundamentals of finance as applied to the petroleum industry, including petroleum project financing techniques, investigating sources of capital, and methods used to evaluate an oil company's

financial performance. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Petroleum and Geosystems Engineering 365.

PGE 372. Advanced Drilling and Well Completions.

Applications of geomechanics in wellbore and near-wellbore problems encountered in drilling and completing high-pressure, high-temperature wells on land and water locations. Three lecture hours a week for one semester. Petroleum and Geosystems Engineering 372 and 379 (Topic: Advanced Drilling and Well Completions) may not both be counted. Prerequisite: Petroleum and Geosystems Engineering 430 and 334 (or 432).

PGE 373L. Geosystems Engineering Design and Analysis.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Team-oriented design projects involving the application of geologic and engineering methods to the solution of subsurface problems, using field case histories. Projects are selected for each student based on his or her petroleum engineering technical area option. Three lecture hours a week for one semester, with one additional hour a week to be arranged. Petroleum and Geosystems Engineering 373L and 374 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Petroleum and Geosystems Engineering 323K (or 331), 323L, 362, and 368.

PGE 176, 276, 376. Special Problems in Petroleum and Geosystems Engineering.

Independent investigation of an advanced subject in petroleum and geosystems engineering, for superior students only. Conference course. Prerequisite: Admission to an appropriate major sequence in engineering and written consent of instructor.

PGE 377. Deepwater Operations.

Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Overview of various technical, logistical, and managerial elements that are functionally integrated in deepwater operations, with emphasis on applications in the Gulf of Mexico. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Petroleum and Geosystems Engineering 323K, 430, 334, and 362.

PGE 378. Applied Reservoir Characterization.

Restricted to students admitted to major sequence in petroleum engineering. Reservoir modeling using software tools for statistical analysis of reservoir data; variogram analysis and modeling; spatial interpolation (kriging); tools for data integration in kriging; stochastic simulation of rock-types (lithology), pay thickness/porosity, and permeability; inputting geological models into flow simulation; uncertainty assessment. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Geological Sciences 416M or 316P with at least a C-, and Petroleum and Geosystems Engineering 323K (or 331), and 337.

PGE 379. Studies in Petroleum and Geosystems Engineering.

Special courses or seminars on recent developments in engineering. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Admission to an appropriate major sequence in engineering or consent of instructor.

Topic 10: Artificial Lift. Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Life of a well, well testing, gas and plunger lift, progressive cavity pumps, electric submersible pumps, and beam lift. Petroleum and Geosystems Engineering 379 (Topic: Artificial Lift) and 379 (Topic 10) may not both be counted. May be used to fulfill the technical

elective requirement for the Bachelor of Science in Petroleum Engineering degree. Offered on the letter-grade basis only. Additional prerequisite: Petroleum and Geosystems Engineering 430 and 362. **Topic 11: Facilities Management.** Restricted to students admitted to major sequence in geosystems engineering and hydrogeology or petroleum engineering. Petroleum fluid characteristics, process control, separators, metering, produced water, tanks, gas processing, gas compression, and liquid pumps. Petroleum and Geosystems Engineering 379 (Topic: Oil and Gas Production Facilities Design) and 379 (Topic 11) may not both be counted. May be used to fulfill the technical elective requirement for the Bachelor of Science in Petroleum Engineering degree. Offered on the letter-grade basis only. Additional prerequisite: Petroleum and Geosystems Engineering 362.

PGE 679H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis. Individual instruction for two semesters. Students pursuing both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering may use this course to fulfill the thesis requirement for the Bachelor of Arts, Plan II. Prerequisite: For 679HA, enrollment in the Engineering Honors Program; for 679HB, Petroleum and Geosystems Engineering 679HA and enrollment in the Engineering Honors Program.

College of Fine Arts

Douglas Dempster, PhD, *Dean*

Andrew F Dell'Antonio, PhD, *Associate Dean for Undergraduate Studies*

Hunter C March, PhD, *Associate Dean for Arts Education*

D. Rachel Martin, BFA, *Assistant Dean*

<http://www.utexas.edu/finearts/>

General Information

Mission

The College of Fine Arts was established by the state legislature in 1937; in the decades since then, the college has grown with the University to become a leading center for arts study. Both students and faculty members of the College of Fine Arts have regularly received national and international recognition for their achievements; such recognition indicates the degree of academic and artistic excellence to which the college is dedicated.

The College of Fine Arts strives to prepare students for the practice, study, criticism, and teaching of the arts; to lead in developing the arts through research and the creation of new works; and to provide performances and exhibitions that deepen the understanding of the arts, expand audiences, and develop a better quality of life in the University, community, state, and nation. The college prepares students and audiences for the coming decades by emphasizing cultural diversity and technological advancement and by exploring the interrelationships among all the arts.

Facilities

The Office of the Dean of the College of Fine Arts is located in the E. William Doty Fine Arts Building, at the corner of 23rd and Trinity streets. General inquiries about the college should be directed to this office. The mailing address is The University of Texas at Austin, Office of the Dean, College of Fine Arts, 2305 Trinity Street D1400, Austin TX, 78712.

Within the college are three academic units—the Department of Art and Art History, the Sarah and Ernest Butler School of Music, and the Department of Theatre and Dance. Inquiries about a particular unit should be directed to that unit.

The Visual Arts Center

The Visual Arts Center (VAC) is a place for the intersection of art education and art innovation, which draws together a uniquely diverse population of students, alumni, faculty, guest artists, and creative voices from around the world. Comprising 25,000 square feet, it is the heart of the Department of Art and Art History at The University of Texas at Austin, providing pivotal exhibition, education, outreach, and research space. Designed by renowned San Antonio architects Lake | Flato, the VAC features state-of-the-art exhibition galleries and community gathering spaces that form the intellectual and emotional center of UT's dynamic arts community.

For more information on the VAC's exhibitions and public programs, please visit <http://www.utvac.org>.

Texas Performing Arts

Texas Performing Arts, one of the nation's most well-respected University-based arts centers, serves the campus and the Austin community at large through a diverse schedule of world-class performances, educational activities, and collaborative campus and community partnerships.

Texas Performing Arts presents an international season of music, theatre, dance, and conversation as well as the best in touring Broadway and concert attractions. As a university-based arts center, Texas Performing Arts also supports the academic mission of the College of Fine Arts by mentoring students and supporting the performance and research goals of faculty and staff members.

Computer Facilities

In addition to the computer facilities available to all students at the University, the College of Fine Arts maintains facilities with special hardware and software for its own undergraduate and graduate majors. These include a central computer laboratory and learning resource center located in the Fine Arts Library and media-enhanced classrooms in each of the three academic units, and extensive wireless Internet coverage throughout the college.

Because of the rapidly growing importance of computers in College of Fine Arts curricula, students are strongly encouraged to come to the University with their own computers. Students should contact the area of academic interest for more information.

Fine Arts Library

Located in the E. William Doty Fine Arts Building, the Fine Arts Library provides a broad range of services and materials for students in art, theatre, dance, and music, as well as audiovisual materials in other subject areas. Services include information and research assistance, instruction in getting the best from library databases including online and full-text journals, circulation and reserves (for checking out items), and media and technology support. The Fine Arts Library is wireless equipped and offers computing hardware and software to support the study of the fine arts. Students may borrow media equipment, including digital cameras and CD players, and reserve seminar and group study rooms. Lockers and carrels are also available. For more information go to: <http://www.lib.utexas.edu/fal/services.html>.

The art collection includes materials on most art and design movements and schools, photography, and art education. Artists of most periods and nationalities and studies of their work are represented, as are most media and techniques. Art works on display include a large pre-Columbian pottery collection and modern prints. The digital image collection contains over 60,000 images from art, architecture, the performing arts, and fashion, and is accessible, with a UT EID, at <http://dase.laits.utexas.edu>.

The music collection includes materials on performance, composition, history, ethnomusicology, music education, and music therapy. Most historical periods and geographical areas are covered in both classical and popular idioms, and while the emphasis is on the Western classical tradition, many other musics are represented. Tens of thousands of scores are available for both study and performance, and over 50,000 CDs are available for listening, as well as musicals, operas, conducting and master classes on DVD.

The theatre and dance collection includes materials on performance, especially play production, theatrical design, playwriting, theatre education, and dance. Materials on other types of theatrical presentations, such as magic, circuses, and pantomime, are also included. The Fine Arts Library holds texts of major plays written in English or translated into English, with contemporary plays collected most heavily. The Perry-Castañeda Library also holds texts of plays in English and other languages, with emphasis on plays as a literary form and on literary criticism.

The audiovisual collection includes documentary and feature films, including popular movies, foreign films, Academy Award winners, and film

festival winners on DVDs, VHS tapes, and streaming online. Other media formats include 16-mm films, interactive media/CD-ROMs, and slides.

Most materials, including CDs and DVDs, can be checked out by anyone with a valid UT EID.

Special collections include materials from the Austin Theatre Alliance—Paramount and State Theatres, and the Historical Music Recordings Collection, which includes over 200,000 items in older formats such as 78rpm and LP records, and audiocassettes.

Financial Assistance Available through the College

Students in the College of Fine Arts are eligible for a variety of scholarships and awards. Most scholarship aid in the college is offered through the academic units (art and art history, music, and theatre and dance). For information about scholarship application procedures and deadlines, the student should contact the academic unit of interest.

Student Services

Office of the Dean, Student Affairs

In the College of Fine Arts, the Office of the Dean, Student Affairs offers a variety of student services, including general academic advising, maintenance of student records, evaluation of the student's academic standing and progress toward a degree, and information about programs in which students may study abroad. Students should contact the Office of the Dean, Student Affairs for answers to questions about degree requirements or other College of Fine Arts or University policies and regulations. This office is also a good source of general information and referral.

Academic Advising

Each academic unit in the college (art and art history, music, and theatre and dance) has an undergraduate advising office with a faculty advising coordinator and one full-time staff adviser. Questions about advising policies and procedures should be directed to those offices.

A student enrolled in the College of Fine Arts is required to meet with a designated adviser before registering for any semester or summer session. This meeting must take place during the official advising period, and the student's proposed schedule of classes must be approved by the adviser. Subsequent changes or corrections in the schedule must also have the adviser's approval.

Career Services

Career Advising

Fine Arts Career Services, a division of the Office of the Dean, helps fine arts majors explore career options, plan for careers, and develop strategies for seeking jobs upon graduation. More information is available at <http://www.utexas.edu/finearts/careers/>. Career advising and planning services are also available from the Sanger Learning and Career Center in Jester Center and the Center for Strategic Advising and Career Counseling in the School of Undergraduate Studies.

The University makes no promise to secure employment for each graduate.

Education Career Services

Education Career Services provides job placement services in education-related occupations at the elementary school, secondary school, and college level. Candidates for teacher certification should register with Education Career Services at the beginning of their student-teaching semester. Additional information is available on the Education Career

Services Web site at <http://www.edb.utexas.edu/education/edServices/career/>.

Student Organizations

In each of the units of the College of Fine Arts are various student organizations, including honor societies, professional associations, and service organizations. For information about current organizations and their eligibility requirements, contact the appropriate unit.

The Fine Arts Council is the official student organization of the college.

Study Abroad

The University offers many opportunities for students to study abroad. Among these is the Learning Tuscan program, which offers instruction by University faculty members at the Santa Chiara Study Center in Castiglion Fiorentino, near Florence. More information is available from the undergraduate advising office in the Department of Art and Art History.

Casa Herrera is a research, conference, and teaching facility located in the heart of Antigua, Guatemala, operated by the Department of Art and Art History. As an extension of the department's Mesoamerica Center, Casa Herrera focuses on the varied and inter-related disciplines that contribute to the study of Pre-Columbian art, archeology, history, and culture.

The Butler School of Music offers an opera program in Salzburg, Austria. More information is available from the undergraduate advising office in the Butler School of Music.

Another international opportunity is the Institute for Digital Performing Arts program, which takes place in Costa Rica during the summer. More information is available from the undergraduate advising office in the Department of Theatre and Dance.

Maymester Abroad courses in fine arts are offered for five weeks in May and June. More information is available from the Study Abroad Office at <http://www.utexas.edu/student/abroad/>.

Admission and Registration

Admission

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in *General Information* (<http://catalog.utexas.edu/general-information/admission>).

Within the College of Fine Arts, the departmental advising offices and dean's office provide assistance to students who plan to attend the University. For information about a particular academic area, prospective students should consult the advising office in the Department of Art and Art History, the Butler School of Music, or the Department of Theatre and Dance. They should consult the Office of the Dean, Student Affairs for general information and for answers to questions about degree requirements. Because of the variety of degree options available in the college, prospective students are encouraged to visit the campus and meet with an academic adviser or admissions coordinator. An appointment should be arranged in advance.

Admission Policies of the College

To major in any field in the College of Fine Arts, a student must be admitted to the University. He or she must also meet the following special requirements.

Department of Art and Art History

To major in the Department of Art and Art History, a student must have the approval of the Art and Art History Admissions Committee. Information about admission requirements, procedures, and deadlines is available from the undergraduate admissions office in the department or online at <https://www.utexas.edu/finearts/aah/admissions/undergraduate>

Students admitted to the design major must pass annual performance reviews to continue in the major.

Sarah and Ernest Butler School of Music

To major in music, a student must pass an audition conducted by the Butler School of Music. At the discretion of the school, a student who fails an audition may be allowed to reaudition at a later date. Information about audition requirements, procedures, dates, and deadlines is available from the undergraduate admissions office in the Butler School or online at <http://www.music.utexas.edu/admissions/undergraduate/>

Department of Theatre and Dance

Admission to programs in the Department of Theatre and Dance requires the approval of the Theatre and Dance Admissions Committee. Information about admission requirements, procedures, and deadlines is available from the undergraduate admissions office in the department or online at <http://www.utexas.edu/finearts/tad/undergraduate/how-apply>

Transfer

Internal Transfer

A student may transfer from another division of the University to the College of Fine Arts in accordance with the procedures and policies given in *General Information* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees/transfer-from-one-division-to-another-within-the-university>). However, a student seeking admission to any department of the college must also satisfy the special admission requirements described above.

External Transfer

A student who begins study in the fine arts at another institution should consult the transfer adviser in the departmental undergraduate advising office (art and art history, music, theatre and dance) before applying to the University.

Transfer Credit Evaluation

Most credit accepted from another college or university is evaluated by the Office of Admissions to determine equivalent courses at the University of Texas at Austin. For some transferred courses, especially in the fine arts, credit is accepted but no specific University equivalency is assigned. If, for example, a student has completed twelve semester hours of transferable coursework in studio art at another institution, the Office of Admissions may accept the work only as twelve semester hours of unspecified credit in art. The same will often be true for courses in theatre and dance and music.

Unspecified transfer credit outside the student's major is evaluated by the Office of the Dean, Student Affairs during the degree audit process described in the Degree Audit (p. 222) section. For unspecified transfer credit within the student's major, however, the student must seek a transfer evaluation from the designated adviser in art and art history, music, or theatre and dance. The adviser will identify courses in the major that are equivalent to University courses and forward his or her written recommendation to the Office of the Dean, Student Affairs.

Transfer credit in music performance may not be counted toward a degree in music until the student has completed additional music performance coursework at the University.

Registration

General Information gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule*, published each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the registrar's Web site, <http://registrar.utexas.edu/>.

Approvals Required

Before registering for any semester or summer session, a student in the College of Fine Arts must obtain written approval of the proposed schedule of classes from his or her designated adviser.

Prerequisites

The student must also meet the prerequisite for each course in which he or she enrolls. Prerequisites are given in the relevant catalog section and often appear in the *Course Schedule*. A student who registers for or adds a class without having met the prerequisite may be dropped from the class.

Fine Arts Registration Requirements

In addition to individual course prerequisites, there are special registration requirements for certain courses and areas of study in the College of Fine Arts.

Sarah and Ernest Butler School of Music

1. A student with transferred college credit in music theory must take a diagnostic examination in music theory. The results of the examination determine the level of music theory for which the student is advised to register.
2. Before beginning upper-division coursework in the major instrument, students majoring in music performance (including those pursuing the pedagogy option) must pass a full faculty jury examination in the major instrument and must be admitted to upper-division standing in that instrument.
3. Before beginning upper-division coursework in the major area, a student majoring in composition or music studies must obtain the approval of a designated committee composed of faculty members from that major.
4. Fulfillment of the music performance requirement signifies the attainment of a given level of artistic performance, rather than the completion of a specific number of semester hours of credit. At the discretion of the faculty, a student may be required to repeat any course in music performance; in such a case, the course may be repeated for credit. No music performance requirement is fulfilled unless approval of the faculty has been obtained.
5. A student who receives a grade lower than a C- in any music performance course may not register for that course during the next semester or summer session until the requests of other students for such work have been met.
6. A student whose degree plan requires a piano proficiency of Music 210K must continue with group piano classes in consecutive semesters until the requirement is fulfilled. In exceptional cases, a student with permission from the group piano supervisor may enroll in private instruction Piano 201 until the Music 210K proficiency has

been reached. The student may not enroll in private instruction Piano 202 until the Music 210K proficiency has been completed.

Department of Theatre and Dance

A student must enroll in an appropriate production or performance laboratory course, under the supervision of a Department of Theatre and Dance faculty member, in any semester he or she wishes to participate in a production sponsored by the department. A student majoring in the Department of Theatre and Dance must consult his or her adviser to determine the appropriate course. Nonmajors who wish to enroll in production or performance laboratory courses must consult the undergraduate advising office of the department.

Academic Policies and Procedures

Academic Standards

Class Attendance and Absences

Regular and punctual attendance is required at all classes, laboratories, practice hours, and other activities for which the student is registered.

Absences from scheduled practice hours, rehearsals, and laboratories will be excused only for serious and substantiated reasons, and the final grade in the course may be lowered for unexcused absence. Absence from a theatre, dance, or music rehearsal, crew meeting, or performance may be deemed sufficient reason for giving the student a grade of *F* for the semester's work in the course concerned.

If an instructor indicates that a student has fallen below a passing grade in a course because of excessive absences, the dean, upon written recommendation of the instructor, may drop the student from that course and assign a grade of *F* for the semester.

Special Regulations of the College

Studio and Design Courses

Students retain copyright to all two-dimensional, three-dimensional, time-based, and electronic artwork created in the Department of Art and Art History; they grant a nonexclusive license to exhibit, display, reproduce, perform, or adapt these works at the discretion of the faculty. Works left in any departmental facility at the end of any semester or summer session may be removed or destroyed at the discretion of the faculty.

Music Performances

A student majoring in the Butler School of Music must consult his or her faculty adviser before participating in any public performance.

Honors

University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information*.

Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information*.

Special Honors in Art History

The Honors Program in Art History gives outstanding art history majors an opportunity to undertake an advanced research and writing project under the supervision of a faculty member. The notation "Special Honors in Art History" appears on the transcript of each graduate who completes the program.

Admission to the Program

The honors program is available to qualified art history majors pursuing the degree of Bachelor of Arts in Art. At the beginning of the senior year, an interested art history major should apply to the honors adviser for admission to the program. The criteria for admission are

1. Completion of at least ninety semester hours of college credit.
2. A University grade point average of at least 3.00.
3. A grade point average of at least 3.50 in all art history courses attempted, both at the University and elsewhere.
4. Completion of at least fifteen semester hours in art history. If the hours in art history were not earned at the University, admission is at the discretion of the honors adviser.
5. Approval of the honors adviser, who is responsible for maintaining the high standards for admission to and completion of the program.

Graduation with Special Honors in Art History

To complete the program, students must meet the following requirements by the end of the semester in which they graduate.

1. Graduation as an art history major.
2. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree.
3. A University grade point average of at least 3.00.
4. A grade point average of at least 3.50 in all art history courses taken at the University.
5. Completion of Art History 375 with a grade of at least *B*.
6. Approval of the honors adviser.
7. Completion of Art History 379H with a grade of *A*. This conference course, in which the student researches and writes a thesis, may not be counted toward the minimum number of hours of art history required for the degree.

To enroll in Art History 379H, the student must have the consent of the honors adviser. Consent is based on a written prospectus for the student's honors thesis and a letter of support from the art history faculty member who will supervise the thesis. The prospectus and the letter of support must be submitted to the honors adviser by the end of the semester preceding the semester in which the student plans to take Art History 379H.

The student may develop the honors project and prepare the prospectus either in Art History 376 or in another art history course:

- a. With the approval of the honors adviser, the student must complete the independent study course Art History 376 with an art history faculty member who agrees to supervise the student's work. Art History 376 may be counted toward the degree as elective art history credit. The student must earn a grade of at least *B* in order to progress to Art History 379H.
 - b. The student may also base the prospectus on a project undertaken in another art history course in which he or she earned a grade of at least *B*.
8. Submission of a departmental honors degree audit application to the Office of the Dean of the College of Fine Arts. This degree audit application may be submitted when the student is admitted to the

honors program; it must be on file when the student applies for graduation. Failure to meet this requirement will preclude graduation with special honors in art history.

Certificate of Recognition in Music Performance

This certificate is offered to encourage undergraduate music students who are not music performance majors to pursue the intensive study of their instrument beyond the minimum requirements for their degree. The area of performance is indicated on the certificate.

Eligibility

To apply for a Certificate of Recognition in Music Performance, a student must be enrolled as an undergraduate music major pursuing the Bachelor of Music degree or the Bachelor of Arts in Music degree. He or she must be enrolled in principal instrument course 260.

Procedure

A student who meets the eligibility criteria must submit a petition to the appropriate music performance jury for permission to audition before the Butler School of Music faculty—that is, to perform at a full faculty jury examination. This petition may be submitted during any semester in which the student is enrolled in principal instrument course 260. Ordinarily, the student may not audition for the full faculty before the conclusion of his or her second semester of principal instrument course 260. If the petition is approved, the student may audition at a full faculty jury examination.

If the student obtains approval at the full faculty jury examination, then he or she must present a certificate recital during the following academic year. The student may also enroll in Music 420R rather than principal instrument course 260 for the semester in which the certificate recital is to be given. A certificate recital must be equivalent to the junior recital required of a performance major and must offer a repertoire equivalent to that of an upper-division performance major. The recital is heard by the faculty of the student's principal instrument, who vote to approve or disapprove the granting of a Certificate of Recognition in Music Performance. If approval is given by the division faculty, the certificate is issued by the Butler School and signed by both the student's music performance instructor and the director of the school.

Graduation

Special Requirements of the College

All students must fulfill the general requirements (p. 17) for graduation. Students in the College of Fine Arts must also fulfill the following requirements.

Residence

See the University-wide general requirements (p. 17) on coursework to be taken in residence. Unless an exception is approved by the adviser and the dean, a student in the College of Fine Arts must also complete in residence the last eighteen semester hours in the major subject that are counted toward the degree.

Grade Point Average

All University students must have a grade point average of at least 2.00 to graduate. In addition, a student in one of the following majors must meet special grade point requirements.

Studio Art

A student majoring in studio art must have a grade point average of at least 2.50 for all upper-division studio art courses taken in residence at the University.

Design

A student majoring in design must have a grade point average of at least 2.50 for all upper-division design courses taken in residence at the University.

Art History

A student majoring in art history must have a grade point average of at least 2.50 for all upper-division art history courses taken in residence at the University.

Bachelor of Arts in Music

A student pursuing the Bachelor of Arts in Music must have a grade point average of at least 2.50 in all upper-division courses in the Butler School of Music (excluding ensemble) taken in residence at the University.

Bachelor of Arts in Theatre and Dance

A student pursuing the Bachelor of Arts in Theatre and Dance must have a grade point average of at least 2.50 in all upper-division courses in the Department of Theatre and Dance.

Teacher Certification in Art, Theatre Arts, Dance, or Music

A student pursuing teacher certification must meet certain grade point average requirements during the course of the certification program. For information, consult the teacher certification officer, College of Education.

Butler School of Music Special Requirements

Ensemble Requirement

Ensembles that may be used to fulfill the following requirements are designated by the Butler School. For information, the student should contact the undergraduate advising office of the school. With the approval of the designated adviser, a student may enroll in more than one ensemble in a semester, but no more than one ensemble a semester may be used to fulfill this requirement.

Bachelor of Music

Students seeking the Bachelor of Music must complete in residence at least eight long-session semesters of approved ensemble. Transfer students must complete an approved ensemble each long-session semester in residence until they have met the ensemble requirement or until they graduate, whichever comes first. A transfer student may count toward this requirement two semesters of transferred ensemble approved by the Butler School.

The ensemble requirement is waived for music studies majors during the student teaching semester.

Bachelor of Arts in Music

Students seeking this degree must complete in residence at least four long-session semesters of ensemble approved by the Butler School. Transfer students must complete an approved ensemble each long-session semester in residence until they have completed four semesters of ensemble or until they graduate, whichever comes first. A transfer student may count toward this requirement one semester of transferred ensemble approved by the Butler School.

Recital Requirement for Music Studies Majors

Before the end of his or her last semester of study on the principal instrument, a music studies major must present either the recital required for a Certificate of Recognition in Music Performance (p. 221) or a community performance approved by the music studies faculty and the student's instructor in the principal instrument.

Degree Audit

At registration periods, each student normally receives an advising audit that summarizes his or her progress toward a degree. An official degree audit, however, is the required statement from the Office of the Dean, Student Affairs of the student's official standing in a College of Fine Arts degree program.

Official degree audits are printed and reviewed by the Office of the Dean, Student Affairs for students with a major in the College of Fine Arts who have completed at least sixty semester hours of coursework. The degree audit is mailed to the student, and the student is advised to retain this official degree audit for his or her records. If a student changes his or her catalog, principle instrument, major, or any degree option that affects the requirements of his or her degree program, a new official degree audit will be printed, reviewed, and mailed to the student.

The official degree audit provides an accurate statement of the requirements, but the student is responsible for meeting all deadlines, knowing the requirements, and registering for courses that fulfill all the requirements for the degree as stated in a catalog under which he or she is entitled to graduate. Before registering, the student should seek an official ruling from the Office of the Dean, Student Affairs if in doubt about any requirement.

Applying for Graduation

In the semester or summer session in which the degree is to be conferred, the candidate must be registered at the University and must file a graduation application form with the Office of the Dean, Student Affairs. This should be done at the beginning of the semester in which the student intends to graduate; it must be done by the deadline to apply for an undergraduate degree, which is given in the official academic calendar. No degree will be conferred unless the graduation application form has been filed on time.

An official degree audit must be on file when the student submits the graduation application. Because the application process includes a review of all remaining degree requirements, candidates for graduation are encouraged to apply as early in the semester as possible. A student who applies for graduation but does not receive the degree must submit a new application in the semester he or she subsequently intends to graduate.

The student must be registered at the University for the semester or summer session in which the degree is to be granted. This requirement may be fulfilled by registering for courses in residence or by registering in absentia. For information about registration in absentia, the student should consult the Office of the Dean, Student Affairs no later than the second week of the semester in which he or she intends to graduate.

Credit received by examination, correspondence, or transfer does not fulfill the residence requirement. Students planning to receive credit by any of these means must consult the Office of the Dean, Student Affairs before the semester in which they intend to graduate for a ruling about whether the credit may be applied toward the degree and for information about the procedures and deadlines involving credit by examination, correspondence, and transfer.

No degree will be conferred unless all requirements have been fulfilled and all deadlines met.

Teacher Certification

To be recommended for a certificate to teach in Texas public schools, an undergraduate or graduate student must complete a University of Texas at Austin approved program for teacher preparation. The University maintains approved programs for art, theatre arts, dance, and music, and students interested in one of these teaching areas ordinarily pursue the degree program in visual art studies, theatre studies, dance, or music studies. Students seeking teacher certification must be approved by the College of Education for the Professional Development Sequence (PDS). In addition, they must complete additional state exams/requirements. See State Board for Educator Certification (SBEC) at <http://www.tea.state.tx.us> for details.

Degrees and Programs

Degrees Offered

The College of Fine Arts offers a wide variety of degree programs. For undergraduate students who seek professional training in the arts or who feel the need for intensive training in their chosen art, the college offers the degrees of Bachelor of Fine Arts and Bachelor of Music. These degrees require that approximately two-thirds of the coursework be completed in the major area.

The student who wants a broad education with an emphasis in the arts may pursue the degree of Bachelor of Arts in Art, Bachelor of Arts in Music, or Bachelor of Arts in Theatre and Dance. These degrees require that approximately a third of the coursework be completed in the major area.

Department of Art and Art History

The Department of Art and Art History offers academic programs in art history, design, studio art, and visual art studies.

The study of art history embraces a wide range of objects: paintings, drawings and prints of all kinds, including photographs and film; sculpture; buildings and their grouping into towns and cities; graves and tombs; gardens; books and manuscripts; objects made of precious stones and metals; performance; in short, all visual and material culture. There is a full range of art history instruction in ancient, medieval, Renaissance, baroque, modern, and contemporary art, as well as in the art from non-Western areas (African, Asian, Islamic, Central and Latin American, Mesoamerican, Native American, and Oceanic).

Design as a complex cultural activity expresses the ideas and values of society while it contributes to the formulation of those ideas and values. Students in design focus on the connection between design and related disciplines, emphasizing the relationships the designer shares with others. Through in-depth investigation of social, cultural, technological, and aesthetic dimensions of design, students have the opportunity to increase their cognitive skills; develop critical analytical, research, and organizational skills; and gain facility with the technologies of design. The goal of the nontraditional design program is to encourage students to use the design process as a method of understanding their culture and to effectively articulate this understanding to others.

The purpose of the studio art program is to transmit a solid foundation in a wide range of studio practices by providing students with experiences in historical and theoretical models and by providing a vocabulary to understand and engage in art's critical discourse. Studio art instruction is given in drawing and painting (contemporary and historical practices), photography (black/white and digital), printmaking (intaglio, lithography,

serigraphy), sculpture (casting, hot and cold fabrication, installation), and transmedia (digital-time art, video art, performance art). Through an exploration of the ideas and forms at the leading edge of knowledge, our students develop the capacity for experimentation and invention to create new forms of studio art.

Art educators believe that art is an essential component of all societies and that an education is not complete without knowledge of art's history, purpose, function, and techniques. Visual art studies prepares students to strengthen art education in schools and communities through instruction in art criticism, philosophy, and current trends in art education, with art education history, philosophy, student development, teaching strategies, standards, objectives, and evaluation procedures. Field observations and practical classroom teaching are required of all students in our programs and leads to art teacher certification for early childhood through grade twelve.

The University's extensive resources for art research include the Fine Arts Library, the Blanton Museum of Art, the Perry-Castañeda Library, and specialized collections such as the Harry Ransom Center, the Classics Library, the Architecture and Planning Library, and the Benson Latin American Collection. While at the University, students also have access to the large permanent collection and traveling exhibitions.

Programs of study leading to the following undergraduate degrees are offered in the Department of Art and Art History:

- Bachelor of Arts in Art
Art history
Studio art
- Bachelor of Fine Arts
Design
Studio art
Visual art studies

Students who plan to pursue certification to teach art in Texas public schools should follow the visual art studies program.

Sarah and Ernest Butler School of Music

Through professional education of the highest caliber, the Butler School of Music prepares students for productive careers as performers, teachers, composers, and scholars, and for satisfying lives as informed and responsible members of a democratic society. In accordance with the University's mission, the School also seeks to extend the boundaries of knowledge and human experience through research and the creation of new music.

Housed in two connected buildings, the physical facilities of the Butler School include performance spaces in the 700-seat Bates Recital Hall with its world-renowned Visser-Rowland pipe organ, Jessen Auditorium, Recital Studio, and MuCullough Theatre. For special events the school collaborates with Texas Performing Arts for performances in Bass Concert Hall. Other facilities include well-equipped classrooms and faculty studios/offices, multiple large and small rehearsal halls, electronic music studios, recording studios, 130 practice rooms and modules (including dedicated rooms for organ, harp, and percussion), a music computer lab, chamber music rooms, two digital keyboard labs, and 250 well-maintained pianos. Also available to music students are libraries including manuscripts, rare editions, and performance collections; a Medieval and Renaissance instrument collection; a Javanese gamelan, and a Music Learning Laboratory.

Programs of study leading to the following undergraduate degrees are offered in the Butler School of Music:

- Bachelor of Arts in Music
Emphasis in Music

Emphasis in Music Business
Emphasis in Recording Technology

- Bachelor of Music
Composition
Jazz (Emphasis in Composition or Performance): Double bass, drum set, guitar, piano, saxophone, trombone, and trumpet
Music performance: Voice, piano, organ, harp, harpsichord, and orchestral instruments
Music studies: Students who plan to pursue certification to teach music in Texas public schools should follow the music studies program.

Department of Theatre and Dance

The Department of Theatre and Dance affords students opportunities for scholarship and practice in all the principal areas of theatre and dance. Students may choose programs of study leading to a variety of academic and professional goals, including teacher certification in both theatre and dance.

The facilities of the department are among the best available to university programs in the United States. In addition to the performance areas, studios, and shops of Texas Performing Arts, the department has the B. Iden Payne Theatre, the Oscar Brockett Theatre (a flexible space black box theatre), a 130-seat laboratory theatre, an extensive costume collection, four dance studios, a drafting studio, a design studio as well as numerous classrooms and rehearsal studios in the F. Loren Winship Drama Building. The Department also has a vital connection to the film and TV studios of the College of Communications, including collaborative courses with the Department of Radio-Television-Film. Of special interest to students pursuing theatre research is the Performing Arts Collection, housed in the Harry Ransom Humanities Research Center, which contains one of the world's most important collections of theatre material.

Programs of study leading to the following undergraduate degrees are offered in the Department of Theatre and Dance:

- Bachelor of Arts in Theatre and Dance
- Bachelor of Fine Arts

Acting
Dance

Students who plan to pursue certification to teach dance in Texas public schools should follow the dance studies option under the dance program.

Theatre studies

Students who plan to pursue certification to teach theatre arts in Texas public schools should follow the theatre studies program.

Applicability of Certain Courses

Physical Activity Courses

Physical activity courses (PED) are offered by the Department of Kinesiology and Health Education. A limited number of these courses may be counted as electives toward degrees in the College of Fine Arts, but only at the discretion of the dean. All physical activity courses are counted among courses for which the student is enrolled, and the grades are included in the grade point average. For further information, contact the Office of the Dean, Student Affairs.

Bible Courses

Bible courses may be counted as lower-division electives in College of Fine Arts degree programs that have room for such electives. No more than twelve semester hours of such work may be counted toward any degree offered by the University.

Courses Taken on the Pass/Fail Basis

Regulations concerning courses taken on the pass/fail basis are given in *General Information* (<http://catalog.utexas.edu/general-information>). For most degree programs in the College of Fine Arts, a very limited and restricted amount of coursework may be taken on the pass/fail basis. To be assured that a course taken on this basis will apply to the degree, the student must consult the Office of the Dean, Student Affairs before enrolling in the course.

Credit by Examination, Correspondence, and Transfer

Credit that a student in residence earns by examination, correspondence, or extension will not be counted toward a degree in the College of Fine Arts unless specifically approved in advance by the dean.

Credit that the student earns at another institution while enrolled in residence at the University also will not be counted toward a degree in the college unless approved in advance by the dean.

A student planning to take coursework at another institution while not enrolled in residence at the University should also seek a ruling from the Office of the Dean, Student Affairs as to whether the credit may be applied toward a degree and for information about procedures and deadlines. This ruling should be obtained before registering for the coursework.

No more than 10 percent of the semester hours required for any degree offered in the College of Fine Arts may be completed by correspondence.

Bachelor of Fine Arts

Core Curriculum

All students must complete the University's core curriculum (p. 20). The specific requirements for the Bachelor of Fine Arts consist of prescribed work, major requirements, and electives. In some cases, a course required for a major in the Bachelor of Fine Arts (BFA) may also be counted toward the core curriculum; these courses are identified below.

Studio Art Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with a global cultures flag, one course with a cultural diversity flag, one course with an ethics and leadership flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Studio art: Sixty semester hours, consisting of
 - a. Studio Art 303K, 303L, 304K, and 304L
 - b. Twelve semester hours, consisting of three hours from each of the following four areas:
 - i. Area A: Drawing, life drawing, painting
 - ii. Area B: Intaglio, lithography, photography, serigraphy
 - iii. Area C: Digital-time art, performance art, video art
 - iv. Area D: Ceramics, metals, sculpture
 - c. Thirty-six additional semester hours of studio art, of which at least twenty-four hours must be upper-division
2. Art history: Twelve semester hours, consisting of

- a. Art History 302 and 304
- b. Six semester hours of upper-division coursework in art history, three semester hours of which may also be counted toward the visual and performing arts requirement of the core curriculum

Electives

Six semester hours chosen from courses either within or outside the Department of Art and Art History. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BFA with a major in studio art: 120 semester hours as outlined above.

Design Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with a global cultures flag, one course with a cultural diversity flag, one course with an ethics and leadership flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Studio art: Twelve semester hours, consisting of Studio Art 303K, 303L, 304K, and 304L.
2. Design: Forty-five semester hours, consisting of
 - a. Design 370 with a grade of at least C and approval of the design faculty
 - b. Design 371 with a grade of at least C and approval of the design faculty
 - c. Thirty-nine additional hours of design, of which at least twenty-four must be upper-division
3. Art history: Twelve semester hours, consisting of
 - a. Art History 302 and 304
 - b. Six semester hours of upper-division coursework in art history, three semester hours of which may also be counted toward the visual and performing arts requirement of the core curriculum

Approval of the design faculty is required before the student may begin upper-division design courses. A student with transfer credit in design must have approval of the design faculty before taking upper-division design courses at the University.

Electives

Nine semester hours chosen from courses either within or outside the Department of Art and Art History. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BFA with a major in design: 120 semester hours as outlined above.

Visual Art Studies Major

The major in visual art studies is a preprofessional academic program recommended for students seeking teacher certification (early childhood through grade twelve) in art or planning to pursue undergraduate or

graduate training for visual art careers in community art programs. Students seeking teacher certification must adhere to current state requirements in addition to the degree requirements described in this catalog. Students should contact the College of Education for current state certification requirements.

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with a global cultures flag, one course with a cultural diversity flag, one course with an ethics and leadership flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Studio art: Thirty-six semester hours, consisting of
 - a. Studio Art 303K, 303L, 304K, and 304L
 - b. Twelve semester hours, consisting of three hours from each of the following four areas:
 - i Area A: Drawing, life drawing, painting
 - ii Area B: Intaglio, lithography, photography, serigraphy
 - iii Area C: Digital-time art, performance art, video art
 - iv Area D: Ceramics, metals, sculpture
 - c. Twelve additional semester hours of coursework in studio art, all of which must be upper-division
2. Art history: Twelve semester hours, consisting of
 - a. Art History 302 and 304
 - b. Six semester hours of upper-division coursework in art history, three semester hours of which may also be counted toward the visual and performing arts requirement of the core curriculum
3. Visual art studies: Twelve semester hours of coursework in visual art studies

Minor

Twelve semester hours approved by the visual art studies adviser.

Approved Electives

Six semester hours of coursework approved by the visual art studies adviser. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BFA with a major in visual art studies: 120 semester hours as outlined above.

Theatre Studies Major

The major in theatre studies is a preprofessional academic program recommended for students seeking teacher certification in theatre arts. Students seeking teacher certification must adhere to current state requirements in addition to the degree requirements described in this catalog. Students should contact the College of Education for current state certification requirements.

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag

requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Theatre and dance core: Eighteen semester hours, consisting of Theatre and Dance 311, 313C, 314C, 314P, 317C, and 317D
2. Theatre studies emphasis: At least thirty-three semester hours, consisting of
 - a. Acting and directing: Theatre and Dance 313D, 323C, and 323D
 - b. Design and technical production: Theatre and Dance 314M; and nine semester hours chosen from topics of Theatre and Dance 354T, including one course in each of the following three areas: costume, lighting, and scenery
 - c. Theatre studies: Theatre and Dance 326C, 326D, and 326E
 - d. Theatre and Dance 351T (Topic: *Creative Drama II*)
3. Nine additional semester hours of coursework in theatre and dance, of which at least six hours must be upper-division, with no more than three hours in production courses

Approved Electives

Eighteen semester hours of coursework approved by the theatre studies adviser. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BFA with a major in theatre studies: 120 semester hours as outlined above.

Dance Major

The option in Dance Studies is a preprofessional academic program recommended for students seeking teacher certification in dance. Students seeking teacher certification must adhere to current state requirements in addition to the degree requirements described in this catalog. Students should contact the College of Education for current state certification requirements.

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Theatre and dance core: Fifteen semester hours, consisting of Theatre and Dance 311, 312M, 314P, 317M, and 317N
2. Dance technique:
 - a. Contemporary dance technique: Twelve semester hours, consisting of two semesters of Theatre and Dance 312C and two semesters of 312D
 - b. Ballet technique: Twelve semester hours, consisting of two semesters of Theatre and Dance 312F and two semesters of 312G
3. Movement composition: Theatre and Dance 312N
4. Dance performance and repertory: Two semesters of Theatre and Dance 222P
5. Somatics/anatomy: Four semester hours, consisting of Theatre and Dance 112 and 352

6. Dance emphasis: Eleven semester hours, consisting of Theatre and Dance 332M, 332N, 232P, and 332R
7. Option in either Dance or Dance Studies:
 - a. For Option in Dance: Twenty-two semester hours, consisting of two semesters of Theatre and Dance 322E, two semesters of 322J, and ten semester hours chosen from 212P, 112T, 212T, 312T, 232Q, 332S, 152T, 252T, and 352T
 - b. For Option in Dance Studies: Twenty-one semester hours, consisting of three semesters of Theatre and Dance 352T and twelve hours of approved electives

To fulfill the degree requirements in dance technique, the student must achieve a suitable level of proficiency and obtain the approval of the dance faculty. At the discretion of the dance faculty, a student may be required to repeat specific dance technique courses in addition to those required for the degree. The student must be registered for dance technique each long-session semester in residence. To continue in this degree program, the student must pass an annual evaluation by the dance faculty. Students whose progress in dance technique is judged unsatisfactory by the faculty will be dismissed from the program.

Electives

Elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Requirements

For the BFA with a major in dance: at least 124 or 125 semester hours as outlined above.

Acting Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Theatre and dance core: Eighteen semester hours, consisting of Theatre and Dance 311, 314M, 314P, 317C, 317D, and 324P
2. Acting Emphasis: At least forty-eight semester hours, consisting of
 - a. Lower-division acting emphasis: Theatre and Dance 313C, 313D, 313E, 313F, 313G, 313K, 313L, 313M, and 313N
 - b. Upper-division acting emphasis: Theatre and Dance 323F, 323G, 321P or 323P, 353C, 353D, 353Q, and 353K or 353T

Approved Electives

Twelve semester hours of approved electives within the Department of Theatre and Dance chosen from the following:

1. Industry Internship: Theatre and Dance 372, 672, or 972
2. Theatre and Dance 353E, 353R, 353T, or additional upper-division semester hours in the Department of Theatre and Dance approved by the acting adviser

Total Minimum Requirements

For the BFA with a major in acting: at least 120 semester hours as outlined above.

Bachelor of Music

Core Curriculum

All students must complete the University's core curriculum (p. 20). The specific requirements for the Bachelor of Music consist of prescribed work, major requirements, and electives. In some cases, a course required for a major in the Bachelor of Music (BMusic) may also be counted toward the core curriculum; these courses are identified below.

Voice Performance Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance: Twenty-six semester hours, consisting of four semesters of Voice 210, two semesters of Voice 362, Music 420R, Music 460R, Music 210K and approval of the faculty, and Music 223J
2. Music literature and music theory: Music 605, 411, 612, 313M, 313N, 321J, 330L, and three hours chosen from Music 334, 337, 342, 343J, and 379K
3. Diction: Music 111E, 311F, 311G, and 311J
4. Music pedagogy: Music 460PA
5. Music ensemble: Two semesters of Ensemble 103P and at least eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221)

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Two semester hours chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in voice performance: 120 semester hours as outlined above.

Piano Performance Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance: With the recommendation of the faculty, given in advance, students may choose either of the following two options.

- a. Normally suggested for students who wish to emphasize performance: Thirty-two semester hours, consisting of four semesters of Piano 312, two semesters of 362, Music 420R, 460P, 460R, and 222J or 223J
 - b. Normally suggested for students who wish to emphasize pedagogy: Thirty-two semester hours, consisting of four semesters of Piano 312, two semesters of 260, 362, Music 460P, 460R, 366P, and 222J or 223J
2. Music literature and music theory: Music 605, 411, 612, 313M, 313N, 321J, 325M, and 330L; two semesters of 259N; and three hours chosen from 334, 337, 342, 343J, and 379K
 3. Music ensemble: Eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221)

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Three semester hours to be chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in piano performance: 120 semester hours as outlined above.

Organ or Harpsichord Performance Major Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance: Twenty-eight semester hours, consisting of four semesters of major instrument course 312, two semesters of major instrument course 362, Music 420R, 460R, and 222J or 223J
2. Music literature and music theory: Music 605, 411, 612, 313M, 313N, 321J, 325L, 325M, 330L, and three semester hours chosen from 334, 337, 342, 343J, and 379K
3. Music ensemble: Two semesters of Music 259N and eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221)

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Four semester hours chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in organ or harpsichord performance: 120 semester hours as outlined above.

Harp Performance Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance: Twenty-eight semester hours, consisting of four semesters of Harp 312, two semesters of 362, Music 420R, 460R, and 222J
2. Music literature and music theory: Music 605, 411, 612, 313M, 313N, 321J, and 330L; three semester hours chosen from Music 334, 337, 342, 343J, and 379K; and two courses chosen from the following: Music 214C, 325L, 325M, 226J, and 226K
3. Music ensemble: Two semesters of Music 259N and eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221)

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Four to six semester hours to be chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in harp performance: 120 semester hours as outlined above.

Orchestral Instrument Performance Major

This program is offered in the following instruments: violin, viola, violoncello, double bass, flute, oboe, clarinet, bassoon, saxophone, trumpet, French horn, euphonium, trombone, tuba, percussion, and guitar.

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance:
 - a. Thirty semester hours, consisting of four semesters of major instrument course 312, two semesters of major instrument course

- 362, Music 420R, 460R, 222J, and 210K, and approval of the faculty
 - b. For violin majors, proficiency in viola equivalent to Viola 201 and approval of the faculty
 - c. For euphonium majors, proficiency in trombone equivalent to Trombone 201 and approval of the faculty
2. Music literature and music theory:
 - a. Music 605, 411, 612, 313M, 313N, 321J, 226J, and 330L
 - b. Two semesters of either Music 259N or 259P
 - c. One of the following options, chosen with the consent of the undergraduate adviser:
 - i Two additional semesters of Music 259N or 259P
 - ii One semester of Music 334, 342, or 379K
 - d. Music 334, 337, 342, 343J, or 379K
 3. Music ensemble: Eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221)

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Two or three semester hours chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in orchestral instrument performance: 120 semester hours as outlined above.

Jazz Major

This program is offered in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, and trumpet.

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Music literature and music theory: Music 605, 411, 612, 313M, 313N, Music 321J, 226J, 228G, 228J, 228L, 328M, 330L, 343J, and Music Recording Technology 316M; majors and principals in instruments other than piano must also complete Music 228K.
2. Music ensemble: Eight semester hours of music ensemble courses as explained in Butler School of Music Special (p. 221) Requirements (p. 221)
3. For concentration in performance:
 - a. Piano: Twenty-four semester hours, consisting of three semesters of Piano 212, two semesters of 212J and approval of the faculty, two semesters of 362J, and Music 420J and 460J
 - b. Drum set: Twenty-four semester hours, consisting of two semesters of Percussion 212, two semesters of Drum Set 212J and approval of the faculty, two semesters of 362J, Music 210J and approval of the faculty, and 420J and 460J
 - c. Other instruments: Twenty-four semester hours, consisting of two semesters of major instrument course 212, two semesters of major instrument course 212J and approval of the faculty, two semesters of major instrument course 362J, Music 420J and 460J, and 210J and approval of the faculty
4. For concentration in composition:
 - a. Piano: Twenty-five semester hours, consisting of Music 214C and three semesters of 228P, three semesters of Piano 210, two semesters of 212J and approval of the faculty, one semester of 362J, and Music 420J
 - b. Other instruments: Twenty-five semester hours, consisting of Music 214C and three semesters of 228P, two semesters of principal instrument course 210, two semesters of principal instrument course 212J and approval of the faculty, one semester of principal instrument course 362J, Music 420J, and 210J and approval of the faculty

Each student must also complete a recital of compositions and/or arrangements. This recital is given in the senior year and must be approved by the jazz faculty

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement.

Electives

For emphasis in performance: two to four semester hours chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

For emphasis in composition: one to three semester hours chosen from courses either within or outside the Butler School of Music. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in jazz: 120 semester hours as outlined above.

Composition Major

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance: At least fourteen semester hours, consisting of four semesters of principal instrument course 210, two semesters of principal instrument course 260 and approval of the faculty, and Music 222J or 223J. Proficiency in Piano 202, second semester, and approval of the faculty are required if the principal instrument is not piano.
2. Music literature and music theory: Music 605, 411, 612, 313M, 313N, 321J, 325L, 325M, 226J, 226K, 330L, 164L, and three semester hours chosen from 334, 337, 342, 343J, and 379K.
3. Composition: Music 214C, two semesters of 224G, at least two semesters of 224J and approval of the music theory and composition

faculty, 329E, and 329G. Fulfillment of this requirement signifies the completion of original compositions of a quality and a quantity sufficient to present the composition recital described below. At the discretion of the music theory and composition faculty, a student may be required to complete more than two semesters of Music 224J.

4. Recital: Music 160C. Upon approval of the music theory and composition faculty, a composition major must present a recital of his or her works. The recital must be approximately thirty minutes in length and must consist of works approved by the student's composition instructor. It is normally given during the student's last semester of Music 224J. It is graded by a jury of designated music theory and composition faculty members. The student must receive from the jury an average grade of at least *B-* for the recital; if the average grade is less than *B-*, the student, upon approval of the music theory and composition faculty, must present another composition recital.
5. Music ensemble: Eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221).

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in composition: 120 semester hours as outlined above.

Music Studies Major

The major in music studies is a preprofessional academic program recommended for students seeking teacher certification in music or intending to pursue graduate preparation for careers in areas such as music and human learning, music therapy, music management, music merchandising, music publishing, and community music development. Students seeking teacher certification must adhere to current state requirements in addition to the degree requirements described in this catalog. Students should contact the College of Education for current state certification requirements.

Prescribed Work

In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.

Major Requirements

1. Performance: Twelve to fourteen semester hours, consisting of four semesters of principal instrument course 210; two semesters of principal instrument course 260 and approval of the faculty; and Music 210K, or equivalent proficiency, and approval of the faculty. Music 210K or equivalent proficiency is required of all music studies majors, regardless of principal instrument. In addition to these requirements, the student must make a recital appearance as described in Butler School of Music Special Requirements (p. 221).
2. Music theory and literature: Music 605, 411, 612, 313M, 313N, and 330L; two semester hours chosen from 226G, 226J, and 226N; and

321J, 334, 337, 342, 343J, or 379K. The choice of upper-division music literature course must be approved by the student's adviser.

3. Conducting: Four semester hours, consisting of either Music 222J and 222K, or 223J and 223K.
4. Choral or instrumental music techniques, literature, and performance practices: Seventeen semester hours in one of the following areas of emphasis.
 - a. Choral music emphasis:
 - i Music 354C, 354F, 255V, and 356G.
 - ii Music 354D or three semester hours approved by the music studies adviser.
 - iii Two semester hours chosen from Music 255D (strings), 255E (brasses), and 255F (woodwinds).
 - iv One semester hour chosen from Music 115D (violin), 115E (trumpet), 115F (clarinet), 115G, and 155C. The course used to fulfill this requirement must involve the study of a family of instruments different from that used to fulfill the preceding requirement.
 - b. Instrumental music emphasis: Music 354C or 354F; 155C, 255D, 255E, 255F, and 356J; and, with the approval of the music studies adviser, four semester hours chosen from 115D, 115E, 115F, and 255M.
5. Music ensemble: Eight semester hours of music ensemble courses as explained in Butler School of Music Special Requirements. (p. 221)

When taken in residence, Music 313M may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Approved Electives

Eight to ten semester hours of coursework approved by the music studies adviser. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BMusic with a major in music studies: 120 semester hours as outlined above.

Bachelor of Arts in Art

Core Curriculum

All students must complete the University's core curriculum (p. 20). The specific requirements for the Bachelor of Arts in Art consist of prescribed work, major requirements, and electives. In some cases, a course required for a major in the Bachelor of Arts in Art (BAArt) may also be counted toward the core curriculum; these courses are identified below.

Studio Art Major

Prescribed Work

1. In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with a global cultures flag, one course with a cultural diversity flag, one course with an ethics and leadership flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may also be used to fulfill other degree requirements.
2. Foreign language: Six semester hours beyond course 507, 508K, or the equivalent in one foreign language.

3. Social and behavioral sciences: Six semester hours chosen from the following areas: anthropology, economics, geography, government, history, linguistics, psychology, and sociology. A course counted toward this requirement may not also be counted toward any core curriculum requirement.
4. General culture: Three semester hours chosen from the following areas: architecture, classics (including classical civilization, Greek, Latin), comparative literature, humanities, philosophy, and interdisciplinary fields outside the Department of Art and Art History such as American studies, African and African diaspora studies, Asian studies, Latin American studies, Mexican American studies, and women's and gender studies. The student is encouraged to choose coursework of a multicultural nature. Courses outside the Department of Art and Art History that are crosslisted with courses in the department may not be used to fulfill this requirement. A course used to fulfill this requirement may not also be counted toward any core curriculum requirement.
5. Science, technology, and mathematics: Six semester hours of coursework. Courses must be chosen from computer science, mathematics, and the fields of study included in the science and technology, part I, requirement of the core curriculum. A course counted toward this requirement may not also be counted toward any core curriculum requirement.

Major Requirements

1. Studio art: Thirty semester hours, consisting of Studio Art 303K, 303L, 304K, 304L, and eighteen additional semester hours of studio art, of which at least twelve hours must be upper-division.
2. Art history: Twelve semester hours, consisting of Art History 302, 304, and six hours of upper-division coursework in art history. Three semester hours of this coursework may also be counted toward the visual and performing arts requirement of the core curriculum.

Electives

Fifteen semester hours chosen from courses either within or outside the Department of Art and Art History. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BA Art with a major in studio art: 120 semester hours as outlined above.

Art History Major

Prescribed Work

1. In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with a global cultures flag, one course with a cultural diversity flag, one course with an ethics and leadership flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may also be used to fulfill other degree requirements.
2. Foreign language: Fifteen to nineteen semester hours, consisting of
 - a. Nine semester hours beyond course 507, 508K, or the equivalent in one foreign language
 - b. One of the following:
 - i. Six additional hours of upper-division coursework in the foreign language used to fulfill requirement 2a
 - ii. Up to ten semester hours, consisting of course 506 and either 507 or 508K, or the equivalent, in a second foreign language

3. Social and behavioral sciences: Six semester hours chosen from the following areas: anthropology, economics, geography, government, history, linguistics, psychology, and sociology. A course counted toward this requirement may not also be counted toward any core curriculum requirement.
4. General culture: Three semester hours in one of the following areas:
 - a. Architecture
 - b. Classics, including classical civilization, Greek, Latin (but excluding any courses in Greek or Latin that are used to fulfill the language requirement)
 - c. Music
 - d. Philosophy
 - e. Radio-television-film
 - f. Theatre and dance
 - g. Programs of special concentration, such as women's and gender studies and Latin American studies

A course used to fulfill requirement 4 may not also be counted toward any core curriculum requirement.

Major Requirements

1. Studio Art 303K
2. Art history: Thirty semester hours, consisting of
 - a. Art History 302 and 304
 - b. Twelve semester hours of upper-division art history, consisting of three hours in each of the following four areas:
 - i. Ancient
 - ii. Medieval/Early Modern
 - iii. Modern
 - iv. Non-Western: African, Asian, Islamic, Latin American, Mesoamerican, Native American, Oceanic
 - c. Art History 375
 - d. Nine additional semester hours of art history

Three semester hours of the coursework counted toward requirement 2 may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Electives

Seventeen to twenty-one semester hours chosen from courses either within or outside the Department of Art and Art History. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the BA Art with a major in art history: 120 semester hours as outlined above.

Bachelor of Arts in Theatre and Dance

Core Curriculum

All students must complete the University's core curriculum (p. 20). The specific requirements for the Bachelor of Arts in Theatre and Dance consist of prescribed work and major requirements. In some cases, a course required for the Bachelor of Arts in Theatre and Dance may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work

1. In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may also be used to fulfill other degree requirements.
2. Foreign language: Six semester hours beyond course 507, 508K, or the equivalent in one foreign language.
3. General culture: Three semester hours chosen from the following areas: architecture, classics (including classical civilization, Greek, Latin), comparative literature, humanities, philosophy, and interdisciplinary fields outside the Department of Theatre and Dance such as American studies, African and African diaspora studies, Asian studies, Latin American studies, Mexican American studies, and women's and gender studies. The student is encouraged to choose coursework of a multicultural nature. Courses outside the Department of Theatre and Dance that are crosslisted with theatre and dance courses may not be used to fulfill this requirement. A course used to fulfill this requirement may not also be counted toward any core curriculum requirement.

Major Requirements

1. Theatre and dance core: Twenty-seven semester hours, consisting of the following courses: Theatre and Dance 311; three semester hours chosen from 302T, 306, 313C, 152T, 252T, and 352T; three semester hours chosen from 312M, 323C, and 323C; 314M; 314P; either 317C and 317D, or 317M and 317N; and two semesters of 324P. Theatre and Dance 302T may also be used to fulfill the visual and performing arts requirement of the core curriculum.
2. Additional courses in theatre and dance: Twenty-one semester hours of coursework in the Department of Theatre and Dance, of which at least fifteen must be in upper-division courses.
3. Approved concentration and electives: At least six semester hours of coursework in the approved concentration and electives must be upper-division, and at least nine semester hours must be from outside the Department of Theatre and Dance.
 - a. Approved concentration: Twelve semester hours in a concentration of courses within or outside the Department of Theatre and Dance approved by the student's designated adviser.
 - b. Electives: Nine semester hours of coursework within or outside the Department of Theatre and Dance. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Students considering graduate study should consult their advisers about the most appropriate choice of courses.

Total Minimum Requirements

For the Bachelor of Arts in Theatre and Dance: 120 semester hours as outlined above.

Bachelor of Arts in Music

Core Curriculum

All students must complete the University's core curriculum (p. 20). The specific requirements for the Bachelor of Arts in Music consist of prescribed work, major requirements, minor, and electives. In some

cases, a course required for the Bachelor of Arts in Music may also be counted toward the core curriculum; these courses are identified below.

Prescribed Work

1. In the process of fulfilling degree requirements, students must complete two courses with a writing flag, one course with a quantitative reasoning flag, one course with an ethics and leadership flag, one course with a global cultures flag, one course with a cultural diversity flag, and one course with an independent inquiry flag. Courses that fulfill flag requirements are identified in the *Course Schedule*. They may also be used to fulfill other degree requirements.
2. Foreign language: Six semester hours beyond course 507, 508K, or the equivalent in one foreign language.
3. General culture: Three semester hours chosen from the following areas: architecture, classics (including classical civilization, Greek, Latin), comparative literature, humanities, philosophy, and interdisciplinary fields outside the Butler School of Music such as American studies, African and African diaspora studies, Asian studies, Latin American studies, Mexican American studies, and women's and gender studies. The student is encouraged to choose coursework of a multicultural nature. Courses outside the Butler School of Music that are crosslisted with music courses may not be used to fulfill this requirement. A course used to fulfill this requirement may not also be counted toward any core curriculum requirement.

Major Requirements

1. Performance: At least twelve semester hours, consisting of four semesters of principal instrument course 210 and approval of the faculty; four semester hours of music ensemble courses as explained in Butler School of Music Special Requirements (p. 221); and Music 201N (completed to the satisfaction of faculty) for students whose principal instrument is not piano
2. Music: Music 605, 411, 612, 313M, 313N, and 330L
3. Emphasis in Music, Music Business, or Recording Technology:
 - a. For Emphasis in Music: Fifteen semester hours in a concentration of music courses approved by the coordinator of the Bachelor of Arts in Music program, at least eleven hours of which must be upper-division, and including at least three hours chosen from Music 334, 337, 342, 343J, or 379K
 - b. For Emphasis in Music Business: Three semester hours in addition to the requirements of the core curriculum chosen from Communication Studies 306M, 310K, 331K, 355K, 359, 365K, or any course with a writing flag; fifteen additional semester hours in a concentration consisting of Music Business 339M, 339N, 347M, 347N, and 377P
 - c. For Emphasis in Recording Technology: Mathematics 408D; either Physics 303K and 303L, or 317K and 317L (physics courses that also fulfill part I of the natural science requirement of the core curriculum); fifteen additional semester hours in a concentration consisting of Music Recording Technology 316M, 316N, 335M, 335N or 336C or 345, and 377P

When taken in residence, Music 313M (in requirement 2) may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement. Music 334 (in requirement 3a) may also be used to fulfill the visual and performing arts requirement of the core curriculum.

Minor

The minor must be approved by the coordinator of the Bachelor of Arts in Music program and must include at least six hours of upper-division coursework.

1. For Emphasis in Music: Twelve semester hours of coursework outside the Butler School of Music
2. For Emphasis in Music Business and Emphasis in Recording Technology: Twelve semester hours of coursework outside the Butler School of Music chosen from one of the following three areas:
 - a. Business Foundations (p. 48) courses as specified by the McCombs School of Business
 - b. Courses within the Bridging Disciplines Programs
 - c. Other topics determined in consultation with the coordinator of the Bachelor of Arts in Music program

Electives

1. For Emphasis in Music: Six to eight semester hours of electives. At least six hours must be from outside the Butler School of Music, and three of these six hours must be upper-division. Courses that are crosslisted with music courses may not be counted toward this requirement. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.
2. For Emphasis in Music Business: Three to five semester hours of electives. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.
3. For Emphasis in Recording Technology: Two to four semester hours of electives. Additional elective coursework may be needed to provide the total number of semester hours required for the degree.

Total Minimum Requirements

For the Bachelor of Arts in Music: 120 semester hours as outlined above.

Advancement to Upper-Division Standing

To advance to upper-division standing in the program, the student must meet the following requirements:

1. Upper-division standing at the University
2. A grade point average of at least 2.50 for all coursework taken in residence at the University
3. Completion of the following courses or their equivalents with a grade point average of at least 2.50: Music 201N (required only for students whose principal instrument is not piano), 605A, 605B, 411A, 411B, 612A, 612B, 313M, and 313N
4. Approval of the coordinator of the Bachelor of Arts in Music program

When taken in residence, Music 313M (in requirement 3) may also be counted toward the three-semester-hour writing flag portion of the core curriculum English composition requirement.

Courses

The faculty has approval to offer the following courses in the academic years 2014-2015 and 2015-2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule*, registrar.utexas.edu/schedules/, to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://registrar.utexas.edu/catalogs>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Fine Arts

Fine Arts: F A

Lower-Division Courses

F A 301C. Freshman Seminar.

Restricted to first-semester freshmen. Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors. Two lecture hours and one discussion hour a week for one semester.

F A 102D, 202D, 302D. Connecting Internship Experience.

Supervised internship experience related to interdisciplinary themes of a Bridging Disciplines Program. Internships may be on or off campus, be paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. For 102D, three hours of fieldwork a week for one semester; for 202D, six hours of fieldwork a week for one semester; for 302D, ten hours of fieldwork a week for one semester. With consent of the Bridging Disciplines Programs research coordinator, may be repeated once for credit. Prerequisite: Admission to the Bridging Disciplines Programs.

F A 308. Arts Integrations for Multidisciplinary Connections.

Through readings, videos, in-class activities, discussion, field trips, micro-teaching, and written reflection, designed to develop a practical understanding of the techniques and skills associated with integrating the arts into various contexts. Provides experience in each art content area (dance, music, theatre arts, and visual arts) to develop an introductory understanding of each of these disciplines. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

F A 110, 210, 310. Topics in the Fine Arts.

Interdisciplinary studies within the fine arts or including the fine arts and other areas. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit when the topics vary.

F A 311. Meanings in Visual Culture and Film.

An examination of how meaning is assigned to objects and images in the world of visual culture. Three lecture hours a week for one semester.

F A 312. Aesthetics of Game Design.

Introduction to the design and aesthetics of games. Explores the meaning of playing games, the aesthetics of play and games, and the role of game design as both the creation of designed artifacts and sociocultural texts. Three lecture hours a week for one semester. Fine Arts 310 (Topic: Aesthetics of Game Design) and 312 may not both be counted.

F A 118C, 218C, 318C. Forum Seminar Series.

Restricted to freshmen and sophomores. Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse. For 118C, two lecture hours a week for eight weeks; for 218C, two lecture hours a week for one semester; for 318C, three lecture hours a week for one semester, or two lecture hours and one hour of supervised research a week for one semester. May be repeated for credit when the topics vary.

F A 119, 219, 319, 419, 519, 619. International Learning Seminars.

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing work in international locations. For

each semester hour of credit earned, one lecture hour a week for one semester. Fine Arts 119, 219, 319, 419, 519, 619 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

F A 119Q, 219Q, 319Q, 419Q, 519Q, 619Q, 719Q, 819Q, 919Q. Topics in Fine Arts.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Fine Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

F A 320. Exploring the Fine Arts.

Open to all University students except those in the College of Fine Arts. An interdisciplinary introduction to the fine arts: their basic concepts, meaning, aesthetics, and role in society. Three lecture hours a week for one semester, with field trips as required. May not be counted toward a degree in the College of Fine Arts. Prerequisite: Upper-division standing or consent of instructor.

F A 129, 229, 329, 429, 529, 629. International Learning Seminars.

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Fine Arts 129, 229, 339, 429, 529, 629 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

F A 129Q, 229Q, 329Q, 429Q, 529Q, 629Q, 729Q, 829Q, 929Q. Topics in Fine Arts.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Fine Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

F A 330. Film As Art.

A historical survey of the evolution of motion pictures from the invention of cinema in 1895 to the recent past and of works by artists in the film medium. Three lecture hours a week for one semester. Fine Arts 330 and Visual Art Studies 379S (Topic: Film as Art) may not both be counted.

F A 331. Films of Alienation: 1966-1976.

An examination of a ten-year period of international film focusing on psychological issues of alienation and angst. Three lecture hours a week for one semester. Fine Arts 331 and Visual Art Studies 379S (Topic: Alienation, Angst, and Anomie: 1966-1976) may not both be counted.

F A 332. Fifty Years of Nonfiction Films: 1962-2012.

A survey of documentary films that were made to reflect a variety of approaches to the nonfiction genre during the years 1962-2012. Three lecture hours a week for one semester. Fine Arts 332 and Visual Art Studies 379S (Topic: Fifty Years of Non-Fiction, 1960-2010) may not both be counted.

F A 333. Fifty Years of Revisionist Westerns.

An examination of the revisionist response to the classic film genre featuring the American West. Three lecture hours a week for one semester. Fine Arts 333 and Visual Art Studies 379S (Topic: Revisionist Westerns 1962-2012) may not both be counted.

F A 334. Films Projecting the Future.

A survey of motion pictures that disclose the evolving notion of the future in cinematic form. Three lecture hours a week for one semester.

F A 335. 1962: Year of Crises, Change, and Creativity.

Examination of the events and individuals who made history and culture in the year 1962 and their relevance to today. Three lecture hours a week for one semester.

F A 140, 240, 340. Fine Arts Internship.

Restricted to fine arts students. Requires completion of 50 hours of satisfactory on-site work per credit hour earned. May be repeated for credit. Prerequisite: Upper-division standing, a University grade point average of at least 2.50, and consent of instructor.

F A 150, 250, 350. Special Topics in the Fine Arts.

Special interdisciplinary studies within the fine arts or including the fine arts and other areas. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit when the topics vary.

Topic 1: Managing Performing Arts Organizations. Restricted to students in the College of Fine Arts; other students may contact the department for permission to register for this class. Focuses on the business aspect of performing arts and, in particular, nonprofit, mission-based arts organizations with an emphasis on organizational structure; budget development and management; strategic planning; trustee development; trustee/staff relations; fundraising; marketing and publicity; audience development, development of outreach programming; box-office management; operations and human resources; and collective bargaining agreements/labor relations, and contract negotiation. Fine Arts 150, 250, 350 (Topic: Managing Performing Arts Organizations) and 150, 250, 350 (Topic 1) may not both be counted.

F A 160, 260, 360. Advanced Topics in the Fine Arts.

Advanced interdisciplinary studies within the fine arts or including the fine arts and other areas. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing or consent of instructor.

F A 361. Digital Production Art 3-D.

Restricted to computer science, fine arts, or radio-television-film majors. In-depth study and practice of 3-D modeling, surfacing, lighting, rendering, animation, compositing, and visual FX using Autodesk Maya, Adobe Photoshop, and other programs. Knowledge of Photoshop or equivalent, and laptop computer for classroom use is recommended. Three lecture hours a week for one semester. Fine Arts 360 (Topic: Digital Production Art 3D) and 361 may not both be counted. Prerequisite: Upper-division standing or consent of instructor.

F A 175, 375, 675. Independent Studies: Art, Drama, or Music.

Independent study or research within the fine arts or between the fine arts and other disciplines. Individual instruction. May be repeated for credit. Prerequisite: Upper-division standing, a grade point average of at least 3.00, consent of instructor, and consent of the dean of the College of Fine Arts.

Department of Art and Art History

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Art History: ARH

Lower-Division Courses

ARH 301 (TCCN: ARTS 1301). Introduction to the Visual Arts.

The visual elements, their nature, functions, and relationships in painting, sculpture, and architecture. Three lecture hours or two lecture hours and one discussion hour a week for one semester.

ARH 302 (TCCN: ARTS 1303). Survey of Ancient through Medieval Art.

A study of the major monuments of architecture, sculpture, painting, and metalwork from the ancient period through the end of the Middle Ages. Three lecture hours or two lecture hours and one discussion hour a week for one semester.

ARH 303 (TCCN: ARTS 1304). Survey of Renaissance through Modern Art.

A study of the major monuments of architecture, sculpture, painting, and metalwork from the Renaissance to the present. Three lecture hours or two lecture hours and one discussion hour a week for one semester.

ARH 304. Issues in Visual Culture.

Restricted to majors in the Department of Art and Art History. Examines the modern and contemporary history of art and visual culture in relation to a broader set of problems fundamental to visual representation throughout the history of art. Three lecture hours or two lecture hours and one discussion hour a week for one semester.

ARH 119Q, 219Q, 319Q, 419Q, 519Q, 619Q, 719Q, 819Q, 919Q. Topics in Art History.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

ARH 325. Art and Archaeology of the Ancient Near East.

Examines various aspects of material culture, including the rise of monumentality and urbanism; media such as writing and figurative arts; and the history and politics of archaeological research in the area of the Fertile Crescent, Turkey, and Iran. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 325, 361L (Topic: Art/Archeology of the Ancient Near East), Middle Eastern Studies 320 (Topic: Art/Archeology of the Ancient Near East), 320 (Topic 4: Survey of Ancient Near Eastern Art).

ARH 326J. The Parthenon Through the Ages.

Examines why the Parthenon is of relevance today for a global audience. Subjects include the postantique lives of this unique monument as a Christian cathedral and pilgrimage site, a mosque, a ruin, and an archaeological icon; the various debates about its restoration and preservation; and the problem of cultural ownership. Three lecture hours a week for one semester. Only one of the following may be counted:

Art History 326J, 362 (Topic: Parthenon through the Ages), Classical Civilization 340 (Topic: Parthenon through the Ages).

ARH 326K. Myth and Images in the Greek and Roman Mediterranean.

Examines various methods of interpretation, such as archaeological and art historical analysis of mythical Greek and Roman narratives as they appear in visual arts of antiquity. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 326K, 362 (Topic: Myth in Images in Classical Antiquity), Classical Civilization 340 (Topic: Myth in Images in Classical Antiquity).

ARH 326L. Visual Cultures of the Mediterranean Islands.

Analysis of material and visual culture and the divergent histories of archaeology and art history in Cyprus, Crete, and Sicily. Three lecture hours a week for one semester.

ARH 326M. Art and Archaeology of Greek Sanctuaries.

Examines the archaeology of Olympia, Delphi, Dodona, Delos, and Samos, their global relevance today, and the history of archaeological research. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 326M, 362 (Topic: Art and Archaeology of Greek Sanctuaries), Classical Civilization 340 (Topic: Art and Archaeology of Greek Sanctuaries).

ARH 326N. Hellenistic Art and Architecture.

Three lecture hours a week for one semester. Art of the Hellenistic period, from the reign of Alexander the Great to the beginning of the Roman Empire, ca. 336 to 31 BCE. Art History 326N and 327M may not both be counted.

ARH 327N. Art and Politics in Imperial Rome.

Same as Classical Civilization 340 (Topic 2: Roman Art). Public art of the Roman Empire from Augustus to late antiquity, ca. 31 BC to AD 350. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

ARH 327P. Roman Imperial Architecture.

Republican and imperial Roman architecture. Three lecture hours a week for one semester.

ARH 327R. Art in the Lives of Ordinary Romans.

Art and architecture from the archaeological sites of Pompeii, Herculaneum, and Ostia as indices of Roman culture, 100 BC to AD 250. Three lecture hours a week for one semester.

ARH 327S. Art and Politics in Republican Rome.

The art and architecture of republican Rome, ca. 500-44 BCE, when the city established dominance in the Mediterranean and developed an artistic tradition that would flourish into the Empire. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 327S, 362 (Topic: Art and Politics in Republican Rome), Classical Civilization 340 (Topic: Art and Politics in Republican Rome), European Studies 347 (Topic: Art and Politics in Republican Rome).

ARH 327T. Art in the Age of Hadrian.

Examines art in Rome under the reign of emperor Hadrian (117-138), who inherited the empire at its greatest geographical extent. Three lecture hours a week for one semester.

ARH 328J. Arts of Islam, 650-1500.

Same as Religious Studies 358 (Topic 17). Early Islamic art and architecture, with an emphasis on interconnections between the Islamic world and Europe. Examines unique ways Islamic visual culture developed out of the classical and late antique world. Artworks will be

contextualized within early Islamic history, religion, and culture. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 328J, 363 (Topic: Arts of Islam: Caliphs-Sultans), Islamic Studies 372 (Topic: Arts of Islam: Caliphs-Sultans), Middle Eastern Languages and Cultures 321 (Topic: Arts of Islam: Caliphs-Sultans), Middle Eastern Studies 321K (Topic: Arts of Islam: Caliphs-Sultans), 328 (Topic: Arts of Islam: Caliphs-Sultans), 342 (Topic: Arts of Islam: Caliphs-Sultans), Religious Studies 358 (Topic: Arts of Islam: Caliphs-Sultans), 358 (Topic 17).

ARH 328K. Arts of Islam 1500-Present.

Same as Religious Studies 358 (Topic 18). Later Islamic art and architecture, beginning with the world empires of the Ottomans, Safavids, and Mughals, and extending into the modern and contemporary periods. Subjects include the social and historical context of Islamic art in these periods and its unique visual culture. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 328K, 363 (Topic: Arts of Islam, 1500-1800), 363 (Topic: Arts of Islam: 1500-Present), Islamic Studies 372 (Topic: Arts of Islam, 1500-1800), 373 (Topic: Arts of Islam: 1500-Present), Middle Eastern Languages and Cultures 321 (Arts of Islam: 1500-Present), Middle Eastern Studies 321K (Topic: Arts of Islam, 1500-1800), 342 (Topic: Arts of Islam: 1500-Present), Religious Studies 358 (Topic 18).

ARH 329J. Byzantine Art.

Same as Religious Studies 357 (Topic 2: Byzantine Art). Examination of the medieval art and architecture of the eastern Roman empire, including related traditions (Coptic, Armenian, Georgian, Crusader, Norman). Three lecture hours a week for one semester.

ARH 329K. Early Medieval Art.

Architecture, sculpture, painting, and metalwork in western Europe from the third to the eleventh century. Three lecture hours a week for one semester.

ARH 329N. Art and Architecture of Late Antiquity.

Examination of early Christian and late Roman art and architecture, including related traditions, such as Jewish, Coptic, Armenian, Georgian, Persian, and Syriac. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 329N, 362R (Topic: Art and Architecture of Late Antiquity), Classical Civilization 340 (Topic: Art and Architecture of Late Antiquity). Prerequisite:

ARH 329P. Medieval Italy.

Architecture, sculpture, painting, and metalwork in the Italian peninsula from the third to the fourteenth century, with a special focus on Rome, Venice, and Palermo. Three lecture hours a week for one semester.

ARH 129Q, 229Q, 329Q, 429Q, 529Q, 629Q, 729Q, 829Q, 929Q. Topics in Art History.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

ARH 329R. Romanesque Art and Architecture.

Form and function of religious art in twelfth-century Europe. Three lecture hours a week for one semester.

ARH 330G. Art at Court: The Gothic Period.

Changing manifestations of Gothic art and architecture at selected court centers, 1140 to 1400. Three lecture hours a week for one semester.

ARH 330J. Gothic Cathedral: Amiens.

Same as Religious Studies 357 (Topic 14). An examination of the cathedral at Amiens, its meaning, structure, political and financial contexts, and sculptural programs, as well as its influence on other buildings in France and Germany. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 330J, 374 (Topic: Gothic Cathedral: Amiens), European Studies 347 (Topic: Gothic Cathedral: Amiens), Religious Studies 357 (Topic: Gothic Cathedral: Amiens), 357 (Topic 14).

ARH 331J. Art and Experience in Central Italy.

Restricted to students admitted to the Learning Tuscany program. Art and architecture of central Italy. The equivalent of three lecture hours a week for one semester. Taught in Castiglion Fiorentino, Italy. Prerequisite: Consent of instructor.

ARH 331K. Early Italian Renaissance Art to 1470.

This course traces the beginnings of the "rebirth" (renaissance) of the visual arts, from the end of the Middle Ages to the heyday of the Medici. Works of art are analyzed both in formal terms and in relation to contemporary society, religion, philosophy, economics, statecraft, gender, and other significant issues. Three lecture hours a week for one semester.

ARH 331L. High Renaissance Art.

Analyzes the key artistic works of the high Renaissance as part of an evolving language of style and form and in relation to the intellectual, social, and political context of the period. Three lecture hours a week for one semester.

ARH 331M. Mannerist and Early Baroque Art.

The art of western Europe from about 1520 to 1590. Emphasis on art in Italy, but developments in the northern countries are also considered. Three lecture hours a week for one semester.

ARH 331N. Later Quattrocento Art, 1470-1500.

Explores the visual arts created in the Italian peninsula during the final decades of the fifteenth century, or Quattrocento. Emphasis will be on common themes such as the revival of antiquity, the exaltation of the prince, and specific local characteristics. Three lecture hours a week for one semester.

ARH 331P. Art and the City in Renaissance Italy.

Art, architecture, and emerging civic identity in Florence, Siena, Venice, and other Italian Renaissance city-states. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 331P, 364 (Topic: Art and the City in Renaissance Italy), Core Texts and Ideas 375 (Topic: Art and the City in Renaissance Italy), European Studies 347 (Topic: Art and the City in Renaissance Italy), Italian Civilization 349 (Topic: Art and the City in Renaissance Italy), Western Civilization 320 (Topic: Art and the City in Renaissance Italy).

ARH 331Q. Art in Medici Florence.

Explores the social and cultural fabric of Florence before and after the rise to power of the Medici family beginning in the early fifteenth century. Three lecture hours a week for one semester.

ARH 332K. Northern Renaissance Art, 1350-1500.

Same as Religious Studies 357 (Topic 7). Northern European art from the International Style to van Eyck and Hieronymus Bosch. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 332K, European Studies 347 (Topic: Northern

Renaissance Art, 1350-1500), Religious Studies 357 (Topic: Northern Renaissance Art, 1350-1500), 357 (Topic 7).

ARH 332L. Northern Renaissance Art, 1500-1600.

Same as Religious Studies 357 (Topic 6). Art and cultural development in the sixteenth century; artists include Duerer, Gruenewald, Holbein, and Brueghel. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 332L, European Studies 347 (Topic: Northern Renaissance Art, 1500-1600), Religious Studies 357 (Topic: Northern Renaissance Art, 1500-1600), 357 (Topic 6).

ARH 333K. Italian Baroque Art.

The art of Italy in the seventeenth and eighteenth centuries; includes the sixteenth-century sources from which Roman baroque developed. Three lecture hours a week for one semester.

ARH 333L. The Age of Rembrandt and Rubens: Northern Baroque Art.

Same as Religious Studies 357 (Topic 11). Northern European art in the seventeenth century, stressing the Netherlands and Flanders. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 333L, European Studies 347 (Topic: The Age of Rembrandt and Rubens: Northern Baroque Art), Religious Studies 357 (Topic: The Age of Rembrandt and Rubens: Northern Baroque Art), 357 (Topic 11).

ARH 334. Eighteenth-Century European Art.

European painting, sculpture, and architecture as social and political events from the age of absolutism to the French Revolution. Three lecture hours a week for one semester.

ARH 335H. Buddhist Traditions and Nineteenth-Century Art.

Examines the extent to which Buddhism and Buddhist art influenced artists and Western culture in the nineteenth century, especially in the development of modernism. Three lecture hours a week for one semester.

ARH 335J. Nineteenth-Century Art.

Examines European art and themes in art during the nineteenth century. Three lecture hours a week for one semester.

ARH 335N. European Art, 1789-1848.

European painting and sculpture as social and political events from the French Revolution to the revolutionary crises of midcentury. Three lecture hours a week for one semester.

ARH 335P. European Art, 1848-1900.

European painting and sculpture as social and political events from the revolutions of 1848 to the turn of the century. Three lecture hours a week for one semester.

ARH 337K. Twentieth-Century European Art to 1940.

Major movements in the development of modern European painting and sculpture. Three lecture hours a week for one semester.

ARH 338L. Art since 1930: Modernism and Mass Modernity.

Avant-garde activity, primarily painting, photography, and film, in the United States and Europe from 1930 to 1970. Three lecture hours a week for one semester.

ARH 338M. Art and Culture: 1968 and After.

Artistic and critical activity in the United States and Europe from 1968 to the present. Three lecture hours a week for one semester.

ARH 338N. Sculpture as Model in the Twentieth Century.

Examines the inherent problems in making and interpreting sculpture in the twentieth century in the United States and Europe. Three lecture hours a week for one semester.

ARH 339J. American Art: Colonial Era to the Civil War.

Painting, sculpture, and architecture from the early seventeenth century to 1860. Three lecture hours a week for one semester.

ARH 339K. American Art: Civil War to the Armory Show.

Painting, sculpture, and architecture from 1860 to 1913. Three lecture hours a week for one semester.

ARH 339L. Twentieth-Century American Art to the 1950s.

Art in the United States from the Armory Show through abstract expressionism. Three lecture hours a week for one semester.

ARH 339M. American Art, 1958-1985.

Survey of major movements from 1958 to 1985, from pop art to graffiti art and new expressionism. Three lecture hours a week for one semester.

ARH 339N. Painting in America to 1860.

Same as American Studies 325 (Topic 2). Painting in British colonial North America and the United States prior to the Civil War. Three lecture hours a week for one semester. Only one of the following may be counted: American Studies 325 (Topic 2), Art History 339N, 374 (Topic 1).

ARH 339P. Painting in the United States, 1860-1913.

Same as American Studies 325 (Topic 3). Painting in the United States from the Civil War to the Armory Show. Three lecture hours a week for one semester. Only one of the following may be counted: American Studies 325 (Topic 3), Art History 374 (Topic 2), 339P.

ARH 339Q. Modernism in American Design and Architecture.

Same as American Studies 330 and Urban Studies 352 (Topic 5). A historical survey of artifacts, buildings, and urban environments, focusing on responses to machine-age civilization. Prerequisite: Upper-division standing.

ARH 340L. History of Photography.

The history of photography, including major historic processes, influential photographers, critical debates, and the significant social, political, and economic circumstances that shaped the development of the medium and the diverse works that were created since its origins in the nineteenth century. Three lecture hours a week for one semester. Art History 340L and 366N (Topic: History of Photography) may not both be counted.

ARH 341J. Nineteenth-Century Latin American Art.

Art of the nineteenth century in Latin America, including Argentina, Brazil, Colombia, Chile, Mexico, Paraguay, Peru, Uruguay, Venezuela, and the Caribbean. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 341J, 361 (Topic: Reframing the Nation: Nineteenth-Century Latin American Art), Latin American Studies 327 (Topic: Reframing the Nation: Nineteenth-Century Latin American Art).

ARH 341K. Modern Art of Mexico.

Same as Latin American Studies 327 (Topic 2: Modern Art of Mexico). Mexican visual culture from the late nineteenth century through 1968. Emphasis on the emergence of modernist avant-gardes and popular entertainment, and their ambivalent relationship to state, church, and market. Also explores how self-consciously negotiating the tension between native and international influences, artists, critics, and curators contributes to notions of *Lo Mexicano*, or "Mexicanness."

ARH 341L. Chicano Art Histories and Futures.

Same as Latin American Studies 327 (Topic 1: Modern Latin American Art). Mexican American art since the 1960s, with an emphasis on the visual production and exhibition of identity inside and outside the Chicano civil rights movement and the politics of U.S. multiculturalism. An introduction to a broad range of art history written to date—including recent feminist and queer interventions—as a means of envisioning a supposed "post-Chicano" or "post-racial" moment. Three lecture hours a week for one semester.

ARH 341M. Contemporary Mexican Art.

Survey of visual culture beginning in the 1950s and 1960s, with a focus on key artists, exhibition spaces, and critical debates from the last thirty years in Mexico in light of international aesthetic currents and shifting political and economic conditions. Three lecture hours a week for one semester.

ARH 341N. Other Modernities: Latin American Art.

Development and sources of twentieth-century art in the Caribbean and Central and South America. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 341N, 361 (Topic: Other Modernities: Latin American Art), Latin American Studies 327 (Topic: Other Modernities: Latin American Art), Mexican American Studies 374 (Topic: Other Modernities: Latin American Art).

ARH 341P. Contemporary Latin American Art.

Development and sources of art in the Caribbean and Central and South America from the 1960s to the present. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 341P, 361 (Topic: Contemporary Latin American Art), Latin American Studies 327 (Topic: Contemporary Latin American Art).

ARH 341Q. Women in Latin American Art.

Development and sources of Latin American Women Artists considering feminist, gender and queer theories Three lecture hours a week for one semester. Only one of the following may be counted: Art History 341Q, 361 (Topic: From Modern to Conceptual: Women Artists in Latin America), Women's and Gender Studies 340 (Topic: From Modern to Conceptual: Women Artists in Latin America).

ARH 342J. Introduction to Women's and Gender Studies in the Fine Arts.

An introduction to women's studies and gender studies in relation to visual, theatrical, and musical culture in the United States and Europe. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 342J, 359 (Topic: Intro to Women's and Gender Studies in the Fine Arts), Fine Arts 350 (Topic: Intro to Women's and Gender Studies in the Fine Arts), Women's and Gender Studies 345 (Topic: Intro to Women's and Gender Studies in the Fine Arts).

ARH 344J. Twentieth-Century African American Art.

Same as African and African Diaspora Studies 374F (Topic 19). A survey of visual art produced by people of African descent in the United States with an emphasis on the twentieth century and its sociohistorical framework. Changes in modes of expression, formal concerns, pictorial themes, and the impact of the Black Arts movement, feminism, and Afrocentrism on art are explored, as well as the relationship of the work of black artists to art from West and Central Africa and the visual traditions of European and Euro-American artists. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic: Twentieth-Century African American Art), 374F (Topic: 20th-Century African American Art), 374F (Topic 19), Art History 344J, 366N (Topic: 20th-Century African American Art).

ARH 345J. Contemporary Artists of the African Diaspora.

Same as African and African Diaspora Studies 374F (Topic 15). Examines a wide range of artists, practicing in different parts of the world, who are part of the African diaspora via such factors as the Atlantic slave trade and various patterns of international migration. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Contemporary Artists of the African Diaspora), 374F (Topic 15), Art History 345J, 373D (Topic: Contemporary Artists of the African Diaspora), 374 (Topic: Contemporary Artists of the African Diaspora).

ARH 345K. Contemporary British Artists of the African Diaspora.

Same as African and African Diaspora Studies 374F (Topic 14). A look at a wide range of artists, practicing in Britain, who are part of the African diaspora via such factors as the Atlantic slave trade and various patterns of international migration. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Contemporary British Artists of the African Diaspora), 374F (Topic 14), Art History 345K, 374 (Topic: Contemporary British Artists of the African Diaspora).

ARH 345L. Diaspora Visions.

Same as African and African Diaspora Studies 374F (Topic 13) and Women's and Gender Studies 340 (Topic 48). An exploration of border crossing by cultures and groups including Yorubas, Jews, Armenians, Tibetans, Hamish, Pakistanis, and Indians and the production of images by immigrants, exiles, and nomads in alien lands. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Diaspora Vision), 374F (Topic 13), Art History 345L, 373D (Topic: Diaspora Visions), 374 (Topic: Diaspora Vision), Women's and Gender Studies 340 (Topic: Diaspora Vision), 340 (Topic 48).

ARH 345M. Visual Arts of the Caribbean.

Same as African and African Diaspora Studies 374F (Topic 12). A look at a wide range of artists from the countries of the Caribbean, including examples of cinema and reggae music packaging. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 372G (Topic: Visual Arts of the Caribbean), 374F (Topic: Visual Arts of the Caribbean), 374F (Topic 12), Art History 345M, 373D (Topic: Visual Arts of the Caribbean), 374 (Topic: Visual Arts of the Caribbean).

ARH 346K. Introduction to African Art.

Same as African and African Diaspora Studies 374F (Topic 11). Investigates the lives and works of several artists who have made substantial contributions to the definition, history, and interpretation of the visual arts. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Introduction to African Art), 374F (Topic 11), Art History 346K, 373C (Topic: Introduction to African Art), 374 (Topic: Introduction to African Art), Women's and Gender Studies 340 (Topic: Introduction to African Art).

ARH 346L. Africana Women's Art.

Same as African and African Diaspora Studies 374F (Topic 9) and Women's and Gender Studies 340 (Topic 46). Analysis of the diverse modes of presentation, mediums, definitions, and influences of Africana women artists in the diaspora. Designed to use critical theory and art history found in oral and written literatures, music, films, and other formal and informal documents. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Africana Women's Art), 374F (Topic 9), Art History 346L, 373C (Topic: Africana Women's Art), Women's and Gender Studies

340 (Topic: Africana Women's Art), 340 (Topic 46). Prerequisite: Upper-division standing.

ARH 346M. Visual Cultures of Africa.

Same as African and African Diaspora Studies 374F (Topic 10). Painting, textiles, ceramics, sculpture, performance, mixed media, photography, films, and the aesthetic ideas behind the production of African visual cultures from the perspectives of rituals, rites of passage, celebrations, initiations, documentations, and expressions. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Visual Cultures of Africa), 374F (Topic 10), Art History 346M, 373C (Topic: Visual Cultures of Africa).

ARH 347J. Preclassic Mesoamerican Art and Civilization.

Introduction to the origins and earliest developments in Mesoamerican art, architecture, and civilization, with emphasis on the social context of art and visual culture in preclassic Mesoamerica. Three lecture hours a week for one semester.

ARH 347K. Art and Archaeology of Ancient Peru.

Same as Latin American Studies 327 (Topic 6: Art and Archaeology of Ancient Peru). The growth of civilization in South America from the earliest decorated textiles, pottery, and ceremonial buildings to the imperial Inca style. Three lecture hours a week for one semester.

ARH 347L. Mesoamerican Art and Culture.

Same as Latin American Studies 327 (Topic 3: Mesoamerican Art). Mesoamerican art, architecture, and its archaeological context, with emphasis on the social function of art and visual culture in ancient Mesoamerica up to the time of European contact. Three lecture hours a week for one semester.

ARH 347M. Maya Art and Architecture.

Same as Latin American Studies 327 (Topic 5: Form and Meaning in Classic Maya Art). Introduction to the artistic traditions of the ancient Maya, tracing their development up to the time of European contact. Students will examine various important themes of Maya culture including history, ritual, and cosmology as revealed in sculpture, hieroglyphs, painting, and architectural design.

ARH 347N. Aztec Art and Civilization.

An introduction to the art, symbolism, and visual culture of the ancient Aztecs. Subjects include the representations of history and mythology in architecture, stone monuments, and pictorial manuscripts. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 347N, 370 (Topic: Aztec Art and Civilization), Latin American Studies 327 (Topic: Aztec Art and Civilization).

ARH 347P. Mesoamerican Writing Systems.

Examines the scripts of ancient Mesoamerica, focusing mostly on Maya and Aztec hieroglyphic writing. Subjects include methods of decipherment, the visual encoding of language in art and script, and the cultures of literacy in precolumbian Mesoamerica. Three lecture hours a week for one semester.

ARH 348K. Formation of Indian Art, 1000 BCE to 1000 CE.

Examines the development of various forces, including social, religious, economic, and political that led to the early artistic production in Indian culture. Three lecture hours a week for one semester.

ARH 348L. Later Indian Art, 1100 to 1900.

Examines how the developments in art and architecture shaped and reflected changes in the political, social, and religious culture of India during the period in which Buddhism diminished, Hinduism flourished,

and Islamic traditions were introduced into the South Asian subcontinent. Three lecture hours a week for one semester.

ARH 348M. The Taj Mahal and the Diversity of Indian Art.

Same as Religious Studies 341 (Topic 9). Examination of the period when Islamic dynasties controlled much of the subcontinent and how a unique mix of forms and cultural practices shaped the development of monuments such as the Taj Mahal. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 348M, 372 (Topic: The Taj Mahal and the Diversity of Indian Art), Asian Studies 372 (Topic: The Taj Mahal and the Diversity of Indian Art), Religious Studies 341 (Topic 9). Prerequisite: Upper-division standing.

ARH 348N. Buddhist Art.

Same as Asian Studies 372 (Topic 24) and Religious Studies 341 (Topic 8). Explores the development of Buddhist art in South Asia, the land of its origin as well as its spread elsewhere. Focus on the question of "what is" Buddhist art. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 348N, 372 (Topic: Buddhist Art), Asian Studies 372 (Topic 24), Religious Studies 341 (Topic 8).

ARH 348P. Art in the Himalayas.

Examines developments in various Himalayan regions, such as Tibet and Nepal, by focusing on certain subjects and styles in order to comprehend the roles of art in shaping culture and society. Three semester hours a week for one semester.

ARH 349K. Traditional Chinese Art and Culture.

Examines Chinese art and culture from prehistory to the eighteenth century. Subjects include Chinese painting, calligraphy, sculpture, and architecture in their historical setting. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 349K, 372 (Topic: Traditional Chinese Art and Culture), 374 (Topic: Traditional Chinese Art and Culture), Asian Studies 372 (Topic: Traditional Chinese Art and Culture).

ARH 349L. Contemporary Chinese Art.

Examines Chinese art and visual culture from the early twentieth century to the present. Analyzes complex issues involving modern and contemporary art scenes in China through artworks, artists' lives, and sociopolitical changes in China during this period. Three lecture hours a week for one semester. Only one of the following may be counted: Art History 349L, 372 (Topic: Contemporary Chinese Art), Asian Studies 372 (Topic: Contemporary Chinese Art).

ARH 359. Topics in Feminism and Gender.

An introduction to feminist and gender theories in relation to issues concerning visual representation. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 360L. Topics in the History of Photography.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 361. Topics in Latino and Chicano Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 361L. Topics in Ancient Near Eastern Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 362. Topics in Greek and Roman Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 362R. Topics in the Art of Late Antiquity.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 363. Topics in Medieval Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 364. Topics in Renaissance Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 365. Topics in Baroque Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 366J. Topics in Nineteenth-Century Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 366N. Topics in Twentieth-Century Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 366P. Topics in Modernism.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 367. Topics in the Art of North America.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 370. Topics in Pre-Columbian Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 370J. Study in Guatemala.

Art and architecture of Guatemala. The equivalent of three lecture hours a week for one semester. Taught in Guatemala. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

Topic 1: Ancient Maya Writing and History.

Topic 2: Sacred Landscapes of the Precolumbian World.

Topic 3: Baroque Art and Architecture in Spanish America.

ARH 372. Topics in the Art of Asia.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 373C. Topics in Africana Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 373D. Topics in Diaspora Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 373E. Topics in African American Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

ARH 374. Special Topics in the History of Art.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

Topic 3: Colonial Encounter.**ARH 375. Art Historical Methods.**

Restricted to art history majors. Art historical investigation; practical research techniques. Three lecture hours a week for one semester. Prerequisite: Upper-division standing in art history and consent of the departmental undergraduate adviser.

ARH 376. Reading Tutorial in Art History Problems.

Individual projects to be completed under faculty supervision. Independent study. May be repeated for credit. Prerequisite: For majors in the Department of Art and Art History, six semester hours of upper-division art history, a grade point average of at least 3.00, and consent of instructor and the chair of the department; for others, a grade point average of at least 3.00 and consent of instructor and the chair of the department.

ARH 379H. Thesis Course for Departmental Honors.

Individual conference course in which student researches and writes a thesis. Independent study. Prerequisite: Admission to the Honors Program in Art History and approval of the honors adviser.

Design: DES**Lower-Division Courses****DES 308. Introduction to Design Studies.**

A survey of the discipline of design, from 1850 to the present, that examines the broader social context and traces the design process from concept through development and on to production, consumption, use, and in some cases, disposal. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Fine Arts degree in design.

DES 310. Introduction to Design.

Intensive study of the discipline of design and its theories, methods, history, and economic and societal factors. Eight laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each, and written consent of the design faculty.

DES 311J. Design Technologies I.

Study of design technologies and their effect on design methods through a focus on tools and lens media. Eight laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each, and written consent of the design faculty.

DES 311K. Design Technologies II.

Introduction to the microcomputer as an integrator of visual information; its applications to organizational systems in the design process. Eight laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Design 310 and 311J with a grade of at least C in each.

DES 312. Visual Syntax in Communication.

Exploration of the fundamental visual elements and their organization through a study of typography and human perception. Eight laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Design 310 and 311J with a grade of at least C in each.

DES 313. Design History Laboratory.

Critical investigation of historical issues, with emphasis on the dynamic relationship between the modern movement and contemporary design.

Three lecture hours and five laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Design 310 and 311J with a grade of at least C in each.

Upper-Division Courses

DES 320. Design Theory and Method.

Critical study of design methodologies and theories. Eight laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Design 311K, 312, and 313 with a grade of at least C in each, and written consent of the design faculty.

DES 321. Images in Communication.

Development of coherent visual statements constructed of images generated by multiple media. Eight laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Design 311K, 312, and 313 with a grade of at least C in each, and written consent of the design faculty.

DES 322. Design and the Social Environment.

Communication projects selected from the public sector. Eight laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Design 311K, 312, and 313 with a grade of at least C in each, and written consent of the design faculty.

DES 340. Design Systems.

Development of flexible, integrated visual systems. Eight laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Design 320, 321, and 322 with a grade of at least C in each.

DES 341. Advanced Issues in Visual Syntax.

Exploration of linguistic relationships involved in the development of typographic messages. Eight laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Design 320, 321, and 322 with a grade of at least C in each.

DES 342. Design and Persuasion.

Investigation of historical models; the role of words, context, and audience; and the effect of media. Eight laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Design 320, 321, and 322 with a grade of at least C in each.

DES 350. Special Design Topics.

A critical investigation of historical and contemporary issues in design, focusing on key theoretical and methodological developments, and assessing the social and environmental consequences of the design act. Eight laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For design majors, the following courses with a grade of at least C in each: Design 320, 321, and 322; for studio art majors, the following courses with a grade of at least C in each: Studio Art 303K, 303L, 304K, 304L; for others, upper-division standing.

DES 351. Design Perspectives.

Students create advanced design projects and present them for critique by visiting critics. Eight laboratory hours a week for one semester. Offered in the fall semester only. Prerequisite: Design 340, 341, and 342 with a grade of at least C in each, and written consent of the design faculty.

DES 354. Design Issues.

A critical investigation of historical and contemporary issues in design, focusing on key theoretical and methodological developments, and assessing the social and environmental consequences of the design act. Three lecture hours a week for one semester. May not be counted toward a degree in the Department of Art and Art History. Prerequisite: For design majors, Design 310, 311J, 311K, 312, and 313 with a grade of at least C in each; for studio art majors, Studio Art 303K, 303L, 304K,

and 304L with a grade of at least C in each; for others, upper-division standing.

DES 370. Senior Project in Design.

Planning, execution, and presentation of a project approved by the design faculty. Eight laboratory hours a week for one semester. Offered in the spring semester only. With consent of the design faculty, may be repeated for credit. Prerequisite: Design 350 and 351 with a grade of at least C in each, and written consent of the design faculty.

DES 371. Design Practicum.

Practical experience through an internship; lectures on professional ethics and responsibilities. One lecture hour and ten laboratory hours a week for one semester. Offered in the spring semester only. With consent of the design faculty, may be repeated for credit. Prerequisite: Design 350 and 351 with a grade of at least C in each.

DES 376. Independent Study: Design.

Individual projects to be completed under faculty supervision. The equivalent of eight laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Fifteen semester hours of upper-division coursework in design, a grade point average in upper-division design of at least 3.00, and consent of the chair of the department.

Studio Art: ART

Lower-Division Courses

ART 303K (TCCN: ARTS 1316). Drawing Foundations.

Restricted to art history, design, studio art, and visual art studies majors. Drawing concepts and skills in various media. Eight laboratory hours a week for one semester. May be taken for credit only once.

ART 303L. Digital Foundations.

Restricted to design, studio art, and visual art studies majors. Introduction to digital, multimedia, and other time-based art. Eight laboratory hours a week for one semester. May be taken for credit only once.

ART 304K (TCCN: ARTS 1311). Two-Dimensional Foundations.

Restricted to design, studio art, and visual art studies majors. A basic course in the visual dynamics of two-dimensional art forms. Eight laboratory hours a week for one semester. May be taken for credit only once.

ART 304L (TCCN: ARTS 1312). Three-Dimensional Foundations.

Restricted to design, studio art, and visual art studies majors. A basic course in three-dimensional form and space. Eight laboratory hours a week for one semester. May be taken for credit only once.

ART 311K (TCCN: ARTS 2316). Painting I.

Restricted to design, studio art, and visual art studies majors. Introduction to painting techniques, composition, and exploration of personal expression. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 313K (TCCN: ARTS 2326). Beginning Sculpture.

Restricted to design, studio art, and visual art studies majors. Introduction to the processes involved in the production of object-oriented sculpture using direct methods of hot and cold construction. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 313M. Topics in Three-Dimensional Art.

Restricted to design, studio art, and visual art studies majors. Study of specific techniques or problems. Eight laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 315K (TCCN: ARTS 1317). Beginning Drawing.

Restricted to design, studio art, and visual art studies majors. Exploration of various methods, subjects, and expressive possibilities in drawing. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 316K (TCCN: ARTS 2323). Beginning Life Drawing.

Restricted to design, studio art, and visual art studies majors. Problems in drawing and construction of the human figure in selected media. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 316T. Introduction to Transmedia.

Restricted to design, studio art, and visual art studies majors. Introduction to the theory and practice of time-based art, including digital time-art, performance, and video art. Two lecture hours and six laboratory hours a week for one semester. May be taken for credit only once. Studio Art 316T and 316V may not both be counted. Studio Art 316T and 317C may not both be counted. Studio Art 316T and 318C may not both be counted. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 316V. Transmedia: Video Art I.

Restricted to design, studio art, and visual art studies majors. Introduction to the basics of video art production, narrative and non-narrative video structural forms, including history, theory, camera techniques, montage, and digital editing. Two lecture hours and six laboratory hours a week for one semester. May be taken for credit only once. Studio Art 316T and 316V may not both be counted. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 317C. Transmedia: Performance Art I.

Restricted to design, studio art, and visual art studies majors. Introduction to the history, theory, and practice of performance art and its application in a variety of contexts, including theatrical, gallery, and the workaday world. Two lecture hours and six laboratory hours a week for one semester. May be taken for credit only once. Studio Art 316T and 317C may not both be counted. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 317K (TCCN: ARTS 2356). Beginning Photography.

Restricted to design, studio art, and visual art studies majors. An introduction to still photography, including basic technical skills and concepts. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 318C. Transmedia: Digital Time-Art I.

Restricted to design, studio art, and visual art studies majors. Introduction to time-based art, with emphasis on the exploration of digital technologies, including motion graphics, video, animation, and sound. Two lecture hours and six laboratory hours a week for one semester. May be taken for credit only once. Studio Art 316T and 318C may not both be counted. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 319G. Beginning Printmaking: Serigraphy.

Restricted to design, studio art, and visual art studies majors. Fundamental instruction in the theories, techniques, and practice of serigraphy. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 319K. Beginning Printmaking: Intaglio.

Restricted to design, studio art, and visual art studies majors. Introduction to the art of printmaking, primarily intaglio techniques such as etching, soft ground, aquatint, and assemblage. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 319M. Beginning Printmaking: Lithography.

Restricted to design, studio art, and visual art studies majors. Fundamental instruction in the theories, techniques, and shop practices of lithography. Eight laboratory hours a week for one semester. May be taken for credit only once. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 119Q, 219Q, 319Q, 419Q, 519Q, 619Q, 719Q, 819Q, 919Q. Topics in Studio Art.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

ART 319T. Topics in Studio Art: Laboratory.

Restricted to design, studio art, and visual art studies majors. Intensive study of various disciplines of studio art. Eight laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

Upper-Division Courses**ART 320K. Topics in Studio Art.**

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320L. Topics in Studio Art.

Open to all students. Continuation of Studio Art 320K. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and Studio Art 320K with a grade of at least C.

ART 320N. Topics in Design.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320P. Topics in Drawing.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320R. Topics in Mixed Media.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320S. Topics in Painting.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320T. Topics in Photography.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320U. Topics in Printmaking.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320V. Topics in Sculpture.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 320W. Topics in Transmedia.

Open to all students. Eight laboratory hours a week for one semester. May not be counted toward a degree in art and art history. May be repeated for credit when the topics vary.

ART 321K. Painting II.

Restricted to design, studio art, and visual art studies majors. Problems in composition and exploration of personal expression. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 311K with a grade of at least C.

ART 321M. Painting II: Figure Painting.

Restricted to design, studio art, and visual art studies majors. Problems in composition and exploration of personal expression with the life model. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 311K with a grade of at least C.

ART 322K. Intermediate Drawing.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 315K. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 315K with a grade of at least C.

ART 323K. Intermediate Sculpture.

Restricted to design, studio art, and visual art studies majors. Exploration of the concepts and processes involved in the production of object-oriented sculpture, with emphasis on indirect methods of mold-making and casting. Encourages individual direction. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 313K with a grade of at least C.

ART 323M. Advanced Topics in Three-Dimensional Art.

Restricted to design, studio art, and visual art studies majors. Study of specific techniques or problems. Eight laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a

grade of at least C in each; and twelve additional semester hours of studio art coursework with a grade of at least C in each course.

ART 323P. Issues in Sculpture.

Restricted to design, studio art, and visual art studies majors. Topics related to the field of sculpture, from issue-based to media-based studies. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 313K with a grade of at least C.

ART 323S. Installation Sculpture.

Restricted to design, studio art, and visual art studies majors. Exploration of the theories and methods involved in the production of installation sculpture through the investigation of form and space and of their function in transforming environmental, architectural, or invented sites. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 313K with a grade of at least C.

ART 325G. Intermediate Printmaking: Serigraphy.

Restricted to design, studio art, and visual art studies majors. Practice in the theories and techniques of multicolor serigraphy and photoserigraphy. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 319G with a grade of at least C.

ART 325K. Intermediate Printmaking: Intaglio.

Restricted to design, studio art, and visual art studies majors. Instruction in the theories and techniques of intaglio printmaking, color, assemblage, stencil, viscosity, collography, photo process, and relief. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 319K with a grade of at least C.

ART 325M. Intermediate Printmaking: Lithography.

Restricted to design, studio art, and visual art studies majors. Instruction in the theories and techniques of metal plate, multicolor, and stone lithography and photolithography. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 319M with a grade of at least C.

ART 129Q, 229Q, 329Q, 429Q, 529Q, 629Q, 729Q, 829Q, 929Q. Topics in Studio Art.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

ART 334K. Digital Photography.

Restricted to design, studio art, and visual art studies majors. Introduction to digital image making in the context of creating art, including digital technologies and a historical overview of traditional and digital photographic practices. Eight laboratory hours a week for one semester. Prerequisite: Studio Art 317K with a grade of at least C.

ART 335K. Intermediate Photography.

Restricted to design, studio art, and visual art studies majors. Practice in still photography, including materials and processes. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with

the same instructor in the same semester. Prerequisite: Studio Art 317K and 334K with a grade of at least C in each.

ART 336K. Color Photography.

Restricted to design, studio art, and visual art studies majors. Instruction in basic principles, materials, and techniques of color photography as an art form. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 317K with a grade of at least C.

ART 336V. Transmedia: Video Art II.

Restricted to design, studio art, and visual art studies majors. Projects in video art and video installation art. Surveys contemporary video art, stylistic modes, ideology, and the history of the artist's video and its precedents in the avant-garde and structuralist filmmaking. Two lecture hours and six laboratory hours a week for one semester. May be repeated twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 316T or 316V with a grade of at least C.

ART 337C. Transmedia: Performance Art II.

Restricted to design, studio art, and visual art studies majors. Projects in performance art with a concentration on the realization of more fully developed solo and collaborative projects. Two lecture hours and six laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 316T or 317C with a grade of at least C.

ART 338C. Transmedia: Digital Time-Art II.

Restricted to design, studio art, and visual art studies majors. Projects in time-based art, with emphasis on the exploration of digital technologies, including motion graphics, video, animation, and sound. Two lecture hours and six laboratory hours a week for one semester. May be repeated twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 316T or 318C with a grade of at least C.

ART 341K. Painting III.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 321K. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 321K or 321M with a grade of at least C.

ART 341M. Painting III: Figure Painting.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 321M. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 321M with a grade of at least C.

ART 346K. Intermediate Life Drawing.

Restricted to design, studio art, and visual art studies majors. Advanced problems in drawing and construction of the human figure. Eight laboratory hours a week for one semester. May be taken twice for credit, but not with the same instructor in the same semester. Prerequisite: Studio Art 316K with a grade of at least C.

ART 350. Philosophy, Theory, and Criticism.

Restricted to design, studio art, and visual art studies majors. Advanced exploration of philosophy, theory, and criticism from a studio art perspective. Prerequisite: Upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; and nine additional

semester hours of coursework in studio art with a grade of at least C in each course.

ART 354C. Computer Art Media.

Restricted to design, studio art, and visual art studies majors. Principles, techniques, and practices of digital arts for studio artists. Two lecture hours and six laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

ART 355. Studio Projects.

Restricted to design, studio art, and visual art studies majors. Study of specific techniques or problems. Eight laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; and twelve additional semester hours of coursework in studio art with a grade of at least C in each course.

Topic 1: Design Issues.

Topic 2: Installation of Film Art.

Topic 3: Monoprinting and Relief Printing.

ART 356K. Advanced Color Photography.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 336K. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 336K with a grade of at least C.

ART 356V. Transmedia: Video Art III.

Restricted to design, studio art, and visual art studies majors. Advanced study of video art and video installation art. Two lecture hours and six laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 336V with a grade of at least C.

ART 357C. Transmedia: Performance Art III.

Restricted to design, studio art, and visual art studies majors. Advanced study of performance art with a concentration on the realization of more fully developed solo and collaborative projects. Two lecture hours and six laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 337C with a grade of at least C.

ART 358C. Transmedia: Digital Time-Art III.

Restricted to design, studio art, and visual art studies majors. Advanced study of time-based art, with emphasis on the exploration of digital technologies, including motion graphics, video, animation, and sound. Two lecture hours and six laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 338C with a grade of at least C.

ART 359K. Advanced Digital Photography.

Restricted to design, studio art, and visual art studies majors. Advanced study of digital image making in the context of creating art, including digital technologies and the historical developments of wet processes in black and white, color, and digital photography. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be

taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 334K with a grade of at least C.

ART 361J. Painting IV: Figure Painting.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 341M. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 341M with a grade of at least C.

ART 361K. Painting IV.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 341K. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 341K or 341M with a grade of at least C, and consent of painting faculty via application and portfolio review.

ART 363K. Advanced Sculpture.

Restricted to design, studio art, and visual art studies majors. Advanced research in the theory, technology, and methods involved in the production of sculpture, with emphasis on individual direction. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 323K with a grade of at least C.

ART 363S. Advanced Installation Sculpture.

Restricted to design, studio art, and visual art studies majors. Advanced research in the theory, technology, and methods involved in the production of installation sculpture, with emphasis on individual direction. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 323S or 323K with a grade of at least C.

ART 365G. Advanced Printmaking: Serigraphy.

Restricted to design, studio art, and visual art studies majors. Advanced practice in the art of serigraphy, with emphasis on independent research. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 325G with a grade of at least C.

ART 365K. Advanced Printmaking: Intaglio.

Restricted to design, studio art, and visual art studies majors. Advanced practice in the art of printmaking, involving independent research. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 325K with a grade of at least C.

ART 365M. Advanced Printmaking: Lithography.

Restricted to design, studio art, and visual art studies majors. Advanced instruction in the theories and techniques of metal plate, multicolor, and stone lithography and photolithography. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken

for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 325M with a grade of at least C.

ART 366K. Advanced Life Drawing.

Restricted to design, studio art, and visual art studies majors. Problems in drawing and construction of the human figure. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 346K with a grade of at least C.

ART 368N. Advanced Drawing.

Restricted to design, studio art, and visual art studies majors. Continuation of Studio Art 322K. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than twice in the same semester, and (2) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 322K with a grade of at least C.

ART 370S. Senior Seminar in Art.

Restricted to design, studio art, and visual art studies majors. Examines how to articulate and make visible the unique qualities and ambition of studio practice through writing, discourse, and other ways of engaging an audience. Coursework is focused on speaking, writing, and conversation. Prerequisite: Upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; and nine additional semester hours of coursework in studio art with a grade of at least C in each course.

ART 372K. Advanced Photography.

Restricted to design, studio art, and visual art studies majors. Advanced practice in still photography. Eight laboratory hours a week for one semester. May be repeated for credit, but (1) may not be taken for credit more than once with the same instructor in the same semester. Prerequisite: Studio Art 334K and 335K with a grade of at least C in each.

ART 376. Independent Study: Studio Art.

Restricted to design, studio art, and visual art studies majors. Individual projects to be completed under faculty supervision. The equivalent of eight laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Completion of at least fifteen semester hours of upper-division coursework in studio art, a grade point average of at least 3.00 in upper-division coursework in the major, and consent of the chair of the department.

ART 379R. Advanced Topics in Studio Art: Seminar.

Restricted to design, studio art, and visual art studies majors. Intensive advanced study of issues in the various disciplines of studio art. Three seminar hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; and twelve semester hours of upper-division coursework in studio art.

ART 179S, 379S. Advanced Topics in Studio Art: Lecture.

Restricted to design, studio art, and visual art studies majors. Intensive advanced study of various disciplines of studio art. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For 179S, upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; concurrent enrollment in Studio Art 279T; and twelve additional semester hours of coursework in studio art with a grade of at least C in each course; for 379S, upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least

C in each; and twelve additional semester hours of coursework in studio art with a grade of at least C in each course.

Topic 1: Game Development Capstone: Two-Dimensional Games.

Introduction to concepts and skills for game development in a two-dimensional game format. Studio Art 179S, 379S (Topic: Game Development Capstone: Two-Dimensional Games) and 179S, 379S (Topic 1) may not both be counted.

ART 279T, 379T. Advanced Topics in Studio Art: Laboratory.

Restricted to design, studio art, and visual art studies majors. Intensive advanced study of various disciplines of studio art. The equivalent of five or eight laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For 279T, upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; concurrent enrollment in Studio Art 179S; and twelve additional semester hours of coursework in studio art with a grade of at least C in each course; for 379T, upper-division standing; Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; and twelve additional semester hours of coursework in studio art with a grade of at least C in each course.

Visual Art Studies: VAS

Lower-Division Courses

Upper-Division Courses

VAS 320. Exploring Objects, Spaces, and Meaning.

Open to all students. Focuses on a broad range of historical and contemporary works, artifacts, and environments, and their implications for understanding imagery and objects in visual and material culture. Three lecture hours a week for one semester. May not be repeated for credit.

VAS 221C. Children's Artistic Development I.

Theory and content for the development of perceptual, aesthetic, critical, studio, and art-historical skills. Two lecture hours a week for one semester. Prerequisite: Concurrent enrollment in Visual Art Studies 121D.

VAS 121D. Children's Artistic Development I: Laboratory.

Practice in the development of perceptual, aesthetic, critical, studio, and art-historical skills. Four laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Visual Art Studies 221C.

VAS 222C. Children's Artistic Development II.

Continuation of Visual Art Studies 221C. Advanced theory and content for the development of perceptual, aesthetic, critical, studio, and art-historical skills. Two lecture hours a week for one semester. Prerequisite: Visual Art Studies 221C and 121D with a grade of at least C in each and concurrent enrollment in Visual Art Studies 122D.

VAS 122D. Children's Artistic Development II: Laboratory.

Continuation of Visual Art Studies 121D. Advanced practice in the development of art skills. Four laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Visual Art Studies 222C.

VAS 330. Introduction to Visual Art Studies.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. An introduction to visual art studies: philosophy, current trends, instructional methods, evaluation, advocacy, and careers in art education, museum education, and cultural or social educational settings. Three lecture hours a week for one semester. Observation required outside of class hours. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each.

VAS 241C. Learners and Instructional Sites for Visual Art Studies.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. Instructional procedures, observations, and evaluation of early childhood through grade twelve classroom and community-based art instruction. Two lecture hours a week for one semester. Observation required outside of class hours. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each, and concurrent enrollment in Visual Art Studies 141D.

VAS 141D. Learners and Instructional Sites for Visual Art Studies: Laboratory.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. Four laboratory hours a week for one semester. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each, and concurrent enrollment in Visual Art Studies 241C.

VAS 251C. Art Materials, Techniques, and Processes.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. Exploration and application of basic materials, techniques, and processes in art production used in early childhood through grade twelve classroom and community-based art instruction. Two lecture hours a week for one semester. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; Visual Art Studies 330 with a grade of at least B; and concurrent enrollment in Visual Art Studies 151D.

VAS 151D. Art Materials, Techniques, and Processes: Laboratory.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. Four laboratory hours a week for one semester. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; Visual Art Studies 330 with a grade of at least B; and concurrent enrollment in Visual Art Studies 251C.

VAS 261C. Criticism and Conversation about Art.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. Individual and professional evaluations of visual imagery, artifacts, and artistic production in a variety of settings. Two lecture hours a week for one semester. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; Visual Art Studies 330, 241C, and 141D with a grade of at least B in each; and concurrent enrollment in Visual Art Studies 161D.

VAS 161D. Criticism and Conversation about Art: Laboratory.

Restricted to visual art studies majors; nonmajors may contact the department for permission to register. Four laboratory hours a week for one semester. Prerequisite: Studio Art 303K, 303L, 304K, and 304L with a grade of at least C in each; Visual Art Studies 330, 241C, and 141D with a grade of at least B in each; and concurrent enrollment in Visual Art Studies 261C.

VAS 271C. Topics in Visual Art Studies.

Lectures on selected topics in visual art. Two lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and concurrent enrollment in Visual Art Studies 171D.

VAS 171D. Topics in Visual Art Studies: Laboratory.

Two laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and concurrent enrollment in Visual Art Studies 271C.

VAS 376. Independent Study: Visual Art Studies.

Individual projects to be completed under faculty supervision. Individual instruction. May be repeated for credit. Prerequisite: Completion of twelve semester hours of upper-division coursework in the Department of Art and Art History, a grade point average in upper-division coursework in the Department of Art and Art History of at least 3.00, and consent of the chair of the department.

VAS 379S. Advanced Topics in Visual Art Studies: Lecture.

Three class hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For majors in the Department of Art and Art History, upper-division standing; for others, upper-division standing and consent of instructor.

Sarah and Ernest Butler School of Music

The University of Texas at Austin is an institutional member of the National Association of Schools of Music, approved for both its undergraduate and its graduate degrees in music. The requirements for entrance and for graduation given in this catalog are in accordance with the published regulations of the association.

Areas of Study

The College of Fine Arts offers courses in several areas of music. The undergraduate courses available in music performance, music literature, music studies, and music theory are listed below; complete descriptions of all music courses are after the tables below.

Music Performance

Before the first semester or summer session in which they will be enrolled, new and transfer students must file an Application for Instruction in Music Performance. The card indicates the faculty member to whom the student has been assigned.

All students enrolled in a music performance course must fill out a Music Performance and Jury Report at the end of each semester or summer session for each course taken.

Students who receive a grade below C- in any music performance course may not register for that course the next semester until the requests of other students for such work have been met.

Some of the following courses may be repeated for credit on the recommendation of the appropriate music performance jury.

MUS 101G Beginning Music Performance
MUS 201J Beginning Class Piano for Nonmusic Majors
MUS 201K Second-Semester Class Piano for Nonmusic Majors
MUS 201M Beginning Music Performance: Class Piano
MUS 201N Beginning Music Performance: Second-Semester Class Piano
MUS 201S Beginning Music Performance: Class Harp
MUS 201T Beginning Music Performance: Second-Semester Class Harp
MUS 210J Beginning Instruction in Music Performance: Third-Semester Class Piano
MUS 210K Beginning Instruction in Music Performance: Fourth-Semester Class Piano
MUS 111E English Diction and Phonetic Translation
MUS 311F French for Musicians
MUS 311G German for Musicians
MUS 311J Italian for Musicians
MUS 313 Fundamentals of Music
MUS 115T Lower-Division Reed Making
MUS 420J Junior Jazz Recital

MUS 420R Junior Recital
MUS 222J Instrumental Conducting
MUS 222K Instrumental Conducting
MUS 223J Choral Conducting
MUS 223K Choral Conducting
MUS 159J Harp Repertoire
MUS 259L Vocal Repertoire Coaching
MUS 259N Chamber Music: Strings and Piano
MUS 259P Chamber Music: Winds and Percussion
MUS 259T Topics in Instrumental Technology
MUS 160C Senior Composition Recital
MUS 460J Senior Jazz Recital
MUS 260M Pedagogy
MUS 460P Pedagogy
MUS 460R Senior Recital
MUS 262 Intermediate Instrumental Conducting
MUS 366P Senior Piano Pedagogy Project
MUS 176C, MUS 276C, MUS 376C Special Topics in Music Performance
MUS 178C, MUS 278C, MUS 378C Independent Study: Music Performance

Music Literature

MUS 302L An Introduction to Western Music
MUS 302P Introductory Topics in Western Music
MUS 303M Introduction to Music in World Cultures
MUS 303N Introduction to Popular Music in World Cultures
MUS 303P Topics in Music of World Cultures
MUS 307 Topics in Popular Music
MUS 313M History of Music I
MUS 313N History of Music II
MUS 330L History of Music III
MUS 334 The Music of the Americas
MUS 337 Music and Film Sound
MUS 338 Masterpieces of Music
MUS 342 Area Studies in Ethnomusicology
MUS 343J History of Jazz
MUS 376G Special Topics in Music Literature
MUS 178G, MUS 278G, MUS 378G Independent Study: Music Literature
MUS 379K Advanced Topics in Music Literature

Music Studies

MUS 115D String Instrument Fundamentals
MUS 115E Brass Instrument Fundamentals
MUS 115F Woodwind Instrument Fundamentals
MUS 115G Guitar Fundamentals
MUS 354 Musical Development of Children
MUS 354C Children's Music Literature and Performance I
MUS 354D Children's Music Literature and Performance II
MUS 354F Music Performance, Listening, and Appreciation
MUS 155C Techniques of Percussion Performance
MUS 255D Techniques of String Performance
MUS 255E Techniques of Brass Performance
MUS 255F Techniques of Woodwind Performance
MUS 255M Marching Band Techniques
MUS 255V Techniques of Vocal Performance
MUS 356G Choral Ensemble Literature and Performance
MUS 356J Instrumental Ensemble Literature and Performance
MUS 176M Special Topics in Music Studies
MUS 178M, MUS 278M, MUS 378M Independent Study: Music Studies

Music Theory

MUS 605 Musicianship
MUS 411 Ear Training and Sight-Singing
MUS 612 Structure of Tonal Music

MUS 214C Beginning Composition
 MUS 218J Beginning Jazz Improvisation
 MUS 321J Twentieth-Century Musical Analysis
 MUS 224G Intermediate Composition
 MUS 224J Advanced Composition
 MUS 325L Counterpoint
 MUS 325M Counterpoint
 MUS 226G Orchestration and Arranging
 MUS 226J Orchestration and Instrumentation
 MUS 226K Orchestration and Instrumentation
 MUS 226N Choral Arranging
 MUS 228G Jazz Theory I
 MUS 228J Intermediate Jazz Improvisation
 MUS 228K Beginning Jazz Piano Techniques
 MUS 228L Jazz Theory II
 MUS 328M Studio Arranging
 MUS 228P Jazz Composition
 MUS 329E Introduction to Electronic Media
 MUS 329F Projects in Electronic Media
 MUS 329G Intermediate Electronic Composition
 MUS 329J Introduction to Computer Music
 MUS 329M Intermediate Computer Music
 MUS 164L Advanced Ear Training
 MUS 368L Review of Music Theory
 MUS 376J Special Topics in Music Theory
 MUS 178J, MUS 278J, MUS 378J Independent Study: Music Theory

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A.

The abbreviations used for performance courses are included in Appendix B.

Ensemble: ENS

Lower-Division Courses

ENS 103P. Butler Opera Center Ensemble.

Open to any University student who can qualify by audition. Instruction and performance in operatic acting, vocal coaching, and stage direction. Four laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit.

ENS 105. Sight-Reading.

Designed to develop and improve sight-reading skills in piano performance. Three laboratory hours a week for one semester. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 106. Accompanying.

Designed for pianists, organists, and harpsichordists to improve ensemble playing and to give training in the technique of vocal and instrumental accompanying. One and one-half to three laboratory hours a week as required for one semester. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 107J. Jazz Orchestra.

Advanced jazz ensemble. Six laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 107K. Large Instrumental Ensemble.

Offered under various topics according to instrumentation, including Symphony Band, Symphony Orchestra, and Wind Ensemble. Six laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 107L. Longhorn Band.

In the spring semester, this organization divides into multiple performing ensembles. Six laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 107S. Small Instrumental Ensemble.

Offered under various topics according to instrumentation. Two laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108C. Texas Concert Band.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108D. Tower Concert Band.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108E. Longhorn Concert Band.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108F. Orange Concert Band.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108H. Longhorn Band Jazz Ensemble.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108K. Longhorn Band Percussion Ensemble.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 108M. Longhorn Band Color Guard Ensemble.

One of several Longhorn Band ensembles offered in spring semesters. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 109C. Choral Ensemble.

Offered under various topics according to ensemble composition, including University Chorus and Women's Chorus. Three laboratory hours a week for one semester, with additional laboratory hours as required.

May be repeated for credit. Open to any University student who can qualify by audition.

ENS 109K. Chamber Singers.

Six laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 109L. Concert Chorale.

Six laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

ENS 109P. Pop Choral Ensemble.

Offered under various topics, including Longhorn Singers and Varsity Singers. Three laboratory hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Open to any University student who can qualify by audition.

Upper-Division Courses

Music: MUS

Lower-Division Courses

MUS 101G. Beginning Music Performance.

Class instruction in music performance for nonmusic majors and for music majors studying a secondary instrument. Sections are offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harpsichord, oboe, organ, percussion, recorder, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice. Laboratory hours as required. May be repeated for credit when the instruments vary. Prerequisite: Ability to read music. Students studying guitar must provide their own six-string nylon (classical) guitar.

MUS 201J. Beginning Class Piano for Nonmusic Majors.

Open to all University students, except music majors, who have no experience in piano. Three class hours a week for one semester. May be repeated for credit.

MUS 201K. Second-Semester Class Piano for Nonmusic Majors.

Open to all University students, except music majors, who can fulfill the prerequisite. Three class hours a week for one semester. May be repeated for credit. Prerequisite: Credit with a grade of at least C or registration for Music 201J, or consent by audition; and consent of instructor.

MUS 201M. Beginning Music Performance: Class Piano.

Open only to music majors. Three laboratory hours a week for one semester. Credit granted only when taken as a secondary instrument. May be repeated for credit. Prerequisite: Ability to read music, and concurrent enrollment in Music 605A or consent of instructor. No experience on the instrument required; for those with experience, consent by audition required.

MUS 201N. Beginning Music Performance: Second-Semester Class Piano.

Open only to music majors. Continuation of Music 201M. Three laboratory hours a week for one semester. Credit granted only when taken as a secondary instrument. May be repeated for credit. Prerequisite: Music 201M completed the previous semester with a grade of at least C, or consent by audition.

MUS 201S. Beginning Music Performance: Class Harp.

Open to all University students who can fulfill the prerequisite. Three laboratory hours a week for one semester. For music majors, credit granted only when taken as a secondary instrument. May be repeated for credit. Prerequisite: Ability to read music and consent of instructor. No previous experience on the instrument required.

MUS 201T. Beginning Music Performance: Second-Semester Class Harp.

Open to all University students who can fulfill the prerequisite. Three laboratory hours a week for one semester. For music majors, credit granted only when taken as a secondary instrument. May be repeated for credit. Prerequisite: Music 201S completed the previous semester with a grade of at least C, or consent by audition.

MUS 302L (TCCN: MUSI 1306). An Introduction to Western Music.

Open to all University students except music majors. Information and techniques for the intelligent appreciation of music: its elements, basic forms, and major style periods from the Middle Ages to the present. Three lecture hours a week for one semester, with one laboratory hour a week as required.

MUS 302P. Introductory Topics in Western Music.

May not be counted by music majors. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

MUS 303M. Introduction to Music in World Cultures.

Open to all University students. Exploration of practices, beliefs, and issues through the study of various musical genres in the regions of Asia, the Middle East, Africa, the Pacific, Europe, and the Americas. Three lecture hours a week for one semester, with one laboratory hour a week as required. Asian Studies 303M and Music 303M may not both be counted.

MUS 303N. Introduction to Popular Music in World Cultures.

Open to all University students. Exploration of practices, beliefs, and issues through the study of various mass-mediated and commercial musical genres in the regions of Asia, the Middle East, Africa, the Pacific, Europe, and the Americas. Three lecture hours a week for one semester, with one laboratory hour a week as required. Asian Studies 303N and Music 303N may not both be counted.

MUS 303P. Topics in Music of World Cultures.

May not be counted by music majors. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

MUS 605 (TCCN: MUSI 1311, MUSI 1312). Musicianship.

Study of the fundamentals of music for music majors through tonal harmony, ear training, sight-singing, keyboard drill, analysis, and composition of music. Three lecture hours and two laboratory hours a week for two semesters. Music 605 and 313 may not both be counted. Prerequisite: For 605A, either satisfactory completion of the audition required for admission to the Butler School of Music and registration in class piano as assigned by the Butler School of Music, or consent of instructor; for 605B, Music 605A with a grade of at least C, and registration in class piano as assigned by the Butler School of Music or consent of instructor.

MUS 306M. Elements of Music.

Open to all University students except music majors. Fundamentals of music including the study of notation and the elements of rhythm, melody, and harmony; development of elementary aural skills; and writing of

simple compositions. Three lecture hours a week for one semester. Music 606 and 306M may not both be counted.

MUS 307 (TCCN: MUSI 1310). Topics in Popular Music.

Open to all University students. Studies of the popular music of a selected culture or geographical area. Three lecture hours a week for one semester, with one laboratory hour a week as required. May be repeated for credit when the topics vary.

Topic 1: Music of African Americans. Same as African and African Diaspora Studies 317F (Topic 2). Introduction to the variety of modes of expression of African American culture in music and other related genres. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 317 (Topic 2: Music of African Americans), 317F (Topic 2), Music 307 (Topic 1).

Topic 2: History of Rock Music.

Topic 3: Jazz Appreciation.

MUS 007P. String Education: Teaching and Learning.

Restricted to current String Project program instructors in the Butler School of Music. Discussion of curriculum planning, lesson observation, and program management topics, as well as guest pedagogues and master teacher presentations. One lecture hour a week for one semester. May be repeated for credit. Prerequisite: Acceptance of teaching application for the String Project program.

MUS 210J. Beginning Instruction in Music Performance: Third-Semester Class Piano.

Open only to music majors. Continuation of Music 201N. Three laboratory hours a week for one semester. Credit granted only when taken as a secondary instrument. May be repeated for credit. Prerequisite: Music 201N completed the previous semester with a grade of at least C, or consent by audition.

MUS 210K. Beginning Instruction in Music Performance: Fourth-Semester Class Piano.

Open only to music majors. Continuation of Music 210J. Three laboratory hours a week for one semester. Credit granted only when taken as a secondary instrument. May be repeated for credit. Prerequisite: Music 210J completed the previous semester with a grade of at least C, or consent by audition.

MUS 411 (TCCN: MUSI 2216, MUSI 2217). Ear Training and Sight-Singing.

Material drawn from all musical styles. Two lecture hours and one laboratory hour a week for two semesters. Prerequisite: For 411A, Music 605B with a grade of at least C, and concurrent enrollment in Music 612A; for 411B, Music 411A with a grade of at least C and concurrent enrollment in Music 612B.

MUS 111E (TCCN: MUSI 1161). English Diction and Phonetic Translation.

Open only to music majors. Study of English diction and phonetic translation specifically for musicians. Emphasis on the International Phonetic Alphabet. One lecture hour a week for one semester.

MUS 311F. French for Musicians.

Open only to music majors. French language and diction specifically for musicians. Three lecture hours and one laboratory hour a week for one semester.

MUS 311G. German for Musicians.

Open only to music majors. German language and diction specifically for musicians. Three lecture hours and one laboratory hour a week for one semester.

MUS 311J. Italian for Musicians.

Open only to music majors. Italian language and diction specifically for musicians. Three lecture hours and one laboratory hour a week for one semester.

MUS 612 (TCCN: MUSI 2311, MUSI 2312). Structure of Tonal Music.

Elements of tonal harmony and form; tonal analysis. Three lecture hours a week for two semesters, with one laboratory hour a week as required. Prerequisite: For 612A, Music 605B with a grade of at least C, concurrent enrollment in Music 411A, and registration in class piano as assigned by the Butler School of Music or consent of instructor; for 612B, Music 612A with a grade of at least C, concurrent enrollment in Music 411B, and registration in class piano as assigned by the Butler School of Music or consent of instructor.

MUS 313. Fundamentals of Music.

Designed to familiarize students who are not music majors with the meaning of musical notation and with the harmonic, melodic, and rhythmic structure of music. Three lecture hours and one laboratory hour a week for one semester. Music 605 and 313 may not both be counted.

MUS 313M. History of Music I.

The history of music from the beginning of notation to the eighteenth century. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Music 605 or consent of instructor.

MUS 313N. History of Music II.

The history of music from the eighteenth century to the early twentieth century. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Music 313M or consent of instructor.

MUS 214C (TCCN: MUSI 1286). Beginning Composition.

Introduction to contemporary composition through the analysis and writing of short studies and through supervised original projects. Two lecture hours and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Concurrent enrollment in Music 411 and 612, or consent of instructor.

MUS 115D. String Instrument Fundamentals.

Beginning instruction in string instrument performance and pedagogy. This course is offered in the following instruments: double bass, viola, violin, and violoncello. Individual or class instruction in music performance. Laboratory hours as required. May not be repeated for credit on the same instrument. May not be taken by music majors in their principal instrument. Prerequisite: A major in music.

MUS 115E. Brass Instrument Fundamentals.

Beginning instruction in brass instrument performance and pedagogy. This course is offered in the following instruments: euphonium, French horn, trombone, trumpet, and tuba. Individual or class instruction in music performance. Laboratory hours as required. May not be repeated for credit on the same instrument. May not be taken by music majors in their principal instrument. Prerequisite: A major in music.

MUS 115F. Woodwind Instrument Fundamentals.

Beginning instruction in woodwind instrument performance and pedagogy. This course is offered in the following instruments: bassoon, clarinet, flute, oboe, and saxophone. Individual or class instruction in music performance. Laboratory hours as required. May not be repeated for

credit on the same instrument. May not be taken by music majors in their principal instrument. Prerequisite: A major in music.

MUS 115G. Guitar Fundamentals.

Beginning instruction in guitar performance and pedagogy. Individual or class instruction in music performance. Laboratory hours as required. Prerequisite: A major in music or consent of instructor.

MUS 115T. Lower-Division Reed Making.

Individual instruction. May be repeated for credit. Prerequisite: Consent of instructor.

MUS 218J. Beginning Jazz Improvisation.

Study of basic jazz improvisational skills through performance of standard literature. Two class hours a week for one semester. Prerequisite: Music 605 or consent of instructor.

MUS 319D. Foundations of Digital Sound and Music.

Introduction to the practice of creating music with computer technologies and the basic techniques of recording, editing and producing digital audio tracks, including introduction to musical acoustics and psychoacoustics, fundamentals of audio recording, editing, mixing, and processing, MIDI, digital audio workstations, and syncing sound to video. Three hours a week for one semester. Fine Arts 310 (Topic: Foundations of Digital Sound and Music) and Music 319D may not both be counted. Prerequisite: Consent of instructor.

MUS 119Q, 219Q, 319Q, 419Q, 519Q, 619Q, 719Q, 819Q, 919Q. Topics in Music.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Butler School of Music. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

MUS 420J. Junior Jazz Recital.

Preparation and performance of a half-hour public recital in the major jazz instrument. Individual instruction. Prerequisite: For jazz composition majors, course 212J in the major jazz instrument for two semesters, or the equivalent, and approval of the jazz faculty; for jazz performance majors, course 412J in the major jazz instrument for two semesters, or the equivalent, and approval of the jazz faculty.

MUS 220P. Practicum in a World Music Tradition.

Open to any University student who can qualify by audition. Advanced training on a non-Western musical instrument such as Javanese gender barung, Indian sitar, Arabic qanun, or Korean kayageum, or advanced training in a non-Western vocal style, and other approved musical practices. Two lecture hours a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing; two semesters of enrollment in a non-Western music ensemble, such as Javanese Gamelan, Middle Eastern or North Indian Music ensemble, or other approved music ensembles, and consent of instructor.

MUS 420R. Junior Recital.

Preparation and performance of a half-hour public recital in the major instrument. Individual instruction. Prerequisite: Course 412 (or 410) in the major instrument for four semesters, or the equivalent, and approval of the faculty.

MUS 321J. Twentieth-Century Musical Analysis.

Introduction to the theory and practice of music since 1900. Includes various analytical approaches to the wide range of musical styles developed over the course of the twentieth- and twenty-first-centuries, as well as the music of mainstream twentieth century composers and living composers. Both analytical and aural skills are emphasized. Three lecture hours a week for one semester. Prerequisite: Music 411 and 612.

MUS 222J. Instrumental Conducting.

Designed for those who have had no experience in conducting. Includes rudimentary use of baton, regular and irregular beat patterns, subdivisions and beat pattern variations as applied to simple instrumental literature, and practical experience in conducting instrumental groups. Two class hours a week for one semester. Prerequisite: Upper-division standing in music or consent of instructor.

MUS 222K. Instrumental Conducting.

Continuation of Music 222J. Further technical study in irregular meters, polyrhythmic and polymetrical patterns and scores; emphasis on expressive gestures, phrasal and compound beat conducting. Two class hours a week for one semester. Prerequisite: Music 222J or consent of instructor.

MUS 223J. Choral Conducting.

Designed for those who have had no experience in conducting. Includes regular and irregular beat patterns, subdivisions and beat pattern variations as applied to simple choral literature, and practical experience in conducting vocal groups. Two class hours a week for one semester. Prerequisite: Upper-division standing in music.

MUS 223K. Choral Conducting.

Continuation of Music 223J. Further technical study in irregular meters, polyrhythmic and polymetrical patterns and scores; emphasis on expressive gestures, phrasal and compound beat conducting. Two class hours a week for one semester. Prerequisite: Music 223J or consent of instructor.

MUS 224G. Intermediate Composition.

Continuation of Music 214C. The equivalent of two lecture hours and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Music 214C with a grade of at least B, and approval of the music theory and composition faculty.

MUS 224J. Advanced Composition.

Continuation of Music 224G for composition majors only. The equivalent of two lecture hours and one laboratory hour a week for one semester. With consent of the music theory and composition faculty, may be repeated for credit. Prerequisite: Music 224G with a grade of at least B, and approval of the music theory and composition faculty.

MUS 325L. Counterpoint.

Development of contrapuntal skill in sixteenth-century style and in related late-twentieth-century styles; the teaching of counterpoint, including Fuxian species. Three lecture hours a week for one semester. Prerequisite: Music 411 and 612.

MUS 325M. Counterpoint.

Analysis of eighteenth-century inventions, fugues, and passacaglias; development of contrapuntal skills in twentieth-century styles that draw on these historical models; the teaching of counterpoint. Three lecture hours a week for one semester.

MUS 226G. Orchestration and Arranging.

Techniques of instrumentation, arranging, and orchestration for band, orchestra, and chamber ensembles. Two lecture hours a week for one semester. Prerequisite: Music 411 and 612.

MUS 226J. Orchestration and Instrumentation.

Study of the characteristics of individual instruments; writing for various combinations; study of scores of different periods; listening to recordings and live performances. Two lecture hours a week for one semester. Prerequisite: Music 411 and 612.

MUS 226K. Orchestration and Instrumentation.

Continuation of Music 226J. Two lecture hours a week for one semester. Prerequisite: Music 226J.

MUS 226N. Choral Arranging.

Techniques of voicing and arranging for choirs, vocal ensembles, and vocal chamber groups. Two lecture hours a week for one semester. Prerequisite: Music 411 and 612.

MUS 228G. Jazz Theory I.

Study of the elements of jazz and popular styles, with emphasis on written theory and keyboard skills. Two lecture hours a week for one semester. Prerequisite: Music 201N and 605, or consent of instructor.

MUS 228J. Intermediate Jazz Improvisation.

Continuation of Music 218J. Two class hours a week for one semester. Prerequisite: Music 201N, 605, 218J, and 228G; or consent of instructor.

MUS 228K. Beginning Jazz Piano Techniques.

Designed for music majors (pianists and nonpianists) seeking basic skills in chord notation, chord interpretation and voicing, voice leading, and chord and scale relationships for improvisation. Three laboratory hours a week for one semester. Prerequisite: Music 210K and 612, or consent of instructor.

MUS 228L. Jazz Theory II.

Continuation of the concepts taught in Music 228G, with an emphasis on ear training, harmonic motion of jazz, and harmonic embellishment. Two lecture hours a week for one semester. Prerequisite: Music 228G.

MUS 328M. Studio Arranging.

Techniques of composing and arranging for standard jazz and popular music instrumental combinations in varied styles. Three lecture hours a week for one semester. With consent of instructor, may be repeated for credit. Prerequisite: Music 612 and 228G, or consent of instructor.

MUS 228P. Jazz Composition.

Individual instruction in the creative process of composition, involving the melodic, harmonic, and rhythmic components of various jazz styles. Individual instruction. May be repeated for credit. Prerequisite: Music 328M or consent of instructor.

MUS 329E. Introduction to Electronic Media.

Introduction to the fundamentals of recording, tape editing, and electronic music synthesis. Three lecture hours and six laboratory hours a week for one semester. Prerequisite: Consent of instructor.

MUS 329F. Projects in Electronic Media.

Continuation of Music 329E for nontheory and noncomposition majors. One and one-half lecture hours and eight laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Music 329E and consent of instructor.

MUS 329G. Intermediate Electronic Composition.

Continuation of Music 329E for music theory or composition majors. Three lecture hours and six laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Music 329E and consent of instructor.

MUS 329J. Introduction to Computer Music.

An introduction to the basic concepts of digital music synthesis and signal processing. One and one-half lecture hours and eight laboratory hours a week for one semester. Prerequisite: Music 329E and consent of instructor.

MUS 329M. Intermediate Computer Music.

Continuation of Music 329J. One and one-half lecture hours and eight laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Music 329J and consent of instructor.

MUS 129Q, 229Q, 329Q, 429Q, 529Q, 629Q, 729Q, 829Q, 929Q. Topics in Music.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Butler School of Music. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

MUS 330L. History of Music III.

The history of music from the early twentieth century to the present. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Music 313N or consent of instructor.

MUS 331J. Advanced Studies in Music Theory.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: MUS 612 and 313N, or upper-division standing and consent of instructor.

MUS 334. The Music of the Americas.

Studies of both indigenous and borrowed traditions in the popular, folk, and art music of the Americas from the colonial period to the present. Three lecture hours a week for one semester, with one laboratory hour a week as required. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

Topic 1: Music of Mexico and the Caribbean. Same as Latin American Studies 326 (Topic 1: Music of Mexico and the Caribbean). An introduction to the history of Mexican and Caribbean traditional and commercial music, with some discussion of classical music as well. Attention will be given to music of indigenous, African, European, and mixed origin. Mexico and the Spanish-speaking Caribbean receive special attention. Class meetings will be divided into lecture/discussion segments, videos, listening, and performance instruction/demonstration. Only one of the following may be counted: Latin American Studies 322 (Topic: Music of Mexico and the Caribbean), 326 (Topic 1), Music 334 (Topic 1). Additional prerequisite: Upper-division standing.

Topic 2: Music of Latin America. Same as Latin American Studies 326 (Topic 2: Music of Latin America). Only one of the following may be counted: Latin American Studies 322 (Topic: Music of Latin America), 326 (Topic 2), Music 334 (Topic 2).

Topic 3: Music of Brazil and Argentina. Same as Latin American Studies 326 (Topic 3: Music of Brazil and Argentina). An introduction to Brazilian and Argentine music from samba, capoeira, and forro to tango, cumbia villera, and chacarera; examines such music making within its various historical, social, and political contexts. Uses course readings, lectures, listening assignments, performance attendance,

and movie screenings to analyze themes including nationalism and ethnicity, globalization and development, and democracy and social justice. Only one of the following may be counted: Latin American Studies 322 (Topic: Music of Brazil and Argentina), 326 (Topic 3), Music 334 (Topic 3). Additional prerequisite: Upper-division standing.

Topic 4: Music of the Andean Countries. Same as Latin American Studies 326 (Topic 4: Music of the Andean Countries). Introduction to the music of Andean countries including Colombia, Ecuador, Peru, Bolivia, and Chile. Explores the role music plays in shaping historical and modern Andean societies, as well as how music comments upon national culture, society, and politics, with particular attention to the ways in which musicians and musical movements continue to influence Andean societies. Subjects include pre-Columbian and colonial music making; music representative of the tripartite indigenous, African, and Iberian heritage of Andean countries; aesthetics, identity, and musical expression; ritual, religion, and the politics of musical performance. Only one of the following may be counted: Latin American Studies 322 (Topic: Music of the Andean Countries), 326 (Topic 4), Music 334 (Topic 4).

Topic 5: The Music of the African Diaspora. Same as African and African Diaspora Studies 374F (Topic 8) and Latin American Studies 326 (Topic 5). The musical legacy of the African slave trade in the Americas, the social contexts in which black musical forms have developed, and their varied forms. Subjects include the shifting meanings of "black music" in various contexts; the notion of hybridity; the uses of African influenced music as a political or oppositional tool; and African ethnic groups represented prominently in the New World, the traditions they brought with them, and the ways they have been adapted to new ends. Three lecture hours and one laboratory hour a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Music of the African Diaspora), 374F (Topic 8), Latin American Studies 326 (Topic: Music of the African Diaspora), 326 (Topic 5), Music 334 (Topic: Music of the African Diaspora), 334 (Topic 5).

MUS 337. Music and Film Sound.

History of music and the soundtrack; analysis of interactions between image and sound; and aesthetics and issues of production and postproduction. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

MUS 338. Masterpieces of Music.

Study of the works of specific composers or of specific genres in the Western musical tradition. Three lecture hours a week for one semester. May not be counted by music majors. May be repeated for credit when the topics vary. Prerequisite: Music 302L or consent of instructor.

MUS 342. Area Studies in Ethnomusicology.

Studies of the musical traditions of selected cultures or geographical areas. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

Topic 3: Musics of India. Same as Anthropology 324L (Topic 13: Musics of India) and Asian Studies 361 (Topic 11: Musics of India). Prerequisite: Upper-division standing.

Topic 5: Black Perspectives in Jazz. Same as African and African Diaspora Studies 372E (Topic 12). Explores the social, cultural, political, and artistic relationships between jazz and the black experience, both within the African American context and throughout the diaspora. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 12), 374 (Topic 10: Black Perspectives in Jazz), Music 342 (Topic 5).

Topic 6: Musics of East and Southeast Asia. Same as Asian Studies 361 (Topic 15: Musics of East and Southeast Asia). Asian Studies

361 (Topic 15) and Music 342 (Topic 6) may not both be counted. Additional prerequisite: Upper-division standing.

Topic 7: Introduction to the Music of the Middle East. Same as Jewish Studies 363 (Topic 21). Only one of the following may be counted: Islamic Studies 373 (Topic: Introduction to Music of the Middle East), Jewish Studies 363 (Topic: Introduction to Music of the Middle East), 363 (Topic 21), Middle Eastern Languages and Cultures 321 (Topic: Introduction to Music of the Middle East), Middle Eastern Studies 328 (Topic: Introduction to Music of the Middle East), 342 (Topic: Introduction to Music of the Middle East), Music 342 (Topic: Introduction to Music of the Middle East), 342 (Topic 7).

MUS 343J. History of Jazz.

Survey of the history of jazz from its origins to the present. Three lecture hours a week for one semester. Prerequisite: Upper-division standing in music or consent of instructor.

MUS 350S. Creating Music and Sound for Film, Video and Games.

Priority given to music composition majors. Designed to introduce students to concepts of music and sound for a variety of media with a primary focus on creating original music and/or soundtracks. Subjects include music structures, production and editing, film and video synchronization, game audio, and other sound for film related topics. Three lecture hours a week for one semester. Prerequisite: Music 319D with a grade of at least C, and consent of instructor.

MUS 354. Musical Development of Children.

The processes of musical development in young children. Topics include music in multicultural contexts, music in the cognitive and social development of young children, and special issues concerning music and exceptional children. Three lecture hours a week for one semester. Prerequisite: Upper-division standing or consent of instructor.

MUS 354C. Children's Music Literature and Performance I.

Literature, materials, and music performance activities appropriate for young children. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Music 605 or 313, upper-division standing in music studies, or consent of instructor.

MUS 354D. Children's Music Literature and Performance II.

Continuation of Music 354C. Three lecture hours a week for one semester. Prerequisite: Music 354C or consent of instructor.

MUS 354F. Music Performance, Listening, and Appreciation.

Techniques and materials for the development of skill in composition, arranging, performance, and aural discrimination; problems related to the adolescent voice. Three lecture hours and one laboratory hour a week for one semester.

MUS 155C. Techniques of Percussion Performance.

Percussion performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures. Two laboratory hours a week for one semester. Prerequisite: Upper-division standing in music studies.

MUS 255D. Techniques of String Performance.

String instrument performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures. Two lecture hours a week for one semester. Prerequisite: Upper-division standing in music studies.

MUS 255E. Techniques of Brass Performance.

Brass instrument performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures. Two

lecture hours a week for one semester. Prerequisite: Upper-division standing in music studies.

MUS 255F. Techniques of Woodwind Performance.

Woodwind instrument performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures. Two lecture hours a week for one semester. Prerequisite: Upper-division standing in music studies.

MUS 255M. Marching Band Techniques.

Literature, materials, and techniques of the marching band. Two lecture hours and one laboratory hour a week for one semester. Prerequisite: Upper-division standing in music studies.

MUS 255V. Techniques of Vocal Performance.

Technique of individual and ensemble singing practiced through the study of vocal literature. Two lecture hours a week for one semester. Prerequisite: Upper-division standing in music studies.

MUS 356G. Choral Ensemble Literature and Performance.

Choral music literature; rehearsal and performance techniques for choirs and small ensembles. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Upper-division standing in music studies or consent of instructor.

MUS 356J. Instrumental Ensemble Literature and Performance.

Study of the literature and of performance and rehearsal techniques for heterogeneous instrumental ensembles. Three lecture hours and one laboratory hour a week for one semester. Prerequisite: Upper-division standing in music studies and Music 210K.

MUS 159J. Harp Repertoire.

Study and performance of the harp repertoire. One laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Consent of instructor.

MUS 259L. Vocal Repertoire Coaching.

Two lecture hours and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Consent of instructor.

MUS 259N. Chamber Music: Strings and Piano.

The equivalent of two lecture hours and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Music 411, 612, and consent of instructor.

MUS 259P. Chamber Music: Winds and Percussion.

The equivalent of two lecture hours and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Music 411, 612, and consent of instructor.

MUS 259T. Topics in Instrumental Technology.

Two lecture hours and one laboratory hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

MUS 160C. Senior Composition Recital.

Open only to music composition majors. Preparation and performance of a thirty-minute public recital of the student's original compositions. Individual instruction.

MUS 460J. Senior Jazz Recital.

Open only to jazz performance majors. Preparation and performance of a one-hour public recital in the major jazz instrument. Individual instruction. Prerequisite: Music 420J and approval of the jazz faculty.

MUS 260M. Pedagogy.

An intensive study of repertoire and methods, designed for students planning to specialize in teaching. May be repeated for credit when the topics vary.

Topic 1: Woodwind Instruments. The equivalent of two laboratory hours a week for one semester. Prerequisite: Two semesters of instrument course 260 and approval of the faculty in one of the woodwind instruments.

Topic 2: Brass Instruments. The equivalent of two laboratory hours a week for one semester. Prerequisite: Two semesters of instrument course 260 and approval of the faculty in one of the brass instruments.

Topic 3: Piano. Offered in the summer session only, in conjunction with the High School Piano Performance Workshop; meets four hours a day for two weeks. May not be substituted for Music 460PA or 460PB. May be repeated for credit. Prerequisite: Piano 412 or consent of instructor.

Topic 4: Strings. The equivalent of two laboratory hours a week for one semester. Prerequisite: Two semesters of instrument course 260 and approval of the faculty in one of the string instruments.

Topic 5: Group Piano. The development of skills in teaching group piano. Examination of methods and materials used in keyboard instruction and for improvisation, sight-reading, and score reading. Two lecture hours and one laboratory hour a week for one semester. Prerequisite: Upper-division standing in music and consent of instructor.

MUS 460P. Pedagogy.

Designed primarily for students planning teaching careers. This course is offered in harp, piano, strings, woodwinds, brass, percussion, and voice. Methods of individual and class instruction through the use of music literature and the teaching repertoire. Practice teaching and laboratory for diagnostic and corrective methods are required. Two lecture hours a week for two semesters. Upon recommendation of the faculty, Music 460P and two semesters of instrument course 260 and approval of the faculty in the student's instrument may be substituted for instrument course 462 and Music 460R. Prerequisite: For 460PA, instrument course 462 and approval of the faculty, and consent of instructor; for 460PB, Music 460PA.

MUS 460R. Senior Recital.

Open only to music performance majors. Preparation and performance of a one-hour public recital in the major instrument. Individual instruction. Prerequisite: For performance majors approved to pursue a pedagogy emphasis, approval of the faculty; for other performance majors, Music 420R and approval of the faculty.

MUS 262. Intermediate Instrumental Conducting.

Problems and interpretation of larger band and orchestral works; analytical study of musical form as it relates to conducting; a synthesis of musical understanding and expansion of comprehensive musicianship through conducting problems. Two class hours and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Music 222K or consent of instructor.

Topic 1: Band. May be repeated for credit.

Topic 2: Orchestra. May be repeated for credit.

MUS 164L, 364L. Advanced Ear Training.

Further development of techniques taught in Music 411, with emphasis on aural recognition of larger musical forms and of music of contemporary style. For each semester hour of credit earned, one lecture hour a week for one semester. Prerequisite: Upper-division standing in music and Music 411 and 612.

MUS 366P. Senior Piano Pedagogy Project.

Open only to senior piano performance majors pursuing the pedagogy option. Students complete a research paper on a piano pedagogy topic, such as methodology, skills development, or repertoire. Individual instruction. Prerequisite: Upper-division standing and Music 460P with a grade of at least B.

MUS 368L. Review of Music Theory.

An intensive review of the skills and concepts required for the study of music theory at the graduate level. Three lecture hours a week for one semester. May not be counted toward a graduate degree. Prerequisite: Upper-division or graduate standing in music.

MUS 375J. Twentieth-Century Music Techniques.

Restricted to music majors. Review of techniques and methods for analyzing twentieth-century music. Three lecture hours a week for one semester. Music 375J and Music 376J (Topic 1) may not both be counted. Offered on the letter-grade basis only.

MUS 176C, 276C, 376C. Special Topics in Music Performance.

For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

MUS 376G. Special Topics in Music Literature.

Three class hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

Topic 1: Historical Survey of Russian Music. Same as Comparative Literature 323 (Topic 7), Humanities 350 (Topic 9), Russian, East European, and Eurasian Studies 325 (Topic 20), and Russian 330 (Topic 3). Focus on the role of Russian music in its social and historical context. Only one of the following may be counted: Comparative Literature 323 (Topic: Historical Survey of Russian Music), 323 (Topic 7), Humanities 350 (Topic: Historical Survey of Russian Music), 350 (Topic 9), Music 376G (Topic: Historical Survey of Russian Music), 376G (Topic 1), Russian, East European, and Eurasian Studies 325 (Topic: Historical Survey of Russian Music), 325 (Topic 20), Russian 330 (Topic: Historical Survey of Russian Music), 330 (Topic 3). Prerequisite: For music majors, upper-division standing and consent of instructor; for others, upper-division standing.

MUS 376J. Special Topics in Music Theory.

Three class hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

Topic 2: Performance, Analysis, and Interpretation. Restricted to music majors. Undergraduate music theory seminar applying theoretical and historical insights to performance and interpretation. Three lecture hours a week for one semester. Music 376J (Topic 2) and Music 379K (Topic: Performance and Analysis) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Upper-division standing or consent of instructor.

MUS 176M. Special Topics in Music Studies.

One class hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

MUS 677P. Internship and Final Project.

Restricted to seniors. Practical experience in the music and recording industry related to the student's area of interest within the music business, recording technology, or electronic media. Comprehensive final project addresses entrepreneurship, as well as technical and business elements of the music and recording industry. Forty hours a week for one semester. Prerequisite: Completion of the program requirements for enrollment in an internship course and consent of the program director.

MUS 178C, 278C, 378C. Independent Study: Music Performance.

Individual projects to be completed under faculty supervision. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor and the director of the school.

MUS 178G, 278G, 378G. Independent Study: Music Literature.

Individual projects to be completed under faculty supervision. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor and the director of the school.

MUS 178J, 278J, 378J. Independent Study: Music Theory.

Individual projects to be completed under faculty supervision. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor and the director of the school.

MUS 178M, 278M, 378M. Independent Study: Music Studies.

Individual projects to be completed under faculty supervision. For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor and the director of the school.

MUS 379K. Advanced Topics in Music Literature.

Three lecture hours a week for one semester. Two or more topics may be taken concurrently. May be repeated for credit when the topics vary. Prerequisite: Music 612 and 313N, or upper-division standing and consent of instructor.

Topic 1: Topics in Keyboard Literature.

Topic 2: Piano Literature, Eighteenth Century to the Present.

Topic 5: Topics in Instrumental Chamber Music.

Topic 6: Topics in Symphonic Tradition.

Topic 7: Topics in Instrumental Concerto.

Topic 8: Topics in the Art Song.

Topic 9: Topics in Opera and Music Drama.

Topic 10: Topics in Mass and Motet.

Topic 11: Topics in Choral Music.

Topic 12: Topics in Cantata and Oratorio.

Topic 13: Topics in Modern Music.

Topic 14: Special Topics in the Western Musical Tradition.

Topic 17: Topics in Instrumental Wind Music.

Music Business: MBU

Lower-Division Courses

Upper-Division Courses

MBU 339M. Introduction to the Music Business and Entrepreneurship.

An overview of the dynamics and business challenges of the contemporary music performance world, with an emphasis on the study of the rapidly changing musical culture and an increasingly competitive and diversified marketplace. Guest lecturers include professional conductors, directors of large performance venues, classical and pop music performers, music critics, songwriters, music publishers, entertainment law attorneys, and record producers. Three lecture hours a week for one semester. Only one of the following may be counted: Music 339M, 376C (Topic: Business of Music), Music Business 339M. Prerequisite: Upper-division standing.

MBU 339N. Music Entrepreneurship.

Further exploration of the dynamics and business challenges of the contemporary music performance world, with emphasis on entrepreneurial savvy, communication skills, fluency with emerging technologies, commitment to audience education, public advocacy for music, and the future health and growth of musical culture. Three lecture hours a week for one semester. Music 339N and Music Business 339N may not both be counted. Prerequisite: Upper-division standing and Music 339M or Music Business 339M.

MBU 347M. Music Copyright and Publishing.

Recording, music publishing, and personal management agreements and how they affect the artist and writer. Includes negotiation considerations, deal points, record company economics and profitability, intellectual property rights, publishing and the control and exploitation of publishing rights in music property, publishing activities, performing rights organizations, catalog sales and acquisitions, publisher and songwriter relations, and royalty accounting. Three lecture hours a week for one semester. Music 347M and Music Business 347M may not both be counted. Prerequisite: Upper-division standing, and credit or registration for Music 339M or Music Business 339M.

MBU 347N. Topics in the Business of Music and the Arts.

Three lecture hours a week for one semester. Music 347N and Music Business 347N may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, and Music 339M or Music Business 339M.

MBU 377P. Internship and Final Project.

Restricted to seniors in the music business concentration. Practical experience in the music industry related to the student's area of interest within the music business. Comprehensive final project addresses entrepreneurship, as well as business elements of the music industry. Forty hours a week for one semester. Only one of the following may be counted: Music 677P, Music Business 377P, Music Recording Technology 377P. Prerequisite: Completion of the program requirements for enrollment in an internship course and consent of the program director.

Music Recording Technology: MRT

Lower-Division Courses

MRT 316M. Introduction to Audio Recording.

Fundamentals of modern multitrack audio recording, including analog and digital recording, microphones and microphone techniques, basic mixing and signal processing, technology, and terminology. Three lecture hours and three laboratory hours a week for one semester. Music 316M

and Music Recording Technology 316M may not both be counted. Prerequisite: Consent of instructor.

MRT 316N. Intermediate Audio Recording.

Intermediate techniques of modern multitrack audio recording, including stereo and remote location recording, intermediate microphone techniques, signal processing and automated mixing, and modern production techniques. Three lecture hours and three laboratory hours a week for one semester, with additional laboratory hours as required. Music 316N and Music Recording Technology 316N may not both be counted. Prerequisite: Music 316M or Music Recording Technology 316M, or consent of instructor.

Upper-Division Courses

MRT 335M. Fundamentals of Digital Audio Workstations.

An overview of the history and theory behind digital audio and digital audio recording, including stand-alone and computer-based digital audio workstations. Three lecture hours a week for one semester. Music 335M and Music Recording Technology 335M may not both be counted. Prerequisite: Music 316N or Music Recording Technology 316N, or consent of instructor.

MRT 335N. Advanced Digital Audio Workstations.

Includes advanced editing, MIDI control surfaces, use of Beat Detective application, surround and synchronization, advanced mixing, plug-ins, third-party digital audio workstation add-ons, soft synthesizers and samplers, and digital mastering techniques and practices. Three lecture hours a week for one semester. Music 335N and Music Recording Technology 335N may not both be counted. Prerequisite: Music 335M or Music Recording Technology 335M, or consent of instructor.

MRT 336C. Computer Audio Production.

Desktop music production, including the history of computer music, MIDI and specialized digital audio for multimedia production, loop-based music, contemporary production styles, and music production environments. Three lecture hours a week for one semester. Music 336C and Music Recording Technology 336C may not both be counted. Prerequisite: Music 335N or Music Recording Technology 335N, or consent of instructor.

MRT 345. Advanced Audio Recording.

Contemporary audio recording and production styles. Advanced techniques for specific recordings and musical styles, including ensemble recording in a multitrack environment. Three lecture hours and three laboratory hours a week for one semester, with additional laboratory hours as required. Music 345 and Music Recording Technology 345 may not both be counted. Prerequisite: Music 336C or Music Recording Technology 336C, or consent of instructor.

MRT 377P. Internship and Final Project.

Restricted to seniors in the music recording technology concentration. Practical experience in the music recording industry related to the student's area of interest within recording technology or electronic media. Comprehensive final project addresses entrepreneurship, as well as technical elements of the music recording industry. Forty hours a week for one semester. Only one of the following may be counted: Music 677P, Music Business 377P, Music Recording Technology 377P. Prerequisite: Completion of the program requirements for enrollment in an internship course and consent of the program director.

Performance: PRF

Lower-Division Courses

PRF 201. Lower-Division Music Performance: Secondary.

Individual instruction in music performance for nonmusic majors and for music majors studying a secondary instrument. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, recorder, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice. Individual instruction. May be repeated for credit. Prerequisite: The ability to read music, and, for most instruments, an audition. For Guitar 201, at least two years of classical guitar lessons. For Piano 201, at least one year of piano lessons.

PRF 202. Lower-Division Piano: Secondary.

Individual instruction beyond Music 210K. May be repeated for credit when the topics vary. Prerequisite: Consent by audition.

PRF 210. Lower-Division Music Performance: Principal.

Individual instruction in the principal instrument for students pursuing the Bachelor of Arts in Music or the Bachelor of Music with a major in music studies, music theory, composition, music literature, or music performance. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice. Individual instruction. May be repeated for credit. Prerequisite: For Organ 210, Piano 201 or the equivalent.

PRF 212, 312. Lower-Division Music Performance: Major.

Individual instruction in music performance for students majoring in music performance or music performance pedagogy. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, and violoncello. Individual instruction. May be repeated for credit.

PRF 212J, 312J, 412J. Lower-Division Music Performance: Improvisation.

Individual instruction in improvisation for students majoring in jazz composition or jazz performance. This course is offered in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, trumpet, and vibraphone. Individual instruction. May be repeated for credit.

Upper-Division Courses

PRF 251. Upper-Division Music Performance: Secondary.

Individual instruction in music performance for nonmusic majors and for music majors studying a secondary instrument. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, recorder, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice. Individual instruction. May be repeated for credit. Prerequisite: Course 201 in the secondary instrument for four semesters, or the equivalent, and approval of the area faculty.

PRF 260. Upper-Division Music Performance: Principal.

Individual instruction in the principal instrument for students pursuing the Bachelor of Arts in Music or the Bachelor of Music with a major in music studies, music theory, composition, music literature, or music performance. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice. Individual instruction. May be repeated for credit. Prerequisite: Course 210 in the principal

instrument for four semesters, or the equivalent, and approval of the music faculty.

PRF 262, 362. Upper-Division Music Performance: Major.

Individual instruction in music performance for students majoring in music performance. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice. Individual instruction. May be repeated for credit. Prerequisite: For Voice 462, Voice 210 for four semesters, or the equivalent, and approval of the music faculty; for other instruments, course 412 in the major instrument for four semesters, or the equivalent, and approval of the music faculty.

PRF 262J, 362J. Upper-Division Music Performance: Improvisation.

Individual instruction in improvisation for students majoring in jazz composition and jazz performance. This course is offered in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, trumpet, and vibraphone. Individual instruction. May be repeated for credit. Prerequisite: For jazz composition majors, course 212J for two semesters, or the equivalent, and approval of the appropriate music faculty; for jazz performance majors, course 412J for two semesters, or the equivalent, and approval of the appropriate music faculty.

Department of Theatre and Dance

Registration with a member of the department faculty is required of students planning to major in the Department of Theatre and Dance and of those enrolling in courses that require faculty permission.

All students majoring in the department are required to act in productions or to serve on technical crews as scheduled by the faculty of the department.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

Theatre and Dance: T D

Lower-Division Courses

T D 301 (TCCN: DRAM 1310). Introduction to Theatre.

Open to all University students except majors in the Department of Theatre and Dance. A study of theatrical texts and practices of the past and present. Three lecture hours a week for one semester; attendance at all major productions of the department is required.

T D 102T, 202T, 302T. Topics in Dance Technique.

Fundamental study of principles and vocabulary of dance. One, two, or three lecture hours a week for one semester. May not be counted toward the Bachelor of Fine Arts degree with a major in dance. May be repeated for credit when the topics vary.

Topic 1: Ballet I. A study of the elements of classical ballet through exploration of movement principles as defined by traditional ballet technique. Only one of the following may be counted: Theater and Dance 302T (Topic: Ballet I), 302T (Topic: Topics in Dance: Ballet I-Nonmajors), 302T (Topic 1).

Topic 2: Ballet II. A continuation of the study of the elements of classical ballet through exploration of movement principles as defined by traditional ballet technique. Only one of the following may be counted: Theater and Dance 302T (Topic: Ballet II), 302T (Topic: Topics in Dance: Ballet II-Nonmajors), 302T (Topic 2).

Topic 3: Modern I. A study of the multiple aspects of modern dance technique including Humphrey-Limon, Release Technique, Laban Movement Analysis, and Bartenieff Fundamentals. Only one of the following may be counted: Theater and Dance 302T (Topic: Modern I), 302T (Topic: Topics in Dance: Modern-Nonmajors), 302T (Topic 3).

Topic 4: Modern II. A continuation of the study of the multiple aspects of modern dance technique as developed in Modern I. Theatre and Dance 102T (Topic 4), 202T (Topic 4), 302T (Topic 4) and 112T (Topic: Modern Dance II), 212T (Topic: Modern Dance II), 312T (Topic: Modern Dance II), may not both be counted.

Topic 5: Jazz I. An introduction to four styles of twentieth and twenty-first century jazz dance through exploration of the fundamental principles of movement with a parallel study of the historical development of the jazz dance aesthetic. Theatre and Dance 102T (Topic: Jazz I), 202T (Topic: Jazz I), 302T (Topic: Jazz I), and 102T (Topic 5), 202T (Topic 5), 302T (Topic 5) may not both be counted.

Topic 6: Jazz II. A continuation of the study of jazz dance as developed in Jazz I.

Topic 7: Afro-Contemporary Dance. The study of contemporary dance informed by African aesthetics and vernacular movement found throughout the African diaspora. Theatre and Dance 302T (Topic: Afro-Contemporary Dance Techn) and 302T (Topic 7) may not both be counted.

Topic 8: Improvisational Dance. The study and practice of improvisational dance. Theatre and Dance 302T (Topic: Improvisational Dance) and 302T (Topic 8) may not both be counted.

Topic 9: Yoga for Dance. The study of yoga as it pertains to movement in dance. Theatre and Dance 302T (Topic: Yoga for Dance) and 302T (Topic 9) may not both be counted.

Topic 10: Yoga: Moving into Stillness. A study of yoga in order to develop the ability to coordinate movement and breathing in dance.

T D 303. Fundamentals of Acting.

Not open to theatre and dance majors. Basic principles of acting and practical work in scenes from plays. Three lecture hours a week for one semester. Theatre and Dance 303 and 313C may not both be counted.

T D 303C (TCCN: DRAM 2336). Training the Speaking Voice.

Restricted to non-theatre and dance majors. Exercising the fundamental principles of vocal production and speech. Three lecture hours a week for one semester.

T D 303V. Acting for Voice Performance Majors I.

Fundamental inquiry into the acting process. Three lecture hours a week for one semester. Prerequisite: A major in voice performance in the Butler School of Music.

T D 303W. Acting for Voice Performance Majors II.

Techniques for playing and shaping action within scene structures. Three lecture hours a week for one semester. Prerequisite: Theatre and Dance 303V.

T D 306. Introduction to Improvisational Drama.

General introduction to improvisational activities with application to the theatre. Three lecture hours a week for one semester.

T D 109C. Musical Theatre Performing Ensemble.

Restricted to Department of Theatre and Dance majors. Rehearsing and performing solo and group numbers from musical theatre and other genres in cabaret-style entertainment and musical revues for on- and off-campus events. Three laboratory hours a week for one semester, with additional laboratory hours to be arranged. Theatre and Dance 109C and 113P, 213P, 313P may not both be counted. May be repeated for credit. Prerequisite: Consent of Instructor.

T D 109D. Studio Voice I.

Restricted to Department of Theatre and Dance majors. Establishes foundational vocal technique for musical theatre singing. Develops successful vocal practice strategies and effective, healthy technique through the study of a comprehensive range of musical theatre styles including musical comedy, Golden Age musical drama, and concept and rock musicals. One laboratory hour a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit. Prerequisite: Consent of Instructor.

T D 109E. Studio Voice II.

Restricted to Department of Theatre and Dance majors. Continuation of Theatre and Dance 109D. Focus on vocal range, flexibility, and endurance. Text analysis through the study of music and lyrics, using these components as the basis of character development. One laboratory hour a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit. Prerequisite: Two semesters of Theatre and Dance 109D and consent of instructor.

T D 311. Languages of the Stage.

Introduction to the ways that performance communicates meaning, as a foundation for further study in theatre and dance. Three lecture hours a week for one semester. Prerequisite: A major in the Department of Theatre and Dance or consent of instructor.

T D 111T, 211T, 311T. Introductory Topics in Theatre and Dance.

Introductory topics in theatre and dance, including basic research methods, contemporary and local performance, the role of the artist in society, the philosophy of a fine arts education, and the exploration of campus resources. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. May be repeated for credit when the topics vary.

T D 112. Freshman Movement and Physical Conditioning.

Restricted to Department of Theatre and Dance majors. Principles and techniques of physical conditioning. One lecture hour and one laboratory hour a week for one semester. May be repeated for credit. Prerequisite: Consent of the dance faculty.

T D 312C (TCCN: DANC 1345, DANC 1346). Contemporary Dance Technique.

Intensive study of principles, technique, and vocabulary of contemporary dance. Six laboratory hours a week for one semester. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 312D (TCCN: DANC 2345, DANC 2346). Intermediate Contemporary Dance Technique.

Intensive study of intermediate-level theory, technique, and vocabulary of contemporary dance. Six laboratory hours a week for one semester. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 312F (TCCN: DANC 1341, DANC 1342). Ballet Technique.

Intensive study of principles, technique, and vocabulary of ballet. Six laboratory hours a week for one semester. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 312G (TCCN: DANC 2341, DANC 2342). Intermediate Ballet Technique.

Study of intermediate-level theory, technique, and vocabulary of ballet as a supporting style. Six laboratory hours a week for one semester. May be

repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 312M. Movement Improvisation.

Exploration and study of elements of movement design. Three hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance.

T D 312N. Movement Composition.

Continuation of Theatre and Dance 312M. Three hours a week for one semester, with additional laboratory hours as required. Prerequisite: Theatre and Dance 312M or consent of instructor.

T D 112P, 212P, 312P. Fundamental Projects in Dance Performance and Repertory.

Preparation and performance laboratory related to production. At least six laboratory hours a week for one semester; additional laboratory hours may be required for rehearsals and performances. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 112T, 212T, 312T. Topics in Dance Technique.

For each semester hour of credit earned, at least one lecture hour a week for one semester, and additional laboratory hours as required. May be repeated for credit when the topics vary. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 313C (TCCN: DRAM 1351). Acting I.

Restricted to Department of Theatre and Dance majors. Approaches to incorporating Stanislavski-based principles in acting, including dramatic action, given circumstances, subtext, sense memory, the magic if, and tempo/rhythm. Three lecture hours a week for one semester, with additional hours to be arranged.

T D 313D (TCCN: DRAM 1352). Acting II.

Restricted to Department of Theatre and Dance majors. Continuation of Acting I. Application of Stanislavski-based principles to scene work selected from realistic genres. Three lecture hours a week for one semester, with additional hours to be arranged. Prerequisite: Theatre and Dance 313C.

T D 313E (TCCN: DRAM 2351). Acting III.

Restricted to Department of Theatre and Dance majors. Continuation of Acting II, with greater emphasis on personalization of character needs, given circumstances, actor-to-actor communication, and emotional life. Three lecture hours a week for one semester, with additional hours to be arranged. Prerequisite: Theatre and Dance 313D.

T D 313F. Voice and Movement I.

Understanding the relationship between voice and body in acting, with a focus on freeing tension, releasing vocal power, and enabling physical expression. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: A major in acting or consent of instructor.

T D 313G. Voice and Movement II.

Continuation of Voice and Movement I. Deeper understanding of the vocal-physical connection as a means of playing dramatic action. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Theatre and Dance 313F.

T D 313K. Voice Laboratory I.

Advanced voice and speech work in breath, support, placement, focus, range, resonance, articulation and endurance. Emphasis placed on

personalization of language and text from selected plays. Three laboratory hours a week for one semester, with additional hours to be arranged.

Prerequisite: Theatre and Dance 313G or consent of instructor.

T D 313L. Voice Laboratory II.

Continuation of Voice Laboratory I. Advanced voice and speech work connected to personalization and truth in classical and heightened text. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Theatre and Dance 313K.

T D 313M. Movement Laboratory I.

Using the body as an instrument for playing action and bringing the actor to a deeper understanding of physical stage presence. Three laboratory hours a week for one semester, with additional hours to be arranged.

Prerequisite: Theatre and Dance 313G or consent of instructor.

T D 313N. Movement Laboratory II.

Continuation of Movement Laboratory I. The practice of physical theatre disciplines as a means of deepening the actor's understanding of character and behavior. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Theatre and Dance 313M.

T D 113P, 213P, 313P. Projects in Acting and Directing.

Preparation and performance laboratory related to production. For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Consent of the acting/directing faculty.

T D 314C (TCCN: DRAM 1330). Design for Performance.

Introduction to the techniques, practices, and processes in costume, lighting, scenic, and sound design. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: A major in the Department of Theatre and Dance.

T D 314M (TCCN: DRAM 2331). Technical Theatre.

Introduction to the techniques, practices, and processes in technical theatre. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: A major in the Department of Theatre and Dance.

T D 314P (TCCN: DRAM 1320). Production Laboratory.

Three hours a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance; and Theatre and Dance 314M, except for dance majors in the BFA degree program.

T D 315. Playwriting I.

The study and practice of writing plays. Three lecture hours a week for one semester.

T D 317C (TCCN: DRAM 2361). Theatre History through the Eighteenth Century.

Three lecture hours a week for one semester. Prerequisite: For theatre and dance majors, Theatre and Dance 311; for others, none.

T D 317D (TCCN: DRAM 2362). Theatre History since the Eighteenth Century.

Three lecture hours a week for one semester. Prerequisite: For theatre and dance majors, Theatre and Dance 311; for others, none.

T D 317M. Dance History I.

An exploration of world dance as an expression of cultural identity and change. Three lecture hours a week for one semester. Prerequisite: Theatre and Dance 311.

T D 317N. Dance History II.

Continuation of Theatre and Dance 317M. Three lecture hours a week for one semester. Prerequisite: Theatre and Dance 317M.

T D 119Q, 219Q, 319Q, 419Q, 519Q, 619Q, 719Q, 819Q, 919Q. Topics in Theatre and Dance.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Theatre and Dance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

T D 121P, 221P, 321P. Festival Project and Production.

Students initiate, develop, and/or participate in an approved departmental major festival project or production under the supervision of a faculty member. For each semester hour of credit earned, at least one lecture hour a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit. Prerequisite: Consent of instructor.

T D 322. Dance Pedagogy.

Techniques and materials used in the teaching of dance. Two lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Upper-division standing and consent of instructor.

T D 322C. Contemporary Dance Technique.

Intensive study of principles, technique, and vocabulary of contemporary dance. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Fine Arts degree with a major in dance. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 322D. Intermediate Contemporary Dance Technique.

Intensive study of intermediate-level theory, technique, and vocabulary of contemporary dance. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Fine Arts degree with a major in dance. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 322E. Advanced Contemporary Dance Technique.

Intensive study of advanced theory, technique, and style of contemporary dance. Six laboratory hours a week for one semester. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 322F. Ballet Technique.

Intensive study of principles, technique, and vocabulary of ballet. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Fine Arts degree with a major in dance. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 322G. Intermediate Ballet Technique.

Study of intermediate-level theory, technique, and vocabulary of ballet as a supporting style. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Fine Arts degree with a

major in dance. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 322J. Advanced Ballet Technique.

Study of advanced theory, technique, and vocabulary of ballet as a supporting style. Six laboratory hours a week for one semester. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 122P, 222P, 322P. Projects in Dance Performance and Repertory.

Preparation and performance laboratory related to production. At least six laboratory hours a week for one semester; additional laboratory hours may be required for rehearsals and performances. May be repeated for credit. Prerequisite: A major in the Department of Theatre and Dance and consent of the dance faculty.

T D 323C. Directing I.

Study and practice of the fundamentals of stage directing: composition, picturization, movement, gesture, and unit structure. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: Upper-division standing and a major in the Department of Theatre and Dance.

T D 323D. Directing II.

Dramatic and environmental analysis of full-length plays. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: Theatre and Dance 323C.

T D 323E. Directing III.

Theory and techniques of play directing, with practical applications in projects and scenes. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: Upper-division standing, Theatre and Dance 323D, and consent of instructor.

T D 323F. Acting Shakespeare.

Incorporating language as action by applying basic acting principles to the demand of Shakespearean text. Three laboratory hours a week for one semester, with additional hours to be arranged. Theatre and Dance 323F and 353T (Topic: Acting Shakespeare) may not both be counted. Prerequisite: Theatre and Dance 313E or consent of instructor.

T D 323G. Acting in Period Plays.

Exploration of classical and idiosyncratic texts to enable personal and artistic growth in actors. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Upper-division standing, and Theatre and Dance 323F or consent of instructor.

T D 123P, 223P, 323P. Advanced Projects in Acting and Directing.

For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Upper-division standing and consent of the acting/directing faculty.

T D 324. Design and Technology for Performance.

Exploration of aspects of design and technology in performance, including costume, lighting, scenery, and sound. Three lecture hours a week for one semester, with laboratory hours as required. May be repeated for credit. Prerequisite: Theatre and Dance 314C, 314M, and consent of instructor.

T D 124P, 224P, 324P. Advanced Production Laboratory.

For each semester hour of credit earned, one lecture hour a week for one semester, with additional laboratory hours to be arranged. May be

repeated for credit. Prerequisite: Theatre and Dance 314P; and a major in the Department of Theatre and Dance or consent of instructor.

T D 325. Playwriting II.

Emphasis on the form and writing of the full-length play or equivalent. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, Theatre and Dance 315, and consent of instructor.

T D 125P, 225P, 325P. Projects in Playwriting.

For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

T D 326. Dramatic Activities for the Classroom.

Theory, materials, and practice, including story dramatization, storytelling, puppets, pantomime, shadow plays, role-playing, and theatre games. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: Upper-division standing.

T D 326C. Theatre Studies: Creative Drama.

Theory and practice of creative drama for children, both as an art form and as a process for emphasizing creative expression and aesthetic growth. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: Upper-division standing and consent of instructor.

T D 326D. Theatre Studies: Theatre for Young Audiences.

Theory and practice of all phases of play production for young audiences. Three lecture hours a week for one semester, with laboratory hours as required. Prerequisite: Upper-division standing.

T D 326E, 626E. Theatre Studies: Directing the Young Performer.

Introduction to the theory and practice of directing and producing theatre with young performers, with emphasis on appropriate literature. Three lecture hours a week for one semester, with additional laboratory hours as required; this course includes field-based instruction in area high schools. Prerequisite: Upper-division standing, Theatre and Dance 323C, and consent of instructor.

T D 126P, 226P, 326P. Projects in Theatre Studies.

For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

T D 127P, 227P, 327P. Projects in History, Criticism, and Performance Studies.

For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

T D 329C. Musical Theatre Performance Workshop.

Restricted to Department of Theatre and Dance majors. Private coaching, master classes, and small and large group rehearsals, culminating in staged public performances of musical revues and/or chamber musicals. Three laboratory hours a week for one semester, with additional hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

T D 129D. Studio Voice III.

Restricted to Department of Theatre and Dance majors. Continuation of Theatre and Dance 109E. Emphasizes the synthesis of singing and acting skills. One laboratory hour a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit. Prerequisite:

Upper-division standing, two semesters of Theatre and Dance 109E, and consent of instructor.

T D 129E. Studio Voice IV.

Restricted to Department of Theatre and Dance majors. Continuation of Theatre and Dance 129D. Refines, expands, and strengthens the specialized performance skills required of a musical theatre performer, including studio recording techniques. One laboratory hour a week for one semester, with additional laboratory hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing and two semesters of Theatre and Dance 109D.

T D 129Q, 229Q, 329Q, 429Q, 529Q, 629Q, 729Q, 829Q, 929Q. Topics in Theatre and Dance.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Theatre and Dance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

T D 332M. Choreography.

Advanced study of the principles and practices of choreography. Three hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Prerequisite: Upper-division standing, Theatre and Dance 312N, and consent of instructor.

T D 332N. Choreography: Design for Dance and Movement Theatre.

Continuation of Theatre and Dance 332M. Three hours a week for one semester, with additional laboratory hours as required. May be repeated for credit. Prerequisite: Theatre and Dance 332M.

T D 232P, 332P. Advanced Projects in Dance Performance and Repertory I.

For 232P, at least six laboratory hours a week for one semester, with additional hours as required; for 332P, at least seven laboratory hours a week for one semester, with additional hours as required. May be repeated for credit. Prerequisite: Upper-division standing, Theatre and Dance 222P, a major in the Department of Theatre and Dance, and consent of the dance faculty.

T D 232Q, 332Q. Advanced Projects in Dance Performance and Repertory II.

For 232Q, at least six laboratory hours a week for one semester, with additional laboratory hours as required; for 332Q, at least seven laboratory hours a week for one semester, with additional hours as required. May be repeated for credit. Prerequisite: Upper-division standing, Theatre and Dance 232P or 332P, a major in the Department of Theatre and Dance, and consent of the dance faculty.

T D 332R. Dance Pedagogy Theory.

Principles, techniques, and materials used in the teaching of dance. Three lecture hours a week for one semester; with additional laboratory hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing, a major in the Department of Theatre and Dance, and consent of the dance faculty instructor.

T D 332S. Dance Pedagogy Practicum.

Practical application techniques and materials used in the teaching of dance. Four and one-half laboratory hours a week for one semester, with additional hours as required. May be repeated for credit. Prerequisite:

Upper-division standing, Theatre and Dance 332R, a major in the Department of Theatre and Dance, and consent of the dance faculty.

T D 351S. Seminar in Theatre and Dance.

Three lecture hours a week for one semester. Prerequisite: Completion of at least ninety semester hours of coursework, a major in the Department of Theatre and Dance, and consent of instructor.

T D 151T, 251T, 351T. Topics in Theatre and Dance.

For each semester hour of credit earned, the equivalent of one class hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

Topic 1: Creative Drama II. Advanced investigation of drama and drama-based instructional strategies. Observation, teaching and/or co-teaching in one or more practical contexts during the semester as a way to hone skills needed to successfully plan, implement, and evaluate drama-based lessons. Theatre and Dance 351T (Topic: Creative Drama II) and 351T (Topic 1) may not both be counted. Prerequisite: Theatre and Dance 326C.

T D 352. Experiential Anatomy.

Restricted to Department of Theatre and Dance majors. Principles and techniques of physical conditioning with practical applications to injury prevention for dance and theatre practitioners. Three laboratory hours a week for one semester, with additional hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing, Theatre and Dance 232P (or 332P), and consent of the dance faculty.

T D 152P, 252P, 352P. Projects in Dance Movement Studies.

For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

T D 152T, 252T, 352T. Topics in Dance and Movement.

For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

Topic 1: Musical Theatre Dance I. Explores original repertoire from a wide variety of musical theatre styles. For each semester hour of credit earned, one lecture hour a week for one semester, with additional hours to be arranged. Theatre and Dance 152T, 252T, 352T (Topic: Dance for Musical Theatre) and 152T, 252T, 352T (Topic 1) may not both be counted. Prerequisite: Upper-division standing.

Topic 2: Musical Theatre Dance II. Explores original musical theatre choreography from a variety of styles. Repertoire will require a higher level of skills. For each semester hour of credit earned, one lecture hour a week for one semester, with additional hours to be arranged. Theatre and Dance 152T, 252T, 352T (Topic: Dance for Musical Theatre II) and 152T, 252T, 352T (Topic 2) may not both be counted. Prerequisite: Upper-division standing, and Theatre and Dance 352T (Topic 1: Musical Theatre Dance I).

Topic 3: Broadway Jazz I. Refines and expands dance technique and skills essential to Broadway-style choreography. Original Broadway choreography requiring a high level of technique and character development. For each semester hour of credit earned, one lecture hour a week for one semester, with additional hours to be arranged. Theatre and Dance 152T, 252T, 352T (Topic: Broadway Jazz I) and 152T, 252T, 352T (Topic 3) may not both be counted. Prerequisite: Upper-division standing, and Theatre and Dance 152T, 252T, 352T (Topic 2: Musical Theatre Dance II).

Topic 4: Broadway Jazz II. Continues to refine and expand dance technique and skills essential to Broadway style choreography. Original Broadway choreography requiring a high level of technique and

character development. For each semester hour of credit earned, one lecture hour a week for one semester, with additional hours to be arranged. Theatre and Dance 152T, 252T, 352T (Topic: Broadway Jazz II) and 152T, 252T, 352T (Topic 4) may not both be counted. Prerequisite: Upper-division standing, and Theatre and Dance 352T (Topic 3: Broadway Jazz I).

T D 353C. Devised Work.

A survey of contemporary devising techniques. Work explores present-day parallels for making performance for both individual and collaborative practices. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Upper-division standing, and Theatre and Dance 323G or consent of instructor.

T D 353D. Acting for the Camera I.

Fundamentals of acting for the camera; adjusting from the stage to the demands of the camera. Six laboratory hours a week for one semester. Theatre and Dance 351T (Topic: Acting for the Camera) and 353D may not both be counted. Prerequisite: For Bachelor of Fine Arts in Acting majors, upper-division standing and Theatre and Dance 353C; for others, upper-division standing, and Theatre and Dance 313E with a grade of at least B- or consent of instructor.

T D 353E. Acting for the Camera II.

Advanced technique for the camera. Professional audition protocols and career preparation. Six laboratory hours a week for one semester. Theatre and Dance 351T (Topic: Acting for the Camera II) and 353E may not both be counted. Prerequisite: Upper-division standing and Theatre and Dance 353D.

T D 353K. Voice-Over and Narration.

Microphone technique and the use of the voice to create character in various media applications such as narration, video games, and commercial copy. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Upper-division standing; and Theatre and Dance 313L and 323F, or consent of instructor.

T D 353Q. Portfolio Preparation.

Restricted to Bachelor of Fine Arts in Acting majors. Selection and rehearsal of materials in preparation for professional acting interviews and auditions. Three laboratory hours a week for one semester, with additional hours to be arranged. Prerequisite: Upper-division standing.

T D 353R. Business of Acting.

Restricted to majors in the Department of Theatre and Dance. Survey of marketing oneself as an actor, the actor's relationship to agents and casting directors, and methods for initiating and maintaining a professional acting career. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

T D 353T. Topics in Acting and Directing.

Restricted to majors in the Department of Theatre and Dance. Topics in acting including voice/speech, movement, and directing. Three lecture hours a week for one semester, with additional hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, and Theatre and Dance 313E with a grade of at least B- or consent of the acting/directing faculty.

T D 154P, 254P, 354P. Projects in Design and Technology.

Individual projects in theatre design and technology. For each semester hour of credit earned, at least one hour a week for one semester and additional laboratory hours as required. May be repeated for credit. Prerequisite: Consent of instructor.

T D 354T. Topics in Design and Technology.

Three lecture hours a week for one semester, with laboratory hours as required. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

Topic 1: Costume and Makeup Crafts.

Topic 2: Fabric Painting and Dyeing. Fundamentals of textile surface design.

Topic 3: Mask Making. Fundamentals of mask theory, design, and construction for theatre and live performance.

Topic 4: Millinery. Fundamentals of hat design, fitting, and construction techniques.

Topic 5: Scenery Technology I.

Topic 6: Costume Rendering.

Topic 7: Drawing for Theatre Designers.

Topic 8: Painting.

Topic 9: Automated Lighting I. Fundamentals of automated and computer-aided lighting for theatre and live performance.

Topic 10: Costume Design Skills. Fundamentals of research, drawing, rendering, and script/character analysis and critique for costume design.

Topic 11: Lighting Design Skills. Fundamentals of research, paperwork communication, and technology for lighting designers.

Topic 12: Scenery Design Skills. Fundamentals of drawing, drafting, and model building for theatrical designers.

Topic 13: Stage Makeup. Designed to familiarize students with the tools and products used by professional makeup artists. Includes techniques for natural, character, and special effects makeup in theatre, opera, dance, film, and television.

Topic 14: Figure and Fabric Rendering. Principles of figure and fabric painting from life.

Topic 15: Scene Painting. Scene painting techniques for theatrical designers.

Topic 16: Automated Lighting II. Advanced automated and computer-aided lighting theory and techniques.

T D 355T. Topics in Playwriting.

Three lecture hours a week for one semester, with laboratory hours as required. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

T D 356T. Topics in Theatre Studies.

Topics in theatre studies, including creative drama, theatre for children and youth, and theatre with young adults. Three lecture hours a week for one semester, with laboratory hours as required. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

Topic 1: Puppetry.

T D 357T. Topics in History, Criticism, and Performance Studies.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

Topic 1: Latin American Theatre and Drama. Same as Latin American Studies 322 (Topic 13: Latin American Theatre and Drama).

T D 372, 672, 972. Industry Internship.

Restricted to majors in the Department of Theatre and Dance. Professional internship position in business and/or production. For every three semester hours of credit earned, at least ten internship hours a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing, a University grade point average of at least 2.50, and consent of instructor.

John A. and Katherine G. Jackson School of Geosciences

Sharon Mosher, PhD, *Dean*
Richard Ketcham, PhD, *Associate Dean, Academic Affairs*
<http://www.jsg.utexas.edu/>

General Information

Mission

As civilization enters an era of increasing challenge, it is imperative that leaders, professionals, and citizens be well educated, competently and realistically able to address issues of local to global scope. With regard to the origin, history, structure, and processes of the planet Earth, and the use and management of its resources, the John A. and Katherine G. Jackson School of Geosciences aims to provide such an education. The objective of every natural science, including geological sciences, is to understand the realm of physical nature. Geological sciences, or geosciences, is a synthetic subject that examines the Earth through such traditional subdisciplines as geophysics, hydrogeology, paleontology, petrology, stratigraphy, and structural geology. Geoscientists also draw upon discoveries from mathematics, geography, archaeology, engineering, and the other sciences to meld an approach that is interdisciplinary, yet uniquely geological.

The need for well-educated geoscientists in industry, government, and education promises a bright future for geoscience professionals in the coming decades. As the human population expands, it is essential to develop sufficient resources and to maintain a livable environment. Geoscientists understand the dynamics of the Earth and its systems—the occurrence of natural resources and the diverse time scales of natural and human-induced change.

Every university seeks to enrich the education of its student body generally. Study of geosciences enhances a liberal arts or arts and sciences education. Geosciences uses experiments and observations to explore origins and processes, whether of the Earth itself, of geologic phenomena, or of the history of life. It operates in the conventional three dimensions of space and in the fourth dimension of deep geologic time. Both in the laboratory and in the field, it examines the Earth on all scales, from atomic nuclei, to a hand sample of rock, to an entire landscape, to continents and oceans, to the planet as a whole.

Vision

The Jackson School of Geosciences (<http://www.jsg.utexas.edu>) at The University of Texas at Austin is among the most established and well-regarded geosciences programs in the world. The school includes the University's Department of Geological Sciences (<http://www.jsg.utexas.edu/dgs>), one of the country's oldest geological sciences departments, and two world-renowned research units, the Institute for Geophysics (<http://www.ig.utexas.edu>) and the Bureau of Economic Geology (<http://www.beg.utexas.edu>). The school is home to the world's largest academic geosciences community of alumni, research scientists, and faculty members as well as one of the largest combined graduate and undergraduate enrollments of any major geoscience program.

The Jackson School is both old and new. It traces its origins to the Department of Geology founded in 1888 but became a separate unit at the level of a college on September 1, 2005. The school's formation resulted from one of the most generous gifts in the history of higher

education when the late John A. and Katherine G. Jackson bequeathed endowments and assets toward "the subjects of geology; geophysics; energy, mineral and water resources; as well as the broad areas of the earth sciences, including the Earth's environment." The charge of their gift and the responsibilities that come with it are reflected in the school's vision:

To become the preeminent geosciences program in the country with international prominence in geology, geophysics, energy, mineral and water resources, and in the broad areas of the earth sciences, including the Earth's environment. To realize this vision, the Jackson School will pursue initiatives that:

- Place the school at the forefront of research.
- Place the school at the forefront of education, student services, and student opportunities.
- Create the fabric of a great college.
- Increase competitiveness for top talent.

Financial Assistance Available through the School

Through the Geology Foundation, the Jackson School of Geosciences (JSG) makes available to its students a number of scholarship funds established by individuals, foundations, and industrial or research organizations. Scholarships are awarded entirely on the basis of academic standing and performance. Each long semester (fall/spring) JSG geological sciences students' academic performance is evaluated along defined criteria including, but not limited to, grade point average, progress towards degree, and hours completed. New geological sciences students are eligible for consideration starting their second long semester as a Jackson School student. Award amounts range from \$750 to \$3,450 with the total award amounts increasing as students approach graduation and a 4.00 GPA. Funds are awarded after the start of the semester and can be used to pay for books, course supplies or any other academic expenses.

The Geology Foundation also offers an Undergraduate Recruitment Scholarship for freshmen geological sciences majors and an emergency loan program for Jackson School students. All students may also seek financial assistance through the University's Office of Student Financial Services. Additional information for all of the JSG Financial Assistance (<http://www.jsg.utexas.edu/education/undergraduate/financial-aid>) programs is available online or by contacting the JSG Student Services Office.

Student Services

The mission of the Jackson School of Geosciences Student Services Office is to facilitate students' development and advancement in the Jackson School community and beyond. Services provided to all Jackson School majors and nonmajors such as professional academic advising and career counseling are available to students year-round.

Academic Advising

The JSG Academic Advising office, located in the Holland Family Student Center, JGB 2.108, serves the undergraduate students of the Jackson School by offering academic advising and guidance. Each undergraduate student is expected to meet with a JSG academic adviser at least once per semester to review his/her academic progress and prepare to register for the next semester. Information related to JSG academic programs and opportunities is frequently distributed to students via email which is considered an official form of communication by the University. Students

are responsible for reading this information and taking the necessary actions in a timely manner. JSG Student Services staff is available to meet with students throughout the year to address any issues or questions they may have.

Counseling and Referral Services

The Jackson School of Geosciences Student Services office advises and counsels students about problems or concerns they have about their academic work or life in the school.

In addition, University counseling services are available from the Counseling and Mental Health Center (<http://cmhc.utexas.edu>), the Telephone Counseling Service, the Sanger Learning Center (<http://www.utexas.edu/ugs/slc>), and University Health Services (<http://healthyhorns.utexas.edu>). These offices are described in General Information.

Career Services

The Jackson School of Geosciences (JSG) Career Center (<http://www.jsg.utexas.edu/careers>), located in the Holland Family Student Center, JGB 2.112, serves the undergraduate and graduate students of the Jackson School by offering career development workshops, job search resources, and opportunities to network with alumni, recruiters and members of industry.

The JSG Career Center also helps Jackson School graduates and students about to graduate seek full-time or part-time jobs and internships. The staff posts job opportunities throughout the year and hosts company information sessions as well as on-campus interviews with recruiters each fall and spring. The Jackson School of Geosciences Career Fair, which brings students and employers together every fall, provides another forum for geosciences students to learn about different career opportunities.

Career services for students who plan to teach are provided by Education Career Services in the College of Education and by UTeach-Natural Sciences.

Admission and Registration

Admission

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. All students who wish to major in geological sciences must be admitted to the University according to the procedures given in *General Information*.

Students admitted to the University with deficiencies in high school units must remove the deficiencies as prescribed in *General Information*.

Admission to the Geological Sciences Program

Freshman Admission

Freshman applicants seeking admission to the Jackson School must meet the calculus readiness requirement by the official admissions application deadline. More information about the calculus readiness requirement is available through the University Admissions Office or online at Be A Longhorn (<http://bealonghorn.utexas.edu>).

Applicants to the Jackson School of Geosciences should use the ApplyTexas (<http://www.applytexas.org>) online application and select Geological Sciences, entry-level as a first-choice major. When selecting a second-choice major, freshman applicants may choose from one of the many other majors offered at the University. Those students interested

in applying to the environmental science or geosystems engineering and hydrogeology degree programs should refer to the information provided below.

External Transfer Admission

Students who wish to transfer to the University from another college or university must apply to the Office of Admissions as described in *General Information*. External transfer applicants seeking admission to the Jackson School of Geosciences (JSG) must demonstrate calculus readiness by the official admissions application deadline. Applicants with additional math and science credentials may receive priority consideration. Details regarding transfer calculus readiness are available through the University admissions office or online at Be A Longhorn (<http://bealonghorn.utexas.edu>). External transfer applicants to the Jackson School should use the ApplyTexas (<http://www.applytexas.org>) online application and select Geological Sciences, entry-level as a first-choice major.

Only courses listed in the student's geosciences degree program, or equivalent courses approved by the associate dean for academic affairs, may be counted toward a geosciences degree. A course may therefore be accepted for transfer credit but not be applicable toward a geosciences degree. Students are strongly encouraged to contact a JSG academic adviser to discuss existing coursework to be transferred and the specific requirements of JSG degree plans prior to applying for admission.

Internal Transfer Admission

A student may transfer to the Jackson School of Geosciences from another division of the University in accordance with the regulations given in *General Information*. A University student, whether a geosciences major or nonmajor, who wants to transfer to a geological sciences major in the Jackson School must meet the following minimum requirements to be eligible for consideration:

1. Completion of at least twenty-four semester hours of coursework in residence at the University. Credit by exam and correspondence, extension and transfer hours may not be counted toward this requirement.
2. A cumulative in residence grade point average (GPA) of at least 3.00.
3. Completion of Mathematics 408C and completion of, or enrollment in, 408D or the equivalent at the time of application.
4. Completion of, or enrollment in, Geological Sciences 401 or 303, and Chemistry 301 at the time of application.

Additional Information for all internal transfer applicants:

- Application Deadline: May 1st for the following fall semester.
- Only currently enrolled students may apply.
- Students may apply during the semester they are completing the minimum requirements to be eligible for consideration.
- Application forms are available on the Jackson School Undergraduate (<http://www.jsg.utexas.edu/education/undergraduate/internal-transfers>) Web site.
- Entry-level admission to all Jackson School majors is offered as space is available to the students who are best qualified. Decisions are based on the student's GPA in the basic sequence courses, cumulative GPA, and other factors including, but not limited to, difficulty of course load, course repetitions, proven mathematical ability, and interest in the field of geological science.

Additional information regarding admission to the Jackson School of Geosciences is available from the Student Services Office, 2305

Speedway, Stop C1160, Austin, TX 78712-1692. The JSG Student Center telephone number is (512) 232-4544.

Admission to the Environmental Science Program

All new freshmen and external transfer students are admitted to the University as entry-level environmental science majors and later seek admission to one of the three majors offered in the degree program by the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences. All students who wish to major in environmental sciences must be admitted to the University according to the procedures given in *General Information* (<http://catalog.utexas.edu/general-information/admission>).

Freshman Admission

Freshmen applicants seeking admission to the environmental science (EVS) degree program through the College of Liberal Arts, the College of Natural Sciences, or the Jackson School of Geosciences must meet the calculus readiness requirement by the official admissions application deadline. More information about the calculus readiness requirement is available through the University admissions office or online at Be A Longhorn (<http://bealonghorn.utexas.edu>).

Freshmen applicants to the EVS program from all three colleges/schools are reviewed and those admitted are as a single cohort. Applicants should use the ApplyTexas (<http://www.applytexas.org>) online application and select the Environmental Science, entry-level major option listed in the College of Liberal Arts (under Geographical Sciences), College of Natural Sciences (under Biological Sciences), or Jackson School of Geosciences (under Geological Sciences) as a first choice major, depending on the anticipated area of focus.

External Transfer Admission

Students who wish to transfer to the University from another college or university must apply to the Office of Admissions as described in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission/transfer-admission>). External transfer applicants seeking admission to the environmental science degree program through the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences must demonstrate calculus readiness by the official admissions application deadline. Details regarding transfer calculus readiness are available through the University Admissions Office or online at Be A Longhorn (<http://bealonghorn.utexas.edu>).

External transfer applicants to the EVS program from all three colleges/schools are reviewed and those admitted are as a single cohort. Applicants should use the ApplyTexas (<http://www.applytexas.org>) online application and select the Environmental Science, entry-level major option listed in the College of Liberal Arts (under Geographical Sciences), the College of Natural Sciences (under Biological Sciences), or the Jackson School of Geosciences (under Geological Sciences) as a first-choice major, depending on the anticipated area of focus.

Internal Transfer Admission

Internal transfer, entry-level applications submitted to the environmental science degree program through the College of Liberal Arts, the College of Natural Sciences, or the Jackson School of Geosciences are reviewed and those admitted are as a single cohort. All internal transfer applicants should use the online EVS Program Transfer Application (<http://www.esi.utexas.edu/EVS>).

To apply for the Bachelor of Science in Environmental Science Geological Sciences major in the Jackson School of Geosciences, the student must

be an entry-level environmental science major who has met the following requirements:

1. Completion of Biology 311C, Chemistry 301, and Mathematics 408C or 408N with a grade of at least C- in each course
2. Completion of Geological Sciences 401 or 303 with a grade of at least B-

To be competitive for admission, the student must have a grade point average of at least 2.75 in these four courses.

Applications are evaluated after the end of each fall. Students whose applications are denied may reapply through the supplemental admission process. Admission decisions are based on the student's grade point average in the basic sequence courses, his or her University grade point average, and other factors; these factors include, but are not limited to, the difficulty of the student's course load, course repetitions, and proven mathematical ability. Students should consult advisers in the Jackson School of Geosciences Undergraduate Student Services Office for information about the application process and application deadlines.

More information about the degree program is given in Bachelor of Science in Environmental Science (p. 270).

Admission to the Geosystems Engineering and Hydrogeology Program

The Bachelor of Science in Geosystems Engineering and Hydrogeology (GEH) is offered jointly by the Cockrell School of Engineering and the Jackson School of Geosciences. Students are simultaneously registered in both schools once accepted.

Freshmen Admission

Freshmen applicants seeking admission to the GEH degree program are admitted through the Jackson School of Geosciences. Applicants must meet the calculus readiness requirement by the official admissions application deadline. More information about calculus readiness is available through the University admissions office or online at Be A Longhorn (<http://bealonghorn.utexas.edu>).

Applicants to the GEH program should use the ApplyTexas (<http://www.applytexas.org>) online application and select *Geosystems Engineering and Hydrogeology* as a first-choice major. When selecting a second-choice major, freshman applicants may choose from one of the many other majors offered at the University.

External Transfer Admission

Students who wish to transfer to the University from another college or university must apply to the Office of Admissions as described in *General Information*. External transfer applicants are admitted through the Cockrell School of Engineering and should use the ApplyTexas (<http://www.applytexas.org>) online application and select *Geosystems Engineering and Hydrogeology* as a first-choice major. Requirements for admission as a transfer student vary, but all transfer applicants must submit transcripts of all college and high school coursework.

External transfer applicants will be required to meet the following minimum criteria to be considered for admission to the geosystems engineering and hydrogeology major:

- Completion of Mathematics 408L, 408M, or 408D
- Completion of Physics 303K and 103M
- Completion of a minimum of four technical courses. Technical courses include courses offered in mathematics, physics, chemistry, biology, geology, computer science, and engineering.

Admission applications that are not complete by the March 1st deadline may be held to a higher admissions standard than those that are complete, if enrollment limits are reached.

Internal Transfer Admissions

Students interested in transferring to the GEH program from another division of the University must apply through the Cockrell School of Engineering. Please refer to *General Information* as well as the Cockrell School of Engineering portion of the Undergraduate Catalog for minimum requirements, application deadlines, and other information regarding internal transfer admissions for the geosystems engineering and hydrogeology degree program.

Registration

General Information gives information about registration, adding and dropping courses, transferring from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published before registration each semester and summer session, contains registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the registrar's Web site, <http://registrar.utexas.edu/>.

Academic Policies and Procedures

Minimum Scholastic Requirements

The student must earn a cumulative grade point average of at least 2.00 in all courses taken at the University of Texas at Austin (including credit by examination, correspondence, and extension) for which a grade or symbol other than Q, W, X, or CR is recorded. In addition, the student must earn a grade point average (GPA) of at least 2.00 in geological sciences courses taken at the University and counted toward the major requirement.

The student must earn a grade of at least C- in each course used to fulfill any of the requirements for the degree.

For more information about grades and the grade point average, see *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

Repetition of a Course

A student may not enroll in any course in the Jackson School more than twice, even if the course is needed to meet degree requirements, without first obtaining written consent in the Undergraduate Student Services Office. The symbol Q or W counts as an enrollment unless it has been approved by the Undergraduate Student Services Office for nonacademic reasons.

Honors

University Honors

Each fall and spring semester, undergraduate who complete a full course load and earn outstanding grades, are recognized on the fall or spring University Honors list, respectively. Students are notified on the semester grade report of their inclusion on the list. The Jackson School hosts an event each spring to recognize JSG University Honors students in conjunction with University-wide Honors Day.

Additional information on University Honors is available in *General Information*.

School Honors Program

The Jackson School offers a departmental honors program to its majors. Students who wish to participate in the program should submit an application to the JSG Student Services Office when they have completed sixty semester hours of coursework, including at least twelve semester hours of upper-division coursework in geological sciences. The Jackson School of Geosciences Honors Program receives an increasing number of qualified applications each year and not all applicants are guaranteed acceptance.

Minimum requirements for the completion of this program are:

1. A cumulative University grade point average of at least 3.00, and a grade point average in geological sciences of at least 3.50
2. Geological Sciences 171H, 172H, and 173H with a grade of at least B- in each
3. Geological Sciences 379H, with a grade of at least B-
4. Completion at the University of at least sixty semester hours of coursework counted toward the degree

An honors student who completes all program requirements will receive the designation "Special Honors in Geological Sciences" on his or her transcript and be recognized at the Jackson School commencement ceremony.

Graduation

Special Requirements of the School

All students must fulfill the general requirements (p. 17) for graduation. Students in the Jackson School must also fulfill the following requirements:

1. The University requires that the student complete in residence at least sixty semester hours of the coursework counted toward the degree. For the Bachelor of Arts in Geological Sciences, these sixty hours must include at least eighteen hours in geological sciences.
2. The University requires that at least six semester hours of advanced coursework in the major be completed in residence. Options I, II, and III of the Bachelor of Science in Geological Sciences require at least eighteen hours of upper-division coursework in geological sciences to be completed in residence; option V requires at least twelve hours. (Option IV: Environmental Science and Sustainability is no longer offered.)
3. An Air Force, Army, or Naval Reserve Officer Training Corps (ROTC) student who elects the basic and/or advanced program in air force science, military science, or naval science will not be approved for graduation until the student's government contract is completed or the student is released from the ROTC.

Non-residence Coursework

A student in his or her final semester may not enroll concurrently at another institution in any course, including a distance education course, to be counted toward the degree. In the final semester, the student may also not enroll by extension or correspondence in coursework to be counted toward the degree. All transfer, extension, and correspondence coursework must be added to the student's official record before his or her last semester.

Degree Audit

Each student should view their personal electronic degree audit available each semester through IDA, the University's Interactive Degree Audit (<http://registrar.utexas.edu/students/degrees/ida>) system. The degree audit tells the student the courses he or she must take and the requirements he or she must fulfill to receive the degree. Although the degree audit normally provides an accurate statement of requirements, the student is responsible for knowing and meeting the requirements of the degree as stated in the undergraduate catalog under which he or she is eligible to graduate (see rules on graduation under a particular catalog (p. 18)). If in doubt about any requirement, the student should seek an official ruling in the Jackson School of Geosciences (JSG) Student Services Office before registering.

Ninety-hour Degree Audit

Upon earning ninety semester hours of credit toward the degree, each JSG student is expected to review their degree audit and schedule a ninety-hour degree audit meeting with a JSG academic adviser before the next semester's registration period begins. Failure to do so may delay the student's graduation.

Final Degree Audit

Prior to registering for the last semester of their Jackson School of Geosciences (JSG) degree program each JSG student must review their final degree audit and meet with a JSG academic adviser. Students must complete all procedures associated with the final degree audit.

Any student who does not graduate when eligible must promptly contact the JSG Student Services Office. An academic adviser will advise the student what steps are needed for future registration and graduation.

Applying for Graduation

Students must be registered at the University and must file a graduation application form in the JSG Student Services Office the first semester they are eligible to graduate. A student is considered eligible to graduate if he or she can complete all degree requirements by registering for twelve semester hours or fewer. Graduation applications should be submitted during the first week of classes. No graduation applications will be accepted after the University's published deadline and no degree will be conferred unless the graduation application form is filed on time. Failure to adhere to these procedures and deadlines will jeopardize the student's future registration in the Jackson School.

Commencement

In addition to the University commencement ceremony held each spring, the Jackson School holds graduation ceremonies in December and May. Students graduating with School Honors and Jackson Scholars are recognized at this ceremony.

Summer Graduates

Students completing their degree requirements in the summer session have the option of "walking" in the spring Jackson School of Geosciences Commencement ceremony preceding their official graduate date. To be eligible, students must complete a final degree audit and submit an application to walk in the ceremony by the published deadlines. Neither the application to walk nor participation in any commencement events constitute applying to graduate or official completion of a degree program.

Degrees and Programs

Degrees

The Jackson School offers the Bachelor of Arts in Geological Sciences, the Bachelor of Science in Environmental Science, the Bachelor of Science in Geological Sciences, and, in partnership with the Cockrell School of Engineering, the Bachelor of Science in Geosystems Engineering and Hydrogeology. Whichever degree they pursue, geological sciences students must take courses in the Jackson School of Geosciences (JSG), the College of Natural Sciences, and the College of Liberal Arts. These units work together to meet students' individual needs and to ensure that they receive a superior education. Graduation from an accredited program is an advantage when applying for a position in industry, membership in a professional society or for registration as a professional geologist.

Programs

The University and the Jackson School offer the following programs to supplement the degree plans mentioned above.

Undergraduate Research

The University offers an opportunity for undergraduates to participate in state-of-the-art research, for University credit, with distinguished scientists. If qualified, the student may also earn special departmental honors for exceptional research and may receive recognition through participation in the Bridging Disciplines Programs (p. 23), or the annual Undergraduate Research Forum sponsored by the College of Natural Sciences. Additional information about undergraduate research is available from the Jackson School Undergraduate Student Services Office.

Field Experiences

Fieldwork is an integral part of the Jackson School of Geosciences undergraduate experience and culture. As freshmen, Jackson School students enjoy a unique two day orientation field trip before classes begin in the fall. Throughout their undergraduate career students have various opportunities to gain additional field experience as part of required coursework or smaller research trips. Students' classroom, laboratory, and field experiences culminate with the completion of Geological Sciences 660, *Field Geology*. Additional field experiences in hydrogeology, geophysics, and marine geology are some of the expanding list of options available to students in discipline-specific areas.

Jackson Scholars Program

The Jackson Scholars program is a learning initiative designed to foster achievement, initiative and motivation in scholarship and community. A goal of the Jackson School of Geosciences (JSG) is to promote "scholars" in the broadest sense where a scholar is defined not solely by classroom performance but also by a willingness to take initiative and participate in research, governance, work experience, study abroad, and/or community service.

Interested students register for the program during their freshmen, sophomore, or junior year. To apply, students outline their intentions to complete activities in the areas of scholarships and service, and submit a final portfolio for review by the associate dean for academic affairs during their senior year. Requirements vary for the activities available and students are encouraged to consult with a member of the JSG student services team as well as participate in workshops and information sessions offered to Jackson Scholars throughout the academic year.

A Jackson Scholar who completes all program requirements will be recognized at the Jackson School commencement ceremony.

Certificate in Computational Science and Engineering

For information about this transcript recognized certificate, see Certificate in Computational Science and Engineering (p. 14). The Jackson School sponsors this program along with the Cockrell School of Engineering, the College of Liberal Arts, and the College of Natural Sciences.

U-Teach Natural Sciences

The Jackson School participates in UTeach-Natural Sciences, an innovative teacher preparation program offered by the College of Natural Sciences and the College of Education that allows students to pursue middle grades and secondary school teacher certification within a four year mathematics, science, or computer science degree program. While learning the subject matter of their majors, students also learn how to teach. Upon completing the program, students graduate with a bachelor's degree and are recommended for a middle grades or secondary school teaching certificate. The UTeach-Natural Sciences program invites students to explore their interest in teaching as early as their freshman year. Through courses taught by some of Texas's most respected secondary school math and science teachers, students learn quickly whether they are suited to the profession.

A description of the UTeach-Natural Sciences curriculum is given in UTeach-Natural Sciences (p. 543); more information is available at the UTeach-Natural Sciences Office. In the Jackson School, the Bachelor of Science in Geological Sciences teaching option prepares students to seek teacher certification.

Simultaneous Majors

A student in the Jackson School of Geosciences (JSG) may pursue two majors simultaneously. The student must follow all procedures and meet all requirements outlined in *General Information* as well as those associated with both majors. A JSG student may not pursue two geosciences majors simultaneously.

The simultaneous major option is available only to undergraduates who have completed thirty hours of coursework in residence at the University and who have been admitted to both degree programs.

Program Assessment Activities

Students in the Jackson School are required to participate in assessment activities related to maintaining accreditation with the Southern Association of Colleges and Schools in addition to their required coursework. Students are exempted from participation only in extenuating circumstances and with prior approval from the JSG Student Services office.

Applicability of Certain Courses

Core Curriculum

Each student must complete the University's core curriculum (<http://catalog.utexas.edu/undergraduate/undergraduate-studies/academic-policies-and-procedures/#corecurriculum>). The core curriculum includes the first-year signature course and courses in English composition, American and Texas government, American history, mathematics, science and technology, visual and performing arts, humanities, and social and behavioral sciences. The core must be an integral part of all geosciences degree programs so graduates will be aware of their social responsibilities and the effects of technology on society.

Flags

In the process of fulfilling geosciences degree requirements, students must also complete: two courses beyond Rhetoric and Writing 306, or its equivalent, with writing flags, one quantitative reasoning flag, one global cultures flag, one cultural diversity in the United States flag, one ethics and leadership flag, and one independent inquiry flag. Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>) and may be used simultaneously to fulfill other requirements, unless otherwise specified. Refer to the Undergraduate Studies chapter of this catalog for additional information regarding flag requirements.

Physical Activity Courses

Physical activity (PED) courses and Kinesiology 119 may not be counted toward a degree in the Jackson School. However, they are counted as courses for which the student is enrolled, and the grades are included in the grade point average.

ROTC Courses

The Departments of Air Force Science, Military Science, and Naval Science maintain ROTC units on campus. Information about each program is available from the chair of the department concerned.

Nine semester hours of coursework in air force science, military science, or naval science may be counted toward any degree in the Jackson School. Such credit may be used only as electives or to fulfill the writing requirement, and only by students who are commissioned by the University ROTC program.

Correspondence and Extension Courses

Concurrent enrollment is enrollment simultaneously at the University and at another educational institution or in any combination of correspondence, extension and online or distance education courses. During a long semester students enrolled in the Jackson School of Geosciences (JSG) are not allowed to take courses at another school or institution or by correspondence or extension at the University unless approved in advance by the associate dean for academic affairs. Students must submit a concurrent enrollment petition and meet with a JSG academic adviser for approval well in advance of the start of the requested course.

A student in his or her final semester may not enroll concurrently at another institution in any course, including a distance education course, to be counted toward the degree. In the final semester, the student may also not enroll by extension or correspondence in coursework to be counted toward the degree. All transfer, extension, and correspondence coursework must be added to the student's official record before his or her last semester.

No more than 30 percent of the semester hours required for any degree in the Jackson School may be completed online, by correspondence, or through distance learning, including University Extension courses. These courses are not included in certain metrics, such as total hours, residency status, etc., and therefore may affect students' eligibility for some JSG programs.

Bible Courses

No more than twelve semester hours of Bible courses may be counted toward a degree.

Bachelor of Arts in Geological Sciences

The Bachelor of Arts in Geological Sciences (BAGeoSci) is a classical arts and sciences degree that gives students a great deal of flexibility in their choice of upper-division geological sciences courses. Students must complete courses in the natural sciences, the social and behavioral sciences, and the humanities. This diversity of subjects provides an opportunity to learn about basic differences in outlook among different disciplines, the ways questions are raised and answered, and the ways the answers are validated and made relevant in practical use. The Bachelor of Arts in Geological Sciences also provides for a minor made up of four courses in another field, including two upper-division courses. These choices let students combine their interests in liberal arts and geosciences to prepare for professions such as business, journalism, resource management, public policy, law, and medicine.

Another option for outstanding students interested in geology is the Bachelor of Arts, Plan II (p. 308), offered by the College of Liberal Arts. This broad liberal arts honors program emphasizes the humanities but also permits a concentration in science that is equivalent to a major. Students who plan to become professional geoscientists should pursue one of the BSGeoSci degree options.

A total of 120 semester hours is required. Thirty-six hours must be in upper-division courses. At least sixty hours, including eighteen hours of upper-division coursework, must be completed in residence at the University; at least twenty-four of the last thirty hours must be completed in residence at the University. As long as these residence rules are met, credit may be earned by examination, by extension, by correspondence (up to 30 percent of the semester hours required for the degree), or, with the approval of the dean, by work transferred from another institution.

The coursework counted toward the degree may include no more than thirty-six hours in any one field of study in the College of Liberal Arts or the College of Natural Sciences; and no more than thirty-six hours in any other single college or school of the University, including the Jackson School.

No coursework to be counted toward the degree may be taken on the pass/fail basis.

All students must complete the University's core curriculum (p. 20). In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the following Skills and Experience flags:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course
5. Ethics and leadership: one flagged course
6. Independent inquiry: one flagged course

The specific requirements for the Bachelor of Arts in Geological Sciences consist of prescribed work, major and minor requirements, and electives. In some cases, a course that is required for the degree may also be counted toward the core curriculum. A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills any other requirement may also be used to fulfill a flag requirement if the course carries that flag, unless otherwise specified. In addition, the student must fulfill the University's general requirements (p. 17), and the requirements

of the Jackson School given in special requirements of the college (p. 266).

Prescribed Work

1. *Foreign language*: Four semesters, or the equivalent, in a single foreign language. The foreign language requirement is the attainment of a certain proficiency, rather than the completion of a specified number of hours. Any part of the requirement may be fulfilled by credit by examination. To achieve proficiency in a foreign language as rapidly as possible, qualified students are urged to take intensive foreign language courses. Information about these courses is available from the departments that offer them. Courses used to fulfill the foreign language requirement must be language courses; literature-in-translation courses, for example, may not be counted.
2. *Social science*: Three semester hours in social science, in addition to the course counted toward the social and behavioral sciences requirement of the core curriculum. The course must be chosen from the following fields; it must be in a different field from the course used to fulfill the core curriculum social and behavioral sciences requirement.
 - a. Anthropology
 - b. Economics
 - c. Geography
 - d. Linguistics
 - e. Psychology
 - f. Sociology
3. *Natural science*: Six semester hours in natural sciences, in addition to the courses counted toward the science and technology requirements of the core curriculum. Courses must be chosen from the following fields; no more than three hours may be in either the history of science or the philosophy of science.
 - a. Astronomy
 - b. Biology
 - c. Chemistry
 - d. Marine science
 - e. Nutrition
 - f. Physical science
 - g. Physics
 - h. Mathematics
 - i. Computer science
 - j. Experimental psychology
 - k. Physical anthropology
 - l. Physical geography
 - m. Philosophy (courses in logic)
 - n. History of science and philosophy of science
 - o. Other fields approved by the dean
4. *General culture*: Three semester hours in addition to the course counted toward the visual and performing arts requirement of the core curriculum. Courses in the following fields may be used:
 - a. Architecture
 - b. Classical civilization, Greek, Latin
 - c. Art history, design, ensemble, fine arts, instruments, music, studio art, theatre and dance, visual art studies
 - d. Philosophy (excluding courses in logic)
 - e. Approved interdisciplinary courses including, but not limited to, those in programs of special concentration cutting across specific departments, schools, or colleges. Lists of approved courses are available in the Undergraduate Student Services Office.

The BA Major and Minor

With the exception of courses that fulfill a flag requirement, a course taken to fulfill the requirements under “Prescribed Work” above may not also be counted toward fulfillment of the major and minor requirements.

Residence Requirements for the Major

At least eighteen semester hours of coursework in geological sciences, including six hours of upper-division coursework, must be completed in residence at the University.

Course Requirements for the Major

Geological Sciences 401 or 303, 404C or 405, 416K, 416M, 420K, and enough additional upper-division coursework in geological sciences to make a total of thirty-two semester hours; six semester hours in biology; Chemistry 301 and 302; and three semester hours in physics.

Minor

Twelve semester hours, of which at least six must be in upper-division coursework, in any one of the following disciplines: anthropology, astronomy, biology, business, computer science, chemistry, education, engineering, geography, mathematics, or physics. Other disciplines may be chosen with submission and approval of a petition through the Jackson School of Geosciences Student Services Office.

Electives

In addition to the core curriculum, the prescribed work, and the major and minor, the student must complete enough elective coursework to provide the 120 semester hours required for the degree. These 120 hours may include no more than twelve semester hours of Bible courses and no more than nine hours of air force science, military science, or naval science courses.

Bachelor of Science in Environmental Science

The Bachelor of Science in Environmental Science (BSEnviroSci), offered by the College of Liberal Arts, the College of Natural Sciences, and the Jackson School of Geoscience, is designed for students interested in an interdisciplinary scientific perspective on environmental and sustainability issues, analysis, and management. The degree program provides the broad foundation in physical, life, and social sciences needed for a career or graduate study in environmental science and related fields such as climate change, ecology, and conservation. Students who complete the program successfully will be able to assess environmental issues critically from multiple perspectives; perform field, laboratory, and computer analyses; and conduct original research. The program is designed to prepare graduates for careers in local, state, and federal government laboratories and nonprofit agencies, environmental consulting firms, environmental education and outreach agencies, and universities and other research settings. The degree is offered by the Jackson School with a major in geological sciences, by the College of Liberal Arts with a major in geographical sciences, and by the College of Natural Sciences with a major in biological sciences. The degree programs share common prescribed work, but each major has its own specific requirements. Students may earn only one Bachelor of Science in Environmental Science degree from the University.

Students must apply for admission to the degree program after completing prerequisite coursework. To be competitive for admission, students should have a grade point average of at least 2.75. More information

about admission requirements is given in Admission to the Environmental Science Program (p. 265).

The BSEnviroSci curriculum consists of 126 semester hours of coursework. In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the following Skills and Experience flags:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course
5. Ethic and leadership: one flagged course
6. Independent inquiry: one flagged course

All students must complete the University's core curriculum (p. 20). The specific degree requirements consist of prescribed work and major requirements. In some cases, a course that is required for the degree may also be counted toward the core curriculum. A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills any other requirement may also be used to fulfill a flag requirement if the course carries that flag, unless otherwise specified.

Prescribed Work

1. *Mathematics*: Mathematics 408C, or 408N and 408S
2. *Chemistry*: Chemistry 301 or 301H, 302 or 302H, and 204
3. *Physics*: Physics 317K and 117M, or another four-hour calculus-based physics sequence
4. *Biological sciences*: Biology 311C and 311D, or 315H
5. *Ecology*: Biology 373 and 373L, or Marine Science 320 and either 120L or 152T (Topic: Marine Ecology)
6. *Geological sciences*: Geological Sciences 401 or 303, 346C, and an approved geological sciences course in sustainability
7. *Geography*: Geography 335N
8. *Field experience*: One course in each of the following areas:
 - a. Introductory field seminar: Environmental Science 311
 - b. Senior field/research experience: Environmental Science 371 or Biology 377 (with prior approval of the faculty adviser)
9. *Research methods*: Environmental Science 331
10. *Environmental and sustainability themes*: One course in each of the following thematic areas:
 - a. *Environmental and sustainability policy, ethics, and history*: Geography 334, 336C, 340D, 342C, 356C, 356T (approved topics), Philosophy 325C
 - b. *Geographic information systems*: Geography 360G, 462K, Geological Sciences 327G
 - c. *Climates and oceans*: Biology 456L, Geography 333K, 356T (approved topics), Geological Sciences 371C (approved topics), 377P, Marine Science 320, 440, 354Q, 354T, 367K
 - d. *Environmental economics, sustainability, and business*: Economics 304K, 330T
11. Environmental Science 141 and 151

Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10c.

Major Requirements

The following thirty-six semester hours of coursework are required; these hours must include at least twelve hours of approved upper-division work in geological sciences.

1. Geological Sciences 404C or 405, 416K, 416M and 420K
2. Mathematics 408D or 408M
3. Four semester hours of physics in one of the following second-semester sequences: Physics 316 and 116L, 317L and 117N, 303L and 103N
4. One of the following courses on climate and water: Geological Sciences 371C (approved topics), 376E, 476K, 476M, 376S, 377P (The same course may not be used to satisfy both requirement 4 of the major requirements and requirement 10 of the prescribed work.)
5. Nine semester hours of upper-division elective coursework in geological sciences
6. Enough additional coursework to make a total of 126 semester hours.

Special Requirements

Students must fulfill the University-wide General Requirements (p. 17) and the Special Requirements (p. 266) of the Jackson School given earlier in this section. They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information*.

Bachelor of Science in Geological Sciences

The Bachelor of Science in Geological Sciences (BSGeoSci) serves as a professional degree for students planning careers as geologists, geophysicists, or teachers, as well as for those planning to pursue graduate work in the geosciences or a profession such as law or business. Careers are available in the petroleum and related energy industries, resource evaluation, mineral exploration, geologic hazard monitoring, environmental control and reclamation, building foundation evaluation, groundwater contamination studies, soil testing, regional planning, watershed management, climate modeling, and college or secondary school teaching. Graduates may also work in state or federal agencies, in universities or museums, with consulting firms, or with service companies to the energy and mineral industries.

A plan of study for the Bachelor of Science in Geological Sciences includes courses required by the University and required and elective courses in geological sciences (preceded by their prerequisite courses). Taken together, these courses make up an option, a degree plan with a particular concentration or emphasis. Thus, individuals may develop intellectually challenging yet quite different plans of study according to their personal interests and goals. Students seeking the Bachelor of Science in Geological Sciences degree must choose one of four options--I: General Geology, II: Geophysics, III: Hydrogeology, V: Teaching. (Option IV: Environmental Science and Sustainability is no longer offered.)

In addition to the prescribed work outlined below, all students must complete the University's core curriculum (p. 20). In some cases, a course that is required for the BSGeoSci may also be counted toward the core curriculum; these courses are identified below. In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the following Skills and Experience flags:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent

2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course
5. Ethic and leadership: one flagged course
6. Independent inquiry: one flagged course

A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills any other requirement may also be used to fulfill a flag requirement if the course carries that flag, unless otherwise specified.

Prescribed Work Common to All Options

1. *Foreign Language*: Courses 506 and 507 (or the equivalent) in a single foreign language, or as much of this coursework as required by the student's score on the appropriate language placement test. Students in the teaching option must fulfill a different foreign language requirement, given with the other option requirements. For students who enter the University with fewer than two high school units in a single foreign language, the first two semesters in a language may not be counted toward the total number of semester hours required for the degree.
2. *Upper-division Coursework*: Thirty-six semester hours of upper-division coursework must be completed in residence at the University. For students in options I, II, and III, at least eighteen of these hours must be in geological sciences; for students in option V, at least twelve hours must be in geological sciences. (Option IV: Environmental Science and Sustainability is no longer offered.) For all students, at least twelve of the thirty-six hours must be outside geological sciences.

Option I: General Geology

1. Mathematics 408C and 408D; or 408K, 408L, and 408M. Mathematics 408C or 408K also meets the mathematics requirement of the core curriculum. Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward the total number of semester hours required for the degree.
2. Physics 301, 101L, 316, and 116L; or Physics 303K, 103M, 303L, and 103N.
3. Chemistry 301, 302, and 204. Together, the courses that meet requirements 2 and 3 also meet parts I and II of the science and technology requirement of the core curriculum.
4. Geological Sciences 401 or 303, 404C or 405, 416K, 416M, 420K, 426P, 428, 660 (completed in residence), and enough additional approved upper-division coursework in geological sciences to make a total of fifty-two semester hours.
5. Twelve semester hours chosen from a list of approved courses in aerospace engineering, architectural engineering, astronomy, biology, chemical engineering, chemistry, civil engineering, computer science, engineering mechanics, geography, marine science, mathematics, mechanical engineering, petroleum and geosystems engineering, and physics. Geological Sciences 325K may also be counted toward requirement 5. This requirement is intended to function as an unspecified minor. Courses used to fulfill the requirement do not have to be taken in the same field of study, but they should form a self-reinforcing sequence related to geological sciences. Courses not on the list of approved courses will be considered upon petition to the Jackson School of Geoscience Student Services Office.
6. Enough additional coursework to make a total of 126 semester hours.

Option II: Geophysics

1. Mathematics 408C and 408D, or 408K, 408L, and 408M; 427K; and 427L. Mathematics 408C or 408K also meets the mathematics requirement of the core curriculum. Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward the total number of semester hours required for the degree.
2. Physics 301, 101L, 315, 115L, 316, and 116L.
3. Chemistry 301 and 302. Together, the courses that meet requirements 2 and 3 also meet parts I and II of the science and technology requirement of the core curriculum.
4. Geological Sciences 401 or 303, 416K, 416M, 420K, 325J, 325K, 428, 354, 365P, 465K, 366M, and three additional hours of approved upper-division coursework in geological sciences.
5. Six semester hours in approved field/research courses. This requirement may be met by several courses, including Geological Sciences 348K, 660, 661, 376L, 679G, and approved off-campus geophysics field courses.
6. Six semester hours of technical electives chosen from a list of approved coursework in mathematics, physics, computer science, engineering, and related fields. A list of approved courses is available in the Jackson School of Geoscience Student Services Office. Technical elective credit for courses not on the approved list may be requested by petition. These courses will be added to the list after geophysics faculty review and approval.
7. Enough additional coursework to make a total of 126 semester hours.

Option III: Hydrogeology

1. Mathematics 408C and 408D, or 408K, 408L, and 408M; and 427K. Mathematics 408C or 408K also meets the mathematics requirement of the core curriculum. Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward the total number of semester hours required for the degree.
2. Physics 301, 101L, 316, and 116L; or 303K, 103M, 303L, and 103N.
3. Chemistry 301, 302, and 204.
4. Biology 311C. Together, the courses that meet requirements 2 and 3 also meet parts I and II of the science and technology requirement of the core curriculum; Biology 311C may also be used to meet part II of that requirement.
5. The following coursework in geological sciences:
 - a. Geological Sciences 401 or 303, 416K, 416M, 420K, 428, 476K, 476M, and 376S
 - b. Six semester hours of field experience which must include Geological Sciences 376L and three additional hours selected from one of the following: Geological Sciences 660A, 660B, or 679J, or other appropriate course approved in advance by the Jackson School of Geoscience (JSG) Student Services Office.
 - c. Three upper-division semester hours in hydrogeology or a related area, chosen from Geological Sciences 325K, 376E, 377P, 327G, or other approved course
 - d. Nine additional semester hours of upper-division coursework in geological sciences.
6. Six semester hours chosen from a list of approved courses in biology, chemistry, civil engineering, geography, marine science, mathematics, mechanical engineering, and petroleum and geosystems engineering. A list of approved courses is available in the JSG Student Services Office. This requirement is intended to function as an unspecified minor. Courses used to fulfill the requirement do not have to be taken in the same field of study, but they should form a self-reinforcing sequence related to geological sciences. Courses not on the list of approved

courses will be considered upon petition to the JSG Student Services Office.

7. Enough additional coursework to make a total of 126 semester hours.

Option V: Teaching

This option is designed to fulfill the course requirements for composite science certification as a middle grades or secondary school teacher in Texas with geological sciences as the primary teaching field; composite certification requires twenty-four semester hours of coursework in the primary field, twelve hours in a second field, and six hours each in two additional fields.

Completion of the required courses does not guarantee teacher certification. To graduate and be recommended for certification, the student must have a cumulative University grade point average of at least 2.50 and must pass the final teaching portfolio review. Information about the portfolio review and additional certification requirements is available from the UTeach-Natural Sciences academic adviser.

1. In place of the foreign language requirement, either two years of high school coursework in a single foreign language or course 506 (or the equivalent) in a foreign language.
2. Mathematics 408C. This course also meets the mathematics requirement of the core curriculum. Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward the total number of semester hours required for the degree.
3. History 329U or Philosophy 329U.
4. Geological Sciences 401 or 303, 404C or 405, 416K, 416M, 420K or 320L, 335, and enough additional upper-division coursework in geological sciences to make a total of at least twenty-eight semester hours.
5. To meet the requirements of composite certification, the student must complete the following courses. In meeting this requirement, the student also fulfills parts I and II of the science and technology requirement of the core curriculum.
 - a. Biology 311C and 311D
 - b. Chemistry 301 and 302
 - c. Physics 302K, 102M, 302L, and 102N; or 301, 101L, 316, and 116L; or an equivalent sequence
 - d. Enough additional approved coursework in biology, chemistry, or physics to provide the required twelve semester hours in a second field
6. Biology 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*), or Physics 341 (Topic 7: *Research Methods: UTeach*).
7. Astronomy 303, 307, or 367M; and Marine Science 307.
8. Eighteen semester hours of professional development coursework, with a grade of at least C- in each course: Curriculum and Instruction 650S, UTeach-Natural Sciences 101, 110, 350, 355, 360, 170.
9. For students seeking middle grades certification, the following coursework with a grade of at least C- in each course: Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304; and Curriculum and Instruction 339E.
10. Enough additional coursework to make a total of 128 semester hours.

Bachelor of Science in Geosystems Engineering and Hydrogeology

Geosystems engineers and hydrogeologists are concerned with the development and use of engineering approaches in the management of natural resources from the Earth's surface and subsurface, environmental restoration of subsurface sites, and other processes related to the earth sciences. This degree program, offered in partnership by the Cockrell School of Engineering and the Jackson School, is designed to teach students the geological and engineering principles needed to solve subsurface resource development and environmental problems. The curriculum includes a fundamental sequence of engineering and geological sciences courses in such areas as multiphase fluid flow, physical and chemical hydrology, heat and mass transfer, field methods, and engineering design. This interdisciplinary systems approach, combining engineering and geological sciences, is increasingly required to address complex real-world problems such as characterization and remediation of aquifers. The degree program is designed to prepare graduates for employment with environmental, water resource management, and energy companies in addition to many government agencies. Better-qualified graduates of the program may pursue graduate study in subsurface environmental engineering, petroleum engineering, geology, and related fields.

The objective of the degree program is to prepare graduates for successful careers in subsurface environmental engineering (including carbon dioxide sequestration), oil and gas production and services, and similar fields. Graduates are expected to understand the fundamental principles of science and engineering behind the technology of geosystems engineering and hydrogeology, so that their education will not become outdated and so that they will be capable of self-instruction after graduation. They should also be prepared to serve society by applying the ideals of ethical behavior, professionalism, and environmentally responsible stewardship of natural resources.

Containing the following elements, the technical curriculum provides both breadth and depth in a range of topics:

- A combination of college-level mathematics and basic sciences (some with experimental work) that includes mathematics through differential equations, physics, chemistry, and geology
- Basic engineering and geologic topics that develop a working knowledge of fluid mechanics, strength of materials, transport phenomena, material properties, phase behavior, and thermodynamics
- Engineering and geosciences topics that develop competence in characterization and evaluation of subsurface geological formations and their resources using geoscientific and engineering methods, including field methods; design and analysis of systems for producing, injecting, and handling fluids; application of hydrogeologic and reservoir engineering principles and practices for water and energy resource development and management; contamination evaluation and remediation methods for hydrologic resources; and use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty
- A major capstone design experience that prepares students for engineering and hydrogeologic practice, based on the knowledge and skills acquired in earlier coursework and incorporating engineering and geological standards and realistic constraints
- A general education component that complements the technical content of the curriculum

Curriculum

Course requirements are divided into three categories: basic sequence courses, major sequence courses, and other required courses. In addition, each student must complete the University's core curriculum (p. 20). In some cases, a course required as part of the basic sequence may also be counted toward the core curriculum; these courses are identified below. To ensure that courses used to fulfill the social and behavioral sciences and visual and performing arts requirements of the core curriculum also meet ABET criteria, students should follow the guidance given in ABET Criteria (p. 157).

In the process of fulfilling the following degree requirements, students must also complete a course that carries an independent inquiry flag, a course that carries a quantitative reasoning flag, and two courses that carry a writing flag. The independent inquiry flag, the quantitative reasoning flag, and one writing flag are provided by courses specifically required for the degree; these courses are identified below. Students are advised to fulfill the second writing flag requirement with a course that meets another requirement of the core curriculum, such as the first-year signature course. Courses that may be used to fulfill flag requirements are identified in the *Course Schedule*. More information about flags is given at Skills and Experiences Flags (p. 22).

Enrollment in major sequence courses is restricted to students who have received credit for all of the basic sequence courses and have been admitted to the major sequence. Requirements for admission to a major sequence are given in Admission to a Major Sequence (p. 151). Enrollment in other required courses is not restricted by completion of the basic sequence.

Courses used to fulfill technical and nontechnical elective requirements must be approved by the petroleum and geosystems engineering faculty and the geological sciences faculty before the student registers for them.

Students must fulfill the Foreign Language Requirement (p. 22). They must also remove any admission deficiencies in mathematics as described in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission/freshman-admission/#admissiondeficiencies>). A suggested arrangement of courses by semester is given in Suggested Arrangement of Courses (p. 179).

Requirements		Hours
Basic Sequence Courses		
Chemistry		
CH 301	Principles of Chemistry I (part II science and technology)	3
CH 302	Principles of Chemistry II	3
Engineering Mechanics		
E M 306	Statics	3
E M 319	Mechanics of Solids	3
Geological Sciences		
GEO 303	Introduction to Geology	3
GEO 416K	Earth Materials	4
GEO 416M	Sedimentary Rocks	4
Mathematics		
M 408C	Differential and Integral Calculus (mathematics, quantitative reasoning flag)	4
M 408D	Sequences, Series, and Multivariable Calculus	4
M 427K	Advanced Calculus for Applications I (quantitative reasoning flag)	4
Petroleum and Geosystems Engineering		

PGE 310	Formulation and Solution of Geosystems Engineering Problems	3
PGE 427	Properties of Petroleum Fluids	4
PGE 322K	Transport Phenomena in Geosystems	3
PGE 326	Thermodynamics and Phase Behavior	3
PGE 333T	Engineering Communication (writing flag and ethics and leadership flag)	3
Physics		
PHY 303K	Engineering Physics I (part I science and technology, writing flag)	3
PHY 303L	Engineering Physics II (part I science and technology, writing flag)	3
PHY 103M	Laboratory for Physics 303K	1
PHY 103N	Laboratory for Physics 303L	1
Rhetoric and Writing		
RHE 306	Rhetoric and Writing (English composition)	3
Undergraduate Studies		
UGS 302	First-Year Signature Course (some sections carry a writing flag)	3
or UGS 303	First-Year Signature Course	
Major Sequence Courses		
Geological Sciences		
GEO 420K	Introduction to Field and Stratigraphic Methods	4
GEO 428	Structural Geology	4
GEO 476K	Groundwater Hydrology (writing flag)	4
GEO 376L	Field Methods in Groundwater Hydrology	3
GEO 376S	Physical Hydrology	3
Petroleum and Geosystems Engineering		
PGE 323K	Reservoir Engineering I: Primary Recovery	3
PGE 323L	Reservoir Engineering II: Secondary and Tertiary Recovery	3
PGE 424	Petrophysics	4
PGE 365	Resource Economics and Valuation	3
PGE 368	Fundamentals of Well Logging	3
PGE 373L	Geosystems Engineering Design and Analysis (independent inquiry flag)	3
Civil Engineering		
C E 357	Geotechnical Engineering	3
	Approved engineering elective	3
	Approved geosciences technical elective	3
Remaining Core Curriculum Courses		
E 316L	British Literature (humanities)	3
or E 316M	American Literature	
or E 316N	World Literature	
or E 316P	Masterworks of Literature	
	American government	6
	American history	6
	Visual and performing arts	3
	Social and behavioral sciences	3
Total Hours		132

Courses

The faculty has approval to offer the following courses in the academic years 2014-2015 and 2015-2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* to determine which courses and topics will be offered during a

particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/credit-value-and-course-numbers>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Environmental Science: EVS

Lower-Division Courses

EVS 311. Field Seminar in Sustainability.

Designed for students pursuing a Bachelor of Science in Environmental Science. Introduces field observation and analysis of environmental processes and sustainability issues. Topics include ecology, hydrogeology, marine science, climate science, energy, and campus sustainability. Two lecture hours and four laboratory or field laboratory hours a week for one semester. Prerequisite: Consent of instructor.

Upper-Division Courses

EVS 331. Research Methods for the Environmental Sciences.

Designed for students pursuing a Bachelor of Science in Environmental Science. Topics include experimental design, statistical analysis and modeling, and ethics. Students develop and conduct an independent research project during the laboratory portion of the course. Two lecture hours and four laboratory or field laboratory hours a week for one semester. Prerequisite: Environmental Science 311 with a grade of at least C-, and consent of instructor.

EVS 141. Environmental Science Professionalism I.

Examines the fundamental, nontechnical aspects of environmental science and sustainability practices through the use of case studies and projects that use interdisciplinary approaches. Subjects may include the importance of interdisciplinary collaboration in addressing and assessing environmental science processes, the development of professional opportunities across disciplines, understanding professional responsibilities, applying ethical principles, the balance of multidisciplinary demands in professional practice, and the need for lifelong learning. One lecture hour a week for one semester. Prerequisite: Senior standing, Environmental Science 311 and 331, and admission to an environmental science major.

EVS 151. Environmental Science Professionalism II.

Examines the fundamental, nontechnical aspects of environmental science and sustainability practices. Focuses on the use of interdisciplinary communication for addressing and assessing environmental science processes, the challenges posed by communicating across disciplines, the development of professional communication and public speaking skills, effective presentation of research, the ethics and practices of peer research review, and effective communication of the effects of environmental science in a global society. One lecture hour a week for one semester. Prerequisite: Environmental Science 141.

EVS 171, 271, 371, 471. Research Experience.

Designed for students pursuing a Bachelor of Science in Environmental Science. Supervised study of selected topics in environmental science, by individual arrangement with the instructor. Conference course. May not be substituted for any required environmental sciences course. May be

repeated for credit when the topics vary. Prerequisite: Written consent of instructor.

Geological Sciences: GEO

Lower-Division Courses

GEO 401 (TCCN: GEOL 1403). Physical Geology.

Nature, properties, and distribution of crustal materials; surficial processes; internal processes; origin of continents, oceans, and ocean basins; mineral and fuel resources. Three lecture hours and two hours of laboratory or fieldwork a week for one semester. Only one of the following may be counted: Geological Sciences 401, 303, 312K, 420H.

GEO 302C. Climate: Past, Present, and Future.

Designed for nonscience majors. Principal factors that determine Earth's climate, evidence of climate change, causes of climate change, natural climatic variations and human-induced changes, prediction of climate in the next one hundred years, and uncertainties in climate prediction. Three lecture hours and one and one-half laboratory hours a week for one semester.

GEO 302D. Age of Dinosaurs.

An exploration of the general principles of natural history, focusing on the natural history of dinosaurs. An introduction to the basics of geology, anatomy, paleontology, and evolutionary theory, followed by the application of this knowledge, in tracing the evolutionary history of Dinosauria. Three lecture hours and one and one-half laboratory hours a week for one semester. Normally offered in the fall semester only. May not be counted toward a degree in environmental or geological sciences.

GEO 302E. Earth, Wind, and Fire.

Designed for nonscience majors. Geologic phenomena that affect everyday life, including global warming, earthquakes, volcanism, desertification, river and coastline flooding and erosion, groundwater, mineral resources, and plate tectonics. Three lecture hours and one and one-half laboratory hours a week for one semester. Normally offered in the fall semester only. May not be counted toward a degree in environmental or geological sciences.

GEO 302K (TCCN: GEOL 1301, GEOL 1302). Selected Topics in Geological Sciences.

Designed for nonscience majors. The impact of geological processes on human activity; geologic topics of popular interest. Three lecture hours and one and one-half laboratory hours a week for one semester. May not be counted toward a degree in environmental or geological sciences. May be repeated for credit when the topics vary.

GEO 302M. The Age of Mammals.

Introductory-level course on paleontology and natural history for nonscience majors. Basic geological processes, fossilization, and the fossil record. Overview of the "tree of life." Summary of the evolution and diversification of mammals, an introduction to interactions between physical and biological processes, and the impact of climate change and human activities on mammalian communities. Laboratory component focuses on the mammalian skeleton and common Texas mammals. Three lecture hours and one and one-half laboratory hours a week for one semester. Normally offered in the spring semester only. May not be counted toward a degree in environmental or geological sciences.

GEO 302P. Sustaining a Planet.

Restricted to freshmen and sophomores. Examines sustainability and the environment from the perspective of multiple disciplines. Three lecture hours and one and one-half laboratory hours a week for one semester.

Normally offered in the spring semester only. May not be counted toward a degree in geological sciences.

GEO 303. Introduction to Geology.

Mineral and rock composition of the earth; measurement of geologic time; origin and evolution of life; earth's interior; plate tectonics; depositional environments and processes; ancient climates; humans, earth resources, and the environment. Two lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Geological Sciences 401, 303, 312K, 420H.

GEO 303C. Introduction to the Solar System.

Examines the origin and evolution of our solar system; how processes such as volcanism and impacts have shaped planet surfaces, as well as the workings of planetary interiors; the unique properties of Earth that allowed life to arise and evolve; the prospects for seeking life on other planets in our own solar system and beyond; and the history of planetary exploration and the methods scientists use to explore fundamental questions regarding our place in the universe. Three lecture hours a week for one semester. Geological Sciences 303C and 310C (Topic: Introduction to the Solar System) may not both be counted.

GEO 404C. Plate Tectonics and Earth History.

Application of plate tectonics to the origin and history of Earth's crust and the origin, evolution, and distribution of living organisms. Three lecture hours and two laboratory hours a week for one semester. Normally offered in the spring semester only. Geological Sciences 404C and 405 may not both be counted. Prerequisite: Geological Sciences 401 or 303 with a grade of at least C-.

GEO 405 (TCCN: GEOL 1404). Life through Time.

Restricted to freshmen and sophomores. The history and development of life, and the processes of change from the early Precambrian era to the present. Three lecture hours and two laboratory hours a week for one semester. Normally offered in the fall semester only. Geological Sciences 404C and 405 may not both be counted. Prerequisite: Geological Sciences 401 or 303 with a grade of at least C-.

GEO 305E. Energy and the Environment.

A survey of all forms of current and potential sources of energy, and how these might impact the earth's environment. Three lecture hours and one and one-half laboratory hours a week for one semester. May not be counted toward a degree in environmental or geological sciences, geosystems engineering and hydrogeology, or petroleum engineering.

GEO 306P. Geology and Sustainability.

Restricted to environmental science entry-level majors. Examines sustainability and environmental science from an interdisciplinary perspective. Three lecture hours and one and one-half laboratory hours a week for one semester. Normally offered in the fall semester. Prerequisite: Written consent of instructor.

GEO 110C, 210C, 310C. Conference Course.

Supervised study of selected topics in geological sciences, by individual arrangement with the department and the instructor. Conference course. May not be substituted for any required geological sciences course. Some topics are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Written consent of instructor.

GEO 211. Emerging Scholars in Geological Sciences.

Introduction to research areas in the geological sciences, with emphasis on the skills needed for success in graduate school and the professional workplace. Four laboratory hours a week for one semester. Offered irregularly. May not be substituted for any required geological sciences

course. Offered on the pass/fail basis only. Prerequisite: Written consent of instructor.

GEO 012N. JSG Geosciences Mentors Program - First-year.

Restricted to first-year students in the Jackson School of Geosciences. Introduction to the various geosciences disciplines and corresponding degree programs and research areas. Emphasis on the skills needed for success in graduate school and the professional workplace, such as interactive sessions with the Jackson School of Geosciences Career Center to address internships, career planning, and job search skills. One lecture hour a week for one semester. May not be counted toward a degree in geological sciences or environmental sciences. Offered on the pass/fail basis only. Prerequisite: Consent of instructor.

GEO 114G. Geophysics Colloquium.

Open to non-geological sciences majors, but registration priority is given to geological sciences majors. Exploration of a variety of problems in modern geophysics. Two lecture hours a week for one semester, and at least one weekend field trip. Geological Sciences 110C (Topic: Geophysics Colloquium) and 114G may not both be counted. May be repeated for credit. Offered on the pass/fail basis only.

GEO 416K. Earth Materials.

Restricted to majors in the Jackson School of Geosciences; others may register with consent of instructor. Introduction to minerals, mineral study techniques, igneous and metamorphic rocks and ore deposits, and formation processes. Three lecture hours and four laboratory hours a week for one semester. Normally offered in the fall semester only. Prerequisite: Geological Sciences 401 or 303 with a grade of at least C-, Chemistry 301 with a grade of at least C-, and credit with a grade of at least C- or registration for Chemistry 302.

GEO 416M. Sedimentary Rocks.

Restricted to majors in the Jackson School of Geosciences; others may register with consent of instructor. Description and interpretation of sedimentary rocks in hand specimen and thin section; characteristics of sedimentary rocks deposited in different environments. Three lecture hours and four laboratory hours a week for one semester, with two additional one-day field trips to be arranged. Prerequisite: Geological Sciences 401, 303, or 420H with a grade of at least C-.

GEO 316P. Sedimentary Rocks.

Examines the fundamentals of sedimentary rocks, including siliciclastic grain parameters and mineralogy, sediment transport and sedimentary structures; and carbonate mineralogy and geochemistry, grain and matrix constituents, modern facies, and classification. Reviews the principal siliciclastic and carbonate depositional systems, their process of formation and facies architecture and the role of process and architecture in petrophysical patterns, distribution of permeability and porosity, flow units, reservoir, heterogeneities, and hydrocarbon recovery. Intended for petroleum and geosystems engineering majors. Three lecture hours a week for one semester. Normally offered in the spring semester. May not be counted toward any degree in geological sciences. Prerequisite: Geological Sciences 401, 303, or 420H with a grade of at least C-.

GEO 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Geological Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad office. Credit is recorded as assigned by the study abroad adviser in the Department of Geological Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

GEO 420F. Classic Geology in Scotland.

Introduction to the founding concepts of geology. Students use advanced field technologies while studying the geology of Scotland on all scales of size. The equivalent of four lecture hours a week for one semester, including field exercises in a variety of geological settings. Prerequisite: Geological Sciences 401, 303, or other coursework in geology.

GEO 420H. Honors Introductory Geology.

An accelerated introductory course on the composition, structure, and history of the earth. Three lecture hours and two laboratory hours a week for one semester, and several all-day field trips. Normally offered in the fall semester only. Only one of the following may be counted: Geological Sciences 401, 303, 312K, 420H. Prerequisite: Consent of instructor.

GEO 420K. Introduction to Field and Stratigraphic Methods.

For geological sciences majors. Field observation of geological processes and study of the mineralogy, petrology, stratigraphy, paleontology, and structural geology of central Texas. Two lecture hours and three laboratory hours a week for one semester, and six weekend field trips. Geological Sciences 420K and 320L may not both be counted. Prerequisite: Geological Sciences 416K and 416M with a grade of at least C- in each.

GEO 320L. Introductory Field Geology.

Study of geologic features and processes in the field, designed for nongeologists; emphasizes regional geology of central Texas and techniques of geologic mapping. The equivalent of three lecture hours a week for one semester. Normally offered between the spring semester and the summer session only. Geological Sciences 420K and 320L may not both be counted. May not be counted toward the Bachelor of Arts in Geological Sciences, the Bachelor of Science in Environmental Sciences, or the Bachelor of Science in Geological Sciences. Offered on the pass/fail basis only. Prerequisite: Geological Sciences 401, or 303, or consent of instructor.

GEO 422K. Paleobiology.

Systematics, biostratigraphy, paleoecology, and evolution of fossil organisms. Three lecture hours and four laboratory hours a week for one semester, with two additional one-day field trips. Normally offered in the fall semester only. Prerequisite: Biology 301M or 311D with a grade of at least C-, Geological Sciences 404C or 405 with a grade of at least C-, and Geological Sciences 416M with a grade of at least C-.

GEO 322S. Development and Evolution of the Vertebrate Skeleton.

Designed for majors in geological sciences and associated fields of natural history. Introduction to the organization and development of the vertebrate skeleton; survey of vertebrate history. Three lecture hours and two laboratory hours a week for one semester. Normally offered in the spring semester only, in alternate years. Prerequisite: Upper-division standing.

GEO 022T. JSG Geosciences Mentors Program - Transfer.

Restricted to first semester transfer students in the Jackson School of Geosciences. Introduction to the various geosciences disciplines and corresponding degree programs and research areas. Emphasis on the skills needed for success in graduate school and the professional workplace, such as interactive sessions with the Jackson School of Geosciences Career Center to address internships, career planning, and job search skills. One lecture hour a week for one semester. May not be counted toward a degree in geological sciences or environmental sciences. Offered on the pass/fail basis only. Prerequisite: Consent of instructor.

GEO 322V. Morphology of the Vertebrate Skeleton.

Identification of skeletal elements from the major vertebrate taxa, and aspects of skeletal functional morphology, with emphasis on extant taxa. Topics include the skeletal systems of fish, amphibians, reptiles, birds, and mammals. Three lecture hours and four laboratory hours a week for one semester. Normally offered in the fall semester only, in alternate years. Geological Sciences 322V and 389R may not both be counted. Prerequisite: One of the following: Geological Sciences 404C, 405, or the equivalent, or three semester hours of coursework in biology, or consent of instructor.

GEO 325J. Programming in FORTRAN and MATLAB.

Restricted to geosciences majors. FORTRAN for students without knowledge of a computer programming language: survey of all variable types, loops, arrays, subroutines, and functions; overview of UNIX and MATLAB. Two lecture hours and two laboratory hours a week for one semester. Normally offered in the spring semester only. Prerequisite: Mathematics 408D or the equivalent.

GEO 325K. Computational Methods.

Sampling and aliasing. Review of sinusoids and wave terminology, complex numbers and complex sinusoids, vectors and matrices, the discrete Fourier transform, convolution, the convolution theorem, linear digital filters and transfer functions, random variable concepts and statistics, and least squares estimation. MATLAB is used for homework problems and examples. Two lecture hours and two laboratory hours a week for one semester. Normally offered in the fall semester only. Prerequisite: Geological Sciences 325J, or an equivalent college-level course in an appropriate programming language and consent of instructor.

GEO 426P. Igneous and Metamorphic Petrology.

Mineralogy, geochemistry, and processes of magmatism and metamorphism. Three lecture hours and four laboratory hours a week for one semester. Normally offered in the spring semester only. Prerequisite: Geological Sciences 416K with a grade of at least C-, and credit with a grade of at least C- or registration for either Physics 301 and 101L or 303K and 103M.

GEO 327G. Geographic Information System and Global Positioning System Applications in Earth Sciences.

For geological sciences majors only. Theory and practice of geographic information system (GIS) and Global Positioning System (GPS) technologies, and their applications to problems in earth sciences. Laboratories and field trips provide hands-on experience with the collection, mapping, and analysis of geologic and other field data using GPS equipment and GIS software. Topics include map projections; datums and reference frames; cartographic principles; remotely sensed data (satellite and aerial photos, image radar); vector- and raster-based image formats; geospatial data resources; GIS software applications; surveying principles; GPS constellation and data structure; differential GPS; data logging schemes; GPS postprocessing software; integration of GPS and GIS in mapmaking; extant GIS applications in geology and hydrogeology. Three lecture hours and two laboratory hours a week for one semester, and two weekend field trips. Geological Sciences 327G and 371C (Topic: Geographic Information System and Global Positioning System Applications in Earth Sciences) may not both be counted. Prerequisite: Geological Sciences 420K with a grade of at least C-, and consent of instructor.

GEO 428. Structural Geology.

Description, classification, and origin of Earth structures. Solution of problems by descriptive geometry, geologic maps, and contouring. Three lecture hours and three laboratory hours a week for one semester. Normally offered in the fall semester only. Prerequisite: For students pursuing the Bachelor of Science in Geological Sciences, Geological

Sciences 420K with a grade of at least C-, Physics 301 and 101L or 303K and 103M with a grade of at least C- in each, and credit with a grade of at least C- or registration for Mathematics 408C or 408K (or 308K); for those pursuing the Bachelor of Arts with a major in geological sciences, Geological Sciences 420K with a grade of at least C-, three semester hours of coursework in mathematics (other than Mathematics 301, 316K, and 316L) with a grade of at least C-, and Physics 302K or 303K with a grade of at least C-; for others, consent of instructor.

GEO 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Geological Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geological Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

GEO 329W. Hydrogeology Cooperative (Geological Sciences).

This course covers the work period of geological sciences students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. The student must submit a final report to the supervising instructor at the conclusion of the program. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. No more than three semester hours may be counted toward the major requirement; no more than six semester hours may be counted toward the degree. The student's first registration must be on the pass/fail basis. Prerequisite: Application to become a member of the Hydrogeology Cooperative (Geological Sciences) Program and consent of the geological sciences undergraduate adviser.

GEO 330K. Energy Exploration.

Covers the fundamental elements of the petroleum system, including the origin of source rocks and reservoirs, rock properties, migration of hydrocarbons, and correlation methods for rock formations. During the final weeks of the course, students form exploration teams and work up real subsurface data from the Gulf of Mexico in order to participate in a simulated lease sale. Two lecture hours and two laboratory hours a week for one semester. Normally offered in the spring semester. Prerequisite: Geological Sciences 416M with a grade of at least C-, and Physics 303L or 316.

GEO 331K. Petrology and Plate Tectonics.

Sedimentation, metamorphism, igneous activity, and deformation patterns at rift zones, subduction zones, and transform margins. Three lecture hours a week for one semester. Offered irregularly, as shown in the Course Schedule. Prerequisite: Geological Sciences 428 with a grade of at least C-.

GEO 335. Geology and Mineral Resources of Texas.

Geologic history of the region; local rocks, fossils, and mineral resources; influence of physiography, surface and subsurface water supplies, and energy and mineral resource production on the state economy. Three lecture hours and two laboratory hours a week for one semester; local field trips may also be required. Normally offered in the fall semester only. May not be counted toward the following options within the Bachelor of Science in Geological Sciences: general geology, geophysics, and hydrogeology. May not be counted toward a degree in environmental

science. Prerequisite: Upper-division standing, Geological Sciences 401 or 303, and Geological Sciences 404C or 405.

GEO 338T. Marine Tectonics.

Tectonic processes within the dynamic Earth, with a focus on oceanic structures. Subjects may include fundamentals of plate tectonics; plate motion, driving forces, and mantle convection; evolution of triple junction and plate margins; plate reconstructions; earthquakes and focal mechanisms; structure and geochemistry of the Earth's interior; mantle structure and tomography; rheology and deformation mechanisms in mantle and crust; heat flow, gravity, the geoid, and paleomagnetism; hotspots and mantle plumes; seafloor spreading and oceanic spreading ridges; oceanic transform faults and fracture zones; and subduction zones, volcanic island arcs, and marginal seas. Three lecture hours a week for one semester. Normally offered in the spring semester only. Only one of the following may be counted: Geological Sciences 338T, 371C (Topic: Tectonics I), 381T, 391 (Topic: Tectonics I). May not be substituted for any required geological sciences course. Prerequisite: Upper-division standing, and Geological Sciences 428 with a grade of at least C- or consent of instructor.

GEO 339T. Continental Tectonics.

Tectonic processes, with a focus on continental lithospheric structures. Subjects may include convergent margins, subduction zones, magmatic arcs, and foreland structures; collisional orogenesis, arc-continent collisions, continent-continent collision, and mountain building; formation of supercontinents; uplift and exhumation; orogenic collapse and extensional tectonics; continental rifting and passive margins; transform margins; and the effect of tectonics on climate and oceanic circulation. Three lecture hours a week for one semester. Normally offered in the fall semester only. Only one of the following may be counted: Geological Sciences 339T, 371C (Topic: Tectonics II), 382T, 391 (Topic: Tectonics II). May not be substituted for any required geological sciences course. Prerequisite: For geological sciences majors, upper-division standing and Geological Sciences 428 with a grade of at least C-; for others, consent of instructor.

GEO 340T. Geoclimatology.

Examination of the climate records encoded in sedimentary archives through geologic time. Three lecture hours a week for one semester. May not be substituted for any required geological sciences course. Geological Sciences 340T and 371C (Topic: Geoclimatology) may not both be counted. Prerequisite: For geological sciences majors, upper-division standing, and Chemistry 302 and Geological Sciences 416K and 416M with a grade of at least C- in each; for others, upper-division standing, Chemistry 302 and Geological Sciences 416K and 416M with a grade of at least C- in each, and consent of instructor.

GEO 341. Mineral Resources, Society, and the Environment.

Nature and origin of mineral resources; their discovery, extraction, and uses; and their relationship to global history, economics, and the environment. Three lecture hours and one laboratory hour a week for one semester. Normally offered in the spring semester only. Prerequisite: Geological Sciences 416K with a grade of at least C-.

GEO 341G. Geomicrobiology.

Geologic and hydrologic controls on subsurface microbial growth, metabolism, and community structure; the geochemical consequences of microbial processes in subsurface settings; and the influence of geology on microbial ecology. Three lecture hours a week for one semester. Normally offered in the fall semester only, in alternate years. May not be substituted for any required geological sciences course. Geological Sciences 341G and 381G may not both be counted. Prerequisite: For

geological sciences majors, upper-division standing; for others, upper-division standing and consent of instructor.

GEO 344K. Marine Mining and Minerals.

Same as Marine Science 344K. Overview of seafloor mineral deposits, their exploration, and mining. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Geological Sciences or the Bachelor of Science in Environmental Sciences degrees. Prerequisite: Geological Sciences 401 or 303, 416K, and 416M.

GEO 344U. Quantitative Seismic Interpretation.

Seismic inversion, a tool for reservoir characterization, post- and pre-stack modeling, rock physics and fluid replacement modeling, wavelet estimation and post-stack inversion, AVO and pre-stack inversion, multiattribute regression and neural network, and net pay estimation. Extensive hands-on training with three-dimensional seismic and well-log data. Three lecture hours a week for one semester. Normally offered in the spring semester only, in alternate years. Prerequisite: Upper-division standing.

GEO 145E. Professional Ethics in Geosciences.

Supervised study devoted to the subject of professional ethics and personal integrity in the sciences, with specific subject matter designed to evolve with the science and our society. One lecture hour a week for one semester. Normally offered in the fall semester only. Geological Sciences 145E and 171C (Topic: Professional Ethics in Geosciences) may not both be counted. May not be substituted for any required geological sciences or environmental sciences course. Offered on the letter-grade basis only. Prerequisite: For non-Jackson School of Geosciences majors, consent of instructor.

GEO 346C. Introduction to Physical and Chemical Hydrogeology.

Basic concepts of fluid flow, surface and subsurface hydrology, aqueous geochemistry, and fluid-rock interaction. Additional topics include isotope hydrogeology, evolution of seawater, and mineral-solution equilibrium. Three lecture hours a week for one semester. Normally offered in the spring semester only. Prerequisite: Chemistry 302 with a grade of at least C-.

GEO 347D. Global Warming.

Discussion of the fundamental sciences of global warming, including an active investigation of contemporary climate change issues. Three lecture hours a week for one semester. Normally offered in the fall semester only. Geological Sciences 347D and 371C (Topic: Global Warming) may not both be counted. Offered on the letter-grade basis only.

GEO 347G. Climate System Modeling.

Studies the basic theory of climate system modeling using state-of-the-art regional climate models in a variety of applications. Subjects may include paleoclimate study and future climate prediction based on greenhouse gas increases. Three lecture hours a week for one semester. Normally offered in the spring semester only. Only one of the following may be counted: Geological Sciences 347G, 371C (Topic: Climate System Modeling), 387G, 391 (Topic: Climate System Modeling). May not be substituted for any required geological sciences course. Prerequisite: Upper-division standing, basic knowledge of Unix, and programming experience in Fortran.

GEO 347K. Gems and Gem Minerals.

Crystallography, occurrence, and identification of gem minerals and materials; artificial gems; simple cutting and polishing; history of gems and gemology. Three lecture hours and two laboratory hours a week for one semester. May not be counted toward a degree in geological sciences or

environmental science. Prerequisite: For earth science teachers, consent of instructor; for others, Geological Sciences 401 or 303, and Chemistry 301 or one year of high school chemistry.

GEO 347P. Climate System Physics.

Discussion of first-order principles and processes that govern the thermodynamical structure and energy distribution of the atmosphere, ocean, land, and cryosphere and their interaction with the dynamic aspect of the climate system. Three lecture hours a week for one semester. Normally offered in the spring semester only. Only one of the following may be counted: Geological Sciences 347P, 371C (Topic: Climate System Physics), 387P, 391 (Topic: Climate System Physics). May not be substituted for any required geological sciences course. Prerequisite: Upper-division standing and Mathematics 408D and Physics 303K with a grade of at least C- in each.

GEO 348K. Marine Geology and Geophysics Field Course.

Same as Marine Science 348 (Topic 2: Marine Geology and Geophysics Field Course). Hands-on, team-based instruction in the collection and processing of marine geological and geophysical data along the Gulf of Mexico coast. Includes classroom, laboratory, and field components in Austin and at sea. Offered between the spring semester and the summer session; limited class meetings may begin in the spring semester. Geological Sciences 348K and 397F may not both be counted. Fulfills the field experience requirement for some geological sciences degree programs. Students should contact the department for information before registering. Prerequisite: For geological sciences majors, upper-division standing, Geological Sciences 420K or 320L with a grade of at least C-, and consent of instructor; Geological Sciences 416M and 465K are recommended; for others, upper-division standing, Marine Science 307 and 354F with a grade of at least C- in each, and consent of instructor.

GEO 354. Physics of Earth.

How history, composition, temperature, kinematics, and dynamics of Earth are inferred from geophysical observations of all types. Three lecture hours a week for one semester. Normally offered in the spring semester only. Geological Sciences 354 and 384D may not both be counted. Prerequisite: For students in the geophysics option, Geological Sciences 465K and 365P; for others, a major in geological sciences and completion of the calculus and physics courses required for the major.

GEO 358K. Volcanology.

Ash deposits, lava flows, eruption processes; prediction and mitigation of volcanic hazards. Three lecture hours and one laboratory hour a week for one semester. Offered irregularly. Prerequisite: Geological Sciences 426P or upper-division standing in geological sciences.

GEO 660. Field Geology.

Methods of geologic mapping with topographic maps and aerial photographs. Field studies include measuring sections, interpretation of stratigraphy, structure, environments of deposition of various sedimentary rocks, and the origin and petrology of igneous and metamorphic rocks. Given for six weeks each summer in Colorado, New Mexico, and other western states. Normally offered in the summer session only. Prerequisite: Eighteen semester hours of coursework in geological sciences, including Geological Sciences 420K and 428 with a grade of at least C- in each.

GEO 661. Geophysics Field Camp.

Field studies for geophysics majors, including seismic, magnetic, electrical, gravity, and other techniques; related data processing and interpretation. Each half requires three consecutive weeks of fieldwork. Geological Sciences 661A is offered either between the spring semester and the summer session or in the summer session; Geological Sciences 661B is offered in the summer session. Students may take Geological

Sciences 661 for University credit while enrolled in the Los Alamos National Laboratory SAGE program. Prerequisite: Completion of eighteen semester hours of coursework in geological sciences, including Geological Sciences 420K, 465K, and 365P with a grade of at least C- in each.

GEO 465K. Seismic Exploration.

Seismic theory, including body and surface waves, attenuation, rays, reflection and transmission coefficients, principles of synthetic seismogram calculations, seismic imaging principles, reflection data processing methods, rock physics overview, seismic attributes overview, and seismic exploration field methods. Three lecture hours and two laboratory hours a week for one semester. Normally offered in the fall semester only. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 427L and Physics 315 and 115L.

GEO 365N. Geophysical Data Processing.

Fourier transforms of continuous functions, linear digital filter design and applications, frequency domain filtering, and spectral analysis and applications. Three lecture hours a week for one semester. Normally offered in the spring semester only. Prerequisite: Geological Sciences 325K or the equivalent.

GEO 365P. Potential Field Applications in Geophysics.

Introduction to the theory, measurement, and application of gravity and magnetic and electric fields to exploration and global-scale problems. Three lecture hours a week for one semester. Normally offered in the spring semester only. Geological Sciences 365P and 383P may not both be counted. Prerequisite: Mathematics 427K, 427L, Physics 315, and 115L with a grade of at least C- in each.

GEO 365Q. Geomorphology Process and Form.

Explores how Earth surface processes combine to shape landscapes through erosion and deposition. Includes discussion of open channel flow, sediment transport, fluvial and hillslope processes, and tectonic controls on landscape evolution. Three lecture hours a week for one semester, with several field trips to be arranged. Normally offered in the fall semester. Only one of the following may be counted: Geological Sciences 365Q, 371C (Topic: Geomorphology: Landscape Process, Form, and Evolution), 385Q, 391 (Topic: Geomorphology: Landscape Process, Form, and Evolution). May not be substituted for any required geological sciences course. Prerequisite: Upper-division standing; and Mathematics 408C or the equivalent, or consent of instructor.

GEO 366M. Mathematical Methods in Geophysics.

A survey of mathematics for geoscientists that includes infinite series, complex variables, linear algebra, integral transforms, ordinary and partial differential equations, tensor analysis, and probability and statistics. Three lecture hours a week for one semester. Normally offered in the fall semester. Geological Sciences 366M and 380J may not both be counted. Prerequisite: Mathematics 427L or the equivalent.

GEO 468K. Geophysics for Geological Sciences Majors.

A survey of seismic, magnetic, gravitational, and other geophysical tools and their application to exploration and global-scale problems. Three lecture hours and two laboratory hours a week for one semester. Normally offered in the spring semester only. May not be counted toward the Bachelor of Science in Geological Sciences, Option II. Prerequisite: Mathematics 408D and either Physics 303L and 103N or 316 and 116L, with a grade of at least C- in each.

GEO 370K. Sedimentology.

Processes of sediment formation, transportation, and deposition; textures, structures, and facies of sedimentary rocks. Three lecture hours a

week for one semester, and two one-day field trips. Offered irregularly. Prerequisite: Geological Sciences 420K with a grade of at least C-.

GEO 171C, 271C, 371C. Conference Course.

Supervised study of selected topics in geological sciences, by individual arrangement with the department and instructor. Conference course. May not be substituted for any required geological sciences course. May be repeated for credit when the topics vary. Prerequisite: Written consent of instructor.

GEO 171H. Research Methods I.

Preparation for independent research projects through exposure to current research programs, facilities, personnel, and projects in the Jackson School of Geosciences. Includes selecting research topics, mentors, and supervisors; preparing research proposals; conducting research activities; and presenting research results. The equivalent of one lecture hour a week for one semester. Prerequisite: Completion of sixty semester hours of college coursework, including at least eight hours of upper-division coursework in geological sciences; consent of the honors adviser; and admission to the Geological Sciences Honors Program or consent of instructor.

GEO 171T, 271T, 371T, 471T, 571T, 671T. Undergraduate Seminar in Geological Sciences.

For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; additional hours may be required for some topics. May not be substituted for any required geological sciences courses. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and a major in the Jackson School of Geosciences, or consent of instructor. Additional prerequisites may vary with the topic.

GEO 172H. Research Methods II.

Preparation for independent research projects through exposure to current research programs, facilities, personnel, and projects in the Jackson School of Geosciences. Includes selecting research topics, mentors, and supervisors; preparing research proposals; conducting research activities; and presenting research results. The equivalent of one lecture hour a week for one semester. Prerequisite: Geological Sciences 171H, and admission to the Geological Sciences Honors Program or consent of instructor.

GEO 173H. Research Methods III.

Preparation for independent research projects through exposure to current research programs, facilities, personnel, and projects in the Jackson School of Geosciences. Includes selecting research topics, mentors, and supervisors; preparing research proposals; conducting research activities; and presenting research results. The equivalent of one lecture hour a week for one semester. Prerequisite: Geological Sciences 171H and 172H, and admission to the Geological Sciences Honors Program or consent of instructor.

GEO 376C. Isotope Geology.

Overview of the principles of stable and radiogenic isotope geochemistry. Subjects include mass spectrometry, geochronology and thermochronology, cosmogenic nuclides, radiogenic geochemistry, isotopic fractionation, traditional and non-traditional stable isotope geochemistry and its applications to the hydrologic cycle, low-temperature geochemistry, magmatic and metamorphic processes, thermometry, fluid-rock interactions, tectonics, crust-mantle evolution, and extraterrestrial materials. Three lecture hours a week for one semester. Only one of the following may be counted: Geological Sciences 371C (Topic: Isotope and Environmental Geology Research), 376C, 388L. Prerequisite: Chemistry

302, Mathematics 408D or 408M with a grade of at least C- in each, and written consent of instructor.

GEO 376E. Environmental Isotope Geochemistry.

The application of the isotope and trace element geochemistry of natural waters and sediments to studies of the hydrologic cycle. Stable, radiogenic, and cosmogenic isotopes are used as tracers of the evolution of groundwater, surface water, and ocean water. Three lecture hours a week for one semester, with additional laboratory hours to be arranged. Offered irregularly. Prerequisite: Upper-division standing in geological sciences; and consent of instructor or the following courses: Chemistry 302, 204, Geological Sciences 416K, 416M, 346C, Mathematics 408D, and Physics 303L and 103N or 316 and 116L.

GEO 476K. Groundwater Hydrology.

Introduction to subsurface hydrology, emphasizing geological controls on groundwater flow; quantitative methods of analyzing aquifer systems; regional hydrology; water quality and pollution. Three lecture hours and one laboratory hour a week for one semester, with several local field trips. Normally offered in the fall semester only. Prerequisite: Geological Sciences 346C or Mathematics 408D with a grade of at least C-, or consent of instructor.

GEO 376L. Field Methods in Groundwater Hydrology.

Introduction to field methods, including geophysics, pump tests, stream gauging, well-logging, water sampling, and mapping. An intensive three-week course meeting eight hours a day, Monday through Friday, and four hours on Saturday: lectures, laboratory exercises, and field exercises; nightly homework involving map exercises, reduction of field data, report preparation; Saturdays devoted to report presentation, review sessions, and local field trips. Offered between the spring semester and the summer session. Prerequisite: Geological Sciences 476K with a grade of at least C-, or consent of instructor.

GEO 476M. Chemical Hydrogeology.

An introduction to aqueous geochemistry and contaminant hydrogeochemistry; topics include basic thermodynamics, kinetics, rock-water interactions, and solute transport. Three lecture hours and two laboratory hours a week for one semester. Normally offered in the spring semester only. Prerequisite: Geological Sciences 346C, 476K, or 376S with a grade of at least C-.

GEO 376S. Physical Hydrology.

Modern conceptual and methodological approaches to hydrological science: qualitative assessment of hydrological processes, quantitative representation, approaches to measurement, and treatment of uncertainty. Major components of the hydrological cycle--precipitation, snow and snowmelt, infiltration, soil moisture, evapotranspiration, and runoff--and their link to the coupled-earth system. Three lecture hours a week for one semester. Normally offered in the fall semester only. Prerequisite: Geological Sciences 346C or Mathematics 408D with a grade of at least C-.

GEO 376T. High-Temperature Geochemistry.

Restricted to geosciences majors. Study of the composition, origin, and chemical and physical evolution of the earth and its interior. Examines the links between the fields of geochemistry and tectonics, igneous petrology, geophysics, and other areas of inquiry. Three lecture hours a week for one semester. Normally offered in the fall semester only. Prerequisite: Mathematics 408D or the equivalent.

GEO 476W. Hydrogeophysics.

Application of geophysical methods in hydrogeology. Modules include method theory and hydrogeological applications; using instruments in the field; and analysis of data, interpretation, and hydrogeological

insights. Class discussions; field exercises and written field exercise summaries; individual and group reports. The equivalent of four lecture hours a week for one semester, with field work hours to be arranged. Normally offered in the fall semester only. Only one of the following may be counted: Geological Sciences 371C (Topic: Hydrogeophysics), 476W, 382W, 391 (Topic: Hydrogeophysics). Prerequisite: Consent of instructor; previous coursework and/or experience in hydrogeology and geophysics is recommended.

GEO 377K. Applied Karst Hydrogeology.

The study of karst landforms, processes, flow systems, and water resources. Geologic controls, natural resources, aquifer recharge and discharge, system evolution, geochemistry/water quality, tracing methodologies, geophysical methods, and modeling are covered with an emphasis on collecting and interpreting field data. Three lecture hours a week for one semester, with additional fieldwork hours to be arranged. Normally offered in the spring semester only. Class counts for field work credit for those in the Bachelor of Science in Geological Sciences (Option III: Hydrogeology) degree program. Only one of the following may be counted: Geological Sciences 371C (Topic: Applied Karst Hydrogeology), 377K, 391 (Topic: Applied Karst Hydrogeology), 391K. Prerequisite: Geological Sciences 476K or consent of instructor.

GEO 377P. Physical Climatology.

Investigates the nature of earth's climate and examines the physical processes that maintain the climate system. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Upper-division standing; and Mathematics 408D, Physics 303K, Geography 301K, and Computer Science 303E, or their equivalents.

GEO 679G. Special Studies in Geophysics.

Special research projects, field studies, or geophysical/industrial internship. Assigned reading with written and oral report. Three lecture hours a week for two semesters. May be used instead of Geological Sciences 660 in fulfilling the requirements for the Bachelor of Science in Geological Sciences (Option II). Prerequisite: A University grade point average of at least 3.00, or a grade point average in geosciences courses of at least 3.00 and consent of instructor.

GEO 379H. Honors Tutorial.

Supervised research project resulting in an honors thesis with an oral defense. Conference course. May be counted as three of the six geological sciences senior elective hours. Prerequisite: Upper-division standing, admission to the Geological Sciences Honors Program, and completion of Geological Sciences 171H, 172H, and 173H with a grade of at least B- in each; or consent of the departmental honors adviser.

GEO 679J. Internship in Hydrogeology.

Special hydrogeological studies under the joint supervision of industry professionals and faculty members. Students present a written report. Forty hours a week for one semester. May be used in place of Geological Sciences 660 in fulfilling the requirements for the Bachelor of Science in Geological Sciences (Option III). Prerequisite: Geological Sciences 476K with a grade of at least C-, a grade point average in geological sciences of at least 3.00, and consent of instructor.

GEO 279K, 379K. Special Studies in Advanced Geological Sciences.

Special emphasis on recent developments. Conference course. May be repeated for credit when the topics vary. Prerequisite: Six semester hours of coursework in advanced geological sciences, a grade point average in geological sciences of at least 3.00, a University grade point average of at least 3.00, and consent of instructor.

GEO 479M. Mammalogy.

Surveys the biology and evolutionary history of mammals. Introduction to the diversity of living mammals through the study of mammalian ecology, behavior, morphology, and taxonomy. Laboratory work focuses on the characters diagnosing the major mammalian clades and identifying the common recent mammals of Texas using skins and recent osteological specimens. Fossils and the fossil record of mammals. Three lecture hours and three laboratory hours a week for one semester. Normally offered in the spring semester only. Prerequisite: Upper-division standing in biology, geological sciences, or anthropology.

School of Information

Andrew P. Dillon, *PhD, Dean*
Philip Doty, *PhD, Associate Dean*
Mary Carla Criner, *PhD, Assistant Dean*
<http://www.ischool.utexas.edu/>

The School of Information offers the Master of Science in Information Studies and the Doctor of Philosophy. The *Graduate Catalog* provides information about these programs and the requirements for admission to graduate study.

In addition to the graduate courses described in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/information>), the faculty has approval to offer the undergraduate courses listed below in the academic years 2014-2015 and 2015-2016. For undergraduates who are interested in a thorough introduction to information studies, the faculty has designed a curriculum that consists of at least four courses: two lower-division and two upper-division, including one required core course, for a total of at least twelve semester hours. Students who complete these requirements receive a certificate from the School of Information documenting their achievement. The curriculum is designed to complement many undergraduate degree programs; with the approval of his or her major college, a student may count the courses toward the requirements of the minor.

Not all courses are taught each semester and summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/credit-value-and-course-numbers>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course; if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Information Studies: INF

Lower-Division Courses

INF 304D. Introduction to Information Studies.

Overview of the information field as it relates to the technology-based world culture. Topics may include the idea of information, information in relation to technology and culture, information technology in education, information literacy and the "digital divide," information and communication technology, information and gender, public information policy, and information organization and preservation. Three lecture hours a week for one semester. Information Studies 304D and 304W may not both be counted. Prerequisite: Lower-division standing.

INF 304W. Introduction to Information Studies.

Overview of the information field as it relates to the technology-based world culture. Topics may include the idea of information, information in relation to technology and culture, information technology in education, information literacy and the "digital divide," information and communication technology, information and gender, public information policy, and information organization and preservation. Web-based instruction; no class meetings. Information Studies 304D and 304W may not both be counted. Prerequisite: Lower-division standing.

INF 315E. Information and Culture.

Examines information as a cultural phenomenon. Topics may include e-commerce, privacy and secrecy, censorship, information as a commodity, Internet culture, access to cultural heritage, and control of the cultural record. Three lecture hours a week for one semester. Information Studies 315E and 315W may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

INF 315W. Information and Culture.

Examines information as a cultural phenomenon. Topics may include e-commerce, privacy and secrecy, censorship, information as a commodity, Internet culture, access to cultural heritage, and control of the cultural record. Web-based instruction; no class meetings. Information Studies 315E and 315W may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

Upper-Division Courses

INF 322T. Children's Literature.

Evaluation, selection, and proper and creative use of books and other media with children. Three lecture hours a week for one semester. Information Studies 322T and 322W may not both be counted. Prerequisite: Upper-division standing.

INF 322W. Children's Literature.

Evaluation, selection, and proper and creative use of books and other media with children. Web-based instruction; no class meetings. Information Studies 322T and 322W may not both be counted. Prerequisite: Upper-division standing.

INF 327E. Information and People.

Study of how individuals and groups create meaning. Explores research topics concerning people and communication, including information literacy, organizations and innovation, knowledge management, and identifying information needs. Three lecture hours a week for one semester. Information Studies 327E and 327W may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

INF 327W. Information and People.

Study of how individuals and groups create meaning. Explores research topics concerning people and communication, including information literacy, organizations and innovation, knowledge management, and identifying information needs. Web-based instruction; no class meetings. Information Studies 327E and 327W may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

INF 331C. Beyond Google.

A general introduction to information searching and evaluating information in digital, print, visual, and aural formats. Three lecture hours a week for one semester. Information Studies 331C and 331W may not both be counted. Prerequisite: Upper-division standing.

INF 331W. Beyond Google.

A general introduction to information searching and evaluating information in digital, print, visual, and aural formats. Web-based instruction; no class meetings. Information Studies 331C and 331W may not both be counted. Prerequisite: Upper-division standing.

INF 335C. Information in Cyberspace.

An overview of the history and social impact of Internet, Web, and other network technologies. Students will learn methods and tools of media creation with an emphasis on technological self-sufficiency. Three lecture hours a week for one semester, including some web-based instruction.

Only one of the following may be counted: Information Studies 312, 335C, 335W. Prerequisite: Upper-division standing.

INF 335W. Information in Cyberspace.

An overview of the history and social impact of Internet, Web, and other network technologies. Students will learn methods and tools of media creation with an emphasis on technological self-sufficiency. Web-based instruction; no class meetings. Only one of the following may be counted: Information Studies 312, 335C, 335W. Prerequisite: Upper-division standing.

INF 343C. Information Organization and Access.

Basic aspects of representing and organizing information resources in digital information settings. Introduces the fundamentals of identifying informational objects, including description, content indication, and metadata. Three lecture hours a week for one semester. Information Studies 343C and 343W may not both be counted. Prerequisite: Upper-division standing.

INF 343W. Information Organization and Access.

Basic aspects of representing and organizing information resources in digital information settings. Introduces the fundamentals of identifying informational objects, including description, content indication, and metadata. Web-based instruction; no class meetings. Information Studies 343C and 343W may not both be counted. Prerequisite: Upper-division standing.

INF 350E. Information Technology.

Design and use of information technologies, including interface design, trends in information technology development, usability, information retrieval, immersive media, and information architecture. Three lecture hours a week for one semester. Information Studies 350E and 350W may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

Topic 1: Technologies of the Book. Some sections offered on the letter-grade basis only. Additional prerequisite: Consent of instructor.

INF 350G. Information in Society.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

INF 350W. Information Technology.

Design and use of information technologies, including interface design, trends in information technology development, usability, information retrieval, immersive media, and information architecture. Web-based instruction; no class meetings. Information Studies 350E and 350W may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

General Information

Arts and Sciences Education

The academic program offered cooperatively by the College of Liberal Arts and the College of Natural Sciences provides what is sometimes referred to as a “liberal arts” or an “arts and sciences” education. No matter what area of knowledge a student intends to specialize in, the program of study will require courses in both colleges. The colleges work together to ensure that the individual interests and needs of the students pursuing an arts and sciences program are met.

Guidelines for developing a coherent plan of study are provided by major requirements, by sequential prerequisites, and by optional patterns of emphasis. Departmental majors, areas of specialization, and interdepartmental programs are designed to enable every student to study at least one field in depth. These programs are sufficiently broad in scope to allow students in the same major to develop quite different plans of study in pursuit of their individual interests and goals. Each student should choose courses that are intellectually challenging and that contribute to his or her long-term objectives.

Arts and sciences students are required to take a certain number of courses in the natural sciences, the social and behavioral sciences, and the humanities. Consequently, whatever their fields of study, they have the opportunity to learn something about the basic differences in the ways questions are raised and answered in several fields of inquiry, and about the techniques for validating the answers and putting the results to use. At the same time, they may gain some of the philosophical and historical perspectives that illuminate and give form to general or specialized knowledge and help to reveal its relevance.

Both teachers and students sometimes make the assumption that independent and creative study is exclusively for the gifted. In fact, the primary requirement is that the student be highly motivated, although he or she must also demonstrate ability. The departments that make up the two arts and sciences colleges encourage all qualified students to work independently in special honors courses and seminars and in conference, studio, or laboratory work. The student is free to define a major, to determine whether a given assignment will be an adventure or a chore, free to develop its latent possibilities or merely satisfy its explicit demands. True creativity presupposes more than a gift for innovation; it requires an unceasing commitment to thinking and working at one's highest level.

As competence is gained in a chosen field, the mind should be progressively sharpened, disciplined, and enriched. The student who leaves arts and sciences studies with an enhanced understanding of self and humankind, of cultural and historical heritage, of the world and the universe, and of the moral values that make it possible to live a

meaningful life, will have made the most of education, having gained something over and above the objective of vocational preparedness.

Financial Assistance Available through the College

Special scholarships established by individuals and foundations are open to undergraduates in the College of Liberal Arts. Financial assistance is also available in many College of Liberal Arts departments, centers, and programs for specific undergraduate majors.

Students with financial need should apply for aid through the Office of Student Financial Services. The Study Abroad Office also administers a number of awards designed to help qualified students participate in international programs.

Information on College of Liberal Arts scholarships is given at <http://www.utexas.edu/cola/student-affairs/Programs/Scholarships.php>.

Information on scholarships awarded through individual departments, centers, and programs is published on their Web sites.

Student Services

Academic Advising

The assistant dean for the Student Division, under the guidance of the associate dean, oversees advising activity for all students in the College of Liberal Arts. The Student Division provides administrative and logistical support for all operations relating to students, including adviser training, official degree checks, and graduation certification.

Liberal Arts advisers embrace the idea that advising is teaching, and foster student development through partnerships and practices dedicated to student success. Advisers work with students to identify and achieve academic and life goals and establish a timely graduation plan, encourage critical thinking strategies, and stimulate intellectual and cultural development. In these ways, advisers teach the value of a liberal arts education for engaged, self-directed learners.

Departmental advisers work directly with their students regarding course selection. They also initiate petitions affecting the major or minor; encourage co- and extracurricular activities, including study abroad; and administer honors programs.

Students who have not yet declared a major work directly with Student Division advisers, who guide students through the process of selecting courses and exploring majors. Student Division advisers also work with students on withdrawing from classes, appeals for exceptions to standard policies and procedures, graduation applications, certifying all graduates' academic programs, and nonacademic issues.

Every student in the college has access to appropriate advisers throughout his or her academic career. In addition, students can create and view their own advising audits using IDA, the Interactive Degree Audit system. The advising audit is produced for advising purposes only and is not an official degree audit.

Career Services

Liberal Arts Career Services (LACS) provides career assistance to current and newly graduated liberal arts students. The goal of the office is to connect College of Liberal Arts students with postgraduate and experiential learning opportunities throughout the world.

Through job search advising, résumé critiques, mock interviews, credit-based classes, and a variety of workshops and programs, LACS helps students develop the skills needed to succeed in the job search and in the workplace. LACS also provides comprehensive prelaw advising services,

including application assistance and review and law school admission advising.

To connect students to the workplace, LACS manages job and internship postings, provides job and internship fairs and events, and manages an on-campus interviewing program involving a variety of employers and opportunities. Students have access to career management tools and resources with an online recruiting system, LiberalArts@Work. LACS maintains a resource room with books, DVDs, company literature, and job postings.

Hundreds of companies are assisted by LACS each year through computer-based rsum searches, information sessions, and on-campus interviewing. Résumé books for a variety of career fields are available to employers at no charge.

As a complement to the assistance available from LACS, the University's Sanger Learning Center (<http://www.utexas.edu/ugs/slc>) and the Center for Strategic Advising and Career Counseling (<http://www.utexas.edu/ugs/csacc>) in the School of Undergraduate Studies provide career services to all students. The centers offer professional assistance to students in choosing or changing their majors or careers, and planning for graduate study.

For liberal arts students who have completed a teacher certification program, Education Career Services in the College of Education assists with the education job search. Certification candidates must register with Education Career Services, George I. Sánchez Building 294, at the beginning of their student-teaching semester. The office also assists those who wish to find teaching jobs at the college level or in private schools, community colleges, or overseas schools in which certification is not required.

The University makes no promise to secure employment for each graduate.

Admission and Registration

Admission

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in the *General Information Catalog*.

The Bachelor of Science in Environmental Science

Students must be admitted to the Bachelor of Science in Environmental Science degree program; they may apply for admission after completing the following requirements: The student must earn a grade of at least *C-* in Biology 311C, Chemistry 301, and Mathematics 408C or 408N; and a grade of at least *B-* in Geological Sciences 401 or 303. To be competitive for admission, the student must have a grade point average of at least 2.75 in these four courses.

Applications are evaluated after the end of each fall and spring semester. Students whose applications are denied may reapply through the supplemental admission process the following semester. Admission decisions are based on the student's grade point average in the basic sequence courses, his or her University grade point average, and other factors; these factors include, but are not limited to, the difficulty of the student's course load, course repetitions, and proven mathematical ability. Students should consult advisers in the College of Liberal Arts Student Advising Office, Dorothy Gebauer Building 2.200, for information about the application process and application deadlines. Once admitted to the

degree program, students will be advised in the Department of Geography and the Environment.

More information about the degree program is given in Bachelor of Science in Environmental Science (p. 311).

Registration

The *General Information Catalog* gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and the *General Information Catalog* are published on the registrar's Web site (<http://registrar.utexas.edu>).

Academic Policies and Procedures

Repetition of a Course

A student in the College of Liberal Arts may not repeat any course in which he or she has earned a grade of *C* or better.

Honors

University-wide honors are described in University Honors (p. 16) and in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees>). In addition, the College of Liberal Arts provides recognition through the Dean's Honor List and the Plan I Honors Programs. Students may also graduate with departmental honors and earn membership in one or more of the honorary scholastic societies open to undergraduates.

Dean's Honor List

The Dean's Honor List, prepared at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered; a grade of *F* in any course makes the student ineligible, regardless of other grades.

The Honor List is divided into five groups; according to the number of grade points they earn, students are listed under one of the following classifications:

- Summa cum Laude (67 or more grade points)
- Cum Laude Ampla et Magna (61–66 grade points)
- Magna cum Laude (58–60 grade points)
- Ampla cum Laude (55–57 grade points)
- Cum Laude (52–54 grade points)

Liberal Arts Honors Programs, Plan I

Liberal Arts Honors Programs coordinates the various honors opportunities available to Plan I students in the college: the Freshman Honors Program, the departmental honors programs, and the Liberal Arts Honors Program. This array of choices is designed for students who seek flexibility and choice in their honors work and for those who want to pursue an honors degree in a particular discipline.

The Freshman Honors Program gives selected students access to honors sections of lower-division introductory courses. Each student admitted to the program is required to take an active part in two courses in the first year: Liberal Arts Honors 102H, *The Idea of the Liberal Arts*, and one designated honors writing course. The program serves as a preparation

for departmental honors programs and for the upper-division Liberal Arts Honors Program. Students must apply to the Freshman Honors Program when they apply to the University. Admission decisions are based on the applicant's demonstrated commitment to the liberal arts, test scores, high school records, and an application essay.

The upper-division Liberal Arts Honors Program offers challenging and intensive interdisciplinary courses taught by distinguished faculty members. Students who have completed at least sixty semester hours of coursework and have earned a University grade point average of at least 3.50 are eligible to enroll in these courses. There is no application process.

The requirements for graduation with liberal arts honors are

1. Graduation from the College of Liberal Arts with any degree other than the Bachelor of Arts, Plan II
2. A University grade point average of at least 3.50 at graduation
3. Completion of at least three upper-division liberal arts honors (LAH) courses with at least a grade of A- in two of the courses and a grade of at least B in the third
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

The statement "Liberal Arts Honors" appears on the academic record of each graduate who fulfills these requirements. The student may earn both liberal arts honors and special honors in his or her major department.

The three upper-division liberal arts honors courses required for graduation with liberal arts honors may be used, with a fourth liberal arts honors course, to fulfill the twelve-hour minor requirement for the Bachelor of Arts, Plan I, unless the work in the minor is specified by the student's major department.

Departmental Honors Programs

Most departments in the College of Liberal Arts offer honors programs to their majors. Minimum requirements for departmental honors are

1. A University grade point average of at least 3.00
2. A three-semester-hour thesis or research project, or a reasonable equivalent, with a grade of at least B
3. Completion, with a grade point average of at least 3.50, of the coursework required for a major in the field
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Each department may establish additional or more rigorous requirements.

The statement "Special Honors in (name of field)" appears on the transcript of each graduate certified as having completed the honors program.

African and African Diaspora Studies Honors Program

Majors who plan to seek special honors in African and African diaspora studies should apply to the undergraduate adviser for admission to the honors program at least two semesters before they expect to graduate. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors are

1. African and African Diaspora Studies 679H, *Honors Tutorial Course*, with a grade of at least B in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors

3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

American Studies Honors Program

Majors who plan to seek special honors in American studies should apply to the honors adviser for admission to the honors program at least two semesters before they expect to graduate. A University grade point average of at least 3.00 is required for admission. In addition to the requirements of the major, requirements for graduation with special honors are

1. American Studies 679H, *Honors Tutorial Course*, with a grade of at least B in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Anthropology Honors Program

Majors who plan to seek special honors in anthropology should apply to the honors adviser for admission to the honors program no later than two semesters before they expect to graduate; the applicant must be recommended by the faculty member who will supervise the honors work. A University grade point average of at least 3.00 and a grade point average in anthropology of at least 3.50 are required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Anthropology 679H, *Honors Tutorial Course*, with a grade of A- in each half
2. Satisfactory performance on a comprehensive oral examination centered on the thesis completed in Anthropology 679H
3. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Asian American Studies Honors Program

Ethnic studies majors who plan to seek special honors in Asian American studies should apply to the honors adviser for admission to the honors program no later than two semesters before they expect to graduate. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the concentration, are

1. Asian American Studies 679H, *Honors Tutorial Course*, with a grade of A in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the concentration in Asian American studies and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Asian Cultures and Languages Honors Program

Majors who plan to seek special honors in Asian cultures and languages should apply to the honors adviser by April 30 for admission to the honors program the following fall. If April 30 falls on a weekend or an official university holiday, the application is due on the next business day. Requirements for admission are completion of sixty semester hours of coursework at the University, a University grade point average of at least 3.00, and a grade point average of at least 3.50 in Asian cultures and languages. Students must complete at least twelve semester hours of upper-division coursework in the Department of Asian Studies before

applying for admission to the honors program. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Asian Studies 678H, *Honors Tutorial Course*, with a grade of *A* in each half
2. A University grade point average of at least 3.00, and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Asian Studies Honors Program

Majors who plan to seek special honors in Asian studies should apply to the honors adviser by April 30 for admission to the honors program the following fall. If April 30 falls on a weekend or an official university holiday, the application is due on the next business day. Requirements for admission are completion of sixty semester hours of coursework at the University, a University grade point average of at least 3.00, and a grade point average in Asian studies of at least 3.50. Students must complete at least twelve semester hours of upper-division coursework in the Department of Asian Studies before applying for admission to the honors program. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Asian Studies 678H, *Honors Tutorial Course*, with a grade of *A* in each half
2. A University grade point average of at least 3.00, and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Classical Studies Honors Program

Majors who plan to seek special honors in classical studies should apply to the honors adviser for admission to the honors program at least one full academic year before they expect to graduate. A University grade point average of at least 3.00 is required for admission, as is a grade point average of at least 3.50 in all coursework required for the major and specialization that the student has completed. The requirements for graduation with special honors, which are in addition to the requirements of the major, are

1. Classical Civilization 679H, *Honors Tutorial Course*, or Ancient History and Classical Civilization 679H, with a grade of at least *A-* in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Classical Languages Honors Program

Majors who plan to seek special honors in Greek, special honors in Latin, or special honors in classics should apply to the honors adviser for admission to the honors program at least one full academic year before they expect to graduate. A University grade point average of at least 3.00 and a grade point average in Greek (for the Greek specialization), Latin (for the Latin specialization), or Greek, Latin, and classical civilization combined (for the classics specialization) of at least 3.50 are required for admission. The requirements for graduation with special honors, which are in addition to the requirements of the major, are

1. Greek 679H, Latin 679H, or Classical Civilization 679H, *Honors Tutorial Course*, with a grade of at least *A-* in each half

2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Economics Honors Program

Majors who plan to seek special honors in economics must apply to the honors adviser for admission to the honors program before the first registration period for the first semester of their senior year. Students are encouraged to apply as early as the beginning of the first semester of their sophomore year. A University grade point average of at least 3.00 and a grade point average in economics of at least 3.50 are required for admission. Before a student registers for Economics 378H, the student's thesis proposal must be approved first by the supervising instructor and then by the honors adviser. The requirements for graduation with special honors are

1. At least thirty-four semester hours in economics
2. Economics 378H, *Honors Tutorial Course I*, and Economics 379H, *Honors Tutorial Course II*, with a grade of at least *B* in each
3. Regular participation in designated honors courses
4. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

English Honors Program

Majors who plan to seek special honors in English should apply for admission to the honors program prior to their junior year. Application forms and information about the program are available in the English Advising Office, Parlin Hall 114, and on the Department of English Web site (<http://www.utexas.edu/cola/depts/english>). The requirements for graduation with special honors are

1. Completion of the requirements for a major in English, except that English 679HB is substituted for the research seminar
2. Completion of three or more upper-division English honors courses with grades of at least *B*; these courses may be counted toward the requirements of the major; two of these courses must be completed prior to enrolling in English 679HA
3. English 679H, *Honors Tutorial Course*, with a grade of at least *B+* in 679HA and a grade of at least *A-* in 679HB, resulting in the presentation and defense of a thesis judged to be worthy of honors
4. A University grade point average of at least 3.33 and a grade point average of at least 3.66 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

French Honors Program

Majors who plan to seek special honors may apply to the honors adviser for admission to the honors program during the semester in which they will complete sixty semester hours of coursework. To enter the program, a student must have completed at least sixty semester hours of coursework, including twelve hours of upper-division coursework in French. These twelve hours must include at least one course numbered 330 or above. A University grade point average of at least 3.00 and a grade point average in French of at least 3.50 are also required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. French 379H, *Honors Tutorial Course*, with a grade of at least *B*
2. Satisfactory performance on an honors examination
3. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Geography Honors Program

Majors who plan to seek special honors in geography should apply to the honors adviser for admission to the honors program no later than two semesters before they expect to graduate. A University grade point average of at least 3.00 and a grade point average in geography of at least 3.50 are required for admission. The requirements for graduation with special honors are

1. Geography 679H, *Honors Tutorial Course*, with a grade of at least *A-* in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

German Honors Program

Majors who plan to seek special honors in German should apply to the honors adviser for admission to the honors program upon completion of thirty semester hours; they must apply no later than upon completion of ninety semester hours. Admission is by means of a special examination; a University grade point average of at least 3.00 is also required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. German 679H, *Honors Tutorial Course*, with a grade of at least *A-* in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

German, Scandinavian, and Dutch Studies Honors Program

Majors who plan to seek special honors in German, Scandinavian, and Dutch studies should apply to the honors adviser for admission to the honors program upon completion of thirty semester hours; they must apply no later than upon completion of ninety semester hours. Admission is by means of a special examination; a University grade point average of at least 3.00 is also required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. German, Scandinavian, and Dutch Studies 679H, with a grade of at least *A-* in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Government Honors Program

Majors who plan to seek special honors in government should apply to the honors adviser for admission to the honors program in the spring semester of their junior year. A University grade point average of at least

3.00 is required for admission. The requirements for graduation with special honors are

1. Thirty-three semester hours of government, including Government 679H, *Honors Tutorial Course*, with a grade of at least *B* in each half
2. Regular participation in honors seminars
3. Satisfactory performance on a comprehensive oral or written honors examination
4. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Health and Society Honors Program

For the Health and Society Honors Program, students complete a two-semester (six hours) honors thesis under the supervision of a faculty member. Students interested in writing an honors thesis should contact the honors adviser, preferably in the first semester of their junior year, in order to discuss plans for the thesis and begin to lay the groundwork for their project. Students applying for the honors program must have a University grade point average (GPA) of at least 3.00, must have completed Health and Society 301 with a *B-* or better, and must have a GPA of at least 3.50 in their core health and society courses at the time of the application. Students are also expected to identify a thesis supervisor at the time of application. All honors program applications must be submitted to the program's honors adviser by February 15 in the spring prior to their senior year. If February 15 falls on a weekend or an official university holiday, the application is due on the next business day. The requirements for graduation with special honors are

1. Completion of liberal arts and health and society requirements
2. A University grade point average of at least 3.00
3. A health and society grade point average of at least 3.50
4. Health and Society 679H, *Honors Thesis*

History Honors Program

History majors who plan to seek special honors in history should apply to the honors adviser for admission to the honors program in the fall semester of the junior year. Application forms and information about the program are available in the History Undergraduate Advising Office, Garrison Hall 1.140. The requirements for graduation with special honors, which are in addition to the requirements of the major, are

1. History 347L, *Seminar in Historiography*, normally taken in the spring semester of the junior year; this course may be counted toward the thirty hours in history required for the major
2. History 679H, *Honors Tutorial Course*, with a grade of at least *B* in each half
3. Satisfactory performance on an oral examination centered on the thesis completed in History 679HB
4. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Normandy Scholar Program (NSP) students may substitute an approved upper-division NSP history course for the History 347L requirement.

Humanities Honors Program

Majors who plan to seek special honors in humanities should apply to the humanities adviser for admission to the honors program no later than

the first semester of the junior year. The requirements for graduation with special honors are

1. A major in humanities
2. Humanities 679H, *Honors Tutorial Course*, with a grade of at least A- in each half
3. A grade of "Recommended for Special Honors" on an oral examination, conducted and graded by faculty members qualified in the student's area of work, covering the thesis completed in Humanities 679H and a reading list
4. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Iberian and Latin American Languages and Cultures Honors Program

Honors will be awarded to students who successfully complete a significant scholarly essay (normally thirty to fifty pages in length). This project should be done in close collaboration with a department faculty member. Majors wishing to graduate with honors should speak with the department professor with whom they want to work. The requirements for graduation with special honors are:

1. Spanish 377H, *Honors Tutorial Course* or Portuguese 379H, *Honors Tutorial Course*, with a grade of at least A. Spanish 377H or Portuguese 379H, is offered by individual instruction. It cannot be undertaken before the senior capstone requirement, but may be taken simultaneously. Students who are admitted to the honors program conduct individual research on a literary, linguistic, or cultural topic. A faculty member in the Department of Spanish and Portuguese will supervise the student's research and writing. A second reader is required and may be either in the Department of Spanish and Portuguese or outside of the department. Spanish 377H or Portuguese 379H is taken in addition to the major requirements.
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors.
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree.

International Relations and Global Studies Honors Program

Majors who plan to seek special honors in international relations and global studies should apply to the honors adviser for admission to the honors program at least one full academic year before they expect to graduate. A University grade point average of at least 3.00 is required for admission, as is a grade point average of at least 3.50 in all coursework required for the major that the student has completed. The requirements for graduation with special honors are

1. International Relations and Global Studies 678H, *Honors Tutorial Course*, with a grade of at least an A- in each half
2. Satisfactory defense of the honors thesis completed in International Relations and Global Studies 678HB
3. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

The requirements for special honors are in addition to the requirements of the major, except that International Relations and Global Studies 678H

may be counted toward the major in place of International Relations and Global Studies 378, the capstone research course.

Islamic Studies Honors Program

Majors who plan to seek special honors in Islamic studies should apply to the honors adviser for admission to the honors program at the beginning of their third year; they must apply no later than the beginning of their last year before graduation. A University grade point average of at least 3.00 is required for admission to the honors program. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Islamic Studies 679HA, and 679HB, *Honors Tutorial Course*
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Italian Honors Program

Majors who plan to seek special honors in Italian may apply to the honors adviser for admission to the honors program during the semester in which they will complete sixty semester hours of coursework. To enter the program, a student must have completed at least sixty semester hours of coursework, including twelve hours of upper-division coursework in Italian. These twelve hours must include Italian 365, Italian 375, or Italian Civilization 360. A University grade point average of at least 3.00 and a grade point average in Italian of at least 3.50 are also required for admission. The requirements for graduation with special honors, which are in addition to the requirements of the major, are

1. Italian 379H, *Honors Tutorial Course*, with a grade of at least B
2. Satisfactory performance on an honors examination
3. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Jewish Studies Honors Program

Majors who plan to seek special honors in Jewish studies should apply to the honors adviser for admission to the honors program at the beginning of their third year; they must apply no later than the beginning of their last year before graduation. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Jewish Studies 679H, *Honors Tutorial Course*, with a grade of A in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Latin American Studies Honors Program

Majors who plan to seek special honors in Latin American studies should apply to the honors adviser for admission to the honors program no later than two semesters before they expect to graduate. A University grade point average of at least 3.00 and a grade point average in Latin American content coursework of at least 3.50 are required for admission. The requirements for graduation with special honors are

1. Latin American Studies 679H, *Honors Tutorial Course*, with a grade of at least *B* in each half and approval of the thesis by both the student's supervisor and the honors adviser
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Linguistics Honors Program

Upper-division linguistics majors who plan to seek special honors in linguistics should apply to the undergraduate honors adviser for admission to the honors program no later than the beginning of their last year. A University grade point average of at least 3.50 or, in exceptional cases, approval of the undergraduate adviser is required for admission. The requirements for graduation with special honors, which are in addition to the requirements of the major, are

1. Linguistics 679H, *Honors Tutorial Course*, with a grade of at least *B* in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours counted toward the degree

Mexican American Studies Honors Program

Ethnic studies majors who plan to seek special honors in Mexican American studies should apply to the undergraduate adviser for admission to the honors program no later than two semesters before they expect to graduate. The requirements for admission are a University grade point average of at least 3.00 and a grade point average at least 3.50 in the coursework required for the concentration in Mexican American studies. The requirements for graduation with special honors are

1. Thirty-nine semester hours of coursework in Mexican American studies, including Mexican American Studies 679H, *Honors Tutorial Course*
2. A grade of at least *A* in Mexican American Studies 361 or Mexican American Studies 362
3. *Mexican American Studies 679H*, with a grade of at least *B* in each half
4. Satisfactory performance on an oral presentation centered on the honors thesis completed in Mexican American Studies 679H
5. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the concentration and for honors
6. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Middle Eastern Languages and Cultures Honors Program

Majors who plan to seek special honors in Middle Eastern languages and literatures should apply to the honors adviser for admission to the honors program at the beginning of their third year; they must apply no later than the beginning of their last year before graduation. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Middle Eastern Languages and Cultures 679HA, and 679HB, *Honors Tutorial Course*
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors

3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Middle Eastern Studies Honors Program

Middle Eastern studies majors who plan to seek special honors in Middle Eastern studies should apply to the honors adviser for admission to the honors program no later than two semesters before they expect to graduate. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Middle Eastern Studies 679HA, and 679HB, *Honors Tutorial Course*
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Philosophy Honors Program

Majors who plan to seek special honors in philosophy should apply to the undergraduate adviser for admission to the honors program at least two semesters before they expect to graduate. Completion of at least nine semester hours of upper-division coursework in philosophy is required for admission, in addition to a University grade point average of at least 3.00 and a grade point average in philosophy of at least 3.50. The requirements for graduation with special honors are

1. Philosophy 371H or 375M, with a grade of at least *B*
2. Philosophy 679H, *Honors Tutorial Course*, with a grade of at least *B* in both 679HA and 679HB
3. Satisfactory performance on an oral examination centered on the thesis completed in Philosophy 679H
4. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Philosophy 371H or 375M may be counted toward the requirements of the major; Philosophy 679H is taken in addition to the requirements of the major.

Plan II Honors Program: Special Honors

Plan II students who plan to seek special honors in Plan II should apply to the director of the Plan II Honors Program for enrollment in Tutorial Course 660H, *Thesis Course: Honors*, at least two semesters before they expect to graduate. A University grade point average of at least 3.50 is required. The requirements for graduation with special honors are

1. Tutorial Course 660H with a grade of at least *A* in each half, or a departmental equivalent with a grade of at least *A*
2. Satisfactory performance on an oral honors examination centered on the thesis completed in Tutorial Course 660H
3. A University grade point average of at least 3.50
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Psychology Honors Program

Prospective candidates for special honors in psychology should apply to the honors adviser for admission to the honors program during the junior year. The application deadline is one week before the first registration period for the semester in which the student wants to enter the program. Requirements for admission are

1. A major in psychology
2. A University grade point average of at least 3.25 and a grade point average in psychology of at least 3.50
3. Completion of the following before entering the honors program: Psychology 301 or the equivalent with a grade of at least C, Psychology 418 with a grade of at least C, and two additional psychology courses
4. Consent of the honors adviser

The requirements for graduation with special honors are

1. Thirty-three semester hours of psychology, including Psychology 458, 158H, 359H, and 379H; the student must earn grades of at least B in Psychology 359H, *Honors Research I*, and Psychology 379H, *Honors Research II*
2. A University grade point average of at least 3.25 and a grade point average in all psychology courses of at least 3.50
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Religious Studies Honors Program

Majors who plan to seek special honors in religious studies should apply to the honors adviser for admission to the honors program by the end of their junior year. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors are

1. Thirty-three semester hours of religious studies coursework, including completion of all major requirements
2. Religious Studies 679HA, *Honors Tutorial Course*, with a grade of at least B
3. Religious Studies 679HB, *Honors Tutorial Course*, with a grade of at least A and approval of the thesis by the chair of the Department of Religious Studies
4. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
5. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Rhetoric and Writing Honors Program

Majors who plan to seek special honors in rhetoric and writing should apply to the honors adviser for admission to the program at the beginning of their third year; they must apply no later than a year before they expect to graduate. Application forms and information about the program are available from the rhetoric and writing adviser. A University grade point average of at least 3.00 is required for admission, as is a grade point average of at least 3.50 in all coursework required of the major that the student has completed.

The requirements for graduation with special honors are

1. Rhetoric and Writing 679H, *Honors Tutorial Course*, with a grade of at least A- in each half
2. A grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree.

Russian, East European, and Eurasian Studies Honors Program

Majors who plan to seek special honors in Russian, East European, and Eurasian studies should apply to the honors adviser for admission to the honors program during the junior year or the first semester of the senior

year. The application deadline is one week before the first registration period for the semester in which the student wants to enter the program. Requirements for graduation with special honors are

1. Russian, East European, and Eurasian Studies 679H, *Honors Tutorial Course*, with a grade of at least B in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Russian, East European, and Eurasian Studies 679H, *Honors Tutorial Course* is taken in addition to the requirements of the major.

Sociology Honors Program

Majors who plan to seek special honors in sociology should apply to the honors adviser by October 1 for admission to the honors program the following spring; they should apply by April 1 for admission the following summer or fall. If October 1 or April 1 fall on a weekend or an official university holiday, the application is due on the next business day. Requirements for admission are completion of sixty semester hours of coursework, a University grade point average of at least 3.00, and a grade point average in sociology of at least 3.50. Students must complete Sociology 302 and either 317L or an approved equivalent before applying for admission to the honors program; they should be enrolled in Sociology 317M and 379M no later than the semester in which they begin the honors thesis coursework. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Sociology 679H, *Honors Tutorial Course*, with a grade of at least A- in each half
2. Satisfactory performance on an oral defense of the senior thesis completed in the second half of Sociology 679H
3. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Urban Studies Honors Program

Majors who plan to seek special honors in urban studies should apply to the honors adviser for admission to the honors program at the beginning of their third year; they must apply no later than a year before they expect to graduate. A University grade point average of at least 3.00 is required for admission. The requirements for graduation with special honors are in addition to the requirements for the major; however, honors students may substitute Urban Studies 679H for Urban Studies 370. The requirements are

1. Urban Studies 679H, *Honors Tutorial Course*, with a grade of at least A- in each half
2. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
3. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Women's and Gender Studies Honors Program

Majors who plan to seek special honors in women's and gender studies should apply to the honors adviser or undergraduate adviser for admission to the honors program no later than two semesters before they expect to graduate; the applicant must be recommended by the faculty member who will supervise the honors work. A University grade point average of at least 3.00 and a grade point average in women's

and gender studies of at least 3.50 are required for admission. The requirements for graduation with special honors, which are in addition to the requirements for the major, are

1. Women's and Gender Studies 679H, *Honors Tutorial Course*, with a grade of at least A in each half
2. Satisfactory performance on a comprehensive oral examination centered on the thesis completed in Women's and Gender Studies 679H, *Honors Tutorial Course*
3. A University grade point average of at least 3.00 and a grade point average of at least 3.50 in the coursework required for the major and for honors
4. Completion in residence at the University of at least sixty semester hours of coursework counted toward the degree

Scholastic Honorary Societies

In addition to Alpha Lambda Delta and Phi Eta Sigma, honor societies for qualified freshman students in all academic fields, the University sponsors chapters of the following national organizations for which College of Liberal Arts students are eligible.

- *Alpha Epsilon Delta*. National honorary premedical fraternity for students who have completed at least three semesters of premedical work.
- *Alpha Kappa Delta*. National honorary sociology fraternity.
- *Delta Phi Alpha*. National honorary German fraternity.
- *Dobro Slovo*. National honorary Slavic fraternity.
- *Eta Sigma Phi*. National honorary classical languages fraternity.
- *Gamma Theta Upsilon*. National honorary geography fraternity.
- *Iota Iota Iota*. National honorary Women's Studies society.
- *Kappa Kappa Psi*. National honorary band fraternity.
- *Mortar Board*. National honorary society for seniors.
- *Omicron Delta Epsilon*. National honorary economics fraternity.
- *Omicron Delta Kappa*. National honorary leadership fraternity.
- *Phi Alpha Theta*. National honorary history fraternity.
- *Phi Beta Kappa*. National honorary society recognizing academic achievement in the arts and sciences.
- *Phi Kappa Phi*. National honor society open to students in all academic fields.
- *Pi Delta Phi*. National honorary French fraternity.
- *Pi Sigma Alpha*. National honorary political science fraternity.
- *Psi Chi*. National honorary psychology fraternity.
- *Sigma Delta Pi*. National honorary Spanish fraternity.
- *Sigma Tau Delta*. National honorary English society.
- *Tau Beta Sigma*. National honorary band society.

Graduation

Special Requirements of the College

All students must fulfill the General Requirements (p. 17) for graduation. Students in the College of Liberal Arts must also fulfill the following requirements.

1. The University requires that the student complete in residence at least sixty semester hours of the coursework counted toward the degree. For the Bachelor of Arts, Plan I, the Bachelor of Science in Environmental Science, and the Bachelor of Science in Psychology, these sixty hours must include at least eighteen hours in the major. For the Bachelor of Arts, Plan II, thirty of these sixty hours must be taken in the College of Liberal Arts or the College of Natural Sciences.

2. The University requires that at least six semester hours of advanced coursework in the major be completed in residence. Additional requirements of the College of Liberal Arts are given later in this chapter with the requirements of the college's four degrees.
3. Students may not complete degree requirements at another institution of higher education during the semester in which the degree is to be conferred.

Degree Audit and Applying for Graduation

A student in the College of Liberal Arts is expected to declare a major by the time he or she has completed sixty semester hours of coursework. The student must initiate major declaration in the department housing the major.

An official degree audit compares a student's coursework with degree requirements for a particular degree, major, and catalog. The degree audit normally provides an accurate statement of requirements, but the student is responsible for knowing the requirements for the degree as stated in a catalog under which he or she is entitled to graduate and for registering so as to fulfill these requirements. The student should seek an official ruling in the major department or in the Student Division before registering, if in doubt about any requirement.

Students are strongly encouraged to schedule an official degree check with a Student Division adviser once they are one semester away from graduating.

In the semester or summer session in which the degree is to be conferred, the candidate must be registered at the University and must file a graduation application form either online or in the Student Division. This must be done by the deadline to apply for an undergraduate degree, which is given in the official academic calendar. No degree will be conferred unless the graduation application form has been filed on time.

Degrees and Programs

The College of Liberal Arts offers four degree programs: the Bachelor of Arts, Plan I; the Bachelor of Arts, Plan II; the Bachelor of Science in Environmental Science with a major in geographical sciences; and the Bachelor of Science in Psychology. The requirements of the Bachelor of Arts, Plan I are described in Bachelor of Arts, Plan I (p. 296). The Bachelor of Arts, Plan II, a broad liberal arts honors program for outstanding students, is described in Bachelor of Arts, Plan II (p. 308).

The Bachelor of Science in Environmental Science, offered by the College of Liberal Arts, the College of Natural Sciences, and the Jackson School of Geological Sciences, is designed for students interested in an interdisciplinary scientific perspective on environmental issues, analysis, and management. Students pursuing the degree through the College of Liberal Arts major in geographical sciences. The requirements for the degree are given in Bachelor of Science in Environmental Science (p. 311).

The Bachelor of Science in Psychology is designed to offer students a more extensive scientific program than the Bachelor of Arts with a major in psychology. The requirements for the BPSy are given in Bachelor of Science in Psychology (p. 312).

A student may not earn more than one Bachelor of Arts degree from the University. A student may not earn more than one Bachelor of Science in Environmental Science degree from the University. A student may not earn both the Bachelor of Arts with a major in psychology and the Bachelor of Science in Psychology. A student may not earn both the Bachelor of Arts with an intercollege major in kinesiology and health and the Bachelor of Science in Kinesiology and Health.

The title of a graduate's degree appears on his or her diploma, but the major does not. Both the degree and the major appear on the graduate's University transcript.

Applicability of Certain Courses

Physical Activity Courses

Physical activity (PED) courses and Kinesiology 119 may not be counted toward a degree in the College of Liberal Arts. However, they are counted as courses for which the student is enrolled, and the grades are included in the grade point average.

ROTC Courses

ROTC units are maintained on campus by the Departments of Air Force Science, Military Science, and Naval Science. Information about each program is available from the chair of the department.

Nine semester hours of designated University of Texas at Austin coursework in air force science, military science, or naval science may be counted toward any degree in the College of Liberal Arts. In general, this credit may be used only as electives or to fulfill the writing requirement. However, cross-listed courses may be used as appropriate to fulfill other degree requirements. A list of approved ROTC courses is available in the College of Liberal Arts, Student Division, Dorothy Gebauer Building 2.200.

Conference Courses and Internship Courses

No more than six semester hours of credit earned in conference courses may be counted toward a single major in the College of Liberal Arts; no more than nine semester hours may be counted toward the degree.

No more than six semester hours of credit earned in internship courses may be counted toward a single major in the College of Liberal Arts; no more than nine semester hours may be counted toward the degree.

In addition, no more than nine semester hours of conference courses and internship courses combined may be counted toward a single major in the College of Liberal Arts; no more than twelve hours of conference courses and internship courses combined may be counted toward the degree.

Bible Courses

Bible courses may be counted as lower-division electives in College of Liberal Arts degree programs that have room for such electives. No more than twelve semester hours of Bible courses may be counted toward any degree offered by the University.

Admission Deficiencies

Students admitted to the University with deficiencies in high school units must remove them by the means prescribed in the *General Information Catalog*. Contact the dean's office for further information.

Correspondence and Extension Courses

Credit that a University student in residence earns simultaneously by correspondence or extension from the University or elsewhere or in residence at another school will not be counted toward a degree in the College of Liberal Arts unless specifically approved in advance by the dean. In very special circumstances, the dean may allow a student in residence to take one or more courses by extension or correspondence. No more than 30 percent of the semester hours required for any degree offered in the College of Liberal Arts may be taken by correspondence. For additional information about correspondence work by resident students, see the *General Information Catalog* (<http://catalog.utexas.edu/general-information>).

Courses Taken on the Pass/Fail Basis

No more than nineteen semester hours of coursework completed on the pass/fail basis may be counted toward the Bachelor of Arts, Plan II; no more than sixteen semester hours of such coursework may be counted toward the other degrees in the college. In general, only electives may be taken on the pass/fail basis. Complete rules on registration on the pass/fail basis are given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information>).

Courses in a Single Field

No more than thirty-six semester hours (thirty-nine for the Bachelor of Arts, Plan I) may be counted in any one field of study, including the major, unless major requirements state otherwise. No more than thirty-six semester hours (thirty-nine for the Bachelor of Arts, Plan I) may be counted in any one college or school other than the College of Liberal Arts or the College of Natural Sciences.

UTeach-Liberal Arts

UTeach-Liberal Arts is a professional teacher preparation program for liberal arts students pursuing degrees in Arabic, Chinese, economics, English, French, history, geography, German, government, Japanese, Latin, Russian, and Spanish. Students may seek certification to teach middle or high school grades for the following certification areas:

1. History, grades eight through twelve
2. Language arts and reading, grades four through eight or eight through twelve
3. Languages other than English, grades six through twelve
4. Social studies, grades four through eight or eight through twelve

UTeach-Liberal Arts offers a four-semester program for undergraduate students and a three-semester program for postbaccalaureate students. Admission into the program is required. Undergraduate students may enter the program as early as the second semester of their freshman year.

UTeach-Liberal Arts students benefit from an innovative program that emphasizes a practical, hands-on field experience in local public school classrooms combined with intensive coursework. The program provides students with an excellent firsthand glimpse into the world of teaching. Other key features of the program are mentorship and seminar instruction, cohort support, discipline-specific pedagogical preparation, literacy training, and innovative use of technology. More information about UTeach-Liberal Arts and the admission process is available online at <http://www.utexas.edu/cola/progs/uteach/>.

Program in Comparative Literature

The program in comparative literature approaches the study of literature from a variety of viewpoints rather than from the viewpoint of a single language or nation. Courses in literary history, practical criticism, and critical theory stress the relationship between literature and other disciplines in the humanities, the arts, and the social sciences. The program offers both the doctoral and the master's degree and sponsors courses on both the graduate and the undergraduate level. All comparative literature courses are conducted in English.

To introduce undergraduates to the field of study, the comparative literature faculty has designed a cluster of courses in critical thinking and world literature. These courses concentrate on writing and thinking critically, with a focus on literary texts drawn from around the world, in the context of an interdisciplinary and international program. The twelve-hour cluster complements many majors in liberal arts; with the approval of the student's major department, it may be used to fulfill the minor

requirement. More information is available from the comparative literature program.

Transcript-Recognized Certificate Programs

The College of Liberal Arts offers three certificate programs, which are open to all degree-seeking University undergraduates. Undergraduates who complete certificate requirements in conjunction with their degree requirements or within one year after earning the degree receive recognition on the University transcript; students in integrated undergraduate/graduate programs must complete certificate requirements within one year after they complete their undergraduate degree requirements. A maximum of nine semester hours of certificate coursework may be taken after the student has earned the undergraduate degree. At least half of the required certificate coursework must be completed in residence at the University; some programs may require more work in residence.

A student may not earn a certificate in the same field as his or her major, and at least one certificate course must be outside the requirements of the major. However, certificate courses outside the major may be counted toward other degree requirements.

Students should apply for the certificate when they apply for graduation or when they complete the certificate program, whichever is later. Transcript recognition is awarded at the end of that semester or summer session.

Students outside the College of Liberal Arts should contact their dean's office for permission to complete a certificate program and for the applicability of certificate requirements toward their individual degrees. Students in the College of Liberal Arts may complete certificate programs offered through other colleges. These are described in Transcript-Recognized Certificate Programs (p. 13) and by each college that offers a transcript-recognized certificate program. Certificate programs that do not lead to transcript recognition are also described in the respective college's catalog section.

Certificate in Computational Science and Engineering

See the Certificate in Computational Science and Engineering (p. 14).

African Studies Certificate

The African Studies Certificate allows students to engage with scholarship on African peoples, cultures, and history through the theoretical lens of black studies. Through the certificate, undergraduates develop interdisciplinary expertise in African studies related to the student's personal field of interest. The African and African Diaspora Studies undergraduate adviser (AADS) is available to steer certificate candidates towards areas of interest, which can include: expressive cultures, gender and sexuality studies, literature, language, history, politics, and society as these topics relate to theories of blackness on the African continent.

The certificate program requires eighteen semester hours of coursework, including at least nine semester hours completed in residence.

Students must fulfill the following requirements:

1. African and African Diaspora Studies 303, *Introduction to Black Studies*, or an alternative course taken with approval from AADS
2. African and African Diaspora Studies 310K, *Introduction to Modern Africa*, or an alternative course taken with approval from AADS
3. Twelve additional semester hours (upper- or lower-division) chosen from courses on an approved list or with prior approval from AADS

4. One of the courses listed in requirement 3 must carry a writing flag from the School of Undergraduate Studies and/or place an emphasis on research and writing, such as African and African Diaspora Studies 372G or an alternative course taken with approval from AADS
5. Earn a grade of at least C in each of the courses taken to fulfill the African Studies Certificate requirements

Each semester the list of approved courses that meet the requirements above is available in the Department of African and African Diaspora Studies undergraduate advising office.

Courses the student has completed at the time of application to the program may be counted toward the certificate. Students may not earn a certificate in the same field of study as their major and at least one course counting toward this certificate must be taken outside of the requirements of the student's undergraduate degree. Students apply for transcript-recognized undergraduate academic certificates at the time they complete their undergraduate degree or the certificate program, whichever comes later. Transcript recognition is awarded at that time.

Core Texts and Ideas Certificate

The certificate program in core texts and ideas is designed to provide a coherent path through the University's core curriculum with an integrated, interdisciplinary sequence of courses on great works of philosophy, literature, science, and the arts that emphasizes debates about fundamental questions of enduring human concern. The program provides a grounding in the major ideas that have shaped the Western world and gives students the opportunity to study Eastern works as well. Students complete courses in four required areas and two elective areas. The four required areas are the philosophy and literature of the ancient world, especially Greece; basic texts of major world religions; the history of political philosophy; and the principles that formed the basis for the founding of the United States. Elective areas include philosophy, the arts, history, literature, and the history and philosophy of science and mathematics.

The certificate program requires eighteen semester hours of coursework, including at least twelve hours completed in residence. Students must fulfill the following requirements:

1. The requirements of an undergraduate major
2. The following twelve semester hours of coursework:
 - a. Philosophy and literature of the ancient world: Core Texts and Ideas 301, *Ancient Philosophy and Literature*
 - b. History of political philosophy: Core Texts and Ideas 302, *Classics of Social and Political Thought* or Core Texts and Ideas 303, *Competing Visions of the Good Life*
 - c. Basic texts of major world religions: Core Texts and Ideas 304, *World Religions: Traditions and Texts*
 - d. Principles of the founding of the United States: Government 312P, *Constitutional Principles: Core Texts*
3. Six additional semester hours of coursework chosen from a list of approved electives available from the academic adviser in the Thomas Jefferson Center for Core Texts and Ideas

All courses must be taken on the letter-grade basis. Each semester a list of approved alternatives to the courses in the four required areas is available from the academic adviser in the Thomas Jefferson Center for the Study of Core Texts and Ideas.

Creative Writing Certificate

The Creative Writing Certificate is intended for any University student interested in advanced study of creative writing, both as reader and as writer. Those who plan to pursue the certificate should apply to the

program adviser for admission no later than the end of their sophomore year. More information about the Creative Writing Certificate is given at the Department of English Web Site (<http://www.utexas.edu/cola/depts/english/undergraduate-program/creative-writing.php>).

The certificate program requires eighteen semester hours of coursework, including at least nine hours completed in residence. Students must fulfill the following requirements:

1. The requirements of an undergraduate major
2. Six semester hours of coursework from English, theatre and dance, or radio-television-film.
3. Creative Writing 325F, 325M, or 325P
4. Creative Writing 330
5. Creative Writing 340F, 340P, or Creative Writing 660 (part A).
6. Creative Writing 355F, 355P, Creative Writing 660 (part B), or three hours of coursework chosen from a list of approved courses available from the program adviser.
7. Earn a grade of at least C- in each course taken to fulfill the Creative Writing Certificate requirements.

Honors Option

To earn an Honors Creative Writing Certificate, students must fulfill the following additional requirements:

1. Creative Writing 370H, *Honors Creative Writing Project*
2. A University Grade Point Average (GPA) of at least 3.66 in the coursework required for the Creative Writing Certificate and a cumulative University GPA of at least 3.33.

History and Philosophy of Science Certificate

The History and Philosophy of Science Certificate provides students an opportunity to gain a coherent, cross-disciplinary command of the methods and findings that the liberal arts have contributed to our understanding of the sciences. Students analyze the dynamic development, concepts, and roles in society of various sciences, as well as the personal, dramatic struggles of famous scientists. Students must complete four courses in two required areas: history of science, and philosophy of science, as well two electives to be selected from a list of pre-approved courses in history, philosophy, astronomy, physics, or core texts and ideas.

The certificate program requires eighteen semester hours of coursework, of which at least twelve semester hours of coursework must be upper-division, and including at least nine semester hours completed in residence.

Students must fulfill the following requirements:

1. History 322D, *The Scientific Revolution of the Seventeenth Century*, and History 322M, *History of Modern Science*
2. Philosophy 313, *Introductory Symbolic Logic*, or Philosophy 363, *Scientific Method*
3. Philosophy 316K, *Science and Philosophy*, or Philosophy 322, *Science and the Modern World*
4. Six additional semester credit hours, chosen from an approved list

Each semester, the list of approved courses that meet the requirements above is available in the Department of History undergraduate advising office.

Courses the student has completed at the time of application to the program may be counted toward the certificate. Students apply for transcript-recognized undergraduate academic certificates at the time

they complete their undergraduate degree or the certificate program, whichever comes later. Transcript recognition is awarded at that time.

Indigenous Studies Certificate

The main goal of the indigenous studies certificate program is to encourage active intellectual and community engagement with indigenous peoples and cultures. The program allows undergraduate students to develop interdisciplinary expertise in indigenous studies and comparative approaches to their primary field of interest. Each student develops a specialization within the program that is tailored to his or her academic and professional development. Students concentrate their studies in two of the following eight strands: Mayan culture, Mesoamerica, indigenous arts, indigenous peoples of Latin America, indigenous peoples in the United States and Canada, indigenous peoples of the Americas, indigenous politics and human rights, and indigenous writing and language.

Courses the student has completed at the time of application to the program may be counted toward the certificate. Upon completion of the course requirements, the student writes a three- to four-page essay that describes his or her intellectual work in the program and how the experience contributed to his or her academic career at the University.

The certificate program requires eighteen semester hours of coursework, including at least nine semester hours completed in residence. Students must fulfill the following requirements:

1. The requirements of an undergraduate major
2. Three semester hours in a lower-division introductory or foundational course with indigenous studies content, such as English 314V (Topic 5: *Native American Literature and Culture*), History 317L (Topic 3: *Introduction to Native American History*), or other courses from an approved list
3. Six semester hours of approved coursework in each of two of the following eight strands: Mayan culture, Mesoamerica, indigenous arts, indigenous peoples of Latin America, indigenous peoples in the United States and Canada, indigenous peoples of the Americas, indigenous politics and human rights, indigenous writing and language
4. An approved upper-division capstone course in indigenous studies chosen from courses on an approved list
5. At least three courses must be taken in a field of study outside of the student's major department

Each semester a list of approved courses that meet the requirements above is available in the Department of Anthropology undergraduate advising office.

Lesbian, Gay, Bisexual, Transgender, and Queer/Sexualities Studies Certificate

The certificate program requires eighteen semester hours of coursework, including at least nine semester hours completed in residence.

Students must fulfill the following requirements:

1. Women's and Gender Studies 303, *Introduction to Lesbian, Gay, Bisexual, Transgender, and Queer Studies*, or Women's and Gender Studies 305, *Introduction to Women's and Gender Studies*
2. Women's and Gender Studies 301 (Topic 12: *Gay and Lesbian Literature and Culture*) or an alternative course taken with prior approval from the LGBTQ/Sexualities Research Cluster faculty committee
3. Twelve additional upper-division semester hours of coursework chosen from courses on an approved list. At least three of these hours must be taken from outside the student's major field of study.

4. Earn a grade of at least a C in each of the courses taken to fulfill the LGBTQ/Sexualities Studies certificate requirements

Each semester, the list of approved courses that meet the requirements above is available in the Center for Women's and Gender Studies undergraduate advising office. The list of courses known as the "Pink Book" is published on the Women's and Gender Studies Web site (<http://www.utexas.edu/cola/centers/cwgs/faculty/research-clusters/LGBTQ-sexualities.php>).

Courses the student has completed at the time of application to the program may be counted toward the certificate. Students apply for transcript-recognized undergraduate academic certificates at the time they complete their undergraduate degree or the certificate program, whichever comes later. Transcript recognition is awarded at that time.

Concentrations

A concentration allows students to pursue a program of interdisciplinary specialization in addition to the major. Within the general requirements for the degree of Bachelor of Arts and the requirements of the major, a student may also complete a concentration in one of the following programs offered by the College of Liberal Arts.

Courses required for a concentration may also be counted toward the requirements of the Bachelor of Arts, Plan I, when applicable. Students in other degree programs and colleges should check with their dean's offices about course applicability and restrictions. The following concentrations are not recognized on the student's transcript.

Cultural Studies

Students who wish to enter the cultural studies concentration should consult the undergraduate adviser in the Américo Paredes Center for Cultural Studies.

The concentration is designed to complement the student's major, with courses drawn from the humanities, the social sciences, and the arts. With the approval of his or her dean and the cultural studies adviser, a student outside the College of Liberal Arts may complete a concentration in cultural studies.

The student must fulfill the following requirements:

1. Completion of the requirements of a major
2. Two of the following courses: Anthropology 305, 325L, Communication 309, Mexican American Studies 307, Music 342, Radio-Television-Film 314, Theatre and Dance 357T
3. Cultural Studies 340
4. Three additional courses from a group of cultural studies–related courses prescribed by the Cultural Studies Curriculum Committee
5. Two additional courses from a group of supporting courses prescribed by the Cultural Studies Curriculum Committee

Science, Technology, and Society

The goal of this concentration is to prepare students to use emerging technologies humanely and critically; to participate thoughtfully in public discourse about scientific and technological innovation; and to understand the consequences of public and private decisions about scientific advancements and technologies. The concentration is designed to allow students to gain experience in analyzing historical, philosophical, rhetorical, economic, political, aesthetic, and scientific practices and methods of inquiry. Students have the opportunity to explore the social impacts of rapid scientific and technological change. The program integrates approaches from the liberal arts, social sciences, and humanities with new developments in science and technology. The science, technology, and society concentration focuses on several

key areas, including nanotechnology, gaming, surveillance, mobile technologies, e-society, education, health care, and computer-mediated communication.

The program of study is designed to complement the major by helping the student to gain a richer and more profound understanding of the dynamic relationships among science, technology, culture, and the individual. The concentration is open to liberal arts majors and, with the approval of their deans, to students in other colleges and schools.

The student must fulfill the following requirements:

1. A departmental major or the equivalent
2. Eighteen semester hours of coursework, consisting of Science, Technology, and Society 319 or 321; Science, Technology, and Society 331; nine semester hours of related coursework; and a capstone seminar, Science, Technology, and Society 360

A list of related courses that will fulfill requirement 2 is available from the science, technology, and society adviser; courses that are not on the list may be used with written consent of the adviser.

Western Civilization and American Institutions

The concentration in western civilization and American institutions is designed to complement departmental specialization with an integrated sequence of courses that emphasizes a multidisciplinary approach to the major ideas of western civilization and their impact on the development of the institutions of the United States. Students who wish to enter the concentration should consult the faculty adviser. With the approval of his or her dean and the western civilization and American institutions adviser, a student outside the College of Liberal Arts may complete the concentration.

The student must fulfill the following requirements:

1. Completion of the requirements of a major
2. Three semester hours of Government 335M, *Topics in Political Thought*, chosen from a list of topics approved by the western civilization and American institutions faculty adviser
3. Fifteen additional semester hours of coursework in western civilization and American institutions, chosen in consultation with the faculty adviser for the concentration, from a list prescribed by the western civilization and American institutions faculty committee

Bachelor of Arts, Plan I

The requirements for the Bachelor of Arts under Plan I are designed to give each student flexibility in the selection of courses to meet individual needs.

A total of 120 semester hours is required. Thirty-six hours must be in upper-division courses. At least sixty hours, including twenty-one hours of upper-division coursework, must be completed in residence at the University; at least twenty-four of the last thirty hours must be completed in residence at the University. Provided residence rules are met, credit may be earned by examination, by extension, by correspondence (up to 30 percent of the hours required for the degree), or, with the approval of the dean, by work transferred from another institution. Up to sixteen semester hours of classroom and/or correspondence coursework may be taken on the pass/fail basis; this coursework may be counted only as electives.

All students must complete the University's Core Curriculum (p. 20). In the process of fulfilling the core curriculum and other degree requirements, all

students are expected to complete courses with content in the following four areas:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course

Courses with sufficient content in these areas will be identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>) by the appropriate flags. A course may carry more than one flag. The School of Undergraduate Studies monitors flagged courses to ensure that they meet the guidelines set by the General Faculty.

The specific requirements for the Bachelor of Arts, Plan I, consist of prescribed work, major and minor requirements, and electives. In some cases, a course that fulfills one of these requirements may also be counted toward the core curriculum; these courses are identified below.

Courses in the major and minor may also be used to fulfill prescribed work requirements unless expressly prohibited. A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills one requirement may also be used to fulfill a flag requirement.

The student must fulfill the University's General Requirements (p. 17) for graduation and the requirements of the College of Liberal Arts. University graduation requirements include a grade point average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension) for which a grade or symbol other than Q, W, X, or CR is recorded; for the BA, Plan I, the student must also earn a grade point average of at least 2.00 in courses taken at the University and counted toward the major requirements. The student should also refer to the description of his or her major in the section Majors and Minors below, since some majors include higher minimum scholastic requirements.

More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

Prescribed Work

1. *Writing and Literature*: English 316L, 316M, or 316N and two courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag. One of these courses must be upper-division. Courses that carry a writing flag are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.
2. *Foreign language*: Proficiency in a language other than English is required.

The study of a second language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a second language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the second language for study in their chosen discipline. An intermediate level of competency as determined by the completion of any one of the following options:

 - a. Certified proficiency on a placement or credit-by-exam test.

b. Students with previous experience in the language they plan to use to meet the language requirement must take a language placement test. A student may not select for credit a language course below this placement level without departmental permission.

c. A passing grade in a language course listed below:

Requirements		Hours
ASL 611C	Accelerated Second-Year American Sign Language	6
ASL 311D	American Sign Language III: Intermediate	3
ASL 312L	Second-Year American Sign Language II	3
ARA 611C	Intensive Arabic II	6
BEN 312L	Second-Year Bengali II	3
CHI 612	Accelerated Second-Year Chinese	6
CHI 412L	Second-Year Chinese II	4
CZ 611C	Intensive Czech II	6
CZ 412L	Second-Year Czech II	4
DAN 612	Accelerated Second-Year Danish	6
DCH 612	Accelerated Second-Year Dutch	6
FR 611C	Intermediate French	6
GER 612	Accelerated Second-Year German: Readings in Modern German	6
GK 312K	Intermediate Greek II	3
GK 312L	Intermediate Greek II: Biblical Greek	3
GK 610C	Intermediate Modern Greek	6
GK 310K	Second-Year Modern Greek II	3
HEB 612C	Intensive Biblical Hebrew II	6
HEB 611C	Intensive Hebrew II	6
HIN 312L	Second-Year Hindi II	3
ITL 611C	Intermediate Italian	6
JPN 611D	Intermediate Japanese	6
KOR 412L	Second-Year Korean II	4
LAT 311	Intermediate Latin I	3
MAL 312L	Second-Year Malayalam II	3
NOR 612	Accelerated Second-Year Norwegian	6
PSH 312L	Second-Year Pashto II	3
PRS 611C	Intensive Persian II	6
PRS 612C	Intensive Persian for Heritage Speakers	6
POL 611C	Intensive Polish II	6
POL 312L	Second-Year Polish II	3
POR 611D	Intermediate Portuguese II	6
RUS 611C	Intensive Russian II	6
RUS 412L	Second-Year Russian II	4
SAN 312L	Second-Year Sanskrit II	3
S C 312L	Second-Year Serbian/Croatian II	3
SEL 611C	Intensive Slavic and Eurasian Languages II	6
SEL 312L	Second-Year Slavic and Eurasian Languages II	3
SPN 611D	Intermediate Spanish II	6
SPN 612	Accelerated Intermediate Spanish for Heritage Learners	6
SWA 611C	Intensive Swahili II	6
SWE 612	Accelerated Second-Year Swedish	6
TAM 312L	Second-Year Tamil II	3
TEL 312L	Second-Year Telugu II	3
TUR 611C	Intensive Turkish II	6
URD 312L	Second-Year Urdu II	3

YID 612	Accelerated Second-Year Yiddish	6
YOR 312L	Second-Year Yoruba II	3
YOR 611C	Intermediate Yoruba	6

d. Students who wish to meet the requirement with proficiency in a language not listed in the table above should contact the Texas Language Center (<http://www.utexas.edu/cola/centers/tlc>).

3. *Social science*: Three semester hours chosen from a list of approved courses, in addition to the course used to fulfill the social and behavioral sciences requirement of the core curriculum. Courses on the approved list are primarily in anthropology, economics, geography, linguistics, psychology, and sociology, but not every course in these fields is approved. Courses that are approved to count toward any core curriculum area other than social and behavioral sciences may not be counted toward this requirement. The list is available each semester in the Student Division on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>).
4. *Mathematics*: Three semester hours in mathematics, excluding Mathematics 301, 316K, and 316L. Some courses that fulfill this requirement may also be counted toward the mathematics requirement of the core curriculum.
5. *Natural science*: Six semester hours in natural sciences, in addition to the courses counted toward the science and technology requirements of the core curriculum. Courses used to fulfill this requirement must be chosen from the fields of study listed below; no more than three hours may be in either the history of science or the philosophy of science. To satisfy the mathematics and science and technology requirements of the core curriculum and the mathematics and natural science requirements of the BA, Plan I, a student may count (1) no more than twelve hours in mathematics, computer science, and statistics and scientific computation combined; and (2) no more than nine hours in any single field of study.
 - a. Astronomy
 - b. Biology
 - c. Chemistry
 - d. Geological sciences
 - e. Marine science
 - f. Nutrition
 - g. Physical science
 - h. Physics
 - i. Mathematics (excluding Mathematics 301), computer science, statistics and data sciences
 - j. Other alternative science courses approved by the dean
 - k. Approved alternative courses in history of science and philosophy of science

Lists of approved courses in science and the history and philosophy of science are available each semester in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Student-Services/Majors-and-Degrees/Course-Lists.php>).

6. *Cultural expression, human experience, and thought*: Three semester hours chosen from a list of approved courses. The course(s) must be in a field of study taught in the College of Liberal Arts. A course counted toward any requirement of the core curriculum may not also be counted toward this requirement. A list of approved courses is available each semester in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Student-Services/Majors-and-Degrees/Course-Lists.php>).

www.utexas.edu/cola/student-affairs/Student-Services/Majors-and-Degrees/Course-Lists.php).

Electives

In addition to the core curriculum, prescribed work, and major and minor, the student must complete enough elective coursework to provide the 120 semester hours required for the degree. These 120 hours may include no more than twelve hours of conference courses and internship courses combined as described in Conference Courses and Internship Courses (p. 293); twelve hours of Bible courses; nine hours of designated coursework in air force science, military science, or naval science; sixteen hours completed on the pass/fail basis; thirty-nine hours in any one field of study in the College of Liberal Arts or the College of Natural Sciences, unless major requirements state otherwise; and thirty-nine hours in any other single college or school of the University. Mathematics courses at the level of college algebra may not count toward elective hours.

Majors and Minors

Major Requirements

The Bachelor of Arts, Plan I, requires the completion of all requirements for one major. The number of semester hours required in the major varies with the field selected. Unless the requirements of the major state otherwise, a major consists of at least twenty-four but no more than forty-two semester hours, with at least fifteen hours in upper-division courses. Of these fifteen hours, six must be taken in residence. At least eighteen hours of coursework in the major, including six hours of upper-division coursework, must be completed in residence at the University.

Minors

Students in most majors must also fulfill the requirements of a minor. The minor consists of a specific number of semester hours of coursework completed outside the student's major field. The requirements of the minor are established by the major department and are given with the major requirements below. Additional restrictions may be imposed by the academic department(s) in which the student takes the courses used to fulfill the requirements of the minor; before planning to use a course to fulfill the minor requirement, the student should consult the department that offers the course.

The same courses may not be used to fulfill the requirements for both a major and a minor. Courses used to fulfill the requirements for a minor must be taken on the letter-grade basis, and six of the required semester hours must be taken in residence.

African and African Diaspora Studies

Major

Twenty-four semester hours of coursework in African and African diaspora studies, including at least fifteen hours of upper-division coursework. The following courses are required:

1. African and African Diaspora Studies 303, *Introduction to Black Studies*
2. African and African Diaspora Studies 375, *Community Internship*
3. African and African Diaspora Studies 376, *Senior Seminar*
4. Three upper-division courses (at least nine semester hours) chosen from one of the following tracks:
 - a. Critical race, gender, and sexuality theories
 - b. Performance, music, art, and literature

- c. Language, history, and behavioral and social sciences
 - d. Law, education, health, and policy
5. Six additional semester hours of African and African diaspora studies coursework

A list of courses for each track is available from the undergraduate adviser. Coursework used in requirements 4 and 5 must cover at least two geographical regions of the African diaspora, identified as Africa, the Caribbean, Latin America, and the United States. A list of courses with their geographical affiliation is available in the departmental advising office.

Minor for African and African Diaspora Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve hours must be taken in residence.

American Studies

Major

Twenty-four semester hours of coursework in American studies, including at least fifteen hours of upper-division coursework. The following courses are required:

1. American Studies 310, *Introduction to American Studies*
2. American Studies 311S, *Introductory Seminar in American Studies*
3. American Studies 355, *Main Currents of American Culture to 1865* and American Studies 356, *Main Currents of American Culture since 1865*
4. Nine semester hours chosen from topics of American Studies 370, *Seminar in American Culture*
5. Three additional semester hours of American studies coursework

Minor for American Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

Anthropology

Major

Thirty-three semester hours of anthropology, including at least eighteen hours of upper-division coursework, consisting of

1. Anthropology 301, 302, 304, and 307
2. At least three semester hours of upper-division coursework in each of the following areas
 - a. Theory: Anthropology 330C or an approved alternate course
 - b. Methods: Anthropology 453, 662, 462M, or an approved alternate course
 - c. Culture/geographic area
3. Twelve additional hours, including at least nine hours of upper-division coursework

A list of the courses in each area of requirement 2 is available from the anthropology adviser.

Minor for Anthropology Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

Asian American Studies

Major

1. Asian American Studies 301.
2. Twenty-one semester hours, including at least eighteen hours of upper-division coursework in Asian American Studies, and with at least one three-hour course in each of the following groups:
 - a. Asian American Studies 320, *Topics in Asian American Culture, Literature, and Media Studies*
 - b. Asian American Studies 325, *Topics in Asian American Economics, History, and Government* or Asian American Studies 330, *Topics in Asian American Anthropology, Geography, and Sociology*

Minor for Asian American Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one field of study in the University. Six of the required semester hours must be taken in residence.

Asian Cultures and Languages

The Bachelor of Arts with a major in Asian cultures and languages is offered with specialization in Chinese, Japanese, Korean, Hindi/Urdu, Malayalam, Sanskrit, or Tamil.

Major

Twenty-four semester hours, including twenty-one hours of upper-division coursework, in the language and culture of one of the following areas of specialization. A list of approved Asian studies courses related to the areas of specialization is available in the Department of Asian Studies.

1. *Chinese*
 - a. Chinese 322 or 341
 - b. Three semester hours chosen from Chinese 320L, 330, and 340
 - c. Six additional semester hours of upper-division coursework in Chinese
 - d. Twelve additional semester hours in Asian studies courses related to China, at least six hours of which must be upper-division
2. *Japanese*
 - a. Japanese 322 or 330
 - b. Twelve additional semester hours of upper-division coursework in Japanese
 - c. Nine additional semester hours in Asian studies courses related to Japan, at least three hours of which must be upper-division
3. *Korean*
 - a. Asian Studies 302D
 - b. Twelve semester hours of upper-division coursework in Korean
 - c. Nine additional upper-division semester hours in Asian studies courses related to Korea
4. *Hindi/Urdu*
 - a. Twelve semester hours of upper-division coursework in Hindi and/or Urdu
 - b. Twelve additional semester hours in Asian studies courses related to South Asia, at least six hours of which must be upper-division.

Three semester hours of upper-division coursework in Hindi, Urdu, or Sanskrit may be counted toward this requirement.

5. *Malayalam*

- a. Twelve semester hours of upper-division coursework in Malayalam
- b. Twelve additional semester hours in Asian studies courses related to South Asia, at least six hours of which must be upper-division. Three semester hours of upper-division coursework in Malayalam, Sanskrit, or Tamil may be counted toward this requirement.

6. *Sanskrit*

- a. Twelve semester hours of upper-division coursework in Sanskrit
- b. Twelve additional semester hours in Asian studies courses related to South Asia, six hours of which must be upper-division. Three semester hours of upper-division coursework in Sanskrit, Hindi, or Urdu may be counted toward this requirement.

7. *Tamil*

- a. Twelve semester hours of upper-division coursework in Tamil
- b. Twelve additional semester hours in Asian studies courses related to South Asia, six hours of which must be upper-division. Three semester hours of upper-division coursework in Tamil, Sanskrit, or Malayalam may be counted toward this requirement.

iii Asian Studies 379

iv Fifteen additional semester hours in Asian studies courses related to East Asia, including at least six hours related to Taiwan, three hours related to China, three hours related to Japan, and three hours in upper-division Asian studies courses related to East Asia or in upper-division Chinese language courses

v Two years of Chinese language to fulfill the foreign language requirement, focusing in these courses on the traditional characters used in Taiwan

2. *South Asia*

- a. At least three semester hours of coursework in South Asian history
- b. A three-hour Asian studies course related to East Asia
- c. Asian Studies 379
- d. Fifteen additional semester hours in Asian studies courses related to South Asia. Six semester hours of upper-division coursework in Bengali, Hindi, Malayalam, Pashto, Sanskrit, Tamil, Telugu, or Urdu language may be counted toward this requirement.
- e. Two years of Bengali, Hindi, Malayalam, Pashto, Sanskrit, Tamil, Telugu, or Urdu to fulfill the foreign language requirement

Minor for Asian Cultures and Languages Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent in a second foreign language, including at least three hours of upper-division coursework. Six of the required semester hours must be taken in residence.

Asian Studies

Major

Twenty-four semester hours of Asian studies coursework, at least eighteen of which must be upper-division, in one of the two areas of specialization listed below. Students specializing in East Asia must choose either the general track or the Taiwan track. Courses counted toward the foreign language requirement may not also be counted toward the major unless otherwise noted. A list of courses that fulfill the requirements of the areas of specialization is available in the Department of Asian Studies.

1. *East Asia*

- a. General track
 - i At least three semester hours of coursework in East Asian history
 - ii A three-hour Asian studies course related to South Asia
 - iii Asian Studies 379
 - iv Fifteen additional semester hours in Asian studies courses related to East Asia, preferably in more than one East Asian cultural area. Six semester hours of upper-division coursework in Chinese, Japanese, or Korean language may be counted toward this requirement.
 - v Two years of Chinese, Japanese, or Korean to fulfill the foreign language requirement
- b. Taiwan track
 - i At least three semester hours of coursework in Taiwanese history
 - ii A three-hour Asian studies course related to South Asia

Minor for Asian Studies Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent in a second foreign language, including at least three hours of upper-division coursework. Six of the required semester hours must be taken in residence.

Classical Languages

Major

Twenty-four semester hours in the languages and cultures of one of the following areas of specialization: Classics, Greek, or Latin.

1. *Classics*

- a. Six hours of upper-division Greek
- b. Six hours of upper-division Latin
- c. Classical Civilization 375, Greek 365, or Latin 365
- d. Nine additional hours of Greek, Latin, or classical civilization, including at least three upper-division hours

2. *Greek*

- a. Twelve hours of upper-division Greek, including Greek 365
- b. Twelve hours of Latin and/or classical civilization, including at least nine in upper-division coursework

3. *Latin*

- a. Fifteen hours of upper-division Latin, including Latin 324 and Latin 365
- b. Nine hours of Greek and/or classical civilization, including at least six in upper-division coursework

Minor for Classical Languages Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in an approved area, or (2) nine semester hours, including at least three hours of upper-division coursework beyond 507, 601C, and 610D in another foreign language.

Classical Studies

Major

Thirty-six semester hours of coursework, at least twenty-one of which must be upper-division, in one of the two areas of specialization, ancient history or classical archaeology, listed below. Coursework counted toward the foreign language requirement may not also be counted toward the major.

1. *Ancient History*
 - a. Six hours of premodern history, chosen from topics of Ancient History and Classical Civilization 310 and 330.
 - b. Nine hours of upper-division Greek and/or Roman history, chosen from topics of Ancient History and Classical Civilization 325.
 - c. Twelve hours of classical civilization, Greek, Latin, or topics of Ancient History and Classical Civilization 319, 325, and 378.
 - d. Six hours of upper-division coursework in Greek and/or Latin.
 - e. Ancient History and Classical Civilization 378.
2. *Classical Archaeology*
 - a. Nine hours of coursework in classical archaeology chosen from Classical Civilization 307C, 307D, or 307K; 317 and 340.
 - b. Three hours of approved coursework in archaeological techniques and analysis. A list of approved courses is available in the Department of Classics.
 - c. Three hours of upper-division coursework in Greek or Roman history, chosen from topics of Ancient History and Classical Civilization 325 and 378.
 - d. Three hours of upper-division coursework in ancient art history, chosen from Art History 325, 326N, 327N, 327P, 327R, and 362.
 - e. Six hours of upper-division coursework in either Greek or Latin.
 - f. Twelve additional hours of coursework chosen from Anthropology 304, approved topics of Middle Eastern Studies 342, Religious Studies 354D, and the areas listed in requirements (2a) through (2e).
 - g. Fieldwork experience approved by the classical studies faculty adviser.

Economics

All economics majors must earn grades of at least C- in either Mathematics 408C and 408D or Mathematics 408K and 408L. Mathematics 403K and 403L (and transfer equivalents) may not be substituted for the required math courses.

Major

Twenty-eight semester hours of economics, consisting of Economics 304K, 304L, 420K, 320L, 329, 341K, and nine additional hours of upper-division coursework. At least six of the additional semester hours of upper-division coursework must be in courses for which a grade of at least C- in Economics 420K is a prerequisite. Economics 420K, 320L, 329, and 341K must be completed in residence. Economics majors must take Economics 420K at least two semesters prior to completion of the degree. All economics majors must earn a grade of at least C- in each course counted toward fulfillment of the major requirements. A minimum grade point average of at least 2.00 in all courses taken at the University and counted toward the major is also required.

No student may register for more than ten semester hours of economics in any one semester without approval of an undergraduate adviser in the Department of Economics.

Minor for Economics Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

English

Major

Thirty-three semester hours of English, including at least twenty-four semester hours of upper-division coursework consisting of the following:

1. English 314J, 314L, or 314V
2. English 316L, 316M, 316N, or 316P
3. An upper-division course in literature or language prior to 1630
4. An upper-division course in literature or language from 1630 to 1830
5. An upper-division course in literature or language from 1830 to 1940
6. An upper-division diverse perspectives course
7. An upper-division single- or dual-author course
8. An upper-division research seminar
9. Nine additional semester hours of coursework in English, including at least six semester hours of upper-division coursework

A list of courses that may be used to fulfill requirements 3–9 is available in the English Advising Office, Parlin Hall 114, and on the Department of English Web site (<http://www.utexas.edu/cola/depts/english>).

The student must make a grade of at least C- in each course counted toward fulfillment of the major requirements. A minimum grade point average of 2.00 in courses taken at the University and counted toward the major is also required.

Students are discouraged from taking more than six semester hours of coursework in English in a semester. No student may take more than nine hours of coursework in English in a semester.

Minor for English Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve semester hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

Ethnic Studies

The ethnic studies program is administered by the Center for Asian American Studies and the Center for Mexican American Studies. The directors and executive committees of these centers advise students, prescribe groups of courses that fulfill content requirements, and authorize course substitutions when appropriate. Students majoring in ethnic studies must choose one of two areas of concentration and meet the requirements of that concentration as outlined in Asian American Studies (p. 299) and Mexican American Studies (p. 306).

European Studies

Students select one of two tracks: (I) European studies with a focus on pre-1700 Europe, or (II) European studies with a focus on post-1700 Europe. The tracks are interdisciplinary in nature and draw on courses in many departments and allow students considerable opportunity to shape their coursework around their interests. Students majoring in European studies must complete six semester hours of upper-division coursework in

one of the following languages: Czech, Danish, Dutch, French, German, modern Greek, Italian, Norwegian, Polish, Portuguese, Serbian/Croatian, Spanish, or Swedish. With permission from the director of the Center for European Studies, however, students may study other languages for their major—such as Arabic, Persian, Hindi, Hebrew, Turkish, Russian, Latin, or ancient Greek—when an application of those language skills will significantly enhance their work as distinctly European studies scholars in their track. Courses taught in English may not be used. Courses used to fulfill the European studies language requirement will be counted toward the major.

Major

Thirty semester hours of coursework in European studies, at least twenty-four of which must be upper-division, consisting of the following. No more than nine hours of coursework counted toward the major may focus on a single country or culture.

1. European Studies 305, *Introduction to European Studies*
2. European Studies 350, *Governments and Politics of Western Europe*
3. Completion of one of the following tracks:
 - A. Track I: European studies with a focus on pre-1700 Europe
 - i. Three hours in each of the following two areas:
 - a. European Studies 306, *Introductory Topics in European Anthropology, Geography, History, and Sociology*; or European Studies 346, *Topics in European Anthropology, Geography, History, and Sociology*, chosen from an approved list
 - b. European Studies 307, *Introductory Topics in European Culture, Literature, Art, Music, and Media*; or European Studies 347, *Topics in European Culture, Literature, Art, Music, and Media*, chosen from an approved list
 - ii. Nine additional hours of European studies coursework chosen from an approved list, only three hours of which may be lower-division
 - B. Track II: European studies with a focus on post-1700 Europe
 - i. Three hours in each of the following three areas:
 - a. European Studies 306, *Introductory Topics in European Anthropology, Geography, History, and Sociology*; or European Studies 346, *Topics in European Anthropology, Geography, History, and Sociology*, chosen from an approved list
 - b. European Studies 307, *Introductory Topics in European Culture, Literature, Art, Music, and Media*; or European Studies 347, *Topics in European Culture, Literature, Art, Music, and Media*, chosen from an approved list
 - c. European Studies 308, *Introductory Topics in European Economics, Government, Business, and Policy*; or European Studies 348, *Topics in European Economics, Government, Business, and Policy*
 - ii. Six additional hours of European studies coursework chosen from an approved list, only three hours of which may be lower-division
4. European Studies 375, *Capstone Research in European Studies*, in which the student prepares a thesis
5. Participation in an approved study abroad program or in an approved internship in Europe selected from a list available from the European studies faculty adviser

Minor for European Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve hours must be taken in residence.

French

Major

1. Twenty-four semester hours of upper-division French, including French 320E, 322E, 326K, and 326L
2. French 340C, 340P, or 340T
3. Six hours of French courses numbered 350 or above

Minor for French Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent in a second foreign language, including at least three hours of upper-division coursework. Six of the required semester hours must be taken in residence.

Geography

Major

Thirty semester hours of geography, at least eighteen of which must be upper-division, including

1. An eighteen-hour core requirement consisting of
 - a. Geography 301C and one other course in physical geography
 - b. Geography 305 and one other course in human geography
 - c. Two geography courses in methods/techniques
2. At least nine semester hours in one of the following tracks:
 - a. Geographic information science
 - b. Cultural geography
 - c. Sustainability
 - d. General geography (designed for students who do not wish to specialize at the undergraduate level)
 - e. Urban geography
 - f. Earth science
 - g. Landscape ecology and biogeography

Courses used to fulfill the core geography requirement may not be counted toward the completion of a track. Lists of courses that fulfill the core geography requirement and of courses in each track are available in the Department of Geography and the Environment.

Minor for Geography Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

German

Major

Twenty-four semester hours of upper-division coursework in German, consisting of

1. German 328
2. Three additional semester hours in language, chosen from German 330C, 331L, or 336W
3. Nine semester hours in literature, culture, and linguistics, chosen from German 340C, 343C, 346L, and 347L
4. Six semester hours of topic seminars, chosen from German 363K, 369, and 373
5. Three additional semester hours in German, chosen from German 340C, 343C, 346L, 347L, 348D, 356W, 363K, 366K, 369, or 373

Eighteen of the twenty-four semester hours must be taken in residence. German 149T, 249T, and 349T may not be counted toward a major in German.

Minor for German Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent in a second foreign language, including at least three hours of upper-division coursework. Six of the required semester hours must be taken in residence.

German, Scandinavian, and Dutch Studies

Major

Twenty-seven semester hours of coursework in German Scandinavian, and Dutch studies, including:

1. German, Scandinavian, and Dutch Studies 301
2. One tools course: language for research
 - a. One upper-division course in the same Germanic language used to fulfill the foreign-language requirement (usually German 328 or Norwegian 328); or
 - b. One language course in a second modern Germanic language (usually 604 or the equivalent); or
 - c. One course in an older Germanic language (Old Norse, Middle-High German, Gothic, etc.)
3. One foundations course out of three areas: film studies, narrative/textual studies, or linguistics that stresses methodology/theory as well as content areas, chosen from an approved list
4. Five additional German, Scandinavian, and Dutch studies courses
 - a. Only one course may be lower-division
 - b. Additional foundations courses may be used to fill this requirement
 - c. Upper-division German courses may be substituted for up to three of the five German, Scandinavian, and Dutch studies courses; German 328 may not be used to fulfill this requirement
 - d. Other substitutions may be approved by the German, Scandinavian, and Dutch studies adviser.
5. German, Scandinavian, and Dutch Studies 377, *Capstone Research in German, Scandinavian, and Dutch Studies*

Minor for German, Scandinavian, and Dutch Studies Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent in a second foreign language, including at least three hours of upper-

division coursework. Six of the required semester hours must be taken in residence.

Government

Major

Thirty semester hours of government, at least eighteen of which must be upper-division, including at least one upper-division course from each of three of the six fields into which the department's work is divided: (1) political theory, (2) American government and politics, (3) public and comparative law, (4) public policy, (5) comparative politics, and (6) international relations.

Government majors must also complete at least three semester hours in a tools course, chosen from Government 339L, *Research Methods in Government*; Government 341M, *Decision Theory*; Government 342N, *Public Choice*; and Government 350K, *Statistical Analysis in Political Science*.

Students may choose to satisfy the tools course requirement by completing one of the following nongovernment course options; these courses may not be counted toward the semester hours and grade point average required for the major.

- a. Three semester hours of statistics chosen from Economics 329; Educational Psychology 371; Mathematics 316; Psychology 418; Social Work 318; Sociology 317L; Statistics 309; Statistics and Data Sciences 302, 304, 305, 306
- b. Three semester hours of logic, chosen from Philosophy 312, 313, 313K, 313Q; Tutorial Course 310 (for Plan II students)
- c. Six semester hours of upper-division coursework in one foreign language, excluding courses conducted in English

All government majors must earn a grade of at least C- in each course counted toward fulfillment of the major requirements. A minimum grade point average of 2.00 in courses taken at the University and counted toward the major is also required.

No more than six hours of internship coursework may be counted toward the major, including transfer credit earned in internship courses at other institutions of higher education.

No student may register for more than nine semester hours of government in one semester without the consent of an undergraduate adviser in the Department of Government.

Minor for Government Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve hours must be taken in residence.

Health and Society

Major*

Thirty semester credit hours, including at least fifteen hour of upper-division coursework, consisting of

1. Health and Society 301, *Introduction to Health and Society*
2. Three semester hours in each of the following:
 - a. Biology: three semester hours, chosen from Biology 301D, *Biology for Business, Law, and Liberal Arts*, Biology 311C, *Introductory Biology I*, Biology 309D, *The Human Body*
 - b. Social/behavioral epidemiology: three semester hours, chosen from Health Education 343, *Foundations of Epidemiology*,

Sociology 368D/Public Health 368D, *Social Context of Public Health*

- c. Methods and statistics: three semester hours, chosen from an approved list
 - d. Social justice and health: three semester hours, chosen from an approved list
3. Nine semester hours, chosen from an approved list, in one of the following tracks:
- a. Health and behavior
 - b. Cultural aspects of health
 - c. Health care and the economy
 - d. Population health
4. Three additional semester hours, chosen from any course offered from any of the tracks listed above. Alternatively, students wishing to pursue graduate studies or develop advanced research skills are encouraged to satisfy their "Additional Major Course" requirement by completing the optional three-hour H S Advanced Research Emphasis (ARE).
5. Health and Society 378, *Seminar in Health and Society*

Minor for Health and Society Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve semester hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

*Pending approval by the Texas Higher Education Coordinating Board

History

Major

Thirty semester hours of history, at least fifteen hours of which must be upper-division, including

1. At least six semester hours in United States history
2. At least six semester hours in European history
3. At least six semester hours in Latin American, African, Asian, or Middle Eastern history

At least three hours of non-United States history must be in upper-division coursework. All history majors must take History 350L or 350R as part of their thirty semester hours.

Minor for History Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve semester hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

Humanities

Major

Forty-two semester hours, including at least thirty hours of upper-division coursework, arranged by contract in consultation with the humanities

adviser. None of these forty-two hours may be counted toward the core curriculum or the prescribed work for the Bachelor of Arts degree.

Students normally enter the program in the sophomore or junior year. In developing the contract, the student and the adviser define objectives, central subject areas, and a general plan of study, structured in accordance with the student's interests. With the approval of the humanities adviser, the student chooses one of the following tracks:

1. *Track One*
 - a. Nine semester hours in a single field of study in the College of Liberal Arts
 - b. Nine hours in one or more other fields of study in the College of Liberal Arts
 - c. Nine hours in any field or fields outside the College of Liberal Arts
 - d. Nine additional hours in any field or fields at the University
 - e. Six hours of upper-division coursework in humanities, including Humanities 370
2. *Track Two*
 - a. Twelve semester hours in a single field of study in the College of Liberal Arts
 - b. Nine hours in a second field of study in the College of Liberal Arts
 - c. Fifteen additional hours in any field or fields at the University
 - d. Six hours of upper-division coursework in humanities, including Humanities 370

Students in the Humanities Honors Program must use Humanities 679HA and 679HB to fulfill requirements 1e or 2d.

Iberian and Latin American Languages and Cultures

Major

1. Three semester hours of grammar and writing: Spanish 327C, *Advanced Grammar and Writing in Context*, or Portuguese 327C, *Advanced Grammar and Writing in Context*
2. One introductory course in language and linguistics in society: Spanish 330L, *Introduction to Language and Linguistics in Society*, or Portuguese 330L, *Introduction to Language and Linguistics in Society*
3. One introductory course in literatures and cultures: Spanish 328C, *Introduction to Literatures and Cultures*, or Portuguese 328C, *Introduction to Literatures and Cultures*
4. Fifteen additional semester hours of coursework in Spanish, Portuguese, or Spanish and Portuguese
 - a. Students completing the majority of their coursework in Spanish must take at least one course in Portuguese or Portuguese civilization (PRC). Students completing the majority of their coursework in Portuguese must take at least one course in Spanish or Spanish civilization (SPC).
5. One capstone seminar, chosen from the following:
 - a. Spanish 379L, *Capstone Seminar in Linguistics*
 - b. Portuguese 379L, *Capstone Seminar in Linguistics*
 - c. Spanish 379C, *Capstone Seminar in Literatures and Cultures*
 - d. Portuguese 379C, *Capstone Seminar in Literatures and Cultures*

Minor for Iberian and Latin American Languages and Cultures Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent

in a second foreign language, including at least three hours of upper-division coursework. Six of the required semester hours must be taken in residence.

International Relations and Global Studies

Major

Thirty-nine semester hours of coursework, at least twenty-four of which must be upper-division, consisting of the following:

1. Fifteen hours in the following five core courses in the major:
 - a. International Relations and Global Studies 301
 - b. A three-semester-hour course chosen from the following: Economics 301, *Introduction to Economics*; Economics 304K, *Introduction to Microeconomics*; or Economics 304L, *Introduction to Macroeconomics*
 - c. Geography 305, *This Human World: An Introduction to Geography*
 - d. World history: A three-semester-hour course in world (non-United States) history, chosen from a list of approved courses available in the advising office
 - e. A three-semester-hour course chosen from the following: Anthropology 302, *Cultural Anthropology*; Economics 304K, *Introduction to Microeconomics*; Economics 304L, *Introduction to Macroeconomics*; Radio-Television-Film 312C, *Introduction to Global Media*; Sociology 302, *Introduction to the Study of Society*
2. International Relations and Global Studies 320F, *Foundations of International Relations and Global Studies*
3. Twelve hours of upper-division coursework in one of the following tracks, chosen from a list of approved courses available in the advising office:
 - a. Culture, media, and the arts
 - b. International security
 - c. Science, technology, and environment
 - d. International political economy
4. Six hours of upper-division coursework in a single foreign language
5. International Relations and Global Studies 378, *Capstone Research in International Relations and Global Studies*; or, for students seeking special honors, International Relations and Global Studies 678H, *Honors Tutorial Course*

International relations and global studies majors must participate in an approved study abroad program. A list of approved programs is available from the faculty adviser. A student who graduated from an international high school may petition to be excused from this requirement. Documentation is required, and the petition must be approved by the faculty adviser and the associate dean for academic affairs.

Minor for International Relations and Global Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in one of the following fields: African and African Diaspora studies; Asian studies; European studies; Latin American studies; Middle Eastern studies; Russian, East European, and Eurasian studies; or a cultural area approved by the faculty adviser. Majors minoring in African and African Diaspora studies must choose courses from an approved list. Six of the required twelve semester hours must be completed in residence.

Islamic Studies

Major

Twenty-four semester hours of coursework in Islamic studies, including eighteen hours of upper-division coursework. The coursework consists of

1. Islamic Studies 310, *Introduction to Islam*
2. Three semester hours chosen from Islamic Studies 311 (Topic 2: *Judaism, Christianity, and Islam: An Introduction*); Religious Studies 305, *Introduction to the Philosophy of Religion*; Religious Studies 310, *Introduction to the Study of Religion*
3. Nine semester hours in Islamic Studies 340, *Topics in Islam*
4. Six semester hours in Islamic Studies 372, *Topics in Islamic Cultures*
5. Three additional semester hours of upper-division coursework in Islamic studies

Students must complete the equivalent of at least two years in Arabic, Persian, Turkish, Urdu, or Yoruba. Credit used to fulfill this requirement may also be used to fulfill the foreign language requirement.

Minor for Islamic Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve hours may be lower-division but must include at least six hours beyond course 507 or the equivalent. Six of the required twelve semester hours must be taken in residence.

Italian

Major

Twenty-four semester hours of upper-division coursework in Italian, including Italian 321, 328, and 329. Three semester hours chosen from Italian Civilization 349 or 360 may be counted toward this requirement.

Minor for Italian Majors

Either (1) twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University; or (2) nine semester hours of coursework beyond 507 or the equivalent in a second foreign language, including at least three hours of upper-division coursework. Six of the required semester hours must be taken in residence.

Jewish Studies

Major

Twenty-seven semester hours of coursework in Jewish studies, including Jewish Studies 304M or 304N, at least three additional hours of lower-division coursework, and eighteen hours of upper-division coursework. Students must complete six hours in each of the following areas:

1. Humanities and arts: Jewish Studies 363 and comparable courses identified by the faculty adviser
2. History and social science: Jewish Studies 364, 365, and comparable courses identified by the faculty adviser

Students are encouraged but not required to use Hebrew or Yiddish to fulfill the foreign language requirement.

Minor for Jewish Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve hours may be lower-division but must include at least six hours beyond course 507 or the equivalent. Six of the required twelve semester hours must be taken in residence.

Latin American Studies

Major

Twenty-seven semester hours, at least eighteen hours of which must be upper-division, including

1. Latin American Studies 301
2. Latin American Studies 337M
3. One of the following social sciences: Latin American Studies 315, 319, 324L, 325, 330, 355
4. Latin American Studies 366
5. Three hours, chosen from the following: Latin American Studies 326, 327, 328, 370P, or 370S
6. Nine additional hours of Latin American studies, of which six must be upper-division
7. Latin American Studies 378

Students must complete the equivalent of at least two years in Spanish or Portuguese. Credit used to fulfill this requirement may also be used to fulfill the foreign language requirement.

Minor for Latin American Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve semester hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

Linguistics

Major

Twenty-four semester hours of coursework in linguistics, consisting of Linguistics 306, 344K, 345, 372K, 372L, and nine additional hours of upper-division coursework in linguistics. Students should consult the undergraduate adviser for information about counting other courses toward the major requirements.

Minor for Linguistics Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

Mexican American Studies

1. Mexican American Studies 307, *Introduction to Mexican American Cultural Studies*; or Mexican American Studies 308, *Introduction to Mexican American Policy Studies*

2. Twenty-one semester hours of upper-division coursework in Mexican American studies, including Mexican American Studies 350 and either 361 or 362; any upper-division Spanish course may be substituted for 350
3. Twelve additional semester hours of coursework in Mexican American studies

Students must use Spanish to fulfill the foreign language requirement.

Middle Eastern Languages and Cultures

The major in Middle Eastern languages and cultures is offered with specialization in one of two tracks: literature and culture, or language.

Major

Twenty-four semester hours, at least twenty-one of which must be upper-division, consisting of the following:

1. Middle Eastern Languages and Cultures 301
2. Middle Eastern Languages and Cultures 323
3. Six semester hours of upper-division coursework in a single Middle Eastern language, chosen from Arabic, Hebrew, Persian, or Turkish, but excluding coursework conducted in English
4. An additional twelve semester hours of upper-division coursework in one of the following tracks:
 - a. Literature and culture: Middle Eastern languages and cultures coursework in Arabic-, Hebrew-, Persian-, and Turkish-speaking cultures and literatures
 - b. Language: upper-division language coursework in Arabic, Hebrew, Persian, or Turkish; may be in a second Middle Eastern language, but excluding coursework conducted in English

Minor for Middle Eastern Languages and Cultures Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. If the minor is in a foreign language other than that used to fulfill the foreign language requirement or the major, the twelve semester hours may be lower-division but must include at least six hours beyond course 507 or the equivalent. Six of the required twelve semester hours must be taken in residence.

Middle Eastern Studies

Major

Twenty-four semester hours of coursework in Middle Eastern studies, eighteen hours of which must be upper-division coursework, consisting of the following:

1. Middle Eastern Studies 301K and 301L
2. Six semester hours of upper-division coursework in a Middle Eastern language (Arabic, Hebrew, Persian, or Turkish)
3. Three semester hours of upper-division coursework in each of the following areas:
 - a. Social science: Middle Eastern Studies 341, *Topics in the Middle East: Social Science*.
 - b. Arts and humanities: Middle Eastern Studies 342, *Topics in the Middle East: Arts and Humanities*.

c. History: Middle Eastern Studies 343, *Topics in the Middle East: History*.

4. Three additional semester hours of upper-division coursework in Middle Eastern studies.

Students must complete the equivalent of at least two years of a Middle Eastern language (normally Arabic, Hebrew, Persian, or Turkish). Credit used to fulfill this requirement may also be used to fulfill the foreign language requirement.

Minor for Middle Eastern Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve hours may be lower-division but must include at least six hours beyond course 507 or the equivalent. Six of the required semester hours must be taken in residence.

Philosophy

Major

Twenty-seven semester hours of philosophy, at least eighteen of which must be upper-division, including

1. Three hours of symbolic logic: Philosophy 313, 313K, or 313Q
2. Philosophy 329K or 329L, which may also be counted toward requirement 3 or 4 below
3. Three hours of ancient philosophy: Philosophy 301K or 329K
4. Three hours of early modern philosophy: Philosophy 301L or 329L
5. Six hours chosen from Philosophy 321K, 323K, 323M, 325K, and 332

Minor for Philosophy Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required semester hours must be taken in residence.

Psychology

Major

Twenty-eight semester hours of psychology, at least eighteen of which must be upper-division, including Psychology 301 and 418 with a grade of at least C in each. Students may take courses from a variety of areas within the field of psychology, including clinical psychology, cognition, developmental psychology, evolutionary psychology, language, neuroscience, perception, and social psychology.

Psychology majors must earn a grade of at least C in Psychology 418 to register for upper-division psychology courses. Students may not enroll in Psychology 418 more than twice.

Psychology 357 and 359 are offered on the pass/fail basis only; they may not be counted toward the twenty-eight hours in psychology required for the major.

Minor for Psychology Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the twelve semester hours must be taken in residence.

Religious Studies

Major

Thirty semester hours of religious studies coursework, of which at least eighteen hours must be upper-division. A single course may not be counted toward more than one of the following requirements. The thirty hours of coursework must include

1. In each of the following areas, at least three semester hours chosen from a list of courses available from the religious studies adviser:
 - a. Area I: Religions of Asia
 - b. Area II: Religions of Europe, the Middle East, and Africa
 - c. Area III: Religions of the Americas
 - d. Area IV: Approaches to the study of religion and comparative studies of religion
2. *Primary area*: Six additional hours of upper-division coursework in one of these four areas chosen in consultation with the religious studies adviser
3. Religious Studies 375S, *Advanced Seminars in Religious Studies*

Minor for Religious Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

Rhetoric and Writing

Major

Twenty-seven semester hours of coursework in rhetoric and writing, at least eighteen of which must be upper-division, consisting of

1. Rhetoric and Writing 306, *Rhetoric and Writing*
2. Rhetoric and Writing 321, *Principles of Rhetoric*
3. Each of the following courses (any topic):
 - a. Rhetoric and Writing 330C, *Advanced Studies in Digital Rhetoric*
 - b. Rhetoric and Writing 330D, *History of Rhetoric*
 - c. Rhetoric and Writing 330E, *Rhetorical Theory and Analysis*
4. Three hours chosen from Rhetoric and Writing 310, 325M, 328 (any topic), 368C, or 368E
5. Nine additional semester hours in rhetoric and writing, including six hours of upper-division coursework

Minor for Rhetoric and Writing Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

Russian, East European, and Eurasian Studies

Major

Students select one of two tracks:

1. Russian, East European, and Eurasian area studies, consisting of twenty-four semester hours of coursework:

- a. Russian, East European, and Eurasian Studies 301
- b. Six hours of upper-division coursework in a Slavic, Central Asian, or East European language
- c. Eighteen semester hours of upper-division coursework, chosen from a list of courses approved by the Advisory Committee of the Program for Russian, East European, and Eurasian Studies

Students pursuing track (I), area studies, must complete a total of three years of language study in a Slavic, Central Asian, or East European language

2. Russian, East European, and Eurasian area studies with a language concentration, consisting of twenty-four semester hours of coursework:
 - a. Russian, East European, and Eurasian Studies 301
 - b. Twelve hours of upper-division coursework in a Slavic, Central Asian, or East European language; credit used to fulfill this requirement may also be used to fulfill the foreign language requirement.
 - c. Eighteen semester hours of upper-division coursework, chosen from a list of courses approved by the Advisory Committee of the Program for Russian, East European, and Eurasian Studies

Students pursuing track (II), area studies with a language concentration, are encouraged to study their chosen language over the summer or to take a fourth year.

Both tracks are designed to allow students considerable opportunity to shape their coursework around their interests.

Minor for Russian, East European, and Eurasian Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required semester hours must be taken in residence. If the minor is in a foreign language other than that used to fulfill the foreign language requirement, the twelve hours may be lower-division but must include at least six hours beyond course 507 or the equivalent.

Sociology

Major

At least twenty-seven semester hours of coursework in sociology, including Sociology 302, 317L, 317M, and 379M. At least fifteen semester hours must be in upper-division courses. Sociology majors must earn grades of at least C in Sociology 302, 317L, and 317M. To enroll in Sociology 317M for a second time, a student must have the consent of a sociology undergraduate adviser. Students may not enroll in Sociology 317M more than twice.

In place of Sociology 317L, students may complete one of the following alternative courses with a grade of at least C: Mathematics 316, Statistics and Data Sciences 303, 304, 305, 306. If the student completes one of these courses instead of Sociology 317L, that course is counted toward the twenty-seven hours required for the major and is included in the major grade point average.

Minor for Sociology Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required semester hours must be taken in residence.

Urban Studies

The Urban Studies degree program is administered by the Department of Geography and the Environment. Students must be admitted to the degree program. They may apply for admission after completing the following requirements: Mathematics 408C or 408K with a grade of at least B-; Mathematics 316 or Statistics and Data Sciences 305 with a grade of at least B-. Other comparable courses may be used if approved.

Major

Twenty-four semester hours of coursework, consisting of

1. Urban Studies 301, 315, and 360
2. Urban Studies 370 or an approved equivalent course
3. Twelve additional hours of upper-division coursework in urban studies

Minor for Urban Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

Women's and Gender Studies

Major

Thirty semester hours of coursework in women's and gender studies, eighteen hours of which must be upper-division. It is recommended that six semester hours be taken in women's and gender studies courses originating from outside the College of Liberal Arts. The thirty required semester hours must include the following:

1. Women's and Gender Studies 301, *Introductory Topics in Women's and Gender Studies* or Women's and Gender Studies 305, *Introduction to Women's and Gender Studies*
2. Six hours in Women's and Gender Studies 340, *Cross-Cultural Topics in Women's and Gender Studies*
3. Women's and Gender Studies 350, *Feminist Theory*, or another feminist theory course chosen from a list of courses approved by the Center for Women's and Gender Studies
4. Women's and Gender Studies 356, *Introduction to Feminist Research Methods*, or another research methods course chosen from a list of courses approved by the Center for Women's and Gender Studies
5. Women's and Gender Studies 379L, *Internship in Women's and Gender Studies*, or Women's and Gender Studies 360, *Research and Thesis in Women's and Gender Studies*
6. Women's and Gender Studies 379S, *Senior Seminar*

Minor for Women's and Gender Studies Majors

Twelve semester hours, including at least six hours of upper-division coursework, in any one other field of study in the University. Six of the required twelve semester hours must be taken in residence.

Bachelor of Arts, Plan II

The Plan II Honors Program is designed to provide a broad, liberal, and challenging education for a limited number of students whose high school class standing and admission test scores indicate strong academic potential and motivation. The enrollment in Plan II is limited; admission to the program is separate from and in addition to admission to the

University. Application materials and information about deadlines are available online at <http://www.bealonghorn.utexas.edu/>.

The Plan II Honors Program is not available to transfer applicants. Disappointed transfer applicants interested in the liberal arts are encouraged to seek departmental honors tracks in the College of Liberal Arts. More information about departmental honors programs is available in the Academic Policies and Procedures (p. 285) section.

The Plan II Honors Program includes the basic coursework required of Plan I students, but much of this work is done in small sections that are restricted to Plan II students and taught by professors selected for their excellent teaching records. Additional required courses explore the humanities, the natural sciences, and the social sciences and provide considerable opportunity for individual research, writing, and speaking. The remainder of the student's program is made up of approved electives.

The academic programs of most Plan II students include thirty-six semester hours or more of elective coursework. The student may use electives to pursue a second major in the College of Liberal Arts or the College of Natural Sciences. Dual degree programs are available in conjunction with most other undergraduate colleges.

Qualified students who are accepted into both the Plan II Honors Program and the Cockrell School of Engineering may pursue a curriculum leading to both the Bachelor of Arts, Plan II, and a bachelor's degree in engineering. Students interested in this dual degree program must apply both to Plan II and to the Cockrell School. Further information is available from the director of Plan II and from the Office of Student Affairs in the Cockrell School.

Qualified students who are accepted into both the Plan II Honors Program and the McCombs School of Business may pursue a curriculum leading to both the Bachelor of Arts, Plan II, and the Bachelor of Business Administration. Students interested in this dual degree program must apply both to Plan II and to the McCombs School of Business. Further information is available from the director of Plan II and from the McCombs School.

A dual degree program is also available that leads to the degrees of Bachelor of Arts, Plan II, and Bachelor of Architecture. Students must apply both to Plan II and to the School of Architecture. Additional information is available from the director of Plan II and from the School of Architecture.

In addition to the following requirements, the student must fulfill the University's General Requirements (p. 17) and the requirements of the College of Liberal Arts given in Special Requirements of the College (p. 292).

Special Requirements

Students who fail to maintain a University grade point average of at least 3.25 will be considered for academic dismissal from Plan II. All students whose grade point average falls below 3.25 but not below 2.50 will be put on academic review. Students whose grade point average falls below 2.50 at any point after their first semester in Plan II will be dismissed from the program. In addition, any student who fails one of the following required courses will be dismissed from the program: English 603A, 603B, Philosophy 610QA, 610QB, Social Science 301, Tutorial Course 302, 603A, 603B, 357, 359T, 660HA, 660HB. Students may only register for Tutorial Course 660H or 359T if their University grade point average is 3.25 or higher. All of these stipulations may be appealed and exceptions may be made on a case-by-case basis by the director of Plan II in consultation with the associate director, assistant director, and academic advisers. A student who is academically dismissed from the Plan II program is eligible to continue to enroll in the College of Liberal

Arts in another academic program if the student fulfills the academic requirements for the Bachelor of Arts, Plan I, and the scholastic standards for continuance in the University given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information>). Students in scholastic difficulty should discuss their problems with a Plan II academic adviser and the director.

Choice of Work

A degree program must include at least 120 semester hours, including at least thirty-six hours of upper-division coursework. Without special permission from the director and the dean, no more than thirty-six hours in one field of study in the College of Liberal Arts or the College of Natural Sciences and no more than thirty-six hours in courses offered in any other college or school may be counted toward the degree.

Plan II students may use credit by examination to fulfill certain program requirements. More information on testing policies and credit by examination is available from a Plan II academic adviser.

Tutorial Course 302 and two semesters of Tutorial Course 357 are required. Tutorial Course 660H is required of students seeking special honors in Plan II, students pursuing the Plan II degree alone, and students writing creative theses. In exceptional situations, students completing dual degree programs may be approved by the Plan II associate director to enroll in Tutorial Course 359T, *Essay Course*, in lieu of Tutorial Course 660H. Other requirements for the Bachelor of Arts, Plan II, are outlined below. All courses offered in the Plan II Honors Program are subject to approval by the Plan II Faculty Advisory Committee; in some areas the committee will prescribe certain courses for all students in the program. Current information on these matters is available in the Plan II office.

All students must complete the University's Core Curriculum (p. 20). In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete courses with content in the following four areas:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course

Courses with sufficient content in these areas will be identified in the *Course Schedule* by the appropriate flags. A course may carry more than one flag. The School of Undergraduate Studies monitors flagged courses to ensure that they meet the guidelines set by the General Faculty.

The following are the specific requirements of the Plan II program. In some cases, a course that is required for the BA, Plan II, may also be counted toward the core curriculum; these courses are identified below.

1. English 603 or Tutorial Course 603. Either course also meets the English composition and humanities requirements of the core curriculum.
2. Two courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag. One of these courses must be upper-division. Courses that carry a writing flag are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.
3. Proficiency in a language other than English is required. The study of a second language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never

appear in English. Knowledge of a second language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the second language for study in their chosen discipline. An intermediate level of competency as determined by the completion of any one of the following options:

- Certified proficiency on a placement or credit-by-exam test.
- Students with previous experience in the language they plan to use to meet the language requirement must take a language placement test. A student may not select for credit a language course below this placement level without departmental permission.
- A passing grade in a language course listed below:

Requirements		Hours
ASL 611C	Accelerated Second-Year American Sign Language	6
ASL 311D	American Sign Language III: Intermediate	3
ASL 312L	Second-Year American Sign Language II	3
ARA 611C	Intensive Arabic II	6
BEN 312L	Second-Year Bengali II	3
CHI 612	Accelerated Second-Year Chinese	6
CHI 412L	Second-Year Chinese II	4
CZ 611C	Intensive Czech II	6
CZ 412L	Second-Year Czech II	4
DAN 612	Accelerated Second-Year Danish	6
DCH 612	Accelerated Second-Year Dutch	6
FR 611C	Intermediate French	6
GER 612	Accelerated Second-Year German: Readings in Modern German	6
GK 312K	Intermediate Greek II	3
GK 412	Intensive Greek	4
GK 312L	Intermediate Greek II: Biblical Greek	3
GK 610C	Intermediate Modern Greek	6
GK 310K	Second-Year Modern Greek II	3
HEB 612C	Intensive Biblical Hebrew II	6
HEB 611C	Intensive Hebrew II	6
HIN 312L	Second-Year Hindi II	3
ITL 611C	Intermediate Italian	6
JPN 611D	Intermediate Japanese	6
KOR 412L	Second-Year Korean II	4
LAT 312K	Intermediate Latin II	3
MAL 312L	Second-Year Malayalam II	3
NOR 612	Accelerated Second-Year Norwegian	6
PSH 312L	Second-Year Pashto II	3
PRS 611C	Intensive Persian II	6
PRS 612C	Intensive Persian for Heritage Speakers	6
POL 312L	Second-Year Polish II	3
POR 611D	Intermediate Portuguese II	6
RUS 611C	Intensive Russian II	6
RUS 412L	Second-Year Russian II	4
SAN 312L	Second-Year Sanskrit II	3
S C 312L	Second-Year Serbian/Croatian II	3
SEL 611C	Intensive Slavic and Eurasian Languages II	6
SEL 312L	Second-Year Slavic and Eurasian Languages II	3
SPN 611D	Intermediate Spanish II	6

SPN 612	Accelerated Intermediate Spanish for Heritage Learners	6
SWA 611C	Intensive Swahili II	6
SWE 612	Accelerated Second-Year Swedish	6
TAM 312L	Second-Year Tamil II	3
TEL 312L	Second-Year Telugu II	3
TUR 611C	Intensive Turkish II	6
URD 312L	Second-Year Urdu II	3
YID 612	Accelerated Second-Year Yiddish	6
YOR 312L	Second-Year Yoruba II	3

d. Students who wish to meet the requirement with proficiency in a language not listed in the table above should contact the Texas Language Center (<http://www.utexas.edu/cola/centers/tlc>).

- Social Science 301. This course also meets the social and behavioral sciences requirement of the core curriculum.
- Six semester hours of non-United States history in the same geographic area.
- Eighteen semester hours of coursework as outlined below. To satisfy the core curriculum and the mathematics and natural science requirement of the BA, Plan II, a student may count (1) no more than twelve hours in mathematics, computer science, and statistics and scientific computation combined; and (2) no more than nine hours in any single field of study. Substitutions do exist for some of the requirements outlined below; each Plan II student should meet with a Plan II academic adviser to discuss her/his individual academic plan.
 - Mathematics 310P. This course also meets the mathematics requirement of the core curriculum. Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward this requirement. Students who enter the University with fewer than three units of high school mathematics at the level of Algebra I or higher must take Mathematics 301 or 303D without degree credit to remove their deficiency.
 - A three-hour course in logic or modes of reasoning designated for Plan II students, currently Tutorial Course 310 or a section of Philosophy 313Q.
 - Six hours of coursework in astronomy, biology, chemistry, geological sciences, physical science, or physics. This coursework may be used to fulfill the science and technology, part I, requirement of the core curriculum.
 - Biology 301E and Physics 321. Either of these courses may also be used to fulfill the science and technology, part II, requirement of the core curriculum. A three-hour course in astronomy, chemistry, or geological sciences designated for Plan II students may be taken in place of Physics 321.
 - Any remaining courses needed to provide eighteen hours of work must be chosen from the following fields. No more than three hours may be in the history of science or the philosophy of science. A list of approved alternative courses (items 10 and 11) is available in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>)
 - Astronomy
 - Biology
 - Chemistry
 - Geological sciences
 - Marine science
 - Nutrition
 - Physical science
 - Physics

- ix Mathematics, computer science, and statistics and data sciences
- x Other alternative science courses approved by the dean
- xi Approved alternative courses in history of science and philosophy of science

7. Philosophy 610Q.

8. An approved three-hour course in art history, music history, or history of theatre and dance; or a three-hour upper-division course in classical civilization, humanities, literature, or philosophy.

Electives

In addition to the core curriculum and the preceding specific requirements, the student must complete enough elective coursework to provide the 120 semester hours required for the degree. These 120 hours may include no more than twelve hours of conference courses and internship courses combined as described in Conference Courses and Internship Courses (p. 293); twelve hours of Bible; nine hours of designated coursework in air force science, military science, or naval science; nineteen hours completed on the pass/fail basis; thirty-six hours in any one field of study in the College of Liberal Arts or the College of Natural Sciences; and thirty-six hours in any other single college or school of the University. Mathematics courses at the level of college algebra may not count toward elective hours.

Order of Work

The usual order of work for students in Plan II is outlined below, although it is possible to make exceptions when there is good reason for doing so. There is some variation in the order of work for students in premedical, pre dental, and dual degree programs, for teacher certification candidates, and for students concentrating in science. Students in these areas should consult the director or an academic adviser.

Suggested Four-Year Plan

First Year:

- Tutorial Course 603 or English 603
- Biology 301E, Mathematics 310P, and Philosophy 313Q or Tutorial Course 310
- Six semester hours of non–United States history
- Foreign language courses
- Tutorial Course 302
- A three-semester-hour elective

Second Year:

- Philosophy 610Q
- Three semester hours in mathematics or natural science
- Government 310L and 312L
- Foreign language courses
- Social Science 301
- A three-semester-hour elective

Third and Fourth Years:

- Three semester hours in the visual and performing arts
- Three semester hours of humanities or courses in the history of fine arts
- Six semester hours of American history
- Six semester hours of Tutorial Course 357
- Tutorial Course 359T or 660H
- Physics 321 and three additional hours of science

- Elective courses sufficient to make a total of at least 120 semester hours, with only upper-division courses usually being approved for third- and fourth-year students

Bachelor of Science in Environmental Science

The Bachelor of Science in Environmental Science degree program is designed for students interested in an interdisciplinary scientific perspective on environmental and sustainability issues, analysis, and management. The degree program provides the broad foundation in physical, life, and social sciences needed for a career or graduate study in environmental science and related fields such as climate change, ecology, and conservation. Students who complete the program successfully will be able to assess environmental issues critically from multiple perspectives; to perform field, laboratory, and computer analyses; and to conduct original research. The program is designed to prepare graduates for careers in local, state, and federal government laboratories and nonprofit agencies, environmental consulting firms, environmental education and outreach agencies, and universities and other research settings. The degree is offered by the Jackson School of Geosciences with a major in geological sciences, by the College of Liberal Arts with a major in geographical sciences, and by the College of Natural Sciences with a major in biological sciences. The degree programs share common prescribed work, but each major has its own specific requirements. Students may earn only one Bachelor of Science in Environmental Science degree from the University.

Students must apply for admission to the degree program after completing prerequisite coursework. To be competitive for admission, students should have a grade point average of at least 2.75. More information about admission requirements is given in The Bachelor of Science in Environmental Science (p. 285).

The BSEnviroSci curriculum consists of 126 semester hours of coursework. All students must complete the University's Core Curriculum. The specific requirements consist of prescribed work, major requirements, and electives. In some cases, a course that is required for the degree may also be counted toward the core curriculum. In addition, for the major in geographical sciences, courses used to fulfill the University core curriculum requirements or the prescribed work below may also be counted toward the major requirements where applicable.

A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills one requirement may also be used to fulfill a flag requirement.

In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete courses with content in the following four areas:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course

Courses with sufficient content in these areas will be identified in the *Course Schedule* by the appropriate flags. A course may carry more than one flag. The School of Undergraduate Studies monitors flagged courses to ensure that they meet the guidelines set by the General Faculty.

The student must fulfill the University's General Requirements (p. 17) for graduation and the requirements of the College of Liberal Arts given earlier in this section. Graduation requirements include a grade point

average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension) for which a grade or symbol other than Q, W, X, or CR is recorded. In addition, a grade of at least C- is required in each mathematics and science course specifically required by the degree.

More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

Prescribed Work

1. Mathematics: Mathematics 408C, or 408N and 408S
2. Chemistry: Chemistry 301 or 301H; 302 or 302H; and 204
3. Physics: 317K and 117M, or another four-hour calculus-based physics sequence
4. Biological sciences: Biology 311C and 311D, or 315H
5. Ecology: Biology 373 and 373L, or Marine Science 320 and 120L or 152T (Topic: *Marine Ecology*) (Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10.)
6. Geological sciences: Geological Sciences 401 or 303, 346C, and an approved geological sciences course in sustainability
7. Geography: Geography 335N
8. Field experience: One course in each of the following areas
 - a. Introductory field seminar: Environmental Science 311
 - b. Senior field/research experience: Environmental Science 371, Geography 373F, 373K
9. Research methods: Environmental Science 331
10. Environmental and sustainability themes: One course in each of the following thematic areas:
 - a. Environmental and sustainability policy, ethics, and history: Geography 334, 336C, 340D, 342C, 356C, 356T (approved topics), Philosophy 325C
 - b. Geographic information systems: Geography 360G, 462K, Geological Sciences 327G
 - c. Climates and oceans: Biology 456L, Geography 333K, 356T (approved topics), Geological Sciences 371C (approved topics), 377P, Marine Science 320, 440, 354Q, 354T, 367K (Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10.)
 - d. Environmental economics, sustainability, and business: Economics 304K, 330T
11. Environmental Science 141 and 151

Additional Prescribed Work

1. *Writing and Literature*: English 316L, 316M, 316N, or 316P, and two courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag. One of these courses must be upper-division. Courses that carry a writing flag are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.
2. *Foreign language/culture*: One of the following foreign language/culture choices:
 - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
 - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
 - c. Two three-semester-hour courses in one foreign culture area chosen from a list of approved courses available in the Student Division or from the undergraduate adviser.

Courses taken to attain a certain level of proficiency in a foreign language are not electives and cannot be taken on the pass/fail basis.

3. *Social science*: Three semester hours chosen from a list of approved courses, in addition to the course used to fulfill the social and behavioral sciences requirement of the core curriculum. Courses on the approved list are primarily in anthropology, economics, geography, linguistics, psychology, and sociology, but not every course in these fields is approved.

The list is available each semester in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>).

4. *Cultural expression, human experience, and thought*: Three semester hours of approved coursework. The course must be in a field of study taught in the College of Liberal Arts. A course counted toward any requirement of the core curriculum may not also be counted toward this requirement.

A list of approved courses is available each semester in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Student-Services/Majors-and-Degrees/Course-Lists.php>).

Major Requirements

The following thirty semester hours of coursework are required; these hours must include at least eighteen hours of upper-division coursework.

1. Geography 301C and 304E
2. Twenty-four additional hours of coursework in geography, selected from Geography 301K, 333C, 333K, 334C, 334K, 335C, 335K, 335N, 338C, 339, 346, 356T (approved topics), 357, 360G, 462K, 464K, 366C, 366K, 367K, 470C, and 476T (approved topics)
3. A grade point average of at least 2.00 in the thirty hours of geography coursework required for the major

Electives

In addition to the core curriculum, prescribed work, additional prescribed work, and major requirements, the student must complete enough elective coursework to provide the 126 semester hours required for the degree. These 126 hours may include no more than twelve hours of conference courses and internship courses combined as described in *Conference Courses and Internship Courses* (p. 293); twelve hours of Bible courses; nine hours of designated coursework in air force science, military science, or naval science; sixteen hours completed on the pass/fail basis; thirty-six hours in any one field of study offered in the College of Liberal Arts or the College of Natural Sciences, unless major requirements state otherwise; and thirty-six hours in courses offered in any other single college or school of the University. Mathematics courses at the level of college algebra may not count toward elective hours.

Bachelor of Science in Psychology

As an alternative to the Bachelor of Arts degree, the Bachelor of Science in Psychology is designed to offer students a more extensive scientific program that may better prepare them for graduate study or employment in research fields. Students interested in mathematics-based or physiology-based areas of psychology have the opportunity to develop more breadth and depth in the fields that complement their area of interest within psychology. To accomplish this goal, the curriculum for the Bachelor of Science in Psychology puts more emphasis on natural sciences and less on language arts.

A student may not earn both the Bachelor of Arts with a major in psychology and the Bachelor of Science in Psychology.

A total of 120 semester hours is required. Thirty-six hours must be in upper-division courses. At least sixty hours, including eighteen hours of upper-division coursework, must be completed in residence at the University; at least twenty-four of the last thirty hours must be completed in residence at the University. Provided these residence rules are met, credit may be earned by examination, by extension, by correspondence (up to 30 percent of the hours required for the degree), or, with the approval of the dean, by work transferred from another institution. Up to sixteen semester hours of classroom and/or correspondence coursework may be taken on the pass/fail basis; this coursework may be counted only as electives.

Students in this degree program may pursue any of the honors programs available to Bachelor of Arts, Plan I, students. These programs are described in the section Liberal Arts Honors Programs, Plan I (p. 285).

All students must complete the University's Core Curriculum. In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete courses with content in the following four areas:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course

Courses with sufficient content in these areas will be identified in the *Course Schedule* by the appropriate flags. A course may carry more than one flag. The School of Undergraduate Studies monitors flagged courses to ensure that they meet the guidelines set by the General Faculty.

The specific requirements for the Bachelor of Science in Psychology consist of prescribed work, the major, the minor, and electives. Only in the following cases may a single course be counted toward more than one requirement:

1. A course that fulfills a core curriculum requirement may also be counted toward any specific requirement of the BSPsy unless otherwise stated below.
2. Courses counted toward the prescribed work may also be counted toward the major.
3. Up to three hours of coursework counted toward the prescribed work or toward the core curriculum may also be counted toward the minor.
4. A course that fulfills another requirement may also be used to fulfill a flag requirement.

The student must fulfill the University's General Requirements (p. 17) for graduation and the requirements given in the sections Special Requirements of the College of Liberal Arts (p. 292) and Applicability of Certain Courses (p. 292). University graduation requirements include a grade point average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension) for which a grade or symbol other than Q, W, X, or CR is recorded; for this degree, the student must also earn a grade point average of at least 2.00 in courses taken at the University and counted toward the major requirement.

More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

Prescribed Work

1. *Writing and Literature*: English 316L, 316M, 316N, or 316P, and two courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag. One of these courses must be upper-division. Courses that carry a writing flag are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.
2. *Foreign language/culture*: Students must complete one of the following options:
 - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
 - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
 - c. Two three-hour foreign culture courses chosen from a list available in the college's Student Division and the Department of Psychology.

Courses taken to attain the required level of proficiency in a foreign language are not electives and may not be taken on the pass/fail basis.
3. *Social science*: Three semester hours chosen from a list of approved courses, in addition to the course used to fulfill the social and behavioral sciences requirement of the core curriculum. Courses on the approved list are primarily in anthropology, economics, geography, linguistics, psychology, and sociology, but not every course in these fields is approved. Courses that are approved to count toward any core curriculum area other than social and behavioral sciences may not be counted toward this requirement. The list is available each semester in the Student Division and on the College of Liberal Arts Web site. (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>)
4. *Mathematics and natural science*: At least twenty-five semester hours of coursework as outlined below. Some of the courses that fulfill this requirement may also be counted toward the requirements of the core curriculum. No course may be counted toward both requirement 4c and 4d.
 - a. Mathematics 408C or 408K or a more advanced calculus course
 - b. Mathematics 316 or a more advanced mathematics course in probability
 - c. Sixteen to eighteen hours, consisting of two of the following sequences:
 - i Biology 311C, 311D, and 325
 - ii Chemistry 301, 302, and 204
 - iii Computer Science 303E, 313E, and one of the following: Computer Science 323E, 324E, 326E, 327E, 329E
 - iv Physics 317K, 117M, 317L, and 117N; or 301, 101L, 316, and 116L; or 303K, 103M, 303L, and 103N; or 302K, 102M, 302L, and 102N
 - d. One of the following:
 - i Three additional hours in mathematics. Mathematics 301, 302, 303D, 303F, 316K, and 316L may not be used to fulfill this requirement.
 - ii Three hours in biology, chemistry, computer science, or physics. Only the courses listed in requirement 4c above and more advanced courses may be used to fulfill this requirement.
5. *Cultural expression, human experience, and thought*: Three semester hours of approved coursework. The course must be in a field of study taught in the College of Liberal Arts. A course counted toward any

requirement of the core curriculum may not also be counted toward this requirement.

A list of approved courses is available each semester in the Student Division and on the College of Liberal Arts Web site. (<http://www.utexas.edu/cola/student-affairs/Student-Services/Majors-and-Degrees/Course-Lists.php>)

The Major

Twenty-eight semester hours of psychology, including Psychology 301 and 418, each with a grade of at least C, and at least eighteen semester hours of upper-division coursework. Of these twenty-eight hours, eighteen hours, including Psychology 418 and at least six hours of upper-division coursework, must be completed in residence at the University. Also included in these twenty-eight hours must be at least six hours in each of the following two categories. A list of the courses in each area is available at <http://www.psy.utexas.edu/> and in the Department of Psychology Undergraduate Office.

1. Clinical/social/developmental/evolutionary psychology
2. Cognition/language/neuroscience/perception

Psychology majors must earn a grade of at least C in Psychology 418 to register for upper-division psychology courses. Students may not enroll in Psychology 418 more than twice.

Psychology 357 and 359 may not be counted toward the twenty-eight hours in psychology required for the major.

The Minor

Twelve semester hours, including at least six hours of upper-division coursework, in any one field of study other than psychology. Six of the twelve hours must be taken in residence.

Additional restrictions may be imposed by the academic department in which the student completes the minor; before planning to use courses to fulfill the minor requirement, the student should also consult the department or program that offers them.

Electives

In addition to the core curriculum, prescribed work, major, and minor, the student must complete enough elective coursework to provide the 120 semester hours required for the degree. These 120 hours may include no more than twelve hours of conference courses and internship courses combined as described in Conference Courses and Internship Courses (p. 292); twelve hours of Bible courses; nine hours of designated coursework in air force science, military science, or naval science; sixteen hours completed on the pass/fail basis; thirty-six hours in any one field of study in the College of Liberal Arts or the College of Natural Sciences (including psychology); and thirty-six hours in any other single college or school of the University. Mathematics courses at the level of college algebra may not count toward elective hours.

Courses

The faculty has approval to offer the following courses in the academic years 2014-2015 and 2015-2016; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and->

procedures/credit-value-and-course-numbers). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

Liberal Arts

Liberal Arts: L A

Lower-Division Courses

L A 101L. Introduction to the Liberal Arts.

Topics related to exploring the various disciplines in the College of Liberal Arts. One lecture hour a week for one semester, or as required by the topic. Some sections are offered on the pass/fail basis only and some sections are offered on the letter-grade basis only. May be repeated for credit when the topics vary.

L A 302. Critical Thinking Seminar.

An examination of fundamental concepts in critical thinking, including the role of intellectual virtues, an analysis of the elements of thought, Socratic thinking, and the application of universal intellectual standards. Three lecture hours or two lecture hours and one discussion hour a week for one semester. Liberal Arts 302 and Natural Sciences 302 may not both be counted. May not be repeated for credit.

L A 104R. Community Service.

Restricted to recipients of the Rapoport Service Scholarship. Tutorial course, in which students submit reports based on service learning and appropriate supplementary reading. The equivalent of one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

Topic 1: Leadership, Ethics, and Society.

Topic 2: Civic Engagement and Civic Responsibility.

L A 110. Internship.

Restricted to students in the College of Liberal Arts. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work. The equivalent of one lecture hour and ten hours of fieldwork a week for one semester. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Completion of at least thirty semester hours of coursework, a University grade point average of at least 2.25, and consent of instructor.

L A 112C, 212C. Topics in Community Engagement.

One or two lecture hours and five to seven community engagement hours a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

L A 113P, 213P. Topics in Peer Mentoring.

One or two lecture hours and five to seven mentoring hours a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

L A 119, 219, 319. International Learning Seminars.

Restricted to students participating in a study abroad program. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Liberal Arts 119, 219, 319 and Undergraduate Studies 119 may not both be counted unless the topics vary. Liberal Arts 119, 219, 319 and 129, 229, 329 may not both be counted. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Upper-Division Courses

L A 320. Internship.

Designed to establish the academic foundations of an internship course in the liberal arts. Students integrate knowledge derived from their academic studies with the experiences gained in an internship setting. The equivalent of three lecture hours and ten hours of fieldwork a week for one semester. May be repeated for credit. Prerequisite: Completion of at least thirty semester hours of coursework, a University grade point average of at least 2.25, and consent of instructor.

L A 220L, 320L, 420L, 520L, 620L. Military Leadership Internship.

Restricted to students participating in an approved ROTC program. Field leadership training program. For each semester hour of credit earned, one week of full-time fieldwork. Some programs may also require classroom hours. Offered during the summer session only. No more than six semester hours of this course may be counted toward any degree. Offered on the pass/fail basis only. Prerequisite: Upper-division standing.

L A 621. International Internship.

Restricted to students participating in a study abroad program. One lecture hour and seven and one-half laboratory hours a week for one semester; with additional fieldwork hours to be arranged. Prerequisite: Upper-division standing.

L A 125, 225, 325. Topics in the Liberal Arts.

Analysis of topics in the philosophy and real-life application of the liberal arts. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. Additional meeting times may be required. Some sections are offered on the letter-grade basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing. Additional prerequisites vary with the topic and are given in the Course Schedule.

L A 129, 229, 329. International Learning Seminars.

Restricted to students participating in a study abroad program. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Liberal Arts 129, 229, 329 and Undergraduate Studies 119 may not both be counted unless the topics vary. Liberal Arts 119, 219, 319 and 129, 229, 329 may not both be counted. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

L A 131R, 231R, 331R. Research Internship.

Restricted to students in the College of Liberal Arts. For every semester hour of credit earned, three hours of fieldwork a week for one semester. May be repeated for credit, but no more than six hours may be counted toward degree requirements. Prerequisite: Upper-division standing, a grade point average of at least 2.50, and written consent of instructor.

Liberal Arts Honors

Liberal Arts Honors: LAH

Lower-Division Courses

LAH 102H, 202H, 302H. The Idea of the Liberal Arts.

Restricted to students in the Freshman Honors Program in the College of Liberal Arts. An overview of the liberal arts disciplines. One, two, or three class hours a week for one semester. Additional hours may be required. Offered on the pass/fail basis only.

LAH 103H. The Ideas of Civic Engagement.

Restricted to students in the Liberal Arts Honors Program in the College of Liberal Arts. Introduces Liberal Arts Honors students to the resources of the University, their history, and how to make best use of them. Provides guidance on internships, scholarships, and career paths, encouraging students to prepare for a lifetime of civic engagement and public service. One lecture hour a week for a semester; additional hours may be required. Humanities 116 and Liberal Arts Honors 103H may not both be counted. Offered on the pass/fail basis only. Prerequisite: Liberal Arts Honors 102H.

LAH 305. Liberal Arts Freshman Honors Seminar.

Restricted to students in the Freshman Honors Program in the College of Liberal Arts. Intensive small class lecture or seminar course addressing basic issues in various liberal arts disciplines. Lectures, readings, discussions, examinations. Three lecture hours a week for one semester. Humanities 305 and Liberal Arts Honors 305 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

Topic 1: Reacting to the Past. Liberal Arts Honors 305 (Topic 1) and 305 (Topic: Reacting to the Past) may not both be counted. Offered on the letter-grade basis only.

LAH 112H. The Nature of Inquiry.

Designed for students who plan to enter a liberal arts departmental honors program. Introduction to the nature of research in liberal arts disciplines. One and one-half class hours a week for one semester. Prerequisite: Forty-five semester hours of coursework and consent of the liberal arts honors director.

LAH 316. Studies in the Liberal Arts.

Restricted to Plan I majors in the College of Liberal Arts. Intensive lecture or seminar course addressing topics in various liberal arts disciplines. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

LAH 318Q. Supervised Research.

Individual instruction. Prerequisite: Consent of the liberal arts honors program adviser.

Upper-Division Courses

LAH 350. Topics in the Liberal Arts.

Restricted to Plan I majors in the College of Liberal Arts. Intensive lecture course treating topics from a variety of disciplinary perspectives, taught by instructors from various departments. Lectures, readings, discussions, examinations. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

Topic 1: Defense Policy. Articulation of national security strategy through decisions about Department of Defense organization and resources. Overview of military terms and organizing principles with an emphasis on policy, personnel, acquisition, budget, intelligence, and leadership. Only one of the following may be counted: Government 360N (Topic: Defense Policy), Liberal Arts Honors 350 (Topic: Defense Policy), 350 (Topic 1), Public Affairs 325 (Topic: Defense Policy). Offered on the letter-grade basis only.

Topic 2: Our Lives In Fiction. Examines the hypothesis that human beings have and continue to create and recreate themselves through the telling of stories. Explores the concept that stories help define what is significant, what is praiseworthy, and what it is we should value and why. Only one of the following may be counted: Core Texts and Ideas

345 (Topic: Our Lives in Fiction), Liberal Arts Honors 350 (Topic: Our Lives in Fiction), 350 (Topic 2). Offered on the letter-grade basis only.

Topic 3: Technical Change and Financial Crisis. Explores the economics of the business firm, the management of technical change, and the interaction between technology and finance in the writings of major twentieth century economists. Emphasis on attempting to understand the social and income-distributional consequences of technical change, the potential for system instability, and the dilemmas of public policy in this area. Liberal Arts Honors 350 (Topic: Technical Change and Financial Crisis) and 350 (Topic 3) may not both be counted. Offered on the letter-grade basis only.

Topic 4: Literature of World War I. Same as Humanities 350 (Topic 10). Selected readings from autobiographies, poetry, fiction, and memoirs, primarily about the Western Front, by German, British, and American authors; a short history of World War I; readings of a central book of literary analysis; exploration of the nature of war, the experience of combatants, and the legacy of the war itself and its unique literature. Only one of the following may be counted: Humanities 350 (Topic: Literature of the Great War), 350 (Topic 10), Liberal Arts Honors 350 (Topic: Literature of the Great War), 350 (Topic 4). Offered on the letter-grade basis only.

Topic 5: Modern Masters of the Novel. An examination of a range of subjects and styles that distinguish the capacity of the novel to reflect private lives and public moments. Focuses on nineteenth and twentieth century British and American novelists such as George Eliot, Philip Roth, Ford Maddox Ford, and Graham Greene. Only one of the following may be counted: Humanities 350 (Topic: Novels of Distinction), Liberal Arts Honors 350 (Topic: Novels of Distinction), 350 (Topic 5). Offered on the letter-grade basis only.

Topic 6: Documentary Film and Inquiry. Examines how narrative accounts such as documentary film, biography, or other non-fiction work impact the interpretation of significant events. A component of the class includes individual or collaborative research on a chosen topic and presentation of a life history project via a narrative description, video, photography, or other medium. Only one of the following may be counted: Educational Psychology 369K (Topic: Life History and Documentary Approaches to Inquiry), Liberal Arts Honors 350 (Topic: Life History and Documentary Approaches to Inquiry), 350 (Topic 6). Offered on the letter-grade basis only.

LAH 358Q. Supervised Research.

Individual instruction. May be repeated for credit, but no more than six semester hours may be counted toward College Honors. Prerequisite: A University grade point average of at least 3.50 and consent of the liberal arts honors program adviser.

LAH 364H. The Enlightenment.

Restricted to Plan I majors in the College of Liberal Arts. Examination of the European Enlightenment, an intellectual movement centered in eighteenth-century France and England that cut across all disciplines and arts and that looked back to the Renaissance and forward to the modern world. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 365H. Great Books in Political Philosophy.

Restricted to Plan I majors in the College of Liberal Arts. An investigation of what it means to think "philosophically" about politics and morals, by reading and interpreting primary sources of political philosophy from more than twenty centuries. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 368H. Literature of the Hispanic World.

Restricted to Plan I majors in the College of Liberal Arts. An examination of the literature and culture of Spain and Spanish America, from the Middle Ages to the present. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 369H. Comparative Legal Systems.

Restricted to Plan I majors in the College of Liberal Arts. A comparison of legal traditions from Europe, English common law, and Asia. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 370H. The Birth of the Modern World, 1400-1700.

Restricted to Plan I majors in the College of Liberal Arts. An interdisciplinary course on European culture during the age of the Renaissance and Reformation. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 371H. Classics of Greek Philosophy.

Restricted to Plan I majors in the College of Liberal Arts. A close reading of major works in the philosophy of Plato and Aristotle, supported by background reading in the history and literature of ancient Greece. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 373H. Literature of the Western World: Continuities.

Restricted to Plan I majors in the College of Liberal Arts. Tradition and innovation of form and thought in literature from Homer to the twentieth century. Three lecture hours and one discussion hour a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 376H. The Rise of Modern America.

Restricted to Plan I majors in the College of Liberal Arts. The end of Reconstruction (1877) to the end of the war in Vietnam (1975)-- industrialization, urbanization, immigration, nuclear energy, and global reach. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 377H. Ideas of the Twentieth Century.

Restricted to Plan I majors in the College of Liberal Arts. Central philosophical controversies of the twentieth century: ethics, politics, comparative religions, science and human nature. Three lecture hours and one discussion hour a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 378H. The Natural Sciences in the Liberal Arts Context.

Restricted to Plan I majors in the College of Liberal Arts. An attempt to understand contemporary developments in science by focusing on the history and philosophy of science. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 379H. Classical Asian Civilizations.

Restricted to Plan I majors in the College of Liberal Arts. An examination of the contributions of India and China to intellectual history. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

Prerequisite: Upper-division standing and a grade point average of at least 3.50.

LAH 679T. Honors Thesis.

Restricted to Plan I majors in the College of Liberal Arts. Supervised research, reading, and writing of a substantial paper on an interdepartmental subject. Conference course for two semesters. Offered on the letter-grade basis only. Prerequisite: For Liberal Arts Honors 679TA, upper-division standing, a grade point average of at least 3.50, and written consent of the director of the Liberal Arts Honors Program; for 679TB, Liberal Arts Honors 679TA.

Department of African and African Diaspora Studies

African and African Diaspora Studies: AFR

Lower-Division Courses

AFR 301. African American Culture.

Survey of African American culture in the United States from the 1600s to the present. Subjects include the circumstances and responses of blacks during North American enslavement, the Civil War, Reconstruction, the Great Migration, the Harlem Renaissance, the civil rights movement, and contemporary contexts. Three lecture hours a week for one semester.

AFR 303. Introduction to Black Studies.

Same as Anthropology 310D. Introduction to canonical black studies literature, themes, and theories. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 303, Anthropology 310D, 310L (Topic: Intro to African and African Diaspora Studies).

AFR 310K. Introduction to Modern Africa.

Same as History 310. Introduction to modern Africa, with focus on colonial and postcolonial development in political organization, economics, sociolinguistics, and literature. Three lecture hours a week for one semester.

AFR 310L. Introduction to Traditional Africa.

Same as History 311K. Introductory, interdisciplinary course on the peoples and cultures of Africa. Three lecture hours a week for one semester.

AFR 311C. Performance, Feminism, and Social Change.

Same as Women's and Gender Studies 301 (Topic 14). Exploration of the ways that engaged performance and feminist practice generate space for social change, including the basic principle that social transformation requires individual awareness, and that awareness necessitates a rigorous examination of race, gender, class, and sexuality. Only one of the following may be counted: African and African Diaspora Studies 311C, 317F (Topic: Performance, Feminism, and Social Change), Women's and Gender Studies 301 (Topic: Performance, Feminism, and Social Change), 301 (Topic 14).

AFR 317C. Special Topics in African Studies.

Three lecture hours a week for one semester, with one laboratory hour a week if required by the topic. Some topics partially fulfill legislative requirement for American history; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: The United States and Africa. Same as History 317L (Topic 7: The United States and Africa). History of political, economic, and cultural relations between the United States and Africa from the early

origins of the slave trade to the present. Only one of the following may be counted: African and African Diaspora Studies 317 (Topic: United States and Africa), 317C (Topic 1), History 317L (Topic 7). Partially fulfills legislative requirement for American history.

Topic 2: Yoruba Women. Same as Women's and Gender Studies 301 (Topic 15). Examination of gender construction in Yorubaland, including an exploration of the difference between Western gender construction and African notions of gender through analyses of the religious, linguistic, cultural, and sociopolitical aspects of Yoruba life. Only one of the following may be counted: African and African Diaspora Studies 317C (Topic: Yoruba Women), 317C (Topic 2), Women's and Gender Studies 301 (Topic: Yoruba Women), 301 (Topic 15).

Topic 3: Peoples and Cultures of Africa. Exploration of indigenous and contemporary societies of Africa, south of the Sahara, designed to provide students with an understanding of the diversity of the societies and cultures of Africa. Focuses on the precolonial, colonial, and postcolonial historical, political, economic, and sociocultural issues that have determined and shaped the lives of the people. African and African Diaspora Studies 317C (Topic: Peoples and Cultures of Africa) and African and African Diaspora Studies 317C (Topic 3) may not both be counted.

Topic 4: The Civilizations of Africa to 1800. Same as History 317N (Topic 3). Introductory course exposes students to ancient Africa, its peoples, cultures, and landscapes. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 317C (Topic: Civilizations of Africa to 1800), 317C (Topic 4), History 317N (Topic: Civilizations of Africa to 1800), 317N (Topic 3).

AFR 317D. Special Topics in Black United States Studies.

Three lecture hours or two lecture hours and one discussion hour a week for one semester, with one additional laboratory hour a week if required by the topic. Some topics partially fulfill legislative requirement for American history; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: Introduction to African American History. Same as History 317L (Topic 3: Introduction to African American History). Only one of the following may be counted: African and African Diaspora Studies 317 (Topic: Introduction to African American History), 317D (Topic 1), History 317L (Topic 3). Partially fulfills legislative requirement for American history.

Topic 2: Anthropology of Race and Ethnicity: An Introduction. Same as American Studies 315D and Anthropology 310L (Topic 2: Anthropology of Race and Ethnicity: An Introduction). Examines the social importance of race and ethnicity both in America and around the world. Only one of the following may be counted: African and African Diaspora Studies 317D (Topic 2) and American Studies 315 (Topic: Anthropology of Race and Ethnicity), 315D, Anthropology 310L (Topic 2).

Topic 3: The Black Power Movement. Same as History 317L (Topic 9: The Black Power Movement). Examines the major organizations, key figures, and ideologies of the Black Power movement from the late 1960s and early 1970s. Only one of the following may be counted: African and African Diaspora Studies 317D (Topic: Black Power Movement), 317D (Topic 3), History 317L (Topic: Black Power Movement), 317L (Topic 9). Partially fulfills legislative requirement for American history.

Topic 4: The Politics of Black Identity. Analysis of the idea that the activities and practices of certain black celebrities, leaders, and intellectuals whose attitudes, behavior, and politics differ from the black majority undermine black progress. Examines the history of labels that make reference to black identity, including "Uncle Tom," "Negro,"

"sellout," and various other denigrating names. African and African Diaspora Studies 317D (Topic 4) and 317F (Topic: The Politics of Black Identity) may not both be counted.

Topic 5: Introduction to Black Women's Studies. Same as Women's and Gender Studies 301 (Topic 16). Interdisciplinary examination of the complexities of black womanhood in America through an investigation of history, identity, popular culture, and black feminism/womanism, as well as social and political activism. Only one of the following can be counted: African and African Diaspora Studies 317D (Topic: Introduction to Black Women's Studies), 317D (Topic 5), Women's and Gender Studies 301 (Topic: Introduction to Black Women's Studies), 301 (Topic 16).

AFR 317E. Special Topics in the African Diaspora.

Three lecture hours a week for one semester, with one laboratory hour a week if required by the topic. Some topics partially fulfill legislative requirement for American history; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: Black Queer Diaspora Aesthetics. Same as Anthropology 310L (Topic 6) and Women's and Gender Studies 301 (Topic 17). Exploration of over two decades of work produced by and about black queer subjects throughout the circum-Atlantic world. Provides an introduction to various artists and intellectuals of the black queer diaspora, as well as an examination of the viability of black queer aesthetic practice as a form of theorizing. Only one of the following may be counted: African and African Diaspora Studies 317E (Topic: Black Queer Diaspora Aesthetics), 317E (Topic 1), Anthropology 310L (Topic: Black Queer Diaspora Aesthetics), 310L (Topic 6), Women's and Gender Studies 301 (Topic: Black Queer Diaspora Aesthetics), 301 (Topic 17).

Topic 2: Diaspora: Race, Nation, and Resistance. Same as Anthropology 310L (Topic 7). Subjects include makings and meanings of diaspora, the differences and similarities between diaspora and related concepts such as race, nation, and cultural identity. Focuses on the making of the black Atlantic world, and comparative analysis between black diasporic life and that of other global dispersals, particularly among Asian and indigenous populations, and how resistance serves as a key link. Only one of the following may be counted: African and African Diaspora Studies 317E (Topic: Diaspora: Race/Nation/Resistance), 317E (Topic 2), Anthropology 310L (Topic: Diaspora: Race/Nation/Resistance), 310L (Topic 7), Asian American Studies 310 (Topic: Diaspora: Race/Nation/Resistance).

Topic 3: Liberation in the African Diaspora. Same as Latin American Studies 310 (Topic 7). Examination of liberation and freedom struggles in the African diaspora, focusing on common intellectual, political, and social currents among the diaspora's various groups. Course focuses on three major themes: abolitionism, Pan-Africanism and national liberation, and hip hop. Particular emphasis will be on the ideas associated with these movements, and the major organizations and intellectual currents in all three. Only one of the following may be counted: African and African Diaspora Studies 317E (Topic: Liberation in the African Diaspora), 317E (Topic 3), Latin American Studies 310 (Topic: Liberation in the African Diaspora), 310 (Topic 7).

AFR 317F. Special Topics in Black Expressive Culture.

Three lecture hours a week for one semester, with one laboratory hour a week if required by the topic. Some topics partially fulfill legislative requirement for American history; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

Topic 1: African American Literature and Culture. Same as English 314V (Topic 1: African American Literature and Culture). Explores texts, drawn from a variety of genres and periods, that indicate the

range of African American experiences and how those experiences are influenced by issues such as class, ethnicity, gender, sexuality, and race. African and African Diaspora 317F (Topic 1) and English 314V (Topic 1) may not both be counted.

Topic 2: Music of African Americans. Same as Music 307 (Topic 1). Introduction to the variety of modes of expression of African American culture in music and other related genres. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 317 (Topic 2: Music of African Americans), 317F (Topic 2), Music 307 (Topic 1).

AFR 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in African and African Diaspora Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

AFR 321. The African Diaspora in the Americas.

Same as Anthropology 324L (Topic 9: The African Diaspora in the Americas). Black cultures and societies in the New World, and their African heritage. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 321K. African American Family.

Same as Social Work 360K (Topic 2) and Women's and Gender Studies 340 (Topic 3). Overview of historical and contemporary issues facing African American families and children. Social service delivery to African American families and communities is emphasized. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 321K, 374 (Topic 1: African American Family), Social Work 360K (Topic 2), Women's and Gender Studies 340 (Topic 3).

AFR 321L. Sociology of Education.

Same as Sociology 321L and Women's and Gender Studies 345 (Topic 23: Sociology of Education). Education as a societal institution, with emphasis on the United States educational system: how the system works; the effects of the system; recent changes. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 321N. Life Span Development of Black Women.

Same as Educational Psychology 363M (Topic 5) and Women's and Gender Studies 340 (Topic 41). The psychological and social issues that affect the life span development of Black women. Discusses issues such as socioeconomic status, political climate, social norms, gender and ethnic identity, mental health, family dynamics, academic achievement, and social adjustment. Only one of the following may be counted: African and African Diaspora Studies 321N, 372D (Topic: Life Span Development of Black Women), 374D (Topic: Life Span Development of Black Women), Educational Psychology 363M (Topic 5), Women's and Gender Studies 340 (Topic: Life Span Development of Black Women), 340 (Topic 41). Prerequisite: Psychology 301 or another introductory behavioral science course.

AFR 322. Introduction to African Prehistory.

Same as Anthropology 324L (Topic 7: Introduction to African Prehistory). Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 322D. Race and the Digital.

Same as Sociology 322D and Women's and Gender Studies 322 (Topic 7). Review of theoretical developments in the sociological study of "race," including an examination of processes of racialization and cultural texts, in order to better understand the ways in which identities are socially produced. Attention will be placed on forms of popular culture, black cultural production, and political action to question how such practices are shaped by migrations within the African diaspora. Only one of the following may be counted: African and African Diaspora Studies 322D, 374E (Topic: Race, Culture, and Migration), Sociology 321K (Topic: Race, Culture, and Migration), 322D, Women's and Gender Studies 322 (Topic: Race, Culture, and Migration), 322 (Topic 7). Prerequisite: Upper-division standing.

AFR 323. The Male in African American Culture and Society.

Same as Anthropology 324L (Topic 18: The Male in African American Culture and Society). Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 324E. Racism and Antiracism.

Same as Asian American Studies 330 (Topic 2). Examines the theories and definitions of racism across several fields: anthropology, sociology, psychology, cultural studies, postcolonial studies, and gender/sexuality studies. Also includes a section that focuses on anti-racist activism, particularly within people of color and immigrant communities. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 324E, 374D (Topic: Racism and Antiracism), 374D (Topic 10), Anthropology 324L (Topic: Racism and Antiracism), Asian American Studies 330 (Topic: Racism and Antiracism), 330 (Topic 2). Prerequisite: Upper-division standing.

AFR 326. Afro-Caribbean Politics and Culture in Central America.

Same as Anthropology 324L (Topic 47), Latin American Studies 337N, and Women's and Gender Studies 340 (Topic 38). Exploration of black identity, political systems, and community activism in Central America and the Caribbean. Only one of the following may be counted: African and African Diaspora Studies 326, 374E (Topic: Afro-Caribbean Politics and Culture in Central America), Anthropology 324L (Topic: Afro-Caribbean Politics and Culture in Central America), 324L (Topic: 47), Government 365N (Topic: Afro-Caribbean Politics and Culture in Central America), Latin American Studies 337M (Topic: Afro-Caribbean Politics and Culture in Central America), 337N, Women's and Gender Studies 340 (Topic: Afro-Caribbean Politics and Culture in Central America), 340 (Topic 38). Prerequisite: Upper-division standing.

AFR 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in African and African Diaspora Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

AFR 345. History of East Africa.

Same as History 359P. A survey of the history of Kenya, Tanzania, and Uganda from prehistoric times to the postindependence era. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 345C. History of West Africa.

Same as History 359R. A history of the West Africa region: the rise and fall of kingdoms, relations with Europe and Asia, the great revolutions

of the nineteenth century, colonial administration, decolonization, and the search for economic development and political stability since independence. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 348C. Minority Student Leadership Issues.

Same as Educational Psychology 369K (Topic 6). Exploration of racial identity development and the psychological impact of racism on all students, regardless of ethnicity. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 348C, 374D (Topic: Minority Student Leadership Issues), Educational Psychology 369K (Topic: Minority Student Leadership Issues), 369K (Topic 6). Prerequisite: Six semester hours of upper-division coursework in education or other behavioral sciences, and consent of instructor.

AFR 356C. African American Theatre History: Precolonial West African Performance to 1950.

Chronological examination of the theatrical work of Africans and African Americans from precolonial West Africa to the United States in 1950. Subjects include productions, performance theory, play texts, essays, reviews, and manifestos within their sociopolitical contexts, with an emphasis on strategies of resistance that are embedded in aesthetics. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 356C, 374F (Topic: African-American Theatre History, Precolonial-1950), Theatre and Dance 357T (Topic: African-American Theatre History, Precolonial-1950). Prerequisite: Upper-division standing.

AFR 356D. African American Theatre History: 1950 to Present.

Chronological examination of the history of African American theatre since 1950, through the study of productions, performance theory, play texts, essays, reviews, and manifestos within their sociopolitical contexts, with an emphasis on strategies of resistance that are embedded in aesthetics. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 356D, 374F (Topic: African American Theatre History, 1950-Present), Theatre and Dance 357T (Topic: African American Theatre History, 1950-Present). Prerequisite: Upper-division standing.

AFR 356E. Black Women and Dance.

Same as Women's and Gender Studies 340 (Topic 43). Exploration of how black women express creativity in response to the violence of racism and sexism, and to envision new ways of being and moving in the world. Women's participation in ritual, concert, and social dance in North America, Haiti, Cuba, and Brazil will be studied through readings, viewings, and stagings. Only one of the following may be counted: African and African Diaspora Studies 356E, 372E (Topic: Black Women and Dance), Theatre and Dance 357T (Topic: Black Women and Dance), Women's and Gender Studies 340 (Topic: Black Women and Dance), 340 (Topic 43). Prerequisite: Upper-division standing.

AFR 357C. African American History to 1860.

Same as American Studies 321E and History 357C. Review of West African origins; New World settlement patterns, social life, and culture; discussion of the Atlantic slave trade, the development of capitalism and plantation slavery, and the origins of racism. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 357C, American Studies 321 (Topic: African American History to 1860), 321E, History 357C. Partially fulfills legislative requirement for American History. Prerequisite: Upper-division standing.

AFR 357D. African American History since 1860.

Same as American Studies 321F, History 357D, and Urban Studies 353 (Topic 1: African American History since 1860). Survey of the history of African Americans in the United States from 1860 to the present: Emancipation, Reconstruction politics, migration and urbanization, and the evolution of African American culture; kinds of sources and methods valuable for analyzing African American life and culture. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 357D, American Studies 321 (Topic: African American History since 1860), 321F, History 357D, Urban Studies 353 (Topic 1). Partially fulfills legislative requirement for American History. Prerequisite: Upper-division standing.

AFR 359N. History of Africa since 1800.

Same as History 359N. Development of sub-Saharan Africa from the end of the slave trade to independence. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

AFR 361K. Performing Race: African American Literary Performance.

Study of the criticism and performance of modern African American drama. Three lecture hours a week for one semester. African and African Diaspora Studies 361K and 374 (Topic: Performance of Dramatic Literature: African American Writers) may not both be counted. Prerequisite: Upper-division standing.

AFR 365. Politics in Contemporary Africa.

Same as Government 365N (Topic 1: Politics in Contemporary Africa). Three lecture hours a week for one semester. Prerequisite: Six semester hours of lower-division coursework in government.

AFR 372C. Topics in Critical Black Studies.

Explores the history, foundational ideas, and subsequent theoretical developments that guide contemporary black studies. Three lecture hours a week for one semester. Only one of the following may be counted unless the topics vary: African and African Diaspora Studies 372C, 374, 374C, 374D, 374E, 374F. Some topics partially fulfill the legislative requirement for American history. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

Topic 2: Race and Beauty in American Culture. Same as History 350R (Topic 11: Race and Beauty in American Culture). Only one of the following may be counted: African and African Diaspora Studies 372C (Topic 2), 374D (Topic 1: Race and Beauty in American Culture), History 350L (Topic 52: Race and Beauty in American Culture), 350R (Topic 11). Partially fulfills legislative requirement for American history. Additional prerequisite: Six semester hours of coursework in history.

Topic 3: Property in American Culture. Same as American Studies 370 (Topic 38: Property in American Culture). Explores American conceptions of property over a wide range of economic transformations from the mercantile to the digital age, with special attention to the ambiguous and tension-filled meanings of property for women, African Americans, and Native Americans. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic 3), 374D (Topic: Property in American Culture), American Studies 370 (Topic: Property in American Culture), 370 (Topic 38).

Topic 4: Gender and Slavery in the United States. Same as History 350R (Topic 14: Gender and Slavery in the United States) and Women's and Gender Studies 345 (Topic 31: Gender and Slavery in the United States). Examines the gendered experience of chattel slavery in the United States. Includes critical analysis of classic and contemporary texts, films, and songs that focus on slave labor, family, community, sexuality, and the economy. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic 4),

374D (Topic: Gender and Slavery in the United States), History 350L (Topic: Gender and Slavery in the United States), 350R (Topic 14), Women's and Gender Studies 340 (Topic: Gender and Slavery in the United States), 345 (Topic 31). Partially fulfills legislative requirement for American history. Additional prerequisite: Six semester hours of coursework in history.

Topic 12: Race, Gender, and Surveillance. Same as Sociology 322V and Women's and Gender Studies 322 (Topic 8). Overview of theories in the sociology of social control, with a focus on risk, power, ethics, and surveillance. Examines historical transformations in social control and the distributions of power in the United States and global contexts, with attention to race, gender, and class. Subjects include: the transatlantic slave trade; prisons and punishment; the gaze, voyeurism, and reality television watching; the Internet; travel and state borders; privacy; and biometrics and the body. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic 12), 374E (Topic: Surveillance and Social Control), Sociology 321K (Topic: Surveillance and Social Control), 322V, Women's and Gender Studies 322 (Topic: Surveillance and Social Control), 322 (Topic 8). Additional prerequisite: Upper-division standing.

Topic 14: Black Political Thought. Same as American Studies 370 (Topic 42). Exploration of black social and political thinkers, writers, and reformers, and how their works influence the legacies of slavery, empire, and patriarchy within the United States. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic: Black Political Thought), 372C (Topic 14), American Studies 370 (Topic: Black Political Thought), 370 (Topic 42).

Topic 15: Postcolonial Women Writers. Same as Comparative Literature 323 (Topic 38). Literary exploration of how postcolonial women across the world view their positions as citizens, migrants, workers, parents, activists, and artists in the new millennium. Subjects include the effects of imperialism in women's lives, western feminisms developed to address global women's needs, and what new possibilities for decolonization, feminism, and creativity remain to be explored. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic: Postcolonial Women Writers), 372C (Topic 15), Comparative Literature 323 (Topic: Postcolonial Women Writers), 323 (Topic 38), English 370W (Topic: Postcolonial Women Writers).

AFR 372D. Topics in Black Education, Psychology, and Health.

Explores the history, theoretical developments, and institutional forms that impact the education and the physical, mental, and emotional health and well-being of people of African descent. Three lecture hours a week for one semester. Only one of the following may be counted unless the topics vary: African and African Diaspora Studies 372D, 374, 374C, 374D, 374E, 374F. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

Topic 1: Psychology of Race and Racism. Same as Educational Psychology 362 (Topic 6: Psychology of Race and Racism). Only one of the following may be counted: African and African Diaspora 374D (Topic 8: Psychology of Race and Racism), 372D (Topic 1), Curriculum and Instruction 362 (Topic 6).

Topic 2: Sociocultural Influences on Learning. Human learning in multisocial, multilingual, and multicultural contexts; realities of society and their impact on learning; social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, parent and community involvement. Three lecture hours a week for one semester, with field hours to be arranged. Only one of the following may be counted: African and African Diaspora Studies 372D (Topic 2), 374D (Topic: Sociocultural Influences on Learning), Applied Learning and

Development 327. Additional prerequisite: Three semester hours of coursework in psychology.

AFR 372E. Topics in Black Popular Culture.

Studies in music, art, literature, and sports that explore the artistic, aesthetic, bodily, and other cultural expressions and traditions of black people. Three lecture hours a week for one semester; additional hours required for some topics. Only one of the following may be counted unless the topics vary: African and African Diaspora Studies 372E, 374, 374C, 374D, 374E, 374F. Some topics partially fulfill legislative requirement for American history. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

Topic 1: Toni Morrison. Same as English 349S (Topic 5: Toni Morrison) and Women's and Gender Studies 345 (Topic 46: Toni Morrison). An examination of select novels by the Nobel Laureate and Pulitzer Prize-winning novelist focuses on the positional uniqueness that womanism shares with a predominant feminism, which surfaces in historicized familial relationships. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 1), 374F (Topic: Toni Morrison), English 349S (Topic 5), Women's and Gender Studies 340 (Topic: Toni Morrison), 345 (Topic 46). Prerequisite: Six semester hours of upper-division coursework in English.

Topic 2: Slavery across Genres. Same as American Studies 370 (Topic 32: Slavery across Genres). Uses nonfictional and fictional narrative accounts of slavery in the United States to examine the political, social, cultural, economic, and psychological aspects of the institution of slavery at different historical moments. Sources may include authors such as Frederick Douglass, Toni Morrison, William Faulkner, Harriet Beecher Stowe, and Edward P. Jones; graphic novels; conceptual art; court records; and bills of sale. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 2), 374D (Topic 7), American Studies 370 (Topic: Slavery across Genres), 370 (Topic 32).

Topic 4: African American Literature through the Harlem Renaissance. Same as English 376R. A survey of African American writing, including autobiography, poetry, fiction, and drama. Authors may include Douglass, Jacobs, Frances E. W. Harper, Chestnut, Du Bois, Hurston, and Hughes. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 4), 374F (Topic 1), English 376R. Some sections are offered on the letter-grade basis only. Additional prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

Topic 5: African American Literature since the Harlem Renaissance. Same as English 376S. The development of African American poetry, drama, fiction, and nonfiction since the Harlem Renaissance. Authors may include Wright, Ellison, Baldwin, Malcolm X, Baraka, Morrison, Shange, and Charles Johnson. Three lecture hours a week for one semester. African and African Diaspora Studies 372E (Topic 5) and English 376S may not both be counted. Some sections are offered on the letter-grade basis only. Additional prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

Topic 8: Self-Revelation in Women's Writing. Same as Comparative Literature 323 (Topic 4), Middle Eastern Studies 342 (Topic 19), and Women's and Gender Studies 340 (Topic 14). Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 8), 374 (Topic 26), Comparative Literature 323 (Topic 4), English 322 (Topic: Self-Revelation in Women's Writing), Middle Eastern Studies 322K (Topic 26), 342 (Topic 19), Persian 361 (Topic: Self-Revelation in Women's Writing), Women's and Gender Studies 340 (Topic 14).

Topic 12: Black Perspectives in Jazz. Same as Music 342 (Topic 5). Explores the social, cultural, political, and artistic relationships between

jazz and the black experience, both within the African American context and throughout the diaspora. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 12), 374 (Topic 10: Black Perspectives in Jazz), Music 342 (Topic 5).

Topic 13: Black Queer Literature and Film. Same as English 376M (Topic 8) and Women's and Gender Studies 340 (Topic 47). Analyzes written works, films, and videos by and about lesbians, bisexual, transgender, and gay black people, with an emphasis on understanding the historical and theoretical construction of sexual and gender identities and sexual/cultural practices in black communities. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic: Black Queer Literature and Film), 372E (Topic 13), 374F (Topic: Black Queer Literature and Film), English 376M (Topic: Black Queer Literature and Film), 376M (Topic 8), Women's and Gender Studies 340 (Topic: Black Queer Literature and Film), 340 (Topic 47).

Topic 15: Contemporary African American Women's Fiction. Same as English 376M (Topic 7) and Women's and Gender Studies 340 (Topic 29). Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Contemporary African American Women's Fiction), 372E (Topic 15), English 376M (Topic: Contemporary African American Women's Fiction), 376M (Topic 7), Women's and Gender Studies 340 (Topic: Contemporary African American Women's Fiction), 340 (Topic 29). Additional prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

Topic 17: Hip Hop Rhetorics. Examination of the hip hop rhetorics of writers, performers, and activists of the hip hop generation. Subjects include the use of cultural tools, including rap, fashion, dance, graffiti, and deejaying, to construct their identities and make and disseminate meaning within and about their social worlds, particularly around issues of racism, sexism and misogyny, poverty, and heterosexism. African and African Diaspora Studies 372E (Topic: Hip Hop Rhetorics) and 372E (Topic 17) may not both be counted.

Topic 18: Kinetic Storytelling. Exploration of the use of dance as a practice of social justice. Kinetic storytelling is a dance-based theatre that is highly structured yet improvisational and is explicitly informed by Africanist aesthetics and concerns of marginalization and inequity. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic: Kinetic Storytelling), 372E (Topic 18), Theatre and Dance 352T (Topic: Kinetic Storytelling). Additional prerequisite: Consent of instructor.

Topic 19: Race and Sport in African American Life. Same as Anthropology 324L (Topic 26) and Kinesiology 352K (Topic 6). Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 19), 374 (Topic 27), Anthropology 324L (Topic 26), Kinesiology 352K (Topic 6) Additional prerequisite: Upper-division standing.

AFR 372F. Topics in Blacks in Government, Law, and Policy.

Explores the philosophical, legal, and institutional traditions affecting black people as individual members of a group and participants in broader societies. Three lecture hours a week for one semester. Only one of the following may be counted unless the topics vary: African and African Diaspora Studies 320, 372F, 374, 374C, 374D, 374E. Some topics partially fulfill legislative requirement for American history. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

Topic 3: States and Peasants. Same as Government 365N (Topic 5: States and Peasants). Prerequisite: Six semester hours of lower-division_coursework_in government.

Topic 10: Race and the Criminal Justice System. Same as Anthropology 324L (Topic 38). Examines historical and contemporary studies that provide arguments about the connections between race, poverty, and the criminal justice system. Subjects include how and

why acts of police violence, questionable court proceedings, and unjust sentences routinely take place, and how and why they are often sanctioned by institutional practices and society at large. Only one of the following may be counted: African and African Diaspora Studies 320 (Topic 3), 372F (Topic 10), Anthropology 324L (Topic 38).

Topic 13: Urban Unrest. Same as Asian American Studies 330 (Topic 6), American Studies 321 (Topic 8), Anthropology 324L (Topic 46), and Urban Studies 354 (Topic 14). Analysis of the roots of urban unrest, exploring a range of origins: joblessness, state violence, white flight, backlash against civil rights gains, new immigration, and interracial strife. Beyond race and class, subjects include exploring unrest as a mode of pushing the normative boundaries of gender and sexuality in public space. Course material will draw from film, literature, history, geography, and anthropology. Only one of the following may be counted: African and African Diaspora Studies 372F (Topic: Urban Unrest), 372F (Topic 13), 374D (Topic: Urban Unrest), American Studies 321 (Topic: Urban Unrest), 321 (Topic 8), Anthropology 324L (Topic: Urban Unrest), 324L (Topic 46), Asian American Studies 330 (Topic: Urban Unrest), 330 (Topic 6), Urban Studies 354 (Topic: Urban Unrest), 354 (Topic 14).

Topic 15: The Tragicomedy of American Democracy. Same as American Studies 370 (Topic 44) and Core Texts and Ideas 326 (Topic 2). Examines the foundational ideas and practices essential to the unfolding of American democracy by focusing on founding documents, public speeches, major political conflicts, and canonical texts of political philosophy. Only one of the following may be counted: African and African Diaspora Studies 374D (Topic: Tragicomedy of American Democracy), 372F (Topic 15), American Studies 370 (Topic: Tragicomedy of American Democracy), 370 (Topic 44), Core Texts and Ideas 326 (Topic: Tragicomedy of American Democracy), 326 (Topic 2), Western Civilization 320 (Topic: Tragicomedy of American Democracy).

AFR 372G. Topics in African and African Diasporic Cultures and Languages.

Explores the cultural, historical, linguistic, artistic, philosophical, and other intellectual traditions emerging from within Africa and as developed, reinterpreted, or reimagined in diasporic contexts. Three lecture hours a week for one semester; additional hours required for some topics. Only one of the following may be counted unless the topics vary: African and African Diaspora Studies 372G, 374, 374C, 374D, 374E, 374F. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

Topic 1: Literature of AIDS in Africa. Same as English 360S (Topic 2: Literature of AIDS in Africa). Examines the emerging cultural representations of AIDS in sub-Saharan Africa through journalistic, social science, and historical accounts.
