**Topic 1: Race and Slavery in Brazil.** Same as Latin American Studies 370P (Topic 7). Focus on the differing meanings and values attributed by major Brazilian writers to the national "race." Topics include images of slavery and slaves in the Brazilian abolitionist literature; fictional and self-representational literature by Afro-Brazilian authors; the debate around the "Black Aesthetic"; and finally, the representation of Afro-Brazilians in other media such as film, painting, television, and popular music (samba, hip-hop, funk). Only one of the following may be counted: Latin American Studies 370P (Topic: The Color of Progress: Race and Slavery in Brazil), 370P (Topic 7), Portuguese 348 (Topic 1), 375 (Topic: The Color of Progress: Race and Slavery in Brazil).

**Topic 2: Afro-Brazilian Diaspora.** Same as Latin American Studies 370P (Topic 8). Examines Afro-Brazilians in the post-abolition (1888 and after) era and the strategies deployed by cultural producers and participants in social movements to overcome the barriers to the achievement of political power and self-determination.

**Topic 3: Brazilian and African Dialogues.** Same as Latin American Studies 370P (Topic 9). A general introduction to the colonial and post-colonial experiences of Portuguese-speaking Africa. Overview of the socio-political and economic experiences of the lusophone African countries under colonialism. Examination of the armed struggle and the combative literary outpourings that impacted morale in the fight for independence.

### **POR 350F. Topics in Film and Media Cultures.**

Audiovisual and media production treatment examined through themes in contemporary Iberian, Latin American, or African societies. Subjects include the analysis of the language, audiovisual, and media cultures and their implications. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Portuguese 327C or 362, and three hours of upper-division coursework in Portuguese or Portuguese Civilization.

**Topic 1: Contemporary Brazilian Film.** Same as Latin American Studies 370P (Topic 3). Explores recent filmmaking in Brazil as an art form and as a method of articulating important aspects and concerns of contemporary Brazilian society. Topics include cinema and development, modernization, national and regional identity, race, social exclusion, violence, and neoliberalism. Only one of the following may be counted: Latin American Studies 370P (Topic 3), Portuguese 350F (Topic 1), 350K.

**Topic 2: Brazilian Film and Culture.** Same as Latin American Studies 370P (Topic 4). Students will be given a critical overview of Brazilian cinema, from the silent era to the present day, with an emphasis on the late twentieth- and early twenty-first-centuries. Only one of the

following may be counted: Latin American Studies 370P (Topic 4), Portuguese 350F (Topic 2), Portuguese 350K.

### **POR 352. Brazilian and Spanish American Literature.**

Brazilian and Latin American literature and culture from the twentieth century and later. Studies the literary trends and social roles in the region while comparing and contrasting the culture and history from both Spanish America and Brazil. Three lecture hours a week for one semester. Prerequisite: Portuguese 611D, 611S, 612, 312L, or 516.

### **POR 353. Sociolinguistics.**

Same as Latin American Studies 370P (Topic 11). Explores the interrelationship of language and society with reference to the Portuguese-speaking world. Examines how socio-economic, political, and anthropological factors like race, social class, gender, age, and identity influence linguistics forms. Three hours a week for one semester. Latin American Studies 370P (Topic 11) and Portuguese 353 may not both be counted. Prerequisite: Portuguese 327C or 362, and 330L.

### **POR 354. United States Latino Literatures and Cultures in Context.**

Same as Latin American Studies 370P (Topic 10). Examines the United States Latino literary and cultural production from a multidisciplinary perspective, through literature, film, music, and performance. Analyzes the literatures and experiences of Brazilian American writers and artists in their historical and cultural specificities. Three lecture hours a week for one semester. Latin American Studies 370P (Topic 10) and Portuguese 354 may not both be counted. Prerequisite: Portuguese 327C or 362, and three hours of upper-division coursework in Portuguese or Portuguese Civilization.

### **POR 362. Advanced Composition.**

Translation of English texts into Portuguese and free composition; special attention to idiomatic expressions and to grammatical and syntactical features. Three lecture hours a week for one semester. Prerequisite: Portuguese 611D, 611S, 612, 312L, or 516.

### **POR 364L. Applied Linguistics.**

Introduction to the linguistic structure of Portuguese; application of linguistic principles to the teaching of Portuguese. Three lecture hours a week for one semester. Prerequisite: Portuguese 611D, 611S, 612, 312L, or 516.

### **POR 367P. Portuguese for the Professions.**

Develop vocabulary, grammar, expressions, and interactional skills for professional purposes. Topics include cultural issues that influence professional activities in Portuguese-speaking communities. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Portuguese 327C or 362, and 330L.

**Topic 1: Business in Brazilian Life and Culture.** Same as Latin American Studies 322 (Topic 16). Cultural aspects of business practices in Brazil. Only one of the following may be counted: Latin American Studies 322 (Topic 16), 370P (Topic: Cultural Aspects of Doing Business in Brazil), Portuguese 367P (Topic 1), Portuguese Civilization 320E (Topic: Cultural Aspects of Doing Business in Brazil). Additional prerequisite: Portuguese 327C or 362, and 330L.

### **POR 368C. Topics in Languages in Contact.**

Examination of Portuguese in contact with other languages among different regional varieties in historical and contemporary settings. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Portuguese 327C or 362, and 330L.

### **POR 368S. Topics in Language Structure and Use.**

Examines the major structural components of Portuguese and how these are used in context to fulfill a variety of communicative functions. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Portuguese 327C or 362, and 330L.

### **POR 375. Topics in Brazilian Literature and Culture.**

Important themes or issues in the Brazilian culture production. Designed to explore various cultural expressions and to understand them in specific political and historical contexts. Also may explore the cultural dialogues Brazil has established with other nations or regions. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Portuguese 327C or 362, and three hours of upper-division coursework in Portuguese or Portuguese Civilization.

**Topic 5: Brazil: An Introduction.** Same as Latin American Studies 370P (Topic 1: Brazil: An Introduction).

**Topic 6: Gender, Sexuality, and Labor in Brazilian Culture.** Same as Latin American Studies 370P (Topic 5). Introduction to the vast spectrum of working women characters, including maids, prostitutes, teachers, factory workers, doctors, street vendors, and unpaid housewives, in Brazilian literature and film, in order to examine the roles of race and gender in shaping the stereotypes surrounding women's labor in modern Brazil. Latin American Studies 370P (Topic 5) and Portuguese 375 (Topic 6) may not both be counted.

**Topic 7: Global Brazil: Immigration and Diaspora in Brazilian Culture.** Same as Latin American Studies 370P (Topic 6). Examination of twentieth-century literature, films, and other cultural artifacts that capture the multicultural reality of Brazilian society and challenge the image of Brazil as a unified, harmonious, racially-mixed nation. Subjects include contemporary textual and visual representations of the Brazilian diaspora in the United States and Europe. Latin American Studies 370P (Topic 6) and Portuguese 375 (Topic 7) may not both be counted. Additional prerequisite: Portuguese 327C and one of the following: 328C, 330L, or Portuguese Civilization 320E.

### **POR 378H. Honors Seminar.**

Honors seminar on a special topic in literature, linguistics, or civilization. The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, admission to the Portuguese Honors Program, and consent of the honors adviser.

### **POR 379C. Capstone Seminar in Literatures and Cultures.**

Central issues, concepts, and themes that define Luso-Brazilian literatures and cultures. Focus on a specific case study or case studies that result in the production of a research paper on a particular topic of interest. Three semester hours a week for one semester. Prerequisite: Portuguese 327C, 328C, and twelve hours of upper-division coursework in Portuguese.

### **POR 379H. Honors Tutorial Course.**

Supervised individual research on a literary, linguistic, or cultural problem, culminating in a written thesis. The equivalent of three lecture hours a week for one semester. Prerequisite: Credit or registration for Portuguese 379C or 379L, upper-division standing, admission to the Iberian and Latin American Languages and Cultures Honors Program, and consent of the honors adviser.

### **POR 379L. Capstone Seminar in Linguistics.**

Central issues, concepts, and themes that define linguistics. Focus on a specific case study or case studies that result in the production of a research paper on a particular topic of interest. Three lecture hours a

week for one semester. Prerequisite: Portuguese 327C, 330L, and twelve hours of upper-division coursework in Portuguese.

## **Spanish Civilization: SPC**

### **Lower-Division Courses**

#### **SPC 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Spanish Civilization.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **Upper-Division Courses**

#### **SPC 320C. Topics in Iberian or Latin American Studies.**

Significant issues in Iberian or Latin American societies and cultures. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

**Topic 1: Jewish Voices from Latin America.** Same as Jewish Studies 363 (Topic 15) and Latin American Studies 328 (Topic 4). An introduction to Jewish writers from Brazil and Latin America, with an emphasis on those whose works portray the situation of the Jewish communities in their respective cities and countries. Only one of the following may be counted: Jewish Studies 363 (Topic: Latin American Jewish Writers), 363 (Topic 15), Latin American Studies 328 (Topic 4), 370S (Topic: Latin American Jewish Writers), 370S (Topic 32), Spanish 352 (Topic), 355 (Topic 3), Spanish Civilization 320C (Topic 1). Prerequisite: Upper-division standing.

**Topic 2: Mediascapes: Literature and Media in the Caribbean.** Same as Latin American Studies 328 (Topic 5). Analyzes the relationship between literature and media technologies in contemporary Caribbean cultures. Only one of the following may be counted: Latin American Studies 328 (Topic 5), 370S (Topic 28), Spanish Civilization 320C (Topic 2), Spanish 350K (Topic 5).

#### **SPC 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Spanish Civilization.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Spanish: SPN**

### **Lower-Division Courses**

#### **SPN 301. Spanish for Graduate Students in Other Departments.**

For graduate students in other departments seeking to fulfill degree language requirements. No auditors. Purpose: To introduce fundamentals of grammar and lexicon to enable students to read texts in their areas of specialization. Primary aim: To allow students to acquire reading proficiency. Also presents audio-aural aspect. Three class hours a week for one semester. Offered every fall semester. May not be used to fulfill the undergraduate foreign language requirement. Offered on the letter-grade basis only. Prerequisite: Graduate standing.

### **SPN 601D. First-Year Spanish I.**

Focus on the development of multilingual literacy through the analysis and use of Spanish to achieve linguistic competence (simple present and past tenses, pronouns, adjectives), communication and interactional competence (complimenting, thanking, requesting, giving opinions), and metalinguistic competence (parts of speech, sociolinguistic cues, dialectal differences). Six lecture hours a week for one semester. Only one of the following may be counted: Spanish 601D, 604, 506. Only one of the following may be counted: Spanish 601D, 604, 507, 508K.

### **SPN 303S. Spanish for Professional Purposes.**

Designed for students in a variety of disciplines who require basic Spanish language skills while studying abroad. Three lecture hours a week for one semester. May not be counted toward fulfillment of the foreign language requirement for any bachelor's degree. May not be counted toward a major in Spanish.

### **SPN 604. Accelerated Introductory Spanish for Heritage Learners.**

Designed primarily for students who have a cultural and linguistic connection to Spanish. Six lecture hours a week for one semester. Only one of the following may be counted: Spanish 601D, 604, 506. Only one of the following may be counted: Spanish 601D, 604, 507, 508K. Spanish 604 and 312K may not both be counted. Spanish 604 and 610D may not both be counted.

### **SPN 305. Spanish for Graduate Students in Other Departments.**

No auditors. Continuation of Spanish 301. Vocabulary and grammar expansion through intense practice in reading texts according to class interests; increased emphasis on the audio-aural aspect. Three lecture hours a week for one semester. Offered every spring semester. May not be used to fulfill the undergraduate foreign language requirement. Offered on the letter-grade basis only. Prerequisite: Graduate standing, and Spanish 301 or consent of instructor.

### **SPN 506 (TCCN: SPAN 1511). First-Year Spanish I.**

Designed for students who have not previously studied any Spanish. Five lecture hours a week for one semester. Only one of the following may be counted: Spanish 601D, 604, 506.

### **SPN 507 (TCCN: SPAN 1512). First-Year Spanish II.**

Five lecture hours a week for one semester. Only one of the following may be counted: Spanish 601D, 604, 507, 508K. Prerequisite: Spanish 506 with a grade of at least C.

### **SPN 508K. Alternate First-Year Spanish II.**

An accelerated review of grammatical structures covered in Spanish 506, followed by study of the new material covered in Spanish 507. Five lecture hours a week for one semester. Only one of the following may be counted: Spanish 601D, 604, 507, 508K. Prerequisite: Transfer credit or credit by examination for Spanish 506, or high school coursework in Spanish, or credit for Spanish 506 earned at the University of Texas at Austin more than one calendar year ago, with a grade of at least C.

### **SPN 610D. First-Year Spanish II.**

Focus on the development of multilingual literacy through the analysis and use of Spanish to achieve linguistic competence (commands, subjunctive, hypotheticals, future), communication and interactional competence (disagreeing, suggesting, turn taking), and metalinguistic competence (critical analysis of oral and written texts, dialectal differences). Six lecture hours a week for one semester. Only one of the following may be counted: Spanish 604, 610D, 312K. Prerequisite: Spanish 601D, 507, or 508K with a grade of at least C.

### **SPN 611D. Second-Year Spanish.**

Focus on the development of multilingual literacy through the analysis and use of Spanish to achieve linguistic competence (aspect, mood, compound tenses, passive voice), communication and interactional competence (pragmatics, cultural perspectives), and metalinguistic competence (critical analysis of oral and written texts, dialectal differences). Six lecture hours a week for one semester. Only one of the following may be counted: Spanish 611D, 612, 312L. Prerequisite: Spanish 604, 610D or 312K with a grade of at least C.

### **SPN 612. Accelerated Intermediate Spanish for Heritage Learners.**

Designed primarily for students who have a cultural and advanced linguistic connection to Spanish. Six lecture hours a week for one semester. Only one of the following may be counted: Spanish 611D, 612, 312L. Prerequisite: Spanish 604 or 610D with a grade of at least C.

### **SPN 312K (TCCN: SPAN 2311). Second-Year Spanish I.**

Three lecture hours a week for one semester. Spanish 610D and 312K may not both be counted. Spanish 604 and 312K may not both be counted. Prerequisite: Spanish 604, 507, or 508K with a grade of at least C.

### **SPN 312L (TCCN: SPAN 2312). Second-Year Spanish II.**

Three lecture hours a week for one semester. Only one of the following may be counted: Spanish 611D, 612, 312L. Prerequisite: Spanish 312K with a grade of at least C.

### **SPN 318. Conversation and Composition.**

Designed to give intensive practice in oral expression, based on cultural readings, with some writing. Three lecture hours a week for one semester. Spanish 315N and 318 may not both be counted. May not be counted toward a major in Spanish. This course or the equivalent is recommended but not required for all majors in Spanish. Prerequisite: Spanish 611D or 312L.

### **SPN 319. Advanced Oral Expression.**

Designed to develop listening comprehension and oral skill to an advanced level. Three lecture hours a week for one semester. May not be counted toward a major in Spanish. Recommended for all Spanish majors. Prerequisite: Consent of instructor.

### **SPN 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Spanish.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May not be counted toward a major in Spanish. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **SPN 327C. Advanced Grammar and Writing in Context.**

Study and practice of Spanish grammar that includes reading exercises and guided composition designed to develop writing skills across styles. Students will be exposed to various topics in Spanish language, literature, and culture. Three lecture hours a week for one semester. Only one of the following may be counted: Spanish 327C, 327G, or 327N. Prerequisite: Spanish 611D, 612, or 312L.

**SPN 327N. Academic Writing for Heritage Speakers.**

Designed specifically for heritage speakers of Spanish and includes a wide range of cultural readings and writing tasks. Aims to strengthen the clarity and organization of writing, promote critical thinking, and master grammar points of particular concern to heritage speakers. Three lecture hours a week for one semester. Only one of the following may be counted: Spanish 327C, 327G, or 327N. Prerequisite: Spanish 611D, 612, or 312L.

**SPN 327W. Advanced Grammar and Composition II.**

Develops writing skills needed for upper-division coursework in Spanish. Emphasizes grammar in Spanish language, literature, and culture, exploring different compositional styles. Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G) or 327N with a grade of at least C.

**SPN 328. Spanish Civilization.**

A survey of the social, political, and cultural history of Spain. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Spanish 611D, 612, or 312L.

**SPN 328C. Introduction to Literatures and Cultures.**

Same as Latin American Studies 370S (Topic 27). Overview of Iberian and/or Latin American literatures and cultures, including the arts and popular expressions, from a multidisciplinary perspective. Among the regions studied are Spain; North, Central, and South America; the Caribbean; and related areas in Africa. Three lecture hours a week for one semester. Only one of the following may be counted: Latin American Studies 370S (Topic 27), Spanish 328, 328C. Only one of the following may be counted: Latin American Studies 370S (Topic 3), 370S (Topic 27), Spanish 322K, 328C. Prerequisite: Spanish 611D, 612, or 312L.

**SPN 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Spanish.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May not be counted toward a major in Spanish. May be repeated for credit when the topics vary.

**SPN 130D. Spanish across Disciplines.**

Students read and discuss Spanish language materials related to the subject matter of another designated course. One lecture hour a week for one semester. May not be counted toward fulfillment of the foreign language requirement for any bachelor's degree. Prerequisite: One upper-division Spanish course or consent of instructor.

**SPN 330L. Introduction to Language and Linguistics in Society.**

Examines the dynamics of language structure and use throughout the Spanish-speaking world, and covers topics such as sound systems, grammatical structures, historical developments, language learning and loss, and dialect differences and their social significance. Spanish 330L and 345L may not both be counted. Prerequisite: Spanish 611D, 612, or 312L.

**SPN 346. Sounds and Intonation.**

Introduction to the study of Spanish phonetics and phonology, focusing on four aspects: mechanisms of sound production, representation of sounds and intonation, dialect variation, and comparison with English.

Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G) or 327N, and 330L.

**SPN 348C. Topics in Community Engagement.**

Service learning course combining research project and engagement with local Spanish-speaking communities. Three lecture hours a week for one semester, with additional community service hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G), or 327N.

**Topic 1: Service Learning & Research in Spanish.** Research on a subject that affects the Spanish-speaking members of the community, supported by a service internship in a relevant site. Students will choose from subjects related to affordable housing; literacy and education; nutrition and health services; immigration and deportation. The equivalent of three lecture hours a week for one semester, with additional fieldwork hours to be arranged. Spanish 348C (Topic 1) and 367P (Topic: Service Learning and Research in Spanish) may not both be counted.

**SPN 350K. Topics in Film and Media Cultures.**

Examines important themes in Iberian, Latin American, or African societies and examines their treatment in audiovisual and media production. Three lecture hours a week for one semester. Spanish 350 and 350K may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

**Topic 1: Gender Issues in Contemporary Latin American Cinema.**

Same as Latin American Studies 370S (Topic 24) and Women's and Gender Studies 335 (Topic 6). Studies Latin American cinema as a device of gender system formation and reinforcement, and as criticism of patriarchal hegemony; discusses questions related to sexuality depicted in Latin American films. Subjects covered include: maternity, prostitution, machismo, children's sexuality, homosexuality, heterosexuality, and gender violence in films from the 1930s to present. Conducted in Spanish. Three lecture hours a week for one semester. Only one of the following may be counted: Latin American Studies 370S (Topic 24), Spanish 350 (Topic: Gender in Contemporary Latin American Cinema), 350K (Topic 1), Women's and Gender Studies 335 (Topic 6), 340 (Topic: Gender in Contemporary Latin American Cinema). Additional prerequisite: Spanish 327C, (or 327), (or 327G), and three hours of upper-division coursework in either Spanish or Spanish Civilization.

**Topic 2: Violence in Spanish Film.** Focus on representations of violence in film from and about Spain since the 1920s to present. Includes the Spanish Civil War, torture, and other state-sanctioned violence; children and violence; violence against women; homophobic violence; terrorism; and ethnic and racist violence.

**Topic 3: Latin American Film and Culture.** Same as Latin American Studies 370S (Topic 25: Latin American Film and Culture). Overview of Latin American cinema from the silent era to present, with an emphasis on the last forty years. Subjects covered include: the development of the film industry (particularly in Argentina and Mexico in the 1930s and 1940s); the "New Wave" of Latin American cinema in the 1960s; and contemporary trends. Taught in Spanish. Three lecture hours a week for one semester. Only one of the following may be counted: Latin American Studies 370S (Topic 25), Spanish 350 (Topic: Latin American Film and Culture), 350K (Topic 3).

**Topic 4: Latin American Literature and Film.** Same as Latin American Studies 370S (Topic 26: Latin American Literature and Film). Studies, in a broad sense, the connections between Latin American cinema and literature, through extensive readings and in-class movie exhibitions. A number of renowned literary works by Latin American authors and their film versions will be analyzed with a comparative approach. Only one of the following may be counted:

Latin American Studies 370S (Topic 26), Spanish 350 (Topic: Latin American Literature and Film), 350K (Topic 4), 352 (Topic: Literature and Cinema in Spanish America).

**Topic 5: Mediascapes: Literature and Media in the Caribbean.** Same as Latin American Studies 370S (Topic 28). Analyzes the relationship between literature and media technologies in contemporary Caribbean cultures. Examination of the notion and uses of Caribbean mediascapes; in other words, the uses of media technologies derived from film, television, the internet and YouTube, and the ways they are used and read in the Spanish Caribbean. Only one of the following may be counted: Latin American Studies 328 (Topic 5), 370S (Topic 28), Spanish 350K (Topic 5), Spanish Civilization 320C (Topic 2).

**Topic 6: Indigenous Voices: From Nezahualcoyotl to Radio.** Same as Latin American Studies 370S (Topic 29). Examines how Indigenous writers, intellectuals, and cultural producers have creatively established their own voices through writing and other forms of media. Only one of the following may be counted: Latin American Studies 370S (Topic: Indigenous Voices), 370S (Topic 29), Spanish 350 (Topic: Indigenous Voices), 350K (Topic 6).

### **SPN 351. Don Quijote and the Early Modern World.**

Study of Cervantes's Don Quijote in depth in the original Spanish. Examines the author's views on artistic freedom, as well as his manipulation of literary genres and conventions, with his questions regarding the dominant political, religious, and literary discourses of early modern Spain. Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

### **SPN 352. Topics in Spanish and Spanish American Literature.**

Major writers and works of Spanish and Spanish American literature. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 1: Spain in 1492.** Spanish 350 (Topic: Spain in 1492) and 352 (Topic 1) may not both be counted. Prerequisite: Spanish 325K, 325L, 326K, or 326L.

**Topic 2: Literature of the Spanish Civil War.** Prerequisite: Spanish 325K, 325L, 326K, or 326L.

**Topic 3: The Latin American Short Story.** Examination of the most representative Latin American authors as a course of study in the art of storytelling, literary history, individual poetics, and narrative theories. Prerequisite: Spanish 325K, 325L, 326K, or 326L.

**Topic 4: Contemporary Caribbean Literature.** Same as Latin American Studies 370S (Topic 44). Only one of the following may be counted: Latin American Studies 370S (Topic: Contemporary Caribbean Literature), 370S (Topic 44), Spanish 352 (Topic: Contemporary Caribbean Literature), 352 (Topic 4). Prerequisite: Spanish 611D, 612, or 312L.

### **SPN 353. Sociolinguistics.**

Explores the interrelationship of language and society, with reference to the Spanish-speaking world. Studies how socioeconomic, political, and anthropological factors like race, social class, gender, age, and identity influence linguistics forms. Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G) or 327N, and 330L (or 345L).

### **SPN 355. Topics in Latin American Literatures and Cultures.**

Study of important themes or issues in the cultural production of the Latin American world. Among the regions studied are Spain; North, Central, and South America; the Caribbean; and related areas in Africa. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

**Topic 1: Fantastic Fiction from Latin America.** Same as Latin American Studies 370S (Topic 30). Analysis of short stories by Latin American writers that in some way represent an alternative to realism. Latin American Studies 370S (Topic 30) and Spanish 355 (Topic 1) may not both be counted.

**Topic 2: Nonfiction Narratives from Latin America.** Same as Latin American Studies 370S (Topic 31). Study of nonfiction works written in contemporary Latin America as experimental narrative forms that offer insight about current political, social, and economic problems of the region. Examination of these realities through readings and careful analysis of the works of popular nonfiction Latin American writers.

**Topic 3: Jewish Voices from Latin America.** Same as Latin American Studies 370S (Topic 32). Overview of popular Jewish writers from Brazil and Spanish America, with special emphasis on those who portray in their work the situation of the Jewish communities of their respective cities and countries. Only one of the following may be counted: Jewish Studies 363 (Topic: Latin American Jewish Writers), 363 (Topic 15), Latin American Studies 328 (Topic 4), 370S (Topic: Latin American Jewish Writers), 370S (Topic 32), Spanish 352 (Topic: Latin American Jewish Writers), 355 (Topic 3), Spanish Civilization 320C (Topic 1).

**Topic 4: Sex and Sexuality in Latin America.** Same as Latin American Studies 370S (Topic 33). Examines different representations of sex, sexuality, and eroticism in the various cultures of Latin America. These concepts do not refer to explicit or provocative texts or images in books, films, or photographs alone. On the contrary, they include a vast gamut of life, love, pain, and social conflict. Only one of the following may be counted: Latin American Studies 370S (Topic: Sexo/Sexualidad en Latinoamerica), 370S (Topic 33), Spanish 352 (Topic: Sexo/Sexualidad en Latinoamerica), 355 (Topic 4).

**Topic 5: Revolutionary Imagination in Latin American Cultures.** Same as Latin American Studies 370S (Topic 34). Explores literary expressions in Latin America that reflect a dissident or transgressive imaginary published during the revolutionary period (1960-1990). Examination of how different sociohistorical experiences require new narrative forms, and innovative ways of exploring and codifying collective community identities. Only one of the following may be counted: Latin American Studies 370S (Topic: Revolutionary Imagination in Latin American Literature), 370S (Topic 34), Spanish 352 (Topic: Revolutionary Imagination in Latin American Literature), 355 (Topic 5).

**Topic 6: Violence in Contemporary Mexican Culture.** Same as Latin American Studies 370S (Topic 23) and Women's and Gender Studies 340 (Topic 20). Studies the representation of violence in contemporary literary and cultural production in Mexico in order to understand social, political, and cultural implications of current violence there. Taught in Spanish. Only one of the following may be counted: Latin American Studies 370S (Topic 23), Spanish 350 (Topic 13), 355 (Topic 6), Women's and Gender Studies 340 (Topic 20). Additional prerequisite: Spanish 327C (or 327G) and three hours of upper-division coursework in Spanish or Spanish Civilization.

**Topic 7: East/West/New World Encounters.** Same as Latin American Studies 370S (Topic 36). Survey of works mostly in the Latin American and Hispanic literary tradition in which images or themes related to the East (Asia, Eastern Africa, the Middle East) are developed. Only one of the following may be counted: Latin American Studies 370S (Topic: Visions of the East in Latin American Writing), 370S (Topic 36), Spanish 352 (Topic: Visions of the East in Latin American Writing), 355 (Topic 7).

**Topic 8: Memory and Writing in Caribbean Culture.** Same as Latin American Studies 370S (Topic 37). Studies literary works from the greater Caribbean basin (with a focus on Cuba and Puerto Rico) in which the act of remembering is emphatically dramatized and described. Only one of the following may be counted: Latin American Studies 370S (Topic: Writing and Memory in Caribbean Literature),

370S (Topic 37), Spanish 355 (Topic 8), 375 (Topic: Writing and Memory in Caribbean Literature).

**Topic 9: Literary Figurations in the Multimedia Age.** Same as Latin American Studies 370S (Topic 38). Focuses on the figurations of sounds and images in literary language in the context of the multimedia environment of modern and contemporary Latin America. Only one of the following may be counted: Latin American Studies 370S (Topic: Literary Figurations in the Multimedia Age), 370S (Topic 38), Spanish 352 (Topic: Literary Figurations in the Multimedia Age), 355 (Topic 9).

### **SPN 356. Topics in Indigenous Cultures in the Americas.**

Examines how indigenous writers, artists, and cultural producers have established their own voices and languages through writing and other forms of media. Analysis of the indigenous artistic and intellectual production in concrete political and cultural contexts. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

**Topic 1: Indigenous Voices in Latin American Literature.** Same as Latin American Studies 370S (Topic 17). Only one of the following may be counted: Latin American Studies 370S (Topic 17), Spanish 350 (Topic 4), 356 (Topic 1). Additional prerequisite: Spanish 327C (or 327G) and three hours of upper-division coursework in Spanish or Spanish Civilization.

**Topic 2: The Imagined Andes.** Same as Latin American Studies 370S (Topic 22). Overview of literature and culture of the Andean regions. Three lecture hours a week for one semester. Only one of the following may be counted: Latin American Studies 370S (Topic: The Imagined Andes), 370S (Topic 22), Spanish 350 (Topic 12), 356 (Topic 2). Additional prerequisite: Spanish 327C (or 327G) and three hours of upper-division coursework in Spanish or Spanish Civilization.

**Topic 3: Contemporary Mesoamerican Indigenous Literatures.** Same as Latin American Studies 370S (Topic 41). Examines the early Mesoamerican mythological narrative, Popol Wuj, as well as twentieth-century Central American texts. Explores ethnicity, class, gender, and traditional cultures as main factors in regional negotiations of identity constructions. Only one of the following may be counted: Latin American Studies 370S (Topic: Contemporary Indigenous Literature), 370S (Topic 41), Spanish 352 (Topic: Contemporary Indigenous Literature), 356 (Topic 3).

### **SPN 357. Topics in Iberian Literatures and Cultures.**

Study of important themes or issues in the cultural production of the Iberian world. Subjects include various cultural expressions and their relevance in specific political and historical contexts. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

**Topic 1: Hispanic Chivalry.** Study of the origins of chivalry with mounted warriors in feudal and crusading warfare. Emphasis on how knights became either the goons and enforcers, robbers of barons, or heroes and protectors of the people with the end of the crusading and Reconquest eras. Only one of the following may be counted: Latin American Studies 370S (Topic: Hispanic Chivalry), Spanish 350 (Topic: Hispanic Chivalry), 357 (Topic 1).

**Topic 2: Cultures in Contact in Medieval Spain.** Focus on the works of literature that reflect the three cultures which coexisted and flourished for almost eight centuries in medieval Spain: the Islamic, the Jewish, and the Christian. Only one of the following may be counted: Spanish 350 (Topic 8), 352 (Topic: Literature of Spain of Three Cultures), 357 (Topic 2).

**Topic 3: Space in Contemporary Iberian Literatures and Cultures.** Studies the representation of space in contemporary Spanish literature, with an emphasis on questions of gender, sexuality, memory,

class, and artistic imagination. Spanish 357 (Topic 3) and 372 (Topic: Space in Contemporary Spanish Literature) may not both be counted.

**Topic 4: Violence and Identity in Early Modern Spain.** Examines the tensions between individual and society, between self and other, in the dramatic literature of early modern Spain, focusing on the themes of war, conquest, race, sex, and gender. Only one of the following may be counted: Latin American Studies 370S (Topic: Violence and Identity in Early Modern Spain), Spanish 357 (Topic 4), or 376 (Topic: Violence and Identity in Early Modern Spain).

### **SPN 358. Studies of African Cultures in Dialogue.**

Study of the cultural production of African and Afro-descendant people of the Iberian and Latin American worlds. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

**Topic 1: African Diasporas.** Same as Latin American Studies 370S (Topic 42). Analysis of the sociocultural contexts of the African diaspora in the Americas with particular focus on the Caribbean and Brazil. Focuses on the contributions of the African diasporic populations and the stylistic strategies through which they constructed their social, political, and cultural agency. Only one of the following may be counted: Latin American Studies 370S (Topic: African Diaspora in Latin America and the Caribbean), 370S (Topic 42), Spanish 358 (Topic 1), 375 (Topic: African Diaspora in Latin America and the Caribbean).

### **SPN 359. United States Latino Literatures and Cultures in Context.**

Same as Latin American Studies 370S (Topic 43). Examines the United States Latino literary and cultural production from multidisciplinary perspectives, such as literature, film, music, and performance. Analysis of the literatures and experiences of United States Latino writers and artists in their historical and cultural specificities. Three lecture hours a week for one semester. Latin American Studies 370S (Topic 43) and Spanish 359 may not both be counted. Prerequisite: Spanish 327C (or 327G) or 327N, and 328C.

### **SPN 364L. Linguistics and the Spanish Learner.**

Focuses on instructed and naturalistic second language (L2) development among adults. Subjects include: L2 acquisition theories, Spanish learners' difficulties, learners' and teachers' beliefs about L2, learners' motivations and needs, and heritage language learners. Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G) or 327N, and 330L (or 345L).

### **SPN 365C. Conference Course in Hispanic Civilization.**

Conference course. Prerequisite: Spanish 612 or 312L; and written consent of the department chair.

### **SPN 365G. Conference Course in Hispanic Linguistics.**

Conference course. Prerequisite: Spanish 612 or 312L; and written consent of the department chair.

### **SPN 365L. Conference Course in Hispanic Literature.**

Conference course. Prerequisite: Spanish 612 or 312L; and written consent of the department chair.

### **SPN 367P. Spanish for the Professions.**

Develops vocabulary, grammar, expressions, and interactional skills that are related to foreign language for professional purposes. Also covers cultural issues that affect professional activities in Spanish-speaking communities. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N.

**Topic 1: Spanish for Health Care Professions.** Same as Latin American Studies 322 (Topic 17). Designed to exercise fluency in both spoken and written language in health care situations. Focus on the complex grammatical concepts and cultural issues that affect professional activities in Spanish-speaking communities. Only one of the following may be counted: Latin American Studies 322 (Topic 17), Spanish 367K (Topic 7), 367P (Topic 1). Additional prerequisite: Spanish 327C (or 327G), 328C, and 330L.

**Topic 2: Business in Hispanic Life and Culture.** Same as Latin American Studies 322 (Topic 18). Only one of the following may be counted: Latin American Studies 322 (Topic 18), 370S (Topic 19), Spanish 350 (Topic 10), Spanish 367P (Topic 2). Prerequisite: Spanish 327C (or 327G) and 328C.

**Topic 3: Translation Principles and Practice.** Spanish 367K (Topic 4) and 367P (Topic 3) may not both be counted. Prerequisite: Spanish 327C (or 327G) and 330L.

### **SPN 367T. Advanced Oral and Written Expression for Teachers.**

Designed to help teacher candidates prepare to pass the state oral and written proficiency exams at the advanced level to obtain certification. Focus on oral proficiency for various genres of speaking with an emphasis on writing and reading of different genres. Three lecture hours a week for one semester. Spanish 367K (Topic 1) and Spanish 367T may not both be counted. Prerequisite: Spanish 327C (or 327G) or 327N, and 330L.

### **SPN 368C. Topics in Languages in Contact.**

Investigates Spanish in contact with other languages and among different regional varieties in historical and contemporary settings. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 330L.

### **SPN 368S. Topics in Language Structure and Use.**

Examination of the major structural components of the language and how these are used in context to fulfill a variety of communicative functions. Three lecture hours a week for one semester. Spanish 367K and 368S may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Spanish 327C (or 327G) or 327N, and 330L.

**Topic 1: Rhetoric and Composition for Native Speakers.** Writing and oral expression for use in academic and professional settings. Only one of the following may be counted: Mexican American Studies 374 (Topic 31), Spanish 367K (Topic 8), 368S (Topic 1).

### **SPN 377H. Honors Tutorial Course.**

Supervised individual research on a literary, linguistic, or cultural problem, culminating in a written thesis. The equivalent of three lecture hours a week for one semester. Prerequisite: Upper-division standing, credit or registration for Spanish 379C or 379L, admission to the Iberian and Latin American Languages and Cultures Honors Program, and consent of the Honors adviser.

### **SPN 379C. Capstone Seminar in Literatures and Cultures.**

Brings together central issues, concepts, and themes that define Iberian or Latin American literatures and cultures, while focusing on a specific case-study or case-studies. Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G), 328C, and twelve hours of upper-division coursework in Spanish.

### **SPN 679H. Honors Tutorial Course.**

Supervised individual research on a literary, linguistic, or cultural problem, culminating in a written thesis of fifty to eighty typewritten pages. Conference course for two semesters. Prerequisite: For 679HA,

upper-division standing, admission to the Spanish Honors Program, and consent of the honors adviser; for 679HB, Spanish 679HA.

### **SPN 379L. Capstone Seminar in Linguistics.**

Brings together central issues, concepts, and themes that define linguistics, while focusing on a specific case-study or case-studies, that allow for the necessary depth and rigor to produce a research paper on a particular topic of interest. Three lecture hours a week for one semester. Prerequisite: Spanish 327C (or 327G), 330L, and twelve hours of upper-division coursework in Spanish.

## **UTeach-Liberal Arts**

### **UTeach-Liberal Arts: UTL**

#### **Lower-Division Courses**

#### **UTL 101. Introduction to the Teaching Profession.**

Weekly seminar with a University faculty member plus a field experience in an area elementary school under the supervision of a cooperating teacher. Course readings and instruction complement the field experience. Seminar topics include basic classroom management, lesson design, assessment, technology, diversity, and special student populations. One class hour a week for one semester; at least ten hours of fieldwork a semester are also required. Offered on the letter-grade basis only. Prerequisite: Successful admission into the UTeach-Liberal Arts program and consent of the UTeach adviser in the College of Liberal Arts.

#### **UTL 202. Introduction to Teaching in the Middle School.**

Weekly seminar with a University faculty member plus a field experience in an area middle school under the supervision of a cooperating teacher. Course readings and instruction complement field experience. Seminar topics include classroom management, lesson design, assessment, technology, diversity, special student populations, conferencing techniques, and school organization. Two class hours a week for one semester; at least twenty hours of fieldwork a semester are also required. Offered on the letter-grade basis only. Prerequisite: UTeach-Liberal Arts 101 with a grade of at least B, and consent of the UTeach adviser in the College of Liberal Arts.

#### **UTL 303E. Teaching English in the High School.**

Weekly seminar with a University faculty member, plus field experience in an area high school under the supervision of a cooperating teacher. Course readings and instruction complement field experience. Seminar topics include state and national standards, curriculum design and implementation, the role of technology in education, and teaching strategies with a special focus on innovative strategies for teaching literature and writing. Three lecture hours a week for one semester; at least forty-five hours of fieldwork a semester are also required. Offered on the letter-grade basis only. Prerequisite: UTeach-Liberal Arts 101 and 202 with a grade of at least B in each; concurrent enrollment in Curriculum and Instruction 370S (Topic 1: Advanced Methods in English, Language Arts, and Reading); and consent of the UTeach adviser in the College of Liberal Arts.

#### **UTL 303L. Teaching Languages Other Than English in the High School.**

Weekly seminar with a University faculty member, plus field experience in an area high school under the supervision of a cooperating teacher. Course readings and instruction complement the field experience. Seminar topics include state and national standards and their implementation, teaching for proficiency, curriculum design, assessment, best practices, the instructional environment, and the role of technology in teaching languages other than English. Three lecture hours a week for

one semester; at least forty-five hours of fieldwork a semester are also required. Offered on the letter-grade basis only. Prerequisite: UTeach-Liberal Arts 101 and 202 with a grade of at least B in each; concurrent enrollment in Curriculum and Instruction 370S (Topic 5: Advanced Methods in Foreign Language); and consent of the UTeach adviser in the College of Liberal Arts.

### **UTL 303S. Teaching Social Studies in the High School.**

Weekly seminar with a University faculty member, plus field experience in an area high school under the supervision of a cooperating teacher. Course readings and instruction complement the field experience. Seminar topics include social studies topics, standards, curriculum design and implementation, teaching strategies, technology, and vertical and horizontal teaming in social studies. Three lecture hours a week for one semester; at least forty-five hours of fieldwork a semester are also required. Offered on the letter-grade basis only. Prerequisite: UTeach-Liberal Arts 101 and 202 with a grade of at least B in each; concurrent enrollment in Curriculum and Instruction 370S (Topic 3: Advanced Methods in Social Studies); and consent of the UTeach adviser in the College of Liberal Arts.

### **UTL 304. Middle School Teaching for Postbaccalaureate Certification.**

Designed for college graduates seeking teacher certification. Students observe and teach in a middle school under the supervision of a mentor teacher, and participate in a weekly seminar. Seminar topics may include classroom management, lesson design, assessment, technology, diversity, special student populations, conference techniques, and professional development. Three lecture hours and two hours of fieldwork a week for one semester. May not be counted toward any degree. Prerequisite: Consent of the UTeach adviser in the College of Liberal Arts.

## **Upper-Division Courses**

### **UTL 320. Topics in Teaching the Liberal Arts.**

Introduction to various topics related to middle grades, secondary, and all-level teaching certification. Topics may include history, social studies, English language arts, and languages other than English. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of the UTeach adviser in the College of Liberal Arts.

### **UTL 640. Teaching in Secondary Schools.**

Restricted to students entering the professional development sequence of the UTeach-Liberal Arts program. Course readings and instruction complement the field experience. Seminar topics include theoretical foundations for subject-specific methods, state and national standards and their implementation, teaching for proficiency, curriculum design, assessment, best practices, the instructional environment, and the role of technology in teaching. The equivalent of six lecture hours and four fieldwork hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: UTeach-Liberal Arts 101 and 202 with a grade of at least B in each, and consent of the UTeach adviser in the College of Liberal Arts.

### **UTL 341R. Overcoming Reading Difficulties.**

Restricted to UTeach-Liberal Arts students. Subjects may include the basic terminology related to special needs students, recognizing differences in learning disabilities, evaluating teaching methods and materials, and teaching strategies that address the needs of special needs students, with a special focus on reading strategies. Three lecture hours a week for one semester. Rhetoric and Writing 379C (Topic: Overcoming Reading Difficulties) and UTeach-Liberal Arts 341R may not

both be counted. Offered on the letter-grade basis only. Prerequisite: Applied Learning and Development 322 and consent of instructor.

### **UTL 360. Problems and Principles of Secondary Education.**

Restricted to students in the final student teaching semester of the UTeach-Liberal Arts program. Draws upon resources found in the directed-teaching environment; considers problems and issues in four broad areas: students in the school, the teacher's professional responsibilities, curriculum understandings, and administrative and organizational problems. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Concurrent enrollment in UTeach-Liberal Arts 670, and consent of the UTeach adviser in the College of Liberal Arts.

### **UTL 670. Directed Teaching in Secondary Schools.**

Restricted to students in the final student teaching semester of the UTeach-Liberal Arts program. Observation and teaching in secondary school classrooms as well as an exploration of other roles of the secondary school teacher, under the joint supervision of University and public school personnel. The equivalent of two lecture hours and forty fieldwork hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Concurrent enrollment in UTeach-Liberal Arts 360, and consent of the UTeach adviser in the College of Liberal Arts.

## **Center for Women's and Gender Studies**

### **Women's and Gender Studies: WGS**

#### **Lower-Division Courses**

#### **WGS 301. Introductory Topics in Women's and Gender Studies.**

Three lecture hours a week for one semester, or as required for the topic. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 2: Introduction to Child Psychology.** General introduction to physical, social, and cognitive development from conception onward. Prerequisite: Psychology 301 with a grade of at least C.

**Topic 4: Family Relationships.** Same as Human Development and Family Sciences 304. The process of family interaction over the life cycle. Application of research findings to the understanding of relationships. Only one of the following may be counted: Human Development and Family Sciences 304, 304H, Women's and Gender Studies 301 (Topic 4).

**Topic 6: Ethnicity and Gender: La Chicana.** Same as Mexican American Studies 311 and Sociology 308D. Three lecture hours a week for one semester. Only one of the following may be counted: Mexican American Studies 311, 319 (Topic 1), Sociology 308 (Topic: Ethnicity and Gender: La Chicana), 308D, Women's and Gender Studies 301 (Topic 6).

**Topic 7: Women's Reproductive Health for Nonscience Majors.** Same as Nursing 307 (Topic 1) and Sociology 310S. Overview of contemporary women's reproductive health issues, with emphasis on historical, physiological, psychosocial, and cultural influences that affect the reproductive health of women during adolescence, the childbearing years, and midlife. Three lecture hours a week for one semester. Only one of the following may be counted: Nursing 307 (Topic 1), Sociology 308 (Topic 2), 310S, Women's and Gender Studies 301 (Topic 7). Additional prerequisite: One year of high school biology, or Biology 301L or 309D.

**Topic 11: United States Women, Sexuality, and Gender to 1865.** Same as History 317L (Topic 5). History 317L (Topic 5) and Women's and Gender Studies 301 (Topic 11) may not both be counted.

**Topic 12: Gay and Lesbian Literature and Culture.** Same as English 314V (Topic 4: Gay and Lesbian Literature and Culture). American writing by gay, lesbian, bisexual, transgender, or queer authors and/or with gay, lesbian, bisexual, transgender, or queer themes. English 314V (Topic 4) and Women's and Gender Studies 301 (Topic 12) may not both be counted.

**Topic 13: Mexican American Women, 1910-Present.** Same as History 317L (Topic 12) and Mexican American Studies 319 (Topic 4). Examines the history of Mexican and Mexican American women in the United States from the twentieth century to the present. Only one of the following may be counted: History 317L (Topic: Mexican American Women, 1910-Present), 317L (Topic 12), Mexican American Studies 319 (Topic: Mexican American Women, 1910-Present), 319 (Topic 4), Women's and Gender Studies 301 (Topic: Mexican American Women, 1910-Present), 301 (Topic 13).

**Topic 14: Performance, Feminism, and Social Change.** Same as African and African Diaspora Studies 311C. Exploration of the ways that engaged performance and feminist practice generate space for social change, including the basic principle that social transformation requires individual awareness, and that awareness necessitates a rigorous examination of race, gender, class, and sexuality. Only one of the following may be counted: African and African Diaspora Studies 311C, 317F (Topic: Performance, Feminism, and Social Change), Women's and Gender Studies 301 (Topic: Performance, Feminism, and Social Change), 301 (Topic 14).

**Topic 15: Yoruba Women.** Same as African and African Diaspora Studies 317C (Topic 2). Examination of gender construction in Yorubaland, including an exploration of the difference between Western gender construction and African notions of gender through analyses of the religious, linguistic, cultural, and sociopolitical aspects of Yoruba life. Only one of the following may be counted: African and African Diaspora Studies 317C (Topic: Yoruba Women), 317C (Topic 2), Women's and Gender Studies 301 (Topic: Yoruba Women), 301 (Topic 15).

**Topic 16: Introduction to Black Women's Studies.** Same as African and African Diaspora Studies 317D (Topic 5). Interdisciplinary examination of the complexities of black womanhood in America through an investigation of history, identity, popular culture, and black feminism/womanism, as well as social and political activism. Only one of the following can be counted: African and African Diaspora Studies 317D (Topic: Introduction to Black Women's Studies), 317D (Topic 5), Women's and Gender Studies 301 (Topic: Introduction to Black Women's Studies), 301 (Topic 16).

**Topic 17: Black Queer Art Worlds.** Same as African and African Diaspora Studies 317E (Topic 1) and Anthropology 310L (Topic 6). Exploration of over two decades of work produced by and about black queer subjects throughout the circum-Atlantic world. Provides an introduction to various artists and intellectuals of the black queer diaspora, as well as an examination of the viability of black queer aesthetic practice as a form of theorizing. Only one of the following may be counted: African and African Diaspora Studies 317E (Topic: Black Queer Diaspora Aesthetics), 317E (Topic 1), Anthropology 310L (Topic: Black Queer Diaspora Aesthetics), 310L (Topic 6), Women's and Gender Studies 301 (Topic: Black Queer Diaspora Aesthetics), 301 (Topic 17).

**Topic 18: Religion and Gender in America.** Same as Sociology 308F. Examines the complex relationship between religious involvement and gender and sexuality in American society with a focus on the historic relationship between religious engagement and women's movements as well as more contemporary issues. Exploration of several major religious traditions in the United States today, including Evangelical Christianity, Catholicism, and Judaism. Examination of smaller religious groups and their attempt to confront the complex and contradictory relationship between gender roles and belief. Three lecture hours a week for one semester. Only one of the following may

be counted: Sociology 308 (Topic: Religion and Gender in America), 308F, Women's and Gender Studies 301 (Topic 18).

**Topic 19: Diversity in American Families.** Same as Sociology 307F. Examination of the diversity of American families and current debates on family life from a sociological perspective with an emphasis on how diverse family forms came to exist and what these changes mean for adults and children in contemporary society. Study of recent trends in several aspects of family life, including dating and courtship, cohabitation, marriage, divorce, parenthood, family structure, and work-family balance. Overview of theoretical perspectives on family life with a focus on gender, race/ethnicity, and sexuality. Three lecture hours a week for one semester. Only one of the following may be counted: American Studies 315 (Topic: Diversity in American Families), Sociology 307F, 308 (Topic: Diversity in American Families), Women's and Gender Studies 301 (Topic: Diversity in American Families), 301 (Topic 19).

**Topic 20: Fertility and Reproduction.** Same as Sociology 307K. Explores the when, why, how, and with whom Americans bear children, and how the United States compares to other developed and developing countries in the world. Subjects include infertility and its treatments, the ethics of surrogacy and international adoption, voluntary childlessness, the rapid rise of nonmarital childbearing in the United States and other countries, the politics of childbirth, the risks of maternal morbidity and mortality in developed and developing countries, and the declining populations and rapid aging of rich countries including Japan, Italy, and Spain where many women have stopped having children. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 307K, 308 (Topic: Fertility and Reproduction), Women's and Gender Studies 301 (Topic: Fertility and Reproduction), 301 (Topic 20).

**Topic 21: Gender, Race, and Class in American Society.** Same as Sociology 307L. Use of the sociological perspective to analyze how the structure of American society, individual life, and group life chances are shaped by broader structures of privilege and disadvantage based on gender, race, and class. Examination of these in institutional arenas such as work, the family, education, health, the criminal justice system, sexuality, popular culture, and more. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 307L, 308 (Topic: Gender, Race, and Class in American Society), Women's and Gender Studies 301 (Topic: Gender, Race, and Class in American Society), 301 (Topic 21).

**Topic 22: Race, Ethnicity, and Gender in Demography.** Same as Sociology 308E. Introduction to the patterns, trends and debates on race, ethnicity, and gender in demography. Study of the social aspect of demography and the relationship of demographic phenomena relative to racial, ethnic, and gender populations. Specific areas will include the following: conceptual/measurement issues; migration and population dynamics; health and morality; and family and fertility. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 308 (Topic: Race, Ethnicity, and Gender in Demography), 308E, Women's and Gender Studies 301 (Topic 22).

**Topic 23: Romantic Relationships and Family Formation.** Same as Sociology 308J. Examination of romantic relationships and family formation from a cultural framework. Subjects include: historical transformations of romance; socioeconomic perspectives on sexual relationships and family formation; the impact of demographic transitions on the emergence of cohabitation as a relationship form; the economics undergirding relationship decision making; common narratives, practices, and gender differences about entry into marriage in the West; and population-level implications of contemporary patterns. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 308 (Topic: Romantic Relationships and Family Formation), 308J, Women's and Gender Studies 301 (Topic 23).

**Topic 24: Race, Immigration, and Family.** Same as Asian American Studies 310 (Topic 5) and American Studies 315 (Topic 3).

Introduction to family systems in the United States in a post-WWII framework with a central focus on Asian Americans. Students will investigate how gender, race, and ethnicity intersect and inform our understanding of the institution of the family. Only one of the following may be counted: American Studies 315 (Topic: Alternative Family Systems), 315 (Topic 3), Asian American Studies 310 (Topic: Alternative Family Systems), 310 (Topic 5), Women's and Gender Studies 301 (Topic: Alternative Family Systems), 301 (Topic 24).

**Topic 27: Women, Gender, Literature, and Culture.** Same as English 314V (Topic 6). An introduction to literary analysis focusing on women's and gender studies. English 314V (Topic 6) and Women's and Gender Studies 301 (Topic 27) may not both be counted.

**Topic 28: History of Human Sexuality.** Same as History 306N (Topic 15). The history of human sexuality is approached from four angles: sexual behaviors; sexual consequences; sexual regulation, and sexual science. Only one of the following may be counted: History 306N (Topic: History of Human Sexuality), 306N (Topic 15), Women's and Gender Studies 301 (Topic: History of Human Sexuality), 301 (Topic 28).

### **WGS 303. Introduction to Lesbian, Gay, Bisexual, Transgender, and Queer Studies.**

Explores concepts of gender and sexuality, race, class, religion, and nation; as well as skills in theory, history, and research methods relevant to LGBTQ studies. The course will also survey the making of modern understandings of sexual and LGBTQ identities in the last one hundred years and the implications of this history for broader understandings of gender and sexuality. Three lecture hours a week for one semester. Women's and Gender Studies 301 (Topic: Introduction to LGBTQ Studies) and 303 may not both be counted. Prerequisite: Consent of instructor.

### **WGS 305. Introduction to Women's and Gender Studies.**

Introduction to the role of gender identity and representation in key social institutions and processes, including borders, displacements, and diasporas. Analysis of the social narratives of gender, race, and sexuality. Three lecture hours a week for one semester. Women's and Gender Studies 301 (Topic: Introduction to Women's and Gender Studies) and 305 may not both be counted.

### **WGS 313. Child Development.**

Same as Human Development and Family Sciences 313. Motor, language, cognitive, social, and emotional development in the family context. Three lecture hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 313, 313H, Women's and Gender Studies 301 (Topic 5), 313. Prerequisite: Credit or registration for Human Development and Family Sciences 113L, and Psychology 301 with grade of at least C-.

### **WGS 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Women's and Gender Studies.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Women's and Gender Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **WGS 321. Introduction to Women's and Gender Studies in the Humanities.**

Multidisciplinary course examining the creative work of women and the image of women in history and art. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

### **WGS 322. Introduction to Women's and Gender Studies in the Social Sciences.**

Multidisciplinary topics using approaches from the social sciences to examine gender constructs and male/female roles. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

**Topic 1: Sociology of Gender.** Same as Sociology 333K. Inequality between the sexes; men's and women's changing roles in society. Three lecture hours a week for one semester. Sociology 333K and Women's and Gender Studies 322 (Topic 1: Sociology of Gender) may not both be counted. Additional prerequisite: Upper-division standing.

**Topic 2: Population and Society.** Same as Sociology 369K. The study of populations, including their growth, age structure, and patterns of fertility, mortality, and migration; the social causes and consequences of these phenomena. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 369K, Women's and Gender Studies 322 (Topic: Population and Society), 322 (Topic 2). Additional prerequisite: Upper-division standing.

**Topic 3: Sociology of Masculinities.** Same as Sociology 322M. Sociological examination of the most important debates and discussions about men's experiences of masculinity in contemporary patriarchal societies. Exploration of social and individual meanings of masculinity, the dominant paradigms of masculinity that are taken as the norm, and the problems, contradictions, and paradoxes men experience in modern society. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 321K (Topic: Sociology of Masculinities), 322M, Women's and Gender Studies 322 (Topic: Sociology of Masculinities), 322 (Topic 3). Additional prerequisite: Upper-division standing, three hours of coursework in sociology, and three hours of coursework in women's and gender studies.

**Topic 5: Sociology of Sexualities.** Same as Sociology 340G. Review of sociological perspectives on sexuality. Examines how social institutions in United States society shape sexual values, beliefs, and practices. Subjects include changing cultural images of sexuality, sexual identities, and social movements. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 321K (Topic: Sociology of Sexuality), 340G, Women's and Gender Studies 322 (Topic: Sociology of Sexuality), 322 (Topic 5). Additional prerequisite: Upper-division standing; Sociology 302; and Sociology 333K or three semester hours of coursework in women's and gender studies.

**Topic 6: The Sociology of Race and Work.** Same as Asian American Studies 330 (Topic 4) and Sociology 321R. Critical examination of work in the United States over the twentieth and twenty-first centuries through a gendered, Asian American lens, using a comparative race perspective. Subjects include the sociological examination of concepts such as labor markets, globalization, care work, and gender/racial segregation in the workplace along with the ways race and gender shape how and where individuals are fitted into the workplace, how skills are evaluated, and how labor markets emerge. Three lecture hours a week for one semester. Only one of the following may be counted: Asian American Studies 330 (Topic: Sociology of Race and Work), 330 (Topic 4), Sociology 321K (Topic: Sociology of Race and Work), 321R, Women's and Gender Studies 322 (Topic: Sociology of

Race and Work), 322 (Topic 6). Additional prerequisite: Upper-division standing.

**Topic 7: Race and the Digital.** Same as African and African Diaspora Studies 322D and Sociology 322D. Review of theoretical developments in the sociological study of "race," including an examination of processes of racialization and cultural texts, in order to better understand the ways in which identities are socially produced. Attention will be placed on forms of popular culture, black cultural production, and political action to question how such practices are shaped by migrations within the African diaspora. Only one of the following may be counted: African and African Diaspora Studies 322D, 374E (Topic: Race, Culture, and Migration), Sociology 321K (Topic: Race, Culture, and Migration), 322D, Women's and Gender Studies 322 (Topic: Race, Culture, and Migration), 322 (Topic 7). Additional prerequisite: Upper-division standing.

**Topic 8: Race, Gender, and Surveillance.** Same as African and African Diaspora Studies 372C (Topic 12), American Studies 321 (Topic 6), and Sociology 322V. Overview of theories in the sociology of social control, with a focus on risk, power, ethics, and surveillance. Examines historical transformations in social control and the distributions of power in the United States and global contexts, with attention to race, gender, and class. Subjects include: the transatlantic slave trade; prisons and punishment; the gaze, voyeurism, and reality television watching; the Internet; travel and state borders; privacy; and biometrics and the body. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic 12), 374E (Topic: Surveillance and Social Control), American Studies 321 (Topic 6), Sociology 321K (Topic: Surveillance and Social Control), 322V, Women's and Gender Studies 322 (Topic: Surveillance and Social Control), 322 (Topic 8). Additional prerequisite: Upper-division standing.

**Topic 10: Sex and Violence in Popular Culture.** Same as Sociology 322P. Overview of the cultural framing of sex and violence through realistic and hyper-realistic representations of sex, love, violence, and war in popular culture. Examination of the ethical implications, including the ways in which these representations rely on and further social inequalities and the sociological concepts, methods, and theoretical approaches to understanding sex and violence in popular culture. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 321K (Topic: Sex and Violence in Popular Culture), 322P, Women's and Gender Studies 322 (Topic 10), 345 (Topic: Sex and Violence in Popular Culture). Additional prerequisite: Upper-division standing.

### **WGS 323. Introduction to Women's and Gender Studies in the Natural Sciences.**

Examination of gendered constructs such as gender and sexual development, male and female differences and similarities, and feminist or alternative scientific epistemologies using approaches from the natural sciences. Three lecture hours a week for one semester, or as required by the topic. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

#### **Topic 2: Human Physical Growth and Development.**

### **WGS 324. Introduction to Women's and Gender Studies in Communication.**

Multidisciplinary course examining issues of women, gender, and sexuality in media industries, texts, and audiences. Three lecture hours a week for one semester, or as required for the topic. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 2: Women and Media Culture.** Introduction to the study of women's relations to media culture. Three lecture hours and two and one-half screening hours a week for one semester. Prerequisite: For radio-television-film majors: upper-division standing and the

following coursework, with a grade of at least C in each course: Radio-Television-Film 305, either 314 or 316, and six additional semester hours of lower-division coursework in radio-television-film; for others, upper-division standing and consent of instructor.

**Topic 4: Gender and the News.** Same as Journalism 348D. Historical and contemporary exploration of gender and the news. Examination of the role of marginalized gender groups in producing news and the construction of gender within news texts. Three lecture hours a week for one semester. Only one of the following may be counted: Journalism 348D, Women's and Gender Studies 324 (Topic 4), 345 (Topic: Women and the News). Additional prerequisite: For journalism majors, Journalism 310F with a grade of at least B-; for others, six semester hours of upper-division coursework in women's and gender studies.

### **WGS 125. Special Topics in Women's and Gender Studies.**

Analysis of special topics in women's and gender studies through reading, discussion, and lectures. One lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

### **WGS 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Women's and Gender Studies.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Women's and Gender Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **WGS 333D. Introduction to Developmental Psychology.**

Same as Psychology 333D. Physical, social, and cognitive development in humans. Three lecture hours a week for one semester. Only one of the following may be counted: Psychology 304, 333D, Women's and Gender Studies 333D, 345 (Topic 6). Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: African and African Diaspora Studies 302M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 301, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), 318 (or Statistics and Scientific Computation 318), 321 (or Statistics and Scientific Computation 321), 328M (or Statistics and Scientific Computation 328M).

### **WGS 333R. Social Development in Children.**

Same as Psychology 333R. Development of social behavior (for example, sex typing and aggression) and social relationships. Three lecture hours a week for one semester. Only one of the following may be counted: Psychology 333R, Women's and Gender Studies 333R, 345 (Topic 19). Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: African and African Diaspora Studies 302M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology

317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 301, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), 318 (or Statistics and Scientific Computation 318), 321 (or Statistics and Scientific Computation 321), 328M (or Statistics and Scientific Computation 328M).

### **WGS 335. Topics in Lesbian, Gay, Bisexual, Transgender, and Queer Studies.**

The perspectives, experiences, and cultural contributions of lesbian, gay, bisexual, transgender, and queer people, examined from different disciplinary and/or interdisciplinary perspectives according to the topic. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary by topic.

**Topic 1: Confronting LGBTQ Oppression.** Restricted to students admitted to the Peers for Pride Program. Serves two primary functions: to increase participant's knowledge on the issues facing the Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) community; and to learn facilitation skills in order to talk about these issues on campus. Enrolled students will become peer educators in a team, and will give workshops across campus around LGBTQ issues during the spring semester. Only one of the following may be counted: Social Work 360K (Topic: Confronting LGBTQ Oppression), Women's and Gender Studies 335 (Topic 1), 345 (Topic: Confronting LGBTQ Oppression).

**Topic 2: Facilitating Dialogues on LGBTQ Oppression: Peers for Pride in Action.** Restricted to students in the Peers for Pride program. The second part of the Peers for Pride facilitation program; serves as a way for students in the program to use the information and skills learned in "Confronting LGBTQ Oppression." Students will continue to fine-tune their facilitation skills and continue learning about LGBTQ people on the UT campus and beyond. Only one of the following may be counted: Social Work 360K (Topic: Facilitating Dialogues on LGBTQ Oppression: Peers for Pride in Action), Women's and Gender Studies 335 (Topic 2), 345 (Topic: Facilitating Dialogues on LGBTQ Oppression: Peers for Pride in Action). Additional prerequisite: Consent of instructor.

**Topic 3: African Queer Studies.** Same as African and African Diaspora Studies 372G (Topic 7). Examines the development of African queer studies as the interdisciplinary study of sexuality on the African continent, and its impact on the academic and activist realm. Focus on intersectional feminist and queer theory and how this field offers tools that can be used to rethink issues of oppression and domination in relationship to race, nation, sex, gender, and sexuality on the African continent. Of particular interest will be LGBTQ activism and the ways in which queer Africans engage and shape their sexuality, and create forms of belonging in their countries and their communities. Only one of the following may be counted: African and African Diaspora Studies 372G (Topic: African Queer Studies), 372G (Topic 7), Women's and Gender Studies 335 (Topic 3), 340 (Topic: African Queer Studies).

**Topic 4: Sexual Deviance in the Twentieth-Century United States.** Same as American Studies 370 (Topic 50). Examines the ways that Americans have created and maintained hierarchies of power by casting certain people and sexual behaviors as unnatural and immoral since the turn of the twentieth century. Only one of the following may be counted: American Studies 370 (Topic: Sexual Deviance in the Twentieth-Century US), 370 (Topic 50), Women's and Gender Studies 335 (Topic: Sexual Deviance in the Twentieth-Century US), 335 (Topic 4). Additional prerequisite: Upper-division standing.

**Topic 6: Gender Issues in Contemporary Latin American Cinema.** Same as Latin American Studies 370S (Topic 24) and Spanish 350K

(Topic 1). Studies Latin American cinema as a device of gender system formation and reinforcement, and as criticism of patriarchal hegemony; discusses questions related to sexuality depicted in Latin American films. Subjects covered include: maternity, prostitution, machismo, children's sexuality, homosexuality, heterosexuality, and gender violence in films from the 1930s to present. Conducted in Spanish. Three lecture hours a week for one semester. Only one of the following may be counted: Latin American Studies 370S (Topic 24), Spanish 350 (Topic: Gender in Contemporary Latin American Cinema), 350K (Topic 1), Women's and Gender Studies 335 (Topic 6), 340 (Topic: Gender in Contemporary Latin American Cinema). Additional prerequisite: Spanish 327C, (or 327), (or 327G), and three hours of upper-division coursework in either Spanish or Spanish Civilization.

**Topic 7: Queer Study in Low Culture.** Same as American Studies 370 (Topic 51). Examines representations of sexual and gender non-conformity in popular culture since the mid-twentieth century in the United States. Only one of the following may be counted: American Studies 370 (Topic: Queer Study in Low Culture), 370 (Topic 51), Women's and Gender Studies 335 (Topic: Queer Study in Low Culture), 335 (Topic 7). Additional prerequisite: Upper-division standing.

**Topic 8: Hip Hop Rhetorics.** Same as African and African Diaspora Studies 372E (Topic 17). Examination of the hip hop rhetorics of writers, performers, and activists of the hip hop generation. Subjects include the use of cultural tools including rap, fashion, dance, graffiti, and deejaying, to construct their identities and make and disseminate meaning within and about their social worlds, particularly around issues of racism, sexism and misogyny, poverty, and heterosexism. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic: Hip Hop Rhetorics), 372E (Topic 17), Women's and Gender Studies 335 (Topic 8).

**Topic 9: Movements for Sexual and Reproductive Justice.** Same as American Studies 370 (Topic 52). Charts the historical development of various struggles for sexual and reproductive justice in the United States since the nineteenth century. Only one of the following may be counted: American Studies 370 (Topic: Movements for Sexual and Reproductive Justice), 370 (Topic 52), Women's and Gender Studies 335 (Topic: Movements for Sexual and Reproductive Justice), 335 (Topic 9).

**Topic 16: Queer Media Studies.** Same as Radio-Television-Film 377H (Topic 2). Introduction to the critical analysis of queer media culture. Explores the dominant strategies used by the media industries to represent members of the LGBTQI community and their issues, as well as those utilized by lesbian, gay, bisexual, transgendered, queer, and intersexed folks in practices of self-representation. Also examines media reception practices among queer folks, as well as the alternative media economies developed by members of the LGBTQI community, and the intersections of queer identity, queer politics, and media culture. Only one of the following may be counted: Radio-Television-Film 359S (Topic: Queer Media Studies), 359S (Topic 5), 377H (Topic 2), Women's and Gender Studies 324 (Topic: Queer Media Studies), 335 (Topic 16).

**Topic 18: Twentieth-Century United States Lesbian and Gay History.** Same as American Studies 370 (Topic 49) and History 365G (Topic 10). Examines classic texts and recent and varied writings on LGBT history, focused on experiences, ideas, and conflicts that have shaped modern LGBT identities. Only one of the following may be counted: American Studies 370 (Topic: United States Lesbian and Gay History, Twentieth Century), 370 (Topic 49), History 365G (Topic: United States Lesbian and Gay History, Twentieth Century), 365G (Topic 10), Women's and Gender Studies 335 (Topic 18), 340 (Topic: United States Lesbian and Gay History, Twentieth Century).

**Topic 22: Queer Visual Culture.** Women's and Gender Studies 335 (Topic 22) and 345 (Topic: Queer Visual Culture) may not both be counted.

### **WGS 340. Cross-Cultural Topics in Women's and Gender Studies.**

Multidisciplinary course examining experiences and issues of gender in different cultures. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

**Topic 3: African American Family.** Same as African and African Diaspora Studies 321K and Social Work 360K (Topic 2). Overview of historical and contemporary issues facing African American families and children. Social service delivery to African American families and communities is emphasized. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 321K, 374 (Topic 1), Social Work 360K (Topic 2), Women's and Gender Studies 340 (Topic 3).

**Topic 7: Black Women and the State.** Same as African and African Diaspora Studies 372F (Topic 12), Anthropology 324L (Topic 78), and Latin American Studies 324L (Topic 17). Surveys black women's experiences living with and confronting state oppression around the world. Takes an historical, social, and theoretical look at the roots of this oppression and inequality, and how black women have chosen to respond to it locally and globally. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 372F (Topic: Black Women, Struggle, and the Transnational State), 372F (Topic 11), 372F (Topic 12), Anthropology 324L (Topic: Black Women, Struggle, and the Transnational State), 324L (Topic 78), Latin American Studies 324L (Topic: Black Women, Struggle, and the Transnational State), 324L (Topic 17), Women's and Gender Studies 340 (Topic: Black Women, Struggle, and the Transnational State), 340 (Topic 7), 340 (Topic 63). Additional prerequisite: Upper-division standing.

**Topic 9: Black Women in America.** Same as African and African Diaspora Studies 374D (Topic 9) and History 350R (Topic 17). Uses primary sources, historical monographs, and essays to provide a chronological and thematic overview of the experiences of black women in America from their African roots to the circumstances they face in the present era. Only one of the following may be counted: African and African Diaspora Studies 374D (Topic: Black Women in America), 374D (Topic 9), History 350L (Topic: Black Women in America), 350R (Topic 17), Women's and Gender Studies 340 (Topic: Black Women in America), 340 (Topic 9).

**Topic 10: Iranian Women Writers.** Same as Middle Eastern Languages and Cultures 321 (Topic 11) and Middle Eastern Studies 342 (Topic 11). Only one of the following may be counted: Middle Eastern Languages and Cultures 321 (Topic 11), Middle Eastern Studies 342 (Topic 11), WGS 340 (Topic 10). Additional prerequisite: Upper-division standing.

**Topic 11: Veiling in the Muslim World.** Same as Asian Studies 372 (Topic 14), Islamic Studies 372 (Topic 2), Middle Eastern Languages and Cultures 321 (Topic 22), and Religious Studies 358 (Topic 5). Only one of the following may be counted: Asian Studies 372 (Topic 14), Islamic Studies 372 (Topic 2), Middle Eastern Languages and Cultures 321 (Topic 22), Religious Studies 358 (Topic 5), Women's and Gender Studies 340 (Topic 11).

**Topic 12: Women in Modern Japanese Fiction.** Same as Asian Studies 372 (Topic 17: Women in Modern Japanese Fiction). Additional prerequisite: Upper-division standing or consent of instructor.

**Topic 13: Law and Society in Early Modern Europe.** Same as European Studies 346 (Topic 4) and History 350L (Topic 57). Research seminar on how historians have explored the significance of law, criminal and civil, in the lives of early modern Europeans. Topics include infanticide, fornication, drunkenness, theft, debt, slander, and family disputes. Only one of the following may be counted: European Studies 346 (Topic 4), History 350L (Topic 57), Women's and Gender Studies 340 (Topic 13).

**Topic 14: Self-Revelation in Women's Writing.** Same as African and African Diaspora Studies 372E (Topic 8), Comparative Literature 323 (Topic 4), and Middle Eastern Studies 342 (Topic 19). Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 8), 374 (Topic 26), Comparative Literature 323 (Topic 4), English 322 (Topic: Self-Revelation in Women's Writing), Middle Eastern Studies 342 (Topic 19), Women's and Gender Studies 340 (Topic 14).

**Topic 18: Women and Gender in China.** Same as Asian Studies 372 (Topic 21: Women and Gender in China) and History 350L (Topic 46: Women and Gender in China).

**Topic 19: Contemporary India.** Exploration of urban and rural inequality through classic and contemporary novels, ethnographies, and films that highlight gender relations.

**Topic 20: Violence in Contemporary Mexican Culture.** Same as Latin American Studies 370S (Topic 23) and Spanish 355 (Topic 6). Studies the representation of violence in contemporary literary and cultural production in Mexico in order to understand social, political, and cultural implications of current violence there. Taught in Spanish. Only one of the following may be counted: Latin American Studies 370S (Topic 23), Spanish 350 (Topic 13), 355 (Topic 6), Women's and Gender Studies 340 (Topic 20). Additional prerequisite: Spanish 327C (or 327G) and three hours of upper-division coursework in Spanish or Spanish Civilization.

**Topic 21: Minorities and the Media.** Discussion of issues concerning minority or nondominant groups in the United States. Survey of minority communication problems, including alienation; fragmentation; media and Internet access; and criticism and feedback for minority groups based on racial/ethnic background, age, sex, disability, social or economic class, and sexual orientation. Only one of the following may be counted: Journalism 341J, Latin American Studies 322 (Topic 10: Minorities and the Media), Mexican American Studies 374 (Topic 22: Minorities and the Media), Urban Studies 354 (Topic: Minorities and the Media), Women's and Gender Studies 340 (Topic 21).

**Topic 22: Muslim Women: Past and Present I.** Same as Islamic Studies 372 (Topic 12) and Religious Studies 358 (Topic 12). Survey of the role of women in Islamic societies from the Middle Ages to the eighteenth century, with a glimpse into modern times. Only one of the following may be counted: Islamic Studies 372 (Topic 12), Religious Studies 358 (Topic: Muslim Women: Past and Present I), 358 (Topic 12) Women's and Gender Studies 340 (Topic 22). Additional prerequisite: Upper-division standing.

**Topic 23: Muslim Women: Past and Present II.** Same as Islamic Studies 372 (Topic 13) and Religious Studies 358 (Topic 13). Survey of the role of women in the modern Muslim world, with a glimpse into historical developments within Islamic societies. Only one of the following may be counted: Islamic Studies 372 (Topic 13), Religious Studies 358 (Topic: Muslim Women: Past and Present II), 358 (Topic 13), Women's and Gender Studies 340 (Topic 23). Additional prerequisite: Upper-division standing.

**Topic 25: Gender, Sexuality, and the Family in Indian Religions and Cultures.** Same as Anthropology 324L (Topic 40), Asian Studies 372 (Topic 25), and Religious Studies 341 (Topic 3). A comprehensive historical overview of gender issues as they are represented in the textual traditions of South Asia.

**Topic 26: American Popular Culture, 1682-Present.** Same as American Studies 370 (Topic 35) and History 350R (Topic 19). Explores the evolution of American popular culture and its relationship to national consolidation, and at times, disunion, over the last 330 years.

**Topic 27: Islamic Law.** Same as Islamic Studies 340 (Topic 5), Middle Eastern Languages and Cultures 321 (Topic 19), Middle Eastern Studies 342 (Topic 27), and Religious Studies 358 (Topic 9). Designed to give students a foundation in the substantive teachings of the shariah, which comprises not only what we normally think of as

law, but also ethics and etiquette. Only one of the following may be counted: Islamic Studies 340 (Topic: Islamic Law), 340 (Topic 5), Middle Eastern Languages and Cultures 321 (Topic: Islamic Law), 321 (Topic 19), Middle Eastern Studies 342 (Topic 27), Religious Studies 358 (Topic: Islamic Law), 358 (Topic 9), Women's and Gender Studies 340 (Topic: Islamic Law), 340 (Topic 27).

**Topic 28: Gender and Sexuality in Japan.** Same as Asian Studies 372 (Topic 30) and History 364G (Topic 10). Examines gender and sexuality in Japan during the classical (Heian), early modern (Tokugawa or Edo), and modern periods. Considers the construction and representation of feminine and masculine gender and sexuality, both normative and otherwise. Only one of the following may be counted: Asian Studies 372 (Topic: Gender and Sexuality in Japan), 372 (Topic 30), History 364G (Topic: Gender and Sexuality in Japan), 364G (Topic 10), Women's and Gender Studies 340 (Topic: Gender and Sexuality in Japan), 340 (Topic 28).

**Topic 29: Contemporary African American Women's Fiction.** Same as African and African Diaspora Studies 372E (Topic 15) and English 376M (Topic 7). Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Contemporary African American Women's Fiction), 372E (Topic 15), English 376M (Topic: Contemporary African American Women's Fiction), 376M (Topic 7), Women's and Gender Studies 340 (Topic: Contemporary African American Women's Fiction), 340 (Topic 29). Additional prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 30: Goddesses in World Religions and Cultures.** Same as Asian Studies 340 (Topic 7) and Religious Studies 373 (Topic 3). Historical and cross-cultural overview of the relationship between feminine and religious cultural expressions through comparative examinations and analyses of various goddess figures in world religions. Only one of the following may be counted: Anthropology 324L (Topic: Goddesses in World Religions and Cultures), Asian Studies 340 (Topic 7), Religious Studies 373 (Topic: Goddesses in World Religions and Cultures), 373 (Topic 3), Women's and Gender Studies 340 (Topic: Goddesses in World Religions and Cultures), 340 (Topic 30). Additional prerequisite: Upper-division standing.

**Topic 31: Writing Slavery.** Same as African and African Diaspora Studies 374F (Topic 6) and English 376M (Topic 3). Explores the controversial rewriting of slavery in a presentist context by contemporary authors. Addresses challenges that archival limitations and revisionist writings about slavery pose for academic disciplines, literary instruction, and/or pedagogy. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Writing Slavery), 374F (Topic 6), English 376M (Topic: Writing Slavery), 376M (Topic 3), Women's and Gender 340 (Topic: Writing Slavery), 340 (Topic 31). Additional prerequisite: For English majors, nine semester hours of coursework in English or rhetoric and writing; for others, upper-division standing.

**Topic 32: African Women's History.** Same as African and African Diaspora Studies 372G (Topic 6) and History 364G (Topic 5). Major themes include politics, economics, religion, the family, culture, technology, feminism, colonialism, nationalism, and development in relation to the lives of African women. Only one of the following may be counted: African and African Diaspora Studies 372G (Topic 6), 374C (Topic: African Women's History), History 364G (Topic: African Women's History), 364G (Topic 5), Women's and Gender Studies 340 (Topic: African Women's History), 340 (Topic 32).

**Topic 33: Antebellum Slavery.** Same as African and African Diaspora Studies 374D (Topic 16) and History 365G (Topic 6). Examination of slavery at its maturity during the nineteenth century. Only one of the following may be counted: African and African Diaspora Studies 374D (Topic: Antebellum Slavery), 374D (Topic 16), History 365G (Topic: Antebellum Slavery), 365G (Topic 6), Women's and Gender Studies 340 (Topic: Antebellum Slavery), 340 (Topic 33).

**Topic 34: Gender in North and West Africa.** Same as African and African Diaspora Studies 372G (Topic 5), Islamic Studies 373 (Topic 8), Middle Eastern Languages and Cultures 321 (Topic 16), and Middle Eastern Studies 342 (Topic 28). Examines gender discourses through North African and West African literary works by looking at the role(s) played by Islam and Christianity in the creation of the identities of African men and women. Includes discussion of the question of what gender is, and whether it is socially constructed. Only one of the following may be counted: African and African Diaspora Studies 372G (Topic 5), 374C (Topic: Gender in North and West Africa), Islamic Studies 372 (Topic: Gender in North and West Africa), 373 (Topic 8), Middle Eastern Languages and Cultures 321 (Topic 16), Middle Eastern Studies 342 (Topic 28), Women's and Gender Studies 340 (Topic: Gender in North and West Africa), 340 (Topic 34). Additional prerequisite: Upper-division standing.

**Topic 35: South Asian Migration to the United States.** Same as Asian American Studies 325 (Topic 9), Asian Studies 372 (Topic 43), and History 365G (Topic 14). Examines the South Asian diaspora in the United States. Only one of the following may be counted: Asian American Studies 325 (Topic: South Asian Migration to the United States), Asian American Studies 325 (Topic 9), Asian Studies 372 (Topic: South Asian Migration to the United States), Asian Studies 372 (Topic 43), History 365G (Topic: South Asian Migration to the United States), History 365G (Topic 14), Women and Gender Studies 340 (Topic: South Asian Migration to the United States), Women and Gender Studies 340 (Topic 35). Additional prerequisite: Upper-division standing.

**Topic 36: Gender and Geography.** Same as Geography 356T (Topic 11). Interrogates how norms of gender, race, and sexuality are created through and across the spaces of the body, home, nation, colony and the globe, using a feminist postcolonial lens. Only one of the following may be counted: Geography 356T (Topic: Gender and Geography), 356T (Topic 11), Women and Gender Studies 340 (Topic: Gender and Geography), 340 (Topic 36). Additional prerequisite: Upper-division standing.

**Topic 37: Tolerance in Dutch Culture.** Same as European Studies 347 (Topic 19) and German, Scandinavian, and Dutch Studies 361E. The historical roots of Dutch "tolerance" and how it plays a role in current Dutch culture and attitudes towards religious, gender, and sexual differences, as well as drug use, prostitution, and euthanasia. Exploration of the stereotypes and the actuality of these Dutch attitudes and policies from an international comparative perspective. Only one of the following may be counted: European Studies 347 (Topic: Dutch Culture: Too tolerant?), 347 (Topic 19), German, Scandinavian, and Dutch Studies 361E, Germanic Civilization 327E (Topic: Dutch Culture: Too tolerant?), Women's and Gender Studies 340 (Topic: Dutch Culture: Too tolerant?), 340 (Topic 37). Additional prerequisite: Upper-division standing.

**Topic 38: Afro-Caribbean Politics and Culture in Central America.** Same as African and African Diaspora Studies 326, Anthropology 324L (Topic 47), and Latin American Studies 337N. Exploration of black identity, political systems, and community activism in Central America and the Caribbean. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 326, 374E (Topic: Afro-Caribbean Politics and Culture in Central America), Anthropology 324L (Topic: Afro-Caribbean Politics and Culture in Central America), 324L (Topic: 47), Government 365N (Topic: Afro-Caribbean Politics and Culture in Central America), Latin American Studies 337M (Topic: Afro-Caribbean Politics and Culture in Central America), 337N, Women's and Gender Studies 340 (Topic: Afro-Caribbean Politics and Culture in Central America), 340 (Topic 38). Prerequisite: Upper-division standing.

**Topic 39: History of Southern Africa.** Same as African and African Diaspora Studies 374C (Topic 4) and History 350L (Topic 72). Only one of the following may be counted: African and African Diaspora Studies

374C (Topic: History of Southern Africa), 374C (Topic 4), History 350L (Topic: History of Southern Africa), 350L (Topic 72), Women's and Gender Studies 340 (Topic: History of Southern Africa), 340 (Topic 39).

**Topic 40: Historical Imagining of Africa in Films.** Same as African and African Diaspora Studies 374F (Topic 18) and History 350L (Topic 70). Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Historical Imagining of Africa in Film), 374F (Topic 18), History 350L (Topic: Historical Imagining of Africa in Film), 350L (Topic 70), Women's and Gender Studies 340 (Topic: Historical Imagining of Africa in Film), 340 (Topic 40).

**Topic 42: Apartheid: South African History.** Same as African and African Diaspora Studies 374C (Topic 6) and History 364G (Topic 6). A study of the social, political, economic, and cultural history of South Africa to contextualize the rise of apartheid. Primarily focuses on the period since 1948 from the perspectives of women, children, and men of all racial backgrounds who lived through that particular period. Only one of the following may be counted: African and African Diaspora Studies 374C (Topic: Apartheid and Resistance in South Africa), 374C (Topic: Apartheid: South African History), 374C (Topic 6), History 364G (Topic: Apartheid: South African History), 364G (Topic: Apartheid and Resistance in South Africa), 364G (Topic 6), Women's and Gender Studies 340 (Topic: Apartheid: South African History), 340 (Topic 42).

**Topic 43: Black Women and Dance.** Same as African and African Diaspora Studies 356E. Exploration of how black women express creativity in response to the violence of racism and sexism, and to envision new ways of being and moving in the world. Women's participation in ritual, concert, and social dance in North America, Haiti, Cuba, and Brazil will be studied through readings, viewings, and stagings. Only one of the following may be counted: African and African Diaspora Studies 356E, 372E (Topic: Black Women and Dance), Theatre and Dance 357T (Topic: Black Women and Dance), Women's and Gender Studies 340 (Topic: Black Women and Dance), 340 (Topic 43). Prerequisite: Upper-division standing.

**Topic 44: Gender Politics in the Islamic World.** Same as Islamic Studies 373 (Topic 11), Middle Eastern Studies 341 (Topic 7), Religious Studies 358 (Topic 8), and Sociology 336G. Study of the Islamic world and major sociological concepts such as gender, social organizations, culture, and politics. Examines how culture is mediated by politics, resulting in diverse interpretations of Islam and in different policies with respect to women's rights. Three lecture hours a week for one semester. Only one of the following may be counted: Islamic Studies 373 (Topic: Gender Politics in the Islamic World), 373 (Topic 11), Middle Eastern Studies 322K (Topic: Gender Politics in the Islamic World), 341 (Topic: Gender Politics in the Islamic World), 341 (Topic 7), Religious Studies 358 (Topic: Gender Politics in the Islamic World), 358 (Topic 8), Sociology 321K (Topic: Gender Politics in the Islamic World), 336G, Women's and Gender Studies 340 (Topic: Gender Politics in the Islamic World), 340 (Topic 44). Additional prerequisite: Upper-division standing.

**Topic 45: Feminist Interventions in Borderlands History.** Same as American Studies 370 (Topic 45) and Mexican American Studies 374 (Topic 38). Provides an in-depth understanding of the social, economic, and spatial transformations of the United States/Mexico borderlands in the nineteenth and early twentieth centuries. Only one of the following may be counted: American Studies 370 (Topic: Feminist Interventions in Borderlands History), 370 (Topic 45), Mexican American Studies 374 (Topic: Feminist Interventions in Borderlands History), 374 (Topic 38), Women's and Gender Studies 340 (Topic: Feminist Interventions in Borderlands History), 340 (Topic 45).

**Topic 46: Africana Women's Art.** Same as African and African Diaspora Studies 374F (Topic 9) and Art History 346L. Analysis of the diverse modes of presentation, mediums, definitions, and influences of Africana women artists in the diaspora. Designed to use critical theory and art history found in oral and written literatures, music,

films, and other formal and informal documents. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Africana Women's Art), 374F (Topic 9), Art History 346L, 373C (Topic: Africana Women's Art), Women's and Gender Studies 340 (Topic: Africana Women's Art), 340 (Topic 46). Prerequisite: Upper-division standing.

**Topic 47: Black Queer Literature and Film.** Same as African and African Diaspora Studies 372E (Topic 13) and English 376M (Topic 8). Analyzes written works, films, and videos by and about lesbians, bisexual, transgender, and gay black people, with an emphasis on understanding the historical and theoretical construction of sexual and gender identities and sexual/cultural practices in black communities. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic: Black Queer Literature and Film), 372E (Topic 13), 374F (Topic: Black Queer Literature and Film), English 376M (Topic: Black Queer Literature and Film), 376M (Topic 8), Women's and Gender Studies 340 (Topic: Black Queer Literature and Film), 340 (Topic 47). Additional prerequisite: For English majors, nine semester hours of coursework in English or rhetoric and writing; for others, upper-division standing.

**Topic 48: Diaspora Visions.** Same as African and African Diaspora Studies 374F (Topic 13) and Art History 345L. An exploration of border crossing by cultures and groups including Yorubas, Jews, Armenians, Tibetans, Hamish, Pakistanis, and Indians and the production of images by immigrants, exiles, and nomads in alien lands. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Diaspora Vision), 374F (Topic 13), Art History 345L, 373D (Topic: Diaspora Visions), 374 (Topic: Diaspora Vision), Women's and Gender Studies 340 (Topic: Diaspora Vision), 340 (Topic 48).

**Topic 50: Women and the Holocaust.** Same as Comparative Literature 323 (Topic 19), European Studies 346 (Topic 10), German, Scandinavian, and Dutch Studies 341F, and Jewish Studies 363 (Topic 11). Introduction to both the history of Jewish and German women during World War II and the Holocaust, and to women's narratives and self-representations of this period. Historical sources, memoirs, films, and interviews will be used as source material. Three lecture hours a week for one semester. Only one of the following may be counted: Comparative Literature 323 (Topic: Women's Narratives of the Holocaust and World War II), 323 (Topic 19), European Studies 346 (Topic: Women's Narratives of the Holocaust and World War II), 346 (Topic 10), German, Scandinavian, and Dutch Studies 341F, Germanic Civilization 323E (Topic: Women's Narratives of the Holocaust and World War II), Jewish Studies 363 (Topic 11), Women's and Gender Studies 340 (Topic: Women's Narratives of the Holocaust and World War II), 340 (Topic 50). Additional prerequisite: Upper-division standing.

**Topic 51: Medieval Women Mystics.** Same as European Studies 347 (Topic 18), German, Scandinavian, and Dutch Studies 361D, and Religious Studies 357 (Topic 15). The life and writings of Saint Birgitta of Sweden, fourteenth-century visionary, religious reformer, and pilgrim, examined and compared with her predecessor Hildegard of Bingen (Germany), her successor Margery Kempe (England), as well as Margery's mentor, Julian of Norwich. Social and historical contexts for all four of these women mystics will be explored in depth. Only one of the following may be counted: English 322 (Topic: Birgitta, Hildegard, and Margery), European Studies 347 (Topic: Birgitta, Hildegard, and Margery), 347 (Topic 18), German, Scandinavian, and Dutch Studies 361D, Germanic Civilization 327E (Topic 10: Birgitta, Hildegard, and Margery), Religious Studies 357 (Topic: Birgitta, Hildegard, and Margery), 357 (Topic 15), Scandinavian 373 (Topic 8: Birgitta, Hildegard, and Margery), Women's and Gender Studies 340 (Topic: Birgitta, Hildegard, and Margery), 340 (Topic 51). Additional prerequisite: Upper-division standing.

**Topic 52: Sex and Power in the African Diaspora.** Same as African and African Diaspora Studies 372G (Topic 33) and Anthropology 324L (Topic 48). Exploration of various experiences and theories of sex, intimacy, and desire alongside intellectual and artistic engagements with power hierarchies and spirituality across transnational black communities. Subjects include the concept of "erotic subjectivity" from various theoretical and methodological angles, principally within African diasporic contexts. Only one of the following may be counted: African and African Diaspora Studies 372G (Topic: Sex and Power in the African Diaspora), 372G (Topic 33), Anthropology 324L (Topic: Sex and Power in the African Diaspora), 324L (Topic 48), Women's and Gender Studies 340 (Topic: Sex and Power in the African Diaspora), 340 (Topic 52).

**Topic 53: Women and Social Movements in the Twentieth-Century United States.** Same as African and African Diaspora Studies 372C (Topic 7), American Studies 321 (Topic 10), and History 365G (Topic 8). Examines women's participation in well-known and lesser-known social movements during the twentieth century. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic: Women and Social Movements in US), 372C (Topic 7), American Studies 321 (Topic: Women/Social Movements in US), 321 (Topic 10), History 365G (Topic: Women/Social Movements in US), 365G (Topic 8), Women's and Gender Studies 340 (Topic: Women/Social Movements in the US), 340 (Topic 53).

**Topic 54: The Qur'an.** Same as Comparative Literature 323 (Topic 37), Core Texts and Ideas 375 (Topic 1), Islamic Studies 340 (Topic 2), Middle Eastern Languages and Cultures 321 (Topic 9), Middle Eastern Studies 342 (Topic 16), and Religious Studies 325G. The history, language, style, and themes of the Qur'an. Only one of the following may be counted: Comparative Literature 323 (Topic: The Qur'an), 323 (Topic 37), Core Texts and Ideas 375 (Topic: The Qur'an), Core Texts and Ideas 375 (Topic 1), Islamic Studies 340 (Topic 2), Middle Eastern Languages and Cultures 321 (Topic 9), Middle Eastern Studies 342 (Topic 16), Religious Studies 325G, Women's and Gender Studies 340 (Topic: The Qur'an), 340 (Topic 54). Additional prerequisite: Upper-division standing.

**Topic 55: Women Filmmakers in the Middle East.** Same as Middle Eastern Languages and Cultures 321 (Topic 23) and Middle Eastern Studies 342 (Topic 32). Only one of the following may be counted: Middle Eastern Languages and Cultures 321 (Topic 23), Middle Eastern Studies 322K (Topic: Women Filmmakers in the Middle East), 342 (Topic 32), Turkish 372 (Topic: Women Filmmakers in the Middle East), Women's and Gender Studies 340 (Topic: Women Filmmakers in the Middle East), 340 (Topic 55). Additional prerequisite: Upper-division standing.

**Topic 56: Muslim Women in Politics.** Same as Islamic Studies 372 (Topic 23) and Religious Studies 358 (Topic 19). Only one of the following may be counted: Anthropology 324L (Topic: Muslim Women in Politics), Islamic Studies 372 (Topic: Muslim Women in Politics), 372 (Topic 23), Religious Studies 358 (Topic: Muslim Women in Politics), 358 (Topic 19), Women's and Gender Studies 340 (Topic: Muslim Women in Politics), 340 (Topic 56).

**Topic 57: Sacred and Ceremonial Textiles.** Same as Anthropology 324L (Topic 29), Islamic Studies 372 (Topic 11), Middle Eastern Languages and Cultures 321 (Topic 34), and Religious Studies 358 (Topic 11). Textiles and material objects indigenous to the Islamic world, and what they reveal about the culture of various Islamic societies. Only one of the following may be counted: Anthropology 324L (Topic 29), Islamic Studies 372 (Topic 11), Middle Eastern Languages and Cultures 321 (Topic: Sacred and Ceremonial Textiles), 321 (Topic 34), Middle Eastern Studies 328 (Topic: Sacred and Ceremonial Textiles), Religious Studies 358 (Topic: Sacred and Ceremonial Textiles), 358 (Topic 11), Textiles and Apparel 355 (Topic: Sacred and Ceremonial Textiles), Women's and Gender Studies 340 (Topic: Sacred and Ceremonial Textiles), 340 (Topic 57).

**Topic 58: Queer Ethnographies.** Same as Anthropology 324L (Topic 45). Anthropological analysis of gender and sexuality that critically evaluates formative concepts and theories that have been subject to recent debates within anthropology, gender studies, and queer theory. Only one of the following may be counted: Anthropology 324L (Topic: Queer Ethnographies), 324L (Topic 45), Women's and Gender Studies 340 (Topic: Queer Ethnographies), 340 (Topic 58).

**Topic 59: Ancient Mediterranean Masculinities.** Same as Classical Civilization 348 (Topic 18). Examines in-depth literary and artistic evidence from multiple ancient cultures to determine how each society defined the distinctively "masculine" role it expected of men and boys and how each society transformed boys into men. Only one of the following may be counted: Classical Civilization 348 (Topic: Ancient Mediterranean Masculinities), 348 (Topic 18), Women's and Gender Studies 340 (Topic: Ancient Mediterranean Masculinities), 340 (Topic 59).

**Topic 62: Gender and Art in the Muslim World.** Same as Asian Studies 372 (Topic 46), Islamic Studies 373 (Topic 15), Middle Eastern Languages and Cultures 321 (Topic 31), Middle Eastern Studies 342 (Topic 40), and Religious Studies 358 (Topic 20). Only one of the following may be counted: Asian Studies 372 (Topic: Gender and Art in Muslim World), 372 (Topic 46), Islamic Studies 373 (Topic: Gender and Art in Muslim World), 373 (Topic 15), Middle Eastern Languages and Cultures 321 (Topic: Gender and Art in Muslim World), 321 (Topic 31), Middle Eastern Studies 342 (Topic: Gender and Art in Muslim World), 342 (Topic 40), Religious Studies 358 (Topic: Gender and Art in Muslim World), 358 (Topic 20), Women's and Gender Studies 340 (Topic: Gender and Art in Muslim World), 340 (Topic 62). Prerequisite: Upper-division standing.

**Topic 64: Postcolonial Women Writers.** Same as African and African Diaspora Studies 372C (Topic 15) and Comparative Literature 323 (Topic 38). Literary exploration of how postcolonial women across the world view their positions as citizens, migrants, workers, parents, activists, and artists in the new millennium. Subjects include the effects of imperialism in women's lives, western feminisms developed to address global women's needs, and what new possibilities for decolonization, feminism, and creativity remain to be explored. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic: Postcolonial Women Writers), 372C (Topic 15), Comparative Literature 323 (Topic: Postcolonial Women Writers), 323 (Topic 38), English 370W (Topic: Postcolonial Women Writers), Women's and Gender Studies 340 (Topic: Postcolonial Women Writers), 340 (Topic 64).

**Topic 65: Feminism and Film: Women Filmmakers in Northern and Central Europe.** Same as Comparative Literature 323 (Topic 33), European Studies 347 (Topic 24), and German, Scandinavian, and Dutch Studies 331D. An introduction to the work of women filmmakers from Scandinavia, Germany, as well as to the viewing and interpretation of films in general. Three lecture hours a week for one semester. Only one of the following may be counted: Comparative Literature 323 (Topic: Women Filmmakers in Northern and Central Europe), 323 (Topic 33), European Studies 347 (Topic: Women Filmmakers in Northern and Central Europe), 347 (Topic 24), German, Scandinavian, and Dutch Studies 330 (Topic: Women Filmmakers in Northern and Central Europe), 331D, Women's and Gender Studies 340 (Topic: Women Filmmakers in Northern and Central Europe), 340 (Topic 65). Additional prerequisite: Upper-division standing.

**Topic 66: Holocaust Aftereffects.** Same as Comparative Literature 323 (Topic 40), European Studies 346 (Topic 23), German, Scandinavian, and Dutch Studies 360 (Topic 1), Jewish Studies 365 (Topic 14), and Religious Studies 357 (Topic 18). Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States. Only one of the following may be counted: Comparative Literature 323 (Topic: Holocaust Aftereffects), 323 (Topic 40),

European Studies 346 (Topic: Holocaust Aftereffects), 346 (Topic 23), German, Scandinavian, and Dutch Studies 360 (Topic 1), Germanic Civilization 323E (Topic: Holocaust Aftereffects), Jewish Studies 365 (Topic: Holocaust Aftereffects), 365 (Topic 14), Liberal Arts Honors 350 (Topic: Holocaust Aftereffects), Religious Studies 357 (Topic: Holocaust Aftereffects), 357 (Topic 18), Women's and Gender Studies 340 (Topic: Holocaust Aftereffects), 340 (Topic 66).

**Topic 67: Graffiti and Poster Art in the Islamic World.** Same as Anthropology 324L (Topic 59), Islamic Studies 373 (Topic 17), Middle Eastern Languages and Cultures 321 (Topic 36), Middle Eastern Studies 342 (Topic 44), and Religious Studies 358 (Topic 21). Only one of the following may be counted: Anthropology 324L (Topic: Graffiti/Poster Art: Islam World), 324L (Topic 59), Islamic Studies 373 (Topic: Graffiti/Poster Art: Islam World), 373 (Topic 17), Middle Eastern Languages and Cultures 321 (Topic: Graffiti/Poster Art: Islam World), 321 (Topic 36), Middle Eastern Studies 342 (Topic: Graffiti/Poster Art: Islam World), 342 (Topic 44), Religious Studies 358 (Topic: Graffiti/Poster Art: Islam World), 358 (Topic 21), Women's and Gender Studies 340 (Topic: Graffiti/Poster Art: Islam World), 340 (Topic 67). Prerequisite: Upper-division standing.

**Topic 68: Women and Wealth in South Asia.** Same as Asian Studies 372 (Topic 47) and History 350L (Topic 94). Addresses the questions surrounding poverty of South Asian women by combining legal, political and social histories of the subcontinent over four centuries. Only one of the following may be counted: Asian Studies 372 (Topic: Women and Wealth in South Asia), 372 (Topic 47), History 350L (Topic: Women and Wealth in South Asia), 350L (Topic 94), Women's and Gender Studies 340 (Topic: Women and Wealth in South Asia), 340 (Topic 68).

#### **WGS 441. The Roots of Social and Economic Justice.**

Four lecture hours a week for one semester. Only one of the following may be counted: Social Work 460K (Topic: Roots of Social and Economic Justice), Women's and Gender Studies 440 (Topic: Roots of Social and Economic Justice), 441. Prerequisite: Upper-division standing.

#### **WGS 345. Topics in Women's and Gender Studies.**

Three lecture hours a week for one semester, or as required for the topic. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

##### **Topic 1: Child Development.**

**Topic 2: The Family.** Same as Sociology 323. The American family in historical and comparative perspective. Family history and origins; comparative family systems; social antecedents of family structure and process; family formation and dissolution; family and society; recent family changes and prospects for the future. Three lecture hours a week for one semester. Sociology 323 and Women's and Gender Studies 345 (Topic 2) may not both be counted. Additional prerequisite: Upper-division standing.

**Topic 3: Women in Sickness and Health.** Same as History 350R (Topic 18). Explores medical and biological views throughout the nineteenth and twentieth centuries of women and women's health, the social context of those views, the development of medical practices, and the treatment of illness and debility. Only one of the following may be counted: History 350L (Topic: Women in Sickness and Health), 350R (Topic 18), Women's and Gender Studies 345 (Topic 3). Additional prerequisite: Six semester hours of coursework in history.

**Topic 5: Women and Sport.** Same as Kinesiology 352K (Topic 3: Women and Sport).

**Topic 7: Eighteenth-Century Women Writers.** Same as English 350M (Topic 1). Women writers in the early eighteenth-century canon. Argues for a historical perspective that demonstrates the centrality of early eighteenth-century women writers to the western canon. English 350M (Topic 1) and Women's and Gender Studies 345 (Topic 7) may

not both be counted. Additional prerequisite: For English majors, nine semester hours of coursework in English or rhetoric and writing; for others, upper-division standing.

**Topic 8: Gender-Based Discrimination.** Same as American Studies 370 (Topic 6: Gender-Based Discrimination) and Government 357M (Topic 1: Gender-Based Discrimination). Studies the substance of laws that relate to gender-based roles, and the participation of women in the legal process. Additional prerequisite: Upper-division standing, six semester hours of lower-division coursework in government, a University grade point average of at least 3.50, and consent of department received prior to registering.

**Topic 9: Women in Classical Antiquity.** Same as Classical Civilization 348 (Topic 7: Women in Classical Antiquity).

**Topic 12: Family Policy Issues.** Same as Sociology 352M (Topic 5: Family Policy Issues). Consideration of liberal, conservative, and centrist views concerning the major family policy issues facing the United States and other advanced industrial societies.

**Topic 13: Isak Dinesen/Karen Blixen.** Same as Comparative Literature 323 (Topic 14), European Studies 347 (Topic 15), and German, Scandinavian, and Dutch Studies 341G. An introduction to the twentieth-century Danish author Karen Blixen, focusing on her major themes such as gender and destiny, and examining her role as a literary figure. Only one of the following may be counted: Comparative Literature 323 (Topic: Isak Dinesen/Karen Blixen), 323 (Topic 14), European Studies 347 (Topic: Isak Dinesen/Karen Blixen), 347 (Topic 15), German, Scandinavian, and Dutch Studies 341G, Germanic Civilization 323E (Topic 1), Scandinavian 373 (Topic 6), Women's and Gender Studies 345 (Topic 13). Additional prerequisite: Upper-division standing.

**Topic 14: Social Dramas of Henrik Ibsen.** Same as Comparative Literature 323 (Topic 17), European Studies 347 (Topic 12), and German, Scandinavian, and Dutch Studies 341D. A detailed introduction to Ibsen's social dramas (1877-1899), emphasizing their unity as a prolonged commentary on the society of his era and the variety of its human problems. Special emphasis on subjects such as: the family and the home; the public world of reputation, work, and citizenship; the predicaments of men and women in a male-dominated society; and the motives of our interventions into the lives of others. Only one of the following may be counted: Comparative Literature 323 (Topic: Social Dramas of Henrik Ibsen), 323 (Topic 17), English 322 (Topic 17), European Studies 347 (Topic: Social Dramas of Henrik Ibsen), 347 (Topic 12), German, Scandinavian, and Dutch Studies 341D, Scandinavian 323 (Topic 2), Women's and Gender Studies 345 (Topic 14). Additional prerequisite: Upper-division standing.

**Topic 15: Contemporary Women Authors.** Same as African and African Diaspora Studies 374F (Topic 4: Contemporary Women Authors) and English 370W (Topic 2: Contemporary Women Authors). Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 17: Language and Gender.** Same as English 364S. Linguistic, social, and political dimensions of gender-related speech differences. Only one of the following may be counted: English 346S, Linguistics 373 (Topic: Language and the Sexes), Women's and Gender Studies 345 (Topic 17). Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 21: Male-Female Communication.** Same as Communication Studies 365K. Studies of speech patterns related to the concepts of male and female, including sexism in speaking, patterns of male and female speaking, patterns of listening to males and females, speech in courtship and family, speech and sexual discrimination in careers. Prerequisite: Upper-division standing.

**Topic 23: Sociology of Education.** Same as African and African Diaspora Studies 321L and Sociology 321L. Education as a societal institution, with emphasis on the United States educational system: how the system works; the effects of the system; recent changes. Prerequisite: Upper-division standing.

**Topic 26: American Dilemmas.** Same as Sociology 336C and Urban Studies 354 (Topic 13). Examination of critical American social problems, including problems in the economic, political, and health care systems, as well as inequities based on income, gender, and race. Exploration of how these problems are a natural outgrowth of the existing social structure. Three lecture hours a week for one semester. Only one of the following may be counted: Sociology 336C, Urban Studies 354 (Topic: American Dilemmas), 354 (Topic 13), Women's and Gender Studies 345 (Topic 26). Additional prerequisite: Upper-division standing.

**Topic 27: Southern Cultures.** Same as American Studies 370 (Topic 40: Southern Cultures). Investigation of multiple, fluid, and diverse southern cultures through topics such as NASCAR, biscuits and cornbread, mega-churches, beauty pageants, jazz, country music, southern hip hop, migrant farm cultures, matzo ball soup with collards, the Trail of Tears, Gullah, Tara, Graceland, and more. Includes discussion of stereotypes and the individual truths about women, men, and southern in the context of this discussion. Prerequisite: Upper-division standing.

**Topic 28: Cult Movies and Gender Issues.** Three lecture hours and two and one-half screening hours a week for one semester. Prerequisite: Upper-division standing.

**Topic 29: Witches, Workers, and Wives.** Same as European Studies 346 (Topic 3: Witches, Workers, and Wives) and History 343W. Explores the role of families and concepts of gender as expressed in key economic, social, political, and cultural patterns in early modern Europe. Prerequisite: Upper-division standing.

**Topic 30: Gay and Lesbian Literature and Culture.** Same as English 370W (Topic 8: Gay and Lesbian Literature and Culture). Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 31: Gender and Slavery in the United States.** Same as African and African Diaspora Studies 372C (Topic 4) and History 350R (Topic 14). Examines the gendered experience of chattel slavery in the United States. Includes critical analysis of classic and contemporary texts, films, and songs that focus on slave labor, family, community, sexuality, and the economy. Only one of the following may be counted: African and African Diaspora Studies 372C (Topic 4), 374D (Topic: Gender and Slavery in the United States), History 350L (Topic: Gender and Slavery in the United States), 350R (Topic 14), Women's and Gender Studies 340 (Topic: Gender and Slavery in the United States), 345 (Topic 31).

**Topic 32: Women in the History of Political Thought.** Same as Core Texts and Ideas 335 (Topic 5) and Government 335M (Topic 17). Examines the themes of women, the family, and the private sphere in the history of political theory. Only one of the following may be counted: Core Texts and Ideas 335 (Topic: Women in Hist of Polit Thought), 335 (Topic 5), Government 335M (Topic: Women in History of Political Thought), 335M (Topic 17), Women's and Gender Studies 345 (Topic: Women in History of Political Thought), 345 (Topic 32). Additional prerequisite: Upper-division standing and six semester hours of lower-division coursework in government.

**Topic 33: The History of Witchcraft.** Study of the prosecution of people, most of them women, for the crime of witchcraft in Europe and colonial America between 1450 and 1750. Prerequisite: Upper-division standing.

**Topic 34: Leadership in America.** Same as American Studies 370 (Topic 10: Leadership in America) and Government 370L (Topic 2: Leadership in America). Introduction to the concepts of leadership and the application of those concepts in public and political leadership. Additional prerequisite: Upper-division standing, six semester hours of lower-division coursework in government, a University grade point average of at least 3.50, and consent of department received prior to registering.

**Topic 35: Psychosocial Issues in Women's Health.** Same as Health Education 361. Explores psychosocial issues in women's physical and

mental health, including traditional reproductive issues, disorders that are more common in women than in men, and the leading causes of death in women. Covers gender influences on health risk behaviors, and societal influences on women's health through a consideration of social norms and roles. Three lecture hours a week for one semester. Only one of the following may be counted: Health Education 352K (Topic 2: Psychosocial Issues in Women's Health), 361, Women's and Gender Studies 345 (Topic 35). Additional prerequisite: Upper-division standing.

**Topic 36: Feminist Media Theory.** Survey of basic theories related to the structure and process of film and video communication. Three lecture hours and two and one-half screening hours a week for one semester.

**Topic 37: Women in Postwar America.** Same as American Studies 370 (Topic 30) and History 350R (Topic 8). Only one of the following may be counted: American Studies 370 (Topic 30), History 350R (Topic 8), Women's and Gender Studies 345 (Topic 37).

**Topic 38: History of Sexuality in America.** Same as History 350R (Topic 13). History 350R (Topic 13) and Women's and Gender Studies 345 (Topic 38) may not both be counted. Additional prerequisite: Six semester hours of coursework in history.

**Topic 39: Gender, Sexuality, and Migration.** Same as English 370W (Topic 9: Gender, Sexuality, and Migration). Only one of the following may be counted: Asian American Studies 320 (Topic: Gender, Sexuality, and Migration), English 370W (Topic 9), 370W (Topic: Cultures of Immigration and Dislocation), Women's and Gender Studies 345 (Topic 39). Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 40: Virginia Woolf.** Same as English 349S (Topic 8). Examines critical and fictional works of Virginia Woolf and the author's continuing legacy and influence. Explores the value and limitations of high modernism; English literary heritage and tradition; feminism; creative and critical definitions of gender and sexuality; intellectual activism, including Woolf's critiques of patriarchy, war, and fascism; and Woolf and imperialism and colonialism. English 349S (Topic 8) and Women's and Gender Studies 345 (Topic 40) may not both be counted. Additional prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 41: American Food.** Same as American Studies 370 (Topic 26: American Food). Studies diverse American food cultures from a humanities perspective, exploring connections between global, national, and local communities. Uses scholarship in the field of food studies as well as cookbooks, novels, poetry, photographs, songs, documentaries, and oral histories to investigate the past and present of American food communities. Prerequisite: Upper-division standing.

**Topic 42: Nature and Gender in America.** Same as American Studies 370 (Topic 27: Nature and Gender in America). Study of the connections between nature and gender in American national narratives. Explores how Americans of differing classes, races, genders, sexual orientations, and ages have shaped and experienced changing ideas of America, wilderness, domestication, and society over time and in different regions of the country. Prerequisite: Upper-division standing.

**Topic 43: Animals and American Culture.** Same as American Studies 370 (Topic 28) and History 350R (Topic 9). Explores the role of animals in American history, culture, and society. Only one of the following may be counted: American Studies 370 (Topic 28), History 350R (Topic 9), Women's and Gender Studies 345 (Topic 43).

**Topic 44: Women Radicals and Reformers.** Same as American Studies 370 (Topic 29: Women Radicals and Reformers). Traces traditions of women's radical activism and reform beginning with the Enlightenment and the American Revolution and continuing to the present, with concentration on the twentieth century. Prerequisite: Upper-division standing.

**Topic 45: Comparative Cultures of Beauty.** Same as American Studies 370 (Topic 24: Comparative Cultures of Beauty) and Asian American Studies 320 (Topic 2: Comparative Cultures of Beauty). Examines fashion and beauty as discourses and cultural practices affecting identity, body politics, race, gender, sexuality, and class. Additional prerequisite: Upper-division standing.

**Topic 46: Toni Morrison.** Same as African and African Diaspora Studies 372E (Topic 1) and English 349S (Topic 5). An examination of select novels by the Nobel Laureate and Pulitzer Prize-winning novelist focuses on the positional uniqueness that womanism shares with a predominant feminism, which surfaces in historicized familial relationships. Only one of the following may be counted: African and African Diaspora Studies 374F (Topic: Toni Morrison), 372E (Topic 1), English 349S (Topic 5), Women's and Gender Studies 340 (Topic: Toni Morrison), 345 (Topic 46). Additional prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

**Topic 47: The Face of Justice.** Same as Government 357M (Topic 11). Examination of the inalienable rights: liberty, due process, equality, speech, assembly, security in the home, and practice or nonpractice of religion. Historical overview of women's rights and women's participation in the justice system. Discussion of individuals whose rights are being protected, and those whose rights are being overlooked by the American judicial system. Only one of the following may be counted: Government 357M (Topic: Face of Justice), 357M (Topic 11), Liberal Arts Honors 350 (Topic: Face of Justice), Women's and Gender Studies 345 (Topic: Face of Justice), 345 (Topic 47). Prerequisite: For government majors, six semester hours of lower-division coursework in government; for others, upper-division standing.

**Topic 48: Women's Autobiographical Writing.** Same as English 370W (Topic 11). Examines the autobiographical impulse in women's writing by exploring the concept of the individualistic self versus the sense of self as a part of community and duty, and the way in which that communal self can both partake of humankind and participate in self-actualization. Only one of the following may be counted: English 370W (Topic: Women's Autobiographical Writing), 370W (Topic 11), Women's and Gender Studies 345 (Topic: Women's Autobiographical Writing), 345 (Topic 48). Additional prerequisite: For English majors, nine semester hours of coursework in English or rhetoric and writing; for others, upper-division standing.

**Topic 49: History of American Feminism.** Same as History 350R (Topic 20). Only one of the following may be counted: History 350R (Topic: History of American Feminism), 350R (Topic 20), Women's and Gender Studies 345 (Topic: History of American Feminism), 345 (Topic 49).

**Topic 52: American Literary Masculinities.** Same as English 370W (Topic 12). Explores constructions of masculinity in American literature from a generally, but not exclusively, feminist perspective. Subjects include what masculinity has meant at different times in United States history, and how it has varied in meaning and significance according to broad categories of identity such as social class, race, region, and queerness. Only one of the following may be counted: English 370W (Topic: American Literary Masculinities), 370W (Topic 12), Women's and Gender Studies 345 (Topic: American Literary Masculinities), 345 (Topic 52). Additional prerequisite: For English majors, nine semester hours of coursework in English or rhetoric and writing; for others, upper-division standing.

**Topic 53: Gender and Sexuality in Ancient Novel.** Same as Classical Civilization 348 (Topic 13). The major works of prose fiction from Greco-Roman antiquity and how those works relate to the intellectual, cultural, and social currents of late antiquity. Only one of the following may be counted: Classical Civilization 348 (Topic: Gender and Sexuality in Ancient Novel), 348 (Topic 13), Women's and Gender Studies 345 (Topic: Gender and Sexuality in Ancient Novel), 345 (Topic 53).

**Topic 56: Gender And Sexuality in Performance.** Same as Theatre and Dance 357T (Topic 2). Only one of the following may be counted: Theater and Dance 357T (Topic: Gender And Sexuality in Performance), 357T (Topic 2), Women's and Gender Studies 345 (Topic: Gender And Sexuality in Performance), 345 (Topic 56). Additional prerequisite: Upper-division standing and consent of instructor.

### **WGS 350. Feminist Theory.**

Restricted to women's and gender studies majors and minors. Feminist theory with selections from women's and gender studies scholars. Recommended feminist theory course for women's and gender studies majors. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and nine semester hours of coursework in women's and gender studies.

### **WGS 356. Introduction to Feminist Research Methods.**

Restricted to women's and gender studies majors and minors. Introduction to feminist research methods across a range of traditional disciplines. Designed to prepare students to analyze research within gender studies and to develop their own research skills. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and six semester hours of coursework in women's and gender studies.

### **WGS 358Q. Supervised Research.**

Supervised individual research on an issue in women's and gender studies. Individual instruction. Prerequisite: Upper-division standing, Women's and Gender Studies 356 with grade of at least C-, and written consent of the supervising faculty member; consent forms are available in the Center for Women's and Gender Studies.

### **WGS 360. Research and Thesis in Women's and Gender Studies.**

Restricted to women's and gender studies majors. Individual project or paper to be completed under the direction of a women's and gender studies faculty member. Conference course. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; Women's and Gender Studies 356 with grade of at least C-; credit or registration for Women's and Gender Studies 358Q; and written consent of the supervising faculty member on a consent form available in the Center for Women's and Gender Studies for that purpose.

### **WGS 466. Guidance in Adult-Child Relationships.**

Same as Human Development and Family Sciences 466. Theory and implementation of positive child and adult interactions, communication, and guidance strategies. Two lecture hours and four laboratory hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 466, Women's and Gender Studies 345 (Topic 4: Guidance in Adult-Child Relationships), 466. Prerequisite: Human Development and Family Sciences 313 or 313H, 113L, and three semester hours of upper-division coursework in human development and family sciences, education, psychology, or sociology, with a grade of at least C- in each.

### **WGS 679H. Honors Tutorial Course.**

Restricted to honors candidates majoring in women's and gender studies. Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis. The equivalent of three lectures hours a week for two semesters. Prerequisite: For 679HA, twelve semester hours of coursework in women's and gender studies and consent of supervising faculty; for 679HB, Women's and Gender Studies 679HA.

**WGS 379L. Internship in Women's and Gender Studies.**

Experience working in the community or for a nonprofit agency. Ten to fifteen hours of work a week for one semester. Prerequisite: At least twelve semester hours of coursework in women's and gender studies and written consent of the supervising faculty member; consent forms are available in the Center for Women's and Gender Studies.

**WGS 379S. Senior Seminar.**

Intensive study of selected topics in women's and gender studies. Three lecture hours a week for one semester. May not be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and completion of at least ninety semester hours of coursework, including six hours in women's and gender studies.

## General Information

### Arts and Sciences Education

The academic program offered cooperatively by the College of Natural Sciences and the College of Liberal Arts provides what is sometimes referred to as a “liberal arts” or an “arts and sciences” education. No matter what area of knowledge a student intends to specialize in, the program of study will require courses in both colleges. The colleges work together to ensure that the individual interests and needs of the students pursuing an arts and sciences program are met.

Guidelines for developing a coherent plan of study are provided by major requirements, by sequential prerequisites, and by optional patterns of emphasis. Departmental majors, areas of specialization, and interdepartmental programs are designed to enable every student to study at least one field in depth. These programs are sufficiently broad in scope to allow students in the same major to develop quite different plans of study in pursuit of their individual interests and goals. Each student should choose courses that are intellectually challenging and that contribute to his or her long-term objectives.

Arts and sciences students are required to take a certain number of courses in the natural sciences, the social and behavioral sciences, and the humanities. Consequently, whatever their fields of study, they have the opportunity to learn something about the basic differences in the ways questions are raised and answered in several fields of inquiry, and about the techniques for validating the answers and putting the results to use. At the same time, they may gain some of the philosophical and historical perspectives that illuminate and give form to general or specialized knowledge and help to reveal its relevance.

Both teachers and students sometimes make the assumption that independent and creative study is exclusively for the gifted. In fact, the primary requirement is that the student be highly motivated, although he or she must also demonstrate ability. The departments that make up the two arts and sciences colleges encourage all qualified students to work independently in special honors courses and seminars and in conference, studio, or laboratory work. The student is free to define a major, to determine whether a given assignment will be an adventure or a chore, free to develop its latent possibilities or merely satisfy its explicit demands. True creativity presupposes more than a gift for innovation; it requires an unceasing commitment to thinking and working at one's highest level.

As competence is gained in a chosen field, the mind should be progressively sharpened, disciplined, and enriched. The student who leaves arts and sciences studies with an enhanced understanding of

self and humankind, of cultural and historical heritage, of the world and the universe, and of the moral values that make it possible to live a meaningful life, will have made the most of education, having gained something over and above the objective of vocational preparedness.

## Financial Assistance Available through the College

A number of scholarship funds established by individuals, foundations, and industrial or research organizations are available to students in the college. Awards are made for reasons ranging from academic promise to financial need. More information about scholarships is given at <http://cns.utexas.edu/honors/scholarships/scholarship-policies>.

## Student Services

### Academic Advising

Academic advising is a responsibility shared by advisers and students. Advisers help students clarify their values and goals, assist with the selection of courses, and monitor and evaluate students' progress toward their degrees. Each student is assigned an academic adviser in his or her proposed field of study; students are expected to communicate with their advisers before registration each semester.

### Career Services

Career Services is a multidisciplinary hub for students to explore the next phase of their professional or educational career. Additional information is given on the Career Services website (<https://cns.utexas.edu/career-services>).

### Study Abroad

Students are encouraged to incorporate an international experience into their course of study. In addition to the traditional study abroad programs, students may take advantage of programs specifically designed for science study, including faculty-led courses, Maymester courses, and research abroad. The Texas Institute for Discovery Education in Sciences (TIDES) provides information sessions, one-on-one advising, and resources for science students interested in these programs.

## Student Programs

The College of Natural Sciences offers additional programs to supplement the degree plans. Additional information is given at <https://cns.utexas.edu/student-communities>.

### Biology Scholars Program

The Biology Scholars Program (BSP) is designed to provide lower-division biochemistry and biology students with a broader understanding of the study of biology and a strong sense of community as they begin their academic careers. Throughout the two-year program, BSP provides academic support, resources for peer-led study, and community service opportunities. Each semester, BSP students take a specialized critical thinking seminar on topics that range from the study of biological sciences to graduate and professional careers in biology. These classes emphasize working in small groups and help BSP students develop strong problem-solving and study skills.

### Cornerstones Program

All entering Natural Sciences majors, freshman or transfer, are eligible for participation in the Cornerstones Program. The guiding principles for students are to connect, acclimate, navigate, and explore. Each entering freshman joins a small learning community led by a faculty or staff adviser and a peer mentor. The key components of Cornerstones

are creating small learning communities, gaining tools to succeed in college, learning about majors, and developing skills and experiences to launch successful careers upon graduation. Transfer students are given the option to join the program. More information is available at <https://cns.utexas.edu/student-communities/cns-cornerstones-communities>.

## Freshman Research Initiative

The Freshman Research Initiative in the Texas Institute for Discovery Education in Science (TIDES) introduces undergraduate students to the world of scientific research at the beginning of their academic careers by integrating a three-semester research experience into coursework required for the degree. All students begin with an introductory research methods course in the first semester, followed by two semesters of work on real, cutting-edge research projects in fields like biology, biochemistry, nanotechnology, molecular biology, astronomy, physics, mathematics, and computer science. After finishing the course sequence, interested students are assisted in joining faculty or other research laboratories for further work.

## Texas Interdisciplinary Plan

The Texas Interdisciplinary Plan (TIP) transforms the learning experience for its scholars by creating small academic communities that promote academic excellence and leadership. TIP offers students who have excelled in high school and are enrolled in the College of Natural Sciences a unique opportunity to continue their academic excellence through managed courses, mentoring, collaborative study, dedicated professional academic advising, and academic and social connections. More information is available from the TIP office and at <https://cns.utexas.edu>.

## Undergraduate Research

One advantage that the University offers undergraduates is the opportunity to participate in state-of-the-art research with some of the world's most respected scientists. Each department in the College of Natural Sciences supports undergraduate research programs in which students may earn University credit. Students may also earn special departmental honors for exceptional research. The college holds an annual Undergraduate Research Forum to recognize and reward students who participate in research. Additional opportunities vary from department to department; information is available in the Office for Honors, Research, and International Study.

## UTeach-Natural Sciences

UTeach-Natural Sciences is an innovative teacher preparation program that allows students to pursue middle school and secondary teacher certification within a four-year mathematics, science, or computer science degree program. While learning the subject matter of their majors, students also learn how to teach. Upon completing the program, students graduate with a bachelor's degree and are recommended for a middle school or secondary teaching certificate. The UTeach-Natural Sciences program invites students to explore their interest in teaching as early as the freshman year. Through courses taught by some of Texas's most respected secondary math and science teachers, students learn quickly whether they are suited to the profession. More information about teacher certification requirements is given in the UTeach Natural Sciences Secondary Teaching Option Certificate (p. 685) and UTeach Teacher Certification section (p. 649) of this catalog. See Preparation for Teacher Certification (p. 16) for additional information.

## Women in Natural Sciences

The Women in Natural Sciences (WINS) Honors Residential Program is designed to promote the involvement and success of women in the sciences. Students live together in an honors dormitory during their first

year and participate in socially and educationally enriching activities. In their first semester they take an innovative small seminar class in which they are introduced to faculty members in their areas of interest. Through the seminar and a wide range of academic, cultural, and social events, WINS students are connected with other students and faculty members who share their interest in science.

# Admission and Registration

## Admission Policies of the College

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission>).

Freshman and transfer students wishing to enter the College of Natural Sciences must apply for admission with the Office of Admissions. The College of Natural Sciences works jointly with the Office of Admissions to identify applicants who have demonstrated preparation and interest in mathematics and sciences. A student must be admitted to the college to pursue a degree program described in this section. A student who is denied admission to the college may seek to enter another college or school.

## Freshman Admission

Applicants should be prepared to make the necessary placements scores on the placement exams for calculus or statistics upon admission into the college. Mathematics, in the form of calculus or statistics, is required for all natural sciences degrees. To enroll in a calculus or statistics course in college, students must first take the mathematics placement exam. Information about scores necessary for placement are posted by the Student Division (<http://cns.utexas.edu/students/incoming-students/assessments>).

## The Entry-Level Major

All new freshman and transfer students are admitted into the College of Natural Sciences in an entry-level major. After completing a specified set of entry-level mathematics and science courses required for the degree with a grade of at least C- in each course, students are admitted to the major and option they plan to pursue unless the major or option has special admission-to-major requirements. The computer science entry-level major is restricted to students who are admitted to that major by the Office of Admissions.

Students admitted into the College of Natural Sciences through freshman admission or external transfer may change from one entry-level major into the other, with the exception of the computer science and neuroscience entry-level majors. The computer science and neuroscience entry-level majors are restricted to students who are admitted by the Office of Admissions or through internal transfer.

## Internal Transfer

Students enrolled in other colleges or schools at the University may apply by April 15 to be considered for admission into an entry-level major in the following fall semester. If April 15 falls on a weekend or an official university holiday, the application is due on the next business day.

Admission to the college is limited and competitive. To be competitive, students should:

1. Complete a minimum of 24 semester hours in residence
2. Achieve a grade point average of at least 3.00 in residence

3. Complete one of the following courses in residence with a grade of at least *B*:- Mathematics 408C, 408D, 408K, 408L, 408M, 408N, 408S, or Statistics and Data Sciences 302.
4. Complete two of the following courses in residence with grades of at least *B*:- Biology 311C, Chemistry 301, 302, Physics 303K, and 303L, or majors level equivalents.
5. Submit an essay describing how the intended major would impact achievement of the educational and career goals.

Students admitted through internal transfer who wish to change to a different major in the college must apply through internal transfer and be accepted in order to change majors. Public Health entry-level majors admitted through internal transfer who are not admitted to the Bachelor of Science in Public Health degree during its admission process may transfer into any Natural Sciences entry-level major other than computer science and neuroscience.

## External Transfer

Students enrolled at other universities who wish to enter the College of Natural Sciences must apply for transfer admission through the Office of Admissions. Students must meet transfer admission deadlines and requirements.

The college seeks applicants with excellent past performance in mathematics and science courses. Admission to the college is limited and competitive, and varies each year based on the applicant pool. Meeting all of the following criteria does not guarantee admission, and failing to meet all criteria does not eliminate applicants from consideration. All students are welcome to apply.

To be competitive, it is recommended that students:

1. Complete or be in progress to complete a minimum of 30 transferable semester hours when submitting the application;
2. Achieve a grade point average of at least 3.25;
3. Complete a calculus course with a grade of at least *B*-;
4. Complete a minimum of nine semester hours in first year mathematics and science coursework with grades of *A* and *B*, including, for example, any combination of biology, chemistry, mathematics, and physics;
5. Utilize all aspects of the admissions application, including essays, resume, and optional letters of recommendation to express interest in the intended academic and career path in the sciences.

Students who apply to the College of Natural Sciences with fewer than 30 transferable hours completed will be considered on a space-available basis after the 30 hours are complete.

The University of Texas prioritizes transfer students who have completed fewer than 70 semester hours and who are able to remain on track to complete a degree in four years, including time spent at previous institutions.

Statistics regarding past admissions cycles are available at [cns.utexas.edu/students/future/external-transfer/#transfer-statistics](https://cns.utexas.edu/students/future/external-transfer/#transfer-statistics).

## Adding a Simultaneous Major or Changing Majors

Students interested in declaring a simultaneous major must first discuss the impact of the simultaneous major on their progress toward degree and develop a timely graduation plan with their academic advisers. Students eligible to pursue a simultaneous major must follow the application procedure and meet admission requirements that have been established for the simultaneous major. At minimum, students must complete 30 semester hours of coursework in residence at the University. Students interested in changing majors must meet the entry-

level or admission requirements of the major they wish to enter. Students admitted through internal transfer may not add a simultaneous major in the College of Natural Sciences unless they are admitted into the simultaneous major through internal transfer.

## Admission-to-Major Requirements

### The Major in Computer Science

Several programs are available to undergraduates who wish to major in computer science. Each program involves an admission process in addition to the student's application for admission to the University. All students may apply to the University as entry-level computer science majors and later seek admission to one of the computer science programs as described in this section; those seeking admission to the Turing Scholars program may also apply to that program when they apply for admission to the University.

Admission requirements for the Bachelor of Arts with a major in computer science, the Bachelor of Science and Arts with a major in computer science, the Bachelor of Science in Computer Science, Option I, and the Integrated Program are given below. Those for the Bachelor of Science in Computer Science, Option II, Turing Scholars Honors, and Option III, Computer Science Honors, are given in Academic Policies and Procedures (p. 644).

### Bachelor of Arts; the Bachelor of Science and Arts; and the Bachelor of Science in Computer Science, Option I and V

To apply for admission to the Bachelor of Arts with a major in computer science, the Bachelor of Science and Arts with a major in computer science, or the Bachelor of Science in Computer Science, Option I and Option V degree programs, the student must earn a grade of at least *C* in each of three entry-level courses: Computer Science 311 or 311H, Computer Science 312, and 314 or 314H. A student may attempt two of the three entry-level courses no more than twice. The third course may be attempted only once. Symbols of *CR*, *Q*, and *W* count as course attempts.

It is recommended that he or she complete all of the entry-level courses in residence at the University. However, he or she may request that transfer courses taken prior to enrollment at The University of Texas at Austin be approved as substitutes for the entry-level courses. Upon enrollment at The University of Texas at Austin, all remaining entry-level courses must be taken in residence. The letter grades for approved transfer courses will be used in combination with entry-level courses taken in residence to calculate the grade point average required for admission to the major. He or she must earn a grade point average of at least 2.75 in the three entry-level courses taken in residence or out of residence, and a grade point average of at least 2.00 in all courses taken in residence.

A student who is not admitted to the major may submit an appeal to the department for consideration. If the appeal is approved, the student may enroll once in Computer Science 429. If the student makes a grade of at least *B*-, he or she will be admitted to the major to which he or she applied.

Students are evaluated after the end of each fall semester, spring semester, and summer session by the Department of Computer Science Admission Committee. Students should consult advisers in the College of Natural Sciences Department of Computer Science for information about admission to the major.

A student admitted to the major who cannot complete Computer Science 429, 439, and 331 with grades of at least a *C*- within two attempts may be removed from the major and placed into the natural sciences

undeclared major. Symbols of *CR*, *Q*, or *W* from the university count as course attempts. A third and final attempt may be granted if the student is given a non-academic drop or non-academic withdrawal during the semester in which the course is taken.

## The Integrated Program in Computer Science

The Integrated Program is a curriculum of undergraduate and graduate coursework that allows the student to earn the Bachelor of Science in Computer Science and the Master of Science in Computer Science, the Master of Science in Information Studies, or the Master of Science in Computational Science, Engineering, and Mathematics degrees at the same time. The integrated Master of Science in Computer Science includes the same coursework as the traditional master's degree program, as well as the opportunity for research. The integrated Master of Science in Information Studies allows students to choose a pathway for completing a capstone and electronic portfolio comprised of a professional experience project, a master's report, or a thesis. The integrated Master of Science in Computational Science, Engineering, and Mathematics includes the same coursework as the traditional computational sciences, engineering and mathematics master's degree program and also offers opportunity for research.

Students in the Integrated Program are expected to become leaders in the profession. Highly motivated students with the personal qualities and intellectual capacity to establish successful careers in higher education and industry are encouraged to apply.

Undergraduates typically follow Option I, II, or III for their first three years, then enter the Integrated Program in their fourth year. Admission is granted only for the fall semester; May 1st is the application deadline for those who wish to begin the program the following fall. By the end of the spring semester in which they apply, students must have completed at least 60 semester hours of coursework, including Computer Science 429 or 429H, 439 or 439H, and 331 or 331H.

Admission is based on the applicant's grade point average, letters of recommendation, statement of purpose, and SAT Reasoning Test or ACT scores, as well as other relevant examples of academic ability and leadership. An applicant with a University grade point average of less than 3.50 is unlikely to be admitted. Admission may be restricted by the availability of instructional resources. Application materials and information about deadlines are published by the Department of Computer Science, available at <http://www.cs.utexas.edu/>.

Before beginning the fifth year, students in the Integrated Program must be admitted to the Graduate School and the graduate program in the Department of Computer Science, the School of Information, or the Institute of Computational Science, Engineering, and Mathematics. Application forms must be completed by January 2 of the student's fourth year. Before the application deadline, students must have completed the prescribed work common to all Bachelor of Science in Computer Science Options. They must earn an acceptable score on the Graduate Record Examinations General Test (GRE) and must have their test scores reported to the University. Students usually take the GRE in the fall semester of their fourth year.

## The Coordinated Program in Dietetics

Freshman and transfer applicants to the University who plan to enter the Coordinated Program in Dietetics (CPD) should begin in the entry-level major in nutrition. When they have met the requirements described below, students may apply for admission to the CPD.

Prior to applying for admission to the CPD, students must complete at least 60 semester hours of the coursework required for the Bachelor of Science in Nutrition, Option I, including Biology 325 or 325H, and 365S; Biochemistry 369; and Nutrition 307, 107L, 312 or 312H, 112L or 312R,

315, and 326. A list of other recommended courses is available from the School of Human Ecology. Students must have a grade point average of at least 2.70 in coursework taken in residence at the University. Students should consult advisers in the School of Human Ecology for information about the application process and deadlines. Application materials are available from the school.

The number of applicants to the CPD may exceed the number that can be adequately instructed by the faculty and accommodated within available facilities. Admission decisions are based on the student's biology, chemistry, and nutrition grade point average, his or her University grade point average, and other factors. These factors include, but are not limited to, the difficulty of the student's coursework, work or volunteer experience, leadership, commitment to the profession of dietetics, and personal interview. Students whose applications are denied may reapply.

## The Bachelor of Science in Environmental Science

### Admission to the Environmental Science Program

All freshmen and external transfer students majoring in environmental science (EVS) are first admitted to the University as entry-level EVS majors in the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences. After completing a minimum of 24 hours in residence, students may select the EVS major that best suits their long-term interests and, if necessary, transfer to the appropriate college/school in accordance with the regulations and procedures set forth in *General Information* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees/transfer-from-one-division-to-another-within-the-university>).

### Freshman Admission

Freshmen applicants seeking admission to the EVS major through the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences must meet the calculus readiness requirement by the official admissions application deadline. More information about the calculus readiness requirement is available through the University Admissions Office or online.

Freshmen applicants to the EVS major from all three colleges/schools are reviewed and admitted as a single cohort. Applications should use the Apply Texas online application and select the "Environmental Science, Entry-Level" major Option listed in the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences as a first-choice major. Applicants should apply to the EVS program in the college that best suits their anticipated area of focus (geological sciences, geographical sciences, or biological sciences, respectively).

### External Transfer Admission

Students who wish to transfer to the university from another college or university must apply to the Office of Admissions as described in *General Information* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission/#transferadmissiontext>). External transfer applicants seeking admission to the Environmental Science (EVS) Degree Program through the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences must demonstrate calculus readiness by the official admissions application deadline. Details regarding transfer calculus readiness are available through the University Admissions Office or online (<https://admissions.utexas.edu/apply/calculus-readiness>).

External transfer applicants to the EVS major from all three colleges/schools are reviewed and admitted to as a single cohort. Applicants should use the Apply Texas online application and select the

"Environmental Science, Entry-Level" major Option listed in the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences as a first-choice major. Applicants should apply to the EVS program in the college that best suits their anticipated area of focus (geological sciences, geographical sciences, or biological sciences, respectively).

### Internal Transfer Admission

Internal transfer, entry-level applications submitted to the EVS major through the Jackson School of Geosciences, the College of Liberal Arts, and the College of Natural Sciences are reviewed and admitted as a single cohort. All internal transfer applicants should use the online EVS Program Transfer Application and must meet requirements for internal transfer given in *General Information* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees/transfer-from-one-division-to-another-within-the-university>).

To be competitive for admission, internal transfer applicants should have a grade point average of at least 3.0 in Biology 311C, Chemistry 301, Mathematics 408C or 408N or 408K, and Geological Sciences 401 or 303.

Additional Information for all internal transfer applicants:

- Application Deadline: March 1 for entry the following academic year.
- Only currently enrolled students in good academic standing with their college of residence may apply.
- Students may apply during the semester they are completing the minimum requirements to be eligible for consideration.
- Entry-level admission to all Environmental Science majors is offered as space is available to the students who are best qualified. Decisions are based on the student's grade point average in the introductory science and math courses listed above, University grade point average, and other factors including, but not limited to, difficulty of course load, course repetitions, proven mathematical ability, and interest in the field of Environmental Science.

Students should consult with an academic adviser for additional information on the application process and deadlines.

## The Bachelor of Human Development and Family Sciences

Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R is restricted to students whose practicum applications have been approved. Students who want to participate in an early childhood field experience/field practicum (Human Development and Family Sciences 352L or 652P) must also complete Human Development and Family Sciences 338 and 466 with grades of at least C-. Practicum applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.

## The Bachelor of Science in Neuroscience, Option I

Prior to applying for admission to the Bachelor of Science in Neuroscience, Option I, degree program, the student must earn a grade of at least B- in Neuroscience 330. Neuroscience 330 must be taken in residence. The student must also complete any of the four following courses, with grades of at least C-: Biology 311C, 311D, 315H, 325H; Chemistry 301, 301H, 302, 302H, and 204; Mathematics 408C, 408N, 408S; and Physics 301, 316, 303K, 303L, 317K, and 317L. To

be competitive for admission, the student should have a combined grade point average of at least 3.0 in the five courses required for admission.

To apply, the student should consult advisers in the Center for First-Year Advising for information about the application process and deadlines. Applications are evaluated after the end of each fall and spring semester by the Department of Neuroscience. Students whose applications are denied may reapply twice through the supplemental admission process. Admission decisions are based on a number of factors including, but not limited to, the student's grade point average, course load difficulty, and written statement about their commitment to a future in the field of neuroscience.

## The Major in Public Health

To apply for admission to the public health degree program, the student must have earned a grade of at least C- in Biology 311C and 311D or 315H; Chemistry 301 or 301H and 302 or 302H; and Mathematics 408C or 408N. To be competitive for admission, the student must have a grade point average of at least 2.75 in these five courses. Students who satisfy these requirements are conditionally admitted to the major, and are registered in Public Health 317 in the following semester. Students must earn a grade of at least B- to be fully admitted to the major.

Applications are evaluated after the end of each fall and spring semester. Students whose applications are denied may reapply through the supplemental admission process the following semester. Admission decisions are based on the student's grade point average in the basic sequence courses, his or her University grade point average, and other factors; these factors include, but are not limited to, the difficulty of the student's course load, course repetitions, and proven mathematical ability. Students should consult advisers in the College of Natural Sciences Center for First-Year Advising for information about the application process and application deadlines.

Students who plan to follow Option II, Public Health Honors, must be admitted to the Dean's Scholars Honors Program.

To apply for admission to Option III, the student must already be admitted to Option I. The Option I student may apply for admission to Option III upon completion of the sixth semester with a grade point average of at least 3.40. The Option III student follows the admission schedule and policies of the School of Public Health at the University of Texas Health Sciences Center at Houston.

## The Bachelor of Science in Public Health, Option III

The Option I student may apply for admission to Option III upon completion of the sixth semester with a grade point average of at least 3.40. The Option III student follows the admission schedule and policies of the School of Public Health at the University of Texas Health Sciences Center at Houston.

## The Major in Textiles and Apparel

### Admission to the Field Experience Programs

All textiles and apparel students must complete a field experience. The internship experience facilitates learning through the blending of theory and practice. The program is a cooperative effort involving three major participants: the student, the sponsoring firm or site supervisor, and the faculty coordinator.

The primary purpose of the program is to provide students with a realistic view of their profession through actual work experience in a professional environment. Experiences in the field setting challenge the student developmentally by providing an opportunity for both cognitive

and effective learning, as well as fundamental changes in attitude, work habits, and maturity level.

Before beginning the internship, students will be expected to participate in interviews with representatives from participating sites. These interviews are designed to prepare students for a competitive marketplace. To ensure a placement that best meets the professional needs of each student, the program partners with organizations and support industries over a wide geographic area. The program director must approve all sites prior to a student's acceptance of the internship. Once a student accepts an approved internship, the placement is binding. Depending on the policy of the host site, the intern may or may not receive compensation. During the internship, the student is responsible for all assignments given by the faculty coordinator and the internship site. The interning student is also responsible for housing, relocation arrangements, and expenses.

Materials, information about deadlines, and directions for application are available from the Director of Internships in Textiles and Apparel.

## **Option I: Apparel, Functional, and Technical Design**

### **Application Process for Internship**

Students must apply and be admitted to the Apparel, Functional, and Technical Design Internship Program the semester before they plan to participate in their internship.

Before applying to the internship program, students must complete the following courses with a grade of at least *C-* in each: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 316L, 164K (Topic 1: *Flat Pattern*), 264L (Topic 1: *Flat Pattern*), and 355C.

### **Internship Semester**

Textiles and Apparel 352C. Students may opt to take additional coursework during this semester.

## **Option II: Merchandising and Consumer Sciences**

### **Application Process for Internship**

Students must apply and be admitted to the Merchandising and Consumer Sciences Internship Program the semester before they plan to participate in their merchandising and consumer sciences internship block.

Before applying to the internship program, students must complete the following courses with a grade of at least *C-* in each: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 316Q, 219C, 119L, 151, and 376. The merchandising and consumer sciences internship block is to be completed during the senior year, serving as the capstone experience for merchandising and consumer sciences majors.

### **Internship Semester**

The merchandising and consumer sciences internship block is comprised of four internship courses: Textiles and Apparel 353, 352M, 355P, and 377, as well as a placement in an approved field experience, all taken concurrently. Students may not enroll in additional coursework during the semester.

## **Option IV: Textile Conservation and Museum Studies**

### **Application Process for Internship**

Students must apply and be admitted to the Textile Conservation and Museum Studies Internship Program the semester before they plan to participate in their conservation internship.

Before applying to the internship program, students must complete the following courses with a grade of at least *C-* in each: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 151, 354C, 354D, 354E, 354F, 355D. The Textile Conservation and Museum Studies Internship is to be completed during the senior year, serving as the capstone experience for textile conservation and museum studies majors.

### **Internship Semester**

Textiles and Apparel 652C. Students may opt to take additional course work during this semester.

## **Academic Policies and Procedures**

### **Academic Standards**

#### **Mathematics Placement**

Mathematics, in the form of calculus or statistics, is required for all natural sciences degrees. To enroll in a calculus or statistics course in the college, students must first take the mathematics placement exam. Scores necessary for placement into specific mathematics and statistics courses are posted by the Student Division (<http://cns.utexas.edu/students/incoming-students/assessments>). More information about scores and course placement is available from academic advisers.

#### **Repetition of a Course**

No student may enroll in any course in the College of Natural Sciences more than twice, even if the course is needed to meet degree requirements, without first obtaining the written consent of his or her major adviser and of the department that offers the course; students in colleges other than the College of Natural Sciences need only departmental approval. A symbol of *Q* or *W* counts as an enrollment unless it has been approved by the dean's office for nonacademic reasons.

A student may not repeat any course in which he or she has earned a grade of *C-* or better.

Departments in the college may have additional requirements for students who repeat courses.

#### **Removal from the Major**

A Natural Sciences student whose appeal to take a course in the College of Natural Sciences for a third time and is denied may be removed from the major if the course is required for the degree.

A student who is removed from the major will be placed in the undeclared major while the student examines options to pursue another major in the College of Natural Sciences or in another college. An academic adviser will work with the student to explore opportunities for academic success and graduation.

A student who transfers the course for which a repeat appeal was denied may appeal to re-enter the major from which the student was removed. Appeals to re-enter the major are reviewed by the Associate Dean for Undergraduate Education.

#### **Concurrent Enrollment**

Concurrent enrollment is enrollment simultaneously at the University and at another educational institution or in University Extension. Math and science courses may not be taken concurrently during fall and spring semesters and will not be counted toward a degree unless they are specifically approved in advance by the College of Natural Sciences. The college permits concurrent enrollment during summers without prior approval and during fall and spring semesters with certain restrictions.

Students must see their academic advisers to petition for approval. No more than 30 percent of the semester hours required for any degree in the college may be completed online with University Extension.

## Undergraduates in a Graduate Course

The College of Natural Sciences encourages undergraduates who excel academically and would benefit from further challenges to enroll in graduate courses. With permission, undergraduates may count graduate courses toward their undergraduate degrees or may reserve them for graduate credit. To enroll in a graduate course, undergraduates must meet the University's eligibility requirements and must receive permission from the course instructor, the graduate adviser for the field in which the course is offered, and the college. Undergraduates reserving courses for graduate credit must also receive permission from the graduate dean. More information is given in Coursework in the Graduate School and the School of Law (p. 18).

## Petitions for Degree Requirements

Petitions for exceptions to degree requirements, other than the University-wide core curriculum, are handled through an online petition system. Academic advisers initiate petitions on the student's behalf and route them through departmental faculty advisers. The most common reason for petitioning is to request the substitution of transfer coursework for a specific degree requirement. Final decisions on all petitions are made by the dean's office. Degree requirements are very rarely waived outright.

## Honors

There are several avenues available for undergraduates to achieve honors recognition for exemplary academic ability and performance. They include: University Honors, graduation with University Honors, college-wide honors programs, departmental honors degree options, and completion of departmental honors.

The College of Natural Sciences offers Bachelor of Science and Arts and Bachelor of Science honors degree options in three programs that serve majors in the College of Natural Sciences: Dean's Scholars, Health Science Scholars, and Polymathic Scholars. Information about admission and requirements for each is available at CNS Honors & Scholarships (<https://cns.utexas.edu/honors>).

Honors degree options that are sponsored by departments include: Turing Scholars in Computer Science; Honors in Advanced Human Development and Family Sciences Program; and the Honors in Advanced Nutritional Sciences Program.

Lastly, students may earn departmental honors upon graduation through completion and approval of an undergraduate thesis.

## University Honors

University honors are earned on a semester by semester basis. Information relating to University Honors can be found in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#universityhonorstext>).

## Graduation with University Honors

The University recognizes no more than the top 20 percent of each college's May graduating class as graduating with University Honors. To be eligible, an undergraduate must have completed at least 60 semester hours of coursework in residence at the University. Graduation with University Honors is based on the average of all grades earned in courses taken in residence at the University, whether the courses were passed, failed, or repeated. Courses taken pass/fail are counted in the

sixty-hour minimum, but only letter grades (including *F* in pass/fail courses) are used to determine the grade point average.

Detailed requirements for graduation from the College of Natural Sciences with University Honors are given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#graduationwithuniversityhonorstext>).

## Dean's Scholars Program

Dean's Scholars is a four-year honors degree program for highly motivated and talented students with a demonstrated interest in mathematics and/or scientific research. Students earn a Bachelor of Science degree with an honors option. This option is available in all majors offered by the College of Natural Sciences.

The key features of the program are a first-semester research methods course; a breadth requirement, usually completed during the first four semesters, that exposes students to various forms of scientific inquiry; and at least two semesters of supervised research and writing that culminate in an honors thesis.

Application to the Dean's Scholars Honors Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the program office and on the Dean's Scholars website (<http://cns.utexas.edu/ds>). Students may enter the program as freshmen or as college transfers prior to their fourth long semester of enrollment at the University.

Factors in the admission decision are the student's high school and/or University grades, class rank, the rigor of the courses the student has taken, the quality of the required application essays, a strong recommendation from a mathematics or science instructor, and the student's interest in mathematics and/or scientific research as demonstrated by extracurricular activities.

To remain in good standing in the Dean's Scholars Honors Program, students are expected to maintain a minimum grade point average of 3.50. Students who do not may be dismissed from the program by the faculty director.

## Health Science Scholars Program

Health Science Scholars is a four-year honors degree program for exceptional students who are interested in the health professions and committed to community service. Students earn a Bachelor of Science and Arts degree with an honors major. An honors option is available in all majors offered under this degree by the College of natural Sciences.

The key features of the program are a first-semester research methods course; a six-credit-hour requirement in honors-level coursework in one or more science; a substantive health or service-related learning experience or laboratory research, undertaken in the third year; and an honors thesis based on their third-year project, written in the final year.

Application to the Health Science Scholars Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available on the Health Science Scholars website (<http://cns.utexas.edu/honors/honors-programs-center/health-science-scholars>). Students may enter the program as freshmen or as college transfers prior to their fourth long semester of enrollment at the University.

Factors in the admission decision are the student's high school and/or college grades, class rank, the rigor of the courses the student has taken, the quality of the required application essays, a strong recommendation from a mathematics or science instructor, and the student's interest

in science, health and services as demonstrated by extracurricular activities.

To remain in good standing in the program, students are expected to maintain a minimum grade point average of 3.50. Students who do not may be dismissed from the program by the faculty director.

## Polymathic Scholars Program

Polymathic Scholars is a four-year honors degree program for exceptional science majors who have compelling interests or talents beyond the natural sciences and wish to make them part of their undergraduate degree. Students earn a Bachelor of Science and Arts degree with an honors major. An honors option is available in all majors offered under this degree by the College of Natural Sciences.

The key features of the program are a first-semester research methods course; a six-credit-hour requirement in honors-level coursework in one or more science; a multidisciplinary field of study outside the student's major, conceived and designed by the student and including no fewer than four courses; and an honors thesis on a question within that field, written in the final year.

Application to the Polymathic Scholars Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available on the Polymathic Scholars website (<https://cns.utexas.edu/honors/honors-programs-center/polymathic>). Students may enter the program as freshmen or as college transfers prior to their fourth long semester of enrollment at the University.

Factors in the admission decision are the student's high school and/or college grades, class rank, the rigor of the courses the student has taken, the quality of the required application essays, a strong recommendation from a mathematics or science instructor, and the student's investment in science as well as in one or more areas beyond science, as demonstrated by extracurricular activities.

To remain in good standing in the program, students are expected to maintain a minimum grade point average of 3.50. Students who do not may be dismissed from the program by the faculty director.

## Turing Scholars in Computer Science

The Department of Computer Science offers a comprehensive honors degree program for highly motivated and talented students. The key features of the program are an intensive, accelerated freshman- and sophomore-year program; special Turing Scholars sections of many advanced computer science courses; a second-semester freshman-year course that introduces students to the research activities of the department; and at least two semesters of supervised research and writing. Upon completion of both a sequence of Turing Scholars courses, approved by the program director, and an approved thesis, students graduate as Turing Scholars in Computer Science.

Students in the Turing Scholars program pursue the Bachelor of Science in Computer Science, option II. Application to the program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the Department of Computer Science and on the Turing Scholars website (<https://www.cs.utexas.edu/turing-scholars>). Students may enter the program either as freshmen or after they have enrolled at the University. Factors in the admission decision are the student's high school grades and class rank, the rigor of the courses the student has taken, the quality of the required application essays, and the student's interest and aptitude in math, science, and computing as demonstrated by extracurricular activities.

More information about the degree program is given in the Degrees and Programs (p. 666) section.

## Honors In Advanced Human Development and Family Sciences Program

The Department of Human Development and Family Sciences offers a comprehensive honors degree program for highly motivated and talented students. The key features of the program are a core of small, select Human Development and Family Sciences courses that expose students to the research activities of the department, and at least two semesters of supervised research and writing that culminates in an honors thesis and presentation of student research in an approved public forum. Application to the Human Development and Family Sciences Honors Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the Department of Human Development and Family Sciences and online (<https://he.utexas.edu/hdfs>). Students may enter the program as freshmen, as transfer students, or after they have enrolled at the University. Factors in the admission decision are the student's high school and/or University grades, class rank, the rigor of the courses the student has taken, faculty recommendations, standardized test scores and the student's interest and aptitude in math and science as demonstrated by relevant extracurricular activities.

More information about the degree program is given in the Degrees and Programs (p. 672) section.

## Honors In Advanced Nutritional Sciences Program

The Department of Nutritional Sciences offers a comprehensive honors degree program for highly motivated and talented students. The key features of the program are a core of select nutrition courses that expose students to the research activities of the department; and at least two semesters of supervised research and writing that culminates in an honors thesis and presentation of student research in an approved public forum. Application to the Honors in Advanced Nutritional Sciences Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the Department of Nutritional Sciences and online (<https://he.utexas.edu/hdfs/academics/graduate/how-to-apply>). Students may enter the program as freshmen, as transfer students, or after they have enrolled at the University. Factors in the admission decision are the student's high school and/or University grades, class rank, the rigor of the courses the student has taken, the quality of the required application essays, faculty recommendations, and the student's interest and aptitude in math and science as demonstrated by relevant extracurricular activities.

More information about the degree program is given in the Degrees and Programs (p. 678) section.

## College Honors

### Departmental Honors

Most departments in the College of Natural Sciences offer departmental honors programs to their majors. Minimum requirements for the completion of all such programs include (1) a University grade point average of at least 3.00; (2) a three-semester-hour thesis or research project, or a reasonable equivalent, with a grade of at least *B-*; some programs may require a higher grade; (3) completion, with a grade point average of at least 3.50, of the coursework required for a major in the field in which the student seeks honors; and (4) completion at the

University of at least 60 semester hours of coursework counted toward the degree.

The statement "Special Honors in (name of field)" appears on the transcript of each graduate certified as having completed the honors program.

## Astronomy Departmental Honors

Majors who plan to seek special departmental honors in astronomy should apply to the honors adviser for admission to the honors program no later than the beginning of the fourth year; application by the end of the third year is recommended. A University grade point average of at least 3.00 and a combined University grade point average in physics and astronomy of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) Astronomy 379H, *Honors Tutorial Course*, in which the student completes a supervised research project; the student may take a second semester of Astronomy 379H if necessary to complete the project; two semesters in this course may be counted toward the major requirement; (2) a written report and oral presentation on the research project approved by the research supervisor and the honors adviser; (3) a University grade point average of at least 3.00 and a combined University grade point average in physics and astronomy of at least 3.50; and (4) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Biochemistry Departmental Honors

Majors who plan to seek special departmental honors in biochemistry should apply to the departmental honors adviser for admission to the honors program no later than the beginning of the senior year. A University grade point average of at least 3.00 and a grade point average in biochemistry and chemistry of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Biochemistry; (2) two semesters of Biochemistry 379H, *Biochemistry Honors Tutorial Course*; (3) a thesis and a presentation based on research; the research topic and the thesis must be approved by the supervising faculty member and the departmental honors adviser; (4) a University grade point average of at least 3.00 and a grade point average in biochemistry and chemistry of at least 3.50; (5) completion at the University of at least 60 semester hours of coursework counted toward the degree; and (6) approval of the honors adviser.

## Biology Departmental Honors

Majors who plan to seek special departmental honors in biology should apply to the departmental honors adviser for admission to the honors program no later than the beginning of the senior year. A University grade point average of at least 3.00 and a grade point average in biology of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors, which are in addition to the requirements of the major, are (1) two semesters of Biology 379H, *Honors Tutorial Course*; (2) a thesis based on original research and approved by the supervising faculty member and the honors adviser; honors students in the human biology option must select both a thesis supervisor and a second reader, one of whom must be a tenure-track faculty member or senior lecturer in the School of Biological Sciences; (3) a University grade point average of at least 3.00 and a grade point average in biology of at least 3.50; and (4) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Chemistry Departmental Honors

Majors who plan to seek special departmental honors in chemistry should apply to the honors adviser for admission to the honors program no later than the beginning of the senior year. A University grade point average of at least 3.00 and a grade point average in chemistry of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Chemistry; (2) two semesters of Chemistry 379H, *Chemistry Honors Tutorial Course*; (3) a thesis and a presentation based on research; the research topic and the thesis must be approved by the supervising faculty member and the undergraduate faculty adviser; (4) a University grade point average of at least 3.00 and a grade point average in chemistry of at least 3.50; (5) completion at the University of at least 60 semester hours of coursework counted toward the degree; and (6) approval of the honors adviser.

## Computer Science Departmental Honors

Students seeking special departmental honors must meet with a faculty adviser at least two semesters before they plan to graduate to discuss potential research topics and the requirements for receiving special departmental honors.

The requirements for graduation with special departmental honors are (1) Computer Science 379H, *Computer Science Honors Thesis*, with a grade of at least B-; (2) a University grade point average of at least 3.00 and a grade point average in computer science of at least 3.50; (3) a thesis and presentation based on research and approved by three faculty members, including the honors adviser; and (4) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Human Development and Family Sciences Departmental Honors

Majors who plan to seek special departmental honors in human development and family sciences should apply to the Departmental Honors Committee for admission to the honors program no later than the beginning of the senior year. The requirements for admission are a University grade point average of at least 3.00 and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Human Development and Family Sciences; (2) Human Development and Family Sciences 379H, *Honors Tutorial Course*; (3) completion of an honors thesis and an accompanying presentation, both of which must be approved by a committee consisting of the research supervisor and another faculty member; (4) a University grade point average of at least 3.00, a grade point average in Human Development and Family Sciences 379H of at least 3.00, and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree and for honors; and (5) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Human Ecology Departmental Honors

Majors who plan to seek special departmental honors in human ecology must follow the requirements of the departmental honors program in human development and family sciences, nutrition, or textiles and apparel.

## Mathematics Departmental Honors

Majors who plan to seek special departmental honors in mathematics should apply to the honors adviser for admission to the honors program at least two semesters before their expected graduation. A University grade point average of at least 3.00 and a grade point average in mathematics of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) Mathematics 379H, *Honors Tutorial Course*; (2) a thesis on the subject of the student's research or project approved in comprehensive examination by a committee consisting of at least three faculty members; (3) a University grade point average of at least 3.00 and a grade point average in mathematics of at least 3.50; and (4) completion at the University of at least 60 semester hours of coursework counted toward the degree. In order to fulfill the first requirement, students must meet the prerequisite of Mathematics 379H—Mathematics 365C, 367K, 373K, or 374G with a grade of at least A-, and another of these courses with a grade of at least B-; and consent of the honors adviser.

## Neuroscience Departmental Honors

Majors who plan to seek special departmental honors in neuroscience should apply to the honors adviser for admission to the honors program no later than the beginning of their senior year. A University grade point average of at least 3.00 and a grade point average in neuroscience of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) two semesters of neuroscience research coursework, including Neuroscience 379H, *Honors Tutorial Course*; (2) a thesis based on original research and approved by the supervising faculty member and the honors adviser; (3) a University grade point average of at least 3.00 and a grade point average in neuroscience of at least 3.50; and (4) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Nutrition Departmental Honors

Majors who plan to seek special departmental honors in nutrition should apply to the Departmental Honors Committee for admission to the honors program no later than the beginning of the senior year. The requirements for admission are a University grade point average of at least 3.00 and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Nutrition; (2) Nutrition 379H, *Honors Tutorial Course*; this course may be repeated once for credit; (3) completion of an honors thesis and an accompanying presentation, both of which must be approved by a committee consisting of the research supervisor and another faculty member; (4) a University grade point average of at least 3.00, a grade point average in Nutrition 379H of at least 3.00, and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree and for honors; and (5) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Physics Departmental Honors

Majors who plan to seek special departmental honors in physics should apply to the honors adviser for admission to the honors program near the end of the third year. A University grade point average of at least 3.00 and a grade point average in physics of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) Physics 379H, *Honors Tutorial Course*; (2) a written honors thesis

approved by faculty readers assigned by the department; (3) a University grade point average of at least 3.00 and a grade point average in physics of at least 3.50; and (4) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Public Health Departmental Honors

Majors who plan to seek departmental honors in public health should apply to the honors adviser for admission to the honors program no later than the beginning of the senior year. Students are encouraged to apply as early as the beginning of the junior year. A University grade point average of at least 3.00 and a grade point average in public health of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of the Bachelor of Science in Public Health; (2) two semesters of Public Health 379H, *Honors Tutorial Course*; (3) a thesis and presentation based on research and approved by the research supervisor and the honors adviser; (4) a University grade point average of at least 3.00, a grade point average in public health of at least 3.50, and grades of at least a B in Public Health 379H; and (5) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Textiles and Apparel Departmental Honors

Majors who plan to seek special departmental honors in textiles and apparel should apply to the Departmental Honors Committee for admission to the honors program no later than the beginning of the senior year. The requirements for admission are a University grade point average of at least 3.00 and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Textiles and Apparel; (2) Textiles and Apparel 379H, *Honors Tutorial Course*; this course may be repeated once for credit; (3) completion of an honors thesis and an accompanying presentation, both of which must be approved by a committee consisting of the research supervisor and another faculty member; (4) a University grade point average of at least 3.00, a grade point average in Textiles and Apparel 379H of at least 3.00, and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree and for honors; and (5) completion at the University of at least 60 semester hours of coursework counted toward the degree.

## Graduation

### Special Requirements of the College

All students must fulfill the General Requirements (p. 20) for graduation. Students in the College of Natural Sciences must also fulfill the following requirements:

1. The University requires that the student complete in residence at least 60 semester hours of the coursework counted toward the degree. For the Bachelor of Arts, Plan I, and the Bachelor of Science and Arts, these 60 hours must include at least 18 hours in the major.
2. The University requires that at least six semester hours of advanced coursework in the major be completed in residence. Additional hours in the professional or major sequence in many cases are required by individual natural sciences degree programs.
3. A candidate for a degree must be registered in the College of Natural Sciences either in residence or in absentia the semester the degree is to be awarded. Graduation applications must be submitted no later than the date given in the academic calendar. The application and

supplemental in absentia instructions are available via the College of Natural Sciences website (<http://cns.utexas.edu/students/degrees-majors-advising/graduation>).

## Applying for Graduation

An electronic degree audit is created for each student each semester. The student should view the audit through IDA, the University's Interactive Degree Audit system. The degree audit tells the student the courses he or she must take and the requirements he or she must fulfill to receive the degree. The degree audit normally provides an accurate statement of requirements, but the student is responsible for knowing the requirements for the degree as stated in a catalog under which he or she is eligible to graduate and for registering so as to fulfill all these requirements. The student should speak with his or her assigned academic adviser before registering if in doubt about any requirement.

In the semester in which the degree is to be conferred, the candidate must be registered at the University and must file an online graduation application form via the graduation section of the College of Natural Sciences website (<http://cns.utexas.edu/students/degrees-majors-advising/graduation>). This should be done during the first week of classes, if possible, but in no event later than the deadline to apply for an undergraduate degree; this date is given in the official academic calendar. No degree will be conferred unless the graduation application form has been filed on time.

## Degrees and Programs

The College of Natural Sciences offers the following undergraduate degrees:

1. Bachelor of Science and Arts, with majors in astronomy, biochemistry, biology, chemistry, computer science, human development and family sciences, human ecology, nutrition, mathematics, neuroscience, and physics.
2. Bachelor of Science degrees in astronomy, biochemistry, biology, chemistry, computer science, environmental science, human development and family sciences, mathematics, medical laboratory science, neuroscience, nutrition, physics, public health, and textiles and apparel.
3. Bachelor of Arts, Plan I, with majors in astronomy, chemistry, computer science, mathematics, and physics.

The Bachelor of Science and Arts degree offers a cross-disciplinary experience for students who want to combine a strong core science experience with coursework in areas such as business, communications, fine arts, and the liberal arts. Students choose a major of up to 55 hours of science and mathematics. Students choose either a transcript-recognized minor outside of the sciences, 15 hours in a field of study outside of sciences, or an 18 to 24 hour transcript-recognized certificate. A full list of the minor and certificate programs offered at the University can be found in The University section (p. 13) of the *Undergraduate Catalog*.

The Bachelor of Science degrees provide deep exploration of science fields for students preparing for graduate science programs and careers as specialized scientists. The degrees contain between 80 to 90 hours of science and mathematics, and typically have multiple specialized options that reflect niche areas of study.

The Bachelor of Arts, Plan I, is shared with the College of Liberal Arts.

A student may not earn more than one Bachelor of Arts, Bachelor of Science and Arts, or Bachelor of Science in Environmental Science degree from the University. A student may earn only one undergraduate

degree in a particular field of study from the College of Natural Sciences. A student who holds a Bachelor of Arts or a Bachelor of Science and Arts degree from the University may earn a second major designation in another field of study that will appear on the University transcript.

The title of a graduate's degree appears on his or her diploma, but the major does not. The degree, the major, the transcript-recognized certificate, and the minor appear on the graduate's University transcript. A natural sciences student who wishes to add another major in the college must meet the criterion described in the Admission and Registration (p. 640) section.

## Applicability of Certain Courses

### Physical Activity Courses

Physical activity (PED) courses and Kinesiology 119 may not be counted toward a degree in the College of Natural Sciences. However, they are counted as courses for which the student is enrolled, and the grades are included in the grade point average.

### ROTC Courses

ROTC units are maintained on campus by the Departments of Air Force Science, Military Science, and Naval Science. Information about each program is available from the chair of the department.

Nine semester hours of designated University of Texas at Austin coursework in air force science, military science, or naval science may be counted toward any degree in the College of Natural Sciences.

### Courses Taken on the Pass/Fail Basis

No more than 16 semester hours taken on the pass/fail basis may be counted toward the Bachelor of Arts, Plan I. No more than six semester hours taken on the pass/fail basis may be counted toward the Bachelor of Science and Arts degree and the Bachelor of Science degrees. In general, only electives may be taken on the pass/fail basis. Complete rules on registration on the pass/fail basis are given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/changing-pass-fail-registration>).

### Courses in a Single Field

For the Bachelor of Arts, Plan I, no more than 39 hours may be counted in any one field of study, including the major, unless major requirements state otherwise. Additionally, for the Bachelor of Arts, Plan I, no more than 39 hours may be counted in any one college or school other than the College of Liberal Arts or the College of Natural Sciences.

### College Algebra

Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward a degree in the College of Natural Sciences.

## UTeach-Natural Sciences Teacher Certification

UTeach-Natural Sciences prepares students in the College of Natural Sciences, the Jackson School of Geosciences, and Cockrell School of Engineering for middle school or secondary teacher certification in Science, Technology, Engineering, and Mathematics (STEM). However, any students in any major at the University may seek STEM teacher certification through UTeach-Natural Sciences.

There are two ways students can seek STEM teacher certification through UTeach-Natural Sciences:

1. Students can complete the courses for certification as electives within a standard bachelor's degree program.
  - Students can obtain lists of the required content courses and additional certification requirements, which are available in the UTeach-Natural Sciences office and online (<https://austin.uteach.utexas.edu/certifications-and-degrees>).
2. Students can consider the teaching options in biology (p. 659), chemistry (p. 662), computer science (p. 665), geological sciences (p. 345), mathematics (p. 672), and physics (p. 679) degree programs.
  - This option is strongly encouraged because these majors incorporate not only the required coursework in the major but also the professional development courses, supporting courses, and courses in other sciences that are required for teacher certification.

The courses required for all teacher certifications include a minimum of 30 field-based experience hours prior to the clinical teaching experience. All students in these field experience courses, (UTS 101, 110, EDC 365D, and 365E), which are part of the Professional Development Sequence, are observed by and received feedback from clinical faculty and in-service educators throughout the semester. Students must pass the field experience in order to pass these courses. During clinical teaching (UTS 170, EDC 651S), supervision and feedback are provided by clinical faculty, field supervisors, and the cooperating teacher.

To graduate and be recommended for teacher certification at the middle school or secondary level in the State of Texas, the student must have a University grade point average of at least 2.50. The student must have earned a grade of at least C- in each of the professional development courses and supporting courses listed below and must pass the final teaching portfolio review. Information about the portfolio review and additional certification requirements is available from the UTeach-Natural Sciences academic adviser.

State of Texas teacher certification requirements are governed by the Texas Education Agency and are subject to change. Students must adhere to current teacher certification requirements, even if they differ from those listed in the University catalogs.

## Professional Development Sequence

All students seeking teacher certification must complete the following courses:

Requirements		Hours
UTS 101	Secondary Teacher Education Preparation: Step 1	1
UTS 110	Secondary Teacher Education Preparation: STEP 2	1
UTS 170	Student Teaching Seminar	1
EDC 651S	Secondary School Teaching Practicum	6
EDC 365C	Knowing and Learning in Math and Science	3
EDC 365D	Classroom Interactions	3
EDC 365E	Project-Based Instruction	3

Students seeking teacher certification for middle school must also complete the following courses. To be recommended for teacher certification, the student must earn a grade of at least C- in each course.

Requirements		Hours
EDC 339E	Secondary School Literacy across the Disciplines	3

PSY 301 & PSY 304	Introduction to Psychology and Introduction to Child Psychology	3-6
or EDP 350G	Adolescent Development	

## Supporting Courses

Requirements		Hours
One of the following:		
BIO 337	Selected Topics in Biology (Topic 2: Research Methods: UTeach)	3
CH 368	Advanced Topics in Chemistry (Topic 1: Research Methods: UTeach)	3
PHY 341	Selected Topics in Physics (Topic 7: Research Methods: UTeach)	3
One of the following:		
HIS 329U	Perspectives on Science and Mathematics	3
PHL 329U	Perspectives on Science and Mathematics	3

Interested students are encouraged to start the program at any time during their undergraduate careers. Students must be considering a teaching career in middle school or secondary science, computer science, mathematics, and/or engineering, and must meet grade point average requirements. Students who are interested in teaching earlier grades should consult the College of Education. See Preparation for Teacher Certification (p. 16) for additional information.

## Bachelor of Arts, Plan I

The requirements for the Bachelor of Arts under Plan I are designed to give each student flexibility in the selection of courses to meet individual needs.

A total of 120 semester hours is required. 36 hours must be in upper-division courses. At least 60 hours, including 21 hours of upper-division coursework, must be completed in residence at the University; at least 24 of the last 30 hours must be completed in residence at the University. Provided residence rules are met, credit may be earned by examination, by extension, by correspondence (up to 30 percent of the hours required for the degree), or, with the approval of the dean, by work transferred from another institution. Up to 16 semester hours of classroom and/or correspondence coursework may be taken on the pass/fail basis; this coursework may be counted only as electives.

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the Course Schedule (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in

the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

Courses in the major and additional coursework may also be used to fulfill prescribed work requirements unless expressly prohibited. A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills one requirement may also be used to fulfill a flag requirement. Courses that fulfill these flag requirements will be identified in the *Course Schedule* by the appropriate flags.

The student must fulfill both the University General Requirements (p. 20) for graduation and the Requirements of the College of Natural Sciences (p. 648). University graduation requirements include a grade point average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension) for which a grade or symbol other than *Q*, *W*, *X*, or *CR* is recorded; for the Bachelor of Arts, Plan I, the student must also earn a grade point average of at least 2.00 in courses taken at the University and counted toward the major requirement. The student should also refer to the description of his or her major in the section "Majors and Additional Coursework" below, since some majors include higher minimum scholastic requirements.

More information about grades and the grade point average is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

## Prescribed Work

1. *Writing*: Two courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag. One of these courses must be upper-division. Courses with a writing flag are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.
2. *Foreign language*: Proficiency in a language other than English is required. The foreign language requirement is the attainment of an intermediate level of competency as determined by the completion of any one of the following options:
  - a. Certified proficiency on a placement or credit-by-examination test;
  - b. A passing grade in a language course listed in the College of Liberal Arts section (p. 372);
  - c. Students who wish to meet the requirement with proficiency in a language not listed in the table found in the College of Liberal Arts section above should contact the Texas Language Center.
3. *Social science*: Three semester hours chosen from a list of approved courses, in addition to the course used to fulfill the social and behavioral sciences requirement of the core curriculum. The course(s) must be in a field of study taught in the College of Liberal Arts and must be in a different field of study from the course used to fulfill the social and behavioral sciences requirement of the core.

Courses on the approved list are primarily in anthropology, economics, geography, linguistics, psychology, and sociology, but not every course in these fields is approved. Courses that are approved to count toward any core curriculum area other than social and behavioral sciences may not be counted toward this requirement.

The list is available each semester in the Student Division and on the College of Liberal Arts website (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>).

4. *Mathematics*: Three semester hours in mathematics, excluding Mathematics 301, 316K, and 316L
5. *Natural science*: Six semester hours in natural sciences, in addition to the courses counted toward the science and technology requirements of the core curriculum. Courses used to fulfill this requirement must be chosen from the fields of study listed below; no more than three hours may be in either the history of science or the philosophy of science.

To satisfy the mathematics and science and technology requirements of the core curriculum and the natural science requirement of the Bachelor of Arts, Plan I, a student may count (1) no more than 12 hours in mathematics, computer science, and statistics and data sciences combined; and (2) no more than nine hours in any single field of study.

- a. Astronomy
  - b. Biology
  - c. Chemistry
  - d. Geological sciences
  - e. Marine science
  - f. Nutrition
  - g. Physical science
  - h. Physics
  - i. Mathematics (excluding Mathematics 301), computer science, statistics and data sciences
  - j. Other alternative science courses approved by the dean
  - k. Approved alternative courses in history of science and philosophy of science
6. *Cultural expression, human experience, and thought*: Three semester hours chosen from a list of approved courses. The course(s) must be in a field of study taught in the College of Liberal Arts. A course counted toward any requirement of the core curriculum may not also be counted toward this requirement.

A list of approved courses is available each semester in the Student Division and on the College of Liberal Arts website (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>).

## Electives

In addition to the core curriculum, prescribed work, and major and additional coursework, the student must complete enough elective coursework to provide the 120 semester hours required for the degree. These 120 hours may include no more than 12 semester hours of bible courses; nine hours of designated coursework in air force science, military science, or naval science; 16 hours completed on the pass/fail basis; 39 hours in any one field of study offered in the College of Liberal Arts or the College of Natural Sciences, unless major requirements state otherwise; and 39 hours in any other single college or school of the University.

## Majors and Additional Coursework

### Major Requirements

The Bachelor of Arts, Plan I, requires the completion of all requirements for one major.

The number of semester hours required in the major varies with the field selected. Unless the requirements of the major state otherwise, a major consists of at least 24 but no more than 39 semester hours, with at least 15 hours in upper-division courses. Of these 15 hours, six must be completed in residence. At least 18 hours of coursework in the major, including six hours of upper-division coursework, must be completed in residence at the University.

### Additional Coursework

Students in most majors must also fulfill the requirements of additional coursework. The requirements of the additional coursework are established by the major department and are given with the major requirements. Additional restrictions may be imposed by the academic department(s) in which the student takes the courses used to fulfill the requirements of the additional coursework; before planning to use a course to fulfill the additional coursework requirement, the student should consult the department that offers the course.

## Astronomy

### Major

The following coursework is required:

1. Physics 301 and 101L
2. Physics 316 and 116L (Prerequisites: Physics 301 and 101L)
3. Physics 315 and 115L (Prerequisites: Physics 316 and 116L)
4. Nine semester hours of upper-division coursework in astronomy, including at least two of the following courses: Astronomy 352K, 352L, 353, 358, 364P.
5. Six additional upper-division hours in astronomy and/or physics

### Additional Coursework

Completion of the following:

1. Six hours of coursework (other than astronomy, lower-division physics, lower-division mathematics, and Mathematics 427J or 427K) approved by the undergraduate adviser;
2. Six additional hours of upper-division physics, or six hours of upper-division coursework approved by the undergraduate adviser.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

All astronomy majors should consult the astronomy undergraduate adviser regularly about the choice of appropriate courses in both the major and the additional coursework. Qualified students are encouraged to carry out a supervised research project by taking a conference course, such as Astronomy 375 or 379H. No more than six of the hours counted toward the major requirement may be earned in conference courses.

## Chemistry

### Major

1. Chemistry 301 or 301H
2. Chemistry 302 or 302H

3. Chemistry 204 or 317
4. One of the following sequences:
  - a. Chemistry 220C, 320M, 320N; or
  - b. Chemistry 128K, 128L, 328M, and 328N
5. Chemistry 353
6. Chemistry 153K
7. Chemistry 354 or 354L
8. Chemistry 154K
9. Chemistry 456
10. Chemistry 376K

### Additional Coursework

1. Mathematics 408C and 408D, or Mathematics 408N, 408S, and 408M
2. Eight semester hours of physics chosen from one of the following sequences:
  - a. Physics 303K, 103M, 303L, and 103N
  - b. Physics 301, 101L, 316, and 116L
  - c. Physics 317K, 117M, 317L, and 117N
3. Completion of one of the following sequences:
  - a. Twelve semester hours of majors-level coursework in biology, mathematics, or physics. Mathematics in requirement 1 or physics in requirement 2 may count toward the 12 hour total
  - b. Computer Science 303E, 313E, and six hours chosen from Computer Science 323E, 324E, 326E, 327E, and 329E. Students choosing this option may simultaneously fulfill some of the requirements of the Elements of Computing Certificate
  - c. With written consent of the department chair and approval of the dean, 12 semester hours in a field of study outside the College of Natural Sciences

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

## Computer Science

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

### Major

The following courses in computer science:

1. *Theory*: Computer Science 311 or 311H\*, 331, or 331H\*, and three additional hours from an approved list available in the department;
2. *Programming*: Computer Science 312, 314 or 314H\*, and three additional hours from an approved list available in the department;
3. *Systems*: Computer Science 429 or 429H\*, 439 or 439H\*, and three additional hours from an approved list available in the department;
4. Twelve additional hours of upper-division courses in computer science.

Computer Science 370 may be counted toward the degree only once.

### Additional Coursework:

Completion of the following:

1. Mathematics 408C or 408N and 408S;
2. Mathematics 340L or Statistics and Data Sciences 329C. Mathematics 341 may substitute for 340L;
3. Statistics and Data Sciences 321. Mathematics 362K may substitute for Statistics and Data Sciences 321.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

Enrollment in Computer Science 311 or 311H\*, 312, and 314 or 314H\*, is restricted to computer science entry-level majors. All other computer science courses that may be counted toward a degree in computer science are restricted to students who have been admitted to the computer science major or have the consent of the undergraduate faculty adviser.

- \* Computer science courses with numbers ending in H are intended for students pursuing the Bachelor of Science in computer science, option II, the Turing Scholars program, and option III, computer science honors. Students outside these options may enroll in these courses only with the special consent of the honors director.

## Mathematics

Undergraduates seeking a Bachelor of Arts degree with a major in mathematics must choose either the standard option or the middle grades or secondary school teaching option.

### Major: Standard Option

At least 24 semester hours of upper-division coursework in mathematics. Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00.

The student must complete the following:

1. One of the following sequences:
  - a. Mathematics 408C\* and 408D
  - b. Mathematics 408N and 408S
  - c. Mathematics 408K and 408L

\*Mathematics 408N and 408S, or 408K and 408L, may substitute for 408C;
2. Mathematics 340L or 341;
3. One course chosen from: Mathematics 325K or 328K, 343K, or 373K;
4. Mathematics 361K or 365C;
5. Mathematics 362K;
6. To broaden the student's training, at least one course chosen from the following: Mathematics 333L, 339J, 339U, 343L, 343M, 344K, 348, 358K, 361, 367K, 368K, 372K, 374M, 376C, 378K;
7. Nine additional hours of upper-division mathematics.

### Major: Options in Mathematics for Middle Grades and Secondary School Teaching:

At least 24 semester hours of upper-division coursework in mathematics. Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

The teaching options are designed to give students the mathematical background appropriate for teaching middle grades and secondary school mathematics, but students must meet additional requirements,

including grade point average requirements, to obtain certification. Lists of the combined requirements of the UTeach-Natural Sciences certification programs and these options are available from the UTeach-Natural Sciences academic adviser and in the *Undergraduate Catalog*.

All students must complete the following:

1. One of the following sequences:
  - a. Mathematics 408C\* and 408D
  - b. Mathematics 408N and 408S
  - c. Mathematics 408K and 408L

\*Mathematics 408N and 408S, or 408K and 408L, may substitute for 408C
2. Mathematics 340L or 341
3. Mathematics 315C, 333L, 358K, 362K, and either 325K or 328K
4. Mathematics 375D
5. Mathematics 361K or 365C
6. Mathematics 343K or 373K

Students pursuing teacher certification through the UTeach-Natural Sciences program must also complete the following:

7. Biology 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 2: *Research Methods—UTeach*), or Physics 341 (Topic 7: *Research Methods—UTeach*);
8. History 329U or Philosophy 329U;
9. 18 semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 651S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
  - e. UTeach-Natural Sciences 101, 110, and 170;
10. For students seeking middle grades certification, the following courses: Educational Psychology 350G, or Psychology 301 and 304; and Curriculum and Instruction 339E

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 8 and in each of the professional development courses listed in requirement 9 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 10. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

## Physics

### Major

Physics 301, 101L, 316, 116L, 315, 115L, 355, and at least 15 semester hours of upper-division coursework in physics, including Physics 336K, 352K, and 353L

### Additional Coursework

Completion of the following:

1. Chemistry 301 or 301H, 302 or 302H, and 204
2. One of the following courses containing differential equations: Mathematics 427K, 427J, and 372

3. Nine additional hours of mathematics, including three upper-division hours
4. Six hours of majors-level coursework, including three upper-division hours in one of the following: biology, chemistry, philosophy, psychology; or in courses offered in the College of Education or the Cockrell School of Engineering; courses used to fulfill specific degree requirements other than flag requirements may not also be used to fulfill this requirement.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00.

## Bachelor of Science and Arts

The requirements for the bachelor of science and arts degree are designed to give each student an opportunity to combine a core mathematics or science experience with an interdisciplinary curriculum which complements his or her major. Students pursuing the Bachelor of Science and Arts will major in a discipline within the College of Natural Sciences and complete one of the following: a transcript-recognized minor, transcript-recognized certificate, or 15 hours in a single field of study. This will allow the student to explore applications of his or her major in the broader society, allow the student to see the impacts of the sciences in other fields of study, and develop a complementary expertise, which supports multidisciplinary study.

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 23). The prescribed work requirements for the Bachelor of Science and Arts consist of the University's Core Curriculum, college flag requirements, language, arts, and culture requirement, major requirements, additional requirement, and electives.

In the process of fulfilling the core curriculum and other degree requirements, all students must complete courses with content in the following areas:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the Course Schedule (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

Students may earn an honors major in their fields of study upon graduation by completing the following requirements:

1. Good standing in the Health Science Scholars Program or the Polymathic Scholars Program;
2. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser;
3. Six hours of coursework in the major must be at the honors-level;

4. Natural Sciences 371;
5. A University grade point average of at least 3.50.

## Prescribed Work Common to All Majors

1. Language, Arts, and Culture Requirement:  
Twelve hours selected from at least two of the following four areas:
  - a. *Fine arts*: courses chosen from design, ensemble, fine arts, music, studio art, performance, visual art studies, art history, and theatre and dance
  - b. *Humanities*: courses chosen from American studies, ancient history and classical civilization, classical civilization, comparative literature, creative writing, English, humanities, philosophy, religious studies, and rhetoric and writing
  - c. *Social and behavioral sciences*: courses chosen from anthropology, economics, geography, government, history, linguistics, psychology, and sociology
  - d. *Foreign language and culture*: foreign language courses or culture courses chosen from an approved list available in the college advising centers. Students who elect to pursue a foreign language must complete a beginning level competency. Students who complete intermediate or advanced level foreign language courses rather than courses equivalent to beginning level competency may count only one intermediate or advanced course toward the language, arts, and culture requirement

A maximum of six semester hours earned through credit by examination may count toward the language arts and culture requirement.

2. Major Requirements: The specific courses required for the major vary with the major selected and are described in the links to the right. Unless the requirements of the major state otherwise, a major consists of at least 36 but no more than 55 semester hours. The major consists of the mathematics, primary science, and secondary science requirements.
3. Additional Requirement: The Bachelor of Science and Arts requires the completion of one of the following: transcript-recognized minor, transcript-recognized certificate, or 15 hours in a single field of study. Students who complete a transcript-recognized minor or 15 hours in a single field of study must select a minor or field of study that is outside the College of Natural Sciences, College of Pharmacy, Cockrell School of Engineering, Jackson School of Geosciences, and School of Nursing.
4. Electives: Enough additional coursework to make a total of 120 semester hours.

### Special Requirements

1. Students may not use a course counting toward one area of prescribed work to fulfill the requirements of another area of prescribed work unless expressly permitted as follows:
  - a. Courses counting toward the university core curriculum may also count toward the major requirements, the additional requirement, and electives.
  - b. Courses counting toward the university core curriculum writing flag may also count toward the language, arts, and culture requirement.
  - c. Courses counting toward the college flag requirements may also count toward the university core curriculum, language, arts, and culture requirement, major requirements, additional requirement, and electives.
  - d. Per university policy, a minimum of nine hours of the transcript-recognized minor may not be also used to satisfy the major.

- e. Per university policy, a minimum of one course taken in a transcript-recognized certificate to satisfy the additional requirement may not also count toward the major.
- 2. Students who seek a transcript-recognized minor or transcript-recognized certificate must meet the minimum grade requirements and grade point average requirements of the program.
- 3. Students must earn a University grade point average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension), a grade of at least C- in each mathematics and science course counted toward the major, and a grade point average of at least 2.00 in the courses fulfilling the major.
- 4. Students must complete a minimum of 60 hours in residence at the University, including at least 18 hours of the major. The 18 hours of the major in residence must include at least nine hours of advanced coursework.

## Astronomy

### Major

1. Mathematics:
  - a. Mathematics 408C and 408D
  - b. Mathematics 427K or 427J
2. Primary science:
  - a. Physics 301, 101L, 315, 115L, 316, and 116L
  - b. Two courses chosen from the following: Astronomy 352K, 353, and 358
  - c. Six additional upper-division semester hours in astronomy and physics
3. Secondary science:  
 Twelve additional semester hours of majors-level coursework from one or more of the following areas. It is recommended that students select three of the 12 hours to also fulfill the Natural Science and Technology Part II core curriculum requirement
  - a. Biology
  - b. Chemistry
  - c. Computer Science
  - d. Geological Sciences
  - e. Mathematics
  - f. Statistics and Data Sciences

## Biochemistry

### Major

1. Mathematics:
  - a. Mathematics 408C, 408R, or 408N and 408S
  - b. Statistics and Data Sciences 328M
2. Primary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204
  - b. Chemistry 320M, and 353M or 455
  - c. Biochemistry 339F and 369L
  - d. Two courses chosen from the following: Biochemistry 339J, 339M, 339N, and 370
3. Secondary science:
  - a. Biology 311C, 311D and 325, or Biology 315H and 325H
  - b. Biology 344
  - c. One of the following physics sequences:

- i. Physics 317K, 117M, 317L, and 117N (recommended)
- ii. Physics 301, 101L, 316, and 116L
- iii. Physics 303K, 103M, 303L, and 103N

## Biology

### Major

1. Mathematics:
  - a. Mathematics 408C, 408R, or 408N and 408S. Students who intend to take additional calculus coursework should begin the sequence with 408C or 408N
  - b. Statistics and Data Sciences 328M
2. Primary science:
  - a. Biology 206L, 208L, or 226L; 311C, 311D, and 325, or 315H and 325H
  - b. One of the following: Biology 320 or 344
  - c. Biology 370
  - d. Complete one course from each of the following:
    - i. Cellular, developmental, and molecular biology: Biochemistry 369 or 339F, 339M, 339J, 364F; Biology 320, 326R, 330, 335, 336, 339, 339M, 344, 360K, 349, 350M, 360M, 361
    - ii. Genetics, genomics, and computational biology: Biochemistry 339N; Biology 321G, 325T, 327E, 327G, 354C, 336, 366R, 471; Statistics and Data Sciences 348
    - iii. Physiology, neuroscience, and behavior: Biology 328, 438L, 359K, 359R, 361T, 365S, 367C, 374, Marine Science 355C
    - iv. Ecology, evolution, and biodiversity: Biology 322, 324, 346, 351, 357, 364, 373, 375; Marine Science 320, 352C, 352D, 352E, 353, 354, 354C, 354E, 354Q, 356, 357
  - e. Complete one laboratory course from the following list: Biology 320L, 122L, 124L, 226L, 129L, 325L, 230L, 331L, 328D, 340L, 446L, 448L, 349L, 353F, 453L, 354L, 455L, 456L, 260L, 361L, 463L, 165U, 369F, 369L, 371L, 373L, 174L, 478L
3. Secondary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204
  - b. Complete one of the following:
    - i. Physics 302K and 102M (recommended)
    - ii. Physics 317K and 117M
    - iii. Physics 303K and 103M
    - iv. Physics 301 and 101L

## Chemistry

### Major

1. Mathematics:
  - a. Mathematics 408C and 408D, or 408N and 408S
2. Primary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204 or 317
  - b. Chemistry 320M, 320N and 220C, or 328M, 328N, 128K and 128L
  - c. Chemistry 353 or 353M, and 153K
  - d. Chemistry 431; 455 or 456; and Biochemistry 369
3. Secondary science: One of the following physics sequences:
  - a. Physics 301, 101L, 316, and 116L
  - b. Physics 303K, 103M, 303L, and 103N
  - c. Physics 317K, 117M, 317L, and 117N

# Computer Science

## Major

1. Mathematics:
  - a. Mathematics 408C or 408N and 408S
  - b. Mathematics 340L or Statistics and Data Sciences 329C. Mathematics 341 may substitute for 340L.
  - c. Statistics and Data Sciences 321. Mathematics 362K may substitute for this requirement.
2. Primary science:
  - a. Theory: Computer Science 311 or 311H, and 331 or 331H
  - b. Programming: Computer Science 312 and 314 or 314H
  - c. Systems: Computer Science 429 or 429H, and 439 or 439H
  - d. Twelve additional semester hours of approved upper-division computer science
3. Secondary science:
  - a. Six semester hours of majors-level coursework chosen from a single field of study: biology, chemistry, or physics. It is recommended that students select courses that will also fulfill the Natural Science and Technology Part I core curriculum requirement.

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

# Human Development and Family Sciences

## Major

1. Mathematics:
  - a. Statistics and Data Sciences 302
  - b. Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332
2. Primary science:
  - a. Human Development and Family Sciences 304, 313, 113L, 315L, and 340
  - b. Nine semester hours of upper-division human development and family sciences
  - c. Six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R is restricted to students whose practicum applications have been approved. Students who want to participate in an early childhood field experience/field practicum (Human Development and Family Sciences 352L or 652P) must also complete Human Development and Family Sciences 338 and 466 with grades of at least C-. Practicum applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
3. Secondary science:
  - a. Chemistry 301 or 301H
  - b. Biology 311C

- c. One of the following courses: Biology 311D, Chemistry 302, or 302H

Psychology 304, 333D, and 339 may not count toward the Bachelor of Science and Arts, with a major in Human Development and Family Sciences.

# Human Ecology

## Major

1. Mathematics:
  - a. Statistics and Data Sciences 302
  - b. Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332
2. Primary science: School of Human Ecology coursework, including:
  - a. Public Health 317
  - b. One of the following: Human Development and Family Sciences 304, 304H, 313 and 113L, or 313H and 113L
  - c. Nutrition 306, 312, or 312H
  - d. Textiles and Apparel 303 or 205 and 105L
  - e. Fifteen semester hours of upper-division chosen from Human Development and Family Sciences, Human Ecology, Nutrition, Public Health, and Textiles and Apparel
3. Secondary science:
  - a. Chemistry 301 or 301H
  - b. Biology 311C
  - c. One of the following: Biology 311D, Chemistry 302, or 302H

# Mathematics

## Major

1. Mathematics:
  - a. Mathematics 408C and 408D
2. Primary science:
  - a. Mathematics 341
  - b. Mathematics 328K, 343K, or 373K
  - c. Mathematics 362K
  - d. Mathematics 361K or 365C
  - e. Twelve additional semester hours of approved upper-division mathematics
3. Secondary science:
  - a. Six semester hours of majors-level coursework chosen from a single field of study: astronomy, biology, chemistry, geological sciences, marine science, or physics. It is recommended that students select courses that will also fulfill the Natural Science and Technology Part I core curriculum requirement.
  - b. Three semester hours of majors-level coursework chosen from a different field of study: astronomy, biology, chemistry, computer science, geological sciences, marine science, or physics. It is recommended that students select a course that will also fulfill the Natural Science and Technology Part II core curriculum requirement.

# Neuroscience

## Major

1. Mathematics:
  - a. Mathematics 408C, or 408N and 408S
  - b. Statistics and Data Sciences 328M

2. Primary science:
  - a. Biology 206L and one of the following sequences:
    - i. Biology 311C, 311D, 325
    - ii. Biology 315H and 325H
  - b. Neuroscience 330
  - c. Neuroscience 335
  - d. Twelve additional semester hours of neuroscience, chosen from: Biology 359K, 367C, Neuroscience 337, 365D, 365L, 365T, 365W, 366C, 366D, 366E, 366L, 366N, 366P, 366S, 367F, 367V, 367W, 466G, 466M, and 371M. Biology 377 may count with prior approval of the faculty adviser.
3. Secondary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204
  - b. One of the following physics sequences:
    - i. Physics 317K, 117M, 317L, 117N
    - ii. Physics 303K, 103M, 303L, 103N
    - iii. Physics 301, 101L, 316, 116L

## Nutrition

### Major

1. Mathematics:
  - a. Statistics and Data Sciences 302, 304, 306, 325H, or 328M
  - b. Mathematics 408C or 408N or Statistics and Data Sciences 332
2. Primary science:
  - a. One of the following sequences:
    - i. Nutrition 312 and 112L, 315, 326, and 126L
    - ii. Nutrition 312H, 312R, and 315
  - b. One of the following sequences:
    - i. Nutrition 307 and 107L
    - ii. Nutrition 218 and 118L
  - c. Twelve additional semester hours of nutrition, including nine semester hours of upper-division coursework.
3. Secondary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204
  - b. Chemistry 320M
  - c. Biology 311C

## Physics

### Major

1. Mathematics:
  - a. Mathematics 408C, 408D, 427K or 427J, and 427L
2. Primary science:
  - a. Physics 301, 101L, 315, 115L, 316, and 116L
  - b. Physics 336K, 352K, 355, 369, and 373
  - c. One course chosen from the following: Mathematics 340L; and Physics 329, 333, 345, 353L, 362K, 362L, 474, 375S, 375R, or 375P
3. Secondary science:
  - a. Three semester hours of majors-level coursework chosen from: astronomy, biology, chemistry, computer science, and geological sciences. It is recommended that students select a course that will also fulfill the Natural Science and Technology Part II core curriculum requirement.

## Bachelor of Science in Astronomy

Astronomy tells us about the place of humankind in the universe: how Earth was created, how the Sun was formed, how galaxies form and evolve. It tells us where the universe is going and where it came from. Astronomers address these questions at a fundamental level. Their goal is to determine the basic and controlling properties of the universe and to transmit that knowledge to society. The Bachelor of Science in Astronomy is designed to give students an understanding of the universe and to prepare them to participate in the advancement of this exciting search.

Two Options are available: Astronomy and Astronomy Honors. Students who plan to follow Option II, Astronomy Honors, must be admitted to the Dean's Scholars Honors Program (p. 645).

### Prescribed Work Common to all Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skill and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. One of the following foreign language/culture choices: (Students in Option II are exempt from this requirement)
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area chosen from an approved list available in the dean's office and the college advising centers
4. At least 36 semester hours of upper-division coursework
5. At least 21 hours of upper-division coursework, including at least 12 semester hours in physics and astronomy, must be completed in residence at the University

### Additional Prescribed Work for Each Option

#### Option I: Astronomy

6. Six semester hours in biology, chemistry, computer science, and/or geological sciences; Chemistry 301 or 301H and the courses in the Elements of Computing Certificate Program may be counted toward this requirement; any other course to be counted must meet major requirements in the department that offers it.
7. Mathematics 408C and 408D, or the equivalent; and 427J or 427K, 427L, and 340L
8. Physics 301, 101L, 315, 115L, 316, 116L, 336K, 352K, 353L, 355, 362K, 369, and 373

9. Astronomy 352K, 353, 358, and three additional hours of upper-division astronomy. Astronomy 364P, 376C, or 376R are recommended
10. Nine additional semester hours of upper-division coursework in physics and/or astronomy
11. Enough additional coursework to make a total of 123 semester hours

## Option II: Astronomy Honors

6. Breadth requirement: An honors mathematics course, Chemistry 301H, and nine additional hours of coursework chosen from honors courses in the college; credit earned by examination may not be counted toward this requirement.
7. Physics 301, 101L, 315, 115L, 316, and 116L
8. Twelve semester hours of upper-division coursework in astronomy approved by the departmental honors adviser
9. Eighteen semester hours of upper-division coursework in physics approved by the departmental honors adviser
10. Three additional semester hours of upper-division coursework in astronomy or physics
11. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
12. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
13. Astronomy 379H and either a three-semester-hour upper-division research course approved by the departmental honors adviser or a second section of Astronomy 379H
14. Sixteen additional hours of coursework approved by the departmental honors adviser
15. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
16. Enough additional coursework to make a total of 120 semester hours

## Special Requirements

Students in both Options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under Option II, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>). More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu>.

## Bachelor of Science in Biochemistry

The degree of Bachelor of Science in Biochemistry is intended to prepare students for professional careers as chemists, either upon graduation or after graduate study in chemistry or related fields. In addition, it may serve as the basis for work in many areas outside pure chemistry, such as materials science, medicine and other health-related fields, pharmacology, patent law, business, and environmental science. The

Honors Option is intended to prepare students for academic or research careers.

Students who plan to follow Option III, Biochemistry Honors, must be admitted to the Dean's Scholars Honors Program (p. 645).

## Prescribed Work Common to all Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. At least 36 semester hours of upper-division coursework
4. At least 21 semester hours of upper-division coursework, including at least 12 semester hours of upper-division coursework in chemistry, must be completed in residence at the University

## Additional Prescribed Work for Each Option

### Option I: Biochemistry

5. Mathematics 408C and 408D, or 408N, 408S, and 408M
6. Biostatistics: Statistics and Data Sciences 328M
7. One of the following sequences:
  - a. Physics 317K, 117M, 317L, and 117N (recommended);
  - b. Physics 303K, 103M, 303L, and 103N; or
  - c. Physics 301, 101L, 316, and 116L
8. The following chemistry courses:
  - a. General chemistry: Chemistry 301 or 301H, 302 or 302H, and 204 or 317
  - b. Organic chemistry: Chemistry 320M
  - c. Biochemistry: Biochemistry 339F and 369L, and two additional courses chosen from Biochemistry 339J, 339M, and 370
  - d. Physical chemistry: Chemistry 353 or 353M
  - e. Analytical chemistry: Chemistry 455
9. One of the following sequences:
  - a. Biology 311C, 311D, and 325; or
  - b. Biology 315H and 325H
10. Biology 344
11. Completion of one of the following:
  - a. Eighteen additional semester hours of upper-division biochemistry, biology, chemistry, and neuroscience; or
  - b. A transcript-recognized certificate or a transcript-recognized minor
12. Enough additional coursework to make a total of 120 semester hours

## Option III: Biochemistry Honors

- Breadth requirement: An honors mathematics course, Biology 315H and 325H, Chemistry 301H and 302H, and three additional semester hours of coursework chosen from honors courses in the college. Credit earned by examination may not be counted toward this requirement.
- The following chemistry courses:
  - General chemistry: Chemistry 204 or 317
  - Organic chemistry: Chemistry 128K, 128L, 328M, and 328N; or 220C, 320M, and 320N
  - Biochemistry: Biochemistry 339F and 369L, and two additional courses chosen from Biochemistry 339J, 339M, 339N, and 370
  - Physical chemistry: Chemistry 353 or 353M
  - Analytical chemistry: Chemistry 455
- Biology 344
- A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
- A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
- Chemistry 379H or Biochemistry 379H and either a three-semester-hour upper-division research course approved by the departmental honors adviser or a second section of Chemistry 379H or Biochemistry 379H
- Twenty-four additional semester hours of coursework approved by the departmental honors adviser.
- Six semester hours of coursework from in the College of Liberal Arts and/or the College of Fine Arts.
- Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students in all Options must fulfill both the University's (p. 20) General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>) *Catalog*.

To graduate under Option III, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu>.

## Order and Choice of Work

The student must consult the undergraduate adviser each semester regarding order and choice of work.

## Bachelor of Science in Biology

The Bachelor of Science in Biology degree program offers 11 Options. The Options have certain prescribed work in common, and each Option has additional requirements. Many fields in the study of biological systems require broadly based training that transcends the classical boundaries of biology. In planning a program of work to meet his or her degree requirements, a student interested in specializing in these

interdisciplinary areas should choose courses both in biology and in sciences that complement biology.

Students who plan to follow Option IX, Biology Honors, must be admitted to the Dean's Scholars Honors Program (p. 645).

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

- Core curriculum
- Skills and experience flags:
  - Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - Quantitative reasoning: one flagged course
  - Global cultures: one flagged course
  - Cultural diversity in the United States: one flagged course
  - Ethics: one flagged course
  - Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

- Courses common to all Bachelor of Science in Biology degree Options except for Option IX.
  - Mathematics 408C, 408R, or 408N and 408S. Students who intend to take additional calculus coursework should begin the sequence with 408C or 408N
  - Statistics and Data Sciences 328M
  - Chemistry 301 or 301H, 302 or 302H, and 204
  - One of the following sequences:
    - Physics 317K, 117M, 317L, and 117N (recommended)
    - Physics 301, 101L, 316, and 116L
    - Physics 303K, 103M, 303L, and 103N
    - Physics 302K, 102M, 302L, and 102N

Option VIII Teaching majors may substitute Science 365 and Physics 108 for Physics 316 and 116L, 317L and 117N, 303L and 103N, or 302L and 102N; Physics 108 is offered on the pass/fail basis.

- Biology, including:
  - Biology 311C, 311D, and 325, or 315H and 325H.
  - Biology 206L, 208L, or 226L. This requirement must be completed prior to progressing to additional laboratory requirement in the degree options. Students pursuing Option III, Marine and Freshwater Science, and Option IV, Microbiology and Infectious Diseases, must complete Biology 226L. Students pursuing Option VIII, Teaching, must complete either Biology 206L or 208L.
  - Biology 370

4. All students must complete at least 36 semester hours of upper-division coursework; at least 21 semester hours of upper-division coursework in biology must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Ecology, Evolution, and Behavior

5. One course or pair of courses in each of the following areas:
  - a. Ecology: Biology 357, 373, or Marine Science 320 and 120L
  - b. Behavior and comparative physiology: Biology 322 and 122L, 359K, or 361T
  - c. Taxon-based course: Biology 321L, 324 and 124L, 327 and 127L, 340L, 448L, 351, 352, 353F, 453L, 354L, 455L, 463L, 369F, 369L, Marine Science 352D, 354, 354C, 354E
6. Three additional courses or pair of courses chosen from coursework in 5a through 5c and from Biology 438L, 471G, 456L, 359R, 364, 373L, 374 and 174L, 375, 478L, Marine Science 352C, and 354Q
7. One course in cellular, developmental, genetics, microbiology, or molecular biology: Biology 320, 320L, 325L, 325T, 326R, 328, 331L, 344, 349, 349L, 350M, 366R
8. One laboratory course or pair of courses containing a substantial field component: Biology 321L, 340L, 353F, 453L, 354L, 455L, 456L, 369L, 373L, Marine Science 320 and 120L, 352C, 352D, 354, 354C, 354E. A laboratory course or pair of courses may also count toward requirements 5 through 7
9. One additional laboratory course: Biology 320L, 321L, 124L, 127L, 325L, 331L, 438L, 340L, 448L, 349L, 353F, 453L, 354L, 455L, 456L, 369L, 373L, 174L, 478L, Marine Science 120L, 352C, 352D, 354, 354C, 354E, 354Q. One-hour laboratory courses may require credit for or registration in a complementary lecture course. A laboratory course may also count toward requirements 5 through 7. A course counted toward requirement 8 may not also count toward requirement 9.
10. One course chosen from the following: Chemistry 320M, Computer Science 303E or 313E, Geological Sciences 401 or 303, Statistics and Data Sciences 332 or 348
11. Enough additional coursework to make a total of 120 semester hours

### Option II: Human Biology

5. Chemistry 320M, 320N, 220C
6. Biochemistry 369 or 339F
7. Biology 346
8. Three hours from genetics, genomics, and computational biology: Biochemistry 339N, Biology 321G, 325T, 327E, 327G, 354C, 366, 366R, 471, Statistics and Data Sciences 348
9. Six hours from cellular, developmental, and molecular biology: Biochemistry 339J, 339M, 364F, Biology 320, 326R, 330, 335, 336, 339, 339M, 344, 360K, 349, 350M, 360M, 361
10. Three hours from ecology, environment, and health: Biology 326R, 327D, 329, 330, 361, 364, Nutrition 306 or 312
11. Four hours from physiology and anatomy: Biology 446L, 365S and 165U, 478L
12. One additional laboratory course from: Biology 320L, 122L, 124L, 128L, 129L, 325L, 328D, 230L, 331L, 340L, 446L, 448L, 349L, 353F, 453L, 354L, 455L, 456L, 260L, 361L, 463L, 165U, 369F, 369L, 371L, 373L, 174L, 478L, Marine Science 120L, 152L. One-hour laboratory courses may require credit for or registration in a complementary lecture course.
13. Enough additional coursework to make a total of 120 semester hours

### Option III: Marine and Freshwater Science

5. Chemistry 320M

6. Biology 326R and 373
7. Marine Science 101, 310, 320, and 120L
8. Eighteen hours of coursework including 12 hours in Marine Science, chosen from: Biology 320, 321L, 328, 344, 354L, 357, 361T, 364, 366, 375, Geological Sciences 341G, Marine Science 440, 348 (Topic 1: *Training Cruise(s)*), 352, 352C, 352D, 352E, 152L, 152S, 252S, 152T, 252T, 353, 354, 354C, 354E, 354J, 354Q, 354T, 354U, 355C, 356, 357, 367K, 170, 270, 370. Six hours in Marine Science must be completed at the Marine Science Institute in Port Aransas, Texas.
9. Enough additional coursework to make a total of 120 semester hours

### Option IV: Microbiology and Infectious Diseases

5. Biochemistry 369 or 339F, and Chemistry 320M
6. Biology 326R, 330, 339, 339M, 360K, 361, 366
7. Two upper-division biology laboratory courses chosen from: Biology 230L, 260L, and 361L. Biology 377, 377-FRI, 379H may be used for one of the laboratory courses if approved in advance by the microbiology faculty adviser.
8. Fifteen additional hours in upper-division biochemistry, biology, and chemistry
9. Enough additional coursework to make a total of 120 semester hours

### Option V: Cell and Molecular Biology

5. Biochemistry 369 or 339F, and Chemistry 320M
6. Biology 320, 326R, 349, and 344 or 350M
7. Two laboratory courses chosen from: Biology 320L, 325L, 331L, 349L
8. One additional upper-division laboratory course in biology. Biology 377, 377-FRI, 379H may be used if approved in advance by the cell and molecular biology faculty adviser.
9. Eighteen additional hours in upper-division biochemistry, biology, and chemistry
10. Enough additional coursework to make a total of 120 semester hours

### Option VII: Plant Biology

5. Biology 328, 373, and 322 and 122L, 324 and 124L, or 463L
6. Two additional upper-division laboratory courses; Biology 377, 377-FRI, 379H may be used for one of the laboratory courses if approved in advance by the plant biology faculty adviser.
7. One of the following sequences:
  - a. Plant molecular biology: Biochemistry 369 or 339F, Biology 320 and 350M, and Chemistry 320M
  - b. Plant environmental biology: Biology 357, 374, and 375
8. Eighteen additional hours in upper-division biochemistry, biology, chemistry, and marine science
9. Enough additional coursework to make a total of 120 semester hours

### Option VIII: Teaching

This Option is designed to fulfill the course requirements for certification as a middle grades or secondary school science teacher in Texas; the student chooses either composite science certification with biology as the primary teaching field or life science certification. However, completion of the course requirements does not guarantee the student's certification. Information about additional certification requirements is available from the UTeach-Natural Sciences academic adviser.

5. Chemistry 320M, 320N, and 220C or 320M and Biochemistry 369
6. Biology courses:
  - a. Biology 320, 226L, 326R, and either 324 and 124L, 322 and 122L, or 328 and 128L

- b. At least three semester hours chosen from the following courses in physiology, neurobiology, and behavior: Biology 438L, 359K, 359R, 361T, 365S, 367C
  - c. At least three semester hours chosen from: Biology 340L, 448L, 453L, 455L, 456L, 463L, 364, 369L, 373, Marine Science 352D, 354, 354C
7. One of the following research methods courses: Biology 328D, 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*), Physics 341 (Topic 7: *Research Methods: UTeach*)
  8. History 329U or Philosophy 329U
  9. One of the following:
    - a. For composite science certification: Biochemistry 369 (to be counted as upper-division biology hours) and six semester hours of coursework in geological sciences. Courses intended for nonscience majors may not be counted toward this requirement. The remaining composite certification content requirements are met by the chemistry, physics, and science courses used to fulfill requirements 3c, 3d, 3ei, and 5.
    - b. For life science certification: Biology 373, and three additional semester hours of biology chosen from the courses listed in requirement 6b and 6c
  10. 18 semester hours of professional development coursework consisting of:
    - a. Curriculum and Instruction 651S
    - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
    - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
    - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
    - e. UTeach-Natural Sciences 101, 110, and 170
  11. Students seeking middle grades certification must complete the following courses: Educational Psychology 350G, or Psychology 301 and 304; and Curriculum and Instruction 339E
  12. Enough additional coursework to make a total of 126 semester hours

### Option IX: Biology Honors

5. Breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; and an additional three-hour honors-designated course from a department in College of Natural Sciences. Credit earned by examination may not be counted toward this requirement.
6. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N; or
  - c. Physics 303K, 103M, 303L, and 103N
7. Biology 206L or 208L and Chemistry 204
8. Complete 24 hours chosen from any of the following courses:
  - a. Biology 370
  - b. Cellular, developmental, and molecular biology: Biochemistry 369 or 339F, 339J, 339M, 364F, Biology 320, 326R, 330, 335, 336, 339, 339M, 344, 360K, 349, 350M, 360M, 361
  - c. Genetics and genomics: Biochemistry 339N, Biology 321G, 325T, 327E, 327G, 354C, 366, 366R, 471, Statistics and Data Sciences 348
  - d. Physiology, neuroscience, and behavior: Biology 328, 438L, 359K, 359R, 361T, 367C, 365S, 374, Marine Science 355C
  - e. Ecology, evolution, and biodiversity: Biology 322, 324, 346, 351, 357, 364, 471G, 373, 375, Marine Science 320, 352C, 352D, 352E, 353, 354, 354C, 354E, 354Q, 356, 357

9. Three upper-division laboratory courses in biology; Biology 377 or 379H may be used as only one of the three required upper-division laboratory courses. Courses used to fulfill this requirement may also be counted toward requirement 8.
10. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
11. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
12. Two semesters of Biology 379H
13. Fifteen additional semester hours of coursework approved by the departmental honors adviser
14. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
15. Enough additional coursework to make a total of 120 semester hours

### Option X: Computational Biology

5. Statistics and Data Sciences 329C or Mathematics 340L or 341; Mathematics 362K or Statistics and Data Sciences 321; and Statistics and Data Sciences 348
6. Two courses from: Computer Science 303E, 313E, 323E, 323H, 324E, 326E, 327E, 329E, Mathematics 408D, 358K, 378K, Statistics and Data Sciences 322, 323, 329D, 332, 335, 352, 353, 358, 374C, 374D, 374E.
7. Two courses from genetics, genomics, and computational biology: Biochemistry 339N, Biology 321G, 325T, 327E, 327G, 354C, 366, 366R, 471
8. Six hours chosen from any of the following courses:
  - a. Cellular, development, and molecular biology: Biochemistry 369 or 339F, 339J, 339M, 364F, Biology 320, 326R, 330, 335, 336, 339, 339M, 344, 360K, 349, 350M, 360M, 361
  - b. Physiology, neuroscience, and behavior: Biology 328, 438L, 359K, 359R, 361T, 367C, 365S, 374, Marine Science 355C
  - c. Ecology, evolution, and biodiversity: Biology 322, 324, 346, 351, 357, 364, 471G, 373, 375, Marine Science 320, 352C, 352D, 352E, 353, 354, 354C, 354E, 354Q, 356, 357
9. One additional laboratory course chosen from: Biology 320L, 122L, 124L, 128L, 129L, 325L, 328D, 230L, 331L, 340L, 446L, 448L, 349L, 353F, 453L, 354L, 455L, 456L, 260L, 361L, 463L, 165U, 369F, 369L, 371L, 373L, 174L, 478L, Marine Science 120L, 152L
10. Nine hours of additional upper-division biochemistry, biology, chemistry, marine science, mathematics, physics, and statistics and data sciences
11. Enough additional coursework to make a total of 120 semester hours

### Option XI: Biology

5. Two courses from cellular, developmental, and molecular biology: Biochemistry 369 or 339F, 339J, 339M, 364F, Biology 320, 326R, 330, 335, 336, 339, 339M, 344, 360K, 349, 350M, 360M, 361
6. Two courses from genetics, genomics, and computational biology: Biochemistry 339N, Biology 321G, 325T, 327E, 327G, 354C, 366, 366R, 471, Statistics and Data Sciences 348
7. Two courses from physiology, neurobiology, and behavior: Biology 328, 438L, 359K, 359R, 361T, 367C, 365S, 374, Marine Science 355C
8. Two courses from ecology, evolution, and biodiversity: Biology 322, 324, 346, 351, 357, 364, 471G, 373, 375, Marine Science 320, 352C, 352D, 352E, 353, 354, 354C, 354E, 354Q, 356, 357
9. Two additional laboratory courses: Biology 320L, 122L, 124L, 128L, 129L, 325L, 328D, 230L, 331L, 340L, 446L, 448L, 349L, 353F, 453L, 354L, 455L, 456L, 260L, 361L, 463L, 165U, 369F, 369L, 371L, 373L, 174L, 478L, Marine Science 120L, 152L. One-hour laboratory courses

may be required credit for or registration in a complementary lecture course.

10. Twelve additional hours in upper-division biochemistry, biology, chemistry, marine science, mathematics, statistics and data sciences, and physics
11. Enough additional coursework to make a total of 120 semester hours.

### Option XII: Genetics and Genomics

5. Biochemistry 369 or 339F
6. Biology 320, 325T, 349, 344, and 325L
7. Chemistry 320M
8. Three hours from: Biochemistry 339N, Biology 321G, Statistics and Data Sciences 348
9. Six hours from: Biology 326R, 327E, 327G, 354C, 366, 366R
10. Biology 320L or 349L
11. Nine additional hours in upper-division biochemistry, biology, chemistry, mathematics, and statistics and data sciences
12. Enough additional coursework to make a total of 120 semester hours

### Special Requirements

Students in all Options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate and be recommended for certification, students who follow the teaching Option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 8, and in each of the professional development courses listed in requirement 10 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 11. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

To graduate under Option IX, students must remain in good standing in the Dean's Scholars Honors Program (<http://cns.utexas.edu/honors/honors-programs-center/deans-scholars>), must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

### Order and Choice of Work

Students begin the Bachelor of Science in Biology degree program with six hours of introductory biology for science majors (Biology 311C and 311D), as well as Chemistry 301 or 301H and 302 or 302H and Mathematics 408C, 408N, or 408R. Students should consult with academic advisers about specific concentrations within biology, about appropriate courses in mathematics and physical sciences, and about course load and the balance between laboratory and nonlaboratory work. Most students select an Option by the end of the second year and take at

least 21 hours of upper-division coursework in the major in the third and fourth years.

## Bachelor of Science in Chemistry

Four degree plans lead to the Bachelor of Science in Chemistry. Option I, Chemistry, is intended to prepare students for professional careers as chemists, either upon graduation or after graduate study in chemistry or related fields. Option II, Computation, is intended to prepare students for the workplace by giving them opportunities to develop hands-on computation skills. Option III, Teaching, is intended to prepare students to enter the teaching profession. Option IV, Chemistry Honors, is intended to prepare students for academic or research careers. Students who plan to follow Option IV must be admitted to the Dean's Scholars Honors Program (p. 645).

The four degree plans may also serve as the basis for work in many areas outside pure chemistry, such as materials science, medicine and other health-related fields, pharmacology, patent law, business, computation, or environmental science. After general chemistry courses, depending on his or her background, the student makes an intensive core study of some of the major areas of chemistry—organic, physical, inorganic, and analytical chemistry. The chemistry coursework in these degree plans culminates in approximately three semesters of advanced work, allowing each student to study more broadly by taking courses in some areas of chemistry not covered in the core courses, such as macromolecular chemistry, biochemistry, or other areas of physical chemistry, or more deeply by taking advanced special topics courses in areas of special interest and by undertaking research projects. Throughout the curricula, emphasis is placed on laboratory experience—synthesis, separations and analysis, structure identification and determination, measurement of rates of reactions, determinations of energy changes accompanying reactions. Supporting work in mathematics and physics is an integral part of the degree programs. Compared to the program leading to the bachelor of arts degree, the Bachelor of Science in Chemistry degree programs are more thorough and demanding and potentially more rewarding to the student planning a career in chemistry.

### Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flag from the same course. Students are encouraged to discuss options with their academic advisers.

3. Options I and II: One of the following foreign language/culture choices: (Students in Options III and IV are exempt from this requirement.)

- a. Beginning level proficiency coursework, or the equivalent, in a foreign language
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area. The courses must be chosen from an approved list available in the dean's office and the college advising centers.
4. The following courses:
    - a. General chemistry: Chemistry 301 or 301H, 302 or 302H, and 317
    - b. Organic chemistry: Chemistry 128K, 128L, 328M, and 328N; or 220C, 320M, and 320N
    - c. Biochemistry: Biochemistry 339F or 369
    - d. Physical chemistry: Chemistry 353 or 353M, 153K, 154K, and either 354 or 354L
    - e. Inorganic chemistry: Chemistry 431
    - f. Analytical chemistry: Chemistry 456 and 376K
  5. Thirty-six semester hours of upper-division coursework.
  6. At least 21 semester hours of upper-division coursework, including at least 12 semester hours of upper-division coursework in chemistry, must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Chemistry

7. Mathematics 408C and 408D, or 408N, 408S, and 408M; and at least three semester hours of upper-division coursework in mathematics or computer science
8. One of the following sequences:
  - a. Physics 301, 101L, 316, and 116L
  - b. Physics 303K, 103M, 303L, and 103N or
  - c. Physics 317K, 117M, 317L, and 117N
9. Six semester hours chosen from the following courses: Biochemistry 339J, 364C, 364D, 364E, 364F, 369L\*, 370, Chemistry 341\*, 354, 354L, 354S, 367C, 367L, 368, 369K\*, 371K\*, 372C\*, 375K, and 475K. At least three of these six hours must be in a laboratory course; courses marked with an asterisk (\*) may be used to fulfill this laboratory requirement. Chemistry 341 and 368 may be repeated for credit toward this requirement when the topics vary. No more than three semester hours in Chemistry 369K may be counted toward this requirement; three additional hours may be counted as electives. No more than three semester hours in Chemistry 371K may be counted toward this requirement; three additional hours may be counted as electives. No more than three hours in Chemistry 372C may be counted toward this requirement; three additional hours may be counted as electives.
10. Nine additional semester hours of coursework in the College of Natural Sciences (excluding chemistry), the Cockrell School of Engineering, and the Jackson School of Geosciences. Any course designed for science or engineering majors may be counted. With the exception of courses in the Elements of Computing Certificate Program, a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it. No more than six hours of laboratory or field research from the Jackson School or any department in the College of Natural Sciences or the Cockrell School may be counted.
11. Enough additional coursework to make a total of 127 semester hours

### Option II: Computation

Students who complete Option II may simultaneously fulfill some of the requirements of the Scientific Computation and Data Sciences Certificate (p. 692).

7. Mathematics 408C and 408D, or 408N, 408S, and 408M; and Statistics and Data Sciences 329C or Mathematics 340L or 341
8. One of the following sequences:
  - a. Physics 301, 101L, 316, and 116L
  - b. Physics 303K, 103M, 303L, and 103N or
  - c. Physics 317K, 117M, 317L, and 117N
9. Chemistry 354M
10. At least three semester hours chosen from the following laboratory courses: Biochemistry 369T, Chemistry 341, 369K, and 371K
11. Statistics and Data Sciences 322 and three of the following courses; the student must complete coursework from at least two of the following areas.
  - a. Numerical methods: Chemical Engineering 348, Computer Science 323E, 323H, 367, Mathematics 348, Statistics and Data Sciences 335
  - b. Statistical methods: Biomedical Engineering 335, Mathematics 358K, 378K
  - c. Other computing topics: Computer Science 324E, 327E, 329E (approved topics), 377, Mathematics 346, 362M, 368K, 372K, 376C, Mechanical Engineering 367S, Statistics and Data Sciences 329D, 374C, 374D, 374E
12. Enough additional coursework to make a total of 127 semester hours

### Option III: Teaching

This Option is designed to fulfill the course requirements for certification as a middle grade or secondary school science teacher in Texas; the student chooses one of the following areas: composite science certification with chemistry as the primary teaching field; physical sciences certification; or physical science, mathematics, and engineering certification. However, completion of the course requirements does not guarantee the student's certification. Information about additional teacher certification requirements is available from the UTeach-Natural Sciences academic adviser.

7. Mathematics 408C and 408D, or 408N, 408S, and 408M
8. History 329U or Philosophy 329U
9. One of the following sequences:
  - a. For students seeking composite science certification: Physics 301, 101L, 316, and 116L; or Physics 303K, 103M, 303L, and 103N; or Physics 317K, 117M, 317L, and 117N. Science 365 and Physics 108 (Topic: *Physics by Inquiry*) may substitute for Physics 316 and 116L, 317L and 117N, or 303L and 103N. Physics 108 is offered on the pass/fail basis.
  - b. For students seeking either physical sciences certification or, mathematics, physical science, and engineering certification: Physics 301, 101L, 316, 116L, 315, and 115L; or 303K, 103M, 303L, 103N, 315, and 115L
10. The requirements of one of the following certification areas:

- a. For composite science certification:
    - i. Biology 311C and 311D
    - ii. Six hours of coursework in geological sciences; courses intended for non-science majors may not be counted toward this requirement
    - iii. Enough additional approved coursework in biology, geological sciences, or physics to provide the required 12 hours in a second field
    - iv. Chemistry 368 (Topic 1: *Research Methods: UTeach*) or, with the consent of the UTeach-Natural Sciences academic adviser, an upper-division chemistry course that includes a substantial research component
    - v. In place of requirements 4c through 4f of the prescribed work above, the following courses, for a total of at least 34 semester hours of chemistry: Biochemistry 339F or 369; Chemistry 353; and 455 or 456
  - b. For physical sciences certification:
    - i. Mathematics 427J or 427K and 427L
    - ii. Chemistry 153K, 354L, and 154K
    - iii. Chemistry 354 and three hours of upper-division coursework in physics
    - iv. Chemistry 368 (Topic 1: *Research Methods: UTeach*) or, with the consent of the UTeach-Natural Sciences academic adviser, an upper-division chemistry course that includes a substantial research component
    - v. In place of requirements 4c through 4f of the prescribed work above, the following courses, for a total of at least 34 semester hours of chemistry: Biochemistry 339F or 369; Chemistry 353, and 455 or 456
  - c. For mathematics, physical science, and engineering certification:
    - i. Mathematics 315C, 360M or 375D (Topic: *Discovery: Introduction to Advanced Study in Mathematics*), 427J or 427K, and 333L
    - ii. Chemical Engineering 379 (Topic: *Fundamentals of Engineering and Design*), 379 (Topic: *Engineering Energy Systems*), and Mechanical Engineering 379M (Topic: *Design of Machines and Systems*)
    - iii. Engineering Studies 301; and Mechanical Engineering 377K upon approval of the project by the UTeach Program
    - iv. In place of requirements 4c through 4f of the prescribed work above, the following courses, for a total of at least 30 semester hours in chemistry: Chemistry 353 and 153K, 455, and Biochemistry 369
11. 18 semester hours of professional development coursework consisting of:
    - a. Curriculum and Instruction 651S
    - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
    - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
    - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
    - e. UTeach-Natural Sciences 101, 110, and 170
  12. Students seeking middle grades certification must complete the following courses: Educational Psychology 350G or Psychology 301 and 304; and Curriculum and Instruction 339E
  13. Enough additional coursework, if needed, to make a total of 126 semester hours
- College of Natural Sciences. Credit earned by examination may not be counted toward this requirement
8. Chemistry 317
  9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
  10. A section of Rhetoric and Writing 309S that is restricted to Dean's Scholars
  11. Chemistry 379H and a three-semester-hour upper-division research course approved by the departmental honors adviser, or six hours of Chemistry 379H
  12. Twenty-two additional hours of coursework approved by the departmental honors adviser
  13. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
  14. Enough additional coursework to make a total of 120 semester hours

## Special Requirements

Students in all Options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>) *Catalog*.

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 7, and each of the professional development courses listed in requirement 10 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 11. For information about the portfolio review and additional teacher certification requirements, consult the UTeach-Natural Sciences academic adviser.

To graduate under Option IV, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu>

## Order and Choice of Work

Students are strongly recommended to take the chemistry/biochemistry—major sections of the following courses: Chemistry 301 or 301H (if taken), 302 or 302H, 128K, 128L, 328M, and 328N. Students planning a graduate program are strongly recommended to take Physics 301, 101L, 316, 116L, 315, and 115L

Students in Option II should consult the undergraduate adviser each semester regarding order and choice of work; those in Option III should consult the UTeach-Natural Sciences academic adviser.

## Option IV: Chemistry Honors

7. Breadth requirement: An honors mathematics course, Chemistry 301H and 302H, Physics 301, 101L, 316, and 116L, and an additional three-hour honors-designated course from a department in the

The following order of work is recommended as a typical minimum program for Option I. It assumes that the student has high school credit in trigonometry, college algebra, and the first semester of general chemistry; is able to earn credit by examination for Chemistry 301; and is able to score well enough on the ALEKS placement examination to take Mathematics 408C or 408N in the first semester of the freshman year. Many students meet some of the following course requirements by credit by examination.

**First year:** Chemistry 302 or 302H, and 317; Mathematics 408C and 408D, or 408N, 408S, and 408M; Physics 301 and 101L, or 303K and 103M, or 317K and 117M (to be taken after Mathematics 408C or 408N); Rhetoric and Writing 306; six semester hours to fulfill core curriculum requirements.

**Second year:** Chemistry 128K, 128L, 328M, and 328N, or 220C, 320M, and 320N; any coursework needed to meet a core curriculum requirement; three semester hours to be counted toward requirement 4 of the prescribed work; English 316L, 316M, 316N, or 316P; Physics 316 and 116L, or 303L and 103N, or 317L and 117N; an upper-division mathematics course (such as Mathematics 427J or 427K) or an upper-division computer science course.

**Third year:** Biochemistry 339F or 369, Chemistry 353, 153K, 354L, 456; six semester hours of American and Texas government; six semester hours of American history; three semester hours of electives; a three-semester-hour course to fulfill a core curriculum requirement; three semester hours to be counted toward requirement 4 of the prescribed work.

**Fourth year:** Chemistry 431, 154K, 376K, and courses to fulfill requirement 3 of the prescribed work. The student must also take enough additional coursework to fulfill requirements 4, 5, 9, and 10 of the prescribed work. It is recommended that the majority of the elective courses taken to fulfill requirements 4 and 9 be chosen from upper-division courses in biology, chemistry, chemical engineering, mathematics, and physics.

## Bachelor of Science in Computer Science

The Bachelor of Science in Computer Science degree program provides a strong technical background for students planning to begin careers upon graduation and for those interested in graduate study in computer science. This program allows students to take more coursework in computer science and related technical areas than does the bachelor of arts degree program.

In addition to the three Options leading to the Bachelor of Science in Computer Science, students may apply to Option IV, the Integrated Program, which leads to simultaneous completion of the Bachelor of Science in Computer Science and the Master of Science in Computer Science, the Master of Science in Information Studies, or the Master of Science in Computational Science, Engineering, and Mathematics. The requirements for the Bachelor of Science in Computer Science, Option IV, are given below. The requirements for the Master of Science in Computer Science, the Master of Science in Information Studies, and the Master of Science in Computational Science, Engineering, and Mathematics are described in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/natural-sciences/computer-science/degree-requirements>).

Students who would like to pursue any of the following Options must first be admitted to the degree program. The admission processes for Options I, II, and IV are described in The Major in Computer Science

(p. 641); the admission process for Option III is described in the section Dean's Scholars Honors Program (p. 645).

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. Options I, II, and IV: One of the following foreign language/culture choices: (Students in Option III and V are exempt from this requirement)
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area. The courses must be chosen from an approved list available in the dean's office and the college advising centers
4. At least 42 semester hours of upper-division coursework.
5. At least 21 semester hours of upper-division coursework in computer science must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Computer Science

6. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C; and Mathematics 362K or Statistics and Data Sciences 321
7. One of the following sequences of coursework:
  - a. Either Biology 311C and 311D, or Biology 315H and 325H
  - b. Chemistry 301 or 301H, and 302 or 302H
  - c. Physics 303K and 103M, 301 and 101L, or 317K and 117M; and 303L and 103N, 316 and 116L, or 317L and 117N
8. Three additional hours of majors-level coursework chosen from:
  - a. a different sequence listed in requirement 7
  - b. geological sciences
  - c. upper-division mathematics, excluding Mathematics 325K, 340L, 341, and 362K
9. The following courses in computer science:
  - a. Theory: Computer Science 311 or 311H, 331 or 331H, and three additional hours from an approved list available in the department
  - b. Programming: Computer Science 312, 314 or 314H, and three additional hours from an approved list in the department

- c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department
  - d. Fifteen additional hours of upper-division courses in computer science
10. Enough additional coursework to make a total of 120 semester hours.

### Option II: Turing Scholars Honors

- 6. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C; and Mathematics 362K or Statistics and Data Sciences 321
- 7. One of the following sequences of coursework:
  - a. Either Biology 311C and 311D, or 315H and 325H
  - b. Chemistry 301 or 301H, and 302 or 302H
  - c. Physics 303K and 103M, 301 and 101L, or 317K and 117M; and 303L and 103N, 316 and 116L, or 317L and 117N.
- 8. Three additional hours of majors-level coursework chosen from:
  - a. a different sequence listed in requirement 7
  - b. geological sciences
  - c. upper-division mathematics, excluding Mathematics 325K, 340L, 341, and 362K
- 9. The following courses in computer science:
  - a. Theory: Computer Science 311 or 311H, 331 or 331H, and three additional hours from an approved list available in the department
  - b. Programming: Computer Science 314 or 314H, and three additional hours from an approved list available in the department
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department
  - d. Computer Science 178H and 379H
  - e. Twelve additional hours of upper-division courses in computer science

The courses the student chooses to fulfill requirements a through c must be approved by the Turing Scholars (<https://www.cs.utexas.edu/turing-scholars>) program director. In addition to Computer Science 429H, 178H and 379H, at least five upper-division courses chosen to fulfill requirements a through e must be honors courses. The honors thesis the student completes in Computer Science 379H must be approved by the program director.

10. Enough additional coursework to make a total of 120 semester hours

### Option III: Computer Science Honors

- 6. Breadth requirement: An honors mathematics course; Computer Science 311H and 314H; one of the following two-semester sequences: Biology 315H and 325H, Chemistry 301H and 302H, Physics 301, 101L, 316, and 116L; and either an additional three hours chosen from these courses or Physics 315 and 115L. Credit earned by examination may not be counted toward this requirement.
- 7. At least six semester hours of upper-division coursework in mathematics
- 8. Computer Science 429H, 331H, 439H, and 12 additional hours of upper-division coursework in computer science
- 9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser

- 10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
- 11. Computer Science 379H and a three-semester-hour upper-division research course approved by the departmental honors adviser
- 12. Twenty-five additional semester hours of coursework approved by the departmental honors adviser
- 13. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
- 14. Enough additional coursework to make a total of 120 semester hours

### Option IV: Integrated Program

- 6. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C; and Mathematics 362K or Statistics and Data Sciences 321
- 7. One of the following sequences of coursework:
  - a. Either Biology 311C and 311D, or Biology 315H and 325H
  - b. Chemistry 301 or 301H, and 302 or 302H
  - c. Physics 303K and 103M, 301 and 101L, or 317K and 117M; and 303L and 103N, 316 and 116L, or 317L and 117N
- 8. Three additional hours of majors-level coursework chosen from:
  - a. a different sequence listed in requirement 7
  - b. geological sciences
  - c. upper-division mathematics, excluding Mathematics 325K, 340L, 341, and 362K
- 9. The following courses in computer science:
  - a. Theory: Computer Science 311 or 311H, 331, or 331H, and three additional hours from an approved list available in the department
  - b. Programming: Computer Science 312, 314 or 314H, and three additional hours from an approved list available in the department
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department
  - d. Nine additional hours of upper-division courses in computer science

10. Enough additional coursework to make a total of 120 semester hours

### Option V: Teaching (Senior grades)

- 6. History 329U or Philosophy 329U
- 7. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C
- 8. One of the following sequences of coursework:
  - a. Biology 311C and 311D
  - b. Chemistry 301 or 301H, and 302 or 302H

- c. Physics 303K and 103M, 301 and 101L, or 317K and 117M; and 303L and 103N, 316 and 116L, or 317L and 117N
9. The following courses in computer science:
- a. Theory: Computer Science 311 or 311H, 331 or 331H, and three additional hours from an approved list available in the department
  - b. Programming: Computer Science 312, 314 or 314H, and three additional hours from an approved list available in the department
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department
10. The requirements of one of the following certification areas:
- a. For computer science certification:
    - i. Mathematics 362K or Statistics and Data Sciences 321
    - ii. An additional sequence chosen from the following:
      - 1. Biology 325 and 337 (Topic 2: *Research Methods: UTeach*)
      - 2. At least three hours of upper-division coursework in chemistry approved by the undergraduate adviser; and Chemistry 368 (Topic 1: *Research Methods: UTeach*)
      - 3. Physics 315 and 341 (Topic 7: *Research Methods: UTeach*)
    - iii. Fifteen additional hours of approved computer science upper-division coursework
  - b. For computer science and mathematics certification:
    - i. Mathematics 315C, 333L, 362K, either 360M or 375D, and Statistics and Data Sciences 321
    - ii. Twelve additional hours of approved computer science upper-division coursework.
    - iii. Biology 337 (Topic 2: *Research Methods: UTeach*), or Chemistry 368 (Topic 1: *Research Methods: UTeach*), or Physics 341 (Topic 7: *Research Methods: UTeach*)
11. Eighteen semester hours of professional development coursework consisting of:
- a. Curriculum and Instruction 651S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
  - e. UTeach-Natural Sciences 101, 110, and 170
12. Enough additional coursework to make a total of 127 semester hours

## Special Requirements

Students in all Options must fulfill both the University's general requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about

grades and the grade point average is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate and be recommended for certification students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 6, and in each of the professional development courses listed in requirement 11 and must pass the final teaching portfolio review. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

Enrollment in Computer Science 312, 311 or 311H, and 314 or 314H is restricted to computer science entry-level majors. All other computer science courses that may be counted toward a degree in computer science are restricted to students who have been admitted to the computer science major or have the consent of the undergraduate faculty adviser.

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

## Additional Requirements for Option II

Students in Option II, the Turing Scholars program (<https://www.cs.utexas.edu/turing-scholars>), must maintain a University grade point average of at least 3.30 and a grade point average in computer science of at least 3.30; in rare circumstances, this grade point average requirement will be waived for students whose honors thesis has been judged by the Department of Computer Science Undergraduate Thesis Committee to be truly outstanding. In addition to this grade point average requirement, students in Option II must know and abide by the academic and disciplinary policies given in this catalog and in the *General Information Catalog* (<http://catalog.utexas.edu/general-information>). Those who fail to do so will be considered for academic dismissal from the Turing Scholars program. Under special circumstances and at the discretion of the director, a student will be allowed to continue in the program under academic review. A student who is academically dismissed from the program may enter another computer science program if he or she fulfills the scholastic standards for continuance in the University given in *General Information*. Students in scholastic difficulty should discuss their problems with a Turing Scholars program academic adviser and the director.

## Additional Requirements for Option III

To graduate under Option III, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

## Additional Requirements for Option IV Satisfactory Progress

Students are expected to make continuous progress toward the degree by completing required computer science coursework each semester. Those who fail to take program coursework two long-session semesters in a row will be removed from the program and re-enrolled in the Bachelor of Science in Computer Science Option (I, II, or III) that they were following before admission to the Integrated Program (Option IV).

Students will be notified before this action is taken; they must meet with their academic adviser upon being notified.

## Probation

The student is placed on probation if his or her grade point average in required undergraduate computer science courses falls below 3.00. Except with the consent of the undergraduate adviser or the graduate adviser, a student on probation may not take graduate computer science courses.

## Dismissal

The student is dismissed from the Integrated Program if (1) he or she fails to improve his or her academic performance significantly while on probation, or (2) he or she will not achieve a grade point average of 3.00 even by earning grades of A in all remaining required undergraduate computer science and graduate courses.

Like all students, those in the Integrated Program must know and abide by the academic and disciplinary policies given in this catalog and in the *General Information Catalog* (<http://catalog.utexas.edu/general-information>). Those who fail to do so will be considered for academic dismissal from the program. Under special circumstances and at the discretion of the director, a student may be allowed to continue in the program under academic review. A student who is academically dismissed from the program may enter another computer science program if he or she fulfills the scholastic standards for continuance in the University given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information>). Students in scholastic difficulty should discuss their problems with an academic adviser and the undergraduate faculty adviser.

## Graduation

To receive the Bachelor of Science in Computer Science and Master of Science in Computer Science, Master of Science in Information Studies, or Master of Science in Computational Science, Engineering, and Mathematics degrees through the Integrated Program, a student must have a University grade point average of at least 3.00 in the coursework in the Master of Science Program of Work. He or she must also have a grade point average in graduate computer science and information studies, or computational science, engineering, and mathematics coursework of at least 3.00.

## Order and Choice of Work

The student must consult the faculty adviser each semester regarding order and choice of work.

Note: Computer science courses with numbers ending in *H* are intended for students in Option II, the Turing Scholars program, and Option III, computer science honors. Students outside these Options may enroll in these courses only with the special consent of the honors director.

# Bachelor of Science in Environmental Science

The Bachelor of Science in Environmental Science degree program is designed for students interested in an interdisciplinary scientific perspective on environmental and sustainability issues, analysis, and management. The degree program provides the broad foundation in physical, life, and social sciences needed for a career or graduate study in environmental science and related fields such as climate change, ecology, and conservation. Students who complete the program successfully will be able to assess environmental issues critically from multiple perspectives; to perform field, laboratory, and computer analyses; and to conduct original research. The program is designed

to prepare graduates for careers in local, state, and federal government laboratories and nonprofit agencies, environmental consulting firms, environmental education and outreach agencies, and universities and other research settings. The degree is offered by the College of Natural Sciences with a focus on biological sciences, by the College of Liberal Arts with a focus on geographical sciences, and by the Jackson School of Geosciences with a focus on geological sciences. The degree programs share common prescribed work, but each degree has its own specific requirements. Students may earn only one Bachelor of Science in Environmental Science degree from the University.

The Bachelor of Science in Environmental Science curriculum consists of 126 semester hours of coursework. All students must complete the University's Core Curriculum (p. 23). The specific degree requirements consist of prescribed work, major requirements, and electives. In some cases, a course that is required for the degree may also be counted toward the core curriculum.

A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills another requirement may also be used to fulfill a flag requirement, unless otherwise specified.

In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the following Skills and Experience flags:

1. Writing: three flagged courses beyond Rhetoric and Writing 306 or its equivalent; students in the College of Natural Sciences and the Jackson School of Geosciences must complete only two flagged writing courses. For students in the College of Natural Sciences, at least one writing flag must be from an upper-division course.
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course
5. Ethics: one flagged course
6. Independent inquiry: one flagged course

## Prescribed Work Common to All Environmental Science Majors

1. Mathematics: Mathematics 408C, or 408N and 408S, or 408K and 408L.
2. Chemistry: Chemistry 301 or 301H; 302 or 302H; and 204.
3. Physics: Physics 317K and 117M, or another four-hour calculus-based physics sequence.
4. Biological Sciences: Biology 311C and 311D, or 315H.
5. Ecology:
  - a. Biology 373 or Marine Science 320. Marine Science 320 may not be used to satisfy both requirement 5a and requirement 10c.
  - b. Biology 373L or Marine Science 120L. Environmental science majors in the College of Natural Sciences must choose Biology 373L.
6. Geological Sciences: Geological Sciences 401 or 303, 346C, and an approved geological sciences course in sustainability.
7. Geography: Geography 335N.
8. Field experience and research methods: Environmental Science 311 and 121.

9. Senior field/research experience: one of the following pairs:
  - a. Environmental Science 271 and 371 or Environmental Science 171 and 471.
  - b. Environmental Science 172C and 472D or Environmental Science 272C and 372D.
  - c. Environmental Science 271 or Marine Science 348, and one of the following: Chemistry 320M, Geography 460G, 368C, 462K, Geological Sciences 327G, Mathematics 408D or 408M. Note: Geography 460G, 462K, and Geological Sciences 327G may not be used to satisfy both requirement 9c and 10b. Biology 277 may substitute for Environmental Science 271 with prior approval of the faculty adviser.
10. Environmental and sustainability themes: one course in each of the following thematic areas:
  - a. Environmental and sustainability policy, ethics, and history: Geography 334, 336C, 339K, 340D, 342C, 344K, 356C, Journalism 346F, Marine Science 367K, and Philosophy 325C. Biology 337, Geography 356, 356T, or Sociology 321K may be counted with prior approval of the faculty adviser.
  - b. Geographic information systems: Geography 460G, 462K, Geological Sciences 327G.
  - c. Climates and oceans: Biology 456L, Geography 333K, Geological Sciences 347D, 347G, 377P, Marine Science 320, 440, 352, 354Q, 354T, 356. Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10. Marine Science 356 may not be used to satisfy both requirement 10c and requirement 14 in Option I. Marine Science 356 may not be used to satisfy both requirement 10c and requirement 18 in Option II. Geography 356T, Geological Sciences 371C, and Marine Science 352 may count with prior approval of the faculty adviser.
  - d. Environmental economics, sustainability, and business: Economics 304K, 330T. Advanced Placement credit for Economics 304L may be used to satisfy this requirement.
11. Environmental Science 141 and 151.

## Major Requirements

### BS EVS: Option I: Biological Science

12. One of the following foreign language/culture choices:
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language.
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers.
13. Three hours in statistics chosen from Statistics and Data Sciences 328M and 321; with the consent of the undergraduate adviser, an upper-division statistics or probability course may be used to fulfill this requirement.
14. Three hours in conservation and environmental biology chosen from Biology 351, 375, and Marine Science 356. Marine Science 356 may not be used to satisfy both requirement 10c and requirement 14. Marine Science 352 may count with prior approval of the faculty adviser.

15. Biology 325 or 325H (for students completing Biology 315H), and 370.
16. One of the following taxon/systems-based diversity courses or pairs of courses: Biology 321L, 324 and 124L, 327 and 127L, 340L, 448L, 353F, 453L, 354L, 455L, 364, 369L, 471G, Marine Science 352D, 352E, 354C, 354E, 354U, or 357. Biology 337 may count with prior approval of the faculty adviser.
17. One of the following physiology, neurobiology, and behavior courses or pairs of courses: Biology 322 and 122L, 328 and 128L, 438L, 339, 345E, 346, 359J, 359K, 359R, 361, 361T, 365S, 371L, Marine Science 355C.
18. Complete one upper-division laboratory course in addition to the laboratory requirements in the Prescribed Work Common to All Environmental Science Majors. A laboratory course taken to meet requirement 16 or 17 may be used to fulfill this requirement.
19. Enough additional coursework to make a total of 126 hours.

### BS EVS: Option II: Biological Sciences Honors

12. To fulfill requirements 1 through 4 of the prescribed work common to all options above, students complete the following breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; Physics 301 and 101L; and a designated honors statistics course. Credit earned by examination may not be counted toward this requirement.
13. Chemistry 204.
14. A section of Undergraduate Studies 302 or 303 that is approved by the honors program adviser.
15. A section of Rhetoric and Writing 309S that is restricted to student in the Dean's Scholars Honors Program.
16. Two semesters of Biology 379H; these courses may be used to fulfill requirement 9.
17. Biology 370.
18. Three semester hours in conservation and environmental biology chosen from Biology 375, 351, Marine Science 356. Marine Science 356 may not be used to satisfy both requirement 10c and requirement 18.
19. One of the following taxon/systems-based diversity courses or pairs of courses: Biology 321L, 324 and 124L, 327 and 127L, 340L, 448L, 353F, 453L, 354L, 455L, 364, 369L, 471G; Marine Science 352 (Topic: *Principles of Estuarine Ecology*), or Marine Science 352 (Topic: *Marine Invertebrates*), 352D, 354C, 354E, 354U or 357. Biology 337 may count with prior approval of the faculty adviser.
20. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts.
21. Complete one upper-division laboratory course in addition to the laboratory requirements in the Prescribed Work Common to All Environmental Science Majors. A laboratory course taken to fulfill requirement 19 may be used to fulfill this requirement.
22. Enough additional coursework approved by the honors adviser to make a total of 126 semester hours.

## Special Requirements

Students must fulfill both the University's general requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under the honors Option, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the program honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

## Bachelor of Science in Human Development and Family Sciences

The Bachelor of Science in Human Development and Family Sciences focuses on the study of human development, individuals in a family context, relationships, and well-being within the family and the broader social, economic, community, and governmental environment. Students in the program are expected to develop knowledge and understanding about human development and family dynamics through classroom experiences, observation of children and families, and research.

They have opportunities to apply their knowledge through practicum experiences in research and placements in the field. The program is designed to give students excellent preparation for graduate training that leads to careers in academia, research, medicine, and other health professions, as well as for employment in a field involving work with children, families, and adults.

Students seeking the Bachelor of Science in Human Development and Family Sciences must choose one of the six Options described below. Those who plan to follow Option V must be admitted to the Dean's Scholars Honors Program (p. 645) and those who plan to follow Option VI must be admitted to the Honors in Advanced Human Development and Family Sciences Program (p. 646).

### Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. Psychology 301; and six semester hours, at least three of which must be upper-division, chosen from courses in economics, social or

cultural anthropology, sociology, and psychology; Psychology 304, 333D, and 339 may not be counted toward this degree.

4. At least 36 semester hours of upper-division coursework; at least 21 semester hours must be completed in residence at the University
5. Eighteen semester hours in the School of Human Ecology must be completed in residence at the University

### Additional Prescribed Work for Each Option

#### Option I: Early Childhood

This Option is designed to provide the necessary foundation for further study or a career in working with children in applied settings.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332.
7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
8. Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals
9. Nutrition 306; Human Development and Family Sciences 304, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R and six additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R is restricted to students whose practicum applications have been approved. Practicum applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
10. Human Development and Family Sciences 338 and 466; and six additional semester hours chosen from Human Development and Family Sciences 342, 345, 347, 351, 358, 362, 378K (Topic 6: *Introduction to Early Childhood Intervention*), 378K (Topic 9: *Introduction to Child Life*), and 378L.
11. Enough additional coursework to make a total of 120 semester hours.

#### Option II: Human Development

This Option involves the study of development across the life span.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, 408R or Statistics and Data Sciences 332
7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
8. Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals
9. Nutrition 306; Human Development and Family Sciences 304, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R and six additional hours of coursework in human development and family sciences.

Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R is restricted to students whose applications have been approved. Applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.

10. Human Development and Family Sciences 378L; six semester hours chosen from Human Development and Family Sciences 335, 351, and 371; and three additional semester hours chosen from Human Development and Family Sciences 335, 342, 343, 345, 351, 353, 358, 466, 371, 372K, and 378K (*Topic 10: Sexuality in Human Development and Family Relationships*).
11. Enough additional coursework to make a total of 120 semester hours.

### Option III: Families and Personal Relationships

This Option involves the study of the formation and maintenance of close relationships, especially couple and family relationships.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332
7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
8. Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals
9. Nutrition 306; Human Development and Family Sciences 304, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R; and six additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R is restricted to students whose applications have been approved. Applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
10. Human Development and Family Sciences 337, and three hours chosen from Human Development and Family Sciences 335, 372K, and 378K (*Topic 10: Sexuality in Human Development and Family Relationships*).
11. Six additional semester hours chosen from Human Development and Family Sciences 322, 335, 345, 347, 353, 358, 360, 371, 372K and 378K (*Topic 10: Sexuality in Human Development and Family Relationships*).
12. Enough additional coursework to make a total of 120 semester hours.

### Option IV: Families and Society

This Option involves the study of the family and its interactions with larger socioeconomic systems, such as the economy, work, the media, public policy, and government.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332.

7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
8. Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals.
9. Nutrition 306; Human Development and Family Sciences 304, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R; and six additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355R is restricted to students whose applications have been approved. Applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
10. Human Development and Family Sciences 347 and 362; and six additional semester hours chosen from Human Development and Family Sciences 322, 338, 342, 343, 353, 360, and 378K (*Topic 6: Introduction to Early Childhood Intervention*), 378K (*Topic 9: Introduction to Child Life*), 378K (*Topic 10: Sexuality in Human Development and Family Relationships*).
11. Enough additional coursework to make a total of 120 semester hours.

### Option V: Human Development and Family Sciences Honors

This Option is designed to prepare students who have been admitted to the Dean's Scholars program for academic or research careers.

6. Breadth requirement: A calculus course and a statistics course, one of which must be a designated honors course; Biology 315H and 325H; Chemistry 301H and 302H; and three additional hours of honors-designated or approved coursework in biology, chemistry, computer science, mathematics, statistics and data sciences, or physics; credit earned by examination may not be counted toward this requirement.
7. Human Ecology 115H and 225H
8. Human Development and Family Sciences 304H, 313H, 113L, 315L, and 18 semester hours chosen from the following: Human Development and Family Sciences 335, 337, 338, 340, 342, 343, 345, 347, 351, 353, 358, 362, 371, 372K, 378L, 378K, and approved social science courses.
9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
11. Human Development and Family Sciences 355H and 379H.
12. Ten additional semester hours of coursework approved by the departmental honors adviser.
13. Six hours of coursework from the College of Liberal Arts and/or the College of Fine Arts.
14. Enough additional coursework to make a total of 120 semester hours.

## Option VI: Honors in Advanced Human Development and Family Sciences

This Option is designed for highly motivated and talented students who are interested in research experience and training.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332.
7. Chemistry 301 or 301H; Biology 311C; and Biology 311D or Chemistry 302 or 302H.
8. Three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for nonscience majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
9. Human Development and Family Sciences 304H, 313H, 113L, and 315L; 18 semester hours chosen from: Human Development and Family Sciences 335, 337, 338, 340, 342, 343, 345, 347, 351, 353, 358, 362, 371, 372K, 378L, 378K, and approved social science courses.
10. Human Development and Family Sciences 355H and 379H.
11. Twenty-one semester hours of additional upper-division coursework approved by the departmental honors adviser.
12. Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students in all Options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under Option V, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>). More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

To graduate under Option VI, students must remain in good standing with an overall in-residence grade point average of at least 3.30 and an overall grade point average of 3.50 in all human development and family sciences courses. In addition, student research conducted in Human Development and Family Sciences 355H and 379H must be presented in an approved public forum, such as the college's annual Undergraduate Research Forum. Students who fail to maintain the required grade point average may be subject to dismissal from the program. Under special circumstances and at the discretion of the human development and family sciences honors adviser, a student may be allowed to continue under academic review.

## Bachelor of Science in Mathematics

As an alternative to the Bachelor of Science and Arts and the Bachelor of Arts degrees, the Bachelor of Science in Mathematics is designed with a twofold purpose: to offer students a more extensive scientific program that may better prepare them for graduate study or employment, and to

recognize students who choose to pursue a more demanding program. Students are given the opportunity to develop greater breadth and depth in their mathematical programs as well as to combine mathematics with a concentration in another scientific discipline.

Students seeking the Bachelor of Science in Mathematics select one of the following Options: Actuarial Science, Mathematics for Secondary Teaching, Mathematics Honors, or Mathematics. Students who plan to follow Option VI, mathematics Honors, must be admitted to the Dean's Scholars Honors Program (p. 645).

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global culture flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. Forty-two semester hours of upper-division coursework. At least 21 semester hours of upper-division coursework must be completed in residence at the University.
4. Eighteen semester hours in mathematics must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Actuarial Science

5. Eight semester hours of majors-level coursework in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics.
6. Complete one of the following:
  - a. Mathematics 408C\*, 408D, and 427L
  - b. Mathematics 408N, 408S, and 408M
  - c. Mathematics 408K, 408L, and 408M  
\*Mathematics 408N, and 408S, or 408K and 408L, may substitute for 408C
7. Economics 304K and 304L
8. Accounting 310F or both 311 and 312
9. Finance 357
10. Computer Science 303E
11. Upper-division mathematics courses, including:

- a. Mathematics 325K or 328K. Mathematics 328K is recommended for students with substantial experience in writing proofs.
- b. Mathematics 341. Mathematics 340L may be substituted for 341 if the course was completed prior to entry into the mathematics entry-level major.
- c. Mathematics 362K, and either 358K or 378K
- d. Mathematics 329F, 339D, 339J, and 339U
- e. Two courses from the following: Mathematics 339V, 339W, 349P
- f. One additional course chosen from the following: Mathematics 339C, 339V, 339W, 349P, 349R, 378K

One of the courses fulfilling requirement 11a through 11f must be taught in the inquiry based learning (IBL) format or with an independent inquiry flag. IBL courses are identified each semester through a notation under the unique number in the course schedule and through a list maintained in the mathematics advising office in Robert Lee Moore Hall, room 4.101. Courses with an independent inquiry flag are identified in the Course Schedule.

- 12. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 1. Philosophy courses in logic, computer science courses in discrete mathematics, engineering courses, and actuarial foundation courses may not be used to fulfill this requirement.
- 13. Enough additional coursework to make a total of 120 semester hours.

## Option V: Teaching

This option is designed to fulfill the course requirements for certification as a middle grades or secondary school mathematics teacher in Texas; the student chooses mathematics certification or mathematics, physical science, and engineering certification. However, completion of the course requirements does not guarantee the student's certification. For information about additional certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

Students are encouraged to become familiar with a variety of mathematical software relevant to middle grades or secondary teaching, such as computer geometry systems, spreadsheets, and statistical software. Whenever possible, the student should take courses and sections of courses that use these types of software.

- 5. History 329U or Philosophy 329U
- 6. One of the following sequences:
  - a. Mathematics 408C\* and 408D
  - b. Mathematics 408N and 408S
  - c. Mathematics 408K and 408L

\*Mathematics 408N and 408S, or 408K and 408L, may substitute for 408C

- 7. Mathematics 315C
- 8. Biology 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*) or Physics 341 (Topic 7: *Research Methods: UTeach*)
- 9. The requirements of one of the following certification areas:
  - a. For mathematics certification:
    - i. Mathematics 340L or 341
    - ii. Mathematics 325K or 328K, 333L, 358K, and 362K. Mathematics 328K is recommended for students with substantial experience in writing proofs.
    - iii. Mathematics 375D

- iv. Mathematics 361K or 365C
- v. Mathematics 343K or 373K
- vi. Mathematics 427J.
- vii. Two courses chosen from: Mathematics 328K, 339J, 339U, 343K, 343L, 348, 361, 365C, 365D, 368K, 373K, 373L, 378K. A course used to fulfill requirements 9ai through 9avi may not also be counted toward requirement 9avii
- viii. A three-semester-hour supporting course that uses mathematics but is in a field other than mathematics. The following courses may be used to fulfill this requirement: Accounting 310F or 311, Architectural Engineering 323K, Astronomy 307, 352K, 352L, 358, 367M, Chemistry 301 or 301H, 303, Civil Engineering 321, 341, Computer Science 303E, 313E, Economics 420K, Electrical Engineering 302, 366, 366L, Geological Sciences 346C, 354, 476K, Geography 360L, Government 341M, Human Development and Family Sciences 322, Mechanical Engineering 320, 326, 366L, 366Q, 366R, Petroleum and Geosystems Engineering 310, Physics 301, 303K, 303L, Psychology 325K, 332, Sociology 369L
- b. For mathematics, physical science, and engineering certification:
  - i. Mathematics 325K or 328K, 427J, 333L, 341, 358K, and 362K. Mathematics 328K is recommended for students with substantial experience in writing proofs
  - ii. Mathematics 361K or 365C
  - iii. Mathematics 375D
  - iv. Physics 301, 101L, 316, 116L, 315, and 115L
  - v. Chemistry 301 or 301H, 302 or 302H, and 204
  - vi. Engineering Studies 301; and Mechanical Engineering 377K upon approval of the projects by the UTeach Program.

- 10. Eighteen semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 651S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
  - e. UTeach-Natural Sciences 101, 110, and 170
- 11. Students seeking middle grades certification must complete the following courses: Educational Psychology 350G, or Psychology 301 and 304; and Curriculum and Instruction 339E. Students seeking mathematics, physical science, and engineering certification may not seek middle grade certification.
- 12. Enough additional coursework to make a total of at least 120 semester hours

## Option VI: Mathematics Honors

- 5. Breadth requirement: An honors mathematics course; one of the following two-semester sequences: Biology 315H and 325H, Chemistry 301H and 302H, or Physics 301, 101L, 316, and 116L; and nine additional semester hours chosen from the preceding courses, Physics 315 and 115L. Credit earned by examination may not be counted toward this requirement
- 6. An honors section of Mathematics 427J, and six semester hours of coursework chosen from Mathematics 365C, 367K, and 373K
- 7. Twenty additional semester hours of upper-division coursework in mathematics approved by the departmental faculty adviser
- 8. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
- 9. A section of Rhetoric and Writing 309S that is restricted to students in the Dean Scholars Honors Program
- 10. Mathematics 379H

11. Thirty additional semester hours of coursework approved by the departmental honors adviser
12. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
13. Enough additional coursework to make a total of 120 semester hours.

### Option VII: Mathematics

5. Eight semester hours of majors-level coursework in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics
6. Computer Science 303E
7. One of the following sequences:
  - a. Mathematics 408C\* and 408D
  - b. Mathematics 408N and 408S
  - c. Mathematics 408K and 408L

\*Mathematics 408N and 408S, or 408K and 408L, may substitute for 408C
8. Three of the following: Mathematics 408M or 427L, 427J, 341, 362K. Mathematics 340L may be substituted for 341 if the course was taken prior to entry into the mathematics entry-level major
9. Mathematics 325K or 328K. Mathematics 328K is recommended for students with substantial experience in writing proofs
10. One of the following: Mathematics 343K, 361K, 365C, 367K, 373K.
11. Complete 33 hours of upper-division mathematics, from requirements 8, 9, 10, and the following: Mathematics 325K, 427J or 427K, 427L, 328K, 329F, 333L, 339C, 339D, 339J, 339U, 339V, 339W, 340L or 341, 343K, 343L, 344K, 346, 348, 349P, 349R, 358K, 361, 361K, 362K, 362M, 365C, 365D, 365G, 367K, 367L, 368K, 372K, 373K, 373L, 374G, 374M, 375D, 375T, 378K, and 379H. Mathematics 374M may not count toward both requirement 11 and 13.
12. One upper-division mathematics course identified as taught in the inquiry based learning (IBL) format or with an independent inquiry flag. IBL courses are identified each semester through a notation under the unique number in the Course Schedule and through a list maintained in the mathematics advising office in Robert Lee Moore Hall, room 4.101. Courses with an independent inquiry flag are identified in the Course Schedule. Courses counted toward requirements 8, 9, 10, and 11 may also count toward this requirement.
13. Mathematics in context. One course chosen from:
  - a. Mathematics 374M
  - b. Chemistry 353, 354
  - c. Computer Science 341, 342, 345, 346, 353, 367
  - d. Electrical Engineering 411, 325, 360C, 362K
  - e. Physics 329, 336K, 352K

Courses in requirements 13b through 13e may require additional prerequisites. Mathematics 374M may not count toward both requirement 11 and 13.

14. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 5. Philosophy courses in logic, computer science courses in discrete mathematics, engineering, and actuarial foundation courses may not be used to fulfill this requirement.
15. Enough additional coursework to make a total of 120 semester hours

## Special Requirements

Students in all Options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information>).

To graduate and be recommended for certification, students who follow the Teaching Option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 5 and 8 and in each of the professional development courses listed in requirement 10 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 11. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

To graduate under Option VI, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>).

## Bachelor of Science in Medical Laboratory Science

The student preparing for a career in medical laboratory science completes at least 100 hours of academic work at the University. After this work is completed, the student enters an accredited school of medical laboratory science (or clinical laboratory science) for an additional 12 to 16 months of clinical education. After completion of this education, the student is awarded the Bachelor of Science in Medical Laboratory Science and is eligible to take the national certification examination administered by the American Society for Clinical Pathology (ASCP) Board of Certification (BOC). Successful completion of this exam results in national certification as a Medical Laboratory Scientist.

The purpose of this degree program is to meet the increasing demand for laboratory professionals in hospital and clinic laboratories, research, industry, public health, education, and laboratory management. Medical laboratory science is also an excellent foundation for graduate study in medicine, dentistry, management, education, and other disciplines.

## Prescribed Work

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise

specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. One of the following foreign language/culture choices:
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language.
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers.
4. Mathematics 408C or 408N, and Statistics and Data Sciences 304 or 328M
5. Either Biology 311C, 311D, and 325, or Biology 315H and 325H
6. Biology 226L, 326M, 330 or 446L, 344 or 366R, 360K, 260L, 361, 361L, and 365S
7. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, 320N, and Biochemistry 369
8. Computer Science 303E, Management Information Systems 302F, or Public Health 323
9. Enough additional elective coursework, if necessary, to make a total of at least 100 semester hours of academic work completed at the University before the clinical education program.
10. Twelve to 16 months of clinical education in a program of medical laboratory science (or clinical laboratory science) accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). The student must apply to and be accepted into a clinical education program. The clinical education program director works closely with each student to ensure his or her success in the program. Upon completion of the clinical education program, the student must submit a letter from the program director verifying completion of coursework and a transcript showing grades in all courses in the program to The University of Texas at Austin, Office of the Dean, College of Natural Sciences, 1 University Station G2500, Austin TX 78712. To be counted toward the degree, the coursework must be approved by the faculty adviser for medical laboratory science and the dean. None of the coursework completed in the clinical education program may be used to fulfill in-residence degree requirements, requirements 1 through 9 of the prescribed work above, or the requirements for a second bachelor's degree.

## Special Requirements

Students must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. Students must also earn a grade of at least C- in each course taken in the 12 to 16-month clinical education in a program of medical laboratory science (or clinical laboratory science) accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

## Order and Choice of Work

The student should consult with his or her academic and faculty advisers each semester regarding order and choice of work and balancing the laboratory load. To complete the program within four years, it may be necessary for the student to take some courses during the summer.

# Bachelor of Science in Neuroscience

The Bachelor of Science degree in Neuroscience provides a strong foundation in the core sciences and related mathematical disciplines, along with the opportunity for training in biology, chemistry, computer science, mathematics, physics, or psychology. Distinctive features of the program include an emphasis on developing the quantitative, statistical, mathematical, and computational skills required in neuroscience, and meaningful hands-on laboratory experience.

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. At least 21 semester hours of upper-division coursework, including 18 semester hours in biology and neuroscience, must be completed in residence at the University. All students must complete at least 36 semester hours of upper-division coursework.

## Option I: Neuroscience Scholars

4. Mathematics 408C, or 408N and 408S; Statistics and Data Sciences 328M
5. An eight hour physics sequence chosen from the following:
  - a. Physics 317K, 117M, 317L, and 117N
  - b. Physics 303K, 103M, 303L, and 103N
  - c. Physics 301, 101L, 316, and 116L
6. Chemistry 301 or 301H, 302 or 302H, and 204
7. Biology 311C and 311D, or 315H and 325H, and 206L
8. Three additional majors-level courses selected from one of the following sequences:
  - a. Biology: Biology 325 or 325H, 320, 344, 349, and 370
  - b. Chemistry: Chemistry 328M and 128K, 328N and 128L, 353 or 353M, and Biochemistry 369
  - c. Computer Science: Computer Science 312, 314, Statistics and Data Sciences 335, 374E
  - d. Mathematics: Mathematics 427J or 427K, 427L, 340L or 341, 362K, 378K, Statistics and Data Sciences 321 or 329C; Mathematics 362K and Statistics and Data Sciences 321 may not both count.
  - e. Physics: Physics 345, 338K, 355
  - f. Psychology: Psychology 301, 323, 353K, 355
9. Neuroscience 330

10. Neuroscience 335
11. Twelve semester hours of laboratory courses chosen from the following: Neuroscience 365L, 366E, 366L, 366N, 366P, 366S, 367W, 377, 466G, and 466M. A maximum of three hours of Neuroscience 377 may count.
12. Nine semester hours of upper-division neuroscience to be chosen from: Biology 325, 359K, 367C, Neuroscience 337, 365D, 365T, 365W, 366C, 366D, 367F, 367V, and 371M; Biology 325 or 325H may count toward either requirement 8a or requirement 12
13. Three semester hours of Neuroscience 379H, *Honors Tutorial Course*
14. Enough additional coursework to make a total of 120 semester hours

## Option II: Neuroscience Honors

4. Breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; and one of the following: Physics 301 and 101L; or Physics 316 and 116L; credit earned by examination may not be counted toward this requirement.
5. Three hours of statistics chosen from the following: Statistics and Data Sciences 321, 325H, or 328M; other statistics courses may be approved by the departmental honors adviser.
6. One of the following:
  - a. Physics 315 and 115L
  - b. Physics 316 and 116L
  - c. Physics 338K, 345, 355

Courses counted toward requirement 4 may not also be counted toward requirement 6.

7. Biology 206L and Chemistry 204
8. Chemistry 128K, 128L, 328M, and 328N
9. Biology 320 or 344
10. Biology 349 and 370
11. Neuroscience 330
12. Neuroscience 335
13. Six hours of laboratory courses chosen from: Neuroscience 365L, 366E, 366L, 366N, 366P, 366S, 367W, 466G, 466M
14. Six hours of upper-division neuroscience chosen from: Biology 359K, 367C, Neuroscience 337, 365D, 365T, 365W, 366C, 366D, 367F, 367V, 371M, 377
15. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
16. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
17. Two semesters of Neuroscience 379H
18. Seven additional semester hours of coursework approved by the departmental honors adviser
19. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
20. Enough additional coursework to make a total of 120 semester hours

## Option III: Neuroscience

4. Mathematics 408C, or 408N and 408S; and Statistics and Data Sciences 328M
5. An eight-hour physics sequence chosen from the following:
  - a. Physics 317K, 117M, 317L, and 117N
  - b. Physics 303K, 103M, 303L, and 103N
  - c. Physics 301, 101L, 316, and 116L
6. Chemistry 301 or 301H, 302 or 302H, and 204
7. Biology 311C, 311D, and 325 or 315H and 325H
8. Biology 206L

9. Neuroscience 330 and 335
10. Fifteen hours of upper-division neuroscience chosen from: Biology 359K, 367C, Neuroscience 337, 365D, 365L, 365T, 365W, 366C, 366D, 366E, 366L, 366N, 366P, 366S, 367F, 367V, 367W, 371M, 377, 466G, 466M. A maximum of six hours of Neuroscience 377 may count.
11. Six additional hours of upper-division laboratory course work chosen from the following: Neuroscience 365L, 366E, 366L, 366N, 366P, 366S, 367W, 466G, 466M. Neuroscience 365L, 366E, 366L, 366N, 366P, 366S, 367W, 466G, and 466M may count toward requirement 10 or requirement 11.
12. Enough additional coursework to make a total of 120 semester hours

## Special Requirements

Students must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under Option II, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/innovative-education/undergraduate-research/undergraduate-research-forum>.

## Bachelor of Science in Nutrition

Nutrition is an integrative science with the overall objective of improving the health and well-being of individuals and groups. Nutritional inquiry encompasses not only the roles of electrons, atoms, molecules, genes, cells, organs, and complex organisms in biological life processes but also the links between life science and health, behavior, education, population, culture, and economics. The Bachelor of Science in Nutrition degree program includes six options, described below.

For students pursuing careers in dietetics, courses in behavioral and clinical nutrition and food systems management provide the academic preparation required for dietetics practice. The Didactic Program in Dietetics (DPD) meets the coursework requirements that qualify graduates to apply to a dietetic internship, which leads to the Registered Dietitian credential. Completion of the Didactic Program in Dietetics requirements qualifies a graduate to apply for the exam to become a Dietetic Technician, Registered. To be eligible to apply for a dietetic internship or to practice as a Registered Dietetic Technician, additional coursework would be required for students earning a degree in Options II-VI. The Coordinated Program in Dietetics (CPD) includes both the coursework and the supervised practice necessary to be eligible to write the examination to become a registered dietitian. The DPD and CPD are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) 120 S. Riverside Plaza, Suite 2000, Chicago IL 60606, (800) 877-1600.

The Nutritional Sciences Option requires courses in science and research in order to prepare students for graduate study or professional school. Graduates may seek employment in private or publicly funded research programs or, upon completion of graduate study, may engage in college or university teaching or nutrition research. This option also allows students to fulfill requirements for postgraduate study in medicine, dentistry, and other health professions. Additional coursework is needed

to be eligible to apply for a dietetic internship or to practice as a Dietetic Technician, Registered.

The Nutrition and Public Health Option III is designed to prepare students for entry-level positions in public health and nutrition at state and other health departments, in research, and in industry. It will equip them for entry into graduate programs in nutrition or other public health disciplines at schools of public health, at graduate schools in the biomedical sciences, and for entry into medical or other health professional schools as well as for those who pursue health and research careers.

Students who plan to follow Option IV must be admitted into the Honors in Advanced Nutritional Sciences Program (p. 646). Students in this option take honors courses in nutrition, research methodology, and writing. In addition, students are encouraged to take honors courses in disciplines outside of nutrition, such as biology, chemistry, and mathematics. Students consult with the departmental honors adviser to develop an individualized and challenging program of study that meets their goals and interests.

Students who plan to follow Option V must be admitted to the Dean's Scholars Honors Program (p. 645). In addition to taking a core of research, writing, and seminar courses in the College of Natural Sciences, students in this option consult with the departmental honors adviser to develop a coherent individual program of rigorous and challenging courses from across the University.

Students in the international nutrition Option gain firsthand knowledge of nutrition issues in other countries through a study abroad experience. Students combine the study of nutrition with a broad range of courses to prepare for experience studying and practicing nutrition in another culture.

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

3. At least 36 semester hours of upper-division coursework, of which at least 24 must be in nutrition. At least 21 semester hours of upper-division coursework, including 18 semester hours in nutrition, must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Dietetics

Students in dietetics may select either the Didactic Program in Dietetics (DPD) or the Coordinated Program in Dietetics (CPD). Students who

complete the DPD with at least four upper-division nutrition courses completed in residence will receive a verification statement that qualifies them to apply for an accredited supervised practice program. DPD graduates who complete an accredited supervised practice program may become active members of the Academy of Nutrition and Dietetics (AND) and are eligible to write the examination to become a registered dietitian.

Students interested in the Coordinated Program in Dietetics (p. 642) must apply for admission after completing 60 semester hours of prerequisite coursework. Upon completing the CPD, which includes approximately 1,200 hours of supervised practice, graduates immediately qualify for active membership in the AND and to write the examination to become a registered dietitian.

Students who are admitted to the CPD should consult the faculty adviser each semester regarding order and choice of work. During the fourth year, the following courses must be taken in the indicated term: *fall semester*: Nutrition 245C; *spring semester*: Nutrition 345M, 372C, 372F, 373S; *summer session*: Nutrition 374C and 374P. Because these courses are taught only once a year, a student who does not take them at the indicated time may be unable to complete the program.

4. At least three semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H and 113L
5. Mathematics 408C, 408N, or Statistics and Data Sciences 332
6. Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M
7. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369
8. Biology 311C or 315H, 325 or 325H, and 365S
9. Accounting 310F or 311
10. The following core nutrition coursework:
  - a. Nutrition 312 or 312H, 112L or 312R, 326, and 126L; students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses
  - b. Nutrition 307, 107L, 338W or 338H, 342, and 343
11. Coursework in nutrition, consisting of the following:
  - a. Behavioral and clinical nutrition:
    - i. CPD: Nutrition 315, 218, 118L, 330, 332, 370, and 371
    - ii. DPD: Nutrition 315, 218, 118L, 330, 332, 370, 371, and either Nutrition 337 or 365 (Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*)
  - b. Food systems management: Nutrition 334, 234L, and 355M
  - c. Research:
    - i. CPD: Nutrition 373S
    - ii. DPD: One of the following: Nutrition 324 and 124L, 353, 355 or 355H, 366L, 379H, Statistics and Data Sciences 318, 321, 325H, or 352; with the approval of the faculty undergraduate adviser, DPD students may count Nutrition 352 toward this requirement; Statistics and Data Sciences 325H may not be counted toward both requirement 6 and requirement 11cii.
  - d. Professional development:
    - i. CPD: Nutrition 245C
    - ii. DPD: Nutrition 162
12. Students in the CPD must complete an additional 15 semester hours of supervised practice: Nutrition 345M, 372C, 372F, 374C, and 374P
13. Enough additional coursework to make a total of 126 semester hours

## Option II: Nutritional Sciences

- At least six semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H, and 113L
- Mathematics 408C, 408N, or Statistics and Data Sciences 332
- Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M
- Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, 320N, and Biochemistry 369
- Either Biology 311C, 311D, and 325 or Biology 315H and 325H; Biology 446L and 365S
- Complete one of the following:
  - Physics 301 and 101L
  - Physics 302K and 102M
  - Physics 303K and 103M or
  - Physics 317K and 117M
- The following core nutrition coursework:
  - Nutrition 312 or 312H, 112L or 312R, 326, and 126L; students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.
  - One of the following: Nutrition 307 and 107L; Biology 326M and 226L; 326R and 226L; Chemistry 455
  - Nutrition 337, 338W or 338H, 342, 343 ; and 365 (Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*)
- Nine additional semester hours of nutrition, including three hours each from the following areas:
  - Nutritional sciences: Nutrition 365 or 370 or 371; the same topic of Nutrition 365 may not be counted both toward this requirement and toward requirement 10c.
  - Behavioral and clinical nutrition: Nutrition 315, 218 and 118L, 321, 330, 331, 332, or 370 or 371
  - Research: Three semester hours of coursework chosen from Nutrition 355 or 355H, 366L, Biology 325L, 331L, and Biochemistry 369L
- Enough additional coursework to make a total of 126 semester hours

## Option III: Nutrition and Public Health

- Six semester hours chosen from Anthropology 322M (Topic 12: *Mexican Immigration Cultural History*), Sociology 319, 354K, and 368D
- Three semester hours of Statistics and Data Sciences 302, 304, 306, 325H, and 328M
- One of the following courses: Mathematics 408C, 408N, or Statistics and Data Sciences 332
- Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369
- Biology 311C or 315H, 325 or 325H, and 365S
- The following core nutrition coursework:
  - Nutrition 312 or 312H, 112L or 312R, 326, and 126L; students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.
  - Nutrition 337, 338W or 338H, 342, 343, and 365 (Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*)
- Three semester hours of research chosen from Nutrition 324 and 124L, 352, 353, 355, 366L, 379H, and Statistics and Data Sciences 318, 321, 325H, or 352; Statistics and Data Sciences 325H may not count toward both requirement 5 and 10.

- Nine semester hours chosen from Anthropology 432L and 349C, Biology 446L, 361T, and 478L, Classical Civilization 306M, Health Education 352K (Topic 4: *Strategic Health Communication*) and 373, Kinesiology 320 and 424K, and Psychology 332C
- Enough additional coursework to make a total of 120 semester hours

## Option IV: Honors in Advanced Nutritional Sciences

- At least three semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H and 113L
- Mathematics 408C, 408N, Mathematics 408D-AP-H, or Statistics and Data Sciences 332
- Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M
- Chemistry 301 or 301H, 302 or 302H, 204, 320M, 320N, 220C, and Biochemistry 369
- Biology 311C, 311D, and 325 or Biology 315H and 325H; and Biology 365S
- Nutrition 312H, 312R, 338H, 342, 343, and 365 (Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*), and 12 additional semester hours of nutrition or related coursework approved by the departmental honors adviser
- A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
- Nutrition 355H and 379H
- Nine semester hours of additional coursework approved by the departmental honors adviser
- Enough additional coursework to make a total of 120 semester hours

## Option V: Nutrition Honors

- Breadth requirement: A calculus course and a statistics course, one of which must be a designated honors course; Biology 315H and 325H; Chemistry 301H and 302H; and three additional hours of honors-designated or approved coursework in biology, chemistry, computer science, mathematics, statistics and data sciences, or physics; credit earned by examination may not be counted toward this requirement.
- At least three semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H and 113L
- Chemistry 204, 320M, and 320N, and Biochemistry 369
- Neuroscience 330 and Biology 365S
- Nutrition 312H, 312R, 338H, 342, 343, and 365 (Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*)
- A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
- A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
- Nutrition 355H and 379H
- Six semester hours of additional coursework in nutrition or related area approved by the departmental honors adviser
- Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
- Enough additional coursework to make a total of 120 semester hours

## Option VI: International Nutrition

Students in this option must participate for one semester or summer session in a study abroad program in nutrition offered by the University. Students must submit a study abroad application. During the study

abroad experience, students complete Nutrition 353, Field Experience in International Nutrition. Additional coursework in nutrition or in the language, culture, or history of the country may be available during the international study experience. All study abroad programs in nutrition must be approved in advance by the international nutrition faculty adviser. A list of other study abroad opportunities in nutrition is maintained in the main office of the School of Human Ecology.

4. Economics 304K or 304L, and at least three semester hours chosen from Psychology 301, Sociology 302, and Anthropology 302
5. Three semester hours chosen from the following: Geography 339K, 357, Mexican American Studies 307, 318, Sociology 335, 354K
6. Second-semester proficiency in a single foreign language
7. Mathematics 408C, 408N, or Statistics and Data Sciences 332
8. Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M
9. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369
10. Biology 311C or 315H, 325 or 325H, and 365S
11. The following core nutrition coursework:
  - a. Nutrition 312 or 312H, 112L or 312R, 326, and 126L. Students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.
  - b. One of the following four-semester-hour sequences: Nutrition 307 and 107L; Biology 326M and 226L; 326R and 226L
  - c. Nutrition 338W or 338H, 342, and 343
12. Nutrition 316, 218, 118L, 321, 331, and 353
13. At least nine semester hours, three of which must be upper-division, chosen from one of the following areas:
  - a. Health professions: Chemistry 220C, 320N, Biology 206L, 311D, 326M, 346, Nutrition 337, Nutrition 365 (Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*); Biology 326M may not be counted toward both requirement 11b and requirement 13a.
  - b. Dietetics: Nutrition 315, 330, 332, 370, 371
  - c. Behavioral science: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, Psychology 308, 319K, Sociology 308D, 319, 320K, 324K
14. Enough additional coursework to make a total of 126 semester hours

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under Option IV, students must remain in good standing with an overall grade point average of at least 3.30 and an overall grade point average of 3.50 in all nutritional sciences courses. In addition, student research conducted in courses described in requirement 10 must be presented in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>). Students who fail to maintain the required grade point average may be subject to dismissal from the program. Under special circumstances and

at the discretion of the nutritional sciences honors adviser, a student may be allowed to continue under academic review.

To graduate under Option V, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/innovative-education/undergraduate-research/undergraduate-research-forum>.

Note:

Nutritional Sciences courses with numbers ending in H are intended for students in Option IV, Honors in Advanced Nutritional Sciences and in Option V, Nutrition Honors. Students outside these options may enroll in these courses with the consent of the nutritional sciences honors adviser.

To be eligible to apply for a dietetic internship or to practice as a Registered Dietetic Technician, additional coursework would be required for students earning a degree in Options II-VI.

## Bachelor of Science in Physics

All aspects of the physical universe are of interest to the physicist, who seeks to understand not only the smallest forms of matter and the rich phenomena present in our everyday lives but also the universe itself. Physics has played a critical role in human technological and intellectual development during the twentieth century. The tools of the physicist—observation, imagination, model building, prediction, and deduction—will enable physics to continue this influence into the new century. The Bachelor of Science in Physics degree program is designed to provide the skills, understanding, and outlook required for participation in the discovery of new knowledge about nature.

The Bachelor of Science in Physics program is balanced and broad. It is designed to give the student a strong foundation for graduate study or work in physics and, with additional training, for work in a variety of other areas, such as astronomy, astrophysics, biophysics, chemical physics, computer science, engineering, geophysics, mathematics, medicine, physics teaching, and space sciences. Students who end their formal training with the bachelor's degree may seek employment in industry, in national laboratories, or in teaching; they should consider the options in computation, radiation physics, space sciences, biophysics, and teaching, which augment the broad instruction provided by the basic Bachelor of Science in Physics. For those who plan to teach physics in secondary school, the teaching option provides the courses needed for certification.

Students who plan to follow Option VI, Physics Honors, must be admitted to the Dean's Scholars Honors Program (p. 645).

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Options I–IV and VII: one of the following foreign language/culture choices: (Students in Options V and VI are exempt from this requirement)
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers
4. Thirty-six semester hours of upper-division coursework
5. At least 21 semester hours of upper-division coursework, including at least 12 semester hours of upper-division coursework in physics, must be completed in residence at the University

## Prescribed Work Common to All Options for Each

### Option I: Physics

This option is designed to give the student a strong foundation for graduate study or work in physics and for further study or work in a variety of other areas.

6. Chemistry 301 or 301H, and 302 or 302H
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it
8. Physics 301, 101L, 316, 116L, 315, and 115L
9. Mathematics 408C and 408D or the equivalent, 427J or 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K; only courses at the level of calculus and above may be counted toward the total number of hours required for the degree
10. Physics 336K, 352K, 353L, 355, 362K, 362L, 369, 373, and 474, or their equivalents
11. Enough additional coursework to make a total of 126 semester hours

### Option II: Computation

This Option is designed to provide the necessary foundation and hands-on skill in computation for the student who plans a career or further study in computational physics or computer science. Students who complete this option may simultaneously fulfill some of the requirements of the Scientific Computation and Data Sciences Certificate (p. 692).

6. Chemistry 301 or 301H, and 302 or 302H
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it
8. Physics 301, 101L, 316, 116L, 315, and 115L
9. Mathematics 408C and 408D or the equivalent, 427J or 427K and 427L, and six additional semester hours of upper-division coursework in mathematics or statistics and data sciences; Statistics and Data Sciences 329C and Mathematics 362K are recommended; only courses at the level of calculus and above may be counted toward the total number of hours required for the degree
10. Physics 329, 336K, 338K, 352K, 353L, 355, 369, and 373, or their equivalents
11. One of the following scientific computation options:

- a. Computer Science 303E; Computer Science 313E or Statistics and Data Sciences 322; and two courses from two of the areas listed below:
  - i. Numerical methods: Chemical Engineering 348, Computer Science 323E, 323H, 367, Mathematics 348, Statistics and Data Sciences 335
  - ii. Statistical methods: Biomedical Engineering 335, Mathematics 358K, 378K
  - iii. Other computing topics: Computer Science 324E, 327E, 329E, 377, Mathematics 346, 362M, 368K, 372K, 376C, Mechanical Engineering 367S, Statistics and Data Sciences 329D, 374C, 374D, 374E
- b. Twelve semester hours chosen from Electrical Engineering 306, 312, 316, 319K, and 422C

12. Enough additional coursework to make a total of 126 semester hours

### Option III: Radiation Physics

This Option is designed to provide the necessary foundation for the student who plans a career or further study in nuclear engineering, radiation engineering, or health physics.

6. Chemistry 301 or 301H, and 302 or 302H
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it
8. Physics 301, 101L, 316, 116L, 315, and 115L
9. Mathematics 408C and 408D or the equivalent, 427J or 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K; only courses at the level of calculus and above may be counted toward the total number of hours required for the degree
10. Twenty-four semester hours of upper-division coursework in physics, including Physics 336K, 352K, 353L, 355, 362L, 369, and 373, or their equivalents
11. Eighteen semester hours of upper-division coursework in mechanical engineering, consisting of Mechanical Engineering 337C, 337F, 337G, 361E, 361F, and 336P
12. Enough additional coursework to make a total of 126 semester hours

### Option IV: Space Sciences

This Option is designed to provide the necessary foundation for the student who plans a career or further study in space sciences.

6. Chemistry 301 or 301H, and 302 or 302H
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it
8. Physics 301, 101L, 316, 116L, 315, and 115L
9. Mathematics 408C and 408D or the equivalent, 427J or 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K; only courses at the level of calculus and above may be counted toward the total number of hours required for the degree
10. Physics 329, 336K, 352K, 353L, 355, 362K, 369, and 373, or their equivalents
11. Either 15 semester hours of upper-division coursework in aerospace engineering or 12 hours in aerospace engineering and three additional hours of upper-division coursework in physics
12. Enough additional coursework to make a total of 126 semester hours

## Option V: Teaching

This Option is designed to fulfill the course requirements for certification as a middle grades or secondary school science teacher in Texas; the student chooses composite science certification with physics as the primary teaching field, physical sciences certification, physics/mathematics certification, or mathematics, physical science, and engineering certification. However, completion of the course requirements does not guarantee the student's certification. For information about additional requirements, students should consult the UTeach-Natural Sciences academic adviser.

6. Physics 301, 101L, 316, 116L, 315, and 115L
7. Mathematics 408C and 408D or the equivalent, 427J or 427K, and 427L
8. At least 18 semester hours of upper-division coursework in physics, consisting of Physics 341 (Topic 7: *Research Methods: UTeach*), 353L, 355, and three of the following courses: Physics 329, 333, 336K, 338K, 352K, 373, Science 365; with the consent of the UTeach-Natural Sciences undergraduate adviser, an upper-division physics course that includes a substantial research component may be substituted for Physics 341
9. History 329U or Philosophy 329U
10. The requirements of one of the following certification areas:
  - a. For composite science certification:
    - i. Biology 311C and 311D
    - ii. Chemistry 301 or 301H and 302 or 302H
    - iii. Six hours of coursework in geological sciences; courses intended for non-science majors may not be counted toward this requirement
    - iv. Enough additional approved coursework in biology, chemistry, or geological sciences to provide the required 12 hours in a second field
  - b. For physical sciences certification:
    - i. Chemistry 301 or 301H, 302 or 302H, 204 or 317, 353, 153K, 154K, 354L, and 455 or 456
    - ii. Three additional hours of upper-division coursework in physics
  - c. For physics/mathematics certification: Mathematics 315C, 325K, 333L, 341 or 340L, 358K, 362K, 360M or 375D
  - d. For mathematics, physical science, and engineering certification:
    - i. Mathematics 315C, 325K, 333L, 358K, and 362K
    - ii. Chemistry 301 or 301H, 302 or 302H, and 204
    - iii. Engineering Studies 301; and Mechanical Engineering 377K upon approval of the project by the UTeach Program.
11. Eighteen semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 651S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
  - e. UTeach-Natural Sciences 101, 110, and 170
12. Students seeking middle grades certification must complete the following courses: Educational Psychology 350G, or Psychology 301 and 304; and Curriculum and Instruction 339E
13. Enough additional coursework to make a total of at least 126 semester hours

## Option VI: Physics Honors

6. Breadth requirement: Biology 315H and 325H, Chemistry 301H and 302H, and Mathematics 427J and 427L; at least one of the math

courses must be a designated honors section; credit earned by examination may not be counted toward this requirement

7. Mathematics 340L and 361
8. Physics 301, 101L, 316, 116L, 315, and 115L
9. Physics 336K, 352K, 353L, 355, 362K, 362L, 369, 373, and 474
10. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
11. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
12. Physics 379H and a three-semester-hour upper-division research course approved by the departmental honors adviser
13. Ten additional semester hours of coursework approved by the departmental honors adviser
14. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
15. Enough additional coursework to make a total of 120 semester hours

## Option VII: Biophysics

6. Chemistry 301 or 301H and 302 or 302H
7. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; Biology 206L
8. Physics 301, 101L, 316, 116L, 315, and 115L
9. Mathematics 408C and 408D or the equivalent, 427J or 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K
10. Physics 336K, 345, 352K, 353L, 355, 369, and 373 or their equivalents
11. Either Chemistry 320M or 328M, and Biochemistry 369
12. Complete one of the following areas:
  - a. Cell Biology: Biology 320
  - b. Microbiology: Biology 326R
  - c. Developmental Biology: Biology 349
  - d. Neurobiology: Neuroscience 371M
  - e. Virology: Biology 330
  - f. Computation: Statistics and Data Sciences 335 and Biology 337J

A list of recommended biology laboratory courses that complement the lecture courses listed in 12a through 12e are available in the advising center and the dean's office.

13. Enough additional coursework to make a total of 126 semester hours

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate and be recommended for certification, students who follow the Teaching Option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 9 and in each of the professional development courses listed in requirement 11 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 12. Information about the portfolio review and additional teacher

certification requirements is available from the UTeach-Natural Sciences academic adviser.

To graduate under Option VI, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/innovative-education/undergraduate-research/undergraduate-research-forum>.

## Bachelor of Science in Public Health

The Bachelor of Science in Public Health prepares graduates for entry-level positions in public health and equips them to pursue certificate and graduate degrees in the field. All of the options offer broad-based training in the five core areas of public health. Option I offers a choice of six areas of specialization.

Students for whom the degree is appropriate include those interested in health careers and in dual graduate degree programs in medicine and public health. The degree is administered by the School of Human Ecology.

Option I students who plan to follow Option III must apply for admission. Admission requirements for Option III is given in The Bachelor of Science in Public Health, Option III. Students who plan to follow Option II must be admitted to the Dean's Scholars Honors Program (p. 645).

### Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Foundation courses:
  - a. Public health: Public Health 317
  - b. Microbiology: Biology 326M and 226L
  - c. Nutrition and physiology: Nutrition 312 or 312H, 112L, and Biology 365S
  - d. Social and behavioral sciences: One of the following: Economics 304K, 304L, Psychology 301, Sociology 319, 354K
  - e. Political science/government: Government 358 or Management 320F
2. Public health core\*:
  - a. Biostatistics: Statistics and Data Sciences 328M
  - b. Environmental health sciences: Public Health 338
  - c. Epidemiology: Public Health 354
  - d. Global health: Public Health 334
  - e. Health policy and health systems: Public Health 358D
  - f. Health behavior theory and practice: Public Health 356
3. Core curriculum
4. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise

specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flag from the same course. Students are encouraged to discuss options with their academic advisers.

5. At least 21 semester hours of upper-division coursework must be completed in residence at the University. All students must complete at least 36 semester hours of upper-division coursework.

### Additional Prescribed Work for Each Option

#### Option I: Public Health

6. Mathematics 408C, 408N, or 408R.
7. Biology 311C, 311D, and 325 or Biology 315H and 325H. These courses must be completed before the student progresses to other upper-division biology and upper-division public health courses.
8. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369.
9. At least nine hours from one of the following areas of specialization; courses counted toward requirement 1 may not be used to fulfill this requirement.
  - a. Biostatistics and public health informatics: Biology 321G, Computer Science 303E, 313E, 327E, Geography 460G, Mathematics 408D, 408M, 408S, 340L, 358K, 362K, 362M, 378K, Public Health 320, 323, 341R, Statistics and Data Sciences 332.
  - b. Environmental health sciences: Biology 373, 373L, 375, Civil Engineering 341, 342, 346, 369L, Geological Sciences 302C, 346C, 476K, 476M, Geography 307C, 334L, 339K, 344K, 357, 460G, Marine Science 307, 320, 354Q, Public Health 341R, Urban Studies 315.
  - c. Health policy and management: Economics 304K, 304L, Government 357M (Topic 3: *Supreme Court and Public Policy*; Topic 4: *Civil Liberties*; Topic 7: *Constitutional Structure of Power*; Topic 8: *Structure of Individual Liberties*), 358, 360N (Topic 10: *Introduction to International Relations*), 370L (Topic 23: *Politics of Health Care*), Health and Society 320, Human Development and Family Sciences 362, Management 320F, Philosophy 325L or 325M, 347, Public Affairs 325 (Topic 1: *Advanced Seminar in Ethical Leadership*), Public Health 341R, Sociology 354K.  
  
Economics 304K and 304L may not count toward both requirement 1d and requirement 9c. Government 358 may not count toward both requirement 1e and requirement 9c. Management 320F may not count toward both requirement 1e and requirement 9c. Sociology 354K may not count toward both requirement 1d and 9c.
  - d. Infectious diseases and public health microbiology: Biology 330, 230L, 336, 360K, 260L, 361, 361L, Public Health 341R, 361P.
  - e. Nutrition: Nutrition 312R, 315, 321, 331, 337, 338W or 338H, 342, 343, 365 (Topic 4: *Obesity and Metabolic Health*), Public Health 341R.
  - f. Social and behavioral sciences: Only one advertising, communication, or public relations course may be counted: Advertising 305, 319, 334, 378, Communication Studies 306M, 315M, 332, 332K, 355K, Health Education 329K, 335, 352K (Topic 2: *Psychological Issues in Women's Health*), 360, 370K (Topic 1: *Foundations of Health Promotion I*), 371K, 373, Health and Society 301, 320, Marketing 320F, Public Health 341R, Public Relations 305, Social Work 310, Sociology 319, 322F, 329, 336D, 354K, 369K

Sociology 319 and 354K may not count toward both requirement 1d and requirement 8f.

10. One of the following foreign language/culture choices:
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers
11. Enough additional coursework to make a total of 120 semester hours

### Option II: Public Health Honors

6. Breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; credit by examination may not count toward this requirement
7. In fulfilling requirement 2a, students must complete an honors statistics course
8. Chemistry 204, 320M, and Biochemistry 369
9. A section of Undergraduate Studies 302 or 303 that is approved by the program honors adviser
10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
11. Two semesters of Public Health 379H
12. Nine additional hours of coursework approved by the departmental honors adviser
13. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
14. Enough additional coursework to make a total of 120 semester hours

### Option III: Advanced Program

This program provides students with a foundation in the natural sciences applied to public health and advanced specialist training in preparation for a leadership position in public health practice. This program leads to the completion of the Bachelor of Science in Public Health and the Master of Public Health, awarded by the School of Public Health at the University of Texas Health Sciences Center at Houston. During the senior year, students complete the first year of the Master of Public Health at the Austin Regional Campus. The second year of the Master of Public Health is completed at one of the five regional campuses in Austin, Brownsville, Dallas, El Paso, Houston, and San Antonio. Upon completion of the first year of the Master of Public Health, coursework may be applied toward Option III requirements. Option III students may apply to graduate upon completion of the undergraduate degree requirements and prior to the completion of the Master of Public Health.

6. Mathematics 408C, 408N, or 408R.
7. Biology 311C, 311D, and 325; or 315H and 325H; these courses must be completed before the student progresses to other upper-division biology and upper-division public health courses
8. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369
9. One of the following foreign language/culture choices:
  - a. Beginning level proficiency coursework, or the equivalent, in a foreign language
  - b. First course in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers.
10. Enough additional coursework to make a total of 120 semester hours; a maximum of 18 hours of graduate coursework completed

at the School of Public Health at the University of Texas Health Sciences Center may be applied as elective hours toward the Bachelor of Science in Public Health, Option III: Advanced Program, if needed to reach a total of 120 hours.

- \* Graduate coursework may not be applied toward the public health core requirements 2a through 2f.

### Special Requirements

Students must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each foundation course, public health core course, and mathematics and science course required by the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the General Information Catalog (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

### Additional Requirements for Option II

To graduate under Option II, students must remain in good academic standing in the Dean's Scholars Program, must submit an honors thesis approved by the departmental honors adviser, and present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<https://cns.utexas.edu/innovative-education/undergraduate-research/undergraduate-research-forum>).

### Additional Requirements for Option III

Students admitted to Option III are required to follow the admission schedule and policies of Master of Public Health program at the School of Public Health at The University of Texas Health Sciences Center at Houston. Students are expected to make continuous progress toward the undergraduate and graduate degrees by completing required undergraduate and graduate public health coursework each semester of the fourth year. Students who fail to complete graduate coursework two long-session semesters in a row will be removed from the program and must re-enroll at the University of Texas at Austin to complete the Bachelor of Science in Public Health Option I. Students will be notified prior to removal from the graduate program. Students must earn the Bachelor of Science in Public Health in their fourth year to be eligible to continue in the Master of Public Health program in their fifth year.

## Bachelor of Science in Textiles and Apparel

The Division of Textiles and Apparel is a place to get a broad-based education, well suited for career opportunities. Students in the Division of Textiles and Apparel enjoy a wide range of academic programs and career opportunities. They study the art of design, the science of chemistry and physics, and the application of retail and management principles, through the lens of history. Majors come in three packages: merchandising and consumer sciences; apparel, functional, and technical design; and textile conservation and museum studies. Each program provides hands-on experience with rapidly evolving retail environments, intercultural practices and customs, consumer behavior, apparel and fashion design, computer-aided design, fashion show production and event organization, garment conservation and museum management, and fiber and fabric testing. Capstone retail merchandising and apparel design programs take students to high-profile venues and provide rich opportunities in honors programs. Internships are available to enhance the educational experience and ensure strong career opportunities. Basic research is being conducted in bio-based fibers and specialized fabrics, and 3D technology to address basic human needs.

Research is also conducted involving the effects of change and new technologies on the development and distribution of creative textile products. The Division of Textiles and Apparel is a marvelous place to get a broad-based education, well suited for rewarding career opportunities.

## Prescribed Work Common to All Options

In the process of fulfilling degree requirements, all students must complete:

1. Core curriculum
2. Skills and experience flags:
  - a. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent, including one at the upper-division level
  - b. Quantitative reasoning: one flagged course
  - c. Global cultures: one flagged course
  - d. Cultural diversity in the United States: one flagged course
  - e. Ethics: one flagged course
  - f. Independent inquiry: one flagged course

Courses that may be used to fulfill flag requirements are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified. Please note, students may not earn the cultural diversity in the United States and the global cultures flags from the same course. Students are encouraged to discuss options with their academic advisers.

## Prescribed Work for Each Option

### Option I: Apparel, Functional, and Technical Design

3. Mathematics 408C, 408N or Statistics and Data Sciences 332
4. One of the following: Statistics and Data Sciences 301, 302, 303, 304, 305, 306, or Educational Psychology 371
5. Chemistry 301 or 301H, 302 or 302H, and 204; and Biology 311C
6. The following textiles and apparel courses:
  - a. Core Courses: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 328, 331, 260L, and 260M; and two of the following courses: Textiles and Apparel 325L, 325M, and 327
  - b. Option courses: Textiles and Apparel 316L, 126, 226L, 350, 352D, 355C, 164K (Topics 1: *Flat Pattern*, 2: *Draping*, and 3: *Advanced Apparel Design*), and 264L (Topic 1: *Flat Pattern*, 2: *Draping*, and 3: *Advanced Apparel Design*)
7. Thirty-six semester hours of upper-division coursework, of which at least 18 must be within and at least nine must be outside the School of Human Ecology. At least 21 semester hours of upper-division coursework must be taken in residence at the University
8. Enough additional coursework to make a total of 120 semester hours

### Option II: Merchandising and Consumer Sciences

In addition, students following the merchandising option must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

3. Mathematics 408C, 408N, or Statistics and Data Sciences 332
4. One of the following: Statistics and Data Sciences 301, 302, 303, 304, 305, 306, or Educational Psychology 371
5. Chemistry 301 or 301H, 302 or 302H, and 204; and Biology 311C
6. Economics 301 or 304K
7. The following textiles and apparel courses:
  - a. Core courses: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 328, 331, 260L, and 260M; and two of the following courses: Textiles and Apparel 325L, 325M, and 327

- b. Option courses: Textiles and Apparel 316Q, 219C, 119L, 151, 352M, 353, 355P, 361, 376, and 377

8. Thirty-six semester hours of upper-division coursework, of which at least 18 must be within and at least nine must be outside the School of Human Ecology. At least 21 semester hours of upper-division coursework must be taken in residence at the University
9. Enough additional coursework to make a total of 120 semester hours

### Option III: Textiles and Apparel Honors

3. Mathematics 408C, 408N, or Statistics and Data Sciences 332
4. Breadth Requirement: An approved calculus course and an approved statistics course (one of these must be honors); Chemistry 301H and 302H; Biology 315H and 325H. Credit earned by examination may not be counted toward this requirement.
5. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser
6. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program
7. Textiles and Apparel 105L, 205, 327, 328, 260L, and 260M
8. Twenty-two semester hours selected from the three streams of textiles and apparel courses with at least three semester hours in each of the streams: apparel, technical, and functional design; merchandising and consumer science; and textile conservation and museum studies, as well as Human Development and Family Sciences 322 with consent of the honors adviser
9. Six hours of textiles and apparel, including Textiles and Apparel 379H. In all cases, students will be required to conduct research and write a thesis. In some cases, this thesis will be accompanied by a portfolio of work
10. Six additional semester hours from biology, chemistry, computer science, engineering, mathematics or physics. Courses designed for non-science majors may not be counted toward this requirement
11. Six semester hours of coursework from the College of Liberal Arts and/or the College of Fine Arts
12. Thirty-six semester hours of upper-division coursework. At least 21 semester hours of upper-division coursework must be taken in residence at the University
13. Twelve additional semester hours of coursework approved by the departmental honors adviser
14. Enough additional coursework to make a total of 120 semester hours

### Option IV: Textile Conservation and Museum Studies

3. Mathematics 408C, 408N, or Statistics and Data Sciences 332
4. One of the following: Statistics and Data Sciences 301, 302, 303, 304, 305, 306, or Educational Psychology 371
5. Chemistry 301 or 301H, 302 or 302H, 204, and 320M
6. Anthropology 302 and 304
7. The following textiles and apparel courses:
  - a. Core courses: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 328, 331, 260L, and 260M; and two of the following courses: Textiles and Apparel 325L, 325M, and 327
  - b. Option courses: Textiles and Apparel 219C, 119L, 151, 652C, 354C, 354D, 354E, 354F, and 355D

8. Thirty-six semester hours of upper-division coursework, of which at least 18 must be within and at least 12 must be outside the School of Human Ecology
9. Enough additional coursework to make a total of 126 semester hours

## Special Requirements

Students must fulfill both the University's General Requirements (p. 20) for graduation and the college requirements (p. 648). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under Option III, students must remain in good standing in the Dean's Scholars Honors Program (p. 645), must submit an honors thesis approved by the departmental honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/innovative-education/undergraduate-research/undergraduate-research-forum>.

## Order and Choice of Work

The student should consult the faculty adviser each semester about order and choice of work and balancing the laboratory load. Students should also check prerequisite requirements carefully.

## Minor and Certificate Programs

In the College of Natural Sciences, only one transcript-recognized minor or transcript-recognized certificate may be declared per major.

A student who wishes to pursue more than one transcript-recognized minor or transcript-recognized certificate per major must consult with his or her academic adviser to get permission from the College. When considering whether to grant an exception and allow pursuit of another transcript-recognized credential, the academic adviser will take into account the student's long-term education/professional goals and the student's ability to graduate within four years of entering the university.

Students admitted to transcript-recognized certificate and transcript-recognized minor programs must contact their academic advisers to have approved programs added to their degree audit profiles. This allows progress toward the programs to be tracked and ensures that certificates and minors are added to official transcripts upon graduation, if all requirements are met.

### Minor

The transcript-recognized undergraduate academic minor must be completed in conjunction with an undergraduate degree at The University of Texas at Austin. For more information regarding the requirements for achieving a minor, including a comprehensive list of minors, please visit the Minors and Certificate Programs (p. 13) section of the *Undergraduate Catalog*.

### Certificate Programs

Undergraduate certificate programs encourage students to explore academic areas that support and extend their degree plans. The following certificates require at least 18 semester hours of coursework, some of which may also be used to fulfill degree requirements. Undergraduates who complete the certificate requirements in conjunction with their degree requirements or within one year after

earning the degree will receive a certificate and recognition on their University transcript. A maximum of nine hours in the certificate program may be taken after completion of the undergraduate degree. At least half of the required coursework in the certificate program must be completed in residence at the University.

## Applied Statistical Modeling Certificate

The certificate in Applied Statistical Modeling equips undergraduate students with the tools necessary to understand how to apply statistics to their primary field of study. This certificate program is designed to complement diverse degree programs and to appeal to students across the University in engineering, science, economics, mathematics, and many other disciplines. Certificate students will complete one course in the mathematical foundations of statistics, a two-course sequence in applied statistics, and nine additional hours in statistics, machine learning, econometrics, and other relevant courses from the approved list below.

Admission to the certificate is by application only. Students may download an application from the Department of Statistics and Data Sciences webpage. Students seeking the certificate must also complete the prerequisite course Mathematics 408C, 408L, 408N, 408R, or 408S with a grade of at least C-.

The certificate consists of 18 hours. Students must receive a grade of at least C in each course applied toward the certificate and have a cumulative grade point average of at least 3.0 in the courses presented to fulfill the certificate. Courses that appear in multiple approved course lists may be used to satisfy only one requirement. Students must contact the Department of Statistics and Data Sciences to apply for the certificate in the semester in which they are completing the requirements and graduating.

Requirements	Hours
Mathematical foundation of statistics	3
E E 351K	Probability and Random Processes
M 362K	Probability I
SDS 321	Introduction to Probability and Statistics
Sequence in applied statistics	6
Choose one of the following:	
ECO 329	Economic Statistics
EDP 371	Introduction to Statistics
M 358K	Applied Statistics
PSY 418	Statistics and Research Design
SOC 317L	Introduction to Social Statistics
STA 309	Elementary Business Statistics
SDS 302	Data Analysis for the Health Sciences
SDS 304	Statistics in Health Care
SDS 306	Statistics in Market Analysis
SDS 328M	Biostatistics
And one of the following:	
ECO 341K	Introduction to Econometrics
M 349R	Applied Regression and Time Series
STA 371G	Statistics and Modeling
STA 371H	Statistics and Modeling: Honors
STA 375	Statistics and Modeling for Finance
SDS 325H	Honors Statistics
SDS 332	Statistical Models for the Health and Behavioral Sciences

SDS 352	Statistical Methods
SDS 358	Special Topics in Statistics (Topic 1: Applied Regression Analysis)
Nine hours of coursework out of the following: <sup>1</sup> 9	
ADV 344K	Advertising Research
C S 343	Artificial Intelligence
CMS 348	Communication Research Methods
ECO 354K	Introductory Game Theory
GEO 325K	Computational Methods
GEO 365N	Seismic Data Processing
HED 343	Foundations of Epidemiology
HED 373	Evaluation and Research Design
KIN 376	Measurement in Kinesiology
M 339J	Probability Models with Actuarial Applications
M 349P	Actuarial Statistical Estimates
M 362M	Introduction to Stochastic Processes
M 378K	Introduction to Mathematical Statistics
or SDS 378	Introduction to Mathematical Statistics
PBH 354	Epidemiology
PGE 378	Applied Reservoir Characterization
PSY 325K	Advanced Statistics
SDS 323	Statistical Learning and Inference
SDS 348	Computational Biology and Bioinformatics
SDS 353	Advanced Multivariate Modeling
SDS 358	Special Topics in Statistics
SDS 374E	Visualization and Data Analysis for Science and Engineering
SDS 375	Special Topics in Scientific Computation
SDS 379R	Undergraduate Research
STA 372	Topics in Statistics (Topic 5: Financial and Econometric Time Series Modeling)

**Please Note:**

Statistics and Data Sciences 358 (Topic 1: Applied Regression Analysis) may only be counted toward one requirement.

—

1. Students are encouraged to select courses within their own majors or colleges as appropriate. The Statistics and Data Sciences courses listed are available to students in all majors.

## Computational Science and Engineering Certificate

The Computational Science and Engineering Certificate program is sponsored by the Cockrell School of Engineering, the Jackson School of Geosciences, the College of Liberal Arts, and the College of Natural Sciences; it is administered by the Institute for Computational Engineering and Sciences (ICES). Information regarding the specific requirements of the Certificate can be found in the Cockrell School of Engineering's Minor and Certificates section (p. 227) of the Undergraduate Catalog.

## The Elements of Computing Program Certificate

The Elements of Computing Program, administered by the Department of Computer Science, is designed to support computational work in disciplines other than computer science and to provide students with skills in the use of computer applications. Any non-computer science major may take any elements of computing course for which he or she meets the prerequisite. No application process is required.

To earn the Elements of Computing Certificate, students must complete 18 semester hours of coursework with a grade of at least C- in each course.

The following coursework is required:

Requirements	Hours
C S 303E	Elements of Computers and Programming (or the equivalent) 3
C S 313E	Elements of Software Design (or the equivalent) 3
Four of the following courses: 12	
C S 320N	Topics in Computer Science for Nonmajors
C S 324E	Elements of Graphics and Visualization
C S 326E	Elements of Networking
C S 327E	Elements of Databases
C S 328E	Topics in Elements of Computing
C S 329E	Advanced Topics in Elements of Computing

**Please Note:**

With the approval of the certificate program faculty committee, other appropriate courses may be counted toward the elective requirement.

## Evidence and Inquiry Certificate

The Evidence and Inquiry Certificate, pursued by students in the Polymathic Scholars Program and open by application to others, allows students to design an area of study shaped by questions that require evidence and methodologies outside their major. Students work with faculty to identify interests, map them onto academic disciplines at the University, and determine questions related to those interests that might be answerable by research that combines expertise from at least two disciplines. Students describe their area of study, identify primary questions, name two University of Texas at Austin faculty members with research experience relevant to their field, and justify the courses they would take in a written proposal that must be reviewed by three members of the program's faculty steering committee. Students complete an original research thesis in their final year. Those who plan to pursue the certificate must apply no later than the end of their third long semester. More information about the Evidence and Inquiry Certificate is available on the College of Natural Sciences website (<http://cns.utexas.edu/students/degrees-majors-advising/graduation>).

The certificate program requires 22 semester hours of coursework, including at least 11 hours completed in residence. Students must meet the following requirements:

Requirements		Hours
UGS 303	First-Year Signature Course ((Topic: Originality in the Arts and Sciences) or another critical thinking or research methods substitute course for students who apply for admission after completing a signature course.)	3
NSC 109	Topics in Natural Science (Topic 4: Polymathic Capstone Field Invention)	1
Four additional courses, including at least six semester hours of upper-division coursework, from the student's approved evidence and inquiry area of study		12
Senior Capstone Sequence		6
NSC 323	Natural Sciences Topics (Topic 1: Polymathic Capstone Thesis Preparation Seminar)	
NSC 371	Capstone Thesis Seminar	

In the College of Natural Sciences, the Evidence and Inquiry Certificate may be used to complement any major. Some certificate courses will also fulfill degree requirements established by the student's major department and are given later in this section; however, some of the 22 hours required for the certificate may be in addition to the number of hours required for the degree.

## Food and Society Certificate

Though food-related issues vary widely in focus, they are all linked by their complexity and are deeply interdisciplinary nature, each relating to topics of health and nutrition, genetics, politics, culture, the environment, economics, and business. Students will be able to appreciate the full range of these interdisciplinary ties and apply new perspectives to their primary academic majors and careers.

Students completing the certificate will be able to apply a more comprehensive understanding of the implications of their food-related actions and decisions; find better solutions to today's complex problems; formulate more effective public policy; become better informed and active citizens; and make healthier choices for themselves and their families.

No admission to the certificate is required. Students must contact the advising office in the School of Human Ecology to apply for the certificate the semester before the certificate requirements are met. The certificate consists of 18 hours, of which nine hours must be in upper-division coursework. Courses must be completed with minimum grades of at least C- unless the course is offered only on the pass/fail basis. Students also seeking the Bachelor of Science in Nutrition may count a maximum of six hours in nutrition toward the food and society certificate.

Some of the courses may contain prerequisites that are in addition to the coursework for the certificate.

Requirements		Hours
Three hours of introductory nutrition chosen from the following:		3
NTR 306	Fundamentals of Nutrition	
NTR 312	Introduction to Nutritional Sciences	
NTR 312H	Introduction to Nutritional Sciences: Honors	
Fifteen hours selected from a minimum of two themes chosen from table 1, 2 and 3 below. <sup>1</sup>		15

Requirements		Hours
1. No more than nine hours in a single theme may be applied toward the certificate.		
1. Nutrition and Health		
NTR 218 & NTR 118L	Assessment of Nutritional Status and Assessment of Nutritional Status Laboratory	3
NTR 307	Introductory Food Science	3
NTR 315	Nutrition through the Life Cycle	3
NTR 330	Nutrition Education and Counseling	3
NTR 321	International Nutrition: The Developing World	3
NTR 334	Foodservice Systems Management	3
NTR 353	Field Experience in International Nutrition	3
NTR 365	Selected Topics in Nutritional Sciences (Topic 4: Obesity and Metabolic Health)	3
SOC 308S	Introduction to Health and Society	3
N 309	Global Health	3

### 2. Culture and History

Requirements		Hours
NTR 316	Culture and Food	3
AMS 370	Seminar in American Culture (Topic 26: American Food)	3
ANT 307	Culture and Communication	3
ANS 379	Capstone Seminars in Asian Studies (Topic 7: Cuisine and Culture in Asia)	3
C C 340	Advanced Topics in Classical Archaeology (Topic 6: Food, Health, and Culture in the Ancient Mediterranean)	3
C C 348	Topics in Ancient Civilization (Topic 14: Ancient Greek Medicine)	3

### 3. Politics, Economics, and Environment

Requirements		Hours
NTR 331	International Nutrition: Social and Environmental Policies	3
NTR 332	Community Nutrition	3
GRG 331K	Nature, Society, and Adaptation	3
GRG 344K	Global Food, Farming, and Hunger	3
GRG 339K	Environment, Development, and Food Production	3
GOV 370L	Topics in American Government and Politics (Topic 21: Politics of Food in America)	3
MNS 308	Humans and a Changing Ocean	3
MNS 367K	Human Exploration and Exploitation of the Sea	3

## Forensic Science Certificate

The Forensic Science Certificate provides an interdisciplinary perspective for students interested in careers in forensic science.

Students seeking employment in forensic science laboratories upon graduation are encouraged to select biology and chemistry courses. Some of these courses may require introductory biology and chemistry courses as prerequisites.

Students must apply online for admission to the certificate through the university-wide portal for transcript-recognized certificates as soon as they decide to pursue the certificate. The certificate consists of 18 hours, including six upper-division hours, with grades of at least C-:

Requirements	Hours
ANT 301 Biological Anthropology	3
Six hours chosen from any of the following courses relevant to forensic science:	6
Criminalistics:	
SOC 302 Introduction to the Study of Society	
SOC 325K Criminology	
SOC 325L Sociology of Criminal Justice	
SOC 336P Social Psychology and the Law	
Behavioral Science:	
PSY 301 Introduction to Psychology	
PSY 308 Biopsychology	
PSY 319K Social Psychology	
PSY 352 Abnormal Psychology	
Pharmacology:	
NEU 365D Principles of Drug Action	
Forensic Science:	
ANT 366 Anatomy and Biology of the Human Skeleton	
Nine hours chosen from any of the following areas:	9
Anatomy and Physiology:	
ANT 432L Primate Anatomy	
BIO 309D The Human Body or BIO 365S Human Systems Physiology	
BIO 446L Human Microscopic and Gross Anatomy	
BIO 361T Comparative Animal Physiology	
BIO 165U Human Systems Physiology Laboratory	
BIO 371L Experimental Physiology	
Chemistry:	
BCH 369 Fundamentals of Biochemistry	
CH 220C Organic Chemistry Laboratory	
CH 320M Organic Chemistry I	
CH 320N Organic Chemistry II	
CH 455 Fundamentals of Analytical Chemistry	
Genetics and Microbiology:	
ANT 349C Human Variation	
ANT 349D Anthropological Genetics	
BIO 325 Genetics	
BIO 325L Laboratory Experience in Genetics	
BIO 325T Human Genetics	
BIO 226L General Microbiology Laboratory	

BIO 326R	General Microbiology
Statistics and Computation (One course chosen from the following):	
BIO 321G	Principles of Computational Biology
SDS 301	Elementary Statistical Methods
SDS 302	Data Analysis for the Health Sciences
SDS 304	Statistics in Health Care
SDS 306	Statistics in Market Analysis
SDS 328M	Biostatistics
Additional coursework from the criminalistics, behavioral science and forensic science sections above. <sup>1</sup>	
---	
1. A course may not count toward both the six-hour requirement and the 9-hour requirement	

## Marine Science Certificate

The Marine Science transcript-recognized certificate enables students to explore the field of marine science. The certificate provides a foundation of basic competency in the fundamentals of marine science, along with specialized upper-division coursework in aquatic science. The knowledge of aquatic science that students gain through the certificate will help them to be competitive for employment or graduate study in this field.

The certificate consists of a minimum of 19 hours with grades of at least C-. Most of the courses in the certificate contain prerequisites of one year of general biology and one year of general chemistry.

Marine and Freshwater Biology and Marine and Freshwater Science majors are not eligible to earn the certificate. Environmental Science majors may count no more than nine hours of degree requirements toward the Marine Science certificate.

Requirements	Hours
MNS 310 Fundamentals of Marine Science	3
MNS 320 Marine Ecology	3
MNS 120L Laboratory Studies in Marine Ecology	1
Three hours chosen from:	3
BIO 311C Introductory Biology I	
BIO 311D Introductory Biology II	
BIO 315H Advanced Introduction to Genetics: Honors	
CH 301 Principles of Chemistry I	
CH 301H Principles of Chemistry I: Honors	
CH 302 Principles of Chemistry II	
CH 302H Principles of Chemistry II: Honors	
Nine hours from the following, including at least six hours at the Marine Science Institute in Port Aransas, Texas:	9
MNS 440 Limnology and Oceanography	
MNS 152L Principles of Marine Science: Laboratory Studies	
MNS 252L Principles of Marine Science: Laboratory Studies	
MNS 152S Principles of Marine Science: Undergraduate Seminar	
MNS 252S Principles of Marine Science: Undergraduate Seminar	
MNS 152T Principles of Marine Science: Special Topics	

MNS 252T	Principles of Marine Science: Special Topics
MNS 348	Training Cruise(s) (Topic 1: Training Cruise(s): Research in Biological Oceanography )
MNS 352	Principles of Marine Science
MNS 352C	Estuarine Ecology
MNS 352D	Marine Botany
MNS 352E	Marine Conservation Biology
MNS 353	Topics in Marine Science
MNS 354	Marine Invertebrates
MNS 354C	Biology of Fishes
MNS 354E	Aquatic Microbiology
MNS 354J	Marine Chemistry
MNS 354Q	Marine Environmental Science
MNS 354T	Biological Oceanography
MNS 354U	Biology of Sharks, Skates, and Rays
MNS 355C	Physiology of Fishes
MNS 356	Ecosystem Oceanography
MNS 357	Marine Phytoplankton Diversity
MNS 367K	Human Exploration and Exploitation of the Sea
MNS 170	Special Studies in Marine Science
MNS 270	Special Studies in Marine Science
MNS 370	Special Studies in Marine Science

## Pre-Health Professions Certificate

The Pre-Health Professions Certificate assists students in preparing for post-baccalaureate, healthcare professional programs. The certificate consists of a minimum of 18 hours, including nine hours in residence. Each course presented for the certificate must be completed with a grade of at least C-.

The certificate is composed of two separate tracks: a track for majors in the College of Natural Sciences, and a track for majors in other colleges across the university. Students must apply online for admission to the certificate through the university-wide portal for transcript recognized certificates.

Students are encouraged to work closely with the Health Professions Office to select healthcare themes relevant to their professional career goals. Some of the courses may contain prerequisites that are in addition to the coursework for the certificate.

Majors in the College of Natural Sciences must seek the Science Major Track.

Majors outside of the College of Natural Sciences must seek the Non-Science Major Track. The composition of the non-science major track is science coursework necessary for admission to post-baccalaureate, healthcare professional programs. Non-science majors may apply to the certificate program upon completion of the following courses with grades of at least B-: Chemistry 301 or 302, and one of the following: Statistics and Data Sciences 302, Mathematics 408C, 408K, 408N, or 408R. Upon admission, the ability to progress in the certificate is dependent on completion of the certificate courses with satisfactory grades.

## Science Major Track

Requirements	Hours
Complete 18 hours chosen from the following themes relevant to healthcare.	18
<b>Cultural Awareness:</b>	
AAS 301	Introduction to Asian American Studies
AAS 310	Introductory Topics in Asian American Studies (Topic 1: Psychological Perspectives on Asian American Identity)
AFR 301	African American Culture
AFR 374D	Advanced Topics in Black United States Studies (Topic 11: Psychology of the African American Experience)
AMS 370	Seminar in American Culture (Topic 49: Twentieth-Century United States Lesbian and Gay History)
CSD 308K	Perspectives on Deafness
LAS 324L	Topics in Latin American Anthropology (Topic 16: Mexican Immigration Cultural History)
MAS 307	Introduction to Mexican American Cultural Studies
MES 301L	Introduction to the Middle East: Adjustment and Change in Modern Times
<b>Health and Anatomy:</b>	
ARH 339R	Art, Art History, and Medicine
C C 306M	Introduction to Medical and Scientific Terminology
CSD 306K	Introduction to Communication Disorders
EDP 350L or HED 366 or PSY 346K	Human Sexuality Human Sexuality Psychology of Sex
HED 335	Theories of Substance Use and Abuse
HED 343	Foundations of Epidemiology
HED 352K	Studies in Health: Topical Studies
HED 370K	Topical Seminar in Health Promotion
HED 373	Evaluation and Research Design
KIN 320	Applied Biomechanics of Human Movement
KIN 424K	Applied Human Anatomy
KIN 425K	Physiology of Exercise
KIN 326K	Biomechanical Analysis of Movement
PSY 301 PSY 308	Introduction to Psychology Biopsychology
PSY 332C PSY 341K	Hormones and Behavior Selected Topics in Psychology (Topic 4: Health Psychology)
PSY 353K	Psychopharmacology
<b>Healthcare Policy:</b>	
CMS 322E	Communication Ethics

GRG 344K	Global Food, Farming, and Hunger
GRG 356	Topics in Environmental Geography (Topic 1: Children's Environmental Health)
GRG 356T	Topics in Geography (Topic 9: Human Health and the Environment)
GRG 357	Medical Geography
HED 378D	Peer Health Leadership I
HIS 350R	Undergraduate Seminar in United States History (Topic 18: Women in Sickness and Health)
MAN 334M	Healthcare System Management
N 309	Global Health
N 321	Ethics of Health Care
PBH 317	Introduction to Public Health
PHL 325M	Medicine, Ethics, and Society
SOC 307P	Introduction to the Sociology of Health and Well-Being
SOC 319	Introduction to Social Demography
SOC 321G	Global Health Issues and Health Systems
SOC 336D	Race, Class, and Health
SOC 354K	Sociology of Health and Illness
SOC 358D	Health Policy and Health Systems
SOC 368D	Social Context of Public Health
SOC 369K	Population and Society
URB 350	Topics in Urban Politics and Governance (Topic 2: Human Health and the Environment)
<b>Human and Societal Development:</b>	
CMS 310K	Team-Based Communication
CMS 322E	Communication Ethics
EDP 350E	Introduction to Life Span Development
HDF 304	Family Relationships
HDF 313	Child Development
HDF 335	Adult Development
HDF 342	Development of Psychopathology from Infancy through Adolescence
HDF 343	Human Development in Minority and Immigrant Families
HDF 351	Infant Development and Attachment Relationships
HDF 378K	Advanced Child and Family Development (Approved topics)
N 310	Communication in Health Care Settings
PSY 301	Introduction to Psychology
PSY 308	Biopsychology
PSY 332C	Hormones and Behavior
PSY 333D	Introduction to Developmental Psychology
PSY 341K	Selected Topics in Psychology (Topic 4: Health Psychology)
SOC 302	Introduction to the Study of Society
SOC 330C	Death and Dying: Sociological Perspectives

SOC 333K	Sociology of Gender
HED 329K	Child and Adolescent Health
S W 360K	Current Social Work Topics (Topic 9: Loss and Grief: Individual, Family, and Cultural Perspectives)
<b>Nutrition:</b>	
CMS 322E	Communication Ethics
HIS 350R	Undergraduate Seminar in United States History (Topic 5: American Cultural History of Alcohol and Drugs)
NTR 306	Fundamentals of Nutrition
NTR 312	Introduction to Nutritional Sciences
NTR 315	Nutrition through the Life Cycle
NTR 218	Assessment of Nutritional Status
NTR 321	International Nutrition: The Developing World
NTR 326	Intermediate Nutrition and Metabolism
NTR 331	International Nutrition: Social and Environmental Policies
NTR 332	Community Nutrition

Optional: If additional hours are needed to complete the 18 hours for the certificate, a maximum of nine hours chosen from the following may be applied to the science major track:

Requirements	Hours
<b>Biochemistry and Chemistry:</b>	
BCH 369	Fundamentals of Biochemistry
CH 220C	Organic Chemistry Laboratory
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II
<b>Biology:</b>	
BIO 206L	Introductory Laboratory Experiments in Biology
BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
<b>Physics:</b>	
PHY 301	Mechanics
PHY 101L	Laboratory for Physics 301
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 302L	General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics
PHY 102M	Laboratory for Physics 302K
PHY 102N	Laboratory for Physics 302L
PHY 303K	Engineering Physics I
PHY 303L	Engineering Physics II
PHY 103M	Laboratory for Physics 303K
PHY 103N	Laboratory for Physics 303L
PHY 316	Electricity and Magnetism
PHY 116L	Laboratory for Physics 316
PHY 317K	General Physics I
PHY 317L	General Physics II
PHY 117M	Laboratory for Physics 317K
PHY 117N	Laboratory for Physics 317L

**Statistics:**

SDS 301	Elementary Statistical Methods
SDS 302	Data Analysis for the Health Sciences
SDS 304	Statistics in Health Care
SDS 306	Statistics in Market Analysis
SDS 328M	Biostatistics

Additional upper-division coursework in biochemistry, biology, and chemistry by approval of the undergraduate certificate adviser

**Non-science Major Track****Requirements****Hours**

Complete 18 hours chosen from one of the health professions preparation sequences. The 18 hours may be composed of introductory coursework, advanced coursework, or a mixture of the two

**Pre-dental Preparation**

Introductory Coursework:

BIO 206L	Introductory Laboratory Experiments in Biology
BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
CH 204	Introduction to Chemical Practice
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 302L	General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics
PHY 102M	Laboratory for Physics 302K
PHY 102N	Laboratory for Physics 302L <sup>1</sup>

Advanced Coursework:

BCH 369	Fundamentals of Biochemistry
BIO 320	Cell Biology
BIO 325	Genetics
BIO 326R	General Microbiology <sup>2</sup>
CH 220C	Organic Chemistry Laboratory
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II

**Pre-medical Preparation**

Introductory Coursework:

BIO 206L	Introductory Laboratory Experiments in Biology
BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
CH 204	Introduction to Chemical Practice
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 302L	General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics
PHY 102M	Laboratory for Physics 302K
PHY 102N	Laboratory for Physics 302L <sup>1</sup>

Advanced Coursework:

BCH 369	Fundamentals of Biochemistry
BIO 320	Cell Biology
BIO 325	Genetics

BIO 326R	General Microbiology <sup>2</sup>
CH 220C	Organic Chemistry Laboratory
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II

**Pre-occupational Therapy Preparation**

Introductory Coursework:

BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
BIO 206L	Introductory Laboratory Experiments in Biology
CH 204	Introduction to Chemical Practice
SDS 302	Data Analysis for the Health Sciences
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 102M	Laboratory for Physics 302K <sup>1</sup>

Advanced Coursework:

BIO 325	Genetics
BIO 446L	Human Microscopic and Gross Anatomy
BIO 365S	Human Systems Physiology
BIO 165U	Human Systems Physiology Laboratory

**Pre-optometry Preparation**

Introductory Coursework:

BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
BIO 206L	Introductory Laboratory Experiments in Biology
CH 204	Introduction to Chemical Practice
SDS 302	Data Analysis for the Health Sciences
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 102M	Laboratory for Physics 302K
PHY 302L	General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics
PHY 102N	Laboratory for Physics 302L <sup>1</sup>

Advanced Coursework:

BCH 369	Fundamentals of Biochemistry
BIO 325	Genetics
BIO 326R	General Microbiology <sup>2</sup>
BIO 226L	General Microbiology Laboratory
BIO 446L	Human Microscopic and Gross Anatomy
BIO 365S	Human Systems Physiology
BIO 165U	Human Systems Physiology Laboratory
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II
CH 220C	Organic Chemistry Laboratory

**Pre-physical Therapy Preparation**

Introductory Coursework:

BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II

BIO 206L	Introductory Laboratory Experiments in Biology
CH 204	Introduction to Chemical Practice
SDS 302	Data Analysis for the Health Sciences
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 102M	Laboratory for Physics 302K
PHY 302L	General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics
PHY 102N	Laboratory for Physics 302L <sup>1</sup>

Advanced Coursework:

BIO 325	Genetics
BIO 446L	Human Microscopic and Gross Anatomy
BIO 365S	Human Systems Physiology
BIO 165U	Human Systems Physiology Laboratory

**Pre-physician Assistant Preparation:**

Introductory Coursework:

BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
BIO 206L	Introductory Laboratory Experiments in Biology
CH 204	Introduction to Chemical Practice
SDS 302	Data Analysis for the Health Sciences
NTR 306	Fundamentals of Nutrition

Advanced Coursework:

BCH 369	Fundamentals of Biochemistry
BIO 320	Cell Biology
BIO 325	Genetics
BIO 226L	General Microbiology Laboratory
BIO 326R	General Microbiology <sup>2</sup>
BIO 344	Molecular Biology
BIO 446L	Human Microscopic and Gross Anatomy
BIO 365S	Human Systems Physiology
BIO 165U	Human Systems Physiology Laboratory
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II
CH 220C	Organic Chemistry Laboratory

**Pre-pharmacy Preparation:**

Introductory Coursework:

BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
BIO 206L	Introductory Laboratory Experiments in Biology
CH 204	Introduction to Chemical Practice
SDS 302	Data Analysis for the Health Sciences
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 102M	Laboratory for Physics 302K <sup>1</sup>

Advanced Coursework:

BIO 325	Genetics
BIO 226L	General Microbiology Laboratory
BIO 326R	General Microbiology <sup>2</sup>
BIO 446L	Human Microscopic and Gross Anatomy
BIO 365S	Human Systems Physiology
BIO 165U	Human Systems Physiology Laboratory
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II
CH 220C	Organic Chemistry Laboratory

**Pre-veterinary Preparation**

Introductory Coursework:

BIO 311C	Introductory Biology I
BIO 311D	Introductory Biology II
BIO 206L	Introductory Laboratory Experiments in Biology
CH 204	Introduction to Chemical Practice
PHY 302K	General Physics Technical Course: Mechanics, Heat, and Sound
PHY 102M	Laboratory for Physics 302K
PHY 302L	General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics
PHY 102N	Laboratory for Physics 302L <sup>1</sup>

Advanced Coursework:

BCH 369	Fundamentals of Biochemistry
BIO 325	Genetics
BIO 326R	General Microbiology
BIO 226L	General Microbiology Laboratory
BIO 344	Molecular Biology
CH 320M	Organic Chemistry I
CH 320N	Organic Chemistry II
CH 220C	Organic Chemistry Laboratory
SDS 321	Introduction to Probability and Statistics
or SDS 328M	Biostatistics

---

1. A completed calculus-based physics sequence may substitute for the purpose of earning the certificate.
2. Previously completed Biology 326M may substitute.

## Scientific Computation and Data Sciences Certificate

The Certificate in Scientific Computation and Data Sciences helps undergraduates equip themselves with the mathematical, statistical, and computer-based tools necessary to investigate complex systems in a variety of applications. It is designed to appeal to students across the University in science, engineering, economics, premedicine, sociology, and many other disciplines. The program is administered by the Department of Statistics and Data Sciences. To be admitted, a student must be in good standing in an approved undergraduate degree program and must have earned a grade of at least C- in each certificate course he or she has completed. Students may apply for admission to the program at any point in their undergraduate study; they are encouraged to apply as early as possible so that they can be advised throughout the program.

The following coursework is required. Students must also complete Mathematics 408D or 408M as a prerequisite. No single course or topic may be used to meet more than one of these requirements.

Requirements	Hours
SDS 222 Introduction to Scientific Programming	2
One course in linear algebra, discrete mathematics, or differential equations chosen from the following:	3
M 340L Matrices and Matrix Calculations	
M 341 Linear Algebra and Matrix Theory	
M 362M Introduction to Stochastic Processes	
M 372K Partial Differential Equations and Applications	
SDS 329C Practical Linear Algebra I	
Two courses in scientific computing, chosen from two of the following areas:	6
<b>Numerical Methods</b>	
CHE 348 Numerical Methods in Chemical Engineering and Problem Solving	
C S 323E Elements of Scientific Computing	
C S 323H Elements of Scientific Computing: Honors	
C S 367 Numerical Methods	
M 348 Scientific Computation in Numerical Analysis	
PGE 310 Formulation and Solution of Geosystems Engineering Problems	
SDS 335 Scientific and Technical Computing	
<b>Statistical Methods</b>	
BME 335 Engineering Probability and Statistics	
E E 351K Probability and Random Processes	
M 358K Applied Statistics	
M 378K Introduction to Mathematical Statistics	
<b>Other Computing Topics</b>	
C S 324E Elements of Graphics and Visualization	
C S 327E Elements of Databases	
C S 329E Advanced Topics in Elements of Computing (Approved topics)	
C S 377 Principles and Applications of Parallel Programming	
M 346 Applied Linear Algebra	
M 362M Introduction to Stochastic Processes	
M 368K Numerical Methods for Applications	
M 372K Partial Differential Equations and Applications	
M 375T Topics in Mathematics (Approved topics)	
M 376C Methods of Applied Mathematics	
M E 367S Simulation Modeling	
SDS 329D Practical Linear Algebra II	
SDS 374C Parallel Computing for Science and Engineering	

SDS 374D Distributed and Grid Computing for Science and Engineering	
SDS 374E Visualization and Data Analysis for Science and Engineering	
One of the following courses in applied computational science:	3
ASE 347 Introduction to Computational Fluid Dynamics	
BIO 321G Principles of Computational Biology	
BME 342 Biomechanics of Human Movement	
BME 346 Computational Biomolecular Engineering	
BME 377T Topics in Biomedical Engineering (Approved topics)	
CH 368 Advanced Topics in Chemistry (Approved topics)	
C S 324E Elements of Graphics and Visualization	
C S 329E Advanced Topics in Elements of Computing (Approved topics)	
ECO 363C Computational Economics	
E E 379K Topics in Electrical Engineering (Approved topics)	
GEO 325K Computational Methods	
M 375T Topics in Mathematics (Approved topics)	
M 374M Mathematical Modeling in Science and Engineering	
PHY 329 Introduction to Computational Physics	
An independent research course:	4
SDS 479R Undergraduate Research	

## Textile Conservation and Museum Studies Certificate

The Certificate in Textile Conservation and Museum Studies helps undergraduates equip themselves with the fiber science, exhibition planning, textile conservation, and museum management skills necessary to conserve textiles in various settings. It is designed to appeal to students across the University in science, history, information science, computational science, merchandising, fiber science and apparel design, and many other disciplines. The program is administered by the Division of Textiles and Apparel in the School of Human Ecology. To be admitted, a student must be in good standing in an approved undergraduate degree program and must have earned a grade of at least C- in each certificate course he or she has completed. Students may apply for admission to the program at any point in their undergraduate study; they are encouraged to apply as early as possible so that they can be advised throughout the program.

The following coursework is required:

Requirements	Hours
INF 304D Introduction to Information Studies	3
INF 335C Information in Cyberspace	3
TXA 205 and TXA 105L Textiles and Textiles Laboratory	3
TXA 219C and TXA 119L Applied Art in Visual Presentation and Applied Art in Visual Presentation Laboratory	3

TXA 325L	History of Dress and Cultural Change I	3
TXA 325M	History of Dress and Cultural Change II	3
TXA 352C	Field Experience in Textile Conservation	3
TXA 355D	Textiles Artifact Management and Conservation	3

## UTeach Natural Sciences Secondary Teaching Option Certificate

The UTeach Natural Sciences program offers a secondary teaching option certificate to students who intend to teach at the middle or high school level.

The following coursework is required, with grades of at least C-:

Requirements	Hours
One of the following courses:	3
BIO 337 Selected Topics in Biology (Topic 2: Research Methods: UTeach)	
CH 368 Advanced Topics in Chemistry (Topic 1: Research Methods: UTeach)	
PHY 341 Selected Topics in Physics (Topic 7: Research Methods: UTeach)	
HIS 329U Perspectives on Science and Mathematics	3
or PHL 329U Perspectives on Science and Mathematics	
Eighteen hours of professional development coursework consisting of the following:	18
EDC 651S Secondary School Teaching Practicum	
EDC 365C Knowing and Learning in Math and Science	
or UTS 350 Knowing and Learning in Math and Science	
EDC 365D Classroom Interactions	
or UTS 355 Classroom Interactions	
EDC 365E Project-Based Instruction	
or UTS 360 Project-Based Instruction	
UTS 101 & UTS 110 & UTS 170 Secondary Teacher Education Preparation: Step 1 and Secondary Teacher Education Preparation: STEP 2 and Student Teaching Seminar	

In addition, students must meet the following requirements to graduate and be recommended for certification:

1. University grade point average of at least 2.50
2. Successful completion of secondary teacher certification and identified discipline specific content courses
3. Successful passing of final teaching portfolio review, conducted by the UTeach Program in Natural Sciences

### Special Requirements

Students who successfully complete this certificate may be eligible for recommendation for state teaching certification if they have met all professional development and discipline specific content courses. Students seeking middle grades certification must also complete the

following courses with grades of at least C-: Educational Psychology 350G or Psychology 301 and 304; and Curriculum and Instruction 339E.

State of Texas teacher certification requirements are governed by the Texas Education Agency and are subject to change. Students must adhere to current teacher certification requirements, even if they differ from those listed in the University catalogs.

For more information about these requirements, students should consult with the UTeach-Natural Sciences academic adviser.

## Courses

The faculty has approval to offer the following courses in the academic years 2018-2019 and 2019-2020; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in the *General Information Catalog*. In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

## Natural Sciences

### Natural Sciences: NSC

#### Lower-Division Courses

##### NSC 301C. Freshman Seminar.

Restricted to first-semester freshmen. Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors. Two lecture hours and one discussion hour a week for one semester.

##### NSC 001D. Practicum in Medical Laboratory Science.

Restricted to medical laboratory science majors; contact the department for permission to register for this class. Students participate in a twelve-to sixteen-month off-campus education program. Forty laboratory hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Completion of all organized coursework for the Bachelor of Science in Medical Laboratory Science degree and consent of the program director.

##### NSC 001S. Natural Sciences Seminar.

Restricted to students in special programs in the College of Natural Sciences. Seminars may include study sessions, career and networking events, student and community speakers, and other subjects related to issues for students in science. Emphasis on student participation. May be repeated for credit.

##### NSC 302. Texas Interdisciplinary Plan: Critical Thinking Seminar.

Restricted to students in the Texas Interdisciplinary Plan or in the Gateway Program. An examination of fundamental concepts in critical thinking, including the role of intellectual virtues, an analysis of the elements of thought, Socratic thinking, and the application of universal intellectual standards. Three lecture hours a week for one semester, with

additional hours to be arranged. Liberal Arts 302 and Natural Sciences 302 may not both be counted. May not be repeated for credit.

### **NSC 303. Creative Communication of Scientific Research.**

Same as Communication 308. Learn to communicate about science, technology, and medicine to broad audiences in order to increase understanding of the impact these fields have on human lives. Three lecture hours a week for one semester. Communication 308 and Natural Sciences 303 may not both be counted.

### **NSC 306J. Hands-On Science I.**

Restricted to applied learning and development majors. The first of an integrated sequence of laboratory-based courses. Subjects include energy and motion, electrical circuits, atomic theory, waves, and sound. Two lecture hours and three laboratory hours a week for one semester. Natural Sciences 306J and 309 (Topic: Science for the Twenty-First Century I) may not both be counted. May not be counted toward a degree in the College of Natural Sciences.

### **NSC 306K. Hands-On Science II.**

Restricted to applied learning and development majors. The second of an integrated sequence of laboratory-based courses. Subjects include physical and chemical properties of matter, Earth's building blocks, plate tectonics, landforms, and weathering. Two lecture hours and three laboratory hours a week for one semester. Natural Sciences 306K and 309 (Topic: Science for the Twenty-First Century II) may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Natural Sciences 306J with a grade of at least C-.

### **NSC 306L. Hands-On Science III.**

Restricted to applied learning and development majors. The third of an integrated sequence of laboratory-based courses. Subjects include properties of life, compartments of living organisms, inheritance, adaptations, variations, and disease. Two lecture hours and three laboratory hours a week for one semester. Natural Sciences 306L and 309 (Topic: Science for the Twenty-First Century III) may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Natural Sciences 306J and 306K with a grade of at least C- in each.

### **NSC 306M. Hands-On Science IV.**

The fourth of an integrated sequence of laboratory-based courses. Subjects include astronomy and the earth's climate. Two lecture hours and three laboratory hours a week for one semester. Natural Sciences 306M and 309 (Topic: Science for the Twenty-First Century IV) may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Natural Sciences 306J and 306K with a grade of at least C- in each.

### **NSC 108, 208, 308, 408, 508, 608, 708, 808, 908. Topics in Natural Sciences.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Varies with the topic.

**Topic 1: Capstone Prospectus Seminar.** Restricted to students enrolled in the Evidence and Inquiry Certificate program or in the Health Science Honors Program. Seminar to prepare students for their capstone project by helping them develop a research prospectus, identify faculty mentors, and develop a target list of journals for publication of a report on their research. For each semester hour of credit earned, one lecture hour a week for one semester. Offered on the pass/fail basis only.

**Topic 2: Evidence and Inquiry Proposal Seminar.** Enrollment restricted to the Evidence and Inquiry Certificate program. Development of compelling, cross-disciplinary, and academically feasible questions of interest outside student's major area of study; design a field of study around those questions; and write a field proposal for faculty review. For each semester hour of credit earned, one lecture hour a week for one semester. Offered on the pass/fail basis only.

### **NSC 109, 209, 309. Topics in Natural Science.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

#### **Topic 3: Natural Sciences Ethics Seminar.**

**Topic 4: Polymathic Capstone Field Invention.** Restricted to students pursuing the Evidence and Inquiry Certificate. Guidance in developing a feasible interdisciplinary field of study and consulting with faculty who are familiar with the field. Substantive writing instruction to develop a proposal that describes and justifies the interdisciplinary field of study.

**Topic 5: Introduction to Applied Problem Solving.** Restricted to first-year students in the TIP Scholars program. Introduction to applied problem-solving with a focus on critical thinking and ethical reasoning on issues relevant to college students.

### **NSC 209P. Topics in Calculus for Emerging Scholars.**

Restricted to students in the Texas Interdisciplinary Plan Scholars Program. A workshop focusing on ideas more than computation and procedures, where students work in small groups on sets of problems designed to encourage advanced thinking about calculus. Three lecture hours a week for one semester. Mathematics 210T (Topic: Topics for Emerging Scholars) and Natural Sciences 209P may not both be counted. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Concurrent enrollment in an approved calculus course.

### **NSC 110E. Internship in the Sciences.**

Restricted to students in the College of Natural Sciences. Practical work experience related to the student's area of interest in natural sciences. Internships may be on or off campus, paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work. Individual instruction conducted on the Web. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Completion of fifteen semester hours of coursework and consent of instructor.

### **NSC 110H. Topics in Natural Sciences Honors Seminar.**

Restricted to students in honors programs in the College of Natural Sciences. Emphasis on student participation. Format may include student speakers, outside speakers, discussions, visits to laboratories, or other enrichment activities. The equivalent of one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

**Topic 1: Dean's Scholars First-Year Seminar.** Restricted to students in the Dean's Scholars Program. The equivalent of one lecture hour a week for one semester. Offered on the pass/fail basis only.

**Topic 2: Health Science Scholars First-Year Seminar.** Restricted to students in the Health Science Scholars Program. The equivalent of one lecture hour a week for one semester. Offered on the pass/fail basis only.

**Topic 3: Polymathic Scholars First-Year Seminar.** Restricted to students in the Polymathic Scholars Program. The equivalent of one lecture hour a week for one semester. Offered on the pass/fail basis only.

### **NSC 311. Critical Reasoning.**

Restricted to students in the Texas Interdisciplinary Plan program. An examination of the fundamental concepts in critical reasoning, including the analysis of argument, application of intellectual standards, and the role of intellectual virtues. Three lecture hours a week for one semester, with additional hours to be arranged.

### **NSC 115. Women in Natural Sciences Seminar.**

The work and lives of women scientists in a sociocultural context. One lecture hour a week for one semester.

### **NSC 118C, 218C, 318C. Forum Seminar Series.**

Restricted to freshmen and sophomores. Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse. For 118C, two lecture hours a week for eight weeks; for 218C, two lecture hours a week for one semester; for 318C, three lecture hours a week for one semester, or two lecture hours and one hour of supervised research a week for one semester. May be repeated for credit when the topics vary.

### **NSC 119, 219, 319, 419, 519, 619. International Learning Seminars.**

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Natural Sciences 119, 219, 319, 419, 519, 619 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Varies with the topic.

## **Upper-Division Courses**

### **NSC 120E. Internship in the Sciences.**

Restricted to students in the College of Natural Sciences. Practical work experience related to the student's area of interest in Natural Sciences. Internships may be on or off campus, paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work. Individual instruction conducted on the Web. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Upper-division standing and consent of instructor.

### **NSC 321. Introduction to Peer Mentoring and Leadership.**

Restricted to students in the College of Natural Sciences. Explores current theory and research related to peer mentoring and leadership within higher education. Includes interactive lectures; and the opportunity for students to identify and work through ethical choices as peer leaders; to study leadership concepts such as conflict resolution, diversity, and group dynamics; to work collaboratively; and to conduct independent research. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Consent of instructor.

### **NSC 122, 222, 322, 422, 522, 622, 722, 822, 922. Natural Science Topics.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

### **NSC 123, 223, 323, 423, 523, 623, 723, 823, 923. Natural Sciences Topics.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit

when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

**Topic 1: Polymathic Capstone Thesis Preparation Seminar.** Restricted to students pursuing the Evidence and Inquiry Certificate. Supports the research process to identify a faculty mentor, define appropriate thesis topics, develop an annotated bibliography, draft a thesis proposal, and develop an initial plan for drafting thesis. Additional prerequisite: Natural Sciences 109 (Topic 4).

### **NSC 124, 224, 324, 424, 524, 624, 724, 824, 924. Natural Sciences Topics.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

### **NSC 129, 229, 329, 429, 529, 629. International Learning Seminars.**

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Natural Sciences 129, 229, 329, 429, 529, 629 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Varies with the topic.

### **NSC 371. Capstone Thesis Seminar.**

Restricted course; contact the College of Natural Sciences Honors Center for permission to register. Directed reading, research, and discussion followed by the writing of a substantial thesis. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

## **Department of Astronomy**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

## **Astronomy: AST**

### **Lower-Division Courses**

#### **AST 301 (TCCN: ASTR 1303). Introduction to Astronomy.**

General introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 301, 302, 303, 307. May not be counted toward a degree in the College of Natural Sciences.

#### **AST 101L. Astronomy Discovery Laboratory.**

For nonscience majors. Hands-on projects in observational astronomy and related laboratory disciplines. Students work in small groups. Three laboratory hours a week for one semester. May not be counted by students with credit for Astronomy 103L. Prerequisite: Credit or registration for Astronomy 301.

#### **AST 302. Self-Paced Introduction to Astronomy.**

General, self-paced introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Self-paced. Only one of the following may be counted: Astronomy 301, 302, 303, 307. May not be counted toward a degree in the College of Natural Sciences.

### **AST 303. Introduction to Astronomy with Celestial Observations.**

General introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Introduces students to the night sky and includes some observational activities. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 301, 302, 303, 307. May not be counted toward a degree in the College of Natural Sciences.

### **AST 103L (TCCN: ASTR 1103). Astronomical Observations.**

For nonscience majors. Observations of the night sky with the naked eye and small telescopes; indoor laboratory activities. Two laboratory hours a week for one semester. May not be counted by students with credit for Astronomy 101L, 302, or 303. Prerequisite: Credit or registration for Astronomy 301 or 307.

### **AST 104. Undergraduate Astronomy Seminar.**

Designed for astronomy majors. Discussions about current astronomical research, with different topics emphasized each semester. One lecture hour a week for one semester. May be repeated twice for credit when the topics vary. Offered on the pass/fail basis only.

### **AST 307. Introductory Astronomy.**

Introduction to astronomy for science and engineering students. The solar system, stars, galaxies, and cosmology. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 301, 302, 303, 307. Prerequisite: Mathematics 305G or the equivalent or consent of instructor; high school trigonometry and physics are recommended.

### **AST 309 (TCCN: ASTR 1304). Topics in Astronomy for Nonscience Students.**

Selected topics in modern astronomy: solar system, galaxies, peculiar stars, cosmology, and others. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. May be repeated for credit when the topics vary. Prerequisite: Astronomy 301, 302, or 303.

**Topic 1: Popular Astronomy.** Survey of topics of greatest interest to the public and the media, including new planets, black holes, dark matter, dark energy, and the origin of the Universe.

### **AST 309C. Birth of Stars and Planets.**

Study of how stars and planets form, including discussions on the implications for the formation of our own solar system. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. Astronomy 309 (Topic: Birth of Stars and Planets) and 309C may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309G. Popular Astronomy for Nonscience Students.**

Subjects include new planets, neutron stars, supernovae, gamma-ray bursts, black holes, dark matter, dark energy, and the origin of the universe. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. Astronomy 309 (Topic 1: Popular Astronomy) and 309G may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309L. Search for Extraterrestrial Life.**

Origin of life in the solar system, existence of other planetary systems, possibilities and techniques for detection of and communication with other intelligences. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. May not be counted toward

a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309N. Lives and Deaths of Stars.**

How stars live and die; extremes of stars and their life cycles. Exotic objects such as white dwarfs, supernovae, neutron stars, pulsars, and black holes. Specific subjects may vary with instructor. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309P. Astronomy in Science Fiction.**

The use of astronomy and other sciences in science fiction literature. Critical analysis of selected novels as to the validity of the astronomy used. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. Prerequisite: Astronomy 301, 302, or 303.

### **AST 309Q. Time and the Cosmos.**

From the beginning of time in the Big Bang to the end of time in the black hole. Includes the early universe, the formation and evolution of single and double stars, and the supercompact objects they eventually become: white dwarfs, pulsars, and black holes. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309R. Galaxies, Quasars, and the Universe.**

Galaxies, quasars, giant black holes; cosmic evolution; the origin and future of the universe. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309S. The Solar System.**

The nature, origin, and evolution of our solar system, including planets, moons, and other bodies. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301 or 307.

### **AST 309T. The Milky Way Galaxy.**

Our spiral system of stars, gas, and dust; star formation. Designed for non-College of Natural Sciences majors. Three lecture hours a week for one semester. Prerequisite: Astronomy 301 or 307.

### **AST 110C, 210C, 310C. Conference Course in Astronomy.**

Restricted enrollment; contact the department for permission to register. Independent research course with supervision by astronomy faculty member or research scientist. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit.

### **AST 110K, 210K, 310K. Topics in Astronomy Research.**

Designed for science and engineering majors. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor or adviser.

### **AST 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Astronomy.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in

residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## Upper-Division Courses

### AST 321. Current Problems in Astronomy.

For nonscience majors. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; and Astronomy 301, 302, 303, or consent of instructor.

### AST 324. Origins: The Universe, Stars, Planets, and Life.

For nonscience majors. Cosmic origins from the Big Bang to life, and the connections among the origins of stars, planets, and life. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Astronomy 301, 302, 303, or consent of instructor.

### AST 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Astronomy.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### AST 350L. History and Philosophy of Astronomy.

Historical influence of astronomical concepts on social, economic, literary, and scientific life; the place of astronomy in society. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Astronomy 301, 302, 303, or consent of instructor.

### AST 351. Astronomical Instrumentation.

A hands-on course in computer-controlled optical instrumentation. Intended for natural science and engineering students interested in the practical aspects of instrument design and construction. Includes optics and optical design, electronics, machining and mechanical design, and computer interfacing. Students work in groups and as teams to design a computer-controlled optical instrument. The equivalent of three lecture hours a week for one semester. Prerequisite: Upper-division standing in the College of Natural Sciences or the Cockrell School of Engineering, or consent of instructor.

### AST 352K. Stellar Astronomy.

Properties of stars and starlight: principles of radiation; interpretation of stellar spectra. Observational techniques such as photometry, spectroscopy, and telescopes and detectors; variable stars; binary stars. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and one of the following: Physics 301 and 303L; 301 and 316; 303K and 303L; or 303K and 316.

### AST 352L. Positional, Dynamical, and Kinematical Astronomy.

Coordinate systems and time; stellar positions and motions; the kinematics and dynamics of star clusters and galaxies. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Mathematics 427K.

### AST 152M. Stellar Astronomy Laboratory.

An introduction to practical observational techniques in astronomy, designed for astronomy majors or advanced students in a physical science. Exercises on the spectroscopy, photometry, and positions of stars using a sixteen-inch telescope on campus. Three laboratory hours a week for one semester. With consent of instructor, may be repeated

for credit. Prerequisite: Physics 316 and 116L; credit or registration for Astronomy 352K is recommended.

### AST 353. Astrophysics.

Survey of the physics of stellar and nonstellar radiation laws, stellar atmospheres and interiors; high-energy astrophysics. Designed for science and engineering majors. Three lecture hours a week for one semester. Prerequisite: One of the following: Physics 301 and 303L; 301 and 316; 303K and 303L; or 303K and 316.

### AST 358. Galaxies and the Universe.

Our galaxy and its constituents; stars and interstellar matter. Properties of other galaxies; galaxy interactions and mergers; expansion and evolution of the universe. Designed for science and engineering majors. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and one of the following: Physics 301 and 303L; 301 and 316; 303K and 303L; or 303K and 316.

### AST 364P. Planetary Systems.

Modern studies of the solar system, including properties of the planets and smaller bodies, and the origin of planetary systems. Three lecture hours a week for one semester. Astronomy 364 and 364P may not both be counted. Prerequisite: Upper-division standing; Physics 316 or 303L; and Astronomy 307, 352K, or 353.

### AST 367M. Physical Science: Methods of Astronomy.

Same as Physical Science 367M. An introductory, self-paced course in the methods of astronomy that emphasizes learning astronomical principles through observations. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Arts, Plan I, degree with a major in astronomy. Prerequisite: Upper-division standing and nine semester hours of coursework in mathematics and/or science, including one of the following: Physical Science 303, 304, Astronomy 301, 302, 303. Equivalent preparation in mathematics, physics, chemistry, or earth sciences may be substituted with written approval of the instructor.

### AST 175, 275, 375. Topics in Astronomy Research.

Designed for science and engineering majors. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor or adviser.

### AST 175C, 275C, 375C. Conference Course in Astronomy.

Restricted enrollment; contact the department for permission to register. Independent research course with astronomy faculty member or research scientist. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit.

### AST 376. Special Topics in Advanced Astronomy.

Designed for science majors. Three lecture hours a week for one semester. Up to six semester hours may be counted toward the major requirement for the Bachelor of Arts with a major in astronomy. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor.

**Topic 1: Observational Methods in Astronomy.** A hands-on course in astronomical observations and data analysis. Explores astronomical observing techniques, data reduction and analysis, and interpretation of results. The coursework will include regular exercises in obtaining and analyzing data to solve currently relevant astronomical problems. Additional prerequisite: Astronomy 376R with a grade of at least C-.

### **AST 376C. Cosmology.**

The laws of physics applied to the Universe at large: its featureless beginning in the Big Bang, its fundamental constituents including radiation, atoms, and dark matter; the discoveries of universal expansion and dark energy, and a structure reflected in the web of galaxies. Designed for science and engineering majors. Three lecture hours a week for one semester. Astronomy 376 (Topic: Cosmology) and 376C may not both be counted. Prerequisite: Upper-division standing, and one of the following: Physics 301 and 303L; 301 and 316; 303K and 303L; or 303K and 316.

### **AST 376R. A Practical Introduction to Research Methods.**

Restricted to science and engineering majors. Practical exercises including analysis of imaging data, visualization, programming exercises with Python, IDL or other languages, statistical analyses, and training for papers and oral presentations. Three lecture hours a week for one semester. Astronomy 376 (Topic: Practical Intro to Research) and 376R may not both be counted. Prerequisite: Mathematics 305G or the equivalent; prior computing experience and an introductory astronomy course are recommended.

### **AST 379H. Honors Tutorial Course.**

Restricted to science majors approved to graduate with honors. Research project and thesis for students electing to take the honors program in astronomy. Conference course. May be repeated once for credit. Prerequisite: Consent of the departmental honors adviser.

## **Biology**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### **Biology: BIO**

#### **Lower-Division Courses**

##### **BIO 101C, 301C, 401C, 601C. Topics in Biology.**

Topics in biology that are especially relevant to current issues and problems in modern society. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics require one additional discussion hour or three or four additional laboratory hours a week. May not be counted toward a degree in biology. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 1: The Biology of Being Human.** Introductory biology course that covers human evolution, genetics and genomics, behavior, population growth and environmental issues. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 301D. Biology for Business, Law, and Liberal Arts.**

Designed for nonscience majors. The scientific method and the social uses of scientific information. Topics include diet and chronic disease, radiation biology, DNA fingerprinting, the biology of learning, conservation of biotic diversity, and the biology of reproduction. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 301E. Problems in Modern Biology.**

An introduction to major concepts in biology, with emphasis on topics, such as genetics, that are relevant to current issues in the field. Three lecture hours and one discussion hour a week for one semester. Biology 301E and 301L may not both be counted; Biology 301E and 301M may

not both be counted. May not be counted toward a degree in biology. Prerequisite: Admission to the Plan II Honors Program.

##### **BIO 301G. Genetics in the 21st Century.**

Designed for non-science majors. An elementary course in human genetics and its social impact. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 301G, 309F, 346. May not be counted toward a degree in the College of Natural Sciences, except for the Bachelor of Science in Human Development and Family Sciences.

##### **BIO 301L (TCCN: BIOL 1308). Molecules to Organisms.**

Designed for nonscience majors. Introduction to the structure and function of organisms from the molecular to the organ system level; an integrated approach to cell and molecular biology, genetics, development, and physiology of organisms. Three lecture hours and one discussion hour a week for one semester. Biology 301L and 311C may not both be counted; Biology 301L and 311D may not both be counted. Biology 301E and 301L may not both be counted. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 301M (TCCN: BIOL 1309). Ecology, Evolution, and Society.**

Designed for nonscience majors. Introduction to environmental adaptations, diversity of organisms, species interactions, organization and processes of communities, population growth and limitations, evolution and population genetics, origin of life, and human impact on the environment. Three lecture hours and one discussion hour a week for one semester. Biology 301M and 311D may not both be counted. Biology 301E and 301M may not both be counted. May not be counted toward a degree in the College of Natural Sciences, except for the Bachelor of Science in Human Development and Family Sciences.

##### **BIO 102C, 202C, 302C, 402C. Conference Course.**

Supervised study of selected subjects in biology, by individual arrangement with the instructor. Conference course. May be repeated for credit. Prerequisite: Varies with instructor.

##### **BIO 305F. How Plants Sense and Respond to Stimuli.**

Designed for nonscience majors. Exploration of the ways plants sense information about their environment and adapt their growth accordingly; similarities between plant and animal sensory physiology. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 206L (TCCN: BIOL 1106, BIOL 1107). Introductory Laboratory Experiments in Biology.**

The organizing principles of biology (such as molecular and cellular functions, reproduction, development, homeostatic mechanisms, and organismal physiology and behavior) are used within a comparative and evolutionary framework to train students in modern laboratory techniques, bioinformatics, experimental design, and interpretation of results. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Credit or registration for Biology 311C or 311D.

##### **BIO 208L. Field Biology.**

Field projects, laboratory exercises, field trips, and computer simulation exercises to acquaint students with the principles and applications of ecology and some of the experimental and descriptive methods of ecological investigations. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Credit or registration for Biology 311D.

### **BIO 309D. The Human Body.**

Designed for nonscience majors. Introduction to the anatomical systems of the human body, their physiological functions and interrelationships. Three lecture hours and one discussion hour a week for one semester. Biology 309D and 365R may not both be counted. May not be counted by students with credit for Biology 365S. May not be counted toward a degree in the College of Natural Sciences, except for the Bachelor of Science in Human Development and Family Sciences.

### **BIO 311C (TCCN: BIOL 1306). Introductory Biology I.**

Introduction to biological energy transformation, cell structure and physiology, and gene expression. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 301L, 211, 311C. Biology 311C and 212 may not both be counted. Prerequisite: Credit or registration for Chemistry 301 or 301H.

### **BIO 311D (TCCN: BIOL 1307). Introductory Biology II.**

Introduction to mechanisms of inheritance, evolution, physiology, and species interactions. Three lecture hours and one discussion hour a week for one semester. Biology 301L and 311D may not both be counted. Biology 301M and 311D may not both be counted. Prerequisite: Biology 311C with a grade of at least C-.

### **BIO 315H. Advanced Introduction to Genetics: Honors.**

Basic principles of genetics and cell biology. Emphasis on gene structure and regulation; transmission of heritable traits; structure and function of cells; bacterial and viral genetics; and recombinant DNA technology. Three lecture hours and one discussion hour a week for one semester. Prerequisite: A score of 5 on the College Board Advanced Placement Examination in Biology and credit or registration for Chemistry 301 or 301H.

### **BIO 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Biology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Biological Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **BIO 320. Cell Biology.**

Principles of eukaryotic cell structure and function; macromolecules, membranes, organelles, cytoskeleton, signaling, cell division, differentiation, motility, and experimental methodologies. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 320L. Cell Biology Laboratory.**

Explores the complex structures and functions of cells through direct observation and experimentation. Subjects may include regulation of gene transcription and translation, protein sorting, organelles and membrane trafficking, cytoskeletal dynamics, and cell division. Use a combination of modern molecular biology, biochemistry, and microscopy techniques, with a strong emphasis placed on hypothesis-driven approaches, proper experimental design, and clear scientific writing and presentation. One lecture hour and five laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Sciences 311.

### **BIO 321G. Principles of Computational Biology.**

Introduces computational methods for the analysis of nucleic acid and protein sequences, with applications towards biological problems. Performance assessment will be based on experiential learning methods. Three lecture hours and two computer laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H; Statistics and Data Sciences 328M (or Statistics and Scientific Computation 328M); and Mathematics 408C, 408S, or 408R.

### **BIO 321L. Aquatic Entomology.**

The taxonomy of aquatic insects; the use of aquatic insects in biomonitoring. Two lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Biology 321L, 370C (Topic: Applied Aquatic Entomology), 384K (Topic 13). Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

### **BIO 322. Structure, Physiology, and Reproduction of Seed Plants.**

The principles of structure and functioning of higher plants; special attention to the dynamics of growth and development and reproduction. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, Chemistry 302 or 302H, and concurrent enrollment in Biology 122L.

### **BIO 122L. Structure, Physiology, and Reproduction of Seed Plants Laboratory.**

Observation of structure and reproduction in seed plants and employment of experimental techniques that demonstrate physiological processes, especially processes of growth and development. Two laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Biology 322; and the following with a grade of at least C-: Biology 206L, 208L, 226L or Environmental Sciences 311.

### **BIO 323L. Laboratory Studies in Cell Biology.**

Research exercises involving light/electron microscopy, image processing, autoradiography, chromatography, fractionation, flow cytometry, spectroscopy, diffraction, antibody labeling, cell growth, and kinetics. One lecture hour and four laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Sciences 311; and credit or registration for Biology 320.

### **BIO 324. Survey of the Plant Kingdom.**

Survey of the groups of living and fossil plants, comparing organization and reproduction to understand major shifts in the evolution of plant life. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and concurrent enrollment in Biology 124L.

### **BIO 124L. Survey of the Plant Kingdom Laboratory.**

Hands-on exploration of major plant groups emphasizing organization, reproduction and evolution. Cultures, prepared and living material examined. Local field trips. Designed to pair with Biology 324 lectures. Two laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Biology 324; and the following with a grade of at least C-: Biology 206L, 208L, 226L or Environmental Sciences 311.

### **BIO 325. Genetics.**

Basic principles of Mendelism, molecular genetics, structure and function of genes and chromosomes, populations and evolution. Three lecture hours and one discussion hour a week for one semester. Biology 325 and 325H may not both be counted. Prerequisite: Biology 311C and 311D with a grade of at least C- in each.

**BIO 325H. Genetics: Honors.**

Basic principles of genetics and evolution. Emphasis on population genetics and natural selection; structure and function of organ systems; behavioral ecology; and mutational analysis of organismal development. Three lecture hours and one discussion hour a week for one semester. Biology 325 and 325H may not both be counted. Prerequisite: Biology 315H with a grade of at least C-.

**BIO 325L. Laboratory Experience in Genetics.**

Experimentation and direct observation in fundamental aspects of transmission genetics. One lecture hour and four laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Sciences 311.

**BIO 325T. Human Genetics.**

Genomics, cancer genetics, identification and analysis of human disease genes, and monogenic and multifactorial traits in humans. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 226L. General Microbiology Laboratory.**

Introduction to microbiology laboratory techniques and experimental demonstration of principles of microbiology. One lecture and three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 326M or 326R.

**BIO 326M. Introductory Medical Microbiology and Immunology.**

Designed primarily for nursing and prepharmacy students. Overview of the structure, function, and genetics of bacteria, viruses, and fungi, with emphasis on the interactions between micro-organisms and the human host. Includes principles of microbial pathogenesis, the host's innate and adaptive immune responses to infection, epidemiology, laboratory diagnosis, and antimicrobial chemotherapy and vaccines. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 311C; Biology 325 or 325H with a grade of at least C-; Chemistry 301 with a grade of at least C-; and one of the following with a grade of at least C-: Mathematics 408C, 408K, 408N, 408R, Statistics and Scientific Computation 302.

**BIO 326R. General Microbiology.**

Overview of the major areas of microbiological study, including cell structure and function, genetics, host-microbe interactions, physiology, ecology, diversity, and virology. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 325 or 325H, and Chemistry 302 or 302H with a grade of at least C-.

**BIO 327. General Phycology.**

A general survey of the algae and of their biology. Three lecture hours a week for one semester. Biology 327 and 388J may not both be counted. Prerequisite: Biology 324, 124L, and 325 or 325H, with a grade of at least C- in each, and concurrent enrollment in Biology 127L.

**BIO 327D. Emerging Infectious Diseases.**

Genomic and proteomic tools used to understand the causes of human infectious diseases. Covers genome sequencing, community sequencing, proteomics, microarrays, and human polymorphism analysis; and how these technologies have been applied to the study of important human viral diseases. Also includes extensive coverage of the molecular and clinical biology of these diseases. Three lecture hours a week for one semester. Biology 327D and 337 (Topic: Emerging Infectious Diseases)

may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 327E. Epigenetics.**

A study of epigenetic modifications, the covalent modifications of DNA or histones that cause changes in gene expression. Particular attention is given to how experience or environmental factors epigenetically modify health or behavior in animals. Three lecture hours a week for one semester. Biology 327E and 337 (Topic: Epigenetics) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 327G. Genomics.**

Genome structure, organization, and function of model organisms; theory and methodology of genetic and physical mapping; sequencing analysis and annotation; genome duplication and evolution; and ethics for biotechnology and cloning. Three lecture hours a week for one semester. Biology 327G and 337 (Topic: Genomics) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 127L. Laboratory in General Phycology.**

Survey of various algal groups, including direct observations of their biology, exposure to research techniques, and instruction in culture procedures. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 327; and the following with a grade of at least C-: Biology 206L, 208L, 226L, or Environmental Sciences 311.

**BIO 328. Introductory Plant Physiology.**

General principles of the mineral nutrition, water relations, metabolic activities, growth and development of green plants. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Chemistry 302 or 302H.

**BIO 328D. Discovery Laboratory in Plant Biology.**

Learning methods of experimental design, data gathering, data interpretation, and data presentation, including original experiments relating to questions of current interest in plant physiology. Five laboratory hours a week for one semester. Biology 328D and 337 (Topic: Discovery Laboratory in Plant Biology) may not both be counted. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Sciences 311.

**BIO 128L. Laboratory Experiments in Plant Physiology.**

Introduction to experimental techniques used in the study of the mineral nutrition, water relations, metabolic activities, growth, and development of green plants. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 328; and the following with a grade of at least C-: Biology 206L, 208L, 226L, or Environmental Sciences 311.

**BIO 329. Medical Mycology.**

A basic introduction to medical mycology and an overview of research involving both the fungal zoopathogen and its host. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

**BIO 129L. Medical Mycology Laboratory.**

Basic techniques for the identification and manipulation of fungi of medical importance. Three laboratory hours a week for one semester. Prerequisite: Biology 226L with a grade of at least C-; and credit with a grade of at least C- or registration for Biology 329.

### **BIO 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Biology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the student abroad adviser in the School of Biological Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **BIO 330. Molecular Biology of Animal Viruses.**

Mechanisms by which viruses replicate and kill or transform cells. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H, and 326M or 326R with a grade of at least C- in each.

### **BIO 230L. Virology Laboratory.**

Basic experimental techniques applied to selected bacteriophages and animal viruses. Four laboratory hours and one discussion hour a week for one semester. Prerequisite: Biology 226L with a grade of at least C-, and credit with a grade of at least C- or registration for Biology 330.

### **BIO 331L. Laboratory Studies in Molecular Biology.**

The methods and principles of molecular biology in a research laboratory context. Students conduct a research project directed by a faculty member. One lecture hour and four and one-half laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Sciences 311.

### **BIO 335. Introduction to Biochemical Engineering.**

Microorganisms in chemical and biochemical synthesis; genetic manipulation of cells by classical and recombinant DNA techniques. Enzyme technology; design of bioreactors and microbial fermentations; separations of biological products. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 335, Biomedical Engineering 339, Chemical Engineering 339, 379 (Topic: Introduction to Biochemical Engineering). Prerequisite: Biochemistry 339F (or Chemistry 339K) or 369 (or Chemistry 369), and Biology 311C with a grade of at least C-.

### **BIO 336. Tumor Biology.**

Covers core aspects of cancer pathology, treatment, epidemiology, the discovery of oncogenes and tumor suppressors, and the molecular genetics underlying the characteristic features of malignant tumors (including metastatic behavior, genomic instability, angiogenesis, cell cycle regulation, and apoptosis). Strong emphasis on the biochemical functions of cancer-related proteins and enzymes and therapeutic approaches based on our understanding of these proteins. Important experimental approaches that have influenced our current understanding of cancer will also be stressed. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-; and one of the following with a grade of at least C-: Biochemistry 339F, 369, Biology 330, 360K.

### **BIO 137, 237, 337, 437. Selected Topics in Biology.**

Recent developments and research methods in the biological sciences. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics may require additional hours. May be repeated for credit when the topics vary. Prerequisite: Biology 325 or 325H with a grade of at least C-; additional prerequisites vary with the topic.

**Topic 1: Seminar in Human Biology.** One lecture hour a week for one semester. Only offered as Biology 137. Prerequisite: Biology 346 with a grade of at least C-.

**Topic 2: Research Methods: UTeach.** Restricted to students in the UTeach-Natural Sciences program. Students perform independent inquiries and use skills from mathematics and science to solve research problems.

**Topic 3: Natural History of Protists.** A study of protista, a wide variety of eukaryotic organisms which are either unicellular or phylogenetically closely allied to unicellular organisms. Description of the basic taxonomic and ecological groups, and description of the natural history of the major groups of organisms.

**Topic 4: Computational Neuroscience and Neural Networks.**

**Topic 5: Grant Writing and Research Skills.** Explores skills required of research scientists, and specifically prepares students to submit a NSF Graduate Research Fellowship Proposal (NSF-GRFP) grant proposal during the semester (deadline for GRFP submission is typically during the last week of October). There are weekly writing milestones to complete an NSF-GRFP proposal by the submission deadline. Additional prerequisite: Upper-division standing and Statistics and Data Sciences 328M with a grade of at least C-.

**Topic 6: Practical Ethics for Biologists.** Incorporates weekly case studies to introduce common ethical issues faced by biologists in the field and the lab. Employs the Systematic Moral Analysis framework to critically examine ethical issues in scientific inquiry in general (data integrity, who pays for science) as well as issues specific to biologists in the field and laboratory (questionable research practices, conflicts of interest, expertise vs advocacy). Explores issues of personal values, implicit bias and environmental justice.

**Topic 7: Sleep Science.** Explores the basics of sleep science, current research questions and novel approaches, and the range of sleep disorders and their diagnoses. Additional prerequisite: Neuroscience 330 with at least a grade of C-.

### **BIO 337J. Computational Biology Laboratory.**

Overview of computational biology, with emphasis on nucleic acid sequence analysis and databases. Class projects and self-learning exercises. Two lecture hours and three computer laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H, and Statistics and Data Sciences 328M (or Statistics and Scientific Computation 328M) with a grade of at least C- in each.

### **BIO 438L. Animal Communication.**

Animal communication from a multidisciplinary perspective, with emphasis on quantitative analysis, sensory processing, and evolution of signals. Three lecture hours and three laboratory hours a week for one semester, with computer laboratory hours as required. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 359K or 370 with a grade of at least C-.

### **BIO 339. Metabolism and Biochemistry of Microorganisms.**

A study of the metabolic processes of microorganisms, using a biochemical approach. Three lecture hours a week for one semester. Biology 339 and 391R may not both be counted. Prerequisite: Biology 326R with a grade of at least C-.

### **BIO 339M. Bacterial Behavior and Signaling Mechanisms.**

Advanced studies in how bacteria perceive their environment and communicate with each other. Subjects may include chemotaxis and motility, morphogenesis and development, and secretion and virulence. Taught entirely through reading and discussion of original articles. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

### **BIO 340L. Biology of Birds.**

Anatomy, physiology, classification, and ecology of birds. Two lecture hours and three laboratory hours a week for one semester. Prerequisite:

The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Sciences 311.

#### **BIO 344. Molecular Biology.**

Molecular basis of cellular processes: gene structure and function, DNA replication, RNA and protein synthesis, viruses, molecular aspects of immunology and cancer, and recombinant DNA. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H, and Biochemistry 369 or 339F with a grade of at least a C-.

#### **BIO 345E. Endocrinology.**

Vertebrate endocrinology (primarily mammalian), with a focus on human pathophysiology. Three lecture hours and one discussion hour a week for one semester. Biology 337 (Topic: Endocrinology) and 345E may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

#### **BIO 346. Human Biology.**

Introduction to human evolution, genetics, sexuality, senescence, and population growth. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 301G, 309F, 346. Prerequisite: Biology 325 or 325H with a grade of at least C-.

#### **BIO 446L. Human Microscopic and Gross Anatomy.**

Designed for students preparing for biomedical research and the health professions. Focuses on microscopic and gross anatomy of human tissues and organs, with an emphasis on structure function relationships. Subjects include the effects of disease and aging in addition to normal human anatomy. Three lecture hours and four laboratory hours a week for one semester. Prerequisite: The following courses with a grade of at least C-: Biology 325 or 325H; Chemistry 301; and Mathematics 408C, 408K, 408N, 408R, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), or 328M (or Statistics and Scientific Computation 328M).

#### **BIO 448L. Invertebrate Biology.**

A study of the diversity and evolution of multicellular invertebrate animals, with emphasis on common themes in animal body construction and function. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 349. Developmental Biology.**

Principles of animal development, with emphasis on developmental mechanisms. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

#### **BIO 349L. Experiments in Developmental Biology.**

An investigation of methods and principles of developmental biology in a laboratory context, with emphasis on animal embryology using molecular techniques and microscopy. One lecture hour and six laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 350M. Plant Molecular Biology.**

Fundamentals of plant molecular biology, including structure and expression of the chloroplast and mitochondrial genomes. Three lecture hours a week for one semester. Biology 350M and 388M may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

#### **BIO 351. Economic Botany.**

An in-depth analysis of the origin of domesticated plant species, the role in nature of plant products, and the ways natural products have been altered through artificial selection. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

#### **BIO 352. Reproductive Biology of Flowering Plants.**

Pollination biology, breeding systems, reproductive strategies, and fruit and seed dispersal from evolutionary and ecological vantage points. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

#### **BIO 353F. Field Entomology.**

A field course on insects, with emphasis on field study techniques, visual identification of species, collecting techniques, and curation in the field. Meets five days a week for one hour a day during a summer-session term; additional fieldwork to be arranged, including extended field trips. Biology 337 (Topic: Field Entomology) and 353F may not both be counted. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 453L. Entomology.**

Characteristics, importance, and biology of the major groups of insects. Two lecture hours and three laboratory hours a week for one semester, with additional fieldwork hours to be arranged. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 354C. Cell Biology of Human Birth Defects.**

Explores the link between basic cell biology, human genetics, and human birth defects using current scientific literature exposing students to critical thinking and the scientific method, as well as the application of these tools to the study of biology. Three lecture hours a week for one semester. Biology 337 (Topic: Developing Biology) and Biology 354C may not both be counted. Prerequisite: Biology 349 with a grade of at least C-.

#### **BIO 354L. Ichthyology.**

Overview of the evolution, biology, and ecology of fishes, emphasizing freshwater fishes. Three lecture hours and three hours of laboratory or fieldwork a week for one semester, with field trips to be arranged. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 455L. Vertebrate Natural History.**

Phylogeny, taxonomy, life histories, habits, and distribution. Two lecture hours and three hours of laboratory or fieldwork a week for one semester, with field trips to be arranged. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 456L. Limnology and Oceanography.**

Same as Marine Science 440. An introduction to the study of the interactions between aquatic organisms and their environments. Two lecture hours and six laboratory hours a week for one semester. Prerequisite: Chemistry 302 or 302H; and the following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

#### **BIO 357. Evolutionary Ecology.**

Principles of modern ecology, particularly as they relate to natural selection and evolutionary theory. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 359J. Behavioral Ecology.**

Advanced topics in behavioral ecology, with detailed consideration of animal communication, altruism, sexual selection, plant-animal interactions. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 359K or 370 with a grade of at least C-.

**BIO 359K. Principles of Animal Behavior.**

An introduction to the study of animal behavior: descriptive analysis of behavior; physiological basis of behavior; development of behavior; adaptive significance and evolution of behavior; communication and social behavior. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 359R. Animal Sexuality.**

The biology of sexuality, including genetics, morphology, physiology, and psychology of sex. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 360K. Immunology.**

The basic concepts of humoral and cell-associated immune phenomena. Three lecture hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 326R or 326M.

**BIO 260L. Immunology Laboratory.**

Current techniques in experimental cellular and humoral immunology. One hour lecture and four laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-; Biology 206L, 208L, 226L, or Environmental Science 311 with a grade of at least C-; and credit or registration for Biology 360K.

**BIO 360M. Molecular Immunology.**

An advanced immunology course with an emphasis on molecular models and medical relevance. Three lecture hours a week for one semester. Biology 337 (Topic: Molecular Immunology) and 360M may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 360K with a grade of at least B-.

**BIO 361. Human Infectious Diseases.**

Etiology, pathogenesis, diagnosis, and immunobiology of the major microbial diseases, with emphasis on their prevention. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H, and Biology 326M or 326R with a grade of at least C- in each.

**BIO 361L. Clinical Bacteriology Laboratory.**

Training in techniques required for independent work in diagnostic and epidemiological bacteriology. Two lecture hours and five laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C- in each: Biology 325 or 325H; 226L; and 326R or 326M.

**BIO 361T. Comparative Animal Physiology.**

Physiology of organ systems in animal phyla, with special emphasis on physiological adaptations of organisms to their environment. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 463L. Plant Systematics.**

Principles of plant classification, phylogeny, and diversity as exemplified by families and species of flowering plants found seasonally in Texas with an emphasis on the local flora. Two lecture hours and three laboratory hours a week for one semester, with additional field trips to be arranged. Biology 262 and 262L, and 463L may not both be counted.

Prerequisite: The following with grades of at least C-: Biology 325 or 325H; and Biology 206L, 208L, 226L, or Environmental Science 311.

**BIO 364. Microbial Ecology.**

Population, community, and ecosystem ecology of microbes and microbiomes. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 365S. Human Systems Physiology.**

Overview of human physiology, including the cardiovascular, respiratory, and renal systems, with an emphasis on critical thinking, integration, and application. Additional subjects include membrane movement, osmolarity and tonicity, endocrinology, and neurophysiology. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 311C; Biology 325 or 325H, and Chemistry 301 or 301H with a grade of at least C- in each; and one of the following with a grade of at least C-: Mathematics 408C, 408K, 408N, 408R, or Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302).

**BIO 165U. Human Systems Physiology Laboratory.**

Offers hands-on experience in human physiology and encourages critical thinking via case study application. Explores the scientific method through the reading of scientific journal articles; writing protocols for basic physiological experiments; and collecting, analyzing, and presenting data. Three laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and credit or registration for Biology 365S.

**BIO 366. Microbial Genetics.**

Molecular biology of nucleic acids; biosynthesis of macromolecules, transfer of genetic material from cell to cell, recombination, mutagenesis, and regulatory mechanisms. Three lecture hours a week for one semester. Biology 366 and 391S may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

**BIO 366R. Molecular Genetics and Medicine.**

Implementation of molecular genetics techniques in medicine. Includes application of diagnostic and therapeutic techniques for several genetic disorders and infectious diseases. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 367C. Cellular and Molecular Bases of Neural Development.**

An introduction to the principles by which the neural tube (brain and spinal cord) forms during embryonic development. Subjects include the cellular and molecular mechanisms underlying the formation of a three-dimensional neural tube and its division into forebrain, midbrain, hindbrain, and spinal cord. Three lecture hours a week for one semester. Biology 365N and BIO 367C may not both be counted. Prerequisite: One of the following with a grade of at least C-: Biology 325, Neuroscience 330, 365R.

**BIO 369F. Field Herpetology.**

Species identification by sight and sound, and research techniques such as sampling populations, data collection, and analysis. One lecture hour and five laboratory hours a week for one semester, with additional field hours to be arranged. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

**BIO 369L. Herpetology.**

Biology of amphibians and reptiles, including evolution, ecology, behavior, physiology, life history, and identification. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following

with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

### **BIO 370. Evolution.**

Introduction to modern evolutionary biology, focusing on the evolution of molecular, developmental, morphological, and behavioral traits. Genetic and ecological bases of evolutionary changes within populations and of evolutionary divergence in animals and plants. Three lecture hours and one discussion hour a week for one semester. Biology 370 and 385K (Topic 2: Evolution) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 170C, 270C, 370C, 470C. Conference Course.**

Supervised study of selected topics in biology, by individual arrangement with the instructor. Conference course. May be repeated for credit when the topics vary. Prerequisite: Biology 325 or 325H with a grade of at least C-; additional prerequisites vary with the topic.

### **BIO 471. Introduction to Systematics.**

Study of diversification of living and fossil organisms, including speciation, biogeography, taxonomy, and phylogeny of genes, species, and higher taxa. The lecture and laboratory include a significant amount of computational molecular phylogenetics. Three lecture hours and three laboratory hours a week for one semester. Biology 458L and 471 may not both be counted. Prerequisite: Biology 325 or 325H, and 370 with a grade of at least C-.

### **BIO 471G. Natural History Museum Science.**

An introduction to curatorial practices in natural history museums. Three lecture hours and one discussion hour a week for one semester; students also complete a twenty- to thirty-hour curatorial project. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 371L. Experimental Physiology.**

Experimental approach to physiological mechanisms by which animals adapt to their environment. One lecture hour, four laboratory hours, and two hours of computer work a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

### **BIO 372C. Biology Peer Mentors in Research/Teaching.**

Students work as peer mentors and assistants in the teaching of biology, with emphasis on developing instructional materials that teach fundamental biology with real world data. Students mentor students for at least three hours a week in addition to other weekly meetings. Biology 372C and Chemistry 372C may not both be counted. Prerequisite: Biology 311C, 311D, and 325, or Biology 315H and 325H, with a grade of at least B in each; and consent of the undergraduate adviser.

### **BIO 373. Ecology.**

An introduction to ecology, the study of relationships among organisms and between organisms and their environment; adaptations, population, communities, and ecosystems. Includes both plants and animals and both terrestrial and aquatic ecosystems. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 373L. Ecology Laboratory.**

Intensive field ecology. Includes group field experiment and observation, independent projects, and field trips to other vegetation zones. Students complete weekly write-ups of observation and data analysis, reports of independent projects, and an oral presentation on an independent project. Four laboratory hours and two workshop/lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or

registration for Biology 373; and the following with a grade of at least C-: Biology 206L, 208L, 226L, or Environmental Science 311.

### **BIO 374. Plant Anatomy with Histological Techniques.**

Tissue organization and cellular details of stems, roots, and leaves of seed plants, with emphasis on development and function. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and concurrent enrollment in Biology 174L.

### **BIO 174L. Laboratory in Plant Anatomy and Histological Techniques.**

Demonstration of cellular details and tissue systems of plant organs; instruction in the preparation of plant materials for histological examination. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 374; and the following with a grade of at least C-: 206L, 208L, 226L, or Environmental Sciences 311.

### **BIO 375. Conservation Biology.**

Application of principles of ecology to the preservation of wild plant and animal species and to the preservation, management, and restoration of natural and seminatural ecosystems. Emphasis on scientific, biological aspects of issues such as endangered species protection, preserve design, and forest management. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 357, 359J, or 373 with a grade of at least C-.

### **BIO 177, 277, 377. Undergraduate Research.**

Laboratory or field research in the various fields of biological science under the supervision of one or more faculty members. Supervised individual research. Up to three semester hours may be counted toward the major requirement for the Bachelor of Arts degree with a major in biology. May be repeated for credit. Prerequisite: Biology 325 or 325H with a grade of at least C-, and written consent of instructor.

### **BIO 478L. Comparative Vertebrate Anatomy.**

Study of vertebrate morphology from developmental anatomy to the function, biomechanics, and phylogenetic relationships of living and fossil taxa. Three lecture hours and four laboratory hours a week for one semester. Biology 478L and Kinesiology 324K, 424K may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 379H, 679H. Honors Tutorial Course.**

Original laboratory or field research project under the direction of a faculty mentor, leading to a thesis or research presentation for students in the honors program in biology. The equivalent of three or six lecture hours a week for one semester. May be repeated for credit, but no more than six hours may be counted toward a degree in biology. Prerequisite: Consent of the student's research supervisor and the departmental honors adviser.

## **Department of Chemistry**

Students seeking the degree of Bachelor of Science in Chemical Engineering, Bachelor of Science in Chemistry, or Bachelor of Science in Physics must take The University of Texas at Austin Test for Credit in Chemistry 301 if they were admitted to the University with high school credit in chemistry. Engineering majors in areas other than chemical engineering are also encouraged to take the test. Students with three semesters or more of high school chemistry that included laboratory experience, or credit for Chemistry 301 or 301H, are encouraged to take The University of Texas at Austin Test for Credit in Chemistry 302. These tests are offered only in Austin. Information about them is available at <https://testingservices.utexas.edu/sts>.

Each student planning to register for a chemistry course should consult an adviser in his or her major area to determine whether specific courses are required.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

## Chemistry: CH

### Lower-Division Courses

#### CH 301 (TCCN: CHEM 1311). Principles of Chemistry I.

Three lecture hours a week for one semester; some sections may also require one enrichment/discussion hour a week. Only one of the following may be counted: Chemistry 301, 301H, 304K. Prerequisite: An appropriate score on the Department of Chemistry placement examination.

#### CH 301H. Principles of Chemistry I: Honors.

Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 301, 301H, 304K. Prerequisite: Credit with a grade of at least C- or registration for one of the following: Mathematics 408C, 408D, 408K, 308L, 408L, 408M, 408N, 408R, 408S.

#### CH 302 (TCCN: CHEM 1312). Principles of Chemistry II.

Development and application of concepts, theories, and laws underlying chemistry. Three lecture hours a week for one semester. Some sections also require one enrichment/discussion hour a week. Only one of the following may be counted: Chemistry 302, 302H, 305. Prerequisite: Chemistry 301 or 301H with a grade of at least C-.

#### CH 302H. Principles of Chemistry II: Honors.

Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 302, 302H, 305. Prerequisite: Chemistry 301H with a grade of at least C-; credit with a grade of at least C- or registration for one of the following: Mathematics 408C, 408D, 408K (or 308K), 308L, 408L, 408M, 408N, 408R, or 408S.

#### CH 303. Mathematical Introduction to Theories of Matter.

Introduction to the quantum theoretic description of atoms, molecules, solids, nuclei, elementary particles, and cosmology. Matrix mechanics and group theory. Three lecture hours a week for one semester. Chemistry 303 may be used instead of either Chemistry 302 or Chemistry 301 and 302 in fulfilling the prerequisites of other chemistry courses, except by students seeking the Bachelor of Science in Chemistry degree. Chemistry 303 may be counted in addition to Chemistry 301 and 302. Not recommended by the Health Professions Office for Medical College Admission Test preparation.

#### CH 204 (TCCN: CHEM 1111, CHEM 1112). Introduction to Chemical Practice.

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science. Four laboratory hours and one hour of discussion a week for one semester. Some sections may also require one hour of computer laboratory a week. Only one of the following may be counted: Chemistry 204, 317, or 104M and 104N. Prerequisite: Credit with a grade of at least C- or registration for Chemistry 302 or 302H.

#### CH 304K. Chemistry in Context I.

Designed for nonscience majors. Chemistry 304K and 305 form a two-semester sequence designed to fulfill the science requirement for

students not majoring in science or engineering. Issues of contemporary interest and importance, such as ozone depletion and global warming, motivate the discussion; the underlying chemistry is developed as needed. Social, political, economic, and ethical implications of scientific developments and science policy are considered. Chemistry 304K addresses the nature of matter, energy, chemical reactions, and chemical thermodynamics. Not intended as preparation for Chemistry 301. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Only one of the following may be counted: Chemistry 301, 301H, 304K.

#### CH 104M. Introduction to Chemical Practice I.

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science. One lecture hour and three laboratory hours a week for one semester. Only one of the following may be counted: Chemistry 204, 317, or 104M and 104N. Prerequisite: Credit with a grade of at least C- or registration for Chemistry 301 or 301H.

#### CH 104N. Introduction to Chemical Practice II.

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science. One lecture hour and three laboratory hours a week for one semester. Only one of the following may be counted: Chemistry 204, 317, or 104M and 104N. Prerequisite: Credit with a grade of at least a C- or registration for Chemistry 302 or 302H; and credit with a grade of at least C- in the following coursework: Chemistry 104M, and Chemistry 301 or 301H.

#### CH 305. Chemistry in Context II.

Designed for nonscience majors. Chemistry 304K and 305 form a two-semester sequence designed to fulfill the science requirement for students not majoring in science or engineering. Chemistry 305 addresses water chemistry, acids and bases, elementary organic chemistry, polymers, pharmaceuticals, nutrition, and genetics. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Only one of the following may be counted: Chemistry 302, 302H, 305. Prerequisite: Chemistry 301 or 304K.

#### CH 206K. Undergraduate Research.

Introduction to research practices; supervised individual undergraduate research in chemistry. Six to ten laboratory hours a week for one semester. May be repeated for credit, but no more than four semester hours may be counted toward a degree in chemistry. Hours beyond four must be taken on the pass/fail basis. May be repeated for credit. Prerequisite: Consent of the undergraduate adviser in chemistry.

#### CH 107, 207. Conference Course.

Supervised study in chemistry. One discussion hour a week for one semester, with additional hours to be arranged. May not be counted toward a major or minor in chemistry. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

#### CH 207K. Introduction to Science Outreach in Elementary Schools.

Developing and presenting level-appropriate science laboratories to students in local elementary schools. A hands-on, discovery learning approach to science is emphasized. The equivalent of five lecture hours a week for one semester, with field hours to be arranged. May be counted as an elective only.

### **CH 207L. Peer Teaching.**

Students act as peer teaching assistants in other University chemistry courses, mainly large general chemistry lecture sections. Two hours of lecture and training a week for one semester, and two to three hours a week leading student group discussions. May not be counted toward any degree in chemistry. Prerequisite: Chemistry 301 and consent of the coordinator of the Peer Teaching Assistant Program.

### **CH 108, 208, 308, 408. Topics in Chemistry.**

For each semester hour of credit earned, one lecture hour a week for one semester; some topics may require additional discussion hours. May not be counted toward a major or minor in chemistry. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

### **CH 110K (TCCN: CHEM 2123). Organic Chemistry Laboratory.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- in the following coursework: Chemistry 302 or 302H, 204, 317, or 104M and 104N; and credit or registration for one of the following: Chemistry 320M or 328M.

### **CH 110L (TCCN: CHEM 2125). Organic Chemistry Laboratory.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Chemistry 110K.

### **CH 317. Descriptive Inorganic Chemistry.**

Synthesis and properties of inorganic, bioinorganic, and organometallic compounds. One lecture hour and six laboratory hours a week for one semester. Only one of the following may be counted: Chemistry 204, 317, or 104M and 104N. Prerequisite: Credit with a grade of at least C- or registration for Chemistry 302 or 302H.

### **CH 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Chemistry.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **CH 220C. Organic Chemistry Laboratory.**

One lecture hour and five laboratory hours a week for one semester. Only one of the following may be counted: Chemistry 110L, 220C, 128L. Prerequisite: Credit with a grade of at least C- or registration for Chemistry 320N; and the following coursework with a grade of at least C- in each: Chemistry 204, 317, or 104M and 104N; and 320M or 328M.

### **CH 320M. Organic Chemistry I.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. Development of organic chemical structure, nomenclature, and reactivity. Three lecture hours a week for one semester. Chemistry 320M and 328M may not both be counted. Prerequisite: Chemistry 302 or 302H with a grade of at least C-.

### **CH 320N. Organic Chemistry II.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. The development of organic chemical functional group reactivity, reaction mechanics, with analogous aqueous transformations in biochemical settings. Three lecture hours a week for one semester. Chemistry 320N and 328N may not both be counted. Prerequisite: The

following coursework with a grade of at least C-: Chemistry 320M, or 328M.

### **CH 128K. Organic Chemistry Laboratory.**

One lecture hour and three laboratory hours a week for one semester. May not be counted by students with credit for Chemistry 220C. Only one of the following may be counted: Chemistry 110K or 128K. Prerequisite: Credit with a grade of at least C- or registration for Chemistry 328M; and the following coursework with a grade of at least C- in each: Chemistry 302 or 302H; and 204, 317, or 104M and 104N.

### **CH 128L. Organic Chemistry Laboratory.**

One lecture hour and three laboratory hours a week for one semester. May not be counted by students with credit for Chemistry 210C or 220C. Only one of the following may be counted: Chemistry 110L, 118L, 128L. Prerequisite: Credit or registration for Chemistry 318N or 328N; and the following coursework with a grade of at least C- in each: Chemistry 118K or 128K; and 318M or 328M.

### **CH 328M. Organic Chemistry I.**

Primarily for chemistry and chemical engineering majors. The development of organic chemical structure, nomenclature, and reactivity. Three lecture hours a week for one semester. Chemistry 320M and 328M may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Chemistry 302 or 302H; and 204, 317, or 104M and 104N.

### **CH 328N. Organic Chemistry II.**

Primarily for chemistry and chemical engineering majors. The development of organic chemical reactivity, with an emphasis on synthesis and polymers. Three lecture hours a week for one semester. Chemistry 320N and 328N may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 328M and 128K.

### **CH 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Chemistry.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **CH 329W. Cooperative Chemistry/Biochemistry.**

This course covers the work period of chemistry and biochemistry students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. No more than three semester hours may be counted toward the major requirement; no more than six semester hours may be counted toward the degree. The student's first registration must be on the pass/fail basis. Prerequisite: Application to become a member of the Cooperative Chemistry/Biochemistry Program, and consent of the Department of Chemistry and Biochemistry undergraduate adviser.

### **CH 431. Inorganic Chemistry.**

Survey of the chemistry of the elements, incorporating both descriptive and theoretical aspects. Open-ended experiments designed to illustrate a variety of synthetic techniques. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following coursework

with a grade of at least C- in each: Chemistry 302 or 302H; Chemistry 204, 317, or 104M and 104N; and Chemistry 320M or 328M.

#### **CH 341. Special Topics in Laboratory Chemistry.**

Examples of topics are physical measurements techniques; electronics for scientists; advanced synthetic chemistry (organic or inorganic); separation techniques. One lecture hour and six laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Eight semester hours of coursework in organic chemistry and consent of the undergraduate adviser.

#### **CH 644. Chemical Education: Secondary School.**

Issues and techniques in secondary school teaching of chemical sciences. Three lecture hours a week for two semesters. For students seeking the Bachelor of Science in Chemistry: Teaching Option degree. May not be counted toward any other degree in chemistry or biochemistry. Prerequisite: For 644A, eight semester hours of coursework in organic chemistry and credit or registration for Chemistry 144K; for 644B, Chemistry 644A, 144K, and credit or registration for Chemistry 144L.

#### **CH 144K. Chemical Education Laboratory I.**

Development of classroom demonstrations, laboratory experiments, and teaching aids for secondary school teaching of the chemical sciences. Two laboratory hours a week for one semester. For students seeking the Bachelor of Science in Chemistry: Teaching Option degree. May not be counted toward any other degree in chemistry. Prerequisite: Credit or registration for Chemistry 644A.

#### **CH 144L. Chemical Education Laboratory II.**

Development of classroom demonstrations, laboratory experiments, and teaching aids for secondary school teaching of the chemical sciences. Two laboratory hours a week for one semester. For students seeking the Bachelor of Science in Chemistry: Teaching Option degree. May not be counted toward any other degree in chemistry. Prerequisite: Credit or registration for Chemistry 644B.

#### **CH 353. Physical Chemistry I.**

For chemistry and chemical engineering majors. Equations of state, laws of thermodynamics, ideal and nonideal solutions, phase equilibria, thermodynamics of chemical reactions. Three lecture hours a week for one semester. Chemistry 353 and 353M may not both be counted. Prerequisite: Mathematics 408C and 408D, or two of the following: Mathematics 408K, 408L, 408M, 408N, 408S; Chemistry 302 or 302H with a grade of at least C-; and Physics 316 and 116L, 303L and 103N, or 317L and 117N.

#### **CH 153K. Physical Chemistry Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Chemistry 353 or 353M with a grade of at least C-.

#### **CH 353M. Physical Chemistry I for Life Sciences.**

For biochemistry and biology majors. Thermochemistry and kinetics of reactions in cells, enzyme catalysis, electrical and transport properties of membranes. Three lecture hours a week for one semester. Chemistry 353 and 353M may not both be counted. Prerequisite: Mathematics 408C and 408D, or two of the following: Mathematics 408K, 408L, 408M, 408N, 408S; Chemistry 302 or 302H with a grade of at least C-; and Physics 316 and 116L, 303L and 103N, or 317L and 117N.

#### **CH 354. Quantum Chemistry and Spectroscopy.**

Fundamental principles of quantum mechanics, exactly soluble model problems, electronic structure of atoms and molecules, spectroscopy. Three lecture hours a week for one semester. Prerequisite: Mathematics

408C and 408D, or two of the following: Mathematics 408K, 408L, 408M, 408N, 408S; and Physics 316 and 116L.

#### **CH 154K. Physical Chemistry Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Chemistry 153K, and 353 or 353M with a grade of at least C-; and credit or registration for Chemistry 354 or 354L.

#### **CH 354L. Physical Chemistry II.**

Molecular energy levels, statistical thermodynamics (macroscopic thermodynamic functions from molecular input), and physical and chemical kinetics, with emphasis on the molecular viewpoint. Three lecture hours a week for one semester. May be counted toward a degree in chemistry. Chemistry 354, rather than this course, is recommended for students planning graduate study in chemistry. Prerequisite: Chemistry 353 or 353M with a grade of at least C-.

#### **CH 354M. Introduction to Computational Methods in Chemistry.**

Construction and implementation of numerical algorithms for solving differential equations which are common in chemistry. Subjects include chemical reaction rates, quantum mechanics, molecular dynamics, normal modes of vibration, and Monte Carlo methods. Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 354M, 368 (Topic: Applied Math and Computation in Chemistry), 368 (Topic: Computational Chemistry), 368 (Topic: Intro to Computational Methods in Chemistry). Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 302 or 302H, and Chemistry 353 or 353M.

#### **CH 354S. Elements of Spectroscopy.**

Primarily for chemistry and biochemistry majors. Fundamentals of spectroscopy, with knowledge of elementary quantum mechanics. Separation of electronic, vibrational, rotational and spin quantum states; interaction of radiation and matter; theory and application of different types of spectroscopy including photoelectron, electronic absorption and emission, vibrational (infrared and Raman), rotational and magnetic resonance. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 353 or 353M, and 354 or 354L.

#### **CH 455. Fundamentals of Analytical Chemistry.**

For biochemistry, engineering, and clinical laboratory science majors. Chemical and instrumental methods in analytical chemistry. Three lecture hours and three laboratory hours a week for one semester. Chemistry 455 and 456 may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 302 or 302H; and Chemistry 204, 317, or 104M and 104N.

#### **CH 456. Analytical Chemistry.**

For chemistry majors. Three lecture hours and three laboratory hours a week for one semester. Chemistry 455 and 456 may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 302 or 302H; and Chemistry 204, 317, or 104M and 104N.

#### **CH 366C. Advanced Inorganic Chemistry: Organometallics Catalysis.**

An in-depth and mostly chronological study of the evolution of organometallic and inorganic coordination chemistry, and its continued critical importance in a range of industrial processes. Covers a range of topical catalytic processes, paying particular attention to how chemical bonding and kinetics can be exploited to affect the relative rates of reaction. Three lecture hours a week for one semester. Chemistry 366C and 368 (Topic: Advanced Inorganic Chemistry: Organometallic

Chemistry and Catalysis) may not both be counted. Prerequisite: Credit with a grade of at least C- in Chemistry 431.

#### **CH 366D. Bio-inorganic Chemistry and Spectroscopy.**

Covers the roles of transition metals in biology, mostly with respect to protein structure, function, and catalysis. Also covers methods of spectroscopy that are used to probe the geometrical and electronic structure of metal ions in proteins. Exposure to modern areas of study in bio-inorganic chemistry. Explores the principles of transition metal chemistry in the context of biological systems. Three lecture hours a week for one semester. Chemistry 366D and 368 (Topic: Bio-inorganic Chemistry) may not both be counted. Prerequisite: Chemistry 431 with a grade of at least C-.

#### **CH 366E. Chemistry of the s-, p-, d-, and f-Block Elements.**

Focuses on the electronic structure of molecules and complexes, and how such information can predict important properties such as chemical reactivity, spectroscopy, and magnetism. Intended for upper-division chemistry majors with a basic understanding of concepts in inorganic chemistry. Three lecture hours a week for one semester. Chemistry 366E and 368 (Topic: Inorganic Reactions and Structures) may not both be counted. Prerequisite: Credit with a grade of at least C- for Chemistry 431.

#### **CH 367C. Materials Chemistry.**

Restricted to chemistry majors. Introduction to structural and physical properties of materials and synthetic strategies for making new materials in the nanoscale and mesoscale regimes, in addition to covering instrumental methods used to probe materials properties. Some aspects of applications (semiconductor devices, solar and fuel cells, smart and responsive materials) will be covered to illustrate the kinds of material properties that need to be considered in designing novel materials of specific function. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and Chemistry 302 and 353 with a grade of at least C- in each. Chemistry 431 or 354L with a grade of at least C- is recommended.

#### **CH 367L. Macromolecular Chemistry.**

Designed for chemistry and chemical engineering students. Occurrence, preparation, structure, and properties of macromolecular substances. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- in the following coursework: Chemistry 320M and 320N, or 328M and 328N; Chemistry 220C, or 128K and 128L; and Chemistry 353 or 353M.

#### **CH 368. Advanced Topics in Chemistry.**

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 320M and 320N, or Chemistry 328M and 328N; credit with a grade of at least C- or registration for Chemistry 353 or 353M.

**Topic 1: Research Methods: UTeach.** Restricted to students in the UTeach-Natural Sciences program. Students use mathematics and science skills to solve research problems.

**Topic 2: Advanced Topic in Analytical Chemistry.**

**Topic 3: Advanced Topic in Inorganic Chemistry.**

**Topic 4: Advanced Topic in Organic Chemistry.**

**Topic 5: Advanced Topic in Physical Chemistry.**

#### **CH 368L. Peer Teaching.**

Equivalent of three lecture hours a week for one semester. Chemistry 368 (Topic: Peer Teaching) and 368L may not both be counted.

#### **CH 369K. Techniques of Research.**

Advanced laboratory practice and introduction to research. One lecture hour and six laboratory hours a week for one semester. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in chemistry or biochemistry. May be repeated for credit. Prerequisite: Eight semester hours of coursework in organic chemistry; and six semester hours of upper-division chemistry courses approved by the undergraduate adviser's office, or consent of the undergraduate adviser in chemistry.

#### **CH 371K. Science Outreach in Elementary Schools.**

Students develop and present level-appropriate science laboratories to students in local elementary schools. Students also plan and create the infrastructure needed to administer the science program in concert with the science curriculum at a specific elementary school. A hands-on, discovery learning approach to science is emphasized. One class hour and six hours of fieldwork a week for one semester. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in chemistry. May be repeated for credit. Prerequisite: Upper-division standing, at least six hours of upper-division coursework in the College of Natural Sciences, and consent of the UTeach adviser in the College of Natural Sciences.

#### **CH 372C. Chemistry Peer Mentors in Research and Teaching.**

Students work as peer mentors and assistants in the teaching of chemistry, with emphasis on developing instructional materials and laboratories that teach fundamental chemistry with real world data. Students mentor students for at least six hours a week in addition to other weekly meetings. Hours to be arranged. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in chemistry. Biology 372C and Chemistry 372C may not both be counted. May be repeated for credit. Prerequisite: Chemistry 301 or 301H, and 302 or 302H with a grade of at least B in each; and consent of the undergraduate adviser.

#### **CH 372S. Study and Research Abroad: Austin International Framework.**

Designed specifically for students participating in the AIF program. Facilitates student-led mini-seminars and video conference call discussions. Explores student research and wider learning and cultural experiences in Austin and abroad. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Enrollment in the Austin International Framework (AIF) program and consent of the instructor.

#### **CH 375K, 475K. Individual Study in Chemistry.**

Supervised reading or individual tutorial sessions on advanced topics in chemistry. Three or four class hours a week for one semester. No more than six semester hours may be counted toward a degree in chemistry. May be repeated for credit. Prerequisite: Eight semester hours of coursework in organic chemistry, Chemistry 353, and consent of the undergraduate adviser.

#### **CH 376K. Advanced Analytical Chemistry.**

Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Chemistry 353 and 456 with a grade of at least C- in each.

#### **CH 379H. Chemistry Honors Tutorial Course.**

Laboratory research project in a specific field of chemistry under the supervision of one or more faculty members. Conference course. May be taken twice for credit. Must be taken in addition to the required hours for the Bachelor of Science in Chemistry degree. Students must enter no later than the first semester of the year of graduation. May be repeated

for credit. Prerequisite: Consent of the student's research supervisor and the departmental honors adviser.

## Department of Computer Science

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### Computer Science: C S

#### Lower-Division Courses

##### **C S 301K. Foundations of Logical Thought.**

Introductory logic in the context of computing; introduction to formal notations; basic proof techniques; sets, relations, and functions. Three lecture hours a week for one semester. Some sections also require one discussion hour a week.

##### **C S 302. Computer Fluency.**

An introduction to the fundamental concepts of computing: how computers work, what they can do, and how they can be used effectively. Some programming is required. Three lecture hours or two lecture hours and one discussion hour a week for one semester. Credit for Computer Science 302 may not be earned after a student has received credit for Computer Science 303E, 305J, 307, 312, 312H, 314, or 314H. May not be counted toward a degree in computer science.

##### **C S 303E. Elements of Computers and Programming.**

Problem solving and fundamental algorithms for various applications in science, business, and on the World Wide Web, and introductory programming in a modern object-oriented programming language. The equivalent of three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 303E, 305J, 312, 312H. Credit for Computer Science 303E may not be earned after a student has received credit for Computer Science 307, 314, or 314H. May not be counted toward a degree in computer science.

##### **C S 103F. Ethical Foundations of Computer Science.**

An introduction to reasoning about the effects of the technology created by computer scientists and understanding the ethical and real-world consequences of that technology. Emphasizes direct participation and discussion using case studies to illustrate ethical topics. One lecture hour a week for one semester. Computer Science 103F and 109 (Topic: Ethical Foundations of Computer Science) may not both be counted.

##### **C S 104C. Competitive Programming.**

Explores the algorithms needed to solve a given problem, reason about corner cases, and write correct implementations under time pressure. Focuses on skills useful for international programming competitions, whiteboard job interviews, and programming tasks that require quickly solving challenging problems with creative use of algorithms. One lecture hour a week for one semester. Computer Science 104 and 109 (Topic: Competitive Programming) may not both be counted. Prerequisite: Computer Science 311 or 311H with a grade of at least C-

and registration or credit in Computer Science 314 or 314H with a grade of at least C-.

##### **C S 105C. Computer Programming: C++.**

Explores the syntax and concepts needed to program in C++. One lecture hour a week for one semester. Prerequisite: Computer Science 307, 313E, 314, 314H, or Electrical Engineering 422C, with a grade of at least C-.

##### **C S 105P. Topics In Computer Programming Languages.**

An introduction to programming in a particular computer language. Includes designing and implementing programs. One lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Computer Science 307, 313E, 314, 314H, or Electrical Engineering 422C, with a grade of at least C-, and consent of instructor.

##### **C S 108. Software Systems.**

Introduction to the use of a particular software system. Students build applications that exploit the system being studied. One lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Computer Science 307, 313E, 314, 314H, or Electrical Engineering 422C, with a grade of at least C-.

##### **C S 109, 209, 309. Topics in Computer Science.**

For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

##### **C S 311. Discrete Mathematics for Computer Science.**

Restricted to computer science majors. A focus on discrete mathematical tools of fundamental importance to the working computer scientist. An emphasis is placed on using logical notation to express rigorous mathematical arguments. Subjects include proof by induction, introduction to graph theory, recurrences, sets, functions, and an introduction to program correctness. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 311, 311H, 313H, 313K, 336, 336H. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 312 or 312H; and Mathematics 408C, 408K, or 408N, or registration for Mathematics 408C.

##### **C S 311H. Discrete Mathematics for Computer Science: Honors.**

Restricted to honors computer science majors. A focus on discrete mathematical tools of fundamental importance to the working computer scientist. An emphasis is placed on using logical notation to express rigorous mathematical arguments. Subjects include proof by induction, graph theory, number theory, combinatorics, recurrences, sets, functions, an introduction to program correctness, and discrete probability. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 311, 311H, 313H, 313K, 336, 336H. Prerequisite: Mathematics 408K or 408N with a grade of at least C-; or registration or credit with at least C- in M 408C.

##### **C S 312. Introduction to Programming.**

First part of a two-part sequence in programming. Fundamental concepts of structured programming; procedures and data structures with a focus on problem solving strategies and implementation; introduction to concepts of informal specification, informal reasoning about program behavior, debugging, and ad hoc testing. Three lecture hours and one discussion hour a week for one semester. Only one of the following courses may be counted: Computer Science 303E, 305J, 312, 312H. Credit for Computer Science 312 may not be earned after a student has received credit for Computer Science 314 or

314H. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 408C, 408K, or 408N.

### **C S 312H. Introduction to Programming: Honors.**

Restricted to computer science majors. First part of a two-part sequence in programming. Fundamental concepts of structured programming; procedures and data structures with a focus on problem solving strategies and implementation; introduction to concepts of informal specification, informal reasoning about program behavior, debugging, and ad hoc testing. Three lecture hours and one discussion hour a week for one semester. Only one of the following courses may be counted: Computer Science 303E, 305J, 312, 312H. Credit for Computer Science 312H may not be earned after a student has received credit for Computer Science 314 or 314H. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 305G, or a passing score on the College of Natural Sciences mathematics placement examination; and consent of the honors director.

### **C S 313E. Elements of Software Design.**

Object-oriented design of software using Python, a modern high-level language. Introduction to abstract data types, fundamental algorithms, and basics of complexity analysis. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: Computer Science 303E, 305J, 312, or 312H with a grade of at least C-.

### **C S 314. Data Structures.**

Second part of a two-part sequence in programming. Introduction to specifications, simple unit testing, and debugging; building and using canonical data structures; algorithm analysis and reasoning techniques such as assertions and invariants. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Computer Science 307, 314, 314H, 315, 315H. Prerequisite: Computer Science 312 or 312H with a grade of at least C-.

### **C S 314H. Data Structures: Honors.**

Second part of a two-part sequence in programming. Introduction to specifications, simple unit testing, and debugging; building and using canonical data structures; algorithm analysis and reasoning techniques such as assertions and invariants. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Computer Science 307, 314, 314H, 315, and 315H. Prerequisite: Computer Science 312 or 312H with a grade of at least C-.

### **C S 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Computer Science.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **C S 120N, 220N, 320N. Topics in Computer Science for Nonmajors.**

For each semester hour of credit earned, one lecture hour a week for one semester. May not be counted toward a degree in computer science. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

### **C S 323E. Elements of Scientific Computing.**

Fundamentals of software issues related to scientific computing. Subjects include floating-point computations, numerical computation

errors, interpolation, integration, solution of linear systems of equations, optimization, and initial value problems of ordinary differential equations. Implementation of algorithms are investigated using MATLAB for matrix and vector computations. Examples are drawn from a variety of science and mathematics areas. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Computer Science 323E and 323H may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 303E and 313E, or Computer Science 307, 312, 312H, 314, 314H, 315, or 315H; Electrical Engineering 422C; Mathematics 408D, 408M, or 427L; and credit with a grade of at least C- or registration for Mathematics 340L, 341, or Statistics and Scientific Computation 329C.

### **C S 323H. Elements of Scientific Computing: Honors.**

Fundamentals of software issues related to scientific computing. Subjects include floating-point computations, numerical computation errors, interpolation, integration, solution of linear systems of equations, optimization, and initial value problems of ordinary differential equations. Implementation of algorithms are investigated using MATLAB for matrix and vector computations. Examples are drawn from a variety of science and mathematics areas. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Computer Science 323E and 323H may not both be counted. Prerequisite: Computer Science 303E, 305J, 307, 312, 312H, 315, or 315H with a grade of at least C-; credit with a grade of at least C- or registration for Mathematics 340L, 341, or Statistics and Scientific Computation 329C; and consent of the honors director.

### **C S 324E. Elements of Graphics and Visualization.**

Basics of two- and three-dimensional computer graphics systems, modeling and rendering, and selected graphics software APIs. Other topics may include interactive graphics, animation, graphical user interfaces, and the graphical presentation of information. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: One of the following with a grade of at least C-: Computer Science 303E, 305J, 307, 312, 312H, 314, 314H, 315, 315H, Electrical Engineering 422C.

### **C S 326E. Elements of Networking.**

Introduction to the principles and basic concepts of the Internet, networking applications and protocols, and simple client/server applications. Other topics may include network technologies and topologies, packet and circuit switching, LANS and WANS, Internet security, and network management. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: One of the following with a grade of at least C-: Computer Science 303E, 305J, 307, 312, 312H, 314, 314H, 315, 315H, Electrical Engineering 422C.

### **C S 327E. Elements of Databases.**

A practical introduction to database management systems, with discussion of database administration and management. Survey of logical modeling, database design with a focus on relational databases, SQL query language, and current applications. Subjects may include data integrity, performance, concurrency, transaction processing, recovery, security, and Web applications. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: One of the following with a grade of at least C-: Computer Science 303E, 305J, 307, 312, 312H, 314, 314H, 315, 315H, Electrical Engineering 422C.

### **C S 328E. Topics in Elements of Computing.**

Three lecture hours a week for one semester. May not be counted toward a degree in computer science. May be repeated for credit when the

topics vary. Prerequisite: Computer Science 303E, 312, or 312H with a grade of at least C-.

### **C S 429. Computer Organization and Architecture.**

Restricted to computer science majors. An introduction to low-level computer design ranging from the basics of digital design to the hardware/software interface for application programs. Includes basic systems principles of pipelining and caching, and requires writing and understanding programs at multiple levels. Four lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Computer Science 310, 310H, 429, 429H. Prerequisite: The following courses with a grade of at least C-: Computer Science 311 (or 313K) or 311H (or 313H); and Computer Science 314 (or 315) or 314H (or 315H).

### **C S 329E. Advanced Topics in Elements of Computing.**

Three lecture hours a week for one semester. May not be counted toward a degree in computer science. May be repeated for credit when the topics vary. Prerequisite: Computer Science 313E, 314, or 314H with a grade of at least C-.

### **C S 429H. Computer Organization and Architecture: Honors.**

Restricted to computer science majors. An introduction to low-level computer design ranging from the basics of digital design to the hardware/software interface for application programs. Includes basic systems principles of pipelining and caching, and requires writing and understanding programs at multiple levels. Four lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Computer Science 310, 310H, 429, 429H. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 314, 314H, 315, or 315H.

### **C S 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Computer Science.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **C S 329W. Cooperative Computer Science.**

This course covers the work period of computer science students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. However, no more than three semester hours may be counted toward the major requirement. The student's first registration must be on the pass/fail basis; the second must be on the letter-grade basis. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; 307, 314, 314H, 315, or 315H; 310, 310H, 429, or 429H; and consent of the undergraduate adviser.

### **C S 331. Algorithms and Complexity.**

An investigation of algorithmic paradigms: divide and conquer, dynamic programming, greedy algorithms, graph algorithms, randomized algorithms, undecidability, NP-completeness, and approximation algorithms. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Computer Science 331, 331H, 357, 357H, 378 (Topic: Algorithms and Complexity).

Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321); and credit with a grade of at least C- or registration for: Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### **C S 331H. Algorithms and Complexity: Honors.**

An investigation of algorithmic paradigms: divide and conquer, dynamic programming, greedy algorithms, graph algorithms, randomized algorithms, undecidability; NP-completeness, approximation algorithm, sorting lower bound, selected topics from amortized analysis, network flow, and linear programming. Three lecture hours and one hour of discussion a week for one semester. Only one of the following may be counted: Computer Science 331, 331H, 357, 357H, 378 (Topic: Algorithms and Complexity). Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321); and credit with a grade of at least C- or registration for: Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### **C S 234. Technical Writing.**

Application of techniques and strategies of effective technical writing, and of conventions used in documents such as letters, memos, proposals, abstracts, and reports. Two lecture hours a week for one semester. Computer Science 234 and 178 (Topic: Technical Writing) may not both be counted. May not be counted toward the number of hours in computer science required for the Bachelor of Science in Computer Science degree. Prerequisite: Computer Science 310, 310H, 429, or 429H with a grade of at least C-.

### **C S 337. Theory in Programming Practice.**

Application of program-analysis theory to program design. Methodologies for large-scale program design. Designed to help students bring together theoretical and programming skills. Three lecture hours and one discussion hour a week for one semester. Computer Science 337 and 337H may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); and 331 (or 357), 331H (or 357H), 341, or 341H.

### **C S 337H. Theory in Programming Practice: Honors.**

Application of program-analysis theory to program design. Methodologies for large-scale program design. Designed to help students bring together theoretical and programming skills. Three lecture hours and one discussion hour a week for one semester. Computer Science 337 and 337H may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); and 331 (or 357), 331H (or 357H), 341, or 341H.

### **C S 439. Principles of Computer Systems.**

Restricted to computer science majors. An introduction to computer systems software abstractions with an emphasis on the connection of these abstractions to underlying computer hardware. Key abstractions include threads, virtual memory, protection, and I/O. Requires writing of synchronized multithreaded programs and pieces of an operating system. Four lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Computer Science 439, 439H, 352, 352H, 372, and 372H. Prerequisite: Computer Science 310, 310H, 429, or 429H with a grade of at least C-.

### **C S 439H. Principles of Computer Systems: Honors.**

Restricted to computer science majors. An introduction to computer systems software abstractions with an emphasis on the connection of these abstractions to underlying computer hardware. Key abstractions include threads, virtual memory, protection, and I/O. Requires writing of synchronized multithreaded programs and pieces of an operating system. Four lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Computer Science 439, 439H, 352, 352H, 372, and 372H. Prerequisite: Computer Science 310, 310H, 429, or 429H with a grade of at least C-.

### **C S 340D. Debugging Verifying Programs.**

Basic concepts of formal methods with emphasis on using and applying mathematical logic plus finite state systems theory to program verification and debugging. Three lecture hours a week for one semester. Computer Science 340D and 378 (Topic: Debugging and Verifying Programs) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 341. Automata Theory.**

An introduction to the formal study of automata and of related formal languages with applications in computer science. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 341, 341H, Linguistics 340. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 341H. Automata Theory: Honors.**

An introduction to the formal study of automata and of related formal languages with applications in computer science. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 341, 341H, Linguistics 340. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-, and consent of the honors director.

### **C S 342. Neural Networks.**

Biological information processing; architectures and algorithms for supervised learning, self-organization, reinforcement learning, and neuroevolution; deep learning, recurrent, and memory networks; hardware implementations and simulators; applications in engineering, artificial intelligence, and cognitive science. Three lecture hours a week for one semester. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 342C. Computational Brain.**

An examination of the brain as a computational system composed of different layers of abstraction. Focus on scientific writing, with weekly reviews of relevant scientific papers. Three lecture hours a week for one semester. Computer Science 342C and 378 (Topic: Computational Brain) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 429 (or 310) or 429H (or 310H); and Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321).

### **C S 343. Artificial Intelligence.**

An introduction to the field of artificial intelligence (AI), starting from foundations in search and knowledge representation, and then sampling from major AI topics such as probabilistic reasoning, intelligent agents (including for games), machine learning, planning, natural language processing, robotics, computer vision, and philosophical foundations. Programming projects are required. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 343, 343H, 378H (Topic: Artificial Intelligence: Honors). Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 429 (or 310) or 429H (or 310H); and Mathematics

362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321).

### **C S 343H. Artificial Intelligence: Honors.**

An introduction to the field of artificial intelligence (AI), starting from foundations in search and knowledge representation, and then sampling from major AI topics such as probabilistic reasoning, intelligent agents (including for games), machine learning, planning, natural language processing, robotics, computer vision, and philosophical foundations. Programming projects are required. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 343, 343H, 378H (Topic: Artificial Intelligence: Honors). Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 429 (or 310) or 429H (or 310H); and Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321).

### **C S 344M. Autonomous Multiagent Systems.**

An introduction to autonomous agents, with an emphasis on multiagent systems. Students use a robotics simulator. Emphasis on computer science research activities, including speaking, writing, programming, and working in groups. Three lecture hours a week for one semester. Computer Science 344M and 378 (Topic: Autonomous Multiagent Systems) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 429 (or 310) or 429H (or 310H); and Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321).

### **C S 344R. Robotics.**

A survey of methods and techniques important for intelligent robotics. Students work in teams, applying these methods to get intelligent behavior from physical robots. Three lecture hours a week for one semester. Computer Science 344R and 378 (Topic: Robotics) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 429 (or 310) or 429H (or 310H); and Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321).

### **C S 345. Programming Languages.**

Survey of significant concepts underlying modern programming languages, including syntax, functions, expressions, types, polymorphism, assignment, procedures, pointers, encapsulation, classes, and inheritance, with some discussion of implementation issues. Prominent programming paradigms, such as sequential, concurrent, object-oriented, functional, and logic programming. Illustrative examples drawn from a variety of current languages. Three lecture hours a week for one semester. Computer Science 345 and 345H may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 345H. Programming Languages: Honors.**

A survey of significant concepts underlying modern programming languages, including syntax, functions, expressions, types, polymorphism, assignment, procedures, pointers, encapsulation, classes, and inheritance, with some discussion of implementation issues. Prominent programming paradigms, such as sequential, concurrent, object-oriented, functional, and logic programming. Illustrative examples drawn from a variety of current languages. Three lecture hours a week for one semester. Computer Science 345 and 345H may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 346. Cryptography.**

A theoretical introduction to cryptography. Subjects include private key cryptosystems, public key cryptosystems, digital signatures, secret

sharing schemes, and the necessary mathematical background. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (310H); 331 (or 357), 331H (or 357H), 341, or 341H; and credit with a grade of at least C- or registration for: Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### **C S 347. Data Management.**

Concepts of database design and database system implementation. Data models, query processing, database design theory, crash recovery, concurrent control, and distributed databases. Three lecture hours a week for one semester. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 349. Contemporary Issues in Computer Science.**

An examination of social, professional, and ethical issues involved in the use of computer technology. Subjects may include software engineering ethics, computer safety and reliability, constitutional issues, intellectual property, computer crime, societal impact, emerging technologies, and philosophical issues. Three lecture hours a week for one semester. Computer Science 349 and 378 (Topic: Contemporary Issues in Computer Science) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 350C. Advanced Computer Architecture.**

Relationships between programming and hardware design, high performance and low power microarchitectures, memory system design, technology and workload constraints on design, special techniques for coding, addressing, and control, and evaluation of design alternatives will be explored. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 350C, 352, or 352H. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 350F. Operating Systems.**

Advanced coverage of core operating systems (virtual memory, file systems, scheduling), and intermediate and advanced operating systems concepts: multiprocessing, multi-core computing, linking, kernel design, virtual machines, and security. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 350F, 372, or 372H. Prerequisite: Computer Science 439 (or 352 or 372) or 439H (or 352H or 372H) with a grade of at least C-.

### **C S 353. Theory of Computation.**

An introduction to computability theory and computational complexity, focusing on the limits of computation. Subjects include undecidability, NP-completeness, time and space complexity, circuit complexity, and randomized complexity. Three lecture hours a week for one semester. Prerequisite: One of the following with a grade of at least C-: Computer Science 331 (or 357), 331H (or 357H), 341, or 341H.

### **C S 354. Computer Graphics.**

Introduction to techniques for human-machine communication through imagery. Subjects include display hardware, transformations, interactive techniques, geometric modeling, two- and three-dimensional display algorithms, graphics software systems architecture, and hidden-line and surface elimination. Projects are assigned and in-depth exploration is encouraged. Three lecture hours a week for one semester. Prerequisite: The following courses with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); Computer Science 105C, 371G or 371P; Mathematics 408D, 408M, or 427L; and Mathematics 340L, 341, or Statistics and Data Sciences 329C.

### **C S 354R. Game Technology.**

An examination of major technological components of computer games and their integration, modeling and animation, physics simulation, networking for games, interface and interaction techniques, and special effects. Three lecture hours a week for one semester. Computer Science 354R and 378 (Topic: Game Technology) may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 105C, 371G or 371P; and Computer Science 429 (or 310) or 429H (or 310H).

### **C S 354S. Game Development Capstone: Two-Dimensional Games.**

Same as Music 354S and Theatre and Dance 354T (Topic 17). Participation in an interdisciplinary team to gain a thorough understanding of the two-dimensional game development process, through modeling of the environment and practices that are used in game studios. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 354S, 378 (Topic: Game Development Capstone: 2D Games), Music 354S, 376J (Topic: Game Development Capstone: 2D Games), Theatre and Dance 354T (Topic 17). Prerequisite: For computer science majors, Computer Science 429 or 429H with a grade of at least C- and consent of instructor; for others, consent of instructor.

### **C S 354T. Game Development Capstone: Three-Dimensional Games.**

Same as Music 354T and Theatre and Dance 354T (Topic 18). Participation in interdisciplinary teams to gain a thorough understanding of the three-dimensional game development process, through modeling of the environment and practices that are used in game studios. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 354T, Music 354T, 376J (Topic: Game Development Capstone: 3D Games), Theatre and Dance 354T (Topic 18). Prerequisite: For computer science majors, Computer Science 429 or 429H with a grade of at least C- and consent of instructor; for others, consent of instructor.

### **C S 356. Computer Networks.**

Introduction to computer networks with emphasis on the Internet. Three lecture hours a week for one semester. Prerequisite: Computer Science 439 (or 372) or 439H (or 372H) with a grade of at least C-.

### **C S 356R. Introduction to Wireless Networks.**

An introduction to basic knowledge in wireless networks ranging from the physical layer to the application layer, and across different types of wireless networks such as WiFi, cellular, and multihop networks. Three lecture hours a week for one semester. Computer Science 356R and 378 (Topic: Introduction to Wireless Networks) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 361. Introduction to Computer Security.**

An introduction to computer security, both in the abstract and in the context of real systems, including recognizing potential threats to confidentiality, integrity and availability, and developing familiarity with current security-related issues in computer science. Three lecture hours a week for one semester. Computer Science 361 and 378 (Topic: Introduction to Security) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 361C. Information Assurance and Security.**

Selected subjects from the broad area of information assurance, including computer security, communications security, operations security, and risk assessment. Three lecture hours a week for one

semester. Computer Science 361C and 378 (Topic: Information Assurance and Security) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 361S. Network Security and Privacy.**

An examination of common computer security threats; fundamental techniques for implementing secure software systems and networks; practical experience in attacking and defending networked systems. Three lecture hours a week for one semester. Computer Science 361S and 378 (Topic: Network Security and Privacy) may not both be counted. Prerequisite: Computer Science 439 (or 352 or 372) or 439H (or 352H or 372H) with a grade of at least C-.

### **C S 363D. Introduction to Data Mining.**

Introduction to the topic of data mining: data preprocessing regression, classification, clustering, dimensionality reduction, association analysis, and anomaly detection. Three lecture hours a week for one semester. Computer Science 363D and 378 (Topic: Introduction to Data Mining) may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321); and Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### **C S 367. Numerical Methods.**

Subjects include systems of linear equations, numerical integration, ordinary differential equations, and nonlinear equations. Construction and use of large numerical systems. Influence of data representation and computer architecture on algorithm choice and development. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 367, Mathematics 368K, Physics 329. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); Mathematics 408D, 408M, or 427L; and Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### **C S 369. Systems Modeling.**

Introduction to performance modeling, with emphasis on computer systems. Modeling methodology, queueing network models, simulation, analysis of results. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); and Mathematics 362K or Statistics and Data Sciences 321 (or Statistics Scientific Computation 321).

### **C S 370. Undergraduate Reading and Research.**

Supervised study of selected problems in computer science, by individual arrangement with supervising instructor. The equivalent of three lecture hours a week for one semester. Computer Science 370 and 370F may not both be counted. No more than three semester hours may be counted toward a degree in computer science. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-, and consent of the undergraduate adviser.

### **C S 370F. Undergraduate Reading and Research: Writing.**

Supervised study of selected problems in computer science, by individual arrangement with supervising instructor. The equivalent of three lecture hours a week for one semester. Computer Science 370 and 370F may not both be counted. No more than three semester hours may be counted toward a degree in computer science. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-, and consent of the undergraduate adviser.

### **C S 371D. Distributed Computing.**

Investigation of models, principles, and fundamental protocols, including event ordering and global predicate detection, atomic commit, state-machine replication, rollback recovery, primary backup, consensus for synchronous and asynchronous systems, and byzantine fault-tolerance. Three lecture hours a week for one semester. Prerequisite: Computer Science 439 (or 372) or 439H (or 372H) with a grade of at least C-.

### **C S 371G. Generic Programming and the STL.**

Three lecture hours a week for one semester. Computer Science 371G and 378 (Topic: Generic Programming and the STL) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 371L. iOS Mobile Computing.**

Overview of mobile computing with an emphasis on developing applications for the iOS operating system. Three lecture hours a week for one semester. Computer Science 371L and 378 (Topic: iOS Mobile Computing) may not both be counted. Prerequisite: Credit with a grade of at least C- or registration in Computer Science 439 (or 352 or 372) or 439H (or 352H or 372H).

### **C S 371M. Mobile Computing.**

Overview of mobile computing. Emphasis on mobile application development. Use of mobile capabilities: sensors, location, telephony, and multimedia. Three lecture hours a week for one semester. Computer Science 371M and 378 (Topic: Mobile Computing) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-; and credit with a grade of at least C- or registration for Computer Science 439 (or 352 or 372) or 439H (or 352H or 372H).

### **C S 371P. Object-Oriented Programming.**

Programming using class derivation, inheritance, and dynamic polymorphism. Application of a simple object-oriented design methodology to several software development problems. Three lecture hours a week for one semester. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 371R. Information Retrieval and Web Search.**

Introduction to traditional and recent methodologies for indexing, processing, querying, and classifying unstructured and semi-structured textual data, including hypertext and World Wide Web documents. Three lecture hours a week for one semester. Computer Sciences 371R and 378 (Topic: Intelligent Information Retrieval and Web Search) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 371S. Object-Oriented Software Engineering.**

Object-oriented formulations of software systems as executable specifications, object-oriented analysis, design of software architectures, translation of high-level specification systems. Three lecture hours a week for one semester. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 373. Software Engineering.**

Introduction to current knowledge, techniques, and theories in large software system design and development. Three lecture hours a week for one semester. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 373S. Software Design.**

Model-driven engineering, UML metamodels and constraints, model transformations, object-oriented refactorings, design patterns, object-oriented frameworks and plug-ins, layered and dataflow architectural

styles, map-reduce parallel software architectures, and service-oriented architectures. Three lecture hours a week for one semester Computer Science 373S and 378 (Topic: Software Design) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 374L. Longhorn Startup.**

Focus on skill development and mentoring in startup formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Emphasis on written and oral presentation of startup activities. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 374L, 378 (Topic: Longhorn Startup), Electrical Engineering 377E, Engineering Studies 377E, Management 337 (Topic: Interdisciplinary Entrepreneurship), 337 (Topic 2). Prerequisite: Upper-division standing, Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-, and consent of instructor.

### **C S 375. Compilers.**

An examination of formal description of languages, lexical analysis, syntax analysis, syntax-directed translation, run-time system management, code generation, code optimization, compiler-building tools. Three lecture hours a week for one semester. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 376. Computer Vision.**

Explores computer vision, a discipline that develops methods that enable machines to interpret or analyze images and videos. Includes the study of image formation, feature detection, segmentation, multiple-view geometry, recognition and learning, and motion and tracking. Three lecture hours a week for one semester. Computer Science 376 and 378 (Topic: Computer Vision) may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 429 (or 310) or 429H (or 310H); Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C); and Mathematics 362K or Statistics and Data Sciences 321 (or Statistics and Scientific Computation 321).

### **C S 377. Principles and Applications of Parallel Programming.**

Models of parallel computation, fundamental concepts for representation of parallel computation structures, study of representative parallel programming systems, and programming of parallel algorithms and computations. Three lecture hours a week for one semester. Prerequisite: Computer Science 439 (or 372) or 439H (or 372H) with a grade of at least C-.

### **C S 377P. Programming for Performance.**

Investigation on the performance-critical features of modern computer architectures and how applications can take advantage of them to obtain high performance. Three lecture hours a week for one semester. Computer Science 377P and 378 (Topic: Programming for Performance) may not both be counted. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 178, 378. Undergraduate Topics in Computer Science.**

One or three lecture hours a week for one semester. Only one of the following may be counted unless the topics vary: Computer Science 178, 378, 178H, 378H. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

### **C S 178H, 378H. Undergraduate Topics in Computer Science: Honors.**

For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted unless the topics vary: Computer Science 178, 378, 178H, 378H. May be repeated for credit when the topics vary. Prerequisite: Computer Science 429 (or 310) or 429H (or 310H) with a grade of at least C-.

### **C S 379H. Computer Science Honors Thesis.**

Directed reading, research, and/or projects in areas of computer science, under supervision of a faculty member, leading to an honors thesis. The thesis must be approved by a committee of three readers. The equivalent of three lecture hours a week for one semester, by arrangement with a faculty member. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Mathematics 408C, 408K, or 408N; nine additional semester hours of upper-division coursework in computer science; and consent of the student's research supervisor and the departmental honors adviser.

## **School of Human Ecology**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### **Human Development and Family Sciences: HDF**

#### **Lower-Division Courses**

#### **HDF 304 (TCCN: TECA 1303). Family Relationships.**

Same as Women's and Gender Studies 301 (Topic 4). The process of family interaction over the life cycle. Application of research findings to the understanding of relationships. Only one of the following may be counted: Human Development and Family Sciences 304, 304H, Women's and Gender Studies 301 (Topic 4).

#### **HDF 304H. Family Relationships: Honors.**

The process of family interaction over the life cycle. Application of research findings to the understanding of relationships. Three lecture hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 304, 304H, Women's and Gender Studies 301 (Topic 4). Offered on the letter-grade basis only. Prerequisite: Consent of the department.

#### **HDF 312. Family Resource Management.**

Management concepts and theory in resource allocation used to meet family and life demands. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Human Development and Family Sciences 304.

#### **HDF 313 (TCCN: TECA 1354). Child Development.**

Same as Women's and Gender Studies 313. Motor, language, cognitive, social, and emotional development in the family context. Three lecture hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 313, 313H, Women's and Gender Studies 301 (Topic 5), 313. Prerequisite: Credit or registration for Human Development and Family Sciences 113L, and Psychology 301 with grade of at least C-.

**HDF 313H. Child Development: Honors.**

Motor, language, social, and emotional development of children in the family context, with an emphasis on research findings and evaluations. Three lecture hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 313, 313H, Women's and Gender Studies 301 (Topic 5: Child Development). Offered on the letter-grade basis only. Prerequisite: Psychology 301 with a grade of at least B-, credit or registration for Human Development and Family Sciences 113L, and consent of the department.

**HDF 113L. Child Development Laboratory.**

Students observe children at the University Child and Family Laboratory and relate their observations to the issues discussed in Human Development and Family Sciences 313 and 313H. One and one-half laboratory hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C- and credit or registration for Human Development and Family Sciences 313 or 313H.

**HDF 315L. Research Methods in Human Development and Family Sciences.**

Survey of research methods, including observational and experimental techniques. Three lecture hours a week for one semester. Prerequisite: Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302); credit with a grade of at least C- or registration for Human Development and Family Sciences 304 or 304H, 313 or 313H, and 113L.

**HDF 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Human Development and Family Sciences.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**Upper-Division Courses****HDF 322. Personal and Family Finance.**

Overview from the individual and family perspectives of financial planning tools, cash management, consumer credit, basic tax preparation, and insurance selection. Includes application of knowledge to hypothetical situations and case studies. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**HDF 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Human Development and Family Sciences.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**HDF 335. Adult Development.**

Adulthood and the development, changes, and maturation that occurs, including the impact of relationships in adulthood. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and Human Development and Family Sciences 313 and 113L.

**HDF 337. Personal Relationships.**

Studies intimate relationships, including dating, cohabitation, marriage, and gay and lesbian relationships, as well as situational factors that

may influence basic relationship processes. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; Human Development and Family Sciences 304 or 304H, and 315L with a grade of at least C- in each.

**HDF 338. Developmentally Appropriate Practices with Young Children.**

Developmentally appropriate practices, the importance of play, arranging environments, material selection, and a basic understanding about centers and activities for young children. Three lecture hours a week for one semester, with an additional three to six hours of fieldwork sometime during the semester. Prerequisite: Upper-division standing; and a grade of at least C- in one of the following: Human Development and Family Sciences 313 and 113L, 313H and 113L, or Psychology 304.

**HDF 340. Ethical, Philosophical, and Professional Development Issues.**

Explores ethical and philosophical issues; personal values and choices; professional development and leadership; and career goals, opportunities, and challenges as they relate to human development and family sciences. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**HDF 342. Development of Psychopathology from Infancy through Adolescence.**

A developmental approach to the study of emotional and behavioral disorders from infancy through adolescence, including attachment disorders, autism, attention deficit disorder, conduct disorder, phobias, obsessive-compulsive disorder, depression, eating disorders, and schizophrenia. Also includes contrasting theories of psychopathology, epidemiology and outcomes of childhood disorders, therapeutic approaches and their efficacy, and developmental resilience. Three lecture hours a week for one semester. Human Development and Family Sciences 342 and Psychology 339 may not both be counted. Prerequisite: Upper-division standing; Human Development and Family Sciences 313 or 313H, and 113L with a grade of at least C- in each.

**HDF 343. Human Development in Minority and Immigrant Families.**

Examines the theories of human development and cultural psychology as they apply to the developmental issues of minority and immigrant children and families. Three lecture hours a week for one semester. Human Development and Family Sciences 343 and 378K (Topic: Child Development in Minority and Immigrant Families) may not both be counted. Prerequisite: Upper-division standing and Human Development and Family Sciences 313 or 313H, 113L, and 315L with a grade of at least C- in each.

**HDF 345. Peer Relationships.**

Children's peer relationships from toddlerhood to adolescence. Three lecture hours a week for one semester. Human Development and Family Sciences 345 and 378K (Topic: Peer Relationships) may not both be counted. Prerequisite: Upper-division standing; Human Development and Family Sciences 313 or 313H, 113L, and 315L with a grade of at least C- in each.

**HDF 347. Socioeconomic Problems of Families.**

An analysis of how socioeconomic factors, including income, education, employment, and their intersection with race and gender affect child development and family functioning. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and six semester hours of coursework in anthropology, economics, education, human development and family sciences, psychology, social work, or sociology.

### **HDF 351. Infant Development and Attachment Relationships.**

The development of emerging social language and cognitive capacities during infancy and toddlerhood and the development and consequences in infant-caregiver attachment security. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Human Development and Family Sciences 313 or 313H, 113L, and 315L, with a grade of at least C- in each.

### **HDF 352. Field Experience: Community.**

Practicum in applied settings concerning human development and family sciences. One lecture hour and ten to twelve hours of fieldwork a week for one semester. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.00; the following coursework with a grade of at least C- in each course: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, 315L, and 340; Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302); Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332; and nine additional semester hours of upper-division coursework in human development and family sciences. Admission by application only, filed with the Department of Human Development and Family Sciences by May 1 for enrollment in the following spring semester, or by December 1 for enrollment in the following fall semester.

### **HDF 652F. Field Practicum: Community.**

Designed for students in their last semester. Practicum in settings concerning human development and family sciences. One lecture hour and at least twenty laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.00; the following coursework with a grade of at least C- in each course: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, 315L, and 340; Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302); Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332; and nine additional semester hours of upper-division coursework in human development and family sciences. Admission by application only, filed with the Department of Human Development and Family Sciences by May 1 for enrollment in the following spring semester, or by December 1 for enrollment in the following fall semester.

### **HDF 352L. Field Experience: Early Childhood.**

Study and implementation of skills necessary for planning, guiding, and interacting with young children and their families, and for the management of facilities that provide services for young children. One lecture hour and ten to twelve hours of fieldwork a week for one semester. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.00; the following coursework with a grade of at least C- in each course: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, and 315L, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302); Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332; Human Development and Family Sciences 338, 340, and 466; three additional semester hours of upper-division coursework in human development and family sciences; and consent of instructor. Admission by application only, filed with the Department of Human Development and Family Sciences by May 1 for enrollment in the following spring semester, or by December 1 for enrollment in the following fall semester.

### **HDF 652P. Field Practicum: Early Childhood.**

Designed for students in their last semester. Study and implementation of skills necessary for planning, guiding, and interacting with young children and their families; and for the management of facilities that provide services for young children. One lecture hour and at least twenty laboratory hours a week for one semester. Offered on the letter-grade

basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.00; the following coursework with a grade of at least C- in each course: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, and 315L, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302); Mathematics 408C, 408N, 408R, or Statistics and Data Sciences 332; Human Development and Family Sciences 338, 340, and 466; three additional semester hours of upper-division coursework in human development and family sciences; and consent of instructor. Admission by application only, filed with the Department of Human Development and Family Sciences by May 1 for enrollment in the following spring semester, or by December 1 for enrollment in the following fall semester.

### **HDF 353. Longevity in the 21st Century.**

Explores questions concerning the rapidly changing world in which people routinely live into old age. Focus on challenges adults face at the individual, familial, and societal level due to a prolonged adulthood. Three lecture hours a week for one semester. Human Development and Family Sciences 353 and 378K (Topic: Longevity in the 21st Century) may not both be counted. Prerequisite: Upper-division standing; and Human Development and Family Sciences 304 or 304H, and 315L with a grade of at least C- in each.

### **HDF 155H, 255H, 355H, 655H. Problems Course: Honors.**

Intensive study of selected research problems. For each semester hour of credit earned, at least three laboratory hours a week for one semester. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; Human Development and Family Sciences 315L with a grade of at least B-; Mathematics 316, Statistics and Data Sciences 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), or 306 (or Statistics and Scientific Computation 306) with a grade of at least B-; a University grade-point average of at least 3.00; and consent of the department.

### **HDF 155R, 255R, 355R, 655R. Problems Course: Research Practicum.**

Intensive study of selected problems of a transdisciplinary nature. For each semester hour of credit earned, the equivalent of three lecture hours a week for one semester. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; a University grade point average of at least 2.00; the following coursework with a grade of at least C- in each course: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, and 315L; Mathematics 408C, 408N, 408R, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), or 332; and consent of instructor. Admission by application only, filed with the Department of Human Development and Family Sciences by May 1 for enrollment in the following spring semester, or by December 1 for enrollment in the following fall semester; or consent of instructor. For nonmajors, the application process and prerequisites may be waived by consent of instructor.

### **HDF 356. The Evolution of Relationships.**

Reviews the scientific literature on the evolution and function of adult romantic relationships. Three lecture hours a week for one semester. Prerequisite: Human Development and Family Sciences 304 or 304H.

### **HDF 358. Parent-Child Relationships.**

The determinants of parenting attitudes and behavior and the effects on children of variations in sensitivity, discipline, and other aspects of parenting. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Human Development and Family Sciences 313, 113L, and 315L with a grade of at least C- in each.

### **HDF 360. Methods of Family Life Education.**

An examination, integrating theory and applied knowledge, of the best practices for working with families. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and Human Development and Family Sciences 304 or 304H, and 315L with a grade of at least C- in each.

### **HDF 362. Children and Public Policy.**

The positive and negative effects of policy on children and the policy landscape in several major domains of child and family life in the United States and in other countries. Three lecture hours a week for one semester. Prerequisite: Six semester hours of upper-division coursework in human development and family sciences, anthropology, education, psychology, sociology, or social work.

### **HDF 466. Guidance in Adult-Child Relationships.**

Same as Women's and Gender Studies 466. Theory and implementation of positive child and adult interactions, communication, and guidance strategies. Two lecture hours and four laboratory hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 466, Women's and Gender Studies 345 (Topic 4: Guidance in Adult-Child Relationships), 466. Prerequisite: Human Development and Family Sciences 313 or 313H, 113L, and three semester hours of upper-division coursework in human development and family sciences, education, psychology, or sociology, with a grade of at least C- in each.

### **HDF 371. Adolescent Development in Context.**

The biological, cognitive, and social changes that occur during the second decade of life, including the developmental issues faced by adolescents. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Human Development and Family Sciences 313 or 313H, 113L, and 315L, with a grade of at least C- in each.

### **HDF 372K. Families in Transition.**

Analysis of interaction, transitions, and crises over the family life span. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and the following courses with a grade of at least C- in each: Human Development and Family Sciences 304 or 304H, and 315L and 337.

### **HDF 378K. Advanced Child and Family Development.**

Concepts, theories, and issues in human development and family sciences. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Six semester hours of upper-division coursework in human development and family sciences (or child development), anthropology, education, psychology, sociology, or social work, and consent of instructor.

**Topic 5: Media and the Family.**

**Topic 6: Introduction to Early Childhood Intervention.**

**Topic 8: Advanced Early Childhood Intervention.** Additional prerequisite: Human Development and Family Sciences 378K (Topic 6).

**Topic 9: Introduction to Child Life.** Introduction to the role of child life specialists in health care settings and the application of general human development principles to the care of hospitalized children and adolescents. Human Development and Family Sciences 378K (Topic: Introduction to Child Life) and 378K (Topic 9) may not both be counted.

**Topic 10: Sexuality in Human Development and Family Sciences.** Introduction to contemporary understandings of sexuality in the context of human development and families, organized around major subjects in the field of sexuality studies. Human Development and

Family Sciences 378K (Topic: Sexuality in Human Development and Family Sciences) and 378K (Topic 10) may not both be counted.

### **HDF 378L. Theories of Child and Family Development.**

Study and analysis of major theories in human and family development. Three lecture hours a week for one semester. Prerequisite: The following with a grade of at least C- in each: Human Development and Family Sciences 313 or 313H, 113L, 315L, and three additional semester hours of upper-division coursework in human development and family sciences.

### **HDF 379H. Honors Tutorial Course.**

Supervised individual research on a special topic in human development and family sciences; oral presentation and preparation of a scholarly paper covering the research. May be based on laboratory, library, or field research. Conference course. May be repeated once for credit. Prerequisite: Upper-division standing, a University grade point average of at least 3.00, admission to the human development and family sciences honors program, and consent of the honors adviser. Name of honors adviser and application procedure are available in the division office.

## **Human Ecology: H E**

### **Lower-Division Courses**

#### **H E 115H. Freshman Honors Seminar.**

Research presentations by students, faculty, and invited scientists on current issues in human ecology, human development and family sciences, and nutrition. One lecture hour a week for one semester. Prerequisite: Admission to the honors degree option in human development and family sciences or nutrition; three semester hours of honors-designated coursework in chemistry, biology, or mathematics with a grade of at least B-; and Human Development and Family Sciences 313 and 113L, or Nutrition 312 and 112L, with a grade of at least B- in each course.

### **Upper-Division Courses**

#### **H E 225H. Sophomore Honors Seminar.**

Students plan, conduct, write, and present research on a current topic in human ecology. Two lecture hours a week for one semester. Prerequisite: Six semester hours of honors-designated coursework in chemistry, biology, or mathematics; concurrent enrollment in a course chosen from a list maintained in the departmental office; and consent of instructor and the departmental honors adviser.

#### **H E 355. Problems Course.**

Intensive study of selected problems of a transdisciplinary nature. The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor; additional prerequisites vary with the topic.

**Topic 1: Research in Family Economics.**

## **Nutrition: NTR**

### **Lower-Division Courses**

#### **NTR 306 (TCCN: BIOL 1322, HECO 1322). Fundamentals of Nutrition.**

Essential food components and their functions in life processes. Three lecture hours a week for one semester. Only one of the following may be counted: Nutrition 306, 312, 312H. Nutrition 306 may not be counted toward a nutritional sciences degree.

#### **NTR 307. Introductory Food Science.**

Application of the principles of food chemistry to processing and preparation techniques. Three lecture hours a week for one semester.

Prerequisite: For nutrition majors: Nutrition 312 or 312H with a grade of at least C-, and credit or registration for 107L; for others: Nutrition 306, 312, or 312H with a grade of at least C-.

### **NTR 107L. Introductory Food Science Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Credit or registration for Nutrition 307.

### **NTR 312. Introduction to Nutritional Sciences.**

Biochemical, physiological, and cellular functions of energy macronutrients, vitamins and minerals, and the scientific basis for current dietary and nutrient recommendations. Designed for science majors. Three lecture hours a week for one semester. Only one of the following may be counted: Nutrition 306, 312, 312H. Prerequisite: Credit with a grade of at least a C- or registration for Nutrition 112L.

### **NTR 312H. Introduction to Nutritional Sciences: Honors.**

Restricted to honors eligible majors in nutritional sciences, biology, biochemistry, and students in the Dean's Scholars Honors Program. Biochemical, molecular, and cellular functions of nutrients with emphasis on primary scientific literature and current methodology. Three lecture hours a week for one semester. Only one of the following may be counted: Nutrition 306, 311, 312, 312H. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 301 or 301H; and Mathematics 408C or 408n, or the equivalent; and credit or registration for Biology 311C or 315H, and Chemistry 302 or 302H.

### **NTR 112L. Introduction to Nutritional Science Laboratory.**

Collection and evaluation of dietary intake data, nutrient composition of food, and survey of dietetic practice. Three laboratory hours a week for one semester. Prerequisite: Chemistry 301 with a grade of at least C-; credit or registration for Biology 311C, Chemistry 302, and Nutrition 312; and one of the following with a grade of at least C-: Mathematics 408C, 408D, 408N, Statistics and Data Sciences 302, 304, 306, 325H, 328M, (Statistics and Scientific Computation 302, 304, 306, 325H, 328M).

### **NTR 312R. Research in Nutritional Sciences.**

Restricted to honors eligible majors in nutritional sciences, biology, biochemistry, and students in the Dean's Scholars Honors Program. Introduction to biochemical and molecular biological techniques, enzyme and coenzyme assays, dietary analysis and assessment protocols, and statistical methods in nutritional sciences. Preparation of a scholarly paper and oral presentation of research findings. One lecture hour and six laboratory hours a week for one semester. Nutrition 112L and 312R may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 301 or 301H; and Mathematics 408C or 408N, or the equivalent; and credit or registration for Biology 311C or 315H, Chemistry 302 or 302H, and Nutrition 312H.

### **NTR 315. Nutrition through the Life Cycle.**

Adapting nutrition recommendations to physiological changes throughout the life span. Three lecture hours a week for one semester. Prerequisite: Nutrition 306, 312, or 312H with a grade of at least C-.

### **NTR 316. Culture and Food.**

Influence of culture on foodways around the world. Three lecture hours a week for one semester. Prerequisite: Nutrition 306, 312, or 312H with a grade of at least C-.

### **NTR 218. Assessment of Nutritional Status.**

Assessment of nutritional status using anthropometric, biochemical, clinical, and dietary intake data, and development and implementation of effective care for individuals. Two lecture hours a week for one semester.

Prerequisite: Nutrition 312 and 112L, or 312H and 312R with a grade of at least C- in each; and credit or registration for Nutrition 118L.

### **NTR 118L. Assessment of Nutritional Status Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Credit or registration for Nutrition 218.

### **NTR 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Nutrition.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **NTR 321. International Nutrition: The Developing World.**

Nutrition-related issues in the developing world, including nutrient deficiency and disease, concerns in vulnerable populations (pregnancy, infancy, childhood, and old age), and food aid. Three lecture hours a week for one semester. Prerequisite: Nutrition 306, 312, or 312H with a grade of at least C-.

### **NTR 324. Advanced Food Science.**

Application of the principles of food chemistry to the development of food products. Three lecture hours a week for one semester. Offered in the spring semester only. Prerequisite: Chemistry 320M, Nutrition 307, 107L, and 326 with a grade of at least C- in each; and credit or registration for Nutrition 124L.

### **NTR 124L. Advanced Food Science Laboratory.**

Individual research project on food product development and evaluation. Three laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Credit or registration for Nutrition 324.

### **NTR 326. Intermediate Nutrition and Metabolism.**

Integration of nutrition, genetics, cell biology, and molecular biology. Focuses on the cellular and molecular basis of nutrition-related diseases and nutrient-gene interactions. Three lecture hours and one discussion hour a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each course: Biology 311C, and Nutrition 312 or 312H; and credit or registration for Chemistry 320M, and Nutrition 112L or 312R.

### **NTR 126L. Nutritional Sciences Laboratory.**

Basic laboratory techniques in nutritional sciences. Three laboratory hours a week for one semester. Prerequisite: Credit or registration for Nutrition 326.

### **NTR 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Nutrition.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **NTR 330. Nutrition Education and Counseling.**

Application of counseling and learning theories to the care of individuals and groups in community and clinical settings. Three lecture hours and

one additional class hour a week for one semester. Prerequisite: Nutrition 315 and 326 with a grade of at least C- in each.

### **NTR 331. International Nutrition: Social and Environmental Policies.**

Explores the nutritional concerns of different countries, environmental aspects of food supply, and social policies needed to balance supply with demand in a sustainable manner. Three lecture hours a week for one semester. Nutrition 331 and 360 (Topic: International Nutrition: Social and Environmental Policies) may not both be counted. Prerequisite: Upper-division standing, and Nutrition 306, 312, or 312H with a grade of at least C-.

### **NTR 332. Community Nutrition.**

National and international issues in public health and nutrition programs. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each course: Nutrition 312 or 312H; 315; and 326.

### **NTR 334. Foodservice Systems Management.**

Procurement, production, and service delivery in foodservice systems. Three lecture hours a week for one semester. Prerequisite: For nutrition majors: Nutrition 307, 107L, and 326 with a grade of at least C- in each, and credit or registration for Nutrition 234L; for others: Nutrition 307 with a grade of at least C-, and one of the following with a grade of at least C-: Nutrition 306, 312, or 312H.

### **NTR 234L. Laboratory in Foodservice Systems.**

Six laboratory hours a week for one semester. Prerequisite: Credit or registration for Nutrition 334.

### **NTR 337. Principles of Epidemiology in Nutritional Sciences.**

Introduction the role of epidemiology methods as the basis for selection of study design and data collection tools in nutrition research such as dietary tools, biomarkers of diet or disease, and anthropometric measurements like obesity. Emphasis on interpretation of study results in nutrition research. Three lecture hours per week for one semester. Offered on the letter-grade basis only. Prerequisite: Credit with a grade of at least C- or registration for Nutrition 312H or 326, and one of the following with a grade of at least C-: Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 304 (or Statistics and Scientific Computation 304), 306 (or Statistics and Scientific Computation 306), 325H (or Statistics and Scientific Computation 325H), or 328M (or Statistics and Scientific Computation 328M).

### **NTR 338H. Issues in Nutrition and Health: Honors.**

Restricted to honors majors in biology, biochemistry, and nutritional sciences, and students in the Dean's Scholars honors program. Identifying, reading, analyzing, writing, and presenting scientific research on selected subjects in nutrition and human health. Detailed literature review as preparation for an honors research thesis. Three lecture hours a week for one semester. Nutrition 338H and 338W may not both be counted. Prerequisite: Biology 325 or 325H; Nutrition 312H and 312R; one of the following: Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), or 325H (or Statistics and Scientific Computation 325H); and credit or registration for Biology 365S and Chemistry 369, or Chemistry 339K and 339L.

### **NTR 338W. Issues in Nutrition and Health.**

Identifying, reading, analyzing, writing, and presenting scientific research on selected topics in nutrition and human health. Three lecture hours a week for one semester. Nutrition 338H and 338W may not both be counted. Prerequisite: The following with a grade of at least C-:

Biochemistry 369 (or Chemistry 369), or Biochemistry 339F (or Chemistry 339K and 339L); Biology 325 and 365S (or 416L); Nutrition 312H or 326; and one of the following with a grade of at least C-: Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 304 (or Statistics and Scientific Computation 304), 306 (or Statistics and Scientific Computation 306), 325H (or Statistics and Scientific Computation 325H), or 328M (or Statistics and Scientific Computation 328M).

### **NTR 342. Advanced Nutritional Sciences.**

Biochemical and molecular biological aspects of carbohydrate, fat, and amino acid metabolism. Three lecture hours and one discussion hour a week for one semester. Prerequisite: The following coursework with a grade of at least C-: Nutrition 326; and Biology 325 or Nutrition 218 and 118L; and credit with a grade of at least C- or registration for Biochemistry 369 (or Chemistry 369) and Biology 365S.

### **NTR 343. Vitamins and Minerals.**

Biomedical, cellular and molecular, and clinical aspects of vitamins, minerals, and water. Three lecture hours a week for one semester. Only one of the following may be counted: Nutrition 343, 344, 365 (Topic 1). Prerequisite: Biology 325, 365S, and Nutrition 342, with a grade of at least C- in each.

### **NTR 144M. Advanced Nutrition II Laboratory.**

Advanced laboratory techniques in nutrition assessment and research. Three laboratory hours a week for one semester. Offered in the spring semester only. Prerequisite: Consent of instructor.

### **NTR 245C. Clinical Practice in Medical Nutrition Therapy I.**

Application of principles of medical nutrition therapy to the care of clients in the practice setting. Nine hours of supervised practice a week for one semester. Prerequisite: Nutrition 370 with a grade of at least C-, credit or registration for Nutrition 371, and admission to the Coordinated Program in Dietetics.

### **NTR 345M. Clinical Practice in Medical Nutrition Therapy II.**

Application of principles of medical nutrition therapy to the care of patients in health care facilities. Forty hours of supervised practice a week for four weeks. Prerequisite: Nutrition 245C and 371 with a grade of at least C- in each. Students must register for Nutrition 372C in the same semester.

### **NTR 152, 252, 352. Field Experience in Nutrition.**

For each semester hour of credit earned, three field placement hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Approval of application for field experience. Applications are available in the department office.

### **NTR 353. Field Experience in International Nutrition.**

Supervised study abroad experience designed to help students understand nutrition science issues, applications, related health care practices in a global environment, and other cultures. Students work in schools, hospitals, or similar settings to gain professional experience with food science and dietetics. Five lecture hours and ten field hours a week for five weeks. Prerequisite: Nutrition 306, 312, or 312H with a grade of at least C-; and approval of an application to study abroad.

### **NTR 155, 255, 355, 455. Undergraduate Research in Nutrition.**

Supervised individual undergraduate research in nutrition. For each semester hour of credit earned, at least three laboratory hours a week for one semester. May be repeated for credit, but no more than four semester hours may be counted toward a degree in nutrition. Any

additional hours must be taken on the pass/fail basis. Nutrition 355 and 355H may not both be counted. Prerequisite: Consent of instructor.

### **NTR 355H. Honors Research.**

Restricted to honors eligible majors in nutritional sciences, biology, biochemistry, and students in the Dean's Scholars Honors Program. Research in biological, biochemical, or nutritional science, coordinated with readings of scientific literature, and a written research report for each semester in which credit is sought. Nutrition 355 and 355H may not both be counted. May be repeated for credit, but no more than nine semester hours may be counted toward the major in nutrition. Any additional hours must be taken on the pass/fail basis. Prerequisite: Biology 325 or 325H; Nutrition 312H and 312R; and approval of research supervisor.

### **NTR 355M. Advanced Food Systems Management.**

Financial control, quality assurance, personnel administration, foodservice equipment, layout and design in foodservice operations. Analysis and evaluation of an organized foodservice operation. Three lecture hours and four hours of supervised practice a week for one semester. Prerequisite: Accounting 310F or 311, and Nutrition 334 and 234L, with a grade of at least C- in each.

### **NTR 360. Selected Topics in Applied Nutrition.**

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

### **NTR 162. Standards, Ethics, and Credentialing for Dietetic Practice.**

Identification of standards and discussion of current issues in ethics and credentialing for dietetics practice. One lecture hour a week for one semester. Prerequisite: Credit or registration for Nutrition 218 and 118L.

### **NTR 365. Selected Topics in Nutritional Sciences.**

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 2: Nutrition and Genes.** Interactions between nutrients and gene expression, including heredity, gene regulation, metabolic disease, developmental abnormalities, and molecular techniques. Additional prerequisite: Biology 325, 365S, and Nutrition 342, with a grade of at least C- in each.

**Topic 4: Obesity and Metabolic Health.** Examines the prevalence, prevention, and treatment of adult and childhood obesity, and the metabolic disorders related to obesity. Prerequisite: Biology 365S, and Nutrition 312 or 312H with a grade of at least C-.

### **NTR 366L. Research Methods in Nutritional Sciences.**

Focuses on state-of-the-art research in nutrition, including biochemistry and molecular biological techniques for nutrient-gene interactions, enzyme and coenzyme functions, and nutrient analysis of biologic materials. Includes data analysis and statistical methods. One lecture hour and six laboratory hours a week for one semester. Prerequisite: Nutrition 126L with a grade of at least C-.

### **NTR 167. Undergraduate Seminar in Nutritional Sciences.**

One lecture hour a week for one semester. Prerequisite: Upper-division standing.

### **NTR 370. Medical Nutrition Therapy I.**

The role of nutrition in prevention and treatment of chronic disease such as diabetes and heart disease. Three lecture hours a week for one semester. Prerequisite: Nutrition 326 with a grade of at least a C-; and credit with a grade of at least C- or registration for the following: Biology

365S, Biochemistry 369 (or credit for Chemistry 369), and Nutrition 218 and 118L.

### **NTR 371. Medical Nutrition Therapy II.**

Nutritional care of critically ill patients, including techniques of nutrition support. Three lecture hours a week for one semester. Prerequisite: Nutrition 326 with a grade of at least a C-; and credit with a grade of at least C- or registration for the following: Biology 365S, Biochemistry 369 (or credit for Chemistry 369), and Nutrition 218 and 118L.

### **NTR 372C. Practicum in Clinical Dietetics.**

Supervised practice in health care facilities. Forty hours of supervised practice a week for four weeks. Prerequisite: Admission to the Coordinated Program in Dietetics. Students must register for Nutrition 345M in the same semester.

### **NTR 372F. Practicum in Food Services Systems Management.**

Supervised practice in food service facilities. Forty hours of supervised practice a week for four weeks. Prerequisite: Nutrition 245C and 355M with a grade of at least C- in each, and admission to the Coordinated Program in Dietetics. Students must register for Nutrition 373S in the same semester.

### **NTR 373S. Practicum in Dietetic Administration.**

Supervised practice in the administration of food and nutrition programs. Forty hours of supervised practice a week for three weeks. Prerequisite: Admission to the Coordinated Program in Dietetics. Students must register for Nutrition 372F in the same semester.

### **NTR 374C. Practicum in Community Dietetics.**

Supervised practice in one or more community-based nutrition programs. Forty hours of supervised practice a week for five weeks. Prerequisite: Nutrition 345M, 372C, 372F, and 373S with a grade of at least C- in each; and admission to the Coordinated Program in Dietetics.

### **NTR 374P. Advanced Practicum in Dietetics.**

Culminating experience in the practice of administrative, clinical, or community dietetics. Forty hours of supervised practice a week for five weeks. Prerequisite: Nutrition 345M, 372C, 372F, and 373S with a grade of at least C- in each; and admission to the Coordinated Program in Dietetics.

### **NTR 379H. Honors Tutorial Course.**

Supervised individual research on a special topic in nutrition; oral presentation and preparation of a scholarly paper covering the research. May be based on laboratory, library, or field research. Conference course. May be taken twice for credit. May be repeated for credit. Prerequisite: Consent of the student's research supervisor and the departmental honors adviser.

## **Public Health: PBH**

### **Lower-Division Courses**

#### **PBH 317. Introduction to Public Health.**

Overview and basic principles of public health, including the public health system, concepts and tools for measuring health in populations, the relationship between public health and the medical care system, and the role of law and government in public health. Three lecture hours a week for one semester. Biology 317 and Public Health 317 may not both be counted.

## Upper-Division Courses

### **PBH 320. Topics in Health Informatics and Health Information Technology.**

Concepts, theories, and issues in health informatics and health information technology. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Biology 325 or 325H with a grade of C-.

#### **Topic 1: Introduction to Health Informatics and Healthcare Analytics.**

Restricted to students enrolled in the Health Informatics and Health Information Technology Professional Education Program. Consists of didactic lectures about the theoretical foundations of health informatics, database theory and management, healthcare standards, medical decision making, and healthcare analytics. Includes four hands-on workshops that relate to subjects taught in this course: HL7, SQL, Microsoft Excel, Microsoft Access, and Tableau. Also includes a research project over a six-eight week time period, production of a professional poster, and a presentation in a research poster forum judged by faculty, industry representatives, healthcare professionals, and policy makers.

**Topic 2: Fundamentals of Health Information Technology.** Restricted to students enrolled in the Health Informatics and Health Information Technology Professional Education Program. Explores healthcare policy (including privacy and security), current technologies (telemedicine, hospital information systems and computer and networking technologies) and the interoperable exchange of healthcare data.

**Topic 3: Project Management, Process Redesign and Quality Improvement.** Restricted to students enrolled in the Health Informatics and Health Information Technology Professional Education Program. Explores the basics of project management, including requests for proposals, scope, project planning, budgets and deliverables. Also discussed is an analysis of workflow processes and the impact of technology to improve these processes. Quality improvement, including tools to improve quality, is also presented. Includes several individual assignments and one team project.

**Topic 4: Operational Models of Healthcare Systems.** Restricted to students enrolled in the Health Informatics and Health Information Technology Professional Education Program. Explores the complex United States (US) health care system and explains the manner by which health care is delivered along a continuum of care. A special emphasis is placed on the operational delivery of ambulatory care and the manner in which acute care facilitates are evolving. Subjects include a comparison of the US health care system to health care delivery in other countries, population health and health care finance/ insurance - including discussion on public (Medicare and Medicaid) and private (Managed Care) coverage. Descriptions of current and emerging payment mechanisms, revenue cycle management, risk management, overhead reduction and practice management are covered in detail to allow students a robust understanding of business issues associated with health care delivery.

**Topic 5: Technology Competencies in Health Informatics and Health Information Technology.** Restricted to students enrolled in the Health Informatics and Health Information Technology Professional Education Program. Hands-on laboratory, team-taught by program faculty and staff with support from industry partners. Utilization of multiple health informatics and health information technology systems, health information exchange and interoperability software, and key analytics tools. This laboratory builds upon concepts taught in Public Health 320, Topic 1 and Public Health 320, Topic 2.

**Topic 6: Practicum and Professional Development in Health Informatics and Health IT.** Restricted to students enrolled in the Health Informatics and Health Information Technology Professional Education Program. Professional development lectures, activities, and a ten-day practicum experience off campus to experience working

with industry, healthcare systems, policy makers, and other experts in the field.

### **PBH 323. Introduction to Health Informatics.**

Introduces theoretical foundations of health informatics, database theory and management, healthcare standards, and medical decision making. Only one of the following may be counted: Biology 337 (Topic: Introduction to Health Informatics), 353, Public Health 323.

### **PBH 330. Topics in Public Health.**

Concepts, theories, and issues in public health. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **PBH 334. Global Health.**

An investigation of global health issues, including the principles of global health, the burden of morbidity and mortality, health determinants, health care and public health systems, socioeconomic development, and human rights. Three lecture hours a week for one semester. Biology 334 and Public Health 334 may not both be counted. Prerequisite: Public Health 358D and 368D with a grade of at least C- in each.

### **PBH 137, 237, 337, 437. Selected Topics in Public Health.**

Recent developments and research methods in the field of public health will be explored. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics may require additional hours. May be repeated for credit when the topics vary. Prerequisite: Bio 325 or 325H with a grade of at least C-.

### **PBH 338. Environmental Health.**

Introduction to the major areas of environmental health presented in the context of epidemiology, toxicology, and health effects. Subjects include water and air quality, solid and liquid waste, hazardous chemicals, radiation, infectious agents, food safety, and occupational health. Three lecture hours a week for one semester; several field trips to be arranged outside of the lecture. Prerequisite: Public Health 358D and 368D with a grade of at least C- in each.

### **PBH 341R. Public Health Research.**

Students conduct public health research, mentored by professionals at public health practice agencies or faculty at graduate schools of public health throughout Texas. An average of twelve hours of fieldwork a week for a total of at least 180 hours. May be repeated for credit. Prerequisite: Biology 325 or 325H with a grade of at least C-; students must also submit a proposal to the instructor.

### **PBH 354. Epidemiology.**

Restricted to public health majors. Introduction to basic principles and concepts in epidemiology, including descriptive epidemiology, association and causation, basic epidemiological study design, evidence-based decision analysis, and applications of epidemiology methods to basic and clinical science. Three lecture hours a week for one semester. Prerequisite: Public Health 317 with a grade of at least C-; and credit or registration for Biology 325 or 325H, and Statistics and Data Sciences 328M (or credit for Statistics and Scientific Computation 328M).

### **PBH 356. Health Behavior Theory and Practice.**

Restricted to public health majors. An introduction to social and behavioral theories that inform the discipline of public health and applied public health practice, including practical examples of how these theories inform and influence health promotion to understand and modify health-related behaviors. Focus on health inequities and inequalities of populations living in the United States and how underlying cultures and social structures impact the health of individuals and communities. Three lecture hours a week for one semester. Only one

of the following may be counted: Public Health 356, 368D, or Sociology 368D. Prerequisite: The following coursework with a grade of at least C- in each: Public Health 354, Biology 325, Statistics and Data Sciences 328M.

#### **PBH 358D. Health Policy and Health Systems.**

Covers the essentials of health policy and law, including the ways that policy and legal issues impact health care and public health systems. Three lecture hours a week for one semester. Only one of the following may be counted: Health and Society 330, Public Health 358D, Sociology 358D. Prerequisite: The following coursework with a grade of at least C- in each: Public Health 354, and Statistics and Data Sciences 328M (or Statistics and Scientific Computation 328M).

#### **PBH 361P. Public Health Internship.**

Includes a public health research project off campus at a public health practice agency or a graduate school of public health. The equivalent of twelve lecture hours a week for one semester, with additional hours to be arranged. May be repeated once for credit. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Biology 325 or 325H and Statistics and Data Sciences 328M (or Statistics and Scientific Computation 328M) with a grade of at least C- in each; and completion and approval of an internship application, available online at the Public Health website.

#### **PBH 379H. Honors Tutorial Course.**

Supervised individual research on a special topic in public health, leading to an honors thesis and an oral presentation. May be based on laboratory, library, or field research. Three lecture hours a week for one semester. May be repeated once for credit. May be repeated for credit. Prerequisite: Upper-division standing; a university grade point average of at least 3.0; admission to the public health honors program; and consent of the honors adviser.

## **Textiles and Apparel: TXA**

### **Lower-Division Courses**

#### **TXA 301. Clothing the Planet.**

Study of the role textiles and apparel play in human lives. Introduction to the textile and apparel industries, and the broad perspective and core skill sets that characterize the field. Subjects include terminology, fibers and fabrics, textile technology, product development through fashion design and retail merchandising, global sourcing and manufacturing, international promotion and marketing, and textile conservation, exhibition, and collection management. Three lecture hours a week for one semester.

#### **TXA 103, 203, 303. Topics in Textiles and Apparel.**

For each semester hour of credit earned, the equivalent of one hour a week for one semester. May be repeated for credit when the topics vary.

#### **TXA 205. Textiles.**

Chemical and physical properties of fibers and yarns, fabric construction, and finishes. Two lecture hours a week for one semester. Prerequisite: Credit or registration for Textiles and Apparel 105L.

#### **TXA 105L. Textiles Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Credit or registration for Textiles and Apparel 205.

#### **TXA 212K. Apparel Industry.**

Introduction to the integrated apparel design industry from the creative and merchandising perspective. Two lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Textiles and Apparel 212L; and the following coursework with a grade

of at least C- in each course: Textiles and Apparel 316L or 316Q; and 319, or 219C and 119L.

#### **TXA 212L. Apparel Product Development and Design Laboratory.**

Six laboratory hours a week for one semester. Prerequisite: Credit or registration for Textiles and Apparel 212K.

#### **TXA 313. Aesthetics: Theory and Practice.**

Introduction to the theoretical and practical aspects of the principles of design and visual literacy in the field of textiles and apparel. Introduction to the principles and theories that define what is aesthetically pleasing and the vocabulary necessary to identify, describe, and critique them. Three lecture hours a week for one semester.

#### **TXA 214K. Product Development.**

Introduction to all stages of product development involved in fashion and functional design. Emphasis on target market identification, cost analysis, material selection, and the organization of product development within the industry structure. Two lecture hours a week for one semester. Prerequisite: Concurrent registration for Textiles and Apparel 214L.

#### **TXA 214L. Product Development Laboratory.**

Application of product development skills and strategies involved in fashion and functional design. Emphasis on target market identification, cost analysis, material selection, and the position of product development within the industry structure. Six laboratory hours a week for one semester. Prerequisite: Concurrent registration for Textiles and Apparel 214K.

#### **TXA 316L. Apparel I.**

Industrial techniques of pattern design and garment construction. One lecture hour and six laboratory hours a week for one semester.

#### **TXA 316Q. Sewn Products Analysis.**

Evaluation of soft goods, including materials, quality of work, and costs. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration in Textiles and Apparel 205 and 105L.

#### **TXA 219C. Applied Art in Visual Presentation.**

Applied principles and elements of design as related to merchandise presentation, visual display, store layout, and space planning. Two lecture hours a week for one semester. Students with credit for Textiles and Apparel 319 may not earn credit for Textiles and Apparel 219C or 119L. Prerequisite: Textiles and Apparel 313 with a grade of at least C-.

#### **TXA 119L. Applied Art in Visual Presentation Laboratory.**

Application of the principles and elements of design as related to merchandise presentation, display planning, execution, and coordination. Three laboratory hours a week for one semester. Students with credit for Textiles and Apparel 319 may not earn credit for Textiles and Apparel 119L. Prerequisite: Credit with a grade of at least C- or registration for Textiles and Apparel 219C.

#### **TXA 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Textiles and Apparel.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## Upper-Division Courses

### TXA 325K. Culture, Gender, and Appearance.

Social, economic, aesthetic, and political aspects of historic costume and of the evolution of modern dress. Three lecture hours a week for one semester. Prerequisite: Textiles and Apparel 219C and 119L with a grade of at least C- in each, or Art History 301.

### TXA 325L. History of Dress and Cultural Change I.

Social, economic, aesthetic, and political aspects of costume evolution from ancient times through the Renaissance. Three lecture hours a week for one semester. Textiles and Apparel 325K and 325L may not both be counted. Prerequisite: Upper-division standing.

### TXA 325M. History of Dress and Cultural Change II.

Social, economic, aesthetic, and political aspects of costume evolution from the Baroque period through modern times. Three lecture hours a week for one semester. Textiles and Apparel 325K and 325M may not both be counted. Prerequisite: Upper-division standing.

### TXA 126. Apparel II.

Advanced apparel construction techniques using industry standards and portfolio development. One lecture hour a week for one semester. Prerequisite: Textiles and Apparel 316L with a grade of at least C- and credit or registration for Textiles and Apparel 226L.

### TXA 226L. Apparel II Laboratory.

Advanced apparel construction techniques using industry standards and portfolio development. Six laboratory hours a week for one semester. Prerequisite: Credit or registration for Textiles and Apparel 126.

### TXA 327. Clothing and Human Behavior.

The social, psychological, and nonverbal significance of clothing and the influence of clothing on behavior. Three lecture hours a week for one semester. Prerequisite: Three semester hours of coursework in psychology, sociology, or the School of Human Ecology.

### TXA 328. Research Methods in Textiles and Apparel.

Basic research methodology and academic writing. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, completion of an introductory statistics course, and Textiles and Apparel 205 and 105L with a grade of at least C- in each.

### TXA 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Textiles and Apparel.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### TXA 331. Textiles and Apparel in a Global Market.

Overview of the textiles and apparel industry including apparel industry standards, labor costs, economics, distribution, and structure in the modern global marketplace. Subjects include the analysis of consumption patterns and retailing systems to inform product development; exploring cross-cultural comparisons between global consumer markets; understanding importing and exporting systems and other procedures involved in modern supply chain activities; and grasping the collaborative nature of innovation and design, manufacturing and distribution, retailing, and customer satisfaction leading to sales in the global market. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### TXA 350. Advanced Apparel Design Portfolio.

Extensive sociological, cultural, and historic visual research for apparel design. Through a range of projects that incorporate computer-aided design, product illustration, technical packets, proposed production plans, and target market identification, students will produce a professional level, hard copy and online, portfolio that will help prepare them for a career in the apparel industry. The equivalent of three lecture hours a week for one semester. Prerequisite: Upper-division standing; Textiles and Apparel 164K (Topic 1) and 264L (Topic 1); and admission to the Apparel Design Internship Program.

### TXA 151. Pre-Internship Seminar.

Preparation course for students seeking internships. Subjects include application, internship interview process, effective professional communication, ethical decision making, leadership development, site expectations, and the impact of business environments on personal and career effectiveness in the field of textiles and apparel. One lecture hour a week for one semester. Prerequisite: Upper-division standing, Textiles and Apparel 301, 205, 105L, 214K, 214L, 316Q, 219C, 119L, and 376.

### TXA 352C, 652C. Field Experience in Textile Conservation.

Participation in an approved internship after completion of all conservation science stream coursework. Students will be placed in an appropriate site under the supervision of an available professional such that students may experience collection management, artifact storage and conservation, exhibit planning/installation, environmental monitoring, and/or other museum or conservation activities. A formal agreement between the faculty supervisor and internship sponsor will govern activities and be monitored throughout the experience through assignments, regular electronic communication, and a site visit. For Textiles and Apparel 352C, a minimum of 150 hours of supervised fieldwork for one semester. For Textiles and Apparel 652C, a minimum of 225 hours of supervised fieldwork for one semester. Prerequisite: Upper-division standing; and Admission to the Conservation Certificate Program, or Textiles and Apparel 219C, 119L, 354C, 354D, 354E, 354F, and 355D, and admission to the Conservation Internship Program for Conservation Science, Option IV major.

### TXA 352D. Field Experience in Apparel Design.

Application of apparel design techniques and principles in a professional environment. At least 154 hours of fieldwork for one semester. Prerequisite: Admission to the Apparel Design Internship Program, and Textiles and Apparel 164K (Topic 1: Flat Pattern) and 264L (Topic 1: Flat Pattern) with a grade of at least C- in each.

### TXA 352M. Field Experience in Retail Merchandising.

Application of merchandising techniques and principles in a professional environment. At least 154 hours of supervised fieldwork for one semester. Prerequisite: Admission to the Retail Merchandising Internship Program.

### TXA 353. Field Experience I.

Application of merchandising strategic planning in a professional environment with faculty and site director supervision. At least 150 hours of supervised fieldwork for one semester. Textiles and Apparel 315K and Textiles and Apparel 353 may not both be counted. Prerequisite: Admission to the Retail Merchandising Internship Program.

### TXA 354C. Material Properties and Deterioration.

Overview of the major mechanisms of textile deterioration from a variety of sources including light, dirt, various insects and microorganisms, as well as mechanical wear and tear. Examination of the peculiarities of these deterioration phenomena through the study of the basic chemical and physical properties of the fibers constituting the textiles. Three

lecture hours a week for one semester. Prerequisite: Textiles and Apparel 354E with a grade of C- or better.

#### **TXA 354D. Instrumental Methods for Conservation Assessment.**

Overview of primary instrumental methods for evaluating historical textiles in terms of physical characteristics, chemical content, strength loss, structural deterioration, color change, and overall structural integrity and status of impact of environmental factors. Focus on instrumental features, measuring procedures, and interpretation of instrumental data. Three lecture hours a week for one semester. Prerequisite: Textiles and Apparel 354E with a grade of at least C-.

#### **TXA 354E. Conservation Planning and Preventive Treatments.**

Implementation and management of textile conservation. Subjects include general requirements for preserving historical textiles, procedures for planning textile conservation projects, and major physical and chemical methods of preventive and postdamage treatments for historical textiles. One lecture hour and four laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Chemistry 320M, Textiles and Apparel 260L, and 260M.

#### **TXA 354F. Advanced Exhibit Planning and Installation.**

Planning and implementation of a full museum exhibit including budget, selection and preparation of artifacts, prop construction, signage, educational and promotional materials, donor/supporter communication, and opening event. Serves as a pre-internship/capstone course for conservation science majors. Six laboratory hours a week for one semester. Prerequisite: Textiles and Apparel 325L, 325M, and 355D.

#### **TXA 155, 355. Problems Course.**

Intensive study of selected problems of an interdisciplinary nature. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

#### **TXA 355C. Computer-Aided Design for Apparel.**

Computer technology used to create textile prints, weaves, illustrations, flat patterns, promotional pieces, and pattern markers. One lecture hour and six laboratory hours a week for one semester. Prerequisite: Textiles and Apparel 205 and 105L with a grade of at least C- in each; and credit with a grade of at least C- or registration for Textiles and Apparel 164K (Topic 1: Flat Pattern) and 264L (Topic 1: Flat Pattern).

#### **TXA 355D. Textiles Artifact Management and Conservation.**

Principles and techniques in the identification, documentation, conservation, and exhibition of textile-based artifacts. Six laboratory hours a week for one semester. Prerequisite: Textiles and Apparel 325M.

#### **TXA 355K. Textile and Apparel Economics.**

Economic and regulatory aspects of the textile and apparel industries. Three lecture hours a week for one semester. Prerequisite: Textiles and Apparel 205 and 105L with a grade of at least C- in each, and Economics 304K and 304L with a grade of at least C- in each.

#### **TXA 355N. History of Textiles.**

Role of textiles in the social, economic, aesthetic, and technological development of society; including production and design of textiles throughout history. Three lecture hours a week for one semester. Prerequisite: Textiles and Apparel 205 and 105L and three semester hours of coursework in art history, with a grade of at least C- in each course.

#### **TXA 355P. Problems in Retail Merchandising.**

Intensive study of selected problems related to field experience; development of analytical and problem-solving skills for retailing. At least 154 hours of supervised fieldwork for one semester. Prerequisite: Admission to the Retail Merchandising Internship Program.

#### **TXA 359H. Honors Reading Course.**

Supervised individual reading on special subjects. Conference course. Prerequisite: Upper-division standing, a University grade point average of at least 3.00, and consent of the undergraduate adviser.

#### **TXA 260L. Advanced Textiles.**

Composition, structure, and properties of textile products; contributions of textile research. Two lecture hours a week for one semester. Prerequisite: Textiles and Apparel 205 and 105L; Chemistry 301, 302, and 204; six semester hours of upper-division coursework in textiles and apparel with a grade of at least C- in each course; and credit with a grade of at least C- or registration for Textiles and Apparel 260M.

#### **TXA 260M. Advanced Textiles Laboratory.**

Analysis and evaluation of textile performance. Six laboratory hours a week for one semester. Prerequisite: Credit or registration for Textiles and Apparel 260L.

#### **TXA 361. Consumer Behavior in the Marketplace.**

Internal and external factors that influence consumer behavior in the marketplace. Application of concepts and theories from the social sciences to the areas of textiles, clothing, and appearance; experience in conducting market and consumer research. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and three semester hours of coursework in economics.

#### **TXA 164K. Advanced Problems in Clothing.**

Creative application of flat pattern or draping processes. One lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Textiles and Apparel 212K, 212L, 316L, 126, and 226L, with a grade of at least C- in each; and credit with a grade of at least C- or registration for the same topic of Textiles and Apparel 264L.

**Topic 1: Flat Pattern.**

**Topic 2: Draping.**

**Topic 3: Advanced Apparel Design.**

#### **TXA 264L. Advanced Problems in Apparel Laboratory.**

Six laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Credit with a grade of at least C- or registration for the same topic of Textiles and Apparel 164K.

**Topic 1: Flat Pattern.**

**Topic 2: Draping.**

**Topic 3: Advanced Apparel Design.**

#### **TXA 165, 265, 365. Advanced Topics in Textiles and Apparel.**

For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing. Additional prerequisites vary with the topic.

#### **TXA 376. Principles of Retail Merchandising.**

Retail strategic planning and implementation for soft goods and apparel. Three lecture hours a week for one semester. Prerequisite: Marketing 320F and six semester hours of upper-division coursework in textiles and apparel, business, studio art, or journalism.

### **TXA 377. Merchandising Systems.**

Application course focusing on the calculation and analysis of the selling price, profitability, assortment planning, purchasing, and inventory control. Includes spreadsheet application and exercises. Prerequisite: Upper-division standing; Textiles and Apparel 301, 205, 105L, 214K, 214L, 316Q, 219C, 119L, 151, and 376; and admission to the Retail Merchandising Internship Program.

### **TXA 378H. Honors Seminar in Textiles and Apparel.**

The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, a University grade point average of at least 3.00, and consent of the honors adviser.

### **TXA 379H. Honors Tutorial Course.**

Supervised individual research on a special topic in textiles and apparel; oral presentation and preparation of a scholarly paper covering the research. May be based on laboratory, library, or field research. Conference course. May be taken twice for credit. May be repeated for credit. Prerequisite: Upper-division standing, admission to the Textiles and Apparel Honors Program, Textiles and Apparel 359H with a grade of at least B-, and consent of the honors adviser.

## **Department of Marine Science**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### **Marine Science: MNS**

#### **Lower-Division Courses**

##### **MNS 101. Seminar in Marine Science.**

Overview of the depth and breadth of marine and freshwater science. Introduction to research opportunities at the university. One lecture hour a week for one semester. Biology 101C (Topic: Seminar in Marine Science) and Marine Science 101 may not both be counted. Prerequisite: None

##### **MNS 307 (TCCN: GEOL 1345). Introduction to Oceanography.**

Introduction to the sciences of oceanography: geological, physical, and biological. Two lecture hours and two laboratory hours a week for one semester. Marine Science 307 and Geological Sciences 307 may not both be counted.

##### **MNS 308. Humans and a Changing Ocean.**

The consequences of human-induced alteration of the marine environment including the impact on fisheries, marine mammals, food-web changes, and changes in species composition and ecological function will be explored. Designed for non-science majors. Two lecture hours and two laboratory hours a week for one semester. Marine Science 309 (Topic: Humans and a Changing Ocean) and 308 may not both be counted. Prerequisite: Marine Science 307 (or Geological Sciences 307).

##### **MNS 309. Topics in Marine Science.**

Designed for nonscience majors. Selected topics in marine science, including marine biology, marine chemistry, and physical oceanography. Two lecture hours and one and one-half laboratory hours a week for one semester. May not be counted toward a degree in marine science. May be repeated for credit when the topics vary. Prerequisite: Marine Science 307.

### **MNS 310. Fundamentals of Marine Science.**

Designed for students pursuing a degree option in Marine and Freshwater Science. In-depth introduction to physical, chemical, geological, and biological processes in marine systems. Three lecture hours a week for one semester. Prerequisite: The following with a grade of at least a C- in each: Biology 311D or 315H, or 301L and 301M; and Chemistry 302 or 302H, or Chemistry 304K and 305.

#### **Upper-Division Courses**

##### **MNS 320. Marine Ecology.**

Study of ecological processes at different levels of integration in marine ecosystems. Three lecture hours a week for one semester. Prerequisite: Biology 311D, and Chemistry 302 or 302H.

##### **MNS 120L. Laboratory Studies in Marine Ecology.**

A laboratory course with two weekend field trips to the Marine Science Institute at Port Aransas to perform ecological studies in the Texas coastal zone. Two weekend field trips, with pre- and post-field trip laboratory hours required. Prerequisite: Credit or registration for Marine Science 320.

##### **MNS 440. Limnology and Oceanography.**

Same as Biology 456L. An introduction to the study of the interactions between aquatic organisms and their environments. Two lecture hours and six laboratory hours a week for one semester. Prerequisite: Chemistry 302 or 302H; and the following with a grade of at least C-: Biology 325 or 325H, and Biology 206L, 208L, 226L, or Environmental Science 311.

##### **MNS 344K. Marine Mining and Minerals.**

Same as Geological Sciences 344K. Overview of seafloor mineral deposits, their exploration, and mining. Three lecture hours a week for one semester. May not be counted toward the Bachelor of Science in Geological Sciences or the Bachelor of Science in Environmental Sciences degrees. Prerequisite: Geological Sciences 401 or 303, 416K, and 416M.

##### **MNS 148, 348. Training Cruise(s).**

May be repeated for credit when the topics vary.

###### **Topic 1: Training Cruise(s): Research in Biological Oceanography.**

One or more cruises of one to several days each to collect physical, chemical, oceanographic, and biological data relevant to biological processes in the sea. Preparatory instruction and post-cruise sample processing and analysis. Marine Science 148, 348 (Topic 1) and 152R may not both be counted. Additional prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

**Topic 2: Marine Geology and Geophysics Field Course.** Hands-on, team-based instruction in the collection and processing of marine geological and geophysical data along the Gulf of Mexico coast. For Marine Science 148, one lecture hour and one laboratory hour a week for one semester. For Geological Sciences 348K and Marine Science 348, one lecture hour and four laboratory hours a week for one semester with additional hours to be arranged. Only one of the following may be counted: Geological Sciences 348K, 397F, Marine Science 348 (Topic 2). Fulfills the field experience requirement for some geological sciences degree programs. Students should contact the Department of Geological Sciences before registering. Additional prerequisite: For geological sciences majors, Geological Sciences 420K or 320L with a grade of at least C-, and consent of instructor; Geological Sciences 416M and 465K are recommended; for others, Marine Science 307 and 354F with a grade of at least C- in each, and consent of instructor.

### **MNS 352. Principles of Marine Science.**

Lectures, laboratory, and fieldwork. The equivalent of three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

**Topic 9: Endocrinology.** Endocrinology, with special reference to lower vertebrates and evolution of control systems. Marine Science 352 (Topic 9) and 382 (Topic 9: Endocrinology) may not both be counted. May count as zoology. Prerequisite: Previous courses in physiology and consent of instructor.

**Topic 12: Adaptive Physiology of Marine Organisms.** Selected topics in the comparative physiology of marine organisms and their environmental adaptations. Prerequisite: Previous course in cell physiology or consent of instructor.

**Topic 13: Microclimatology.** Physical and thermal characteristics of the atmospheric surface layer, with particular reference to coastal environments.

**Topic 16: Ocean Engineering.** Description of ocean waves and tides, methods of wave forecasting, classroom and field exercises. Prerequisite: Consent of instructor.

**Topic 18: Marine Atmospheric Chemistry.** Atmospheric particle chemistry; sea-surface films, atmospheric organic matter; air-sea chemical fractionation; carbon, nitrogen, sulfur cycles. Prerequisite: Consent of instructor.

**Topic 20: General Marine Phycology.** Survey of benthic algae and phytoplankton of the Texas coast; systematics, morphology, life history and culturing techniques.

**Topic 21: Ecology of Marine Fungi.** Biology of the fungi with emphasis on ecological, morphological, and developmental aspects and culturing techniques.

**Topic 22: Oceanography.** Consideration of current understanding of the chemistry and biology of the oceans.

### **MNS 352C. Estuarine Ecology.**

Explores general ecological principles of estuarine environments in Texas including physiography, hydrography, and plant and animal community structure and productivity. The equivalent of three lecture hours a week for one semester; additional lecture and field/lab hours may be required. Marine Science 352 (Topic 8) and 352C may not both be counted. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 352D. Marine Botany.**

Exploration of the marine algae and seagrasses of the south Texas coast, with emphasis on their taxonomy, physiology, and ecology; may include field trips to representative coastal habitats. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 352E. Marine Conservation Biology.**

Explores how human activities influence the natural functioning and diversity of marine ecosystems and examines conservation efforts aimed to promote the sustainability of coastal habitats; may include several field excursions to local/regional marine ecosystems including sensitive coastal marshes and seagrass communities. Encourages the development of creative and critical thinking skills through numerous classroom activities focused on developing holistic understandings of marine ecosystems and the complexities of conservation science. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Marine Science 353 (Topic: Marine Conservation Biology) and 352E may not both be counted.

Prerequisite: Biology 311D and Chemistry 302 or 302H with a grade of at least C- in each.

### **MNS 152L, 252L. Principles of Marine Science: Laboratory Studies.**

A laboratory course with one-day field trips (which may include weekends) to local estuarine and coastal habitats. Includes pre- and post-field trip laboratory hours. For each semester hour of credit earned, three or four field/laboratory sessions, scheduled throughout the semester. May be counted toward the Bachelor of Science in Biology (Option III: Marine and Freshwater Biology) and toward other undergraduate degrees in biology. May be repeated for credit when the topics vary. Prerequisite: Credit or registration for Marine Science 352.

### **MNS 152R. Marine Science Research and Reporting.**

Reviews the planning, conduct, and communication of marine science research, including hypothesis generation, experimental design, data analysis, and scientific writing and presentation. The equivalent of one lecture hour a week for one semester. Marine Science 148, 348 (Topic 1) and 152R may not both be counted. Prerequisite: Upper-division standing and concurrent enrollment in Marine Science 170, 270, or 370.

### **MNS 152S, 252S. Principles of Marine Science: Undergraduate Seminar.**

Guest lectures by local and visiting research scientists on a variety of topics in marine and environmental science. Each seminar is followed by a separate one-hour discussion to give students an opportunity to meet directly with the scientist. For each semester hour of credit earned, one lecture/discussion a week for one semester. May be counted toward the Bachelor of Science in Biology (Option III: Marine and Freshwater Biology) and toward other undergraduate degrees in biology. May be repeated for credit when the topics vary.

### **MNS 152T, 252T. Principles of Marine Science: Special Topics.**

Advanced research topics in marine science relevant to critical habitats, organisms, or processes. The equivalent of one or two lecture hours a week for one semester; additional lecture and field/lab hours may be required. May be counted toward the Bachelor of Science in Biology (Option III: Marine and Freshwater Biology) and toward other undergraduate degrees in biology. May be repeated for credit when the topics vary. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 353. Topics in Marine Science.**

The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. May be repeated for credit when the topics vary. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

**Topic 2: Fish Adaptations to Coastal Ecosystems.** Quantitative ecological comparisons of zoogeographical abundance and distribution with population, metabolic, and growth parameters. Additional prerequisite: Fifteen semester hours of coursework in biology and/or zoology.

**Topic 4: Current Research.** Research instruction/participation in marine science. Laboratory and field activity with emphasis on faculty contact.

**Topic 5: Seafloor Mining.** Study of seafloor mineral resources, including problems and policies related to exploration, mining, environmental concerns, assessment, and industrial development.

**Topic 6: Marine Ecology.** Independent study in marine ecology, literature research, and comprehensive writing. Report required. Additional prerequisite: Upper-division standing in a natural science, engineering, or education.

**Topic 7: Marine Sedimentology.** Selected topics and problems concerning the depositional processes, controls, and distribution of marine sediments.

**Topic 8: Marine Chemistry.** Study of the processes controlling the chemistry of natural waters, the oceans as a chemical system, and the impact of human activities on these systems.

**Topic 14: Marine Isotope Geochemistry.** The use of isotopes (stable, radiogenic, uranium series, and anthropogenic) in the study of marine science.

**Topic 15: Interdisciplinary Classroom Field Methods.** Uses the interdisciplinary nature of marine science to focus on inquiry-based instruction, constructivist-oriented teaching strategies, and field explorations.

**Topic 17: Marine Fish Physiology.** Physiology of major organ systems of marine fishes, with emphasis on adaptations to marine environments. Includes osmoregulation, nutrition, circulation, excretion, reproduction, sensory physiology, and endocrine control. Additional prerequisite: Biology 311D, and Chemistry 302 or 302H.

### **MNS 354. Marine Invertebrates.**

Study of invertebrate taxonomy, structure, behavior, and ecology; may include field sampling and laboratory studies of invertebrate habitats of the Texas coast. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 354C. Biology of Fishes.**

Anatomy, physiology, behavior, life history, taxonomy, and distribution of fishes; may include field sampling and laboratory studies of the coastal biota. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 354E. Aquatic Microbiology.**

Ecology, physiology, distribution, and growth of heterotrophic and autotrophic bacteria and fungi in waters and sediments. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Marine Science 354E and 384E may not both be counted. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 354F. Marine Geology.**

Survey of the origin, structure, stratigraphy, and sedimentology of marine basins and continental margins. Three lecture hours a week for one semester. Marine Science 354F and 384F may not both be counted. Prerequisite: Upper-division standing; and six semester hours of coursework in chemistry, marine science, or geological sciences, or consent of instructor.

### **MNS 354J. Marine Chemistry.**

Introduction to marine and environmental chemistry, including the distribution of elements in seawater, the geochemical and oceanographic processes controlling and affected by these distributions, and the effects of human activities on marine chemical processes. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 354Q. Marine Environmental Science.**

Application of the principles of marine science to the study of environmental issues: toxicology, biogeochemical cycles, and the biological and ecological impacts of xenobiotic materials in the coastal

zone. The equivalent of two lecture hours and one laboratory hour a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 354T. Biological Oceanography.**

Introduction to the organisms in the sea, their adaptations to the environment, and the factors that control their distribution and abundance; may include laboratory and field work with organisms found in the coastal waters of Texas. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C-: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 354U. Biology of Sharks, Skates, and Rays.**

Ecology, anatomy, and physiology of elasmobranch fishes. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 355C. Physiology of Fishes.**

Physiology of major organ systems of both marine and freshwater fishes. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 356. Ecosystem Oceanography.**

An exploration of interconnections within and among marine ecosystems, as well as their linkages to climate, human activity, and adjacent freshwater and terrestrial environments. Emphasis will be placed on Gulf of Mexico ecosystems; may include hands-on field and laboratory activities. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Marine Science 352 (Topic: Ecosystem Oceanography) and 356 may not both be counted. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 357. Marine Phytoplankton Diversity.**

The taxonomy of the major phytoplankton groups, their physiology, and their role in marine ecosystem; may include field and/or laboratory hours. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Marine Science 353 (Topic: Diversity Marine Phytoplankton) and 357 may not both be counted. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 367K. Human Exploration and Exploitation of the Sea.**

Review of the history of ocean exploration including major oceanographic expeditions. Discussion of current topics in ocean exploration and exploitation of marine resources, the impact of resource exploitation on biological systems, and the development of marine policy. An oral presentation is required. The equivalent of three lecture hours a week for one semester; additional lecture and field/laboratory hours may be required. Prerequisite: The following with a grade of at least C- in each: Biology 311D or 315H, and Chemistry 302 or 302H.

### **MNS 170, 270, 370. Special Studies in Marine Science.**

Supervised individual instruction and research in marine science field and laboratory techniques. The equivalent of one, two, or three class hours a week for one semester, at the Marine Science Institute at Port Aransas. May be repeated for credit. Prerequisite: Six semester hours

of upper-division coursework in science, and a University grade point average of at least 2.50.

## Department of Mathematics

The Department of Mathematics offers a wide variety of courses both for math majors and for non-majors. Students interested in mathematics as a first or second major should consult the advisers in the Mathematics, Physics, and Astronomy Advising Center, in RLM 4.101.

Course prerequisites are enforced. Most entry-level mathematics courses have an appropriate score on the mathematics placement exam as a prerequisite. In such courses, students must be prepared to present proof of their score immediately after classes have begun; those unable to meet the score will be dropped.

Students may check the current *Course Schedule* or go to the Department of Mathematics website (<http://www.ma.utexas.edu>) for details about the prerequisite required for their course.

Students who plan to use transfer credit to meet the prerequisite of a mathematics course must submit an official transcript to the Office of Admissions so that the credit may be added to their official university record. In addition to sending a transcript, students are encouraged to retain hard copies of their grade reports for proof of prerequisite until their transcripts are processed.

Students who wish to enroll in conference courses in the Department of Mathematics must submit consent of instructor forms to the department before registering. Forms are available in the Advising Center.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### Actuarial Foundations: ACF

#### Lower-Division Courses

##### ACF 110C, 210C, 310C, 410C. Conference Course.

Supervised study of selected subjects by individual arrangement with department and instructor. Conference course. May be repeated for credit. Prerequisite: Written consent of instructor.

##### ACF 110T. Conference Course: Texas Department of Insurance Internship.

Supervised internship at the Texas Department of Insurance. Conference course. May be repeated for credit. Admission by application only. Students must apply to the director of the concentration in actuarial studies the semester before they take the course.

##### ACF 112M. Actuarial Laboratory on Probability and Statistics.

Problems and supplementary instruction in probability and statistics, especially as required for the Society of Actuaries and Casualty Actuarial Society Exam 110. Three laboratory hours a week for one semester. Prerequisite: Mathematics 362K, credit or registration for Mathematics 378K, and consent of the director of the concentration in actuarial studies.

#### Upper-Division Courses

##### ACF 329. Theory of Interest.

Same as Mathematics 329F. Measurement of interest, present and accumulated value, amortization, sinking funds, bonds, duration, and immunization. Covers the interest-theory portion of an exam of the Society of Actuaries and the Casualty Actuarial Society. Three

lecture hours a week for one semester. Only one of the following may be counted: Actuarial Foundations 329, Mathematics 329F, 389F. Prerequisite: Mathematics 408D, 308L, 408L, or 408S with a grade of at least C-.

##### ACF 129D. Introductory Actuarial Financial Mathematics.

Introductory analysis of financial derivatives. Covers the financial derivatives portion of the syllabus for the professional actuarial exam on financial mathematics. One lecture hour a week for one semester. Offered on the pass/fail basis only. Prerequisite: Credit with a grade of at least C- or registration for Actuarial Foundations 329 or Mathematics 329F.

### Mathematics: M

#### Lower-Division Courses

##### M 301 (TCCN: MATH 1314). College Algebra.

Subjects include a brief review of elementary algebra; linear, quadratic, exponential, and logarithmic functions; polynomials; systems of linear equations; applications. Three lecture hours a week for one semester. Usually offered only in the summer session. May not be counted toward a degree in mathematics. Credit for Mathematics 301 may not be earned after a student has received credit for any calculus course with a grade of C- or better. Prerequisite: A passing score on the mathematics section of the Texas Higher Education Assessment (THEA) test (or an appropriate assessment test).

##### M 302 (TCCN: MATH 1332). Introduction to Mathematics.

Intended primarily for general liberal arts students seeking knowledge of the nature of mathematics as well as training in mathematical thinking and problem solving. Topics include number theory and probability; additional topics are chosen by the instructor. Three lecture hours a week for one semester. Mathematics 302 and 303F may not both be counted. A student may not earn credit for Mathematics 302 after having received credit for any calculus course. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Texas Success Initiative (TSI) exemption or a TSI Mathematics Assessment score of 350 or higher.

##### M 303D (TCCN: MATH 1324). Applicable Mathematics.

An entry-level course for the nontechnical student, dealing with some of the techniques that allow mathematics to be applied to a variety of problems. Topics include linear and quadratic equations, systems of linear equations, matrices, probability, statistics, exponential and logarithmic functions, and mathematics of finance. Three lecture hours a week for one semester. Mathematics 303D and 303F may not both be counted. A student may not earn credit for Mathematics 303D after having received credit for Mathematics 305G or any calculus course. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: An appropriate score on the mathematics placement exam.

##### M 303F. Mathematics of Investment.

Simple and compound interest, equivalent rates, equivalent values, annuities, amortization, sinking funds, bonds, depreciation. Three lecture hours a week for one semester. Mathematics 302 and 303F may not both be counted; Mathematics 303D and 303F may not both be counted. May not be counted toward the major requirement for the Bachelor of Arts, Plan I, degree with a major in mathematics or toward the Bachelor of Science in Mathematics degree. Prerequisite: Three units of high school mathematics at the level of Algebra I or higher.

##### M 403K (TCCN: MATH 1425). Calculus I for Business and Economics.

Differential and integral calculus of algebraic, logarithmic, and exponential functions with applications. Three lecture hours and two

discussion sessions a week for one semester. Only one of the following may be counted: Mathematics 403K, 408C, 408K, 408N. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: An appropriate score on the mathematics placement exam.

#### **M 403L. Calculus II for Business and Economics.**

Differential and integral calculus of functions of several variables with applications, infinite series, improper integrals; introductions to probability, differential equations, matrices, systems of linear equations, and linear programming. Three lecture hours and two discussion sessions a week for one semester. Mathematics 403L and 408L (or 308L) may not both be counted. May not be counted toward the major requirement for the Bachelor of Arts, Plan I, degree with a major in mathematics or toward the Bachelor of Science in Mathematics degree. Prerequisite: Mathematics 403K, 408C, 308L, or 408N with a grade of at least C-.

#### **M 305E. Analytic Geometry.**

Combines development of methods (including adequate treatment of theory) and acquisition of skills with applications. Three lecture hours a week for one semester. Mathematics 305E and 305K may not both be counted. Mathematics 305E and 305G may not both be counted toward the major requirement for the Bachelor of Arts, Plan I, degree with a major in Mathematics or towards the Bachelor of Science in Mathematics degree. Prerequisite: Mathematics 301.

#### **M 305G (TCCN: MATH 2312). Preparation for Calculus.**

Study of advanced functions and their graphs and applications, including exponential, logarithmic, and trigonometric functions. Introduction to rates, slopes, and derivatives. Three lecture hours a week for one semester. Mathematics 305G and any college-level trigonometry course may not both be counted. A student may not earn credit for Mathematics 305G after having received credit for any calculus course with a grade of at least C-. Mathematics 301, 305G, and equivalent courses may not be counted toward a degree in mathematics. Prerequisite: An appropriate score on the mathematics placement exam.

#### **M 408C (TCCN: MATH 2417). Differential and Integral Calculus.**

Introduction to the theory and applications of differential and integral calculus of functions of one variable; topics include limits, continuity, differentiation, the mean value theorem and its applications, integration, the fundamental theorem of calculus, and transcendental functions. Three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403K, 408C, 408K, 408N. Prerequisite: An appropriate score on the mathematics placement exam or Mathematics 305G with a grade of at least B-

#### **M 408D (TCCN: MATH 2419). Sequences, Series, and Multivariable Calculus.**

Certain sections of this course are designated as advanced placement or honors sections; they are restricted to students who have scored well on the Advanced Placement Calculus BC exam or have the consent of the mathematics adviser. This is the second semester of the accelerated calculus sequence. The theory and applications of sequences and infinite series, including those involving functions of one variable, and an introduction to the theory and applications of differential and integral calculus of functions of several variables; subjects include methods of integration, parametric equations, sequences, infinite series, power series, functions of several variables, partial derivatives, and multiple integrals. Three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403L, 408D, 408M (or 308M). Prerequisite: Mathematics 408C, 408L, or 408S with a grade of at least C-.

#### **M 408K (TCCN: MATH 2413). Differential Calculus.**

Introduction to the theory and applications of differential calculus of functions of one variable; topics include limits, continuity, differentiation, and the mean value theorem and its applications. Three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403K, 408C, 408K, 408N. Prerequisite: An appropriate score on the mathematics placement exam or Mathematics 305G with a grade of at least B-

#### **M 308L, 408L. Integral Calculus.**

Introduction to the theory and applications of integral calculus of functions of one variable; topics include integration, the fundamental theorem of calculus, transcendental functions, sequences, and infinite series. For Mathematics 308L, three lecture hours a week for one semester; for 408L, three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403L, 408L (or 308L), 408S. Prerequisite: Mathematics 408C, 408K, or 408N with a grade of at least C-, or Mathematics 408R with a grade of at least B.

#### **M 308M, 408M. Multivariable Calculus.**

Introduction to the theory and applications of differential and integral calculus of functions of several variables. Includes parametric equations, polar coordinates, vectors, vector calculus, functions of several variables, partial derivatives, gradients, and multiple integrals. For Mathematics 308M, three lecture hours a week for one semester; for 408M, three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403L, 408D, 408M (or 308M). Prerequisite: Mathematics 408L or 408S with a grade of at least C-.

#### **M 408N (TCCN: MATH 2413). Differential Calculus for Science.**

Restricted to students in the College of Natural Sciences. Introduction to the theory of differential calculus of functions of one variable, and its application to the natural sciences. Subjects may include limits and differentiation, with applications to rates of change, extremes, graphing, and exponential growth and decay. Three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403K, 408C, 408K, 408N. Prerequisite: An appropriate score on the mathematics placement exam or Mathematics 305G with a grade of at least B-

#### **M 408R. Differential and Integral Calculus for the Sciences.**

A calculus course for students in the life sciences. Emphasizes representations and analysis of data. Subjects include functions, rates, and derivatives and their applications to problems in biology; differential equations; Riemann integrals; the Euler method; and fundamental theorems of calculus. Three lecture hours and two discussion hours a week for one semester. May not be counted by students with credit for Mathematics 408C, 408K, or 408N. Prerequisite: An appropriate score on the mathematics placement exam or Mathematics 305G with a grade of at least B-

#### **M 408S (TCCN: MATH 2414). Integral Calculus for Science.**

Restricted to students in the College of Natural Sciences. Introduction to the theory of integral calculus of functions of one variable, and its applications to the natural sciences. Subjects may include integration and its application to area and volume, and transcendental functions, sequences, and series and their application to numerical methods. Three lecture hours and two discussion hours a week for one semester. Only one of the following may be counted: Mathematics 403L, 408L (or 308L), 408S. Prerequisite: Mathematics 408C, 408K, or 408N with a grade of at least C-, or Mathematics 408R with a grade of at least B.

**M 110C, 210C, 310C, 410C. Conference Course.**

Supervised study in mathematics, with hours to be arranged. May be repeated for credit. Prerequisite: Written consent of instructor; forms are available in the department office or in the Mathematics, Physics, and Astronomy Advising Center.

**M 210E. Emerging Scholars Seminar.**

Restricted to students in the Emerging Scholars Program. Supplemental problem-solving laboratory for precalculus, calculus, or advanced calculus courses for students in the Emerging Scholars Program. Three or four laboratory hours a week for one semester. May be repeated for credit. Offered on the pass/fail basis only.

**M 310P. Modern Mathematics: Plan II.**

Restricted to Plan II students. Significant developments in modern mathematics. Topics may include fractals, the fourth dimension, statistics and society, and techniques for thinking about quantitative problems. Three lecture hours a week for one semester. May not be counted toward a degree in mathematics.

**M 110T, 210T, 310T, 410T. Topics in Mathematics.**

One, two, three, or four lecture hours a week for one semester. May be repeated for credit when the topics vary.

**M 315C. Foundations, Functions, and Regression Models.**

In-depth study of topics from secondary school mathematics. Emphasizes the development of the concept of function, exploring function patterns in data sets, and the connections between the main topics of mathematics associated with a secondary school curriculum. Use of appropriate technology is explored. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Mathematics 408C and enrollment in a teaching preparation program, or consent of instructor.

**M 316K (TCN: MATH 1350). Foundations of Arithmetic.**

Restricted to students in a teacher preparation program. An analysis, from an advanced perspective, of the concepts and algorithms of arithmetic, including sets; numbers; numeration systems; definitions, properties, and algorithms of arithmetic operations; and percents, ratios, and proportions. Problem solving is stressed. Three lecture hours a week for one semester. May not be counted toward the major requirement for the Bachelor of Arts, Plan I, degree with a major in mathematics or toward the Bachelor of Science in Mathematics degree. Credit for Mathematics 316K may not be earned after the student has received credit for any calculus course with a grade of C- or better, unless the student is registered in the College of Education. Prerequisite: One of the following with a grade of at least C-: Mathematics 301, 302, 303D, 305G, 316, Educational Psychology 371, Statistics and Data Sciences 302, 304, or 306.

**M 316L (TCN: MATH 1351). Foundations of Geometry, Statistics, and Probability.**

Restricted to students in a teacher preparation program. An analysis, from an advanced perspective, of the basic concepts and methods of geometry, statistics, and probability, including representation and analysis of data; discrete probability, random events, and conditional probability; measurement; and geometry as approached through similarity and congruence, through coordinates, and through transformations. Problem solving is stressed. Three lecture hours a week for one semester. May not be counted toward the major requirement for the Bachelor of Arts, Plan I, degree with a major in mathematics or toward the Bachelor of Science in Mathematics degree. Credit for Mathematics 316L may not be earned after the student has received credit for any calculus course with a grade of C- or better, unless

the student is registered in the College of Education. Prerequisite: Mathematics 316K with a grade of at least C.

**M 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Mathematics.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**Upper-Division Courses****M 325K. Discrete Mathematics.**

Provides a transition from the problem-solving approach of Mathematics 408C and 408D to the rigorous approach of advanced courses. Subjects include logic, set theory, relations and functions, combinatorics, and graph theory and graph algorithms. Three lecture hours a week for one semester. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

**M 326K. Foundations of Number Systems.**

Restricted to students in a teacher preparation program or who have consent of instructor. Study of number-related topics in middle-grade and secondary school mathematics. Topics include place value; meanings of arithmetic operations; analysis of computation methods; historical development of number concepts and notation; and rational, irrational, algebraic, transcendental, and complex numbers. Emphasis is on communicating mathematics, developing pedagogical understanding of concepts and notation, and using both informal reasoning and proof. Three lecture hours a week for one semester. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

**M 427J. Differential Equations with Linear Algebra.**

Ordinary differential equations, introduction to vector spaces, linear operators and eigenvalues, systems of linear differential equations, introduction to partial differential equations and Fourier series. Five lecture hours a week for one semester. Mathematics 427J and 427K may not both be counted. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

**M 427K. Advanced Calculus for Applications I.**

Ordinary and partial differential equations and Fourier series. Five lecture hours a week for one semester. Mathematics 427J and 427K may not both be counted. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

**M 427L. Advanced Calculus for Applications II.**

Matrices, elements of vector analysis and calculus of functions of several variables, including gradient, divergence, and curl of a vector field, multiple integrals and chain rules, length and area, line and surface integrals, Green's theorems in the plane and space, and, if time permits, complex analysis. Five class hours a week for one semester. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

**M 328K. Introduction to Number Theory.**

Provides a transition from the problem-solving approach of Mathematics 408C and 408D to the rigorous approach of advanced courses. Properties of the integers, divisibility, linear and quadratic forms, prime numbers, congruences and residues, quadratic reciprocity, number theoretic functions. Three lecture hours a week for one semester. Prerequisite: Mathematics 325K or 341 with a grade of at least C-.

**M 329F. Theory of Interest.**

Same as Actuarial Foundations 329. Measurement of interest, present and accumulated value, amortization, sinking funds, bonds, duration, and immunization. Covers the interest-theory portion of an exam of the Society of Actuaries and the Casualty Actuarial Society. Three lecture hours a week for one semester. Only one of the following may be counted: Actuarial Foundations 329, Mathematics 329F, 389F. Prerequisite: Mathematics 408D, 308L, 408L, or 408S with a grade of at least C-.

**M 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Mathematics.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**M 329W. Cooperative Mathematics.**

This course covers the work period of mathematics students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. No more than three semester hours may be counted toward the major requirement; no more than six semester hours may be counted toward the degree. The student's first registration must be on the pass/fail basis. Prerequisite: Application through the College of Natural Sciences Career Design Center; Mathematics 408D, 408L, or 408S with a grade of at least C-; a grade of at least C- in two of the following courses: Mathematics 325K, 427J or 427K, 341, 362K, or 378K; and consent of the undergraduate adviser.

**M 333L. Structure of Modern Geometry.**

Axiom systems, transformational geometry, introduction to non-Euclidean geometries, and other topics in geometry; use of these ideas in teaching geometry. Three lecture hours a week for one semester. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-; or upper-division standing and consent of instructor.

**M 339C. Actuarial Case Studies.**

Introduces aspects of basic ratemaking, reserving, catastrophe modeling, and rate classification in a property & casualty actuarial context. Explores loss & premium trending, loss triangles, loss development, loss ratios, on-level premium, and accident year vs. calendar year vs. policy year data. Three lecture hours a week for one semester. Prerequisite: Actuarial Foundations 329 or Mathematics 329F with a grade of at least C-; and M339J or M339U with a grade of at least C-.

**M 339D. Introduction to Financial Mathematics for Actuaries.**

Covers the financial derivative subjects on the Society of Actuary FM/2 exam: general derivatives, options, hedging, investment strategies, forwards, futures, and swaps. Covers option pricing techniques in the MFE/3F exam: binomial option pricing, Monte Carlo Valuation using risk neutral probabilities, and Black-Scholes. Three lecture hours a week for one semester. Prerequisite: Actuarial Foundations 329 or Mathematics 329F; and Mathematics 362K with a grade of at least C-.

**M 339J. Probability Models with Actuarial Applications.**

Introductory actuarial models for life insurance, property insurance, and annuities. With Mathematics 349P, covers the syllabus for the

professional actuarial exam on model construction. Three lecture hours a week for one semester. Prerequisite: Mathematics 358K or 378K with a grade of at least C-.

**M 139S. Seminar on Actuarial Practice.**

Presentations by working actuaries on current issues in actuarial practice. One lecture hour a week for one semester. Offered on the pass/fail basis only. Prerequisite: Actuarial Foundations 329 or Mathematics 329F; Mathematics 339J or 339U with a grade of at least C-; and credit with a grade of at least C- or registration for one of the following: Mathematics 339J, 339U, 339V, 349P.

**M 339U. Actuarial Contingent Payments I.**

Intermediate actuarial models for life insurance, property insurance, and annuities. Three lecture hours a week for one semester. Prerequisite: Mathematics 362K with a grade of at least C-; credit with a grade of at least C- or registration for Actuarial Foundations 329 or Mathematics 329F; and credit with a grade of at least C- or registration for Mathematics 340L or 341.

**M 339V. Actuarial Contingent Payments II.**

Advanced actuarial models for life insurance, property insurance, and annuities. Three lecture hours a week for one semester. Prerequisite: Actuarial Foundations 329 or Mathematics 329F, and M 339U with a grade of at least C- in each.

**M 339W. Financial Mathematics for Actuarial Applications.**

Pricing, stock price, and interest rate models for actuarial applications. Tools include lognormal distribution, Brownian motion, Black-Scholes, and delta hedging. Three lecture hours a week for one semester. Prerequisite: Mathematics 339D with a grade of at least C-.

**M 340L. Matrices and Matrix Calculations.**

Restricted to non-mathematics majors. Techniques of matrix calculations and applications of linear algebra. Three lecture hours a week for one semester. Only one of the following may count: Mathematics 340L, 341, Statistics and Data Sciences 329C, or Statistics and Scientific Computation 329C. Prerequisite: Mathematics 408C, 408K, or 408N with a grade of at least C-.

**M 341. Linear Algebra and Matrix Theory.**

Restricted to mathematics majors. Vector spaces, linear transformations, matrices, linear equations, determinants. Some emphasis on rigor and proofs. Three lecture hours a week for one semester. Only one of the following may count: Mathematics 340L, 341, Statistics and Data Sciences 329C, or Statistics and Scientific Computation 329C. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

**M 343K. Introduction to Algebraic Structures.**

Elementary properties of groups and rings, including symmetric groups, properties of the integers, polynomial rings, elementary field theory. Three lecture hours a week for one semester. Students who have received a grade of C- or better in Mathematics 373K may not take Mathematics 343K. Prerequisite: Consent of the undergraduate adviser, or two of the following courses with a grade of at least C- in each: Mathematics 325K or Philosophy 313K, Mathematics 328K, Mathematics 341.

**M 343L. Applied Number Theory.**

Basic properties of integers, including properties of prime numbers, congruences, and primitive roots. Introduction to finite fields and their vector spaces with applications to encryption systems and coding

theory. Three lecture hours a week for one semester. Prerequisite: Mathematics 328K or 343K with a grade of at least C-.

### **M 343M. Error-Correcting Codes.**

Introduction to applications of algebra and number theory to error-correcting codes, including finite fields, error-correcting codes, vector spaces over finite fields, Hamming norm, coding, and decoding. Three lecture hours a week for one semester. Prerequisite: Mathematics 328K or 341 with a grade of at least C-.

### **M 344K. Intermediate Symbolic Logic.**

Same as Philosophy 344K. A second-semester course in symbolic logic: formal syntax and semantics, basic metatheory (soundness, completeness, compactness, and Loewenheim-Skolem theorems), and further topics in logic. Three lecture hours a week for one semester. Prerequisite: Philosophy 313, 313K, or 313Q.

### **M 346. Applied Linear Algebra.**

Emphasis on diagonalization of linear operators and applications to dynamical systems and ordinary differential equations. Other subjects include inner products and orthogonality, normal mode expansions, vibrating strings and the wave equation, and Fourier series. Three lecture hours a week for one semester. Prerequisite: Mathematics 341 or 340L with a grade of at least C-.

### **M 348. Scientific Computation in Numerical Analysis.**

Introduction to mathematical properties of numerical methods and their applications in computational science and engineering. Introduction to object-oriented programming in an advanced language. Study and use of numerical methods for solutions of linear systems of equations; nonlinear least-squares data fitting; numerical integration; and solutions of multidimensional nonlinear equations and systems of initial value ordinary differential equations. Three lecture hours a week for one semester. Prerequisite: Computer Science 303E or 307, and Mathematics 341 or 340L with a grade of at least C-.

### **M 349P. Actuarial Statistical Estimates.**

Statistical estimation procedures for random variables and related quantities in actuarial models. With Mathematics 339J, covers the syllabus for the professional actuarial exam on model construction. Three lecture hours a week for one semester. Prerequisite: Mathematics 339J, and 341 or 340L, with a grade of at least C- in each.

### **M 349R. Applied Regression and Time Series.**

Introduction to simple and multiple linear regression and to elementary time-series models, including auto-regressive and moving-average models. Emphasizes fitting models to data, evaluating models, and interpreting results. Three lecture hours a week for one semester. Prerequisite: Mathematics 339J or 339U, and 358K or 378K, with a grade of at least C- in each.

### **M 349T. Time Series and Survival-Model Estimation.**

Introduction to the probabilistic and statistical properties of time series; parameter estimation and hypothesis testing for survival models. Covers 30 percent of the syllabus for exam #4 of the Society of Actuaries and the Casualty Actuarial Society. Three lecture hours a week for one semester. Prerequisite: Mathematics 339U, 341 or 340L, and 358K or 378K.

### **M 358K. Applied Statistics.**

Exploratory data analysis, correlation and regression, data collection, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Prerequisite: Mathematics 362K with a grade of at least C-.

### **M 360M. Mathematics as Problem Solving.**

Discussion of heuristics, strategies, and methods of evaluating problem solving, and extensive practice in both group and individual problem solving. Communicating mathematics, reasoning, and connections among topics in mathematics are emphasized. Three lecture hours a week for one semester. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-; and written consent of instructor.

### **M 361. Theory of Functions of a Complex Variable.**

Elementary theory and applications of analytic functions, series, contour integration, and conformal mappings. Three lecture hours a week for one semester. Prerequisite: Mathematics 427J, 427K, or 427L with a grade of at least C-.

### **M 361K. Introduction to Real Analysis.**

A rigorous treatment of the real number system, of real sequences, and of limits, continuity, derivatives, and integrals of real-valued functions of one real variable. Three lecture hours a week for one semester. Students who have received a grade of C- or better in Mathematics 365C may not take Mathematics 361K. Prerequisite: Consent of the undergraduate adviser, or two of the following courses with a grade of at least C- in each: Mathematics 325K or Philosophy 313K, Mathematics 328K, Mathematics 341.

### **M 362K. Probability I.**

An introduction to the mathematical theory of probability, fundamental to further work in probability and statistics, includes basic probability properties, conditional probability and independence, various discrete and continuous random variables, expectation and variance, central limit theorem, and joint probability distributions. Three lecture hours a week for one semester. Mathematics 362K and Statistics and Scientific Computation 321 may not both be counted. Prerequisite: Mathematics 408D, 408L, or 408S with a grade of at least C-.

### **M 362M. Introduction to Stochastic Processes.**

Introduction to Markov chains, birth and death processes, and other topics. Three lecture hours a week for one semester. Prerequisite: Mathematics 362K with a grade of at least C-.

### **M 364K. Vector and Tensor Analysis I.**

Invariance, vector algebra and calculus, integral theorems, general coordinates, introductory differential geometry and tensor analysis, applications. Three lecture hours a week for one semester. Prerequisite: Mathematics 427J, 427K, or 427L with a grade of at least C-.

### **M 364L. Vector and Tensor Analysis II.**

Continuation of Mathematics 364K, with emphasis on tensor and extensor analysis. Riemannian geometry and invariance. Three lecture hours a week for one semester. Prerequisite: Mathematics 364K with a grade of at least C-.

### **M 365C. Real Analysis I.**

A rigorous treatment of the real number system, Euclidean spaces, metric spaces, continuity of functions in metric spaces, differentiation and Riemann integration of real-valued functions of one real variable, and uniform convergence of sequences and series of functions. Three lecture hours a week for one semester. Students who have received a grade of C- or better in Mathematics 365C may not take Mathematics 361K. Prerequisite: Consent of the undergraduate adviser, or two of the following courses with a grade of at least C- in each: Mathematics 325K or Philosophy 313K, Mathematics 328K, Mathematics 341. Students who receive a grade of C- in one of the prerequisite courses are advised to take Mathematics 361K before attempting 365C. Students planning

to take Mathematics 365C and 373K concurrently should consult a mathematics adviser.

### **M 365D. Real Analysis II.**

Recommended for students planning to undertake graduate work in mathematics. A rigorous treatment of selected topics in real analysis, such as Lebesgue integration, or multivariate integration and differential forms. Three lecture hours a week for one semester. Prerequisite: Mathematics 365C with a grade of at least C-.

### **M 365G. Curves and Surfaces.**

Calculus applied to curves and surfaces in three dimensions: curvature and torsion of space curves, Gauss map and curvature of surfaces, Gauss theorem, geodesics, and the Gauss-Bonnet theorem. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 365C.

### **M 367K. Topology I.**

An introduction to topology, including sets, functions, cardinal numbers, and the topology of metric spaces. Three lecture hours a week for one semester. Prerequisite: Mathematics 361K or 365C or consent of instructor.

### **M 367L. Topology II.**

Various topics in topology, primarily of a geometric nature. Three lecture hours a week for one semester. Prerequisite: Mathematics 367K with a grade of at least C- or consent of instructor.

### **M 368K. Numerical Methods for Applications.**

Continuation of Mathematics 348. Topics include splines, orthogonal polynomials and smoothing of data, iterative solution of systems of linear equations, approximation of eigenvalues, two-point-boundary value problems, numerical approximation of partial differential equations, signal processing, optimization, and Monte Carlo methods. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 367, Mathematics 368K, Physics 329. Prerequisite: Mathematics 348 with a grade of at least C-.

### **M 371E. Learning Assistant Experience in Mathematics.**

Students assist instructors and TAs in mathematics courses. This is a hands-on experience in what it is like to teach and support students in the learning of mathematics in undergraduate courses. Students must attend classroom training and discussions and work in Calculus discussion sections or undergraduate classrooms where mathematics is being taught. One class hour and three hours of fieldwork in an undergraduate mathematics course a week for one semester. Prerequisite: Mathematics 408C, 408K, 408N, 408R, or equivalent, and consent of instructor.

### **M 372. Fourier Series and Boundary Value Problems.**

Discussion of differential equations of mathematical physics and representation of solutions by Green's functions and eigenfunction expansions. Three lecture hours a week for one semester. Prerequisite: Mathematics 427J or 427K with a grade of at least C-.

### **M 372K. Partial Differential Equations and Applications.**

Partial differential equations as basic models of flows, diffusion, dispersion, and vibrations. Topics include first- and second-order partial differential equations and classification (particularly the wave, diffusion, and potential equations), and their origins in applications and properties of solutions. Includes the study of characteristics, maximum principles, Green's functions, eigenvalue problems, and Fourier expansion methods. Three lecture hours a week for one semester. Prerequisite: Mathematics 427J or 427K with a grade of at least C-.

### **M 373K. Algebraic Structures I.**

A study of groups, rings, and fields, including structure theory of finite groups, isomorphism theorems, polynomial rings, and principal ideal domains. Three lecture hours a week for one semester. Students who have received a grade of C- or better in Mathematics 373K may not take Mathematics 343K. Prerequisite: Consent of the undergraduate adviser, or two of the following courses with a grade of at least C- in each: Mathematics 325K or Philosophy 313K, Mathematics 328K, Mathematics 341. Students who receive a grade of C- in one of the prerequisite courses are advised to take Mathematics 343K before attempting 373K. Students planning to take Mathematics 365C and 373K concurrently should consult a mathematics adviser.

### **M 373L. Algebraic Structures II.**

Recommended for students planning to undertake graduate work in mathematics. Topics from vector spaces and modules, including direct sum decompositions, dual spaces, canonical forms, and multilinear algebra. Three lecture hours a week for one semester. Prerequisite: Mathematics 373K with a grade of at least C-.

### **M 374. Fourier and Laplace Transforms.**

Operational properties and application of Laplace transforms; some properties of Fourier transforms. Three lecture hours a week for one semester. Prerequisite: Mathematics 427J or 427K with a grade of at least C-.

### **M 374G. Linear Regression Analysis.**

Fitting of linear models to data by the method of least squares, choosing best subsets of predictors, and related materials. Three lecture hours a week for one semester. Prerequisite: Mathematics 358K or 378K with grade of at least C-, Mathematics 341 or 340L, and consent of instructor.

### **M 374K. Fourier and Laplace Transforms.**

Continuation of Mathematics 374. Introduction to other integral transforms, such as Hankel, Laguerre, Mellin, Z. Three lecture hours a week for one semester. Prerequisite: Mathematics 374 with a grade of at least C-.

### **M 374M. Mathematical Modeling in Science and Engineering.**

Tools for studying differential equations and optimization problems that arise in the engineering and physical sciences. Includes dimensional analysis and scaling, regular and singular perturbation methods, optimization and calculus of variations, and stability. Three lecture hours a week for one semester. Prerequisite: Mathematics 427J or 427K, and 340L or 341, with a grade of at least C- in each; and some basic programming skills.

### **M 175, 275, 375, 475. Conference Course.**

Supervised study in mathematics, with hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing.

### **M 375C. Conference Course (Computer-Assisted).**

Supervised study in mathematics on material requiring use of computing resources, with hours to be arranged. Conference course. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

### **M 375D. Discovery: An Introduction to Advanced Study in Mathematics.**

Capstone course designed primarily for UTeach pre-service mathematics majors considering discovery teaching methodology and/or graduate work in mathematics or mathematics education. Ties together foundational topics in the primary strands of mathematics present in a typical graduate mathematics program; included are selected topics from analysis, algebra, number theory, and topology. Three lecture hours

a week for one semester. Mathematics 375D and 375T (Topic: Discovery: An Introduction to Advanced Study in Mathematics) may not both be counted. Prerequisite: Two proof-based mathematics courses with a grade of at least C-, or consent of instructor.

### **M 175S. Seminar in Instruction of Mathematics.**

An exploration of subjects in mathematics instruction as taught at the secondary educational level. Practice learning and teaching through use of proofs, explorations, and connections. Subjects include foundational mathematics concepts, numbers, constructibility, and development of key mathematics topics. One lecture hour a week for one semester. Mathematics 175S and 175T may not both be counted. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and consent of instructor.

### **M 175T, 275T, 375T, 475T. Topics in Mathematics.**

One, two, three, or four lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

### **M 376C. Methods of Applied Mathematics.**

Variational methods and related concepts from classical and modern applied mathematics. Models of conduction and vibration that lead to systems of linear equations and ordinary differential equations, eigenvalue problems, initial and boundary value problems for partial differential equations. Topics may include a selection from diagonalization of matrices, eigenfunctions and minimization, asymptotics of eigenvalues, separation of variables, generalized solutions, and approximation methods. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Mathematics 427J or 427K, and 340L or 341, with a grade of at least C- in each.

### **M 378K. Introduction to Mathematical Statistics.**

Same as Statistics and Data Sciences 378. Sampling distributions of statistics, estimation of parameters (confidence intervals, method of moments, maximum likelihood, comparison of estimators using mean square error and efficiency, sufficient statistics), hypothesis tests (p-values, power, likelihood ratio tests), and other topics. Three lecture hours a week for one semester. Only one the following may be counted: Mathematics 378K, Statistics and Data Sciences 378, Statistics and Scientific Computation 378. Prerequisite: Mathematics 362K with a grade of at least C-.

### **M 378N. Generalized Linear Models.**

Extensions to ordinary least-squares regression, including Poisson regression, the lasso, mixed models, and ridge regression. Three lecture hours a week for one semester. Mathematics 375T (Topic: Generalized Linear Models) and 378N may not both be counted. Prerequisite: Mathematics 378K with a grade of at least C- or consent of instructor.

### **M 379H. Honors Tutorial Course.**

Directed reading, research, and/or projects, under the supervision of a faculty member, leading to an honors thesis. Conference course. Prerequisite: Admission to the Mathematics Honors Program; Mathematics 365C, 367K, 373K, or 374G with a grade of at least A-, and another of these courses with a grade of at least B-; and consent of the honors adviser.

## **Department of Molecular Biosciences**

### **Biochemistry: BCH**

#### **Lower-Division Courses**

##### **BCH 206K. Undergraduate Research.**

Introduction to research practices; supervised individual undergraduate research in biochemistry. Six to ten laboratory hours a week for one semester. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in biochemistry. May be repeated for credit.

##### **BCH 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Biochemistry.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

#### **Upper-Division Courses**

##### **BCH 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Biochemistry.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

##### **BCH 339F. Foundations of Biochemistry.**

Restricted to biochemistry majors. Metabolism of carbohydrates, lipids, amino acids, and nucleotides; structure and function of proteins. Three lecture hours a week for one semester. Only one of the following may be counted: Biochemistry 339F, 369, Biology 337 (Topic: Foundations of Biochemistry), Chemistry 339K, 369. Prerequisite: One of the following with a grade of at least C-: Chemistry 310M, 318M, 320M, or 328M.

##### **BCH 339J. Chemical and Synthetic Biology.**

Designed for students pursuing pharmaceutical and biotechnology careers. Topics include enzymatic reaction mechanisms and how they can be manipulated using tools from both chemistry and molecular biology. Three lecture hours a week for one semester. Only one of the following may be counted: Biochemistry 339J, Chemistry 339J, Systems and Synthetic Biology 339J. Prerequisite: Biochemistry 339F with a grade of at least C-.

##### **BCH 339M. Structure and Function of Molecular Machines.**

Function of proteins and protein complexes as machines in the cell, including the interaction of proteins with nucleic acids, synthesis of proteins, and degradation of proteins. Three lecture hours per week for one semester. Prerequisite: Biochemistry 339F with a grade of at least C-.

##### **BCH 339N. Systems Biology and Bioinformatics.**

Restricted to biochemistry majors. Understanding how the cell works as a system with emphasis on the methods used to gather and analyze data and develop/test models of systems level data. Three lecture hours

a week for one semester. Only one of the following may be counted: Biochemistry 339N, 350, Biology 337 (Topic: Quantitative Analysis of Cellular and Molecular Biology), Chemical Engineering 337, 379 (Topic: Quantitative Analysis of Cellular and Molecular Biology), 381Q. Prerequisite: Biochemistry 339F, Computer Science 303E, and Statistics and Data Sciences 328M (or Statistics and Scientific Computation 318M, 328M) with a grade of at least C-.

### **BCH 350. Quantitative Analysis of Cellular and Molecular Biology.**

Study of biological fundamentals using quantitative chemical engineering approaches for students with an engineering or life sciences background. Analysis of biological systems from stoichiometric, thermodynamic, and kinetic perspectives. Investigation of how these principles are used to understand disease, control cellular behavior, and design protein-based therapeutics through case studies. Three lecture hours a week for one semester. Only one of the following may be counted: Biochemistry 350, 339N, Biology 337 (Topic: Quantitative Analysis of Cellular and Molecular Biology), Chemical Engineering 337, 379 (Topic: Quantitative Analysis of Cellular and Molecular Biology), 381Q. Prerequisite: Biochemistry 339F or 369 with a grade of C- or better.

### **BCH 364C. Bioinformatics.**

Restricted to biochemistry majors. Subjects include physical methods for the study of macromolecules, chemistry of proteins, enzyme chemistry, regulatory mechanisms for gene expression, and protein-nucleic acid interactions. Three lecture hours a week for one semester. Only one of the following may be counted: Biochemistry 364C, Chemistry 364C, Systems and Synthetic Biology 364C. Prerequisite: Biochemistry 339F with a grade of at least B; Statistics and Data Sciences 328M (or Statistics and Scientific Computation 318M, 328M) with a grade of at least C-; and consent of the instructor.

### **BCH 364D. Macromolecular Structure Determination.**

Restricted to biochemistry majors. Emphasis on X-ray crystallography and nuclear magnetic resonance (NMR) spectroscopy of proteins. Investigation of theories and practices of the most relevant techniques in macromolecular structure determination. Use of the X-ray and NMR facilities to collect data that is used to solve protein structures. Three lecture hours a week for one semester. Biochemistry 364D and Chemistry 364D may not both be counted. Prerequisite: Biochemistry 339F and 370 with a grade of at least B.

### **BCH 364E. Systems Biology.**

Restricted to biochemistry majors. Survey of current high-throughput technologies and computational methods for generating data and integrating information at all levels of biological organization. Emphasis on how hypotheses can be generated and tested with these techniques to better understand how model organisms function and evolve. Three lecture hours a week for one semester. Biochemistry 364E and Chemistry 364E may not both be counted. Prerequisite: Biochemistry 339F with a grade of at least B and consent of instructor.

### **BCH 364F. Astrobiology.**

Restricted to biochemistry majors. An overview of the science used in the search for extraterrestrial life, life origins, earth history, evolution, metabolism of extremophiles, biochemistry, and astronomy. Three lecture hours a week for one semester. Biochemistry 364F and Chemistry 364F may not both be counted. Prerequisite: Biochemistry 339F with a grade of at least B and consent of instructor.

### **BCH 365D. Structure and Function of Proteins and Nucleic Acids.**

Restricted to biochemistry majors. Exploration of the structures and functions of proteins and nucleic acids, utilizing quantitative methods to

evaluate the roles of structural features in function, and developing new ways of thinking about the dynamics of macromolecules. Three lecture hours a week for one semester. Biochemistry 365D and Chemistry 365D may not both be counted. Prerequisite: Biochemistry 339F and 370 with a grade of at least B.

### **BCH 369. Fundamentals of Biochemistry.**

The basics of protein structure and function, carbon and nitrogen metabolism, and molecular biology of macromolecules. Three lecture hours a week for one semester. Only one of the following may be counted: Biochemistry 339F, 369, Biology 337 (Topic: Foundations of Biochemistry), Chemistry 339K, 369. May not be counted toward a degree in biochemistry. Prerequisite: One of the following with a grade of at least C-: Chemistry 310M, 318M, 320M, or 328M.

### **BCH 369K. Techniques of Research.**

Advanced laboratory practice and introduction to research. One lecture hour and six laboratory hours a week for one semester. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in biochemistry. May be repeated for credit. Prerequisite: Six semester hours of upper-division coursework in biochemistry or chemistry, or five semester hours of coursework in organic chemistry, or consent of the undergraduate faculty adviser in biochemistry.

### **BCH 369L. Biochemistry Laboratory.**

An introduction to modern fundamental techniques of biochemistry. Two lecture hours and seven laboratory hours a week for one semester. Biochemistry 369L and Chemistry 369L may not both be counted. Prerequisite: Biochemistry 339F with a grade of at least C-.

### **BCH 369T. Biotechnology Laboratory.**

Advanced techniques in biotechnology. Nine laboratory hours a week for one semester. Biochemistry 369T and Chemistry 369T may not both be counted. Prerequisite: Consent of instructor.

### **BCH 370. Physical Methods of Biochemistry.**

Theory of electrophoresis, ultracentrifugation, spectroscopy, electron microscopy, and diffraction as applied to biological macromolecules. Three lecture hours a week for one semester. Biochemistry 370 and Chemistry 370 may not both be counted. Prerequisite: Biochemistry 339F with a grade of at least C-.

### **BCH 379H, 679H. Biochemistry Honors Tutorial Course.**

Laboratory research project in a specific field of biochemistry under the supervision of one or more faculty members. Conference course. May be repeated once for credit. Must be taken in addition to the required hours for a degree in biochemistry. Students must enroll no later than the first semester of the year of graduation. May be repeated for credit. Prerequisite: Consent of the research supervisor and the departmental honors adviser.

## **Neuroscience Program**

### **Neuroscience: NEU**

#### **Lower-Division Courses**

#### **Upper-Division Courses**

#### **NEU 330. Neural Systems I.**

Introduction to the nervous system with an emphasis on brain organization, neuron physiology, perceptual systems, and motor systems. Intended for neuroscience majors and those considering neuroscience as a major. Three lecture hours a week for one semester.

Only one of the following may be counted: Biology 337 (Topic: Neural Systems I), 365R, 371M, Neuroscience 330, 365R, 371M.

### **NEU 335. Neural Systems II.**

Introduction to the nervous system with an emphasis on neural development and on the neural mechanisms of memory, emotions, and other higher cognitive functions. Intended for neuroscience majors and those considering neuroscience as a major. Three lecture hours a week for one semester. Biology 337 (Topic: Neural Systems II) and Neuroscience 335 may not both be counted. Prerequisite: Credit or registration in Physics 303L, 316, or 317L; and a grade of at least C- in the following: Biology 206L, and 311D or 325H, and Mathematics 408C or 408S, and Neuroscience 330.

### **NEU 137, 237, 337, 437. Selected Topics in Neuroscience.**

Topics include recent developments and research methods in the field of neuroscience. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics may require additional hours. May be repeated for credit when the topics vary. Neuroscience 335 with a grade of at least B-; additional prerequisites vary with the topic.

### **NEU 365D. Principles of Drug Action.**

Introduction to the basic principles of pharmacology; including how drugs get into the body, exert their actions, and are metabolized and excreted. Three lecture hours a week for one semester. Biology 365D (Topic: Principles of Drug Action) and Neuroscience 365D may not both be counted. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 365L. Neurobiology Laboratory.**

An introduction to physiological, morphological, and molecular techniques used for analysis of the nervous system. Experiments and computer simulations illustrate basics of information processing by the nervous system. Four laboratory hours and one discussion hour a week for one semester. Biology 365L (Topic: Neurobiology Laboratory) and Neuroscience 365L may not both be counted. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 365T. Neurobiology of Disease.**

The neurobiological basis of disorders of the brain, with the main focus on mental illness. Emphasizes the neural circuitries and neurochemical events that underlie specific mental processes and behaviors. Three lecture hours a week for one semester. Biology 365T and Neuroscience 365T may not both be counted. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 365W. Neurobiology of Addiction.**

Study of the neurobiology of neurotransmitters, and the influence of alcohol and drugs of abuse on neurotransmitters. Three lecture hours a week for one semester. Biology 365W and Neuroscience 365W may not both be counted. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 366C. Ion Channels and the Molecular Physiology of Neuronal Signaling.**

Explores the role of molecular conformational changes in higher-level neuronal function and sensory transduction, including the generation and regulation of diverse types of neuronal signaling characteristics. Emphasizes a quantitative approach and the use of models to study function. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Ion Channels and the Molecular Physiology of Neuronal Signaling), 366C, Neuroscience 366C. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 366D. Synaptic Physiology and Plasticity.**

Detailed study of the physiology of synaptic transmission in the mammalian central nervous system. Covers dendritic integration and various forms and mechanisms of synaptic plasticity. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Synaptic Physiology and Plasticity in the Central Nervous System), 366D, Neuroscience 366D. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 366E. Visual Neuroscience.**

Physiology of the visual pathway and its relationship to visual perception; prospects for prevention of blinding eye diseases; functional and ecological adaptations of primate vision. Laboratory experiments and demonstrations illustrate and extend lecture topics and include measurement of several aspects of students' own visual and sensorimotor function. One and one-half lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Visual Neuroscience), 366E, 366P, Neuroscience 366E, 366P. Prerequisite: Biomedical Engineering 365R or Neuroscience 335 with a grade of at least C-.

### **NEU 466G. Functional and Synaptic Neuroanatomy.**

Neuroanatomy and function of synapses as a basis for brain function and behavior. Examine the ultrastructure and function of synapses, dendrites and axons underlying basic synaptic transmission and plasticity. Laboratory projects involve three-dimensional reconstructions from serial section electron microscopy. Three lecture hours and one-and-one-half laboratory hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Neurobiology of Synaptic Circuits), 337 (Topic: Human Neuroanatomy), 366F, Neuroscience 466G. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 366L. Neuroimaging Laboratory.**

Basic principles of image formation and techniques of fluorescent imaging and confocal laser-scanning microscopy. Includes image processing and analysis to extract quantitative information from digital images. Survey of imaging techniques, including electron microscopy and functional MRI. One lecture hour and four laboratory hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Microscopy and Fluorescence Imaging Laboratory), 366L, Neuroscience 366L. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 466M. Quantitative Methods In Neuroscience I.**

Overview of the basic mathematical and computational tools central to the analysis of neural systems in a laboratory setting. Subjects include linear algebra, differential equations, filtering, correlation, probability, and inference, with an emphasis on quantitative methodology and applications to neuroscience. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Mathematics 408D or 408M, and Neuroscience 335 with a grade of at least C- in each.

### **NEU 366N. Quantitative Methods in Neuroscience II.**

Continuation of Neuroscience 466M. Introduction to basic mathematical and computational tools for the analysis of neural systems. Subjects include computational and quantitative methods, with an emphasis on their applications to neuroscience. Three lecture hours and one laboratory hour a week for one semester. Biology 366N and Neuroscience 366N may not both be counted. Prerequisite: Neuroscience 466M with a grade of at least C-.

### **NEU 366P. Laboratory in Psychophysics.**

Studies the principles of experimental design, execution, and interpretation by having students measure their own perceptual and behavioral responses to visual and auditory tests. Includes data analysis,

statistical significance, and interpretation. Five laboratory hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Visual Neuroscience), 366E, 366P, Neuroscience 366E, 366P. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 366S. Neuromolecular Genetics and Disease Laboratory.**

Explores techniques used to study the molecular genetic basis for nervous system function and disease with a powerful invertebrate model system. Subjects will range from studying the conserved molecular basis for our senses and male/female-specific behaviors, to exploring how mutations of conserved neural genes cause neurological disorders, such as Parkinson's disease and Alzheimer's disease. Six laboratory hours a week for one semester Biology 366S and Neuroscience 366S may not both be counted. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 367F. Foundations of Human Neuroimaging.**

Survey of methods for neuroimaging research. Describes the physics of MRI image acquisition, the physiology of neural responses, and the design and analysis of MRI studies. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Foundations of Human Neuroimaging), 367F, Neuroscience 367F. Prerequisite: Neuroscience 330 or 365R (or Biology 365R) with a grade of at least C-.

### **NEU 367V. Evolutionary Neurobiology.**

Examination of the nervous system in an evolutionary context. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Evolutionary Neurobiology), 367V, Neuroscience 367V. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **NEU 367W. Laboratory in Behavioral Neuroscience.**

Behavioral experiments with rodents aimed at elucidating the neural mechanisms of psychological processes such as memory, anxiety, and incentive motivation. One lecture hour and five laboratory hours a week for one semester. Biology 367W and Neuroscience 367W may not both be counted. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 371M. Comparative Neuroscience.**

The nervous system, with emphasis on vertebrate neurobiology. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 337 (Topic: Neural Systems I), 365R, 371M, Neuroscience 330, 365R, 371M. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 177, 277, 377, 477. Undergraduate Research.**

Laboratory or research in the various fields of neuroscience under the supervision of one or more faculty members. Supervised individual research. Up to three semester hours may be counted toward the major requirement for the Bachelor of Science in Neuroscience. May be repeated for credit. Prerequisite: Neuroscience 335 with a grade of at least C-.

### **NEU 179H, 279H, 379H. Honors Tutorial Course.**

Restricted to students in the honors program in neuroscience. Original laboratory research project under the direction of a faculty mentor leading to a thesis or research presentation. The equivalent of one, two, or three lecture hours a week for one semester. May be repeated for credit, but no more than six hours may be counted toward a degree in neuroscience. Prerequisite: Consent of student's research supervisor and the departmental honors adviser.

## **Department of Physics**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### **Physical Science: P S**

#### **Lower-Division Courses**

#### **P S 303. Introductory Physical Science I: Mechanics and Heat.**

Restricted to students outside the College of Natural Sciences. Inquiry laboratory approach to basic concepts of measurement, forces, motion, energy, temperature, and heat. Designed for students with minimum prior preparation in mathematics and physics. Especially appropriate for prospective elementary school teachers. Four hours of integrated laboratory and lecture a week for one semester. Only one of the following may be counted: Physical Science 303, Physics 301, 302K, 303K, 309K, 317K.

#### **P S 304. Introductory Physical Science II: Electricity, Light, and Optics.**

Restricted to students outside the College of Natural Sciences. Inquiry laboratory approach to electricity, magnetism, waves, light, and optical instruments. Four hours of integrated laboratory and lecture a week for one semester. Only one of the following may be counted: Physical Science 304, Physics 302L, 303L, 309L, 316, 317L. Prerequisite: Physical Science 303.

#### **Upper-Division Courses**

#### **P S 350. Physical Science for Elementary and Middle School Teachers.**

Designed for kindergarten through sixth grade teachers with minimal preparation in mathematics (college algebra) and no preparation in physics. An inquiry laboratory in the basic concepts of light, electricity, and magnetism. Three hours of integrated laboratory and lecture a day for three weeks.

#### **P S 367M. Physical Science: Methods of Astronomy.**

Same as Astronomy 367M. An introductory, self-paced course in the methods of astronomy that emphasizes learning astronomical principles through observations. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Arts, Plan I, degree with a major in astronomy. Prerequisite: Upper-division standing and nine semester hours of coursework in mathematics and/or science, including one of the following: Physical Science 303, 304, Astronomy 301, 302, 303. Equivalent preparation in mathematics, physics, chemistry, or earth sciences may be substituted with written approval of the instructor.

#### **P S 375. Individual Study in Physical Science.**

Intended primarily for preservice and in-service teachers. Guided inquiry reading or laboratory research in physical science. Meets three times a week for one semester, for one hour each meeting. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and written consent of instructor.

### **Physics: PHY**

#### **Lower-Division Courses**

#### **PHY 301. Mechanics.**

Designed for students who intend to major in science or mathematics. Three lecture hours a week for one semester. Only one of the following

may be counted: Physical Science 303, Physics 301, 302K, 303K, 309K, 317K. Prerequisite: Credit with a grade of at least C- or registration in Mathematics 408D, 408L, or 408S, and Physics 101L; and an appropriate score on the physics assessment exam.

#### **PHY 101L. Laboratory for Physics 301.**

Three laboratory hours a week for one semester. Only one of the following may be counted without prior approval of the department: Physics 101L, 102M, 103M, 117M. May not be counted toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 301.

#### **PHY 302K (TCCN: PHYS 1301). General Physics Technical Course: Mechanics, Heat, and Sound.**

Noncalculus technical course in physics. Completion of high school trigonometry or Mathematics 305G is highly recommended. Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 303, Physics 301, 302K, 303K, 309K, 317K. Prerequisite: Credit with a grade of at least C- or registration for Physics 102M.

#### **PHY 302L (TCCN: PHYS 1302). General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics.**

Noncalculus technical course in physics. Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 304, Physics 302L, 303L, 309L, 316, 317L. Prerequisite: Credit with a grade of at least C- in Physics 302K and 102M; credit with a grade of at least C- or registration in Physics 102N.

#### **PHY 102M (TCCN: PHYS 1101). Laboratory for Physics 302K.**

Two laboratory hours a week for one semester. Only one of the following may be counted without prior approval of the department: Physics 101L, 102M, 103M, 117M. May not be counted toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 302K.

#### **PHY 102N (TCCN: PHYS 1102). Laboratory for Physics 302L.**

Two laboratory hours a week for one semester. Only one of the following may be counted without prior approval of the department: Physics 102N, 103N, 116L, 117N. May not be counted toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 302L.

#### **PHY 303K (TCCN: PHYS 2325). Engineering Physics I.**

A general survey of physics; primarily laws of motion, heat, and wave phenomena. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Physical Science 303, Physics 301, 302K, 303K, 309K, 317K. Prerequisite: Credit with a grade of at least C- or registration in Mathematics 408D, 408L, or 408S, and Physics 103M; and an appropriate score on the physics assessment exam.

#### **PHY 303L (TCCN: PHYS 2326). Engineering Physics II.**

Electricity and magnetism, optics, and atomic phenomena. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Physical Science 304, Physics 302L, 303L, 309L, 316, 317L. Prerequisite: Physics 303K and 103M with a grade of at least C- in each; credit with a grade of at least C- or registration in Mathematics 408D or 408M, and Physics 103N.

#### **PHY 103M (TCCN: PHYS 2125). Laboratory for Physics 303K.**

Two laboratory hours a week for one semester. Only one of the following may be counted: Physics 101L, 102M, 103M, 117M. May not be counted

toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 303K.

#### **PHY 103N (TCCN: PHYS 2126). Laboratory for Physics 303L.**

Two laboratory hours and one discussion hour a week for one semester. Only one of the following may be counted: Physics 102N, 103N, 116L, 117N. May not be counted toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 303L.

#### **PHY 104. Introductory Physics Seminar.**

Suggested for beginning physics majors. Discussion of the development of important ideas in physics, with emphasis on their relevance to contemporary research. One lecture hour a week for one semester. Offered on the pass/fail basis only.

#### **PHY 306. Elementary Physics Methods.**

Designed for students who have not had high school physics, have weak problem-solving skills, and need preparation for Physics 301 or 303K. Three lecture hours a week for one semester. May not be counted toward any degree. Prerequisite: High school trigonometry or Mathematics 305G.

#### **PHY 108. Introduction to Research.**

Introductory laboratory experience; use of tools and test equipment; beginning apprenticeship in active physics research. One class hour a week for one semester. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Consent of instructor and approval of an undergraduate adviser.

#### **PHY 308F. Introduction to Research.**

Introductory laboratory experience; use of tools and test equipment; beginning apprenticeship in active physics research. One lecture hour and eight laboratory hours a week for one semester. Prerequisite: Consent of instructor and the undergraduate adviser.

#### **PHY 309K (TCCN: PHYS 1305). Elementary Physics for Nontechnical Students.**

Mechanics, heat, and sound. Designed for students who do not intend to do further work in natural sciences, engineering, mathematics, or medicine. Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 303, Physics 301, 302K, 303K, 309K, 317K. May not be counted toward a degree in the College of Natural Sciences.

#### **PHY 309L (TCCN: PHYS 1307). Elementary Physics for Nontechnical Students.**

Electricity and magnetism, light, atomic and nuclear physics. Designed for students who do not intend to do further work in natural sciences, engineering, mathematics, or medicine. Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 304, Physics 302L, 303L, 309L, 316, 317L. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Physics 309K with a grade of at least C-.

#### **PHY 110C. Conference Course.**

Supervised study of selected topics in physics, by individual arrangement with department and instructor. Conference course. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Written consent of instructor.

#### **PHY 315. Wave Motion and Optics.**

Study of general properties of waves; examples include sound, electromagnetic, and mechanical waves; special emphasis on light and optics. Three lecture hours a week for one semester. Prerequisite: The

following coursework with a grade of at least C- in each: Mathematics 427J or 427K; Physics 316 and 116L; and credit with a grade of at least C- or registration for Physics 115L.

### **PHY 115L. Laboratory for Physics 315.**

Three laboratory hours a week for one semester. May not be counted toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 315.

### **PHY 316. Electricity and Magnetism.**

Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 304, Physics 302L, 303L, 309L, 316, 317L. Prerequisite: Physics 301 and 101L with a grade of at least C- in each; credit with a grade of at least C- or registration in Mathematics 408D or 408M, and Physics 116L.

### **PHY 116L. Laboratory for Physics 316.**

Three laboratory hours a week for one semester. Only one of the following may be counted without prior approval of the department: Physics 102N, 103N, 116L, 117N. May not be counted toward a degree unless prerequisite is observed. Prerequisite: Credit with a grade of at least C- or registration for Physics 316.

### **PHY 317K. General Physics I.**

Mechanics, heat, and sound, with biomedical applications. An introductory course designed and recommended primarily for premedical students and others in the biomedical sciences whose professional or preprofessional training includes an introductory course in calculus. Satisfies most medical and dental school requirements for physics. Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 303, Physics 301, 302K, 303K, 309K, 317K. May not be counted toward the Bachelor of Science in Astronomy or Bachelor of Science in Physics. Prerequisite: Credit with a grade of at least C- in Mathematics 408C or 408R; or credit with a grade of at least C- in 408K or 408N and registration for 408L or 408S; and credit with a grade of at least C- or registration for Physics 117M.

### **PHY 317L. General Physics II.**

Electricity and magnetism, light, atomic and molecular physics, nuclear physics, and their biomedical applications. Designed and recommended primarily for premedical students and others in the biomedical sciences whose professional or preprofessional training includes an introductory course in calculus. Satisfies most medical and dental school requirements for physics. Three lecture hours a week for one semester. Only one of the following may be counted: Physical Science 304, Physics 302L, 303L, 309L, 316, 317L. May not be counted toward the Bachelor of Science in Astronomy or Bachelor of Science in Physics. Prerequisite: Physics 317K and 117M with a grade of at least C-; and credit with a grade of at least C- or registration in Physics 117N.

### **PHY 117M. Laboratory for Physics 317K.**

Three laboratory hours a week for one semester. Only one of the following may be counted without prior approval of the department: Physics 101L, 102M, 103M, 117M. Prerequisite: Credit with a grade of at least C- or registration for Physics 317K.

### **PHY 117N. Laboratory for Physics 317L.**

Three laboratory hours a week for one semester. Only one of the following may be counted without prior approval of the department: Physics 102N, 103N, 116L, 117N. Prerequisite: Credit with a grade of at least C- or registration for Physics 317L.

### **PHY 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Physics.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **Upper-Division Courses**

#### **PHY 321. Modern Physics: Plan II.**

Restricted to Plan II students. Conceptual foundations of modern physics. Examines quantum mechanics, quantum field theory, relativity, and general relativity, including large-scale structure and cosmology; and the development of analytic problem-solving skills, including estimation. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

#### **PHY 329. Introduction to Computational Physics.**

Computational methods for problem solving and research in physics; numerical analysis and computer simulation methods for physics applications using different types of computers. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 367, Mathematics 368K, Physics 329. Prerequisite: The following coursework with a grade of at least C- in each: Physics 315 and 115L; a programming course at the level of Computer Science 303E with a grade of at least C- or consent of instructor; and credit with a grade of at least C- or registration for Mathematics 341 or 340L.

#### **PHY 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Physics.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

#### **PHY 329W. Cooperative Physics.**

Covers the work period of physics students in the Cooperative Education Program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. No more than three semester hours may be counted toward the major requirement; no more than six semester hours may be counted toward the degree. The student's first registration must be on the pass/fail basis. Prerequisite: Membership application to the Cooperative Physics Program, Physics 316 with a grade of at least C-, and consent of the undergraduate adviser.

#### **PHY 333. Modern Optics.**

Review of geometrical optics, polarization, interference, and optical instruments. Subjects include Fourier optics, light propagation in fibers, quantum optics, and coherence. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Mathematics 427J or 427K, Physics 315, and 115L.

#### **PHY 133L. Laboratory for Physics 333.**

Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Physics 333.

### **PHY 336K. Classical Dynamics.**

Elementary linear vector algebra, Newtonian mechanics, Lagrangian mechanics, central force motion, dynamics of rigid bodies, and theory of small oscillations. Three lecture hours a week for one semester.

Prerequisite: The following coursework with a grade of at least C- in each: Mathematics 427L or 364K, Physics 315, and 115L.

### **PHY 336L. Fluid Dynamics.**

Fundamental concepts of fluid mechanics developed and applied to laminar and turbulent flows. Subjects include the Navier-Stokes equations, pipe and channel flow, drag, boundary layers, convection, and rotating fluids. Three lecture hours a week for one semester. Prerequisite: Physics 336K with a grade of at least C-.

### **PHY 338K. Electronic Techniques.**

Elementary circuit theory, amplifiers, feedback, pulse and digital techniques, signal processing, and microprocessors as applied to physics instrumentation. One and one-half lecture hours and three laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Mathematics 427J or 427K, Physics 316, and 116L.

### **PHY 341. Selected Topics in Physics.**

Three lecture hours a week for one semester. An additional one-hour problem session is required for some sections. May not be counted toward the Bachelor of Science in Physics degree without prior approval of the department. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing, three semester hours of coursework in a natural science, and three semester hours of coursework in mathematics.

**Topic 1: Energy Production.** The various means that exist or have been suggested for generating energy; comparison in terms of efficiency, safety, and effects on the environment.

**Topic 2: Great Men, Moments, and Ideas.** How our views of matter, energy, and the universe developed.

**Topic 3: Musical Acoustics.** Study of the production, transmission, and perception of the special kind of sound called music, based on the application of elementary principles of physics.

**Topic 4: The Nature of Things.** A qualitative survey of all of physics, from falling bodies to quarks, making heavy use of classroom demonstrations.

**Topic 5: Pseudoscience.** Study of a variety of ideas treated very seriously by the communications media but having no basis in fact, including astrology, extrasensory perception, and flying saucers; why such areas are not part of science.

**Topic 6: Writing.**

**Topic 7: Research Methods: UTeach.**

### **PHY 345. Biophysics.**

Basic concepts of physics developed and applied to biological systems. Subjects include energy in living systems, entropic interactions, molecular forces and self-assembly, biopolymers, bio-membranes, cell-cell interactions, pattern formation, collective behavior, higher order systems, population dynamics and evolution. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and the following coursework with a grade of at least C- in each: Biology 311D, Chemistry 302, and Physics 355.

### **PHY 352K. Classical Electrodynamics I.**

Electrostatic fields, magnetostatic fields, derivation of Green's theorems and functions and of Maxwell's equations. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Mathematics 427L or 364K, Physics 315, and 115L.

### **PHY 352L. Classical Electrodynamics II.**

A continuation of Physics 352K, emphasis is placed on conservation laws, electromagnetic waves, potentials and fields, radiation, and Lorentz invariance. One or more special subjects, such as Rayleigh scattering and energy loss by relativistic charged particles in matter will be developed. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Physics 352K with a grade of at least C-.

### **PHY 353L. Modern Physics Laboratory.**

Laboratory experiments investigating the breakdown of classical physics for microscopic phenomena. Includes absorption and emission spectra, the photoelectric effect, blackbody radiation, the Compton effect, X-ray diffraction, and other experiments in modern physics. Four and one-half laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Physics 315 and 115L.

### **PHY 355. Modern Physics and Thermodynamics.**

Introduction to modern physics and thermodynamics: photons (spectra, photoelectric effect, blackbody radiation, Compton effect), atoms (Rutherford, Bohr), matter waves (Planck, deBroglie, probability interpretation, Schroedinger), nuclei, particles, special relativity, the laws of thermodynamics, and statistical physics. Three lecture hours a week for one semester. Prerequisite: Physics 303L or 316 with a grade of at least C-.

### **PHY 362K. Quantum Physics II: Atoms and Molecules.**

The two-electron atom; spin and statistics; coupling schemes for many-electron atoms; atoms and the radiation field; perturbation methods for decay and collisions; thermal, electrical, and magnetic properties of solids; and free-electron metal and band theory. May include subjects such as superconductivity, Josephson tunneling, and others. Three lecture hours a week for one semester. Prerequisite: Physics 373 with a grade of at least C-.

### **PHY 362L. Quantum Physics III: Particles and Nuclei.**

Nuclei and nucleons, their gross properties; the hadrons; symmetries and conservation laws; nuclear stability; electromagnetic, weak, and hadronic interactions; nuclear reactions at low, medium, and high energies; nucleon structure; tools of experimental nuclear physics; models of theoretical nuclear physics; nuclear technology. Three lecture hours a week for one semester. Prerequisite: Physics 373 with a grade of at least C-; Physics 362K is recommended.

### **PHY 369. Thermodynamics and Statistical Mechanics.**

Basic concepts of thermal physics; entropy, enthalpy, free energy, phase transitions, equilibrium distribution functions, applications. Three lecture hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Physics 373.

### **PHY 670T. Senior Thesis.**

Individual research with faculty supervision. First half involves preparation of proposal; second involves completion of written thesis. Six hours of work a week for one semester, or three hours of work a week for two semesters. Only three semester hours may be counted toward the Bachelor of Science in Physics degree. Prerequisite: Upper-division standing and nine semester hours of upper-division coursework in physics.

### **PHY 371C. Individual Study in Physics.**

Supervised reading or research in physics. Hours to be arranged. May be repeated for credit. Prerequisite: Upper-division standing; Physics 336K with a grade of at least C-; credit with a grade of at least C- or registration for Physics 352K; and consent of the undergraduate adviser.

### **PHY 373. Quantum Physics I: Foundations.**

Postulates of quantum mechanics, the bound states of the finite square well, the harmonic oscillator, operator-eigenvalue formalism and selected examples, the hydrogen atom, angular momentum, rigid rotor, and spin. May include simple scattering theory. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Physics 336K, 353L, and 355.

### **PHY 474. Advanced Laboratory I.**

Modern experimental techniques, theory of error, and analysis of experiments; both modern and classical experiments in atomic and nuclear physics, electricity and magnetism, optics and heat. Three lecture hours and eight laboratory hours a week for one semester, with additional laboratory hours to be arranged. With consent of instructor, may be repeated for credit. Prerequisite: Physics 352K, 353L, and 355; or consent of the undergraduate adviser. Physics 338K is recommended.

### **PHY 375P. Introductory Plasma Physics.**

Orbit theory and drifts, introduction to plasma stability and waves, applications to plasma confinement and heating. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Physics 352K and 369.

### **PHY 375R. Introduction to Relativity.**

Overview of the special and general theories of relativity, with emphasis on recent developments in gravitation. Three lecture hours a week for one semester. Prerequisite: Physics 352K with a grade of at least C-.

### **PHY 375S. Introductory Solid-State Physics.**

Crystal structure, classification of solids, cohesion, thermal and electrical properties of solids, magnetic properties of solids, imperfections. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Physics 369 and 373.

### **PHY 379H. Honors Tutorial Course.**

Research project, resulting in a thesis, for outstanding students electing to take the honors program in physics. Conference course. Prerequisite: A University grade point average of at least 3.00, a grade point average in physics of at least 3.50, twelve semester hours of upper-division coursework in physics, and consent of the student's research supervisor and the departmental honors adviser.

## **Division of Statistics and Data Sciences**

### **Statistics and Data Sciences: SDS**

#### **Lower-Division Courses**

#### **SDS 301. Elementary Statistical Methods.**

Covers the fundamental procedures for data organization and analysis. Subjects include frequency distributions, graphical presentation, sampling, experimental design, inference, and regression. Three lecture hours a week for one semester. Only one of the following may be counted: Educational Psychology 371, Mathematics 316, Statistics 309 or Statistics and Data Sciences 301. A student may not earn credit for Educational Psychology 371, Mathematics 316, Statistics 309 or Statistics and Data Sciences 301 after having received credit for any of the following with a grade of at least C-: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, or 328M.

#### **SDS 302. Data Analysis for the Health Sciences.**

Basic probability and data analysis for the sciences. Subjects include randomness, sampling, distributions, probability models, inference,

regression, and nonlinear curve fitting. Three lecture hours and one laboratory hour a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, 328M.

#### **SDS 303. Statistics in Experimental Research.**

An introduction to the fundamental concepts and methods of statistics, with emphasis on applications in experimental science. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, or 328M. Prerequisite: An appropriate score on the College of Natural Sciences mathematics placement examination.

#### **SDS 304. Statistics in Health Care.**

Introduction to the fundamental concepts and methods of statistics, with emphasis on applications in the health sciences. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, or 328M.

#### **SDS 305. Statistics in Policy Design.**

An introduction to the fundamental concepts and methods of statistics, with emphasis on applications in policy evaluation and design. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, or 328M. Prerequisite: An appropriate score on the College of Natural Sciences mathematics placement examination.

#### **SDS 306. Statistics in Market Analysis.**

Introduction to the fundamental concepts and methods of statistics, with emphasis on applications in the analysis of personal and group behaviors. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, or 328M.

#### **SDS 110T, 210T, 310T, 410T. Topics in Statistics and Computation.**

For each semester hour of credit earned, one lecture hour a week for one semester. Statistics and Data Sciences 110T and Statistics and Scientific Computation 110T may not both be counted. May be repeated for credit when the topics vary.

#### **SDS 318. Introduction to Statistical and Scientific Computation.**

An introduction to quantitative analysis using fundamental concepts in statistics and scientific computation. Includes probability, distributions, sampling, interpolation, iteration, recursion, and visualization. Three lecture hours and one laboratory hour a week for one semester. Statistics and Data Sciences 318 and Statistics and Scientific Computation 318 may not both be counted.

## Upper-Division Courses

### SDS 321. Introduction to Probability and Statistics.

Covers fundamentals of probability, combinatorics, discrete and continuous random variables, jointly distributed random variables, and limit theorems. Using probability to introduce fundamentals of statistics, including Bayesian and classical inference. The equivalent of four lecture hours a week. Only one of the following may be counted: Mathematics 362K, Statistics and Data Sciences 321, Statistics and Scientific Computation 321. Prerequisite: Mathematics 408C, 408L, 408R, or 408S with a grade of at least C-.

### SDS 222, 322. Introduction to Scientific Programming.

Introduction to programming using both the C and Fortran (95/2003) languages, with applications to basic scientific problems. Covers common data types and structures, control structures, algorithms, performance measurement, and interoperability. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 222, 322, 292, 392, Statistics and Scientific Computation 222, 322, 292, 392. Prerequisite: Credit or registration for Mathematics 408C, 408K, or 408N.

### SDS 323. Statistical Learning and Inference.

An introduction to statistical inference, broadly construed as the process of drawing conclusions from data, and to quantifying uncertainty about said conclusions. Covers the major schools of thought that influence modern scientific practice, including classical frequentist methods, machine learning, and Bayesian inference. Three lecture hours a week for one semester. Statistics and Data Sciences 323 and Statistics and Scientific Computation 323 may not both be counted. Prerequisite: Statistics and Data Sciences 321 (or Statistical and Scientific Computation 321) or the equivalent.

### SDS 325H. Honors Statistics.

An introduction to the fundamental theories, concepts, and methods of statistics. Emphasizes probability models, exploratory data analysis, sampling distributions, confidence intervals, hypothesis testing, correlation and regression, and the use of statistical software. Three lecture hours a week for one semester. Statistics and Data Sciences 325H and Statistics and Scientific Computation 325H may not both be counted. Prerequisite: Admission to the Dean's Scholars Honors Program in the College of Natural Sciences or consent of instructor.

### SDS 328M. Biostatistics.

Introduction to methods of statistical analysis of biological data. Includes data analysis, basics of experimental design, statistical inference, interval estimation, and hypothesis testing. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 328M, Statistics and Data Sciences 328M, Statistics and Scientific Computation 328M. Only one of the following may be counted: Statistics and Data Sciences 302, 303, 304, 305, 306, 328M, Statistics and Scientific Computation 302, 303, 304, 305, 306, or 328M. Prerequisite: Six semester hours of coursework in biology.

### SDS 329C. Practical Linear Algebra I.

Matrix representations and properties of matrices; linear equations, eigenvalue problems and their physical interpretation; and linear least squares and elementary numerical analysis. Emphasis on physical interpretation, practical numerical algorithms, and proofs of fundamental principles. Three lecture hours a week for one semester. Only one of the following may be counted: Mathematics 340L, 341, Statistics and Data Sciences 329C, or Statistics and Scientific Computation 329C. Prerequisite: Credit or registration for Mathematics 408C, 408K, 408N, or 408R.

### SDS 329D. Practical Linear Algebra II.

Iterative solutions to linear equations and eigenvalue problems; properties of symmetric and nonsymmetric matrices, exploitation of sparsity and diagonal dominance; introduction to multivariate nonlinear equations; numerical analysis; and selected applications and topics in the physical sciences. Three lecture hours a week for one semester. Statistics and Data Sciences 329D and Statistics and Scientific Computation 329D may not both be counted. Prerequisite: Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### SDS 332. Statistical Models for the Health and Behavioral Sciences.

Follow up to introductory statistics with an overview of advanced statistical modeling topics. Subjects may include multiple regression, ANOVA, logistic regression, random and mixed effects models including longitudinal data, time series analysis, survival analysis, factor analysis, and SEM. Use of statistical software is emphasized. Three lecture hours a week for one semester. Prerequisite: Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 304 (or Statistics and Scientific Computation 304), 306 (or Statistics and Scientific Computation 306), 328M (or Statistics and Scientific Computation 328M), or the equivalent.

### SDS 335. Scientific and Technical Computing.

A comprehensive introduction to computing techniques and methods applicable to many scientific disciplines and technical applications. Covers computer hardware and operating systems, systems software and tools, code development, numerical methods and math libraries, and basic visualization and data analysis tools. Three lecture hours a week for one semester. Statistics and Data Sciences 335 and Statistics and Scientific Computation 335 may not both be counted. Prerequisite: Mathematics 408D or 408M, and prior programming experience.

### SDS 339. Applied Computational Science.

Concentrated study in a specific area or areas of application, with an emphasis on modeling and visualization. Areas may include computational biology, computational chemistry, computational applied mathematics, computational economics, computational physics, or computational geology. Three lecture hours a week for one semester. Statistics and Data Sciences 339 and Statistics and Scientific Computation 339 may not both be counted unless topics vary. May be repeated for credit when the topics vary.

### SDS 348. Computational Biology and Bioinformatics.

Computational-based data sorting, data transformation, and data analysis; programming in Python and R. Three lecture hours and one laboratory hour per week. Prerequisite: Statistics and Data Sciences 328M (or Statistics and Scientific Computation 328M) with a grade of at least C-.

### SDS 150K. Data Analysis Applications.

Introduction to the use of statistical mathematical applications for data analysis. Two lecture hours a week for eight weeks. Statistics and Data Sciences 150K and Statistics and Scientific Computation 150K may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Varies with the topic.

**Topic 1: SPSS Software.** Statistics and Data Sciences 150K (Topic 1) and Statistics and Scientific Computation 150K (Topic 1) may not both be counted. Offered on the pass/fail basis only. Additional prerequisite: Upper-division standing.

**Topic 2: SAS Software.** Statistics and Data Sciences 150K (Topic 2) and Statistics and Scientific Computation 150K (Topic 2) may

not both be counted. Offered on the pass/fail basis only. Additional prerequisite: Upper-division standing.

**Topic 3: Stata Software.** Statistics and Data Sciences 150K (Topic 3) and Statistics and Scientific Computation 150K (Topic 3) may not both be counted. Offered on the pass/fail basis only. Additional prerequisite: Upper-division standing.

**Topic 4: The R Software Environment.** Statistics and Data Sciences 150K (Topic 4) and Statistics and Scientific Computation 150K (Topic 4) may not both be counted. Offered on the pass/fail basis only. Additional prerequisite: Upper-division standing.

### **SDS 352. Statistical Methods.**

Study of simple and multiple regression, fundamentals of experimental design, and analysis of variance methods. May include logistic regression, Poisson regression, resampling methods, introduction to Bayesian methods, and probability models. Includes substantial use of statistical software. Three lecture hours and one laboratory hour a week for one semester. Statistics and Data Sciences 352 and Statistics and Scientific Computation 352 may not both be counted. Prerequisite: One of the following: Mathematics 316, Statistics and Data Sciences 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), or 306 (or Statistics and Scientific Computation 306).

### **SDS 353. Advanced Multivariate Modeling.**

Advanced topics in statistical modeling, including models for categorical and count data; spatial and time-series data; and survival, hazard, and hierarchical models. Extensive use of statistical software to build on knowledge of introductory probability and statistics, as well as multiple regression. Three lecture hours a week for one semester. Statistics and Data Sciences 353 and Statistics and Scientific Computation 353 may not both be counted. Prerequisite: Mathematics 408D or 408M; and Statistics and Data Sciences 325H (or Statistics and Scientific Computation 325H) or 352 (Statistics and Scientific Computation 352).

### **SDS 358. Special Topics in Statistics.**

Three lecture hours a week for one semester. Statistics and Data Sciences 358 and Statistics and Scientific Computation 358 may not both be counted unless topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites may vary with the topic.

**Topic 1: Applied Regression Analysis.** Through software application, discussion, and guided instruction, explores simple linear regression - what data is appropriate, how to run analysis, and how to interpret the output. Examines multiple regression with combinations of predictor variables, both continuous and categorical. There will be a discussion/application of ANOVA, prior to proceeding on to logistic regression: the prediction of discrete events. Only one of the following may be counted: Statistics and Data Sciences 358 (Topic: Applied Regression Analysis), 358 (Topic: 1), Statistics and Scientific Computation 358 (Topic: Applied Regression Analysis) Additional prerequisite: One of the following with a grade of at least C-: Statistics and Data Sciences 302, 304, 306, 328M (or Statistics and Scientific Computation 302, 304, 306, 328M).

### **SDS 367S. Simulation Modeling.**

Basic concepts of discrete-event simulation. Statistical input and output analysis; application of simulation software; modeling of systems under uncertainty. Three lecture hours a week for one semester. Only one of the following may be counted: Statistics and Data Sciences 367S, Statistics and Scientific Computation 358 (Topic: Simulation Modeling), 367S. Prerequisite: Upper-division standing and the following with a grade of at least C-: Mathematics 408C, 408K, or 408N; and Statistics

and Data Sciences 321 (or Scientific Computation 321) or an equivalent introductory statistics course.

### **SDS 374C. Parallel Computing for Science and Engineering.**

Study of parallel computing principles, architectures, and technologies; and parallel application development, performance, and scalability. Designed to help prepare students to formulate and develop parallel algorithms to implement effective applications for parallel computing systems. Three lecture hours a week for one semester. Statistics and Data Sciences 374C and Statistics and Scientific Computation 374C may not both be counted. Prerequisite: Mathematics 408D or 408M, 340L, and prior programming experience using C or Fortran on Linux or Unix systems.

### **SDS 374D. Distributed and Grid Computing for Science and Engineering.**

Distributed and grid computing principles and technologies. Covers common modes of grid computing for scientific applications, development of grid-enabled applications, and future trends in grid computing. Three lecture hours a week for one semester. Statistics and Data Sciences 374D and Statistics and Scientific Computation 374D may not both be counted. Prerequisite: Mathematics 408D or 408M, 340L, and prior programming experience using C or Fortran on Linux or Unix systems.

### **SDS 374E. Visualization and Data Analysis for Science and Engineering.**

Scientific visualization principles, practices, and technologies, including remote and collaborative visualization. Introduces statistical analysis, data mining, and feature detection. Three lecture hours a week for one semester. Statistics and Data Sciences 374E and Statistics and Scientific Computation 374E may not both be counted. Prerequisite: Mathematics 408D or 408M, 340, and prior programming experience using C or Fortran on Linux or Unix systems.

### **SDS 375. Special Topics in Scientific Computation.**

Three lecture hours a week for one semester. Statistics and Data Sciences 375 and Statistics and Scientific Computation 375 may not both be counted unless topics vary. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; additional prerequisites may vary with the topic.

### **SDS 378. Introduction to Mathematical Statistics.**

Same as Mathematics 378K. Sampling distributions of statistics, estimation of parameters (confidence intervals, method of moments, maximum likelihood, comparison of estimators using mean square error and efficiency, sufficient statistics), hypothesis tests (p-values, power, likelihood ratio tests), and other topics. Three lecture hours a week for one semester. Only one of the following may be counted: Mathematics 378K, Statistics and Data Sciences 378, Statistics and Scientific Computation 378. Prerequisite: Mathematics 362K with a grade of at least C-.

### **SDS 179R, 279R, 379R, 479R. Undergraduate Research.**

Students work on an individual research project under the supervision of one or more faculty members. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor.

# UTeach-Natural Sciences

## UTeach-Natural Sciences: UTS

### Lower-Division Courses

#### **UTS 101. Secondary Teacher Education Preparation: Step 1.**

Introduction to mathematics, computer science, and science teaching as a career. Discussions include standards-based lesson design and various teaching and behavior management strategies. Fieldwork consists of planning and teaching four inquiry-based lessons to students in grades three to six in local elementary schools. One and one-half class hours a week for one semester; at least ten hours of fieldwork a semester are also required. Chemistry 107 (Topic: STEP1-UTeach) and UTeach-Natural Sciences 101 may not both be counted. Prerequisite: For degree holders, application and admission to the UTeach CNS program.

#### **UTS 110. Secondary Teacher Education Preparation: STEP 2.**

Topics may include routes to teacher certification in mathematics, computer science, and science teaching; various teaching methods that are designed to meet instructional goals; and learner outcomes. Students develop and teach three inquiry-based lessons in their field in a middle school, and participate in peer coaching. One and one-half class hours a week for one semester; at least twenty hours of fieldwork a semester are also required. Biology 101C (Topic: STEP 2) and UTeach-Natural Sciences 110 may not both be counted. Prerequisite: UTeach-Natural Sciences 101 with a grade of at least C-, and a University grade point average of at least 2.20.

### Upper-Division Courses

#### **UTS 350. Knowing and Learning in Math and Science.**

Same as Curriculum and Instruction 365C. Restricted to students in the UTeach-Natural Sciences program. Psychological foundations of learning; problem solving in mathematics and science education utilizing technology; principles of expertise and novice understanding of subject matter; implications of high-stakes testing; and foundations of formative and summative assessment. Three lecture hours a week for one semester; additional hours may be required. Curriculum and Instruction 365C and UTeach-Natural Sciences 350 may not both be counted. Prerequisite: Credit with a grade of at least C- or registration for UTeach-Natural Sciences 101.

#### **UTS 355. Classroom Interactions.**

Same as Curriculum and Instruction 365D. Restricted to students in the UTeach-Natural Sciences program. Principles of delivering effective instruction in various formats (lecture, lab activity, collaborative settings); examination of gender, class, race, and culture in mathematics and science education; overview of policy related to mathematics and science education. Three lecture hours a week for one semester; additional hours may be required. Curriculum and Instruction 365D and UTeach-Natural Sciences 355 may not both be counted. Prerequisite: The following courses with a grade of at least C-: Curriculum and Instruction 365C or UTeach-Natural Sciences 350, and UTeach-Natural Sciences 110; and a University grade point average of at least 2.50.

#### **UTS 360. Project-Based Instruction.**

Same as Curriculum and Instruction 365E. Restricted to students in the UTeach-Natural Sciences program who have earned a passing score on the preliminary portfolio. Foundations of project-based, case-based, and problem-based learning environments; principles of project-based curriculum development in mathematics and science education; classroom management and organization of project-based learning classrooms. Three lecture hours a week for one semester with additional fieldwork hours to be arranged. Curriculum and Instruction 365E and UTeach-Natural Sciences 360 may not both be counted. Prerequisite:

Curriculum and Instruction 365D or UTeach-Natural Sciences 355 with a grade of at least C-, and a University grade point average of at least 2.50.

#### **UTS 170. Student Teaching Seminar.**

Restricted to students in the UTeach-Natural Sciences program who have earned a passing score on the preliminary portfolio. Discussions include student teaching experiences, contemporary critical issues in education, and preparation for the state certification exam. One lecture hour a week for one semester. Chemistry 107 (Topic: Special Topics Seminar) and UTeach-Natural Sciences 170 may not both be counted. Prerequisite: Credit or registration for Curriculum and Instruction 650S, and a University grade point average of at least 2.50.

#### **UTS 675. Student Teaching for Secondary and Middle Grades.**

Closely supervised field coursework in a cooperating school. Experience includes carrying out the duties of a secondary or middle grades teacher. Twenty hours of fieldwork a week for one semester. Offered on the pass/fail basis only. Prerequisite: A University grade point average of at least 2.50, approval of the preliminary portfolio by the College of Natural Sciences UTeach Program, consent of the UTeach adviser in the College of Natural Sciences, and concurrent enrollment in UTeach-Natural Sciences 170.

# School of Nursing

## General Information

### Mission

The purpose of the School of Nursing is to achieve excellence in undergraduate and graduate education, research, public service, and to advance the missions of The University of Texas at Austin through:

1. Preparing students at the baccalaureate level to assume roles in professional nursing practice.
2. Preparing students at the graduate level to assume leadership in practice, education, and research.
3. Promoting excellence in nursing scholarship.
4. Advancing the health of the public through developing and disseminating new knowledge about health, health care, and health care delivery through scholarly inquiry.
5. Providing consultation, health care programs, and health care services in response to emerging and urgent public health needs.

### History

The University of Texas School of Nursing, established in Galveston in 1890 as the John Sealy Hospital Training School for Nurses, is one of the oldest schools of nursing in the Southwest. In 1896 it was transferred to the University of Texas and became the School of Nursing, a division of the Medical Branch, with the diploma granted by the University. In addition to the diploma course, a curriculum leading to the degree of Bachelor of Science in Nursing was established in 1923 in cooperation with the College of Arts and Sciences of the Main University in Austin. In 1932 the School of Nursing was renamed the John Sealy College of Nursing. The degree program was transferred to the college in 1943.

With the financial support of the Texas Graduate Nursing Association, graduate courses in nursing were first offered in 1930 in the Department of Physical and Health Education at the Main University. In 1940, a complete curriculum was established leading to the degree of Bachelor of Science in Nursing Education. In 1945, the curriculum was transferred to the Medical Branch administration, bringing the John Sealy College of Nursing and the new Department of Nursing Education together to form the School of Nursing with its own dean. In 1949, a curriculum leading to the degree of Bachelor of Science in Nursing was established for graduates of diploma programs. The last class of students enrolled in the diploma program was admitted to the School of Nursing in 1957; since that time the school has offered a single program leading to the Bachelor of Science in Nursing.

Funding from the W. K. Kellogg Foundation provided for a program leading to the Master of Science in Nursing with a major in nursing administration, first offered in 1952. Participating in the program of the Southern Regional Education Board for graduate education in nursing, the School of Nursing offered additional specialization in 1955. At that

time the name of the school was changed to the University of Texas Medical Branch School of Nursing.

In the fall of 1960, The University of Texas at Austin became an extension campus of the School of Nursing, which was still located in Galveston, and nursing courses were offered on the Austin campus for the first time. The School of Nursing was reorganized in 1967 as The University of Texas Nursing School (System-wide) and administrative offices were moved to Austin. The school was renamed The University of Texas System School of Nursing in 1972. Junior- and senior-level nursing courses were offered in Austin, El Paso, Fort Worth, Galveston, Houston, and San Antonio.

On March 26, 1976, the Board of Regents of The University of Texas System voted to reorganize the schools of nursing in the system and to place each school under the administration of the president of the health science center or academic institution nearest it. On September 1, 1976, the School of Nursing at Austin became a part of The University of Texas at Austin.

A program leading to the Doctor of Philosophy degree in nursing was initiated in 1974. Nursing faculty members conduct research on a wide variety of topics. Since 2002, the School of Nursing has been ranked among the top institutions in research funding received from the National Institutes of Health.

### Facilities

The 110,008-square-foot, five-story Nursing School building houses administrative, faculty, staff, and research offices, as well as large and small classrooms and seminar and conference rooms. Also located in the building are the Cain Center for Nursing Research, the St. David's Center for Health Promotion and Disease Prevention Research in Underserved Populations, and the School of Nursing Learning Enhancement and Academic Progression Center, with an audiovisual library and a staff who provide technical assistance for clinical simulation and skills, instructional design, and production.

Learning experiences in the health field are numerous and varied. The School of Nursing has ongoing clinical placement agreements with more than two hundred agencies. These include the Austin State Hospital, Dell Children's Medical Center of Central Texas, Dell Seton Medical Center at The University of Texas, and St. David's Medical Center. Other community settings used for student field experiences include nursing homes, neighborhood health centers, day-care centers, state and local health departments, physicians' offices, and clinics, including our Family Wellness Center, and our Children's Wellness Center (located in Del Valle).

### Financial Assistance Available through the School

Application forms for scholarships are available from the Office of Financial Aid (<http://finaid.utexas.edu>) and from the School of Nursing (<http://nursing.utexas.edu/academics/services.html>), 1710 Red River Street, Austin TX 78712. The School of Nursing Scholarship Committee selects the recipients for endowed nursing scholarships. A list of endowed scholarships can be found on the School of Nursing website (<http://nursing.utexas.edu/academics/endowed.html>). Other scholarships are frequently available through the generosity of groups such as the The University of Texas at Austin School of Nursing Alumni Network, area civic organizations, and several nursing student organizations. Information is available in the Office of Student Services ([http://nursing.utexas.edu/academics/services\\_sa.html](http://nursing.utexas.edu/academics/services_sa.html)) each semester.

## Other Financial Aid Programs

### ROTC Nursing Scholarships

To be eligible for an ROTC scholarship, an applicant must be a United States citizen and must be less than 25 years old on June 30 of the calendar year during which commissioning is scheduled.

**Air Force ROTC Nursing Scholarships.** These scholarships provide for payment of tuition and fees and for textbooks and a monthly allowance during the school year. For additional information, contact The University of Texas at Austin, Department of Air Force Science, 1 University Station C3600, Austin TX 78712.

**Army ROTC Nursing Scholarships.** These scholarships provide for payment of tuition and fees, a flat rate for textbooks, and a monthly allowance during the school year. Students must attend the Nursing Advanced Camp during the summer between the junior and senior years and work individually with a licensed BSN preceptor. Students may apply to the dean for independent study credit; applications are considered on a case-by-case basis. For additional information, contact The University of Texas at Austin, Department of Military Science, 1 University Station C3606, Austin TX 78712.

**Navy ROTC Nursing Scholarships.** These scholarships provide for payment of tuition and fees and for textbooks and a monthly allowance during the school year. For additional information, contact The University of Texas at Austin, Department of Naval Science, 1 University Station C3604, Austin TX 78712.

### Vocational Rehabilitation

The Texas Department of Assistive and Rehabilitative Services (DARS) offers assistance in payment of tuition to students who have certain disabling conditions, provided their vocational objectives are approved by a DARS counselor. Services are also available to help students with disabilities find or keep employment. More information is available at <http://www.dars.state.tx.us/drs/vr.shtml>.

## Academic Advising

All nursing students must come to the School of Nursing before registration each semester for academic advising. Individualized academic advising is managed by the academic advisers in the Office of Student Services. In addition, group advising is offered to assist students with clinical schedules and particular requirements of the upcoming semester.

## Student Organizations

Undergraduate students interested in nursing are eligible for membership in The University of Texas Nursing Students Association. Through the association, nursing students are represented on campus committees and in campus activities involving all students. The local association is affiliated with the Texas Nursing Students' Association and the National Student Nurse Association. In addition, students can join the Longhorn Association for Men in Nursing, the African American Nursing Students Association, the Hispanic Nursing Students Association, and the Student Community of Asian Nurses.

Qualified students in the School of Nursing are also eligible for membership in Epsilon Theta Chapter of Sigma Theta Tau International Honor Society of Nursing.

## Admission and Registration

### Admission

#### Admission to the University

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/admission>).

#### Admission to the Professional Sequence in Nursing

Application to the School of Nursing is made concurrently when applying to the University. Acceptance into the School of Nursing is based on (1) the strength of the student's academic background; (2) participation in extracurricular and work activities, especially related to community service and health care; and (3) the quality of the essay.

### Internal Transfer

The University of Texas at Austin students currently enrolled in other departments who want to change majors to nursing must attend a School of Nursing Internal Transfer Information Session ([https://nursing.utexas.edu/academics/ud\\_info.html#internal](https://nursing.utexas.edu/academics/ud_info.html#internal)). To be considered for change of major admission, the student must have completed Chemistry 301, *Principles of Chemistry I*, Statistics and Data Sciences 302, *Data Analysis for the Health Sciences*, and Biology 311C, *Introductory Biology I*. Additionally, students should be on schedule to graduate within four years and have a University grade point average of 3.00. Internal transfer requests may be very competitive, and admission is offered only on a space-available basis. Interested students should consult The University of Texas at Austin policy for Transfer from One Division to Another within the *General Information Catalog* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees/transfer-from-one-division-to-another-within-the-university>), as well as the School of Nursing website (<http://www.nursing.utexas.edu>) for current details about the transfer process and available information sessions.

### External Transfer

All students who wish to transfer to the University from another institution must apply to the University Office of Admissions as described in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/admission>). Transfer students must meet the same requirements as University students seeking admission to the School of Nursing and select nursing as their first choice major. To be considered for transfer admission to the School of Nursing, students must have completed 30 semester hours of transferable coursework and are advised to attend an information session. Transfer admission to the School of Nursing is competitive. Transfer applications are competitively reviewed, and admission is offered on a space-available basis. Since space is limited, applicants are strongly encouraged to indicate a second choice of major in case they are not admitted to the School of Nursing.

A student who wishes to transfer into the upper-division nursing coursework from another nursing school after starting nursing clinical or lab work must make an appointment with the School of Nursing, Office of Student Services ([https://nursing.utexas.edu/academics/services\\_sa.html](https://nursing.utexas.edu/academics/services_sa.html)) for academic advising and transcript review. Students from other nursing schools must consult an adviser in the School of Nursing before applying for admission to the University. In addition to meeting the regular University admission requirements, the student must apply for admission to the School of Nursing. He or she must submit an official transcript from each institution attended, letters of recommendation from faculty members at the previous nursing school, and course information for all completed nursing courses. Requests to

transfer into upper division at the School of Nursing are approved on a limited, space-available basis.

Transfer students must meet the same requirements as University students seeking admission to the professional sequence; however, they are considered for admission to the School of Nursing only if they are admitted to the University.

## Registration

The *General Information Catalog* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees>) gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>), published before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and the *General Information Catalog* are published on the University Registrar's website (<http://registrar.utexas.edu>).

## Academic Policies and Procedures

### Student Responsibility

1. It is the student's responsibility to be informed of general and special notices posted in the School of Nursing building and on the listserv.
2. The student must make arrangements for the completion of all work, including makeup examinations and requirements for removal of conditional and incomplete grades.
3. Because the curriculum is demanding, students are urged to limit work hours while in the program. A student's combined employment and semester-hour load (including clinical laboratory hours) should not exceed 40 hours a week in either a long-session semester or a summer term. During the final month of the last semester of the program, students are enrolled in a full-time preceptorship and are unable to have outside employment.
4. Students may be employed in area hospitals and clinics as nursing assistants, performing functions for which they have been trained by the employing institution and for which the institution has a clearly discernible policy, either in writing or by precedent, defining the scope of these functions. It is illegal for unlicensed students to practice as professional nurses.

Students should be aware that (1) the School of Nursing assumes no responsibility for their activities as employees of an agency; (2) they are personally responsible and liable for any activity they participate in while employed; (3) professional liability insurance purchased by students is valid only in their student role, not in their employment role; (4) individuals who practice illegally may jeopardize their future careers, since those who are convicted of violating the Nurse Practice Act may not be eligible to write state board examinations and subsequently to be licensed.

Students employed in an agency are personally and professionally responsible for engaging only in those activities that fall within their job descriptions as non-licensed workers (such as aides). They have a responsibility to refuse to participate in activities that they have not been legally licensed to perform, such as giving medications and assuming total responsibility for a nursing unit.

5. Students should be familiar with the Student Standards of Conduct given in subchapter 11, Appendix C, "Student Discipline and Conduct," *General Information* (<http://catalog.utexas.edu/general-information/appendices/appendix-c/student-discipline-and-conduct>), as well as

the University Honor Code (<https://www.utexas.edu/about/mission-and-values>) and the School of Nursing Honor Code. Students are expected to read and sign a pledge to abide by the Code of Honor.

## School of Nursing Honor Code

The profession of nursing has a legacy of public respect and trust. We provide specialized care for the health needs of individuals and the community with integrity, honesty, compassion, and state-of-the-art knowledge and skills. Learning and practicing responsible and ethical professional behavior is a vital part of professional education.

As a student in The University of Texas at Austin's School of Nursing, I pledge myself to be honest in all of my student activities including, but not limited to, all of my scholastic work and interactions with patients, members of the community, faculty, and peers. Furthermore, I will not use any substance prior to or during my interaction with patients that could alter my judgment or ability to render safe care: this includes but is not limited to any use of alcohol, illegal drugs, and prescription or over-the-counter drugs that may impair my mental and/or physical abilities required to perform safe patient care. I will disclose to my instructor any violations of the above standards of conduct.

## Standards of Nursing Performance and Progress

### Progression Requirements for Nursing Majors Prior to Nursing Clinical or Lab Courses

Students must maintain a University grade point average of at least 2.80 in required nursing degree coursework prior to taking nursing courses with a clinical or lab component. In addition, students must attain a grade of at least C- in each natural science course. Courses in which the student receives a grade of less than C-, Q, or W must be repeated in residence to resume progression toward completing the degree. Students may not enroll more than twice in any one natural science course (including Q or W) and should take a full academic load of at least 12 semester hours of coursework when repeating a course. For the student to continue in the nursing major, no more than two natural science courses may be repeated. A student may not repeat for credit a course in which a grade of C- or better was awarded.

Students must meet all progression requirements prior to taking nursing courses with a clinical or lab component. Students who do not meet these requirements will not be permitted to continue in the nursing major. Students are advised every semester about the coursework needed to complete the degree in four academic years.

Students are placed on academic probation in the School of Nursing if they receive a grade of D+, D, D-, or F in any nursing or natural science course. Students are subject to dismissal from the nursing major if they receive more than one D+, D, D-, or F during a semester or receive a second D+, D, D-, or F while on academic probation.

### Progression Requirements and Performance Standards for Upper Division Nursing Courses

Patient safety is a critical element in every clinical course. Clinical errors related to patient care, including those near-miss incidents intercepted by the faculty, may interfere with a student's progression in the course and in the program. The standards of performance are described in course syllabi and clinical evaluation tools for clinical practicum courses.

A student must earn a grade of at least C in each nursing course for the course to be counted toward degree requirements. Concurrent or sequential enrollment is required as stated in each course description.

If the student is not on scholastic probation at the University, permission may be granted to repeat a required nursing course in which he or she failed to earn a grade of C or better. To receive credit, the student must repeat the course at The University of Texas at Austin School of Nursing. The semester in which a course is repeated is at the discretion of the dean and is dependent on the space available.

A student may repeat a nursing course only once. If the student does not earn a grade of at least C upon repeating the course, he or she cannot continue in the School of Nursing. If, while repeating the course, the student drops the course or withdraws from the University at a time when the student's performance in the course is considered to be inferior to that required for a grade of C, he or she may not re-enroll in the course or continue in the School of Nursing.

No more than two nursing courses may be repeated.

A student may not repeat for credit a course in which a grade of C or better was awarded.

As a prerequisite to medication administration in clinical nursing courses, students are required to pass a medications and calculations test with a grade of at least 90.

## Compliance Requirements for Clinical Courses

Students must provide documentation confirming completion of compliance requirements prior to participating in clinical nursing courses. Log in to the School of Nursing website (<http://www.nursing.utexas.edu/current>) for more information.

## Medical Clearance Requirements

Clinical experiences for nursing students are provided in hospitals and other health care agencies with which the School of Nursing is affiliated. A number of these facilities require that nursing students assigned to them have evidence of good health and immunity to certain diseases. Students must provide evidence of compliance with immunization requirements before they begin clinical nursing courses. Students must also submit a health certificate completed by a qualified health care provider prior to starting their first clinical rotation.

## Criminal Background Checks

Students are required to submit to the Texas Board of Nursing criminal background checks before beginning the program. Information about the process is available on the School of Nursing Web site. Students with concerns about eligibility are urged to seek official determination from the Texas Board of Nursing (<http://www.bon.state.tx.us>). Further, we urge students with concerns to seek the background check six months in advance of enrollment to allow sufficient time for investigation and Texas Board of Nursing approval.

## Employment Background Check

Agencies in which nursing students are placed for clinical work require an employment background check. Directions to complete this requirement are on the School of Nursing Web site listed with other compliance requirements.

## Drug Screen

Clinical agencies require that a drug screen be completed prior to participating in patient care. Students are to follow directions for the

drug screen shown with the compliance requirements on the School of Nursing website.

## CPR and First Aid Requirements

Current certification in cardiopulmonary resuscitation and first aid are required for participation in clinical nursing courses. The CPR course must be the Basic Life Support for Healthcare Providers and include Automatic External Defibrillator from the American Heart Association. Online courses for CPR are not acceptable. The basic first aid certification must be acquired from the American Heart Association (Heartsaver First Aid) or from a local emergency medical services agency (National Safety Council First Aid). Students must provide evidence of current certification before they begin clinical courses. Students who are registered nurses, licensed vocational nurses, or emergency medical technicians are not required to provide evidence of first aid certification.

## Professional Liability Insurance

Professional liability insurance is required of all students enrolled in the professional sequence in the School of Nursing. Students will be billed through the "What I Owe" system for liability insurance each semester they are participating in clinical courses. All student policies expire on the date of graduation.

## Training Modules

All students must complete the following modules on the School of Nursing Intranet Site (<http://www.nursing.utexas.edu/current>) before participating in clinical nursing coursework: online orientation, facilities training, and training on the Health Insurance Portability and Accountability Act (HIPAA).

## Health and Hospitalization Insurance

Students are required to purchase health insurance. The cost of personal health care, including care required as the result of clinical practicum experiences, is not covered by either the University, the School of Nursing, or clinical agencies. Information about low-cost group health insurance is available through University Health Services (<http://healthyhorns.utexas.edu>). The professional liability insurance students buy as a part of compliance for participating in clinical courses does not cover health care expenses.

## Uniforms and Other Expenses

Students must purchase uniforms, shoes, name badges, and other supplies before taking the first clinical nursing course. Specific requirements and information about suggested equipment are distributed as a part of orientation and will be available in course syllabi.

## Transportation

Upper-division clinical courses require students to go to various clinical facilities and community sites at varied hours. Students must have their own transportation.

## Honors

### University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information*.

## Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#universityhonorstext>).

## Nursing Honors Program

The Nursing Honors Program is designed to enhance the educational experience of high-achieving undergraduate nursing majors by focusing on the development of scholarship. Students must apply to this competitive honors program, which begins in the sophomore year. Admission to the program requires approval of the Honors Program Committee.

Students in the program must complete Nursing 321H, 117H, 264H, and 377H. These courses provide students with enhanced mentorship experiences. Students must complete an honors project with a focus on research, ethics, or leadership. Students are also required to take Nursing 337, *Independent Study* with their mentor with the focus on their honors project. The statement “Special Honors in Nursing” appears on the transcript of each student who completes the honors program.

## Sigma Theta Tau International

Epsilon Theta Chapter of Sigma Theta Tau International Honor Society of Nursing, was chartered at the University on May 16, 1980. Membership in Sigma Theta Tau is an honor conferred by active chapters on students who demonstrate academic excellence and on nursing leaders who advance the scientific base of the profession. The society recognizes superior achievement in many areas, facilitates the development of leadership qualities, fosters high professional standards, encourages creative work, and strengthens commitment to the ideals of nursing.

Each year qualified students in the undergraduate and graduate programs may apply for consideration for membership. Invitations to membership are extended to students who are in the top 35 percent of their graduating class. Undergraduates must have a grade point average of at least 3.00; graduate students must have a grade point average of at least 3.50. Qualified community nursing leaders may also be invited to membership. Applications for membership in Epsilon Theta Chapter are available from the Office of Student Services in the School of Nursing ([https://nursing.utexas.edu/academics/services\\_sa.html](https://nursing.utexas.edu/academics/services_sa.html)).

At the induction ceremony each spring, Epsilon Theta Chapter announces its awards, grants, and scholarship recipients. A scholarship is awarded to an upper-division nursing student who has demonstrated leadership potential and outstanding scholastic achievement. The chapter also awards start-up grants annually to Epsilon Theta Chapter members and/or students to fund research projects.

Sigma Theta Tau International, with active chapters on more than four hundred campuses in the United States and in several other countries, offers opportunities for involvement at the chapter, regional, national, and international levels.

## Credit by Examination

The faculty believes that each educational experience should build on previous achievements to encourage fulfillment of each student’s potential. Therefore, all students and registered nurses are urged to seek advice on arranging a logical sequence of work. The faculty subscribes to the principle that a candidate’s competence should be validated and that credit should be awarded on the basis of satisfactory achievement on examinations as well as in the classroom. Twenty-four of the last 30

semester hours of credit presented for the degree must be earned in residence, rather than by examination, correspondence, or transfer.

An examination for credit may not be taken in a course in which the student is enrolled, which the student has completed, or which the student has dropped with either a passing or a failing grade.

University policies regarding credit by examination are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/testing-and-evaluation-services/#courseplacementandcreditbyexaminationtext>).

## Graduation

### Special Requirements of the School

All students must fulfill the General Requirements (p. 20) for graduation. Students in the School of Nursing must also fulfill the following requirements:

1. All University students must have a grade point average of at least 2.00 to graduate. In the School of Nursing, students must also have a grade point average of at least 2.00 in the coursework used to fulfill the upper-division requirement.
2. A candidate must complete the prescribed curriculum and must meet all other requirements of the School of Nursing.
3. A student must supply the School of Nursing with transcripts of courses taken outside the school as the courses are completed.

### Degree Audit

A degree audit is prepared when the student begins the junior year of nursing courses. The student is then notified of the courses he or she must take and the requirements he or she must fulfill to receive the degree. The degree audit is normally done according to the catalog in effect when the student was admitted to the School of Nursing, but the student may choose to have it done according to any catalog under which he or she is eligible to graduate. Rules on graduation under a particular catalog are given in Graduation Under a Particular Catalog (p. 21).

In advising and in registering students, the dean and advisers try to prevent errors. Avoidance of errors is the main purpose of the degree audit, but it remains the responsibility of the student to fulfill all catalog requirements.

### Graduation Application Form

In the long-session semester or summer session in which the degree is to be awarded, the candidate must be registered at the University and must file a Graduation Application Form in the School of Nursing Office of Student Services. The form must be filed by the deadline to apply for an undergraduate degree, which is given in the official academic calendar (<http://registrar.utexas.edu/calendars>).

### Licensure as a Professional Nurse

Upon graduation from the BSN program, students seeking licensure as a registered nurse must register to take the National Council Licensure Examination (NCLEX). To ensure eligibility, the Texas Board of Nursing will rerun the criminal background check that was conducted prior to beginning the nursing program. In addition, students must meet all of the eligibility requirements for licensure as indicated by the Texas Board of Nursing. To determine eligibility, students should consult the Texas Board of Nursing website (<http://www.bon.state.tx.us>). Students with questions or concerns are encouraged to contact the Board of Nursing

directly prior to enrollment in the nursing program and consult with the Assistant Dean for Student Services at the School of Nursing.

## Degrees and Programs

### Programs in the School of Nursing

The School of Nursing offers an undergraduate program leading to the degree of Bachelor of Science in Nursing and graduate programs leading to the Master of Science in Nursing degree and the Doctor of Philosophy degree with a major in nursing. The undergraduate program is designed for students who wish to enter the profession of nursing. Students who have earned an associate's degree in nursing and wish to obtain the baccalaureate degree may apply as transfer students. The master's and doctoral degree programs are designed to prepare professionals for advanced nursing practice and research in nursing.

The baccalaureate program is accredited by the Commission on Collegiate Nursing Education (CCNE) and the Texas Board of Nursing.

### Objectives of the Bachelor's Degree Program

The graduate of the baccalaureate program in nursing is expected to

1. Demonstrate critical thinking to integrate knowledge from nursing, biological and behavioral sciences, and the humanities in planning, implementing, and evaluating nursing care.
2. Apply critical thinking and clinical judgment within a problem-solving process to meet the health care needs of individuals, families, aggregates, and communities in a variety of settings.
3. Exhibit responsibility and accountability for one's own actions as a health care professional.
4. Participate in the delivery of health care through case management, interprofessional collaboration, delegation, supervision, coordination, and consultation.
5. Participate in nursing and interprofessional efforts to improve the delivery of high-quality, safe and culturally competent health care to diverse individuals, families, aggregates, and communities.
6. Demonstrate core professional values to complement continued personal and professional growth.
7. Practice nursing according to professional and ethical standards.
8. Critically appraise and apply research findings to demonstrate evidence-based nursing practice.
9. Analyze health policy and its effects on diverse individuals, families, aggregates, communities, and health agencies.
10. Integrate information and health care technology in nursing practice, administration, education, and research.
11. Utilize leadership skills to advance the profession of nursing and promote continuous improvement of the health care delivery system.

### Applicability of Certain Courses

#### ROTC Courses

The dean has the authority to substitute an equivalent air force science, military science, or naval science course or courses for a course or courses prescribed by the School of Nursing; core curriculum courses cannot be substituted. The dean can also make adjustments to compensate for any differences in semester hour value. The total number of semester hours required for the degree remains unchanged.

### Correspondence and Extension Courses

Credit earned by correspondence or extension from the University or elsewhere will be counted toward a Bachelor of Science in Nursing

degree if approved by either the assistant dean for student services or the assistant dean for undergraduate programs. A student planning to meet pre-professional course requirements with correspondence or extension courses should consult the Office of Student Services to ensure enrollment in appropriate courses. Credit for professional sequence courses may not be earned by correspondence or extension.

## Bachelor of Science in Nursing

This program consists of 125 to 126 semester hours of coursework. All students must complete the University's Core Curriculum (p. 23). In some cases, a course that is required for the Bachelor of Science in Nursing may also be used to fulfill a requirement of the core curriculum. In order to meet prerequisites, students must take most of the nursing courses in a specific sequence. Upon completion of the program, students are awarded the Bachelor of Science in Nursing degree and have fulfilled the prescribed course of study and clinical practice required to take the National Council Licensure Examination (NCLEX) for licensure as a registered nurse.

### Foreign Language Requirement

Students may fulfill the foreign language component of the University's basic education requirements by completing two years of a single foreign language in high school, by earning an appropriate score on one of the placement examinations administered by the University, or by completing two semesters of college coursework in a single foreign language in addition to the degree requirements given below. If the foreign language requirement will be fulfilled by transfer credit, credit by examination, or extension or correspondence courses, it must be fulfilled before the first semester of the student's senior year. Nursing 354 may not be counted toward the foreign language requirement. For students who take college coursework to complete the foreign language requirement, Spanish is recommended.

### Flag Requirements

In the process of fulfilling the requirements for the Bachelor of Science in Nursing degree, students must fulfill flag requirements. Students must earn credit for one flag in ethics, one flag in global cultures, one flag in cultural diversity, one flag in independent inquiry, one flag in quantitative reasoning, and three flags in writing.

Courses with flags are identified in the *Course Schedule*. For additional information about flag requirements, see Additional Basic Education Requirements (p. 23).

### Suggested Arrangement of Courses

First Year					
First Term	Hours	Second Term	Hours	Summer Term	Hours
RHE 306	3	BIO 311C	3	GOV 310L	3
CH 301	3	NTR 306	3	American History Core Course	3
SDS 302	3	E 316L, 316M, 316N, or 316P	3		
UGS 302 or 303	3	PSY 301	3

N 250	2	N 279P	2
15		14	

Total credit hours: 125-126

## Courses

The faculty has approval to offer the following courses in the academic years 2018–2019 and 2019–2020; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/credit-value-and-course-numbers>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

## Nursing: N

### Lower-Division Courses

#### N 107, 207, 307. Topics in Nursing.

One, two, or three lecture hours a week for one semester, with one discussion hour a week if required by the topic. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 1: Women's Reproductive Health for Nonscience Majors.** Same as Sociology 310S and Women's and Gender Studies 301 (Topic 7). Overview of contemporary women's reproductive health issues, with emphasis on historical, physiological, psychosocial, and cultural influences that affect the reproductive health of women during adolescence, the childbearing years, and midlife. Three lecture hours a week for one semester. Only one of the following may be counted: Nursing 307 (Topic 1), Sociology 308 (Topic 2), 310S, Women's and Gender Studies 301 (Topic 7). Prerequisite: One year of high school biology, or Biology 301L or 309D.

#### N 309. Global Health.

Overview of global health, with emphasis on the determinants of health, health indicators, human rights, globalization, current socioeconomic factors, health care systems, and public health systems. Three lecture hours a week for one semester.

#### N 310. Communication in Health Care Settings.

Introduction to theories and models of communication in relation to health care; basic factors affecting interpersonal communication in health care settings. Three lecture hours a week for one semester. Required for nursing majors.

#### N 117H. Introduction to Nursing Scholarship: Honors Seminar.

Introduction to the nature of nursing scholarship, along with related research and clinical and educational career opportunities. Topics include leadership, research, and ethics as they relate to nursing. One lecture hour a week for one semester. Prerequisite: Admission to the School of Nursing Honors Program.

#### N 119, 219, 319, 419, 519, 619. International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Nursing 119, 219, 319, 419, 519, 619 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

## Upper-Division Courses

#### N 320. Introduction into Patient-Centered Nursing Care.

Examines the profession of nursing and introduces the concept of nursing process as a framework for patient-centered care of younger and older adults. Special emphasis will be placed on topics that apply to the bio-psycho-social-spiritual needs of the aging adult. Three lecture hours a week for one semester. Nursing 227 and 320 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Biology 326M, 446L, Nutrition 306, Psychology 301; credit or registration for Biology 365S and 165U.

#### N 321. Ethics of Health Care.

Examination of ethical issues of health care and related legal concerns; contradictions, inconsistencies, and competing views that lead to dilemmas in health care. Three lecture hours a week for one semester. Nursing 321 and 321H may not both be counted. Prerequisite: Rhetoric and Writing 306.

#### N 321H. Ethics of Health Care: Honors.

Ethical issues in health care and related legal concerns; contradictions, inconsistencies, and competing views that lead to dilemmas in health care. Emphasis on resolving ethical dilemmas through ethical reasoning and ethical obligations in health professional-patient relationships; and just allocation of scarce health care resources. Three lecture hours a week for one semester. Nursing 321 and 321H may not both be counted. Prerequisite: Admission to the School of Nursing Honors Program, or consent of instructor.

#### N 322. Transition to Professional Nursing.

Restricted to students in the RN-BSN accelerated track. Designed to provide the RN student with a transition into the baccalaureate and professional nursing roles. Explores professional socialization in the work and education settings; develops professional career goals and career plans; and includes discussion of role transition in nursing practice, with attention to expanded and advanced nursing practice

roles. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **N 223, 323. Genetics in Health Care.**

The integration of genetic information into nursing practice, including ethical, legal, psychological, and social issues. For each semester hour of credit earned, one lecture hour a week for one semester. Nursing 223 and 323 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Nursing 325 or consent of instructor.

### **N 224. Health Assessment Skills.**

Discussion, application, and documentation of health assessment skills needed to provide data for health promotion and nursing interventions. One and one-half lecture hours and one laboratory hour a week for one semester. Offered on the letter-grade basis only. Prerequisite: Biology 326M, 446L and Nursing 310; credit or registration for Nursing 320.

### **N 325. Adult Health Nursing I.**

Discussion of the concepts necessary to promote and restore the health of adults with biological problems; related physiological and psychological responses. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Biology 365S and 165U, Nursing 320, 224, and 127P.

### **N 325P. Adult Health Nursing I (Practicum).**

For nursing majors admitted to the professional sequence. Application of the concepts and theories necessary to promote and restore health of adults with biological problems; related physiological and psychological responses. Nine laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Nursing 325.

### **N 227. Conceptual Bases of Aging.**

An examination of the theories of aging, the developmental tasks of families, and the physical, psychological, social, economic, ethical, legal, and spiritual needs of aging persons. Responsibilities and needs of caregivers. Two lecture hours a week for one semester. Nursing 320 and 227 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Consent of instructor.

### **N 127P. Clinical Nursing Skills I (Practicum).**

Laboratory instruction and practice in clinical nursing skills. Two laboratory hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Biology 326M and 446L; concurrent enrollment in Nursing 320.

### **N 129M, 229M, 329M, 429M, 529M, 629M. International Learning Seminars.**

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Nursing 129M, 229M, 329M, 429M, 529M, 629M and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

### **N 137, 237, 337. Independent Study.**

Study in a specific area; topic and mode of study are agreed upon by student(s) and instructor. The equivalent of one, two, or three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: A University grade point average of at least 2.80 and consent of instructor.

### **N 338. Complementary and Alternative Medicine in Health Care.**

Overview of representative Complementary and Alternative Medicine (CAM) modalities and their role in shaping an emerging wellness-oriented, patient-centered model of care. Evaluation of current research evidence of CAM therapies in four domains: mind-body medicine, biologically based practices, manipulative and body-centered therapies, and energy medicine. Includes a hands-on experiential component for familiarization of some fundamental CAM concepts. Three lecture hours a week for one semester. Nursing 347 (Topic: COMPL/ALTERN MED IN HLTH CARE) and Nursing 338 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

### **N 147, 247, 347. Specialized Topics in Nursing.**

The equivalent of one, two, or three lecture hours a week for one semester; some topics require up to thirty-nine hours of fieldwork a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Enrollment in the upper-division sequence; some topics also require consent of instructor.

**Topic 1: Informatics in Health Care and Nursing.**

**Topic 2: Acute Care Pediatrics.**

**Topic 3: Cardiovascular Nursing.**

**Topic 4: Childbearing Nursing Elective.**

**Topic 5: Critical Care Nursing.**

**Topic 6: High-Risk Maternity.**

**Topic 7: Pediatrics.**

**Topic 8: Perioperative Nursing.**

**Topic 9: Special Topics in Pediatrics.**

**Topic 10: Child Wellness Center (Practicum).**

**Topic 11: Children with Chronic Illness in the Community.**

**Topic 12: Clinical Nursing Preceptorship.**

**Topic 13: Community-Oriented Ambulatory Nursing.**

**Topic 14: Genetics in Clinical Nursing (Practicum).**

**Topic 15: Home Health Nursing.**

**Topic 16: Pediatrics in the Community.**

**Topic 17: Well Children in the Community.**

### **N 250. Interprofessional Collaborative Practice.**

Focuses on developing the competencies needed for interprofessional collaborative practice among health care professionals. Core interprofessional competencies addressed include: values and ethics for interprofessional practice; knowledge of roles and responsibilities of different health professions; interprofessional communication; and teams and teamwork. Two lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Nursing 310; credit or registration for Nursing 320, and 321 or 321H, or consent of instructor.

### **N 354. Spanish for Health Care Professionals.**

Basic medical Spanish language skills and phrases related to assessment and nursing activities. Focus on the cultural values of Latino patients who seek health care in the United States. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

### **N 455. Adult Health Nursing II.**

Advanced concepts and theories to promote and restore health of adults with biological problems and related physiological and psychological responses. Four lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Nursing 325 and 325P.

### **N 255C. Adult Health Nursing IIA.**

First of a two-part sequence in adult health nursing. Advanced concepts and theories to promote and restore health of adults with biological problems and related physiological and psychological responses. Two lecture hours a week for one semester. Nursing 455 and 255C may not

both be counted. Offered on the letter-grade basis only. Prerequisite: Nursing 325 and 325P.

### **N 255D. Adult Health Nursing IIB.**

Second part of a two-part sequence in adult health nursing. Advanced concepts and theories to promote and restore health of adults with biological problems and related physiological and psychological responses. Two lecture hours a week for one semester. Nursing 455 and 255D may not both be counted. Offered on the letter-grade basis only. Prerequisite: Nursing 255C.

### **N 355P. Adult Health Nursing II (Practicum).**

Application of advanced concepts and theories to promote and restore health of adults with biological problems and their related physiological and psychological responses. Nine laboratory hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Nursing 325P and Pharmacy 338; credit or registration for Nursing 157P and 455 or 255D.

### **N 356. Mental Health Nursing across the Life Span.**

Biological, environmental, cultural, and interpersonal factors predisposing individuals across the life span to mental health problems. The course is organized around the nursing process, as well as multidisciplinary therapeutic modalities, that assist the individual and family to adapt, recover, and grow through these problems. Current relevant research, and the sociocultural, legal, and ethical implications of providing nursing care to the mentally ill. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Nursing 224; credit or registration for Human Development and Family Sciences 313 and 113L or Psychology 304 and Nursing 325.

### **N 256P, 356P. Problems in Mental Health Nursing (Practicum).**

Application of strategies for the care of individuals, groups, and families experiencing mental health problems. For 256P, six laboratory hours a week for one semester; for 356P, nine laboratory hours a week for one semester. Nursing 256P and 356P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Nursing 356.

### **N 157P. Clinical Nursing Skills II Practicum.**

Laboratory instruction and practice in clinical nursing skills. Two laboratory hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Nursing 325P.

### **N 264. Nursing Research.**

Basic components of the research process; interpreting descriptive and inferential statistics in research. Critical examination of research studies in nursing. Two lecture hours a week for one semester. Nursing 264 and 264H may not both be counted. Prerequisite: Introductory statistics course (such as Statistics and Data Sciences 302) and Nursing 320, or consent of instructor.

### **N 264H. Nursing Research: Honors.**

Examination of the research process and methods, along with interpretation of descriptive and inferential statistics in research. Critical examination of research studies in nursing and research skills through participation in a research project. One and one-half lecture hours and one laboratory hour a week for one semester. Nursing 264 and 264H may not both be counted. Prerequisite: Admission to the School of Nursing Honors Program and an introductory statistics course, or consent of instructor.

### **N 265. Nursing Care of Childbearing Families.**

Concepts, theories, and processes essential to understanding the health concerns and problems of women and their families during the childbearing years. Two lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Nursing 325, 325P, 356, and 256P or 356P; credit or registration in Nursing 157P and 455 or 255C.

### **N 365P. Nursing Care of Childbearing Families Practicum.**

The application of concepts, theories, and processes pertinent to care of women and their families during the childbearing years. Nine laboratory hours a week for one semester. Prerequisite: Credit or registration for Nursing 265.

### **N 266. Nursing Care of Children and Their Families.**

Concepts, theories, and developmental processes essential to the health concerns and problems of children, adolescents, and their families. Two lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Human Development and Family Sciences 313 and 113L or Psychology 304, Nursing 356, 356P or 256P, Pharmacy 338; and credit or registration in Nursing 355P and 255D or 455.

### **N 366P. Nursing Care of Children and Their Families Practicum.**

Application of concepts, theories, and developmental processes essential to the health concerns and problems of children, adolescents, and their families. Nine laboratory hours a week for one semester. Prerequisite: Nursing 157P; credit or registration for Nursing 266.

### **N 371. Disability over the Life Course.**

An interdisciplinary introduction to the study of disability as a distinct social and clinical concept with practical and theoretical implications for health care. Focus on the changing needs of persons with disabilities over the life course. Explores how to understand the health needs of persons with disabilities and how to work with them and their families so they may negotiate environments with appropriate accommodations that meet their health care needs. Three lecture hours a week for one semester. Nursing 347 (Topic: DISABILITY OVER THE LIFE COURSE) and Nursing 371 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

### **N 273. Quality and Safety for Nursing Practice.**

Designed to prepare students for professional nursing practice. Provides opportunities for synthesis of theoretical, evidence-based, and clinical knowledge with emphasis on quality care and patient safety. Two lecture hours a week for one semester. Nursing 273 and 278 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Nursing 321 or 321H and credit or registration in Nursing 264, or consent of instructor.

### **N 274. Complex Nursing Care.**

Addresses the management of complex and critical needs of patients and their families across the continua of care. The focus will be on people with multiple chronic conditions experienced by various populations such as age groups, disease/health conditions, and settings. In addition, transitional care, critical care concepts, palliative, and end-of-life care will be explored. Two lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Nursing 255D, 455, 355P, 266, 366P; credit or registration in Nursing 277P.

### **N 275. Public Health Nursing.**

Presents public health nursing concepts, theories, and processes used in health promotion, disease or injury prevention, health protection, and risk reduction with individuals, families, groups, communities, and populations. Two lecture hours a week for one semester. Offered on the

letter-grade basis only. Prerequisite: Nursing 455 or 255D, 355P, 356, 256P or 356P, 265, and 266; or consent of instructor.

**N 375P. Public Health Nursing Practicum.**

Application of public health nursing concepts, theories, and processes used in health promotion, disease or injury prevention, health protection, and risk reduction with individuals, families, groups, communities, and populations. Nine laboratory hours a week for one semester.

Prerequisite: Credit or registration for Nursing 275.

**N 377. Leadership and Management of Nursing Care.**

Selected concepts and theories of management in the context of the delivery of dynamic nursing care. Use of management concepts in working with a health care team to provide high-quality patient care. Historical development of the health care system, current issues, contemporary trends, standards of professional practice, management and leadership roles, political and cultural influences on health care, and professional career development. Three lecture hours a week for one semester. Nursing 377 and 377H may not both be counted. Prerequisite: Nursing 325 or consent of instructor.

**N 377H. Leadership and Management of Nursing Care: Honors.**

Examination of selected concepts and theories of management and leadership in the context of the delivery of dynamic nursing care. The use of management concepts in working with a health care team to provide high-quality patient care. Current economic, social, and political factors that influence health care. Three lecture hours a week for one semester. Nursing 377 and 377H may not both be counted. Prerequisite: Admission to the School of Nursing Honors Program or consent of instructor.

**N 277P, 377P. Clinical Care Management Practicum.**

Application of selected concepts and theories of management in the planning and delivery of health care. For 277P, six laboratory hours a week for one semester; for 377P, nine laboratory hours a week for one semester. Nursing 277P and 377P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Nursing 265, 365P, 266, and 366P; and credit or registration in Nursing 377 or 377H.

**N 279P. Capstone Preceptorship.**

Designed to provide students with clinical experiences similar to those that confront newly employed registered nurses. Focuses on the role transformation of students and on clinical competence in communication, collaboration, negotiation, delegation, coordination, and evaluation of interdisciplinary work. Thirty to forty hours a week for three to four weeks for a total of 120 clinical hours. Additional preparation time to assure clinical competence may be required. Offered on the pass/fail basis only. Prerequisite: Nursing 377 or 377H, and 277P or 377P.

# College of Pharmacy

---

M. Lynn Crismon, PharmD, *Dean*  
W. Renee Acosta, MS, *Associate Dean*  
Diane B. Ginsburg, PhD, *Associate Dean*  
John H. Richburg, PhD, *Associate Dean*  
Bryson M. Duhon, PharmD, *Assistant Dean*  
Jennifer L. Ridings-Myhra, M Ed, *Assistant Dean*

## General Information

### Accreditation

The College of Pharmacy has been a member of the American Association of Colleges of Pharmacy since 1927. The Doctor of Pharmacy degree program is accredited by the Accreditation Council for Pharmacy Education (ACPE); ACPE does not accredit master's and Ph.D. degrees in pharmacy.

### Mission

The University offers a four year Doctor of Pharmacy (Pharm.D.) as the sole entry-level, professional degree for the practice of pharmacy. Competitive admission to the program occurs after the completion of a series of required prepharmacy courses. This program offers a course of study in the biomedical, pharmaceutical, clinical, and social and behavioral sciences designed to provide the state and the nation with pharmacists who are scientifically educated and clinically competent to deliver a full spectrum of pharmaceutical services in all areas of practice. In meeting its teaching obligation, the college provides a curriculum and faculty that offer students an educational experience beyond training solely for the practice of pharmacy.

The profession of pharmacy has evolved from a role primarily in distribution of medication toward a patient-centered care model. The patient-centered care model is a process through which a pharmacist interacts with the patient and other health care professionals collaboratively in the collection, assessment, planning, implementation, and follow-up of a patient-specific therapeutic plan that will produce the desired therapeutic outcomes. To ensure that graduates have the necessary tools to practice in this complex, patient-centered environment, the pharmacy curriculum has evolved from traditional discipline-specific coursework to a discipline-integrated approach of disease state management and a case-based, team approach to the design of the patient-specific therapeutic plan that includes interprofessional collaborative practice.

The professional curriculum is designed to prepare pharmacy graduates to provide patient-centered pharmaceutical care in a contemporary interprofessional collaborative practice setting, whether a community pharmacy, an ambulatory clinic, a hospital, managed care, or a long-term care facility, as well as to work in the pharmaceutical industry. In addition, the curriculum aims to inculcate an understanding of the basic sciences sufficient to prepare the student for graduate study in the pharmaceutical sciences or post Pharm.D. residency training. These objectives are pursued through a balanced program of study in pharmaceuticals, medicinal chemistry, pharmacology, therapeutics, pharmacy administration, social and behavioral sciences, and the humanities, as well as a structured clinical and professional practice experiential program. The holder of a professional degree from The University of Texas at Austin has received an education and training as sophisticated as any available in the health professions.

The College of Pharmacy has conducted a joint Pharm.D. degree program with the University of Texas Health Science Center at San Antonio since 1974. Students who complete their P3 and P4 experiential courses at the Health Science Center are considered part of this program and receive a degree awarded jointly by the two institutions.

The college has educational affiliations with several other academic health institutions, health-systems, and pharmacy organizations through its five Texas regional internship areas - Austin/Temple/Waco, Dallas/Ft. Worth, Houston/Galveston, the Rio Grande Valley, and San Antonio.

The college seeks to encourage the belief that education is ongoing and lifelong and that all levels of professional education must form a continuum with professional practice and patient care. To meet this objective, the college provides postgraduate educational programs and develops innovative programs of training through continuing education for the roles pharmacists may be called on to fill as a result of changes in the patterns of delivery of pharmaceutical services.

In addition to the Pharm.D. degree, the University offers the Master of Science in the Pharmaceutical Sciences, and the Doctor of Philosophy (Ph.D.) with a major in the Pharmaceutical Sciences. The College of Pharmacy also participates in interdisciplinary Ph.D. programs in Cellular and Molecular Biology and in Neuroscience. In collaboration with The University of Texas Health Science Center at San Antonio and The University of Texas at San Antonio, the College offers an interinstitutional Ph.D. program with a major in Translational Science. These programs are described in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/pharmacy/pharmacy>).

### History

For more than a century, the University's College of Pharmacy has provided education and training for men and women as pharmacy practitioners, scientists, professional leaders, and responsible citizens. Eleven students constituted the first class when a school of pharmacy was created in the fall of 1893 at the University of Texas Medical Branch at Galveston. In 1927, the program was reorganized as the College of Pharmacy and moved to the Austin campus. The college shared quarters with other University programs until 1952, when the first pharmacy building was opened. Instruction now takes place in facilities designed for the pharmacy program and located near the center of the Austin campus, and on the campus of the University of Texas Health Science Center at San Antonio.

The first undergraduate program consisted of two sessions, each seven months in length. The current Pharm.D. degree program requires six years in pre-professional subjects, biomedical and pharmaceutical sciences, and professional experience courses. Graduate study became available in 1948 with the institution of a Master of Science in Pharmacy degree program. Today programs are also available that lead to the Doctor of Philosophy in the pharmaceutical, administrative, and clinical sciences. More than 8,000 students have graduated from the programs offered by the college; many have achieved state, national, and international prominence in pharmacy or in related health fields.

Academic leadership for pharmaceutical education at the University has been provided by eleven prominent educators, beginning with James Kennedy of San Antonio, who was appointed as a pharmacy professor and director of the Galveston program in 1893. He was succeeded by R. R. D. Cline, who for almost thirty years guided pharmaceutical education in Texas. When the school was moved to Austin in 1927, W. F. Gidley was named the first dean of the college. In 1947, Henry M. Burlage succeeded Professor Gidley as dean. He was succeeded in 1962 by Lee F. Worrell, who served until 1966. Carl C. Albers was acting dean until Joseph B. Sprowls was appointed dean in 1967. William J. Sheffield became acting dean upon the death of Professor Sprowls in 1971. He was succeeded in

1973 by James T. Doluisio, who served the college for 25 years. Steven Leslie served as dean from 1998 until 2007, when M. Lynn Crismon assumed the leadership of the college.

University pharmacy students receive instruction in the basic biomedical sciences, the pharmaceutical sciences, pharmacy administration, and pharmacy practice in state-of-the-art academic and health care facilities. Pharmacy interns expand their professional practice knowledge and skills at clinical education sites in the Austin/Temple/Waco area, University of Texas Health Science Center at San Antonio, the University of Texas Southwestern Medical Center at Dallas, the Texas Medical Center in Houston, and The University of Texas Medical Branch at Galveston.

## Facilities

### The Pharmacy Building

In addition to well-equipped classrooms, laboratories, and offices, the pharmacy building provides a learning resource center, a television production laboratory and classrooms, and pharmaceutical technology laboratories with facilities for product development, pilot manufacturing, sterile production and quality control, and stability testing. The University Health Services Pharmacy also serves as a teaching laboratory for second-year pharmacy students while providing comprehensive pharmaceutical services to the student community. Space assigned to the college in the Biomedical Engineering Building and the Dell Pediatric Research Institute expands pharmacology, medicinal chemistry, and pharmaceuticals research space.

### Pharmacy Facilities in San Antonio

The University of Texas Health Science Center at San Antonio has provided facilities for the education and training of pharmacy students, residents, and fellows since 1972. The McDermott Clinical Sciences Building on the Health Science Center campus, which houses the pharmacotherapy division of the college and the Pharmacotherapy Education and Research Center, provides a state-of-the-art distance education classroom, a student computer laboratory, research laboratories, and offices for faculty and staff members. The Division of Pharmacotherapy maintains a broad range of affiliation agreements with institutions in San Antonio that provide extensive training opportunities in a variety of practice settings. Research opportunities exist in the areas of infectious disease, oncology, anticoagulation, stroke prevention, and psychiatry.

### Office of Pharmacy Continuing Education

As part of a state university, the College of Pharmacy recognizes obligations to the profession of pharmacy on a state, national, and international level. The college began providing continuing education to pharmacists in 1953 in cooperation with the University's Division of Extension (<http://www.utexas.edu/ce/uex>). Today, the college is an ACPE-approved provider of continuing pharmaceutical education. A primary goal of the Office of Pharmacy Continuing Education is to advance the pharmacist's knowledge and provide the skills necessary to adapt to a changing practice. Toward this end, the office offers a variety of programs, including home-study courses, seminars, multiday conferences, and certificate programs addressing the most current practice issues. Programs are conducted both on and off campus and by correspondence and distance learning. Annually, the office provides about 350 contact hours of continuing education programming to more than 6,500 pharmacists across the United States.

### Learning Resource Center

The college's Learning Resource Center (<http://sites.utexas.edu/phr-lrc>) (LRC) offers a variety of instructional resources to students

and faculty members. The LRC provides state-of-the-art digital video teleconferencing transmission of courses among the Austin campus, the Health Science Center at San Antonio, and other sites in the University of Texas System, so that faculty members can teach students at two or more locations simultaneously. Most courses are recorded and made available by video streaming. The LRC also operates the Delgado Library, a multipurpose, nontraditional facility with individual and small-group study spaces, and seminar rooms.

The staff of the LRC provides faculty members and students with computer hardware and software consulting as well as advice on the use of media in the classroom. Facilities and equipment are available for video and data projection. The College of Pharmacy's website (<http://www.utexas.edu/pharmacy>) provides additional information and curriculum support for students and faculty members.

The electronic classrooms feature desktop computers with projection equipment and a full suite of software. The large distance-learning classroom supports notebook computer ports. Wireless high-speed Internet is available throughout the Pharmacy Building.

The goal of the Learning Resource Center is to provide the highest quality learning technology infrastructure and support services to students and faculty members.

## Libraries

The Life Science Library supports the teaching and research missions of the College of Pharmacy by providing access to an extensive array of print and electronic information resources. The library maintains extensive holdings in pharmacology, pharmaceuticals, pharmacy administration, and medicinal chemistry, with supporting materials in medicine and nutrition. Biochemistry and medicinal chemistry material is complemented by the collections of the Mallet Chemistry Library. Medical material is supplemented by additional material in nursing, pediatrics, and psychiatry at the Perry-Castañeda Library. Extensive collections in the social sciences and business provide additional support for the interdisciplinary interests of health outcomes and pharmacy practice. Current journal holdings are primarily online, while books are acquired in print or digitally as eBooks.

The online Clinical Information Center (CliniC), sponsored by the Life Science Library, provides electronic access to the complete resources of a drug information center. The center gives users access to significant electronic resources such as Micromedex, Access Pharmacy, PharmacyLibrary, AHFS Drug Information, Clinical Pharmacology online, Drug Facts & Comparisons, LexiComp online, and the Cochrane Library of evidence-based reviews, in addition to databases such as Medline, International Pharmaceutical Abstracts, Web of Science, and SciFinder Scholar. These electronic resources are available for remote access through the University Libraries website (<http://www.lib.utexas.edu>), which offers a full range of databases, access to electronic journals, and links to other digital information sources. The libraries collaborate with the College of Pharmacy to select and integrate electronic resources into the pharmacy curriculum. Access to print information resources for students on rotation and at the College of Pharmacy Cooperative Program campus is provided through the University Libraries InterLibrary Services.

All units of the University Libraries offer reference service, circulation and reserve services, and interlibrary loan. Instruction in the use of information resources is provided in required pharmacy classes and by individual consultation.

## Financial Assistance Available through the College

Students entering the first year of the professional curriculum may be eligible for certain college-based scholarships, and information is provided to students regarding these scholarships upon matriculation. Students who have completed the first year of the professional curriculum are eligible to apply for all scholarships and loans offered through the College of Pharmacy. Eligibility and application information is available at <http://pharmacy.utexas.edu/students/financial-aid/> and in the Office of Student Affairs, Pharmacy Building 5.112.

Scholarship opportunities with the College of Pharmacy include Endowed Presidential Scholarships with a minimum of \$2,500, and other endowed scholarships with a minimum of \$1,500. Students must meet eligibility requirements, and in some cases additional criteria, to be awarded these scholarships. Additional college scholarships are funded by various pharmacy associations, individuals, employers, and organizations. These scholarships are awarded, as they become available, through The University of Texas College of Pharmacy at the direction of the college's Financial Aid Committee.

## Loan Funds

### The Klinck Family Loan Funds

These loan funds were established by the Klinck family of McAllen, Texas, to assist students in need of financial assistance. Emergency loans, for a maximum of \$1000 are available; they normally are repayable within 90 days. Long-term loans of up to \$2,500 are available to pharmacy students who demonstrate financial need. The interest rate for these loans is six percent. Repayment begins three months after the student's graduation from pharmacy school, or once the student is no longer enrolled in the pharmacy program. Students may apply for more than one loan, but except in unusual circumstances the loans will total no more than \$5,000. Additional information is available in the Office of Student Affairs, Pharmacy Building 5.112.

### Other Loan Funds

Other loan funds may be available to pharmacy students. Information about these loans is available from the Office of Student Affairs, Pharmacy Building 5.112.

## Student Services

### Academic Advising

Academic and career advising are ongoing activities of the Office of Student Affairs, Pharmacy Building 5.112. Because advising is not restricted to the time just before registration, all students are strongly encouraged to seek advice whenever they need it about degree requirements, the availability of course offerings each semester, and taking courses in proper sequence.

Advising for pre-pharmacy students at the University is provided by assigned academic advisers in their colleges and by the Health Professions Office in the College of Natural Sciences. University students interested in the profession of pharmacy should contact their office early in their college careers.

Pre-pharmacy students from outside the University should seek information from our College of Pharmacy website (<http://www.utexas.edu/pharmacy>), from their institutional academic advisers or Health Professions Office, and from an admissions representative from the College of Pharmacy.

## Career Services

The college provides career counseling to students in the professional sequence of courses. Throughout the year, staff is available in the Office of Student Affairs to assist students in examining the career options available to them upon graduation.

In addition, a systematic exploration of professional career options is conducted as part of the foundations for professional development series of courses. Guest lecturers include successful pharmacists representing a variety of pharmacy practice models, other health care and regulatory settings, and careers in professional organizations, education, research, and the pharmaceutical industry.

The College of Pharmacy, under the supervision of the assistant dean for student success, conducts a P4 senior interview day for graduating seniors. This event gives seniors an opportunity to interview for professional practice positions with major employers of pharmacists in Texas and throughout the nation. A workshop including mock interviews is conducted to prepare students for interviews and is held prior to the P4 senior interview day as a part of Senior Conference. A college-wide Career Day each fall, featuring major employers, allows students in all years of the curriculum to interact with numerous pharmacist employers and explore practice opportunities.

The college also facilitates interaction between employers and professional students interested in obtaining competitive internships. More information on this process is provided to all students during the first professional year.

A limited number of competitive internships both in and outside of Texas are available by application only. Information is available in the Office of Student Affairs, Pharmacy Building 5.112; from individual faculty members; and via the student's own internship search.

As a complement to the assistance available from the college, the University's Vick Center for Strategic Advising and Career Counseling in the School of Undergraduate Studies provides comprehensive career services to all students. The center offers professional assistance to students in choosing or changing their majors or careers, seeking an internship, and planning for a job search or graduate study.

The University makes no promise to secure employment for each graduate.

## Student Organizations

### American Association of Pharmaceutical Sciences (AAPS)

The University of Texas at Austin Student Chapter of AAPS was initiated in 2003 with the primary goal of increasing awareness of educational and career opportunities in the pharmaceutical sciences among The University of Texas at Austin College of Pharmacy students. The organization fosters participation at the national AAPS Annual Meeting and Exposition.

### American Pharmaceutical Association Academy of Students of Pharmacy (UT-APhA-ASP)

In December, 1951, the Longhorn Pharmaceutical Association was organized as an association jointly representing the student branches of the American Pharmaceutical Association and the Texas Pharmaceutical Association. Renamed in 1998, the association sponsors service projects and social events and serves to develop professionalism in pharmacy students.

## **Asian Pharmacy Students Association (APSA)**

The mission of the Asian Pharmacy Students Association, established at the University in 1999, is to promote unity among pharmacy students who have common interests, values, and backgrounds, in order to help them achieve educational, professional, and personal excellence.

## **Christian Pharmacists Fellowship International (CPFI)**

This group seeks to identify and enroll all Christian pharmacists, wherever they practice, and to assist them in creating opportunities for fellowship. CPFI is the first international organization of evangelical Christian pharmacists established with a focus on integrating the spiritual and vocational dimensions of the pharmacist's role.

## **Kappa Epsilon (KE)**

Kappa Epsilon is a national professional fraternity established to promote careers for women in pharmacy, but membership is open to women and men. Xi chapter, established in 1943, sponsors service and professional projects, including a focus on breast cancer awareness, poison prevention working with elementary schools, as well as social events and other extracurricular activities.

## **Hispanic Association of Pharmacists (HAP)**

The primary goals of the Hispanic Association of Pharmacists are to assist in the recruitment and retention of qualified students in the College of Pharmacy, to provide health care education to the community, and to maintain open communication channels between students and the college. Membership is open to prepharmacy and professional students.

## **Pharmacy Council**

The Pharmacy Council is composed of officers and representatives of the sponsored student organizations in the College of Pharmacy and elected student representatives from each of the professional pharmacy classes. The president, financial director, and senate representative of the council are also members of the Senate of College Councils, and a member of the council serves as the college's representative to Student Government. Acting as liaison between the student body and the Office of the Dean, the Pharmacy Council works to ensure the equitable consideration of student concerns and problems. The council sponsors orientation programs for new pharmacy students, college and University-wide programs, events that promote student and faculty interaction, and community service activities for medically underserved citizens throughout the state.

## **Pharmacy Graduate Students' Association (PGSA)**

This association conducts activities that promote the general welfare of pharmacy graduate students. Its chief purposes are to encourage and facilitate graduate student communication and interaction; to gather and disseminate information important to pharmacy graduate students; to represent pharmacy graduate students to the University community; and to promote pharmaceutical education at the undergraduate level.

## **Phi Delta Chi (PDC)**

Lambda chapter of Phi Delta Chi, established at the University in 1905, was reactivated in 1956. Phi Delta Chi is a professional pharmaceutical fraternity of national standing. Membership is open to qualified professional students who are interested in promoting leadership, scholarship, and professional ethics in the field of pharmacy.

## **Phi Lambda Sigma (PLS)**

Psi chapter of Phi Lambda Sigma, the national pharmacy leadership society, was established at the University in 1989. Students selected for membership must be of high moral and ethical character, must have demonstrated dedication, service, and leadership in the advancement of pharmacy, must have completed at least 90 semester hours of scholastic work, and must be in good academic standing as defined by the College of Pharmacy.

## **Rho Chi**

Nu chapter of Rho Chi, the national pharmaceutical honor society, was established at the University in 1930. Charters for chapters of this organization are granted only to groups in colleges that are members in good standing of the American Association of Colleges of Pharmacy. Eligibility for membership in the society is based on scholarship, character, personality, and leadership. Students selected for membership must have a pharmacy grade point average of at least 3.20, must be in the top 20 percent of their class, and must have completed the first professional year of the pharmacy curriculum. All candidates must be approved by the Dean of the College of Pharmacy.

## **San Antonio Student Pharmacists Association (SASPA)**

The San Antonio Student Pharmacists Association (SASPA) was formed in the spring semester of 2010. This organization serves as a venue to bring The University of Texas at Austin College of Pharmacy students located in the San Antonio region together to impact the community and to promote the profession of pharmacy.

## **Student Industry Pharmacists Organization (IPhO)**

This group's mission is to advance the experience of student pharmacists interested in industry careers by promoting knowledge, resources, academic support, and employment opportunities.

## **Student Pharmacist Recovery Network (SPRN)**

The Students of Pharmacy Recovery Network (SPRN) is a program for pharmacy students at the University of Texas designed by conscientious students, faculty members, and staff members of the College. The purpose of the SPRN is to act as a concerned intermediary by assisting pharmacy students having personal problems including emotional stress, alcohol or other drug abuse problems, or a combination of these. SPRN students, faculty, and staff members are able to refer others to the appropriate University and Austin resources that best address their particular needs.

## **Texas Coalition of Student Pharmacists (TCSP)**

This group's mission is to be committed to promoting pharmacists as competent health care professionals, increasing the awareness for improved patient access to pharmacist care, and advocating on behalf of pharmacy for the betterment of our patients.

## **UT Chapter, International Society of Pharmacoeconomics and Outcomes Research (UT-ISPOR)**

This group's mission is to provide an environment in which students can share knowledge in pharmacoeconomics and health outcomes research. It brings together students of pharmacoeconomics and outcomes research and members of the pharmaceutical industry, health-related organizations, and academia; acts as a resource for students interested in pharmacoeconomics and outcomes research; and provides an opportunity for students to become familiar with the work of ISPOR and to be represented in its affairs.

## UT Chapter, National Community Pharmacists Association (NCPA)

NCPA is a national professional organization representing the interests of independent community pharmacists. The student chapter sponsors projects and events designed to foster the entrepreneurial spirit among future practitioners. The national association has a loan program available to student members, as well as several competitive scholarships and research grants.

## UT Chapter, National Pharmaceutical Association (SNPhA)

The purpose of the SNPhA is to plan, organize, coordinate, and execute programs geared toward the improvement of the health, educational, and social environment of the minority community.

## UT Student Chapter of the American College of Clinical Pharmacy (UT-SCCP)

The mission of SCCP is to adopt the purposes of the American College of Clinical Pharmacy. SCCP is focused on giving students exposure to clinical pharmacy, research, and academia. Students have opportunities to hear from and research with many different clinical pharmacists and researchers.

## University of Texas Student Society of Health-System Pharmacists (UTSSHP)

The student chapter of the Texas Society of Health-System Pharmacists is an organization for students interested in institutional or health-system pharmacy practice. An affiliate of the American and Texas Societies of Health-System Pharmacists, the organization considers a wide range of topics of interest to health professionals and encourages the broadest possible educational introduction to institutional pharmacy and pharmaceutical care. This introduction includes presentation of programs and seminars, tours of pharmacy practice sites, and distribution of literature. The chapter publicizes job openings in hospital pharmacies across the state.

## Longhorn Prepharmacy Association (LPPA)

LPPA comprises all prepharmacy students at The University of Texas at Austin. The group's chief objectives are to function as a small community of students within a large institution; to provide current information on the preprofessional and professional curricula; and to provide information about the pharmacy profession.

## Legal Requirements for Professional Practice

Upon matriculation to the first professional year in the College of Pharmacy, each student must apply to become an intern trainee with the Texas State Board of Pharmacy (<http://www.tsbp.state.tx.us>). Each student must be registered as an intern trainee, and subsequently as a student-intern, in order to acquire, through pharmacy courses, the internship hours necessary for licensure upon graduation as a pharmacist in Texas.

Students should be aware that the process of registration as an intern includes a criminal history and fingerprint check. The existence of a criminal record may preclude the student from registration as an intern, completion of experiential courses in the curriculum, and/or from subsequent licensure as a pharmacist in Texas. However, the Texas State Board of Pharmacy may grant limited internship status under certain conditions to those with prior convictions. It is possible that health care facilities in which students are placed for experiential coursework may mandate an additional background check and/or drug

screen. Students assigned to these facilities must comply with all such requirements. If a student cannot be placed in practice facilities because of prior convictions that appear on any background check, or because of a positive drug screen, his or her graduation may not be possible or may be significantly delayed.

After completing the first professional year (at least 30 semester hours), students registered as student-interns may earn internship hours toward licensure not only through professional sequence pharmacy courses but also outside the academic program through employment in certain practice settings. Internship hours gained outside the College of Pharmacy curriculum may not replace any portion of the experiential program required for graduation.

Students are required to inform the Student Affairs Office of any change in status that may affect intern registration or the ability to be placed in practice (experiential) sites.

Graduates of the College of Pharmacy are eligible to apply to the Texas State Board of Pharmacy for licensure as pharmacists. Licensure exams may be taken shortly after graduation. Postgraduate internship experience is not currently required for Texas licensure but may be required for licensure in other states.

Additional information about requirements for pharmacy licensure in Texas is available from the Texas State Board of Pharmacy. (<http://www.tsbp.state.tx.us>)

Intern registration and pharmacist licensure requirements are subject to change by the Texas State Board of Pharmacy. Students and graduates must meet current requirements, even if they differ from those described above.

## Graduate Degrees (Research)

Graduate programs leading to the Master of Science in the Pharmaceutical Sciences and the Doctor of Philosophy in the Pharmaceutical Sciences are offered through the Graduate School and described in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/pharmacy/pharmacy>). The graduate student may specialize in medicinal chemistry, pharmacology and toxicology, pharmaceuticals, pharmacotherapy, pharmacy administration, or translational science. Faculty members in each area work closely with students and engage in research in such fields as drug synthesis, pharmacokinetics, drug mechanisms and toxicity, and clinical research.

## Admission and Registration

### Admission

#### Admission to the University

For the College of Pharmacy's Pharm.D. program, admission and readmission are the responsibility of the dean of the College as delegated by the University's director of admissions. Students accepted to the Pharm.D. Program will be processed for admission to the University (if not already enrolled at The University of Texas at Austin).

#### Admission to the Professional Curriculum

Admission to the University in no way implies or guarantees admission to the professional curriculum. No student may begin the professional curriculum until he or she has been admitted to the professional curriculum in pharmacy by the dean, following recommendation by the Admissions Committee of the College of Pharmacy, according to the procedures outlined in this section regarding admission. All students must meet the admission requirements given in the catalog in effect at the time of application. If the number of eligible applicants to the

professional curriculum exceeds the number that available facilities can accommodate, final selection is made by the college Admissions Committee and the dean.

The College of Pharmacy uses PharmCAS, the national Pharm.D. application system. All student applications must go through PharmCAS, and those accepted for enrollment in the college will be processed for direct admission to the University.

Students who are enrolled in a pharmacy program at another institution and who wish to transfer to the University should follow the normal Pharm.D. application process. Upon admission to the University and the professional curriculum, the student may request advanced standing in the pharmacy curriculum. Placement is contingent on availability of space and on transcript evaluation to determine University equivalencies for the student's coursework.

As a condition of admission to the college, each student must sign a statement that he or she agrees to accept assignment to any one of the college's experiential (internship) regions throughout the state. Cooperative arrangements for pharmacy education exist with academic units and health care institutions in the following internship regions: Austin/Temple/Waco, Dallas/Fort Worth, Galveston/Houston, and San Antonio. Experiential regions may be added or deleted at any time based on the availability of resources.

Students assigned to San Antonio must spend the last two years of the professional program in that region. Students assigned to the other regions spend only the final year of the program (the fourth professional experiential year) in their assigned region.

Students are assigned to experiential regions through a computer-generated random assignment system that takes students' ranked preferences into account. Since most students relocate to experiential regions outside the Austin area, region assignment occurs during the latter part of the first professional year to allow students adequate time to make personal and financial arrangements. There are no exceptions to the region assignment process. If a student fails to agree to accept assignment to any region, he or she will not be admitted to the college.

## Admission to the First Professional Year

Admission to the professional curriculum is competitive. The application process is conducted via the national Pharm.D. admissions program, PharmCAS, as specified on the PharmCAS website (<http://www.pharmcas.org>) and linked via the College of Pharmacy (<http://sites.utexas.edu/pharmacy-admissions>).

### Basic Admission Criteria

1. Scholarship, as indicated by grade point average and Pharmacy College Admission Test (PCAT) scores, including writing sample scores, are submitted via PharmCAS. Scores more than three years old are not accepted.
2. Essay as specified in the PharmCAS application process.
3. Letters of recommendation submitted via PharmCAS from people who know the applicant well professionally, especially pharmacist employers.
4. Transcripts of all academic work submitted via PharmCAS.
5. A résumé submitted via PharmCAS that provides details about the applicant's professional, organizational, volunteer, and service experience.

### Additional Personal Factors

The information specified below is submitted either via PharmCAS or through the college's supplemental application.

1. Pharmacy and other related work experience
2. Organizational, service, and volunteer activities that demonstrate community involvement and leadership potential
3. Teaching, tutoring, and mentoring experience
4. Research experience
5. Honors and awards
6. Interview. Applicants are screened for interviews based on academic record, direct work experience in the profession, special life circumstances, and any other compelling factors. If the applicant is invited for an interview, then other factors are considered; these include but are not limited to the following:
  - a. Knowledge of and motivation for pharmacy as a career
  - b. Lifelong learning strategies
  - c. Critical thinking skills
  - d. Communication skills
  - e. Compassion and commitment to care
  - f. Respect toward others
  - g. Organizational efficiency
  - h. Integrity and ethical reasoning
  - i. Relationship-building skills
  - j. Leadership skills
  - k. Teamwork
7. Special life circumstances; these include but are not limited to the following:
  - a. Single parent
  - b. Socioeconomic status of family
  - c. First generation attending college
  - d. Overcoming adversity
  - e. Resident of an underserved area of the state or an area of Texas with a health professions shortage
  - f. Race and ethnicity
  - g. Cultural background

Because the University is a public institution, preference is given to applicants who are legal residents of Texas and to applicants from states without colleges of pharmacy. Applicants are strongly encouraged to examine the admission statistics published by the college on its admissions website (<http://sites.utexas.edu/pharmacy-admissions>).

## Application Deadlines

The deadline to apply for admission to the college is specified on the PharmCAS website (<http://www.pharmcas.org>) and linked via the College of Pharmacy (<http://sites.utexas.edu/pharmacy-admissions/im-ready-to-apply>).

## Admission Requirements

1. The applicant must have completed at least 66 semester hours in total, and must have completed the following 45 hours in prerequisite courses prior to enrolling in the professional pharmacy curriculum:
  - a. Nine hours of biology, including cellular and molecular biology, structure and function of organisms, and genetics
  - b. Eight hours of general chemistry with laboratory
  - c. Three hours of freshman-level rhetoric and writing
  - d. Three hours of sophomore-level survey of American, British, or world literature
  - e. Three hours of calculus
  - f. Three hours of statistics
  - g. Eight hours of organic chemistry with laboratory

- h. Four hours of microbiology with laboratory
- i. Four hours of physics with laboratory

The remaining 21 semester hours should be from the Core Curriculum (p. 23).

- 2. The applicant must remove all deficiencies in high school units by the means prescribed in *General Information* before seeking admission to the professional curriculum.

## Admission Procedures

1. All applications for the Pharm.D. program will be handled through the national Pharm.D. admissions system, PharmCAS. Students must adhere to the deadlines for admission specified. The PharmCAS application process will include a supplementary application to the college (with a nonrefundable supplementary application fee) necessary to acquire additional academic information for University admission. Candidates will be notified if additional information is required.
2. Selected applicants will be asked to appear for a personal interview. The personal interview will follow a multiple-mini interview (MMI) format.
3. The applicant is considered on the basis of overall academic performance, with emphasis on grades in the required Pharm.D. prerequisite courses. In accordance with University policy, courses in which the applicant earned a grade of *D+*, *D*, *D-*, or *F* at another institution are not transferable and may not be used to fulfill any degree requirements. However, courses in which the student earned a grade of *D+*, *D*, or *D-* are considered when the student's admissibility to the professional curriculum is determined.
4. Applicants who have been offered admission to the University and to the Pharm.D. program will be asked to pay a nonrefundable enrollment deposit to the University. If the student does enroll in the program that fall, the deposit will be applied to the semester's tuition bill.
5. All students accepted for admission in the Pharm.D. program will be processed for admission to The University of Texas using the information in the PharmCAS application. Additional materials for University admission may be required:
  - a. A high school transcript, if the applicant's foreign language requirement was completed in high school. Official transcripts must be sent to the University's Office of Admissions (<https://www.utexas.edu/student/admissions>).
  - b. Scores on the Texas Higher Education Assessment (THEA) test (or an appropriate assessment test), if and only if the student is required by state law to take this test.
  - c. Credit earned by examination. These reports should be sent directly to the Testing and Evaluation Services—Student Testing Services ([http://ctl.utexas.edu/services/student\\_testing\\_services](http://ctl.utexas.edu/services/student_testing_services)) at the University. This would be done if and only if the student had not previously claimed credit showing on the transcript.
  - d. Official transcripts for all colleges/universities attended.
6. An applicant who has been admitted to the University and to the professional curriculum but fails to enroll in either, and who wishes to enter the professional curriculum in a subsequent fall semester, must reapply both to the University and to the College of Pharmacy and must meet all requirements in force at the time of reapplication.
7. An applicant who has been admitted to and enrolls in the professional curriculum but subsequently withdraws, and who wishes to reenter in a subsequent fall semester, must apply for readmission to the professional curriculum and must meet all requirements in force at the time of reapplication. A student who has

been out of the University for a semester or more must also apply for readmission to the University.

## Technical Standards

"Technical standards" are the observational, communication, sensory/motor, and intellectual skills, the behavioral and social attributes, and the ethical values required for the completion of the professional curriculum and for the practice of pharmacy. These standards are described on the College of Pharmacy's website (<http://pharmacy.utexas.edu/students/programs-of-study/pharm-d-program/technical-standards-for-pharmacy-education>). Each applicant must attest that they have read and understand the technical standards. Any applicant who believes he or she may have difficulty meeting them should contact the college's director of admission.

## Registration

*General Information* (<http://registrar.utexas.edu/catalogs/general-information>) gives information about registration, adding and dropping courses, transfer from one division of the University to another, and auditing a course. The *Course Schedule* (<http://registrar.utexas.edu/schedules>) published before registration each semester and summer session, includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the Office of the Registrar's website (<https://registrar.utexas.edu>).

Each semester the academic adviser for the college provides registration guidance that is specific to the College of Pharmacy.

## Registration as a Student Pharmacist-Intern

Upon matriculation to the first professional year, each student must register as an intern-trainee with the Texas State Board of Pharmacy. This is accomplished through completion of the Application for Student-Intern Registration. Each student must be registered as a student-intern in order to complete the academic requirements for the degree.

Additional information regarding intern registration and pharmacist licensure is given in the section Legal Requirements for Professional Practice (p. 761). Requirements and regulations are subject to change by the Texas State Board of Pharmacy. Every attempt is made to inform students of changes as they occur.

## Professional Liability Insurance

Professional liability insurance is required of all students each year of the professional pharmacy curriculum. Coverage in the amount of two million dollars for each claim and six million dollars in the aggregate per year is provided through the insurance policy. The annual premium is less than \$20.00 but is subject to change, and is payable by the student. The policy covers the period September 1 through August 31 and must be secured each year of the program through the University of Texas System.

## Medical Clearance Requirements

In addition to the University's immunization requirements, students must meet additional immunization requirements for students in healthcare programs as articulated in Title 25 of the Texas Administrative Code, Rule 97.64, and as mandated by the practice sites in which students participate in practicum experiences.

Immunization requirements are subject to change. Every effort is made to notify students promptly of any changes. A current list of vaccination requirements can be found on the College of Pharmacy's website

(<http://sites.utexas.edu/phr-experiential/student-experience/policies-requirements/mandatory-immunization-schedule>).

Although not a College of Pharmacy requirement, students may be subject to other health clearance requirements mandated by health care facilities for practicum.

## Student Health Insurance

Students must procure health insurance to cover treatment for injuries or illness, and must provide proof of insurance each year of the curriculum. This is especially important for the experiential components of the curriculum, spanning all four professional years, when students have frequent contact with patients in a number of different health care environments.

The Student Health Insurance Plan, operated under the auspices of University Health Services, offers optional low-cost insurance for students who are not covered by other programs. Information about this plan is available through University Health Services at <http://healthyhorns.utexas.edu/>.

## Academic Policies and Procedures

### Academic Standards

University regulations on scholastic probation and dismissal are given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/scholastic-probation-and-dismissal>). In addition, the following academic standards are in effect in the College of Pharmacy.

### Academic Progress

1. The student must repeat a required pharmacy course in which he or she earns a grade of *F*. The student who earns a grade of *D+*, *D*, or *D-* in a required pharmacy course becomes subject to the policies on academic probation and dismissal described below.
2. The student must earn a grade of at least *C-* in each elective pharmacy course. If the student fails to earn a grade of at least *C-* in an elective pharmacy course, he or she may repeat the course or may take another elective course in its place, but only courses in which the student has earned a grade of at least *C-* may be counted toward the professional elective requirement.
3. The student must earn an average of at least two grade points (2.00) a semester hour on all courses undertaken at the University, whether passed or failed in order to graduate. The student must also earn an average of at least two grade points (2.00) a semester hour on all required pharmacy courses undertaken, whether passed or failed.
4. The student may not repeat for credit a course in which he or she has earned a grade of *C-* or better, except under circumstances approved by the dean.
5. Pharmacy elective courses and laboratory problems courses can be taken on the letter-grade or pass/fail basis, unless otherwise stated in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). However, the student must complete the Professional Electives Course Requirement (p. 768) with approved elective courses taken for the letter grade basis.

### Academic Probation and Dismissal

A student is placed on academic probation in the College of Pharmacy if he or she receives a grade of *D+*, *D*, *D-*, or *F* in any required pharmacy course. If the grade received is an *F*, the student must repeat the course and may not progress to courses for which it is a prerequisite until he

or she has earned a grade of at least *C-* in the failed course. If the initial grade received is a *D+*, *D*, or *D-*, the student may progress to courses for which the course is a prerequisite. The student may choose to repeat a course in which he or she received a *D+*, *D*, or *D-*, if the course does not conflict with other courses the student would normally take in the same semester; however, this choice affects the student's release from academic probation as described in the following section.

If the student receives more than two incompletes in required pharmacy courses, regardless of the grades ultimately awarded, he or she is subject to review by the Academic Performance Committee. The committee may choose to place the student on academic probation.

A student is subject to dismissal from the college if he or she receives more than one *D+*, *D*, *D-*, or *F* in required pharmacy courses in one semester. The student is also subject to dismissal if he or she receives an additional *D+*, *D*, *D-*, or *F* while on academic probation or conditional academic probation.

Students on academic probation are expected to focus on academic improvement and thus are not allowed to hold student offices (elected, appointed, or committee chairmanship) or receive college stipends for travel to professional meetings or other college-sponsored events.

### Release from Academic Probation

After receiving a grade of *F*, the student must repeat the course and earn a grade of at least *C-*. If the failed course is a prerequisite for another course, the student must repeat the course and earn a grade of at least *C-* before taking the course for which the failed course is a prerequisite. In the semester or summer session in which he or she repeats the course, the student must complete a full academic load, including at least five hours in required pharmacy courses and/or other courses recommended by the academic adviser. A full academic load is defined for this purpose as 12 hours in a long-session semester and six hours in the summer. The new grade is averaged with the grade of *F* when the student's pharmacy grade point average is calculated. If the new grade is *C-* or better, the student is released from academic probation if and only if he or she has earned no further grades of *D+*, *D*, *D-*, or *F* while on academic probation or conditional academic probation. If the student does not earn a grade of at least *C-* upon repeating the course, he or she is subject to academic dismissal.

After receiving a grade of *D+*, *D*, or *D-*, the student chooses whether or not to repeat the course, if the course does not conflict with other courses the student would normally take in the same semester. He or she may progress to courses for which the course in question is a prerequisite. If the student chooses to repeat the course, he or she must earn a grade of at least *C-*. If the new grade is a *C-* or better, the student is released from academic probation only if he or she has earned no further grades of *D+*, *D*, *D-*, or *F* while on academic probation or conditional academic probation. If the student does not earn a grade of at least *C-* upon repeating the course, he or she is subject to academic dismissal. The new grade is averaged with the grade of *D+*, *D*, or *D-* when the student's pharmacy grade point average is calculated.

If the student chooses not to repeat the course, he or she remains on academic probation (or conditional academic probation, described below) through completion of the P4 advanced pharmacy practice experiential courses in the final semester. To take the P4 experiential courses, the student must have a grade point average of at least 2.00 in required pharmacy courses. If the student earns the symbol *CR* in each P4 advanced pharmacy practice course, he or she is released from probation and graduates in good academic standing with the college.

## Conditional Academic Probation

If a student on academic probation receives no grade lower than C- in required pharmacy courses during the following semester or summer session in which he or she takes a full academic load, the student may be placed on conditional academic probation. This status allows the student to hold student office (elected, appointed or committee chairmanship) and to receive college stipends for travel to professional meetings or other college-sponsored events. The student remains on conditional academic probation until graduation and is subject to dismissal if he or she receives a second grade of *D+*, *D*, *D-*, or *F*.

## Academic Progression in the Pharm.D. Program

If the student's academic progression results in a two-year delay of progression at any time, he or she is subject to review by the Academic Performance Committee. The committee may choose to allow the student to continue in the program, place the student on conditional probation, or dismiss the student from the program.

## Comprehensive Milestone Exams and Academic Progression

During the third professional year, all students are required to complete a comprehensive P3 Milestone Exam. Students who successfully pass the exam will progress into the fourth, and final, professional year. Students who do not successfully pass the exam will be referred to the Academic Performance Committee for progression decisions and targeted remediation.

At the end of the fourth professional year, all students are required to complete a comprehensive P4 Milestone Exam. Students who successfully pass the exam will progress towards graduation provided all other degree requirements have been met. Students who do not successfully pass the exam will be referred to the Academic Performance Committee for progression decisions and targeted remediation.

## Calculation of the Grade Point Average

1. The student's University grade point average includes all courses taken at the University for which a grade or symbol other than *Q*, *W*, *X*, or *CR* is recorded. If the student has repeated a course, including those courses for which he or she earned a grade of *D+*, *D*, *D-*, or *F*, all grades earned are included in the University grade point average.
2. The student's College of Pharmacy grade point average includes all required professional courses (excluding ALL elective courses) taken at the University for which a grade or symbol other than *Q*, *W*, *X*, or *CR* is recorded. When a student repeats a required pharmacy course, the second grade in the repeated course is averaged with the previous grade when the student's College of Pharmacy grade point average is calculated.

## The Academic Performance Committee

The College of Pharmacy Academic Performance Committee monitors the academic progress of students in the professional program. The committee makes recommendations to the dean regarding students' academic progress and academic probation and dismissal. The committee also makes recommendations to assist students who may be in academic difficulty. Any student in academic difficulty may be asked to appear before the committee for guidance. The committee hears all student appeals regarding academic progress and academic probation and dismissal. The committee aids the Admissions Committee in the evaluation of students who wish to return to the college after having been dismissed.

## Course Load and Sequence of Work

1. To progress to the final-year experiential courses, the student must have successfully completed all basic education requirements and all required and elective pharmacy courses except those in the internship year.
2. Because final-year experiential courses are offered on the pass/fail basis only, students must have attained both the University and the College of Pharmacy grade point average of at least 2.00 required for graduation before they begin the P4 advanced pharmacy practice experiential year.
3. If a conflict arises between University requirements and a student's employment, the student must resolve the conflict in favor of the University requirements.
4. A student who is not on academic probation must take at least 12 semester hours during any long-session semester, at least six hours of which must be for a letter grade (not pass/fail).
5. A student on academic probation must take at least 12 semester hours during any long-session semester or at least six semester hours during the summer session in order to clear academic probation.
6. Students may not take courses for degree credit at another institution without prior approval from the dean of the College of Pharmacy.
7. All students seeking to reenter the College of Pharmacy after having been placed on academic dismissal must make formal application through the Admissions Committee. The application is processed through the Admissions Committee with recommendations from the Academic Performance Committee and the approval of the dean.

## Standards of Ethical Conduct

Pharmacy practitioners enjoy a special trust and authority based on the profession's commitment to a code of ethical behavior in its management of client affairs. The inculcation of a sense of responsible professional behavior is a critical component of professional education, and high standards of ethical conduct are expected of pharmacy students.

Toward that end, the faculty and students of the College of Pharmacy have pledged their support to the Policy Statement on Ethical Conduct and Scholastic Integrity and the Code of Ethics that implements this Policy Statement. Upon entering the College of Pharmacy, and each academic year thereafter, students are asked to recite and sign the following pledge:

"As a student of The University of Texas College of Pharmacy, I have reviewed and hereby pledge my full support to the Honor Code. I pledge to be honest myself, and in order that the spirit and integrity of the Honor Code may endure, I pledge that I will make known to the appropriate authorities cases of dishonesty which I observe in the College of Pharmacy."

In addition, the following oath, which students will be asked to sign, is included at the end of all class examinations: "I have neither participated in nor witnessed any acts of academic dishonesty pertaining to this assignment." At the discretion of the instructor, the oath may also be included for other assignments such as quizzes, written reports, or papers.

Students are also required to adhere to the University's Student Honor Code which states "As a student at The University of Texas at Austin, I shall abide by the core values of the University and uphold academic integrity." The entire text of the Student Honor Code and the University's

Code of Conduct can be found at <http://www.utexas.edu/about/mission-and-values>.

The entire text of the Policy Statement on Ethical Conduct and Scholastic Integrity and the Honor Code are available at <http://www.utexas.edu/pharmacy/students/handbook98/3code.html>.

Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including failure of the course involved and dismissal from the college and/or the University. Since dishonesty harms the individual, fellow students, and the integrity of the University and the College of Pharmacy, policies on scholastic dishonesty are strictly enforced.

## Attendance in Class and Laboratories

Students in the College of Pharmacy are expected to attend all scheduled class and laboratory sessions in courses for which they are registered. If attendance is a course requirement that can impact the student's grade, the criteria for assessing attendance and consequences for nonattendance must be specified in the syllabus.

## Honors

University-wide honors are described in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors>). In addition, the College of Pharmacy encourages academic excellence through Rho Chi, the national pharmaceutical honor society, described in Student Organizations (p. 759), and through the Pharmacy Honors Program.

## University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#universityhonorstext>).

## Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#graduationwithuniversityhonorstext>).

## Pharmacy Honors Program

### Criteria for Admission

Students who plan to seek special honors in pharmacy should apply to the chair of the Honors Program Committee after they have completed the fall semester of the first professional year; they must apply before they begin the second professional year. Students interested in the Pharmacy Honors Program are strongly encouraged to enroll in PHM 181R Research Opportunities in the Pharmaceutical Sciences in the spring semester of their first professional year. The criteria for admission to the program are (1) admission to the professional curriculum; (2) a grade point average of at least 3.00 in all required professional coursework completed at the time of application to the program; and (3) approval of the Honors Program Committee.

### Requirements for Completion

Requirements for the completion of the honors program are (1) a grade point average of at least 3.00 in all required professional courses; (2) a grade point average of at least 3.00 in all professional courses, including

required professional elective coursework; (3) completion of Pharmacy PharmD 187R at least twice; (4) completion of at least one honors elective; (5) completion of Pharmacy PharmD 288H and 489H; and (6) completion of the regular curriculum for the degree.

The statement "Research Honors in Pharmacy" appears on the transcript of each graduate certified to have completed the honors program.

## College of Pharmacy Recognition Awards

**The College of Pharmacy Award for Academic Achievement** recognizes a graduate who has demonstrated an outstanding grade point average, professional attitude, and excellent communication skills.

**The College of Pharmacy Award for Outstanding Research** recognizes a graduate who has demonstrated outstanding ability in areas of pharmacy research.

**The College of Pharmacy Award for Excellence in Patient Care** recognizes a graduate who has demonstrated excellence in patient care while pursuing the PharmD degree.

**The College of Pharmacy Award for Dedicated Service** recognizes a graduate who has shown a commitment to service above and beyond the norm.

**The College of Pharmacy Award for Exemplary Leadership** recognizes a graduate who has excelled in leadership while pursuing the PharmD degree.

**The College of Pharmacy Alumni Association Mortar and Pestle Award for Leadership, Service, and Patient Care** recognizes an exceptional graduate who has demonstrated outstanding leadership, service, and patient care in the college, the University, and the community while pursuing the PharmD degree. The award is a hand-carved mortar and pestle.

**The College of Pharmacy Class Officers** are elected by their classmates and serve as permanent officers of their class.

Students' scholarly accomplishments are also recognized through election to Rho Chi, the national pharmaceutical honor society, and through admission to the Pharmacy Honors Program. Students' leadership accomplishments are recognized through election to Phi Lambda Sigma, the national pharmacy leadership society.

## Graduation

All students must fulfill the general requirements (p. 20) for graduation. In addition, students seeking the Doctor of Pharmacy (Pharm.D.) must complete in residence the courses prescribed for the third and fourth professional years.

All University students must have a grade point average of at least 2.00 to graduate. In the College of Pharmacy, students must also have a grade point average of at least 2.00 in required professional courses to graduate.

A candidate must complete the prescribed curriculum and must meet all other requirements of the College of Pharmacy.

PharmD professional students are not required to submit a Graduation Application Form to graduate.

## Degrees and Programs

The University offers the Pharm.D. as the sole entry-level pharmacy practice degree. As described in the mission (p. 757), this program emphasizes an integrated and problem-based approach to disease

management as the core of the didactic, laboratory, and experiential program of study.

The capstone of the Pharm.D. program is a series of seven six-week rotations known as the advanced pharmacy practice experiences (APPE (<http://sites.utexas.edu/phr-experiential/student-experience/advanced-pharmacy-practice-experience-appe>)). Each APPE course requires a minimum of 45 on-site, practitioner-faculty-supervised hours of internship experience a week for six weeks.

The college expects but cannot guarantee that experiential regions will include Austin/Temple/Waco, Dallas/Fort Worth (the University of Texas Southwestern Medical Center and other area health care facilities), Galveston/Houston (the University of Texas Medical Branch at Galveston, the University of Texas M. D. Anderson Cancer Center, and other area health care facilities), the Rio Grande Valley (the University of Texas - Rio Grande Valley and health care facilities primarily in Harlingen and McAllen), and San Antonio (the University of Texas Health Science Center San Antonio and other area health care facilities). Students assigned to San Antonio spend two years in this region, while students assigned to other regions spend only the final year in the APPE region.

College of Pharmacy students who complete their experiential courses at the University of Texas Health Science Center at San Antonio are considered part of a joint Pharm.D. degree program and receive a degree awarded jointly by the two institutions. The joint nature of this program is reflected on the student's diploma.

In completing the Doctor of Pharmacy degree, students also fulfill the internship requirements of the Texas State Board of Pharmacy. The final year of APPE courses and several other practice-based experiential courses, beginning in the first professional year, make up the experiential program. The professional experience courses are currently approved by the Texas State Board of Pharmacy to meet its standards for completion of the professional internship licensure requirement. The board reassesses all programs annually.

## The Minor

While a minor is not required as part of the Pharm.D. degree program, the student may choose to complete additional coursework in a field outside of the College of Pharmacy. A course may not be counted both toward the minor and toward the 219 hours of work required for the Pharm.D. degree.

The transcript-recognized undergraduate academic minor must be completed in conjunction with an undergraduate degree at The University of Texas at Austin; students pursuing an integrated undergraduate/graduate program must complete the requirements for the minor within one year after completing the undergraduate requirements of their program. For more information regarding the requirements for achieving a minor, including a comprehensive list of minors, please visit the Minors and Certificate Programs (p. 13) section of the *Undergraduate Catalog*.

## Applicability of Certain Courses

### Physical Activity Courses

Physical activity (PED) courses are offered by the Department of Kinesiology and Health Education. They may not be counted toward a degree in the College of Pharmacy. However, they are counted among courses for which the student is enrolled, and the grades are included in the University grade point average.

## ROTC Courses

Courses in air force science, military science, and naval science may be substituted for a total of nine semester hours of non-pharmacy electives by students who complete the 16 to 20 semester hours of required air force science, military science, or naval science coursework and accept a commission in one of the services. These courses may not be counted toward the professional elective requirement.

## Correspondence and Extension Courses

Credit that a University student in residence earns simultaneously by correspondence or extension from the University or elsewhere or in residence at another school will not be counted toward a degree unless it is specifically approved in advance by the dean. No more than 30 percent of the semester hours required for any degree may be completed by correspondence, and no pharmacy courses taken by correspondence or extension may be counted toward a pharmacy degree.

## Prescribed Work

Students who enter the Doctor of Pharmacy degree program must complete a minimum of 219 semester hours of coursework in the following areas: the core curriculum, additional basic education requirements, professional electives, and pre-professional and professional coursework.

## Core Curriculum

Each student must complete the University's Core Curriculum (p. 23). Because of the intensity and structure of the professional pharmacy curriculum, and because admission to the professional curriculum is highly competitive, the College of Pharmacy strongly recommends that students complete all of the core courses before they enter the college.

The following core requirements are usually met by the pre-professional and professional coursework described below: English composition with one writing flag, mathematics, science and technology (parts I and II), and humanities. Students must complete additional coursework to meet the core requirements listed below; the courses in each core area are listed in Core Curriculum (p. 23).

Requirements	Hours
<b>Additional Coursework</b>	
First-year signature course	3
American and Texas government	6
American history	6
Social and behavioral sciences	3
Visual and performing arts	3
Total Hours	21

Transfer students who complete the core curriculum at another public Texas institution of higher education with core completion specified on their transcript and who are then admitted to the Pharm.D. program are considered "core complete" by the University. Core curriculum requirements are waived for students admitted to the Pharm.D. program who have previously earned a bachelor's degree.

## Additional Basic Education Requirements

All students must also earn the following skills and experiences flags: writing, quantitative reasoning, cultural diversity in the United States, ethics, global cultures, and independent inquiry. See skills and experiences for more information; courses that carry these flags are identified in the *Course Schedule*. All skills and experience flags are

fulfilled by courses within the professional pharmacy sequence, except for global cultures.

Flag requirements are waived for students admitted to the professional curriculum who have already earned a bachelor's degree.

All students must complete the foreign language (p. 24) requirement before they enter the professional curriculum (unless they hold a prior bachelor's degree).

## Professional Electives Course Requirement

The student must complete at least two professional elective courses, for a total of at least seven semester hours, on the letter-grade basis. The student must take the courses used to fulfill the professional electives requirement after admission to the professional curriculum.

## Preprofessional and Professional Coursework

The following courses are required. The course sequence given here shows the usual order in which courses are taken to fulfill prerequisite requirements and illustrates the feasibility of completing requirements for the degree within six calendar years. Students who depart significantly from this sequence may need more time to complete their coursework, because most courses are taught only once a year and because in a given semester the scheduled meeting time of a preprofessional or professional course may conflict with the times of core courses or professional electives.

### First Preprofessional Year

<sup>1</sup> Students should consider enrolling in a First-Year Signature Course that also satisfies the global cultures flag requirement.

## Courses

The faculty has approval to offer the following courses in the academic years 2018–2019 and 2019–2020; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

## Pharmacy PharmD: PHM

### University Courses

#### PHM 310K. Drugs in Our Society.

Survey of drug development, distribution, and safety, including therapeutic categories of drugs, their actions and abuse potential, and the sociological aspects of drug use. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 310K, 350K, Pharmacy PharmD 310K, 350K. Not open to students in the professional pharmacy curriculum and may not be counted toward the professional elective requirement in pharmacy.

#### PHM 311K. Take your Medicine: Developing New Drug Products.

Restricted to non-pharmacy majors. Explores the process, challenges, and issues in developing pharmaceutical products. An overview of drug development, approval, and consumer issues will be presented and discussed in the context of research practices, consumers, science, marketing, public welfare, and innovative practices. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

#### PHM 338. Introduction to Pharmacology.

Restricted to non-pharmacy majors. Survey of basic concepts and principles in pharmacology. Three lecture hours a week for one semester. Pharmacy 338 and Pharmacy PharmD 338 may not both be counted. Prerequisite: Credit or registration for Biology 365S, 446L, Biomedical Engineering 365R, 365S, or Kinesiology 324K.

#### PHM 350K. Drugs in Our Society.

Survey of drug development, distribution, and safety, including therapeutic categories of drugs, their actions and abuse potential, and the sociological aspects of drug use. Essay papers required. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 310K, 350K, Pharmacy PharmD 310K, 350K. Not open to students in the professional pharmacy curriculum and may not be counted toward the professional elective requirement in pharmacy. Prerequisite: Upper-division standing.

#### PHM 160J, 260J, 360J. Basic Study in Pharmaceutical Research for Nonmajors.

Original investigation in any area of the pharmaceutical sciences. For each semester hour of credit earned, three laboratory hours a week for one semester. May be repeated for credit. Prerequisite: Consent of instructor and the dean.

### Professional Courses

#### PHM 480C. Human Normal Physiology/Pathophysiology and Basics in Pharmacology I.

Integrated approach consisting of normal physiology (with limited functional anatomy), pathophysiology, and basic principles in pharmacology to address the etiology of disease states affecting the nervous, gastrointestinal, visual/olfactory, skin, muscular, and cardiovascular systems. Four lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

#### PHM 480D. Human Normal Physiology/Pathophysiology II.

Integrated approach consisting of normal physiology (with limited functional anatomy), pathophysiology, and basic principles in pharmacology to address the etiology of disease states affecting the blood/immune system, renal, pulmonary, endocrine, and metabolic systems. Also includes multi-systemic diseases related to infectious

disease and cancer. Four lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 480C.

#### PHM 280H. Landmark Studies in Cardiovascular Disease.

Evidence-based clinical studies in support of drug therapy recommendations in the treatment of cardiovascular diseases. Two lecture hours a week for one semester. Pharmacy 280H and Pharmacy PharmD 280H may not both be counted. Prerequisite: Second-professional-year standing in pharmacy.

#### PHM 180K. Medicinal Chemistry Principles.

Introduction to medicinal chemistry principles. Subjects include drug metabolism and the transition from organic to medicinal chemistry. One lecture hour a week for one semester. Pharmacy 143M and Pharmacy PharmD 180K may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum, and credit or registration for Pharmacy PharmD 180P (or Pharmacy 143P).

#### PHM 280L, 380L. Landmark Pharmacotherapy Studies in Primary Care.

Reviewing, evaluating, and applying the results of landmark studies in pharmacotherapy to primary care practice. An examination of disease states encountered in primary care including diabetes, hypertension, dyslipidemias, and psychological disorders. For 280L, six laboratory hours a week for one semester; for 380L, nine laboratory hours a week for one semester. Only one of the following may be counted: Pharmacy PharmD 280L, 380L, Pharmacy 280L, 380L. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 195Q (or Pharmacy 163C), 185P (or Pharmacy 185P), 685E (or Pharmacy 695F), and 385G (or Pharmacy 395G).

#### PHM 180P. Basic Pharmaceutical Sciences Laboratory.

Laboratory exercises to support the basic pharmaceutical sciences courses. One hour of pre-laboratory lecture and three laboratory hours a week for one semester. Pharmacy 143P and Pharmacy PharmD 180P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum, and credit or registration for Pharmacy PharmD 180K (or Pharmacy 143M).

#### PHM 180R, 280R, 380R. Basic Study in Pharmaceutical Research.

Basic exploration in any area of the pharmaceutical sciences. For each semester hour of credit earned, three laboratory hours a week for one semester. No more than three semester hours may be counted toward the professional pharmacy elective requirement. May be repeated for credit. Prerequisite: Admission to the PharmD program and consent of instructor and the dean.

#### PHM 180T, 280T, 380T. Global Health.

Restricted to students in the College of Pharmacy. An exploration of health care issues outside the United States with an inside look at different cultures and healthcare systems to enhance global awareness and cultural competence in the practice of pharmacy. For every credit hour earned, one lecture hour per week for one semester. Offered on the letter-grade basis only.

#### PHM 280W. Psychiatric Pharmacy Practice and Drug Treatment of Mental Disorders.

Advanced study in the pathophysiology of selected psychiatric disease states and the clinical presentation, phenomenology, diagnosis, and treatment of these disease states. Two lecture hours a week for one semester. Pharmacy 280W and Pharmacy PharmD 280W may not both

be counted. Prerequisite: Credit or registration for Pharmacy PharmD 685F (or Pharmacy 695F), or consent of instructor.

### **PHM 181. Pharmacotherapeutics of the Renal and Autonomic Systems.**

An integrated approach to the etiology and treatment of disease states of the renal and autonomic systems. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 181 and 685D (or Pharmacy 665E) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 480D, 182, 483, and 392P.

### **PHM 181C, 281C. Professional Development Convocation I.**

Professional development issues and assessments for PharmD students in the first professional year. Includes students' professional and program-specific responsibilities, such as program evaluations, portfolios, and administrative requirements; practice opportunities in pharmacy; and expected areas and levels of professional growth as the student advances through the curriculum. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 142H, Pharmacy PharmD 181C, 281C, 281S. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 181D, 281D. Professional Development Convocation II.**

Professional development issues and assessments for PharmD students in the first professional year. Student fulfillment of professional and program-specific responsibilities (program evaluations, portfolios, administrative requirements), practice opportunities in pharmacy, and addressing the expected areas and levels of professional growth as the student advances through the curriculum. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 152H, Pharmacy PharmD 181D, 281D, 281T. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 181C, 281C, 281S (or Pharmacy 142H).

### **PHM 381H. Interprofessional Health Care for HIV Patient Management.**

Interprofessional teamwork, health literacy, treatment guidelines, patient safety, and medication reconciliation in the care of patients with the human immunodeficiency virus. Conducted at an HIV clinic in Texas. Students complete six hours of required Web-based instruction before beginning the clinical component. Six hours of online lecture and a minimum of fifty hours of fieldwork in one semester. Pharmacy 381H and Pharmacy PharmD 381H may not both be counted. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 381K. Pharmaceutical Marketing.**

Concepts of marketing as they apply to the pharmaceutical industry, pharmaceutical products, and the health care environment. Three lecture hours a week for one semester. Pharmacy 320M and Pharmacy PharmD 381K may not both be counted. Prerequisite: Pharmacy PharmD 281L (or Pharmacy 244C) and 181P (or Pharmacy 144P).

### **PHM 281L. Personnel Management and Patient Behavior.**

Concepts and principles of management, and social and behavioral aspects of pharmacy practice. Two lecture hours a week for one semester. Pharmacy 244C and Pharmacy PharmD 281L may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum and credit or registration for Pharmacy PharmD 181P (or Pharmacy 144P).

### **PHM 381M. Pharmaceutical Biochemistry I.**

Basic principles of intermediary metabolism, with emphasis on defects in pathways that result in disease and on identification of molecular targets for therapeutic control. Three lecture hours a week for one semester. Pharmacy 341C and Pharmacy PharmD 381M may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 281N. Pharmaceutical Biochemistry II.**

The biosynthesis and function of macromolecules (nucleic acids, lipids, proteins, and carbohydrates); sites of drug action, immunology, and applications of biotechnology and molecular biology to the pharmaceutical sciences. Two lecture hours a week for one semester. Pharmacy 251C and Pharmacy PharmD 281N may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 381M (or Pharmacy 341C).

### **PHM 181P. Personnel Management and Patient Behavior Laboratory.**

Explores issues in pharmacy practice. Includes case study discussions, group presentations, and small group work to enhance communication and teamwork skills. Three laboratory hours a week for one semester. Pharmacy 144P and Pharmacy PharmD 181P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum, and credit or registration for Pharmacy PharmD 281L (or Pharmacy 244C).

### **PHM 181R. Research Opportunities in the Pharmaceutical Sciences.**

An introduction to research in all divisions of the College of Pharmacy. Includes ethical issues in research, career paths in research, and subjects such as choosing a research mentor or project. One lecture hour and three laboratory hours a week for one semester. Pharmacy 151R and Pharmacy PharmD 181R may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 181S, 281S. Foundations of Professional Development I.**

Restricted to students in the College of Pharmacy. In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars and team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 142H, Pharmacy PharmD 181C, 281C, 181S, 281S. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 181T, 281T. Foundations of Professional Development II.**

In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy

practice, and interprofessional collaboration. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 152H, Pharmacy PharmD 181D, 281D, 181T, 281T. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 181C, or 281C, or 181S, or 281S, (or Pharmacy 142H).

### **PHM 182. Pharmacotherapeutics of the Respiratory System.**

An integrated approach to the etiology and treatment of disease states of the respiratory system. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 182 and 685D (or Pharmacy 665E) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 480D, 182, 483, and 392P.

### **PHM 182C, 282C. Professional Development Convocation III.**

Professional development issues and assessments for PharmD students in the second professional year. Student fulfillment of professional and program-specific responsibilities (program evaluations, portfolios, administrative requirements), practice opportunities in pharmacy, and addressing the expected areas and levels of professional growth as the student advances through the curriculum. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 161H, Pharmacy PharmD 182C, 282C, 282S. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 181D, or 281D, or 281T, (or Pharmacy 152H).

### **PHM 182D, 282D. Professional Development Convocation IV.**

Professional development issues and assessments for PharmD students in the second professional year. Student fulfillment of professional and program-specific responsibilities (program evaluations, portfolios, administrative requirements), practice opportunities in pharmacy, and addressing the expected areas and levels of professional growth as the student advances through the curriculum. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 172H, Pharmacy PharmD 182D, 282D, 282T. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 182C, or 282C, or 282S, (or Pharmacy 161H).

### **PHM 282E. Nonprescription Pharmacotherapeutics and Self-Care I.**

Study of nonprescription products and complementary and alternative medicine as it relates to the patient's ability to care for themselves with emphasis on the pharmacist's consultant role in product selection and nonpharmacologic recommendations. Two lecture hours a week for one semester. Pharmacy 262D and Pharmacy PharmD 282E may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 182F. Nonprescription Pharmacotherapeutics and Self-Care II.**

A continuation of Pharmacy PharmD 282E. The study of nonprescription products and complementary and alternative medicine as it relates to the patient's ability to care for themselves with emphasis on the pharmacist's consultant role in product selection and non-pharmacologic recommendations. One lecture hour a week for one semester. Pharmacy 172E and Pharmacy PharmD 182F may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 282E (or Pharmacy 262D), 392P (or Pharmacy 392S), and credit or registration for Pharmacy PharmD 182P (or Pharmacy 172P).

### **PHM 282G. Pharmacy Business Plan Development.**

The fundamentals of writing a pharmacy business plan, including the mission statement, objectives, description of products and services, legal structure, location analysis, layout and design, pro forma financial statements, staffing, market analysis and strategies, and promotion and advertising plans, culminating in submission of the plan for national

competition. Two lecture hours a week for one semester. Pharmacy 282D and Pharmacy PharmD 282G may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 384K (or Pharmacy 326C) and completion of the second professional year in pharmacy, or consent of instructor.

### **PHM 382K. Experimental Design and Research Methods in Health Care.**

Concepts and procedures involved in designing and completing a research project. Three lecture hours a week for one semester. Pharmacy 322H and Pharmacy PharmD 382K may not both be counted. Prerequisite: Admission to the Pharmacy Honors Program or consent of instructor.

### **PHM 382L. Clinical Toxicology.**

A course in toxicology that focuses on common poisons and their management; designed for pharmacy students planning to enter general practice. Three lecture hours a week for one semester. Pharmacy 362L and Pharmacy PharmD 382L may not both be counted. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 182P. Nonprescription Pharmacotherapeutics and Self-Care II Laboratory.**

Laboratory practice related to the pharmacist's consultant role in nonprescription product selection (including complementary and alternative medicine) and non-pharmacologic recommendations in self-care; includes fieldwork in a community pharmacy. One lecture hour and three laboratory or fieldwork hours a week for one semester. Pharmacy 172P and Pharmacy PharmD 182P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 182F (or Pharmacy 172E), and current intern registration with the Texas State Board of Pharmacy.

### **PHM 182R, 282R, 382R. Basic Studies in the Pharmaceutical Sciences.**

Basic exploration in any area of the pharmaceutical and clinical sciences. For each semester hour of credit earned, one lecture hour a week for one semester. Pharmacy 161J, 261J, 361J and Pharmacy PharmD 182R, 282R, 382R may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum; additional prerequisites vary with the topic.

### **PHM 182S, 282S. Foundations of Professional Development III.**

In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 161H, Pharmacy PharmD 182C, 282C, 181S, 282S. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 181D, or 281D, 181T or 281T (or Pharmacy 152H).

### **PHM 182T, 282T. Foundations of Professional Development IV.**

In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and

Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 172H, Pharmacy PharmD 182D, 282D, 182T, 282T. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 182C, or 282C, or 182S, or 282S (or Pharmacy 161H).

### **PHM 483. Pharmacotherapeutics of the Cardiovascular System.**

An integrated approach to the etiology and treatment of disease states of the cardiovascular system. The equivalent of four lecture hours a week for one semester. Pharmacy PharmD 483 and 685D (or Pharmacy 665E) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 480D, 182, 483, and 392P.

### **PHM 183C, 283C. Professional Development Convocation V.**

Professional development issues and assessments for PharmD students in the third professional year. Student fulfillment of professional and program-specific responsibilities (program evaluations, portfolios, administrative requirements), practice opportunities in pharmacy, and addressing the expected areas and levels of professional growth as the student advances through the curriculum. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 182H, Pharmacy PharmD 183C, 283C, 283S. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 182D, or 282D, or 282T, (or Pharmacy 172H).

### **PHM 183D, 283D. Professional Development Convocation VI.**

Professional development issues and assessments for PharmD students in the third professional year. Student fulfillment of professional and program-specific responsibilities (program evaluations, portfolios, administrative requirements), practice opportunities in pharmacy, and addressing the expected areas and levels of professional growth as the student advances through the curriculum. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 192H, Pharmacy PharmD 182R (Topic: PROFESNL DEVEL CONVOCATION VI), 183D, 283D, 283T. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 183C, or 283C, or 283S, (or Pharmacy 182H).

### **PHM 383E. Development of Interprofessional Education for Collaborative Practice.**

A collaboration between students in pharmacy, nursing, social work, and medicine in the development of educational modules addressing interprofessional education in collaborative practice relating to error disclosure, service learning, healthcare quality improvement. Preprofessional introduction to interprofessional education competencies. Three lecture hours a week for one semester. Pharmacy 383E and Pharmacy PharmD 383E may not both be counted. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 183F. Basic Intravenous Admixtures.**

Basic principles of injectable and other sterile dosage forms; methods of preparation and evaluation that meet current pharmacy practice standards. One lecture hour a week for one semester. Pharmacy 183F and Pharmacy PharmD 183F may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 388M (or

Pharmacy 356C), 188P (or Pharmacy 156P), and credit or registration for 183G (or Pharmacy 183G).

### **PHM 183G. Basic Intravenous Admixtures Laboratory.**

Basic laboratory principles in the preparation and evaluation of injectable and other sterile dosage forms. One lecture hour and three laboratory hours a week for one semester. Pharmacy 183G and Pharmacy PharmD 183G may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 388M (or Pharmacy 356C), 188P (or Pharmacy 156P) and credit or registration for 183F (or Pharmacy 183F).

### **PHM 383K. New Concepts, Topics, and Issues in Pharmacy Practice.**

Three lecture hours a week for one semester. Pharmacy 322P and Pharmacy PharmD 383K may not both be counted. Prerequisite: Credit or registration for Pharmacy PharmD 384L (or Pharmacy 364D).

### **PHM 183P. Pharmacotherapeutics I Laboratory.**

Problem-based laboratory course that integrates the pathophysiology, medicinal chemistry, pharmacology, and therapeutic aspects of various diseases in order to prepare students to make sound therapeutic decisions. Subjects introduced in Pharmacy PharmD 685D. Three laboratory hours a week for one semester. Pharmacy 165P and Pharmacy PharmD 183P may not both be counted. Prerequisite: Credit or registration for Pharmacy PharmD 685D (or Pharmacy 665E).

### **PHM 183R, 283R, 383R. Advanced Study in Pharmaceutical Research.**

For each semester hour of credit earned, three laboratory hours a week for one semester. No more than three semester hours may be counted toward the professional pharmacy elective requirement. May be repeated for credit. Prerequisite: Second-professional-year standing and consent of instructor and the dean.

### **PHM 183S, 283S. Foundations of Professional Development V.**

In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 182H, Pharmacy PharmD 183C, 283C, 183S, 283S. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 182D, 282D, or 182T, 282T, (or Pharmacy 172H).

### **PHM 183T, 283T. Foundations of Professional Development VI.**

In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 192H, Pharmacy PharmD 182R

(Topic: PROFESNL DEVEL CONVOCATION VI), 183D, 283D, 183T, 283T. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 183C, or 283C, or 183S, or 283S, (or Pharmacy 182H).

### **PHM 283U. Multidisciplinary Pain Management.**

Problem-based instruction to help health professions students acquire knowledge and skills in the care of patients with acute and chronic pain. Taught by faculty members in medicine, pharmacy, and nursing. Two lecture hours a week for one semester. Pharmacy 283U and Pharmacy PharmD 283U may not both be counted. Prerequisite: Consent of instructor.

### **PHM 184. Pharmacotherapeutics of the Gastrointestinal System and Nutrition.**

An integrated approach to the etiology and treatment of disease states of the gastrointestinal system. Also includes nutrition. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 184 and 385G (or Pharmacy 395G) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181, 184P, 185, 486, or consent of the dean.

### **PHM 384D. Antimicrobics: Mechanism of Action and Clinical Use.**

Mechanisms of antimicrobial activity and the development of bacterial resistance, and their relationship to clinical therapy. Three lecture hours a week for one semester. Pharmacy 384D and Pharmacy PharmD 384D may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 685E (or Pharmacy 675E) and 184P (or Pharmacy 175P).

### **PHM 284E. Pharmacy Law.**

State and federal pharmacy laws. Two lecture hours a week for one semester. Pharmacy 284E and Pharmacy PharmD 284E may not both be counted. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 184H. Antimicrobics: Advanced Inquiry.**

Designed to give students additional insight, beyond Pharmacy PharmD 384D, into the development of antimicrobial agents and the interactions of these agents with each other, the pathogen, and the patient. Students explore a self-selected topic for research and presentation. Conference course, with at least fifteen additional hours to be arranged. Pharmacy 184H and Pharmacy PharmD 184H may not both be counted. Offered on the letter-grade basis only. Prerequisite: Registration for Pharmacy PharmD 384D.

### **PHM 384K. Community Pharmacy Management.**

Advanced concepts in community pharmacy management for the student who plans to become a pharmacy owner or manager. Covers operational, personnel, and financial management; marketing; layout and design; and the delivery of pharmaceutical care in a community pharmacy setting. Three lecture hours a week for one semester. Pharmacy 326C and Pharmacy PharmD 384K may not both be counted. Prerequisite: Pharmacy PharmD 281L (or Pharmacy 244C).

### **PHM 384L. Pharmacy and the Health Care System.**

The health care system in the United States; principles of managed care; application of pricing policies; and an overview of pharmacy services. Three lecture hours a week for one semester. Pharmacy 364D and Pharmacy PharmD 384L may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 281L (or Pharmacy 244C) and 181P (or Pharmacy 144P).

### **PHM 284M. Pharmacy Professional Communications.**

Professional communication skills in interacting with patients and other health care professionals. One lecture hour and three laboratory hours a week for one semester, with additional hours to be arranged. Pharmacy 266P and Pharmacy PharmD 284M may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 287D (or Pharmacy 242D).

### **PHM 184N. Interprofessional Ethics.**

Explores ethical issues in pharmacy practice and health care, with a focus on the perspectives of professionals in the fields of nursing, law, social work, and medicine. One lecture hour a week for one semester. May include five additional discussion hours. Pharmacy 176E and Pharmacy PharmD 184N may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 281L (or Pharmacy 244C), 181P (or Pharmacy 144P), 384L (or Pharmacy 364D), and credit or registration for Pharmacy PharmD 282D (or Pharmacy 172H), 685E (Pharmacy 675E), and 184P (or Pharmacy 175P).

### **PHM 184P. Pharmacotherapeutics II Laboratory.**

Problem-based laboratory that integrates the pathophysiology, medicinal chemistry, pharmacology, and therapeutic aspects of various diseases in order to prepare students to make sound therapeutic decisions. Three laboratory hours a week for one semester. Pharmacy 175P and Pharmacy PharmD 184P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit for Pharmacy PharmD 685E (or Pharmacy 675E), or credit or registration for Pharmacy PharmD 181, 182, 483, 184, 185 and 486, or consent of the dean.

### **PHM 284S. Quality and Patient Safety Interprofessional Education.**

Concepts of patient safety and quality improvement. Current and past quality improvement projects are used to demonstrate the model of clinical safety and effectiveness. Reducing and preventing medical errors using the TeamSTEPPS approach; working in interprofessional teams on a quality improvement project. The equivalent of two lecture hours a week for one semester. Pharmacy 274S and Pharmacy PharmD 284S may not both be counted. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 185. Pharmacotherapeutics of Diabetes.**

An integrated approach to the etiology and treatment of diabetes. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 185 and 385G (or Pharmacy 395G) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181, 184, 486, 184P, or consent of the dean.

### **PHM 685D. Pharmacotherapeutics I.**

An integrated approach (pathophysiology, medicinal chemistry, pharmacology, and therapeutics) to the etiology and treatment of adrenergic-based diseases; cholinergic-based diseases; inflammatory diseases; hypertension; acute and chronic renal disease; and cardiovascular disease, including hyperlipidemia, circulatory problems, thromboembolic disease, myocardial ischemia, myocardial infarction, congestive heart failure, and arrhythmias. Six lecture hours a week for one semester. Pharmacy PharmD 181 and 685D (or Pharmacy 665E) may not both be counted. Pharmacy PharmD 182 and 685D (or Pharmacy 665E) may not both be counted. Pharmacy PharmD 483 and 685D (or Pharmacy 665E) may not both be counted. Pharmacy PharmD 685D (or Pharmacy 665E) and 190 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 282E (or Pharmacy 262D), 195Q (or Pharmacy 163C), 195P (or Pharmacy 163P) and 392P (or Pharmacy 392S).

### **PHM 685E. Pharmacotherapeutics II.**

An integrated approach (pathophysiology, medicinal chemistry, pharmacology, and therapeutics) to the pathogenesis and treatment of bacterial, viral, and fungal infections; immunizations against bacterial and viral diseases; and allergies, asthma, and chronic obstructive pulmonary disease. Six lecture hours a week for one semester. Pharmacy PharmD 685E (or Pharmacy 675E) and 486 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 685D (or Pharmacy 665E) and credit or registration for Pharmacy PharmD 182P (or Pharmacy 175P).

### **PHM 685F. Pharmacotherapeutics III.**

An integrated approach (pathophysiology, medicinal chemistry, pharmacology, and therapeutics) to the etiology and treatment of neurological and psychiatric disorders. Also includes therapeutics of pain management, anesthesia, drug addiction, and oncology. Six lecture hours a week for one semester. Pharmacy PharmD 685F (or Pharmacy 695F) and 288 may not both be counted. Pharmacy PharmD 685F (or Pharmacy 695F) or 291 may not both be counted. Pharmacy PharmD 685F (or Pharmacy 695F) and 292 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 685E (or Pharmacy 675E) and 182P (or Pharmacy 175P), and credit or registration for Pharmacy PharmD 185P (or Pharmacy 185P) and 385G (or Pharmacy 395G).

### **PHM 385G. Pharmacotherapeutics IV.**

An integrated approach (pathophysiology, medicinal chemistry, pharmacology, and therapeutics) to the etiology and treatment of hormonal disorders and gastrointestinal disorders. Three lecture hours a week for one semester. Pharmacy PharmD 184 and 385G (or Pharmacy 395G) may not both be counted. Pharmacy PharmD 185 and 385G (or Pharmacy 395G) may not both be counted. Pharmacy PharmD 385G (or Pharmacy 395G) and 187 may not both be counted. Pharmacy PharmD 385G (or Pharmacy 395G) and 189 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 685E (or Pharmacy 675E) and 182P (or Pharmacy 172P) and credit or registration for Pharmacy PharmD 185P (or Pharmacy 185P) and 685F (or Pharmacy 695F).

### **PHM 385H. Pharmacotherapeutics of Special Populations.**

Subjects include geriatrics, pediatrics, pharmacogenomics, transplant patients, and under-served populations. Three lecture hours a week for one semester. Pharmacy PharmD 385H (or Pharmacy 396D) and 193 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 390N (or Pharmacy 371S), 190P (or Pharmacy 171P), 182F (or Pharmacy 172E), 182P (or Pharmacy 172P), 185P (or Pharmacy 185P), 685F (or Pharmacy 695F), and 385G (or Pharmacy 395G).

### **PHM 185J. Independent Inquiry into Special Populations.**

Companion course to required course, Pharmacy PharmD 385H. Students identify a category issue associated with one of the four major modules of the course (under-served populations, geriatrics, pharmacogenomics, or pediatrics), and work closely with a faculty mentor to complete a comprehensive paper and presentation to the class. For each semester or credit hour earned, the equivalent of one lecture hour a week for one semester. Pharmacy 196G and Pharmacy PharmD 185J may not both be counted. Offered on the letter-grade basis only. Prerequisite: Registration for Pharmacy PharmD 385H.

### **PHM 385K. Applied Pharmacy Management.**

Examination and application of principles of pharmacy management, with emphasis on human resource management. Subjects include interviewing and selection techniques, assessing job performance, improving the work environment, leadership skills, management skills,

managing medication errors, and quality improvement of pharmacy services. Three lecture hours a week for one semester. Pharmacy 326M and Pharmacy PharmD 385K may not both be counted. Prerequisite: Pharmacy PharmD 281L (or Pharmacy 244C) and 181P (or Pharmacy 144P).

### **PHM 185P. Pharmacotherapeutics III Laboratory.**

Problem-based laboratory that integrates the pathology, medicinal chemistry, pharmacology, and therapeutic aspects of various diseases in order to prepare students to make sound therapeutic decisions. Three laboratory hours a week for one semester. Pharmacy 185P and Pharmacy PharmD 185P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit for Pharmacy PharmD 685E (or Pharmacy 675E), 185P (or Pharmacy 175P), 685F (or Pharmacy 695F), and 385G (or Pharmacy 395G); or credit or registration for Pharmacy PharmD 184P, 187, 288, 189, and 190; or consent of the dean.

### **PHM 486. Pharmacotherapeutics of Infectious Diseases.**

An integrated approach to the etiology and treatment of infectious disease. The equivalent of four lecture hours a week for one semester. Pharmacy PharmD 685E (or Pharmacy 675E) and 486 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181, 184, 184P, and 185; or consent of the dean.

### **PHM 386G. Spanish for the Pharmacy Professional.**

Intermediate communication skills in Spanish. Three lecture hours a week for one semester. Pharmacy 386G and Pharmacy PharmD 386G may not both be counted. Prerequisite: Completion of the second professional year in the College of Pharmacy, and one year of college-level Spanish or consent of instructor.

### **PHM 386H. Institutional Clinical Skills.**

Hands-on experience in an institutional practice care facility; examines pharmacy services, hospital pharmacy management, staff interaction, and the flow of information from pharmacy to bedside. Forty hours a week for two weeks. Pharmacy 377H and Pharmacy PharmD 386H may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy; and Pharmacy PharmD 287D (or Pharmacy 242D), 281L (or Pharmacy 244C), 181P (or Pharmacy 144P), 195Q (or Pharmacy 163C), 195P (or Pharmacy 163P), 384L (or Pharmacy 364D), 284M (or Pharmacy 266P), 190P (or Pharmacy 171P), 390N (or Pharmacy 371S), 282D (or Pharmacy 172H), 685E (or Pharmacy 675E), 182P (or Pharmacy 175P), 184N (or Pharmacy 176E) and 289P (or Pharmacy 277P, or 177G and 177P).

### **PHM 386K. Pharmacy Association Management.**

An introduction to the principles involved in managing pharmacy associations. Students gain practical experience in a community pharmacy. Nine hours of fieldwork a week for one semester. Only one of the following may be counted: Pharmacy 329C, 389C, and Pharmacy PharmD 386K. Prerequisite: Pharmacy PharmD 281L (or Pharmacy 244C) and 181P (or Pharmacy 144P) and consent of instructor.

### **PHM 186P. Advanced Pharmacotherapeutics Laboratory.**

Provides a safe, structured, and supportive laboratory setting for students to develop individual presentation skills necessary for professional practice. Presentations include journal clubs, development of data-driven drug therapy algorithms, and brief case presentations. One lecture hour and three laboratory hours a week for one semester. Pharmacy 194P and Pharmacy PharmD 186P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit for Pharmacy PharmD 685F (or Pharmacy 695F), 385G (or Pharmacy 395G), and 185P

(or Pharmacy 185P); or credit or registration for Pharmacy PharmD 185P, 291, 292, and 193; or consent of the dean.

### **PHM 186Q. Experiential Pharmacy Practice and Patient Counseling.**

Medication use and dispensing in a practice environment. Counseling skills and techniques for a better understanding of disease states and positive medication outcomes. Three laboratory hours a week for one semester. Pharmacy 176P and Pharmacy PharmD 186Q may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy, and credit or registration for Pharmacy PharmD 685D (or Pharmacy 665E) and 284M (or Pharmacy 266P).

### **PHM 286R. Advanced Contemporary Compounding.**

The art and science of compounding pharmaceutical preparations to develop an advanced understanding of formulation, stability, and quality standards of compounded pharmaceuticals. Focuses on pharmaceutical elegance; developing professional judgement based on limited data to assess the stability and efficacy of a compound before dispensing the preparation; the regulations governing compounding, including those outlined by the United States Pharmacopeial Convention, the Pharmacy Compounding Accreditation Board, and other scientific and professional organizations; mechanisms for evaluation and analysis of the quality of a compounded formulation; and marketing and promotion of compounding services. Two lecture hours a week for one semester. Pharmacy 256R and Pharmacy PharmD 286R may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 388M (or Pharmacy 356C) and 188P (or Pharmacy 156P).

### **PHM 186S. Advanced Contemporary Compounding Laboratory.**

Advanced compounding methods with respect to pharmaceutical dosage forms and formulations, with emphasis placed on creating formulations that satisfy unique patient needs, and a discussion of equipment used by compounding pharmacists to formulate preparations that satisfy those needs. Pharmacy PharmD 186S builds upon compounding skills taught in Pharmacy PharmD 188P. Three laboratory hours a week for one semester. Pharmacy 156S and Pharmacy PharmD 186S may not both be counted. Offered on the letter-grade basis only. Prerequisite: Registration for Pharmacy PharmD 286R.

### **PHM 187. Pharmacotherapeutics of the Endocrine System.**

An integrated approach to the etiology and treatment of disease states of the endocrine system. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 385G (or Pharmacy 395G) and 187 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181 and 184P or consent of the dean.

### **PHM 287D. Introduction to Patient Care.**

Basic aspects of caring for patients. Includes fieldwork in a local eldercare facility. One lecture hour and up to three laboratory hours a week for two semesters; and a minimum of twelve additional hours of fieldwork to be arranged over two semesters. Pharmacy 242D and Pharmacy PharmD 287D may not both be counted. Offered on the letter-grade basis only. Prerequisite: For Pharmacy PharmD 287DA, admission to the professional pharmacy curriculum; for 287DB, Pharmacy PharmD 287DA (or Pharmacy 242DA).

### **PHM 287H, 387H. Community Care Clinical Skills.**

Clinical work in a community-based pharmacy practice setting. Includes medication therapy management training, participation in the development of patient care plans, the ability to develop and conduct a public health project, carry out patient exercises, and complete

prescription management activities such as patient counseling. For Pharmacy PharmD 287H, 96 hours of fieldwork for one semester, for 387H, 120 hours of fieldwork for one semester. Pharmacy 287H and Pharmacy PharmD 287H, 387H may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy; Pharmacy PharmD 195Q (or Pharmacy 163C), 195P (or Pharmacy 163P), 384L (or Pharmacy 364D), 284M (or Pharmacy 266P), 182F (or Pharmacy 172E), 182P (or Pharmacy 172P), 184N (or Pharmacy 176E), 289P (or 277P) and 392P (or Pharmacy 392S).

### **PHM 187J, 287J, 387J. Advanced Problems in Pharmacy Education.**

Laboratory course examining professional education issues and techniques for students exploring an academic career. For each semester hour of credit earned, three laboratory hours a week for one semester. Only one of the following may be counted: Pharmacy 187J, 287J, 387J, Pharmacy PharmD 187J, 287J, 387J. Prerequisite: Completion of all first-year professional coursework and consent of the dean.

### **PHM 687K. Pharmacy Association Management Residency.**

Experience working in a pharmacy association, including active involvement in some managerial aspect of the association. Eighteen hours of fieldwork a week for one semester. Only one of the following may be counted: Pharmacy 629D, 689D, Pharmacy PharmD 687K. Prerequisite: Pharmacy PharmD 384L (or Pharmacy 364D) and consent of instructor.

### **PHM 387M. Physical and Chemical Principles of Drugs.**

Fundamental, introductory principles of pharmaceuticals, including thermodynamics, kinetics, and other basic chemical principles related to drugs. Three lecture hours a week for one semester. Pharmacy 342C and Pharmacy PharmD 387M may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum, and credit or registration for Pharmacy PharmD 187P (or Pharmacy 142P).

### **PHM 287N. Biopharmaceutics.**

Complements the basic pharmaceuticals principles covered in Pharmacy PharmD 387M. Subjects include core concepts in biopharmaceutics of drugs. Two lecture hours a week for one semester. Pharmacy 252C and Pharmacy PharmD 287N may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 187P. Physical and Chemical Principles of Drugs Laboratory.**

Problem-based learning exercises to reinforce the material presented in Pharmacy PharmD 387M. One lecture hour and three laboratory hours a week for one semester. Pharmacy 142P and Pharmacy PharmD 187P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum, and credit or registration for Pharmacy PharmD 387M (or Pharmacy 342C).

### **PHM 187R. Exploratory Research in Pharmacy.**

The student participates in ongoing in-depth research activities in pharmaceuticals, medicinal chemistry, toxicology, pharmacology, pharmacy administration, pharmacy practice, or pharmacotherapy. At least seven research hours a week for one semester. May be repeated for credit. Prerequisite: Pharmacy PharmD 181R (or Pharmacy 151R) and admission to the Pharmacy Honors Program, or consent of the dean.

### **PHM 288. Pharmacotherapeutics of Oncology and Transplant.**

An integrated approach to the etiology and treatment of disease states related to oncology and transplants. The equivalent of two lecture hours per week for one semester. Pharmacy PharmD 685F (or Pharmacy 695F) and 288 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181 and 184P, or consent of the dean.

### **PHM 288H. Pharmacy Honors Proposal and Tutorial Course.**

Honors seminar; development of laboratory research proposal for approval by the Honors Program Committee. One lecture hour and three hours of independent research a week for one semester. Pharmacy 278H and Pharmacy PharmD 288H may not both be counted. Prerequisite: Admission to the Pharmacy Honors Program.

### **PHM 388K. Hospital Pharmacy.**

Basic principles, standards, and procedures involved in providing professional pharmaceutical services in hospitals. Three lecture hours a week for one semester. Pharmacy 372K and Pharmacy PharmD 388K may not both be counted. Prerequisite: Admission to the professional pharmacy curriculum.

### **PHM 388M. Pharmaceutics.**

General introduction to dosage forms, and the technology and pharmaceutical rationale fundamental to their development. Three lecture hours a week for one semester. Pharmacy 356C and Pharmacy PharmD 388M may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 387M (or Pharmacy 342C) and 187P (or Pharmacy 142P) and credit or registration for Pharmacy PharmD 188P (or Pharmacy 156P).

### **PHM 188P. Pharmaceutics Laboratory.**

Laboratory course supporting the subjects discussed in Pharmacy PharmD 388M. One hour of pre-laboratory lecture and three laboratory hours a week for one semester. Pharmacy 156P and Pharmacy PharmD 188P may not both be counted. Prerequisite: Credit or registration for Pharmacy PharmD 388M (or Pharmacy 356C).

### **PHM 189. Pharmacotherapeutics of the Reproductive System.**

An integrated approach to the etiology and treatment of disease states related to reproductive health. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 385G (or Pharmacy 395G) and 189 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181 and 184P, or consent of the dean.

### **PHM 489H. Pharmacy Honors Thesis and Tutorial Course.**

Honors seminar; laboratory research project conducted under the supervision of one or more faculty members. One lecture hour and nine laboratory hours a week for one semester. Pharmacy 479H and Pharmacy PharmD 489H may not both be counted. Prerequisite: Pharmacy PharmD 288H (or Pharmacy 278H).

### **PHM 389K. Social Media and Consumer Healthcare.**

An exploration of how social media is transforming healthcare and improving patient outcomes. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 282E (or Pharmacy 262D), 182F (or Pharmacy 172E), and 182P (or Pharmacy 172P).

### **PHM 289P. Introduction to Clinical Skills Laboratory.**

Designed to develop the practical skills necessary in a pharmacy setting, with a focus on patient histories, how to read and interpret patient

charts, adult immunizations (including APhA certification), and training and certification in CPR from American Heart Association facilitators. Laboratory includes practical application of pharmacy clinical skills. One lecture hour and three laboratory hours a week for one semester. Pharmacy 277P and Pharmacy PharmD 289P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy; Pharmacy PharmD 284M (or Pharmacy 266P) and 392P (or Pharmacy 392S); and credit or registration for Pharmacy PharmD 685E (or Pharmacy 675E) and 184P (or Pharmacy 175P).

### **PHM 189S, 289S, 389S. Community Service Learning.**

Community-based participatory projects designed to connect coursework and community service experiences. Past and present health issues specific to the Texas region (such as United States-Mexico border issues), national and regional health initiatives, service challenges and opportunities, as well as personal/professional identities and responsibilities to the community. Projects developed in consultation with a faculty mentor and a selected community site. Includes an academic service-learning component. For each semester credit hour earned, one lecture hour a week for one semester; with a minimum of two fieldwork hours a week at a service-learning site to be arranged. Only one of the following may be counted: Pharmacy 169S, 269S, 369S, Pharmacy PharmD 189S, 289S, 389S. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 190. Pharmacotherapeutics of Dermatology and Inflammatory Processes.**

An integrated approach to the etiology and treatment of disease states of the dermis. Includes inflammatory responses. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 685D (or Pharmacy 665E) and 190 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181, PHM 184P, or consent of the dean.

### **PHM 390C. Communication Skills for Health Professionals.**

Designed for pharmacy, pre-pharmacy, premedical, pre dental, and nursing students. Enhancement of verbal communication skills for professional and public presentations, patient consultations, and interviewing. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 370C, Pharmacy PharmD 370C, or Pharmacy PharmD 390C. Offered on the letter-grade basis only.

### **PHM 290D. Nutritional Aspects of Clinical Pharmacy.**

Explores the interrelationships of nutrition, disease, and drug therapy, including aspects of both normal and clinical nutrition, nutritional deficiencies, and the metabolic consequences or diseases associated with malnutrition. Patient case studies examine both the effects of drug therapy on nutrition and the effects of nutrition on drug therapy. Disease states covered include cardiovascular disease, diabetes, hepatic and renal failure, and anemia. Two lecture hours a week for one semester. Pharmacy 270D and Pharmacy PharmD 290D may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 685F (or Pharmacy 695F) and 385G (or Pharmacy 395G).

### **PHM 390K. Clinical Management of Drug-Drug Interactions.**

Group discussions with an emphasis on clinically relevant drug-drug interactions, mechanisms, significance, and clinical management. Three lecture hours a week for one semester. Prerequisite: Completion of the second professional year in the College of Pharmacy and consent of instructor.

### **PHM 290L. Introduction to Nuclear Pharmacy.**

An overview of nuclear pharmacy, a recognized specialty area of pharmacy practice focusing on the compounding and dispensing of radioactive materials for use in nuclear medicine procedures (therapeutic, diagnostic, and imaging). Two lecture hours a week for one semester. Pharmacy 270N and Pharmacy PharmD 290L may not both be counted. Prerequisite: Pharmacy PharmD 287N (or Pharmacy 252C), 190P (or Pharmacy 171P) and 390N (or Pharmacy 371S); or consent of instructor.

### **PHM 290M. Inpatient Adult Medicine.**

Clinical therapeutic management of adult patients in an inpatient, institutional (primarily hospital) setting. Two lecture hours a week for one semester. Pharmacy 270M and Pharmacy PharmD 290M may not both be counted. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 390N. Integrated Basic and Applied Pharmacokinetics.**

Introduction to pharmacokinetic principles; and the application of principles to specific drugs and patient situations. Three lecture hours a week for one semester. Pharmacy 371S and Pharmacy PharmD 390N may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 387M (or Pharmacy 342C), 187P (or Pharmacy 142P), 287N (or Pharmacy 252C), 388M (or Pharmacy 356C), and 188P (or Pharmacy 156P); and credit or registration for Pharmacy PharmD 171P (or Pharmacy 171P), 675E (or Pharmacy 675E), and 175P (or Pharmacy 175P).

### **PHM 190P. Integrated Basic and Applied Pharmacokinetics Laboratory.**

Problem-based and case-based application of pharmacokinetic principles to specific drugs and patient situations. One lecture hour and three laboratory hours a week for one semester. Pharmacy 171P and Pharmacy PharmD 190P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 390N (or Pharmacy 371S).

### **PHM 390S. Interprofessional Community Service Learning.**

Integration of community service with contemporary pharmacy practice, with a focus on social justice and social determinants of health care. Weekly online didactic modules, a minimum of fifty hours of service learning practicum with a community partner, and twice monthly group meetings. Pharmacy 370S and Pharmacy PharmD 390S may not both be counted. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy.

### **PHM 390T. Pharmacy International Exchange.**

Work in an exchange program with international colleges and schools of pharmacy as partners. Examination of similarities and differences between pharmacy education, professional practice, and/or research in the hosting country and in the United States. Forty hours of fieldwork a week for one semester. Pharmacy 390T and Pharmacy PharmD 390T may not both be counted. Prerequisite: Completion of the first professional year in the College of Pharmacy and consent of instructor.

### **PHM 390V. Patient Safety.**

Covers methods to ensure patient safety, prevent misadventures, and develop policy associated with patient safety and misadventure prevention. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 361J (Topic: Patient Safety and You), 390V, and Pharmacy PharmD 390V. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 284M (or Pharmacy 266P).

### **PHM 290W. Health Leadership.**

Develops skills necessary to identify and establish professional goals, build and lead teams, delegate effectively, resolve conflicts, network for career advancement, document leadership experiences/abilities on curriculum vitae and in recommendation letters, and demonstrate leadership abilities during job interviews. Two lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 261J (Topic: Health Leaders), 290W or Pharmacy PharmD 290W. Offered on the letter-grade basis only.

### **PHM 291. Pharmacotherapeutics of Pain and Addiction.**

An integrated approach to the etiology and treatment of disease states related to pain and addiction. The equivalent of two lecture hours per week for one semester. Pharmacy PharmD 685F (or Pharmacy 695F) and 291 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181 or consent of the dean.

### **PHM 291K. Pediatric Pharmacotherapy.**

Pathophysiology and pharmacotherapy of selected pediatric diseases. Designed to expose students to pediatric pharmacy as a potential area of focus, and to prepare them for a potential residency or practice in providing pharmaceutical care in a pediatric setting. Two lecture hours a week for one semester. Pharmacy 282Q and Pharmacy PharmD 291K may not both be counted. Prerequisite: Completion of the first professional year in the College of Pharmacy.

### **PHM 191L. Leadership in Community Service Learning.**

Designed for students enrolled in Pharmacy PharmD 390S and 381H who elect to serve in a leadership role for the community service-learning project. Involves coordination and organization of responsibilities at each phase of the project, communication with community partners, and additional outreach based on the needs of the community partner. Includes development of a plan and dissemination of the project outcomes. A minimum of six in-person meetings with the instructor, with additional meetings scheduled as needed, including online and by telephone. Pharmacy 171L and Pharmacy PharmD 191L may not both be counted. Prerequisite: Credit or registration for Pharmacy PharmD 390S (or Pharmacy 370s) or 381H (or Pharmacy 381H).

### **PHM 291M. Introduction to Ambulatory Care Pharmacy.**

Clinical and non-clinical topics relevant to treating commonly encountered disease states, effectively communicating with patients, and managing a clinical pharmacy practice in an ambulatory setting. Emphasis on application of concepts learned in previous classes to real-world situations. Two lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Graduate standing; Pharmacy PharmD 282E, and 182F, and 182P.

### **PHM 191U. Foundations for Interprofessional Collaborative Practice I.**

Restricted to students in the College of Pharmacy. Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team. One lecture hour per week and six interprofessional sessions for one semester. Offered on the letter-grade basis only.

### **PHM 191V. Foundations for Interprofessional Collaborative Practice II.**

Restricted to students in the College of Pharmacy. Introduces and reinforces interprofessional education core competencies delivered

through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team. One lecture hour per week and six interprofessional sessions for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 191U.

#### **PHM 391W. Leadership and Advocacy in Pharmacy.**

A discussion forum for exploring current legislative and regulatory issues influencing the pharmacy profession. Focuses on retrieving legislative and regulatory information, interpreting legislation, regulations and their potential impacts, engaging in discussion on various perspectives of the issues and presenting information on legislation and regulations that impact pharmacy practice. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 361J (Topic: Leadership and Advocacy in Pharmacy), 391W, and Pharmacy PharmD 391W. Offered on the letter-grade basis only. Prerequisite: Admission to the professional pharmacy curriculum.

#### **PHM 292. Pharmacotherapeutics of Psychiatric Disorders.**

An integrated approach to the etiology and treatment of disease states related to psychiatrics. The equivalent of two lecture hours per week for one semester. Pharmacy PharmD 685F (or Pharmacy 695F) and 292 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181 or consent of the dean.

#### **PHM 292G, 392G. Herbal and Botanical Supplements.**

A practice-based approach to learning about the most common herbal and botanical supplements in a pharmacy practice setting, including review of studies of popular uses, clinical indications, pharmacological effects, mechanisms of action, side effects, contraindications, and common dosage guidelines. Discussion of the legal, regulatory, and ethical aspects, in addition to analyzing manufacturing quality issues and counterfeit products is also addressed. For each semester hour of credit earned, one lecture hour a week for one semester. Only one of the following may be counted: Pharmacy 292G, 392G, Pharmacy PharmD 292G, 392G. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 282E (or Pharmacy 262D), 195Q (or Pharmacy 163C), and 182F (or Pharmacy 172E).

#### **PHM 392P. Patient Assessment Skills Laboratory.**

Introduction to patient assessment techniques skills needed to provide pharmaceutical care. Two lecture hours and three laboratory hours a week for one semester. Pharmacy 392S and Pharmacy PharmD 392P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy, and Pharmacy PharmD 480C (or Pharmacy 253C) and 480D (or Pharmacy 253D).

#### **PHM 192U. Foundations for Interprofessional Collaborative Practice III.**

Restricted to students in the College of Pharmacy. Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team. One lecture hour per week and six interprofessional sessions for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 191V.

#### **PHM 192V. Foundations for Interprofessional Collaborative Practice IV.**

Restricted to students in the College of Pharmacy. Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team. One lecture hour per week and six interprofessional sessions for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 192U.

#### **PHM 193. Pharmacotherapeutics of Neurologic Disorders.**

An integrated approach to the etiology and treatment of disease states related to neurology. The equivalent of one lecture hour per week for one semester. Pharmacy PharmD 385H (or Pharmacy 396D) and 193 may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 181 or consent of the dean.

#### **PHM 693C. Ambulatory Care Pharmacy Practice.**

Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of ambulatory patient care. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 693C and Pharmacy PharmD 693C may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C), 694E (or Pharmacy 694E), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

#### **PHM 693E. Elective in Pharmacy Practice I.**

Experience in pharmacy practice, research, or administration. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 693E and Pharmacy PharmD 693E may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C), 694E (or Pharmacy 694E), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

#### **PHM 693N. Advanced Hospital Pharmacy Practice.**

Analysis of pharmacotherapy, evaluation of drug use, synthesis of rational drug regimens, and dispensing of medications in the context of institutional patient care. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 693N and Pharmacy PharmD 693N may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C), 694E (or Pharmacy 694E), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

**PHM 693P. Advanced Community Pharmacy Practice.**

Analysis of pharmacotherapy, evaluation of drug use, synthesis of rational drug regimens, and dispensing of medications in the context of community-based patient care. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 693P and Pharmacy PharmD 693P may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C), 694E (or Pharmacy 694E), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

**PHM 693R. Supplemental Rotation in Pharmacy Practice I.**

Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of patient care. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. May be repeated for credit. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy.

**PHM 693S. Selective in Pharmacy Practice I.**

Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in a selected pharmacy practice environment. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 693S and Pharmacy PharmD 693S may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 694C (or Pharmacy 694C), 694E (or Pharmacy 694E), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

**PHM 193U. Foundations for Interprofessional Collaborative Practice V.**

Restricted to students in the College of Pharmacy. Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team. One lecture hour per week and six interprofessional sessions for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 192V.

**PHM 193V. Foundations for Interprofessional Collaborative Practice VI.**

Restricted to students in the College of Pharmacy. Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team. One lecture hour per week and six interprofessional sessions for one semester. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 193U.

**PHM 693W. Elective International Pharmacy Experience.**

Competitive placement for an international advanced pharmacy experience. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 693W and Pharmacy PharmD 693W may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy.

**PHM 694C. Inpatient General Medicine Pharmacy Practice.**

Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of acute patient care. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 694C and Pharmacy PharmD 694C may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694E (or Pharmacy 694E), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

**PHM 694E. Elective in Pharmacy Practice II.**

Experience in pharmacy practice, research, or administration. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 694E and Pharmacy PharmD 694E may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C), 694S (or Pharmacy 694S), or 695E (or Pharmacy 695E).

**PHM 394F. Pharmacoeconomics.**

Terms, concepts, procedures, methods, problems, and strengths associated with pharmacoeconomics. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 393T, 394F, Pharmacy Graduate Studies 393T, Pharmacy PharmD 394F. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 384L (or Pharmacy 364D) or consent of instructor.

**PHM 694R. Supplemental Rotation in Pharmacy Practice II.**

Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of patient care. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. May be repeated for credit. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy.

**PHM 694S. Selective in Pharmacy Practice II.**

Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in selected pharmacy practice environments. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 694S and Pharmacy PharmD 694S may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following:

Pharmacy PharmD 693C (or Pharmacy 693C), 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C) 694E (or Pharmacy 694E), or 695E (or Pharmacy 695E).

### **PHM 695E. Elective in Pharmacy Practice III.**

Experience in pharmacy practice, research, or administration. Forty laboratory hours a week for at least six weeks, with additional hours to be arranged. Pharmacy 695E and Pharmacy PharmD 695E may not both be counted. Offered on the credit/no credit basis only. Prerequisite: Current intern registration with the Texas State Board of Pharmacy and completion of all didactic and laboratory coursework prior to the fourth professional year in the College of Pharmacy; during the fall and spring semesters, concurrent enrollment in two of the following: Pharmacy PharmD 693C (or Pharmacy 693C), 693E (or Pharmacy 693E), 693N (or Pharmacy 693N), 693P (or Pharmacy 693P), 693S (or Pharmacy 693S), 694C (or Pharmacy 694C) 694E (or Pharmacy 694E) or 694S (or Pharmacy 694S).

### **PHM 195P. Drug Information and Evidence-Based Practice Laboratory.**

Practical application of the concepts presented in Pharmacy 195Q. Includes assignments, projects, and oral presentations. Three laboratory hours a week for one semester. Pharmacy 163P and Pharmacy PharmD 195P may not both be counted. Offered on the letter-grade basis only. Prerequisite: Credit or registration for Pharmacy PharmD 282E (or Pharmacy 262D), 195Q (or Pharmacy 163C), and 685D (or Pharmacy 665E).

### **PHM 195Q. Drug Information and Evidence-Based Practice.**

Knowledge and skills needed to retrieve and interpret drug information. Interpretation of biomedical literature and an introduction to concepts of evidence-based practice. One lecture hour a week for one semester. Pharmacy 163C and Pharmacy PharmD 195Q may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 287D (or Pharmacy 242D); or credit or registration for Pharmacy PharmD 282E (or Pharmacy 262D), 195P (or Pharmacy 163P), and 685D (or Pharmacy 665E).

### **PHM 295R. Advanced Evidence-Based Practice.**

Research methodology and biostatistical concepts as they relate to the interpretation and critical evaluation of biomedical literature. Designed to build upon the material covered in Pharmacy PharmD 195Q. Two lecture hours a week for one semester. Pharmacy 295R and Pharmacy PharmD 295R may not both be counted. Offered on the letter-grade basis only. Prerequisite: Pharmacy PharmD 195Q (or Pharmacy 163C), 195P (or Pharmacy 163P), 185P (or Pharmacy 185P), 685F (or Pharmacy 695F), and 385G (or Pharmacy 395G).

### **PHM 398T. College Teaching Methodology.**

Interdisciplinary course intended to provide a foundation of theoretical and practical knowledge relating to teaching at the postsecondary level. Subjects include instructional methods, instructional design, practice teaching, teaching philosophy, instructional technology, and assessment of learning. Includes class discussions and individual consultations. Three lecture hours a week for one semester. Only one of the following may be counted: Pharmacy 368T, 398T, Pharmacy Graduate Studies 398T, Pharmacy PharmD 398T. Offered on the letter-grade basis only. Prerequisite: Completion of the second professional year in the College of Pharmacy, or consent of instructor.

# Lyndon B. Johnson School of Public Affairs

Angela Evans, MA, *Dean*  
David Springer, PhD, *Associate Dean (Interim)*  
<http://www.utexas.edu/lbj/>

## General Information and Courses

The Lyndon B. Johnson School of Public Affairs offers the Master of Global Policy Studies, the Master of Public Affairs, and the Doctor of Philosophy with a major in public policy. Information is given in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/public-affairs/>) about these programs and about the requirements for admission to graduate study.

In addition to the graduate courses described in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/public-affairs/graduate-courses/>), the faculty has approval to offer the following courses in the academic years 2018-2019 and 2019-2020; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules/>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* (<http://registrar.utexas.edu/schedules/>) may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/credit-value-and-course-numbers/>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course; if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

## Public Affairs: P A

### Lower-Division Courses

#### P A 310C. Public Policy.

Skill topics, including economics, quantitative methods, public financial management, policy development, and public administration. Three lecture hours a week for one semester. Public Affairs 310C and 330C may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

#### P A 310S. Public Policy Seminar.

Seminar with topics related to domestic or international public policy. Three lecture hours a week for one semester. Public Affairs 310S and 330S may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

### Upper-Division Courses

#### P A 325. Topics in Policy.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

**Topic 1: Advanced Seminar in Ethical Leadership.** Public Affairs 325 (Topic: Advanced Seminar in Ethical Leadership) and 325 (Topic 1) may not both be counted.

**Topic 2: Defense Policy.** Only one of the following may be counted: Government 360N (Topic: Defense Policy), 360N (Topic: Defense Policy: Honors), Liberal Arts Honors 350 (Topic: Defense Policy),

350 (Topic 1), Public Affairs 325 (Topic: Defense Policy), 325 (Topic: Defense Policy: Honors), 325 (Topic 2).

#### P A 326. Topics in Policy.

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

#### P A 330C. Public Policy.

Skill topics, including economics, quantitative methods, public financial management, policy development, and public administration. Three lecture hours a week for one semester. Public Affairs 310C and 330C may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

#### P A 330S. Public Policy Seminar.

Seminar with topics related to domestic or international public policy. Three lecture hours a week for one semester. Public Affairs 310S and 330S may not both be counted unless the topics vary. May be repeated for credit when the topics vary.

#### P A 150. Public Service and Practice.

Restricted to sophomore, junior, and senior-level undergraduates. Topics related to public service fields and the skills used by effective leaders. One lecture hour a week for one semester, with additional hours for some topics. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

#### P A 150S. Issues in Public Service.

Topics in issues and decision-making that arise in the practice of public service. One lecture hour a week for one semester, with additional hours for some topics. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing.

#### P A 159R. Public Policy Issues.

Current issues in public policy. The equivalent of one lecture hour a week for one semester, with additional hours to be arranged. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

**Topic 1: UT Energy Symposium.** Only one of the following may be counted: Public Affairs 158S (Topic: UT Energy Symposium), 159R (Topic: UT Energy Symposium), 159R (Topic 1), 159S (Topic: UT Energy Symposium). Offered on the pass/fail basis only. Additional prerequisite: Upper-division standing.

#### P A 159S. Public Policy Issues.

Current issues in public policy. Hours to be arranged. May be repeated for credit when the topics vary.

#### P A 159T. Public Policy Issues.

Current issues in public policy. Hours to be arranged. May be repeated for credit when the topics vary. Offered on the letter-grade basis only.

# Steve Hicks School of Social Work

## General Information

### Accreditation

The bachelor of social work degree program is accredited by the Council on Social Work Education.

### Mission

The Steve Hicks School of Social Work provides professional education and leadership in social work practice, research, and service to promote social and economic justice, enhance social welfare, and build strong community-University partnerships.

The mission of the Bachelor of Social Work (BSW) program is to prepare students as beginning level generalist professional social work practitioners who are committed to the provision of services that further the well-being of people and who promote social and economic justice. Building on a broad liberal arts framework, the BSW curriculum is designed to develop generalist practitioners who have an understanding of social work knowledge and values and are able to select different methods and resources to meet identified client needs, while recognizing and engaging the strengths of the client in the process. The curriculum offers students the opportunity to learn to promote, restore, maintain, and enhance the social functioning of multiple levels of systems in the environment, including individuals, families, small groups, organizations, and communities; to recognize worker and client limitations; and to know when to refer clients to other resources.

The BSW student is given the opportunity to learn to work collaboratively in a variety of settings using an ecosystems/developmental perspective; to recognize the relationships between client needs and public issues; to work toward the development of social policies, resources, and programs that meet basic human needs and empower at-risk groups; and to be sensitive to the diversities among individuals, including ethnicity, gender, age, sexual orientation, religion, and ability. The program is intended to prepare reflective, self-evaluating practitioners who have a strong identification with the social work profession and work to alleviate poverty, oppression, and discrimination.

Graduates of the program are expected to be able to enhance the problem-solving, coping, and developmental capacities of individuals, especially those from at-risk populations. They also are expected to contribute to the effective and humane operation of the systems within the environment that provide individuals with resources, services, and opportunities; to link individuals in need with the appropriate systems; and to contribute to the development and improvement of social policies that have an impact on people and their social environments, especially by empowering at-risk groups and by promoting social and economic justice.

The BSW program is integrated with and builds upon a liberal arts base that includes knowledge in language arts, the humanities, and the social, behavioral, and natural sciences. The curriculum includes content in social work values, diversity and at-risk populations, social and economic justice, human behavior and the social environment, research, social welfare policy and services, and social work intervention.

## Program Objectives

Students graduating from the BSW program are expected to demonstrate the following characteristics:

1. A professional identity that incorporates the values and ethics of the social work profession and the professional development of self.
2. The ability to work with diverse populations with an understanding of, and respect for, the positive value of diversity, including ethnicity, gender, sexual orientation, age, ability, and religion, and to use communication skills differentially with diverse groups.
3. An understanding of the forms and mechanisms of oppression and discrimination.
4. The ability to apply strategies and skills that advance social and economic justice and to address the oppression of at-risk populations.
5. An understanding of the biological, psychological, social, and cultural contexts of changing client systems, including individuals, families, groups, organizations, communities, and the broader society, and their effects on development and behavior.
6. Beginning level competencies in research and evaluation, including the ability to evaluate research studies and apply their findings to practice, and, under supervision, evaluate their own practice interventions and those of other relevant systems.
7. An understanding of how social policy develops and differentially affects various client systems, workers, and agencies.
8. An understanding of the role the social work profession has played in promoting social change, historically and currently.
9. The attainment of knowledge and skills that demonstrate the ability to practice effectively with individuals, families, groups, organizations, and communities, in a manner that empowers client systems and uses their strengths in order to maximize their health and well-being.
10. An ability to apply critical thinking skills within the context of professional social work roles and practice.
11. An awareness of their responsibility to continue their professional growth and development, including the use of supervision appropriate to generalist practice.

## History

The Steve Hicks School of Social Work was established as a graduate program in 1949 and began classes in the fall of 1950 with 24 students enrolled in the Master of Science in Social Work (MSSW) program. Undergraduate courses in social work were first offered in 1958. These were incorporated into a full Bachelor of Social Work (BSW) program in the fall of 1974.

The first BSW degree was awarded in December 1977. Since that time, the program has been strengthened by curriculum modifications reflecting changes in the profession and in society that have implications for beginning social work practice.

The Steve Hicks School of Social Work also offers programs leading to the Master of Science in Social Work and the Doctor of Philosophy. These are described in the *Graduate Catalog* (<http://catalog.utexas.edu/graduate/fields-of-study/social-work>).

## Facilities

The Steve Hicks School of Social Work Building (1925 San Jacinto Boulevard) provides space for social work classes, including classrooms equipped for distance learning and an instructional technology classroom; offices for faculty and staff; an advising center and student services area; and a student lounge. The building also houses the Learning Resource Center (LRC), which has an extensive collection of social work related books, journals, and other publications partially funded by the Josleen Lockhart Memorial Book Fund. The LRC includes a computer laboratory for student use and provides space, equipment, and technical assistance for studying, meetings of small groups of students, viewing audiovisual materials, videotaping, and completing other skills-based learning assignments. The Steve Hicks School of Social Work Building also houses the Center for Social Work Research, the DiNitto Center for Career Services, and Con Mi Madre.

## Financial Assistance Available through the School

Although many University scholarships are awarded through the Office of Financial Aid, a limited number are awarded by the Steve Hicks School of Social Work to undergraduate social work students. Awards are made for reasons ranging from academic promise to financial need. Scholarship information, including eligibility requirements and the application process, is available through the Office of Academic Affairs. Additional scholarships funded by yearly contributions to the Steve Hicks School of Social Work are awarded to undergraduate social work students who are nominated by faculty on the basis of academic excellence, financial need and potential contributions to the social work profession.

## Student Services

### Academic Advising

The Office of Academic Affairs in the Steve Hicks School of Social Work seeks to assist the student in exploring social work as a career choice, in planning an academic program suited to the student's interests and talents, in seeking help with academic or personal problems, and in post-graduation planning, whether for employment or for further study. The Office of Academic Affairs also provides administrative support and student services, including maintenance of academic records, provision of official degree audits, and graduation certification for social work majors. Faculty and staff members are also available to assist students with questions about scholarship programs, degree requirements, rules and regulations, and other available campus services. Students who declare an interest in completing the social work program are required to meet with a social work adviser at least once each semester for academic advising. To arrange an appointment with an adviser, students should contact the Office of Academic Affairs.

During the student's first and second academic years, the student and the adviser discuss the student's career choice, the selection of a major, degree requirements, and requirements for admission to the major and to upper-division courses in social work; during the third year, the course work required for the major and the student's preparation for entry into the field practicum; and during the fourth year, the field practicum and the student's post-graduation plans.

### Career Choice Information

Students interested in social work as a career are encouraged to discuss this interest at any time with a social work adviser. Advisers are available in the Office of Academic Affairs to help students explore social work practice and settings and the development of interest in social work through academic, volunteer and service learning experiences. Students are encouraged to use the variety of career services available through

the DiNitto Center for Career Services (<http://www.utexas.edu/ssw/dccs>).

Members of the social work faculty are available to assist the student in choosing a career, as are the staff and resources of the University's Sanger Learning Center, the Volunteer and Service Learning Center, and the Center for Strategic Advising and Career Counseling in the School of Undergraduate Studies. Since the social work program requires admission to the major and completion of 122 semester hours, students are encouraged to discuss their interest in social work as a career early in their studies.

## Career Services

Career development services are provided to students preparing to enter the professional job market. Students should inquire in the DiNitto Center for Career Services, Steve Hicks School of Social Work Building 2.214. The office maintains a listserv of employment opportunities and provides information about social work careers, graduate programs, online resources, and other opportunities for professional development, volunteer and service learning placements, and social work licensure. Workshops and other programs are offered on the fields of social work practice, résumé preparation, and job search and interview skills.

Professional social workers may seek employment in a number of areas. The Texas Department of Aging and Disability Services has established quality control standards that mandate the hiring of holders of BSW degrees in designated positions. The Texas Department of Family and Protective Services hires social workers for its child protective services programs, and the Texas Health and Human Services Commission hires BSW graduates for its client support services programs. Large nursing home facilities are also required to have a social work staff. Substance use disorder treatment programs, psychiatric hospitals, health care programs, school social work and dropout prevention programs, criminal justice programs, and programs for the elderly also employ social workers. More than a third of the program's graduates go on to graduate schools throughout the country.

As a complement to the assistance available from the school, the University's Sanger Learning Center in Jester Center and the Center for Strategic Advising and Career Counseling in the School of Undergraduate Studies provide comprehensive career services to all students. The centers offer professional assistance to students in choosing or changing their majors or careers, seeking an internship, and planning for the job search or for graduate study.

The University makes no promise to secure employment for each graduate.

## Social Work Council

The Social Work Council is an organization open to all students pursuing a social work degree or interested in the social work profession. The purposes of the council are to help students acquire a better understanding of the profession of social work, to provide a mechanism for student input on issues related to the social work curriculum and the school, and to organize and support social work related programs and projects that will benefit students, the school, the University, and the community.

Council activities are often conducted in collaboration with the Office of Academic Affairs. They include orientations to the BSW and MSSW programs, a career night, forums with guest speakers from community agencies and the University, community service projects, special interest groups that meet to discuss social work related topics, and social gatherings. Members of the Council represent student concerns as

voting members of the school's curriculum committees, the Senate of College Councils, and the Student Government.

## Professional Liability Insurance

Students must purchase professional liability insurance while they are enrolled in the field practicum. The cost is about \$15 a semester. Payment is coordinated by the Field Office of the Steve Hicks School of Social Work. A criminal background check may be required as well.

## Admission and Registration

### Admission

#### Admission to the University

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is provided in *General Information* (<http://catalog.utexas.edu/general-information/admission>).

#### Admission Policies of the School

The Steve Hicks School of Social Work maintains two classifications of undergraduate students: pre-social work majors and social work majors. Pre-social work majors are usually freshmen and sophomores. After completing the requirements below, a student may apply for admission to the professional curriculum as a social work major. Students who are admitted into the major complete at least three semesters of social work coursework and any other remaining degree requirements. Students who fulfill all degree requirements receive a Bachelor of Social Work degree.

The professional practice of social work requires people who are above average in academic ability and performance, sufficiently emotionally mature to assume a helping role with people under stress, and committed to the ethical standards and performance demands of social work practice. Students are encouraged to use the advising services in the Steve Hicks School of Social Work early in their college careers in anticipation of meeting requirements for admission to the major. A student who is interested in seeking a social work degree must discuss his or her intentions with a social work adviser before applying for admission to the program.

#### Admission to the School as a Pre-Social Work Major

A student may transfer from another division of the University to the Steve Hicks School of Social Work in accordance with the regulations given in *General Information* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees/transfer-from-one-division-to-another-within-the-university>).

A University student who wants to transfer as a pre-social work major must meet the following requirements:

1. Completion of at least 12 semester hours of coursework in residence at the University. Credit earned by exam, correspondence, and extension may not be counted toward this requirement.
2. A cumulative in-residence grade point average of at least 2.00.
3. If social work coursework has been completed prior to the application, a grade point of at least 2.50 in those courses is required, and all social work courses must have been completed with a grade of at least C.

Only currently enrolled students may apply. Forms to apply for internal transfer are available through the Steve Hicks School of Social Work Office of Academic Affairs.

Admission to the Steve Hicks School of Social Work is offered on a space-available basis to the students who are best qualified.

Students with over 90 semester hours of coursework or a completed degree are encouraged to consider other options, such as completing a degree in their current college/school or alternate institution with the option of pursuing a MSSW degree at a later date.

### Admission to the Major in Social Work

No student may enter the professional curriculum (the required upper-division social work courses) unless he or she has been admitted to the University as described in *General Information* (<http://catalog.utexas.edu/general-information/admission>) and has been admitted to the major in social work by the assistant dean for undergraduate programs, following recommendation by the BSW Curriculum Committee, according to the procedures below. All students are considered according to the policies given in the editions of the General Information catalog and the Undergraduate catalog that are in effect at the time of the application.

The Steve Hicks School of Social Work considers students for admission to the major twice a year, during the fall and spring semesters. A student who enters the University as a freshman in a fall semester will usually apply for admission to the professional curriculum in the spring semester of the sophomore year or the fall semester of the junior year. Admission applications are distributed during mandatory information sessions held by the Office of Academic Affairs. The application allows the student to describe his or her background and motivation to enter the social work profession as well as any special experiences that enhance his or her application.

The Steve Hicks School of Social Work limits admission to the major to the number of students for whom a professional education of high quality can be provided. Because of enrollment restrictions dictated by the availability of faculty members and facilities, some applicants may be denied admission even though they meet the following minimum requirements.

1. The applicant must have completed at least 45 semester hours of coursework, including at least 30 hours chosen from the following requirements:
  - a. All requirements of the University's Core Curriculum (p. 23)
  - b. Sociology 302
  - c. Psychology 301
  - d. One three-semester-hour course in human biology: Biology 301L, 301M, 309D, or 311C
  - e. Second-semester-level proficiency, or the equivalent, in a single foreign language
  - f. A three-semester-hour course in economics
2. The applicant must have completed the following courses with a grade of at least C in each course: Social Work 310, 312, 313, 318, and 325. He or she must also have a University grade point average of at least 2.50 in courses that are part of the social work major requirements. Social Work 310 must be completed a semester before applying to the major.
3. The applicant must have a University grade point average of at least 2.00.
4. Application for admission must be made on forms available from the Office of Academic Affairs in the Steve Hicks School of Social Work.
5. The following must be submitted to the BSW Program by the application deadline:
  - a. The completed application for admission to the professional curriculum
  - b. A personal statement as explained on the application

- c. At least two recommendation forms completed by appropriate individuals who can attest to the applicant's academic and professional readiness to enter the program
  - d. Documentation of successful completion of at least 45 hours of supervised service learning involving direct contact with clients in a human services organization
  - e. Official transcripts from all colleges attended, if the coursework has not been transferred to the student's University record
  - f. Score reports for any credit earned by examination, if the scores are not on the student's University record
6. The applicant may be asked to appear for a personal interview.

The applicant is considered on the basis of academic performance and their commitment to and suitability for generalist social work practice. The committee also assesses the applicant's emotional and professional readiness to work with clients on the basis of such factors as their work in courses already taken, previous meetings with social work advisers, personal statement, and the interview, if any, that is part of the application process. As a general guide, the committee also uses the *Student Standards for Social Work Education*, available at [www.utexas.edu/ssw/current/forms/](http://www.utexas.edu/ssw/current/forms/), which delineates expectations for social work students in four areas: basic abilities to acquire professional skills, mental and emotional abilities, professional performance skills, and scholastic performance. The *Standards* can be found in the appendix of the *BSW Handbook*, available at [www.utexas.edu/ssw/current/forms/](http://www.utexas.edu/ssw/current/forms/).

A student who is unable to attend in the semester for which he or she is admitted must reapply for admission in order to enroll at a later time. A student who has been admitted to and enrolls in the professional curriculum, withdraws, and then wishes to return must apply for readmission on the basis of the curriculum in effect at the time of the return. A student who has been out of the University for a semester or more must also submit an application for readmission to the University.

## Transfer Credit

As part of the application for admission to the University, students must submit transcripts from all other colleges and universities they have attended to the University's Office of Admissions. Students seeking readmission must submit transcripts from all schools they have attended since leaving the University. The Office of Admissions evaluates all transcripts and grants the student transfer credit when possible for coursework completed at the other schools.

Although the University's Office of Admissions may grant the student a certain number of semester hours of transfer credit for work completed in another social work program, the assistant dean for undergraduate programs in the Steve Hicks School of Social Work determines whether this coursework may be counted toward fulfillment of the Bachelor of Social Work degree requirements. Students who wish to use transfer credit to meet degree requirements should submit a course syllabus, assignments, and the titles and names of authors of textbooks to the assistant dean for undergraduate programs for evaluation.

Students may also seek transfer credit for coursework they complete at another institution after enrolling at the University. In this case the student should submit a transcript from the other institution to the University's Office of Admissions and a syllabus, course assignments, and information about textbooks to the Steve Hicks School of Social Work's assistant dean for undergraduate programs.

## Registration

*General Information* (<http://catalog.utexas.edu/general-information/registration-tuition-and-fees>) provides information about registration, adding and dropping courses, transfer from one division of the University

to another, and auditing a course. Published before registration each semester and summer session, the *Course Schedule* (<https://registrar.utexas.edu/schedules>) includes registration instructions, advising locations, and the times, places, and instructors of classes. The *Course Schedule* and *General Information* are published on the Office of the Registrar's website (<http://registrar.utexas.edu>).

# Academic Policies and Procedures

## Honors

### University Honors

The designation University Honors, awarded at the end of each long-session semester, gives official recognition and commendation to students whose grades for the semester indicate distinguished academic accomplishment. Both the quality and the quantity of work done are considered. Criteria for University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#universityhonorstext>).

### Graduation with University Honors

Students who, upon graduation, have demonstrated outstanding academic achievement are eligible to graduate with University Honors. Criteria for graduation with University Honors are given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/#graduationwithuniversityhonorstext>).

### Social Work Honors Program

The Social Work Honors Program (<http://socialwork.utexas.edu/bsw/honors>) is available to outstanding students who have distinguished themselves by superior academic performance during their time at the University.

Interested social work majors should apply for admission to the Honors Program Subcommittee of the BSW Curriculum Committee at least one full year before they expect to graduate. A University grade point average of at least 3.50 is required for admission, as is a grade point average of at least 3.50 in all of the coursework required for the major that the student has completed. The requirements for graduation from the Social Work Honors Program which are in addition to the requirements for the major, are: (1) a six-hour, two-semester honors tutorial course with a grade of at least *B-* for each semester; (2) an oral presentation of the student's honors thesis in a research colloquium open to the Steve Hicks School of Social Work community and the public; (3) a University grade point average of at least 3.50 and a grade point average of at least 3.50 in the courses required for the major and for the Social Work Honors Program; and (4) completion in residence at the University of at least 60 hours of coursework counted toward the degree.

## Review and Grievance Procedures

The Steve Hicks School of Social Work document *Student Standards for Social Work Education* delineates standards for professional education that apply to students enrolled in the Steve Hicks School of Social Work. Because of the nature of professional social work practice, the Steve Hicks School of Social Work has different expectations of students than do nonprofessional programs. All social work students are expected to abide by the *Standards* and by the National Association of Social Workers (NASW) Code of Ethics. When a student's performance does not meet expectations according to these established guidelines, a review may be called to bring the problem to the student's attention and to develop a plan to address the problem. Usually, the issue is resolved and the student is continued in the program with additional support

provided to the student and/or conditions established for the student's continuance in the program. In some instances, depending on the nature of the problem, the student may be referred to the University's Office of the Dean of Students, counseled to change majors, or dismissed from the program.

Students enrolled in the social work program have the right to appeal decisions made by the social work program, including scholastic dismissal. Students are assured freedom from reprisals for filing appeals. Students who wish to appeal a decision made during a school review process should consult the *Standards* for information on grievance procedures, located in the BSW Handbook (<http://www.utexas.edu/ssw/current/forms>).

## Graduation

### Special Requirements of the School

All students must fulfill the General Requirements (p. 20) for graduation. Students in the Steve Hicks School of Social Work must also fulfill the following requirements.

1. All University students must have a grade point average of at least 2.00 to graduate. In the Steve Hicks School of Social Work, students must also have a grade point average of at least 2.50 in required social work courses.
2. To receive an undergraduate degree from the University, every student must fulfill the following requirements on coursework taken in residence:
  - a. All University students must complete in residence at least 60 semester hours of coursework counted toward the degree. For the Bachelor of Social Work degree, these 60 hours must include at least 24 hours in the major and must include the required field practicum courses.
  - b. The University requires that at least six semester hours of advanced coursework in the major be completed in residence. The Steve Hicks School of Social Work further requires that 24 of the 46 hours of upper-division coursework for the Bachelor of Social Work be completed in residence.
3. An Air Force, Army, or Naval Reserve Officer Training Corps student who elects the basic and/or advanced program in air force science, military science, or naval science will not be approved for graduation until the government contract is completed, unless the student is released from the ROTC.

### Applying for Graduation

The Office of Academic Affairs provides each student with a computer-generated degree audit during each long-session semester. The degree audit notifies the student of the courses he or she must take and the requirements he or she must fulfill to receive the degree. The degree audit normally provides an accurate statement of requirements, but the student is responsible for knowing the exact requirements for the degree as stated in a catalog under which he or she is eligible to graduate and for registering so as to fulfill those requirements. The student should seek an official ruling in the Office of Academic Affairs before registering if in doubt about any requirement.

In the semester or summer session in which the degree is to be conferred, the candidate must be registered at the University and must apply for the degree in the Office of Academic Affairs. This should be done at the time of registration for the last semester, if possible, but in no event later than the deadline given in the official academic calendar. No degree will be conferred unless the graduation application form has been filed on time.

## Advanced Standing in Master's Degree Programs

A number of graduate schools of social work grant advanced standing to students who have completed all the requirements of an accredited undergraduate social work program. Many programs allow up to one year of credit toward the master's degree in social work. Information about programs offering advanced standing is available in the Office of Academic Affairs.

## Degrees and Programs

### Applicability of Certain Courses

No more than 36 semester hours in any one field of study other than social work may be counted toward the Bachelor of Social Work degree. No more than 60 semester hours of social work may be counted toward the degree.

### Physical Activity Courses

Physical activity courses (PED) are offered by the Department of Kinesiology and Health Education. Six semester hours of this coursework may be counted toward the Bachelor of Social Work degree. All physical activity courses are counted among courses for which the student is enrolled, and the grades are included in the grade point average.

### ROTC Courses

No more than six semester hours of credit for air force science, military science, or naval science courses may be counted toward the Bachelor of Social Work. Such credit may be used only as lower-division electives in degree programs that have room for such electives and only by students who have completed the third and fourth years of the ROTC program.

### Correspondence and Extension Courses

Credit that a University student in residence earns simultaneously by correspondence or extension from the University or elsewhere or in residence at another school will not be counted toward a degree in the Steve Hicks School of Social Work unless specifically approved in advance by the dean. No more than 30 percent of the semester hours required for the Bachelor of Social Work may be taken by correspondence. More information is available from the assistant dean for undergraduate programs.

### Courses Taken on the Pass/Fail Basis

Undergraduate students who have received at least 30 semester hours of college credit may take no more than five one-semester courses in elective subjects outside their major area on the pass/fail basis. Students must state their intention to register on this basis by the deadline given in the official academic calendar; they may not change the basis of registration in a course more than once; and they may not take more than two courses a semester on this basis.

### Other Courses

Music 101Q or Music 101V may not be counted toward any degree in the Steve Hicks School of Social Work. Other introductory courses, such as Music 201J, 201M, and 201N, may be counted toward degrees in the school.

No more than six semester hours of Bible courses may be counted toward the Bachelor of Social Work degree.

# Bachelor of Social Work

The requirements for the Bachelor of Social Work degree are designed to give the student an opportunity for integrated, nonrepetitive learning. A total of 122 semester hours is required. These may include credit by examination and a maximum of five one-semester elective courses taken on the pass/fail basis. All students must complete the requirements for the major and must complete at least 60 semester hours in residence at the University. These 60 hours must include at least 24 semester hours in social work. A completed degree program must include at least 46 semester hours of upper-division coursework, of which 24 semester hours must have been taken in residence. No more than 60 semester hours in social work may be counted toward the degree.

Each student must complete a sequence of prescribed work; major requirements, which include the field practicum; and special requirements, which include electives.

## Prescribed Work

The prescribed work provides the liberal arts base for the social work curriculum. Interdepartmental courses and credit by examination may be used to meet these requirements. Unless otherwise indicated, a course taken to meet the requirements of one area may not also be used to fulfill the requirements of another area; however, a single course may be used, unless otherwise indicated, to fulfill both an area requirement and a major requirement. No course used to fulfill area or major requirements, other than the field practicum, may be taken on the pass/fail basis.

## Core Curriculum

All students must complete the University's Core Curriculum (p. 23). A single course may not be counted toward more than one core area, but in some cases a course that is required for the Bachelor of Social Work may also be counted toward the core curriculum; these courses are identified below.

## Skills and Experience Flags

In the process of fulfilling the core curriculum and other degree requirements, all students pursuing the Bachelor of Social Work must complete courses that carry flags in the following areas:

1. Writing: Three courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag; one of these courses must be upper-division. Social Work 323K and 327 count toward this requirement; students must complete the third writing course outside the Steve Hicks School of Social Work. Courses used to fulfill the writing requirement may be used to fulfill other requirements.
2. Cultural diversity in the United States: One flagged course. Social Work 310 and 325 carry the cultural diversity flag.
3. Ethics: One flagged course. Social Work 332 and 333 carry the ethics flag.
4. Quantitative reasoning: One flagged course. Social Work 318 carries the quantitative reasoning flag.
5. Global cultures: One flagged course chosen from approved list. Social Work 360K (Ghana Maymester) and Social Work 460K (London Maymester) also satisfy the global cultures flag.
6. Independent inquiry: One flagged course. Social Work 323K carries the independent inquiry flag.

## Foreign Language

In addition to the core curriculum requirements above, undergraduates must earn credit for the second college-level course, or the equivalent,

in a foreign language. American Sign Language and Sign Language for Social Workers may be used to fulfill this requirement.

## Major Requirements

The Bachelor of Social Work program offers basic courses designed to provide students with concentrated and in-depth educational experience combining social work knowledge and practice skills. No course used to fulfill major requirements, except Social Work 640 and 641, may be taken on the pass/fail basis. Students are advised to complete the core curriculum, the skills and experiences flags, the foreign language requirement, and all lower-division major requirements before taking upper-division courses. In developing their degree plans, students must also pay careful attention to the sequencing of social work courses to ensure that prerequisite requirements are met.

Academic credit cannot be granted for life experience or previous work experience, and such experience cannot be substituted for any of the courses in the professional foundation areas or the field practicum. Students who believe they have the qualifications to receive credit by examination for a social work course other than the practice sequence coursework (Social Work 312, 332, 333, and 334) and the field practicum may submit a written request to the assistant dean for undergraduate programs. The assistant dean will review the request and determine whether or not the student should be permitted to take the examination.

1. The following courses are required:
  - a. Social welfare policy: Social Work 310, 323K.
  - b. Research: Social Work 313, 318.
  - c. Human behavior: Social Work 325, 327.
  - d. Practice: Social Work 312, 332, 333, 334.
  - e. Field practicum: Social Work 640, 641, 444.
2. Students must complete a three-semester-hour introductory course in psychology. Psychology 301 fulfills this requirement and may also be counted toward the social and behavioral science requirement of the core curriculum.
3. Students must complete a three-semester-hour introductory course in sociology. Sociology 302 fulfills this requirement and may also be counted toward the social and behavioral science requirement of the core curriculum.
4. Students must complete a three-semester-hour course in human/environmental biology: Biology 301L, 301M, 309D, 311C, or the equivalent. Biology 301L and 301M or Biology 311C and 301M may be used together to complete the science and technology part I requirement. If biology coursework is not used for science and technology part I, any of these courses may be used to fulfill the science and technology part II requirement.
5. Students must complete three semester hours in economics. Certain economics courses may also be used to fulfill the social and behavioral sciences requirement of the core curriculum.
6. Students must complete three semester hours in child psychology or child development. Psychology 304 or Human Development and Family Sciences 313 accompanied with HDF 113L may be used to fulfill this requirement.
7. Students must complete at least nine semester hours of upper-division coursework in the social and behavioral sciences (applied learning and development, anthropology, economics, educational psychology, government, history, kinesiology, psychology, sociology, Social Work 360K topics) in addition to other major requirements. Six of these nine hours may be upper-division social work electives.

## Field Sequence Requirements

The social work program requires that students complete 45 clock hours of supervised service learning related to social work to be admitted

to the major, to upper-division courses in social work, and to the field practicum. These service learning hours may be used to meet course requirements in Social Work 310 and 312. Students must also complete 480 clock hours of fieldwork as part of the course requirements in Social Work 640 and 641. Students have the opportunity in the field practicum to develop the professional skills needed for entry-level social work positions as generalist practitioners. Adequate laboratory time through the field practicum is built into this professional program to provide students with an opportunity to test their developing skills in a real-life environment. At the same time, faculty members evaluate the student's professional development within the context of the educational objectives established for the experience. The goals are for the student to learn real-life practice, to develop skills, to relate concepts to skill development, to remain motivated to continue to learn, and to evaluate personal performance.

To enroll in the field practicum, students must meet the following requirements: (1) admission to the major in social work; (2) a University grade point average of at least 2.00; and (3) both a grade point average of at least 2.50 for the following group of courses and a grade of at least C in each course in the group: Social Work 310, 312, 313, 318, 323K, 325, 327, 332, 333, and 334.

Following the student's admission to the field practicum, his or her work is reviewed periodically by the student, the field faculty, and the agency supervisor. Should the student have trouble meeting the professional or academic requirements of the program, the review process will bring the difficulty to the student's attention and assist the student in seeking appropriate resolution. The student may make use of counseling and advising services at any time. If difficulties cannot be resolved, the field director may conduct an administrative review, which may result in a decision to terminate the student's field placement. The student is notified of this decision in writing.

All social work students enrolling in the field practicum are required to show evidence of professional liability insurance coverage paid for the duration of the course. The effective date of the policy must be on or before the first regular class period of the field practicum course for which the student is enrolling. Failure to provide evidence of insurance may result in the student being dropped from the field practicum.

## Special Requirements

### Elective Requirements and Limitations

In addition to the area and major requirements given above, the student must take elective coursework to complete the 122 semester hours required for the Bachelor of Social Work. No more than five one-semester courses taken on the pass/fail basis, 36 hours in any one field of study other than social work, and 54 hours in social work may be counted toward the 122-hour requirement.

## Minimum Scholastic Requirements

1. The student must fulfill the University-wide graduation (p. 20) requirements and the requirements of the Steve Hicks School of Social Work given earlier in this section.
2. To apply for admission to the social work major, a student must have earned a grade of at least C in each of the following courses: Social Work 310, 312, 313, 318 and 325. The student must also have a University grade point average of at least 2.00 and a grade point average of at least 2.50 in all the courses he or she has completed that are part of the social work major requirements. Additional requirements are given in the section Admission to the Major in Social Work (p. 784).
3. Following the student's admission to the major, the student's coursework is reviewed periodically by the student and the academic

adviser. Students must maintain a University grade point average of at least 2.00; they must also earn a grade of at least C in each course listed as a social work major requirement and must maintain a grade point average of at least 2.50 in these courses. If the student has trouble meeting the professional or academic requirements of the major, the review process delineated in *Student Standards for Social Work Education*, available at [www.utexas.edu/ssw/current/forms/](http://www.utexas.edu/ssw/current/forms/), will bring the difficulty to the student's attention and assist the student in making appropriate resolution. The student may make use of counseling and advising services at any time.

4. If the student's grade point average in social work courses falls below 2.50, the student is placed on academic probation in social work. If the grade point average remains below 2.50 for two consecutive semesters, including the summer session, the student is subject to academic dismissal from the Steve Hicks School of Social Work.
5. All students who seek to reenter the Steve Hicks School of Social Work after having been placed on enforced withdrawal or academic dismissal must have the approval of the assistant dean for undergraduate programs.
6. Any student who has a grade of C or higher in a course may not repeat the course and use the second grade to improve his or her grade point average without special permission of the assistant dean for undergraduate programs. If a student repeats a course, all grades received for the course are included in the grade point average.

## Order and Choice of Work

A pre-social work major may fulfill the requirements for application to the major in four or five long-session semesters, depending on the number of hours completed each semester. After admission to the major, students complete a three-semester professional sequence and additional requirements needed for the BSW degree.

### Suggested Schedule for Pre-Social Work Majors

First Year		Second Year	
First Term	Hours	Second Term	Hours
RHE 306	3	A course to be counted towards the mathematics requirement of the core curriculum	3
S W 310	3	A course to be counted toward the U.S. history requirement of the core curriculum	3
PSY 301	3	A biology course to be counted toward the natural science and technology part I or II requirement of the core curriculum	3
SOC 302	3	GOV 310L	3
UGS 302 or 303	3	A three-hour course to be counted toward the visual and performing arts requirement of the core curriculum	3
		15	15
Second Year		Third Year	
First Term	Hours	Second Term	Hours
E 316L, 316M, 316N, or 316P	3	S W 313	3
GOV 312L	3	S W 318	3
S W 312	3	A course to be counted toward the U.S. history requirement of the core curriculum	3
Foreign language 601D, or an equivalent beginning course; or Sign Language for Social Workers I	3-6	Foreign language 610D, or an equivalent second sequence course; or Sign Language for Social Workers II	3-6
PSY 304 (Or HDF 313 and HDF 113L)	3	A course to be counted towards the natural science and technology part I requirement of the core curriculum	3
		15-18	15-18

Third Year		
First Term	Hours Second Term	Hours
A course to be counted toward the natural science and technology part I or II requirement of the core curriculum	3 A three-hour upper-division elective, if needed, to provide the required forty-six hours of upper-division credit	3
A non-social work course that carries a writing flag	3 S W 327	3
An economics course	3 S W 334	3
Three hours of upper-division social and behavioral science coursework	3 A course that carries a global cultures flag	3
S W 325	3 Three hours of upper-division social and behavioral science coursework	3
		15

Fourth Year		
First Term	Hours Second Term	Hours
S W 323K	3 S W 640	6
S W 332	3 S W 641	6
S W 333	3 S W 444	4
Three hours of upper-division social and behavioral science coursework	3	
Three hours of elective coursework	3	
		15
		16

Total credit hours: 121-127

The student must also complete all other remaining required coursework before the field practicum, including electives needed to provide the total of 122 semester hours required for the degree. No other courses may be taken concurrently with the field practicum courses.

## Minor and Certificate Programs

### Minor

The transcript-recognized undergraduate academic minor must be completed in conjunction with an undergraduate degree at The University of Texas at Austin. For more information regarding the requirements for achieving a minor, including a comprehensive list of minors, please visit the Minors and Certificate Programs (p. 13) section of the *Undergraduate Catalog*.

### Social Work Minor

A Social Work Minor requires completion of 15 semester hours, six of which must be upper-division. All courses in the Social Work minor must be taken on a letter grade basis and students must earn a minimum grade of a C.

All interested students must apply for admission to the minor. To be eligible, students must satisfy the following requirements:

Requirements	Hours
S W 310 Introduction to Social Work and Social Welfare <sup>1</sup>	3

Submission of a personal statement of interest in the Social Work Minor

Minimum The University of Texas at Austin GPA of 2.5

1. With a minimum grade of a "C"

### Required Courses

Requirements	Hours
S W 310 Introduction to Social Work and Social Welfare	3
S W 312 Generalist Social Work Practice: Knowledge, Values, and Skills	3

S W 325 Foundations of Social Justice	3
Students will choose 2 additional courses from SW 360K numbered topic courses to complete their required 15 semester hours.	6

### Disability Studies Minor

A program that focuses on the nature, meaning, and consequences of what it is to be defined as disabled and explores the historical, cultural, economic, physiological, and socio-political dynamics of disability. Includes instruction in disability rights, legal issues, and public policy; literature, philosophy, and the arts; and/or research in the social sciences, education, and health sciences addressing social and experiential aspects of disability.

All interested students must apply for admission to the minor. To be eligible, students must 1) submit a personal statement of interest in the Disability Studies Minor, and 2) have an overall minimum The University of Texas at Austin GPA of 2.5.

The Disability Studies Minor requirements are:

Requirements	Hours
S W 325 Foundations of Social Justice	3
S W 360K Current Social Work Topics (Topic: The Social Context of Disability)	3
S W 360K Current Social Work Topics (Topic: Making Systems Work for People with Disabilities)	3
Six hours chosen from:	6
ALD 322 Individual Differences	
ANT 302 Cultural Anthropology	
ANT 349C Human Variation	
CSD 306K Introduction to Communication Disorders	
CSD 308K Perspectives on Deafness	
E 376M Studies in Ethnic American Literature	
EDP 376T Topics in Educational Psychology	
N 347 Specialized Topics in Nursing	
SED 303 Autism Spectrum Disorder: Truths and Consequences	
S W 311 Introductory Topics in Social Work (Topic 1: Sign Language for Social Workers I)	
KIN 352K Studies in Human Movement: Topical Studies	
KIN 360 Programming for People with Disabilities	
S W 360K Current Social Work Topics	

Please Note:

All courses in the disability studies minor must be taken on a letter grade basis, and students must earn a minimum grade of a C.

### Certificates

#### Certificate in Public Safety for Bachelor of Social Work Students

The certificate in public safety provides undergraduate social work students with coursework and service learning opportunities that prepare them for careers in public safety. These careers may include work in

such settings as law enforcement, fire departments, Emergency Medical Services (EMS), and emergency management at the local, state, and national levels.

**Requirements:**

The certificate will be awarded to students whose successful completion of the BSW program of work includes six courses (18 hours) in the area of focus, including:

Requirements		Hours
PSF 311	Social Work and Public Safety	3
S W 325	Foundations of Social Justice	3
Three courses chosen from the following:		9
S W 311	Introductory Topics in Social Work (Topic: Introduction to the Criminal Justice System)	
S W 360K	Current Social Work Topics (Topic 3: Treatment of Substance Use Disorders)	
S W 360K	Current Social Work Topics (Topic 4: Social Work Practice with Abused and Neglected Children and their Families)	
S W 360K	Current Social Work Topics (Topic 5: Advanced Topics in Social and Economic Justice)	
S W 360K	Current Social Work Topics (Topic 6: Contemporary Issues in Domestic Violence)	
S W 360K	Current Social Work Topics (Topic 8: Leadership in the Community)	
S W 360K	Current Social Work Topics (Topic 9: Loss and Grief: Individual, Family, and Cultural Perspectives)	
S W 360K	Current Social Work Topics (Topic 11: Communication Skills in Interdisciplinary Settings)	
S W 360K	Current Social Work Topics (Topic 12: Social Work in the Legal System)	
S W 360K	Current Social Work Topics (Topic 14: Working with Youth Gangs)	
S W 360K	Current Social Work Topics (Topic 15: Youth, Delinquency, and Juvenile Justice)	
S W 360K	Current Social Work Topics (Topic 17: Principles of Recovery and Relapse Prevention)	
S W 360K	Current Social Work Topics (Topic 18: Mental Health Issues in Public Safety)	
PSF 360K	Public Safety Field Immersion <sup>1</sup>	3
—		

1. Field Immersion Placements: Placements will be completed in public safety related settings, including such possibilities as the Austin Police Department, The University of Texas at Austin Police Department, Travis County Sheriff's Office, the Department of Corrections, City of Austin Office of Emergency Management, Travis County Office of Emergency Management, and Austin EMS.

**Application Process:**

Students will complete an application form and submit it to the Undergraduate Program Coordinator, who, in consultation with the Senior Associate Dean for Academic Affairs, will offer admission to the Certificate Program.

## Courses

The faculty has approval to offer the following courses in the academic years 2018–2019 and 2019–2020; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The Course Schedule (<https://registrar.utexas.edu/schedules>) may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/credit-value-and-course-numbers>). In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 793).

### Public Safety: PSF

#### Lower-Division Courses

##### PSF 311. Social Work and Public Safety.

Restricted to social work majors and pre-majors. Focuses on the intersection between social work, public safety, law, and human services. Three lecture hours a week for one semester. Offered on the letter-grade basis only.

#### Upper-Division Courses

##### PSF 360K. Public Safety Field Immersion.

Restricted to social work majors and pre-majors. Explores the intersection of social work and public safety. Experiential learning in approved public safety-related settings and a weekly one-hour seminar. One lecture hour a week and completion of 120 hours of service learning for one semester. Offered on the pass/fail basis only.

### Social Work: S W

#### Lower-Division Courses

##### S W 310 (TCCN: SOCW 2361). Introduction to Social Work and Social Welfare.

Introduction to the profession of social work and its roles in the social welfare system, with emphasis on social problems, society's historical response, and contemporary proposed solutions. Three lecture hours a week for one semester, and forty-five clock hours of service learning.

##### S W 311. Introductory Topics in Social Work.

Selected introductory topics in the social work profession. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

**Topic 1: Sign Language for Social Workers I.** Restricted to social work pre-majors and majors. Social Work 311 (Topic: Sign Language for Social Workers I) and 311 (Topic 1) may not both be counted. May be counted towards the foreign language requirement for social work.

**Topic 2: Sign Language for Social Workers II.** Restricted to social work pre-majors and majors. Social Work 311 (Topic: Sign Language for Social Workers II) and 311 (Topic 2) may not both be counted. May be counted towards foreign language requirement for social work. Additional prerequisite: Social Work 311 (Topic 1).

**Topic 3: Introduction to the Criminal Justice System.** Social Work 311 (Topic: Criminal Justice System) and 311 (Topic 3) may not both be counted.

### **S W 312. Generalist Social Work Practice: Knowledge, Values, and Skills.**

Restricted to social work pre-majors. Introduction to generalist social work practice, with emphasis on the knowledge, values, and skills used in intervention. Three lecture hours a week for one semester, and forty-five clock hours of service learning. Prerequisite: Credit or registration for Social Work 310.

### **S W 313. Social Work Research Methods.**

Introduction to the logic, design, and use of research, with emphasis on research designs appropriate to social work. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Social Work 318 or the equivalent.

### **S W 318. Social Work Statistics.**

Introduction to statistics commonly used in social work research, including the critical analysis of the findings and inferential processes of existing research studies. Three lecture hours a week for one semester. Prerequisite: Completion of the Area C mathematics requirement for the Bachelor of Social Work.

## **Upper-Division Courses**

### **S W 323K. Social Welfare Programs, Policies, and Issues.**

Restricted to social work majors. Study of structure and function of service delivery systems, policy analysis, and effects and influences of policy on practice and planning decisions. Three lecture hours a week for one semester. Prerequisite: Government 310L, 312L, History 315K, 315L, and three semester hours of coursework in Economics are recommended.

### **S W 325. Foundations of Social Justice.**

History and demographics of culturally diverse groups in the United States, including family and community diversity. Emphasis on principles of knowledge acquisition about cultural diversity and ethnic-sensitive social work practice. Three lecture hours a week for one semester. Prerequisite: Social Work 310.

### **S W 327. Human Behavior and Social Environment.**

Same as Urban Studies 354 (Topic 10). Survey of selected theories of human behavior, including a systems/ecological perspective, ego psychology, and social learning theory, with emphasis on the life cycle from adolescence through adulthood. Three lecture hours and one laboratory hour a week for one semester. Only one of the following may be counted: Social Work 327, Urban Studies 354 (Topic: Human Behavior and Social Environment), 354 (Topic 10). Prerequisite: For social work majors, admission to the major in social work; for others, upper-division standing.

### **S W 332. Social Work Practice with Individuals and Families.**

Restricted to social work majors. Theory and knowledge of effecting change in individuals and families, with emphasis on analytical and interactional processes and skills. Three lecture hours a week for one

semester. Prerequisite: Social Work 325 and 327 with a grade of at least C in each.

### **S W 333. Social Work Practice with Groups.**

Restricted to social work majors. Theory and knowledge of group dynamics, group development, and effective group work skills. Three lecture hours a week for one semester. Prerequisite: Social Work 325 and 327 with a grade of at least C in each.

### **S W 334. Social Work Practice in Organizations and Communities.**

Restricted to social work majors. Theory and knowledge of effecting change in organizations and communities, with an emphasis on analytical and interactional processes and skills. Three lecture hours a week for one semester.

### **S W 640. Social Work Practicum I.**

Field practicum providing supervised experience in which students apply knowledge and develop skills of social work practice. Educational supervision by faculty and by social workers in community agencies. Sixteen laboratory hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Admission to the field sequence and concurrent enrollment in Social Work 641 and 444.

### **S W 641. Social Work Practicum II.**

Knowledge and skill in social work, building on objectives emphasized in Social Work 640. Educational supervision by faculty and by social workers in community agencies. Sixteen laboratory hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Admission to the field sequence and concurrent enrollment in Social Work 640 and 444.

### **S W 444. Integrative Seminar.**

Integration of theory and practice on the basis of field practicum experiences. Four lecture hours a week for one semester. Prerequisite: Completion of all requirements for the Bachelor of Social Work degree except Social Work 640 and 641, and concurrent enrollment in Social Work 640 and 641.

### **S W 350. Special Topics in Generalist Social Work.**

Conference course. May be repeated for credit. Prerequisite: Upper-division standing.

### **S W 360K, 460K. Current Social Work Topics.**

Designed to enable each student to undertake intensive study of selected aspects of social work practice. Three or four lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 2: African American Family.** Same as African and African Diaspora Studies 321K and Women's and Gender Studies 340 (Topic 3). Overview of historical and contemporary issues facing African American families and children. Social service delivery to African American families and communities is emphasized. Three lecture hours a week for one semester. Only one of the following may be counted: African and African Diaspora Studies 321K, 374 (Topic 1), Social Work 360K (Topic 2), Women's and Gender Studies 340 (Topic 3).

**Topic 3: Treatment of Substance Use Disorders.**

**Topic 4: Social Work Practice with Abused and Neglected Children and Their Families.** Social Work 360K (Topic: Social Work Practice with Abused and Neglected Children and Their Families) and 360K, 460K (Topic 4) may not both be counted.

**Topic 5: Advanced Topics in Social and Economic Justice.**

**Topic 6: Contemporary Issues in Domestic Violence.** Social Work 360K (Topic: Contemporary Issues in Domestic Violence) and 360K, 460K (Topic 6) may not both be counted.

**Topic 7: International Social Work.** Social Work 360K (Topic: International Social Work) and 360K, 460K (Topic 7) may not both be counted.

**Topic 8: Leadership in the Community.** Must have consent of instructor to register. Social Work 360K (Topic: Leadership in the Community) and 360K, 460K (Topic 8) may not both be counted.

**Topic 9: Loss and Grief: Individual, Family, and Cultural Perspectives.** Social Work 360K (Topic: Loss and Grief: Individual, Family, and Cultural Perspectives) and 360K, 460K (Topic 9) may not both be counted.

**Topic 10: Methods of Play Intervention.** Social Work 360K (Topic: Methods of Play Intervention) and 360K, 460K (Topic 10) may not both be counted.

**Topic 11: Communication Skills in Interdisciplinary Settings.**

**Topic 12: Social Work in the Legal System.** Social Work 360K (Topic: Social Workers in the Legal System) and 360K, 460K (Topic 12) may not both be counted.

**Topic 13: Social Work in the School Setting.** Social Work 360K (Topic: Social Work in the School Setting) and 360K, 460K (Topic 13) may not both be counted.

**Topic 14: Working with Youth Gangs.** Social Work 360K (Topic: Working with Youth Gangs) and 360K, 460K (Topic 14) may not both be counted.

**Topic 15: Youth, Delinquency, and Juvenile Justice.** Social Work 360K (Topic: Youth, Delinquency, and Juvenile Justices) and 360K, 460K (Topic 15) may not both be counted.

**Topic 16: Roots of Social and Economic Justice: An International Perspective.** Course is offered as a Maymester in London through Study Abroad Office. Social Work 360K (Topic: Roots of Social and Economic Justice: An International Perspective) and 360K, 460K (Topic 16) may not both be counted.

**Topic 17: Principles of Recovery and Relapse Prevention.**

**Topic 18: Mental Health Issues in Public Safety.** Designed to provide a basic understanding of mental health intervention and treatment related issues for students planning to work in the field of public safety.

### **S W 679H. Honors Tutorial Course.**

Individual conference course in social work research and writing. The equivalent of three lecture hours a week for two semesters. Prerequisite: Upper-division standing and admission to the Social Work Honors Program.

# Appendix A: Texas Common Course Numbering System

To help students transfer credit from one institution to another, Texas community colleges employ a statewide numbering system for their courses. The Texas Common Course Numbering system (TCCN) is a standard set of four-character abbreviations for academic disciplines and four-digit course numbers. The first digit of the number represents the academic level of the course (0 for subfreshman, 1 for freshman, and 2 for sophomore); the second represents the semester credit hour value of the course. Texas public universities, and some private ones, cross-reference their courses with TCCN.

Listed below are TCCN course designations and their University transfer credit evaluations. In the University's three-digit numbering system, the first digit indicates the semester credit hour value of the course. The suffixes *A* and *B* indicate the first and second parts of a course; credit for each part is half the value indicated by the first digit.

Notes are given below the table.

TCCN Designation	The University of Texas at Austin Transfer Credit
ACCT 2301	ACC 311

<sup>1</sup> This is a modified course number with a higher credit value than is normally offered at the University. The higher value does not affect the course's prerequisite or degree applicability.

<sup>2</sup> Lower-division biology courses may transfer as generic credit, without a specific University course number. The terms "Frmn" and "Soph" identify freshman- and sophomore-level lecture credit. "Lab" identifies lower-division laboratory credit. For students in the School of Biological Sciences, such credit is applicable toward prerequisite and degree requirements only with department approval. For students in other degree plans that require specific biology courses, such credit is applicable only with the approval of the student's academic dean. Introductory major-track lecture credit (TCCN BIOL 1406, 1407, 1306, or 1307) generally transfers as BIO 311C and 311D (<http://catalog.utexas.edu/undergraduate/appendix-a>). Major-track laboratory credit (TCCN BIOL 1106, 1107, or the lab components of 1406 and 1407) generally transfers with the modified course numbers BIO 206LA and 206LB.

Nonmajor lecture credit (TCCN BIOL 1408, 1409, 1308, or 1309) generally transfers as Biology 301L (<http://catalog.utexas.edu/undergraduate/appendix-a>) and 301M (<http://catalog.utexas.edu/undergraduate/appendix-a>). Nonmajor laboratory credit (TCCN BIOL 1108, 1109, or the lab components of 1408 and 1409) transfers generically, because the University does not offer nonmajor lab courses.

<sup>3</sup> This is a modified course number with a lower credit value than is normally offered at the University. In many cases, such transfer credit may be counted toward prerequisite or degree requirements in place of the higher-value University course; however, such substitution is at the discretion of the student's academic dean.

<sup>4</sup> This is a course no longer offered at the University but still used in awarding transfer credit and still applicable toward certain degree requirements. For students in the School of Nursing, BIOL 2420, 2421, 2320, 2321, 2120, and 2121 transfer as retired microbiology courses.

<sup>5</sup> Texas community colleges do not offer direct equivalents of The University of Texas at Austin's GOV 310L, 312L, or 312P. GOVT 2305+2306 together fulfill the core 070 requirement. Either GOVT 2305 or 2306 combines with GOV 310L (but not with 312L or 312P) to fulfill the core 070 requirement.

<sup>6</sup> For School of Architecture students, ARCH 1311 transfers as generic architecture credit and Architecture 308 (<http://catalog.utexas.edu/undergraduate/appendix-a>) must be taken in residence.

# Appendix B: Course Abbreviations

The University offers courses in the following fields of study. The abbreviations in the second column are used in catalogs, course schedules, and student records. Some of the fields listed are offered only at the graduate level.

Field of Study	Abbreviation
Accounting	ACC
Actuarial foundations	ACF
Advertising	ADV
Aerospace engineering	ASE
African and African diaspora studies	AFR

# School of Architecture Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Dm Addington, Professor  
Henry M. Rockwell Chair in Architecture  
DEnviroD, Harvard University, 1997

Dean J Almy, Associate Professor  
MArch, University of Texas at Austin, 1989

Anthony Alofsin, Professor  
Roland Gommel Roessner Centennial Professorship in Architecture  
PhD, Columbia University in the City of New York, 1987

Kevin S Alter, Professor  
The Sid W. Richardson Centennial Professorship in Architecture  
MArch, Harvard University, 1990

Brian D Andrews, Lecturer  
MArch, Princeton University, 1989

Simon D Atkinson, Professor  
Mike Hogg Professorship in Community and Regional Planning  
PhD, University of Sheffield, 1989

Adam Barbe, Lecturer  
MLA, University of Texas at Austin, 2008

M W Bell, Professor Emeritus  
BArch, University of Texas at Austin, 1960

Michael L Benedikt, Professor  
Hal Box Endowed Chair in Urbanism  
MEnviroD, Yale University, 1975

Miroslava M Benes, Associate Professor  
PhD, Yale University, 1989

Kory Bieg, Assistant Professor  
MArch, Columbia University in the City of New York, 2002

Judith C Birdsong, Lecturer  
MArch, University of Florida, 1992

John P Blood, Distinguished Senior Lecturer  
MArch, Yale University, 1987

Michael R Boduch, Lecturer  
MArch, University of Texas at Austin, 2012

Daniel R Bonilla  
MA, Oxford Brookes University, 1990

Jon A Bowman, Professor Emeritus  
MArch, University of Texas at Austin, 1962

Danelle I Briscoe, Associate Professor  
MArch, Yale University, 2002

Richard L Cleary, Professor  
PhD, Columbia University in the City of New York, 1986

Coleman Coker, Adjunct Professor  
MFA, Memphis College of Art, 1994

Miriam S Collins, Assistant Professor  
MCityP, Massachusetts Institute of Technology, 2012

Robert J Coote, Professor Emeritus  
MA, Harvard University, 1959

Ulrich C Dangel, Associate Professor  
MArch, University of Oregon, 1999

Elizabeth A Danze, Professor  
Gene Edward Mikeska Endowed Chair for Interior Design, Bartlett Cocke  
Regents Professorship in Architecture  
MArch, Yale University, 1990

Charles H Di Piazza, Administrative Associate  
MArch, University of Texas at Austin, 1996

Gabriel Diaz Montemayor, Assistant Professor  
MArch, Auburn University, 2007

Larry A Doll, Associate Professor  
MArch, Cornell University, 1974

Tara A Dudley, Lecturer  
PhD, University of Texas at Austin, 2013

Matthew L Fajkus, Associate Professor  
MArch, Harvard University, 2005

Elizabeth Farrell, Lecturer  
MArch, University of Texas at Austin, 2015

Nerea Feliz Arrizabalaga, Assistant Professor  
BArch, Universidad Politecnica de Madrid (UPM), 2001

Juliana Felkner, Assistant Professor  
MArch, University of Kansas Main Campus, 2008

Ilse L Frank, Lecturer  
MLA, University of Pennsylvania, 2006

Frances Gale, Research Fellow  
MS, Columbia University in the City of New York, 1982

Sarah P Gamble, Lecturer  
MArch, University of Texas at Austin, 2005

Michael L Garrison, Professor  
MArch, Rice University, 1971

Carmen M Garufo, Research Fellow  
BArch, Pratt Institute, 1966

Tamie Michele Glass, Associate Professor  
MArch, University of Oregon, 2001

Francisco H Gomes, Associate Professor  
MArch, Harvard University, 1995

Martin Haettasch, Lecturer  
MArch, Princeton University, 2007

Michael G Hargens, Lecturer  
MArch, Parsons School of Design, 2006

Hope Hasbrouck, Associate Professor  
MLArch, Harvard University, 1996

David D Heymann, Professor  
Harwell Hamilton Harris Regents Professorship in Architecture  
MArch, Harvard University, 1988

Barbara Hoidn, Adjunct Associate Professor

MArchE, Universität Friedericiana Karlsruhe, 1988

Michael Holleran, Associate Professor  
PhD, Massachusetts Institute of Technology, 1991

Benjamin Ibarra Sevilla, Assistant Professor  
MS, Universidad de Alcala, 2005

Richard W Jennings, Adjunct Professor  
PhD, Harvard University, 2008

Junfeng Jiao, Assistant Professor  
PhD, University of Washington - Seattle, 2010

Juan S Jofre-Lora, Lecturer  
MArch, Massachusetts Institute of Technology, 2014

Terry D Kahn, Professor Emeritus  
PhD, University of California-Berkeley, 1970

Alex Karner, Assistant Professor  
PhD, University of California-Davis, 2012

Nancy P Kwallek, Professor Emeritus  
PhD, Purdue University Main Campus, 1978

Fernando Luiz Lara, Associate Professor  
PhD, University of Michigan-Ann Arbor, 2001

Matthew Z Leach, Lecturer  
MArch, University of Texas at Austin, 2011

Daniel E Leary, Associate Professor Emeritus  
MArch, University of Pennsylvania, 1966

Edna Ledesma De Leon, Lecturer  
MArch, University of Texas at Austin, 2009

Gerlinde Leiding, Professor Emeritus  
MArch, Yale University, 1966

Charlton N Lewis, Lecturer  
MArch, University of Texas at Austin, 2013

Katherine E Lieberknecht, Assistant Professor  
PhD, Cornell University, 2008

Petra Gabriele Liedl, Adjunct Assistant Professor  
PhD, Technischen Universität München/Munich, 2007

Christopher A Long, Professor  
Martin S. Kermacy Centennial Professorship in Architecture  
PhD, University of Texas at Austin, 1993

Sarah L Lopez, Assistant Professor  
PhD, University of California-Berkeley, 2011

Mark Macek, Specialist  
BArch, University of Texas at Austin, 1990

Deborah Mary Mann, Lecturer  
MS, University of Cape Town, 1996

S Milovanovic-Bertram, Associate Professor  
MArch, Harvard University, 1974

Juan Miro, Professor  
David Bruton, Jr. Centennial Professorship in Urban Design  
MArch, Yale University, 1991

Elizabeth Mueller, Associate Professor

PhD, University of California-Berkeley, 1992

Morris J Neal, Lecturer  
BArch, Texas Tech University, 1984

Michael Oden, Associate Professor  
PhD, New Sch for Soc Research, 1992

Clay Odom, Assistant Professor  
MS, Columbia University in the City of New York, 2003

Jonathan A Ogren, Lecturer  
MA, University of Texas at Austin, 2008

Primo Orpilla, Visiting Professor  
BA, San Jose State University, 1988

Robert G Paterson, Associate Professor  
PhD, University of North Carolina at Chapel Hill, 1993

Ana Francisca Moreira Aroso Pinto De Oliveira, Lecturer  
MArch, Universitat Politecnica de Catalunya, 2008

Adam A Pyrek, Lecturer  
MA, Architectural Association School of Architecture, 2005

Rachael Rawlins, Senior Lecturer  
JD, University of Texas at Austin, 1993

Johanna H Reed, Lecturer  
MArch, University of Texas at Austin, 2012

Benjamin E Rice, Research Engineering/ Scientist Associate II  
MArch, Princeton University, 2011

Joyce Rosner, Senior Lecturer  
MArch, University of Houston, 1981

Stephen L Ross  
MA, University of Texas at Austin, 1990

Stefan K Schuster, Lecturer  
MS, University of Texas at Austin, 1996

Gian Claudia Sciara, Assistant Professor  
PhD, University of California-Berkeley, 2009

Daniel L Sharp, Lecturer  
MLA, University of Texas at Austin, 2006

Allan W Shearer, Associate Professor  
PhD, Harvard University, 2003

Keith A Shuley, Lecturer  
JD, University of Houston, 1981

Igor P Siddiqui, Associate Professor  
MArch, Yale University, 2003

Keith Simon, Lecturer  
MArch, University of Oregon, 2004

Bjorn I Sletto, Associate Professor  
PhD, Cornell University, 2006

Gregory W Smith, Lecturer  
MA, University of Delaware, 1991

Marla Smith, Lecturer  
MArch, University of Texas at Austin, 1996

Vincent L Snyder, Professor

MArch, Princeton University, 1988

Stephen M Sonnenberg, Adjunct Professor  
MD, Yeshiva University, 1965

Jason S Sowell, Associate Professor  
MArch, Harvard University, 2004

Lawrence W Speck, Professor  
The W. L. Moody, Jr. Centennial Professorship in Architecture  
MArch, Massachusetts Institute of Technology, 1972

Nicholas Daniel Steshyn, Lecturer  
MArch, University of Texas at Austin, 2014

Richard P Swallow, Professor Emeritus  
MArch, Massachusetts Institute of Technology, 1957

Rabun M Taylor, Professor  
PhD, University of Minnesota-Twin Cities, 1997

Danilo F Udovicki, Associate Professor  
PhD, Massachusetts Institute of Technology, 1995

Clare W Van Montfrans, Lecturer  
MArch, University of Texas at Austin, 2016

Gary Wang, Lecturer  
MArch, University of Michigan-Ann Arbor, 1998

Wilfried Wang, Professor  
O'Neil Ford Centennial Chair in Architecture  
MS, University College London, 1981

Jacob A Wegmann, Assistant Professor  
MCP, Massachusetts Institute of Technology, 2006

Samantha J Whitney Schwarze, Lecturer  
MArch, University of Texas at Austin, 2013

Dason M Whitsett, Lecturer  
MS, University of Texas at Austin, 2005

Nichole Wiedemann, Associate Professor  
MA, Princeton University, 1992

Roxanne K Williamson, Professor Emeritus  
MA, University of Texas at Austin, 1965

Patricia A Wilson, Professor  
PhD, Cornell University, 1975

Jennifer L Wong, Curator  
MArch, University of Texas at Austin, 2013

Ming Zhang, Professor  
PhD, Massachusetts Institute of Technology, 2002

## Red McCombs School of Business Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Robert J Adams Jr, Senior Lecturer  
Management  
PhD, Capella University, 2007

Shiva Agarwal, Assistant Professor  
Management

PhD, University of Pennsylvania, 2017

James W Albrecht Jr, Lecturer  
Accounting  
BBA, University of Texas at Austin, 1975

Joshua D Alexander, Lecturer  
Finance  
MBA, University of Pennsylvania, 2009

Megan E Allen, Lecturer  
Accounting  
MPA, University of Texas at Austin, 2006

John R Allison, Professor  
Mary John and Ralph Spence Centennial Professorship  
JD, Baylor University, 1972

Andres Almazan, Professor  
Finance  
PhD, Massachusetts Institute of Technology, 1996

Mark I Alpert, Professor Emeritus  
Marketing  
DBA, University of Southern California, 1968

Aydogan Altı, Associate Professor  
Finance  
PhD, Carnegie Mellon University, 2002

Gregory A Alves, Lecturer  
Finance  
MBA, University of San Francisco, 1994

Richard A Amato, Lecturer  
Management  
MBA, University of Texas at Austin, 1998

Edward G Anderson Jr, Professor  
Mr. and Mrs. William F. Wright, Jr. Centennial Professorship for  
Management of Innovative Technology  
Management  
PhD, Massachusetts Institute of Technology, 1997

Urton L Anderson, Professor Emeritus  
Accounting  
PhD, University of Minnesota-Twin Cities, 1985

Victor L Arnold, Professor Emeritus  
Management  
PhD, University of Wisconsin-Madison, 1971

Mihran A Aroian, Lecturer  
Management  
MBA, University of Texas at Austin, 1988

Florence J Atiase, Lecturer  
Accounting  
MAcc, University of Florida, 1983

Rowland Atiase, Professor  
Accounting  
PhD, University of California-Berkeley, 1980

Patrick G Badolato, Lecturer  
Accounting  
PhD, Duke University, 2010

Michael J Barrett, Lecturer  
Management

PhD, University of Texas at Austin, 1994

Caroline A Bartel, Associate Professor  
Management  
PhD, University of Michigan-Ann Arbor, 1998

Taylor Bentley, Assistant Professor  
Marketing  
PhD, Washington University in St Louis, 2015

Ben A Bentzin, Lecturer  
Marketing  
MBA, University of Pennsylvania, 1992

Y Sekou Bermiss, Assistant Professor  
Management  
PhD, Northwestern University, 2009

Harlan T Beverly, Lecturer  
Management  
MBA, University of Texas at Austin, 2004

Steven M Bowers, Lecturer  
Finance  
JD, University of Texas at Austin, 1982

Mark L Bradshaw, Lecturer  
Accounting  
JD, University of Texas at Austin, 1988

Floyd S Brandt, Professor Emeritus  
Management  
DBA, Harvard University, 1960

Dean A Bredeson, Distinguished Senior Lecturer  
JD, University of Texas at Austin, 1995

Steven Miller Brister, Lecturer  
Marketing  
MBA, University of Texas at Austin, 1989

Patrick L Brockett, Professor  
Gus Wortham Memorial Chair in Risk Management and Insurance  
Finance  
PhD, University of California-Irvine, 1975

Andrew Brodsky, Assistant Professor  
Management  
PhD, Harvard University, 2017

Susan M Broniarczyk, Professor  
Susie and John L. Adams Endowed Chair in Business  
Marketing  
PhD, University of Florida, 1992

Keith C Brown, Professor  
Finance  
PhD, Purdue University Main Campus, 1981

Patti J Brown, Lecturer  
Accounting  
MPA, University of Texas at Austin, 1989

Ethan R Burris, Associate Professor  
Management  
PhD, Cornell University, 2005

John Burrows, Lecturer  
Management

PhD, Tulane University, 2003

John C Butler, Clinical Associate Professor  
Finance  
PhD, University of Texas at Austin, 1998

Johnny S Butler, Professor  
J. Marion West Chair for Constructive Capitalism  
Management  
PhD, Northwestern University, 1974

Daniel O Campbell, Lecturer  
Finance  
MBA, University of Texas at Austin, 2006

William Carpenter, Lecturer  
Finance  
MBA, Texas A & M University, 2008

Carlos Marinho Carvalho, Professor  
Finance  
PhD, Duke University, 2006

Eric Chan, Assistant Professor  
Accounting  
PhD, University of Pittsburgh, Pittsburgh Campus, 2015

Gretchen B Charrier, Senior Lecturer  
Accounting  
MPA, University of Texas at Austin, 1996

Shuping Chen, Professor  
The Wilton E. and Catherine A. Thomas Professorship in Accounting  
Accounting  
PhD, University of Southern California, 2003

Michael B Clement, Professor  
KPMG Centennial Professorship  
Accounting  
PhD, Stanford University, 1997

Jonathan B Cohn, Associate Professor  
Finance  
PhD, University of Michigan-Ann Arbor, 2008

Julia L Coronado, Assistant Professor  
Finance  
PhD, University of Texas at Austin, 1997

Stephen E Courter, Lecturer  
Management  
MSBA, George Washington University, 1982

Eli P Cox III, Professor Emeritus  
Marketing  
DBA, Indiana University at Bloomington, 1973

Frank B Cross, Professor Emeritus  
JD, Harvard University, 1980

William H Cunningham, Professor  
James L. Bayless Chair for Free Enterprise  
Marketing  
PhD, Michigan State University, East Lansing, 1971

John A Daly, Professor  
Texas Commerce Bancshares, Inc. Centennial Professorship in Business  
Communication, Frank A. Liddell, Sr. Centennial Professorship in  
Communication

Management  
PhD, Purdue University Main Campus, 1977

Paul Damien, Professor  
B. M. (Mack) Rankin, Jr. Professorship in Business Administration  
Finance  
PhD, University of London, 1994

John W Davis, Lecturer  
Marketing  
MA, State University of New York at Binghamton, 1983

Justin T Day, Lecturer  
Finance  
MBA, University of Texas at Austin, 2006

James W Deitrick, Professor Emeritus  
Accounting  
DBA, University of Tennessee, 1977

Jade S Dekinder, Clinical Assistant Professor  
Marketing  
PhD, Emory University, 2007

Jeffrey S Dickerson, Lecturer  
JD, University of Texas at Austin, 1988

Douglas R Dierking, Senior Lecturer  
Management  
PhD, University of Texas at Austin, 1997

David M Dodd, Lecturer  
Marketing  
LLM, Georgetown University, 1981

John N Doggett, Senior Lecturer  
Management  
MBA, Harvard University, 1981

Andres Francisco Donangelo, Assistant Professor  
Finance  
PhD, University of California-Berkeley, 2011

Dain Donelson, Associate Professor  
Accounting  
PhD, University of Illinois at Urbana-Champaign, 2007

Aysa A Dordzhieva, Assistant Professor  
Accounting  
MS, Moscow State University, 2011

Minette E Drumwright, Associate Professor  
PhD, University of North Carolina at Chapel Hill, 1986

Jun A Duan, Associate Professor  
Marketing  
PhD, Duke University, 2006

Janet M Dukerich, Professor  
Harkins & Company Centennial Chair  
Management  
PhD, University of Minnesota-Twin Cities, 1985

Robert C Duvic, Distinguished Senior Lecturer  
Finance  
PhD, University of Texas at Austin, 1990

James S Dyer, Professor  
The Fondren Foundation Centennial Chair in Business  
Management  
PhD, University of Texas at Austin, 1969

Kathleen A Edwards, Senior Lecturer  
Management  
PhD, University of Texas at Austin, 1997

Megan Jean Ehrisman, Lecturer  
Marketing  
MA, Ball State University, 2008

Greta C Fenley, Lecturer  
Marketing  
MS, University of Oklahoma Health Sciences Center, 1999

Erica Fennewald, Lecturer  
Marketing  
MA, University of Missouri - Saint Louis, 2009

Anna C Fowler, Professor Emeritus  
Accounting  
PhD, University of Texas at Austin, 1977

Cesare Fracassi, Associate Professor  
Finance  
PhD, University of California-Los Angeles, 2009

James A Franklin, Lecturer  
Accounting  
MPA, University of Texas at Austin, 1993

James W Fredrickson, Professor  
Tom E. Nelson, Jr. Regents Professorship in Business  
Management  
PhD, University of Washington - Seattle, 1980

Robert N Freeman, Professor  
Arthur Andersen & Co. Alumni Centennial Professorship in Accounting  
Accounting  
PhD, University of Texas at Austin, 1977

Michael A Froehls, Lecturer  
Marketing  
PhD, Universitat Trier, 1995

William Fuchs, Associate Professor  
Finance  
PhD, Stanford University, 2005

Alessandro U Gabbi, Lecturer  
Marketing  
MBA, University of Texas at Austin, 1997

George W Gau, Professor Emeritus  
Finance  
PhD, University of Illinois at Urbana-Champaign, 1975

Kishore Gawande, Professor  
Century Club Professorship  
PhD, University of California-Los Angeles, 1991

Robert E George, Lecturer  
Accounting  
BBA, University of North Texas, 1971

Linda V Gerber, Senior Lecturer  
Marketing  
PhD, University of Texas at Austin, 1983

Andrew D Gershoff, Professor  
Foley's Professorship in Retailing

Marketing  
PhD, University of Texas at Austin, 1999

Genevieve Jo Giambalvo, Lecturer  
Marketing  
MEd, University of Texas at Austin, 2015

Stephen M Gilbert, Professor  
Sam P. Woodson, Jr. Centennial Memorial Professorship in Business Management  
PhD, Massachusetts Institute of Technology, 1992

Kate Gillespie, Associate Professor  
Marketing  
PhD, University of London, 1983

Elizabeth S Goins, Lecturer  
Management  
MA, George Mason University, 2006

Bradley Michael Gold, Lecturer  
JD, University of Southern California, 2006

Linda L Golden, Professor  
Joseph H. Blades Centennial Memorial Professorship in Insurance Marketing  
PhD, University of Florida, 1975

Stephen G Goodson, Lecturer  
Accounting  
BA, Stephen F Austin State University, 1985

Melissa E Graebner, Associate Professor  
Management  
PhD, Stanford University, 2001

Brian E Graham-Moore, Professor Emeritus  
Management  
PhD, Washington University in St Louis, 1970

Michael H Granof, Professor  
Ernst & Young Distinguished Centennial Professorship of Accounting  
Accounting  
PhD, University of Michigan-Ann Arbor, 1972

Steven Gray Jr, Assistant Professor  
Management  
PhD, Washington University in St Louis, 2017

Robert T Green, Professor Emeritus  
Marketing  
PhD, Pennsylvania State University Main Campus, 1971

John M Griffin, Professor  
James A. Elkins Centennial Chair in Finance  
Finance  
PhD, Ohio State U Main Campus, 1997

Genaro J Gutierrez, Associate Professor  
Management  
PhD, Stanford University, 1988

Beverly L Hadaway, Associate Professor Emeritus  
Finance  
PhD, The University of Alabama, 1981

Warren J Hahn, Clinical Associate Professor  
Finance  
PhD, University of Texas at Austin, 2005

Greg F Hallman, Senior Lecturer  
Finance  
PhD, University of Texas at Austin, 1996

Nicholas Jennings Hallman, Assistant Professor  
Accounting  
PhD, University of Missouri - Columbia, 2016

Douglas Hannah, Assistant Professor  
Management  
PhD, Stanford University, 2016

Roy D Harris, Professor Emeritus  
Management  
PhD, University of California-Los Angeles, 1965

Thomas B Harris IV, Adjunct Professor  
Finance  
BA, Texas A & M University, 1980

Finance  
MS, University of North Texas, 1982

Paul J Irvine, Lecturer  
Finance  
PhD, University of Rochester, 1996

Julie R Irwin, Professor  
Marlene and Morton Meyerson Centennial Professorship in Business  
PhD, University of Colorado at Boulder, 1992

Kapil Jain, Senior Lecturer  
Marketing  
PhD, Columbia University in the City of New York, 1990

David B Jemison, Professor Emeritus  
Management  
PhD, University of Washington - Seattle, 1978

Ross G Jennings, Professor  
Deloitte & Touche Professorship in Accounting  
Accounting  
PhD, University of California-Berkeley, 1987

Nathan Michael Jensen, Professor  
PhD, Yale University, 2002

Jeffrey L Johanns, Lecturer  
Accounting  
BS, University of Illinois at Urbana-Champaign, 1977

Travis Lake Johnson, Assistant Professor  
Finance  
PhD, Stanford University, 2012

Donna Johnston-Blair, Lecturer  
Accounting  
MBA, University of Toronto, 1976

Stephanie C Jue, Lecturer  
JD, South Texas College of Law, 2002

Steven J Kachelmeier, Professor  
Randal B. McDonald Chair in Accounting  
Accounting

PhD, University of Florida, 1988

J W Kamas, Lecturer  
Accounting  
MBA, University of Chicago, 1991

Kelly L Kamm, Distinguished Senior Lecturer  
Finance  
PhD, University of Texas at Austin, 1992

Ari C Kang, Clinical Assistant Professor  
Finance  
PhD, Carnegie Mellon University, 2010

Orlando R Kelm, Associate Professor  
Marketing  
PhD, University of California-Berkeley, 1989

Woochan Kim, Visiting Professor  
Finance  
PhD, Harvard University, 1999

Carey W King, Lecturer  
PhD, University of Texas at Austin, 2004

William R Kinney Jr, Professor Emeritus  
Accounting  
PhD, Michigan State University, East Lansing, 1968

Amanda J Kiouss, Lecturer  
Marketing  
MS, Texas Tech University, 2006

Lisa L Koonce, Professor  
Deloitte & Touche Chair in Accounting  
Accounting  
PhD, University of Illinois at Urbana-Champaign, 1990

Meeta Kothare, Adjunct Professor  
Finance  
Management  
PhD, University of Rochester, 1992

Samuel Arthur Kruger, Assistant Professor  
Finance  
PhD, Harvard University, 2014

Karen M Landolt, Lecturer  
JD, Northeastern University, 2000

Kermit D Larson, Professor Emeritus  
Accounting  
DBA, University of Colorado at Boulder, 1966

Volker Laux, Professor  
Aubrey and Elsie Fariss Professorship in Accounting  
Accounting  
PhD, Johann Wolfgang Goethe University, 2003

Sanford J Leeds, Distinguished Senior Lecturer  
Finance  
JD, University of Virginia, 1989

Brian R Lendecky, Senior Lecturer  
Accounting  
MPA, University of Texas at Austin, 1999

Kathleen T Li, Assistant Professor  
Marketing

MS, University of Pennsylvania, 2014

Stephen T Limberg, Professor  
PricewaterhouseCoopers Centennial Professorship in Accounting  
Accounting  
PhD, Arizona State University Main, 1982

Thomas E Lindsay, Lecturer  
Management  
PhD, University of Texas at Austin, 2015

Inessa Liskovich, Assistant Professor  
Finance  
PhD, Princeton University, 2015

Robert Livengood, Lecturer  
Management  
PhD, University of Maryland College Park, 2010

Kristie J Loescher, Senior Lecturer  
Management  
PhD, Nova Southeastern University, 2004

Finance  
PhD, University of Texas at Austin, 1997

Scott R Sanderson, Lecturer  
Finance  
MBA, University of Chicago, 1991

Jaime Joy Schmidt, Associate Professor  
Accounting

PhD, Texas A & M University, 2009

Jan Schneider, Clinical Assistant Professor  
Finance  
PhD, University of British Columbia, 2006

Vito A Sciaraffia, Clinical Assistant Professor  
Finance  
PhD, University of California-Berkeley, 2011

Ronnie Shah, Lecturer  
Finance  
PhD, University of Texas at Austin, 2008

Clemens Sialm, Professor  
Texas Commerce Bancshares, Inc. Centennial Professorship in  
Commercial Banking  
Finance  
PhD, Stanford University, 2001

Stuart R Singer, Lecturer  
Accounting  
JD, Columbia University in the City of New York, 1965

Stephen T Smith, Lecturer  
Accounting  
MS, University of Virginia, 1994

Jeremy L Smitheal, Lecturer  
Finance  
MBA, University of Texas at Austin, 2003

Michael Sockin, Assistant Professor  
Finance  
PhD, Princeton University, 2015

Garrett P Sonnier, Associate Professor  
Marketing  
PhD, University of California-Los Angeles, 2006

Lewis J Spellman, Professor  
Finance  
PhD, Stanford University, 1971

David B Spence, Professor  
Herbert D. Kelleher Centennial Professorship in Business Law  
PhD, Duke University, 1997

William A Spiller, Lecturer  
Accounting  
PhD, Duke University, 1989

James C Spindler, Professor  
The Sylvan Lang Professorship  
JD, Harvard University, 2000

Rajashri Srinivasan, Professor  
Sam Barshop Centennial Professorship in Marketing Administration  
Marketing  
PhD, Pennsylvania State University Main Campus, 2000

Laura T Starks, Professor  
Charles E. and Sarah M. Seay Regents Chair in Finance  
Finance  
PhD, University of Texas at Austin, 1981

Deidra G Stephens, Lecturer  
Management  
PhD, University of Nebraska - Lincoln, 2009

James H Stephens, Lecturer  
Marketing  
MA, University of Texas at Austin, 1995

Edward L Summers, Professor Emeritus  
Accounting  
PhD, University of Texas at Austin, 1965

Sharath M Sury, Lecturer  
Finance  
MBA, University of Chicago, 1995

William B Swann Jr, Professor  
William Howard Beasley III Professorship in the Graduate School of  
Business  
Management  
PhD, University of Minnesota-Twin Cities, 1978

Xavier Szejnberg, Lecturer  
Finance  
MBA, University of Pennsylvania, 1996

Elizabeth Teisberg, Professor  
PhD, Stanford University, 1988

Trent E Thurman, Lecturer  
Management  
MBA, University of Texas at Austin, 1994

Sheridan Titman, Professor  
Walter W. McAllister Centennial Chair in Financial Services  
Finance  
PhD, Carnegie Mellon University, 1981

Puay Khoon Toh, Associate Professor  
Management  
PhD, University of Michigan-Ann Arbor, 2007

Efstathios Tompaidis, Professor  
Finance  
PhD, University of Texas at Austin, 1994

Heidi K Toprac, Senior Lecturer  
Finance  
MBA, University of Texas at Austin, 1991

Sara M Toynbee, Assistant Professor  
Accounting  
PhD, University of Washington - Seattle, 2017

David B Verduzco, Lecturer  
Accounting  
MPA, University of Texas at Austin, 1993

Stephen M Walls, Senior Lecturer  
Marketing  
PhD, University of Texas at Austin, 2009

May Wang, Lecturer  
Accounting  
MPA, University of Texas at Austin, 2008

Adrian F Ward, Assistant Professor  
Marketing  
PhD, Harvard University, 2013

Keegan D Warren-Clem, Adjunct Professor  
JD, University of Texas at Austin, 2012

William J Way, Senior Lecturer

Finance

MBA, University of Texas at Austin, 1989

Rachel Wellhausen, Assistant Professor  
PhD, Massachusetts Institute of Technology, 2012

Timothy Daniel Werner, Associate Professor  
PhD, University of Wisconsin-Madison, 2009

Brian White, Assistant Professor  
Accounting  
PhD, University of Illinois at Urbana-Champaign, 2012

Erin Wike, Lecturer  
Marketing  
MBA, DeVry University, 2010

Kenneth W Wiles, Clinical Associate Professor  
Finance  
PhD, University of Texas at Austin, 1991

Braden Mern Williams, Assistant Professor  
Accounting  
MAcc, Brigham Young University, 2009

John K Williams, Senior Lecturer  
Marketing  
MBA, University of Texas at Austin, 1994

Yong Yu, Associate Professor  
Accounting  
PhD, Pennsylvania State University Park, 2006

Alminas Zaldokas, Assistant Professor  
Finance  
PhD, Institut Europeen d'Administration des Affaires, 2012

Mindy Zhang Xiaolan, Assistant Professor  
Finance  
PhD, University of California-Los Angeles, 2014

Wuyang Zhao, Assistant Professor  
Accounting  
PhD, Fudan University, 2013

Ronghuo Zheng, Assistant Professor  
Accounting  
PhD, Carnegie Mellon University, 2016

Kristina Zvinakis, Senior Lecturer  
Accounting  
PhD, University of Texas at Austin, 1998

## Moody College of Communication Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Michael D Akel, Lecturer  
Radio-Television-Film  
BS, Missouri State University, 1996

Wiley Akins, Lecturer  
Radio-Television-Film  
BFA, University of North Texas, 1976

Miguel A Alvarez, Lecturer  
Radio-Television-Film

MFA, University of Texas at Austin, 2009

Rosental C Alves, Professor  
Knight Chair in Journalism  
Journalism  
BA, Universidade Federal do Rio de Janeiro, 1976

Henry A Anderson, Associate Professor Emeritus  
Journalism  
PhD, University of Texas at Austin, 1975

Joan M Balash, Specialist  
Communication Sciences and Disorders  
MA, University of Texas at Austin, 1987

Dawna Ballard, Associate Professor  
Communication Studies  
PhD, University of California-Santa Barbara, 2002

Micah R Barber, Lecturer  
Radio-Television-Film  
MFA, University of Texas at Austin, 2011

Joshua Ben Barbour, Assistant Professor  
Communication Studies  
PhD, University of Illinois at Urbana-Champaign, 2006

Benjamin L Bays, Lecturer  
Radio-Television-Film  
BA, University of Texas at Austin, 1998

Lisa M Bedore, Professor  
Communication Sciences and Disorders  
PhD, Purdue University Main Campus, 1998

Mary C Beltran, Associate Professor  
Radio-Television-Film  
PhD, University of Texas at Austin, 2002

Charles E Berg, Professor  
Joe M. Dealey, Sr. Professorship in Media Studies  
Radio-Television-Film  
PhD, University of Texas at Austin, 1987

Jay Michael Bernhardt, Professor  
Walter Cronkite Regents Chair in Communication, DeWitt C. Reddick  
Regents Chair in Communication  
Communication Studies  
PhD, University of North Carolina at Chapel Hill, 1999

Karen Bernstein, Lecturer  
Radio-Television-Film  
HS/GED, , 1979

Mark E Bernstein, Associate Professor  
Communication Sciences and Disorders  
EdD, Boston University, 1980

Mary A Bock, Assistant Professor  
Communication Studies  
Journalism  
PhD, University of Pennsylvania, 2009

Casey A Boyle, Assistant Professor  
Communication Studies  
PhD, University of South Carolina - Columbia, 2011

Paul Brady, Lecturer  
BSPR, University of Texas at Austin, 2003

Robert B Brenner, Professor  
G. B. Dealey Regents Professorship in Journalism  
Journalism  
BA, Oberlin College, 1983

Larry D Browning, Professor Emeritus  
Communication Studies  
PhD, Ohio State U Main Campus, 1973

Barry Brummett, Professor  
Charles Sapp Centennial Professorship in Communication  
Communication Studies  
PhD, University of Minnesota-Twin Cities, 1978

Gene A Burd, Associate Professor Emeritus  
Journalism  
PhD, Northwestern University, 1964

Michael Butterworth, Professor  
Communication Studies  
PhD, Indiana University at Bloomington, 2006

Courtney T Byrd, Associate Professor  
William David Blunk Memorial Professorship  
Communication Sciences and Disorders  
PhD, Vanderbilt University, 2003

Julia Campbell, Assistant Professor  
Communication Sciences and Disorders  
PhD, University of Colorado at Boulder, 2015

Angela A Carey, Clinical Assistant Professor  
Communication Sciences and Disorders  
AuD, Pennsylvania College of Optometry, 2009

Craig A Champlin, Professor  
Lillie Hage Jamail Centennial Professorship  
Communication Sciences and Disorders  
PhD, University of Kansas Main Campus, 1987

Bharath Chandrasekaran, Associate Professor  
Communication Sciences and Disorders  
PhD, Purdue University Main Campus, 2008

Andrew D Chavez, Lecturer  
Journalism  
MS, Texas Christian University, 2010

Karma Ruth Chavez, Associate Professor  
Communication Studies  
PhD, Arizona State University Main, 2007

Gina Chen, Assistant Professor  
Journalism  
PhD, Syracuse University Main Campus, 2012

Wenhong Chen, Associate Professor  
Journalism  
Radio-Television-Film  
PhD, University of Toronto, 2007

Richard A Cherwitz, Professor  
Ernest A. Sharpe Centennial Professorship in Communication  
Communication Studies  
PhD, University of Iowa, 1978

Deepak J Chetty, Lecturer  
Radio-Television-Film  
MFA, University of Texas at Austin, 2015

Hsiang I Chyi, Associate Professor  
Journalism  
PhD, University of Texas at Austin, 1999

Renita B Coleman, Professor  
Journalism  
PhD, University of Missouri - Columbia, 2001

James B Colson, Professor Emeritus  
Journalism  
MA, University of California-Los Angeles, 1961

Martin R Cox, Senior Lecturer  
Communication Studies  
MA, University of Texas at Austin, 1994

Isabella C Cunningham, Professor  
Stan Richards Chair in Advertising and Public Relations Strategy  
PhD, Michigan State University, East Lansing, 1972

Joe H Cutbirth, Lecturer  
Communication Studies  
PhD, Columbia University in the City of New York, 2011

Tracy S Dahlby, Professor  
Frank A. Bennack, Jr. Chair in Journalism  
Journalism  
AM, Harvard University, 1976

Rene M Dailey, Associate Professor  
Communication Studies  
PhD, University of California-Santa Barbara, 2005

Rodger M Dalston, Professor Emeritus  
Communication Sciences and Disorders  
PhD, Northwestern University, 1972

John A Daly, Professor  
Texas Commerce Bancshares, Inc. Centennial Professorship in Business  
Communication, Frank A. Liddell, Sr. Centennial Professorship in  
Communication  
Communication Studies  
PhD, Purdue University Main Campus, 1977

Dennis C Darling, Professor  
Journalism  
MFA, School of the Art Institute of Chicago, 1973

Barbara L Davis, Professor Emeritus  
Communication Sciences and Disorders  
PhD, University of Texas at Austin, 1986

D D Davis, Professor  
Communication Studies  
PhD, University of Texas at Arlington, 1995

Katherine Winkler Dawson, Senior Lecturer  
Journalism  
MS, Columbia University in the City of New York, 2003

Donna De Cesare, Associate Professor  
Journalism  
MPhil, University of Essex, 1979

Eileen Flynn Delao, Lecturer  
Journalism  
BA, Massachusetts College of Liberal Arts, 1998

Lisa Z Dobias  
BSAdv, University of Texas at Austin, 1989

David H Donaldson, Lecturer  
Journalism  
JD, University of Texas at Austin, 1976

Erin Eileen Donovan, Associate Professor  
Communication Studies  
PhD, University of Illinois at Urbana-Champaign, 2008

Anthony David Dudo, Associate Professor  
PhD, University of Wisconsin-Madison, 2011

Catherine T Eaton, Lecturer  
Communication Sciences and Disorders  
PhD, University of Maryland College Park, 2014

Drew Ferrante, Lecturer  
BA, University of Massachusetts Lowell, 1990

John F Fiege, Lecturer  
Radio-Television-Film  
MFA, University of Texas at Austin, 2006

James A Fino, Lecturer  
BS, University of Texas at Austin, 1988

Jessica Franco, Clinical Assistant Professor  
Communication Sciences and Disorders  
PhD, University of Texas at Austin, 2008

Communication Sciences and Disorders  
MA, University of Texas - Pan American, 2010

# College of Education Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Lawrence D Abraham, Professor  
Kinesiology and Health Education  
EdD, Teachers College, Columbia University, 1975

Jennifer Keys Adair, Associate Professor  
Curriculum and Instruction  
PhD, Arizona State University Main, 2009

Ricardo C Ainslie, Professor  
M. K. Hage Centennial Professorship in Education  
Educational Psychology  
PhD, University of Michigan-Ann Arbor, 1979

Greg Allen, Clinical Associate Professor  
Educational Psychology  
PhD, San Diego State University, 2000

Adriana Alvarez, Assistant Professor  
Curriculum and Instruction  
PhD, University of Colorado at Boulder, 2017

Patricia A Aronin, Adjunct Professor  
Kinesiology and Health Education  
MD, University of North Carolina at Chapel Hill, 1975

Robin D Atwood, Research Assistant Professor  
Kinesiology and Health Education  
EdD, University of Texas at Austin, 1999

Heather Taylor Augustine, Clinical Assistant Professor  
Curriculum and Instruction  
MEd, University of Texas at Austin, 2006

Germine H Awad, Associate Professor  
Educational Psychology  
PhD, Southern Illinois University Carbondale, 2005

Flavio S Azevedo, Assistant Professor  
Curriculum and Instruction  
PhD, University of California-Berkeley, 2005

Marcia Barnes, Professor  
H. E. Hartfelder/The Southland Corporation Regents Chair in Human  
Resource Development  
Educational Psychology  
Special Education  
PhD, McMaster University, 1988

John Bartholomew, Professor  
Teresa Lozano Long Endowed Chair in Kinesiology and Health Education  
Kinesiology and Health Education  
PhD, Arizona State University Main, 1996

James P Barufaldi, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Maryland College Park, 1972

Sarah K Bearman, Assistant Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2005

Kimberly A Beckwith, Lecturer  
Kinesiology and Health Education

PhD, University of Texas at Austin, 2006

Susan N Beretvas, Professor  
John L. and Elizabeth G. Hill Centennial Professorship  
Educational Psychology  
PhD, University of Washington - Seattle, 2000

Janie E Black, Clinical Assistant Professor  
Educational Psychology  
PhD, Fielding Graduate Institute, 2011

George M Blanco, Associate Professor Emeritus  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1971

John G Bordie, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1958

Gary D Borich, Professor Emeritus  
Educational Psychology  
EdD, Indiana University at Bloomington, 1970

Maura Borrego, Professor  
Curriculum and Instruction  
PhD, Stanford University, 2003

Matthew Bowers, Clinical Assistant Professor  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2011

Gene Brooks, Lecturer  
Special Education  
PhD, University of Texas at Austin, 2000

Anthony L Brown, Associate Professor  
Curriculum and Instruction  
PhD, University of Wisconsin-Madison, 2006

Christopher P Brown, Professor  
Curriculum and Instruction  
PhD, University of Wisconsin-Madison, 2004

Keffrelyn D Brown, Associate Professor  
Curriculum and Instruction  
PhD, University of Wisconsin-Madison, 2006

Christopher G Brownson, Clinical Associate Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2001

Lawrence A Brownstein, Senior Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 1977

Diane P Bryant, Professor  
Mollie Villeret Davis Professorship in Learning Disabilities  
Special Education  
PhD, University of New Mexico Main Campus, 1986

Lynne J Bryant, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2017

Pamela S Buchanan, Lecturer  
Kinesiology and Health Education  
MA, Sam Houston State University, 1988

Angela M Bush-Richards, Lecturer  
Educational Psychology

PhD, University of Texas at Austin, 2006

Ralph W Cain, Associate Professor Emeritus  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1964

Rebecca M Callahan, Associate Professor  
Curriculum and Instruction  
PhD, University of California-Davis, 2003

Lucy Camarillo, Lecturer  
Curriculum and Instruction  
MEd, University of Texas at Austin, 2009

Cindy I Carlson, Professor  
Educational Psychology  
PhD, Indiana University at Bloomington, 1982

Heather L Carter, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Maryland College Park, 1969

Jennifer L Carter, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2004

Darla M Castelli, Professor  
Catherine Mae Parker Centennial Professorship in Education  
Kinesiology and Health Education  
PhD, University of South Carolina - Columbia, 2002

Stephanie W Cawthon, Associate Professor  
Educational Psychology  
Special Education  
PhD, University of Wisconsin-Madison, 2000

Claudia G Cervantes Soon, Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2011

Seung W Choi, Professor  
Educational Psychology  
PhD, University of Texas at Austin, 1996

Nathan Clemens, Associate Professor  
Special Education  
PhD, Lehigh University, 2009

Kevin O Cokley, Professor  
Oscar and Anne Mauzy Regents Professorship for Educational Research  
and Development  
Educational Psychology  
PhD, Georgia State University, 1998

Amanda K Colbert, Lecturer  
Kinesiology and Health Education  
MPH, University of Texas Health Science Center at San Antonio, 2014

Sarah M Collins, Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 2010

North A Cooc, Assistant Professor  
Special Education  
EdD, Harvard University, 2014

Edward F Coyle, Professor  
Kinesiology and Health Education  
PhD, University of Arizona, 1979

Charles W Craven, Associate Professor Emeritus  
Kinesiology and Health Education  
MEd, University of Texas at Austin, 1968

Don S Crowley Jr, Specialist  
Kinesiology and Health Education  
BS, University of Texas at Austin, 1990

Rosemary Magdalena Cuellar Torres, Lecturer  
Curriculum and Instruction  
MEd, University of Texas at El Paso, 2003

Nancy P Daley, Senior Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 1991

Ozro L Davis Jr, Professor Emeritus  
Curriculum and Instruction  
PhD, Vanderbilt University, 1958

Noah De Lissovoy, Associate Professor  
Curriculum and Instruction  
PhD, University of California-Los Angeles, 2005

Rosario C Deleon, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Houston, 2005

Christian Doabler, Assistant Professor  
Special Education  
PhD, University of Oregon, 2010

Barbara G Dodd, Professor  
Pearson Endowed Professorship in Psychometrics  
Educational Psychology  
PhD, University of Texas at Austin, 1984

David J Drum, Professor  
Educational Psychology  
PhD, American University, 1969

Susan K Dubois, Adjunct Assistant Professor  
Kinesiology and Health Education  
MD, University of Texas Health Science Center at Houston, 1988

Bonnie M Elliott, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1999

Michelle L Emery, Lecturer  
Kinesiology and Health Education  
MA, DePaul University, 2011

Edmund T Emmer, Professor Emeritus  
Educational Psychology  
PhD, University of Michigan-Ann Arbor, 1967

Susan B Empson, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Wisconsin-Madison, 1994

Nicholas M Enge, Lecturer  
Kinesiology and Health Education  
MS, Stanford University, 2012

John D Fair, Adjunct Professor  
Kinesiology and Health Education  
PhD, Duke University, 1970

Toni L Falbo, Professor

Educational Psychology  
PhD, University of California-Los Angeles, 1973

Terry S Falcomata, Associate Professor  
Special Education  
PhD, University of Iowa, 2008

Brian K Farr, Senior Lecturer  
Kinesiology and Health Education  
MA, Ohio State U Main Campus, 1996

Roger P Farrar, Professor  
Kinesiology and Health Education  
PhD, University of Massachusetts, 1976

Edmund J Farrell, Professor Emeritus  
Curriculum and Instruction  
PhD, University of California-Berkeley, 1969

Sherry L Field, Professor Emeritus  
Lee Hage Jamail Regents Chair in Education  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1991

Tracey Terece Flores, Assistant Professor  
Curriculum and Instruction  
PhD, Arizona State University Main, 2017

Douglas E Foley, Professor Emeritus  
Curriculum and Instruction  
PhD, Stanford University, 1970

Christina L Fragale, Clinical Assistant Professor  
Special Education  
PhD, University of Texas at Austin, 2012

Michael T Fresques, Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 1991

Manda G Freytag, Specialist  
Kinesiology and Health Education  
BS, University of Texas at Austin, 2006

Joe L Frost, Professor Emeritus  
Curriculum and Instruction  
EdD, University of Arkansas Main Campus, 1965

Shernaz B Garcia, Associate Professor Emeritus  
Special Education  
PhD, University of Texas at Austin, 1984

Douglas C Garrard, Lecturer  
Educational Psychology  
EdD, University of Texas at Austin, 2006

Mary C Gerwels, Senior Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 1994

Lucia A Gilbert, Professor Emeritus  
Educational Psychology  
PhD, University of Texas at Austin, 1974

Dell P Giles, Specialist  
Curriculum and Instruction  
PhD, University of Georgia, 2010

Erik Gnagy, Clinical Assistant Professor  
Kinesiology and Health Education

PhD, University of Texas at Austin, 2012

Maria Jorgelina Gonzalez Tristan, Assistant Professor  
Curriculum and Instruction  
PhD, Boston College, 2017

Nell H Gottlieb, Professor Emeritus  
Kinesiology and Health Education  
PhD, Boston University, 1981

Jane S Gray, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2006

Emily Strassner Greenspahn, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2006

Lisa Griffin, Associate Professor  
Kinesiology and Health Education  
PhD, University of Western Ontario, 1999

Lucy Guevara Velez, Lecturer  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2013

Frank J Guszak, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Wisconsin-Madison, 1966

Colby S Hall, Lecturer  
Special Education  
PhD, University of Texas at Austin, 2016

Dorothy R Hall, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2009

Shannon Colleen Hanby, Lecturer  
Kinesiology and Health Education  
MPH, University of Georgia, 2012

William R Harmer, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Minnesota-Twin Cities, 1959

Karol K Harris, Research Assistant Professor (Affiliated)  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2000

Louis Harrison, Professor  
Charles H. Spence, Sr. Centennial Professorship in Education  
Curriculum and Instruction  
PhD, Louisiana State University and Agricultural and Mechanical College, 1997

David Robert Heckler, Clinical Assistant Professor  
Educational Psychology  
PhD, Texas Tech University, 2012

James V Hoffman, Professor  
Priscilla Pond Flawn Regents Professorship in Early Childhood Education  
Curriculum and Instruction  
PhD, University of Missouri - Kansas City, 1977

Carole K Holahan, Professor  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 1976

Elaine K Horwitz, Professor

Curriculum and Instruction  
PhD, University of Illinois at Urbana-Champaign, 1980

Hao-Yuan Hsiao, Assistant Professor  
Kinesiology and Health Education  
PhD, University of Delaware, 2015

Joan Hughes, Associate Professor  
Curriculum and Instruction  
PhD, Michigan State University, East Lansing, 2000

Thomas M Hunt, Associate Professor  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2007

Anita Israni, Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 2015

John L Ivy, Professor Emeritus  
Kinesiology and Health Education  
PhD, University of Maryland College Park, 1976

Earl Jennings, Professor Emeritus  
Educational Psychology  
PhD, University of Texas at Austin, 1963

Jody L Jensen, Professor  
Kinesiology and Health Education  
PhD, University of Maryland College Park, 1989

Julie M Jensen, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Minnesota-Twin Cities, 1970

Rodolfo Jimenez Jr, Lecturer  
Curriculum and Instruction  
PhD, University of Texas at San Antonio, 2012

Esbelle M Jowers, Research Assistant Professor (Affiliated)  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 1999

Hyeon-Ah Kang, Assistant Professor  
Educational Psychology  
PhD, University of Illinois at Urbana-Champaign, 2016

Xiaofen Keating, Associate Professor  
Curriculum and Instruction  
PhD, University of Illinois at Urbana-Champaign, 2000

Timothy Z Keith, Professor  
Educational Psychology  
PhD, Duke University, 1982

Darren D Kelly, Lecturer  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2012

Deborah C Kelt, Lecturer  
Curriculum and Instruction  
MA, University of Texas at Austin, 2008

Grace Kim, Assistant Professor  
Curriculum and Instruction  
PhD, University of California-Berkeley, 2017

John D King, Professor Emeritus  
Special Education

EdD, University of Nebraska - Lincoln, 1964

Amy L Kinkade, Lecturer  
Curriculum and Instruction  
MEd, University of Texas at Austin, 1982

David A Klingbeil, Assistant Professor  
Educational Psychology  
PhD, University of Minnesota-Twin Cities, 2013

Eric Knuth, Professor  
Curriculum and Instruction  
PhD, University of Colorado at Boulder, 1999

William R Koch, Professor Emeritus  
Educational Psychology  
PhD, University of Missouri - Columbia, 1980

Harold Willis Kohl III, Research Professor  
Kinesiology and Health Education  
PhD, University of Texas Health Science Center at Houston, 1993

Gladys H Krause, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2014

Sophie Lalande, Assistant Professor  
Kinesiology and Health Education  
PhD, University of Auckland, 2008

Dorothy D Lambdin, Clinical Professor Emeritus  
Kinesiology and Health Education  
EdD, University of Massachusetts, 1992

Lara Latimer, Lecturer  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2013

Cecil Wayne Lee, Specialist  
Kinesiology and Health Education  
BS, University of Texas at Austin, 1972

Judith W Lindfors, Professor Emeritus  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1972

Amanda L Little, Clinical Assistant Professor  
Special Education  
PhD, University of Kansas Main Campus, 2009

Min Liu, Professor  
Curriculum and Instruction  
EdD, West Virginia University, 1992

Phillip D Long, Clinical Professor  
Educational Psychology  
PhD, Pennsylvania State University Park, 1983

Alexandra Loukas, Professor  
Barbie M. and Gary L. Coleman Professorship in Education  
Kinesiology and Health Education  
PhD, Michigan State University, East Lansing, 1997

Dorothy J Lovett, Associate Professor Emeritus  
Kinesiology and Health Education  
PhD, Texas Woman's University - Denton, 1968

Tia Madkins, Assistant Professor  
Curriculum and Instruction

PhD, University of California-Berkeley, 2016

Jennifer W Maedgen, Clinical Associate Professor  
Educational Psychology  
PhD, University of Texas at Austin, 1998

Robert M Malina, Professor Emeritus  
Kinesiology and Health Education  
PhD, University of Pennsylvania, 1968

Anna E Maloch, Professor  
Elizabeth Shatto Massey Endowed Chair in Education  
Curriculum and Instruction  
PhD, Vanderbilt University, 2000

Guy J Manaster, Professor Emeritus  
Educational Psychology  
PhD, University of Chicago, 1969

Jill A Marshall, Associate Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1984

Julie A Martinez, Lecturer  
Special Education  
PhD, University of Texas at Austin, 2016

Julie Maslowsky, Assistant Professor  
Kinesiology and Health Education  
PhD, University of Michigan-Ann Arbor, 2012

Christopher J McCarthy, Professor  
Educational Psychology  
PhD, Georgia State University, 1995

Lauren E McGill, Lecturer  
Kinesiology and Health Education  
MS, University of Texas at Austin, 2014

Nicole Kristen McLagan, Lecturer  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2014

Serena Messina, Lecturer  
Educational Psychology  
PhD, Università degli Studi di Roma La Sapienza, 2016

Brian Miller, Clinical Professor  
Kinesiology and Health Education  
PhD, University of Texas Medical Branch, 1983

Lynn M Monnat, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2009

Leslie A Moore, Senior Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 1987

Karisma Lucia Morton, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2017

Kathy Mosteller, Lecturer  
Kinesiology and Health Education  
BS, University of Alaska Anchorage, 1992

Katherine M Muenks, Assistant Professor  
Educational Psychology

PhD, University of Maryland College Park, 2016

Sheri Mycue, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of New Orleans, 2000

Kristin Neff, Associate Professor  
Educational Psychology  
PhD, University of California-Berkeley, 1997

Katherine A Noble, Lecturer  
Curriculum and Instruction  
MA, University of Texas at Austin, 2011

Nancy L Nussbaum, Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 1986

Fikile Nxumalo, Assistant Professor  
Curriculum and Instruction  
PhD, University of Victoria, 2015

Liesl Nydegger, Assistant Professor  
Kinesiology and Health Education  
PhD, Claremont Graduate University, 2015

Mark F O'Reilly, Professor  
Audrey Rogers Myers Centennial Professorship in Education  
Special Education  
PhD, University of Illinois at Urbana-Champaign, 1992

Jessica J Obleness, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Iowa, 2015

Alba A Ortiz, Professor Emeritus  
Special Education  
PhD, University of Texas at Austin, 1976

Tolga Ozyurtcu, Clinical Assistant Professor  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2014

Michael Parent, Assistant Professor  
Educational Psychology  
PhD, University of Florida, 2013

Soyoung Park, Assistant Professor  
Special Education  
PhD, Stanford University, 2017

Randall M Parker, Professor Emeritus  
Special Education  
PhD, University of Missouri - Columbia, 1970

Keryn Elizabeth Pasch, Associate Professor  
Kinesiology and Health Education  
PhD, University of Minnesota-Twin Cities, 2007

Puja G Patel, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2010

James R Patton, Adjunct Associate Professor  
Special Education  
EdD, University of Virginia (Old Code), 1980

Katherina A Payne, Assistant Professor  
Curriculum and Instruction

MA, Adelphi University, 2004

Anthony J Petrosino, Associate Professor  
Curriculum and Instruction  
PhD, Vanderbilt University, 1998

Beeman N Phillips, Professor Emeritus  
Educational Psychology  
EdD, Indiana University at Bloomington, 1954

Miguel Pinedo, Assistant Professor  
Kinesiology and Health Education  
PhD, University of California-San Diego, 2015

Keenan A Pituch, Associate Professor  
Educational Psychology  
PhD, Florida State University, 1997

Jennifer A Porterfield, Lecturer  
Special Education  
PhD, University of Texas at Austin, 2011

Sarah Rannells Powell, Assistant Professor  
Special Education  
PhD, Vanderbilt University, 2009

James E Pustejovsky, Assistant Professor  
Educational Psychology  
PhD, Northwestern University, 2013

Martha I Pyron, Adjunct Assistant Professor  
Kinesiology and Health Education  
MD, University of Texas at San Antonio, 1996

Nayelli Ramos, Clinical Assistant Professor  
Curriculum and Instruction  
MEd, University of Texas at Austin, 2017

Kathryn E Redd, Lecturer  
Kinesiology and Health Education  
MSW, New Mexico State University Main Campus, 2010

Stuart Reifel, Professor Emeritus  
Curriculum and Instruction  
EdD, University of California-Los Angeles, 1981

Paul E Resta, Professor  
Ruth Knight Millikan Centennial Professorship  
Curriculum and Instruction  
PhD, Arizona State University Main, 1968

Geoff B Rich, Specialist  
Kinesiology and Health Education  
MA, Southwestern Baptist Theological Seminary, 1995

John M Rich, Professor Emeritus  
Curriculum and Instruction  
PhD, Ohio State U Main Campus, 1958

Frank C Richardson, Professor Emeritus  
Educational Psychology  
PhD, Colorado State University, 1971

Catherine Riegler-Crumb, Associate Professor  
Curriculum and Instruction  
PhD, University of Chicago, 2000

Herbert J Rieth, Professor Emeritus  
Special Education

EdD, University of Kansas Main Campus, 1971

Aaron B Rochlen, Professor  
Educational Psychology  
PhD, University of Maryland College Park, 2000

Erin M Rodriguez, Assistant Professor  
Educational Psychology  
PhD, Vanderbilt University, 2012

Haydee M Rodriguez, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2000

Laura K Rojeski, Lecturer  
Special Education  
PhD, University of Texas at Austin, 2015

Nancy L Roser, Professor Emeritus  
Curriculum and Instruction  
EdD, Indiana University at Bloomington, 1970

Stephanie S Rude, Professor  
Educational Psychology  
PhD, Stanford University, 1983

Cynthia S Salinas, Professor  
Ruben E. Hinojosa Regents Professorship in Education  
Curriculum and Instruction  
PhD, University of Texas at Austin, 1999

Victor Sampson, Associate Professor  
Curriculum and Instruction  
PhD, Arizona State University Main, 2007

Delida Sanchez, Assistant Professor  
Educational Psychology  
PhD, Columbia University in the City of New York, 2002

Micheal Paige Sandbank, Assistant Professor  
Special Education  
PhD, Vanderbilt University, 2015

Michael T Sanders, Senior Lecturer  
Kinesiology and Health Education  
EdD, University of Tennessee, 1985

James L Schaller, Associate Professor  
Special Education  
PhD, University of Wisconsin-Madison, 1991

Diane L Schallert, Professor  
Educational Psychology  
PhD, Arizona State University Main, 1975

Allison Skerrett, Associate Professor  
Curriculum and Instruction  
PhD, Boston College, 2007

Darla R Smith, Clinical Professor  
Kinesiology and Health Education  
PhD, Texas Woman's University - Denton, 1996

Elizabeth A Feger, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2009

Jennifer C Smith, Lecturer  
Curriculum and Instruction

PhD, University of Arizona, 2002

Audrey M Sorrells, Associate Professor  
Special Education  
PhD, University of Florida, 1996

Emily Sparvero, Clinical Assistant Professor  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2008

Carol J Spaulding, Lecturer  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2009

Waneen W Spirduso, Professor Emeritus  
Kinesiology and Health Education  
EdD, University of Texas at Austin, 1966

Dixie Stanforth, Senior Lecturer  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 2010

Philip R Stanforth, Senior Lecturer  
Kinesiology and Health Education  
MS, University of Arizona, 1978

Kevin D Stark, Professor  
Educational Psychology  
PhD, University of Wisconsin-Madison, 1985

Kathryn E Starkes  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2009

Mary A Steinhardt, Professor  
Kinesiology and Health Education  
EdD, University of Houston, 1985

Audrey J Stone, Assistant Professor  
Kinesiology and Health Education  
PhD, University of Arkansas at Little Rock, 2010

Marie-Anne P Suizzo, Associate Professor  
Educational Psychology  
EdD, Harvard University, 1997

Marilla D Svinicki, Professor Emeritus  
Educational Psychology  
PhD, University of Colorado at Boulder, 1972

Deane A Swanson, Lecturer  
Kinesiology and Health Education  
MEd, Springfield College, 1979

Kathryn Klingler Tackett, Clinical Assistant Professor  
Special Education  
PhD, University of Texas at Austin, 2009

Hirofumi Tanaka, Professor  
Kinesiology and Health Education  
PhD, University of Tennessee, 1995

Deborah J Tharinger, Professor Emeritus  
Educational Psychology  
PhD, University of California-Berkeley, 1981

Janice S Todd, Professor  
Kinesiology and Health Education  
PhD, University of Texas at Austin, 1995

Martin L Tombari, Senior Lecturer  
Educational Psychology  
PhD, University of Arizona, 1975

Jessica R Toste, Assistant Professor  
Special Education  
PhD, McGill University, 2011

Marian E Trattner, Lecturer  
Kinesiology and Health Education  
MSW, University of Missouri - Columbia, 2008

Keith D Turner, Professor Emeritus  
Special Education  
PhD, University of Washington - Seattle, 1974

Kenneth W (Pete) Tyson, Associate Professor Emeritus  
Kinesiology and Health Education  
MEd, University of Texas at Austin, 1970

Luis Urrieta, Professor  
Suzanne B. and John L. Adams Endowed Professorship in Education  
Curriculum and Instruction  
PhD, University of North Carolina at Chapel Hill, 2003

Sepehr Vakil, Assistant Professor  
Curriculum and Instruction  
PhD, University of California-Berkeley, 2016

Richard Valencia, Professor Emeritus  
Educational Psychology  
PhD, University of California-Santa Barbara, 1977

Angela Valenzuela, Professor  
Curriculum and Instruction  
PhD, Stanford University, 1990

Sharon Vaughn, Professor  
Manuel J. Justiz Endowed Chair in Math, Science, and Technology in  
Teacher Education  
Special Education  
PhD, University of Arizona, 1981

Elizabeth G Walsh, Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 2016

Rachel Marie Watson, Specialist  
Kinesiology and Health Education  
MS, University of Texas at Austin, 2016

Melissa R Wetzel, Associate Professor  
Curriculum and Instruction  
PhD, Washington University in St Louis, 2007

Tiffany A Whittaker, Associate Professor  
Educational Psychology  
PhD, University of Texas at Austin, 2003

Frank W Wicker, Professor Emeritus  
Educational Psychology  
PhD, Princeton University, 1966

Molly T Wiebe, Clinical Assistant Professor  
Curriculum and Instruction  
PhD, University of Texas at Austin, 2016

Kelly J Williams, Lecturer  
Special Education

ME, Georgia Southern University, 2010

Brandy Windham, Lecturer  
Special Education  
MEd, University of Texas at Austin, 2014

Teri L Wood, Lecturer  
Educational Psychology  
PhD, University of Texas at Austin, 2006

Althea L Woodruff, Lecturer  
Special Education  
PhD, University of Texas at Austin, 2003

Mary J Worthy, Professor  
Curriculum and Instruction  
PhD, University of Virginia (Old Code), 1989

Veronica Yan, Assistant Professor  
Educational Psychology  
PhD, University of California-Los Angeles, 2014

San Yoon, Specialist  
Kinesiology and Health Education  
EdD, United States Sports Academy, 1992

Manuel X Zamarripa, Clinical Assistant Professor  
Educational Psychology  
PhD, University of Wisconsin-Madison, 2005

## Cockrell School of Engineering Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Jacob A Abraham, Professor  
Cockrell Family Regents Chair in Engineering #8  
Electrical and Computer Engineering  
PhD, Stanford University, 1974

P A Abusali, Lecturer  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1983

J K Aggarwal, Professor Emeritus  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 1964

Maruthi R Akella, Professor  
E. P. Schoch Professorship in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, Texas A & M University, 1998

Deji Akinwande, Associate Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 2010

David T Allen, Professor  
Melvin H. Gertz Regents Chair in Chemical Engineering  
Chemical Engineering  
PhD, California Institute of Technology, 1983

Hal S Alper, Professor  
Paul D. and Betty Robertson Meek Centennial Professorship in Chemical Engineering  
Chemical Engineering

PhD, Massachusetts Institute of Technology, 2006

Andrea Alu, Adjunct Professor  
Temple Foundation Endowed Professorship No. 3  
Electrical and Computer Engineering  
Electrical and Computer Engineering  
PhD, Università degli Studi Roma Tre, 2007

Catherine G Ambrose, Adjoint Associate Professor  
Biomedical Engineering  
PhD, University of Texas at Austin, 1992

Jeffrey G Andrews, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering #1  
Electrical and Computer Engineering  
PhD, Stanford University, 2002

Joshua Apte, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
MS, University of California-Berkeley, 2008

Aristotle Arapostathis, Professor  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1982

Neal E Armstrong, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1968

Ivo M Babuska, Professor  
Robert B. Trull Chair in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, Academy of Sciences, 1955

Francois Baccelli, Professor  
Simons Chair in Mathematics and Electrical and Computer Engineering  
Electrical and Computer Engineering  
These d'Etat, Université de Paris XI, Paris-Sud, 1983

Cem Bagdatlioglu, Lecturer  
Mechanical Engineering  
MS, University of Texas at Austin, 2015

Vaibhav Bahadur, Assistant Professor  
Mechanical Engineering  
PhD, Purdue University Main Campus, 2008

Aaron Blair Baker, Associate Professor  
Biomedical Engineering  
PhD, Harvard University, 2006

Lee E Baker, Professor Emeritus  
Electrical and Computer Engineering  
PhD, Baylor College of Medicine, 1965

Efstathios Bakolas, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Georgia Institute of Technology, 2011

Michael Baldea, Associate Professor  
Chemical Engineering  
PhD, University of Minnesota-Twin Cities, 2006

Ross Baldick, Professor  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1990

Matthew T Balhoff, Associate Professor

Petroleum and Geosystems Engineering  
PhD, Louisiana State University and Agricultural and Mechanical College, 2005

Sanjay K Banerjee, Professor  
Cockrell Family Regents Chair in Engineering #4  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 1983

Seth R Bank, Associate Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 2006

James A Bankson, Adjoint Associate Professor  
Biomedical Engineering  
PhD, Texas A & M University, 2001

Suzanne Barber, Professor  
AT&T Foundation Endowed Professorship in Engineering  
Electrical and Computer Engineering  
PhD, University of Texas at Arlington, 1992

Jonathan F Bard, Professor  
Mechanical Engineering  
DSc, George Washington University, 1979

Joel W Barlow, Adjunct Professor  
Chemical Engineering  
PhD, University of Wisconsin-Madison, 1970

John W Barnes, Professor Emeritus  
Mechanical Engineering  
PhD, University of Arkansas Main Campus, 1971

Ronald E Barr, Professor  
Mechanical Engineering  
PhD, Marquette University, 1975

Don S Batory, Professor  
David Bruton, Jr. Centennial Professorship in Computer Sciences #1  
Electrical and Computer Engineering  
PhD, University of Toronto, 1981

Martin L Baughman, Professor Emeritus  
Electrical and Computer Engineering  
PhD, Massachusetts Institute of Technology, 1972

Oguzhan Bayrak, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Toronto, 1999

Fred C Beach, Lecturer  
Chemical Engineering  
PhD, University of Texas at Austin, 2010

Joseph J Beaman Jr, Professor  
Earnest F. Gloyne Regents Chair in Engineering  
Mechanical Engineering  
ScD, Massachusetts Institute of Technology, 1979

Haley K Beasley  
Mechanical Engineering  
MD, Tulane University, 1962

Michael F Becker, Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 1974

Anthony Bedford, Professor Emeritus

Aerospace Engineering and Engineering Mechanics  
PhD, Rice University, 1967

Mikhail A Belkin, Associate Professor  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 2004

Adela Ben-Yakar, Professor  
Biomedical Engineering  
Mechanical Engineering  
PhD, Stanford University, 2001

Jeffrey K Bennighof, Research Professor (Affiliated)  
Aerospace Engineering and Engineering Mechanics  
PhD, Virginia Polytechnic Institute and State University, 1986

Brenda L Berkelaar, Lecturer  
Mechanical Engineering  
PhD, Purdue University Main Campus, 2010

Srinivas V Bettadpur, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1993

Amit Bhasin, Associate Professor  
Civil, Architectural, and Environmental Engineering  
DPhil, Texas A & M University, 2006

Abhimanyu Bhat, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2015

Chandra R Bhat, Professor  
Joe J. King Chair of Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, Northwestern University, 1991

J Eric Bickel, Associate Professor  
Mechanical Engineering  
Petroleum and Geosystems Engineering  
PhD, Stanford University, 1999

George Biros, Professor  
W. A. "Tex" Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 2  
Mechanical Engineering  
PhD, Carnegie Mellon University, 2000

Fabrizio Bisetti, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of California-Berkeley, 2007

Benjamin A Black, Lecturer  
Aerospace Engineering and Engineering Mechanics  
Mechanical Engineering  
PhD, Georgia Institute of Technology, 2007

David T Blackstock, Professor Emeritus  
Mechanical Engineering  
PhD, Harvard University, 1960

David G Bogard, Professor  
Baker Hughes Incorporated Centennial Professorship  
Mechanical Engineering  
PhD, Purdue University Main Campus, 1982

Paul M Bommer, Distinguished Senior Lecturer  
Chevron Lectureship in Petroleum Engineering  
Petroleum and Geosystems Engineering

PhD, University of Texas at Austin, 1979

Roger T Bonnecaze, Professor  
William and Bettye Nowlin Chair in Engineering  
Chemical Engineering  
PhD, California Institute of Technology, 1991

John D Borcharding, Adjunct Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Stanford University, 1972

Maura Borrego, Professor  
Mechanical Engineering  
PhD, Stanford University, 2003

Francis X Bostick Jr, Professor Emeritus  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1964

David L Bourell, Professor  
Temple Foundation Endowed Professorship No. 2  
Mechanical Engineering  
PhD, Stanford University, 1979

Alan C Bovik, Professor  
Cockrell Family Regents Chair in Engineering #3  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 1984

Stephen Boyles, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2009

John E Breen, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1962

Joan F Brennecke, Professor  
Cockrell Family Chair in Engineering #16  
Chemical Engineering  
PhD, University of Illinois at Urbana-Champaign, 1989

Amy Brock, Assistant Professor  
Biomedical Engineering  
PhD, Harvard University, 2004

Gregory L Brooks, Senior Lecturer  
Civil, Architectural, and Environmental Engineering  
MArch, University of Texas at Austin, 1996

Andrew C Brown, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2013

Michael D Bryant, Professor  
Mechanical Engineering  
PhD, Northwestern University, 1981

Tan T Bui, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Massachusetts Institute of Technology, 2007

Margaret Elise Byers, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2017

John H Byrne, Adjoint Professor  
Biomedical Engineering  
PhD, Polytechnic University, 1973

Carlos H Caldas, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 2003

Mehmet F Candas, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2007

Constantine Caramanis, Associate Professor  
Electrical and Computer Engineering  
PhD, Massachusetts Institute of Technology, 2006

Ben H Caudle, Professor Emeritus  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 1963

Armand J Chaput, Senior Lecturer  
Aerospace Engineering and Engineering Mechanics  
PhD, Texas A & M University, 1966

Randall J Charbeneau, Professor  
Jewel McAlister Smith Professorship in Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, Stanford University, 1978

William Charlton, Professor  
John J. McKetta Energy Professorship in Engineering  
Mechanical Engineering  
PhD, Texas A & M University, 1999

James R Chelikowsky, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Materials  
Chemical Engineering  
PhD, University of California-Berkeley, 1975

Dongmei Chen, Associate Professor  
Mechanical Engineering  
PhD, University of Michigan-Ann Arbor, 2006

Jingyi Chen, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Stanford University, 2014

Ray T Chen, Professor  
Keys and Joan Curry/Cullen Trust Endowed Chair  
Electrical and Computer Engineering  
PhD, University of California-Irvine, 1991

Christian Claudel, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 2010

Patricia Clayton, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
MSCE, University of Washington - Seattle, 2010

Noel T Clemens, Professor  
Cockrell Family Chair for Departmental Leadership #2, Bob R. Dorsey  
Professorship in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, Stanford University, 1991

John F Cline, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2012

Thomas J Connolly, Lecturer  
Aerospace Engineering and Engineering Mechanics  
Mechanical Engineering

PhD, University of Texas at Austin, 2000

Lydia Maria Contreras, Associate Professor  
Chemical Engineering  
PhD, Cornell University, 2008

Richard L Corsi, Professor  
Cockrell Family Chair for Departmental Leadership #3, Joe J. King Chair  
of Engineering No. 2  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Davis, 1989

Elizabeth Cosgriff-Hernandez, Professor  
L. B. (Preach) Meaders Professorship in Engineering  
Biomedical Engineering  
PhD, Case Western Reserve University, 2005

Brady R Cox, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2006

Harvey G Cragon, Professor Emeritus  
Electrical and Computer Engineering  
BSEE, Louisiana Tech University, 1950

Roy R Craig Jr, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Illinois at Urbana-Champaign, 1960

Michael E Crawford, Professor Emeritus  
Mechanical Engineering  
PhD, Stanford University, 1976

Richard H Crawford, Professor  
Mechanical Engineering  
PhD, Purdue University Main Campus, 1989

Alfonso Cuevas, Senior Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1990

Michael Arthur Cullinan, Assistant Professor  
Mechanical Engineering  
PhD, Massachusetts Institute of Technology, 2011

Adriana Costa Da Silveira, Adjunct Assistant Professor  
Biomedical Engineering  
PhD, University of Florida, 1998

Hugh C Daigle, Assistant Professor  
Petroleum and Geosystems Engineering  
PhD, Rice University, 2011

Walter K Daniel, Project Manager  
Aerospace Engineering and Engineering Mechanics  
MS, Georgia Institute of Technology, 1986

Clinton N Dawson, Professor  
John J. McKetta Centennial Energy Chair in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, Rice University, 1988

Gustavo A De Veciana, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering  
#2  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1993

Mojdeh Delshad, Research Professor (Affiliated)

Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 1986

Leszek F Demkowicz, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and  
Sciences II  
Aerospace Engineering and Engineering Mechanics  
PhD, Cracow Univ of Technology, 1982

Brandi L DeMont, Lecturer  
Aerospace Engineering and Engineering Mechanics  
Biomedical Engineering  
PhD, University of Texas at Austin, 2010

Eric Pierre Derouffignac, Adjunct Professor  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 1979

Ashish Deshpande, Associate Professor  
Mechanical Engineering  
PhD, University of Michigan-Ann Arbor, 2007

Luigi Dibiase, Adjunct Associate Professor  
Biomedical Engineering  
MD, University of Bari, 2000

David DiCarlo, Associate Professor  
Petroleum and Geosystems Engineering  
PhD, Cornell University, 1994

Kenneth R Diller, Professor  
Robert M. and Prudie Leibrock Endowed Professorship in Engineering  
Biomedical Engineering  
ScD, Massachusetts Institute of Technology, 1972

Georgios-Alex Dimakis, Associate Professor  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 2008

Birol Dindoruk, Professor  
Petroleum and Geosystems Engineering  
PhD, Stanford University, 1992

Brian Dinsmoor, Lecturer  
Chemical Engineering  
MS, University of Texas at Austin, 1979

Dragan Djurdjanovic, Associate Professor  
Mechanical Engineering  
PhD, University of Michigan-Ann Arbor, 2002

Ananth Dodabalapur, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering  
#3  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1990

Ricardo H Dunia, Volunteer  
Chemical Engineering  
PhD, University of Texas at Austin, 1997

Andrew K Dunn, Professor  
Donald J. Douglass Centennial Professorship in Engineering  
Biomedical Engineering  
PhD, University of Texas at Austin, 1997

Mary V Eberlein, Senior Lecturer  
Electrical and Computer Engineering

PhD, University of Tennessee, 1996

Thomas F Edgar, Professor  
George T. and Gladys H. Abell Endowed Chair of Engineering  
Chemical Engineering  
PhD, Princeton University, 1971

Thomas A Edison, Lecturer  
Chemical Engineering  
PhD, University of Maryland College Park, 1998

John G Ekerdt, Professor  
Dick Rothwell Endowed Chair in Chemical Engineering  
Chemical Engineering  
PhD, University of California-Berkeley, 1979

Chadi Said El Mohtar, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Purdue University Main Campus, 2008

Robert B Eldridge, Distinguished Senior Lecturer  
Chemical Engineering  
PhD, University of Texas at Austin, 1986

Zwy Eliezer, Professor Emeritus  
Mechanical Engineering  
DSc, Technion-Israel Institute of Technology, 1972

Janet L Ellzey, Professor  
Mechanical Engineering  
PhD, University of California-Berkeley, 1985

Stanislav Emelianov, Adjunct Professor  
Biomedical Engineering  
PhD, University of Moscow, 1992

Saeid Enayatpour, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2015

Michael D Engelhardt, Professor  
Adnan Abou-Ayyash Centennial Professorship in Transportation  
Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1989

Mattan Erez, Associate Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 2007

David N Espinoza, Assistant Professor  
Petroleum and Geosystems Engineering  
PhD, Georgia Institute of Technology, 2011

Brian L Evans, Professor  
Engineering Foundation Professorship  
Electrical and Computer Engineering  
PhD, Georgia Institute of Technology, 1993

Ofori A Ezekoye, Professor  
W. R. Woolrich Professorship in Engineering  
Civil, Architectural, and Environmental Engineering  
Mechanical Engineering  
PhD, University of California-Berkeley, 1991

William F Fagelson, Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 2004

Eric P Fahrenthold, Professor  
Mechanical Engineering  
PhD, Rice University, 1984

Donglei Fan, Associate Professor  
Mechanical Engineering  
PhD, Johns Hopkins University, 2007

Kasey M Faust, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Purdue University Main Campus, 2015

Marc D Feldman, Adjunct Professor  
Biomedical Engineering  
MD, University of Pennsylvania, 1981

Gregory L Fenves, Professor  
Cockrell Family Chair in Engineering #15, Regents Chair in Higher  
Education Leadership, Ed and Caroline Hyman Endowed Presidential  
Leadership Chair  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1984

Benito Fernandez, Associate Professor  
Mechanical Engineering  
PhD, Massachusetts Institute of Technology, 1988

Paulo J Ferreira, Adjunct Professor  
Mechanical Engineering  
PhD, University of Illinois at Urbana-Champaign, 1996

Raissa Patricia Ferron, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Northwestern University, 2008

Mark M Flynn, Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 2003

Kevin J Folliard, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1995

John Timothy Foster, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
Petroleum and Geosystems Engineering  
PhD, Purdue University Main Campus, 2009

David W Fowler, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Colorado at Boulder, 1965

Wallace T Fowler, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1965

Douglas J Fox Jr, Adjunct Assistant Professor  
Biomedical Engineering  
MD, Washington University in St Louis, 1999

Karl H Frank, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, Lehigh University, 1972

Benny D Freeman, Professor  
Richard B. Curran Centennial Chair in Engineering  
Chemical Engineering  
PhD, University of California-Berkeley, 1988

Keith A Friedman, Senior Lecturer  
Chemical Engineering  
PhD, University of Texas at Austin, 2003

Richard W Furlong, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1963

Donald S Fussell, Professor  
Trammell Crow Regents Professorship in Computer Science  
Electrical and Computer Engineering  
PhD, University of Texas at Dallas, 1980

Venkat Ganesan, Professor  
Kenneth A. Kobe Professorship in Chemical Engineering  
Chemical Engineering  
PhD, Massachusetts Institute of Technology, 1999

Vijay K Garg, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering  
#5  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1988

James Gelb, Lecturer  
Mechanical Engineering  
PhD, Massachusetts Institute of Technology, 1992

George Georgiou, Professor  
Laura Jennings Turner Chair in Engineering  
Biomedical Engineering  
Chemical Engineering  
PhD, Cornell University, 1987

Hande Gerkus, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2016

Andreas M Gerstlauer, Associate Professor  
Electrical and Computer Engineering  
PhD, University of California-Irvine, 2004

Ranjit Gharpurey, Professor  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1995

Omar Ghattas, Professor  
John A. and Katherine G. Jackson Chair in Computational Geosciences  
Biomedical Engineering  
Mechanical Engineering  
PhD, Duke University, 1988

Joydeep Ghosh, Professor  
Schlumberger Centennial Chair in Electrical Engineering  
Electrical and Computer Engineering  
PhD, University of Southern California, 1988

Robert B Gilbert, Professor  
Brunswick-Abernathy Regents Professorship in Soil Dynamics and  
Geotechnical Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 1993

Milos Gligoric, Assistant Professor  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 2015

Earnest F Gloyna, Professor Emeritus  
Civil, Architectural, and Environmental Engineering

DEng, Johns Hopkins University, 1953

David B Goldstein, Professor  
Hayden Head Centennial Professorship  
Aerospace Engineering and Engineering Mechanics  
PhD, California Institute of Technology, 1990

Anthony J Gonzales, Lecturer  
Civil, Architectural, and Environmental Engineering  
MSCE, University of Texas at Austin, 2009

Mario J Gonzalez, Professor Emeritus  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1971

John B Goodenough, Professor  
Virginia H. Cockrell Centennial Chair in Engineering  
Electrical and Computer Engineering  
Mechanical Engineering  
PhD, University of Chicago, 1952

Mack Grady, Professor Emeritus  
Electrical and Computer Engineering  
PhD, Purdue University Main Campus, 1983

Kenneth E Gray, Professor  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 1963

Derek A Haas, Assistant Professor  
Mechanical Engineering  
PhD, University of Texas at Austin, 2008

Michael R Haberman, Assistant Professor  
Mechanical Engineering  
PhD, Georgia Institute of Technology, 2007

Christopher C Hadlock, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2017

Matthew J Hall, Professor  
Mechanical Engineering  
PhD, Princeton University, 1987

Neal A Hall, Associate Professor  
Electrical and Computer Engineering  
PhD, Georgia Institute of Technology, 2004

Gary A Hallock, Professor  
Electrical and Computer Engineering  
PhD, Rensselaer Polytechnic Institute, 1982

Mark F Hamilton, Professor  
Harry L. Kent, Jr. Professorship in Mechanical Engineering  
Mechanical Engineering  
PhD, Pennsylvania State University Main Campus, 1983

Grani Adiwena Hanasusanto, Assistant Professor  
Mechanical Engineering  
PhD, Imperial College London, 2015

Raymond J Harshbarger III, Adjunct Professor  
Biomedical Engineering  
MD, University of Rochester, 1994

Hillary Hart, Distinguished Senior Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, Bryn Mawr College, 1981

John J Hasenbein, Professor  
Mechanical Engineering  
PhD, Georgia Institute of Technology, 1999

Noble Hatten, Research Associate  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 2016

Byron Haynes  
Petroleum and Geosystems Engineering  
MS, University of Texas at Austin, 1988

Robert W Heath Jr, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering  
#6  
Electrical and Computer Engineering  
PhD, Stanford University, 2002

Robert E Hebner, Research Professor  
Mechanical Engineering  
PhD, University of Missouri - Rolla, 1971

Zoya Heidari, Assistant Professor  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 2011

Adam Heller, Research Professor  
Chemical Engineering  
PhD, The Hebrew University of Jerusalem, 1961

Alexander J Heltzel, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2006

Todd A Helwig, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1994

Deborah S Hempel-Medina, Lecturer  
Petroleum and Geosystems Engineering  
MBA, Southern Methodist University, 2001

Lea Hildebrandt Ruiz, Assistant Professor  
Chemical Engineering  
PhD, Carnegie Mellon University, 2011

Ben R Hodges, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Stanford University, 1997

Edward R Holley, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
ScD, Massachusetts Institute of Technology, 1965

Rodney Horton, Adjunct Professor  
Biomedical Engineering  
MD, University of Texas Southwestern Medical Center at Dallas, 1988

John R Howell, Professor Emeritus  
Mechanical Engineering  
PhD, Case Western Reserve University, 1962

Trevor Daniel Hrynyk, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Toronto, 2013

Qin Huang, Professor  
Dula D. Cockrell Centennial Chair in Engineering #1  
Electrical and Computer Engineering

PhD, University of Cambridge, 1992

Rui Huang, Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Princeton University, 2001

William R Hudson, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1965

Thomas J Hughes, Professor  
Peter O'Donnell, Jr. Chair in Computational and Applied Mathematics  
Aerospace Engineering and Engineering Mechanics  
PhD, University of California-Berkeley, 1974

David G Hull, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, Rice University, 1967

Todd E Humphreys, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Cornell University, 2008

Gyeong S Hwang, Professor  
Paul D. and Betty Robertson Meek and American Petrofina Foundation  
Centennial Professorship in Chemical Engineering  
Chemical Engineering  
PhD, California Institute of Technology, 1999

Jang-Hi Im  
Mechanical Engineering  
ScD, Massachusetts Institute of Technology, 1976

Jean Incorvia, Assistant Professor  
Electrical and Computer Engineering  
PhD, Harvard University, 2015

Marcia Isakson, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2002

Moriba Jah, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Colorado at Boulder, 2005

Vijay Janapa Reddi, Associate Professor  
Electrical and Computer Engineering  
PhD, Harvard University, 2010

Ning Jiang, Assistant Professor  
Biomedical Engineering  
PhD, Georgia Institute of Technology, 2005

James O Jirsa, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 1963

Lizy K John, Professor  
B. N. Gafford Professorship in Electrical Engineering  
Electrical and Computer Engineering  
PhD, Pennsylvania State University Main Campus, 1993

Blair Johnson, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Cornell University, 2016

Keith P Johnston, Professor  
M. C. (Bud) and Mary Beth Baird Endowed Chair  
Chemical Engineering

PhD, University of Illinois at Urbana-Champaign, 1981

Brandon A Jones, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Colorado at Boulder, 2010

Miguel Jose-Yacamán, Adjunct Professor  
Chemical Engineering  
PhD, Nat University of Mexico, 1973

Maria G Juenger, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Northwestern University, 1999

Christine L Julien, Professor  
Annis and Jack Bowen Endowed Professorship in Engineering  
Electrical and Computer Engineering  
DSc, Washington University in St Louis, 2004

Davor Juricic, Professor Emeritus  
Mechanical Engineering  
DSc, University of Belgrade, 1964

Moses A Kai, Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 2012

Loukas F Kallivokas, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Carnegie Mellon University, 1995

Lynn E Katz, Professor  
Bettie Margaret Smith Professorship in Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Michigan-Ann Arbor, 1993

Fayez S Kazi, Lecturer  
Civil, Architectural, and Environmental Engineering  
MSE, University of Texas at Austin, 2001

Keith Keitz, Assistant Professor  
Chemical Engineering  
PhD, California Institute of Technology, 2013

Patrick K Kelley, Adjunct Associate Professor  
Biomedical Engineering  
MD, Baylor College of Medicine, 1998

Alireza Khademhosseini, Adjunct Associate Professor  
Biomedical Engineering  
PhD, Massachusetts Institute of Technology, 2005

Sarfraz Khurshid, Professor  
Electrical and Computer Engineering  
PhD, Massachusetts Institute of Technology, 2004

Hyun Jung Kim, Assistant Professor  
Biomedical Engineering  
PhD, Yonsei University, 2005

Cynthia J King, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, Arizona State University Main, 2012

Spyridon A Kinnas, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Massachusetts Institute of Technology, 1985

Kerry A Kinney, Professor  
L. P. Gilvin Centennial Professorship in Civil Engineering

Civil, Architectural, and Environmental Engineering  
PhD, University of California-Davis, 1996

Mary Jo Kirisits, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 2000

Dale E Klein, Professor  
Frank and Kay Reese Endowed Professorship in Engineering  
Mechanical Engineering  
PhD, University of Missouri - Columbia, 1977

Joshua B Klenzendorf, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2010

Richard E Klingner, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1977

Kara Kockelman, Professor  
DeWitt C. Greer Centennial Professorship in Transportation Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1998

Billy V Koen, Professor Emeritus  
Mechanical Engineering  
ScD, Massachusetts Institute of Technology, 1968

Joseph H Koo, Lecturer  
Mechanical Engineering  
ScD, George Washington University, 1987

Seungbum Koo, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2017

Brian A Korgel, Professor  
Edward S. Hyman Endowed Chair in Engineering, T. Brockett Hudson  
Professorship in Chemical Engineering  
Chemical Engineering  
PhD, University of California-Los Angeles, 1997

Desiderio Kovar, Professor  
E. C. H. Bantel Professorship for Professional Practice  
Mechanical Engineering  
PhD, Carnegie Mellon University, 1995

Thomas J Krueger, Senior Lecturer  
Mechanical Engineering  
PhD, Texas A & M University, 1975

Jaydeep Prakash Kulkarni, Assistant Professor  
Electrical and Computer Engineering  
PhD, Purdue University Main Campus, 2009

Kirby A Kuntz, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, Pennsylvania State University Main Campus, 1994

Erhan Kutanoglu, Associate Professor  
Mechanical Engineering  
PhD, Lehigh University, 1999

Stelios Kyriakides, Professor  
John Webb Jennings Chair in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, California Institute of Technology, 1980

Larry W Lake, Professor  
Shahid and Sharon Ullah Endowed Chair in Petroleum and Geosystems Engineering  
Petroleum and Geosystems Engineering  
PhD, Rice University, 1973

Simon S Lam, Professor  
Regents Chair in Computer Sciences #1  
Electrical and Computer Engineering  
PhD, University of California-Los Angeles, 1974

Jamie P Lamb Jr, Professor Emeritus  
Mechanical Engineering  
PhD, University of Illinois at Urbana-Champaign, 1961

Chad M Landis, Professor  
M. J. Thompson Regents Professorship in Aerospace Engineering and Engineering Mechanics  
Aerospace Engineering and Engineering Mechanics  
PhD, University of California-Santa Barbara, 1999

Sheldon Landsberger, Professor  
Texas Atomic Energy Research Foundation Professorship in Engineering  
Mechanical Engineering  
PhD, University of Toronto, 1982

Desmond F Lawler, Professor  
Nasser I. Al-Rashid Chair in Civil Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of North Carolina at Chapel Hill, 1980

Clyde E Lee, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1962

Jack C Lee, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering #4  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1988

Benjamin D Leibowicz, Assistant Professor  
Mechanical Engineering  
PhD, Stanford University, 2016

Fernanda L Leite, Associate Professor  
Civil, Architectural, and Environmental Engineering  
DPhil, Carnegie Mellon University, 2009

Marsha Jane Lewis, Lecturer  
Chemical Engineering  
PhD, University of Texas at Austin, 2010

Wei Li, Professor  
Mechanical Engineering  
PhD, University of Michigan-Ann Arbor, 1999

Kenneth M Liechti, Professor  
Zarrow Centennial Professorship in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, California Institute of Technology, 1980

Howard M Liljestrand, Professor  
Gerard A. Rohlich Regents Professorship in Civil Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, California Institute of Technology, 1980

Chao Liu, Lecturer  
Mechanical Engineering

PhD, University of Texas at Austin, 2016

Yuanyue Liu, Assistant Professor  
Mechanical Engineering  
PhD, Rice University, 2014

Douglas R Lloyd, Professor Emeritus  
Chemical Engineering  
PhD, University of Waterloo, 1977

Raymond C Loehr, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Wisconsin-Madison, 1961

Raul G Longoria, Professor  
Mechanical Engineering  
PhD, University of Texas at Austin, 1989

Nanshu Lu, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
Biomedical Engineering  
PhD, Harvard University, 2009

Lan Luan, Research Assistant Professor (Affiliated)  
Biomedical Engineering  
PhD, Stanford University, 2011

Nathaniel Lynd, Assistant Professor  
Chemical Engineering  
PhD, University of Minnesota-Twin Cities, 2007

Randy B Machemehl, Professor  
Nasser I. Al-Rashid Centennial Professorship in Transportation Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1975

Raghavendran Mahalingam, Lecturer  
Aerospace Engineering and Engineering Mechanics  
PhD, Georgia Institute of Technology, 1999

David R Maidment, Professor  
Hussein M. Alharthy Centennial Chair in Civil Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 1976

Krishan A Malik, Adjunct Professor  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 1987

Filippo Mangolini, Assistant Professor  
Mechanical Engineering  
PhD, Universitat Zurich, 2011

Arumugam Manthiram, Professor  
Cockrell Family Regents Chair in Engineering #7  
Mechanical Engineering  
PhD, Indian Institute of Technology - Chennai, 1980

Lance Manuel, Professor  
T. U. Taylor Professorship in Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, Stanford University, 1993

Harris L Marcus, Professor Emeritus  
Mechanical Engineering  
PhD, Northwestern University, 1966

Hans M Mark, Professor Emeritus

Aerospace Engineering and Engineering Mechanics  
PhD, Massachusetts Institute of Technology, 1954

Mia K Markey, Professor  
Biomedical Engineering  
PhD, Duke University, 2001

Kurt M Marshek, Professor Emeritus  
Mechanical Engineering  
PhD, Ohio State U Main Campus,

Glenn Y Masada, Professor  
Mechanical Engineering  
ScD, Massachusetts Institute of Technology, 1980

Ronald D Matthews, Professor  
Mechanical Engineering  
PhD, University of California-Berkeley, 1977

Jennifer A Maynard, Associate Professor  
Chemical Engineering  
PhD, University of Texas at Austin, 2002

Robert B McCann  
Civil, Architectural, and Environmental Engineering  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1975

Mark W McDermott, Executive in Residence  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 2014

John J McKetta Jr, Professor Emeritus  
Chemical Engineering  
PhD, University of Michigan-Ann Arbor, 1946

Daene C McKinney, Professor  
W.A. (Bill) Cunningham Professorship  
Civil, Architectural, and Environmental Engineering  
PhD, Cornell University, 1990

Mark E Mear, Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Harvard University, 1986

Fatima A Merchant, Adjunct Associate Professor  
Biomedical Engineering  
PhD, University of Texas at Austin, 1995

Robert M Metcalfe, Professor  
Electrical and Computer Engineering  
PhD, Harvard University, 1973

Delia Milliron, Professor  
Henry Beckman Professorship in Chemical Engineering  
Chemical Engineering  
PhD, University of California-Berkeley, 2004

Thomas E Milner, Professor  
The Joe King Professorship  
Biomedical Engineering  
Electrical and Computer Engineering  
PhD, University of Arizona, 1991

Kishore Mohanty, Professor  
Bank of America Centennial Professorship in Petroleum Engineering  
Petroleum and Geosystems Engineering  
PhD, University of Minnesota-Duluth, 1981

Tessie J Moon, Professor  
Mechanical Engineering  
PhD, University of Illinois at Urbana-Champaign, 1989

Christy Moore, Senior Lecturer  
Mechanical Engineering  
MA, University of Texas at Austin, 1990

Robert D Moser, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and Sciences  
Mechanical Engineering  
PhD, Stanford University, 1984

Charles B Mullins, Professor  
Z. D. Bonner Professorship of Chemical Engineering, Matthew Van Winkle Regents Professorship in Chemical Engineering  
Chemical Engineering  
PhD, California Institute of Technology, 1990

Juan Murcia Delso, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-San Diego, 2013

Mustafa N Musta, Visiting Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Southern Methodist University, 2012

Gyorgy Zoltan Nagy, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Swiss Federal Institute of Technology, 2011

Mohsen Nakhaeinejad, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2010

Vallath Nandakumar, Lecturer  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 1990

Dean P Neikirk, Professor  
Cullen Trust for Higher Education Endowed Professorship in Engineering #7  
Electrical and Computer Engineering  
PhD, California Institute of Technology, 1984

Richard R Neptune, Professor  
Cockrell Family Chair for Departmental Leadership #4, John T. MacGuire Professorship in Mechanical Engineering  
Mechanical Engineering  
PhD, University of California-Davis, 1996

Quoc P Nguyen, Professor  
J. H. Herring Centennial Professorship in Petroleum Engineering  
Petroleum and Geosystems Engineering  
PhD, Delft University of Technology, 2004

Steven P Nichols, Professor  
Mechanical Engineering  
PhD, University of Texas at Austin, 1975

Evdokia Nikolova, Assistant Professor  
Electrical and Computer Engineering  
PhD, Massachusetts Institute of Technology, 2009

Atila Novoselac, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Pennsylvania State University Main Campus, 2004

Shannon B O'Brien, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, University of Florida, 2007

William J O'Brien, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Stanford University, 1998

James T O'Connor, Professor  
C. T. Wells Professorship in Project Management  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1983

J T Oden, Professor  
Cockrell Family Regents Chair in Engineering #2, Peter O'Donnell, Jr.  
Centennial Chair in Computing Systems  
Aerospace Engineering and Engineering Mechanics  
PhD, Oklahoma State University Main Campus, 1962

Ryosuke Okuno, Assistant Professor  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 2009

Hilary C Olson, Lecturer  
Petroleum and Geosystems Engineering  
PhD, Stanford University, 1988

Jon E Olson, Professor  
Lois K. and Richard D. Folger Leadership Chair in Petroleum and  
Geosystems Engineering, Frank W. Jessen Professorship in Petroleum  
Engineering  
Petroleum and Geosystems Engineering  
PhD, Stanford University, 1991

Roy E Olson, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 1960

Raymond Lee Orbach, Professor  
Mechanical Engineering  
PhD, University of California-Berkeley, 1960

Michael E Orshansky, Professor  
Electrical and Computer Engineering  
PhD, University of California-Berkeley, 2001

Jeremiah F Palmer, Lecturer  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 2015

Zhigang Pan, Professor  
Engineering Foundation Endowed Professorship #1  
Electrical and Computer Engineering  
PhD, University of California-Los Angeles, 2000

Ronald L Panton, Professor Emeritus  
Mechanical Engineering  
PhD, University of California-Berkeley, 1966

Michael P Pappas, Lecturer  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 2004

Paola Passalacqua, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Minnesota-Twin Cities, 2009

Yale N Patt, Professor  
Ernest Cockrell, Jr. Centennial Chair in Engineering

Electrical and Computer Engineering  
PhD, Stanford University, 1966

Donald R Paul, Professor  
Ernest Cockrell, Sr. Chair in Engineering  
Chemical Engineering  
PhD, University of Wisconsin-Madison, 1965

Nicholas A Peppas, Professor  
Cockrell Family Regents Chair in Engineering #6  
Biomedical Engineering  
Chemical Engineering  
ScD, Massachusetts Institute of Technology, 1973

Dewayne E Perry, Professor Emeritus  
Electrical and Computer Engineering  
PhD, Stevens Institute of Technology, 1978

Ekwere J Peters, Professor Emeritus  
Petroleum and Geosystems Engineering  
PhD, University of Alberta, 1979

Daniel L Peterson, Adjunct Professor  
Biomedical Engineering  
MD, University of Colorado at Boulder, 1988

Michael Ray Piana, Volunteer  
Chemical Engineering  
MBA, University of Texas at Austin, 1978

Jean-Philip Piquemal, Adjunct Professor  
Biomedical Engineering  
PhD, Universite de Paris VI, Pierre et Marie Curie, 2004

Michael E Poehl, Lecturer  
Chemical Engineering  
MBA, University of Houston, 1988

Gary A Pope, Professor  
Texaco Centennial Chair in Petroleum Engineering  
Petroleum and Geosystems Engineering  
PhD, Rice University, 1972

Edward J Powers Jr, Professor Emeritus  
Electrical and Computer Engineering  
PhD, Stanford University, 1965

Roger L Priebe, Senior Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1997

Masa Prodanovic, Associate Professor  
Petroleum and Geosystems Engineering  
PhD, New York University, 2005

Jorge A Prozzi, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 2001

Mitchell W Pryor, Lecturer  
Electrical and Computer Engineering  
Mechanical Engineering  
PhD, University of Texas at Austin, 2002

Daniel Puperi, Lecturer  
Biomedical Engineering  
PhD, Rice University, 2016

Michael Pyrcz, Associate Professor

Petroleum and Geosystems Engineering  
PhD, University of Alberta, 2004

Varun Rai, Associate Professor  
Mechanical Engineering  
PhD, Stanford University, 2008

Laxminarayan L Raja, Professor  
Robert L. Parker, Sr. Centennial Professorship in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1996

D'Arcy C Randall, Senior Lecturer  
Chemical Engineering  
PhD, University of Texas at Austin, 2001

Ellen M Rathje, Professor  
Warren S. Bellows Centennial Professorship in Civil Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1997

Manuel Karl Rausch, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
Biomedical Engineering  
PhD, Stanford University, 2013

Krishnaswa Ravi-Chandar, Professor  
Temple Foundation Endowed Professorship No. 1  
Aerospace Engineering and Engineering Mechanics  
PhD, California Institute of Technology, 1982

Leonard F Register, Professor  
J. H. Herring Centennial Professorship in Engineering  
Electrical and Computer Engineering  
PhD, North Carolina State University, 1990

Pengyu Ren, Professor  
Biomedical Engineering  
PhD, University of Cincinnati Main Campus, 1999

Joshua D Rhodes, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2014

Gary T Rochelle, Professor  
Carol and Henry Groppe Professorship in Chemical Engineering  
Chemical Engineering  
PhD, University of California-Berkeley, 1977

Gregory J Rodin, Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Massachusetts Institute of Technology, 1986

Tomas M Rodriguez, Lecturer  
Civil, Architectural, and Environmental Engineering  
MS, University of Texas at Austin, 2009

Adrienne M Rosales, Assistant Professor  
Chemical Engineering  
PhD, University of California-Berkeley, 2013

Charles H Roth Jr, Professor Emeritus  
Electrical and Computer Engineering  
PhD, Stanford University, 1962

Juan P Ruiz, Other University Affiliate  
Chemical Engineering  
PhD, Carnegie Mellon University, 2011

Martin Glen Rumbaugh, Lecturer  
Civil, Architectural, and Environmental Engineering  
MS, University of Texas at Austin, 1998

Ryan P Russell, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 2004

Christopher G Rylander, Associate Professor  
Biomedical Engineering  
Mechanical Engineering  
PhD, University of Texas at Austin, 2005

Henry G Rylander III, Professor  
Harry H. Power Professorship in Engineering  
Biomedical Engineering  
Electrical and Computer Engineering  
MD, University of Texas Health Science Center at San Antonio, 1974

Marissa Nichole Rylander, Associate Professor  
Mechanical Engineering  
PhD, University of Texas at Austin, 2005

Michael S Sacks, Professor  
W. A. "Tex" Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 1  
Aerospace Engineering and Engineering Mechanics  
Biomedical Engineering  
Mechanical Engineering  
PhD, University of Texas at Arlington, 1992

Jason D Sagers, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2012

Chirag Sakhuja, Lecturer  
Electrical and Computer Engineering  
MS, University of Texas at Austin, 2017

Shelly Elese Sakiyama-Elbert, Professor  
Cockrell Family Chair for Departmental Leadership #1, Fletcher Stuckey  
Pratt Chair in Engineering  
Biomedical Engineering  
PhD, California Institute of Technology, 2000

Joseph C Salamone, Adjunct Professor  
Biomedical Engineering  
PhD, Polytechnic University, 1967

Salvatore Salamone, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Universita degli Studi di Palermo, 2007

Navid Saleh, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Carnegie Mellon University, 2007

Isaac C Sanchez, Professor  
William J. (Bill) Murray, Jr. Endowed Chair of Engineering  
Chemical Engineering  
PhD, University of Delaware, 1969

Juan M Sanchez, Professor  
Temple Foundation Endowed Professorship No. 4  
Mechanical Engineering  
PhD, University of California-Los Angeles, 1977

Irwin W Sandberg, Professor Emeritus  
Electrical and Computer Engineering

DEE, Polytechnic University, 1958

Sujay Sanghavi, Associate Professor  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 2006

Surya Santoso, Professor  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1996

Richard A Schapery, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, California Institute of Technology, 1962

Erich A Schneider, Professor  
Mechanical Engineering  
PhD, Cornell University, 2002

Carolyn C Seepersad, Associate Professor  
Mechanical Engineering  
PhD, Georgia Institute of Technology, 2004

Polina Sela, Assistant Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Technion-Israel Institute of Technology, 2011

Luis Sentis, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, Stanford University, 2007

Kamy Sepehrnoori, Professor  
W. A. "Monty" Moncrief Centennial Chair in Petroleum Engineering  
Petroleum and Geosystems Engineering  
PhD, University of Texas at Austin, 1977

Amir Shahmoradi, Lecturer  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 2015

Sanjay Shakkottai, Professor  
Ashley H. Priddy Centennial Professorship in Engineering  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 2002

Mukul M Sharma, Professor  
W. A. "Tex" Moncrief, Jr. Centennial Chair in Petroleum Engineering  
Petroleum and Geosystems Engineering  
PhD, University of Southern California, 1985

Li Shi, Professor  
The BFGoodrich Endowed Professorship in Materials Engineering  
Mechanical Engineering  
PhD, University of California-Berkeley, 2000

Jayant Sirohi, Associate Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Maryland College Park, 2002

Richard W Smalling, Adjoint Professor  
Biomedical Engineering  
PhD, University of Texas Health Science Center at Houston, 1977

Mark J T Smith, Professor  
Electrical and Computer Engineering  
PhD, Georgia Institute of Technology, 1984

Michael H Smolensky, Adjunct Professor  
Biomedical Engineering  
PhD, University of Illinois at Urbana-Champaign, 1971

Konstantin V Sokolov, Adjunct Associate Professor  
Biomedical Engineering  
PhD, Moscow State University, 1992

David Soloveichik, Assistant Professor  
Electrical and Computer Engineering  
PhD, California Institute of Technology, 2008

Gerald E Speitel Jr, Professor  
C. W. Cook Professorship in Environmental Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of North Carolina at Chapel Hill, 1985

S V Sreenivasan, Professor  
Joe C. Walter, Jr. Chair in Engineering  
Mechanical Engineering  
PhD, Ohio State U Main Campus, 1994

Jeanne Casstevens Stachowiak, Assistant Professor  
Biomedical Engineering  
PhD, University of California-Berkeley, 2008

Mark A Stadtherr, Research Professor  
Chemical Engineering  
PhD, University of Wisconsin-Madison, 1976

Karl D Stephan, Adjunct Associate Professor  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1983

Morris Stern, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Illinois at Urbana-Champaign, 1962

James E Stice, Professor Emeritus  
Chemical Engineering  
PhD, Illinois Institute of Technology, 1963

Wesley W Stidham, Lecturer  
Civil, Architectural, and Environmental Engineering  
BSME, University of Texas at Austin, 1995

Kenneth H Stokoe II, Professor  
Jennie C. and Milton T. Graves Chair in Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Michigan-Ann Arbor, 1972

Ben G Streetman, Professor Emeritus  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1966

Laura J Suggs, Professor  
Biomedical Engineering  
PhD, Rice University, 1998

James Samuel Sulzer, Assistant Professor  
Mechanical Engineering  
PhD, Northwestern University, 2009

Nan Sun, Associate Professor  
Electrical and Computer Engineering  
PhD, Harvard University, 2011

Earl E Swartzlander Jr, Professor  
Electrical and Computer Engineering  
PhD, University of Southern California, 1972

John S Swinnea, Lecturer  
Chemical Engineering

PhD, University of Texas at Austin, 1981

Eric M Taleff, Professor  
Mechanical Engineering  
PhD, Stanford University, 1995

Takashi Tanaka, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Illinois at Urbana-Champaign, 2012

Hu Tao, Assistant Professor  
Mechanical Engineering  
PhD, Boston University, 2010

Byron D Tapley, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1960

John L Tassoulas, Professor  
Phil M. Ferguson Professorship in Civil Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, Massachusetts Institute of Technology, 1981

Nina K Telang, Senior Lecturer  
Biomedical Engineering  
Electrical and Computer Engineering  
PhD, University of Notre Dame, 1995

David W Terreson, Adjunct Associate Professor  
Biomedical Engineering  
MD, University of Mississippi Medical Center, 1986

Delbert Tesar, Professor Emeritus  
Mechanical Engineering  
PhD, Georgia Institute of Technology, 1964

Ahmed Hossam Tewfik, Professor  
Cockrell Family Regents Chair in Engineering #1, Cockrell Family Chair  
for Departmental Leadership #5  
Electrical and Computer Engineering  
ScD, Massachusetts Institute of Technology, 1987

Andrea Lockerd Thomaz, Associate Professor  
Electrical and Computer Engineering  
PhD, Massachusetts Institute of Technology, 2006

Edison Thomaz Jr, Research Assistant Professor  
Electrical and Computer Engineering  
PhD, Georgia Institute of Technology, 2016

Mohit Tiwari, Assistant Professor  
Electrical and Computer Engineering  
PhD, University of California-Santa Barbara, 2011

Ufuk Topcu, Assistant Professor  
Aerospace Engineering and Engineering Mechanics  
PhD, University of California-Berkeley, 2008

Carlos Torres-Verdin, Professor  
Brian James Jennings Memorial Endowed Chair in Petroleum and  
Geosystems Engineering  
Petroleum and Geosystems Engineering  
PhD, University of California-Berkeley, 1991

Nur A Touba, Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 1996

Thomas M Truskett, Professor

Bill L. Stanley Endowed Leadership Chair in Chemical Engineering, Les  
and Sherri Stuewer Endowed Professorship in Chemical Engineering  
Chemical Engineering  
PhD, Princeton University, 2001

Richard L Tucker, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1963

James W Tunnell, Associate Professor  
Biomedical Engineering  
PhD, Rice University, 2002

David P Tuttle, Lecturer  
Mechanical Engineering  
PhD, University of Texas at Austin, 2015

Emanuel Tutuc, Associate Professor  
Electrical and Computer Engineering  
PhD, Princeton University, 2004

Timothy J Urban, Lecturer  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 2000

Jonathan W Valvano, Professor  
Electrical and Computer Engineering  
PhD, Massachusetts Institute of Technology, 1981

Eric van Oort, Professor  
B. J. Lancaster Professorship in Petroleum Engineering  
Petroleum and Geosystems Engineering  
PhD, University of Amsterdam, 1990

Philip L Varghese, Professor  
Stanley P. Finch Centennial Professorship in Engineering  
Aerospace Engineering and Engineering Mechanics  
PhD, Stanford University, 1983

Haris Vikalo, Associate Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 2003

Sriram Vishwanath, Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 2004

T R Viswanathan, Research Professor  
Electrical and Computer Engineering  
PhD, University of Saskatchewan, 1964

Gary C Vliet, Professor Emeritus  
Mechanical Engineering  
PhD, Stanford University, 1962

Norman K Wagner, Associate Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of Hawaii at Manoa, 1966

C Michael Walton, Professor  
Ernest H. Cockrell Centennial Chair in Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, North Carolina State University, 1971

Junmin Wang, Professor  
Mechanical Engineering  
PhD, University of Texas at Austin, 2007

Yaguo Wang, Assistant Professor

Mechanical Engineering  
PhD, Purdue University Main Campus, 2011

Zheng Wang, Assistant Professor  
Electrical and Computer Engineering  
PhD, Stanford University, 2006

Daniel M Wasserman, Associate Professor  
Electrical and Computer Engineering  
PhD, Princeton University, 2004

Michael E Webber, Professor  
Josey Centennial Professorship in Energy Resources  
Mechanical Engineering  
PhD, Stanford University, 2001

Ashley J Welch, Professor Emeritus  
Biomedical Engineering  
PhD, Rice University, 1964

William F Weldon, Professor Emeritus  
Mechanical Engineering  
MS, University of Texas at Austin, 1970

Charles J Werth, Professor  
Bettie Margaret Smith Chair in Environmental Health Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, Stanford University, 1997

Heidi R Westerfield Ross, Lecturer  
Civil, Architectural, and Environmental Engineering  
MSCE, University of Texas at Austin, 1993

John C Westkaemper, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1967

Mary F Wheeler, Professor  
Ernest and Virginia Cockrell Chair in Engineering  
Aerospace Engineering and Engineering Mechanics  
Petroleum and Geosystems Engineering  
PhD, Rice University, 1971

James C Wiley, Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 1974

Eric B Williamson, Professor  
Hussein M. Alharthy Centennial Professorship in Civil Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 1996

Carlton G Willson, Professor  
Rashid Engineering Regents Chair  
Chemical Engineering  
PhD, University of California-Berkeley, 1974

Preston S Wilson, Professor  
Mechanical Engineering  
PhD, Boston University, 2002

Eugene H Wissler, Professor Emeritus  
Chemical Engineering  
PhD, University of Minnesota-Twin Cities, 1955

Billy H Wood, Senior Lecturer  
Mechanical Engineering  
MArch, Texas A & M University, 1977

Sharon L Wood, Professor  
Cockrell Family Chair in Engineering #14, Jack and Beverly Randall  
Dean's Chair for Excellence in Engineering, Cockrell Family Dean's Chair  
in Engineering Excellence, Dean's Chair for Excellence in Engineering  
Civil, Architectural, and Environmental Engineering  
PhD, University of Illinois at Urbana-Champaign, 1986

Herbert H Woodson, Professor Emeritus  
Electrical and Computer Engineering  
DSc, Massachusetts Institute of Technology, 1956

Stephen G Wright, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1969

Tracy A Wuster, Lecturer  
Electrical and Computer Engineering  
PhD, University of Texas at Austin, 2011

Chong Xie, Assistant Professor  
Biomedical Engineering  
PhD, Stanford University, 2011

Ying Xu, Associate Professor  
Civil, Architectural, and Environmental Engineering  
PhD, Virginia Polytechnic Institute and State University, 2009

Thomas Yankeelov, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and  
Sciences IV - Computational Oncology, W. A. "Tex" Moncrief, Jr. Chair in  
Computational Engineering and Sciences IV - Computational Oncology  
Biomedical Engineering  
PhD, State University of New York at Stony Brook, 2003

Hsin-Chih Yeh, Assistant Professor  
Biomedical Engineering  
PhD, Johns Hopkins University, 2008

Ramesh Yerraballi, Distinguished Senior Lecturer  
Electrical and Computer Engineering  
PhD, Old Dominion University, 1996

Ching-Hsieh Yew, Professor Emeritus  
Aerospace Engineering and Engineering Mechanics  
PhD, University of California-Berkeley, 1962

Ali E Yilmaz, Associate Professor  
Electrical and Computer Engineering  
PhD, University of Illinois at Urbana-Champaign, 2005

Edward T Yu, Professor  
Judson S. Swearingen Regents Chair in Engineering  
Electrical and Computer Engineering  
PhD, California Institute of Technology, 1991

Guihua Yu, Assistant Professor  
Mechanical Engineering  
PhD, Harvard University, 2009

Joseph A Yura, Professor Emeritus  
Civil, Architectural, and Environmental Engineering  
PhD, Lehigh University, 1965

Ramin Zanbaghi, Lecturer  
Electrical and Computer Engineering  
PhD, Oregon State University, 2011

Renato Zanetti, Assistant Professor  
Aerospace Engineering and Engineering Mechanics

PhD, University of Texas at Austin, 2007

Zhanmin Zhang, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of Texas at Austin, 1996

Yuebing Zheng, Assistant Professor  
Mechanical Engineering  
PhD, Pennsylvania State University Park, 2010

Jianshi Zhou, Research Professor  
Mechanical Engineering  
PhD, Northeast Normal University, 1991

Hao Zhu, Assistant Professor  
Electrical and Computer Engineering  
PhD, University of Minnesota-Twin Cities, 2012

Janeta Zoldan, Assistant Professor  
Biomedical Engineering  
PhD, Technion-Israel Institute of Technology, 2004

Jorge G Zornberg, Professor  
Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 1994

## College of Fine Arts Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Lee E Abraham, Associate Professor Emeritus  
Theatre and Dance  
Theatre and Dance  
MFA, California Institute of the Arts, 1977

Nanette Acosta, Lecturer  
Theatre and Dance  
BFA, DePaul University, 1990

Christopher O Adejumo, Associate Professor  
Art and Art History  
PhD, Ohio State U Main Campus, 1997

Donnie R Albert, Senior Lecturer  
Music  
MM, Southern Methodist University, 1975

Sarah B Aldridge, Technical Staff Assistant IV  
Theatre and Dance  
BFA, Boston University, 2002

Gregory D Allen, Professor  
Music  
MM, Peabody Institute of Johns Hopkins University, 1972

Byron P Almen, Associate Professor  
Music  
PhD, Indiana University at Bloomington, 1998

Megan Alrutz, Associate Professor  
Theatre and Dance  
PhD, Arizona State University Main, 2004

Charles O Anderson, Associate Professor  
Theatre and Dance  
MFA, Temple University, 2002

Kevin J Auer, Technical Staff Assistant III

Art and Art History  
MA, University of Texas at Austin, 2009

Michael Avila, Lecturer  
Theatre and Dance  
MA, University of Houston, 2014

Nicole Awai, Assistant Professor  
Art and Art History  
MFA, University of South Florida, 1996

Christina Bain, Associate Professor  
Art and Art History  
PhD, University of Georgia, 2001

Rebecca A Baltzer, Professor Emeritus  
Music  
PhD, Boston University, 1974

Alyson Beaton, Lecturer  
Art and Art History  
MFA, School of the Art Institute of Chicago, 2003

Andrea P Beckham, Senior Lecturer  
Theatre and Dance  
BA, University of Texas at Austin, 1986

Ronald Berry Jr, Lecturer  
Theatre and Dance  
BA, Earlham College and Earlham School of Religion, 1995

Alexander Birchler, Research Associate  
Art and Art History  
MFA, Nova Scotia College of Art and Design, 1992

William Bloodgood, Senior Lecturer  
Theatre and Dance  
MFA, Pennsylvania State University Park, 1990

Paul E Bolin, Professor  
Art and Art History  
PhD, University of Oregon, 1986

Paul A Bonin, Associate Professor  
Theatre and Dance  
PhD, University of Texas at Austin, 2006

Carl Booker, Lecturer  
Theatre and Dance  
MFA, University of Texas at Austin, 2011

Yvonne M Boudreaux, Lecturer  
Theatre and Dance  
MFA, University of Texas at Austin, 2007

Penny Rae-Sunshine Brandt, Lecturer  
Music  
PhD, University of Connecticut, 2017

Troy D Brauntuch, Professor  
Art and Art History  
BFA, California Institute of the Arts, 1975

Nathaniel O Brickens, Professor  
Music  
DMA, University of Texas at Austin, 1989

Andrew A Brownell, Assistant Professor  
Music

DMA, Guildhall School of Music and Drama, 2010

Steven L Bryant, Associate Professor Emeritus  
Music  
MM, Wichita State University, 1971

James W Buhler, Professor  
Music  
PhD, University of Pennsylvania, 1996

Thomas A Burritt, Professor  
Music  
DMA, Northwestern University, 2000

William S Bussey, Lecturer  
Theatre and Dance  
BFA, University of Wisconsin-Milwaukee, 1983

Jett Butler, Lecturer  
Art and Art History  
BArch, Texas Tech University, 1996

Miguel Campinho, Lecturer  
Music  
DMA, University of Hartford, 2015

Charlotte Canning, Professor  
Frank C. Erwin, Jr. Centennial Professorship in Drama  
Theatre and Dance  
PhD, University of Washington - Seattle, 1991

Sarah A Canright, Senior Lecturer  
Art and Art History  
BFA, School of the Art Institute of Chicago, 1964

Andrew I Carlson, Clinical Assistant Professor  
Theatre and Dance  
PhD, University of Illinois at Urbana-Champaign, 2011

Laquetta L Carpenter, Lecturer  
Theatre and Dance  
MFA, Pennsylvania State University Park, 2007

Charles Daniel Carson, Associate Professor  
Music  
PhD, University of Pennsylvania, 2008

Edward Chambers, Professor  
Art and Art History  
PhD, University of London, 1998

B G Chandler, Professor  
Music  
PhD, Indiana University at Bloomington, 1975

Stacey H Chang  
Art and Art History  
MS, Stanford University, 1998

Michael J Charlesworth, Professor  
Art and Art History  
PhD, The University of Kent, 1990

Lee R Chesney III, Associate Professor  
Art and Art History  
MFA, Indiana University at Bloomington, 1972

Daniel Ching, Senior Lecturer  
Music

MMus, Cleveland Institute of Music, 1998

Barbara Chisholm, Lecturer  
Theatre and Dance  
BFA, The Catholic University of America, 1984

Pamela D Christian, Associate Professor Emeritus  
Theatre and Dance  
Theatre and Dance  
PhD, Southern Illinois University, 2000

John R Clarke, Professor  
Annie Laurie Howard Regents Professorship in Fine Arts  
Art and Art History  
PhD, Yale University, 1973

Jesse Andrew Cline, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2016

Rusty Cloyes, Senior Lecturer  
Theatre and Dance  
MFA, University of Texas at Austin, 2005

Michael Cohen, Lecturer  
Theatre and Dance  
MEd, University of Toronto, 1999

Thelma R Coles, Professor Emeritus  
Art and Art History  
MA, San Diego State University, 1978

Eric Joseph Colleary, Lecturer  
Theatre and Dance  
PhD, University of Minnesota-Twin Cities, 2014

Anna Collette, Assistant Professor  
Art and Art History  
MFA, Yale University, 2003

Anthony Creeden, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2017

Paula A Crider, Professor Emeritus  
Music  
MM, University of Texas at Austin, 1970

Jeremy L Cudd, Lecturer  
Theatre and Dance  
MFA, Pennsylvania State University Park, 2007

Tina Marie Curran, Clinical Assistant Professor  
Theatre and Dance  
PhD, New York University, 2010

Stephen J Daly, Professor Emeritus  
Art and Art History  
MFA, Cranbrook Academy of Art, 1967

Penelope J Davies, Professor  
Art and Art History  
PhD, Yale University, 1994

Christin Sawyer Davis, Lecturer  
Theatre and Dance  
MFA, American Conservatory Theater, 2007

Kathryn M Dawson, Assistant Professor  
Theatre and Dance

MFA, University of Texas at Austin, 2006

Andrew F Dell'Antonio, Professor  
Music  
PhD, University of California-Berkeley, 1991

Douglas J Dempster, Professor  
Effie Marie Cain Regents Chair in Fine Arts, The Marie and Joseph D. Jamail, Sr. Regents Professorship in Fine Arts  
Theatre and Dance  
PhD, University of North Carolina at Chapel Hill, 1983

Robert A Desimone, Professor  
Sarah and Ernest Butler Professorship in Opera  
Music  
DMA, University of Washington - Seattle, 1981

Hanns-Bertold Dietz, Professor Emeritus  
Music  
PhD, University of Innsbruck, 1956

Steven Dietz, Professor  
Theater for Youth Chair  
Theatre and Dance  
BA, University of Northern Colorado, 1980

Franchelle Dorn, Professor  
Virginia L. Murchison Regents Professorship in Fine Arts  
Theatre and Dance  
MFA, Yale University, 1975

Lara Rose Dossett, Administrative Program Coordinator  
Theatre and Dance  
MFA, University of Texas at Austin, 2014

Lucien Douglas, Associate Professor  
Theatre and Dance  
PhD, Michigan State University, East Lansing, 1996

Kathryn Lynn Dreier, Lecturer  
Art and Art History  
BFA, Pratt Institute, 2009

Eric A Drott, Associate Professor  
Music  
PhD, Yale University, 2001

Robert A Duke, Professor  
Marlene and Morton Meyerson Centennial Professorship in Music  
Music  
PhD, Florida State University, 1983

Rachel N Durkin-Drga, Lecturer  
Theatre and Dance  
MFA, University of Illinois at Urbana-Champaign, 1991

John E Durst, Lecturer  
Art and Art History  
MFA, Yale University, 2016

William A Edwards, Lecturer  
Music  
MM, University of Texas at Austin, 1989

Jeff W Ellinger, Lecturer  
Theatre and Dance  
BA, University of Texas at Austin, 1977

Bernard B Engel, Professor Emeritus

Theatre and Dance  
PhD, University of Pittsburgh, Pittsburgh Campus, 1967

Elizabeth Engelman, Lecturer  
Theatre and Dance  
MFA, Columbia University in the City of New York, 1996

Veit F Erlmann, Professor  
History of Music Chair  
Music  
PhD, University of Cologne, 1978

William A Fedkenheuer, Senior Lecturer  
Music  
BM, Rice University, 1998

Howard L Fine, Lecturer  
Theatre and Dance  
PhD, Rhode Island College, 2008

Eliot Fisher, Lecturer  
Theatre and Dance  
MFA, Goddard College, 2015

George F Flaherty, Associate Professor  
Art and Art History  
PhD, University of California-Santa Barbara, 2010

Robert Freeman, Professor Emeritus  
Music  
PhD, Princeton University, 1967

John M Fremgen, Associate Professor  
Music  
MMus, University of Southern California, 1993

George A Frock, Professor Emeritus  
Music  
MME, University of Kansas Main Campus, 1963

Joshua Gall, Lecturer  
Music  
MM, University of Florida, 2014

Nancy B Garrett, Professor Emeritus  
Music  
MM, University of Texas at Austin, 1966

Christine Garvey, Lecturer  
Art and Art History  
MFA, Concordia University, Montreal, 2015

Marianne Gedigian, Professor  
Sarah and Ernest Butler Professorship in Music  
Music  
BM, Boston University, 1986

Sophia Gilmsen, Associate Professor  
Music  
Diploma (Artist), Saint Petersburg State Conservatory, 1973

Joshua T Gindele, Senior Lecturer  
Music  
BMus, The Juilliard School, 2000

Erica Lynn Gionfriddo, Lecturer  
Theatre and Dance  
BFA, Shenandoah University, 2006

James J Glavan, Professor

David Bruton, Jr. Regents Professorship in Fine Arts  
Theatre and Dance  
MA, Kent State University Main Campus, 1984

Jason A Goldstein, Lecturer  
Art and Art History  
PhD, University of Texas at Austin, 2017

Mark K Goodman, Professor Emeritus  
Art and Art History  
BA, Boston University, 1970

Donald J Grantham, Professor  
Frank C. Erwin, Jr. Centennial Professorship in Music  
Music  
DMA, University of Southern California, 1980

John W Grubbs, Associate Professor Emeritus  
Music  
PhD, University of California-Los Angeles, 1972

Julia E Guernsey, Professor  
Art and Art History  
PhD, University of Texas at Austin, 1997

Lita A Guerra, Professor Emeritus  
Music  
MM, University of Texas at Austin, 1959

Jonathan F Gunn, Assistant Professor  
Music  
MM, Duquesne University, 1997

Michelle Habeck, Associate Professor  
Theatre and Dance  
MFA, Northwestern University, 1996

Kenneth J Hale, Professor Emeritus  
Art and Art History  
MFA, University of Illinois at Urbana-Champaign, 1973

Scott S Hanna, Senior Lecturer  
Music  
DMA, University of Texas at Austin, 1999

Lorenzo Rennie Harris, Senior Lecturer  
Theatre and Dance  
PhD, Columbia College Chicago, 2013

Paul P Hatgil, Professor Emeritus  
Art and Art History  
MA, Columbia University in the City of New York, 1951

Robert S Hatten, Professor  
Marlene and Morton Meyerson Professorship in Music  
Music  
PhD, Indiana University at Bloomington, 1982

Amy Hauff, Professor  
Leslie Waggener Professorship in the College of Fine Arts  
Art and Art History  
MFA, School of the Art Institute of Chicago, 1983

Ryan Taylor Hawk, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2017

Millie C Heckler, Lecturer  
Theatre and Dance

BFA, University of Colorado at Boulder, 2015

Jeffrey L Hellmer, Professor  
Priscilla Pond Flawn Regents Professorship in Organ or Piano  
Performance  
Music  
MM, University of Rochester, 1983

Linda D Henderson, Professor  
David Bruton, Jr. Centennial Professorship in Art History  
Art and Art History  
PhD, Yale University, 1975

Rebecca Henderson, Professor Emeritus  
Music  
MM, University of Rochester, 1986

Timothy G High, Associate Professor  
Art and Art History  
MFA, University of Wisconsin-Madison, 1976

Martha F Hilley, Professor  
Music  
MA, Sam Houston State University, 1971

Joan A Holladay, Professor  
Art and Art History  
PhD, Brown University, 1982

Adam Holzman, Professor  
Parker C. Fielder Regents Professorship in Music  
Music  
MM, Florida State University, 1984

Teresa Hubbard, Professor  
William and Bettye Nowlin Endowed Professorship in Photography  
Art and Art History  
MFA, Nova Scotia College of Art and Design, 1992

Patrick Hughes, Associate Professor  
Music  
MMus, University of Wisconsin-Madison, 1988

Zachery Ingram, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2017

Richard M Isackes, Professor  
Joanne Sharp Crosby Regents Chair in Design and Technology  
Theatre and Dance  
MFA, Carnegie Mellon University, 1975

Judith A Jellison, Professor  
Mary D. Bold Regents Professorship of Music  
Music  
PhD, Florida State University, 1972

Coleman A Jennings, Professor Emeritus  
Theatre and Dance  
EdD, New York University, 1974

Kristin Wolfe Jensen, Professor  
Music  
MM, The Juilliard School, 1991

Ann C Johns, Distinguished Senior Lecturer  
Art and Art History  
PhD, University of Texas at Austin, 2000

J E Johnson, Lecturer  
Theatre and Dance  
BA, Bethel College, 1996

Omi Osun Joni L Jones, Professor  
Theatre and Dance  
PhD, New York University, 1993

Jerry F Junkin, Professor  
Music  
MMus, University of Texas at Austin, 1979

Janet E Kastner, Associate Professor Emeritus  
Art and Art History  
MFA, Alfred University, 1979

Ryan S Kelly, Lecturer  
Music  
DMA, University of Texas at Austin, 2014

Nancy K Koenning, Lecturer  
Theatre and Dance  
MM, University of Texas at Austin, 1983

Karl Korte, Professor Emeritus  
Music  
MS, The Juilliard School, 1956

Stefan M Kostka, Professor Emeritus  
Music  
PhD, University of Wisconsin-Madison, 1969

Kelly Kuo, Lecturer  
Music  
MM, Manhattan School of Music, 1998

John C Largess, Senior Lecturer  
Music  
BA, Yale University, 1995

Joan Lazarus, Professor Emeritus  
Theatre and Dance  
MFA, Arizona State University Main, 1982

Delaine E Leonard, Senior Lecturer  
Music  
MMus, University of Texas at Austin, 1984

Janice Leoshko, Associate Professor  
Art and Art History  
PhD, Ohio State U Main Campus, 1987

Brian D Lewis, Professor  
David and Mary Winton Green Chair in String Performance and Pedagogy  
Music  
MM, The Juilliard School, 1993

Hannah Lewis, Assistant Professor  
Music  
PhD, Harvard University, 2014

William L Lewis, Professor  
Frank C. Erwin, Jr. Centennial Professorship in Opera  
Music  
BM, Texas Christian University, 1967

Alicia L Link, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2017

Samuel M Lipman, Lecturer  
Theatre and Dance  
MM, University of Texas at Austin, 2017

Rina Kundu Little, Lecturer  
Art and Art History  
PhD, Ohio State U Main Campus, 2008

Beili Liu, Professor  
Art and Art History  
MFA, University of Michigan-Ann Arbor, 2003

Sondra Lomax, Lecturer  
Theatre and Dance  
MFA, York College, 1979

Beto Lopez  
Art and Art History  
MS, University of Texas at Austin, 2002

Marie Lorenz, Lecturer  
Art and Art History  
MFA, Yale University, 2002

Doreen Lorenzo  
Art and Art History  
MS, Boston University, 1981

Allison Elizabeth Lowery, Technical Staff Assistant IV  
Theatre and Dance  
MFA, North Carolina School of the Arts, 1999

Kristin Lucas, Assistant Professor  
Art and Art History  
MFA, Stanford University, 2006

Amarante L Lucero, Professor Emeritus  
Theatre and Dance  
MFA, Southern Methodist University, 1976

William A Lundberg, Professor Emeritus  
Art and Art History  
MA, University of California-Berkeley, 1965

Kirk E Lynn, Associate Professor  
Theatre and Dance  
MFA, University of Texas at Austin, 2004

Betty P Mallard, Associate Professor Emeritus  
Music  
DMA, University of Texas at Austin, 1979

Karen L Maness, Lecturer  
Theatre and Dance  
BA, Whittier College, 1995

Hunter C March, Professor Emeritus  
Music  
PhD, University of Michigan-Ann Arbor, 1980

Vincent A Mariani, Professor Emeritus  
Art and Art History  
BFA, Yale University, 1959

Cari E McDonnell, Lecturer  
Music  
PhD, University of Texas at Austin, 2015

Lawrence D McFarland, Professor Emeritus  
Art and Art History

MFA, University of Nebraska - Lincoln, 1976

Maurie McInnis, Professor  
Jacob and Frances Sanger Mossiker Chair in the Humanities #1  
Art and Art History  
PhD, Yale University, 1996

Bethany S McLemore, Lecturer  
Music  
PhD, University of Texas at Austin, 2016

Richard E McMaster, Lecturer  
Art and Art History  
MFA, Arizona State University Main, 2008

Jeffrey L Meikle, Professor  
Stiles Professorship in American Studies  
Art and Art History  
PhD, University of Texas at Austin, 1977

Zachary Richard Meisner, Technical Staff Assistant III  
Art and Art History  
MFA, University of Texas at Austin, 2017

Robert W Melton, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2010

Susan E Mickey, Professor  
Susan Menefee Ragan Regents Professorship in Fine Arts  
Theatre and Dance  
MFA, The University of Alabama, 1979

Amissa K Miller, Lecturer  
Theatre and Dance  
MFA, Columbia University in the City of New York, 2009

Ann B Miller, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2016

Bucky Miller, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2017

Melissa W Miller, Associate Professor Emeritus  
Art and Art History  
BA, New Mexico State University Main Campus, 1974

Adam Miller-Batteau, Lecturer  
Theatre and Dance  
MFA, University of Exeter, 2012

John R Mills, Professor  
Music  
DMA, University of Texas at Austin, 1998

Michael J Mogavero, Associate Professor  
Art and Art History  
MFA, Maryland Institute College of Art, 1975

Kevin Edward Mooney, Lecturer  
Music  
PhD, University of Texas at Austin, 1998

Robin D Moore, Professor  
Music  
PhD, University of Texas at Austin, 1995

Cynthia C Morrow, Lecturer

Music  
DMA, Ohio State U Main Campus, 1989

James M Morrow Jr, Associate Professor  
Music  
DMA, University of Texas at Austin, 1996

Michael J Muelhaupt, Technical Staff Assistant III  
Art and Art History  
MFA, University of Texas at Austin, 2017

Stephennie Mulder, Associate Professor  
Art and Art History  
PhD, University of Pennsylvania, 2008

Elisabeth R Murphy, Lecturer  
Art and Art History  
MAEd, Texas Tech University, 2008

Leslie A Mutchler, Associate Professor  
Art and Art History  
MFA, Temple University, 2004

Roger E Myers, Professor  
Music  
MM, University of Southern California, 1992

David A Nancarrow, Professor Emeritus  
Theatre and Dance  
PhD, University of Birmingham, 1975

Luisa Nardini, Associate Professor  
Music  
PhD, Universita degli Studi di Roma La Sapienza, 2001

Lana C Neal, Lecturer  
Music  
PhD, University of Texas at Austin, 2013

Anton Nel, Professor  
Joe R. & Teresa Lozano Long Chair in Piano  
Music  
MMus, University of Cincinnati Main Campus, 1984

Adele E Nelson, Assistant Professor  
Art and Art History  
PhD, New York University, 2012

David P Neumeyer, Professor Emeritus  
Music  
PhD, Yale University, 1976

Moyosore Benjamin Okediji, Professor  
Art and Art History  
PhD, University of Wisconsin Colleges, 1995

Guido Olivieri, Senior Lecturer  
Music  
PhD, University of California-Santa Barbara, 2005

Sandra E Organ, Lecturer  
Theatre and Dance  
BA, Antioch College, 2016

Sven Ortel, Lecturer  
Theatre and Dance  
BA, Rose Bruford College of Theatre and Performance, 2001

Francie Ostrower, Professor  
Theatre and Dance

PhD, Yale University, 1991

Dorothy Oshea Overbey, Lecturer  
Theatre and Dance  
BFA, Southern Methodist University, 1999

Stephen C Page, Assistant Professor  
Music  
DMA, University of Iowa, 2011

Athanasio Papalexandrou, Associate Professor  
Art and Art History  
PhD, Princeton University, 1998

Joonho Park, Assistant Professor  
Music  
MM, State University of Music and Performing Arts Stuttgart, 2010

Andrew A Parker, Assistant Professor  
Music  
DMA, University of Michigan-Ann Arbor, 2009

Sara L Paul, Lecturer  
Theatre and Dance  
BA, University of Texas at Austin, 2012

Gordon B Peacock, Professor Emeritus  
Theatre and Dance  
MFA, Carnegie Mellon University, 1952

Glenn A Peers, Professor  
Art and Art History  
PhD, Johns Hopkins University, 1996

Suzanne M Pence, Associate Professor  
Music  
DMA, University of Missouri - Kansas City, 1992

Monica M Penick  
Art and Art History  
PhD, University of Texas at Austin, 2007

Bruce W Pennycook, Professor  
Music  
DMA, Stanford University, 1978

Carolina Perez, Lecturer  
Theatre and Dance  
MFA, University of North Carolina School of the Arts, 2008

Jose Manuel Perez, Technical Staff Assistant IV  
Art and Art History  
MFA, University of Texas at Austin, 2015

Bogdan P Perzynski, Professor  
Art and Art History  
MFA, Poznan Academy of Fine Arts, 1979

Bradley R Petersen, Associate Professor Emeritus  
Art and Art History  
MFA, University of Georgia, 1975

Russell F Pinkston, Professor  
Music  
DMA, Columbia University in the City of New York, 1984

Harvey C Pittel, Professor Emeritus  
Music  
MM, Northwestern University, 1967

Russell Podgorsek, Senior Administrative Associate  
Music  
DMA, University of Texas at Austin, 2013

Mary Ellen Poole, Professor  
Florence Thelma Hall Centennial Chair in Music  
Music  
PhD, University of Illinois at Urbana-Champaign, 1994

Brant Pope, Professor  
Z. T. Scott Family Chair in Drama  
Theatre and Dance  
PhD, Michigan State University, East Lansing, 2003

Brenda I Preyer, Professor Emeritus  
Art and Art History  
PhD, Harvard University, 1976

Robert Ramirez, Associate Professor  
Theatre and Dance  
MFA, University of Delaware, 1995

Stephanie Ramirez, Lecturer  
Art and Art History  
MFA, University of Texas at Austin, 2017

Susan W Rather, Professor  
Art and Art History  
PhD, University of Delaware, 1986

Anastasia S Rees, Lecturer  
Art and Art History  
PhD, University of Texas at Austin, 2017

Ann M Reynolds, Associate Professor  
Art and Art History  
PhD, City University of New York Graduate Center, 1993

Andrew M Riggsby, Professor  
Lucy Shoe Meritt Professorship in Classics  
Art and Art History  
PhD, University of California-Berkeley, 1993

John Riskey, Professor  
Meredith and Cornelia Long Chair in Art and Art History  
Art and Art History  
MFA, Yale University, 1986

Rebecca Rossen, Associate Professor  
Theatre and Dance  
PhD, Northwestern University, 2006

Rick E Rowley, Senior Lecturer  
Music  
HS/GED, , 1973

Astrid Runggaldier, University Professional (Part-Time)  
Art and Art History  
PhD, Boston University, 2009

Janice Lynch Ryan  
Art and Art History  
BBA, Baylor University, 1977

Wayne W Salzman II, Specialist  
Music  
MM, University of Texas at Austin, 2010

Kj Sanchez, Associate Professor

Theatre and Dance  
MFA, University of California-San Diego, 1992

Tamara Sanikidze, Lecturer  
Music  
DMA, University of Maryland College Park, 2010

Ray K Sasaki, Professor  
Frank C. Erwin, Jr. Centennial Professorship in Fine Arts  
Music  
MMus, University of North Texas, 1975

Peter A Saul, Professor Emeritus  
Art and Art History  
BFA, Washington University in St Louis, 1956

Margo L Sawyer, Professor  
Art and Art History  
MFA, Yale University, 1982

D Schmandt-Besserat, Professor Emeritus  
Art and Art History  
MA, Ecole Du Louvre, 1965

John C Schmidt, Adjunct Professor  
Music  
PhD, New York University, 1979

Robert N Schmidt, Professor Emeritus  
Theatre and Dance  
MFA, University of Wisconsin-Madison, 1979

Roxanne Schroeder-Arce, Associate Professor  
Theatre and Dance  
MFA, University of Texas at Austin, 2000

Seth O Schwaiger, Lecturer  
Art and Art History  
MFA, Glasgow School of Art, 2013

William Schweigert, Lecturer  
Art and Art History  
MFA, Northwestern University, 2015

Laurie Pierce Scott, Associate Professor  
Music  
PhD, University of Texas at Austin, 1987

Sonia T Seeman, Associate Professor  
Music  
PhD, University of California-Los Angeles, 2002

Yevgeniy Sharlat, Associate Professor  
Music  
DMA, Yale University, 2007

Patrick Forsythe Shaw, Lecturer  
Theatre and Dance  
MFA, University of Texas at Austin, 2015

Andrew B Shea, Professor  
Theatre and Dance  
MA, California Institute of the Arts, 1985

Richard A Shiff, Professor  
Effie Marie Cain Regents Chair in Art  
Art and Art History  
PhD, Yale University, 1973

Amy L Simmons, Senior Lecturer

Music  
PhD, University of Texas at Austin, 2007

Sara M Simons, Lecturer  
Theatre and Dance  
PhD, New York University, 2013

Stephen M Slawek, Professor  
Music  
PhD, University of Illinois at Urbana-Champaign, 1986

David A Small, Associate Professor  
Music  
MM, University of Cincinnati Main Campus, 1987

Jeffrey C Smith, Professor  
Kay Fortson Chair in European Art  
Art and Art History  
PhD, Columbia University in the City of New York, 1979

Matthew R Smith, Lecturer  
Theatre and Dance  
MA, Angelo State University, 2012

Michael Smith, Professor  
Art and Art History  
BA, Colorado College, 1974

Rachael Angelica Starbuck, Technical Staff Assistant III  
Art and Art History  
MFA, University of Texas at Austin, 2017

John S Stoney, Associate Professor  
Art and Art History  
MFA, Cranbrook Academy of Art, 1998

Nikita Storojev, Associate Professor  
Music  
MFA, Moscow P.I. Tchaikovsky Conservatory, 1979

Stacy A Strakowski, Lecturer  
Theatre and Dance  
MM, University of Cincinnati Main Campus, 2001

David S Stuart, Professor  
Linda and David Schele Chair in the Art and Writing of Mesoamerica  
Art and Art History  
PhD, Vanderbilt University, 1995

Daniel D Sutherland, Associate Professor  
Art and Art History  
MFA, Syracuse University Main Campus, 1991

Rebecca Switzer, Lecturer  
Theatre and Dance  
MFA, University of Arizona, 1987

Lisa B Thompson, Associate Professor  
Theatre and Dance  
PhD, Stanford University, 2000

Bion Tsang, Professor  
Joe R. & Teresa Lozano Long Chair in Cello  
Music  
MM, Yale University, 1993

John R Turci, Lecturer  
Music  
PhD, Yale University, 2004

Michael C Tusa, Professor  
Music  
PhD, Princeton University, 1983

Jarvis W Ulbricht, Professor Emeritus  
Art and Art History  
PhD, University of Iowa, 1976

Jason Paul Urban, Senior Lecturer  
Art and Art History  
MFA, University of Iowa, 2002

Colette T Valentine, Associate Professor  
Music  
DMA, State University of New York at Stony Brook, 2005

Efrain E Velez, Lecturer  
Art and Art History  
MArch, University of Texas at Austin, 2006

Charles W Villarrubia, Associate Professor  
Music  
MM, Boston University, 1988

Louis A Waldman, Associate Professor  
Art and Art History  
PhD, New York University, 1999

James Michael Walker, Lecturer  
Art and Art History  
MFA, Virginia Commonwealth University, 2013

Dan E Welcher, Professor  
The Lee Hage Jamail Regents Professorship in Fine Arts  
Music  
MM, Manhattan School of Music, 1972

Marianne Wheeldon, Professor  
Music  
PhD, Yale University, 1997

Susan D Whyne, Associate Professor Emeritus  
Art and Art History  
MA, University of San Francisco, 1974

Darlene C Wiley, Professor  
Music  
MM, University of Illinois at Urbana-Champaign, 1969

Jason R Wilkins, Lecturer  
Art and Art History  
BA, University of Arkansas Main Campus, 2010

Holly A Williams, Professor  
Theatre and Dance  
MFA, Texas Woman's University - Denton, 1994

Jeff Williams, Associate Professor  
Art and Art History  
MFA, Syracuse University Main Campus, 2002

Lyn C Wiltshire, Professor  
Theatre and Dance  
BA, State University of New York Empire State College, 1969

Lewis R Wiman, Professor Emeritus  
Art and Art History  
MFA, University of Florida, 1966

Patti Wolf, Lecturer

Music  
MM, Yale University, 1989

Satoko S Yamamoto, Senior Lecturer  
Music  
MMus, Cleveland Institute of Music, 1998

John A Yancey, Professor  
John D. Murchison Regents Professorship in Art  
Art and Art History  
MFA, Georgia Southern University, 1993

Jeanette Yew, Lecturer  
Theatre and Dance  
MFA, California Institute of the Arts, 2006

Suzan L Zeder, Professor Emeritus  
Theatre and Dance  
PhD, Florida State University, 1978

Daxun Zhang, Associate Professor  
Music  
BM, Indiana University at Bloomington, 2005

Gerhardt Zimmermann, Professor  
Jack G. Taylor Regents Professorship in Fine Arts  
Music  
MFA, University of Iowa, 1971

## John A. and Katherine G. Jackson School of Geosciences Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Milo M Backus, Professor Emeritus  
Geological Sciences  
PhD, Massachusetts Institute of Technology, 1956

Jay L Banner, Professor  
Fred M. Bullard Professorship in Geological Sciences  
Geological Sciences  
PhD, State University of New York at Stony Brook, 1986

Jaime D Barnes, Associate Professor  
Geological Sciences  
PhD, University of New Mexico Main Campus, 2006

Thorsten Becker, Professor  
Shell Companies Foundation Distinguished Chair in Geophysics  
Geological Sciences  
PhD, Harvard University, 2002

Whitney Behr, Assistant Professor  
Geological Sciences  
PhD, University of Southern California, 2011

Christopher J Bell, Professor  
Geological Sciences  
PhD, University of California-Berkeley, 1997

Philip C Bennett, Professor  
Geological Sciences  
PhD, Syracuse University Main Campus, 1989

Robert E Boyer, Professor Emeritus  
Geological Sciences

PhD, University of Michigan-Ann Arbor, 1959

Daniel O Breecker, Associate Professor  
Geological Sciences  
PhD, University of New Mexico Main Campus, 2008

Meinhard Bayani Cardenas, Professor  
Geological Sciences  
PhD, New Mexico Institute of Mining and Technology, 2006

William D Carlson, Professor Emeritus  
Geological Sciences  
PhD, University of California-Los Angeles, 1980

Ginny A Catania, Associate Professor  
Geological Sciences  
PhD, University of Washington - Seattle, 2004

Elizabeth J Catlos, Associate Professor  
Geological Sciences  
PhD, University of California-Los Angeles, 2000

Julia A Clarke, Professor  
John A. Wilson Professorship in Vertebrate Paleontology  
Geological Sciences  
PhD, Yale University, 2002

Mark P Cloos, Professor  
Getty Oil Company Centennial Chair in Geological Sciences  
Geological Sciences  
PhD, University of California-Los Angeles, 1981

Kerry H Cook, Professor  
Geological Sciences  
PhD, North Carolina State University, 1984

Ian W Dalziel, Professor  
Geological Sciences  
PhD, University of Edinburgh, 1963

Pedro Di Nezio, Lecturer  
Geological Sciences  
PhD, University of Miami, 2011

Robert E Dickinson, Professor  
Geological Sciences  
PhD, Massachusetts Institute of Technology, 1966

Peter Eichhubl, Lecturer  
Geological Sciences  
PhD, University of California-Santa Barbara, 1997

William L Fisher, Professor  
Leonidas T. Barrow Centennial Chair in Mineral Resources  
Energy and Earth Resources  
Geological Sciences  
PhD, University of Kansas Main Campus, 1980

Peter B Flemings, Professor  
John A. and Katherine G. Jackson Chair in Energy and Mineral Resources  
Energy and Earth Resources  
Geological Sciences  
PhD, Cornell University, 1990

Robert L Folk, Professor Emeritus  
Geological Sciences  
PhD, Pennsylvania State University Main Campus, 1952

Sergey B Fomel, Professor

Wallace E. Pratt Professorship in Geophysics  
Geological Sciences  
PhD, Stanford University, 2001

Rong Fu, Adjunct Professor  
Geological Sciences  
PhD, Columbia University in the City of New York, 1991

William E Galloway, Professor Emeritus  
Geological Sciences  
PhD, University of Texas at Austin, 1971

James E Gardner, Professor  
Geological Sciences  
PhD, University of Rhode Island, 1993

Omar Ghattas, Professor  
John A. and Katherine G. Jackson Chair in Computational Geosciences  
Geological Sciences  
PhD, Duke University, 1988

Jennifer H Gillespie, Other University Affiliate  
Geological Sciences  
PhD, University of Texas at Austin, 2011

Stephen P Grand, Professor  
Shell Companies Foundation Centennial Chair in Geophysics  
Geological Sciences  
PhD, California Institute of Technology, 1986

Sean S Gulick, Research Professor (Affiliated)  
Geological Sciences  
PhD, Lehigh University, 2000

Nicholas W Hayman, Lecturer  
Geological Sciences  
PhD, University of Washington - Seattle, 2003

Patrick Heimbach, Associate Professor  
Geological Sciences  
PhD, University of Hamburg, 1998

Mark A Helper, Distinguished Senior Lecturer  
Geological Sciences  
PhD, University of Texas at Austin, 1985

Marc A Hesse, Associate Professor  
Geological Sciences  
PhD, Stanford University, 2008

John W Holt, Research Professor (Affiliated)  
Geological Sciences  
PhD, California Institute of Technology, 1997

Brian K Horton, Professor  
Alexander Deussen Professorship of Energy Resources  
Geological Sciences  
PhD, University of Arizona, 1998

Charles S Jackson, Lecturer  
Geological Sciences  
PhD, University of Chicago, 1998

Farzam Javadpour, Lecturer  
Geological Sciences  
PhD, University of Calgary, 2006

Joel Peterson Johnson, Associate Professor  
Geological Sciences

PhD, Massachusetts Institute of Technology, 2007

John W Kappelman Jr, Professor  
Geological Sciences  
PhD, Harvard University, 1987

Charles Kerans, Professor  
Robert K. Goldhammer Chair in Carbonate Geology, Wilton E. Scott  
Centennial Professorship  
Energy and Earth Resources  
Geological Sciences  
PhD, Carleton University, 1982

Richard A Ketcham, Professor  
The First Mr. and Mrs. Charles E. Yager Professorship  
Geological Sciences  
PhD, University of Texas at Austin, 1995

Wonsuck Kim, Associate Professor  
Geological Sciences  
PhD, University of Minnesota-Twin Cities, 2007

Gary A Kocurek, Professor Emeritus  
Geological Sciences  
PhD, University of Wisconsin-Madison, 1980

J Richard Kyle, Professor  
The Third Mr. and Mrs. Charles E. Yager Professorship  
Energy and Earth Resources  
Geological Sciences  
PhD, University of Western Ontario, 1977

Lynton S Land, Professor Emeritus  
Geological Sciences  
PhD, Lehigh University, 1966

John C Lassiter, Associate Professor  
Geological Sciences  
PhD, University of California-Berkeley, 1995

Luc L Lavier, Associate Professor  
Geological Sciences  
PhD, Columbia University in the City of New York, 1999

Jung-Fu Lin, Associate Professor  
Geological Sciences  
PhD, University of Chicago, 2002

Leon E Long, Professor Emeritus  
Geological Sciences  
PhD, Columbia University in the City of New York, 1959

E L Lundelius Jr, Professor Emeritus  
Geological Sciences  
PhD, University of Chicago, 1954

Barbara J Mahler, Lecturer  
Geological Sciences  
PhD, University of Texas at Austin, 1997

Rowan Clare Martindale, Assistant Professor  
Geological Sciences  
PhD, University of Southern California, 2012

Ashley Michelle Matheny, Assistant Professor  
Geological Sciences  
PhD, Ohio State U Main Campus, 2016

Arthur E Maxwell, Professor Emeritus

Geological Sciences  
PhD, University of California-San Diego, 1959

Earle F McBride, Professor Emeritus  
Geological Sciences  
PhD, Johns Hopkins University, 1960

Timothy A Meckel, Lecturer  
Geological Sciences  
PhD, University of Texas at Austin, 2003

Nathaniel R Miller, Research Engineering/ Scientist Associate V  
Geological Sciences  
PhD, University of Texas at Dallas, 1995

Kevan Moffett, Adjunct Assistant Professor  
Geological Sciences  
PhD, Stanford University, 2010

David Mohrig, Professor  
John E. "Brick" Elliott Centennial Endowed Professorship in Geological  
Sciences  
Geological Sciences  
PhD, University of Washington - Seattle, 1994

Sharon Mosher, Professor  
William Stamps Farish Chair in Geology, John A. and Katherine G.  
Jackson Decanal Chair in the Geosciences  
Geological Sciences  
PhD, University of Illinois at Urbana-Champaign, 1978

Yosio Nakamura, Professor Emeritus  
Geological Sciences  
PhD, Pennsylvania State University Main Campus, 1963

Cornel Olariu, Lecturer  
Geological Sciences  
PhD, University of Texas at Dallas, 2005

Jon E Olson, Professor  
Lois K. and Richard D. Folger Leadership Chair in Petroleum and  
Geosystems Engineering, Frank W. Jessen Professorship in Petroleum  
Engineering  
Energy and Earth Resources  
PhD, Stanford University, 1991

Raymond Lee Orbach, Professor  
Geological Sciences  
PhD, University of California-Berkeley, 1960

Jeffrey G Paine, Lecturer  
Geological Sciences  
PhD, University of Texas at Austin, 1991

Camille Parmesan, Adjunct Professor  
Geological Sciences  
PhD, University of Texas at Austin, 1995

Judson W Partin, Lecturer  
Geological Sciences  
PhD, Georgia Institute of Technology, 2008

Suzanne A Pierce, Lecturer  
Geological Sciences  
PhD, University of Texas at Austin, 2006

Mary F Poteet, Lecturer  
Geological Sciences

PhD, University of California-Berkeley, 2001

Terrence M Quinn, Professor  
Albert W. and Alice M. Weeks Centennial Professorship in Geological Sciences  
Geological Sciences  
PhD, Brown University, 1989

Daniella M Rempe, Assistant Professor  
Geological Sciences  
PhD, University of California-Berkeley, 2016

Timothy B Rowe, Professor  
J. Nalle Gregory Regents Professorship in Geological Sciences  
Geological Sciences  
PhD, University of California-Berkeley, 1986

Stephen C Ruppel, Lecturer  
Geological Sciences  
PhD, University of Illinois at Urbana-Champaign, 1979

Mrinal K Sen, Professor  
John A. and Katherine G. Jackson Chair in Applied Seismology  
Geological Sciences  
PhD, University of Hawaii at Manoa, 1987

Timothy M Shanahan, Associate Professor  
Geological Sciences  
PhD, University of Arizona, 2006

John M Sharp Jr, Professor  
Dave P. Carlton Centennial Professorship in Geology  
Geological Sciences  
PhD, University of Illinois at Urbana-Champaign, 1974

Douglas Smith, Professor Emeritus  
Geological Sciences  
PhD, California Institute of Technology, 1969

Kyle Thomas Spikes, Associate Professor  
Geological Sciences  
PhD, Stanford University, 2008

James T Sprinkle, Professor Emeritus  
Geological Sciences  
PhD, Harvard University, 1971

Ronald J Steel, Professor  
Morgan J. Davis Centennial Chair in Petroleum Geology  
Geological Sciences  
PhD, University of Glasgow, 1972

Daniel Stockli, Professor  
Chevron Centennial Professorship in Geology  
Geological Sciences  
PhD, Stanford University, 2000

Paul L Stoffa, Professor Emeritus  
Geological Sciences  
PhD, Columbia University in the City of New York, 1974

Robert H Tatham, Professor Emeritus  
Geological Sciences  
PhD, Columbia University in the City of New York, 1975

Scott W Tinker, Professor  
Edwin Allday Centennial Chair in Subsurface Geology  
Geological Sciences

PhD, University of Colorado at Boulder, 1996

Nicola Tisato, Assistant Professor  
Geological Sciences  
PhD, Swiss Federal Institute of Technology, 2013

Carlos Torres-Verdin, Professor  
Brian James Jennings Memorial Endowed Chair in Petroleum and Geosystems Engineering  
Geological Sciences  
PhD, University of California-Berkeley, 1991

Clark R Wilson, Professor  
Dave P. Carlton Centennial Professorship in Geophysics  
Geological Sciences  
PhD, University of California-San Diego, 1975

Zong-Liang Yang, Professor  
John A. and Katherine G. Jackson Chair in Earth System Sciences  
Geological Sciences  
PhD, Macquarie University, 1992

## School of Information Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Amelia Acker, Assistant Professor  
PhD, University of California-Los Angeles, 2014

Jennifer E Allen, Adjunct Assistant Professor  
MS, University of Texas at Austin, 2017

Diane E Bailey, Associate Professor  
PhD, University of California-Berkeley, 1994

Jakki Bailey, Assistant Professor  
PhD, Stanford University, 2018

Jullianne Hughes Ballou, Lecturer  
MS, University of Texas at Austin, 2016

Suzanne Barber, Professor  
AT&T Foundation Endowed Professorship in Engineering  
PhD, University of Texas at Arlington, 1992

Brenda L Berkelaar, Lecturer  
PhD, Purdue University Main Campus, 2010

Randolph G Bias, Professor  
PhD, University of Texas at Austin, 1978

Barbara A Bintliff, Professor  
Joseph C. Hutcheson Professorship in Law  
JD, University of Washington - Seattle, 1978

Craig E Blaha, Lecturer  
MA, Claremont Graduate University, 1996

Sarah Grace Britt, Adjunct Assistant Professor  
MSInfoStds, University of Texas at Austin, 2016

Ramona L Broussard, Lecturer  
MSInfoStds, University of Texas at Austin, 2010

Kate Catterall, Associate Professor  
MA, Glasgow School of Art, 1992

Tanya Elizabeth Clement, Associate Professor

PhD, University of Maryland College Park, 2009

Mary C Criner, Lecturer  
PhD, Louisiana State University and Agricultural and Mechanical College, 2000

Sarah H Cunningham, Lecturer  
MS, University of Texas at Austin, 2003

Donald G Davis Jr, Professor Emeritus  
PhD, University of Illinois at Urbana-Champaign, 1972

Andrew P Dillon, Professor  
Vara Martin Daniel Regents Professorship in Libraries, Archives & Information Studies  
PhD, Loughborough University, 1991

Philip Doty, Associate Professor  
PhD, Syracuse University Main Campus, 1995

Rebecca K Elder, Adjunct Assistant Professor  
MSLS, University of Texas at Austin, 2003

Kenneth Robert Fleischmann, Associate Professor  
PhD, Rensselaer Polytechnic Institute, 2004

Margaret M Foster, Adjunct Assistant Professor  
MS, University of Texas at Austin, 1999

Patricia K Galloway, Professor  
PhD, University of North Carolina at Chapel Hill, 2004

David B Gracy II, Professor Emeritus  
PhD, Texas Tech University, 1971

Stanley T Gunn Jr, Adjunct Assistant Professor  
MLS, University of Texas at Austin, 1998

Danna Gurari, Assistant Professor  
PhD, Boston University, 2015

Jacek Gwizdka, Assistant Professor  
PhD, University of Toronto, 2004

Julie Hallmark, Professor Emeritus  
PhD, University of Texas at Austin, 1973

Lorraine J Haricombe, Professor  
PhD, University of Illinois at Urbana-Champaign, 1992

Lance A Hayden, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 2009

Billie G Herring, Professor Emeritus  
PhD, University of Texas at Austin, 1974

James L Howison, Associate Professor  
PhD, Syracuse University Main Campus, 2009

Barbara F Immroth, Professor Emeritus  
PhD, University of Pittsburgh, Pittsburgh Campus, 1980

Barbara A Jansen, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 2014

Unmil P Karadkar, Assistant Professor  
PhD, Texas A & M University, 2011

April D Kessler, Adjunct Assistant Professor  
MS, University of Texas at Austin, 2004

Matthew A Lease, Associate Professor  
PhD, Brown University, 2009

Zandra I Lopez, Adjunct Assistant Professor  
MLS, Emporia State University, 2005

Bill Lukenbill, Professor Emeritus  
PhD, Indiana University at Bloomington, 1973

Robert S McCleskey, Lecturer  
JD, St Mary's University, 1998

Francis L Miksa, Professor Emeritus  
PhD, University of Chicago, 1974

Ann E Minner, Adjunct Assistant Professor  
MLIS, University of Texas at Austin, 1998

Eric Nordquist, Clinical Associate Professor  
MA, New Mexico State University Main Campus, 2004

Kristen S Oglesbee, Adjunct Assistant Professor  
MSInfoStds, University of Texas at Austin, 2016

Karen L Pavelka, Senior Lecturer  
MS, Columbia University in the City of New York, 1988

Walker E Riley, Adjunct Assistant Professor  
MS, University of Texas at Austin, 2017

Marion E Rocco, Adjunct Assistant Professor  
MS, University of Texas at Austin, 2011

Elizabeth Rogers, Adjunct Assistant Professor  
JD, St Mary's University, 1988

Loriene Roy, Professor  
PhD, University of Illinois at Urbana-Champaign, 1987

Alonzo F Seay, Adjunct Assistant Professor  
PhD, Carnegie Mellon University, 2006

Jeremy M Selvidge, Adjunct Assistant Professor  
MS, University of Texas at Austin, 2015

Clay Spinuzzi, Professor  
PhD, Iowa State University, 1999

Stephanie D Swenson, Adjunct Assistant Professor  
JD, University of Texas at Austin, 1994

Edison Thomaz Jr, Research Assistant Professor (Affiliated)  
PhD, Georgia Institute of Technology, 2016

Ciaran Trace, Associate Professor  
PhD, University of California-Los Angeles, 2004

Christine A Walczyk, Adjunct Assistant Professor  
PhD, University of North Texas, 2016

Jo Lynn Westbrook, Associate Professor  
PhD, University of Michigan-Ann Arbor, 1995

Andrew B Whinston, Professor  
Hugh Roy Cullen Centennial Chair in Business Administration  
PhD, Carnegie Mellon University, 1962

Karen M Wickett, Assistant Professor  
PhD, University of Illinois at Urbana-Champaign, 2012

Michael B Winship, Professor

Iris Howard Regents Professorship in English Literature #2  
DPhil, University of Oxford, 1990

Ronald E Wyllys, Professor Emeritus  
PhD, University of Wisconsin-Madison, 1974

Bo Xie, Associate Professor  
PhD, Rensselaer Polytechnic Institute, 2006

Yan Zhang, Associate Professor  
PhD, University of North Carolina at Chapel Hill, 2009

## College of Liberal Arts Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Jeffrey Bruce Abramson, Professor  
Government  
PhD, Harvard University, 1977

Jason Abrevaya, Professor  
Murray S. Johnson Chair in Economics  
Economics  
PhD, Massachusetts Institute of Technology, 1996

Robert H Abzug, Professor  
Audre and Bernard Rapoport Regents Chair of Jewish Studies  
American Studies  
History  
Jewish Studies  
PhD, University of California-Berkeley, 1977

Daniel A Ackerberg, Professor  
Addison Baker Duncan Centennial Professorship in Economics  
Economics  
PhD, Yale University, 1997

Michael W Adams, Associate Professor  
English  
PhD, University of Texas at Austin, 1973

Paul C Adams, Professor  
Geography and the Environment  
PhD, University of Wisconsin-Madison, 1993

Richard N Adams, Professor Emeritus  
Anthropology  
PhD, Yale University, 1951

Christopher O Adejumo, Associate Professor  
African and African Diaspora Studies  
PhD, Ohio State U Main Campus, 1997

Abimbola Adunni Adelokun, Lecturer  
African and African Diaspora Studies  
PhD, University of Texas at Austin, 2017

Ari Adut, Associate Professor  
Sociology  
PhD, University of Chicago, 2004

Omoniyi Afolabi, Associate Professor  
African and African Diaspora Studies  
African and African Diaspora Studies  
PhD, University of Wisconsin-Madison, 1997

Kamran S Aghaie, Associate Professor  
History

Middle Eastern Studies  
Middle Eastern Studies Ctr  
Women's and Gender Studies  
PhD, University of California-Los Angeles, 1999

Yukie Aida, Senior Lecturer  
Asian Studies  
PhD, University of Texas at Austin, 1988

Helene M Aji  
English  
PhD, Universite de Picardie Jules Verne, 1997

Erick Akins, Lecturer  
Geography and the Environment  
MA, Trinity University, 1988

Olla N Al-Shalchi, Lecturer  
Middle Eastern Studies  
PhD, Old Dominion University, 2015

Ilana Albanese, Clinical Assistant Professor  
Psychology  
PhD, University of Florida, 1994

Bethany L Albertson, Associate Professor  
Government  
PhD, University of Chicago, 2006

Duane G Albrecht, Professor Emeritus  
Psychology  
PhD, University of California-Berkeley, 1978

Marina Alexandrova, Lecturer  
Slavic and Eurasian Studies  
PhD, University of Texas at Austin, 2010

Kamran Ali, Professor  
Anthropology  
Asian Studies  
Middle Eastern Studies  
Middle Eastern Studies Ctr  
PhD, Johns Hopkins University, 1998

Andres Almazan, Professor  
Economics  
PhD, Massachusetts Institute of Technology, 1996

Megan Alrutz, Associate Professor  
Women's and Gender Studies  
PhD, Arizona State University Main, 2004

Chad Alvarez, Assistant Professor  
History  
PhD, University of Chicago, 2014

Carrie Andersen, Lecturer  
American Studies  
PhD, University of Texas at Austin, 2017

Charles O Anderson, Associate Professor  
African and African Diaspora Studies  
African and African Diaspora Studies  
MFA, Temple University, 2002

Michael R Anderson, Senior Lecturer  
Government  
PhD, University of Texas at Austin, 2009

W. St. John Garwood and W. St. John Garwood, Jr. Centennial Chair in  
Law  
Government  
JD, Stanford University, 1973

Marc S Lewis, Associate Professor  
Psychology  
PhD, University of Cincinnati Main Campus, 1973

Randolph R Lewis, Professor  
American Studies  
Anthropology  
PhD, University of Texas at Austin, 1994

Rebecca J Lewis, Associate Professor  
Anthropology  
PhD, Duke University, 2004

Jarrod Alan Lewis-Peacock, Assistant Professor  
Psychology  
PhD, University of Wisconsin-Madison, 2010

Huaiyin Li, Professor  
Asian Studies  
History  
PhD, University of California-Los Angeles, 2000

Junyi Li, Assistant Professor  
Linguistics  
PhD, University of Pennsylvania, 2017

Tatjana Lichtenstein, Associate Professor  
History  
Jewish Studies  
Slavic and Eurasian Studies  
PhD, University of Toronto, 2009

Harold A Liebowitz, Professor Emeritus  
Middle Eastern Studies  
PhD, University of Pennsylvania, 1972

Vladimir Lifschitz, Professor  
Professorship in Computer Sciences #2  
Philosophy

PhD, Steklov Mathematical Institute, 1969

Jose E Limon, Professor Emeritus  
English  
PhD, University of Texas at Austin, 1978

Ken-Hou Lin, Assistant Professor  
Sociology  
PhD, University of Massachusetts, 2013

Tse-Min Lin, Associate Professor  
Government  
PhD, University of Minnesota-Twin Cities, 1990

Yi-Chun Lin, Lecturer  
Asian Studies  
MA, National Taiwan University, 2010

Linguistics  
PhD, Stanford University, 1991

Alexander A Weinreb, Associate Professor  
Sociology  
PhD, University of Pennsylvania, 2000

Amelia Gabrielle Weinreb, Lecturer  
Jewish Studies  
PhD, University of Pennsylvania, 2007

John M Weinstock, Professor Emeritus  
Germanic Studies  
PhD, University of Wisconsin-Madison, 1967

Abigail Weitzman, Assistant Professor  
Sociology  
PhD, New York University, 2015

Rachel Wellhausen, Assistant Professor  
Government  
PhD, Massachusetts Institute of Technology, 2012

Bruce Wells, Associate Professor  
Middle Eastern Studies  
PhD, Johns Hopkins University, 2003

Timothy Daniel Werner, Associate Professor  
Government  
PhD, University of Wisconsin-Madison, 2009

Jo Lynn Westbrook, Associate Professor  
Women's and Gender Studies  
PhD, University of Michigan-Ann Arbor, 1995

Alexandra K Wettlaufer, Professor  
Stuart W. Stedman Director's Chair in Plan II, Hayden W. Head Regents  
Chair in the Plan II Honors Program  
French and Italian  
PhD, Columbia University in the City of New York, 1993

Walter D Wetzels, Professor Emeritus  
Germanic Studies

PhD, Princeton University, 1968

David A Wevill, Professor Emeritus  
English  
MA, University of Cambridge, 1957

Kurt G Weyland, Professor  
Mike Hogg Professorship in Liberal Arts  
Government  
PhD, Stanford University, 1991

Frank F Whigham Jr, Professor Emeritus  
English  
PhD, University of California-San Diego, 1975

Andrew B Whinston, Professor  
Hugh Roy Cullen Centennial Chair in Business Administration  
Economics  
PhD, Carnegie Mellon University, 1962

Deborah E White, Senior Lecturer  
Linguistics  
MA, Gallaudet University, 1993

L M White, Professor  
The Ronald Nelson Smith Chair in Classics & Christian Origins  
Religious Studies  
PhD, Yale University, 1982

Stephen A White, Professor  
Philosophy  
PhD, University of California-Berkeley, 1987

Sarah Jey Whitehead, Lecturer  
Spanish and Portuguese  
PhD, University of Texas at Austin, 2014

Catherine Whiting, Clinical Assistant Professor  
Psychology  
PhD, The University of Memphis, 2001

Henry Alexander Wiencek, Postdoctoral Fellow  
History  
PhD, University of Texas at Austin, 2017

Walter Wilczynski, Adjunct Professor  
Psychology  
PhD, University of Michigan-Ann Arbor, 1978

Evgenia Mikhaylova Wilkins, Lecturer  
Slavic and Eurasian Studies  
PhD, University of Texas at Austin, 2017

Karin G Wilkins, Professor  
John P. McGovern Regents Professorship in Health and Medical Science  
Communication  
Middle Eastern Studies  
Middle Eastern Studies Ctr  
Women's and Gender Studies  
PhD, University of Pennsylvania, 1991

Lynn R Wilkinson, Associate Professor  
Germanic Studies  
Women's and Gender Studies  
PhD, University of California-Berkeley, 1983

Jennifer M Wilks, Associate Professor  
African and African Diaspora Studies  
African and African Diaspora Studies

English  
PhD, Cornell University, 2003

Christine L Williams, Professor  
Elsie and Stanley E. (Skinny) Adams, Sr. Centennial Professorship in  
Liberal Arts  
Sociology  
Women's and Gender Studies  
PhD, University of California-Berkeley, 1986

Robert H Wilson, Professor  
Mike Hogg Professorship of Urban Policy  
Geography and the Environment  
PhD, University of Pennsylvania, 1979

Samuel M Wilson, Professor Emeritus  
Anthropology  
PhD, University of Chicago, 1986

James I Wimsatt, Professor Emeritus  
English  
PhD, Duke University, 1964

Michael B Winship, Professor  
Iris Howard Regents Professorship in English Literature #2  
English  
DPHil, University of Oxford, 1990

William J Winslade, Adjunct Professor  
Philosophy  
PhD, Northwestern University, 1967

Thomas E Wiseman, Associate Professor  
Economics  
PhD, Northwestern University, 2001

Christopher Wlezien, Professor  
Mike Hogg Professorship in Government  
Government  
PhD, University of Iowa, 1989

Hannah C Wojciehowski, Professor  
Arthur J. Thaman and Wilhelmina Dore' Thaman Endowed Professorship  
in English #2  
English  
PhD, Yale University, 1984

Michael Scott Wolford, Associate Professor  
Government  
PhD, Emory University, 2008

Seth L Wolitz, Professor Emeritus  
French and Italian  
Slavic and Eurasian Studies  
PhD, Yale University, 1965

Helena Woodard, Associate Professor  
African and African Diaspora Studies  
African and African Diaspora Studies  
English  
PhD, University of North Carolina at Chapel Hill, 1991

Anthony C Woodbury, Professor  
Anthropology  
Linguistics  
PhD, University of California-Berkeley, 1981

Paul B Woodruff, Professor  
Darrell K Royal Regents Professorship in Ethics and American Society

Philosophy  
PhD, Princeton University, 1973

Marjorie C Woods, Professor  
Jane and Roland Blumberg Centennial Professorship in English  
English  
History  
PhD, University of Toronto, 1977

Jacqueline D Woolley, Professor  
Psychology  
PhD, University of Michigan-Ann Arbor, 1990

Fu Lye Woon, Clinical Assistant Professor  
Psychology  
PhD, Brigham Young University, 2010

Harold A Wylie Jr, Associate Professor Emeritus  
African and African Diaspora Studies  
French and Italian  
PhD, Stanford University, 1965

Charters S Wynn, Associate Professor  
History  
Slavic and Eurasian Studies  
PhD, Stanford University, 1987

Michael Francis Wynne Jr, Lecturer  
Linguistics  
MA, Gallaudet University, 2005

Haiqing Xu, Assistant Professor  
Economics  
PhD, Pennsylvania State University Park, 2011

Veronica Yan, Assistant Professor  
Psychology  
PhD, University of California-Los Angeles, 2014

Tal Yarkoni, Research Assistant Professor  
Psychology  
PhD, Washington University in St Louis, 2009

David Scott Yeager, Associate Professor  
Psychology  
PhD, Stanford University, 2011

Dean H Young, Professor  
William S. Livingston Endowed Chair in Writing  
English  
MFA, Indiana University at Bloomington, 1984

Hershini Young, Professor  
African and African Diaspora Studies  
PhD, University of California-Berkeley, 1999

Kenneth R Young, Professor  
Geography and the Environment  
Latin American Studies  
PhD, University of Colorado at Boulder, 1990

Michael P Young, Associate Professor  
Sociology  
PhD, New York University, 2000

Sandra E Black, Professor  
Audre and Bernard Rapoport Centennial Chair in Economics  
Economics

PhD, Harvard University, 1997

Aaron S Zacks, Lecturer  
Rhetoric and Writing  
PhD, University of Texas at Austin, 2012

Emilio Zamora, Professor  
History  
PhD, University of Texas at Austin, 1983

Jay W Zarnikau  
Economics  
PhD, University of Texas at Austin, 1990

Maria Del Pilar Zazueta, Lecturer  
Latin American Studies  
PhD, Columbia University in the City of New York, 2011

Mark A Zentner, Clinical Assistant Professor  
Psychology  
PhD, University of Texas at Austin, 1999

Anastasia Zervou, Lecturer  
Economics  
PhD, Washington University in St Louis, 2009

Abraham Zilkha, Associate Professor Emeritus  
Middle Eastern Studies  
PhD, University of Texas at Austin, 1970

Christine Zumello, Visiting Associate Professor  
English  
PhD, Universite de Paris III, Sorbonne Nouvelle, 1997

## College of Natural Sciences Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Scott J Aaronson, Professor  
Computer Science  
PhD, University of California-Berkeley, 2004

Sarah A Abraham, Lecturer  
Computer Science  
Computer Science  
PhD, University of Texas at Austin, 2015

Elia S Abreu Olvera, Specialist  
Mathematics  
BS, University of Texas at Austin, 2015

Santos A Acosta, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Meena D Adhikary, Specialist  
Human Ecology  
MEd, University of Texas at Austin, 1990

Seema Agarwala, Associate Professor  
Molecular Biosciences  
PhD, State University of New York at Stony Brook, 1990

Lucas D Akin, Specialist  
Chemistry  
BS, University of Texas at Austin, 2016

Teri J Albrecht, Lecturer  
PhD, University of Texas at Austin, 2007

Richard W Aldrich, Professor  
Karl Folkers Chair in Interdisciplinary Biomedical Research II  
Neuroscience  
PhD, Stanford University, 1980

Alejandro Aleman Jr, Specialist  
Biology Instruction Office  
MS, University of Texas at Austin, 2017

Daniel J Allcock, Professor  
Mathematics  
PhD, University of California-Berkeley, 1996

Kelli R Allen, Clinical Assistant Professor  
MS, Pittsburg State University, 1998

Albert T Almanza, Specialist  
Chemistry  
BS, University of Texas at Austin, 2014

Lorenzo Alvisi, Professor Emeritus  
Computer Science  
PhD, Cornell University, 1996

Natalie Y Ammon, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2011

Timothy R Andeen Jr, Assistant Professor  
Physics  
PhD, Northwestern University, 2008

Edward R Anderson, Associate Professor  
Human Ecology  
PhD, University of Virginia, 1989

Morgan James Anderson, Specialist  
Chemistry  
PhD, University of Texas at Austin, 2017

Kathleen Anding McInnis, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2016

Eric V Anslyn, Professor  
Welch Regents Chair in Chemistry  
Chemistry  
PhD, California Institute of Technology, 1988

Dean R Appling, Professor  
Lester J. Reed Professorship in Biochemistry  
Molecular Biosciences  
PhD, Vanderbilt University, 1981

Jonathan F Arambula, Lecturer  
Chemistry  
PhD, University of Illinois at Urbana-Champaign, 2008

Todd J Arbogast, Professor  
W. A. "Tex" Moncrief, Jr. Simulation-Based Engineering and Sciences  
Professorship I  
Mathematics  
PhD, University of Chicago, 1987

Jane Arledge, Senior Lecturer  
Mathematics

PhD, University of Colorado at Boulder, 1995

Taft E Armandroff, Professor  
Frank and Susan Bash Endowed Chair for the Director of McDonald  
Observatory  
Astronomy  
PhD, Yale University, 1988

Connie R Arnold, Professor Emeritus  
Marine Science  
PhD, Texas A & M University, 1968

Karen J Artzt, Professor Emeritus  
Molecular Biosciences  
PhD, Weill Medical College of Cornell University, 1972

Nigel S Atkinson, Professor  
Neuroscience  
PhD, Pennsylvania State University Main Campus, 1986

Jennifer K Mann Austin, Lecturer  
Mathematics  
PhD, Florida State University, 2007

Ivo M Babuska, Professor  
Robert B. Trull Chair in Engineering  
Mathematics  
PhD, Academy of Sciences, 1955

Francois Baccelli, Professor  
Simons Chair in Mathematics and Electrical and Computer Engineering  
Mathematics  
These d'Etat, Universite de Paris XI, Paris-Sud, 1983

Joshua Dana Baer, Adjunct Assistant Professor  
Computer Science  
BS, Carnegie Mellon University, 1999

Carlos R Baiz, Assistant Professor  
Chemistry  
PhD, University of Michigan-Ann Arbor, 2011

Chandrajit L Bajaj, Professor  
CAM Chair in Visualization  
Computer Science  
PhD, Cornell University, 1984

Brett J Baker, Assistant Professor  
Marine Science  
Marine Science  
PhD, University of Michigan-Ann Arbor, 2014

Dana H Ballard, Professor  
Computer Science  
PhD, University of California-Irvine, 1974

Zuzana Baranova, Lecturer  
Chemistry  
PhD, Texas A & M University, 2017

Allen J Bard, Professor  
Norman Hackerman - Welch Regents Chair in Chemistry  
Chemistry  
PhD, Harvard University, 1958

Kaylyn R Barrett, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Jeffrey E Barrick, Assistant Professor  
Molecular Biosciences  
PhD, Yale University, 2006

Suzanne S Barth, Adjunct Associate Professor  
Biology Instruction Office  
PhD, University of Texas at Austin, 1983

Frank N Bash, Professor Emeritus  
Astronomy  
PhD, University of Virginia (Old Code), 1967

Don S Batory, Professor  
David Bruton, Jr. Centennial Professorship in Computer Sciences #1  
Computer Science  
PhD, University of Toronto, 1981

John C Batterton, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1970

Nathan L Bauld, Professor Emeritus  
Chemistry  
PhD, University of Illinois at Urbana-Champaign, 1959

Vanessa M Bazan, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Angela Chappell Beasley, Lecturer  
Computer Science  
MS, George Washington University, 2007

Cam Beasley, Lecturer  
Computer Science  
BSChE, University of Texas at Austin, 2001

William Beckner, Professor  
Paul V. Montgomery Centennial Memorial Professorship in Mathematics  
Mathematics  
PhD, Princeton University, 1975

Ockhee Bego, Lecturer  
Human Ecology  
MFA, Academy of Art University, 2010

David D Ben-Zvi, Professor  
Mathematics  
PhD, Harvard University, 1999

Roger D Bengtson, Professor Emeritus  
Physics  
PhD, University of Maryland College Park, 1968

Aprile D Benner, Associate Professor  
Human Ecology  
PhD, University of California-Los Angeles, 2007

Philip A Benson, Specialist  
Biology Instruction Office  
Chemistry  
BS, University of Texas at Austin, 2017

Sterling K Berberian, Professor Emeritus  
Mathematics  
PhD, University of Chicago, 1955

Herbert L Berk, Professor Emeritus  
Physics

PhD, Princeton University, 1964

Katherine Alexis Biberdorf, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 2014

Klaus R Bichteler, Professor Emeritus  
Mathematics  
PhD, University of Hamburg, 1965

George Biros, Professor  
W. A. "Tex" Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 2  
Computer Science  
PhD, Carnegie Mellon University, 2000

George D Bittner, Professor  
Neuroscience  
PhD, Stanford University, 1967

Bryan Andrew Black, Associate Professor  
Marine Science  
Marine Science  
PhD, Pennsylvania State University Park, 2003

Garrett Blake, Research Engineering/ Scientist Associate II  
Chemistry  
PhD, University of Texas at Austin, 2016

Kirk D Blazek, Lecturer  
Mathematics  
PhD, University of Washington - Seattle, 2006

Andrew Justin Blumberg, Associate Professor  
Mathematics  
PhD, University of Chicago, 2005

Arno R Bohm, Professor Emeritus  
Physics  
PhD, Philipps-University of Marburg, 1966

Daniel I Bolnick, Professor  
Biology Instruction Office  
PhD, University of California-Davis, 2003

Henry R Bose, Professor Emeritus  
Molecular Biosciences  
PhD, Indiana University at Bloomington, 1967

Lisa D Boucher, Lecturer  
Biology Instruction Office  
PhD, Ohio State U Main Campus, 1995

Jason R Bourgeois, Associate Academic Advisor  
MEd, University of Texas at Austin, 2012

Lewis P Bowen, Professor  
Mathematics  
PhD, University of Texas at Austin, 2002

Brendan P Bowler, Assistant Professor  
Astronomy  
PhD, University of Hawaii at Manoa, 2013

Robert S Boyer, Professor Emeritus  
Computer Science  
PhD, University of Texas at Austin, 1971

Michael Boylan-Kolchin, Assistant Professor  
Astronomy

PhD, University of California-Berkeley, 2006

Jerry J Brand, Professor Emeritus  
Molecular Biosciences  
PhD, Purdue University Main Campus, 1971

Molly S Bray, Professor  
Susan T. Jastrow Human Ecology Chair for Excellence in Nutritional  
Sciences  
Human Ecology  
PhD, University of Texas Health Science Center at Houston, 1998

Michel Breger, Adjunct Professor  
Astronomy  
PhD, University of California-Berkeley, 1969

Boris Breizman, Research Professor (Affiliated)  
Physics  
PhD, Budker Institute of Nuclear Physics, 1978

Margaret E Briley, Professor  
Human Ecology  
PhD, Texas Tech University, 1973

Patrick L Brockett, Professor  
Gus Wortham Memorial Chair in Risk Management and Insurance  
Mathematics  
PhD, University of California-Irvine, 1975

Jennifer S Brodbelt, Professor  
Norman Hackerman Chair in Chemistry  
Chemistry  
PhD, Purdue University Main Campus, 1988

Volker Bromm, Professor  
Astronomy  
PhD, Yale University, 2000

Franklin H Bronson, Professor Emeritus  
Biology Instruction Office  
PhD, Pennsylvania State University Main Campus, 1961

R Malcolm Brown Jr, Professor Emeritus  
Molecular Biosciences  
PhD, University of Texas at Austin, 1964

Karen S Browning, Professor  
Molecular Biosciences  
PhD, University of Illinois at Urbana-Champaign, 1980

Delia M Brownson, Specialist  
Human Ecology  
PhD, University of Texas at Austin, 1996

Audrey C Brumback, Research Assistant Professor (Affiliated)  
Neuroscience  
PhD, University of Colorado at Denver, 2006

Katherine M Bruner, Lecturer  
Biology Instruction Office  
PhD, Johns Hopkins University, 2017

Amy E Bryan, Clinical Assistant Professor  
Human Ecology  
PhD, University of Texas at Austin, 2010

William C Bulko, Lecturer  
Computer Science  
PhD, University of Texas at Austin, 1989

James J Bull, Professor  
Joseph J. & Jeanne M. Lagowski Regents Professorship in Molecular  
Bioscience  
Biology Instruction Office  
PhD, University of Utah, 1977

Peter Burton, Instructor  
Mathematics  
PhD, California Institute of Technology, 2017

Edward J Buskey, Professor  
Marine Science  
Marine Science  
PhD, University of Rhode Island, 1983

Ruth E Buskirk, Distinguished Senior Lecturer  
Biology Instruction Office  
PhD, University of California-Davis, 1972

Elena Caceres, Associate Professor  
Physics  
PhD, University of Texas at Austin, 1996

Luis A Caffarelli, Professor  
Sid W. Richardson Foundation Regents Chair in Mathematics #1  
Mathematics  
PhD, University of Buenos Aires, 1972

Xiaolu Cambronne, Assistant Professor  
Molecular Biosciences  
PhD, Harvard University, 2009

Alan Campion, Professor  
Dow Chemical Company Endowed Professorship in Chemistry  
Chemistry  
PhD, University of California-Los Angeles, 1977

Phillip E Cannata, Adjunct Professor  
Computer Science  
PhD, University of Notre Dame, 1980

David Cannatella, Professor  
Biology Instruction Office  
PhD, University of Kansas Main Campus, 1986

Caitlin M Casey, Assistant Professor  
Astronomy  
PhD, University of Cambridge, 2011

Gustavo E Cepparo, Lecturer  
Mathematics  
MS, Kansas State University, 1999

Clarence Shiu Man Chan, Associate Professor  
Molecular Biosciences  
PhD, Cornell University, 1985

James R Chelikowsky, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Materials  
Chemistry  
Physics  
PhD, University of California-Berkeley, 1975

Jonathan Yan Chen, Professor  
Human Ecology  
PhD, University of Leeds, 1995

Penghao Chen, Specialist  
Chemistry

PhD, University of Texas at Austin, 2017

Thomas Chen, Associate Professor  
Mathematics  
PhD, Swiss Federal Institute of Technology, 2001

Zengjian J Chen, Professor  
D. J. Sibley Centennial Professorship in Plant Molecular Genetics  
Biology Instruction Office  
Molecular Biosciences  
PhD, Texas A & M University, 1993

Shao-Ying Cheng, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2009

Antonia Chimonidou, Lecturer  
PhD, University of Texas at Austin, 2009

Raymond A Chitwood, Lecturer  
Biology Instruction Office  
PhD, University of Texas at San Antonio, 2000

Charles B Chiu, Professor Emeritus  
Physics  
PhD, University of California-Berkeley, 1966

Grace Choy, Lecturer  
PhD, Carnegie Mellon University, 2003

Jessica Ciarla, Lecturer  
Human Ecology  
MA, Kent State University Main Campus, 2015

Mirela Ciperiani, Associate Professor  
Mathematics  
PhD, Princeton University, 2006

David Clark, Lecturer  
Mathematics  
PhD, McGill University, 1992

Gregory B Clark  
Biology Instruction Office  
PhD, University of Texas at Austin, 1992

Alan K Cline, Professor Emeritus  
Computer Science  
PhD, University of Michigan-Ann Arbor, 1970

William D Cochran, Research Professor (Affiliated)  
Astronomy  
PhD, Princeton University, 1976

Stephany S Coffman-Wolph, Lecturer  
Computer Science  
PhD, Western Michigan University, 2013

Shirley Cohen, Adjunct Assistant Professor  
Computer Science  
MS, University of Pennsylvania, 2007

William R Coker, Professor  
Physics  
PhD, University of Georgia, 1966

John A Colapret, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 1983

Laura Lee Colgin, Associate Professor  
Neuroscience  
PhD, University of California-Irvine, 2003

William R Cook, Associate Professor  
Computer Science  
PhD, Brown University, 1989

Alan H Cowley, Professor Emeritus  
Chemistry  
PhD, University of Manchester, 1958

Charles Kikutaro Crawford, Specialist  
Biology Instruction Office  
MS, University of Texas at Austin, 2017

David P Crews, Professor  
Biology Instruction Office  
PhD, Rutgers the State University of New Jersey Newark Campus, 1973

Richard M Crooks, Professor  
The Robert A. Welch Chair in Chemistry (Materials Chemistry)  
Chemistry  
PhD, University of Texas at Austin, 1987

Milica Cudina, Clinical Assistant Professor  
Mathematics  
PhD, Carnegie Mellon University, 2006

Molly E Cummings, Professor  
Biology Instruction Office  
PhD, University of California-Santa Barbara, 2001

Kathryn Dabbs, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2017

Jeffrey E Danciger, Assistant Professor  
Mathematics  
PhD, Stanford University, 2011

James W Daniel, Professor Emeritus  
Mathematics  
PhD, Stanford University, 1965

Mark L Daniels, Clinical Professor  
Mathematics  
EdD, Walden University, 2007

Bryan William Davies, Assistant Professor  
Molecular Biosciences  
PhD, Massachusetts Institute of Technology, 2008

Jaimie N Davis, Associate Professor  
Human Ecology  
PhD, University of Texas at Austin, 2004

Katherine M Davis, Associate Professor  
Mathematics  
PhD, Cornell University, 1974

Alejandra De Angulo Sorian, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2014

Alex De Lozanne, Professor  
Physics  
PhD, Stanford University, 1982

Arturo De Lozanne, Associate Professor

Molecular Biosciences  
PhD, Stanford University, 1988

Linda A Degraffenried, Associate Professor  
Human Ecology  
PhD, University of Texas Health Science Center at San Antonio, 2001

Cassandra V Delgado-Reyes  
PhD, University of Illinois at Urbana-Champaign, 2003

Alexander A Demkov, Professor  
Physics  
PhD, Arizona State University Main, 1995

Leszek F Demkowicz, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and Sciences II  
Mathematics  
PhD, Cracow Univ of Technology, 1982

Ryan Denlinger, Instructor  
Mathematics  
PhD, New York University, 2016

Niraj Desai, Lecturer  
Biology Instruction Office  
PhD, Cornell University, 1995

F W Dewette, Professor Emeritus  
Physics  
PhD, Utrecht University, 1959

Matasha Dhar, Specialist  
Biology Instruction Office  
PhD, Washington State University, 2012

Inderjit S Dhillon, Professor  
Gottesman Family Centennial Professorship in Computer Sciences  
Computer Science  
Mathematics  
PhD, University of California-Berkeley, 1997

Robert Wayne Dickey, Professor  
Nancy Lee and Perry R. Bass Regents Chair in Marine Science  
Marine Science  
PhD, Southern Illinois University Carbondale, 1984

Daniel James Dickinson, Assistant Professor  
Molecular Biosciences  
PhD, Stanford University, 2011

Duane A Dicus, Professor  
Physics  
PhD, University of California-Los Angeles, 1968

Isil Dillig, Associate Professor  
Computer Science  
PhD, Stanford University, 2011

Thomas W Dillig, Adjunct Assistant Professor  
Computer Science  
Computer Science  
PhD, Stanford University, 2011

Harriet L Dinerstein, Professor  
Astronomy  
PhD, University of California-Santa Cruz, 1980

Jacques Distler, Professor

Physics  
PhD, Harvard University, 1987

Todd Ditmire, Professor  
Physics  
PhD, University of California-Davis, 1995

Theodore H Dix, Associate Professor Emeritus  
Human Ecology  
PhD, Northwestern University, 1980

John D Dollard, Professor Emeritus  
Mathematics  
PhD, Princeton University, 1963

Michael W Downer, Professor  
Professorship in Physics #2  
Physics  
PhD, Harvard University, 1983

Glenn P Downing, Lecturer  
Computer Science  
MS, Massachusetts Institute of Technology, 1977

Justin M Dragna, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 2011

Michael Drew, Assistant Professor  
Neuroscience  
PhD, Columbia University in the City of New York, 2004

Jaquelin P Dudley, Professor  
Molecular Biosciences  
PhD, Baylor College of Medicine, 1978

Dennis P Dunn, Lecturer  
PhD, University of Texas at Austin, 2002

Kenneth H Dunton, Professor  
Marine Science  
Marine Science  
PhD, University of Alaska Fairbanks, 1985

John R Durbin, Professor Emeritus  
Mathematics  
PhD, University of Kansas Main Campus, 1964

Gregory C Durrett, Assistant Professor  
Computer Science  
PhD, University of California-Berkeley, 2016

Charles F Earhart, Professor Emeritus  
Molecular Biosciences  
PhD, Purdue University Main Campus, 1967

Paul Eastwick, Adjunct Associate Professor  
Human Ecology  
PhD, Northwestern University, 2009

David J Eaton, Professor  
Bess Harris Jones Centennial Professorship in Natural Resource Policy Studies  
Biology Instruction Office  
PhD, Johns Hopkins University, 1977

Johann K Eberhart, Associate Professor  
Molecular Biosciences  
PhD, University of Missouri - Columbia, 2002

Lauren Ilyse Richie Ehrlich, Associate Professor  
Molecular Biosciences  
PhD, Stanford University, 2002

Denise D Ekberg, Clinical Assistant Professor  
MS, University of Illinois at Urbana-Champaign, 1989

Ron Elber, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Life Sciences and Biology  
Chemistry  
PhD, Hebrew University, 1985

Andrew Ellington, Professor  
Wilson M. and Kathryn Fraser Research Professorship in Biochemistry  
Molecular Biosciences  
PhD, Harvard University, 1988

E Allen Emerson, Professor Emeritus  
Computer Science  
PhD, Harvard University, 1981

Michael Endl, Lecturer  
Astronomy  
PhD, University of Vienna, 2001

Peter H English, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1998

Bjorn Engquist, Professor  
CAM Chair I  
Mathematics  
PhD, Uppsala University, 1969

Deana L Erdner, Associate Professor  
Marine Science  
Marine Science  
PhD, Massachusetts Institute of Technology, 1997

Brad Erisman, Assistant Professor  
Marine Science  
Marine Science  
PhD, University of California-San Diego, 2008

James L Erskine, Professor  
Trull Centennial Professorship in Physics #2  
Physics  
PhD, University of Washington - Seattle, 1972

Andrew Jerome Esbaugh, Assistant Professor  
Marine Science  
Marine Science  
PhD, Queens University, 2005

Neal J Evans II, Professor Emeritus  
Astronomy  
PhD, University of California-Berkeley, 1973

Fatima H Fakhreddine, Senior Lecturer  
Chemistry  
PhD, University of Texas at Austin, 1999

Caroline E Fariior, Assistant Professor  
Biology Instruction Office  
PhD, Princeton University, 2012

Marilyn M Felkner, Clinical Assistant Professor  
Human Ecology

PhD, University of Texas Health Science Center at Houston, 2001

Leanne H Field, Distinguished Senior Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 1987

Gregory A Fiete, Associate Professor  
Physics  
PhD, Harvard University, 2003

Ila P Fiete, Associate Professor  
Neuroscience  
Physics  
PhD, Harvard University, 2004

Karen L Fingerman, Professor  
Human Ecology  
PhD, University of Michigan-Ann Arbor, 1993

Manfred Fink, Professor  
Physics  
PhD, Universitat Friedericiana Karlsruhe, 1966

Ilya J Finkelstein, Assistant Professor  
Molecular Biosciences  
PhD, Stanford University, 2007

Keely D Finkelstein, Lecturer  
Astronomy  
PhD, Ecole Nationale de Aviation Civile, 2008

Steven Lyle Finkelstein, Associate Professor  
Astronomy  
PhD, Arizona State University Main, 2008

Janice Ann Fischer, Professor  
Molecular Biosciences  
PhD, Harvard University, 1988

Willy Fischler, Professor  
Jane and Roland Blumberg Centennial Professorship in Physics  
Physics  
PhD, Vrije Universiteit Brussel, 1976

Jillian Rose Fisher, Specialist  
Mathematics  
BA, University of Texas at Austin, 2015

Shelby Dax Fisher-Garibay, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2016

Daniel L Fitzpatrick, Clinical Assistant Professor  
MA, University of Texas at Austin, 2010

Richard Fitzpatrick, Professor  
Physics  
PhD, University of Sussex, 1988

Conrad R Fjetland, Lecturer  
Chemistry  
PhD, New Mexico Institute of Mining and Technology, 1998

Scott B Fleenor, Specialist  
Human Ecology  
BA, University of Chicago, 1984

Ernst-Ludwig Florin, Associate Professor  
Physics

PhD, Technischen Universitat Munchen/Munich, 1995

Hugh S Forrest, Professor Emeritus  
Neuroscience  
DSc, University of London, 1970

Norma L Fowler, Professor  
Biology Instruction Office  
PhD, Duke University, 1978

Marye A Fox, Professor Emeritus  
Chemistry  
PhD, Dartmouth College, 1974

Fares Z Fraij, Lecturer  
Computer Science  
PhD, University of Texas at El Paso, 2005

David W Franke  
Computer Science  
PhD, University of Texas at Austin, 1992

Ruth A Franks, Senior Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2000

Daniel S Freed, Professor  
Mathematics  
PhD, University of California-Berkeley, 1985

Jeanne H Freeland-Graves, Professor  
Bess Heflin Centennial Professorship in Nutritional Sciences  
Human Ecology  
PhD, Rutgers the State University of New Jersey New Brunswick Campus,  
1975

Gary L Freeman, Professor Emeritus  
Biology Instruction Office  
PhD, University of Chicago, 1964

Bj Friedman, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 1985

Jennifer H Fritz, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1997

Lothar W Frommhold, Professor Emeritus  
Physics  
PhD, University of Hamburg, 1961

Atlantis Y Frost, Specialist  
Chemistry  
BS, Northeastern Illinois University, 2015

Lee A Fuiman, Professor  
Perry R. Bass Chair in Fisheries and Mariculture  
Biology Instruction Office  
Marine Science  
PhD, University of Michigan-Ann Arbor, 1983

Donald S Fussell, Professor  
Trammell Crow Regents Professorship in Computer Science  
Computer Science  
PhD, University of Texas at Dallas, 1980

Anna Gal, Professor  
Computer Science

PhD, University of Chicago, 1995

Irene M Gamba, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and  
Sciences III  
Mathematics  
PhD, University of Chicago, 1989

Blanca U Gamez, Lecturer  
MPA, Texas State University-San Marcos, 2011

Wayne S Gardner, Professor Emeritus  
Marine Science  
PhD, University of Wisconsin Colleges, 1972

Adam T Garland, Specialist  
Chemistry  
PhD, University of Texas at Austin, 2014

J David Gavenda, Professor Emeritus  
Physics  
PhD, Brown University, 1959

Karl Gebhardt, Professor  
Herman and Joan Suit Professorship in Astrophysics  
Astronomy  
PhD, Rutgers the State University of New Jersey New Brunswick Campus,  
1994

Kenneth W Gentle, Professor  
Physics  
PhD, Massachusetts Institute of Technology, 1966

Andreas S George, Specialist  
Biology Instruction Office  
MS, University of Texas at Austin, 2015

George Georgiou, Professor  
Laura Jennings Turner Chair in Engineering  
Molecular Biosciences  
PhD, Cornell University, 1987

Elizabeth Thompson Gershoff, Professor  
Human Ecology  
PhD, University of Texas at Austin, 1998

Simon Gersib, Specialist  
Chemistry  
BS, Southwestern University, 2016

Omar Ghattas, Professor  
John A. and Katherine G. Jackson Chair in Computational Geosciences  
Computer Science  
PhD, Duke University, 1988

Ahmed Gheith, Adjunct Professor  
Computer Science  
PhD, Georgia Institute of Technology, 1990

John Michael Giacona, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Noah Bramson Giese, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

John C Gilbert, Professor Emeritus  
Chemistry

PhD, Yale University, 1965

John E Gilbert, Professor  
Mathematics  
PhD, University of Oxford, 1963

Lawrence E Gilbert, Professor  
Biology Instruction Office  
PhD, Stanford University, 1971

Ryan R Gillespie, Specialist  
Biology Instruction Office  
BS, Westminster College (Utah), 2002

Martha B Gillham, Associate Professor Emeritus  
Human Ecology  
PhD, Iowa State University, 1975

Benjamin D Gilman, Specialist  
Biology Instruction Office  
PhD, University of Texas at Austin, 2017

Marci Elizabeth Joy Gleason, Associate Professor  
Human Ecology  
PhD, New York University, 2004

Austin M Gleeson, Professor  
Physics  
PhD, University of Pennsylvania, 1965

Nace L Golding, Professor  
Neuroscience  
PhD, University of Wisconsin-Madison, 1996

Marcel Goldschen, Assistant Professor  
Neuroscience  
PhD, University of Wisconsin-Madison, 2009

Robert E Gompf, Professor  
Jane and Roland Blumberg Centennial Professorship in Mathematics  
Mathematics  
PhD, University of California-Berkeley, 1984

Laura I Gonzalez, Lecturer  
Biology Instruction Office  
PhD, University of New Mexico Main Campus, 1998

Oscar Gonzalez, Professor  
Mathematics  
PhD, Stanford University, 1996

Cameron M Gordon, Professor  
Sid W. Richardson Foundation Regents Chair in Mathematics #2  
Mathematics  
PhD, University of Cambridge, 1971

Vernita Gordon, Assistant Professor  
Physics  
PhD, Harvard University, 2003

Mohamed G Gouda, Professor  
Mike A. Myers Centennial Professorship in Computer Sciences  
Computer Science  
PhD, University of Waterloo, 1977

Gail Grabner, Lecturer  
Biology Instruction Office  
PhD, University of Illinois at Urbana-Champaign, 2002

Kristen L Grauman, Professor

Professorship in Computer Sciences #4  
Computer Science  
PhD, Massachusetts Institute of Technology, 2006

Kathryn L Greenstein, Specialist  
Chemistry  
BA, University of Texas at Austin, 2017

Thomas A Griffy, Professor Emeritus  
Physics  
PhD, Rice University, 1961

Jeffrey M Gross  
Biology Instruction Office  
PhD, Duke University, 2002

Sam Gunningham, Lecturer  
Mathematics  
PhD, Northwestern University, 2013

Robin Gutell, Professor  
Biology Instruction Office  
PhD, University of California-Santa Cruz, 1985

Marvin L Hackert, Professor  
William Shive Centennial Professorship in Biochemistry  
Molecular Biosciences  
PhD, Iowa State University, 1970

Ronny Hadani, Associate Professor  
Mathematics  
PhD, Tel Aviv University, 2006

Amanda Hager, Lecturer  
Mathematics  
PhD, University of Iowa, 2010

Gary C Hamrick, Professor  
Mathematics  
PhD, University of Virginia, 1971

Craig A Handley, Specialist  
Biology Instruction Office  
MS, Texas State University-San Marcos, 2011

Debra R Hansen, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2012

Amber Hardison, Assistant Professor  
Marine Science  
Marine Science  
PhD, College of William and Mary, 2010

Susan C Harkins, Lecturer  
EdD, University of Pittsburgh, Pittsburgh Campus, 1998

Kerri Harmon, Senior Student Program Coordinator  
EdD, Delaware State University, 2012

Shinko K Harper, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 1997

Kristen M Harris, Professor  
Neuroscience  
PhD, Northeastern Ohio Universities College of Medicine, 1982

Makenzie Burton Harris, Specialist  
Human Ecology

BS, University of Texas at Austin, 2015

R A Harris, Professor

M. June and J. Virgil Waggoner Chair in Molecular Biology  
Neuroscience

PhD, University of North Carolina at Chapel Hill, 1973

Rasika M Harshey, Professor

Molecular Biosciences

PhD, Indian Institute of Science - Bangalore, 1977

Justin Havird, Assistant Professor

Biology Instruction Office

PhD, Auburn University, 2014

Christine V Hawkes, Associate Professor

Biology Instruction Office

PhD, University of Pennsylvania, 2000

Drew Hays, Lecturer

Human Ecology

MA, University of Texas at Austin, 2012

Richard D Hazeltine, Professor

Physics

PhD, University of Michigan-Ann Arbor, 1968

Nancy L Hazen-Swann, Professor

Human Ecology

PhD, University of Minnesota-Twin Cities, 1979

Yuan He, Lecturer

Mathematics

PhD, Columbia University in the City of New York, 2010

Bjorn Hegelich, Associate Professor

Physics

PhD, Ludwig-Maximilians-Universitat Munchen, 2002

Daniel J Heinzen, Professor

The Fondren Foundation Centennial Chair in Physics

Physics

PhD, Massachusetts Institute of Technology, 1988

Raymond C Heitmann, Professor

Mathematics

PhD, University of Wisconsin-Madison, 1974

Graeme A Henkelman, Professor

Chemistry

PhD, University of Washington - Seattle, 2001

Thushani Herath, Lecturer

Chemistry

PhD, Wayne State University, 2015

Ladia Maxine Hernandez, Lecturer

Human Ecology

PhD, Texas Woman's University - Denton, 2009

David L Herrin, Professor

Molecular Biosciences

PhD, University of South Florida, 1986

Charlotte Herzele, Lecturer

Human Ecology

PhD, University of Texas at Austin, 1997

Mariusus Heule, Research Assistant Professor (Affiliated)

Computer Science

PhD, Delft University of Technology, 2008

Linda A Hicke, Professor

Robert E. Boyer Chair in Natural Sciences

Molecular Biosciences

PhD, University of California-Berkeley, 1990

Gary J Hill, Research Professor (Affiliated)

Astronomy

PhD, University of Hawaii at Hilo, 1988

David M Hillis, Professor

Alfred W. Roark Centennial Professorship in Natural Sciences

Biology Instruction Office

PhD, University of Kansas Main Campus, 1985

Mary C Hines, Lecturer

Biology Instruction Office

PhD, University of Louisville, 1989

David W Hoffman, Associate Professor

Molecular Biosciences

PhD, Duke University, 1986

Johann Hofmann, Professor

Biology Instruction Office

PhD, Universitat Leipzig, 1997

James A Holcombe, Professor Emeritus

Chemistry

PhD, University of Michigan-Ann Arbor, 1974

Anthony Joseph Hollenback, Specialist

Chemistry

BS, University of Texas at Austin, 2016

Gloria J Holt, Professor Emeritus

Marine Science

PhD, Texas A & M University, 1976

Benjamin Sumin Hong, Specialist

Chemistry

BS, University of Texas at Austin, 2016

Wendell Horton, Professor Emeritus

Physics

PhD, University of California-San Diego, 1967

Mackenzie A Howard

Biology Instruction Office

Neuroscience

PhD, University of Washington - Seattle, 2008

Qixing Huang, Assistant Professor

Computer Science

PhD, Stanford University, 2012

Dusten Dale Hubbard, Specialist

Biology Instruction Office

BS, University of Texas at Austin, 2016

Kylie A Huckleberry, Specialist

Biology Instruction Office

PhD, University of Texas at Austin, 2017

Jon M Huijbregtse, Professor

Molecular Biosciences

PhD, University of Michigan-Ann Arbor, 1989

Alexander C Huk, Professor

Neuroscience  
PhD, Stanford University, 2001

Simon M Humphrey, Associate Professor  
Chemistry  
PhD, University of Cambridge, 2006

Joseph F Hunt, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2017

Warren A Hunt Jr, Professor  
Computer Science  
PhD, University of Texas at Austin, 1985

Enamul Huq, Professor  
Molecular Biosciences  
PhD, Purdue University Main Campus, 1997

Aletha C Huston, Professor Emeritus  
Human Ecology  
PhD, University of Minnesota-Twin Cities, 1965

Ted L Huston, Professor Emeritus  
Human Ecology  
PhD, State University of New York at Albany, 1972

Alexander Huth, Assistant Professor  
Computer Science  
Neuroscience  
PhD, University of California-Berkeley, 2013

Amy E Imes, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2008

Salvatore Ioverno, Lecturer  
Human Ecology  
PhD, University of Rome Tor Vergata, 2016

Gregory C Ippolito  
Biology Instruction Office  
PhD, University of Alabama at Birmingham, 2002

Philip Isett, Assistant Professor  
Mathematics  
PhD, Princeton University, 2013

Arie Israel, Assistant Professor  
Mathematics  
PhD, Princeton University, 2011

Brent L Iverson, Professor  
Warren J. and Viola Mae Raymer Professorship  
Chemistry  
PhD, California Institute of Technology, 1988

Vishwanath R Iyer, Professor  
Molecular Biosciences  
PhD, Harvard University, 1996

Deborah B Jacobvitz, Professor  
Amy Johnson McLaughlin Administrative Chair in Human Ecology, Phyllis L. Richards Endowed Professorship in Child Development  
Human Ecology  
PhD, University of Minnesota-Twin Cities, 1987

Dan Jaffe, Professor  
Jane and Roland Blumberg Centennial Professorship in Astronomy

Astronomy  
PhD, Harvard University, 1981

Bob Jansen, Professor  
Sidney F. and Doris Blake Centennial Professorship in Systematic Botany and the Blake Collection  
Biology Instruction Office  
PhD, Ohio State U Main Campus, 1982

Makkuni Jayaram, Professor  
Molecular Biosciences  
PhD, Indian Institute of Science - Bangalore, 1977

William H Jefferys, Professor Emeritus  
Astronomy  
PhD, Yale University, 1965

Frank Siegfried Jenko, Adjunct Professor  
Physics  
PhD, Technische Universitat Munchen/Munich, 1998

Christine Jessup, Specialist  
Biology Instruction Office  
MPH, DePaul University, 2016

Shalene Jha, Associate Professor  
Biology Instruction Office  
PhD, University of Michigan-Ann Arbor, 2009

Shardha Jogee, Professor  
Astronomy  
PhD, Yale University, 1999

Arlen W Johnson, Professor  
Molecular Biosciences  
PhD, Harvard University, 1988

Kenneth Johnson, Professor  
Roger J. Williams Centennial Professorship in Biochemistry  
Molecular Biosciences  
PhD, University of Wisconsin-Madison, 1975

Spencer Owen Johnson, Specialist  
Mathematics  
BA, Pomona College, 2014

Travis H Johnson, Specialist  
Chemistry  
MS, University of Texas at Austin, 2007

Daniel Johnston, Professor  
Karl Folkers Chair in Interdisciplinary Biomedical Research  
Neuroscience  
PhD, Duke University, 1974

Marshall C Johnston, Professor Emeritus  
Biology Instruction Office  
PhD, University of Texas at Austin, 1955

Christopher A Jolly, Associate Professor  
Human Ecology  
PhD, Texas A & M University, 1996

Lauren M Jones, Senior Student Program Coordinator  
MA, Georgetown University, 2013

Richard A Jones, Professor  
Chemistry  
PhD, University of London, 1978

Thomas E Juenger, Professor  
Biology Instruction Office  
PhD, University of Chicago, 1999

Greyson M Kale, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

Klaus O Kalthoff, Professor Emeritus  
Molecular Biosciences  
PhD, Albert Ludwig University Freiburg im Breisgau, 1971

Dananjaya Kalu Appulage, Lecturer  
Chemistry  
PhD, University of Texas at Arlington, 2017

Vadim Kaplunovsky, Professor  
Physics  
PhD, Tel Aviv University, 1984

Karishma S Kaushik, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2015

Adrian T Keatinge-Clay, Associate Professor  
Molecular Biosciences  
PhD, University of California-San Francisco, 2004

Stephen W Keckler, Adjunct Professor  
Computer Science  
PhD, Massachusetts Institute of Technology, 1998

Sean M Keel, Professor  
Joe B. and Louise Cook Professorship in Mathematics  
Mathematics  
PhD, University of Chicago, 1989

Timothy H Keitt, Professor  
Biology Instruction Office  
PhD, University of New Mexico Main Campus, 1995

Keith Keitz, Assistant Professor  
PhD, California Institute of Technology, 2013

Melissa Kemp, Assistant Professor  
Biology Instruction Office  
PhD, Stanford University, 2015

Rebekah G Kester, Lecturer  
MEd, University of Texas at Austin, 2011

John W Keto, Professor  
Physics  
PhD, University of Wisconsin-Madison, 1972

Keenan J Kidwell, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2014

Can Kilic, Associate Professor  
Physics  
PhD, Harvard University, 2006

Goheun Kim, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2014

Jonghwan Kim, Associate Professor  
Molecular Biosciences  
PhD, University of Texas at Austin, 2005

Se Yong Kim, Specialist  
Chemistry  
BS, University of Texas at Austin, 2015

Su Yeong Kim, Associate Professor  
Human Ecology  
PhD, University of California-Davis, 2003

Peter J King, Lecturer  
Biology Instruction Office  
PhD, University of California-Irvine, 2000

Lynn E Kirby, Clinical Assistant Professor  
MLibArts, St Edward's University, 2007

Mark A Kirkpatrick, Professor  
T. S. Painter Centennial Professorship in Genetics  
Biology Instruction Office  
PhD, University of Washington - Seattle, 1983

Karrol A Kitt, Associate Professor Emeritus  
Human Ecology  
PhD, Purdue University Main Campus, 1978

George B Kitto, Professor Emeritus  
Molecular Biosciences  
PhD, Brandeis University, 1966

Leonard Kleinman, Professor Emeritus  
Physics  
PhD, University of California-Berkeley, 1960

Kimberly Kline, Professor Emeritus  
Human Ecology  
PhD, University of Texas at Austin, 1985

Adam R Klivans, Associate Professor  
Computer Science  
PhD, Massachusetts Institute of Technology, 2002

Daniel F Knopf, Professor  
Mathematics  
PhD, University of Wisconsin-Milwaukee, 1999

Hans A Koch, Professor  
Mathematics  
PhD, University of Geneva, 1979

Terry M Kotrla, Adjunct Assistant Professor  
Biology Instruction Office  
MSEd, Capella University, 2001

Philipp Kraehenbuehl, Assistant Professor  
Computer Science  
PhD, Stanford University, 2014

Adam L Kraus, Assistant Professor  
Astronomy  
PhD, California Institute of Technology, 2009

Amber Kreischer, Lecturer  
Human Ecology  
PhD, Iowa State University, 2017

Michael J Krische, Professor  
The Robert A. Welch Chair in Science  
Chemistry

PhD, Stanford University, 1997

Emma Krueger, Specialist  
Chemistry  
PhD, University of Texas at Austin, 2016

Robert M Krug, Professor Emeritus  
Molecular Biosciences  
PhD, Rockefeller University, 1966

Joseph J Kuehl, Adjunct Assistant Professor  
Marine Science  
PhD, University of Rhode Island, 2009

Benjamin J Kuipers, Professor Emeritus  
Computer Science  
PhD, Massachusetts Institute of Technology, 1977

Devdatta Kulkarni, Adjunct Assistant Professor  
Computer Science  
PhD, University of Minnesota-Twin Cities, 2009

Pawan Kumar, Professor  
Astronomy  
PhD, California Institute of Technology, 1988

John W La Claire II, Professor Emeritus  
Molecular Biosciences  
PhD, University of California-Berkeley, 1979

Cynthia A Labrake  
Biology Instruction Office  
Chemistry  
PhD, Loyola University Chicago, 1992

Lance A Labun, Lecturer  
Physics  
PhD, University of Arizona, 2011

John H Lacy, Professor  
Astronomy  
PhD, University of California-Berkeley, 1979

Travis J Laduc, Lecturer  
Biology Instruction Office  
Biology Instruction Office  
PhD, University of Texas at Austin, 2003

Matthew Ladue, Specialist  
MA, University of Texas at Austin, 2017

Jeanne M Lagowski, Professor Emeritus  
Neuroscience  
PhD, University of Michigan-Ann Arbor, 1957

Keji Lai, Assistant Professor  
Physics  
PhD, Princeton University, 2006

Simon S Lam, Professor  
Regents Chair in Computer Sciences #1  
Computer Science  
PhD, University of California-Los Angeles, 1974

David L Lambert, Professor Emeritus  
Astronomy  
DPhil, University of Oxford, 1965

Alan Lambowitz, Professor  
Mr. and Mrs. A. Frank Smith, Jr. Regents Chair in Molecular Biology

Molecular Biosciences  
PhD, Yale University, 1972

Karen M Landolt, Lecturer  
Computer Science  
JD, Northeastern University, 2000

Karol Lang, Professor  
Jane and Roland Blumberg Professorship in Physics  
Physics  
PhD, University of Rochester, 1985

Judith H Langlois, Professor  
Charles and Sarah Seay Regents Professorship in Developmental  
Psychology  
Human Ecology  
PhD, Louisiana State University and Agricultural and Mechanical College,  
1973

Laura M Lashinger, Research Scientist  
Human Ecology  
PhD, University of Texas Health Science Center at Houston, 2005

Anita G Latham, Senior Lecturer  
Biology Instruction Office  
PhD, University of Alabama at Birmingham, 1999

David A Laude, Professor  
Chemistry  
PhD, University of California-Riverside, 1984

Daniel J Leahy, Professor  
Benjamin Clayton Centennial Professorship in Biochemistry, The  
Benjamin Clayton Biochemical Institute Regents Lectureship, The Lorene  
Morrow Kelley Lectureship, The Lorene Morrow Kelley Lectureship in  
Molecular Biology  
Molecular Biosciences  
PhD, Stanford University, 1988

Matthew A Lease, Associate Professor  
Computer Science  
PhD, Brown University, 2009

Mathew A Leibold, Professor  
Harold C. and Mary D. Bold Regents Professorship of Cryptogamic  
Botany (Phycology)  
Biology Instruction Office  
PhD, Michigan State University, East Lansing, 1988

Donald A Levin, Professor  
Biology Instruction Office  
PhD, University of Illinois at Urbana-Champaign, 1964

Xiaoqin E Li, Associate Professor  
Physics  
PhD, University of Michigan-Ann Arbor, 2003

Vladimir Lifschitz, Professor  
Professorship in Computer Sciences #2  
Computer Science  
PhD, Steklov Mathematical Institute, 1969

Calvin Lin, Professor  
Computer Science  
PhD, University of Washington - Seattle, 1992

Craig R Linder, Associate Professor  
Biology Instruction Office

PhD, Brown University, 1984

Hung-Wen Liu, Professor  
George H. Hitchings Regents Chair in Drug Design  
Chemistry  
PhD, Columbia University in the City of New York, 1981

Qiang Liu, Assistant Professor  
Computer Science  
PhD, University of California-Irvine, 2014

Zhanfei Liu, Associate Professor  
Marine Science  
Marine Science  
PhD, State University of New York at Stony Brook, 2006

Alan M Lloyd, Professor  
Molecular Biosciences  
PhD, Stanford University, 1993

Alessia Lodi, Research Associate  
Human Ecology  
PhD, Ohio State U Main Campus, 2006

John C Loehlin, Professor Emeritus  
Computer Science  
PhD, University of California-Berkeley, 1957

Hector E Lomeli, Lecturer  
Mathematics  
PhD, University of Minnesota-Twin Cities, 1995

Elma Ines Lorenzo-Blanco, Assistant Professor  
Human Ecology  
PhD, University of Michigan-Ann Arbor, 2013

Timothy J Loving, Adjunct Associate Professor  
Human Ecology  
PhD, Purdue University Main Campus, 2001

Fengyan Lu, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2016

Jeffrey J Luci, Research Assistant Professor  
Neuroscience  
PhD, University of Iowa, 2002

John E Luecke, Professor  
Mathematics  
PhD, University of Texas at Austin, 1985

Martha M Maas, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2005

Allan H Macdonald, Professor  
Sid W. Richardson Foundation Regents Chair in Physics #1  
Physics  
PhD, University of Toronto, 1978

Paul M Macdonald, Professor  
Mr. and Mrs. Robert P. Doherty, Jr. Regents Chair in Molecular Biology  
Molecular Biosciences  
PhD, Vanderbilt University, 1983

Jan M Machart, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2001

Francesco Maggi, Professor  
Mathematics  
PhD, Universita degli Studi di Roma La Sapienza, 2004

Philip D Magnus, Professor Emeritus  
Chemistry  
PhD, University of London, 1968

Anne-Clarisse T Magtaan, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

Bassett Maguire Jr, Professor Emeritus  
Biology Instruction Office  
Marine Science  
PhD, Cornell University, 1957

Swadesh M Mahajan, Research Professor (Affiliated)  
Physics  
PhD, University of Maryland College Park, 1973

Dmitrii E Makarov, Professor  
Chemistry  
PhD, Semenov Institute of Chemical Physics, 1992

Solomon Manukure, Lecturer  
Mathematics  
PhD, University of South Florida, 2016

Edward M Marcotte, Professor  
Mr. and Mrs. Corbin J. Robertson, Sr. Regents Chair in Molecular Biology #1  
Molecular Biosciences  
PhD, University of Texas at Austin, 1995

Michael P Marder, Professor  
Physics  
PhD, University of California-Santa Barbara, 1986

Michela Marinelli, Associate Professor  
Neuroscience  
PhD, Universite Victor Segalen, Bordeaux II, 1997

Irina S Marinova, Lecturer  
PhD, University of Texas at Austin, 2011

Christina Markert, Associate Professor  
Physics  
PhD, Johann Wolfgang Goethe University, 2001

John T Markert, Professor  
Physics  
PhD, Cornell University, 1987

Jill A Marshall, Associate Professor  
Physics  
PhD, University of Texas at Austin, 1984

Stephen F Martin, Professor  
M. June and J. Virgil Waggoner Regents Chair in Chemistry  
Chemistry  
PhD, Princeton University, 1972

Kelly Stewart Masterson, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Wylie M Masterson, Specialist  
Biology Instruction Office

BS, University of Texas at Austin, 2017

Andreas T Matouschek, Professor  
Molecular Biosciences  
PhD, University of Cambridge, 1992

Mikhail V Matz, Associate Professor  
Biology Instruction Office  
PhD, Shemyakin-Ovchinnikov Institute of Bioorganic Chemistry, 1999

Richard A Matzner, Professor  
Physics  
PhD, University of Maryland College Park, 1967

Michael Mauk, Professor  
Neuroscience  
PhD, Stanford University, 1985

James D Mauseth, Professor Emeritus  
Biology Instruction Office  
PhD, University of Washington - Seattle, 1975

Mark M Maxwell, Clinical Professor  
Mathematics  
PhD, Oregon State University, 1994

Jennifer A Maynard, Associate Professor  
PhD, University of Texas at Austin, 2002

Mary L McAnelly, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1984

Claire McCarthy Zagorski, Specialist  
Chemistry  
BA, University of Texas at Austin, 2006

Rachel McCarthy, Lecturer  
Human Ecology  
PsyD, Argosy University/Orange County, 2015

Blinda E McClelland, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1994

James W McClelland, Associate Professor  
Marine Science  
Marine Science  
PhD, Boston University, 1998

Paul McCord, Senior Lecturer  
Chemistry  
PhD, University of Texas at Austin, 1992

William D McCormick, Professor Emeritus  
Physics  
PhD, Duke University, 1959

Duncan Edward McCoy, Instructor  
Mathematics  
PhD, University of Glasgow, 2016

Gene D McDonald, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1990

Jason McLellan, Associate Professor  
Molecular Biosciences  
PhD, Johns Hopkins University, 2009

Bailey McMeans, Adjunct Assistant Professor  
Marine Science  
PhD, University of Windsor, 2012

Kay McMurry, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1996

Monica R Meadows, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2003

Mona Mehdy, Associate Professor  
Molecular Biosciences  
PhD, University of California-San Diego, 1984

Robert Messing, Professor  
Neuroscience  
MD, Stanford University, 1979

John C Meth, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2010

Lauren A Meyers, Professor  
Biology Instruction Office  
PhD, Stanford University, 2000

S J Mihic, Associate Professor  
Neuroscience  
PhD, University of Toronto, 1992

Risto P Miikkulainen, Professor  
Computer Science  
PhD, University of California-Los Angeles, 1990

Jesse E Miller, Lecturer  
Mathematics  
PhD, University of Illinois at Urbana-Champaign, 2011

Kyle M Miller, Associate Professor  
Molecular Biosciences  
PhD, University College London, 2004

Mary E Miller, Specialist  
Chemistry  
BS, Texas State University-San Marcos, 1989

Charles D Mills, Lecturer  
Mathematics  
PhD, University of Houston, 2017

Monica J Milonovich, Lecturer  
Human Ecology  
MS, Bowling Green State University, 1999

Milos Milosavljevic, Associate Professor  
Astronomy  
PhD, Rutgers the State University of New Jersey New Brunswick Campus,  
2002

Dong-Ha Min, Lecturer  
Marine Science  
Marine Science  
PhD, University of California-San Diego, 1999

Zachary L Miner, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2011

Daniel P Miranker, Professor  
Computer Science  
PhD, Columbia University in the City of New York, 1987

Jayadev Misra, Professor Emeritus  
Computer Science  
PhD, Johns Hopkins University, 1973

Shyamal K Mitra, Senior Lecturer  
Computer Science  
PhD, University of Texas at Austin, 1988

Sarah Nicole Mladenka, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Aloysius K Mok, Professor  
Quincy Lee Centennial Professorship in Computer Science  
Computer Science  
PhD, Massachusetts Institute of Technology, 1983

Ian J Molineux, Professor  
Molecular Biosciences  
DPhil, University of Oxford, 1969

Marie H Monfils, Associate Professor  
Neuroscience  
PhD, University of Lethbridge, 2005

Stephen A Monti, Professor Emeritus  
Chemistry  
PhD, Massachusetts Institute of Technology, 1964

Jennifer Moon, Senior Lecturer  
Biology Instruction Office  
PhD, Indiana University at Bloomington, 2004

Raymond J Mooney, Professor  
Professorship in Computer Sciences #3  
Computer Science  
PhD, University of Illinois at Urbana-Champaign, 1987

C F Moore, Professor Emeritus  
Physics  
PhD, Florida State University, 1964

J S Moore II, Professor Emeritus  
Computer Science  
PhD, University of Edinburgh, 1973

Pedro F Morales, Lecturer  
Mathematics  
PhD, Baylor University, 2012

Nancy A Moran, Professor  
Warren J. and Viola Mae Raymer Chair, Leslie Surginer Endowed  
Professorship  
Biology Instruction Office  
PhD, University of Michigan-Ann Arbor, 1982

Hitoshi Morikawa, Associate Professor  
Neuroscience  
PhD, Kyoto University, 1999

Philip J Morrison, Professor  
Physics  
PhD, University of California-San Diego, 1979

Dana Hadar Moshkovitz Aaronson, Associate Professor

Computer Science  
PhD, Weizmann Institute of Science, 2008

Rachel K Moyer-Trimyer, Lecturer  
Human Ecology  
MEd, University of Texas at Austin, 2001

Peter Mueller, Professor  
Mathematics  
PhD, Purdue University Main Campus, 1991

Ulrich G Mueller, Professor  
William Morton Wheeler-Lost Pines Professorship  
Biology Instruction Office  
PhD, Cornell University, 1993

Charles B Mullins, Professor  
Z. D. Bonner Professorship of Chemical Engineering, Matthew Van Winkle  
Regents Professorship in Chemical Engineering  
Chemistry  
PhD, California Institute of Technology, 1990

Petr Munk, Professor Emeritus  
Chemistry  
PhD, In of Macromole Chem, 1961

Richard F Nauert, Adjunct Associate Professor  
Human Ecology  
PhD, University of Texas at Austin, 2002

Ian Michael Nauhaus, Assistant Professor  
Neuroscience  
PhD, University of California-Los Angeles, 2008

Joseph Neeman, Assistant Professor  
Mathematics  
PhD, University of California-Berkeley, 2013

Lisa Ann Neff, Associate Professor  
Human Ecology  
PhD, University of Florida, 2002

Andrew M Neitzke, Associate Professor  
Mathematics  
PhD, Harvard University, 2005

Joel H Nibert, Lecturer  
Mathematics  
PhD, University of Southern California, 2012

Scott David Niekum, Assistant Professor  
Computer Science  
PhD, University of Massachusetts, 2013

Hiroshi Nishiyama, Associate Professor  
Neuroscience  
PhD, Kyoto University, 2002

Qian Niu, Professor  
Trull Centennial Professorship in Physics #1  
Physics  
PhD, University of Washington - Seattle, 1985

Alison N Norman, Lecturer  
Computer Science  
PhD, University of Texas at Austin, 2010

Gordon S Novak Jr, Professor  
Computer Science

PhD, University of Texas at Austin, 1976

Theresa J O'Halloran, Associate Professor  
Molecular Biosciences  
PhD, University of North Carolina at Chapel Hill, 1986

Melvin E Oakes, Professor Emeritus  
Physics  
PhD, Florida State University, 1964

Howard Ochman, Professor  
Biology Instruction Office  
PhD, University of Rochester, 1984

Gustavo Ochoa, Specialist  
Biology Instruction Office  
MS, University of Texas at Austin, 2015

J T Oden, Professor  
Cockrell Family Regents Chair in Engineering #2, Peter O'Donnell, Jr.  
Centennial Chair in Computing Systems  
Computer Science  
Mathematics  
PhD, Oklahoma State University Main Campus, 1962

Stella S Offner, Assistant Professor  
Astronomy  
PhD, University of California-Berkeley, 2009

Yousef Mazen Okasheh, Specialist  
Chemistry  
BS, University of Texas at Austin, 2016

Vicki Olubukola Oladoyin, Specialist  
Chemistry  
MS, Mississippi College, 2017

Abiodun Oluyomi, Clinical Assistant Professor  
Human Ecology  
PhD, University of Texas Health Science Center at Houston, 2011

Peter Onyisi, Assistant Professor  
Physics  
PhD, Cornell University, 2008

Matthew Orap, Specialist  
Chemistry  
BS, University of Texas at Austin, 2016

Raymond Lee Orbach, Professor  
Physics  
PhD, University of California-Berkeley, 1960

Sophia Alexandra Ortega, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

Karen L Ostlund, Lecturer  
PhD, University of Minnesota-Twin Cities, 1983

Glen Otto, Clinical Professor  
Biology Instruction Office  
DVM, University of Minnesota-Twin Cities, 1987

Sarah Danielle Ozuna, Specialist  
Human Ecology  
BS, University of Texas at Austin, 2013

Sonia Paban, Associate Professor  
Physics

PhD, University of Barcelona, 1988

Bruce P Palka, Professor Emeritus  
Mathematics  
PhD, University of Michigan-Ann Arbor, 1972

Jose L Panero, Associate Professor  
Biology Instruction Office  
PhD, University of Tennessee, 1990

Diane Papillion, Lecturer  
Human Ecology  
MPH, University of North Carolina at Chapel Hill, 2001

Patrick H Parker, Specialist  
Biology Instruction Office  
BS, Augusta State University, 2005

Jonathan D Partridge, Lecturer  
Biology Instruction Office  
PhD, University of Sheffield, 2005

Stefania Patrizi, Assistant Professor  
Mathematics  
PhD, Universita degli Studi di Roma La Sapienza, 2010

Yale N Patt, Professor  
Ernest Cockrell, Jr. Centennial Chair in Engineering  
Computer Science  
PhD, Stanford University, 1966

Kristin D Patterson, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1998

Tanya T Paull, Professor  
Burl G. and Lorene L. Rogers Chair in Human Health  
Molecular Biosciences  
PhD, University of California-Los Angeles, 1996

Natasa Pavlovic, Professor  
Mathematics  
PhD, University of Illinois at Chicago, 2002

Shelley M Payne, Professor  
Molecular Biosciences  
PhD, Tex Hlth Sci C Dallas, U, 1977

Gergina Pencheva, Lecturer  
Mathematics  
PhD, University of Pittsburgh, Pittsburgh Campus, 2007

Timothy Perutz, Associate Professor  
Mathematics  
PhD, University of London, 2005

Simon Peter, Assistant Professor  
Computer Science  
PhD, Swiss Federal Institute of Technology, 2012

Steven M Phelps, Associate Professor  
Biology Instruction Office  
PhD, University of Texas at Austin, 1999

Eric R Pianka, Professor  
Denton A. Cooley Centennial Professorship in Zoology  
Biology Instruction Office  
PhD, University of Washington - Seattle, 1990

Jonathan T Pierce-Shimomura, Associate Professor

Neuroscience  
PhD, University of Oregon, 2000

Keshav K Pingali, Professor  
W. A. "Tex" Moncrief, Jr. Chair in Distributed and Grid Computing  
Computer Science  
ScD, Massachusetts Institute of Technology, 1986

C Greg Plaxton, Professor  
Computer Science  
PhD, Stanford University, 1989

Martin Poenie, Associate Professor  
Molecular Biosciences  
PhD, Stanford University, 1986

Luis R Polanco, Specialist  
Chemistry  
MA, University of Texas at Austin, 2017

George D Pollak, Professor  
Neuroscience  
PhD, University of Maryland College Park, 1970

Mark T Pope, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2011

Bruce W Porter, Professor  
Computer Science  
PhD, University of California-Irvine, 1984

Andrew Potter, Assistant Professor  
Physics  
PhD, Massachusetts Institute of Technology, 2013

Natalie Shepherd Poulos, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2015

Pamela G Powell, Clinical Associate Professor  
MEd, University of Texas at Austin, 1993

William H Press, Professor  
Warren J. and Viola Mae Raymer Chair, Leslie Surginer Endowed  
Professorship  
Biology Instruction Office  
Computer Science  
PhD, California Institute of Technology, 1972

Alison R Preston, Associate Professor  
Neuroscience  
PhD, Stanford University, 2004

Eric Price, Assistant Professor  
Computer Science  
PhD, Massachusetts Institute of Technology, 2013

Melinda Price, Adjunct Assistant Professor  
Computer Science  
BS, University of Texas at Austin, 1993

Nicholas J Priebe, Associate Professor  
Neuroscience  
PhD, University of California-San Francisco, 2001

Chris Prorise, Adjunct Assistant Professor  
Computer Science  
BSEE, Duke University, 1994

Hong Qiao, Assistant Professor  
Molecular Biosciences  
PhD, Chinese Academy of Sciences, 2004

Lili Qiu, Professor  
Computer Science  
PhD, Cornell University, 2001

Emily Que, Assistant Professor  
Chemistry  
PhD, University of California-Berkeley, 2009

Heather M Quimby, Lecturer  
Human Ecology  
PhD, Fielding Graduate Institute, 2016

Charles L Radin, Professor  
Mathematics  
PhD, University of Rochester, 1971

Saydur Rahman, Adjunct Professor  
Marine Science  
PhD, Univ of the Ryukyus, 2001

Mark G Raizen, Professor  
Sid W. Richardson Foundation Regents Chair in Physics #2  
Physics  
PhD, University of Texas at Austin, 1989

Vijaya Ramachandran, Professor  
William B. Blakemore II Regents Professorship in Computer Sciences  
Computer Science  
PhD, Princeton University, 1983

Michael W Raney, Lecturer  
PhD, University of Texas at Austin, 1991

Mary A Rankin, Professor Emeritus  
Biology Instruction Office  
PhD, University of Iowa, 1972

Joanne M Ravel, Professor Emeritus  
Chemistry  
PhD, University of Texas at Austin, 1954

Megan C Regnier, Adjunct/Clinical Affiliate  
PsyD, Florida State University, 2009

Linda E Reichl, Professor  
Physics  
PhD, University of Denver, 1969

Jan S Rellermeyer, Adjunct Assistant Professor  
Computer Science  
PhD, Swiss Federal Institute of Technology, 2011

Han Ren, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2015

Kui Ren, Associate Professor  
Mathematics  
PhD, Columbia University in the City of New York, 2006

Alessandro Rezende De Macedo, Specialist  
Mathematics  
PhD, University of Texas at Austin, 2017

Phyllis L Richards, Professor Emeritus  
Human Ecology

PhD, Florida State University, 1964

Dick Richardson, Professor Emeritus  
Biology Instruction Office  
PhD, North Carolina State University, 1965

Judit G Ries, Lecturer  
Astronomy  
PhD, University of Texas at Austin, 1992

Peter J Riley, Professor Emeritus  
Physics  
PhD, University of Alberta, 1962

Jack L Ritchie, Professor  
Physics  
PhD, University of Rochester, 1984

Paul Anthony Robbins, Lecturer  
PhD, University of Texas at Austin, 2015

Sean Thomas Roberts, Assistant Professor  
Chemistry  
PhD, Massachusetts Institute of Technology, 2009

Jon D Robertus, Professor Emeritus  
Molecular Biosciences  
PhD, University of California-San Diego, 1972

Catherine J Robinson, Specialist  
Human Ecology  
MEd, Texas State University-San Marcos, 2011

Edward L Robinson, Professor  
William B. Blakemore II Regents Professorship in Astronomy  
Astronomy  
PhD, University of Texas at Austin, 1973

Altha B Rodin, Senior Lecturer  
Mathematics  
PhD, University of Texas at Austin, 1988

Shelly R Rodriguez, Clinical Associate Professor  
MA, University of Texas at Austin, 2003

Michael Rose, Assistant Professor  
Chemistry  
PhD, University of California-Santa Cruz, 2009

Haskell P Rosenthal, Professor Emeritus  
Mathematics  
PhD, Stanford University, 1965

Christopher J Rossbach, Assistant Professor  
Computer Science  
PhD, University of Texas at Austin, 2009

Stanley J Roux Jr, Professor  
Molecular Biosciences  
PhD, Yale University, 1971

David Rusin, Lecturer  
Mathematics  
PhD, University of Chicago, 1984

Rick Russell, Professor  
Molecular Biosciences  
PhD, Johns Hopkins University, 1998

Stephen Thomas Russell, Professor

Priscilla Pond Flawn Regents Professorship in Child Development  
Human Ecology  
PhD, Duke University, 1994

Michael J Ryan, Professor  
Clark Hubbs Regents Professorship in Zoology  
Biology Instruction Office  
PhD, Cornell University, 1982

Holly S Ryon, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2014

Lorenzo A Sadun, Professor  
Mathematics  
PhD, University of California-Berkeley, 1987

Cynthia Saldivar Fitchpatrick, Lecturer  
Human Ecology  
MEd, University of Texas at Austin, 1996

David J Saltman, Professor Emeritus  
Mathematics  
PhD, Yale University, 1976

Bob G Sanders, Professor Emeritus  
Molecular Biosciences  
PhD, Pennsylvania State University Park, 1961

Krishnakali Sarkar, Specialist  
Biology Instruction Office  
MS, University of Texas at Austin, 2014

Sahotra Sarkar, Professor  
Biology Instruction Office  
PhD, University of Chicago, 1989

K Sata Sathasivan, Senior Lecturer  
Biology Instruction Office  
PhD, Louisiana State University and Agricultural and Mechanical College, 1991

Kanthimathi Sathasivan, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2011

Jennette Saunders, Specialist  
Chemistry  
BS, University of Texas at Austin, 2016

Inder M Saxena, Lecturer  
Biology Instruction Office  
PhD, Jawaharlal Nehru University, 1984

Pratibha Saxena, Lecturer  
Biology Instruction Office  
PhD, Jawaharlal Nehru University, 1983

John M Scalco, Professor  
Astronomy  
PhD, University of California-Los Angeles, 1973

Livia Schiavinato Eberlin, Assistant Professor  
Chemistry  
PhD, Purdue University Main Campus, 2012

William C Schieve, Professor Emeritus  
Physics  
PhD, Lehigh University, 1959

Benjamin Schmidt, Instructor  
Mathematics  
PhD, Ohio State U Main Campus, 2016

Evelyn M Schultz, Lecturer  
Mathematics  
MA, Duke University, 1972

William Schwartz, Professor  
Biology Instruction Office  
MD, University of California-San Francisco, 1974

Roy F Schwitters, Professor  
Sid W. Richardson Foundation Regents Chair in Physics #4  
Physics  
PhD, Massachusetts Institute of Technology, 1971

Michael D Scott, Distinguished Senior Lecturer  
Computer Science  
MS, Rensselaer Polytechnic Institute, 1998

Eyal Seidemann, Professor  
Neuroscience  
PhD, Stanford University, 1998

Robert M Seitsinger, Adjunct Assistant Professor  
Computer Science  
MS, Boston University, 1998

Eric Senning, Assistant Professor  
Neuroscience  
PhD, University of Oregon, 2009

Jonathan L Sessler, Professor  
R. P. Doherty, Jr. - Welch Regents Chair in Chemistry  
Chemistry  
PhD, Stanford University, 1982

Shagufta H Shabbir, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 2009

Paul R Shapiro, Professor  
Frank N. Edmonds, Jr. Regents Professorship in Astronomy  
Astronomy  
PhD, Harvard University, 1978

Jason B Shear, Professor  
Chemistry  
PhD, Stanford University, 1994

Ruth I Shear  
Chemistry  
PhD, Griffith University, 1991

Yunyi Shen, Lecturer  
Mathematics  
PhD, Florida State University, 2017

Jian Sheng, Adjunct Associate Professor  
Marine Science  
PhD, Johns Hopkins University, 2006

Chih-Kang Shih, Professor  
Dr. Arnold Romberg Endowed Chair in Physics  
Physics  
PhD, Stanford University, 1988

Frank T Shirley, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 1984

Ralph E Showalter, Professor Emeritus  
Mathematics  
PhD, University of Illinois at Urbana-Champaign, 1968

Gennady Shvets, Adjunct Professor  
Physics  
PhD, Massachusetts Institute of Technology, 1995

Beryl B Simpson, Professor Emeritus  
Biology Instruction Office  
PhD, Harvard University, 1968

Michael C Singer, Professor Emeritus  
Biology Instruction Office  
PhD, University of Oxford, 1971

Mihai Sirbu, Associate Professor  
Mathematics  
PhD, Carnegie Mellon University, 2004

Greg O Sitz, Professor  
Physics  
PhD, Stanford University, 1987

James Carter Smith, Specialist  
Mathematics  
BS, University of Texas at Austin, 2017

Christopher A Sneden, Professor  
Rex G. Baker, Jr. and McDonald Observatory Centennial Research  
Professorship in Astronomy  
Astronomy  
PhD, University of Texas at Austin, 1974

D M Snodderly, Professor  
Human Ecology  
Neuroscience  
PhD, Rockefeller University, 1969

Stacy C Sparks, Senior Lecturer  
Chemistry  
PhD, University of Texas at Austin, 1999

Emily E Spencer, Specialist  
Human Ecology  
BS, Texas A & M University, 2016

Hallie G Speranza, Senior Lecturer  
Human Ecology  
MA, University of Texas at Austin, 1991

John F Stanton, Adjunct Professor  
Chemistry  
PhD, Harvard University, 1989

Michael P Starbird, Professor  
Mathematics  
PhD, University of Wisconsin-Madison, 1974

Eric Joseph Staron, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 2012

David S Stein, Professor  
Molecular Biosciences  
PhD, Stanford University, 1989

Lydia C Steinman, Adjunct/Clinical Affiliate  
Human Ecology  
Human Ecology  
MA, University of Texas at Austin, 1987

Scott W Stevens, Associate Professor  
Molecular Biosciences  
PhD, University of North Carolina at Chapel Hill, 1996

Keith J Stevenson, Adjunct Professor  
Joseph J. & Jeanne M. Lagowski Regents Professorship in Inorganic  
Chemistry  
Chemistry  
PhD, University of Utah, 1997

Shannon N Stokes, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 2009

Peter H Stone, Professor  
David Bruton, Jr. Centennial Professorship in Computer Sciences #3  
Computer Science  
PhD, Carnegie Mellon University, 1998

John Rudi Strickler, Adjunct Professor  
Marine Science  
PhD, Swiss Federal Institute of Technology, 1969

Thomas Struppeck, Lecturer  
Mathematics  
PhD, University of Texas at Austin, 1989

Sawyer Elizabeth Stubbs, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

George Sudarshan, Professor Emeritus  
Physics  
PhD, University of Rochester, 1958

Christopher S Sullivan, Associate Professor  
Molecular Biosciences  
PhD, University of Pittsburgh, Pittsburgh Campus, 2000

Sibum Sung, Associate Professor  
Molecular Biosciences  
PhD, University of Wisconsin-Madison, 2004

Catherine A Surra, Professor Emeritus  
Human Ecology  
PhD, Pennsylvania State University Main Campus, 1980

Sara J Sutcliffe, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 2000

Harry E Sutton, Professor Emeritus  
Molecular Biosciences  
PhD, University of Texas at Austin, 1953

Sara J Sweitzer, Lecturer  
Human Ecology  
PhD, University of Texas at Austin, 2009

Jack B Swift, Professor Emeritus  
Physics  
PhD, University of Illinois at Urbana-Champaign, 1968

Harry L Swinney, Professor

Sid W. Richardson Foundation Regents Chair in Physics #3  
Physics  
PhD, Johns Hopkins University, 1968

Paul J Szanislo, Professor Emeritus  
Molecular Biosciences  
PhD, University of North Carolina at Chapel Hill, 1967

Thibaud Olivier Taillefumier, Assistant Professor  
Mathematics  
Neuroscience  
PhD, Rockefeller University, 2012

Michael Tang, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

John T Tate, Professor Emeritus  
Mathematics  
PhD, Princeton University, 1950

Amelia J Tate-Looney, Specialist  
Chemistry  
BS, University of Texas at Austin, 2016

David W Taylor Jr, Assistant Professor  
Molecular Biosciences  
PhD, Yale University, 2013

Melissa Anne Taylor, Specialist  
MEd, University of Texas at Austin, 2012

Richard A Taylor, Lecturer  
Human Ecology  
PhD, University of South Florida, 2003

Edward C Theriot, Professor  
Jane and Roland Blumberg Centennial Professorship in Molecular  
Evolution  
Biology Instruction Office  
PhD, University of Michigan-Ann Arbor, 1983

Ann Thijs, Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 2014

Devarajan Thirumalai, Professor  
Larry R. Faulkner Departmental Chair for Excellence in Chemistry and  
Biochemistry, Marvin K. Collie-Welch Regents Chair in Chemistry  
Chemistry  
Physics  
PhD, University of Minnesota-Twin Cities, 1982

Melissa M Thomas, Lecturer  
JD, University of Texas at Austin, 2005

Peter Thomas, Professor  
H-E-B Endowed Chair in Marine Science  
Biology Instruction Office  
Marine Science  
Marine Science  
PhD, University of Leicester, 1978

Guy Thompson, Professor Emeritus  
Molecular Biosciences  
PhD, California Institute of Technology, 1959

James C Thompson, Professor Emeritus  
Physics

PhD, Rice University, 1956

Wesley J Thompson  
Biology Instruction Office  
PhD, University of California-Berkeley, 1975

Xiaochuan Tian, Instructor  
Mathematics  
PhD, Columbia University in the City of New York, 2017

Stefano Tiziani, Assistant Professor  
Human Ecology  
PhD, Ohio State U Main Campus, 2006

Zachary N Tobin, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

Paul K Toprac, Senior Lecturer  
Computer Science  
PhD, University of Texas at Austin, 2008

Ngoc Tran, Assistant Professor  
Mathematics  
PhD, University of California-Berkeley, 2013

Sydney Tran, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2017

Philip U Treisman, Professor  
Mathematics  
PhD, University of California-Berkeley, 1985

Michael Stephen Trent  
Biology Instruction Office  
PhD, East Tennessee State University, 1998

Lauren Nicole Trotter, Specialist  
Biology Instruction Office  
BS, University of Texas at Austin, 2016

Thomas M Truskett, Professor  
Bill L. Stanley Endowed Leadership Chair in Chemical Engineering, Les  
and Sherri Stuewer Endowed Professorship in Chemical Engineering  
Physics  
PhD, Princeton University, 2001

Yen-Hsi Tsai, Professor  
Mathematics  
PhD, University of California-Los Angeles, 2002

Kiryl Tsishchanka, Lecturer  
Mathematics  
PhD, The National Academy of Sciences of Belarus, 1998

Maxim Tsoi, Professor  
Physics  
PhD, Universitat Konstanz, 1998

Haley Tucker, Professor  
Marie Betzner Morrow Centennial Chair  
Molecular Biosciences  
PhD, Texas A & M University, 1975

Billie L Turner, Professor Emeritus  
Biology Instruction Office  
PhD, Washington State University, 1953

Takeshi Udagawa, Professor Emeritus

Physics  
PhD, Univ of Tsukuba, 1962

Karen Uhlenbeck, Professor Emeritus  
Mathematics  
PhD, Brandeis University, 1968

Emin T Ulug, Senior Lecturer  
Biology Instruction Office  
PhD, University of Texas at Austin, 1984

Jason Upton, Assistant Professor  
Molecular Biosciences  
PhD, Washington University in St Louis, 2006

Jeffrey D Vaaler, Professor Emeritus  
Mathematics  
PhD, University of Illinois at Urbana-Champaign, 1974

Robert A Van De Geijn, Professor  
Computer Science  
PhD, University of Maryland University College, 1987

David A Vandembout, Professor  
Chemistry  
PhD, University of Texas at Austin, 1995

Fatima Alesia Varner, Assistant Professor  
Human Ecology  
PhD, Northwestern University, 2010

Alexis F Vasseur, Professor  
John T. Stuart III Centennial Professorship in Mathematics  
Mathematics  
PhD, Universite de Paris VI, Pierre et Marie Curie, 1999

Vijaychidambaram Velayudhan Pillai, Assistant Professor  
Computer Science  
PhD, University of Wisconsin Colleges, 2013

Laura Villafuerte Altuzar, Lecturer  
Mathematics  
PhD, Universidad Politecnica de Valencia, 2007

Tracy A Villareal, Professor  
Marine Science  
Marine Science  
PhD, University of Rhode Island, 1989

Mikhail M Vishik, Professor  
Mathematics  
PhD, University of Moscow, 1980

Brittney Voigt, Specialist  
Biology Instruction Office  
BSArt, University of Texas at Austin, 2016

Steven A Vokes, Associate Professor  
Molecular Biosciences  
PhD, University of Texas at Austin, 2002

Paul E Vouga, Assistant Professor  
Computer Science  
PhD, Columbia University in the City of New York, 2011

James Wadman, Specialist  
Chemistry  
BS, University of Texas at Austin, 2014

Francois Waelbroeck, Research Professor (Affiliated)

Physics  
PhD, University of Texas at Austin, 1988

Alisa H Walch, Lecturer  
Mathematics  
MA, University of Texas at Austin, 2008

Andrew Robert Waldeck, Specialist  
Chemistry  
PhD, University of Texas at Austin, 2016

Michael H Walfish, Adjunct Assistant Professor  
Computer Science  
PhD, Massachusetts Institute of Technology, 2008

Deborah R Walker, Lecturer  
Chemistry  
PhD, University of Texas at Austin, 2005

James R Walker, Professor  
Molecular Biosciences  
PhD, University of Texas at Austin, 1963

Stephen G Walker, Professor  
Paul D. and Betty Robertson Meek and American Petrofina Foundation  
Centennial Professorship in Business  
Mathematics  
PhD, Imperial College of Science, Technology and Medicine, University of  
London, 1995

John B Wallingford, Professor  
William and Gwyn Shive Endowed Professorship  
Molecular Biosciences  
PhD, University of Texas at Austin, 1998

Dale E Walston, Associate Professor Emeritus  
Mathematics  
PhD, University of Texas at Austin, 1961

Benjamin D Walther, Adjunct Assistant Professor  
Marine Science  
PhD, Woods Hole Oceanographic Institution, 2007

Rachel A Ward, Associate Professor  
Mathematics  
PhD, Princeton University, 2009

Pamela J Way, Lecturer  
PhD, University of Texas at Austin, 2002

Lauren J Webb, Associate Professor  
Chemistry  
PhD, California Institute of Technology, 2005

Stephen E Webber, Professor Emeritus  
Chemistry  
PhD, University of Chicago, 1965

Karen A Weems, Lecturer  
MEd, University of Texas at Austin, 1989

Steven Weinberg, Professor  
Jack S. Josey - Welch Foundation Chair in Science  
Astronomy  
Physics  
PhD, Princeton University, 1957

Rush S Wells Iv, Adjunct Professor  
Biology Instruction Office  
PhD, Harvard University, 1994

John C Wheeler, Professor  
Samuel T. and Fern Yanagisawa Regents Professorship in Astronomy  
Astronomy  
PhD, University of Colorado at Boulder, 1969

Mary F Wheeler, Professor  
Ernest and Virginia Cockrell Chair in Engineering  
Mathematics  
PhD, Rice University, 1971

Andrew B Whinston, Professor  
Hugh Roy Cullen Centennial Chair in Business Administration  
Computer Science  
PhD, Carnegie Mellon University, 1962

Marvin Whiteley  
Biology Instruction Office  
PhD, University of Iowa, 2001

Diane J Whitmer, Adjunct Assistant Professor  
Biology Instruction Office  
PhD, University of California-San Diego, 2008

Alexander L Wild, Lecturer  
Biology Instruction Office  
Biology Instruction Office  
PhD, University of California-Davis, 2005

Claus O Wilke, Professor  
Biology Instruction Office  
PhD, Ruhr-Universität Bochum, 1999

Robert F Williams, Professor Emeritus  
Mathematics  
PhD, University of Virginia (Old Code), 1954

Hannah Williamson, Assistant Professor  
Human Ecology  
PhD, University of California-Los Angeles, 2017

Richard A Willis, Professor Emeritus  
Human Ecology  
PhD, University of Oklahoma Health Sciences Center, 1979

Derek Wills, Professor Emeritus  
Astronomy  
PhD, University of Cambridge, 1966

Carlton G Willson, Professor  
Rashid Engineering Regents Chair  
Chemistry  
PhD, University of California-Berkeley, 1974

Don Winget, Professor  
Harlan J. Smith Centennial Professorship in Astronomy  
Astronomy  
PhD, University of Rochester, 1982

Emmett Witchel, Professor  
Computer Science  
PhD, Massachusetts Institute of Technology, 2004

Kristin D Wolesensky, Specialist  
Mathematics  
MS, University of Nebraska - Lincoln, 1990

William R Wolesensky, Lecturer

Mathematics  
PhD, University of Nebraska - Lincoln, 2002

William David Wood Iv, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

Matthew Worden, Lecturer  
Chemistry  
PhD, Kent State University Main Campus, 2015

Robert E Wyatt, Professor Emeritus  
Chemistry  
PhD, Johns Hopkins University, 1965

Dennis C Wylie, Lecturer  
Biology Instruction Office  
PhD, University of California-Berkeley, 2006

Blerta Xhemalce, Assistant Professor  
Molecular Biosciences  
PhD, Universite de Paris VII, Denis Diderot, 2006

Zhen Yao, Associate Professor  
Physics  
PhD, Harvard University, 1997

Maha Yaqub, Specialist  
Human Ecology  
BS, University of Texas at Austin, 2017

George A Yatskievych, Lecturer  
Biology Instruction Office  
PhD, Indiana University at Bloomington, 1990

Lauren A Yeager, Assistant Professor  
Marine Science  
Marine Science  
PhD, Florida International University, 2013

John A Yeazell, Lecturer  
Physics  
PhD, University of Rochester, 1989

Rose J Yeh, Specialist  
Chemistry  
BS, University of Texas at Austin, 2017

William D Young, Senior Lecturer  
Computer Science  
PhD, University of Texas at Austin, 1988

Cheng Yu, Lecturer  
Mathematics  
PhD, University of Pittsburgh, Pittsburgh Campus, 2013

Harold H Zakon, Professor  
Biology Instruction Office  
Neuroscience  
PhD, Cornell University, 1981

Thaleia Zariphopoulou, Professor  
Chair in Mathematics, V. F. Neuhaus Centennial Professorship in Finance  
Mathematics  
PhD, Brown University, 1989

Boris Zemelman, Assistant Professor  
Neuroscience  
PhD, Stanford University, 1997

Yan Zhang, Associate Professor  
Molecular Biosciences  
PhD, The Scripps Research Institute, 2004

Gordan Zitkovic, Professor  
Mathematics  
PhD, Columbia University in the City of New York, 2003

Janeta Zoldan, Assistant Professor  
PhD, Technion-Israel Institute of Technology, 2004

Cynthia Zoski, Research Professor (Affiliated)  
Chemistry  
PhD, Queens University, 1985

David I Zuckerman, Professor  
Professorship in Computer Sciences #1  
Computer Science  
PhD, University of California-Berkeley, 1991

## School of Nursing Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Christine W Abbyad, Associate Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2008

Gayle J Acton, Associate Professor  
PhD, University of Texas at Austin, 1993

Joy O Adeku, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2015

Larissa K Alberson, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2014

Marta Anderson, Instructor in Clinical Nursing  
MSN, University of Phoenix - Phoenix, 2005

Jessica Lee Barr, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2016

John E Bellquist, Communications Professional (Part-Time)  
PhD, University of California-Berkeley, 1980

Mary M Benham-Hutchins, Assistant Professor  
PhD, University of Arizona, 2008

Adam Blank, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2015

Eliezer Bose, Assistant Professor  
PhD, University of Pittsburgh, Pittsburgh Campus, 2015

Billye J Brown, Professor Emeritus  
EdD, Baylor University, 1975

Richard A Brown, Research Professor  
PhD, University of Oregon, 1981

Patricia A Carter, Associate Professor  
PhD, University of California-Los Angeles, 1999

Sharon L Carter, Instructor in Clinical Nursing  
MS, Ball State University, 2011

Jane Dimmitt Champion, Professor  
Lee and Joseph D. Jamail Endowed Professorship in Nursing

PhD, University of Texas Health Science Center at San Antonio, 1994

Brittany Paige Christiansen, Assistant Professor of Clinical Nursing  
DNP, University of Texas at Austin, 2017

Angela P Clark, Associate Professor Emeritus  
PhD, Texas Woman's University - Denton, 1983

Nola E Cottom, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 1977

Heather E Cuevas, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2013

Valerie Danesh, Assistant Professor  
PhD, University of Central Florida, 2015

Carol L Delville, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2008

Christine A Divin, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2015

Danielle Duquette, Instructor in Clinical Nursing  
MSN, Frontier School of Midwifery & Family Nursing, 2016

Carly E Edgar, Instructor in Clinical Nursing  
MSN, Texas Woman's University - Denton, 2006

Helen L Erickson, Professor Emeritus  
PhD, University of Michigan-Ann Arbor, 1984

Alexandra A Garcia, Associate Professor  
PhD, University of Texas at Austin, 2002

Carol D Gaskamp, Associate Professor of Clinical Nursing  
PhD, University of Kansas Main Campus, 2000

Leigh A Goldstein, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2013

Susan J Grobe, Professor Emeritus  
PhD, University of Texas at Austin, 1977

Nancy M Guillet, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2011

Tatyana Gustafson, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2007

Lorraine C Haertel, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 1985

Beverly A Hall, Professor Emeritus  
PhD, University of Colorado at Boulder, 1974

Patricia Lee Hamilton-Solum, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2011

Tracie C Harrison, Professor  
PhD, University of Texas at Austin, 2004

Sherry G Hendrickson, Associate Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2000

Jennifer Hensley, Associate Professor of Clinical Nursing  
EdD, University of Southern California, 1996

Janice F Hernandez, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2009

April Alonzo Herrera, Instructor in Clinical Nursing

MSN, University of Texas at Austin, 2012

Amy R Holland, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2007

Sharon D Horner, Professor  
Dolores V. Sands Chair in Nursing Research  
PhD, Medical College of Georgia, 1992

Shalonda E Horton, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2015

Sheryl A Innerarity, Associate Professor of Clinical Nursing  
PhD, Texas Woman's University - Denton, 1987

Karen Johnson, Assistant Professor  
PhD, University of Minnesota-Twin Cities, 2012

Glenda L Joiner-Rogers, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 1988

Stephanie M Key, Instructor in Clinical Nursing  
MA, University of Texas at Austin, 1999

Latashia V Kiel, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2014

Miyong Kim, Professor  
La Quinta Motor Inns, Inc. Centennial Professorship in Nursing  
PhD, University of Arizona, 1996

Jung Kwak, Associate Professor  
PhD, University of South Florida, 2006

Li-Chen Lin, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2009

Elizabeth Ann Loika, Associate Professor of Clinical Nursing  
DNP, Vanderbilt University, 2011

Jessica Elizabeth Meinhardt-Salazar, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2011

Martha G Meraviglia, Associate Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2001

Stephanie Morgan, Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2013

Laura E Murphy, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2009

Jennifer J Murray-Chavez, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2008

Esther Nwokocha, Instructor in Clinical Nursing  
MSN, Pennsylvania State University Park, 2016

Brenda Olmos, Instructor in Clinical Nursing  
MSN, Texas State University, 2017

Nicole Osier, Assistant Professor  
PhD, University of Pittsburgh, Pittsburgh Campus, 2016

Marnie Otto, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2017

Joy H Penticuff, Professor Emeritus  
PhD, Case Western Reserve University, 1976

Kavita Radhakrishnan, Assistant Professor

PhD, University of Massachusetts, 2011

Donna L Rew, Professor  
Denton and Louise Cooley and Family Centennial Professorship in  
Nursing  
EdD, Northern Illinois University, 1979

Anna Rivera, Instructor in Clinical Nursing  
MSN, University of Phoenix - Phoenix, 2006

Mary E Roche, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2012

Donna G Rolin, Assistant Professor of Clinical Nursing  
PhD, New York University, 2012

Mary Kathryn Sanders, Assistant Professor of Clinical Nursing  
DNP, Indiana Wesleyan University, 2015

Dolores Sands, Professor Emeritus  
PhD, Arizona State University Main, 1979

Rosa N Schnyer, Clinical Assistant Professor  
DAOM, Oregon College of Oriental Medicine, 2008

Amber Nicole Sherman, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2016

Anmarie Staats, Instructor in Clinical Nursing  
MSN, Mercy College, 2006

Bobbie S Sterling, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2001

Alexa M Stuijbergen, Professor  
Laura Lee Blanton Chair in Nursing, James R. Dougherty, Jr. Centennial  
Professorship in Nursing  
PhD, University of Texas at Austin, 1988

Lisa L Sumlin, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2014

Danica Fulbright Sumpter, Assistant Professor of Clinical Nursing  
PhD, University of Pennsylvania, 2009

Laura M Swarts, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 2012

Jean C Taxis, Associate Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2003

Gayle M Timmerman, Associate Professor  
PhD, Ohio State U Main Campus, 1994

Ana T Todd, Assistant Professor of Clinical Nursing  
PhD, University of Texas at Austin, 2013

Mary Tuttle  
DNP, Fairfield University, 2013

Deborah L Volker, Associate Professor Emeritus  
PhD, University of Texas at Austin, 1999

Mary K Wakefield, Visiting Professor  
PhD, University of Texas at Austin, 1985

Lorraine O Walker, Professor  
Luci B. Johnson Centennial Professorship in Nursing  
EdD, Indiana University at Bloomington, 1971

Veronica Garcia Walker, Assistant Professor of Clinical Nursing

PhD, University of Texas at Austin, 2014

Charlotte K Wilson, Instructor in Clinical Nursing  
MSN, Texas Woman's University - Houston, 1988

Darlene M Wilson, Instructor in Clinical Nursing  
MSN, University of Texas at Austin, 1998

Bo Xie, Associate Professor  
PhD, Rensselaer Polytechnic Institute, 2006

Linda H Yoder, Associate Professor  
PhD, University of Pennsylvania, 1992

Cara Young, Assistant Professor  
PhD, Vanderbilt University, 2010

Julie A Zuniga, Assistant Professor  
PhD, University of Texas at Austin, 2013

## College of Pharmacy Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Daniel Acosta Jr, Adjunct Professor  
PhD, University of Kansas Main Campus, 1974

Wyanza R Acosta, Clinical Professor  
MS, University of Texas at Austin, 1998

Selina M Aguilar, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2008

Lydia Aguilera, Adjunct Assistant Professor  
PharmD, University of Florida, 2008

Jon T Albrecht, Clinical Assistant Professor  
BS, Auburn University, 1982

Linda S Albrecht, Clinical Assistant Professor  
MBA, University of Texas at Arlington, 1990

Angela A Allerman, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1991

Ogechika K Alozie, Adjunct Assistant Professor  
MS, University of Minnesota-Twin Cities, 2010

Analiza Amaya-Diaz, Clinical Assistant Professor  
PharmD, Texas Southern University, 1994

Sharmin Amjad, Instructor in Clinical Pharmacy  
PharmD, Long Is U Brooklyn C Phar, 2016

Sweta Andrews, Adjunct Assistant Professor  
PharmD, The University of Findlay, 2014

Gordon Ang, Instructor in Clinical Pharmacy  
PharmD, Texas A&M University-Kingsville, 2017

Vicente Aparicio, Adjoint Assistant Professor  
PharmD, University of Texas at Austin, 2016

Grant W Armstrong, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2007

Jasmin Badwal, Instructor in Clinical Pharmacy  
PharmD, Wayne State University, 2017

Alexis L Balko, Clinical Instructor

PharmD, University of Texas at Austin, 2006

Jamie C Barner, Professor  
Clifford L. Klinck, Jr. Centennial Professorship in Pharmacy Administration  
PhD, Purdue University Main Campus, 1998

James N Barnes, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2005

Colleen A Barthol, Adjunct Assistant Professor  
PharmD, University of Missouri - Kansas City, 1998

Maryam Bayat, Clinical Assistant Professor  
PharmD, Texas Southern University, 1994

Oralia V Bazaldua, Clinical Assistant Professor  
PharmD, University of Oklahoma Health Sciences Center, 1996

William Benefield Jr, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1991

Jacob Ferguson Beyer, Instructor in Clinical Pharmacy  
PharmD, Saint Louis College of Pharmacy, 2016

Heather Payton Blacksmith, Adjunct Assistant Professor  
PharmD, Saint Louis College of Pharmacy, 2010

Roland A Bodmeier, Adjunct Associate Professor  
PhD, University of Texas at Austin, 1986

Douglas J Borys, Clinical Assistant Professor  
PharmD, Shenandoah University, 2004

Phillip D Bowman, Adjunct Assistant Professor  
PhD, University of California-Santa Cruz, 1975

Rebecca L Brady, Clinical Instructor  
PharmD, University of Texas at Austin, 2006

Steven Jeffrey Braun, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2016

Fred S Brinkley, Lecturer  
MBA, University of Texas at Austin, 1983

Carolyn M Brown, Professor  
PhD, University of Florida, 1994

Barry A Browne, Clinical Associate Professor  
PharmD, University of Texas at Austin, 1987

Aaron R Buchan, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2001

Donna M Burkett, Clinical Associate Professor  
MS, University of Texas at Austin, 2000

Richard M Cadle  
PharmD, University of the Pacific, 1983

Angela Hughes Campbell, Clinical Instructor  
PharmD, University of Texas at Austin, 2005

Todd W Canada, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1993

Amy Carr, Instructor in Clinical Pharmacy  
PharmD, University of Florida, 2016

Jongwha Chang, Adjunct Assistant Professor  
PhD, University of Michigan-Ann Arbor, 2012

Ashley N Chasse, Adjunct Assistant Professor  
PharmD, University of Oklahoma Health Sciences Center, 2013

Lydia D Chen  
PharmD, University of California-San Francisco, 2013

Pinhui Chen, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Tina Chen, Instructor in Clinical Pharmacy  
PharmD, Midwestern University (Illinois), 2017

Elaine Chiquette, Clinical Assistant Professor  
PharmD, University of Texas at San Antonio, 1994

Emily Janel Christenberry, Adjunct Assistant Professor  
PharmD, Butler University, 2014

Charlene A Church, Clinical Instructor  
PharmD, University of Texas at Austin, 1996

Andrea L Coffee, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1994

Claudia S Colombo, Adjunct Assistant Professor  
PharmD, Saint Louis College of Pharmacy, 2002

Claudio J Conti, Adjunct Professor  
PhD, University of Buenos Aires, 1983

Toby L Cooper, Clinical Assistant Professor  
PharmD, Texas Tech University, 2001

Vicki S Crane, Clinical Assistant Professor  
MBA, University of Dallas, 1989

David P Crews, Professor  
PhD, Rutgers the State University of New Jersey Newark Campus, 1973

M Lynn Crismon, Professor  
James T. Doluisio Regents Chair in Pharmacy, Behrens Inc. Centennial Professorship in Pharmacy, The Hoechst-Roussel Centennial Endowed Professorship in Pharmacy  
PharmD, University of Texas at Austin, 1979

Barrett R Crowther, Adjunct Assistant Professor  
PharmD, University of Wisconsin-Madison, 2009

Maria A Croyle, Professor  
Glaxo Wellcome Inc. Endowed Professorship in Pharmacy  
PhD, University of Michigan-Ann Arbor, 1997

Bianca Cruz, Adjoint Assistant Professor  
PharmD, University of Texas at Austin, 2009

Zhengrong Cui, Professor  
PhD, University of Kentucky, 2002

Nicole L Cupples, Adjunct Assistant Professor  
PharmD, The University of Findlay, 2010

Molly F Curran, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2014

Kevin N Dalby, Professor  
Johnson & Johnson Centennial Professorship in Pharmacy  
PhD, University of Cambridge, 1992

Divya M Daniel, Adjunct Assistant Professor

PharmD, University of Tennessee Health Science Center, 2014

Kori Daniels, Instructor in Clinical Pharmacy  
PharmD, University of Mississippi, 2017

Renee K Danysh, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2006

James A Dasher, Clinical Assistant Professor  
PharmD, University of Arkansas for Medical Sciences, 1996

Joseph F Dasta, Adjunct Professor  
MS, Ohio State U Main Campus, 1976

Dewayne A Davidson, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2012

Paige Davies, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Patrick J Davis, Professor  
Eckerd Centennial Professorship in Pharmacy  
PhD, University of Iowa, 1976

Jennifer Defilippi Faulkner, Adjunct Assistant Professor  
PharmD, Rutgers the State University of New Jersey New Brunswick  
Campus, 1997

Elina Delgado, Instructor in Clinical Pharmacy  
PharmD, University of the Incarnate Word, 2016

John Digiovanni, Professor  
Coulter R. Sublett Chair in Pharmacy  
PhD, University of Washington - Seattle, 1978

Monica Do, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Heather H Dobie, Adjunct Assistant Professor  
PharmD, University of North Carolina at Chapel Hill, 1997

James T Doluisio, Professor Emeritus  
PhD, Purdue University Main Campus, 1962

Juan M Dominguez, Associate Professor  
PhD, State University of New York at Buffalo, 2002

Nicole Dominguez, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Erin Eileen Donovan, Associate Professor  
PhD, University of Illinois at Urbana-Champaign, 2008

Eric C Dougherty, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2004

Staci Lynn Dufrene, Adjunct Assistant Professor  
PharmD, Albany College of Pharmacy of Union University, 2007

Bryson M Duhon, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2011

Christine L Duvauchelle, Associate Professor  
PhD, University of California-Santa Barbara, 1991

Kathryn E Dzintars, Adjunct Assistant Professor  
PharmD, University of Pittsburgh, Pittsburgh Campus, 2003

Kelly L Echevarria, Clinical Assistant Professor  
PharmD, Creighton University, 1997

Hannah Ehrenfeld, Instructor in Clinical Pharmacy  
PharmD, Texas A&M University-Kingsville, 2017

Carlton K Erickson, Professor  
Pfizer Centennial Professorship in Pharmacy  
PhD, Purdue University Main Campus, 1965

Richard R Espinosa, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2001

Martha Frances Evans, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Kirk E Evoy, Clinical Assistant Professor  
PharmD, Purdue University Main Campus, 2013

Lisa E Farnett, Clinical Assistant Professor  
PharmD, University of Texas Health Science Center at San Antonio, 1988

Lane Burton Farrell, Adjunct Assistant Professor  
PharmD, University of Kansas Main Campus, 2014

Walter L Fast, Professor  
PhD, Northwestern University, 1998

Silvia Ferrati  
PhD, University of Texas Health Science Center at Houston, 2012

Kristin R Fiebelkorn, Adjunct Associate Professor  
MD, Johns Hopkins University, 1996

Jerry Fineg, Professor Emeritus  
DVM, Texas A & M University, 1953

Susan M Fischer, Adjunct Professor  
PhD, University of Wyoming, 1974

Laura K Fonken, Assistant Professor  
PhD, The Ohio State University Main Campus, 2013

Kentya C Ford, Assistant Professor  
DPH, University of Texas Health Science Center at Houston, 2005

Cynthia A Foslien, Clinical Assistant Professor  
PharmD, University of Nebraska Medical Center, 1985

Ana C Franco, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2007

Alan Frazer, Adjunct Professor  
PhD, Peninsula College, 1969

Shaneka Frazer, Instructor in Clinical Pharmacy  
PharmD, Temple University, 2017

Christopher R Frei, Associate Professor  
PharmD, University of Texas at Austin, 2001

Sarah Fry, Instructor in Clinical Pharmacy  
PharmD, Creighton University, 2017

Conrado D Gamboa, Adjunct Assistant Professor  
BS, University of Texas at Austin, 1985

Anita A Garcia, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2002

David B Garcia, Adjunct Professor  
PhD, University of Texas at Austin, 1977

Lindsey Garner, Instructor in Clinical Pharmacy

PharmD, Drake University, 2016

Aida A Garza, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2007

Anyssa S Garza, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2011

Gavino A Garza, Clinical Instructor  
BS, University of Houston, 1981

Javier R Garza, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2012

Monica Alejandra Garza, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Michael J Gass, Adjunct Assistant Professor  
PharmD, Midwestern University (Arizona), 2007

Debadityuti Ghosh, Assistant Professor  
PhD, Rice University, 2006

Diane B Ginsburg, Clinical Professor  
MS, University of Houston, 1990

Nishi S Goel, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

Rueben A Gonzales, Professor  
Jacques P. Servier Regents Professorship in Pharmacy  
PhD, University of Texas at Austin, 1983

Carrie E Gonzalez, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

F Gonzalez-Lima, Professor  
George I. Sanchez Centennial Professorship in Liberal Arts  
PhD, University of Pr Medical Sciences, 1980

Andrea C Gore, Professor  
Mildred Hajek Vacek and John Roman Vacek Chair in Pharmacology, in  
Honor of Professor C. C. Albers  
PhD, University of Wisconsin-Madison, 1990

Stephen J Gore, Adjunct Assistant Professor  
PharmD, University of Oklahoma Norman Campus, 1996

Roberta L Grant, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 1995

Belinda K Green, Adjunct Assistant Professor  
BS, University of Texas at Austin, 1990

Catlin Lee Grisham-Takac, Adjunct Assistant Professor  
PharmD, Texas Tech University, 2015

Karolina M Grzesiak, Instructor in Clinical Pharmacy  
PharmD, Purdue University Main Campus, 2017

Veronica I Guerra, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2011

Thomas D Guidry, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1982

Nancy M Guillet  
MSN, University of Texas at Austin, 2011

Tyler Harris Gums, Assistant Professor

PharmD, University of Florida, 2012

Cynthia A Gutierrez, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2001

Catherine S Hall, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1999

Reed C Hall, Adjunct Assistant Professor  
PharmD, Midwestern University (Arizona), 2007

Sarah Hallowell, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Elizabeth Oates Hand  
PharmD, University of Texas at Austin, 2010

Sarah R Hardt, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2012

Kristi L Hargrove, Instructor in Clinical Pharmacy  
PharmD, University of Washington - Seattle, 2017

R A Harris, Professor  
M. June and J. Virgil Waggoner Chair in Molecular Biology  
PhD, University of North Carolina at Chapel Hill, 1973

Sarah Hayes, Instructor in Clinical Pharmacy  
PharmD, University of Missouri - Kansas City, 2017

Matthew Herpin, Lecturer  
PhD, University of Texas at Austin, 2015

Lydia A Herrera, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2000

Jon D Herrington, Adjunct Associate Professor  
PharmD, Saint Louis College of Pharmacy, 1992

Russell A Higgins, Adjunct Assistant Professor  
MD, University of New Mexico Main Campus, 2002

Lucas Grant Hill, Clinical Assistant Professor  
PharmD, University of Missouri - Kansas City, 2013

April J Hinds, Adjunct Assistant Professor  
PharmD, University of Arkansas for Medical Sciences, 2013

Tuyen K Ho, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2002

Prudence O Hofmann, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

Eugene P Holder, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 1994

Collin A Hovinga, Clinical Associate Professor  
PharmD, Creighton University, 1997

John Huang, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2003

Darrel W Hughes, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2006

Barry L Hull, Clinical Assistant Professor  
PharmD, University of Southern California, 1983

Pamela Ijeoma, Instructor in Clinical Pharmacy  
PharmD, Florida Agricultural and Mechanical University, 2016

Susana James, Adjunct Assistant Professor  
MFA, University of Texas at El Paso, 1998

Theresa J Corona, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2001

David G Johnson, Adjunct Associate Professor  
PhD, University of Texas Southwestern Medical Center at Dallas, 1991

Melissa A Johnson, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 1997

Vivian B Johnson, Clinical Assistant Professor  
PhD, Mercer U Sthn School Phar, 1983

Jason R Jokerst, Adjunct Assistant Professor  
PharmD, University of Nebraska Medical Center, 2005

David J Jones, Adjunct Professor  
PharmD, University of Texas Health Science Center at San Antonio, 1974

Sharon A Jung, Clinical Assistant Professor  
PharmD, University of Texas Health Science Center at San Antonio, 1995

James A Karboski, Clinical Professor  
PharmD, University of Texas at San Antonio, 1988

Dean L Kellogg, Adjunct Professor  
PhD, University of Texas Health Science Center at San Antonio, 1989

Priyanka Kelshikar  
PharmD, University of the Sciences in Philadelphia, 2016

Monte A Kenaston, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 2010

Sean M Kerwin, Adjunct Associate Professor  
PhD, University of California-Berkeley, 1989

Dawit Kidane-Mulat, Assistant Professor  
PhD, Albert Ludwig University Freiburg im Breisgau, 2005

Marcia L Kiger, Clinical Instructor  
BS, University of Texas at Austin, 1982

Elisabeth Lapp Kincaide, Instructor in Clinical Pharmacy  
PharmD, University of the Incarnate Word, 2016

Kristina J Klein-Bradham, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2004

Jodi M Klocek, Clinical Assistant Professor  
PharmD, University of Mississippi, 1996

Jim M Koeller, Professor  
MS, University of Wisconsin-Madison, 1980

John G Kuhn, Professor Emeritus  
PharmD, University of Texas Health Science Center at San Antonio, 1977

Sydney Kutter, Instructor in Clinical Pharmacy  
PharmD, Texas Tech University Health Sciences Center, 2017

Phillip H Lai, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2007

Yui-Wing F Lam, Clinical Associate Professor  
PharmD, University of Minnesota-Twin Cities, 1984

Kenneth A Lawson, Professor  
Smithkline Centennial Professorship in Pharmacy  
PhD, University of Texas at Austin, 1992

William Lawson, Professor  
MD, University of Chicago, 1978

Grace Choi Lee, Assistant Professor  
PhD, University of Texas at Austin, 2016

Leon Lee III, Clinical Assistant Professor  
PharmD, University of Kentucky, 1996

Seongmin Lee, Associate Professor  
PhD, Purdue University Main Campus, 2004

Steven W Leslie, Professor  
James E. Bauerle Centennial Professorship in Drug Dynamics  
PhD, Purdue University Main Campus, 1974

Mitchell R Lestico, Clinical Assistant Professor  
PharmD, University of Wisconsin-Madison, 1992

Melissa R Lewis, Adjunct Assistant Professor  
PharmD, University of New Mexico Main Campus, 2007

Sara Jean Linedecker, Adjunct Assistant Professor  
PharmD, Purdue University Main Campus, 2013

Justina Lipscomb, Instructor in Clinical Pharmacy  
PharmD, Roseman University of Health Sciences, 2012

John H Littlefield, Clinical Assistant Professor  
PhD, University of Texas at Austin, 1975

Louis C Littlefield, Professor Emeritus  
PharmD, University of Southern California, 1967

Hung-Wen Liu, Professor  
George H. Hitchings Regents Chair in Drug Design  
PhD, Columbia University in the City of New York, 1981

Debra A Lopez, Adjunct Professor  
PharmD, University of Texas at Austin, 1999

Amanda M Loya, Clinical Associate Professor  
PharmD, University of Texas at Austin, 2003

Charlotte A Luebbert, Clinical Assistant Professor  
PharmD, Creighton University, 1995

Liliana Lunares, Adjunct Assistant Professor  
PharmD, Roseman University of Health Sciences, 2015

Cindy Luu, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

Dao Cam Ly, Instructor in Clinical Pharmacy  
PharmD, University of Houston, 2017

Michael C Macleod, Adjunct Professor  
PhD, University of Oregon, 1974

Michela Marinelli, Associate Professor  
PhD, Université Victor Segalen, Bordeaux II, 1997

Emory S Martin III, Clinical Assistant Professor  
PharmD, University of California-San Francisco, 1984

Brian Masek, Adjunct Professor  
PhD, California Institute of Technology, 1987

Pamela R Maxwell, Clinical Assistant Professor

PharmD, University of Texas at Austin, 1994

Theresa A Mays Hutchings, Clinical Assistant Professor  
PharmD, University of Oklahoma Health Sciences Center, 1994

James W McGinity, Professor Emeritus  
PhD, University of Iowa, 1972

Megan A McKee, Adjunct Assistant Professor  
PharmD, University of Arizona, 2008

Nicole L McMaster, Clinical Assistant Professor  
PharmD, University of Missouri - Kansas City, 2002

Laura Meadow, Instructor in Clinical Pharmacy  
PharmD, University of Iowa, 2017

Mina Mehvar, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2010

Kelsey Melloy, Instructor in Clinical Pharmacy  
PharmD, University of North Carolina at Chapel Hill, 2017

George Melnik, Clinical Associate Professor  
PharmD, University of the Sciences in Philadelphia, 1986

April A Messett, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2007

Robert Messing, Professor  
MD, Stanford University, 1979

Lisa M Mican, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2000

S J Mihic, Associate Professor  
PhD, University of Toronto, 1992

Arika M Mike, Instructor in Clinical Pharmacy  
PharmD, University of New Mexico Main Campus, 2016

Edward M Mills, Associate Professor  
PhD, Purdue University Main Campus, 1997

Harsha Mistry, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2004

Leticia R Moczygemba, Associate Professor  
PhD, University of Texas at Austin, 2008

Deirdre M Monroe, Clinical Assistant Professor  
PhD, University of Texas at Austin, 2003

Eugene Moore, Clinical Assistant Professor  
PharmD, Southeastern University, 1992

Tera D Moore, Clinical Assistant Professor  
PharmD, University of New Mexico Main Campus, 2003

Troy A Moore, Adjunct Assistant Professor  
PharmD, University of New Mexico Main Campus, 2003

Rebecca D Moote, Clinical Associate Professor  
PharmD, University of Texas at Austin, 2007

Vanessa Morales, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2004

Clarissa Moreno, Adjunct Assistant Professor  
PharmD, Texas Tech University Health Sciences Center, 2003

Richard A Morrisett, Professor  
PhD, University of Alabama at Birmingham, 1986

Michael Tanner Moser, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2016

Somshuvra Mukhopadhyay, Assistant Professor  
PhD, New York Medical College, 2008

Jacquelyn Padilla Navarrete, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2009

Jordan D Nelson, Adjunct Assistant Professor  
PharmD, Drake University, 2009

Jenny S Ngo, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

Thanh hao T Ngo, Clinical Assistant Professor  
PharmD, University of Oklahoma Health Sciences Center, 2003

An Nguyen, Instructor in Clinical Pharmacy  
PharmD, University of Maryland Baltimore, 2017

Michelle V Nguyen, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2007

Suzanne Novak, Clinical Assistant Professor  
PhD, University of Texas at Austin, 2005

Dannielle C O'Donnell, Clinical Assistant Professor  
PharmD, Rutgers the State University of New Jersey Camden Campus, 1993

John T O'Neill, Adjunct Assistant Professor  
Diploma (High School), , 1951

Lauren Olsen, Instructor in Clinical Pharmacy  
PharmD, University of North Texas Health Science Center at Fort Worth, 2017

Natalie Osagie, Adjunct Assistant Professor  
PharmD, Texas Southern University, 2010

Ian W Pace, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 1999

Margie E Padilla, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2005

Neil C Pan, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2005

Deepali S Parikh, Adjunct Assistant Professor  
PharmD, University of Pittsburgh, Pittsburgh Campus, 1999

Sarin Patel, Instructor in Clinical Pharmacy  
PharmD, University of Houston, 2017

Liza J Paul, Adjunct Assistant Professor  
PharmD, University of Florida, 2004

Diana Paz, Adjunct Assistant Professor  
PhD, University of Houston, 2009

Robert Pearlman, Professor Emeritus  
PhD, University of Michigan-Ann Arbor, 1975

Amanda Marie Pena, Adjoint Assistant Professor  
PharmD, University of Texas at Austin, 2011

Jodie L Pepin, Clinical Assistant Professor

PharmD, University of Texas at Austin, 2001

Nicholas A Peppas, Professor  
Cockrell Family Regents Chair in Engineering #6  
ScD, Massachusetts Institute of Technology, 1973

Isaac Perales, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Maria D Person, Adjunct Associate Professor  
PhD, University of Chicago, 1991

Jay I Peters, Adjunct Professor  
MD, Baylor College of Medicine, 1977

Patrick S Pevoto, Clinical Assistant Professor  
MD, University of Texas Medical Branch, 1983

Tracie Phillips, Adjunct Assistant Professor  
PhD, Texas A & M University, 2006

Cameron Pickard, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Denise Pinal, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2006

Robert N Pinckard, Adjunct Professor  
PhD, University of Edinburgh, 1967

Igor Ponomarev, Research Assistant Professor (Affiliated)  
PhD, Oregon Health and Science University, 2002

Nathan D Pope, Clinical Associate Professor  
PharmD, Rutgers the State University of New Jersey New Brunswick  
Campus, 2002

Roger P Potyk, Clinical Assistant Professor  
PhD, University of Texas at Austin, 1989

Gabriel J Quintanilla, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2002

Isidro Ramirez, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2003

Luis Ramirez, Instructor in Clinical Pharmacy  
PharmD, Texas Tech University Health Sciences Center, 2017

Karen L Rascati, Professor  
Stewart Turley/Eckerd Corporation Centennial Endowed Professorship in  
Pharmacy  
PhD, University of Florida, 1986

Kristin C Reed, Adjunct Assistant Professor  
PharmD, Auburn University, 2007

Ivan Alexander Reveles, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2010

Kelly Renee Reveles, Assistant Professor  
PharmD, University of Texas at Austin, 2010

Ann L Richards, Clinical Assistant Professor  
PharmD, University of Nebraska Medical Center, 1981

John H Richburg, Professor  
Gustavus and Louise Pfeiffer Professorship in Toxicology  
PhD, Rutgers the State University of New Jersey Camden Campus, 1993

Jennifer L Ridings-Myhra, Clinical Associate Professor

MEd, Western Governors University Texas, 2016

Jose O Rivera, Clinical Professor  
PharmD, University of Kentucky, 1979

Rochelle Mendiola Roberts, Lecturer  
PhD, University of Texas at Austin, 2008

Mauricio L Rodriguez, Adjunct Assistant Professor  
PharmD, Texas Southern University, 2003

Ralph Rodriguez, Adjunct Assistant Professor  
MS, University of Texas at San Antonio, 1988

Jordan Rohder, Instructor in Clinical Pharmacy  
PharmD, Midwestern University (Illinois), 2015

Rebecca A Rottman, Clinical Assistant Professor  
PharmD, University of Southern California, 2003

John W Rudder, Clinical Instructor  
BS, University of Texas at Austin, 1983

Veronica C Rudder, Clinical Instructor  
BD, University of Texas at Austin, 1983

Andres D Ruiz, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

Sarah Rumbellow, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Augustus J Rush, Adjunct Professor  
MD, Columbia University in the City of New York, 1968

Sharon K Rush, Clinical Associate Professor  
BS, University of Texas at Austin, 1986

Laurajo Ryan, Clinical Associate Professor  
PharmD, University of Texas at Austin, 2000

Kyllie S Ryan-Hummel, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2016

Paula Rychlik, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2005

Achinto Saha, Research Assistant Professor (Affiliated)  
PhD, Tokushima Bunri University, 2010

Stephen R Saklad, Clinical Professor  
PharmD, University of Southern California, 1978

Barbara E Salazar, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2013

Amista L Salcido, Clinical Assistant Professor  
PharmD, University of Arizona, 1998

Adrian Sandoval Jr, Adjoint Assistant Professor  
PharmD, Texas A & M University - Kingsville, 2012

Rahul M Sasane, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 1998

Jennifer K Seltzer, Clinical Associate Professor  
PharmD, University of Texas Health Science Center at San Antonio, 1984

Thomas C Shank, Clinical Assistant Professor  
PharmD, University of Tennessee Health Science Center, 1983

William P Sharp, Adjunct Assistant Professor

BS, University of Texas at Austin, 1976

Marvin D Shepherd, Professor Emeritus  
PhD, Purdue University Main Campus, 1980

Jennifer Hyun Jung Shin, Instructor in Clinical Pharmacy  
PharmD, Appalachian College of Pharmacy, 2016

Ashir Shumunov, Instructor in Clinical Pharmacy  
PharmD, St John's University, 2016

Jeri J Sias, Clinical Associate Professor  
PharmD, University of Kansas Main Campus, 1998

Leslie R Simien, Adjunct Assistant Professor  
PharmD, University of California-San Francisco, 2011

Julia Anne Sivinski, Clinical Instructor  
PhD, University of Texas at Austin, 2002

Stephen Slubar, Instructor in Clinical Pharmacy  
PharmD, Texas A & M University, 2017

Lucas Smedley, Instructor in Clinical Pharmacy  
PharmD, Purdue University Main Campus, 2017

Ashley G Smith, Adjunct Assistant Professor  
PharmD, University of Louisiana at Monroe, 2008

Josiah P Smith, Adjunct Assistant Professor  
PharmD, Butler University, 2014

Hugh D Smyth, Associate Professor  
PhD, University of Otago, 2000

Sara L Solis, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2011

Lisa H Song, Adjunct Assistant Professor  
PharmD, University of North Carolina at Chapel Hill, 2011

Maaya Srinivasa, Adjunct Assistant Professor  
PharmD, Texas A & M University - Kingsville, 2011

Mitzi A Stansberry, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2010

Casey Stauffer, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Salomon A Stavchansky, Professor  
Alcon Centennial Professorship in Pharmacy  
PhD, University of Kentucky, 1974

Daniel J Still, Clinical Assistant Professor  
PharmD, Creighton University, 1993

Kristina Sucic, Adjunct Assistant Professor  
PharmD, University of Pittsburgh, Pittsburgh Campus, 2012

Kimberly K Summers, Clinical Assistant Professor  
PharmD, University of Missouri - Kansas City, 1995

Patricia A Tabor, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1983

Sharla K Tajchman, Adjunct Assistant Professor  
PharmD, Rutgers the State University of New Jersey Camden Campus,  
2007

Robert L Talbert Jr, Professor Emeritus

PharmD, University of Kentucky, 1974

Dean G Tang, Adjunct Associate Professor  
PhD, Wayne State University, 1994

Jodi L Taraba, Adjunct Assistant Professor  
PharmD, Drake University, 2001

Yasar O Tasnif, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2002

Eslie Tebedge, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

Holli L Temple, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1999

Andrew P Ten Eick, Adjunct Associate Professor  
PharmD, University of Iowa, 1996

Sara Thompson, Instructor in Clinical Pharmacy  
PharmD, Belmont University, 2016

Kristi A Traugott, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2008

Shana K Trice, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1997

Curtis L Triplitt, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1995

Rebecca G Twombly, Clinical Assistant Professor  
PharmD, University of North Carolina at Chapel Hill, 2001

Kenneth J Utz, Adjunct Assistant Professor  
PharmD, University of Oklahoma Health Sciences Center, 2006

Carla L Van Den Berg, Associate Professor  
PharmD, University of Texas at Austin, 1991

Karen Marie Vasquez, Professor  
James T. Doluisio Regents Professorship in Pharmacy  
PhD, Baylor College of Medicine, 1996

Lindsay Sara Vasquez, Adjunct Assistant Professor  
PharmD, University of the Incarnate Word, 2012

Susie A Vasquez, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 1997

John F Villanacci, Adjunct Associate Professor  
PhD, University of Michigan-Ann Arbor, 1983

Leticia R Villela, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2003

Kristie A Vinklerek, Clinical Assistant Professor  
PharmD, University of Texas at Austin, 2001

Samantha M Vogel, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2016

Landry Volz, Instructor in Clinical Pharmacy  
PharmD, University of Oklahoma Health Sciences Center, 2017

Cheryl L Walker, Adjunct Professor  
PhD, Tex Hlth Sci C Dallas, U, 1984

Janet C Walkow, Clinical Professor  
PhD, University of Texas at Austin, 1982

Guliang Wang, Research Assistant Professor (Affiliated)  
PhD, Zhejiang University, 2002

Alan B Watts, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 2009

Christian P Whitman, Professor  
Romeo T. Bachand, Jr. Regents Professorship in Pharmacy  
PhD, University of California-San Francisco, 1984

Nathan P Wiederhold, Adjoint Associate Professor  
PharmD, University of Texas at Austin, 2000

Richard E Wilcox, Adjunct/Clinical Affiliate  
PhD, Southern Illinois University Carbondale, 1976

Raeschell Williams, Instructor in Clinical Pharmacy  
PharmD, University of Kentucky, 2017

Robert O Williams III, Professor  
Johnson & Johnson Centennial Chair in Pharmacy  
PhD, University of Texas at Austin, 1986

James P Wilson, Associate Professor  
PhD, Purdue University Main Campus, 1986

Holly N Winkler, Clinical Instructor  
PharmD, University of Texas at Austin, 2006

Stewart R Wirebaugh, Clinical Assistant Professor  
PharmD, University of Illinois at Urbana-Champaign, 1987

Mark Wong, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2004

Billy W Woodward, Clinical Associate Professor  
BS, University of Texas at Austin, 1963

Consuelo M Worley, Clinical Assistant Professor  
MS, University of Texas at Austin, 2002

Chanin C Wright, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2001

Robert Wright, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 1996

Erin Kristi Yeung, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2016

Veronica S Young, Clinical Associate Professor  
PharmD, Creighton University, 1993

Stephanie Rose Younts, Adjunct Assistant Professor  
PharmD, University of Texas at Austin, 2005

Edward M Zastawny, Adjunct Assistant Professor  
PharmD, University of Texas Health Science Center at San Antonio, 1991

Daria Zavgorodnyaya, Instructor in Clinical Pharmacy  
PharmD, Long Island University Brooklyn Campus, 2017

Feng Zhang, Assistant Professor  
PhD, University of Texas at Austin, 1999

Lichao Zhao, Instructor in Clinical Pharmacy  
PharmD, University of the Incarnate Word, 2016

Kajia Zheng, Instructor in Clinical Pharmacy  
PharmD, University of Texas at Austin, 2017

## Lyndon B. Johnson School of Public Affairs Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Gordon B Abner, Postdoctoral Fellow  
PhD, Indiana University at Bloomington, 2017

Abigail Rosemary Ann Aiken, Assistant Professor  
PhD, University of Texas at Austin, 2014

Jacqueline L Angel, Professor  
PhD, Rutgers the State University of New Jersey New Brunswick Campus,  
1989

Kevin M Bacon, Adjunct Professor  
MS, London School of Economics and Political Science, 1978

Fred C Beach, Lecturer  
PhD, University of Texas at Austin, 2010

Richard P Bixler, Research Fellow  
PhD, Colorado State University, 2014

Terrell Blodgett, Professor Emeritus  
MS, Syracuse University Main Campus, 1947

Leigh B Boske, Professor Emeritus  
PhD, University of Pittsburgh, Pittsburgh Campus, 1973

Karl B Brooks, Clinical Professor  
PhD, University of Kansas Main Campus, 2000

Joshua W Busby, Associate Professor  
PhD, Georgetown University, 2004

Victoria Maria Defrancesco, Lecturer  
PhD, Duke University, 2007

Michele Y Deitch, Senior Lecturer  
JD, Harvard University, 1986

Edwin Dorn, Professor  
PhD, Yale University, 1978

David J Eaton, Professor  
Bess Harris Jones Centennial Professorship in Natural Resource Policy  
Studies  
PhD, Johns Hopkins University, 1977

Iris Ma Eisenman, Lecturer  
PhD, University of California-Los Angeles, 2016

Joshua David Eisenman, Assistant Professor  
MA, Johns Hopkins University, 2002

Brenda W Eivens, Adjunct Assistant Professor  
MPA, Texas State University-San Marcos, 1995

Gregory W Engle, Lecturer  
MPAdmin, University of Colorado at Colorado Springs, 1979

Angela M Evans, Clinical Professor  
MA, University of Wisconsin-Madison, 1971

Raissa Fabregas, Assistant Professor  
MS, University of Oxford, 2009

Michael G Findley, Professor

PhD, University of Illinois at Urbana-Champaign, 2007

David J Firestein, Clinical Professor  
MPAff, University of Texas at Austin, 1992

Kenneth Flamm, Professor  
Dean Rusk Chair in the Lyndon Baines Johnson School of Public Affairs  
PhD, Massachusetts Institute of Technology, 1979

Lynda E Frost  
PhD, University of Iowa, 1996

James K Galbraith, Professor  
Lloyd M. Bentsen, Jr. Chair in Government/Business Relations  
PhD, Yale University, 1981

Charlee Garden, Clinical Associate Professor  
MS, Stanford University, 1988

Kenneth L Gladish, Adjunct Professor  
PhD, University of Virginia, 1985

Michael H Granof, Professor  
Ernst & Young Distinguished Centennial Professorship of Accounting  
PhD, University of Michigan-Ann Arbor, 1972

Sherri R Greenberg, Clinical Professor  
MSc, University of London, 1981

Dagmar S Hamilton, Professor Emeritus  
JD, American University in Cairo, 1961

Carolyn Heinrich, Research Professor  
PhD, University of Chicago, 1995

Michael Hole, Research Assistant Professor  
MD, Stanford University, 2014

Robert L Hutchings, Professor  
Walt and Elspeth Rostow Chair in National Security  
PhD, University of Virginia, 1979

Rana S Inboden, Other University Affiliate  
MA, Stanford University, 2000

William Inboden, Associate Professor  
PhD, Yale University, 2003

Bobby R Inman, Professor  
Lyndon B. Johnson Centennial Chair in National Policy  
BA, University of Texas at Austin, 1950

Bryan D Jones, Professor  
J. J. "Jake" Pickle Regents Chair in Congressional Studies  
PhD, University of Texas at Austin, 1970

Peniel E Joseph, Professor  
Barbara Jordan Chair in Ethics and Political Values  
PhD, Temple University, 2000

Donald Kettl, Professor  
PhD, Yale University, 1978

Meeta Kothare  
PhD, University of Rochester, 1992

Alan J Kuperman, Associate Professor  
PhD, Massachusetts Institute of Technology, 2002

Erin Lentz, Assistant Professor

MS, Cornell University, 2005

Stephanie Leutert, Research Fellow  
MA, Yale University, 2016

Michael E Lind, Visiting Professor  
JD, University of Texas at Austin, 1988

Leigh L Linden, Associate Professor  
PhD, Massachusetts Institute of Technology, 2004

Martin J Luby, Assistant Professor  
PhD, Indiana University at Bloomington, 2010

Ji Ma, Assistant Professor  
MA, Beijing Normal University, 2013

Ray Marshall, Professor Emeritus  
PhD, University of California-Berkeley, 1954

Mary K McCaston, Adjunct Assistant Professor  
MA, University of Arizona, 1991

Steven D McKee, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 1978

William H McRaven, Professor  
MA, Naval Postgraduate School, 1991

Montgomery C Meigs  
PhD, University of Wisconsin-Madison, 1982

Michael P Meyer, Adjunct Assistant Professor  
MA, University of Texas at Austin, 2008

Jenny Knowles Morrison, Research Fellow  
PhD, New York University, 2008

Michael W Mosser, Lecturer  
PhD, University of Wisconsin-Madison, 2002

Angela M Newell, Lecturer  
PhD, University of Texas at Austin, 2011

Thomas P O'Donnell, Lecturer  
JD, University of Texas at Austin, 1992

Sheila Marie Olmstead, Professor  
PhD, Harvard University, 2002

Todd A Olmstead, Associate Professor  
PhD, Harvard University, 2000

Cynthia Osborne, Associate Professor  
PhD, Princeton University, 2003

Francie Ostrower, Professor  
PhD, Yale University, 1991

Rajeev Charles Patel, Research Professor  
PhD, Cornell University, 2002

Miguel A Pavon, Adjunct Professor  
MSEnvironE, Instituto Tecnológico y de Estudios Superiores de  
Monterrey, 1995

Pamela Marie Paxton, Professor  
Linda K. George and John Wilson Professorship  
PhD, University of North Carolina at Chapel Hill, 1998

James P Pope, Clinical Professor

MA, Naval Postgraduate School, 1982

Heath J Prince, Lecturer  
PhD, Brandeis University, 2013

Howard T Prince II, Clinical Professor  
Loyd Hackler Endowed Chair in Ethical Leadership  
PhD, University of Texas at Austin, 1975

Varun Rai, Associate Professor  
PhD, Stanford University, 2008

Lorinc Redej, Lecturer  
PhD, Central European University, 2013

Pedro Reyes, Professor  
PhD, University of Wisconsin-Madison, 1985

Victoria E Rodriguez, Professor  
PhD, University of California-Berkeley, 1987

Jaganath Sankaran, Assistant Professor  
PhD, University of Maryland College Park, 2012

Jurgen Schmandt, Professor Emeritus  
PhD, University of Bonn, 1956

Max Sherman, Professor Emeritus  
JD, University of Texas at Austin, 1960

William H Shute, Lecturer  
JD, University of Houston, 1987

Stephen Slick, Clinical Professor  
JD, University of California-Los Angeles, 1983

Evan A Smith, Lecturer  
MA, Northwestern University, 1988

William G Spelman, Professor  
PhD, Harvard University, 1988

David W Springer, Professor  
PhD, Florida State University, 1997

Paul J Stekler, Professor  
Wofford Denius Chair in Entertainment Studies  
PhD, Harvard University, 1983

Chandler W Stolp, Associate Professor  
PhD, Carnegie Mellon University, 1982

Jeremi Suri, Professor  
Mack Brown Distinguished Chair for Leadership in Global Affairs  
PhD, Yale University, 2001

John P Thornborrow, Adjunct Assistant Professor  
MBA, University of Texas at Austin, 1994

Kenneth W Tolo, Professor Emeritus  
PhD, University of Nebraska - Lincoln, 1968

Philip U Treisman, Professor  
PhD, University of California-Berkeley, 1985

Paul Von Hippel, Associate Professor  
PhD, Ohio State U Main Campus, 2010

C Michael Walton, Professor  
Ernest H. Cockrell Centennial Chair in Engineering

PhD, North Carolina State University, 1971

Peter Ward, Professor  
C. B. Smith, Sr. Centennial Chair in United States-Mexico Relations #1  
PhD, University of Liverpool, 1976

David C Warner, Professor Emeritus  
PhD, Syracuse University Main Campus, 1969

Ruth E Wasem, Clinical Professor  
PhD, University of Michigan-Ann Arbor, 1990

Andrew Waxman, Assistant Professor  
PhD, Cornell University, 2016

Catherine Elizabeth Weaver, Associate Professor  
PhD, University of Wisconsin-Madison, 2003

Robert H Wilson, Professor  
Mike Hogg Professorship of Urban Policy  
PhD, University of Pennsylvania, 1979

Patrick P Wong, Associate Professor  
PhD, University of Wisconsin-Madison, 1988

Sandra E Black, Professor  
Audre and Bernard Rapoport Centennial Chair in Economics  
PhD, Harvard University, 1997

Clare Packard Zutz, Lecturer  
MA, University of Texas at Austin, 2015

## Steve Hicks School of Social Work Faculty

The following faculty list represents those appointed in the 2018 spring semester.

Zaccheus J Ahonle, Lecturer  
PhD, University of Texas at Austin, 2015

Terrence Allen, Assistant Professor  
PhD, The University of Alabama, 2003

Robert J Ambrosino, Adjunct Assistant Professor  
PhD, State University of New York at Albany, 1971

Rosalie Ambrosino, Lecturer  
PhD, University of Texas at Austin, 1985

Barbara S Anderson, Clinical Professor  
MSSW, University of Texas at Austin, 1974

Marilyn Armour, Professor  
PhD, University of Minnesota-Twin Cities, 2000

Joan E Asseff, Clinical Assistant Professor  
MSSW, University of Texas at Austin, 2006

Johanna Creswell Baez, Lecturer  
MS, Columbia University in the City of New York, 2006

Margaret M Bassett, Lecturer  
MS, Northern Illinois University, 1990

Jolynne M Batchelor, Adjunct Assistant Professor  
PhD, University of Texas at Arlington, 2016

Natalie Deann Beck, Adjunct Assistant Professor

MSSW, University of Texas at Austin, 2009

Mary C Beer, Clinical Assistant Professor  
MSSW, University of Texas at Austin, 2001

Elisa V Borah, Research Associate Professor (Affiliated)  
PhD, University of Texas at Austin, 2010

Christopher A Burnett, Lecturer  
MS, California State University-Sacramento, 2004

Noel B Busch-Armendariz, Professor  
Endowed President's Professorship  
PhD, University of South Carolina - Columbia, 2000

Esther Calzada, Associate Professor  
PhD, University of Florida, 2000

Yessenia Castro, Assistant Professor  
PhD, Florida State University, 2008

Elaine H Cavazos, Lecturer  
MSW, Our Lady of the Lake University, 1991

Namkee Choi, Professor  
Louis and Ann Wolens Centennial Chair in Gerontology  
PhD, University of California-Berkeley, 1987

Patricia A Cody, Lecturer  
PhD, University of Texas at Austin, 2007

Deborah Cohen, Research Assistant Professor (Affiliated)  
PhD, University of Kentucky, 2015

Allan H Cole Jr, Professor  
PhD, Princeton University, 2001

Fiona Conway, Assistant Professor  
PhD, Rutgers the State University of New Jersey New Brunswick Campus,  
2016

Julia N Cuba, Lecturer  
MSSW, University of Texas at Austin, 2006

Catherine Cubbin, Professor  
PhD, Johns Hopkins University, 1998

Susan De Luca, Assistant Professor  
PhD, Ohio State U Main Campus, 2009

Megan L Delaney, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 2010

Diana M Dinitto, Professor  
Cullen Trust Centennial Professorship in Alcohol Studies and Education  
PhD, Florida State University, 1980

David L Evans, Lecturer  
MA, Oakland University, 1976

Monica R Faulkner, Research Associate Professor (Affiliated)  
PhD, University of Texas at Austin, 2010

Rowena Fong, Professor  
Ruby Lee Piester Centennial Professorship in Services to Children and  
Families  
EdD, Harvard University, 1990

Delinda L Spain, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 1999

Cynthia G Franklin, Professor  
Stiernberg/Spencer Family Professorship in Mental Health  
PhD, University of Texas at Arlington, 1989

Bethany E Gerlach, Lecturer  
PhD, University of Texas at Austin, 2011

Dorie J Gilbert, Associate Professor Emeritus  
PhD, University of Texas at Austin, 1996

Emmett L Gill, Clinical Assistant Professor  
PhD, University of Maryland Baltimore, 2006

Teresa Granillo, Lecturer  
PhD, University of Michigan-Ann Arbor, 2011

Roberta R Greene, Professor Emeritus  
PhD, University of Maryland College Park, 1980

Lauren E Gulbas, Assistant Professor  
PhD, Southern Methodist University, 2008

Wilbert J Heffernan Jr, Professor Emeritus  
PhD, University of North Carolina at Chapel Hill, 1964

Mercedes Hernandez, Assistant Professor  
PhD, University of Southern California, 2014

Margaret Lee Duval Hill, Lecturer  
MSSW, University of Texas at Austin, 2011

Kristen A Hogan, Lecturer  
PhD, University of Texas at Austin, 2006

Lori K Holleran, Professor  
PhD, Arizona State University Main, 2000

Heather Larkin Holloway, Associate Professor  
PhD, The Catholic University of America, 2006

Catherine Hough, Clinical Assistant Professor  
MSSW, University of Texas at Austin, 1993

Yuri Jang, Professor  
PhD, University of South Florida, 2001

Allyson M Jervy, Lecturer  
MSSW, University of Texas at Austin, 1997

Christine M Johnson, Lecturer  
MSW, Texas State University-San Marcos, 2003

Barbara L Jones, Professor  
PhD, State University of New York at Albany, 2004

Dana R Jones, Lecturer  
MSSW, University of Texas at Austin, 1993

Laura G Jones-Swann, Lecturer  
EdM, Texas Tech University, 1983

Dina M Kassler, Lecturer  
PhD, The University of Memphis, 1997

Kendra D Koch, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 2017

Jane A Kretzschmar, Clinical Professor  
MSW, University of Michigan-Ann Arbor, 1979

Noel G Landuyt, Lecturer

PhD, University of Texas at Austin, 1999

Braden Latham-Jones, Adjunct Assistant Professor  
MSSW, University of Michigan-Ann Arbor, 2013

Michael L Lauderdale, Professor  
Clara Pope Willoughby Centennial Professorship in Criminal Justice  
PhD, University of Oklahoma Norman Campus, 1967

Laura Lein, Professor Emeritus  
PhD, Harvard University, 1973

Carol M Lewis, Lecturer  
PhD, University of Texas at Austin, 1995

Elizabeth Martha Lewis, Adjunct Assistant Professor  
PhD, University of Texas at Austin, 2017

Tamera B Linseisen, Clinical Associate Professor  
MSSW, University of Texas at Austin, 1989

Molly A Lopez, Research Associate Professor (Affiliated)  
PhD, Texas A & M University, 1998

Abena S Mackall, Assistant Professor  
EdM, Harvard University, 2015

Sandy Magana, Professor  
Professorship in Autism and Neurodevelopmental Disabilities  
PhD, Brandeis University, 1999

Octavio N Martinez, Clinical Professor  
MD, Baylor College of Medicine, 1997

Sarah M McCafferty, Lecturer  
MSSW, University of Texas at Austin, 2006

John McNeil, Professor Emeritus  
PhD, University of Southern California, 1964

Ruth G McRoy, Professor Emeritus  
PhD, University of Texas at Austin, 1981

Alma Leonor Mena, Lecturer  
MSW, New York University, 2000

Jeffrey D Moe, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 2013

Arlene K Montgomery, Lecturer  
PhD, Smith College, 1999

Elizabeth Mueller, Associate Professor  
PhD, University of California-Berkeley, 1992

Rosamaria Murillo, Lecturer  
MSW, Our Lady of the Lake University, 1992

Angela M Nonaka, Assistant Professor  
PhD, University of California-Los Angeles, 2007

John S Nowicki, Lecturer  
MSW, University of Texas at Arlington, 1979

Vicki Y Packheiser, Clinical Professor  
MSW, University of Illinois at Urbana-Champaign, 1980

Yolanda C Padilla, Professor  
PhD, University of Michigan-Ann Arbor, 1993

Jose Ruben Parra-Cardona, Associate Professor

PhD, Texas Tech University, 2004

Cynthia S Penwell, Lecturer  
MSSW, University of Texas at Austin, 2010

Farya Phillips, Postdoctoral Fellow  
PhD, University of Texas at Austin, 2013

Rayven Plaza, Assistant Professor  
MSW, City University of New York Hunter College, 2014

Elizabeth C Pomeroy, Professor  
Bert Kruger Smith Centennial Professorship in Social Work  
PhD, University of Texas at Austin, 1994

Suzanne Laura Potts, Lecturer  
MSW, San Diego State University, 1998

Diane McDaniel Rhodes, Lecturer  
MA, The Episcopal Theological Seminary of the Southwest, 2001

Stephanie L Rivaux, Lecturer  
PhD, University of Texas at Austin, 2009

Michele A Rountree, Associate Professor  
PhD, Arizona State University Main, 1992

Arthur J Schwab Jr, Professor Emeritus  
PhD, University of Texas at Austin, 1981

Jaclyn N Sepp, Lecturer  
MA, Texas State University-San Marcos, 2012

Alba D Sereno, Lecturer  
MSSW, University of Texas at Austin, 2011

Deborah S Sharp, Lecturer  
MSSW, University of Texas at Austin, 1998

Guy E Shuttlesworth, Professor Emeritus  
PhD, University of Pittsburgh, Pittsburgh Campus, 1970

Jennifer Wood Silva, Lecturer  
MSSW, University of Texas at Austin, 2003

Sarah K Sloan, Clinical Assistant Professor  
MSSW, University of Texas at Austin, 2003

Douglas R Smith, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 2000

Melissa C Smith  
MD, University of Washington - Seattle, 1988

Robin M Smith, Clinical Assistant Professor  
MSSW, University of Texas at Austin, 1992

Russell A Smith, Lecturer  
MSW, University of Houston, 1997

Erin P Spalding, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 2007

Debra Lynn Sparks, Clinical Assistant Professor  
MSW, Texas State University-San Marcos, 2002

Melissa S Stewart, Adjunct Assistant Professor  
MSSW, Boston University, 2000

Calvin L Streeter, Professor

Meadows Foundation Centennial Professorship in the Quality of Life in  
the Rural Environment  
PhD, Washington University in St Louis, 1989

Mitchell Sudolsky, Clinical Professor  
MSSW, University of Texas at Austin, 1978

Sarah A Swords, Clinical Associate Professor  
MSW, Simmons College, 1982

Melissa Torres, Lecturer  
PhD, University of Houston, 2015

Earley R Ullrich, Lecturer  
MSSW, University of Texas at Austin, 2009

Debra J Umberson, Professor  
Centennial Commission Professorship in the Liberal Arts #1  
PhD, Vanderbilt University, 1985

Carmen R Valdez Chavez, Associate Professor  
PhD, University of Texas at Austin, 2004

Mary M Velasquez, Professor  
Centennial Professorship in Leadership for Community, Professional, and  
Corporate Excellence  
PhD, University of Texas Health Science Center at Houston, 1997

Shetal S Vohra, Lecturer  
PhD, University of Houston, 2009

Kirk L Von Sternberg, Associate Professor  
PhD, University of Texas Health Science Center at Houston, 2005

Tanya M Voss, Clinical Professor  
MSW, University of Texas at Austin, 1996

Deborah K Webb, Lecturer  
PhD, University of Texas at Austin, 1994

Shane O Whalley, Lecturer  
MSSW, University of Texas at Austin, 2003

Valerie A Whiting, Adjunct Assistant Professor  
MSSW, University of Texas at Austin, 1999

Ahmed Whitt, Assistant Professor  
PhD, University of North Carolina at Chapel Hill, 2013

Martha S Williams, Professor Emeritus  
PhD, University of Texas at Austin, 1963

Christine D Winston, Lecturer  
MSSW, University of Texas at Austin, 1998

Leila G Wood, Research Assistant Professor (Affiliated)  
PhD, Indiana University at Bloomington, 2014

Luis H Zayas, Professor  
The Robert Lee Sutherland Chair in Mental Health and Social Policy  
PhD, Columbia University in the City of New York, 1986
