Degree Requirements, Information, Risk, and Operations Management

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Science in Information, Risk, and Operations Management**

The Master of Science in Information, Risk, and Operations Management is offered only to students who are enrolled in the doctoral program in information, risk, and operations management. This degree is offered in three options: with thesis, with report, and without thesis or report. The thesis option requires at least 30 semester hours of coursework; the report option, at least 33 hours; and the option without thesis or report, at least 36 hours. All coursework must be logically related, and the student's entire program must be approved by the student's primary advisor and the graduate advisor. The Graduate Studies Committee's approval is not required.

**Doctor of Philosophy**

The doctoral program in information, risk, and operations management has four areas of concentration: decision analysis, information systems, statistics, and operations management. Degree requirements vary slightly among these. After the first year, each student must pass a qualifying examination that is based on the core courses in the appropriate area of concentration. Students concentrating in information systems must also complete a first-year research paper.

In the second and third years of the program, students complete core coursework and take other methodological and contextual courses in the areas of their research interest. Students are expected to begin working on research as soon as possible, and will spend increasing amounts of time on research as they progress through the program. At the end of the second year, students in all areas of concentration complete a research paper; students in the supply chain and operations management area of concentration also complete a comprehensive examination.

Following admission to candidacy, students undertake dissertation research, which concludes in a written dissertation and an oral defense before the student's dissertation committee.
