

Stackable Certificate Programs, Semiconductor Science and Engineering

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the [Stackable Certificates section](#) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the [Graduate Study](#) section of the *Graduate Catalog*.

Semiconductor Science and Engineering: Semiconductor Processes and Devices

The **Semiconductor Science and Engineering: Semiconductor Processes and Devices** stackable graduate certificate is designed primarily for (1) people with a Bachelor's degree already working at companies in the semiconductor and related technology fields who want an advanced degree and (2) people with a Bachelor's degree who are currently outside of the semiconductor industry but would like to make a career transition into the industry. The program is available to degree-seeking and non-degree-seeking students. All courses required for program completion are delivered to degree-seeking students in a face-to-face format on the UT Austin campus. These courses are delivered to non-degree-seeking students in an asynchronous online format and in accordance with University policies and procedures that govern non-formula-funded (Option III) academic programs.

Requirements		Hours
SSE 380	Introduction to Semiconductors	3
SSE 381	Semiconductor Processes	3
SSE 382	Semiconductor Devices	3
Total Hours		9
