Graduate

Introduction

The benefits of education and of useful knowledge, generally diffused through a community, are essential to the preservation of a free government.

Sam Houston

Cultivated mind is the guardian genius of Democracy, and while guided and controlled by virtue, the noblest attribute of man. It is the only dictator that freemen acknowledge, and the only security which freemen desire.

Mirabeau B. Lamar

Where liberty has arisen, learning must be cherished—or liberty itself becomes a fragile thing.

Lyndon B. Johnson

Mission of the University

The mission of The University of Texas at Austin is to achieve excellence in the interrelated areas of undergraduate education, graduate education, research, and public service. The university provides superior and comprehensive educational opportunities at the baccalaureate through doctoral and special professional educational levels.

The university contributes to the advancement of society through research, creative activity, scholarly inquiry, and the development and dissemination of new knowledge, including the commercialization of University discoveries. The university preserves and promotes the arts, benefits the state’s economy, serves the citizens through public programs, and provides other public service.

The Graduate School at The University of Texas at Austin is an active community of diverse scholars in over 100 academic programs dedicated to excellence in original research, teaching, creative expression, and intellectual leadership. Using our extensive resources and talents, we cultivate individuals who work together to bring knowledge, innovation, and best practices to meet the great and small challenges of our time.

Officers of Administration

The University of Texas at Austin

Jay C. Hartzell, PhD, President
Sharon L. Wood, PhD, Executive Vice President and Provost
James Davis, JD, Senior Vice President and Chief Operating Officer
Claudia Lucchinetti, MD, Senior Vice President for Medical Affairs and Dean of the Dell Medical School
Christopher M. Del Conte, MEd, Vice President and Athletics Director
Daniel T. Slesnick, PhD, Interim Vice President and Chief Financial Officer
Emily Reagan, MBA, Vice President and Chief Marketing and Communications Officer
David Livingston, BA, Vice President for Development
LaToya C. Smith, PhD, Vice President for Campus and Community Engagement
Amanda Cochran-McCall, JD, Vice President for Legal Affairs and General Counsel
Roger Cude, PhD, Vice President for People and Talent
Daniel T. Jaffe, PhD, Vice President for Research, Scholarship, and Creative Endeavors
Sonia Reagins-Lilly, EdD, Vice President for Student Affairs and Dean of Students
Nancy A. Brazzil, BS, Deputy to the President
Richard R. Flores, PhD, Deputy to the President for Academic Strategies
Janet H. Huang, MBA, Deputy to the President for Transformation Strategies
Andrea Sheridan, BS, Deputy to the President for Governmental Affairs and Initiatives
Jeffery L. Graves, JD, Chief Compliance Officer
Sandy Jansen, BBA, Chief Audit Executive

Administrative Officers of the Colleges and Schools

Maria Juenger, PhD, Interim Dean, Graduate School
Heather Woofter, MArch, Dean, School of Architecture
Lillian F. Mills, PhD, Dean, Red McCombs School of Business
Justin Dyer, PhD, Dean, School of Civic Leadership
Rachel Davis Mersey, PhD, Dean, Moody College of Communication
Charles R. Martinez, Jr., PhD, Dean, College of Education
Roger T. Bonnecaze, PhD, Dean, Cockrell School of Engineering
Ramón Rivera-Servera, PhD, Dean, College of Fine Arts
Claudia I. Mora, PhD, Dean, John A. and Katherine G. Jackson School of Geosciences
Eric T. Meyer, PhD, Dean, School of Information
Robert M. Chesney, Dean, School of Law
Ann Huff Stevens, PhD, Dean, College of Liberal Arts
George A. Macones, MD, MSCE, Interim Dean, Dell Medical School
David A. Vanden Bout, PhD, Dean, College of Natural Sciences
Eun-Ok Im, PhD, MPH, RN, CNS, FAAN, Dean, School of Nursing
Samuel M. Poloyac, PharmD, PhD, Dean, College of Pharmacy
JR DeShazo, PhD, Dean, Lyndon B. Johnson School of Public Affairs
Allan H. Cole, Jr., PhD, Dean, Steve Hicks School of Social Work
Richard J. Reddick, EdD, Senior Vice Provost for Curriculum and Enrollment and Dean, Undergraduate College

The University of Texas System

James B. Milliken, JD, Chancellor
Archie L. Holmes Jr., PhD, Executive Vice Chancellor for Academic Affairs
Jonathan Pruitt, MPA, Executive Vice Chancellor for Business Affairs
John M. Zerwas, MD, Executive Vice Chancellor for Health Affairs
Daniel H. Sharpnord, JD, Vice Chancellor and General Counsel
Stacey Napier, JD, Vice Chancellor for Governmental Relations
Randa S. Safady, PhD, Vice Chancellor for External Relations, Communications, and Advancement Services
David L. Lakey, MD, Vice Chancellor for Health Affairs and Chief Medical Officer

Board of Regents

Officers

Kevin P. Eltife, Chairman
Janiece M. Longoria, Vice Chairman
James C. "Rad" Weaver, Vice Chairman
Francie A. Frederick, General Counsel to the Board of Regents

Members

Terms scheduled to expire February 1, 2025
Christina M. Crain, Dallas
Jodie Lee Jiles, Houston
Kelcy L. Warren, Dallas

Terms scheduled to expire February 1, 2027
Kevin P. Eltife, Tyler
Directory of Offices

The following list includes some University offices of general interest. A complete directory of offices on campus is published at https://www.utexas.edu/offices.

### Academic Calendar

The academic calendar is published in General Information and at http://registrar.utexas.edu/calendars

### Admission

Graduate and International Admissions Center, UT Administration Building 4.202 (1616 Guadalupe Street), (512) 475-7391, fax (512) 475-7395 https://gradschool.utexas.edu/admissions

The University of Texas at Austin, Graduate and International Admissions Center, P O Box 7608, Austin, TX 78713-7608

### Catalogs and Course Schedules

Catalogs and Course Schedules are published at the registrar’s website, http://registrar.utexas.edu

### Fellowships, Teaching Assistantships, and Research Assistantships

Information and application forms for University fellowships, teaching assistantships, and research assistantships are available from the graduate advisor in each graduate program. General information on University fellowships, and additional information on fellowships funded by sources external to the University, is available from the fellowship director in the Graduate School, Main Building 101, (512) 232-3603.

The University of Texas at Austin, Office of Graduate Studies, 110 Inner Campus Drive, Stop G0400, Austin, TX 78712-1710. The mailing address for each graduate program is given in the program's section of Fields of Study.

### Financial Assistance

All student questions and forms for the Office of Scholarships and Financial Aid should be sent to Texas One Stop https://onestop.utexas.edu/help

### Housing

University Housing and Dining, PO Box 7666, Austin TX 78713-7666

### International Students

Texas Global, 2400 Nueces Street Suite B, (512) 471-1211, fax (512) 232-4363; https://global.utexas.edu

The University of Texas at Austin, Texas Global, PO Box A, Austin TX 78713-8901, USA

### Medical Services

University Health Services, Student Services Building, 100 West Dean Keeton Street, (512) 471-4955; 24/7 Nurse Advice Line (512) 475-6877; http://healthyhorns.utexas.edu

The University of Texas at Austin, University Health Services, PO Box 7339, Austin TX 78713-7339

### Registration Information

Registration, (512) 475-7656, fax (512) 475-7520, e-mail registration@austin.utexas.edu; https://onestop.utexas.edu/registration-and-degree-planning/registering-for-classes/

The University of Texas at Austin, Office of the Registrar, Registration, PO Box 7216, Austin TX 78713-7216

### Disability and Access

Disability and Access, Student Services Building 4.206, (512) 471-6259, video phone (512) 410-6644, fax (512) 475-7730, e-mail ssd@austin.utexas.edu; http://78712-1100

The University of Texas at Austin, Disability and Access, 100 West Dean Keeton Street, Student Services Building 4.206, Austin TX 78713-8901, USA

### Texas One Stop

Texas One Stop, 512-232-6988 (myUT), e-mail onestop@utexas.edu, https://onestop.utexas.edu/

The University of Texas at Austin, Texas One Stop, 110 Inner Campus Dr Rm 1 Austin, TX 78712

### Transcripts

Office of the Registrar, (512) 475-7689, fax (512) 475-7515, e-mail transcripts@austin.utexas.edu; https://onestop.utexas.edu/student-records/transcripts-other-records/

The University of Texas at Austin, Office of the Registrar, Transcript Services, PO Box 7216, Austin TX 78713-7216

### Adding and Dropping Courses, Questions About Degree Programs, Information, and Forms

Graduate School, Main Building 101, (512) 471-4511.

The University of Texas at Austin, VP & Dean of Graduate Studies, 110 Inner Campus Drive, Stop G0400, Austin, TX 78712-1710

### Graduate Study

The University of Texas at Austin, established in 1883, is a major research institution. It is the largest member of The University of Texas System. The University has grown from one building, two departments, eight faculty members, and 221 students on a 40-acre tract to a campus of more than 350 acres, with more than 110 buildings. The enrollment is about 50,000.
The faculty includes Pulitzer Prize and Nobel Prize winners and members of the National Academy of Sciences, the National Academy of Engineering, and the American Academy of Arts and Sciences. The University awards one of the largest number of doctoral degrees in the United States and is one of three southwestern members of the Association of American Universities.

The Graduate School was established in 1910 as the Graduate Department, but the first master's degree was awarded in 1886. The first doctoral degree was awarded in 1915. More than 11,000 graduate students are now enrolled, and more than 800 doctoral degrees and 2,800 master's degrees are awarded each year.

The administration of the Graduate School (which does not include the School of Law) is the responsibility of the vice provost and dean of graduate studies. Graduate degrees are available in about a 100 fields. Each academic area that offers a graduate degree has a Graduate Studies Committee, a group consisting of all the assistant, associate, and full professors who are active in that graduate degree program. The Graduate Studies Committee recommends students for admission to the program, sets program-specific requirements for the graduate degrees in that area, and recommends students for admission to candidacy for degrees. Graduate education is the responsibility of the members of Graduate Studies Committees. One member serves as the graduate advisor to register and advise all graduate students, to maintain records, and to represent the Graduate School in matters pertaining to graduate work in that area.

## Accreditation

The University of Texas at Austin is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, professional, and doctorate degrees. The University of Texas at Austin also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of The University of Texas at Austin may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC’s website (www.sacscoc.org).

## The Nature and Purpose of Graduate Work

Graduate work at the University is divided into disciplines. These are normally associated with departments, they may, however, be broader in scope, involving courses and research in several departments. The candidate for an advanced degree presents work done in a chosen major area but is usually also expected to have done supporting work on an advanced level (upper-division or graduate) in one or more relevant areas. There are three components of graduate study: coursework, independent study, and independent scholarly research leading to a report, thesis, recital, dissertation, or treatise. In some areas, internships, field studies, and other professional experiences may also be an integral part of the program. The proportion of each type of study varies according to the previous training of the student and the nature of the major area.

The objective of graduate study is to develop the intellectual breadth and to provide the specialized training necessary to a career in teaching, research, the arts, or the professions. Emphasis is placed on the knowledge, methods, and skills needed for scholarly teaching, original research and problem solving, intellectual leadership, creative expression, and other modes of achievement in the student's discipline.

---

**Statement on Equal Educational Opportunity**

The University of Texas at Austin is committed to an educational and working environment that provides equal opportunity to all members of the University community. In accordance with federal and state law, the University prohibits unlawful discrimination, including harassment, on the basis of race; color; religion; national origin; gender; including sexual harassment; age; disability; citizenship; and veteran status. Discrimination on the basis of sexual orientation, gender identity, and gender expression is also prohibited pursuant to University policy. Any member of the University community who believes they have been subject to discrimination, harassment, or retaliation should contact the Center for Access and Restorative Engagement in person at SSB 3.212, Austin TX 78712; via e-mail at care@utexas.edu; or by phone at (512) 471-1849.

## Graduate Degrees

The Graduate School offers the following degrees.

Degree Programs

Graduate degrees are offered in the following areas. A complete list of fields of study in which graduate courses are taught is given in the Courses section of the General Information Catalog.

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

School of Architecture (p. 28)

Major(s) | Degree(s)
---|---
Architecture | MArch, MAAD, PhD
Architectural history | MA
Community and regional planning | MSCRIP, PhD
Historic preservation | MSHP
Interior design | MID
Landscape architecture | MLA, MSLA
Sustainable design | MSLA
Urban design | MSUD

Red McCombs School of Business (p. 38)

Major(s) | Degree(s)
---|---
Business administration | MBA
Accounting | MPA, MSAcc, PhD
Business analytics | MSBA
Energy management | MSEMA
Finance | MSF, PhD
Financial mathematics | MBA

College of Education (p. 57)

Major(s) | Degree(s)
---|---
Curriculum and instruction | MA, MEd, EdD, PhD
Educational leadership and policy | MEd, EdD, PhD
Educational psychology | MA, MEd, PhD
Health behavior and health education | MEd, MSHbed, PhD
Kinesiology | MEd, MSKin, PhD
Science, technology, engineering, and mathematics education | MA, MEd, PhD
Special education | MA, MEd, EdD, PhD

Cockrell School of Engineering (p. 69)

Major(s) | Degree(s)
---|---
Aerospace engineering | MSE, PhD
Biomedical engineering | MSE, PhD
Chemical engineering | MSE, PhD
Civil engineering | MSE, PhD
Electrical and computer engineering | MSE, PhD
Engineering management | MSE
Engineering mechanics | MSE, PhD
Environmental and water resources engineering | MSE
Materials science and engineering | MSE, PhD
Mechanical engineering | MSE, PhD
Operations research and industrial engineering | MSE, PhD
Petroleum engineering | MSE, PhD

College of Fine Arts (p. 94)

Major(s) | Degree(s)
---|---
Art education | MA
Art history | MA, PhD
Conducting | MMusic, DMA
Dance | MFA
Design | MA, MFA
Music | MMusic, DMA, PhD
Music and human learning | MMusic, DMA, PhD

### Dual Degree Programs

Dual degree programs are structured so that a student can pursue graduate work at the University in two fields and fulfill the requirements...
of two degrees; in programs leading to two master’s degrees, the degrees are awarded simultaneously. To enter a dual program, the student must be accepted by both of the individual programs. Students who wish to enter a dual program that involves the JD degree should contact the Admissions Office in the School of Law first. Dual programs are offered in the following fields:

<table>
<thead>
<tr>
<th>Major(s)</th>

</table>

**Dual degree programs with other institutions.** The dual degree programs listed above lead to two University degrees; in other programs, students pursue degrees from the University and from another school at the same time. A dual degree program in business administration allows students to pursue a Master of Business Administration degree from the University and the degree of Master of Administration from Tecnológico de Monterrey-Campus Sante Fe. A dual degree program between the University’s School of Social Work and the Austin Presbyterian Theological Seminary allows students to earn the Master of Science in Social Work from the University and the Master of Divinity from the seminary simultaneously. The University’s LBJ School of Public Affairs offers dual degree programs with the University of Texas Health Science Center at Houston School of Public Health leading to the Master of Public Affairs or the Master of Global Policy Studies from the University and the Master of Public Health from the center. The University’s School of Social Work also offers a dual degree program with the University of Texas Health Science Center at Houston School of Public Health leading to the Master of Science in Social Work from the University and the Master of Public Health from the center.

**Integrated Degree Programs**

Integrated degree programs enable students to earn a bachelor’s and master’s degree in a single continuous degree plan. Through the application of course waivers to common course requirements and the reservation of coursework for graduate credit, integrated degree programs are designed to be completed in less time and at a lower cost than is required to complete the two associated degree programs independently. Integrated degree program arrangements are designed to support the University’s student success goals, and they are attentive to timely undergraduate degree conferral. Students enrolled in an integrated degree program are expected to complete requirements for the bachelor’s degree within four years as a milestone toward earning the master’s degree. Degree candidates must be registered during the semester in which a degree is to be awarded. Integrated degree students who are ineligible to receive the bachelor’s degree at the end of four years must apply for the degree as soon as they are eligible and no later than the date specified in the official academic calendar.
Combined JD/PhD Programs

The School of Law and the Graduate School offer programs leading to the Doctor of Jurisprudence and the Doctor of Philosophy with a major in government or philosophy. These programs are designed to prepare students for academic careers in law or the cognate discipline or both. By counting law courses toward the PhD and courses in the cognate discipline toward the JD, students can save up to a year of coursework. The law school provides financial aid to students at the dissertation stage of the program. More information on the JD/PhD in government is available at (512) 471-5121, and on the JD/PhD in philosophy at the School of Law’s website.

Graduate Portfolio Programs

The goal of graduate portfolio programs is to recognize and encourage cross-disciplinary research and scholarly activity. A portfolio program usually consists of four thematically related graduate courses and a research paper, presentation, or practical experience. The portfolio must include courses offered by at least two graduate programs other than the student’s major program. Portfolio programs are approved by the Graduate School. Although the certification requirements of each program are independent of the requirements for graduate degrees, courses included in the Program of Work may, with appropriate approval, be counted toward certification. Upon completion of both degree and portfolio program requirements, the student’s University transcript reflects portfolio certification.

All graduate portfolio programs must include nine to 15 credit hours of thematically related graduate coursework (typically three to five courses) selected from a variety of predetermined disciplines or graduate programs. The requirements of a portfolio may not exceed 15 credit hours. To ensure the expansion of cross-disciplinary content expertise, each portfolio must include a minimum of nine credit hours of content coursework (typically three courses) and content courses offered by at least two graduate programs other than the student’s primary degree major. In addition to required content courses, portfolio programs may require one Independent Study course and/or Internship course. Master’s Reports, Theses, and Doctoral Dissertations may be used to satisfy the independent paper, or project, requirement of a portfolio program; however, these courses may not be used to satisfy the nine to 15 credit-hour coursework requirement.

If a student’s graduate degree is conferred while their portfolio program is in progress, they may continue enrollment to complete the portfolio under the following circumstances:

a. the student must enroll as a non-degree-seeking student in one of the graduate programs sponsoring the portfolio program,
b. the student must have completed at least two of the courses required for the portfolio at the time that their degree is conferred (a student may not begin a portfolio program after their degree is conferred),
c. the portfolio administrator must request permission from the Graduate School to allow the student to complete a post-graduation portfolio and provide confirmation that the student has completed at least two portfolio courses and,
d. the student may not have a break in enrollment period.

A student will not be readmitted for the purpose of completing a portfolio program.

Graduate portfolio programs are available in the following areas:

- African and African diaspora studies
- Aging and health
- Applied statistical modeling
- Arts and cultural management and entrepreneurship
- Asian American studies
- Communication, information, and cultural policy
- Computational medicine
- Cultural studies
- Digital studies
- Disability studies
- Dispute resolution
- Energy studies
- Ethical AI
Cooperative Consortium Program

A cooperative arrangement between The University of Texas System and the Texas A&M University System allows a graduate student at one institution to use unique facilities or courses at the other institution with a minimum of paperwork. The graduate student registers and pays fees at the home institution and may retain any fellowship or financial assistance awarded by it. Space must be readily available, and the instructor or laboratory director of the proposed work must consent to the arrangement. Approval must be given by the graduate dean of each institution.

A similar arrangement among component institutions of The University of Texas System has been authorized by the chancellor and the Board of Regents. The University has active arrangements with the University of Texas Health Science Center at Houston, the University of Texas M. D. Anderson Science Park in Bastrop County, and the University of Texas Medical Branch at Galveston.

Cooperative Degree Programs

With appropriate approval, The University of Texas at Austin and another component of The University of Texas System may enter into a cooperative agreement in which one component serves as the degree-granting institution while some or all of the courses in the degree program are taught at the other component. The component that grants the degree is the “sponsoring” institution. A student who enters such a cooperative program is admitted on the understanding that institutional sponsorship of the program may change during the student’s enrollment. The student’s continuation in the program will not be affected by such a transfer of sponsorship, but the student will become subject to the policies and procedures of the new sponsoring institution, which may differ from those of the original sponsor. The student will receive the degree from the component that sponsors the program at the time of the student’s graduation.

Certificates

Transcript-recognized graduate certificate programs offer a non-degree credential for completing a structured sequence of courses designed to meet identified workforce needs and to provide students with skills and knowledge that shall be useful for their lives and careers.

Each graduate certificate program is sponsored and administered by an associated Graduate Studies Committee (GSC) that is responsible for determining the program curriculum, publishing a program description in the Graduate Catalog, processing applications for admission, tracking and evaluating student progress, and reporting program completion to the Graduate School.

The general requirements for graduate certificates are given in this chapter. Specific requirements for each certificate program are given in Areas of Study (p. 27).

Application and Admission

Degree-seeking graduate students may pursue a graduate certificate within or outside of their primary field of study. Students who are currently enrolled in a graduate degree program at the University of Texas at Austin may apply for admission to a graduate certificate program through the academic unit administering the program.

Non-degree-seeking students: Some graduate certificates are available to non-degree-seeking students. Individuals who have earned a bachelor’s degree or higher may apply for admission to these programs by submitting materials required for admission as a nondegree student (p. ) to the Graduate and International Admissions Center (GIAC). Individual certificate programs may impose additional admissions requirements.

Coursework Requirements

Upper-division courses may not be used to satisfy graduate certificate requirements. All coursework must be completed within a six-year period. A graduate course may be used to satisfy requirements of a graduate certificate and graduate degree program; however, a graduate course may not be used to satisfy the requirements of more than one graduate certificate program.

Grade Requirements

All coursework must be completed with a grade of “C” or higher. In addition, students must earn a cumulative grade point average of at least 3.00 in the courses used to satisfy graduate certificate requirements. Individual certificate programs may set higher grade point average requirements for all or a portion of their students’ coursework.

Transcript Notation

In most certificate programs, students receive recognition on the University transcript at the end of the semester when requirements of a graduate certificate program are completed; however, some programs may require simultaneous awarding of the certificate and degree.

Each of the following transcript-recognized graduate certificate programs is described in the catalog section for the college that sponsors it. Certificate programs that do not lead to transcript recognition are also described in the following sections of this catalog.

The following graduate certificates are designed for degree-seeking graduate students enrolled at the University and must be awarded simultaneously with a graduate degree:
• Engineering Education (p. 89)
• Latin American Architecture (p. 28)

The following graduate certificates are designed for non-degree-seeking graduate students and may be awarded following completion of program requirements:

• Artist Diploma in Music Performance (p. 99)
• Advanced Practice Registered Nurse Certification (p. 171)
  - Advanced Practice Nursing - Acute Care Pediatric Nurse Practitioner
  - Advanced Practice Nursing - Adult Gerontology Clinical Nurse Specialist
  - Advanced Practice Nursing - Family Nurse Practitioner
  - Advanced Practice Nursing - Family Psych/Mental Health Nurse Practitioner
  - Advanced Practice Nursing - Pediatric Nurse Practitioner

**Stackable Certificates**

Stackable graduate certificate programs provide an opportunity for degree-seeking and non-degree-seeking graduate students to earn a transcript-recognized, non-degree credential for completing a structured sequence of courses in a specified area of study. Stackable graduate certificates are designed to meet identified workforce needs and to provide students with skills and knowledge that will be useful for their lives and careers. Degree-seeking graduate students may pursue a stackable graduate certificate within or outside their primary area of study.

Each graduate certificate program is sponsored and administered by a Graduate Studies Committee (GSC). The GSC is responsible for determining the program curriculum, publishing a program description in the Graduate Catalog, processing applications for admission, tracking and evaluating student progress, and reporting program completion to the Graduate School.

The general requirements for stackable graduate certificates are given in this chapter. These requirements set a minimum standard; however, individual programs may impose additional requirements. Specific requirements for each stackable certificate program are given in the Fields of Study.

**Application and Admission**

Stackable graduate certificates are available to individuals who have been admitted to the University as either degree-seeking or non-degree-seeking graduate students.

Students who are enrolled in a graduate degree program at UT Austin may apply for admission through the academic unit sponsoring the certificate.

Some stackable graduate certificate programs are available to nondegree-seeking students; persons who have earned a bachelor's degree or higher may apply for admission to those programs by submitting materials required for admission as a nondegree student to the Graduate and International Admissions Center (GIAC). Individual programs may impose additional admissions requirements.

**Coursework Requirements**

To earn a stackable graduate certificate, students must complete 9-15 hours of graduate-level coursework that has been approved by the program faculty. Upper-division undergraduate courses may not be used to satisfy coursework requirements. All coursework used to satisfy program requirements must be completed within a 6-year period. A single course may not be used to satisfy the requirements of more than one stackable graduate certificate.

**Grade Requirements**

All coursework must be completed with a grade of "C" or higher. In addition, students must earn a grade point average of at least 3.00 in courses used to satisfy stackable certificate requirements. Individual programs may set higher grade point average requirements for all or a portion of their students’ coursework.

**Limits on Transfer Coursework**

Degree-seeking graduate students must complete a minimum of nine of the hours required for a stackable graduate certificate in residence at the University. With approval of the GSC administering a graduate certificate program, and except where otherwise limited by the nine-hour residency requirement, a maximum of 20% of the total hours required for a stackable graduate certificate, rounded up to the next nearest integer, may be satisfied through the application of approved graduate transfer coursework. Transfer credit must meet the standards outlined in the Graduate Catalog at [https://gradschool.utexas.edu/academics/policies/transfer-credit](https://gradschool.utexas.edu/academics/policies/transfer-credit).

Non-degree-seeking students who are admitted to a graduate certificate program must complete all coursework for the certificate in residence at the University.

**Application of Stackable Certificate Coursework Taken in Non-degree Status Toward a Graduate Degree**

Admission to and enrollment in a stackable graduate certificate program does not guarantee admission to a graduate degree program. A graduate non-degree-seeking student who wishes to seek a graduate degree must meet the requirements for admission, submit all required materials and items by the program’s deadline, and pay the standard application fee.

Under normal circumstances, no more than six hours of coursework completed in non-degree status may be applied towards a graduate degree. Upon request, however, this limit may be extended for students who complete a stackable graduate certificate while in non-degree status. Specifically, with approval of a program GSC and the Graduate Dean, the greater of 18 credit hours or 50% of the total hours required for a degree may be satisfied with coursework completed for a stackable graduate certificate while the student was enrolled in the non-degree status, inclusive of:

a. transfer credits  
b. undergraduate courses reserved for graduate credit  
c. credit hours accrued as a non-degree seeking student.

**Transcript Notation**

Some stackable graduate certificates may be awarded following completion of program requirements, while others require simultaneous wording of the graduate certificate and a graduate degree. For more information, see the catalog section for the school or college sponsoring the program in question.

Each of the following transcript-recognized stackable certificate programs is described in the catalog section for the program that sponsors it.

Libraries and Other Academic Resources

The University Libraries

The libraries of the University are a resource center for Texas and the Southwest, as well as a national resource center for library materials on Latin America, Texas, the history of the American South and West, and nineteenth- and twentieth-century British, French, and American literature. Libraries include the University of Texas Libraries, the Dolph Briscoe Center for American History, the Harry Ransom Humanities Research Center, and the Joseph D. Jamail Center for Legal Research: Tarlton Law Library. The University of Texas Libraries include the Perry-Castañeda Library, the Nettie Lee Benson Latin American Collection, six science and technology libraries, and several other branches and special collections.

The University Libraries website serves as the gateway to an array of online information resources. These include the online library catalog which provides information on most items located in the collections of the University of Texas Libraries, the Dolph Briscoe Center for American History, and the Humanities Research Center, and a partial listing for items in the Law Library. The University Libraries website also offers access to millions of pages of specially licensed scholarly information, including the full text of articles and illustrations from thousands of journals, the full text of about 80,000 books in electronic format, several hundred indexes, and an extensive online map collection. A variety of library services are also available online.

Detailed information about the University Libraries is given in General Information.

Dolph Briscoe Center for American History

The Dolph Briscoe Center for American History is a special collections library, archive, and museum that facilitates research and sponsors programs on the historical development of the United States. The center supports research and education by acquiring and preserving research collections and making them accessible and by sponsoring exhibitions, conferences, fellowships, and grant-funded initiatives. Research collection strengths are the history of Texas, the South, the Southwest, and the Rocky Mountain West, congressional history, and other specific national topics.

More information is given in General Information.

Harry Ransom Center

The Harry Ransom Center is one of the world’s foremost institutions for literary and cultural research. It offers resources in a number of disciplines and periods, but its principal strength is in its collections of twentieth-century British, American, and French literature. The center houses about a million books, thirty million manuscripts, five million photographs, and more than one hundred thousand works of art.

More information is given in General Information.

Information Technology Services

Information Technology Services (ITS) supports the University’s academic and research programs by providing an information-technology-based environment, technological capabilities, and a staff to assist students, faculty and staff members, academic departments, and research centers with their learning, teaching, research, and outreach activities. ITS provides the University’s core computing, wired and wireless networking, video conferencing, satellite conferencing, network directory, domain name, and information processing infrastructure, as well as a broad range of services and support programs.

The facilities and services provided by ITS are described in General Information.

Law Library

The Joseph D. Jamail Center for Legal Research: Tarlton Law Library is one of the largest academic law libraries in the country, with more than a million volumes of codes, statutes, court decisions, administrative regulations, periodicals, textbooks, and treatises on law and related fields. It offers a strong collection of foreign and international legal materials.

More information is given in General Information.

Other Libraries in Austin

The Lyndon Baines Johnson Library and Museum, located on campus, is operated by the National Archives and Records Administration. This library is a valuable resource for the study of the twentieth century. Faculty members and students also have access to other public and private libraries in the Austin area, including several special-interest libraries.

Perry-Castañeda Library

This six-level open stack library contains more than 2.5 million volumes and is the main library of the University. It serves most subject areas but emphasizes the humanities; the social sciences; business; education; nursing; social work; and European, East European, Asian, Middle Eastern, Hebraic, and Judaic studies. Special materials include United States and United Nations official documents, current journals, and newspapers. On-site reference service is offered, and graduate students may consult subject bibliographers to identify useful resources and gain access to them.

Research Facilities

The University offers some of the most extensive university research facilities in the United States. There are more than a hundred organized research units on campus and many other informally organized laboratories; they give graduate students the opportunity to conduct laboratory and field research in almost all fields of study. Internships are also offered in many fields.

Special Collections and Branch Libraries

The Nettie Lee Benson Latin American Collection, an internationally recognized resource for research in Latin American and United States Latino studies, contains more than a million volumes of books, pamphlets, and journals, in addition to extensive collections of manuscripts, maps, newspapers, photographs, recordings, and microfilm. It includes materials on any subject related to Latin America or written by a Latin American, regardless of language.

The branch libraries are the Architecture and Planning Library (including the Alexander Architectural Archive), the Mallet Chemistry Library, the...
Financial Aid

Fellowships

University fellowships, which are administered through the Graduate School, are awarded to both new and continuing graduate students in most academic areas. Students must be nominated by their graduate advisors for any fellowship administered by the Graduate School. Additional information is available from the Graduate School.

University recruiting fellowships for entering graduate students are awarded on the basis of scholastic excellence and adequate preparation for graduate study in the student’s chosen field, as shown by the student’s academic record and letters of recommendation. University fellowships for continuing students are awarded on the basis of the student’s record since entering the Graduate School, including performance in relevant coursework and research or creative activity, letters of recommendation from University faculty members, and the endorsement of the graduate advisor; financial need is also considered. There are additional specific qualifications for many of the competitive fellowships awarded by the University and by graduate programs. Generally, fellowships require no service from the recipient. Major fellowships provide for payment of nearly all tuition in addition to the stipend.

Assistantships

Various teaching, research, and academic assistantships are awarded by the departments. These appointments require specific service. Nonresidents and international students who hold assistantships of at least 20 hours a week may pay resident tuition if the assistantship duties are related to the student’s degree program. Applicants may indicate on the admission application that they would like to be considered by the graduate program for a teaching assistantship or a research assistantship. Enrolled students should apply directly to the department in which they would serve.

Additional Financial Aid and Deadlines for Financial Aid

The Office of Scholarships and Financial Aid offers financial assistance in the form of gift aid, which includes grants and scholarships, and self-help aid, which includes student employment programs and long-term loans. To apply for these programs, all applicants are encouraged to complete the Free Application for Federal Student Aid (FAFSA). More information about these programs and deadlines for filing the FAFSA are published on the Texas One Stop website in the financial aid section.

Individual graduate programs may also offer financial assistance to their students. For more information about these programs and deadlines for applying to them, applicants should contact the graduate program of interest. Financial aid decisions are made soon after program application deadlines, and applicants whose materials have not been received may not be given full consideration.

Student Services

In addition to student services provided by the Office of Graduate Studies, support services for students are provided by several other offices, including University Housing and Dining; University Health Services; the Counseling and Mental Health Center; and Parking and Transportation Services. The functions of these and similar offices are described in General Information.

Graduate students are represented on campus and in the community by the Graduate Student Assembly, described below. In addition, there are social and professional groups for graduate students in most fields of study, and hundreds of registered student organizations that are open to undergraduates and graduate students.

Graduate Student Assembly

The Graduate Student Assembly (GSA) is the official representative body for graduate students. GSA addresses issues that are important to its constituents, not only as students but also as teaching assistants, research assistants, and assistant instructors. GSA reports administratively to the vice provost and dean of graduate studies and the vice president for student affairs. Administrative expenses are funded through an allocation from students’ tuition.

The objectives of GSA are to represent the views of graduate students to the University community and the community at large; to facilitate graduate student communication and interaction; to gather and disseminate information pertinent to graduate students; to conduct activities that promote the general welfare of graduate students; and to provide a means of assisting in the selection of graduate student members of departmental, college, and University bodies.

More information about GSA, including contact information for officers, current representatives, meeting agendas and minutes, and current and past activities, is available at the GSA’s website.

Student Responsibility

While University faculty and staff members give students academic advice and assistance, students are expected to take responsibility for their education and personal development. They must know and abide by the academic and disciplinary policies given in this catalog and in General Information, including rules governing quantity of work, the standard of work required to continue in the University, warning status and scholastic dismissal, and enforced withdrawal. Students must also know and meet the requirements of their degree program; must enroll in courses appropriate to the program; must meet prerequisites and take courses in the proper sequence to ensure orderly and timely progress; and must seek advice about degree requirements and other University policies when necessary.

The student must give correct local and permanent postal addresses, telephone numbers, and e-mail address to the Office of the Registrar and must notify this office immediately of any changes. Official correspondence is sent to the postal or e-mail address last given to the registrar; if students have failed to correct this address, they will not be relieved of responsibility on the grounds that the correspondence was not delivered. Students may update their addresses and telephone numbers at the Office of the Registrar’s website.

Students must register by the deadlines given in the Course Schedule and must verify their schedule of classes each semester, must see that necessary corrections are made, and must keep documentation of all schedule changes and other transactions.

Students should be familiar with the following sources of information:
Catalog

The University catalog is an official University publication describing academic programs, student services, general regulations, requirements and procedures.

The catalog of the University is the document of authority for all students. Any academic unit may issue additional or more specific information that is consistent with approved policy. However, the information in the catalog supersedes that issued by any other unit if there is a conflict between the two. The University reserves the right to change the requirements given in the catalog at any time.

The catalog consists of five issues: the Undergraduate Catalog, the Graduate Catalog (p. 6), the Law School Catalog, the Medical School Catalog, and the General Information Catalog.

The Undergraduate Catalog is published in even-numbered years; the Graduate Catalog is published annually; the Law School Catalog is published in even-numbered years; the Medical School Catalog is published annually. These issues contain regulations and degree requirements that apply to undergraduate, graduate, School of Law, and School of Medicine students. Regulations are valid only for the academic years indicated by the dates in the title of each publication; for an explanation of the period for which degree requirements are valid, see the section “Graduation Under a Particular Catalog” in each issue.

The General Information Catalog, published annually, contains current and historical information about the University’s organization and physical facilities. It gives important information about academic policies and procedures that apply to all students for the academic year indicated in the title of the publication. It includes the official academic calendar, admission procedures and residence requirements, information about tuition and fees, and policies on quantity of work, grades and the grade point average, credit by examination and correspondence, adding and dropping courses, withdrawal from the University, and scholastic probation and dismissal. General Information is meant to be used along with each of the other issues; students must be familiar with the regulations given there and with those given in the issue that covers their degree program.

The lists of available course offerings for each academic unit are correct at the time of publication but are subject to change. They are superseded by course offerings published each semester in the Course Schedule.

Assistance in obtaining information about the University—including costs, refund policies, withdrawal, academic programs, the faculty, accreditation, and facilities and services for disabled persons—is available from Brenda Schumann, Interim Registrar, at (512) 475-7510 and at The University of Texas at Austin, Office of the Registrar, P O Box 7216, Austin TX 78713-7216.

Course Schedule

The Course Schedule is published by the Office of the Registrar and is available before registration for each semester. The Course Schedule includes information about registration procedures; times, locations, instructors, prerequisites, and special fees of classes offered; and advising locations.

Directory

The University directory gives physical and e-mail addresses and telephone numbers of students and faculty and staff members.
A nonrefundable application fee is required with each application for admission to the Graduate School, the McCombs School of Business, or the School of Law. Current fee amounts are given in the Application Processing Fee section of the General Information Catalog. Under certain circumstances, applicants to the Graduate School may be eligible for a waiver of the application fee; additional information about the fee waiver is available online. Applicants may apply simultaneously to more than one graduate program; a fee may be charged for each application.

1 Please see https://gradschool.utexas.edu/admissions/how-to-apply/international-students for exceptions.

**Admission**

**Admission Requirements**
For information regarding the Graduate Admission requirements, please see the General Information Catalog.

**Graduate School Select Admission Program**
For information regarding the Graduate School Select Admission Program, please see the General Information Catalog.

**Admission with Conditions**
For information regarding Conditional Admission, please see the General Information Catalog.

**Admission as a Nondegree Student**
For information regarding Admission as a Nondegree Student, please see the General Information Catalog.

**Applying for Admission**
Application for admission to the Graduate School consists of submitting the official online application form, transcripts, test scores, and processing fees to the Graduate and International Admissions Center (GIAC). Instructions and forms are available at the Graduate School's admissions website. Students may also indicate their interest in assistantships and fellowships on the application form.

Each graduate program may require the submission of additional materials. These materials vary by program, but examples include letters of reference, auditions, samples of the student’s work, and personal statements. Information about required materials is available from the graduate program.

Because graduate programs set and maintain their own application deadlines, applicants must be sure to inquire about the deadline for the program to which they are applying. Many programs have deadlines as early as December 1 for the following summer semester or fall semester, but some programs set different dates. Few graduate programs admit new students for the spring semester; those that do generally have deadlines no later than October 1. It is the applicant's responsibility to meet the deadline set by the graduate program. A list of program deadlines is given at the Graduate School's admissions website.

**Deadlines for those seeking financial aid.** Information about financial aid and financial aid deadlines is given on the Financial Aid page (p. 17).

**International Students**
In addition to meeting the general requirements for admission, international applicants must demonstrate sufficient competence in English to study effectively at the University, unless otherwise exempt. These applicants are required to submit scores for either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) to the Graduate School. Information about TOEFL and IELTS is published online.

Because transcripts from foreign universities require special evaluation, prospective international students are advised to complete their application well in advance of deadlines. Early submission gives the University enough time to process the application and gives the applicant enough time to obtain visas and make travel arrangements if admission is granted. A nonrefundable application fee is required with each application for admission to the Graduate School, the McCombs School of Business, or the School of Law. All payments must be in US dollars and drawn on US banks. Current fee amounts are given in the Application Processing Fees section of the General Information Catalog.

International students must maintain approved comprehensive health insurance or coverage. The student's registration bill includes the premium for the University health insurance policy, unless approval to substitute alternate, comparable coverage has been given by the International Office.

**Enrollment Deposit**
Some graduate programs require students to pay a nonrefundable enrollment deposit upon admission to indicate that they accept the offer of admission. The current amounts of these deposits are given in the General Information section of the General Information Catalog. For students applying to dual degree programs, one deposit serves to confirm the student's intention of enrolling in both programs. When both programs require deposits, only the higher fee is required. The deposit is applied to the payment of fees when the student enrolls.

**Readmission**
All graduate students are expected to enroll and pay tuition by the twelfth class day of the fall semester and the spring semester of each academic year until they graduate. A student who does not do so must apply for readmission in order to return to the University. The student must submit an Application for Readmission to the Graduate and International Admissions Center (GIAC) by the deadline given in the General Information section of the General Information Catalog and must pay the application fee. The fee is waived if the student has received an official leave of absence as described in Continuous Registration (p. 22). Students must also obtain the approval of the graduate advisor in the program in which they were last enrolled. Readmission to a graduate program is not guaranteed. Former graduate students who were in good standing when they left the University are not required to submit official transcripts unless they are requested by the student's graduate program.

To change to a different major, the student must submit an Application for Admission to Another Graduate Major to the Graduate School, as described on the Application to Another Graduate Major (Change of Major) page (p. 23).

**Exchange Students**
A graduate student who is admitted to the University through a reciprocal exchange program is classified as a nondegree student. An exchange student may not register for more than two fall/spring terms and one summer term. The transferability of academic credit to the student's home institution is determined by the home institution.
An exchange student who wishes to take a graduate course must obtain the approval of the instructor and of the graduate advisor for the program that offers the course, and must meet all course prerequisites, and must meet any other requirements affecting nondegree students. The rules that apply to nondegree students are given in General Information.

An exchange student may later apply for admission to the University as a degree-seeking graduate student. To do so, the student must submit the usual test scores, application fee, and other required material by the appropriate deadline, as described in “Applying for Admission” on the Admission page (p. 18). If the applicant is admitted, the Graduate Studies Committee may seek the graduate dean’s approval to include on the Program of Work for the master’s degree up to six hours of graduate coursework that the student completed as a nondegree exchange student. All requirements related to courses that may be counted toward graduate degrees apply, including rules concerning courses counted toward another degree.

Registration

University students register online for each semester. Complete information about the registration process is given in the Course Schedule.

Registration for New Graduate Students

Applicants are notified by e-mail of their admission or denial. Admitted applicants should notify their graduate advisors as soon as possible whether they plan to accept admission. Either in an interview or by correspondence, admitted applicants should then learn the specific requirements of their graduate program. Students should consult the Course Schedule to learn whether advising before registration is required in their major area.

Late Registration

Students are expected to register at their earliest opportunity. A student who registers late is charged a fee to defray the cost of the extra services necessary to effect the late registration. Late registration periods are identified in the Course Schedule each semester (spring, fall, and summer). Students may register after the fourth class day in a fall or spring semester or the second class day in a summer term only with the approval of the department chair, graduate advisor, the student’s dean, and the registrar. Registration after these dates is approved only in unusual circumstances.

Registration for Continuing Graduate Students

Continuing graduate students should consult the Course Schedule to learn whether advising before registration is required in their major area.

To continue in the Graduate School beyond the first term, the student must make satisfactory progress in fulfilling any admission conditions that were imposed, meet any requirements made in writing by the Graduate Studies Committee, maintain a graduate grade point average of at least 3.00, and receive the approval of the Graduate Studies Committee. For more information about grade requirements, see Graduate Credit (p. 21).

Registration Following Graduation

Graduate students who wish to continue enrollment beyond the term in which their degree is awarded must be admitted as nondegree-seeking students or as degree-seeking students in a new degree program. Students must request a change of major or degree-seeking status from the Graduate School.

Course Load (Quantity of Work Rule)

Please see General Information, Academic Policies and Procedures, Quantity of Work Rule for information about course load.

Maximum Course Load

The maximum course load for a graduate student is published in General Information > Academic Policies and Procedures > Quantity of Work Rule.

Full-Time Course Load

There is no minimum course load for graduate students. Please see General Information > Academic Policies and Procedures > Quantity of Work Rule for the Graduate School’s full-time course load requirements.

Agencies that grant loans or provide for educational funding may establish different definitions of full-time status. Students should be familiar with the regulations of any agency to which they have an obligation.

Under various circumstances, graduate students must register for and must remain registered for a full-time load. In other circumstances, graduate students must register and must remain registered for a minimum number of hours; those requirements are given below.

Holders of Graduate School–administered fellowships and scholarships: Nine hours each fall or spring semester and three hours in the summer semester (in any combination of summer terms).

Graduate student academic employees: Please see General Information > Academic Policies and Procedures > Quantity of Work Rule for the Graduate School’s full-time course load requirements for graduate student academic employees.

Students receiving certain student loans should consult the Office of Scholarships and Financial Aid for course-load regulations.

Students living in University housing should consult University Housing and Dining for course-load regulations.

International students: Nine hours each fall or spring semester. International students must consult with International Student Scholar Services and must have the written permission of their dean to take fewer than nine hours. No minimum load is required in the summer. Some approved courses in English as a second language do not carry University credit, but each course is considered the equivalent of a three-hour course for purposes of the course load requirement. Students may enroll in these courses with the approval of their graduate advisor.

Affiliated studies: Students enroll in affiliated studies (AS) when they participate in a study abroad program offered by an institution with which the University has an affiliation agreement. Students enrolled in affiliated studies are considered full-time students, but are not eligible to serve as graduate student academic employees. More information about affiliated programs is given in General Information.

International study and research: Students may enroll in international study and research (ISR) when they conduct research or study independently abroad. A student enrolled in international study and research is considered a full-time student, but are not eligible to serve as graduate student academic employees. When a doctoral candidate receives approval to enroll in ISR, that enrollment is an acceptable substitute for registration in dissertation hours, except in the final
In Absentia Registration

See General Information, Registration, Tuition, and Fees, In Absentia Registration for information about registering In Absentia.

Adding and Dropping Classes

Please see General Information, Academic Policies and Procedures, Adding and Dropping Classes for information about adding and dropping classes.

Evaluation

Withdrawal from the University

Dropping an entire course load constitutes withdrawal from the University for that semester.

To withdraw from the Graduate School, a student must file with the graduate dean a withdrawal petition, a form that also explains refund policies. The student may withdraw through the last day of the semester. If the student abandons their courses without withdrawing, the instructor in each class determines what grade should be recorded.

Students in a warning status because of failure to maintain a grade point average of at least 3.00 may not withdraw without a petition from the graduate advisor and the approval of the graduate dean.

Students may not be employed in an academic position beyond the last date of their enrollment. Students must end their academic appointments prior to withdrawing.

Degree Requirements

The general requirements for graduate degrees are given in this chapter. Specific requirements and course descriptions for each graduate program are given in Areas of Study (p. 27). Detailed information about each degree program is available from the graduate advisor and the graduate coordinator for that program.

Limitation for Faculty

No tenured member of the faculty of The University of Texas at Austin may pursue an advanced degree at this institution.

Grade Point Average

The graduate grade point average is calculated by the registrar and appears on the student's official record maintained by the registrar. To graduate, all graduate students must have a graduate grade point average of at least 3.00. Additionally, candidates for the master's degree must also have a grade point average of at least 3.00 in courses included on the Program of Work. Individual Graduate Studies Committees may set grade point average requirements of 3.00 or higher for all or a portion of their students' coursework.

Additional information about grades, symbols, and the graduate grade point average is given in General Information.

Graduate Credit

Only the courses that appear on the student's Program of Work are counted toward the degree. The following policies govern the inclusion of courses on the Program of Work.

Courses Taken in Residence

Courses completed with a letter grade. Courses in which the student earned a grade of at least C while registered in the Graduate School may be included in the Program of Work, although some programs may restrict the use of such courses.

Courses completed on the credit/no credit basis. Graduate programs may allow up to 20 percent of the hours on the Program of Work for a master's degree to be taken on the credit/no credit basis, and no more than a comparable portion of the Program of Work for the doctoral degree. Thesis, master's report, master's recital, dissertation, and treatise courses, which are offered only on the credit/no credit basis, are not included in the 20 percent. More information about credit/no credit grading is given in General Information.

Courses with incomplete grades. Courses for which the symbol X (incomplete) or I (permanent incomplete) is recorded may not be included on the Program of Work. More information about incomplete grades is given in General Information.

Transfer of Credit

Ordinarily, all work for the master's degree must be done at The University of Texas at Austin. Under some circumstances, a maximum of six semester hours of graduate coursework in which the grade is B or higher may be transferred to the Program of Work from another institution, but only on the basis of a petition by the Graduate Studies Committee and with the approval of the graduate dean. (In the School of Nursing, a higher number of hours may be transferred in some degree programs.) A student seeking a transfer of credit must provide the Graduate School with an official transcript and an official explanation of the course numbering and grading systems at the school at which the credit was earned. Only graduate courses may be transferred. Work counted toward a degree at another institution cannot be transferred. Students are encouraged to seek approval before taking any coursework they plan to transfer. Students should not take courses at another institution during the semester they plan to graduate because the grades may not be received in time to certify the student's Program of Work for graduation. Unless its inclusion has been approved by the graduate dean, no coursework listed on the Program of Work may be over six years old.

The doctoral Program of Work normally includes no more than six semester hours of courses transferred from another university. The Graduate School recognizes that the academic background of each doctoral student is different, and exceptions to the six-hour maximum may be granted with approval of the Graduate Studies Committee.

Transferred coursework as described in this section appears only on the student's Program of Work. It does not appear on the official student record maintained by the registrar. Because it is not part of the official record, such coursework does not appear on the student's transcript and is not included in either the graduate grade point average or the Program of Work grade point average.

Extension Credit

Up to six semester hours of work done in extension classes through the University Extension Office may be listed on the Program of Work, with the approval of the Graduate Studies Committee and the graduate dean. The extension credit must be in graduate courses; the courses
and instructors must be approved in advance by the Graduate School and by the program in which the student would otherwise take the work on campus; and the student must be admitted to the Graduate School before taking the extension courses. Because students must be registered at the University in the semester in which they graduate, they cannot be registered solely for extension courses in their final semester.

All grades in graduate courses taken through Continuing and Innovative Education are included in the graduate grade point average.

**Correspondence Credit**

Courses taken by correspondence may not be counted toward graduate degrees.

**Credit by Examination**

Credit by examination may not be counted toward graduate degrees.

**Enrollment of Undergraduates in Graduate Courses**

**Graduate Work for Undergraduate Credit**

An undergraduate may enroll in a graduate course under the following conditions:

a. The student must be an upper-division student and must fulfill the prerequisite for the course (except graduate standing).

b. The student must have a University grade point average of at least 3.00.

c. The student must receive the consent of the instructor of the course and of the graduate advisor for the field in which the course is offered. Some colleges and schools may also require the approval of the dean's office. Individual divisions may impose additional requirements or bar undergraduates from enrolling in graduate courses.

d. Students in most colleges must have their dean's approval before they register for a graduate course.

Undergraduate students may not enroll in graduate courses that have fewer than five graduate students enrolled.

A graduate course taken by an undergraduate is counted toward the student's bachelor's degree in the same way that upper-division courses are counted, unless the course is reserved for graduate credit as described in the next section. Courses reserved for graduate credit may not also be used to fulfill the requirements of an undergraduate degree.

An undergraduate student enrolled in a graduate course is subject to all University regulations affecting undergraduates.

**Reservation of Work for Graduate Credit**

Under the following conditions, a degree-seeking undergraduate may enroll in a graduate course and reserve that course for credit toward a graduate degree:

a. The student must have a University grade point average of at least 3.00.

b. The student must have completed at least 90 semester hours of coursework toward an undergraduate degree.

c. The student may not register for more than 15 semester hours in the semester or for more than 12 semester hours in the summer semester in which the course is reserved.

d. No more than 12 semester hours may be reserved for graduate credit.

e. All courses reserved for graduate credit must be approved by the twelfth class day of the semester or the fourth class day of the summer semester by the course instructor, the student's undergraduate advisor, the graduate advisor in the student's proposed graduate major area, the dean of the student's undergraduate college, and the graduate dean. A form for this purpose is available on the Graduate School website.

An undergraduate student enrolled in a graduate course is subject to all University regulations affecting undergraduates.

A student who reserves courses for graduate credit must be admitted to a University graduate program through regular channels before the credit may be applied toward a graduate degree. By allowing a student to earn graduate credit while still an undergraduate, the University makes no guarantee of the student's admissibility to any graduate program.

A course reserved for credit may be listed on the student's Program of Work for the master's or doctoral degree. Because it was taken before the student entered the Graduate School, it is not included in the graduate grade point average.

**Use of the Course 398T on the Program of Work**

With the consent of their Graduate Studies Committee, students may include the college teaching methodology course, numbered 398T, on the Program of Work. Master's degree students may include up to three semester hours. Doctoral degree students may include up to six semester hours, if they complete both introductory and advanced teaching methodology courses.

**Courses Counted toward Another Degree**

No course counted toward another degree may be counted toward a master's degree, either directly or by substitution.

Work done for the master's degree may be included in the work for the doctoral degree, provided it is acceptable to the Graduate Studies Committee, the supervising committee, and the graduate dean and provided it has not already been used toward another doctoral degree.

Students in a dual degree program must meet the course requirements for both degrees. Courses common to the two curricula in a dual degree program are included on the Program of Work for one of the degrees and are waived by the other degree program as specified in the dual degree program requirements. The Program of Work on which courses are waived must meet the Graduate School's minimum-credit-hour requirements for the degree. A list of approved dual degree programs is given on the Dual Degree Programs (p. 10) page.

**Continuous Registration**

All graduate students are expected to enroll and pay tuition by the twelfth class day of the fall term and the spring term of each academic year until graduation. If the student has been admitted to candidacy for the doctoral degree, registration in the dissertation course or the equivalent or in international study and research (ISR) is required. The only alternative to continuous registration is a leave of absence, discussed in the Leave of Absence for Graduate Students section.

In order to fulfill the continuous registration requirement, doctoral candidates who are readmitted must register retroactively and pay tuition for all long terms that have elapsed since they were last enrolled.

If a student who is not on approved leave fails to register by the twelfth class day, the student may not return to the University without applying for readmission. The student must apply for readmission both to the
University and to the graduate program and must pay the general application fee. The application is reviewed by the Graduate Studies Committee, which may choose to readmit the student or to deny readmission.

### Leave of Absence

Degree-seeking graduate students may apply for a leave of absence of no more than two long terms. Requests for a leave of absence must be approved in advance by the graduate advisor and the graduate dean. Applications from students who have been admitted to candidacy will be approved by the graduate dean only in rare and unusual circumstances.

A student on approved leave must apply for readmission in order to return to the University, but readmission during the approved period is automatic and the application fee is waived.

A student on leave may not use any University facilities; nor is the student entitled to receive advice from any member of the faculty. A leave of absence does not alter the time limits for degrees or coursework.

### Application to Another Graduate Major (Change of Major)

To change their major, students must submit the form Application for Admission to Another Graduate Major to the Graduate School Graduate and International Admissions Center (GIAC). The application must be approved by the graduate advisor in the new program. Students should consult the graduate advisor for the proposed new major about deadlines and additional requirements, procedures, and materials.

If the student has been away from the University for a semester or longer and are wishing to return to the program within which they were last enrolled, they must apply for readmission as described on the Readmission page (p. 19).

### Warning Status, Academic Dismissal, and Termination

#### Graduate Students

To continue in the Graduate School beyond the first term of enrollment, the student must make satisfactory progress in fulfilling any admission conditions that were imposed, meet any requirements made in writing by the Graduate Studies Committee, maintain a graduate grade point average of at least 3.00, and receive the approval of the student’s Graduate Studies Committee.

Graduate Studies Committees are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If the Graduate Studies Committee finds that a student is not making satisfactory progress, it may recommend to the graduate dean that the student’s program be terminated.

A graduate student whose cumulative graduate grade point average falls below 3.00 at the end of any term of enrollment will be warned by the Office of Graduate Studies that their continuance in the Graduate School is in jeopardy. The student must attain a cumulative graduate grade point average of at least 3.00 during the next term they are enrolled or be subject to dismissal. During this period, the student may not drop a course or withdraw from the University without the approval of the graduate advisor and the graduate dean.

A graduate student who has been dismissed may be readmitted for further graduate study only by petition of the Graduate Studies Committee in the student’s major area or by the Graduate Studies Committee of another program that will accept the student. The petition must be approved by the graduate dean and will only be approved for rare and extenuating non-academic reasons.

Scholastic warning status and academic dismissal are reflected on the student’s permanent record.

Additional information about grades and the grade point average is given in General Information.

### Time Limits

#### Master’s Degree

All requirements for a master’s degree must be completed within one six-year period. Work over six years old may be reinstated only with the permission of the graduate dean, upon recommendation of the Graduate Studies Committee. The Graduate Studies Committee will review the program of every student yearly; the results of this review will be provided to the student in writing. At those times, the committee may recommend additional coursework, further examinations, or termination of candidacy. In addition, the program is subject to review by the graduate dean.

See Graduation for more information.

#### Doctoral Degree

All completed work that is included in a doctoral student’s degree program at the time of admission to candidacy must have been taken within the previous six years (exclusive of a maximum of three years of United States military service). Work over six years old may be reinstated upon recommendation of the Graduate Studies Committee. The Graduate Studies Committee will review the program of every student yearly; the results of this review will be provided to the student in writing. At those times, the committee may recommend additional coursework, further examinations, or termination of candidacy. In addition, the program is subject to review by the graduate dean.

### The Master’s Degree

The following general requirements for the master’s degree set a minimum standard. With the approval of the graduate dean, specific programs may impose additional requirements.

#### Prerequisites

Every master’s degree program assumes that participants have a general college education through the baccalaureate level. Accordingly, to enter a master’s degree program a student must hold a baccalaureate degree from a regionally accredited United States institution or proof of equivalent training outside the United States. The student must also have taken at least 12 semester hours of upper-division undergraduate coursework in the area of the proposed graduate major or must have the consent of the graduate dean. Some areas may require more undergraduate preparation. Students who lack adequate preparation may be admitted to a graduate program on the condition that they complete additional preparatory coursework designated by the graduate advisor. These courses are in addition to the 30 semester hours or more required for the master’s degree itself.

#### Options

The Graduate School recognizes four options under which a student may pursue the master’s degree: with thesis, with report, with recital, and without thesis, report, or recital. All four options may not be available in any one field of study; information about the options that are possible is
available under Areas of Study (p. 27) or from the student's graduate advisor.

For each option, the Graduate School requires at least 30 semester hours of credit. Individual programs may have higher requirements. No more than nine semester hours of upper-division coursework may be included on the Program of Work, and no more than six of these hours may be in the major area. In some degree programs and options, the number of upper-division hours allowed is lower.

At least 18 semester hours must be in the major area; the thesis, report, or recital course, if part of the program, must be in the major. At least six hours must be in supporting work. Supporting work, is a required part of each degree program. It consists of coursework outside the major area, although the Graduate Studies Committee may permit some or all of it to be taken in other areas within the program.

The exact number of hours in the major area and in supporting work is determined in consultation with the graduate advisor. The Graduate Studies Committee must then review and approve the Program of Work, made up of the proposed courses in the major area and in supporting work. Courses listed on the Program of Work may not be more than six years old. The student may earn no more than 20 percent of the hours of credit listed on the Program of Work on the credit/no credit basis; thesis, report, and recital courses are not included in the 20 percent.

Master's degree with thesis or report. Each master's thesis or report is developed under the guidance of a supervising committee with two or more members, one of whom is designated as supervisor. The thesis or report is subject to the approval of the committee and ultimately of the graduate dean. The supervisor or co-supervisor must be a member of the Graduate Studies Committee in the major area. In general, all committee members should be members of a Graduate Studies Committee. Occasionally, scholars who hold nonfaculty appointments at the University — research scientists, research engineers, or adjunct faculty members — or off-campus scholars are appointed because their expertise would be valuable to the student. Individuals serving as a member of a thesis, report, dissertation, or treatise committee are generally expected to hold a terminal degree in the field and have an earned degree equivalent to or higher than the degree being pursued by the candidate. An equivalent record of exceptional professional accomplishment within the field may be considered in lieu of the terminal degree requirement. The composition of the committee is subject to the approval of the graduate dean.

The format of the report or thesis may range from the traditional document authored by a single student to a series of unrelated papers and/or journal articles with multiple authorship. Graduate School policy recognizes that approaches to the report or thesis vary across disciplines, and specifies only that the format chosen for students of a master's program be consistent with practices of similar programs in AAU institutions. Reports or theses containing one or more papers or articles must include brief introductions and conclusions that put the work in context and an acknowledgement of any previous publication of each paper in another report, thesis, dissertation, or other venue. In the case of multi-authored papers, students are allowed to include any portion of multi-authored works in their reports or theses only after receiving the approval of all other co-authors. In addition, a statement must be included explaining the contribution of the student to each paper. When papers or articles that have been previously published are included the report or thesis must include permission(s) of the copyright holder(s) for reproduction in the report or thesis. The supervising committee should review the stated contributions and be satisfied that the student's collective contribution to the multiple-authored papers or articles is sufficient to represent a report or thesis.

The thesis or report is normally written in English. Requests for permission to write in another language pertinent to the research will be granted when there are circumstances warranting an exception. An insufficient command of English is not justification for an exception. The petition from the graduate advisor should include assurance that faculty members competent both in the language and in the field are available and willing to serve on the supervising committee. The request must be approved by the graduate dean when the student is admitted to candidacy. The abstract and a substantial summary and conclusions section in English must be submitted with the thesis.

The student must submit the thesis or report in an approved electronic format to the Office of Graduate Studies. Information about format requirements is available from the Office of Graduate Studies. The thesis or report should be retained by the University Libraries and will be made available to the public through the Texas Digital Library. The student may request permission from the graduate dean to temporarily delay making the thesis or report available to the public in order to protect patent or other rights. This request must be supported by a written recommendation from the supervisor. The graduate dean makes the final decision regarding delayed publication.

Master's degree with thesis. Each student's Program of Work must include at least 21 semester hours of graduate courses, including at most six hours of thesis courses. Course 698A (research project) should precede course 698B (writing period); 698A may not be repeated for credit. Both 698A and 698B must be taken on the credit/no credit basis. Students must register for 698B the semester they intend to graduate. In the event that a student completes and submits their Master's thesis while enrolled in 698A, the student will be allowed to add 698B in the same semester in order to graduate. The thesis cannot be accepted before the semester in which the student applies for graduation.

Master's degree with report. Each student's Program of Work must include at least 24 hours of graduate courses, including at most three hours of the report course. Students must register for the master's report course on the credit/no credit basis during the semester that they file for graduation.

Master's degree with recital: Some students seeking the Master of Music complete a recital rather than a thesis. The student completes the two-semester course Music 698RA and 698RB, Master's Recital, rather than a thesis course. The recital is prepared under the direction of a supervisor, who is chair of the supervising committee, and graded by faculty members from the student's performance area. All other policies affecting the master's degree with thesis apply to the master's degree with recital.

Master's degree without thesis, report, or recital. Each student's Program of Work must include at least 24 semester hours of graduate courses. Students must be registered the semester they apply to graduate.

The Doctor of Philosophy

The Doctor of Philosophy (PhD) is a research degree designed to prepare students to discover, integrate, and apply knowledge as well as to communicate and disseminate it. The degree emphasizes development of the capacity to make significant original contributions to knowledge within the context of free inquiry and expression. Students pursuing this degree are expected to develop the ability to understand and to evaluate the literature of their field and to apply appropriate principles and procedures to the recognition, evaluation, interpretation, and understanding of issues at the frontiers of knowledge. In contrast to the PhD, other doctorates such as the Doctor of Education, the Doctor of
Audiology, the Doctor of Nursing Practice, and the Doctor of Musical Arts are designed for professional training.

**Course Requirements**

The Program of Work for the Doctor of Philosophy degree must have a minimum of 30 semester hours of advanced coursework, including dissertation hours. All the completed coursework that is included in a degree program at the time of admission to candidacy for a doctoral degree must have been taken within the preceding six years (exclusive of a maximum of three years of United States military service). Work over six years old may be reinstated upon recommendation of the Graduate Studies Committee. All doctoral work is subject to review by the graduate dean.

**Foreign Language Requirement**

The Graduate School has no foreign language requirement. However, many graduate programs require the study of one or more languages. These requirements are given in Areas of Study (p. 27) or are available from the graduate advisor.

**Graduate Studies Committee Requirements**

The Graduate Studies Committee specifies the coursework the student must complete, the qualifying examinations (written or oral or both) the student must pass, the conditions under which the student may retake all or part of an examination, and the procedures the student must follow in developing a dissertation proposal.

In consultation with the graduate advisor, the student proposes a Dissertation Committee to advise or direct the student on the research and writing of the dissertation. The student selects the chair of the Dissertation Committee, with the consent of that person.

**Admission to Candidacy**

Each student seeking the PhD must be admitted to candidacy on the recommendation of the Graduate Studies Committee in the major area. Students may not register for the dissertation course until they are admitted to candidacy, and completion of coursework does not in itself constitute admission. Formal admission to doctoral candidacy consists of the submission and approval of the following:

a. **Program of Work.** The Program of Work comprises a list of courses taken and proposed, the prospective dissertation title, and similar information. The Graduate Studies Committee must approve the Program of Work. The Dissertation Committee may, in review of the Program of Work, recommend additional course requirements to the Graduate Studies Committee.

b. **Dissertation Committee.** The Dissertation Committee advises the student on the research and writing of the dissertation, conducts the final oral examination, and approves the dissertation. The membership of the Dissertation Committee, proposed by the student with the consultation and approval of the graduate advisor, is submitted to the Graduate School for approval by the graduate dean. Individuals serving as a member of a thesis, report, dissertation, or treatise committee are generally expected to hold a terminal degree in the field and have an earned degree equivalent to or higher than the degree being pursued by the candidate. An equivalent record of exceptional professional accomplishment within the field may be considered in lieu of the terminal degree requirement. The committee consists of at least four members. At least three of the committee members, including the student’s supervisor or co-supervisor, must be Graduate Studies Committee members in the student’s major program, and at least one committee member must be from outside the student’s Graduate Studies Committee. The purpose of the outside committee member is to provide an independent assessment of the student’s mastery of their subject. The dissertation supervisor or co-supervisor serves as the committee chair. Changes to the Dissertation Committee after admission to candidacy require the approval of the student, current and new committee members, and the Graduate Advisor, with final approval by the Graduate Dean. Exceptions to this process may be granted by petition to the Graduate Dean.

c. **Dissertation Proposal.** A brief statement of the proposed dissertation must be submitted.

**The Dissertation**

The student must register for at least six hours of dissertation courses in order to graduate. A dissertation is required of every candidate.

The format of the dissertation today ranges from the traditional "book" authored by a single student to a series of unrelated papers and/or journal articles with multiple authorship. Graduate School policy recognizes that approaches to the dissertation vary across disciplines, and specifies only that the format chosen for students of a doctoral program be consistent with practices of similar programs in AAU institutions.

Dissertations containing one or more papers or articles must include brief introductions and conclusions that put the work in context and an acknowledgement of any previous publication of each paper in another dissertation or other venue. In the case of multi-authored papers, dissertators are allowed to include any portion of multi-authored works in their dissertations only after receiving the approval of all other co-authors. In addition, a statement must be included explaining the contribution of the dissertation to each paper. The contribution statement might include, for example, information about the dissertator’s contribution to designing research, performing research, contributing new reagents or analytic tools, analyzing data, writing the dissertation or other area-specific classification of research activities. When papers or articles that have been previously published are included, the dissertation must include permission(s) of the copyright holder(s) for reproduction in the dissertation. The supervisor and dissertation committee should review the stated contributions and be satisfied that the dissertator’s collective contribution to the multiple-authored papers or articles is sufficient to represent a dissertation.

The dissertation is normally written in English. Requests for permission to write in another language pertinent to the research are granted when there are circumstances warranting an exception. An insufficient command of English is not justification for an exception. The formal petition from the graduate advisor should include assurance that faculty members competent both in the language and in the field are available and willing to serve on the Dissertation Committee. The request must be approved by the graduate dean when the student is admitted to candidacy. The abstract and a substantial summary and conclusions section in English must be submitted with the dissertation.

The dissertation must be approved by the Dissertation Committee.

**Review of Progress**

During their first semester all students intending to pursue doctoral study are required to review and sign the Milestones Agreement Form with their program. The purpose of the form is to ensure that the student has been advised of the degree requirements, has been shown a list of major academic milestones for obtaining the PhD degree, and has been provided with an estimate of the timelines for reaching milestones.
The Graduate Studies Committee will review the program of every student yearly; the results of this review will be provided to the student in writing.

**Final Oral Examination (Defense of Dissertation)**

A satisfactory final oral examination is required for the approval of a dissertation. The exam is open to all members of the University community and the public, unless attendance is restricted by the Graduate Studies Committee. Every student has the right to defend their dissertation.

The dissertation, reviewed by the supervisor, should be submitted to each member of the dissertation committee at least one week before the defense. A written request to hold the final oral examination must be submitted to the Graduate School.

The examination covers the dissertation and the general field of the dissertation and such other parts of the student’s program as the committee determines. If the members of the committee are satisfied that the dissertation is a scholarly investigation in the major field which constitutes a contribution to knowledge and that the student has passed the final oral examination, they indicate approval on the Report of Dissertation Committee.

In the event that a committee cannot reach a unanimous decision concerning the dissertation, the matter is referred to the graduate dean for review. The results of the review are communicated to the student, the graduate advisor, the chair of the Graduate Studies Committee, the committee members, and the department chair, if applicable.

**Submission of the Dissertation**

After defending the dissertation, the student must submit it in an approved electronic format to the Office of Graduate Studies. The dissertation is retained by the University Libraries. Information about format requirements is available from the Office of Graduate Studies.

Dissertations must be made available to the public. A list of ways of doing this is available from the Office of Graduate Studies. The student may request permission from the graduate dean to temporarily delay making the dissertation available to the public in order to protect patent or other rights. This request must be supported by a written recommendation from the dissertation supervisor. The graduate dean makes the final decision regarding delayed publication.

Students may arrange for registration of copyright, at their own expense, by making arrangements directly with the copyright office at: https://www.copyright.gov/registration/.

**Approval of the Degree**

Upon approval by the Dissertation Committee of the dissertation and its defense, the Graduate Studies Committee certifies that the student has completed all degree requirements, has passed all required examinations, and is entitled to the award of the doctoral degree.

**The Doctor of Education**

The Doctor of Education (EdD) is a professional degree that emphasizes preparation for the highest levels of educational practice. It provides academic training and educational service experiences for individuals who will have leading roles in educational practice and who will help define the scope and functions of education in society. Programs are oriented toward the application of theory and research to issues of education and human development and to the development of skilled practitioners to fill a variety of roles in institutions that educate children, youth, and adults.

Students in educational leadership and policy complete a treatise; those pursuing the EdD in other fields complete a dissertation. Most policies affecting the EdD are similar to those described for the Doctor of Philosophy (PhD) (p. 24), such as the requirement for a minimum of 30 semester hours of advanced coursework, including dissertation or treatise hours. Additional policies on admission to the program and to candidacy are given below.

**Admission**

In addition to the requirements for admission to the Graduate School, each department may require evidence of successful performance in an educational setting and evidence of interpersonal problem-solving skills and other skills useful for predicting success in professional educational roles. The applicant must hold a master’s degree from a regionally accredited United States institution or the equivalent.

**Admission to Candidacy**

In addition to the requirements listed for the PhD degree, the curriculum must have a clear and predominantly applied focus. The student’s program normally entails an internship in an operational setting that is distinct from previous or concurrent work experience.

In addition to the requirements listed for the PhD degree in regard to the Dissertation Committee, at least one member of the committee must be from outside the major program or from the field of practice represented by the dissertation.

**The Doctor of Audiology**

The Doctor of Audiology provides academic and clinical training for those who plan to enter the profession of audiology. The degree program involves preparation for the diagnosis and management of hearing and balance disorders; it is designed to prepare audiologists to meet the standards for Texas state licensure in audiology.

The program requires a minimum of 99 semester hours of coursework and is designed to be completed in three years, with a fourth year consisting of a full-time clinical externship. All students in audiology complete the same set of courses and clinical practicum. Research practicum are part of the curriculum, culminating in a Capstone research project at the end of the third year. A dissertation is not required. Clinical practicum include on-site and off-site clinical training and placements, culminating in a one-year externship during the fourth year.

The Graduate Studies Committee in speech, language, and hearing sciences oversees the AuD degree program. More information about the program is available from the Graduate Advisor in Speech, Language, and Hearing Sciences.

**The Doctor of Musical Arts**

The Doctor of Musical Arts (DMA) degree allows for three majors: performance (including conducting, opera, collaborative piano, and voice pedagogy emphases), composition, and music and human learning (including conducting and piano pedagogy emphases). Most policies affecting the DMA are similar to those described for the Doctor of Philosophy (PhD) (p. 24), such as the requirement for a minimum of 30 semester hours of advanced coursework, including treatise hours. Candidates for this degree must pass a comprehensive examination. They must demonstrate outstanding professional competence, artistic maturity, and exceptional knowledge of the historical and practical
aspects of their major field. Each candidate must prepare a scholarly treatise in a field appropriate to the major or complete the alternative requirements of the nontreatise degree option. For composition majors, a musical work replaces the treatise. A jazz emphasis is available in each of the three majors.

Further information about requirements in various areas of concentration is available from the graduate advisor.

Graduation

The University holds commencement exercises at the end of the spring semester. Those who graduate in the preceding summer semester or fall semester are eligible to attend along with those who graduate in the spring semester. In addition, the Graduate School holds a Convocation at the end of the spring semester at which master’s and doctoral degree candidates are individually recognized.

Graduation under a Particular Catalog

Degree requirements may be changed from one catalog to the next. Students are normally bound by the requirements of the catalog in force at the time of their first registration; a student may choose, however, to fulfill the requirements of a subsequent catalog. If students do not fulfill the requirements within six years of their first enrollment in the Graduate School, they are then bound by the requirements of a subsequent catalog. Students may choose the catalog in effect in any year in which they are enrolled in the Graduate School, within the six-year limit.

Procedures of Graduation

Candidates for Master of Business Administration and Master in Professional Accounting degrees should consult advisors in their program for graduation procedures. All other degree candidates must follow the procedures below. More information — including detailed guidelines, deadlines, and forms — is available from the Office of Graduate Studies.

Master’s Degree Candidates

Must:

a. Be registered in the Graduate School in the semester in which they plan to graduate.
b. Submit the online Master’s Graduation Application, Program of Work, and post-graduation employment information via the Graduate School website by the published deadline; if their graduation is postponed, they must submit a new online Master’s Graduation Application in their subsequent semester of graduation.

c. Complete the Thesis/Treatise Option form. For composition majors, a musical work replaces the treatise. A jazz emphasis is available in each of the three majors.
d. Submit the signed Master’s Supervising Committee Approval form and all other required forms associated with degree certification to the Office of Graduate Studies by the published deadline.

Doctoral Degree Candidates

Must:

a. Be registered in the Graduate School in the semester in which they plan to graduate.
b. Have completed the Intellectual Property (Copyright) Tutorial. If the candidates’ research involves human subjects, they must have provided evidence of ethical review by the departmental review committee and, if appropriate, by the University Institutional Review Board. The Institutional Review Board form should be attached to the Statement of Research with Human Participants form.
c. Submit the online Doctoral Graduation Application via the Graduate School website by the published deadline; if their graduation is postponed, they must submit a new online Doctoral Graduation Application in their subsequent semester of graduation.
d. Provide each member of the Dissertation/Treatise Committee with a copy of the dissertation or treatise by the deadline the committee establishes.
e. Schedule the final oral examination with the Office of Graduate Studies.
f. Pass the final oral examination.
g. Upload the final dissertation in electronic format to the submission site by the published deadline.
h. Submit the signed Report of Dissertation Committee form and all other required forms and fees associated with degree certification to the Office of Graduate Studies by the published deadline.

Other Components of the University of Texas System

For information about graduate programs and courses at the following components of The University of Texas System, consult their current catalogs.

- The University of Texas at Arlington
- The University of Texas at Dallas
- The University of Texas at El Paso
- The University of Texas Permian Basin
- The University of Texas Rio Grande Valley
- The University of Texas at San Antonio
- The University of Texas at Tyler
- The University of Texas Southwestern Medical Center
- The University of Texas Medical Branch at Galveston
- The University of Texas Health Science Center at Houston
- The University of Texas Health Science Center at San Antonio
- The University of Texas MD Anderson Cancer Center

Areas of Study
School of Architecture

Facilities for Graduate Work

The School of Architecture is housed in four adjacent buildings at the heart of the campus: Battle Hall (1911) and Sutton Hall (1918, renovated in 1982), designed by the American architect Cass Gilbert; Goldsmith Hall (1933, expanded and renovated in 1988), designed by the French architect Paul Philippe Cret; and the West Mall Office Building (1961) by the Texas firm Jessen, Jessen, Millhouse, and Greeven.

The Architecture and Planning Library, a branch of The University of Texas Libraries, supports the School of Architecture by directly enhancing the value, relevance, and effectiveness of its teaching, research, and public service goals. The library, located in historic Battle Hall, also serves the public with ongoing exhibitions displayed in the grand reading room.

All students, faculty, and staff have convenient access to literature, information, and visual and digital resources that support education and research. While the library is located in close proximity to the school, its catalog, instructional guides, and digital content are web-based, allowing virtual discovery and access via the Internet. Staff provide expert information services that teach and develop research, as well as evaluative and critical thinking skills necessary for professional practice and lifelong learning. The Architecture and Planning Library is home to a large circulating collection, subject-specific journals, special collections of rare or unique publications, and the Alexander Architectural Archives, one of the largest such repositories in the country. Materials currently collected by the library and archive meet the curricular needs of the school’s programs and enable faculty and graduate students to undertake original research projects.

The Center for Sustainable Development, located in West Mall Building, supports sponsored research undertaken by the School of Architecture. The center is unique in its integration of diverse interests to develop creative, balanced, and achievable solutions to the physical and social challenges facing the planning, construction, and preservation of buildings, neighborhoods, landscapes, and regions. Its offices include space for Graduate Research Assistants (GRAs) to work on projects.

The Center for American Architecture and Design, located in Battle Hall, supports scholarship and criticism on architecture and related professional disciplines through lectures, exhibitions, seminars, and symposia. Regular scholarly publications of the center include CENTER and Centerline book series.

Comparative Mobility for Competitive Megaregions, located in West Mall Building, leads a consortium of universities to provide research that supports legal and analytical frameworks for megaregion transportation planning. It is a United States Department of Transportation Tier 1 University Transportation Center.

The Technology Lab and Service Desk, located in Sutton Hall, supports a variety of services for teaching and research including access to scanning, printing, and plotting systems. In addition, students can check out digital cameras, digital video cameras, laptops, projectors, light meters, and other digital resources. The Service Desk provides assistance with advanced design and analysis applications. The Digital Fabrication Lab provides access to a variety of digital fabrication tools for 3D scanning, 3D printing, laser cutting, and CNC routing. The related Robotics Lab provides access and support to students and faculty who wish to pursue advanced digital workflows that produce physical results. The Lighting Studio provides an area with photographic backdrops and controlled lighting to photograph architectural models and other objects. The Virtual Reality Lab supports dedicated hardware and software for immersive representations. The computer classrooms in the West Mall Building provide 56 dedicated workstations that serve as open computer lab space when not in use for classroom instruction.

The Build Lab/Wood Shop, located in Goldsmith Hall, plays an integral role in the creation of design—ranging from models to full-scale applications—by providing equipment and training, primarily in wood, but also in metal, plastic, and glass.

The Thermal Lab, a testing facility of the Center for Sustainable Development, allows experimentation of building façade treatments with respect to direct and indirect use of energy.

The Materials Lab, located in West Mall Building, is dedicated to material investigation in design and maintains a circulating library of material samples. The collection consists of traditional building construction materials as well as emerging, innovative, and sustainable materials and technologies. Material education is further supported through exhibitions, workshops, field trips, and in-house research.

The Architectural Conservation Lab, located in West Mall Building, is home to the Materials Conservation course series. Additionally, the space allows the Historic Preservation Program to establish affiliations with related facilities on the University campus, including the School of Information Book and Paper Conservation Labs and the Conservation Department at the Harry Ransom Center.

A variety of other facilities support students in their coursework and professional development. The school’s Career Services Center, located in Sutton Hall, assists students with finding internships, identifying employment prospects, and preparing for interviews and negotiations with potential employers. The Professional Residency Program (PRP) offers upper-level architecture students a unique opportunity to expand their education through work experience in the architectural profession. PRP has provided internship opportunities to honors students in the School since 1974 and, over the past 25 years, our students have been linked with 300 firms in 30 countries.

The Lady Bird Johnson Wildflower Center, located south of the main campus, conducts applied research on sustainable landscapes and ecosystem services, develops comprehensive educational materials, and consults on landscape development projects of all sizes to capitalize on the ability of sustainable landscapes to improve communities. The site consists of 284 acres, including nine acres of cultivated gardens.

The study of architecture, landscape architecture, and interior design draws upon the collections of the nearby Harry Ransom Center, which include china, clothing, decorative arts, furniture, silver, and textiles that contribute to the study of the interior; as well as original maps, texts, and drawings that supplement the teaching of landscape history. Historic rooms and suites on campus include the Willoughby-Blake Room, the John Foster and Janet Dulles Suite, the Republic of Texas Suite, the Office of the President, and the Esther Hobbitzelle Parlor. Other collections on campus include the 15,000 pieces of art, furniture, and accessories in the Elton and Martha Hyde collection and the collection...
of approximately forty chairs dating from the seventeenth through twentieth centuries that are housed in the Blanton Museum of Art.

The resources of the Teresa Lozano Long Institute of Latin American Studies and the Benson Latin American Collection, and the proximity of Austin to Latin America, provide exceptional opportunities for the study of Latin American architecture and planning. School of Architecture faculty and students also collaborate with the Environmental Science Institute, the School of Social Work, the Center for Transportation Research, the Population Research Center, the Center for Research in Water Resources, the Bureau of Economic Geology, the Energy Institute, and other allied institutes.

**Areas of Study**

The School of Architecture offers graduate degree programs in Architecture, Community and Regional Planning, Interior Design, Landscape Architecture, and Urban Design.

**Graduate Certificate in Latin American Architecture**

The School of Architecture administers a graduate certificate program in Latin American Architecture. The certificate program is open to current degree-seeking design students in the School of Architecture and requires completion of a total of 24 hours of graduate coursework, including 15 hours of required courses and nine hours of prescribed electives. The graduate certificate will only be awarded at the time of degree conferral. Admission requirements and details on the certificate program are available on the School of Architecture website.

**Architecture**

- Master of Architecture
- Master of Advanced Architectural Design
- Master of Arts
- Master of Science in Historic Preservation
- Master of Science in Sustainable Design
- Doctor of Philosophy

**Accreditation**

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

The University of Texas at Austin School of Architecture offers the following NAAB-accredited degree programs:

- B. Arch. (161 Undergraduate credits)
- M. Arch. (preprofessional degree + 60 credits)
- M. Arch. (non-preprofessional degree + 96 credits)

Next accreditation visit for all programs: 2026

**Areas of Study**

**Master’s Degrees**

The School of Architecture offers master’s degree programs that lead to professional, postprofessional, and academic degrees.

**Master of Architecture.** The MArch degree program fulfills the professional degree requirements for registration as an architect. The MArch is a STEM Designated Degree Program, as identified by the Department of Homeland Security for the purposes of the 24-month STEM optional practical training extension.

**Master of Advanced Architectural Design.** The MAAD degree program offers students with professional degrees in architecture the opportunity for advanced study in an area of concentration. The MAAD degree is not an NAAB accredited degree and does not fulfill the professional degree requirements for registration as an architect. The MAAD is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

**Master of Arts.** The MA is an academic degree with a concentration in architectural history. It is a prerequisite for doctoral work in architectural history.

**Master of Science in Historic Preservation.** The MSHP is an academic degree that prepares students for practice or doctoral study in historic preservation.

**Master of Science in Sustainable Design.** The MSSD is an academic degree that prepares students for doctoral study, practice-based research, work in public policy, or activism. The MSSD is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

**Doctor of Philosophy**

The Doctor of Philosophy is an academic degree with concentrations in the history of architecture and landscape architecture, historic preservation, and sustainability. It provides students holding an appropriate master’s degree with a rigorous program of study intended to prepare them to conduct research and teach in these disciplines.

The concentration in the history of architecture and landscape architecture places special emphasis on understanding buildings or landscapes and their designers within their historical contexts as complex and interconnected wholes that include aspects of aesthetics, tectonics, function, culture, and meaning. The student’s program of study may address the history of architectural theory; the history of design; the history of interior design; the history of urban design, settlements, or cities; the history of building technology; and the history of landscape design.

The concentration in historic preservation embraces multi-disciplinary and culturally diverse approaches to the conservation of historic resources. The student’s program may address preservation planning and development; issues in the theory, history, and practice of the conservation of buildings, interiors, landscapes and neighborhoods; preservation-based strategies of sustainable development; and innovative methodologies for preservation practice.

The concentration in sustainability is practical, technical, and philosophical in scope and integrates three areas of inquiry related to the built environment: biophysical systems, building systems, and political systems. The study of biophysical systems relies upon the disciplines of natural and urban ecological sciences as they relate
to architecture. The study of building systems includes investigating component technologies necessary to construct environmentally responsive architecture. The study of political systems situates the biophysical and building systems within the social and political contexts of architectural practice.

Graduate Studies Committee
The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Michelle Addington  Benjamin Ibarra Sevilla
Dean J Almy  Aleksandra Jaeschke
Kevin S Alter  Daniel Koehler
Michael L Benedikt  Fernando Luiz Lara
Miroslava Benes  Katherine E Lieberknecht
Kory Bieg  Christopher A Long
Daneele Irene Briscoe  S Milovanovic-Bertram
Ulrich C Dangel  Juan Miro
Elizabeth A Danze  Bryan E Norwood
Tara A Dudley  Michael Oden
Matt Fajkus  Clay D Odom
Nerea Feliz Arrizabalaga  Allan W Shearer
Juliana Felkner  Igor P Siddiqui
Michael L Garrison  Vincent L Snyder
Francisco Henning Gomes  Lawrence W Speck
David D Heymann  Danilo F Udovicki
Michael Holleran  Nichole Wiedemann

Admission Requirements
Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls. The deposit is also required of students admitted to dual degree programs.

Master of Architecture. This degree program is open to qualified applicants who hold baccalaureate degrees in any discipline, including pre-architecture. Prerequisites include one semester of college-level calculus and one semester of college-level physics for non-technical majors (non-calculus based).

Master of Advanced Architectural Design. This degree program is open to qualified applicants who hold a professional five-year baccalaureate degree in architecture from an NAAB accredited school, a Master of Architecture from an NAAB accredited school, or its international equivalent. The MAAD degree is not an NAAB accredited degree. International students interested in pursuing licensure in the United States should instead apply to the Master of Architecture degree program.

Master of Arts. This degree program in architectural history is open to qualified applicants who hold baccalaureate degrees in any discipline. Prerequisites include nine hours of architectural history or a related spatial discipline. This may include courses in art history, history, geography, planning, or related subjects.

Master of Science in Historic Preservation. This degree program is open to qualified applicants who hold baccalaureate degrees in any discipline. Prerequisites include at least one three-semester-hour course in history (art, architecture, etc.). Students with experience in the field of historic preservation are preferred. This experience may be satisfied by coursework or by evidence of previous fieldwork or professional work.

Master of Science in Sustainable Design. This degree program is open to qualified applicants who hold baccalaureate degrees in any discipline.

Doctor of Philosophy. Students who enter the doctoral degree program must hold a master's degree or the equivalent in a discipline relevant to their area of concentration and must demonstrate the ability to excel in doctoral work. Admission decisions are made by the doctoral subcommittee of the Architecture Graduate Studies Committee.

Degree Requirements, Architecture
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Architecture
The Master of Architecture is an accredited first professional degree, with graduate professional courses designed to prepare the student for advanced work in architecture and to apply for registration with the National Council of Architectural Registration Boards (NCARB) as an architect in the United States. Students are admitted into the three-year 96-hour program or the two-year 60-hour Advanced Standing program on the basis of the student’s previous college work as shown by transcripts, the portfolio, the statement of intent, and references. For students entering with a professional degree in architecture (B.Arch.), a minimum of 48 hours of prescribed coursework is required. Before progressing into the advanced architectural design sequence, all Master of Architecture professional degree candidates must demonstrate proficiency in design and communication through a qualifying portfolio review conducted by the faculty.

Students may earn stackable graduate certificates or graduate certificates by completing the relevant sequence of courses. More information is available from the graduate advisor.

Master of Advanced Architectural Design
For students entering with a professional degree in architecture, the Master of Advanced Architectural Design is a postprofessional degree. It requires 36 hours of graduate work, including a final six hours of master’s design study or a terminal design studio. Before progressing to their final project, all Master of Advanced Architecture students participate in a portfolio review conducted by the faculty.

Students may earn stackable graduate certificates or graduate certificates by completing the relevant sequence of courses. More information is available from the graduate advisor.

Master of Arts
The degree program consists of at least 30 semester hours of coursework, including a thesis. An individual plan of study is defined for each student by the program coordinator.

Master of Science in Historic Preservation
The degree program consists of at least 48 semester hours of coursework, including a thesis, professional report, or coursework-only option. An individual plan of study is defined for each student by the faculty advising contact.

Master of Science in Sustainable Design
The degree program consists of at least 42 semester hours of work and includes a thesis. Up to 24 semester hours of coursework may be chosen
in the student's area of concentration. An individual plan of study is defined by each student in conjunction with the faculty advising contact.

**Doctor of Philosophy**

The doctoral subcommittee of the Architecture Graduate Studies Committee determines course requirements, prescribes qualifying examinations, and approves dissertation topics. The degree plan requires a minimum of 30 semester hours. These include 21 semester hours of seminars, independent research, and reading courses leading to the qualifying examination. Nine of these hours must satisfy the program's core requirements, as specified by the doctoral subcommittee (credit may be awarded for core courses taken as part of a School of Architecture master's program). After passing the qualifying examination, the student registers for a three-semester-hour dissertation colloquium to develop a dissertation topic. Continuous registration is required through the writing, oral defense, revision, and final acceptance of the dissertation. All tracks require experience in design, which may be gained through design studio coursework or professional practice, reading proficiency in two foreign languages, and/or proficiency in qualitative or quantitative analysis as determined by the doctoral subcommittee.

**Dual Degree Programs**

The following dual degree programs are offered within the School of Architecture. More information is available from the graduate advisor in each program.

For the Master of Science in Sustainable Design:

**Stackable Certificate Programs, Architecture**

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

**Architecture: Building Technology**

The Architecture: Building Technology stackable graduate certificate is designed for students interested in the role of building technology within the design process. Students who pursue this certificate will focus on systems integration, structural design, construction materials and processes, and issues of sustainable design. The stackable graduate certificate is open to any University of Texas at Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

**Architecture: Community Equity Design**

The Architecture: Community Equity Design stackable graduate certificate accommodates a growing interest in community equity design among designers and diverse professionals to develop tools that can engage and foster design as a collaborative effort grounded in public interest design methodologies. As a result, students will not only gain expertise in community equity design, they will become better equipped to address the world's most pressing concerns regarding social, economic, and environmental issues of the built environment. As part of this program, students will engage in an off-campus design-research problem, working directly with an approved stakeholder in the region; take on the roles of both citizen and designer, organizing and attending stakeholder meetings, while conducting field-research outside of the classroom setting; and submit a scholarly paper reflecting on lessons learned during their research. The stackable graduate certificate is open to any UT Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format.

**Total Hours** 9

**Architecture: Digital Technology**

The Architecture: Digital Technology stackable graduate certificate is for students who are interested in using advanced and emerging digital technologies for design at multiple scales. Courses that fulfill the
Certificate requirements include instruction on software, computational design methods, digital fabrication, and digital design theory. Students will be exposed to a variety of different computer programs and design processes while pursuing this certificate and leverage computational design to create new objects, buildings, and cities that would otherwise not be possible. Students will explore how contemporary architectural theory shapes this discourse. The stackable graduate certificate is open to any UT Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

### Architecture: Latin American Architecture

By enhancing and promoting a regional focus that already exists in the school's graduate curriculum, the Architecture: Latin American Architecture stackable graduate certificate allows graduate students to develop a comparative approach to architectural education and scholarship and equips them with tools to engage in the effect that globalization has on architecture and place more broadly. As a result, program participants will not only gain expertise in Latin American architecture, they will also become better equipped to address the world's most pressing issues regarding the built environment. The stackable graduate certificate is open to any UT Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Architectural History: Political, Social, and Cultural Histories of Architecture

The Architectural History: Political, Social, and Cultural Histories of Architecture stackable graduate certificate program investigates the social, political, and economic histories of architecture and urbanism. With an emphasis on macro structures (i.e., capitalism) in relation to historically marginalized groups (migrants, people of color, laborers, etc.), these courses ask students to deeply contextualize "sites" and "architectures." To complement the work and role of the architect, the focus explores the users and makers of ordinary built environments as well as canonical works of architecture. Beyond developing a specific historic lens or framework to view and analyze architecture, students will also conduct their own architectural histories of everyday environments and ask questions about architecture that address the pressing social issues of our time. The stackable graduate certificate is open to any UT Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Historic Preservation: Cultural Heritage: History and Research

Cultural heritage advocacy seeks to protect heritage and communities, manifested in buildings, landscapes, or even intangibles, such as a sense of place or traditions. Like other sustainability efforts, cultural heritage studies help to conserve resources for society's betterment in the present and the future. Understanding historic cultural heritage principles and historical research are crucial for a thoughtful design strategy when dealing with historic buildings. In the Historic Preservation: Cultural Heritage: History and Research stackable graduate certificate, students will explore foundational skills and knowledge to approach cultural heritage from the historical point of view. Students will formulate historical research and reports while describing the historical built environment using terms and concepts embedded in the field of cultural heritage practice. All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Sustainable Design: Technology and Environment

The Sustainable Design: Technology and Environment stackable graduate certificate is for students interested in sustainability at various scales and within a diverse set of contexts. Program participants will focus on issues of performance, primarily at the building scale - considering both technical components such as daylight modulation and thermal factors within larger systems, as well as philosophical questions about sustainable design and its potential boundaries or lack thereof. Building science and phenomenological experience are both considered throughout the coursework. All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Total Hours 9
Committee (GSC) in the spring 2023 semester. The following faculty members served on the Graduate Studies programs.

The deposit is also required of students admitted to the dual degree enrollment deposit. The deposit is applied to the payment of tuition when the student enrolls.

Upon admission to the program, students must pay a deposit in care of the program or the community and regional planning program or to any of the dual degree programs, consult the graduate advisor in care of the program or the community and regional planning program or a related field.

For more information about admission to the master’s or doctoral degree programs and portfolio programs, please contact the program with concerns or questions. Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Degree Requirements, Community and Regional Planning

Master of Science in Community and Regional Planning

Each student must complete 48 semester hours of coursework, including introductory courses in planning history, theory, and ethics; quantitative planning methods; qualitative and participatory planning methods; sustainable land use planning; GIS and visual planning tools; planning law; and public economics and finance. During the final year, students synthesize their educational experience by taking an integrative planning studio and completing either a thesis or a professional report. With the assistance of the graduate advisor, each student develops an individual program based on their interests.

Doctor of Philosophy

The doctoral degree requires 48 semester hours of work, including graduate coursework, directed research, and the dissertation. Each doctoral student must specialize in a planning field, such as environmental and natural resources planning, land use and infrastructure planning (including transportation), historic preservation (through cross-listed architecture courses), or a special field defined by the supervisor and the student and approved by the community and regional planning PhD Committee. In addition, doctoral students must complete advanced work in an outside field; a variety of supporting (outside) fields are available through other University programs. Depth and breadth of experience in planning theory and research design and methods are required of all doctoral students.

After completing the required coursework, the student advances to candidacy according to procedures set by the Graduate Studies Committee. Advancement to candidacy involves an evaluation of the student’s research proposal and a comprehensive written examination. A faculty committee evaluates the research in progress, and reads the dissertation.

Dual Degree Programs

The community and regional planning program offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Total Hours 9

Community and Regional Planning

Master of Science in Community and Regional Planning Doctor of Philosophy

Areas of Study

Students may choose to tailor the choice of elective courses to their specific interests. Students have a wide range of elective courses to choose from and are encouraged to select electives that they feel will best prepare them for their future careers. Students can also pursue specialized interests through dual degree programs and portfolio programs.

Admission Requirements

Master of Science in Community and Regional Planning. There are no specific course prerequisites for admission to the master’s degree program. However, facility in basic computer skills (using spreadsheets and word processing) is assumed.

Doctor of Philosophy. To be admitted to the doctoral program, an applicant must have a master’s degree in community and regional planning or a related field.

To be admitted to any of the dual degree programs, the applicant must be admitted to each of the individual participating programs.

For more information about admission to the master’s or doctoral degree program or to any of the dual degree programs, consult the graduate advisor in care of the program or the community and regional planning website.

Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls. The deposit is also required of students admitted to the dual degree programs.

Stackable Certificate Programs, Community and Regional Planning

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Community and Regional Planning: Introduction to City Planning

This Community and Regional Planning: Introduction to City Planning stackable graduate certificate provides an overview of the theoretical foundations, specific skills, and practical experience that constitute the context of professional planning. The stackable graduate certificate is open to any University of Texas at Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Interior Design

Master of Interior Design
Areas of Study

The Master of Interior Design degree program offers two degree options.

The Master of Interior Design (first professional) degree option may qualify graduates to become licensed or registered as an interior designer. Interested students are encouraged to confirm requirements for the state in which they hope to practice and confirm NCIDQ eligibility requirements.

The Master of Interior Design (post-professional) degree option offers students advanced studies, theory, and research for those holding a prior professional degree in interior design or architecture.

Admission Requirements

Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls.

Master of Interior Design (first professional). This degree program is open to qualified applicants who hold baccalaureate degrees in any discipline without a prior professional degree in interior design or architecture.

Master of Interior Design (post-professional). This degree program is open to qualified applicants with a prior professional baccalaureate degree in interior design, interior architecture, or architecture.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Ria Bravo  Aleksandra Jaeschke
Tara A Dudley  Clay D Odom
Matt Fajkus  Igor P Siddiqui
Nerea Feliz Arrizabalaga

Degree Requirements, Interior Design

Graduate information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Interior Design (first professional)

For students entering with degrees other than professional degrees in interior design or architecture, the Master of Interior Design is a first professional degree, with accelerated graduate professional courses designed to prepare the student for advanced work in interior design; the coursework is prescribed on the basis of the student's previous college work as shown in transcripts, portfolio, statement of intent, résumé, and references. This program includes 32 hours of qualifying coursework (some course requirements may be waived upon review of transcripts and experience) prior to 50 semester hours of graduate work, including a master's design studio or a terminal advanced studio.

A Portfolio Review is administered by the Interior Design Program to evaluate student progress through the Master of Interior Design first professional program. It is a multistage process that allows students to document their work in a cumulative and iterative manner, receive necessary feedback from program faculty about their academic progress, and prepare their portfolios for professional use. The Portfolio Review Process is outlined in detail within the MID Graduate Handbook.

Master of Interior Design (post-professional)

For students entering with a professional degree in interior design, interior architecture, or architecture, the Master of Interior Design is a post-professional degree. This program requires 48 semester hours of graduate work, including a master's thesis contributing to the knowledge base of interior design or a master's design studio.

A Portfolio Review is administered by the Interior Design Program to evaluate student progress through the Master of Interior Design post-professional program. It is a multistage process that allows students to document their work in a cumulative and iterative manner, receive necessary feedback from program faculty about their academic progress, and prepare their portfolios for professional use. The Portfolio Review Process is outlined in detail within the MID Graduate Handbook.

Stackable Certificate Programs, Interior Design

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Interior Design: Theories of Interiors and Spatial Design

This Interior Design: Theories of Interiors and Spatial Design stackable graduate certificate is for students interested in developing a deeper understanding of contemporary concepts, projects, and methods that underlie the design process and theorization of interior environments and spatial design. The stackable graduate certificate is open to any University of Texas at Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Landscape Architecture

Master of Landscape Architecture

Areas of Study

The Master of Landscape Architecture degree is a professional degree program for students with no background in landscape architecture. The accredited degree program is one part of the path toward professional licensure in landscape architecture.

The Master of Science in Landscape Architecture degree is a STEM-designated degree program for individuals who hold a professional 5-year degree in landscape architecture (BLA or BSLA) from an LAAB-accredited degree program or its international equivalent.

Admission Requirements

Upon admission to the graduate program in Landscape Architecture, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls.

**Master of Landscape Architecture.** The professional degree program is open to qualified applicants with baccalaureate degrees in any discipline. Applicants with an accredited professional degree in architecture may be eligible for admission with advanced standing. Advanced standing may also be granted to applicants with a nonaccredited pre-professional degree in architecture, landscape architecture, or environmental design.

**Master of Science in Landscape Architecture.** The degree program is open to qualified applicants with LAAB-accredited degrees in landscape architecture. Applicants who do not meet the accredited degree requirement will be considered for admission to the Master of Landscape Architecture degree program with advanced standing and must complete a minimum of 48 hours of prescribed coursework.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Dean J Almy  
Miroslava Benes  
Maggie Hansen  
Hope Hasbrouck  
Phoebe Lickwar  
Katherine E Lieberknecht  
Allan W Shearer

Degree Requirements, Landscape Architecture

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Landscape Architecture**

The Master of Landscape Architecture professional degree program is accredited by the Landscape Architecture Accreditation Board (LAAB). Graduate coursework prepares the student for advanced work in the field and fulfills the Council of Landscape Architecture Registration Board’s (CLARB) education requirement. The student’s coursework is individually prescribed and based upon previous academic work as shown by transcripts, portfolio, studio supplement, statement of intent, and references.

Students entering without a background in landscape architecture usually complete the professional degree program in 87 semester hours of coursework or approximately three years and a preceding summer session of in-residence study. Subject to recommendations made by a faculty committee, qualified students holding pre-professional bachelor’s degrees in landscape studies or environmental design must complete a minimum of 64 semester hours of prescribed coursework.

Students entering with a professional degree in architecture (B.Arch or M.Arch) must complete a minimum of 48 semester hours of coursework prescribed by a faculty committee. All Master of Landscape Architecture professional degree candidates must demonstrate proficiency in design and visual communication and mastery of the curriculum through a qualifying portfolio review conducted by the faculty before enrolling in advanced coursework.

**Master of Science in Landscape Architecture**

The Master of Science in Landscape Architecture degree is designed to provide individuals with an accredited landscape architecture degree opportunities to engage in advanced scholarship and professional development. Students usually complete program requirements in two years, with 48 semester hours of coursework.

Students in both Landscape Architecture programs may participate in graduate portfolio programs. Graduate portfolio programs provide opportunities for students to obtain credentials in a cross-disciplinary academic area of inquiry while they are completing the requirements of a Master’s degree program. Additional information is available from the graduate advisor.

**Urban Design**

Master of Science in Urban Design

Areas of Study

The Master of Science in Urban Design (MSUD) is an academic degree focusing on urban design with associated coursework in the disciplines of architecture, landscape architecture, and community and regional planning. The program is designed to help students develop the professional skills needed to engage in improving the quality and structure of the built environment. The MSUD is a STEM Designated Degree Program by the Department of Homeland Security for the purposes of the 24-month STEM optional practical training extension.

**Admission Requirements**

This degree program is open to qualified applicants who hold professional degrees in either architecture, landscape architecture, or planning. A dual-degree program with the Master of Science in Community and Regional Planning is available for students with baccalaureate degrees in any other discipline.

Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls. The deposit is also required of students admitted to dual degree programs.
Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Urban Design

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Urban Design

The Master of Science in Urban Design (MSUD) degree program requires completion of at least 36 semester hours of work. Students must either complete the core 3-semester studio sequence or obtain approval of the program's Graduate Studies Committee to undertake an honors project in lieu of the third required studio course. Students enrolled in the dual-degree program with Community and Regional Planning must complete the Urban Design Planning Studio in lieu of the third required studio course. Additional hours, in the form of a summer preparatory studio, may be required for students without a prior degree in either architecture or landscape architecture. An individual plan of study is defined for each student by the program director.

Dual Degree Programs

The following dual degree programs are offered within the School of Architecture. More information is available from the graduate advisor in each program.

Stackable Certificate Programs, Urban Design

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Urban Design: Housing and Urbanism

The stackable graduate certificate in Urban Design: Housing and Urbanism provides a framework for the investigation of the issues that impact the construction of the urban environment and their resultant effect on the human condition in cities. The program requires completion of nine semester credit hours of coursework and is available to degree-seeking students.

Red McCombs School of Business

Business Administration

Master of Business Administration

For More Information

Campus address: College of Business Administration Building (CBA) 2.502, phone (512) 471-7698, fax (512) 471-4131; campus mail code: B6004
Facilities for Graduate Work

Facilities for graduate study in business include state-of-the-art classrooms and seminar rooms, which are equipped with multimedia and computer terminal facilities. Computer classrooms, computer laboratories, a Financial Trading and Technology Center, and a behavioral science laboratory are also available. A variety of special collections and databases are available for research and study. In addition, there are extensive study and research facilities for individual and group projects.

Library holdings in business, economics, and related areas are unusually comprehensive; the University has several noteworthy collections, such as those on Latin America and Texas, that are of special interest to business students. Also available are personalized reference services, including library instruction classes, web-based subject and course guides, and an extensive array of online business and statistical databases; a tax collection; and a large selection of materials to aid in productive problem solving. These holdings are located in the Perry-Castañeda Library and are available through the University Libraries website.

Other facilities of interest, especially to students of international business, include the Center for International Business Education and Research, the Benson Latin American Collection, the Teresa Lozano Long Institute of Latin American Studies, the Center for Middle Eastern Studies, the Center for East Asian Studies, the South Asia Institute, and the Population Research Center. Additional opportunities for research are provided by the AIM Investment Center; the Center for Business, Technology, and Law; the Center for Customer Insight and Marketing Solutions; the Real Estate Finance and Investment Center; the Center for Research in Electronic Commerce; the EDS Financial Trading and Technology Center; the Hicks, Muse, Tate & Burst Center for Private Equity Finance; the Herb Kelleher Center for Entrepreneurship; the IC2 Institute; the Supply Chain Management Center of Excellence; the Center for Energy Finance Education and Research; the Center for Risk Management and Insurance; the Energy Management and Innovation Center; and the Jon Brumley Texas Venture Labs.

The McCombs School of Business has its own computer network that links the school’s laboratories and other computing resources. The network is also connected to the University’s computing infrastructure. All Master of Business Administration (MBA) students are required to own a laptop computer.

The MBA Program Office provides information, academic advising, and student services to MBA students; contact information is given on the top of this page.

Areas of Study

Graduate study is offered in the following areas: accounting; business, government, and society; finance; information, risk, and operations management; management; marketing; and technology commercialization. Students in the full-time program may concentrate their coursework in one of these areas by choosing from among 22 available tracks of elective coursework. The track selected by a student determines whether their degree program is Business Administration, Business Administration-Management Science and Quantitative Methods or Business Administration-Financial Mathematics. The latter of these programs are classified as STEM Designated Degree Programs by the Department of Homeland Security for the purposes of the 24-month STEM optional practical training extension.

Admission Requirements

Several scheduling options are available to students seeking the MBA: full-time, executive, and evening programs in Austin; weekend programs in Dallas and Houston.
Admission decisions for all programs are based on the applicant’s test scores, academic and professional background, letters of recommendation, and other factors.

With the following exceptions, all applicants must submit a valid score from the Graduate Management Admission Test (GMAT) or the Graduate Records Examination General Exam (GRE).

The admissions committee may consider waiving the GMAT/GRE requirement in the executive MBA programs in Austin when one of the following conditions is met: (1) 15 years of postgraduate work experience, (2) five years of people/project management experience, (3) an advanced degree, (4) an expired GMAT or GRE.

TOEFL or IELTS scores are required of all applicants who are not United States citizens or permanent residents, and for those who received their undergraduate education in a country where English is not the official language.

Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls. The deposit is also required of students admitted to the dual degree (p. ) programs.

More information about the admission process for each program is published by the McCombs School online.

Degree Requirements, Business Administration

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

The objective of each of the programs described below is to develop influential business leaders who are able to assume high-level responsibilities in the rapidly changing national and international environment of the public and private sectors. The curriculum is designed to stimulate intellectual curiosity; to develop analytical and research ability; and to give students the ability to make sound managerial decisions, to plan, organize, and control activities in order to achieve established goals, and to manage people, organizations, and change. Students are expected to acquire the concepts, tools, and understanding to operate in and contribute successfully to new economic environments. Such environments are characterized by rapid technological change, global competition, and information-rich or information-deficient management decisions. Each program is designed to accommodate students with baccalaureate degrees in a wide variety of fields. Each affords the student a wide range of choices to complete a course of advanced study that integrates developments, theory, and applications involved in the exercise of executive and managerial administrative responsibilities.

Full-Time Program

The full-time Master of Business Administration (MBA) is a two-year program taught in Austin. Students enter the program in the fall and graduate at the end of the second spring semester. At least 15 hours of coursework are required each semester. A one-hour career management course is required in the first semester.

The program is 62 semester hours of coursework. Twenty-three hours are provided by required core courses. Students are required to take certain core courses in an assigned cohort.

During the first semester of the program, students are organized into four cohorts of approximately 65 members. The students in each cohort take most core courses together. Within the cohort and in particular courses, students may be assigned to four or five-person study groups to encourage group problem solving and teamwork and the development of leadership skills.

At least 37 semester hours of approved graduate electives are required. The student may concentrate the elective coursework within a discipline, such as marketing, by choosing from among 22 available tracks of elective coursework; each concentration consists of a sequence of courses that offers strong preparation for a particular career path. The track selected by a student determines whether their degree program is Business Administration, Business Administration-Management Science and Quantitative Methods or Business Administration-Financial Mathematics. The latter of these programs are classified as STEM Designated Degree Programs by the Department of Homeland Security for the purposes of the 24-month STEM optional practical training extension. Students are not required to choose a concentration.

Further information about prerequisites, requirements, and concentrations is available from the MBA Program Office, online and by email (texasmba@mccombs.utexas.edu).

Weekend and Evening Programs in Austin

A carefully planned program of continuing education and development for executives is essential in today’s dynamic business environment. The following programs provide this graduate business education for early-career to senior managers while permitting them to continue their careers.

Executive MBA. The Executive MBA program is a 20-month program designed to meet the needs of academically qualified mid- to senior-level professionals who wish to pursue an MBA degree while continuing to carry the full responsibilities of their jobs. Typical in-person class weekends are held once per month, Thursday through Saturday, with six distinct three- to six-day Executive Immersions in NYC, Washington, DC, Dallas and Austin, in addition to one six-day Global Immersion. This rigorous and demanding program is offered in a face-to-face format and requires a serious commitment from both the student and the student’s employer. All students must complete 34 semester hours of required coursework and eight hours of electives, for a total of 42 hours. A minimum of eight years of work experience is required. The average work experience of currently enrolled students exceeds 14 years. In most cases, prospective students will need to complete the GMAT, GRE, or the Executive Assessment (EA). Applicants admitted to the program must submit a nonrefundable enrollment deposit to secure enrollment in the program. Information is available online and by email (texasemba@mccombs.utexas.edu).

Evening MBA. This rigorous two-year graduate business program is designed to help high-potential managers and individual contributors become global business leaders while they continue working. Classes are held on Monday and Tuesday evenings, from 6:00 pm - 9:15 pm. Occasional weekend classes are scheduled in order to meet minimum contact hour requirements. Students attend classes in the fall, spring, and summer, and must complete 44 semester hours of coursework.

Prospective students should have at least two years of work or professional experience. The average work experience of currently enrolled students is nearly seven years. Information about the Evening MBA program is available online.
Weekend Programs Outside Austin

MBA at Houston and MBA at Dallas-Fort Worth. These rigorous, two-year graduate business programs are designed for managers and professionals who wish to pursue an MBA degree outside normal working hours. Classes are held Friday evenings from 4:00pm to 8:00pm and Saturdays from 8:00am to 5:00pm on alternate weekends. Three-day (Friday through Sunday) class weekends and occasional weeklong immersions in Austin will be scheduled in order to meet minimum contact hour requirements. Classes held in Dallas meet at The Centrum building located in Uptown Dallas. Classes held in Houston meet at the University of Texas Health Science Center at Houston. Students must complete 44 semester hours of coursework. In addition, the programs include a week-long international trip.

The high academic standards and dedicated faculty are the same as in the full-time MBA program. Information about the Houston program and the Dallas-Fort Worth program are available online.

Dual Degree Programs

The McCombs School of Business offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Master of Business Administration/Doctor of Medicine

In partnership with the Dell Medical School, Business Administration offers a Master of Business Administration (MBA) to medical students as part of the medical school curriculum third year requirement for experience in Innovation, Leadership, and Discovery. The MBA/MD program is one of several dual-degree programs from which medical students can choose in their third year. Through waivers of coursework that is common to both degrees, the total number of hours required to earn both degrees through the dual-degree arrangement is decreased by 21 credit hours. Applicants to the dual-degree program are not required to submit GMAT scores with their application materials. The requirements and policies associated with the dual-degree program are published in the Medical School Catalog. More information is available from the graduate advisor in Business Administration.

Double Degree Programs

Students interested in a Master of Business Administration degree with an international focus may seek admission to the Double Degree Program. This program allows students in the full-time MBA program to take a substantial part of their coursework at a partner school outside the United States. The student must complete at least thirty-seven semester hours of graduate coursework in residence at the McCombs School and must also fulfill the partner school's requirements for coursework in residence. Students who complete the program earn both the MBA from the University and the equivalent degree from the partner school.

Applicants must be proficient in English and must meet the language requirements of the partner school. The McCombs School offers this program in cooperation with the Chinese University of Hong Kong; Escuela de Administración de Negocios para Graduados, Lima, Peru; Fundação Getúlio Vargas, São Paulo, Brazil; Guanghua School of Management, Beijing, China; Pontificia Universidad Católica de Chile, Santiago; WHU—Koblenz Otto Beisheim School of Management, Vallendar, Germany; and various campuses of the Instituto Tecnológico y de Estudios Superiores de Monterrey, Mexico. Additional partner schools may be added in the future. Further information on the Double Degree Program is published online.

Facilities for Graduate Work

The physical facilities, computing systems, and research centers that support graduate work in the McCombs School are described in the Business Administration section under Facilities for Graduate Work (p. 38).
Areas of Study

The objective of this program is to provide the student with a sound foundation in the body of knowledge of business administration, broad exposure to the discipline of accounting, and the greater depth in accounting required to specialize and to enter the profession with the prospect of rapid career progress, high-level responsibility, and future leadership. The program is designed to provide outstanding students with the educational foundation for successful careers in public accounting, industry, consulting, not-for-profit organizations, and educational and financial institutions.

Graduate Studies Committee

Nicholas Jennings Hallman  Aruhn Venkat
D E Hirst  Braden Mern Williams
Hyun Hwang  Yong Yu
Steven J Kachelmeier  Wuyang Zhao
Urooj Khan  Ronghuo Zheng
Lisa L Koonce

Admission Requirements

Master in Professional Accounting

Applications to the Master in Professional Accounting (MPA) program are accepted for the fall semester only. The Admissions Committee considers each completed application, giving particular attention to the statement of purpose, prior academic performance, letters of recommendation, extracurricular and community activities, honors and achievements, test scores, work history (if applicable), and other factors.

The MPA program is sufficiently flexible to accommodate students with bachelor's degrees in any field of study. Applicants should complete the required pre-enrollment courses before applying for admission, as outlined on the MPA website. Students without a sufficient background in financial accounting will be expected to start the MPA program in the summer.

Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls. All fees and deposits are subject to change with appropriate approval. Students should consult the General Information Catalog for the current amount of the enrollment deposit.

The MPA Bridge Program offers undergraduate students at The University of Texas at Austin an opportunity to prepare for future graduate study by providing access to courses and program resources that normally require graduate standing. University of Texas at Austin undergraduate students may apply for admission through the MPA program. Admission to a bridge program is highly competitive and does not guarantee admission to a graduate degree program. Additional information can be found on the MPA website.

Doctor of Philosophy

Admission to the PhD program is based on a holistic review by the PhD Admissions Committee of several factors, including the applicant’s motivations for doctoral study, academic and work experience, and academic credentials. The number of applicants admitted is limited by the faculty’s commitment to provide financial assistance, excellent teaching, and expert guidance to each student.

Degree Requirements, Accounting

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master in Professional Accounting

The core of the Master in Professional Accounting (MPA) curriculum consists of 25 semester hours of coursework. Four of the core courses may be waived if the student has completed equivalent undergraduate work. In addition to the core, students complete 18 hours in more specialized courses.

Depending on their undergraduate backgrounds, students must earn from 30 to 43 semester hours of credit to complete the program; all MPA students must complete at least 19 semester hours in accounting. Students must complete at least two fall and/or spring terms in residence in the MPA program. In order to graduate, the student’s overall, MPA, and accounting grade point averages must each be at least 3.00.

Master of Science in Accounting

The Master of Science in Accounting is offered only to students who are enrolled in the doctoral program in accounting. This degree is offered in three options: with thesis, with report, and without thesis or report. The thesis option requires at least 30 semester hours of credit; the report option, at least 33 hours; and the option without thesis or report, at least 36 hours. All coursework must be logically related, and the student’s entire program must be approved by the student’s primary advisor and the graduate advisor. The Graduate Studies Committee’s approval is not required.

Doctor of Philosophy

The coursework for the doctoral degree includes four non-accounting core courses, five accounting seminars, and at least five courses in two supporting fields outside accounting. Students also write first-year and second-year research papers. Those without teaching experience complete Business Administration 398T and teach an entry-level accounting course. Four or five years are generally needed to complete the coursework and dissertation phases of the degree program.

Business Analytics

Master of Science in Business Analytics

For More Information

Campus address: College of Business Administration Building (CBA) 5.202, phone (512) 471-3322, fax (512) 471-0587; campus mail code: B6500

Mailing address: The University of Texas at Austin, Graduate Program, Department of Information, Risk, and Operations Management (iROM), 2110 Speedway B6500, Austin TX 78712-1277
The Department of Information, Risk, and Operations Management (IROM) offers the Master of Science in Business Analytics (MSBA) degree program in two formats to meet differing needs: the full-time MSBA format and the part-time working professional MSBA format. Students in both program formats are expected to meet the same academic standards.

Each MSBA program format requires a Program of Work consisting of at least 36 semester hours of coursework. Coursework is designed to include technical and quantitative methods from multiple disciplines, such as information management, statistics, optimization, and computer science, to solve business problems using large data sets. Each program ends with a capstone project.

Full-time MSBA format: This 10-month program format takes place in person on The University of Texas at Austin campus.

Part-time MSBA format: This 24-month program format is designed to provide flexibility for working professionals. Students admitted to the part-time MSBA program format complete courses delivered online and also participate in several multi-day immersive events hosted on The University of Texas at Austin campus.

Graduate programs in the Department of Information, Risk, and Operations Management (IROM) are overseen by the IROM Graduate Studies Committee (GSC). The IROM GSC has delegated operational authority over the MSBA program to a Program Committee consisting of faculty who teach in the program from the IROM department as well as other departments. The Program Committee determines degree requirements and rules for registration which are communicated to students in a handbook. All courses required for program completion are offered in accordance with University policies that govern non-formula-funded (Option III) programs.

The Master of Science in Energy Management (MSEMA) degree at the McCombs School of Business provides students with the ability to enhance their existing skills with required coursework in business, engineering, law, science and policy. The program is designed to allow students to contribute to the analysis of the ability of various energy systems, as described in the business administration section under Facilities for Graduate Work (p. ).

**Admission Requirements**

The admissions timeline and criteria for the Master of Science in Business Analytics Option III program is separate from other degrees in the department. The MSBA program begins in the second term of summer semester and concludes the following spring semester. Applicants admitted to the MS in Business Analytics Option III program will be required to submit a nonrefundable enrollment deposit to secure enrollment in the program.

The MS Bridge Program offers undergraduate students at The University of Texas at Austin an opportunity to prepare for future graduate study by providing access to courses and program resources that normally require graduate standing. University of Texas at Austin undergraduate students may apply for admission through the graduate academic unit sponsoring the bridge program. Admission to a bridge program is highly competitive and does not guarantee admission to a graduate degree program. Additional information can be found at MS Bridge Program.
includes 18 hours of required coursework and 17 hours of prescribed credit and does not require a master's thesis or report. The program The Master of Science in Energy Management degree requires 35 hours of study and online at program. Graduate handbooks are available within each program's office Graduate handbook information is updated and maintained by each sponsoring the bridge program. Admission to a bridge program is highly competitive and does not guarantee admission to a graduate degree program in Energy Management Program. Currently, the MS Programs Office is not admitting students into the MS in Energy Management Program.

Admissions Requirements

When the MS in Energy Management Program is active, admission to the program is extremely competitive. The admission decision is based on a holistic review process that includes the applicant's academic record, test scores, essays, resume, and letters of recommendation. Students must enter the Master of Science in Energy Management Option III program in the summer semester.

The MS Bridge Program offers undergraduate students at The University of Texas at Austin an opportunity to prepare for future graduate study by providing access to courses and program resources that normally require graduate standing. Master of Science in Finance

The Master of Science in Finance is offered in three options: with thesis, with report, and without thesis or report. The thesis option requires at least 30 semester hours of credit; the report option, at least 33 hours; and the option without thesis or report, at least 36 hours. The Master of Science in Finance Option III requires 36 hours and is without thesis or report. All coursework must be logically related, and the student’s entire program must be approved by the student’s primary advisor and the graduate advisor. The Graduate Studies Committee’s approval is not required.

Doctor of Philosophy

The core of the program is a set of courses required of all students. The core is supplemented with special courses and electives. Students are required to study one minor field in addition to finance; typically, they choose economics, statistics, or mathematics, all of which provide skills important to financial research.

A required element of the student’s development as a scholar is the completion of first- and second-year summer papers. The quality of these two papers is a factor in judging the student's progress in the program. Students must take a comprehensive examination at the end of their second year. They then undertake dissertation research.

Students normally complete coursework, research, and the dissertation in approximately five years.

Health Care Transformation

Master of Science in Health Care Transformation

For More Information

Mailing address: The University of Texas at Austin, MSHCT Program, Value Institute for Health and Care, Dell Medical School, 1601 Trinity St., Bldg. B, Stop Z1600, Austin TX 78712

E-mail: valueinstitute@dellmed.utexas.edu

URL: https://www.mccombs.utexas.edu/Master-of-Science-in-Health-Care-Transformation

Areas of Study

This master's degree is designed to enable medical students and people across the health care industry to lead change in existing organizations, become transformational leaders, and create high-value services in the health sector.

The one-year Master of Science in Health Care Transformation (MSHT) degree equips leaders and emerging leaders across the health care sector with the knowledge, skills, and abilities required to design and lead health care services that achieve better health and better value for individuals and families.

Delivered in a hybrid format, the MSHCT degree program is designed to allow students to complete degree requirements while working full time. The curriculum provides practical strategies and solutions, many of which can be implemented immediately into an organization.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Alice Andrews, Kristie J Loescher
Kevin Bozic, Douglas J Morrice
Erin Eileen Donovan, Elizabeth Teisberg
Stephen T Limberg, Scott Wallace

Admission Requirements

The MSHCT degree program is designed for students with professional experience across the health care sector. Exceptions will be made for medical students and/or medical residents as their training provides equivalent experience and clinical knowledge. All courses required for program completion are offered in accordance with University policies that govern non-formula-funded (Option III) programs.

All applicants will be required to meet the Graduate School's general requirements for admission. The Admissions Committee may consider waiving the GMAT/GRE requirement in the MS in Health Care Transformation program when one of the following conditions is met: (1) five years of professional experience, (2) an advanced degree, or (3) an expired GMAT/GRE. Upon admission to the program, students must pay a nonrefundable enrollment deposit to indicate that they accept the offer of admission. The deposit is applied to the payment of tuition when the student enrolls.

Admission into the MD/MSHCT dual degree program is only open to current Dell Medical School students.

Degree Requirements, Health Care Transformation

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.
**Master of Science in Health Care Transformation**

Students must complete 30 credit hours of required coursework. The program is offered in a hybrid format that is designed to provide flexibility for working professionals. Students attend classes on campus several times a semester and complete online offerings in between residential periods. Every course includes face-to-face and online sessions. Online content delivery comprises less than half of the total hours required for the degree.

**Doctor of Medicine/Master of Science in Health Care Transformation**

The Dell Medical School and the McCombs School of Business offer an MD/MSHCT dual-degree program that is designed for Dell Medical students who choose to complete requirements for a Master of Science in Health Care Transformation degree while completing their MD degree program at the Dell Medical School. Applicants to the dual-degree program are not required to submit GRE/GMAT scores with their application materials. The requirements and policies associated with the dual-degree program are published in the Medical School Catalog. More information is available from the graduate advisor in the Health Care Transformation program.

- Mingyuan Zhou

**Admission Requirements**

Admission to information, risk, and operations management programs is extremely competitive. The admission decisions are based on the applicant’s academic record, test scores, personal statement, résumé, and letters of recommendation. Students must enter the PhD program in the fall semester.

**Degree Requirements, Information, Risk, and Operations Management**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Science in Information, Risk, and Operations Management**

The Master of Science in Information, Risk, and Operations Management is offered only to students who are enrolled in the doctoral program in information, risk, and operations management. This degree is offered in three options: with thesis, with report, and without thesis or report. The thesis option requires at least 30 semester hours of coursework; the report option, at least 33 hours; and the option without thesis or report, at least 36 hours. All coursework must be logically related, and the student’s entire program must be approved by the student’s primary advisor and the graduate advisor. The Graduate Studies Committee’s approval is not required.
Doctor of Philosophy

The doctoral program in information, risk, and operations management has four areas of concentration: decision analysis, information systems, statistics, and operations management. Degree requirements vary slightly among these. After the first year, each student must pass a qualifying examination that is based on the core courses in the appropriate area of concentration. Students concentrating in information systems must also complete a first-year research paper.

In the second and third years of the program, students complete core coursework and take other methodological and contextual courses in the areas of their research interest. Students are expected to begin working on research as soon as possible, and will spend increasing amounts of time on research as they progress through the program. At the end of the second year, students in all areas of concentration complete a research paper; students in the supply chain and operations management area of concentration also complete a comprehensive examination.

Following admission to candidacy, students undertake dissertation research, which concludes in a written dissertation and an oral defense before the student’s dissertation committee.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Master of Science in Information Technology and Management

The Master of Science in Information Technology and Management (MSITM) Option III program is a program for students pursuing specialization in information technology and management. Coursework is designed to prepare students to draw upon both emerging and mature information technologies to develop innovative solutions to business problems. The program includes instruction on information technologies and design thinking and concludes with a capstone project. The Graduate Studies Committee for Information Technology and Management determines degree requirements and rules for registration which are communicated to students in a handbook.

Facilities for Graduate Work

The physical facilities, computing systems, and research centers that support graduate work in the McCombs School are described in the Business Administration section under Facilities for Graduate Work (p. 202).

Areas of Study

The Master of Science in Information Technology & Management gives students opportunities to study topics in emerging technologies such as cloud computing, deep learning, Internet of Things, blockchain, and data science.

For More Information

Campus address: College of Business Administration Building (CBA) 4.202, phone (512) 471-2622, fax (512) 471-3837; campus mail code: B6300

Mailing address: The University of Texas at Austin, Graduate Program, Department of Management, 2110 Speedway Stop B6300, Austin TX 78712
Facilities for Graduate Work

The physical facilities, computing systems, and research centers that support graduate work in the McCombs School are described in the Business Administration section under Facilities for Graduate Work (p. 24). Of particular relevance to marketing students are the McCombs School Behavioral Research Laboratory and the Center for Customer Insight and Marketing Solutions, which works to develop pragmatic, market-relevant management knowledge, skills, and experience.

Areas of Study

Graduate work in marketing is offered in the following areas: consumer behavior, marketing strategy, and quantitative marketing.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Shiva Agarwal  Andrew D Henderson  Bukky Akinsanmi  Insiya Hussain  Caroline A Bartel  Cha Li  Andrew Brodsky  Luis D I Martins  Ethan R Burris  Shefali V Patil  Johnny S Butler  Francisco Polidoro Jr  Janet M Dukerich  Ramkumar Ranganathan  Steven Gray Jr  Subrina Shen  Paul Green  Puay khoon Toh  David A Harrison

Admission Requirements

Admission to the program is very competitive. Decisions are based on the applicant’s test scores, academic record (GPA and courses taken), research experience, personal statement, and letters of recommendation.

Students must enter the program in a fall semester.

Degree Requirements, Management

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Management

The Master of Science in Management degree is offered in three options: with thesis, with report, and without thesis or report. Depending on the option chosen, between 30 and 36 semester hours of credit are required. All coursework must be logically related and must be approved by the Department of Management Graduate Studies Committee.

Doctor of Philosophy

All students take core and elective courses in the Department of Management that cover organizational behavior, organization theory, strategic management, and quantitative and qualitative research methods topics. Students must also complete at least two courses outside management that support the student’s area of study and ongoing research programs.

A key objective in the student's development as a scholar is writing papers that will be published in top tier academic journals. Students will be required to write a first-year paper in the summer following their first year and present it in the fall semester of their second year. The quality of the student’s work on the project is a factor in evaluating the student’s progress in the degree program.

Students take the comprehensive examination, which assesses their knowledge of research methodology and of their chosen sub-field of management (organizational behavior, organization theory, or strategic management), in the summer at the end of the second year. They then undertake dissertation research as described in Degree Requirements (p. 24). A well-prepared student generally completes the degree in five years.

Facilities for Graduate Work

The physical facilities, computing systems, and research centers that support graduate work in the McCombs School are described in the Business Administration section under Facilities for Graduate Work (p. 24). Of particular relevance to marketing students are the McCombs School Behavioral Research Laboratory and the Center for Customer Insight and Marketing Solutions, which works to develop pragmatic, market-relevant management knowledge, skills, and experience.

Areas of Study

Graduate work in marketing is offered in the following areas: consumer behavior, marketing strategy, and quantitative marketing.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Department of Homeland Security as a STEM-eligible program for funded (Option III) degree programs.

All courses required to complete the Option III program are offered in alignment with University policies governing the delivery of non-formula-based courses. A non-refundable enrollment deposit is required to secure enrollment in the program.

The MS Bridge Program offers undergraduate students at The University of Texas at Austin an opportunity to prepare for future graduate study by providing access to courses and program resources that normally require graduate standing. University of Texas at Austin undergraduate students may apply for admission through the graduate academic unit sponsoring the bridge program. Admission to a bridge program is highly competitive and does not guarantee admission to a graduate degree program. Additional information can be found at MS Bridge Program.

Admission Requirements

Admission to the PhD and MS in Marketing programs is extremely competitive. Admission decisions are made by the Doctoral Admission Committee and MS in Marketing Admission Committee respectively and are based on a balanced consideration of multiple factors, including academic credentials, test scores, work experience, personal statement, and letters of recommendation. Students must enter the MS in Marketing Option III program in the summer semester. Applicants admitted to the MS in Marketing Option III program will be required to submit a non-refundable enrollment deposit to secure enrollment in the program.

The MS Bridge Program offers undergraduate students at The University of Texas at Austin an opportunity to prepare for future graduate study by providing access to courses and program resources that normally require graduate standing. University of Texas at Austin undergraduate students may apply for admission through the graduate academic unit sponsoring the bridge program. Admission to a bridge program is highly competitive and does not guarantee admission to a graduate degree program. Additional information can be found at MS Bridge Program.

Degree Requirements, Marketing

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Marketing

Option I: The Master of Science in Marketing Option I degree program is offered only to students enrolled in the doctoral program in marketing. This degree is offered in three options: with thesis, with report, and without thesis or report. The thesis option requires at least 30 semester hours of credit; the report option, at least 33 hours; and the option without thesis or report, at least 36 hours. All coursework must be logically related, and the student's entire program must be approved by the graduate advisor.

Option III: The Master of Science in Marketing Option III degree program is designed for students pursuing a terminal master's degree in marketing. Coursework is designed to teach rigorous and innovative content that will provide students with master's level knowledge, skills, and abilities in the field of marketing. This program requires completion of 36 semester hours of coursework and is without thesis or report. All courses required to complete the Option III program are offered in alignment with University policies governing the delivery of non-formula-funded (Option III) degree programs.

The Master of Science in Marketing degree has been identified by the Department of Homeland Security as a STEM-eligible program for purposes of fulfilling the Optional Practical Training (OPT) extension requirement.

Doctor of Philosophy

To be admitted to candidacy for the doctoral degree, the student must (1) fulfill the core course requirements in marketing and research methods; (2) satisfy the first-year paper requirement; (3) complete course requirements in the area of specialization; (4) pass a written comprehensive exam by the end of the second year in the program; and (5) select a dissertation topic and dissertation committee. The student then submits a dissertation proposal for committee approval, conducts dissertation research, completes dissertation coursework, and defends the final dissertation research before the dissertation committee. A well-prepared student generally completes the program in five years.

The PhD degree in Marketing has been identified by the Department of Homeland Security as a STEM-eligible program for purposes of fulfilling the Optional Practical Training (OPT) extension requirement.

Technology Commercialization

Master of Science in Technology Commercialization

For More Information

Campus address: Robert B. Rowling Hall (RRH) 1.320, phone (512) 471-4700, fax (512) 471-4131; campus mail code: D7700

Mailing address: The University of Texas at Austin, McCombs School of Business, MSTC Program Office, 300 W. MLK Jr. Blvd., Stop D7700, Austin TX 78712

E-mail: mstc@mccombs.utexas.edu

URL: http://www.mccombs.utexas.edu/mstc/

The STEM-designated and project-based Master of Science in Technology Commercialization (MSTC) at the McCombs School of Business focuses not only on general management knowledge and business skills but also on technology entrepreneurship, venture creation, and commercialization. The program is designed to give students the expertise necessary to convert scientific knowledge and technology to wealth by creating new products, services, and ventures. Students in the program study all aspects of starting and managing entrepreneurial and intraprendeurial ventures, assessing a technology's commercial potential, and accelerating the movement of products and services from conception to market introduction and growth. The MSTC is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

The one-year executive program provides graduate education for professionals while they continue their careers. Classes meet on alternate weekends, Friday evenings and all day Saturday, for 23 weekends. The program begins with the MSTC Launch Week in Austin, Texas in late April/early May. Another intensive week in August jumps starts the fall semester. The fall semester concludes with a required international trip. The MSTC program is offered both on-campus and online via video conference. The coursework is rigorous and demanding, requiring a serious commitment on the part of the student.

Areas of Study

The master's degree addresses challenges in both technology policy and technology enterprise.
Graduate Studies Committee
The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Admission Requirements
The prospective student should have at least five years of professional experience, an above-average score on the Graduate Record Examination General Test (GRE) or the Graduate Management Admission Test (GMAT), and an undergraduate grade point average of at least 3.00.

The Admissions Committee may consider waiving the GMAT/GRE requirement in the MSTC program when one of the following conditions is met: (1) 15 years of post-graduate work experience, (2) five years of people/project management experience, (3) an advanced degree, or (4) an expired GMAT.

Degree Requirements,
Technology Commercialization

Please contact the program with concerns or questions.

Master of Science in Technology Commercialization
The dates of enrollment for each semester are published in the University’s academic calendar. The program requires 30 semester hours of graduate coursework. Students must enter the program in the summer and must take courses in a prescribed sequence. There are no electives.

Courses, Business
Please see the General Information Catalog for a list of courses. The following fields of study are housed at the school level: Business Administration (B.A).

For courses offered by each department within the McCombs School of Business, please see the corresponding department page in the following sections.

Courses, Department of Accounting
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Accounting: Accounting (ACC).

Courses, Department of Business, Government, and Society
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Business, Government, and Society: Business, Government, and Society (BGS), International Business (I.B), and Legal Environment of Business (LEB).

Courses, Department of Finance
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Finance: Finance (FIN) and Real Estate (R.E).

Courses, Department of Information, Risk, and Operations Management
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Information, Risk, and Operations Management: Management Information Systems (MIS), Operations Management (O.M), Risk Management (R.M), and Statistics (STA).

Courses, Department of Management
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Management: Management (MAN).

Courses, Department of Marketing
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Marketing: Marketing (MKT).

Courses, Energy Management Graduate Program
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Energy Management Graduate Program: Energy Management (EMA).

Courses, Health Care Transformation Graduate Program
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Health Care Transformation Graduate Program: Health Care Transformation (HCT).

Courses, Technology Commercialization Graduate Program
Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Technology Commercialization Graduate Program: Science and Technology Commercialization (STC).

Moody College of Communication
Master of Arts
Master of Fine Arts
Master of Science in Speech, Language, and Hearing Sciences
Doctor of Audiology
Doctor of Philosophy
Facilities for Graduate Work

In addition to the extensive library and computer resources of the University, certain special resources provide support for graduate work in communication. The G.B. Dealey Center for New Media is the college’s five-story, 120,000 square-foot building. It provides interactive classrooms and meeting space for students and houses the adjacent KUT Public Media Studios. It is a state-of-the-art facility that includes a 300-seat auditorium, a multimedia newsroom, an advertising creative room, and dedicated spaces for conferences, presentations, and screenings.

Communication Building A (CMA) is a six-level building housing classrooms, offices, and sophisticated multimedia facilities. Communication Building B (CMB) is a nine-level production building and houses teaching and production facilities for the School of Journalism and Media and the Department of Radio-Television-Film. The extensive Behavioral Science Laboratory in CMB is a research facility housing a suite of versatile, state-of-the-art experimental rooms and laboratory spaces.

These facilities provide opportunities for programs of graduate study that cross departmental lines and media, and that combine the resources of the Moody College of Communication in other ways not feasible within a single department. Additional facilities are listed in each graduate program’s section.

Areas of Study

Graduate work in the Moody College of Communication may lead to the Master of Arts, the Master of Fine Arts, the Master of Science in Speech, Language, and Hearing Sciences, the Doctor of Audiology, or the Doctor of Philosophy, or may be taken as a supporting field for a graduate degree in an area outside the college. For the Master of Arts or Doctor of Philosophy, the student may major in advertising, communication studies, journalism, radio-television-film, or speech, language, and hearing sciences; radio-television-film majors may seek the Master of Fine Arts in film production or screenwriting; speech, language, and hearing sciences majors may seek the Master of Fine Arts in film production or screenwriting; speech, language, and hearing sciences majors may seek the Master of Science in Speech, Language, and Hearing Sciences; and the Doctor of Audiology degree. Advanced graduate work in communication may emphasize the processes of communication, or interdisciplinary combinations of areas of study, or appropriate subdivisions indicated by the courses taught and the specialties of faculty members.

Admission Requirements

The applicant must have an undergraduate degree from an accredited college or university and may be required to complete up to 12 semester hours of upper-division coursework in the area of the proposed graduate major. Each program reserves the right to examine the applicant orally or in writing or both regarding the subject matter prerequisite to graduate courses in the major.

Degree Requirements

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts usually requires 30 semester hours of graduate coursework, although additional courses may be required to make up deficiencies.

Master of Science in Speech, Language, and Hearing Sciences

The Master of Science in Speech, Language, and Hearing Sciences requires 57-60 hours for students seeking certification.

Master of Fine Arts

The Master of Fine Arts is available only in video and film production or in writing for film and television. Information about the program is given in the Radio-Television-Film (p. 55) section.

Doctor of Philosophy

The doctoral program cannot be defined in terms of a specific number of hours of credit, although a few core requirements may be stated. Beyond these core courses, the student is required to select a major area of study, to take courses recommended by an advisory committee in this area, and to pursue coursework in one or more supporting fields. The graduate programs in the college work closely together in the coordination of courses for the doctoral degrees in communication. Supporting fields are most commonly in the social and behavioral sciences, business, education, and linguistics, but the student may suggest other fields.

Core requirements include graduate courses in communication theory and research methodology specified by the departments. Foreign language or substitute research tool requirements are specified by Graduate Studies Committees. Students should consult the program’s graduate advisor for specific requirements.

Doctor of Audiology

The college offers the Doctor of Audiology (AuD) through the Department of Speech, Language, and Hearing Sciences. Information about the program is given in Speech, Language, and Hearing Sciences Degree Requirements (p. 56).

Facilities for Graduate Work

In addition to the extensive library and computer resources available on the campus, certain special resources provide support for graduate work in advertising.

Classrooms and laboratories devoted to research and creative work in advertising include a copy and layout studio equipped with the latest computer technology for advertising design and production; the Advertising Conference Room, equipped for client and research presentations; and the Enviro Media Student Lounge.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Lucy Atkinson
Laura F Bright
Erica Ciszew
Isabella C Cunningham
Natalie Brown Devlin
Minette E Drumwright
Anthony David Dudo
Matthew S Eastin
Lee Ann Kahlor
Deena Kemp
Brad Love
Michael S Mackert
Jeeyun Oh
Kathrynn Pounders
JoAnn M Sciarrino
Natalie T J Tindall
Sean J Upshaw
Gary B Wilcox

Admission Requirements

The entering student must hold a bachelor's degree from an accredited institution. All students must complete the following coursework prior to the first semester of enrollment: a basic marketing course and a basic statistics course.

Degree Requirements, Advertising

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts degree is offered in two options: with thesis and no thesis. The thesis option requires at least 36 semester hours of credit; the option without thesis at least 36 hours. Advertising 382, 382J, 385, 387, and 391K are required. All students must also complete at least six semester hours in a minor area of study, such as marketing, sociology, anthropology, journalism, psychology, or English. No more than nine semester hours of upper-division coursework may be counted toward the degree. These courses must be approved by the graduate advisor.

The program is flexible, allowing students to focus on their specific interests through elective and minor coursework. Most students complete the program in 21 months.

Option II. The Master of Arts is offered both in a traditional format and in the Option II format. Option II provides a planned program of study that includes intensive summer work and special internationally focused enrichment opportunities. It gives students enrolled in participating academic programs access to a multinational and global experience. Option II students must complete a master's report.

Doctor of Philosophy

The Doctoral program cannot be defined in terms of a specific number of hours of credit, although a few core requirements are stated. The required core courses are Advertising 392 (Topic 2: Advanced Advertising Theories I), 392 (Topic 3: Advertising Research I), 392 (Topic 4: Advanced Advertising Theories II), 392 (Topic 5: Advertising Research II), and three hours of practicum coursework (Advertising 389). In addition to these required core courses, the student is required to select advertising as a major area of study and to pursue coursework in three or more supporting fields. Selected courses are recommended by an advisory committee selected by the student and their advisor. Typically, the Doctoral degree requires a minimum of 75 hours beyond the Bachelor's degree.

Dual Degree Programs

The following dual degree programs are offered in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Communication Studies

Master of Arts

Doctor of Philosophy

For More Information

Campus address: Jesse H. Jones Communication Center (Academic) (CMA) A7.112, phone (512) 471-1942, fax (512) 471-3504; campus mail code: A1105

Mailing address: The University of Texas at Austin, Graduate Program, Department of Communication Studies, 2504 Whitis Avenue A1105, Austin TX 78712

E-mail: commstudies@austin.utexas.edu

URL: http://commstudies.utexas.edu/

Facilities for Graduate Work

The graduate program provides students with a designated computer lab and access to a departmental printer. The Robert Hopper Lab is equipped with multi-platform computers (two Apple and two PC), statistical software packages, storage space, study space, lounge space, and research and collaboration space. Audio and video equipment is available to check out from the Moody College of Communication. A Research Participation Software system is provided for graduate students to recruit undergraduate participants for research studies.

The program provides all students with cubicle or office space within the Moody College of Communication complex. In addition, facilities are available for testing, defenses, research, virtual interviews, and various graduate student needs.

Areas of Study

The traditional master's (Option I) and doctoral degree programs in communication studies provide training in the following areas: interpersonal communication, organizational communication and technology, and rhetoric, language, and political communication.

The Option III master's degree in communication studies provides training in strategic communication.
The Doctor of Philosophy degree with a major in communication studies is a research degree; doctoral students can expect opportunities to work closely with the faculty on research and to participate in the publication of research findings. All doctoral students are expected to achieve mastery of research design principles and methods appropriate to their program of study.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Dawna Ballard
- Joshua Ben Barbour
- Jay Michael Bernhardt
- Michael Butterworth
- Karma Ruth Chavez
- Rene M Dailey
- John A Daly
- Erin Eileen Donovan
- Shiv Ganesh
- Joshua G Gunn
- Roderick P Hart
- Elin J Hartelius
- Sharon E Jarvis
- Madeline M Maxwell

- Scott R Stroud
- Jeffrey Treem
- Anita L Vangelisti

Admission Requirements

Entering students must have a bachelor’s degree (or the equivalent) from an accredited institution, and their undergraduate preparation should include at least nine semester hours of upper-division coursework in communication studies. All applicants must meet the Graduate School’s admission requirements (p. 19).

Satisfying these minimum requirements does not guarantee admission. Each applicant’s credentials are scrutinized by each faculty member in the program. No single criterion, such as grade point average or Graduate Record Examinations (GRE) score, is given undue weight in the decision process; every attempt is made to assess the special strengths that the applicant might bring to the program.

Degree Requirements, Communication Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

With the approval of the Graduate Studies Committee and the graduate dean, work toward the major may be divided among two or more areas in communication. To be counted toward the degree, all coursework in the major must be at the graduate level and must be completed with a grade of at least B.

Student’s in the traditional (Option I) master’s degree program receive training in interpersonal communication, organizational communication and technology, and rhetoric, language and political communication. Students must complete a minimum of 30 semester hours of coursework, including a thesis, or a minimum of 33 semester hours, including a report.

Students in the Option III master’s degree program with a specialization in Strategic Communication must complete a minimum of 33 semester hours; no report or thesis is required. All courses required to complete the Option III program are offered in alignment with university policies governing the delivery of non-formula-funded (Option III) degree programs.

Doctor of Philosophy

With the approval of the Graduate Studies Committee and the graduate dean, work toward the major may be divided among two or more areas in communication. To be counted toward the degree, all coursework in the major must be at the graduate level and must be completed with a grade of at least B. Doctoral students normally complete all requirements in four or five years of graduate study. Individual study programs must be arranged in consultation with the graduate advisor.

Dual Degree Programs

The Department of Communication Studies offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Stackable Certificate Programs, Communication Studies

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Communication Studies: Strategic Communication

The Communication Studies: Strategic Communication stackable graduate certificate is designed for post-baccalaureate, non-degree seeking students who seek to bolster their communication skills and increase their marketability. The program requires completion of five courses (15 semester credit hours of coursework), all offered in a face-to-face format on the UT Austin campus. The stackable graduate certificate will be offered in accordance with University policies and procedures that govern non-formula-funded (Option III) academic programs.

With a mix of national and international scholars, former news media executives, and journalists, the School of Journalism and Media faculty is one of the best and most balanced in the country. Students have access to excellent labs and facilities and state-of-the-art equipment, as well as several special resources. Within the College, The Knight Center for Journalism in the Americas, the Center for Media Engagement, the Technology & Information Policy Institute, the Institute for Media Innovation, and the Dallas Morning News Innovation Endowment collaborate with students and faculty in Journalism and Media by providing research opportunities and internships. The Harry Ransom Center houses such collections as the Watergate papers of Bob Woodward and Carl Bernstein, as well as the world's first photograph, and the Dolph Briscoe Center for American History houses a variety of archived papers from such journalism icons as Walter Cronkite and Molly Ivins. These facilities and resources support graduate study in journalism and media that is designed to prepare students to succeed in a wide range of careers in the professional, scholarly and public domains.

### Areas of Study

The School of Journalism and Media supports a doctoral program and a Master of Arts degree. Multiple areas of emphasis are available in both degrees. The MA degree includes a professional track and a research and theory track.

The Doctor of Philosophy degree in Journalism and Media emphasizes the interdisciplinary study of media systems, including journalism, digital media platforms and technologies, and global media ecosystems. It cultivates expertise in multiple research methodologies.

The MA Research and Theory track is designed for students who seek a general conceptual foundation for media-related study and careers, or who plan to pursue doctoral study in journalism and media. It offers extensive choices across a range of methodological and research preparation.

The MA Professional track is designed to provide or extend professional training for people who desire to work in the fields of making media, including reporters, photojournalists, and storytellers in various media forms.

### Admission Requirements

Admission to the graduate program in journalism and media is competitive, and a number of criteria are carefully considered in admissions decisions. Students admitted to the Master of Arts program must hold a bachelor's degree from an accredited institution. Students...
admitted to the Doctor of Philosophy program must hold a master’s degree from an accredited institution.

Degree Requirements, Journalism and Media

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The research and theory track of the MA degree requires 30 semester hours of coursework, including a thesis.

The professional track of the MA degree requires 30 semester hours of coursework and a portfolio of professional work produced during the degree.

Doctor of Philosophy

Working with the faculty and the graduate advisor, each student develops an individual Program of Work. All students develop mastery of journalism and media research and theory. Students are required to complete five semesters of coursework (45 credit hours), one semester for preparing for comprehensive exams and a research proposal, and their dissertation in the final, fourth year. The program offers a variety of courses that focus on concepts, models, and theories, and includes opportunities for research, fellowships and internships.

Dual Degree Programs

The School of Journalism and Media offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Radio-Television-Film

Master of Arts
Master of Fine Arts
Doctor of Philosophy

For More Information

**Campus address:** Jesse H. Jones Communication Center (Academic) (CMA) 6.116, phone (512) 471-3532, fax (512) 471-4077; campus mail code: A0800

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of Radio-Television-Film, 2504 Whitis Avenue A0800, Austin TX 78712

**URL:** http://rtf.utexas.edu/

Facilities for Graduate Work

The extensive production facilities of the Jesse H. Jones Communication Center are available to graduate students in radio-television-film, as are the services of Information Technology Services. Research in media history, criticism, and theory is supported by the resources of the University Libraries, the Research and Collections Division of the Dolph Briscoe Center for American History, and the Harry Ransom Center, a major collection of primary materials in literature, film, and the arts. Students in global media have available to them the nationally recognized resources of the Benson Latin American Collection, the Center for Middle Eastern Studies, and the South Asia Institute.

Areas of Study

Students seeking the Master of Arts or the Doctor of Philosophy pursue work in a number of concentrations, including identity and representation; history and criticism; media industries; global cinema and media; and digital media. Students seeking the Master of Fine Arts study film and media production, or screenwriting.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Radio-Television-Film

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

The student is normally expected to begin coursework in the fall semester.

Master of Arts

The Master of Arts with thesis requires 30 semester hours of coursework, including three hours in Radio-Television-Film 395, Theory and Literature, which must be taken in the fall semester of the first year; three hours in Radio-Television-Film 380, Research Theory and Design, which must be taken in the spring semester of the first year; and six hours of Radio-Television-Film 698, Thesis. The Master of Arts with thesis is recommended for students who plan to continue their graduate work after receiving the master’s degree. The Master of Arts with report requires 33 hours of coursework, including three hours of Radio-Television-Film 398R, Master’s Report.

Master of Fine Arts

This degree is available in two areas of specialization – film and media production and screenwriting. It is designed for the student with a demonstrated commitment to production or screenwriting as a professional, artistic, or academic pursuit.

MFA students who are admitted to the film and media production specialization complete 60 hours of coursework in a three-year program that allows them to develop a foundation of production skills by creating works in both traditional and nontraditional forms. During their final semester in the program, students must enroll in Radio-Television-Film 398R, Master’s Report. MFA production students must pass annual
reviews of their work and must produce a final film project for public exhibition during the third year.

MFA students who are admitted to the screenwriting specialization must complete 42 hours of coursework in a program that allows them to explore writing for film and television. Students write original screenplays as well as those adapted from other material. In their final semester in the program, students must enroll in Radio-Television-Film 398R, Master's Report. In that course, in addition to the master's report, students will rewrite one or more of the scripts completed during earlier semesters.

Doctor of Philosophy

The Master of Arts or an equivalent degree is required for admission to the doctoral degree program. The program requires completion of at least 42 semester hours of coursework beyond the master's degree; among these hours must be at least nine hours in research-tools courses and 18 hours in the student's area of specialization, including Radio-Television-Film 395, Theory and Literature taken twice, and Radio-Television-Film 380, Research Theory and Design. The student works with a faculty advisor to plan specific course requirements in their area(s) of specialization. In addition to this coursework, the student must pass comprehensive examinations in three academic areas. After successful completion of the comprehensive examinations, the student files an application for candidacy and writes the dissertation.

The graduate program does not require an enrollment deposit to accept an offer of admission. A $10.00 general deposit is applied to the tuition bill when the student enrolls in their first semester.

Dual Degree Programs

The Department of Radio-Television-Film offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Speech, Language, and Hearing Sciences

Master of Science in Speech, Language, and Hearing Sciences
Doctor of Audiology
Doctor of Philosophy

For More Information

Campus address: Jesse H. Jones Communication Center (Academic) (CMA) A4.134, phone (512) 471-2385, fax (512) 471-2957; campus mail code: A1100

Mailing address: The University of Texas at Austin, Graduate Program, Department of Speech, Language, and Hearing Sciences, 2504 Whitis Avenue A1100, Austin TX 78712-1074

E-mail: SLHSGradoffice@austin.utexas.edu
URL: http://slhs.utexas.edu/graduate/

Facilities for Graduate Work

Program facilities and equipment are centralized through the Moody College of Communication. Students, faculty, and staff in all speech, language, and hearing sciences programs have access to the same facilities and equipment, as funded, provided, facilitated, and updated by the Moody College. The research labs within the department, the University of Texas Speech and Hearing Center, and the Michael and Tami Lang Stuttering Institute, house research and clinical equipment that supports graduate and undergraduate study in speech, language, and hearing sciences.

Areas of Study

The graduate degree programs in speech, language, and hearing sciences provide training in speech/language pathology, audiology, and speech and hearing science.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Admission Requirements

Applicants to the program must meet the requirements for admission to the Graduate School given in Admission and Registration (p. 18); however, satisfying these minimum requirements does not guarantee admission. Each applicant's credentials are scrutinized by members of the faculty of the program. No single criterion, such as grade point average or Graduate Record Examinations (GRE) score, is given undue weight in the decision process; every attempt is made to assess the special strengths that the applicant might bring to the program.

Professional Liability Insurance

Professional liability insurance is required of all students enrolled in off-campus clinical practicums in speech/language pathology or audiology. The insurance policy must cover the duration of the placement, beginning on or before the first day of the placement and extending through the final day of the placement.

Degree Requirements, Speech, Language, and Hearing Sciences

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Students seeking professional certification in speech/language pathology or audiology must meet coursework and clinical requirements specific to the specialization or area of study. Information about certification requirements is available from the graduate advisor.

To be counted toward the degree, all coursework in the major must be at the graduate or upper division level. Individual study programs must be arranged in consultation with the graduate advisor.
Master of Science in Speech, Language, and Hearing Sciences

The Master of Science in Speech, Language, and Hearing Sciences is offered with a thesis or no-thesis option.

The Master of Science in Speech, Language, and Hearing Sciences with thesis: Students selecting this option must complete at least 27 semester hours in core courses, at least six hours of thesis, and in addition, students must complete clinical practicum training by enrolling in clinical practicum coursework for 24 to 27 semester hours. Enrollment in clinical practicum coursework is required for eligibility for certification through the American Speech-Language-Hearing Association (ASHA). Students who wish to opt out of eligibility for certification may do so with approval of the graduate advisor. Additional hours may be required by the program in order to meet ASHA guidelines. Students in the MSSLHS/Ph.D. program should enroll in thesis.

The Master of Science in Speech, Language, and Hearing Sciences without thesis: Students selecting this option must complete at least 27 semester hours in core courses, at least six hours of electives, and in addition, students must complete clinical practicum training by enrolling in clinical practicum coursework for 24 to 27 semester hours. Enrollment in clinical practicum coursework is required for eligibility for certification through the American Speech-Language-Hearing Association (ASHA). Students who wish to opt out of eligibility for certification may do so with approval of the graduate advisor. Additional hours may be required by the program in order to meet ASHA guidelines.

Students have the option to seek the degree of Master of Sciences in Speech, Language, and Hearing Sciences without clinical certification. Choosing this option would waive the requirement to complete clinical practicum training (24 to 27 semester hours of clinical practicum coursework). Students selecting this option must complete at least 27 semester hours of core courses and at least six hours of electives or at least six hours of thesis. Students in the MSSLHS/Ph.D. program should enroll in thesis.

Doctor of Audiology

The Doctor of Audiology (AuD) provides academic and clinical education for those who plan to enter the profession of audiology. The degree program involves preparation for the diagnosis and non-medical treatment of hearing and balance disorders; it is designed to prepare audiologists to meet the standards for Texas state licensure in audiology.

The program requires a minimum of 99 semester hours of coursework and is designed to be completed in four years. All preprofessional students in audiometry complete the same set of core courses and basic clinical practicum. Students may choose from a set of electives based upon their specific interests. Research experiences are part of the curriculum, but a dissertation is not required.

Doctor of Philosophy

The Doctor of Philosophy is a research degree; students can expect opportunities to work closely with faculty on research and to participate in the publication of research findings. All students in the program are expected to achieve mastery of research design principles and methods appropriate to their program of study.

The PhD program requires a minimum of 36 semester hours of coursework, and completion of a teaching portfolio and two research projects before PhD candidacy. After advancing to candidacy, students are required to complete a dissertation and pass an oral defense to satisfy degree requirements.

Courses, Communication

Please see the [General Information Catalog](#) for a list of courses. The following fields of study are housed at the college level: Communication (COM).

2023-2024 Graduate Catalog ▸ Graduate 57
Areas of Study
The College of Education offers graduate degree programs in the following areas: curriculum and instruction; educational leadership and policy; educational psychology; foreign language education; health behavior and health education; kinesiology; science, technology, engineering, and mathematics education; and special education.

Degree Requirements
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts
In addition to fulfilling the general requirements for all master’s degrees, the student must complete at least 12 semester hours of advanced course preparation appropriate to the proposed area of concentration. Graduate advisors can provide information about these requirements and any others prescribed by the Graduate Studies Committees.

Before a student is admitted to candidacy, the Program of Work must be approved by the graduate advisor of the area of concentration and the graduate dean. Additional requirements and optional plans open to students in the areas of concentration in education are listed under the appropriate area headings or are available from the area graduate advisors.

Master of Education
In addition to fulfilling the general requirements for all master’s degrees, the student must complete 12 semester hours of advanced course preparation appropriate to the proposed area of concentration. Graduate advisors can provide information about these requirements and any others prescribed by the Graduate Studies Committees.

Of the total number of semester hours required, at least 18 must be in a particular area of concentration, which may be interdepartmental in scope and not necessarily confined to the College of Education.

Before the student is admitted to candidacy, the Program of Work must be approved by the graduate advisor of the area of concentration and the graduate dean. Additional requirements and optional plans open to students in the areas of concentration in education are listed under the appropriate area headings or are available from the area graduate advisors.

Master of Science
A Master of Science is offered in health behavior and health education and in kinesiology. In addition to fulfilling the general requirements for all master’s degrees, students in these programs must complete 12 semester hours of advanced course preparation appropriate to the proposed area of concentration, as well as a thesis or a report under the direction of their advisor. Graduate advisors can provide information about these requirements and any others prescribed by the Graduate Studies Committees.

Before a student is admitted to candidacy, the Program of Work must be approved by the graduate advisor of the area of concentration and the graduate dean. Additional requirements and optional plans open to students in the areas of concentration in education are listed under the appropriate area headings or are available from the area graduate advisors.

Doctor of Philosophy
The Doctor of Philosophy is a research degree. The student’s Program of Work includes courses in the field of specialization and supporting work outside the major. To be admitted to candidacy, the student is expected to pass a qualifying examination, written or oral or both, and to meet additional requirements established by the Graduate Studies Committee. Admission to candidacy must be approved by the Graduate Studies Committee and the graduate dean.

Doctor of Education
The Doctor of Education is a professional degree. Program requirements vary, but each must focus predominantly on the application of knowledge. The program normally entails an internship. The requirements for admission to candidacy and course requirements are similar to those for the Doctor of Philosophy degree.

Curriculum and Instruction

Mailing address: The University of Texas at Austin, Graduate Program, Department of Curriculum and Instruction, 1912 Speedway D5700, Austin TX 78712
E-mail: cigrad@austin.utexas.edu
URL: https://education.utexas.edu/departments/curriculum-instruction

Facilities for Graduate Work
The Perry-Castañeda Library offers an extensive collection of material on education, including the Curriculum and Textbook Collections. Students also have access to an array of electronic databases, journals, and books related to curriculum and instruction through the University Libraries website. The College of Education’s Information Technology Office includes a graphics laboratory, a media check-out, a computer help desk, and multiple computer laboratories. Other campus facilities, including the Sanger Learning Center, the University Writing Center and the laboratories and systems of Information Technology Services, are used extensively, and ongoing research and instructional activities are carried out in local schools.

Areas of Study
Graduate study is offered in the following areas of specialization: bilingual/bicultural education, cultural studies in education, early childhood education, learning technologies, language and literacy studies, physical education teacher education, and social studies education. Requirements for concentrations in science, technology, engineering, and mathematics education are given elsewhere in this catalog.

Graduate Studies Committee
The following faculty members served on the Graduate Studies Committee (GSO) in the spring 2023 semester.
Degree Requirements, Curriculum and Instruction

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Arts**

General requirements are those for the master's degree on the Degree Requirements (p. 23) page, except that students may count no more than six semester hours of upper-division coursework toward the degree. The thesis option requires 30 hours of coursework; the report option requires 33 hours. Students who choose the language and literacy studies specialization, however, complete 36 hours of coursework for either option. The program area faculty annually conduct a review of each student's progress. For specific requirements and optional plans, consult the graduate advisor.

**Master of Education**

In addition to the general requirements for all master's degrees, students must present evidence of appropriate teaching or related experience. The MEd teacher certification specialization requires 42 hours of coursework, with other tracks generally requiring 36 hours of coursework, without a thesis or a report. In some specializations, a 33-semester-hour option is available. This option requires a report. The program area faculty annually conduct a review of each student’s progress. For specific requirements and optional plans, consult the graduate advisor.

**Doctor of Philosophy**

Students seeking the degree of Doctor of Philosophy must show evidence of related academic and professional experience, including a master's degree or the equivalent.

**Program Requirements**

Each student must complete at least 18 semester hours of organized coursework in the Department of Curriculum and Instruction. The faculty in each specialization has established a minimum number of hours of coursework required for that program.

**Core courses.** All students must complete nine hours in courses that form the theoretical foundation for the study of curriculum and instruction. Courses must be taken in teaching and teacher education, curriculum theory and development, and sociocultural foundations of education.

**Research methodology.** At least 12 hours in research methodology are required, consisting of three hours in each of the following: philosophical foundations of research, qualitative methods, quantitative methods, and an advanced course in either qualitative or quantitative research methods. Current knowledge of statistics is a prerequisite for the quantitative research methods course.

**Directed research.** Twelve hours in directed research are required. This requirement may be fulfilled with organized coursework that has a substantial research component and requires a research project, or through faculty-guided research studies.

**Specialization courses.** This coursework is defined by the faculty in the area of specialization.

**Review and Examination Requirements**

**First review.** When the student has completed approximately one year in residence, or about 18 hours of coursework, the faculty will assess the student’s progress and likelihood of finishing the program based on performance in coursework and progress in research.

**Midprogram review.** The area faculty conducts a mid-program review when the student has completed between 27 and 36 semester hours of coursework, including some of the required hours of directed research. Requirements vary by program area, but all students are expected to submit evidence of research activity, either conducted or proposed, and usually developed as part of Curriculum and Instruction 396T. A favorable review results in the student's continuation in the program. An unfavorable review may result in additional requirements or dismissal from the program.

**Qualifying examination.** To be admitted to candidacy for the degree, the student must pass a qualifying examination according to guidelines established by the faculty in the area of specialization.

**Dissertation.** The quality and significance of the dissertation must conform to the guidelines of the Graduate School. The PhD dissertation should make a significant contribution to knowledge and educational theory.

**Annual review.** In any year a student does not engage in a first or midprogram review, a qualifying examination, or dissertation, the student will engage in an annual review conducted by the program area faculty.

**Doctor of Education**

The Doctor of Education is a professional degree. The degree program differs from that leading to the Doctor of Philosophy in its predominant focus on the application of knowledge and in the nature of the dissertation. At least three years of related professional experience and a master's degree or the equivalent are required for admission to this degree program.

**Program Requirements**

Each student must complete at least 18 semester hours of organized coursework in the Department of Curriculum and Instruction. The faculty in each specialization has established a minimum number of hours of coursework required for that program.

**Core courses.** All students must complete 12 hours in courses that form the theoretical foundation for the study of curriculum and instruction. Courses must be taken in learning and teaching and teacher education,
curriculum theory and development, and sociocultural foundations of education.

Research methodology. At least six hours in research methodology are required.

Field research/internship. At least six hours in field research are required, completed over at least two semesters. This research is most often conducted in a school setting and may be done during an internship. It need not be done as part of an organized course but must be directed by a faculty member.

Specialization courses. This coursework is defined by the faculty in the area of specialization.

Review and Examination Requirements

First review. When the student has completed approximately one year in residence, or about 18 hours of coursework, the faculty will assess the student’s progress and likelihood of finishing the program as shown by performance in coursework.

Midprogram review. After two semesters of field research or about two years in the program, the student submits for faculty review a written report based on the field research/internship. A favorable review results in the student's continuation in the program. An unfavorable review may result in additional requirements or dismissal from the program.

Qualifying examination. To be admitted to candidacy for the degree, the student must pass a qualifying examination according to guidelines established by the faculty in the area of specialization.

Dissertation. The quality and significance of the dissertation must conform to the guidelines of the Graduate School. In general, the EdD dissertation should make a significant contribution to knowledge about educational practice.

Annual review. In any year a student does not engage in a first or midprogram review, a qualifying examination, or dissertation, the student will engage in an annual review conducted by the program area faculty.

Stackable Certificate Programs, Curriculum and Instruction

Curriculum and Instruction: Learning, Action, Equity, and Design (LEAD)
The Curriculum and Instruction: Learning, Equity, Action & Design (LEAD) stackable graduate certificate is designed primarily for K-12 educators or other related practitioners who seek to advance their technology integration and digital equity design skills for curricular and instructional work with K-12 learners. The program builds technology leaders committed to digital equity and justice. The program requires completion of four graduate-level courses (12 semester credit hours) and is available to degree-seeking and non-degree-seeking students. All courses required for program completion are learner-centered and project-based, offered in asynchronous online formats, with negotiated scheduling for synchronous work.

Educational Leadership and Policy

Master of Education
Doctor of Philosophy
Doctor of Education

For More Information

Campus address: George I. Sánchez Building (SZB) 3.808, phone (512) 471-7551, fax (512) 471-5975; campus mail code: D5400

Mailing address: The University of Texas at Austin, Graduate Program, Department of Educational Leadership and Policy, 1912 Speedway Stop D5400, Austin TX 78712

URL: https://education.utexas.edu/departments/educational-leadership-policy

Facilities for Graduate Work

The University and the College of Education provide outstanding computer laboratories, instructional resource centers, and libraries. Students are also encouraged to view the whole intellectual and cultural life of the University as a resource to be explored.

The Department of Educational Leadership and Policy has close working relationships with public and private schools, colleges, and universities that provide clinical sites, field experiences, and research opportunities. Many educational associations and agencies in Austin provide important additional resources for students and faculty members.

Areas of Study

Students may choose from the following specializations: higher education leadership, educational policy and planning, principalship and superintendent. Although each specialization involves unique coursework, a common core of knowledge is required of all students.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Admission Requirements

Admission decisions are based on multiple criteria, including the applicant's academic and professional qualifications. Applicants must have a grade point average of at least 3.00 in upper-division and graduate coursework. In addition, the applicant must be accepted into one of the areas of specialization listed above. The faculty for the specialization may establish additional admission requirements, such as the submission of an official score on the Graduate Record Examinations General Test, participation in an assessment center, personal interviews, or other evidence of the student's preparation for graduate work. Information about these requirements is available from the department.

Students entering one of the doctoral programs should hold a master's degree. The master's degree need not be in education, but the applicant is expected to have knowledge of the history or philosophy of education and of human learning.

Degree Requirements, Educational Leadership and Policy

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Education

This is a professional degree offered in two areas of specialization—higher education leadership and public school executive leadership. In the public school executive leadership specialization, the master's degree is offered in educational policy and planning, or the principalship. The master's degree in the principalship is part of the state certification program. At least 35 semester hours of coursework are required in the principalship concentration and 36 semester hours of coursework in the other areas of specialization. All specializations require at least 30 hours of approved coursework in the department. Several specializations require a minor of at least six hours outside of the department.

Doctor of Philosophy

Programs leading to this degree emphasize preparation for a research career in which the graduate will add to the core of knowledge in the fields of educational policy or higher education leadership. Programs are oriented toward theory development and the development of research skills in a variety of methodologies and include a strong secondary emphasis in a cognate field. To be admitted to candidacy, a student must pass the mid-program review and a written and oral examinations in the area of specialization.

The student's program must consist of at least 60 semester hours of coursework at the University in addition to dissertation hours, including at least 42 hours in the Department of Educational Leadership and Policy. The student must be in residence as a full-time student for two consecutive semesters. Students may register for no more than 15 hours each semester and for no more than six hours each six-week summer term.

All students must complete the coursework listed below. Additional coursework is required in some areas of specialization.

a. Twelve hours in core areas that form the theoretical foundation for the study of administration. Core areas include educational economics and finance policy; educational politics and policy; organizational design and behavior; and social and cultural contexts of education.

b. At least 18 hours of coursework unique to the specialization.

c. At least 15 hours (the minor) outside the College of Education but in areas supporting the field; nine hours must be in a single theme or discipline or must form an integrated sequence.

d. Twelve hours in research methods courses, including Educational Leadership and Policy 391P, 391Q, 391E. Knowledge of basic statistics is prerequisite to some research methodology courses; this knowledge may be demonstrated by coursework (which may not be counted toward the doctoral degree) or by examination.

e. The candidate must enroll for two consecutive semesters in dissertation courses.

The focus of the dissertation must be in-depth, original research that has the possibility of creating new knowledge and understanding of a particular educational construct. In addition, the implications of the dissertation research should be much wider than a specific problem in a specific context.

The dissertation committee must be comprised of a minimum of four individuals. The chair of the committee must be a faculty member with GSC status in the Department. The second and third committee members must be faculty with GSC status in the Department. The fourth member is an individual with a doctorate degree who is not a member of the student's GSC. The fourth member, if external to the University, will need to submit a curriculum vitae and communication indicating his/her willingness to serve on the dissertation committee.

Doctor of Education

Programs for the Doctor of Education degree emphasize preparation for leadership careers in a variety of educational settings, including superintendent executive leadership and higher education executive leadership. Programs are oriented toward the application of theory and knowledge to practical problems and toward the development of sophisticated management skills and intelligent, informed leadership. To be admitted to candidacy, a student must pass the mid-program review and written and oral examinations in the area of specialization.

Doctor of Education students in the superintendent executive leadership area must take coursework that consists of at least 63 semester hours at the University in addition to the treatise courses, including at least 54 hours in the Department of Educational Leadership and Policy. Students must be in residence as full-time students for two consecutive terms. Students may register for no more than 15 hours each semester and
for no more than six hours each six-week summer term. Students must complete the following coursework:

a. Twelve hours in core areas that form the theoretical foundation for the study of leadership. Core areas include educational economics and finance policy; educational politics and policy; organizational design and behavior; and social and cultural contexts of education.

b. At least 33 hours of coursework unique to the specialization.

c. Nine hours (the minor) outside the department but in areas supporting the field of educational leadership.

d. At least nine hours in research methods courses. Knowledge of basic statistics is prerequisite to other research methodology courses. This knowledge may be demonstrated by coursework (which may not be counted toward the doctoral degree) or by examination.

e. At least one semester in an internship or practicum. The internship is individually designed to provide each student with on-site experience in the practice of educational leadership.

f. The candidate must enroll for two consecutive semesters in treatise courses.

Doctor of Education students in the higher education executive leadership program* must take coursework that consists of at least 57 semester hours at the University including the treatise courses, including at least 48 hours in the Department of Educational Leadership and Policy. Students must be in residence as full-time students for the length of the program. Students may register for no more than 15 hours each semester and for no more than nine hours for whole summer term. Students must complete the following coursework:

a. Twelve hours in core areas that form the theoretical foundation for the study of leadership. Core areas include educational economics and finance policy; educational politics and policy; organizational design and behavior; and social and cultural contexts of education.

b. At least 15 hours of coursework unique to the specialization.

c. Nine hours (the minor) outside the department but in areas supporting the field of educational leadership.

d. Three hours in an internship course. The internship is individually designed to provide each student with enhanced experience in the practice of higher education leadership.

e. The candidate must enroll for two consecutive semesters in treatise courses.

For all Doctor of Education students, the focus of the treatise must be on problems of practice and should address a specific problem or program in a given context. The treatise can examine a particular issue or evaluate a specific program in any educational institution.

The treatise committee for the EdD must be comprised of four individuals. The chair of the committee must be a faculty with GSC status in the department. The second and third committee members must be faculty with GSC status in the department. The fourth committee member will be an individual with practical experience directly related to the proposed treatise, who holds a doctorate degree, and who is not a member of the student’s GSC. The fourth member, if external to the University, will need to submit a curriculum vitae and communication indicating their willingness to serve on the treatise committee.

Educational Psychology

Master of Arts
Master of Education
Doctor of Philosophy

For More Information

Campus address: George I. Sánchez Building (SZB) 5.708, phone (512) 471-4155, fax (512) 471-1288; campus mail code: D5800

Mailing address: The University of Texas at Austin, Graduate Program, Department of Educational Psychology, 1912 Speedway Stop D5800, Austin TX 78712-1289

URL: https://education.utexas.edu/departments/educational-psychology

Facilities for Graduate Work

The University, College of Education, and Department of Educational Psychology have an array of facilities that offer excellent opportunities for research and study. Resources include technology-enhanced classrooms and meeting rooms, collaborative research space, and the Assessment and Clinical Training Center with recording and observation technology. The College of Education's Information Technology Office provides access to computer laboratories, technology help desk, and a wide range of hardware and software useful for instructional development and research. Students also have access through the University Libraries website to electronic databases, journals, and books related to educational psychology. Training, practicum and internship opportunities are available through many schools and state and community institutions in Austin and surrounding communities.

Areas of Study

Professional training in educational psychology relates human cognition, affect and behavior to the educational process as it occurs in the home and in peer groups, nursery school through graduate school, professional education, business and industry, the military, and other settings. In so doing, it includes study in the following areas: the biological bases of behavior; history and systems of psychology and of education; the psychological processes related to diversity and multicultural issues; the psychology of learning, motivation, cognition, and instruction; human development, culture, and learning sciences (developmental, social, and personality psychology); psychological and educational measurement, statistics, evaluation, and research methodology; and the professional areas of school psychology, counseling psychology, and counselor education, including clinical training in those areas.

Degree Requirements, Educational Psychology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

All students seeking the Master of Arts (MA) degree in Educational Psychology concentrate coursework in an area of specialization within the department. Specializations with an available MA degree are human development, culture and learning sciences; and school psychology. The MA is also available to students enrolled in the doctoral degree program who either wish to complete a master's degree en-route to the doctorate, or who are permitted by the Graduate Studies Committee to complete a terminal MA degree.

Master of Arts (MA) in Educational Psychology with specialization in Human Development, Culture and Learning Sciences: Students pursuing the MA degree with specialization in human development, culture and learning sciences must complete a minimum of 40 hours of coursework, with an additional three-hour Master's Report or six-hour Master's Thesis. This program is designed to train graduate students in theories of human cognition, culture, development, language, learning, motivation, social, and personality psychology.

Master of Arts (MA) in Educational Psychology with specialization in School Psychology: Students pursuing the MA degree with specialization in school psychology must complete a minimum of 68 hours of coursework. Curriculum includes academic coursework as well as clinical practicum experience. This program is designed for those interested in future doctoral training but first wish to gain experience in research or in schools employed as a Licensed Specialist in School Psychology (LSSP).

More information is available on the Educational Psychology website, or from the graduate advisor in educational psychology.

Master of Education

The Master of Education (MEd) degree in educational psychology is available to students with specializations in human development, culture and learning sciences; quantitative methods; and counselor education.

Master of Education (MEd) in Educational Psychology with specialization in Counselor Education: Students pursuing the MEd degree with specialization in counselor education must complete a minimum of 60 hours of coursework. Curriculum includes academic coursework as well as clinical practicum experience. Within the program, there are two subject concentrations: school counseling; and higher education counseling and student affairs. The MEd program in Counselor Education is designed to prepare counselors to work in academic settings, to pursue doctoral studies in counseling psychology or related fields, and/or pursue certification as a Licensed Professional Counselor or School Counselor.

Master of Education (MEd) in Educational Psychology with specialization in Human Development, Culture and Learning Sciences: Students pursuing the MEd degree with specialization in human development, culture and learning sciences must complete a minimum of 33 hours of coursework. This program is designed to train graduate students in theories of human cognition, culture, development, language, learning, motivation, social, and personality psychology.

Master of Education in Educational Psychology with specialization in Quantitative Methods: Students pursuing the MEd degree with specialization in quantitative methods must complete a minimum of 35 hours of coursework. This Master's specialization is designed to provide knowledge and technical skills in the areas of applied statistics, psychometrics, and program evaluation.

More information is available on the Educational Psychology website, or from the graduate advisor in educational psychology.

Doctor of Philosophy

The Doctor of Philosophy (PhD) with a major in educational psychology involves specialization in a program area within Educational Psychology: counseling psychology; human development, culture and learning science; quantitative methods; or school psychology. Degree plans differ depending on the areas of specialization.

Students in all specializations are required to complete core coursework in Educational Psychology, specialization coursework, and supporting coursework outside the department. Students in the specializations of counseling psychology and school psychology are required to complete additional training in the form of practicums and internship. All PhD specializations involve a dissertation: the student must successfully present the dissertation proposal to the Graduate Studies Committee. The dissertation must represent an independent scholarly investigation of a problem pertinent to the field of educational psychology and constitute a scholarly contribution to the body of knowledge in the profession.

Required semester hours of coursework vary per doctoral specialization. Most students require at least four years beyond the bachelor's degree to complete the program; many take five years or more. A significant proportion of students in programs not requiring an internship can complete the program in four to five years, including terms in the summer semester.

More information is available on the Educational Psychology website, or from the graduate advisor in educational psychology.

Dual Degree Programs

The Department of Educational Psychology offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Master of Education/Doctor of Medicine

In partnership with the Dell Medical School, Educational Psychology offers a Master of Education (MEd) to medical students as part of the medical school curriculum, third-year requirement for experience in Innovation, Leadership, and Discovery. The MEd/MD program is one of several dual-degree programs from which medical students can choose in their third year. Applicants to the dual-degree program are not required to submit GRE scores with their application materials. The requirements and policies associated with the dual-degree program are published in the Medical School Catalog. More information is available from the graduate advisor in educational psychology.

Health Behavior and Health Education

Master of Education
**Master of Science in Health Behavior and Health Education**

**Doctor of Philosophy**

---

**For More Information**

**Campus address:** L. Theo Bellmont Hall (BEL) 718, phone (512) 471-1273, fax (512) 471-8914; campus mail code: D3700

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of Kinesiology and Health Education, 2109 San Jacinto Boulevard Stop D3700, Austin TX 78712

---

**Facilities for Graduate Work**

Excellent teaching and research laboratories are available to graduate students in health behavior and health education. Special classrooms and computer facilities are available. Research laboratories are also available for field research at various schools, institutions, and agencies in Austin and surrounding communities.

---

**Areas of Study**

The programs leading to the Master of Science in Health Behavior and Health Education, Master of Education, or the Doctor of Philosophy with a major in Health Behavior and Health Education emphasize a developmental and research-based approach to health promotion across the life span.

All the health behavior and health education degree programs provide students with a solid background in the social and behavioral foundations of health. Students have the opportunity to design a course of study suited to their interests and the research interests of the faculty. The program prepares students for academic, research, and applied careers in health promotion and public health.

**Admissions Requirements**

Students who lack the prerequisite coursework described below may be admitted to the Graduate School, but they must then complete coursework in the appropriate areas in addition to degree requirements.

**Master’s degree programs.** An applicant to the Master of Science in Health Behavior and Health Education degree program or Master of Education with a major in health behavior and health education degree program must have completed an undergraduate major in health education or a related discipline. The applicant must have completed at least three semester hours of coursework in each of the following areas: theory and methods of health education and/or health promotion, behavioral sciences, and statistics.

**Doctoral degree program.** An undergraduate major in health education or a related discipline is required; the student must have completed at least three semester hours of coursework in each of the following areas: behavioral sciences, research methods, and statistics. The applicant must also be sponsored by a member of the Graduate Studies Committee. Applicants to the PhD program must demonstrate the ability to conduct independent research.

---

**Degree Requirements, Health Behavior and Health Education**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

---

**Master of Science in Health Behavior and Health Education**

The Master of Science in Health Behavior and Health Education (MSHbhed) consists of at least 36 semester hours of graduate study including a six-hour master’s thesis. All students seeking the MSHbhed degree complete coursework and research in an area of departmental specialization. Six semester hours of upper-division coursework is allowed in the program of work. Six hours should be taken in the minor. The minor field consists of six semester hours taken outside the department. A statistics course, a course in research methods, and the thesis course are required.

**Master of Education**

The Master of Education consists of at least 36 semester hours of graduate study including a six-hour graduate internship. Students concentrate coursework in a general program in health behavior and health education. Six semester hours of upper-division coursework is allowed in the program of work. Six hours should be taken in the minor. The minor field consists of six semester hours taken outside the department. The internship course is required.

**Doctor of Philosophy**

The Doctor of Philosophy is a research degree designed to prepare students as scholars in a designated area of specialization. The program includes at least 15 semester hours of core coursework in health behavior and health education, 12 hours of statistics and research methods, and six hours of supporting coursework outside the department. Students must also complete research experience that includes at least eight hours of independent study, four hours of departmental seminar, and 18 hours in the dissertation courses.

During the student’s first year in the program, the student works with their advisor to prepare a program of study, which must be approved by the Graduate Studies Committee. Prior to admission to candidacy for the doctoral degree, the student must successfully complete the comprehensive examination covering the area of specialization. The student must present the dissertation proposal to the Graduate Studies Committee. The dissertation must represent an independent scholarly investigation of a problem pertinent to the field of health behavior and health education. It deals with basic questions in the area of...
specialization and must constitute a scholarly contribution to the body of knowledge in the profession.

More detailed descriptions and requirements for each of the specializations are available from the graduate advisor.

Kinesiology

Master of Education
Master of Science in Kinesiology
Doctor of Philosophy

For More Information

Campus address: L. Theo Bellmont Hall (BEL) 718, phone (512) 471-1273, fax (512) 471-8914; campus mail code: D3700

Mailing address: The University of Texas at Austin, Graduate Program, Department of Kinesiology and Health Education, 2109 San Jacinto Boulevard Stop D3700, Austin TX 78712

E-mail: khegradinfo@austin.utexas.edu

URL: https://education.utexas.edu/departments/kinesiology-health-education

Facilities for Graduate Work

Excellent teaching and research laboratories are available to graduate students in kinesiology. Special classrooms and computer facilities are available, as well as teaching laboratories for human anatomy, biomechanics, exercise physiology, rehabilitation and movement science, motor control and learning, and movement and cognitive rehabilitation science. Research laboratories are available for both basic and applied research with whole-body and subcellular investigations. Also available for field research are various schools, institutions, and agencies in Austin and surrounding communities.

Areas of Study

Students pursuing a master's degree in kinesiology specialize in exercise physiology, movement and cognitive rehabilitation science, or sport management. Students pursuing doctoral studies can specialize in either exercise physiology, movement and cognitive rehabilitation science, or physical culture and sports studies.

Master's students in exercise physiology can focus on basic and applied physiology, clinical physiology, etc. Master's students in movement and cognitive rehabilitation exercise physiology science can focus on biomechanics, neuromuscular control, motor learning and cognitive function. Doctoral students in exercise physiology can focus on basic and applied physiology, clinical physiology, etc. Doctoral students in movement and cognitive rehabilitation science can focus on biomechanics, neuromuscular control, motor learning and cognitive function.

Master's students in sport management pursue degrees that help them prepare for careers in the management, marketing, and administration of sport programs in educational settings, sport business, or the entertainment industry. The sport management Option III program is designed for early-career professionals pursuing a terminal master's degree in sport management. Doctoral students in physical culture and sports studies pursue independent doctoral research in areas related to sport history, physical culture studies, sport law, sport and politics, sport philosophy, and other related subject areas.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSO) in the spring 2023 semester.

John Bartholomew  Alexandre Loukas
Owen Beck  Brian M Mills
Matthew Bowers  Liesl Nydegger
Darla Marie Castelli  Tolga Ozuyurtcu
Edward F Coyle  Deborah Parra-Medina
J Mark Eddy  Keryn Elizabeth Pasch
Mike Freedberg  Miguel Pinedo
Lisa Griffin  Deborah Salvo
Hao-Yuan Hsiao  Seth Schwartz
Thomas M Hunt  Emily Sparvero
Sara J Hussain  Mary A Steinhardt
Esbelle M Jowers  Audrey J Stone
Jasdeep Kaur  Hirofumi Tanaka
Harold Willis Kohl III  Janice S Todd
Sophie Lalande

Admission Requirements

A student who lacks the prerequisite coursework described below may be admitted to the Graduate School, but must then complete coursework in the appropriate areas in addition to degree requirements.

Master of Education

Applicants must have completed an undergraduate major or at least 12 semester hours of upper-division coursework in physical education, kinesiology, and/or health education. Applicants to the M.Ed. in Kinesiology Option III program are required to have one year of full-time work experience at the time of enrollment.

Applicants to the master of education degree program in kinesiology with specialization in exercise physiology must have an undergraduate major in kinesiology or a related discipline and must have completed coursework in human anatomy, exercise physiology, and vertebrate or human physiology.

Applicants to the master of education degree program in kinesiology with specialization in movement science must have an undergraduate major in kinesiology or a related discipline, and must have completed coursework in human anatomy, vertebrate or human physiology, biomechanics, and motor learning or neuromuscular control.

Applicants to the master of education degree program in kinesiology with specialization in sport management, are recommended to have an undergraduate major in kinesiology or a related discipline.

Master of Science

Applicants to the master of science degree program in kinesiology with specialization in exercise physiology must have an undergraduate major in kinesiology or a related discipline and must have completed coursework in human anatomy, exercise physiology, and vertebrate or human physiology.

Applicants to the master of science degree program in kinesiology with specialization in movement science must have an undergraduate major in kinesiology or a related discipline, and must have completed coursework in human anatomy, vertebrate or human physiology, biomechanics, and motor learning or neuromuscular control.

Applicants to the master of science degree program in kinesiology with specialization in sport management, are recommended to have an undergraduate major in kinesiology or a related discipline.
Doctor of Philosophy
Applicants to the doctoral degree program in kinesiology must be sponsored by a member of the Graduate Studies Committee and must demonstrate the ability to conduct independent research.

Applicants to the doctoral degree program in kinesiology with specialization in exercise physiology and movement and cognitive rehabilitation science must have an undergraduate major in kinesiology or a related discipline and must have completed coursework in human anatomy, exercise physiology, and vertebrate or human physiology.

Applicants to the doctoral degree program in kinesiology with specialization in movement and cognitive rehabilitation science must have an undergraduate major in kinesiology or a related discipline, and must have completed coursework in human anatomy, vertebrate or human physiology, biomechanics, and motor learning or neuromuscular control.

Applicants to the doctoral degree program in kinesiology with specialization in physical culture and sport studies, an undergraduate major in kinesiology, health, history, or other fields in the humanities.

Degree Requirements, Kinesiology
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science

Master of Science in Kinesiology with thesis. The specializations in exercise physiology and movement and cognitive rehabilitation science consist of at least 30 semester hours of graduate study; the sport management specialization consists of at least 36 hours. All students seeking the Master of Science in Kinesiology concentrate coursework and research in an area of departmental specialization. Six semester hours of upper-division coursework is allowed in the program of work. No more than six semester hours may be taken outside the department. A statistics course, a course in research methods, and the thesis course are required.

Master of Science in Kinesiology with report. The specializations in exercise physiology and movement and cognitive rehabilitation science consist of at least 33 semester hours of graduate study; the sport management specialization consists of at least 36 hours. Students concentrate coursework and research in an area of departmental specialization. Six semester hours of upper-division coursework is allowed in the program of work. No more than six semester hours may be taken outside the department. A statistics course, a course in research methods, and the report course are required.

Master of Education
This degree program consists of at least 36 semester hours of graduate study. Students concentrate coursework in an area of departmental specialization or pursue a general program in kinesiology. Six semester hours of upper-division coursework is allowed in the program of work. No more than six semester hours may be taken outside the department. All specializations require at least 21 semester hours of approved coursework within the department. To complete any of the specializations, satisfactory performance in an approved culminating experience is required.

Master of Education in Kinesiology Option III degree program with a concentration in Sport Management. This degree program requires completion of 30 semester hours of coursework. Coursework is designed to cover the functional areas of sport management education and prepare students for managerial and executive positions within the sport and recreation industry. All courses are delivered in an asynchronous online format.

Doctor of Philosophy
The Doctor of Philosophy with a major in kinesiology degree program involves specialization in exercise physiology, movement and cognitive rehabilitation science, or physical culture and sports studies. Exercise physiology involves in-depth study in basic and applied exercise physiology. Movement and cognitive rehabilitation science students concentrate in biomechanics; motor control and learning; clinical movement science; sport movement science; or developmental science: pediatrics and aging. Physical culture and sports studies involves coursework in sport history, sport management, exercise history, sport and gender, and other sociocultural aspects of sport.

Each student completes coursework in preparation for a comprehensive examination in one of these specializations. The program also includes a departmental elective taken outside the area of specialization; six semester hours of graduate coursework in statistics, biometry, or an appropriate area of mathematics; nine hours of supporting work outside the department; research experience that includes at least six hours of independent study; and 18 hours in the dissertation courses. More detailed descriptions and requirements for each of the specializations are available from the graduate advisor.

During the students’ first year in the program, they work with their advisor to prepare a program of study, which must be approved by the Graduate Studies Committee. Prior to admission to candidacy for the doctoral degree, the student must successfully complete the comprehensive examination covering the area of specialization. The student must present the dissertation proposal to the Graduate Studies Committee. The dissertation must represent an independent scholarly investigation of a problem pertinent to the field of kinesiology. It deals with basic questions in the area of specialization and must constitute a scholarly contribution to the body of knowledge in the profession.

Science, Technology, Engineering, and Mathematics

URL: https://education.utexas.edu/departments/curriculum-instruction/graduate-programs/stem-education
Facilities for Graduate Work

Facilities for graduate work include state-of-the-art computer, multimedia, and videoconferencing laboratories, laboratories for science, technology, engineering, and mathematics (STEM) research, field-based sites for implementation studies in local school districts, and numerous federal- and state-funded research and development projects in science, technology, engineering, and mathematics education. The University Libraries contain more than eight million volumes and provide access to a wide variety of print-based and electronic research tools, the latter through their website. Library units serving science, technology, engineering, and mathematics include the Kuehne Physics Mathematics Astronomy Library, the Mallet Chemistry Library, the Walter Geology Library, and the Life Science Library.

Areas of Study

Graduate study in science, technology, engineering, and mathematics (STEM) education is offered through an interdisciplinary program that combines content preparation with educational research and scholarship, in a setting that fosters and supports tight links to educational practice. The program is anchored by a set of core courses addressing learning, instruction, curriculum, technology, equity, policy, and systemic reform in STEM education, at the elementary, secondary, and postsecondary levels. Coursework is chosen from departments in the College of Education, Cockrell School of Engineering, and College of Natural Sciences, as well as other appropriate University colleges.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Science, Technology, Engineering, and Mathematics Education

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master's Degrees

Prerequisites for admission to each master’s degree program are a baccalaureate degree and prior coursework in education, science, technology, engineering, or mathematics.

Master of Arts. Students may select from the following tracks:

Master of Arts in STEM Education, Regular Track (no thesis option): This track is intended for students who are already certified to teach in the K-12 system. The program requires completion of 33 hours of coursework, with the major field composed of 18 hours in science, technology, engineering, and mathematics (STEM) education, including 15 hours in the STEM education core course and advance topic sequence, and three hours of research methods classes in STEM education. The minor field consists of nine hours of content courses in science, technology, engineering, or mathematics. Six additional hours may be drawn from coursework chosen by the student in conjunction with the graduate advisor.

Master of Arts in STEM Education, Regular Track (thesis option): This track is intended for students who are already certified to teach in the K-12 system. The program requires completion of 36 hours of coursework including a six-hour Master’s Thesis (STM 698). The major field is composed of 18 hours in science, technology, engineering, and mathematics (STEM) education, including 15 hours in the STEM education core course and advance topic sequence, and three hours of research methods classes in STEM education. The minor field consists of nine hours of content courses in science, technology, engineering, or mathematics. Three additional hours may be drawn from coursework chosen by the student in conjunction with the graduate advisor.

Master of Arts in STEM Education, Teaching Track (GradTeach): This track is intended for students who are seeking certification to teach math or science in high school as part of their graduate education. This program requires completion of 36 hours of coursework, with the major field composed of 18 hours in science, technology, engineering, and mathematics (STEM) education. The minor field consists of nine to 12 hours of coursework in the Department of Curriculum and Instruction focused on teacher education. An additional six to nine hours of supporting coursework are taken in the College of Natural Science under advisement by the graduate advisor. A Master's Thesis is not required.

Master of Education. The program is the same as the program for the Master of Arts (Regular Track) described above, with one exception: in addition to the requirements for a Master of Arts, students must be certified to teach at the elementary or secondary level.

Doctor of Philosophy

Students seeking the degree of Doctor of Philosophy must show evidence of related professional and academic experience. Sixty-three hours of coursework (including a minimum of six credits of dissertation) are required for the degree.

Program Requirements

Core courses. Students must complete the 12-semester-hour core course sequence in science, technology, engineering, and mathematics education.

Content courses. Students must complete 12 semester hours of coursework in science, technology, engineering, or mathematics. This requirement is waived for students who enter the program with a master's degree in mathematics, one of the sciences, or engineering.

Research methodology. Students must complete at least 12 hours of coursework in research methodology.

Research practicum. Students must complete at least nine hours of coursework of research practicum.

Advanced topics courses. Students must complete at least six hours of coursework on special areas of interest or on emerging areas of research.

Related courses. Students are expected to broaden and deepen their Program of Work by taking a minimum of 6 hours of related coursework consonant with their scholarly interests. This coursework must be chosen in consultation with the graduate advisor or faculty mentor.

A more detailed description of all required courses is available in the STEM Education graduate handbook.

Special Education

Master of Arts
Master of Education

Campus address: George I. Sánchez Building (SZB) 306, phone (512) 471-4161, fax (512) 471-2471; campus mail code: D5300

Mailing address: The University of Texas at Austin, Graduate Program, Department of Special Education, 1912 Speedway Stop D5300, Austin TX 78712

E-mail: a.zapata@austin.utexas.edu

URL: https://education.utexas.edu/departments/special-education

Facilities for Graduate Work

The University has an array of facilities that offer outstanding opportunities for research and study. Students may work with individual faculty members, many of whom have obtained external funding for research, development, training, and model demonstration projects involving the Texas Education Agency and school districts throughout Texas. In addition, students may work cooperatively with faculty members affiliated with the Assistive and Instructional Technology Laboratory, the Meadows Center for Preventing Educational Risk, and the Vaughn Gross Center for Reading and Language Arts. The Perry-Castañeda Library contains extensive holdings in special education and related fields. Students also have access through the University Libraries website to electronic databases, journals, and books related to special education. The College of Education’s Learning Technology Center provides access to a wide range of hardware and software useful for instructional development and for research. Practicum and internship opportunities are provided by a number of local schools, state facilities, and community agencies.

Areas of Study

The Department of Special Education offers master’s degrees in two areas of specialization: autism and developmental disabilities, and early childhood special education. The doctoral degree is offered in four areas of specialization: autism and developmental disabilities, early childhood special education, learning disabilities and behavioral disorders; and equity and diversity in special education. Graduate study prepares students for leadership roles in fields that serve children, youth, adults with disabilities, and their families. Students may also complete coursework to fulfill requirements for certification as a behavior analyst. Although there is considerable overlap between degree and certification requirements, additional courses beyond the degree plan are usually necessary.

Master’s degree program. The master’s degree prepares students to provide behavior analysis, or special education services to individuals with disabilities and their families. Through coursework and field-based experiences, students acquire knowledge and skills in the areas of disabilities, advocacy, collaboration, instruction and assessment, and professional standards of legal and ethical practice, and in the socio-cultural, linguistic, economic, and technological contexts in which services are provided.

Doctoral degree program. The doctoral program prepares students to assume leadership positions in institutions of higher education and in local, state, and national agencies that provide services to individuals with disabilities and their families. The core areas of study focus on advocacy, leadership roles as members of the profession, standards of legal and ethical professional practice, and developing programs and services and/or conducting research that contribute to the quality of life for individuals with disabilities and their families. Students also develop the foundation for ongoing professional development and an appreciation of the socio-cultural, linguistic, economic, and technological contexts that shape the development and delivery of services.

Areas of Specialization

Autism and developmental disabilities provides opportunities for students to develop skills in designing, implementing, and evaluating educational interventions for people with autism and developmental disabilities.

Early childhood special education focuses on the development of early intervention programs for children from birth through six years of age, reflecting a family-centered philosophy and application of the most recent theoretical concepts in natural and inclusive settings.

Learning disabilities and behavioral disorders is a doctoral area of specialization that provides advanced coursework in contemporary trends and issues in learning disabilities and behavioral disorders. Students learn ways to conduct theoretically-driven research that addresses important issues pertinent to the major field including developing, implementing, and evaluating instructional and behavioral interventions and exploring the impact of assistive technologies on learning. Students participate in research-based experiences that help prepare them for instructional and/or leadership roles, and for conducting independent empirically-based research in the major field.

Equity and diversity in special education is a doctoral area of specialization that focuses on critical issues, knowledge, and skills related to the complex relationships between culture, race and ethnicity, language, and disability. This specialization is designed to prepare students for leadership roles in the provision of culturally and linguistically responsive educational services for exceptional children and youth from diverse backgrounds.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Special Education

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts degree is offered in three master’s concentrations. The Master of Arts degree requires at least 36 semester hours of coursework, including six hours for research, and writing a thesis. The general requirements for the master’s degree are set at a minimum standard. Information about additional requirements is available from the graduate advisor or coordinator.

Master of Education

The Master of Education degree is offered in three master’s concentrations. The Master of Education degree requires at least 36 semester hours of coursework. The Master of Education degree with a report requires at least 36 semester hours of coursework. The general requirements for the master’s degree are set at a minimum standard.
Information about additional requirements is available from the graduate advisor or coordinator.

Doctor of Philosophy

Because the Doctor of Philosophy is a research degree, the program is structured to provide students with both academic and practical experience in conducting research in educational settings, clinics, and other research settings. Degree plans focus on students' areas of specialization; research; interdisciplinary studies; and professional skills related to research, teaching, and service. The dissertation is expected to be a theoretically-based piece of original research that contributes to knowledge in special education or rehabilitation counseling. In addition to coursework, all students are expected to become actively involved in a variety of professional activities, such as supervision of student teachers, conference presentations, publications, and college teaching.

Doctor of Education

Although the requirements for this degree are similar to those for the Doctor of Philosophy, the Doctor of Education emphasizes applied research, and the program is designed to prepare students for leadership roles in a variety of educational settings. Requirements include a focus on program evaluation, organizational decision-making, policy and law, and personnel preparation. The Doctor of Education dissertation may be a theoretically-based piece of original research; it may also represent a scholarly investigation in special education or rehabilitation counseling that contributes to policy development, professional practice, or both. Graduates are prepared to assume leadership roles at the district, state, or national agency levels.

Courses, Education

For courses offered by each department within the College of Education, please see the corresponding department page in the following sections.

Courses, Department of Curriculum and Instruction

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Curriculum and Instruction: Curriculum and Instruction (EDC), Foreign Language Education (FLE), and Science, Technology, Engineering, and Mathematics Education (STM).

Courses, Department of Educational Leadership and Policy

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Educational Leadership and Policy: Educational Leadership and Policy (ELP).

Courses, Department of Educational Psychology

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Educational Psychology: Educational Psychology (EDP).

Courses, Department of Kinesiology and Health Education

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Kinesiology and Health Education: Health Education (HED), and Kinesiology (KIN).

Courses, Department of Special Education

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Special Education: Special Education (SED).

Cockrell School of Engineering

Master of Science in Engineering

Doctor of Philosophy

For More Information

Campus address: Ernest Cockrell Jr. Hall (ECJ) 10.322, phone (512) 471-7995; campus mail code: C2100

Mailing address: The University of Texas at Austin, Academic Affairs, Cockrell School of Engineering, 301 East Dean Keeton Stop C2100, Austin TX 78712-2100

URL: http://www.engr.utexas.edu/

Areas of Study

Graduate work in engineering may lead to the Master of Science in Engineering or the Doctor of Philosophy degree in the following majors: aerospace engineering, biomedical engineering, chemical engineering, civil engineering, electrical and computer engineering, engineering mechanics, materials science and engineering, mechanical engineering, operations research and industrial engineering, and petroleum engineering. The Master of Science in Engineering degree is also offered with a major in environmental and water resources engineering; and, through executive programs, in electrical and computer engineering, mechanical engineering, and engineering management.

A graduate certificate in Engineering Education is available to degree-seeking graduate students in the Cockrell School of Engineering. Stackable Graduate Certificates, available in Mechanical Engineering and in Petroleum Engineering, provide students with the opportunity to earn a transcript-recognized, non-degree workforce-aligned credential. Integrated degree programs are available in biomedical engineering, electrical engineering, and mechanical engineering. The integrated programs result in the simultaneous awarding of a Bachelor of Science in Biomedical Engineering, Bachelor of Science in Electrical Engineering, or Bachelor of Science in Mechanical Engineering degree, and a Master of Science in Engineering (MSE) degree. Information about the concentrations offered in each field is given in the program descriptions.

Facilities for Graduate Work

The Cockrell School of Engineering has an outstanding research and teaching facilities on the main campus and at the J. J. Pickle Research Campus. Details are given in the individual program descriptions.
Executive Programs

Several programs allow working professionals to pursue the Master of Science in Engineering or a Stackable Graduate Certificate while employed full time. These programs are offered with alternative scheduling and modalities (weekend programs, online, and hybrid) and courses are designed to allow students to increase their career potential. Master’s Degree students may major in Engineering Management, Mechanical Engineering, or Electrical Engineering. Stackable Graduate Certificates are available in Mechanical Engineering: Controls, Petroleum Engineering: Data Analytics, Petroleum Engineering: Fundamentals, and Petroleum Engineering: Unconventional Resources. These programs are specifically designed to meet identified workforce needs and provide engineers and STEM professionals with immediately applicable skills and knowledge to be useful for their lives and careers. Programs offering onsite classes generally meet once a month on Fridays and Saturdays. Programs offered online are synchronous or asynchronous. Additional information about these executive and alternatively scheduled programs for STEM professionals is published by Texas Engineering Executive Education.

Degree Requirements, Cockrell School of Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Engineering

This degree is offered in three options: with thesis, with report, and without thesis or report. All three options may not be available in any one field of study; information about the options in each of the fields is given in the program descriptions.

Doctor of Philosophy

The Doctor of Philosophy is a research degree. The student pursues coursework approved by the Graduate Studies Committee in the field of specialization and in supporting work outside the major. Before admission to candidacy, the student is expected to pass qualifying examinations and to meet additional requirements established by the Graduate Studies Committee. Admission to candidacy must be approved by the committee and the graduate dean. A dissertation that is an original contribution to scholarship and is the result of independent investigation in the major area is required of every candidate.

Dual Degree Programs

The Cockrell School offers three dual degree programs: one in mechanical engineering (manufacturing and decision systems engineering) and business administration, one in biomedical engineering and medicine, and one in civil engineering and public affairs. More information is available from the graduate advisor in each program.

Intercollegial Programs

Graduate engineering study may also be a component of the master’s and doctoral degrees in computational science, engineering, and mathematics described in Intercollegial Programs (p. 182).

Aerospace Engineering

For More Information

Campus address: Aerospace Engineering (ASE) 2.228, phone (512) 471-7595, fax (512) 471-3788; campus mail code: C0600

Mailing address: The University of Texas at Austin, Graduate Program in Aerospace Engineering, Department of Aerospace Engineering and Engineering Mechanics, 1 University Station, 2617 Wichita Street, C0600, Austin TX 78712

E-mail: ase.grad@mail.ae.utexas.edu

URL: http://www.ae.utexas.edu/

Objectives

The aerospace engineering graduate program focuses on teaching and research in analytical, computational, and experimental methods in the areas of aerothermodynamics and fluid mechanics; solids, structures, and materials; structural dynamics; guidance and control; and orbital mechanics. The student may concentrate in any of these five areas. The objectives of the program are to enable the student to attain a deeper understanding of aerospace engineering fundamentals, a knowledge of recent developments, and the ability as a master’s degree student to participate in research and as a doctoral degree student to conduct individual research. The goals are accomplished through coursework, seminars, and active research programs.

Areas of Study and Facilities

Aerothermodynamics and Fluid Mechanics. This concentration involves study and research in experimental, theoretical, and computational aerodynamics, gas dynamics, turbulence, plasma dynamics, heat transfer, and combustion. Research is presently being conducted in nonequilibrium and rarefied gas flows, planetary atmospheres, turbulence control, shock-boundary layer interactions, thermal and glow-discharge plasmas, turbulent mixing/combustion, numerical methods for turbulent reacting flows, and advanced optical diagnostics and sensors. Facilities include Mach 2 and Mach 5 blowdown wind tunnels, a 50kw inductively coupled plasma torch, a 15” × 20” water channel, a laser sensor laboratory, combustion facilities, a plasma engineering laboratory, and extensive laser and camera systems for advanced flow diagnostics. Excellent computational facilities include a variety of workstations, and access to very-large-scale, high-performance computers at the Texas Advanced Computing Center.

Controls, Autonomy and Robotics. The Controls, Autonomy and Robotics (CAR) area within the Department of Aerospace Engineering and Engineering Mechanics at The University of Texas at Austin conducts research in controls, networks, autonomy, and robotics with applications to the automation, navigation, guidance, control, and flight mechanics of space and air vehicles and robotic systems.

Major research topics include dynamic games, secure perception, decision-making and path-planning under uncertainty, motion planning of robotic systems, uncertain control systems, data-driven control and model reduction, uncertainty quantification, machine learning and adaptive control, multi-vehicle coordination, swarming, and fractionation, optimal decision-making in multi-agent systems, information theory in control, vision- and radio-based navigation, controlled-mobility wireless networks, robust communications, autonomy, trust, and human-machine teaming. Several of these projects advance both foundational research and aerospace applications with funding from the Defense Advanced Research Projects Agency, the Air Force Office of Scientific Research, the National Science Foundation, the Office of Naval Research, the Missile Defense Agency, National Aeronautics and Space
Administration, the U.S. Space Force, the Jet Propulsion Laboratories, and the Army Research Lab. Faculty from the CAR area also maintain fruitful engagements and active collaborations with leading industry partners from the aerospace and robotics sectors.

Robotics at UT Austin also offers the Graduate Portfolio Program in Robotics which provides graduate students the opportunity to obtain an official "certification of expertise" in robotics with their Masters or Ph.D. degree from their home departments.

**Orbital Mechanics.** This area involves study and research in the applications of orbital mechanics and remote sensing in the context of spacecraft and celestial bodies. Applications and customers include NASA, military, a variety of governmental agencies, and the rapidly growing commercial space industry. Research in spaceflight mechanics includes trajectory and mission design, nonlinear optimization, numerical methods, perturbations, dynamical systems theory, high fidelity simulation, and high performance computing. Research in nonlinear estimation provides observable properties of dynamical systems in order to enable autonomous operations of spacecraft and ground-based tracking for satellite applications and situational awareness. Research in space domain awareness and space traffic management seeks to develop and deliver the decision-making science for the space community. Example topics include space object detection, tracking, identification, and characterization via multi-source information collection, curation, and fusion. Research in satellite applications include the development of space geodetic and both active and passive satellite remote sensing techniques, such as Interferometric Synthetic Aperture Radar (InSAR), laser and microwave tracking of satellites, and the Global Navigation Satellite Systems (GNSS). Application areas include measurement and interpretation of global Earth System variables such as the gravity field, loading, Earth rotation, and terrestrial reference frames; their application to research in the atmosphere, biosphere, cryosphere, and hydrosphere, as well as their mutual interactions; and GNSS signals, assurance, and applications for navigation and precise positioning. Research is supported by a large database of satellite remote sensing measurements, state-of-the-art high performance computing resources, GPS receivers, and image processing equipment.

**Solids, Structures, and Materials.** This concentration involves study and research in mechanics of composite materials, fracture mechanics, micromechanics of materials, constitutive equations, mechanical behavior at high strain rates, structural analysis, and structural stability. Experimental facilities include equipment for static structural testing; digital data acquisition equipment; uniaxial and biaxial materials-testing machines; custom loading devices; environmental chambers; microscopes; photomechanics facilities; composites processing equipment; facilities for microstructural analysis; and high-speed imaging and high-strain-rate mechanical testing facilities. Computing facilities include workstations, high-performance computers, and networks of workstations.

**Structural Dynamics.** This concentration involves study and research in theoretical, computational, and experimental structural dynamics, including aeroelasticity, rotor dynamics, morphing structures, adaptive structures, vibration and noise control, and computational techniques for very-large-scale vibration analysis. Computational and experimental facilities include high-performance shared- and distributed-memory multiprocessor systems, actuators, sensors, balances, and data-acquisition systems for structural testing, system identification, and control. Facilities for testing aeroelastic models on a whirl test stand or in a wind tunnel are also available.

---

### Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Maruthi R Akella
- Efstathios Bakolas
- Srinivas V Betladupur
- Fabrizio Bisetti
- Tan Thanh Bui
- Jingyi Chen
- John-Paul Clarke
- Noel T Clemens
- Clinton N Dawson
- Leszek F Demkowicz
- David Fridovich-Keil
- David B Goldstein
- Rui Huang
- Thomas J Hughes
- Todd E Humphreys
- Moriba Jah
- Brandon A Jones
- Stelios Kyriakides
- Chad Matthew Landis
- Kenneth M Liechti
- Nanshu Lu
- Lori A Magruder
- Mark E Mear
- J T Oden
- Laxminarayan L Raja
- Manuel Karl Rausch
- Krishnaswasi Ravi-Chandar
- Ryan P Russell
- Luis Sentis
- Jayant Sirohi
- Takashi Tanaka
- Ufuk Topçu
- Thomas Carlton Underwood
- Philip L Varghese
- Mary F Wheeler
- Karen E Willcox
- Jin Yang
- Renato Zanetti

---

### Admission Requirements

The prerequisite for graduate study in aerospace engineering is a bachelor’s or master’s degree in aerospace engineering or in a related field of engineering or science. Graduate study in orbital mechanics is possible for those with degrees in engineering, science, or mathematics.

### Degree Requirements, Aerospace Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

### Master of Science in Engineering

Students seeking the master’s degree have three options, each requiring a total of 30 semester hours of credit. The thesis option requires 24 semester hours of coursework plus six hours in the thesis course. The report option requires 27 hours of coursework plus three hours in the report course. The option without a thesis or report requires 30 semester hours of coursework. Students receiving financial aid through the sponsorship of the department are expected to choose the thesis option. The report option and the option without a thesis or report each can be completed in one year.

Regardless of the option chosen, a student is required to take six hours of supporting coursework outside of their technical area. Only courses completed on the letter-grade basis may be counted toward the degree. Only three hours of business-related courses may be counted. Students may count no more than six hours of upper-division undergraduate coursework toward the degree.

### Doctor of Philosophy

Students are expected to complete 90 credit hours after their BS degree (including coursework and research credit) to earn a PhD. This expectation, however, may be waived simply by the agreement of the student’s research advisor(s) and/or dissertation committee.
The PhD program consists of coursework, qualifying examinations, and the dissertation. Students who have master’s degrees must complete at least nine hours of coursework; those who enter the graduate program with bachelor’s degrees must complete at least 39 hours of coursework.

To be admitted to candidacy for the Doctor of Philosophy degree, the student must pass both a written and an oral examination. The written examination is general in nature and covers subject matter studied through the first year of graduate work. The oral examination is in the student’s specialty area and is conducted by a committee of faculty members whose interests are in that area. Students may not take courses on the credit/no credit basis until they have passed the written qualifying examination.

### Biomedical Engineering

**Master of Science in Engineering**  
**Doctor of Philosophy**

### For More Information

**Campus address:** Biomedical Engineering Building (BME) 3.308AF, phone (512) 475-8500, fax (512) 471-0616; campus mail code: C0800

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of Biomedical Engineering, 107 W. Dean Keeton St. C0800, Austin TX 78712

**E-mail:** bme-grad@engr.utexas.edu

**URL:** [http://www.bme.utexas.edu/](http://www.bme.utexas.edu/)

### Objectives

Graduate degrees in biomedical engineering have been offered by the University since 1974. The undergraduate degree program and the Department of Biomedical Engineering were established in 2001. The department fosters a unique environment in which scholars and scientists may excel in both fundamental research and its translation to clinical applications.

The mission of the UT Austin graduate program in biomedical engineering is to educate students in the fundamentals of engineering and science as they affect biology and medicine and to perform multidisciplinary, disease-oriented research at the molecular, cellular, organ, and systemic levels. The program aims fully to integrate biology and engineering research and education at the graduate level.

The graduate program has approximately 130 students, with backgrounds in biology, chemistry, physics, and various engineering disciplines. Students come from all over the United States and the world to gain unique knowledge and experience. Apart from coursework and research in some of the world’s premier laboratories, there are many opportunities for personal and professional development through interaction with industry professionals, conference attendance, and seminars with leaders in the field.

Doctoral students receive full financial support, either through teaching assistant or graduate research assistant positions or through one of many fellowships. More than half the students in the program have fellowships from a source like the National Science Foundation, National Institutes of Health, the Graduate School, or the Cockrell School of Engineering.

### Facilities for Graduate Work

The Department of Biomedical Engineering has offices and laboratories in the Biomedical Engineering Building, completed in 2008, and laboratories in the Engineering and Education Resource Center, completed in 2017. Research is also conducted in the Dell Medical School, at partner institutions in Houston such as the University of Texas MD Anderson Cancer Center, and at the University of Texas Health Science Center at San Antonio. Students have access to facilities for research in biochemical and protein engineering, cell and tissue engineering, gene therapy, cell-electronic interfaces and nanostructure engineering, cell biomechanics, whole-body biomechanics and gait analysis, thermal engineering, optical spectroscopy and imaging, ultrasound imaging, laser-tissue interactions, image processing, biosignal analysis and computer graphics, protein bioinformatics, functional genomics, biomimetics, protein modeling, and computational disease diagnosis.

In addition to individual research laboratories, a number of core facilities are available for research at the medical school campuses. The following are located on The University of Texas at Austin campus:

**Institute for Biomaterials, Drug Delivery, and Regenerative Medicine.** The institute provides a focal point for impactful activities in research, education, and service in biomaterials, Drug Delivery, and regenerative medicine—key areas to transforming health care. Areas of focus are cancer, cardiovascular diseases, neurological diseases, diabetes, and infections and autoimmune diseases. More information provided online.

**Center for Emerging Imaging Technologies.** The CEIT brings together basic and clinical scientists, engineers, and physicians from medical centers within Texas, building on strengths in optical imaging, biomedical optics, ultrasound, and image processing to create novel imaging approaches for understanding basic biological processes as well as clinical applications in the diagnosis and treatment of diseases. The center fosters collaborative research at the interface of chemical, physical, mathematics, engineering, and life sciences. Areas of focus are imaging contrast agents, image processing, modeling and informatics, and clinical translation of imaging techniques and therapeutics. More information provided online.

**Willerson Center for Cardiovascular Modeling and Simulation.** The overarching goal of the WCCMS is developing computational biomechanical models for understanding the heart valve and heart disease progression for developing clinical interventions, including prosthetic devices. The Center develops or utilizes a range of unique in-vivo and in-vitro data for elucidating mechanisms that underlie the observed pathologies. The Center ultimately seeks to provide cardiovascular scientists and clinicians with advanced simulations for the rational development of treatments for structural heart and valve diseases. More information provided online.

**Center for Computational Oncology.** As our knowledge of cancer grows, there is a desperate need to make real connections between those designing clinical trials and those studying mathematical models of tumor growth and treatment response so that the field of theoretical oncology can provide systematic, testable predictions of the response of individual patients to individual therapeutic regimens. The long-term goal of the CCO is to build a testable, mathematical theory of cancer. Cancer biologists could use such a theory to discover new biology, while oncologists could select the most promising treatment for an individual patient in a systematic fashion. More information provided online.

**Center for Biomedical Research Support core facilities.** The Center for Biomedical Research Support (CBRS) provides access to cutting-edge technology and expert advice to enhance research. Core facilities include the Biological Mass Spectrometry Facility, the Biomedical Imaging Center, the Computational Biology and Bioinformatics core facility, Cryo-Electron Microscopy, the Genomic Sequencing and Analysis Facility,
Microscopy and Flow Cytometry, and Mouse Genetic Engineering Facility. More information is given online.

**Texas Materials Institute and Center for Nano and Molecular Science and Technology core facilities.** The Texas Materials Institute (TMI) maintains core facilities in electron microscopy, surface analysis, polymer characterization, and X-ray scattering. The Center for Nano and Molecular Science and Technology (CNM) is a multidisciplinary, collaborative research center focused on several emerging areas of research. A multidepartmental effort of the College of Natural Sciences and the Cockrell School of Engineering, CNM houses extensive shared user facilities, including a picosecond fluorescence lifetime spectrometer/microscope; an FTIR spectrometer; a near-field scanning optical microscope; organic thin film fabrication equipment; beam lithography systems; a molecular force probe microscope; a transmission electron microscope; and a time-correlated single photon counting facility.

**Animal Resources Center facilities.** The Animal Resources Center (ARC) is a 14,000-square-foot state-of-the-art facility in which animal surgical procedures are performed. A separate building houses transgenic and knock-out animals. The facility is fully staffed and equipped in compliance with NIH and AAALAC guidelines for accreditation. Available are animal operating rooms, staff support, equipment for preparing tissue specimens, and veterinary consultation for both animal husbandry and surgery.

**Computer and computational facilities.** All research groups maintain computers for use by their graduate students, and each academic unit has one or more core computer facilities. The University also has core computer user facilities across campus. Extensive computing facilities are available to faculty members and students, including the Texas Advanced Computing Center (TACC). TACC's comprehensive advanced computing resources include high performance computing (HPC) systems of a variety of architectures to enable larger simulations and faster computation times than are possible using computers available to individual researchers, academic departments, and research centers and institutes; advanced scientific visualization (SciVis) resources including computing systems with high performance graphics hardware, large displays, and immersive environments, and high-end post-production facilities to enable large data analysis and promote knowledge discovery; and massive data storage/archival systems to house the vast quantities of data that result from performing simulations on HPC systems and developing visualizations of large data sets.

**Library facilities.** The University has outstanding library facilities, including a general collection of 2.5 million volumes in the Perry-Castañeda Library and topical collections in specialized libraries like the Mallet Chemistry Library, the McKinney Engineering Library, and the Life Sciences Library.

**Areas of Study**
The biomedical engineering program is interdisciplinary, with a faculty that includes members of the Dell Medical School, College of Natural Sciences, the Departments of Kinesiology and Health Education, Chemistry and Biochemistry, Psychology, Biomedical Engineering, and several other departments in the Cockrell School of Engineering. In addition, several faculty members from the University of Texas Health Science Center at San Antonio, the University of Texas Health Science Center at Houston, and the University of Texas MD Anderson Cancer Center serve on the Graduate Studies Committee and supervise biomedical engineering students.

The current research of this faculty is focused in the following areas: biomedical imaging and instrumentation; cellular and biomolecular engineering; computational biomedical engineering; and molecular, cellular, and tissue biomechanics. Research activities embrace such topics as bioinstrumentation, modeling and control of biological systems, nerve fiber regeneration, biomedical computer and information technology, biomechanics, cell and tissue mechanics, thermal processes, musculoskeletal modeling, acquisition and analysis of in vivo and ex vivo spatial human biomechanics data, acquisition of physiological data by noninvasive means, cell and tissue engineering, design and testing of novel fluid and drug delivery systems, effects of laser radiation on biological material, laser applications in medicine, coherence imaging of biological materials, pulsed photothermal tomography, bioengineering, visual system instrumentation, computer vision, production and purification of genetically engineered proteins, DNA and drug delivery, cell-electronic interfaces, acquisition and processing of neurological signals, neuroprostheses, applications of finite element modeling in medicine, acoustics and ultrasound, image processing, thermography, hyperthermia, genomic signal processing, biological and medical informatics, and nanotechnology.

**Graduate Studies Committee**

**Admission Requirements**
The graduate advisor and the Admissions Committee make all admission decisions. Standards for entrance into the program exceed the minimum standards established by the University. Students must have a bachelor's degree with the following coursework or equivalent knowledge: freshman biology, freshman inorganic chemistry, physiology, differential equations, probability and statistics, and calculus-based physics. An applicant with a degree in an area other than engineering must take specified
preliminary coursework before applying to the graduate program in biomedical engineering. The coursework does not need to be completed at UT Austin. Information about the admission process is given online.

Admission decisions are based on a careful review of all aspects of each applicant's file, including scores on the Test of English as a Foreign Language, if needed, grade point average, letters of recommendation, résumé, personal statement, transcripts, previous research or work experience, and contributions to the broader impacts of the field. Only the most qualified applicants are accepted. Graduate Record Examination (GRE) scores are not considered as part of the application file and applicants are not advantaged in the admissions process by submitting GRE scores. All applications received by the applicable deadline are reviewed holistically. The number of students admitted each semester depends on the availability of supervising faculty members to provide research facilities and possible financial support. Students are admitted for doctoral study. Students interested in a terminal master's degree are required to obtain faculty nomination before applying. Admission is offered for fall entry only.

Admission into the Doctor of Medicine/Master of Science in Engineering dual degree program is only open to current Dell Medical Students. Admission into the integrated Bachelor of Science in Biomedical Engineering/Master of Science in Engineering degree is only open to current biomedical engineering undergraduate students at The University of Texas at Austin.

All applicants whose native language is not English must submit a score on the Test of English as a Foreign Language (TOEFL), unless exempt. More information is given online.

Degree Requirements, Biomedical Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

The Master of Science in Engineering and the Doctor of Philosophy degree programs include a core curriculum and courses from one or more areas of specialization selected with the approval of the graduate advisor. Specializations are offered in the following four areas: biomedical imaging and instrumentation; cellular and biomolecular engineering; computational biomedical engineering and bioinformatics; and molecular, cellular, and tissue biomechanics. The graduate advisor and the Executive Committee of the Graduate Studies Committee must approve deviation from the prescribed curriculum.

This program has been designated as a STEM-eligible degree program, as defined by the Department of Homeland Security.

Master of Science in Engineering

The master's degree requires at least 30 semester hours of coursework, including six hours in the thesis course and 18 hours of biomedical engineering coursework. The remaining six semester hours can be selected from courses outside the field of biomedical engineering. These additional courses must be logically related to the student's program and must be approved by the graduate advisor.

A thesis is normally expected; however, with the consent of the graduate advisor, the student may follow a degree plan that includes a report or one with neither thesis nor report. The report option requires 30 semester hours of coursework, consisting of six courses in the major, three courses in supporting work, and three hours in the report course. The

Integrated Bachelor of Science in Biomedical Engineering/Master of Science in Engineering Program. The integrated degree program results in simultaneously awarding a Bachelor of Science in Biomedical Engineering (BSBME) and a Master of Science in Engineering (MSE) degree offered by the graduate program in biomedical engineering. The objective of the Integrated BSBME/MSE Program is to enable prepared undergraduates in Biomedical Engineering to earn two degrees in a shortened time period. By applying AP and Credit by Exam courses, having students take recommended summer courses, and allowing seniors to enroll in graduate-level engineering courses reserved for graduate credit, the program enables graduates to complete both degree requirements in five years.

Graduates of the integrated program will receive the BSBME and MSE degrees simultaneously after successfully completing the 127 SCH for the BSBME and 30 SCH for the MSE, a total of 157 SCH. It is expected that students in this program will graduate with both degrees in a total of five years to completion.

Information regarding the integrated program requirements and policies may be obtained from the Biomedical Engineering Academic Advising Office in BME 3.308.

Doctor of Philosophy

Doctoral degree students complete at least 26 semester hours of coursework beyond the baccalaureate degree, in addition to conducting research necessary to write a dissertation under the direction of a faculty supervisor. The 26 hours of coursework must be composed of one course from each of the three specializations mentioned above, two seminar courses, one biological/clinical sciences course, one mathematics or statistics course, and three other supporting graduate-level courses. One technical course may be substituted with one approved graduate-level professional development course. All coursework must be approved by the graduate advisor in advance.

After the first year of study, the student must pass both written and oral components of the qualifying examination. The student must present a written and oral dissertation proposal to the dissertation committee within two years of enrollment in the program. The written proposal must be formatted according to the guidelines of the National Science Foundation or the National Institutes of Health. Before taking the oral examination, the student is expected to formulate a hypothesis and propose an approach to a selected research problem with a selected supervisor. The student is examined specifically on the proposed research. After the oral examination, the dissertation committee determines if the student should complete additional coursework. At least one faculty member outside the biomedical engineering Graduate Studies Committee must participate in examining and supervising the student.

Dual Degree Program

The Department of Biomedical Engineering offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

<table>
<thead>
<tr>
<th>Major(s)</th>
<th>Degree(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medicine</td>
<td>Doctor of Medicine</td>
</tr>
</tbody>
</table>
Doctor of Medicine/Master of Science in Engineering

The Department of Biomedical Engineering offers an MD/MSE program that is designed for medical school students who choose to complete requirements for an MSE degree while completing their MD degree program at the Dell Medical School. Through waivers of coursework that is common to both degrees, the total number of hours required to earn both degrees through the dual-degree arrangement is decreased by 12 credit hours. The requirements and policies associated with the dual-degree program are published in the Medical School Catalog. More information is available from the graduate advisor in biomedical engineering.

Chemical Engineering

Master of Science in Engineering
Doctor of Philosophy

For More Information

Campus address: Chemical and Petroleum Engineering Building (CPE) 2.802, phone (512) 471-6991, fax (512) 475-7824; campus mail code: C0400

Mailing address: The University of Texas at Austin, Graduate Program, McKetta Department of Chemical Engineering, Stop C0400, Austin TX 78712

E-mail: chemegrad@utexas.edu (chemegrad@che.utexas.edu)

URL: https://che.utexas.edu/academics/graduate-program

Objectives

The graduate program in chemical engineering is designed to provide students with the opportunity to develop advanced competence in transport phenomena, thermodynamics, and reaction engineering for the application of chemistry to the advancement of society. Through formal coursework and mentoring, each student is expected to acquire the tools to develop and transmit new knowledge and processes in a focused area of chemical engineering. The focused research areas include advanced materials, polymers and nanotechnology, biotechnology, energy, environmental engineering and sustainability, modeling and simulation, and process engineering.

Program Educational Objectives

Upon graduation, those who earn advanced chemical engineering degrees are expected to

a. Become leading professionals who advance chemical engineering practice and knowledge in multiple fields, such as energy, materials, environmental and systems engineering, electronics, biotechnology, human health, and education;

b. Continue to educate themselves as their needs, interests, and circumstances dictate;

c. Become ethical and productive engineers, who recognize and acknowledge the local and global impacts of engineering technology on humans and the environment.

Facilities for Graduate Work

The McKetta Department of Chemical Engineering contains laboratories, offices, and all facilities necessary for research and instruction. Research is conducted in the Chemical and Petroleum Engineering Building and across Main Campus, and also at the J. J. Pickle Research Campus.

Excellent library facilities include the Mallet Chemistry Library, the McKinney Engineering Library, and the Kuehne Physics Mathematics Astronomy Library.

The extensive computer facilities available for graduate student research include more than one hundred microcomputers and workstations in the Chemical and Petroleum Engineering Building as well as super computing facilities in the Texas Advanced Computing Center. Computer graphics capabilities are available. State-of-the-art analytical instrumentation, located within the department and in other departments, is available for use by chemical engineering graduate students.

The department enjoys close relations with the chemical, petroleum, and materials processing industries. A number of cooperative research projects are carried out with the support of private companies. A substantial portion of the graduate student research is supported through federal grants and contracts.

Areas of Study

Biochemical and biomedical engineering. Protein and nucleic acid engineering, metabolic engineering, synthetic biology, systems biology, bioinformatics, fermentations, genetic engineering technology, mammalian tissue culture, biomaterials, biosensors, biomolecular interactions, cell and tissue engineering, virus removal from blood, hemodialysis.

Energy resources. Secondary and tertiary oil recovery, flow processes in porous media, acid gas treating, energy control and efficiency, photovoltaics, battery technology.

Environmental engineering and sustainability. Air pollution measurements, modeling and control, air pollutant and chemical exposures, atmospheric chemistry.

Materials and processes for microelectronics. Plasma processing, etching, chemical vapor deposition, selective laser sintering, supermolecular self-assembly and organization, colloidal systems, mesoscopic materials.

Meso- and molecular-scale modeling and simulation. Statistical and micromechanical modeling and Monte Carlo, Brownian, and molecular dynamics simulations of reactions, complex fluids, polymers, and biological molecules.

Polymer engineering. Synthesis; processing; reaction injection molding; properties, with specific emphasis on blends, transport, and thermodynamic behavior; membranes; microelectronics; thin film; composition.

Process engineering. Chemical reaction engineering and catalyst development; optimization; process simulation, dynamics, and control; fault detection, rheology and simulation of suspensions.

Separations. Membrane separations, distillation, absorption, supercritical extraction.

Other areas. Aerosol science, surface phenomena, crystal chemistry and physical properties, electrochemistry, electronic and optical materials, electrical impedance tomography.
Graduate Studies Committee

Admission Requirements

Students with a Bachelor of Science degree in chemical engineering usually fulfill requirements for consideration for admission.

Students with a bachelor's degree in another discipline, such as chemistry, physics, other engineering sciences, and natural sciences, must have a background the department considers satisfactory for the study of advanced chemical engineering. A strong background will have included courses in math (including calculus and differential equations), vector physics, and ideally some courses that cover the topics of thermodynamics, heat and mass transfer, and chemical kinetics.

Apart from the requirements of the Graduate School, the department has no set criteria for admission. Applications are viewed holistically based GPA, research experience, letters of recommendation, and personal statements. We view each of these categories as important and the admission committee ranks applications according to these metrics.

Degree Requirements, Chemical Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Engineering

The student's program of coursework is selected with the advice of the graduate advisor and must be approved by the Graduate Studies Committee.

Master of Science in Engineering with thesis. For students electing this option, 30 semester hours of coursework, including six hours in the thesis course, are required. At least 15 hours must be completed in graduate-level organized chemical engineering courses. Up to nine hours of graduate research in chemical engineering may be counted towards the 30 hours requirement. A grade point average of at least 3.00 must be attained on graduate coursework in the major.

Master of Science in Engineering with report. This option requires 30 hours of coursework, including three hours in the report course. At least 18 hours must be completed in graduate-level coursework, of which at least 15 hours must be in chemical engineering. Up to nine hours of graduate research in chemical engineering may be counted towards the 30 hour requirement. A grade point average of at least 3.00 must be attained on graduate coursework in the major.

Master of Science in Engineering without thesis or report. For students electing this option, 30 semester hours of coursework are required. At least 18 semester hours must be completed in graduate coursework in chemical engineering, and at least six hours must be outside chemical engineering. Three hours of upper-division coursework may be included, and three hours of graduate research in chemical engineering may be included. No research is required, but a grade point average of at least 3.00 must be attained on graduate coursework in the major. Enrollment in this option must be approved by the Chair of the Graduate Studies Committee in chemical engineering.

Doctor of Philosophy

A student may choose to pursue the doctoral degree without first obtaining a master's degree. To be eligible for admission to candidacy, the student must pass the three core curriculum graduate courses in thermodynamics, transport phenomena, and kinetics, followed by a preliminary oral examination. Three additional courses in any field or major are required for the degree; organized graduate courses in Chemical Engineering or upper-level undergraduate and graduate courses outside Chemical Engineering will be counted towards this requirement. Only courses in which a student earns a C or higher will be counted. The doctoral candidate must also complete annual meetings with their committee and pass a final oral examination covering the research program.

For a student with a Bachelor of Science degree, at least three years are required to complete the Doctor of Philosophy degree program.

Civil Engineering

Master of Science in Engineering  
Doctor of Philosophy

For More Information

Campus address: Ernest Cockrell Jr. Hall (ECJ) 4.200, phone (512) 471-4921, fax (512) 471-0592; campus mail code: C1700

Mailing address: The University of Texas at Austin, Graduate Program in Civil Engineering, Department of Civil, Architectural, and Environmental Engineering, 301 East Dean Keeton C1700, Austin TX 78712

URL: http://www.caee.utexas.edu/

Objectives

The objectives of the graduate program in civil engineering are excellence in engineering education, research, and professional service. The program seeks to educate students to assume leadership positions in engineering practice, research, and education. The program also seeks to advance the state of the art and of the practice of civil
engineering at both fundamental and applied levels through extensive research programs, and to disseminate the research outcomes through professional and scholarly activities. The program's thematic areas include architectural engineering, construction engineering and project management, construction materials, environmental and water resources engineering, geotechnical engineering, ocean engineering, structural engineering, and transportation engineering, as well as interdisciplinary areas of study.

Facilities for Graduate Work

The Department of Civil, Architectural, and Environmental Engineering occupies eight floors in Ernest Cockrell Jr. Hall, which also houses computer facilities for use by civil engineering students. In addition, the facilities of Information Technology Services are available to students working on problems in any of the areas listed below. Laboratories are equipped and staffed to provide for both instruction and research.

Building energy and environments. The Building Energy and Environments program investigates a wide range of issues related to building environments and environmental systems. The program research focuses on energy flows and conservation methods; building energy efficiency; environmental control systems; moisture transport and control; indoor microbial growth and fate; sources of VOCs, SVOCs, and particles; homogeneous and heterogeneous reactions; transport of indoor pollutants; and human exposure. Beside taking coursework in other areas of civil engineering and in other departments, students have a chance to specialize in building environmental systems and various aspects of indoor environmental quality. The diverse faculty, with expertise ranging from environmental, architectural, and mechanical engineering, offers a large variety of graduate courses that address different aspects of indoor air quality and energy efficiency of building environmental systems. This provides students with a unique opportunity to receive both the depth and breadth of knowledge necessary to design and maintain truly sustainable buildings. Students, faculty, and staff within the Building Energy and Environments Group conduct their research in academic laboratories equipped with cutting-edge instrumentation and simulation systems. The research activities take place in laboratories at the Center for Energy and Environmental Resources at the University of Texas’ J. J. Pickle Research Campus. Five separate laboratories totaling 6,000 square feet are devoted to building energy and environments research on the J. J. Pickle Research Campus. These laboratories are used for experiments using physical simulation systems, preparation for field studies, instrumentation calibration and maintenance, and analysis of samples collected in the field or in laboratory. The laboratories contain a wide range of instruments and facilities and among the physical simulation systems are a 1,200-square-foot test house, three full scale test rooms with state-of-the-art environment control systems, a variety of small chambers for testing emissions from building materials, human simulators such as a thermal manikin with breathing systems, and a family of wind tunnels for testing various components of heating, ventilation, and air conditioning systems (HVAC).

Construction engineering and project management. The construction laboratories include a well-equipped computer cluster on the main campus and a high-bay laboratory for construction automation research at the J. J. Pickle Research Campus. Software includes three-dimensional computer-assisted drafting and modeling packages, statistical packages, construction project management software, discrete modeling and simulation packages, advanced communication hardware, and software developed through research. The program also has access to the Texas Advanced Computing Center Visualization Laboratory, which makes available various world-leading research and teaching infrastructure such as a 307 Mpixel display and a large-scale, tiled display supporting 32-point multi-touch for collaborative manipulation. Students also benefit from the many facilities under construction on campus and in the surrounding community as living laboratories for class visits and research studies.

Infrastructure materials engineering. The graduate program in infrastructure materials engineering emphasizes the characterization and testing of materials such as asphalt, cement, aggregates, concrete, steel, masonry, wood, polymers, and composites. Research and coursework focus on the materials science, property development, field performance, durability, forensics, and repair of infrastructure materials. The Laboratory for Infrastructure Materials Engineering (LIME) is located at the J. J. Pickle Research Campus. Excellent facilities are available for proportioning and batching concrete, mechanical testing, and durability testing, including both accelerated tests and outdoor exposure sites. The laboratory has the capability to perform a wide range of materials tests, including freezing and thawing, alkali-silica reaction, shrinkage, creep, aggregate characterization, rapid chloride, and corrosion evaluation. Microscopes, X-ray diffraction, thermal analysis instrumentation, and rheometers are also available. The Infrastructure Materials Performance and Characterization (IMPACT) laboratory is located in Ernest Cockrell Jr. Hall and is dedicated to the characterization and testing of asphalt binders and mixtures. The lab includes facilities to synthesize different asphalt binders, fabricate test specimens and evaluate them under a variety of different temperature and loading rate conditions. In addition to the above labs, students also take advantage of central facilities such as UTCT for X-ray CT and Texas Materials Institute for materials investigation using tools such as gel permeation chromatograph, atomic force microscope, scanning electron microscope etc.

Environmental and water resources engineering.

Program. This program is designed to educate engineers who will solve environmental and water resources problems by applying concepts of sustainability and fundamental principles from the natural sciences, mathematics, mechanics, economics, and other underlying disciplines. To achieve this objective, the program offers a breadth of possible research and study areas. The faculty is one of the largest and most diverse in the nation, with expertise ranging from environmental fluid mechanics to water resources planning and from pollutant transport to treatment processes. The major areas of emphasis are treatment process engineering, air resources engineering, environmental remediation, water quality, water resources engineering, and ocean engineering. Because the program requires no specific courses, each student's education can be designed to meet their goals. The faculty offers a wide variety of courses, and students may choose courses in other related fields, such as chemical engineering, chemistry, geology, mathematics, microbiology, petroleum engineering, physics, and public policy. Once students choose a particular study area, they work closely with the faculty member or members conducting research in that area. Each student's program of study includes a balanced combination of coursework, seminars, and research. Well-equipped research laboratories, state-of-the-art instrumentation, and superb computation facilities support the graduate program, as do cooperation and coordination with research faculties and laboratories in physical, chemical, biological, and social sciences and other engineering disciplines.

Facilities. Environmental and water resources engineering laboratories are well-equipped for both basic and applied state-of-the-art research in virtually all environmental and water resources areas. On campus, the program has twenty thousand square feet of space on three floors of Ernest Cockrell Jr. Hall for physical, chemical, and biological analyses and for research on water, wastewater, and hazardous waste treatment processes. Facilities include a clean room for metal or particulate analysis, four laboratories with temperature and humidity control, numerous hoods for the safe handling of hazardous chemicals and biological samples, and an instrumentation laboratory.
The Computational Hydrodynamics Laboratory in Ernest Cockrell Jr. Hall has a high-performance computer cluster (16 nodes of eight cores each, Intel Xeon E5420 processors). This cluster provides the necessary platform for solving nonlinear flow problems about complex hull and/or propulsor geometries (involving cavities or free surfaces), and for developing algorithms for the design of efficient propeller or tidal turbine blades using nonlinear optimization techniques.

The Program in Air Resources Engineering maintains 5,000-square-feet of laboratory space in five laboratories at the Center for Energy and Environmental Resources. These laboratories also include facilities for studying outdoor sources of volatile organic compounds and indoor sources and sinks of volatile chemicals. A wide range of instrumentation is available for field monitoring in both indoor and outdoor environments. The Center for Energy and Environmental Resources also maintains extensive computational resources for air quality modeling and energy and climate change research.

The Center for Research in Water Resources is located at the J. J. Pickle Research Campus. Computational research focuses on applications of geographic information systems using ArcInfo and ArcView, simulation of pollutants in soil and groundwater, and assembly and synthesis of historical water quantity and quality information. The experimental research uses scaled physical models, models of innovative wastewater treatment facilities, and field monitoring of water quality. The 24,000-square-foot laboratory includes general- and special-purpose fixed and tilting channels and instrumentation and data acquisition systems for laboratory and field studies.

Geotechnical engineering. This program is designed to offer students a broad range of activities with a solid basis in the core areas of geotechnical engineering. Graduates receive a strong background in the basics through courses in geotechnical engineering, which offer the foundation for a successful professional career. In addition, the program exposes students to research activities that are at the forefront of developments in the field.

The geotechnical engineering laboratories are located in the Ernest Cockrell Jr. Hall and at the Pickle Research Campus. The laboratories include modern workstations for conducting standard geotechnical tests, including index tests, flexible wall permeameter tests, one-dimensional and triaxial consolidation, direct shear tests, and triaxial shear tests.

The soil dynamics laboratory has extensive facilities for combined resonant column and torsional shear testing. Large-scale multimode equipment is available for dynamic laboratory testing with specimens up to 0.3 meters in diameter. The geosynthetics laboratory includes tensile testing devices, a large-scale pullout testing device, large-scale time-temperature testing equipment, as well as specialized interface shear tensile devices. The unsaturated soils laboratory includes pressure plate testing devices, hanging columns, infiltration column systems, and multiple calibration chambers.

The ground improvement/pore fluid engineering research laboratories include one cyclic direct simple shear and one cyclic triaxial device; both devices can be run under static/cyclic loading with stress/strain complete servo control. Special setups for testing grouted soils, including static triaxial setups, are available as well. The laboratories have an advanced rheometer than can measure the engineering properties of fluids, suspensions, and gels. The facilities also include a multi-use dynamic/static (MUDS) testing setup that consists of a shaking table with a laminar box mounted on top of it. The MUDS testing setup allows for running 1-D 1-g free top shaking table tests on large specimens (1 m x 0.5 m x 0.5m with shaking along the 1 m direction). The setup allows for running large scale static and cyclic simple shear tests as well as direct shear tests at confining stresses up to 200 kPa.

The rock mechanics laboratory is equipped to carry out uniaxial and triaxial tests with confinement of up to 70 MPa and with the possibility of controlling the pore pressure up to 70 MPa; and direct shear tests both in stiffness control and in load control; all of the above equipment is completely servocontrolled, and any sensor may be used to program the tests. Additional rock testing capabilities include: slake durability, point load, Brazilian (indirect tensile), Cerchar, brittleness, Sievers’ J, abrasion value (on rock and soil), rebound hardness (Schmidt Hammer), pulse velocity and dynamic elastic constants, swelling, unit weight, porosity, and water content.

The centrifuge laboratory includes a high G-level centrifuge permeameter that was developed with the specific objective of expediting the measurement of the hydraulic characteristics of soils. It includes a water flow control system and an in-flight data acquisition system capable of collecting data under accelerations in excess of 500 Gs. In-flight instrumentation includes systems suitable to measure the infiltration rate (flow pump and outflow transducer), volumetric water content (time domain reflectometry), matric suction (tensiometers), and volumetric changes (displacement transducers). A small prototype centrifuge is also available in the laboratory for hydraulic testing of soil samples.

For model studies of foundation systems, two large test tanks are available together with loading and tracking systems to install, monitor, and load a variety of foundation types. Equipment available for field measurement programs includes fiber optical strain gauges, inclinometers, and time domain reflectometry moisture probes.

A large-scale calibration chamber is available for testing 2.1-meter cubical samples under three-dimensional states of stress for dynamic, cyclic, and static conditions. A second calibration chamber is available for testing in situ tools and model foundations. For dynamic field testing, the program has a broad array of equipment for measuring in situ stress wave velocities using borehole and surface wave methods, as well as vane, cone, and dilatometer devices. A vibroseis truck, which is capable of applying static, cyclic, and dynamic loads up to fifty thousand pounds, is available for field measurements at geotechnical, foundation, and pavement sites. Three hydraulic shakers, field instrumentation, and teleparticipation equipment are available to the department as a participant in the Network for Earthquake Engineering Simulation (NEES).

Mechanics, uncertainty, and simulation in engineering (MUSE). The graduate program in MUSE aims at preparing students to address the increasingly complex engineering problems modern societies face, through multi-disciplinary training rooted in applied mechanics, applied mathematics, and computational modeling. Students are expected to take courses reflective of the interdisciplinary character of the program.

Graduate students pursuing a thesis-option Master of Science degree or doctoral studies are exposed to the program’s research activities. Current research endeavors focus on model-based simulation of challenging multi-physics and multi-disciplinary engineering problems. Examples include the modeling of the dynamic response of structures; performance of structures in the offshore environment; structural response under extreme loads (wind, earthquake, hurricane, blast, etc.); soil-structure interaction problems under seismic loads; inverse problems and the non-destructive condition assessment of engineered and natural systems; structural reliability and uncertainty quantification problems; the performance of subsurface systems, pipelines, and energy-generating systems such as wind turbines and hydrokinetic devices; the modeling of deterioration and aging processes afflicting the
infrastructure; the modeling of material behavior; the propagation of waves and their interactions; and problems in computational engineering. Though the program's focus derives chiefly from problems affecting the infrastructure and the built environment, our reach goes well beyond as we seek to address bigger societal questions related to energy, natural and man-made disasters, and physical/natural processes at various temporal and spatial scales. Research projects integrate theoretical results and computational modeling with experimental studies, where appropriate.

MUSE graduate students and faculty conduct research using various computational facilities within the department and the University of Texas. These include two computational laboratories within the Ernest Cockrell Jr. Building (ECJ): the MUSE laboratory (ECJ 4.602), and the MUSE too laboratory (ECJ 3.301), occupying approximately 1,200 square feet. The two laboratories are equipped with several high-end workstations, including multi-processor and multi-core computers. For research projects demanding supercomputing resources, students and their faculty advisors have access to the Texas Advanced Computing Center's (TACC) massively parallel systems and visualization resources.

Ocean engineering. Students interested in ocean engineering and in offshore structures may develop an appropriate course of study in consultation with the faculty. These programs are typically interdisciplinary, including work in hydrodynamics, structural analysis and dynamics, steel design, soils and foundations, and computational methods. Students may also participate in the work of the Offshore Technology Research Center.

Structural engineering. The graduate program in structural engineering addresses the analysis and design of reinforced and prestressed concrete, timber, steel, masonry, and composite structural systems. Extensive experimental research facilities are available for the observation and study of the behavior of structures under a variety of loadings.

Most of the experimental studies in structural engineering are conducted in the Phil M. Ferguson Structural Engineering Laboratory, located at the J. J. Pickle Research Campus. Ferguson Laboratory is one of the largest, best-equipped structural research facilities in the world. Multistory structures and full-size multigirder bridge structures have been tested. The laboratory contains three test slabs, 40' × 80', 40' × 60', and 30' × 60'. One of the test floors surrounds a 600kip universal test machine that permits testing full-size plate girders. In addition, a unique three-dimensional test facility consisting of a 44' × 32' test floor, combined with two perpendicular vertical walls, each nineteen feet high, permits three-dimensional loading. Fatigue testing capabilities permit study of full-size components under random amplitude and frequency to simulate actual service conditions. A number of closed-loop servo-controlled loading systems are available. Cables, such as those used in cable-stayed bridges, can be tested in fatigue up to loads of three million pounds in the cable testing facility. A materials-testing facility is also located in the Ferguson Laboratory. For structural fire engineering research, test frames and furnaces are available for elevated temperature tests of structural materials, components, and connections. Data acquisition systems are available that are suitable for static, dynamic, and fatigue loading programs. The systems are controlled by the laboratory's own computer systems. Direct access to the main University computer facility is also available.

Excellent computational facilities are available to all students in structural engineering in support of both instructional and research activities. These include: (1) the Civil Engineering Learning Resource Center (LRC), a general-use, 24-hour access facility equipped with more than 150 workstation-class computers ranging from single-core/single-processor to multicore/multiprocessor machines and several dedicated color laser printers, plotters, and flatbed scanners; (2) the Virtual Design Lab, a smaller computational facility equipped with several workstations that provide students with access to the latest suite of high-end CAD and graphics software; (3) a student lounge equipped with computational centers that can be used for team projects; (4) a graduate student computational laboratory equipped with high-end workstations dedicated to research activities; and (5) a similarly equipped graduate computational laboratory housed at the Ferguson Structural Engineering Laboratory. In addition, for research demanding supercomputing resources, students and their faculty advisors have access to the Texas Advanced Computing Center's (TACC) supercomputers, which include Ranger, currently the largest open-science computing system in the world, featuring 62,976 computing nodes, 123 TB of aggregate memory, and peak performance of about 0.5 petaFLOPS. The TACC also provides access to other massively parallel systems and visualization clusters. Access to computational resources is facilitated through the network infrastructure that comprises both wired and wireless segments; the wireless network covers most of the University's main campus.

Sustainable systems. The graduate program in Sustainable Systems is intended to provide students with an education and research experience that is cross-disciplinary. The program permits considerable flexibility in the selection of courses and participation in research experiences, thereby allowing students to tailor the graduate program according to their background and educational objectives. This program aligns with CAEE'S Strategic Plan, which focuses on the Cities, Water, and Energy nexus, challenging civil, architectural, and environmental engineers to address complex problems through innovative and cross-disciplinary solutions. To foster this, research of each Sustainable Systems student can be co-supervised by two faculty members in different areas. Hence, students are affiliated to laboratories in their respective supervisor(s) area(s). Students also benefit from the many facilities and infrastructure systems on campus and in the surrounding community as living laboratories for class visits and research studies.

Transportation engineering. The University's proximity to the headquarters of governmental transportation agencies provides ready access to the facilities and records of these organizations by graduate students, in planning, behavioral modeling and demand prediction, geometric and structural design, large-scale infrastructure systems analysis and optimal resource allocations, policy making, and operation of streets, highways, and transit and non-motorized transportation systems. The Center for Transportation Research administers an extensive cooperative research program with the Texas Department of Transportation, the United States Department of Transportation, as well as a spectrum of sponsored projects with other agencies, including the Transportation Research Board, and the National Science Foundation.

Equipment for specialized and routine testing of materials used for constructing and maintaining transportation facilities is available. The bituminous materials laboratory includes state-of-the-art asphalt binder and asphalt concrete testing equipment, an environmental control chamber, and mix preparation and aggregate handling facilities.

Facilities are provided for studying traffic operations, including traffic volume counters, speed meters, motor-driven movie cameras, video cameras and recorders, projectors, portable delay recorders, and other special measuring and recording equipment.

The Transportation Infrastructure and Information Systems Laboratory provides the capability to conduct research in analysis and simulation of large-scale infrastructure systems. The Transportation Equilibrium, Simulation, and Optimized Networks Laboratory allows research on large-scale complex networks with a focus on transportation systems. In addition, the University's high-performance computers and hardware and software in the department's Learning Resources Center are available to
support research in transportation networks, infrastructure systems, land uses, and traffic operations.

Libraries. In addition to the Perry-Castañeda Library and libraries in physics and mathematics, geological sciences, life sciences, and chemistry, a complete library of books, periodicals, and society proceedings in civil engineering is housed in the McKinney Engineering Library.

Areas of Study

Civil engineering majors may specialize in building energy and environments; construction engineering and project management; infrastructure materials engineering; environmental and water resources engineering; geotechnical engineering; mechanics, uncertainty, and simulation in engineering; ocean engineering; structural engineering; sustainable systems; or transportation engineering. In addition, the Department of Civil, Architectural, and Environmental Engineering offers the Master of Science in Engineering with a major in environmental and water resources engineering.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- David T Allen
- Matthew David Bartos
- Oguzhan Bayrak
- Amit Bhasin
- Chandra R Bhat
- Stephen Boyles
- Carlos H Caldas
- Sergio Castellanos
- Alexora Clara Saracho
- Christian Claudel
- Patricia Clayton
- C Tyler Dick
- Berkin Dortdivanlioglu
- Chadi Said El Mohtar
- Michael D Engelhardt
- Ofodike A Ezekoye
- Kasey M Faust
- Anca-Cristina Ferche
- Raisa Patricia Ferron
- Kevin J Folliard
- Benny D Freeman
- Robert B Gilbert
- Matt Hebdon
- Todd A Helwig
- Ben R Hodges
- Blair Johnson
- Maria Juenger
- Loukas F Kallivokas
- Lynn E Katz
- Spyridon A Kinnas
- Kerry A Kinney
- Mary Jo Kinzies
- Kara Kockelman

- Krishna Kumar
- Manish Kumar
- Desmond F Lawler
- Fernanda Lustosa Leite
- Howard M Liljestrand
- Randy B Machemehl
- Lance Manuel
- Pawel Miszal
- Javad Mohammad
- Gyorgy Zoltan Nagy
- Dev Niyogi
- Atila Novoselac
- William J O'Brien
- James T O'Connor
- Jon E Olson
- Paola Passalaqua
- Gary A Pope
- Jorge A Prouzi
- Ellen M Rathje
- Salvatore Salamone
- Navid Saleh
- Polina Sela
- Kamy Sepehrnoori
- Gerald E Speitel Jr
- Kenneth H Stokoe II
- Eric van Oort
- C Michael Walton
- Michael Webber
- Charles J Werth
- Eric B Williamson
- Sharon L Wood
- Jorge G Zornberg

Admission Requirements

A Bachelor of Science degree from a program in engineering accredited by ABET is the general prerequisite for admission to a graduate program in civil engineering. An applicant whose training does not meet this prerequisite may be accepted but will be required to pass a sequence of courses stipulated by the Graduate Studies Committee that will make up the deficiencies in undergraduate preparation. A list of the required courses is available from the graduate advisor.

Degree Requirements, Civil Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Full-time students, and both teaching and research assistants, are required to register for nine semester hours of coursework during each fall/spring semester. These nine hours may include special problems, seminar, thesis, and dissertation courses.

Master of Science in Engineering

Students who follow the 30-semester-hour plan with thesis must complete a major in civil engineering consisting of 18 to 24 semester hours, including the thesis course, and a minor of six to 12 semester hours outside the area of concentration. Included in the major and minor must be at least 18 semester hours in engineering. The courses must be logically related and the individual program must be approved by the graduate advisor.

A 30-semester-hour degree plan is also available under the report option, which includes a report prepared in Civil Engineering 398R according to procedures set by the Graduate School; and under an option that includes a report prepared in Civil Engineering 398D, or an approved program of coursework only, according to procedures set by the Graduate Studies Committee.

Majors for the master’s degree may be chosen in any area or combination of areas listed under Areas of Study (p. ).

Doctor of Philosophy

To be admitted to candidacy for the doctoral degree, the student must pass a preliminary (qualifying) examination administered by a committee, appointed by the graduate advisor, of at least three members of the civil engineering faculty, two of whom may be in the major area. This examination must be taken before the student registers for the second semester beyond the Master of Science in Engineering degree. The student must also submit a Program of Work that is approved by the chair of the civil engineering Graduate Studies Committee and the graduate dean. All students must demonstrate proficiency in English.

When the student has been admitted to candidacy, a dissertation committee is appointed by the graduate dean. When the student has completed most of their coursework, the dissertation committee administers a comprehensive examination in the major.

The defense of the dissertation is the final examination of the Doctor of Philosophy degree program. This examination is scheduled after the members of the dissertation committee have received a final draft of the dissertation that has been approved by the supervising professor.

Dual Degree Program

The Department of Civil, Architectural, and Environmental Engineering offers the following dual degree program in cooperation with the Lyndon B. Johnson School of Public Affairs. More information is available from the graduate advisor in each program.
practitioners are responsible for specifying, designing, and implementing architecture at the interface of computer hardware and software. Its role is crucial in the development of computer systems, and it spans many dimensions, such as the scope of a processor (embedded processors, desktop systems, servers, and supercomputers); the target application (general-purpose versus domain-specific); the characteristics of the design objectives (speed, power consumption, cost, reliability, availability, and reconfigurability); and the measurement and analysis of resulting designs.

bioECE. Understanding, engineering, and interfacing with biological systems are among humanity's most important challenges, impacting numerous fields from basic science to health. Motivated by this larger vision, the bioECE track is focused on the intersection of electrical and computer engineering with biology and medicine. It includes biomedical instrumentation, biophotonics, health informatics, bioinformatics, neural engineering, computational neuroscience, and synthetic biology. Associated faculty have expertise in diverse topics: cardiovascular instrumentation, neuroscience, neural engineering and the machine-brain interface, image and signal processing (feature extraction and diagnostic interpretation), health information technologies (data mining, electronic medical records analysis), VLSI biomedical circuits (biosensing, lab-on-a-chip), algorithms for large-scale genomic analysis, and molecular programming (engineering molecules that compute).

Decision, Information, and Communications Engineering. This track involves research and design in the following fields: (1) Communications and networking: all aspects of transmission of data, including: wireless communications, communication theory, information theory, networking, queueing theory, stochastic processes, sensor networks; (2) Data science and machine learning: all aspects of extraction of knowledge from data, including: algorithms, data mining, optimization, statistics, pattern recognition, predictive analytics, artificial intelligence; and (3) Controls, signals, and systems: estimation and detection; signal, image and video processing; linear and nonlinear systems.

Electromagnetics and Acoustics. This track includes the study of electromagnetic and acoustic phenomena ranging from ultralow frequencies to the visible spectrum. The activities in electromagnetics involve research in antenna design, radar scattering, computational methods, wave-matter interaction, bioelectromagnetics, wave manipulation using artificial materials, wireless propagation channels, microwave and millimeter-wave integrated circuits, guided wave devices and systems, electromagnetic forces (including electrostrictive and magnetostrictive forces), and Maxwell's stress tensor. The activities in acoustics involve research in transducers, microelectromechanical systems, atmospheric and underwater acoustics, and noise and vibration control.

Electronics, Photonics, and Quantum Systems. This track focuses on the development and improvement of electronic, photonic, optoelectronic, spintronic and micro-electromechanical (MEMS) materials, devices and systems for a variety of applications. Electronic device examples include transistors for nano-CMOS, back-end-of-the-line silicon, power transistors and post-CMOS logic, memory, analog, and mixed-signal applications based on quantum mechanical tunneling and electron spin. Photonic devices include photodetectors, LEDs and lasers, including topological photonics, metamaterials, metasurfaces, and other novel nanophotonic structures, optical interconnects for short and long-range communication, displays and solar cells. There is research on acoustic, chemical and biological sensors, as well as quantum transport devices such as Josephson junctions. Material systems include unstrained and strained column IV and III-V semiconductors grown by molecular beam epitaxy.

### Facilities for Graduate Work

Facilities are available for graduate work in almost all areas of study within electrical and computer engineering, and for both experimental and theoretical/computational research. Graduate activities of the department are housed in the Engineering Education and Research Center, and in several special-purpose laboratories located in the Peter O'Donnell Jr. building and on the J. J. Pickle Research Campus. Numerous facilities for experimental research are provided within these well-equipped research laboratories. Among the resources available for computationally intensive research is the Texas Advanced Computing Center, also housed on the J. J. Pickle Research campus. In addition, The University of Texas Libraries provide a rich source of literature to support graduate activities in electrical and computer engineering, including free online access to essentially all important journals.

Facility of the Chandra Department of Electrical and Computer Engineering also participate in several widely-recognized centers for research including: the Center for Advanced Research in Software Engineering, the Center for Electromechanics, the Center for Identity, the Center for Perceptual Systems, the Center for Transportation Research, the Microelectronics Research Center, the Oden Institute for Computational Engineering and Sciences, the Texas Materials Institute, and the Wireless Networking and Communications Group.

### Areas of Study

There are eight named academic tracks spanning electrical and computer engineering which admissions, course offerings, and advising are organized, as listed below. However, the interests and work of students and faculty alike may overlap more than one track.

**Architecture, Computer Systems, and Embedded Systems.** Computer architecture is at the interface of computer hardware and software. Its practitioners are responsible for specifying, designing, and implementing at the architecture level the hardware structures that carry out the work specified by computer software. Computer architects share the responsibility for providing mechanisms that algorithms, compilers, and operating systems can use to enhance the performance and/or energy requirements of running applications. Computer architecture spans many dimensions, such as the scope of a processor (embedded processors, desktop systems, servers, and supercomputers); the target application (general-purpose versus domain-specific); the characteristics of the design objectives (speed, power consumption, cost, reliability, availability, and reconfigurability); and the measurement and analysis of resulting designs.

**BioECE.** Understanding, engineering, and interfacing with biological systems are among humanity's most important challenges, impacting numerous fields from basic science to health. Motivated by this larger vision, the bioECE track is focused on the intersection of electrical and computer engineering with biology and medicine. It includes biomedical instrumentation, biophotonics, health informatics, bioinformatics, neural engineering, computational neuroscience, and synthetic biology. Associated faculty have expertise in diverse topics: cardiovascular instrumentation, neuroscience, neural engineering and the machine-brain interface, image and signal processing (feature extraction and diagnostic interpretation), health information technologies (data mining, electronic medical records analysis), VLSI biomedical circuits (biosensing, lab-on-a-chip), algorithms for large-scale genomic analysis, and molecular programming (engineering molecules that compute).

**Decision, Information, and Communications Engineering.** This track involves research and design in the following fields: (1) Communications and networking: all aspects of transmission of data, including: wireless communications, communication theory, information theory, networking, queueing theory, stochastic processes, sensor networks; (2) Data science and machine learning: all aspects of extraction of knowledge from data, including: algorithms, data mining, optimization, statistics, pattern recognition, predictive analytics, artificial intelligence; and (3) Controls, signals, and systems: estimation and detection; signal, image and video processing; linear and nonlinear systems.

**Electromagnetics and Acoustics.** This track includes the study of electromagnetic and acoustic phenomena ranging from ultralow frequencies to the visible spectrum. The activities in electromagnetics involve research in antenna design, radar scattering, computational methods, wave-matter interaction, bioelectromagnetics, wave manipulation using artificial materials, wireless propagation channels, microwave and millimeter-wave integrated circuits, guided wave devices and systems, electromagnetic forces (including electrostrictive and magnetostrictive forces), and Maxwell's stress tensor. The activities in acoustics involve research in transducers, microelectromechanical systems, atmospheric and underwater acoustics, and noise and vibration control.

**Electronics, Photonics, and Quantum Systems.** This track focuses on the development and improvement of electronic, photonic, optoelectronic, spintronic and micro-electromechanical (MEMS) materials, devices and systems for a variety of applications. Electronic device examples include transistors for nano-CMOS, back-end-of-the-line silicon, power transistors and post-CMOS logic, memory, analog, and mixed-signal applications based on quantum mechanical tunneling and electron spin. Photonic devices include photodetectors, LEDs and lasers, including topological photonics, metamaterials, metasurfaces, and other novel nanophotonic structures, optical interconnects for short and long-range communication, displays and solar cells. There is research on acoustic, chemical and biological sensors, as well as quantum transport devices such as Josephson junctions. Material systems include unstrained and strained column IV and III-V semiconductors grown by molecular beam epitaxy.
epitaxy or various types of chemical vapor deposition, organics and polymers, thin-film and novel 0D, 1D and 2D materials such as quantum dots, nanowires, graphene and other 2D layered materials such as transition metal dichalcogenides, as well as insulators such as high-dielectric-constant materials. Research in systems includes those for quantum information processing, optical systems for signal processing and very-high-speed communications, and electronic systems such as compute-in-memory and neuromorphic computing.

Integrated Circuits and Systems. This track involves all aspects of analysis, design, synthesis, and implementation of digital, analog, mixed-signal, and radio frequency (RF) integrated circuits and systems for applications in computing, sensing, and communications. Research in the area spans levels of abstraction from devices to systems-on-chip (SoC), and involves transceiver architectures, data converters, memory technologies, signal processing systems, integrated bio-chips, neuromorphic computing, high-performance and low-power design, fault tolerance, design for manufacturability (DFM), design for test (DFT), verification, computer-aided design (CAD) and electronic design automation (EDA).

Power Electronics and Power Systems. This track involves research in the generation, transmission, distribution, conversion, storage, and management of electric energy. Research activities include but are not limited to advanced power semiconductor devices; high-frequency-power-electronic conversion systems; high-frequency magnetics; medium voltage power electronics for applications in renewable energy; energy storage and smart grid systems; dc power grids; power system analyses; modeling and simulation of power systems; grid data analytics; security and resilience of power grid infrastructures; microgrids; protection systems; energy system economics and optimization; electricity markets; power system harmonics; power quality; and distributed generation.

Software Engineering and Systems. This track involves all aspects of engineering software systems. In addition to the problem of requirements, research and study in the area addresses architecting, designing, building, testing, analyzing, evaluating, deploying, maintaining, and evolving software systems. Problems investigated include theory, techniques, methods, processes, tools, middleware, and environments for all types of software systems in all types of domains and applications. This area of study also is available to working professionals through the Alternatively Scheduled MSE program with a concentration in Software Engineering administered by Texas Engineering Executive Education (TxEEE).

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

| Jacob A Abraham | Ruochen Lu |
| Andrea Ali | Diana Marculescu |
| Jeffrey G Andrews | Radu Marculescu |
| Chandrakj L Bajaj | Mia K Markey |
| Sanjay K Banerjee | Jose del R Millan |

| Calvin Lin | Mingyuan Zhou |
| Nanshu Lu | Hao Zhu |

Admission Requirements

Admission to the graduate programs in ECE is highly competitive and based on a holistic review of all application materials by the chosen academic track’s admission committee, which is composed of faculty within that track. Standards for admission generally exceed the minimum standards established by the University. The Chandra Department of ECE neither requires nor considers GRE scores in the selection of students for admission.

Applicants to the graduate program of the Chandra Department of Electrical and Computer Engineering normally will have an undergraduate degree in this field. Applicants with a degree in another field also may be considered if their background is appropriate for the chosen area of specialization. However, if admitted, the student may be required
to complete additional coursework (outside their Program of Work, discussed below) to address any academic deficiencies. Another exception exists for students in the Integrated BSECE/MSE program who receive their BSECE and MSE degrees simultaneously.

Graduate students in the Chandra Department of Electrical and Computer Engineering are expected to be proficient in English. An applicant who does not meet the English proficiency standards of the University may be admitted, but then may be required to complete a three-hour English course. The course is counted toward the student’s course load for the semester but is not counted toward the fulfillment of course requirements for the graduate degree.

Degree Requirements, Electrical and Computer Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Overview

Applications may be made to one of the Master of Science in Engineering (MSE) programs in ECE to pursue the MSE degree or may be made to the Doctor of Philosophy (PhD) program in ECE to pursue the PhD. A master’s degree is not required to obtain the PhD, but a student entering the PhD program without a master’s degree in the same or a related field typically can choose to also pursue the MSE along the way. Similarly, a student in one of the MSE programs can be admitted to the PhD program for continuing study. In either case, the student often can earn both degrees with little or no additional effort beyond that required to earn only the PhD by using much or all the same classroom-instruction-based (“classroom”) coursework for both degrees.

Beyond a minimum of six hours of Dissertation courses required for the PhD and normally taken on a credit/no credit basis in ECE, both the MSE and the PhD Programs of Work require 30 semester hours (10 three-hour semester-long courses) of coursework including at least 18 hours of major work and at least six hours of supporting work. Both the MSE and the PhD Program of Work can include up to two upper-division undergraduate courses (three hours or more each) where available, but supporting work must include at least one graduate course (three hours). Which courses may be counted as major work and which may be counted as supporting work depend on both the student’s academic track and the student’s individual interests. Ultimately, all major and supporting coursework must be logically related. Individual academic tracks may have additional requirements. The academic track advisor, the student’s individual supervisor if any, or both can provide guidance as to which courses a student may count toward major or supporting work. Additional courses may be taken outside the Program of Work, such as courses taken for remedial purposes and, usually on a credit/no credit basis, Research Problems and additional Dissertation courses. The Graduate School of the University of Texas requires graduate students to maintain an overall GPA of at least 3.00 (B) for all coursework taken while within the graduate program and to achieve a 3.00 GPA for all coursework taken within the graduate program that is included within an MSE or PhD Program of Work. Program-specific information and additional requirements for each graduate program within ECE are provided in what follows. Still more information is available online, from a graduate coordinator within the ECE Advising Office, from the academic track advisors, and from other sources noted in what follows.

Master of Science in Engineering

The Chandra Department of Electrical and Computer Engineering currently offers three Master of Science in Engineering (MSE) programs to meet differing needs: the Traditional MSE program, the Integrated MSE program, and the single-track Alternatively Scheduled MSE program with a concentration in Software Engineering. The latter program is offered through Texas Engineering Executive Education (TxEEE). The Traditional and Integrated BSECE/MSE programs share the same academic track advisors; the Alternatively Scheduled MSE program has its own program advisor. Students in each of these MSE programs are expected to meet the same academic standards.

The Traditional and Integrated MSE programs each offer thesis, report, and coursework-only options; the Alternatively Scheduled MSE programs each offer thesis, report, and coursework-only options; the Alternatively Scheduled MSE program offers only the report and coursework-only options. The thesis option requires original research and satisfactory completion of a written thesis and two associated three-hour Thesis courses taken on the credit/no credit basis within the 30-hour MSE Program of Work. The report option requires satisfactory completion of a written report and one associated three-hour Report course taken on the credit/no credit basis within the 30-hour MSE Program of Work. Otherwise, all other courses that count toward the MSE Program of Work must be classroom courses and taken for a letter grade. Up to six semester hours (two semester-long courses) or the quarter system equivalent of graduate coursework taken elsewhere but not used for a prior degree may be used for the Program of Work with approval. A minimum grade point average of 3.00 (B) is required within the MSE Program of Work for coursework taken at The University of Texas at Austin as a Graduate student. The MSE Program of Work including graduate coursework taken at other institutions and taken at The University of Texas at Austin as an undergraduate and reserved for graduate credit should meet this standard also. Moreover, only one course with a grade less than B−, no course with a grade less than C, and no course with a grade of less than B taken at another institution may be counted within the MSE Program of Work. The student’s MSE Program of Work must be approved by the student’s academic track advisor or, in the case of the Alternatively Scheduled program, program advisor or by the student’s individual supervisor, then by the graduate advisor of the Chandra Department of ECE, and finally by the Graduate School of The University of Texas at Austin.

**Traditional MSE program:** Students in the Traditional MSE program attend classes in the Integrated MSE program and the PhD program and have access to upper-division undergraduate courses and courses taught outside the Chandra Department of ECE.

**Integrated BSECE/MSE program:** Admission to the Integrated BSECE/MSE program is open only to students within the undergraduate program within the Chandra Department of Electrical and Computer Engineering at The University of Texas at Austin. The Integrated BSECE/MSE program is designed to provide a smooth and accelerated connection between the Bachelor of Science in Electrical and Computer Engineering (BSECE) degree and the MSE degree and it results in the simultaneous awarding of both degrees. However, the course options and requirements of the MSE portion of the Integrated BSECE/MSE program are identical to those of the Traditional MSE program, and students in the Integrated BSECE/MSE program attend classes with those in the Traditional MSE program and the PhD program and have access to upper-division undergraduate courses and courses taught outside the Chandra Department of ECE. Admission requirements and procedures for the graduate portion of the Integrated BSECE/MSE program also are much the same as for the Traditional MSE program, except that students are expected to have taken and reserved for graduate credit two graduate courses prior to entering the graduate portion of the Integrated BSECE/MSE program.
Information about the requirements of the undergraduate portion of the Integrated BSECE/MSE program is available from the Integrated BSECE/MSE program sub-section of the Bachelor of Science in Electrical Engineering section of the Undergraduate Catalog, from the ECE website, and from an undergraduate advisor within the ECE Advising Office.

**Alternatively Scheduled MSE program with a concentration in Software Engineering:** This is a single-track program administered by Texas Engineering Executive Education (TxEEE) and designed with full-time engineers and computer professionals in mind. Students attend classes in person taught by faculty from the Chandra Department of Electrical and Computer Engineering. However, they do so once a month on Fridays and Saturdays. Moreover, all courses offered in this program are at the graduate level, and this program has its own academic advisor. Additional information about this program is published by TxEEE.

**Doctor of Philosophy**

Of the 30 hours of classroom coursework required for the PhD Program of Work, up to 18 semester hours (six semester-long courses) or the quarter-system equivalent of graduate-level classroom coursework taken elsewhere but not used for a prior bachelor or doctoral degree may be used with approval. A minimum grade point average of 3.33 (B+) is required for the classroom coursework taken at The University of Texas at Austin included within the Program of Work. The Program of Work including graduate coursework taken at other institutions also should meet this standard. Moreover, no course with a grade of less than a B- and no course with a grade of less than a B taken at another institution may be counted within the ECE PhD Program of Work. The student’s PhD Program of Work must be approved by the student’s dissertation supervisor or supervisors, by the remainder of the student’s dissertation committee (see below), by the Chair of the ECE GSC, and by the Graduate School of The University of Texas at Austin. Students in the PhD program attend classes with students in the Traditional and Integrated MSE programs and have access to upper-division undergraduate courses and courses taught outside the Chandra Department of ECE.

Beyond the requirements of a master’s degree (whether or not the student has or obtains one), the PhD becomes primarily or entirely a research-based degree requiring the student to make a significant original contribution. For students who entered or enter the PhD program fall 2018 or later or who entered earlier but chose to follow the rules that are mandatory for students entering fall 2018 or later, research milestones toward the PhD include: finding a dissertation supervisor or supervisors; forming a dissertation committee consisting of the dissertation supervisor or supervisors and of other members inside and outside of the ECE GSC, undergoing a Candidacy Evaluation by the nonsupervisory members of the dissertation committee, and being admitted to PhD candidacy by the Graduate School of The University of Texas at Austin; passing a Progress Review; and ultimately writing and successfully defending their PhD dissertation before their dissertation committee. For students who entered the PhD program prior to fall 2018 and chose to be grandfathered into the rules in effect at that time, research milestones toward the PhD include: finding a research supervisor or supervisors; performing any prequalifying examination or procedure as defined by the student’s academic track; forming a qualifying committee consisting of the dissertation supervisor or supervisors and of other members inside and outside of the ECE GSC, successfully performing a qualifying examination before their qualifying committee, forming a dissertation committee (probably but not necessarily the same as their qualifying committee), and being admitted to PhD candidacy by the Graduate School of The University of Texas at Austin; and ultimately writing and successfully defending their PhD dissertation before their dissertation committee. PhD students also take accompanying individual instruction Research Problems and/or additional Dissertation courses (beyond the six hours required within the PhD Program of Work) before and after entering candidacy, respectively, as required to meet registration and often employment and visa requirements. These matters are discussed in detail in the Rules, Procedures and Expectations Regarding Academic Progress within the ECE PhD Program which can be found on the ECE website.

**Engineering Management**

**Master of Science in Engineering**

The Engineering Management program is offered by the Cockrell School of Engineering and administered by Texas Engineering Executive Education. The mission of the program is to contribute significantly to engineers’ managerial leadership abilities within their technological organizations by allowing students an opportunity to pursue higher education that is innovative and intellectually inspiring. The program fulfills this mission by offering courses that teach engineers how to lead and how to manage projects, processes, personnel, products, and services in real-world situations.

**For More Information**

**Campus address:** Gary L. Thomas Building 4th Floor Suite 4.106 210 E 24th St, Stop A2800, phone (512) 471-3506, fax (512) 471-0831; campus mail code: A2800

**Mailing address:** The University of Texas at Austin, Engineering Management Program, 210 E 24th St, Stop A2800, Austin TX 78712

**E-mail:** utmasters@engr.utexas.edu

**URL:** https://executive.engr.utexas.edu/academic-programs/degrees/engr-manage

**Objectives**

The core objective of the engineering management program is to provide engineers who have chosen to pursue leadership and management career paths with the tools and education that will most directly support their success. The goal of the degree program is to provide engineering professionals with a solid foundation to help them continue lifelong learning while employed in industry. Additional objectives include teaching students about managing technical, business, and human performance processes in order to achieve corporate goals; to develop and learn core business fundamentals in areas including economics, negotiations, analytics, operations management, marketing, and decision analysis and risk assessment; and to provide an understanding of marketing risks associated with new products, financing a new venture, and legal issues associated with a new project or product. The MSE in Engineering Management program provides challenging, innovative, and intellectually inspiring curriculum to meet the needs of working professionals and technology organizations of all types. Courses meet once a month on Friday and Saturday.

All courses have been built to align with the American Society for Engineering Management Body of Knowledge. In addition, all courses align with the University’s policies governing non-formula-funded (Option III) degree programs. In the required courses, listed in the Degree Requirements (p. 85) section, students are expected to develop their perspectives on leadership and management of technology in industry and to gain insight into other management issues critical to leading or managing a technological organization.

The curriculum is designed to help students become better engineering leaders who can manage personnel, projects, processes, products, and services. The program’s special scheduling option allows working professionals to earn an advanced degree while maintaining their career.
Areas of Study

The interdisciplinary engineering management faculty includes members of several departments of the Cockrell School of Engineering and the McCombs School of Business. The current research of this faculty includes such topics as finance and accounting for engineering manager; strategic decision and risk analysis; marketing and negotiation; management of people and organizations; and legal issues and technology management, such as product liability and patent law.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Caroline A Bartel  John A Daly
J Eric Bickel  John J Hasenbein
Richard H Crawford

Admission Requirements

This two-year program provides graduate education for the working professional who is employed in or planning to move into the field of engineering management. Classes meet all day one Friday and Saturday a month, with an orientation session at the beginning of the program. The program requires a serious commitment on the part of the student and the student’s employer. The coursework is rigorous and demanding and can provide an excellent educational experience.

It is preferred that applicants have at least 18 months of professional industry-related experience, an upper-division GPA of a 3.0, and a bachelor of science in engineering, engineering technology, or related technical field.

Degree Requirements, Engineering Management

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Engineering

Both the traditional program and fast track program track require 30 semester hours of graduate coursework, including the following core courses:

Engineering Management 380E, Topic 1: Managing People and Organizations
Engineering Management 380E, Topic 2: Engineering Project Management
Engineering Management 381E, Topic 1: Marketing and Negotiation
Engineering Management 381E, Topic 2: Legal Issues and Technology Management
Engineering Management 381E, Topic 3: Finance and Accounting for Engineering Managers
Engineering Management 382E, Topic 1: Analytics for Engineering Managers
Engineering Management 382E, Topic 2: Strategic Decision and Risk Analysis

The student must also complete six semester hours in a projects course, Engineering Management 397P, Projects in Engineering Management.

Engineering Mechanics

Master of Science in Engineering
Doctor of Philosophy

For More Information

Campus address: Aerospace Engineering (ASE) 2.228, phone (512) 471-7595, fax (512) 471-3788; campus mail code: C0600
Mailing address: The University of Texas at Austin, Graduate Program in Engineering Mechanics, Department of Aerospace Engineering and Engineering Mechanics, 2617 Wichita Street, Stop C0600, Austin TX 78712
E-mail: ase.grad@mail.ae.utexas.edu
URL: http://www.ae.utexas.edu/

Objectives

The engineering mechanics graduate program is involved in teaching and research in analytical, computational, and experimental methods in mechanics of solids, structures, and materials and fluid mechanics. The objectives of the program are to enable the student to attain a deeper understanding of engineering mechanics fundamentals, a knowledge of recent developments, and the ability as a master’s degree student to participate in research and as a doctoral degree student to conduct individual research. The goals are accomplished through coursework, seminars, and active research programs.

Areas of Study and Facilities

Graduate study and facilities for research are offered in the areas of theoretical mechanics and applied mathematics, dynamics, computational mechanics, experimental fluid mechanics, computational fluid dynamics, finite element methods, boundary element methods, experimental mechanics, solid and structural mechanics, and structural dynamics. The extensive facilities of Information Technology Services and related hardware for interactive computer graphics and real-time control of experiments are available to graduate students for research use. For experimental research, the Department of Aerospace Engineering and Engineering Mechanics maintains laboratory facilities on the main campus and at the J. J. Pickle Research Campus. These facilities include equipment for studies in high-velocity impact, structural dynamics. The extensive facilities of Information Technology Services and related hardware for interactive computer graphics and real-time control of experiments are available to graduate students for research use. For experimental research, the Department of Aerospace Engineering and Engineering Mechanics maintains laboratory facilities on the main campus and at the J. J. Pickle Research Campus. These facilities include equipment for studies in high-velocity impact, structural dynamics, and materials science. A well-equipped machine shop is partially supported by the department, and technical assistance is available when required.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Tan Thanh Bui  Nanshu Lu
Clinton N Dawson  Mark E Mear
Leszek F Demkowicz  J T Oden
Berkin Dortdivanlioglu  Manuel Karl Rausch
John Timothy Foster  Krishnaswa Ravi-Chandar
Rui Huang  Gregory J Rodin
Thomas J Hughes  Michael S Sacks
Loukas F Kallivokas  Jayant Sirohi
Stelios Kyriakides  Mary F Wheeler
Chad Matthew Landis  Karen E Willcox
Kenneth M Liechti  Jin Yang

2023-2024 Graduate Catalog ▶ Graduate 85
Degree Requirements, Engineering Mechanics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Candidates for a graduate degree in engineering mechanics must meet all the general requirements for advanced degrees. Particular details are given below.

Master of Science in Engineering

Before being admitted to the program, the student must have a satisfactory proficiency in basic and intermediate material in engineering mechanics and mathematics. Students entering without an undergraduate degree in engineering are usually required to do some remedial work at the undergraduate level.

Students seeking the Master’s degree have three options, each requiring a total of 30 credit hours. The thesis option requires 24 credit hours of coursework plus six credit hours for a master’s thesis based on research. The report option requires 27 credit hours of coursework plus three credit hours for a master’s report based on research. The coursework-only option requires 30 credit hours of coursework without a thesis or report.

Regardless of the option chosen, a student is required to take six credit hours of supporting coursework outside of the technical area. Only courses completed on the letter-grade basis may be counted toward the degree. Only three hours of business-related courses may be counted. Students may count no more than six hours of upper-division undergraduate coursework toward the degree.

Doctor of Philosophy

Students are expected to complete 90 credit hours after their BS degree (including coursework and research credit) to earn a PhD. This expectation, however, may be waived simply by the agreement of the student’s research advisor(s) and/or dissertation committee.

Doctoral candidates must fulfill the basic course requirements prescribed for the Master’s degree. Beyond that, the course program is tailored to each student’s needs.

Before being admitted to candidacy for the degree, the student must pass both a written and an oral qualifying examination on graduate-level material.

After being admitted to candidacy, the student completes coursework, carries out an acceptable program of original research, and writes a dissertation covering this research. The committee appointed to approve the Program of Work and the dissertation examines the student for both breadth and depth of knowledge. Examinations may be oral or written or both and must include a public defense of the dissertation.

Further information about policy, procedure, and requirements is available from the Department of Aerospace Engineering and Engineering Mechanics.

Materials Science and Engineering

Master of Science in Engineering
Doctor of Philosophy

For More Information

Campus address: Engineering Education and Research Center (EER) 6.614A, phone (512) 471-1504, fax (512) 475-8482; campus mail code: C2201

Mailing address: The University of Texas at Austin, Materials Science and Engineering Program, 204 E. Dean Keeton Street Stop C2201, Austin TX 78712

E-mail: mse@tmi.utexas.edu

URL: http://www.tmi.utexas.edu/

Objectives

This program is designed to educate materials scientists and engineers, to develop new knowledge, and to solve problems related to the synthesis, processing, characterization, and application of materials.

Facilities for Graduate Work

Extensive facilities, including laboratories for materials research and instruction and offices for faculty members and students, are located in several buildings on the main campus and at the J. J. Pickle Research Campus. The offices for the Texas Materials Institute (TMI) the materials science and engineering graduate program are located in the Engineering Education and Research Center (EER) building. Core central facilities for research include the Electron Microscopy, X-Ray Scattering, Surface Analysis, Nanofabrication and Testing, Electronic and Vibrational Scattering, Microelectronic Materials Processing, Organic Electronic Fabrication, Scanning Probe, X-ray Photoelectron Spectroscopy, Time-of-Flight Mass Spectrometry, and Polymer Characterization Facilities, each of which employs a manager to assist users. Other laboratories provide materials synthesis, powder processing, mechanical testing, and property measurements facilities for use by students and faculty members.

Areas of Study

Graduate study is focused on a range of materials, including metals and alloys, ceramics, polymers, composites, nanomaterials, structural materials, electronic and photonic materials, energy materials, and computational materials.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Admission Requirements

Students with a bachelor’s degree in engineering or in one of the physical sciences may be admitted to the materials science and engineering degree program upon the recommendation of the Graduate Studies Committee. Students who do not have a background that the committee considers satisfactory for the study of advanced materials science and engineering will be required to take preparatory coursework, some of which may be at the undergraduate level. Completion of some coursework may be required before the student begins the work for the graduate degree.

Degree Requirements, Materials Science and Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

Master of Science in Engineering

The student’s program of coursework is selected with the advice of the graduate advisor and must be approved by the Graduate Studies Committee. All students must complete deficiency, core, and advanced-level courses. (Individual deficiency courses may be waived if the student has equivalent credit on entering the program.) The specific course requirements vary for each concentration.

At least one full year is required to complete the master’s degree program.

Master of Science in Engineering with thesis. For students electing this option, 30 semester hours of credit are required, consisting of 24 hours of organized coursework and six hours in the thesis course. Students begin the program by completing deficiency courses, but they may petition to waive these courses if they have equivalent credit. Nine hours in core courses and nine to 15 additional hours in advanced-level courses must then be taken. A maximum of six hours of upper-division coursework may be counted toward the required 30 hours.

The student should choose a thesis research topic and begin research during the first semester.

Master of Science in Engineering with report. This option requires 33 semester hours of credit, consisting of 30 hours of organized coursework and three hours in the report course. The program must be approved by the graduate advisor. At least nine hours in core courses and an additional 15 to 21 hours of advanced-level coursework must be taken. Up to nine hours of upper-division coursework may be counted. Enrollment in this option must be approved by the graduate advisor.

Master of Science in Engineering without thesis or report. For students electing this option, 36 semester hours of coursework are required. Nine hours in core courses and an additional 18 to 24 hours in advanced-level courses must be taken. The program must be approved by the graduate advisor. Up to nine hours of upper-division coursework may be included. No research is required, but the level of academic performance is the same as that required for the master’s degree with thesis.

Doctor of Philosophy

A student may choose to pursue the doctoral degree without first obtaining a master’s degree. Before admission to doctoral candidacy, the student must have a master’s degree in materials science and engineering or an equivalent amount of graduate credit and must have demonstrated satisfactory performance on each part of the doctoral qualifying process. The doctoral candidate must also pass preliminary and final oral examinations covering the research program and the underlying science and engineering upon which the research is based. For a student with a Bachelor of Science degree, at least three years are required to complete the Doctor of Philosophy degree program.

Mechanical Engineering

**E-mail:** go@me.utexas.edu

**URL:** [https://www.me.utexas.edu/academics/graduate-program](https://www.me.utexas.edu/academics/graduate-program)

Objectives

The graduate program in mechanical engineering is designed to educate engineers who will be in the forefront of the mechanical engineering profession, leading the way to new and improved engineering systems to transform energy, materials, and information to meet the needs of society. To achieve this objective, the program offers a breadth of research and study areas and facilities. The faculty values creativity, the novel application of fundamental engineering science, interdisciplinary activities, the development of future leaders and a community of scholars, professionalism, and excitement in discovery. The program is designed to enhance these values, drawing upon the diverse interests and experience of the faculty. The major areas of emphasis are described below.
Areas of Study and Facilities

Acoustics. The Walker Department of Mechanical Engineering and the Chandra Department of Electrical and Computer Engineering offer an interdisciplinary course of study in this field. Research projects are carried out in physical acoustics, industrial acoustics, electroacoustics, nonlinear acoustics, underwater acoustics, and biomedical acoustics. Major experimental facilities include a general-purpose acoustics laboratory, a transducers laboratory, an anechoic chamber, a reverberation chamber, waveguides for high-intensity sound, a computer-controlled water tank for ultrasonics, and extensive underwater sound facilities at the Applied Research Laboratories.

Biomechanical engineering. This concentration provides studies for application of mechanical engineering principles to biological and medical problems. Areas of study are physiology, bioheat transfer, biomaterials, bioengineering, health physics, biosignal analysis, biomechanics, ultrasonics, and biomedical computing. Supporting courses and facilities are also provided through the Department of Biomedical Engineering.

Dynamic systems and control. This concentration offers intensive study in the analysis, design, and control of engineered and natural systems. Areas of study include applied mechanics, biomedical engineering, constitutive modeling of materials, electromechanics, information and control theory, mechanisms and robotics, mechatronics, modeling of multienergy domain systems, multibody dynamics, simulation and analysis of system dynamics, tribology, and vibrations. Laboratories and facilities are available for research in acoustics, biomechanics, control systems, mechatronics, robotics, system dynamics, and tribology.

Manufacturing and decision systems engineering. Manufacturing and decision systems engineering (MDSE) embraces the broad spectrum of knowledge required by decision makers in the realms of manufacturing and service systems. Courses in MDSE cover topics drawn from mechanical systems and design, thermal and fluid systems, materials science and engineering, operations research and industrial engineering, and leadership and entrepreneurship. Major research facilities are available for graduate students in this field.

Manufacturing and design. The concentration in manufacturing and design offers state-of-the-art programs in innovative manufacturing processes, product design and development, and supporting technologies. Areas of study include product design methods, layer-based manufacturing (solid freeform fabrication), machine design, unit manufacturing processes, robotics, contemporary prototyping, reverse engineering, optimization techniques, computer-aided design and manufacturing (CAD/CAM), computational geometry, machine intelligence, and design for people with disabilities. Well-equipped laboratories are available for research in solid freeform fabrication (including selective laser sintering), product modeling and simulation, unit manufacturing processes, robotics, one-off prototyping (such as CNC processes, woodworking equipment, power tools, and product measurement equipment), scaled manufacturing (from macro to meso to micro), biomedical device fabrication, and laser-based processes. These laboratories are part of the Advanced Manufacturing Center.

An alternatively scheduled master's degree program in advanced manufacturing engineering, a subarea of manufacturing and design, also exists but is inactive. More information is available from the graduate advisor.

Materials engineering. This concentration encompasses graduate study in the fields of materials development, characterization and processing, and in structure-property-performance relationships. Areas of study include ceramics, physical metallurgy, mechanical behavior, materials processing, fuel cells, high-energy density batteries, new materials development, nanomaterials and nanotechnology, corrosion, and microelectronics packaging. Laboratory facilities include scanning and transmission electron microscopes; X-ray scattering, metallographic, laser processing, thermal analysis, and thin-film characterization facilities; and mechanical, electrical, magnetic, and electrochemical property measurement equipment. The Walker Department of Mechanical Engineering is also a primary participant in the interdisciplinary materials science and engineering graduate degree program.

Nuclear and radiation engineering. This concentration provides graduate study and research in nuclear radiation science, analysis and design of nuclear systems, and experimental techniques in nuclear technology. Emphasis is on radiation transport and measurements, neutron physics, health physics and dosimetry, transport and disposal of nuclear wastes, and nuclear material safeguards and disposition. The Nuclear Engineering Teaching Laboratory is equipped with a 1.1-MW TRIGA pulsing nuclear reactor; a cold neutron source with prompt gamma analysis; neutron radiography equipment; neutron activation analysis equipment, including a pneumatic transfer system; californium-252 neutron sources; a low-level gamma-ray counting system and many radiation detection systems; and extensive computational capabilities.

Thermal/Fluid systems. This concentration offers graduate study and research in the areas of thermodynamics, heat and mass transfer, fluid mechanics, combustion, energy conversion, energy conservation, alternative energy, microscale heat transfer, microfluidics, advanced laser-materials processing, and thermoelectrics. Experimental facilities include subsonic wind tunnels, three-dimensional laser-Doppler anemometry, a micro/nano fabrication facility, scanning probe microscopy, a cryogenic measurement facility, instrumentation calibration facilities for semiconductor rapid thermal processing, fundamental combustion research facilities, engine and emission test facilities, solar energy components and systems, and various fluid mechanics and heat transfer equipment. The University's computational resources for numerical investigations are state-of-the-art and extensive.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Admission Requirements
To enter the graduate program in mechanical engineering, a student should have an undergraduate degree in engineering or in an equivalent quantitative field of study. Students who do not meet this requirement may have to take additional courses at the discretion of the graduate advisor. Admission to the integrated Bachelor of Science in Mechanical Engineering and Master of Science in Engineering (BSME/MSE) program is only open to current Mechanical Engineering undergraduate students.

Degree Requirements, Mechanical Engineering
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Engineering
There are generally three options under which a student may pursue the MSEME degree. Most students follow the thesis option, which requires 30 semester hours of credit, including six hours in the thesis course. Students who are appointed as teaching assistants or research assistants are expected to choose the thesis option. Except for students in manufacturing and decision systems engineering (MDSE), the report option requires 33 semester hours, including three hours in the report course; the MDSE concentration requires 36 hours, including three in the report course. The option without thesis or report requires 36 hours of coursework. At least 18 hours (including the thesis or report, if any) should be in the major area; at least six hours should be in a supporting area. The supporting courses may be in mechanical engineering but must represent a specialty distinct from the major courses. Some areas of study have required core courses.

The Department of Mechanical Engineering also offers an online MSEME degree program designed for working professionals. Students may complete the 30-hour program in two years. Courses are taught online by faculty in the Department of Mechanical Engineering. Requirements are the same as the traditional MSEME program. The online program is administered by the Cockrell School of Engineering’s Texas Engineering Executive Education, which publishes additional information.

Integrated BSME/MSE Program. Admission to the integrated Bachelor of Science in Mechanical Engineering and Master of Science in Engineering (BSME/MSE) program is open only to undergraduate students within the Department of Mechanical Engineering at the University of Texas at Austin. It results in the simultaneous awarding of a BSME degree (integrated option) and an MSE degree. The MSE degree options and requirements for students in the integrated BSME/MSE program are identical to those for students in the traditional MSE program. Admission requirements and procedures for the graduate portion of the integrated BSME/MSE program are the same as for the traditional MSE program except that the requirement for an undergraduate degree upon entering the program has been waived by the University.

See the Bachelor of Science in Mechanical Engineering, integrated BSME/MSE program section of the Undergraduate Catalog for more details about the requirements of the integrated option BSME degree. Additional information about the integrated BSME/MSE program requirements and policies may be obtained from the mechanical engineering advising offices.

Doctor of Philosophy
The student must pass a qualifying examination consisting of either: a) an examination administered by faculty members in the area of specialty, or b) a written examination administered by the department, followed by an oral examination administered by a faculty committee formed by the student’s faculty advisor. After passing the qualifying examination, the student applies for candidacy by submitting a Program of Work that includes a proposed dissertation topic and a suggested dissertation committee. The dissertation committee recommends courses to be taken as part of the Program of Work, which should include at least 18 hours (for students with a master’s degree) or 36 hours (for students without a master’s degree) of graduate coursework in the area of specialization. This coursework must be taken on the letter-grade basis. The Program of Work must be approved by the chair of the Graduate Studies Committee. Application for candidacy must be submitted before the student completes fifty hours of credit toward the doctoral degree.

Dual Degree Program
The Department of Mechanical Engineering offers the following dual degree program in cooperation with the McCombs School of Business. More information is available from the graduate advisor in each program.

Graduate Certificate in Engineering Education

The Center for Engineering Education, in conjunction with the Department of Mechanical Engineering, administers a graduate certificate program in engineering education. The program is open to current graduate students at the University of Texas and requires completion of 16 hours of coursework. The graduate certificate will only be awarded at the time of degree conferral. Details on the certificate program are available on the Cockrell School of Engineering website.

Stackable Certificate Programs, Mechanical Engineering

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Mechanical Engineering: Controls

The Mechanical Engineering: Controls graduate stackable certificate is designed primarily for working engineers who deal with the control and optimization of processes and systems. The program requires completion of 9 semester credit hours of coursework and is available to degree-seeking and non-degree-seeking students. All courses required for program completion are offered in an asynchronous online format in accordance with University policies that govern non-formula-funded (Option III) programs.

Operations Research and Industrial Engineering

Master of Science in Engineering  
Doctor of Philosophy

For More Information

**Campus address:** Engineering Teaching Center II (ETC) 5.202, phone (512) 471-1336, fax (512) 471-8727; campus mail code: C2200

**Mailing address:** The University of Texas at Austin, Operations Research and Industrial Engineering Program, Department of Mechanical Engineering, 204 E Dean Keeton Street Stop C2200, Austin TX 78712

**E-mail:** orie@me.utexas.edu

URL: https://www.me.utexas.edu/academics/graduate-program/areas-of-study/operations-research-and-industrial-engineering

**Objectives**

Operations research is a mathematical science concerned with optimal decision making and the modeling of deterministic and probabilistic systems. Its focus and field of application are interdisciplinary, embracing a broad range of quantitative techniques. Industrial engineering is concerned with the design, improvement, and installation of integrated systems of personnel, material, and equipment. Together, operations research and industrial engineering provide a rational approach to engineering and managerial problem solving through the deliberate application of scientific methods.

In practice, operations research and industrial engineering address both the performance objectives and the resource constraints of an organization, working toward the establishment of policies that are most beneficial to the organization as a whole. The function of the operations research analyst or the industrial engineer is to guide decision making by identifying underlying cause-and-effect relationships, developing and proposing courses of action, establishing criteria by which to judge their effectiveness, and evaluating their probable effects. The program in operations research and industrial engineering is designed to allow students to develop the technical, analytic, and managerial skills necessary to perform these tasks successfully.

The principal goals of the program are to provide the student with the educational basis for continued learning and to impart the fundamental skills necessary to be a successful analyst. Students are expected to develop proficiency in one or more programming languages, expertise in mathematical modeling, and an understanding of the uses and limitations of commercial optimization and statistical software. The master’s degree program balances theory and applications. At the doctoral level, the program’s emphasis on research is intended to enable students to extend their field of knowledge and to develop the analytic techniques that will serve them in academic, industrial, or governmental careers.

**Areas of Study**

The program in operations research and industrial engineering is designed to educate engineers who will solve complex industrial-socioeconomic problems by applying fundamental principles from engineering, mathematics, economics, computer science, and systems theory. In support of this end, a wide variety of research and study areas are offered by a faculty whose expertise covers such fields as optimization, simulation, statistics, stochastic processes, decision analysis, and manufacturing systems. The program is rigorous but sufficiently flexible to accommodate the needs and interests of most students.

Once students choose a study area, they work closely with one or more faculty members pursuing research in that area. Because of the interdisciplinary nature of the program, many projects involve teamwork and collaboration with departments in the Cockrell School of Engineering and the McCombs School of Business. Each student’s program includes a balanced combination of coursework, seminars, computational analysis, and research. State-of-the-art computer facilities, specialized laboratories, and the latest versions of applications software are available to all graduate students.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Jonathan F Bard  
J Eric Bickel  
Raghu Bollapragada  
Stephen Boyles  
Constantine Caramanis  
Dragan Djurdjanovic  
Grani Adiwena Hansausanto

John J Hasenbein  
Erhan Kutanoglu  
Benjamin D Lebowicz  
Lauren A Meyers  
Evdokia Nikolova  
Purnamrita Sarkar  
Peter H Stone

Admission Requirements

The Admission Committee uses the following policies in considering applicants for admission. Each application is reviewed on its merits.

a. Applicants must provide a Graduate Record Examinations General Test (GRE) score no more than five years old. The applicant should have a grade point average in upper-division undergraduate coursework of at least 3.0 on a 4-point scale, or the equivalent. Students who feel that their GRE scores and grades do not reflect their ability to do high-quality graduate work should submit a statement explaining this belief.

b. Both the master’s and the doctoral degree program are designed for full-time study, but part-time students are accepted. From the time of entry until completion, students are expected to show evidence of commitment to the program and of progress toward the degree.

c. As a general rule, students should enter the program in the fall semester, because of the way basic graduate courses are scheduled.

d. Students who do not have undergraduate degrees in engineering, mathematics, or the sciences may be required to remove deficiencies before beginning graduate coursework.

Degree Requirements, Operations Research and Industrial Engineering

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Engineering

To enter the MSE program, a student should have an undergraduate degree in engineering or an equivalent quantitative field such as mathematics, economics, or one of the physical sciences. The graduate advisor may require those with degrees in other fields to take additional courses. In general, an adequate background includes coursework in probability, statistics, programming, linear algebra, calculus, engineering economics, and optimization. These courses may be taken after enrollment, but they usually will not be counted toward fulfillment of degree requirements.

The operations research component of the program emphasizes the application of mathematics to a variety of economic and operational problems. Students take advanced coursework in optimization, probability and statistics, and stochastic processes. Those interested primarily in industrial engineering may concentrate on forecasting, production planning and control, scheduling, or logistics. Each student must complete either 24 semester hours of coursework plus a six-hour thesis, 27 semester hours of coursework, plus a three-hour research report, or 30 semester hours of coursework. More coursework may be required, depending on the student’s background and goals. All options require at least two courses in a minor area, which usually comprises work in mathematics, business, computer science, or other branches of engineering. The graduate advisor, after consultation with a student’s research supervisor, is the final approver of each student’s degree plan. All DRI-designated courses must be taken for a letter grade if they are to count towards the degree.

Doctor of Philosophy

The chief components of this program are scholastic excellence and original research. Although there is no specific number of semester hours required for the doctoral program, the student must meet the requirements of the Graduate Studies Committee (GSC), which means completing at least 24 hours of graduate coursework beyond a master’s degree in a related field. The graduate advisor, in consultation with the members of the GSC, will determine the exact coursework requirements for those doctoral students with a Master’s degree from another program. Formal admission to candidacy is considered by the GSC after a thorough review of the student’s overall academic record and performance on the doctoral qualifying examination.

Petroleum and Geosystems Engineering

Master of Science in Engineering

For More Information

Campus address: Chemical and Petroleum Engineering Building (CPE) 2.502, phone (512) 471-3161, fax (512) 471-9605; campus mail code: C0300

Mailing address: The University of Texas at Austin, Graduate Program, Hildebrand Department of Petroleum and Geosystems Engineering, 200 East Dean Keeton Stop C0300, Austin TX 78712-1585.

E-mail: pgegradoffice@mail.utexas.edu

URL: http://www.pge.utexas.edu/

Objectives

This program is designed to educate engineers to develop technology and solve problems related to earth energy resources. Student research has traditionally focused on oil and gas, but sustainability topics are growing in importance in the curriculum and as research endeavors. Once students have chosen a degree option, they may choose to work closely with a faculty member conducting research in their area of interest. The program offers a doctoral degree based on a combination of coursework and research, and a master’s degree based on either a thesis or a report, or on coursework alone.

Hildebrand Department faculty are leaders in technology for the development of unconventional oil and gas, mentoring students to advance technology in drilling techniques, hydraulic fracturing, reservoir characterization and improved recovery, working to maximize the value of every well drilled for the abundant shale plays in the United States and around the world. Our researchers also work on ways to better utilize legacy oil and gas plays, devising new Enhanced Oil Recovery (EOR) methods to better extract the last drop of oil from discovered fields. We also recognize that, given the world currently depends on fossil fuels for 80% of its energy, and in the United States we depend on oil and gas for 70% of our energy, it is crucial that we innovate in ways to make those energy sources more sustainable. New programs in methane emissions monitoring and mitigation given students opportunities to be part of the solution for a lower carbon future. Research in carbon capture and storage (removing CO2 from the atmosphere and storing it in underground aquifers and depleted reservoirs) are innovations from petroleum engineering that will also address reducing CO2 impacts on...
climate. Program faculty are engaged in low carbon energy technologies such as geothermal energy, hydrogen, and rare earth metals supply, which are innovations that build on the foundation of petroleum engineering knowledge base and provide students with a broad and resilient experience that will lead to a rewarding career.

Facilities for Graduate Work
Excellent facilities for graduate research in petroleum and geosystems engineering are available in multiple engineering buildings where Hildebrand Department faculty, staff and students work. The Chemical and Petroleum Engineering Building is home to the department offices, classrooms, student office and study space, and state of the art research laboratories. Another segment of the program’s research staff occupy the Gary L. Thomas Energy Engineering Building, an interdisciplinary education and research building dedicated to solving the problems for our energy future. Finally, additional laboratory space at the J. J. Pickle Research Campus is used for large scale research apparatus. A machine shop is maintained to fabricate and support research equipment.

In addition to the facilities of Information Technology Services, students have access to a host of computers housed in the Hildebrand Department of Petroleum and Geosystems Engineering, including numerous PCs, workstations, and parallel computing clusters. World-class supercomputing facilities are also available at the Texas Advanced Computing Center. Excellent library facilities include the Mallet Chemistry Library, the Walter Geology Library, and the Kuehne Physics Mathematics Astronomy Library.

Graduate Studies Committee
The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Matthew Thomas Balhoff  Quoc Phuc Nguyen
Hugh C Daigle  Ryosuke Okuno
Mojdeh Delshad  Jon E Olson
David DiCarlo  Masa Prodanovic
David N Espinoza  Michael Pyrcz
John Timothy Foster  Arvind P Ravikumar
Kenneth E Gray  Kamy Sepehrnoori
Zoya Heidari  Mukul M Sharma
Larry W Lake  Wen Song
Silviu Livescu  Carlos Torres-Verdin
Yingda Lu  Eric van Oort
Kishore Mohanty  Mary F Wheeler

Admission Requirements
All prospective degree candidates must have a background satisfactory for study of advanced petroleum and geosystems engineering as determined by the Graduate Studies Committee. For students without this background, such as those without degrees in engineering or in the petroleum-related fields, the Graduate Studies Committee will recommend a program of coursework designed to prepare the student for graduate study. Complete requirements for admission are available online.

Degree Requirements, Petroleum and Geosystems Engineering
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Engineering
With the approval of the Graduate Studies Committee, the student elects one of the following degree options:

a. Thesis option. Thirty semester hours (including six hours in the thesis course) are required to complete the program. In addition to the thesis, 18 semester hours of coursework must be completed in the Hildebrand Department of Petroleum and Geosystems Engineering; six semester hours of supporting work must be completed outside the department.

b. Report option. Thirty-three semester hours (including three hours in the report course) are required to complete the program. In addition to the report, 24 semester hours of coursework must be completed in the Hildebrand Department of Petroleum and Geosystems Engineering; six semester hours of supporting coursework must be completed outside the department.

For students who plan to continue their studies and enter the doctoral degree program, the report may be a PhD proposal.

c. Option without thesis or report. Thirty-six semester hours are required to complete the program. Twenty-seven to 30 semester hours of coursework must be completed in the Hildebrand Department of Petroleum and Geosystems Engineering; six to nine semester hours of supporting coursework must be completed outside the department.

All options must include at least 18 semester hours of engineering courses. The program of coursework must be approved by the graduate advisor and the graduate dean. More detailed information is available online.

The Hildebrand Department of Petroleum and Geosystems Engineering also offers the MSE degree in an online format that is designed for working professionals. All courses required to complete the 36-hour program are offered in an asynchronous online format in accordance with University policies that govern non-formula-funded (Option III) programs. This program does not require completion of a Master’s Thesis or Report. The online program is administered by the Cockrell School of Engineering’s Texas Engineering Executive Education, which publishes additional information.

Doctor of Philosophy
To qualify as a doctoral candidate, the student must fulfill the following requirements:

a. Students must choose and enroll in three signature courses during the fall semester (see handbook for signature course list). Students must pass each of the three signature courses so the combined 3-class gpa is 3.3 or higher. Students must enroll in the courses before the 12th class day. No changes in registration can be made after the 12th class day.

b. Maintain a grade point average of at least 3.50 on all graduate coursework completed at The University of Texas at Austin.

c. Students must pass a PhD Qualifying Exam followed by a PhD Proposal Exam. The PhD Proposal Exam should be taken no later than 18 months after the PhD Qualifying Exam; and the PhD Proposal Exam should not be taken longer than 30 months after enrolling in the PhD program.

d. Students are admitted to PhD candidacy by the Graduate School of The University of Texas at Austin and ultimately are required to write and successfully defend their PhD dissertation before their dissertation committee. Detailed information about Advancing to Doctoral Candidacy is available on the Graduate School website.
Doctoral candidates should refer to our departmental web pages for various PhD background requirements.

In general, two to four years beyond the master’s degree are required to complete the Doctor of Philosophy degree program. More detailed information is available online.

Stackable Certificate Programs, Petroleum and Geosystems Engineering

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Petroleum Engineering: Data Analytics

The Petroleum Engineering: Data Analytics graduate stackable certificate is designed primarily for the working petroleum engineer who wants to master the ability to use analytics on the massive amounts of data being made available in the industry to better inform decision-making. The program requires completion of nine semester credit hours of coursework and is available to degree-seeking and non-degree-seeking students. All courses required for program completion are offered in an asynchronous online format in accordance with University policies that govern non-formula-funded (Option III) degree programs.

College of Fine Arts

The College of Fine Arts educates artists, scholars, designers, and art educators within a context that emphasizes artistic excellence, advanced technology, cultural diversity and best professional practices. The college places high priority on research and the creation of new work through its many programs and degrees offered by the Butler School of Music, the Department of Art and Art History, the Department of Theatre and Dance, and the School of Design and Creative Technologies.

Texas Performing Arts, the university's arts presenting organization, and Landmarks, the university's public art program, along with the Visual Arts Center a contemporary gallery space showcasing student, faculty and guest artists, are housed within the college and provide performances and exhibitions that deepen the understanding of the arts, expand audiences and develop a better quality of life in the University, community, state and nation.

Facilities for Graduate Work

In addition to specialized facilities of the Butler School of Music, the Department of Art and Art History, the Department of Theatre and Dance, the Department of Design and the Department of Art and
The Fine Arts Library (FAL), located in the Doty Fine Arts building (DFA), is a unit of The University of Texas Libraries that serves research and instruction in the College of Fine Arts. With the inclusion of materials from the former Audio Visual Library, the FAL collections include approximately 350,000 books and scores, 400 current serial subscriptions, 48,000 compact discs, 12,000 DVDs, 12,000 video cassettes and videodiscs, 6,200 reels of microfilm, 24,000 microfiche, and over 135,000 LPs. Opened in 2016, The Foundry adds a maker space to the FAL, offering 3D printing, gaming equipment, a textile lab, and a music studio.

The theatre and dance collections support the Department of Theatre and Dance, which concentrates on performance, especially play production, theatrical design, playwriting, theatre education, and dance. The Fine Arts Library holds texts of major plays written in English or translated into English, with contemporary plays collected most heavily. The Perry-Castañeda Library also holds texts of plays in English and other languages, with emphasis on plays as a literary form and on literary criticism. The extensive Art and Art History collections create a pivotal focus of research for graduate study.

The music collection supports instruction and research in the Sarah and Ernest Butler School of Music, which includes music performance, composition, ethnomusicology, music and human learning, music theory, and musicology. Most historical periods and geographical areas are covered in both classical and popular idioms. Music is represented in a wide variety of printed and recorded formats.

The special collections of the Fine Arts Library include the Historical Music Recordings Collection, the papers of the Paramount and State Theatres, and papers of Sam Shepard. The Historical Music Recordings Collection is an archive of audio recordings in all formats. Holding more than two hundred thousand items, it is one of the largest collections of audio recordings in the United States.

Texas Performing Arts presents a full season of music, theater, dance, and Broadway shows every year, with special student discounts for many productions. Located in the heart of the arts quadrant on campus, the TPA also serves as a learning laboratory for university students, providing them with opportunities to work alongside professionals in arts management and administration.

As the University’s public art program, Landmarks enriches the lives of students and visitors by presenting art that is broadly accessible and free to all. More than thirty-five works of modern and contemporary art are on view throughout the 433-acre campus. The collection not only enhances the beauty of the landscape, but also supports scholarship and learning by demonstrating significant art historical trends from the past six decades.

Areas of Study

The College of Fine Arts offers graduate study through the following schools and departments: The Department of Design, which is housed within the School of Design and Creative Technologies, offers graduate study in design. The Department of Art and Art History offers graduate study in art history, studio art, and art education. The Butler School of Music offers graduate study with concentrations in performance (including conducting and opera), music and human learning, musicology (including ethnomusicology), composition, conducting, and theory (a jazz emphasis is available in approved areas). The Department of Theatre and Dance offers graduate study with concentrations in directing, dance, drama and theatre for youth and communities, performance as public practice, playwriting, stage technology and integrated media, and live design. See Art Education (p. 95), Art History (p. 96), Design (p. 97), Music (p. 98), Studio Art (p. 100), and Theatre and Dance (p. 100) for more information. Further information is available from the graduate advisor of each program.

Facilities for Graduate Work

Students have access to a range of high-quality facilities for study on the University campus, as well as in the greater Austin community. There are many dynamic museums and active community-based art sites and programs that students can use for research and internships. Of particular note are the University’s Blanton Museum of Art and Harry Ransom Center. Public school districts in Austin and the surrounding area also provide research and internship opportunities for students. Students have access to the University’s comprehensive library system, including the Perry-Castañeda Library with more than 2.5 million volumes, and the Fine Arts Library, which contains a substantial visual and sound collection. Both the Department of Art and Art History and the College of Fine Arts offer access to state-of-the-art computer facilities.

Areas of Study

Art education occurs within a variety of locations, which may include public and private schools, museums, community centers, after-school programs, prisons, rehabilitation facilities, and assisted living centers. These settings provide on-site learning and research opportunities for students in the Master of Arts program. Students choose coursework and a guided internship in one of three emphases in art education: school focus (certification or non-certification option), museum education focus, and community-based arts focus. The school focus emphasis is designed for students who want to enhance their knowledge of art education at the elementary and secondary school level; the museum education focus emphasis is designed for students interested in learning about and working in the field of art museum education; and the community-based arts focus emphasis is designed for students who want to investigate and conduct professional activities in art education in community-based sites or organizations.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Christopher O Adejumo
Donalyn Heise
Christina Bain
Dawn Stienecker
Admission Requirements

A bachelor's degree in art education, studio art, or art history is recommended for admission to any of the three emphases within the art education master's program. However, special consideration may be given to the applicant with a related bachelor's degree and prior experience in art teaching, museum education, or art education work in a community-based setting.

Degree Requirements, Art Education

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

All emphases require 36 semester hours of coursework consisting of 30 hours in art education (including 12 hours in core art education courses, six hours in the student's chosen emphasis, three hours of internship or on-site experience, three hours in art education electives, and six hours in Art Education 698 or six hours in Art Education 382L). Upon completion of 18 semester hours of approved coursework, students must present a thesis/project proposal to their graduate committee and receive approval before beginning work on their thesis or project.

Art History

Master of Arts

Mailing address: The University of Texas at Austin, Graduate Program in Art History, Department of Art and Art History, 1 University Station D1300, Austin TX 78712

Contact: Clare Thoman, Graduate Program Coordinator

URL: https://art.utexas.edu/admissions/graduate/art-history

Facilities for Graduate Work

Facilities for study and research include an open-shelf fine arts library containing more than 125,000 volumes and periodicals; extensive digital-image databases; and the Blanton Museum of Art, which has an active exhibition program and can provide training in the various aspects of museum work.

The Fine Arts Library is supplemented by the Perry-Castañeda Library, with holdings of more than 2.5 million volumes; the rare books and manuscripts of the Harry Ransom Center; and the specialized libraries of the School of Architecture, the Department of Classics, and the Teresa Lozano Long Institute of Latin American Studies.

Visual resources on campus include the Mari and James A. Michener Collection of American Painting; the Duncan Collection of Latin American Art; the Suida-Manning Collection of Renaissance and Baroque Art; an encyclopedic print collection; the Battle Collection of casts after ancient sculpture; and additional drawings, paintings, prints, sculptures, silver, and furniture. Visual resources in the Harry Ransom Humanities Research Center include rare books, manuscripts, photographs, film, and art.

Areas of Study

Graduate study in art history is offered in traditional areas of Western art and in African and African American, Asian, Islamic, Latin American, Chicano/a, US Latino/a, and pre-Columbian art. The student may pursue the degree of Master of Arts or that of Doctor of Philosophy.

For Masters students, the general track allows students to cover diverse historical areas of art history; students who desire to pursue a more specialized approach may choose tracks from one of three areas: ancient (western and non-western), medieval to early modern, and modern.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Edward Chambers
Michael J Charlesworth
C Ondine Chavoya
John R Clarke
Penelope J Davies
George F Flaherty
Julia E Guernsey
Linda D Henderson
Joan A Holladay
Ann C Johns
Janice Leoshko
Stephennie Mulder

Admission Requirements

Master of Arts

Students seeking admission to the Master of Arts degree program are expected to have an undergraduate degree in art history or to have completed substantial coursework in art history. Students must also demonstrate the capacity for advanced academic work.

Doctor of Philosophy

For admission to the Doctor of Philosophy degree program, the student must have a master's degree in art history, or have completed substantial coursework in art history on both the undergraduate and graduate levels. Students with special backgrounds in other disciplines are judged on an individual basis.

Degree Requirements, Art History

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The program requires 30 semester hours of coursework, including six hours in the thesis course and six hours in supporting work (supporting work consists of upper-division or graduate courses in such related areas as history, literature, anthropology, archaeology, classical civilization, philosophy, architecture, music, museum education, and area studies). In addition to Art History 395, Art Historical Methods, students must complete four seminars selected according to their chosen degree track (general, ancient, medieval to early modern, or modern). Students take an additional three semester hours of art history preferably as a seminar.
but, in certain cases, as a reading tutorial (Art History 396, Advanced Reading Tutorial) or a lecture tutorial (Art History 396K, Advanced Lecture Tutorial). Students must show evidence of the ability to read one foreign language by the end of three fall/spring terms in the program.

**Doctor of Philosophy**

Degree requirements are: (1) completion of five seminar courses, including coursework in at least two of the following chronological areas of Western and non-Western art: ancient, medieval to early modern, and modern; (2) reading competence in two foreign languages; (3) successful participation in the dissertation colloquium; (4) a written and oral qualifying examination that admits the student to candidacy; (5) the dissertation; and (6) the oral defense of the dissertation.

**Design**

*Master of Fine Arts*

*Master of Arts*

**For More Information**

**Campus address:** Art Building (ART) 3.330, phone (512) 471-3377; campus mail code: D1300

**Mailing address:** The University of Texas at Austin, Graduate Program in Design, School of Design and Creative Technologies, 2301 San Jacinto Boulevard Stop D1300, Austin TX 78712-1412

**E-mail:** Graduate Coordinator: design@utexas.edu (Design@utexas.edu)

**MFA in Design URL:** [https://designcreativetech.utexas.edu/mfa-design](https://designcreativetech.utexas.edu/mfa-design)

**MA in Design URL:** [https://designcreativetech.utexas.edu/ma-design](https://designcreativetech.utexas.edu/ma-design)

**Facilities for Graduate Work**

After completing required safety training, graduate students in design may use the woodshop, computer lab/digital printing lab, risograph lab, in-house fabrication lab (equipped with ABS-plastic and thermal 3D Printers, large-scale CNC router, laser cutters, and vinyl cutters), and letterpress printing lab (featuring platen presses, proofing presses, bookbinding equipment, and an extensive collection of metal and wood type), housed in the ART Building and Anna Hiss Gymnasium (AHG).

Graduate students in design also have ready access to the book and periodical collections of the Fine Arts Library (FAL), where they may also check out photographic, video, audio, computer, and robotic equipment. The FAL is also home to the Foundry, a staffed maker space equipped with 3D printers, laser cutters, VR headsets, sewing machines, mills, soldering guns, large-format printer, vinyl cutter, video wall, recording studio, and workstations with game development software.

**Areas of Study**

Through advanced studio courses in design, elective courses in related fields, and design history/theory/criticism courses, the curricula of the graduate programs in design encourage students to take full advantage of the programs’ location within a top-tier research university. Rather than offering traditional medium-based specializations in communication design, interaction design, or industrial design, the programs instead encourage students to integrate knowledge and modes of inquiry from other disciplines into their design practice, and to develop mastery in a range of image-making, typographic, modeling, prototyping, and/or coding skills most appropriate to their own area of investigation.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Tasheka Arceneaux Sutton
- Katherine Canales
- Alexandra Kate Catterall
- Michael Ray Charles
- Gray B Garmon
- Tamie Michele Glass
- Carma Ryanne Gorman
- Kelcey C Gray
- Sam Lavigne
- Jiabao Li
- Monica Penick
- Jose Manuel Perez
- Byron Wilson

**Admission Requirements**

**Master of Fine Arts**

In addition to meeting all general admission requirements laid out by the Graduate School, applicants to the Master of Fine Arts (MFA) degree program must submit a portfolio, a personal statement, and two letters of recommendation from individuals familiar with the applicant’s academic and design work. The GRE is not a requirement for admission to the MFA program; but students who have taken the GRE, GMAT, LSAT, MCAT or other graduate-level standardized tests are encouraged to submit their score reports with their application.

Applicants for admission to the Master of Fine Arts (MFA) degree program are expected to be self-motivated, experienced practitioners of design with a strong portfolio of recent work, a clearly stated rationale for undertaking graduate study in design, and a well-defined area of investigation around which they propose to focus their coursework, research, and creation in the program.

**Master of Arts**

In addition to meeting all general admission requirements laid out by the Graduate School, applicants to the Master of Arts (MA) degree program must submit a personal statement, current résumé/CV, and three letters of recommendation from individuals familiar with the applicant’s academic and professional potential. The GRE is not a requirement for admission to the MA program, but students who have taken the GRE, GMAT, LSAT, MCAT or other graduate-level standardized tests are encouraged to submit their score reports with their application.

Students must enter the Master of Arts in Design Option III program in the summer semester. Applicants admitted to the Master of Arts in Design Option III program will be required to submit a nonrefundable enrollment deposit to secure enrollment in the program.

**Degree Requirements, Design**

**Master of Fine Arts**

Candidates for the MFA degree must complete at least 60 semester hours of coursework, chosen with the advice and approval of the graduate advisor. Students must complete at least 33 hours of studio coursework, at least 30 of which must be graduate studio courses in design; at least nine hours of academic studies concerned with design; and at least six hours in areas of study other than design. Remaining hours may be selected from graduate courses in any area of study at the University. Up to nine hours of upper-division undergraduate coursework in any subject may, with the approval of the graduate advisor, be counted toward the degree.

**Master of Arts**

Candidates for the MA degree must complete at least 40 credit hours of coursework. Twenty-six credit hours will be in design and 14 credit hours...
will be prescribed electives specific to the student's track (area of focus). The MA degree does not require a Master's thesis or report.

**Dual Degree Programs**

The School of Design and Creative Technologies offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor.

**Mailing address:** The University of Texas at Austin, Graduate Program, Butler School of Music, 2406 Robert Dedman Drive Stop E3100, Austin TX 78712

**E-mail:** mga@mail.music.utexas.edu

**URL:** http://www.music.utexas.edu/

**Facilities for Graduate Work**

The Fine Arts Library has excellent facilities for research in its collection of books, scores, periodicals, microforms, and sound recordings. In addition, the Harry Ransom Center houses many special collections of importance, including the Kraus Libretti Collection, the Bachmann Collection, the Carlton Lake Collection, and the Theodore Finney Collection. The Butler School of Music also maintains a collection of authentic early instruments, non-Western instruments, and folk instruments that are available for performance.

**Areas of Study**

**Performance.** Degrees in this area of concentration are awarded for performance on brass, woodwind, percussion, keyboard, and stringed instruments, and in voice, opera, collaborative piano, and chamber music. In addition to demonstrating the technical achievements of the artist-performer, the student is expected to exhibit a thorough knowledge of the theoretical, pedagogical, and historical aspects of the major, as well as a knowledge of the literature of the performance area.

**Music and Human Learning.** Students in this major study the fundamental principles of human learning and behavior as applied in all aspects of music activity, including performance, perception, composition, analysis, pedagogy, and the role of music in elementary and secondary schools and in higher education. Individual courses of study are uniquely designed to broaden and refine the knowledge and skills of experienced educators, preparing them for advanced careers as teachers and scholars in the various dimensions of research and professional education.

**Musicology/Ethnomusicology.** Students pursuing degrees in this area of concentration have the opportunity to acquire the appropriate tools and methods of research in both historical musicology and ethnomusicology, and to study the history of music from the remote past to the present as well as the nature and function of music in the cultures of the world. The student also has the opportunity to do research in any historical aspect of music and to undertake field research in any cultural area. This major provides preparation for positions in college teaching, in research, in music criticism, and, with additional training, in library work. A broad background in the humanities and social sciences is essential for this area of study. Languages, history, philosophy (aesthetics), psychology, anthropology, cultural studies, and sociology are supporting, related fields.

**Composition.** Students pursuing degrees in this area of concentration have the opportunity to acquire the tools to create music and convey their musical ideas through a variety of performance media. Students are expected to exhibit a thorough knowledge of the theoretical and historical basis of music and to develop strong pedagogical skills. A comprehensive general curriculum and optional concentrations in various areas of specialization help to prepare students for advanced careers as composers and teachers.

**Conducting.** Students in this major study the artistic, technical, physical, and leadership principles and skills required of successful conductors at the professional and postsecondary levels. Intensive coursework in conducting, score study, analysis, musicology, and theory is combined with opportunities to conduct University ensembles. Individual courses of study are tailored to prepare students for advanced careers as artists and teachers.

**Theory.** Students pursuing degrees in this area of concentration study the principles of music, develop skills in music analysis and scholarly research, and prepare themselves to become college teachers in music theory. Competence in keyboard performance, proficiency in aural skills, a thorough knowledge of the pedagogy of music theory, and a broad background in the humanities are essential for this area of study.

Admission Requirements

All applicants are required to furnish a statement of intent in graduate study and three letters of reference pertaining to their potential for graduate work in music, music and human learning, or conducting. Graduate Record Examinations scores are not required for students pursuing degrees in conducting or in music with concentrations in composition or performance. Applicants seeking admission to degree programs with a concentration in performance typically must perform a live audition. Exceptions and detailed instructions can be found on the Butler School of Music graduate admissions website. Those seeking admission to the degree program in conducting and certain areas of concentration within music must submit prescreening videos before arranging for a live audition on campus; those planning to major in music with a concentration in composition must send scores and recordings of their music; and those planning to major in music with a concentration in musicology, ethnomusicology, or music theory must submit samples of their written work. Those applying for admission to doctoral degree programs in music and human learning must submit samples of written work and video recordings of their teaching.

Diagnostic examinations in music theory and in music history and literature are required of all students before registration for the first semester of graduate work. Passing these examinations or remediation of the deficiencies by completing assigned courses is necessary for completion of every degree, and, in the case of doctoral students, is a prerequisite to doctoral comprehensive examinations.

Entering graduate students in music pursuing a concentration in voice are expected to have taken the equivalent of one semester each of Italian, French, and German, and two semesters of diction. All entering graduate students pursuing a degree with a concentration in voice are given a diagnostic examination consisting of reading in these three languages. The examination stresses proficiency in pronunciation and is used to help the student plan a program of study.

Degree Requirements, Music

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Music

The Master of Music degree with a major in music includes the following areas of concentration: performance (including collaborative piano, opera coaching/directing, and chamber music), composition, theory, literature and pedagogy, musicology, and ethnomusicology. The Master of Music degree is also offered with a major in conducting and a major in music and human learning. Entering students should have a bachelor’s degree (or the equivalent) from an accredited institution.

Most programs of study leading to the Master of Music require between 30 to 36 semester hours of coursework depending on the degree major and area of concentration. The program of work for music degrees with a concentration in musicology, ethnomusicology, music theory, and literature/pedagogy includes a three-hour Master’s Report (Music 398M) in lieu of the six-hour Master’s Thesis (Music 698B). A comprehensive examination is required of all master’s degree candidates, usually in the final semester of study.

Further information about master’s degrees is given in Degree Requirements (p. 23). Details of departmental requirements in the various areas of concentration are available from the graduate admissions coordinator.

Doctor of Philosophy

The Doctor of Philosophy (PhD) degree in music is offered with concentrations in musicology, ethnomusicology, and music theory. The PhD degree is also offered with a major in music and human learning. Candidates for PhD degrees are required to pass a comprehensive examination and to write a dissertation based on original research. Information about requirements in the various areas of concentration is available from the graduate admissions coordinator.

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree allows for three majors: music, conducting, and music and human learning. The DMA degree in music offers concentrations in composition (including a jazz emphasis) and in performance (including opera, collaborative piano, jazz, and voice pedagogy emphases). The DMA degree in music and human learning includes jazz pedagogy and piano pedagogy emphases. Candidates for the DMA degree must pass a comprehensive examination. They must demonstrate outstanding professional competence, artistic maturity, and exceptional knowledge of the historical and practical aspects of their major field. Each candidate must prepare a scholarly treatise in a field appropriate to the major or complete the alternative requirements of the non-treatise degree option. For music majors pursuing a concentration in composition, an original musical work replaces the treatise. A jazz emphasis is also available in the performance and the composition majors.

Further information about requirements in various areas of concentration is available from the graduate admissions coordinator.

Artist Diploma in Music Performance

The Artist Diploma is a highly specialized and performance-oriented non-degree graduate certificate program for exceptional musicians who have great potential for a professional career in music performance
at the international level. To be considered for admission, applicants must meet the admission requirements for performance majors. The program requires completion of at least 27 semester hours of graduate coursework, including but not limited to courses in performance, performance practice, and advanced music literature, as well as an artist recital course taken for each of three required recitals. Additional information is available from the graduate admissions coordinator.

## Studio Art

**Master of Fine Arts**

### For More Information

**Campus address:** Art Building (ART) 3.330, phone (512) 471-3377; campus mail code: D1300

**Mailing address:** The University of Texas at Austin, Graduate Program in Studio Art, Department of Art and Art History, 2301 San Jacinto Boulevard D1300, Austin TX 78712-1421

**Contact:** Clare Thoman, Graduate Program Coordinator

**URL:** [https://art.utexas.edu/graduate/studio-art](https://art.utexas.edu/graduate/studio-art)

### Facilities for Graduate Work

Studies for all areas are housed in the Art Building, and graduate students generally have access to these facilities 24 hours a day, seven days a week. Graduate students are assigned an individual studio workspace; all students have access to a fully furnished wood shop that is also open evenings and weekends. Students have access to the 3D Fab Lab featuring equipment for three-dimensional milling, scanning, and printing. The studio art computer lab features fully equipped Macintosh graphics workstations and auxiliary hardware and software. Students also have access to the holdings of the Fine Arts Library, housed in the E. William Doty Fine Arts Building. Additionally, students have access to the cultural materials available for study at the Harry Ransom Research Center for the Humanities, to the circulating materials available at the Materials Lab in the School of Architecture, and to the exhibitions and collections of artworks housed at the Blanton Museum of Art.

The area studios contain the following facilities: for painting, well-ventilated, well-lit, individual studios within a communal suite; for photography, individual studios and access to the wet black-and-white and digital darkrooms with their attendant equipment; for printmaking, individual studios and access to the well-equipped print studio including presses for lithography, intaglio and serigraphy; for sculpture, private studios and access to fabrication facilities for casting, welding, and moldmaking; and for transmedia, a group studio with access to the performance facility with green screen and the computer lab with image processors, video cameras, video mixers with chroma-key functions, 16-mm film and digital multimedia equipment, and audio equipment.

### Areas of Study

The interdisciplinary studio art graduate program is structured around five studio areas: painting and drawing; photography and media; print; sculpture and extended media; and transmedia (video/performance/digital media). Students are encouraged to practice across disciplines or conversely, to master a single area of studio practice. The curriculum is designed to privilege studio time while also delving into the academic riches available at The University of Texas at Austin. The course of study includes individual and group critiques, seminars taught by artists or art historians or other arts professionals, and discussions with visiting artists and critics. Students select a committee of three to four graduate faculty for whom, each semester, they present their work in service of a discussion and evaluation of their progress.

### Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Beverly Dominique Acha
- Nicole Awai
- Alexander Birchler
- Troy D Brauntuch
- Scherezade Garcia-Vazquez
- Teresa Hubbard
- Beili Liu
- Kristin Lucas
- Richard E McMaster
- Bogdan P Perzynski
- Margo L Sawyer
- Michael Smith
- John S Stoney
- Daniel D Sutherland
- Jeff Williams
- John A Yancey

### Admission Requirements

The applicant must be an early-career artist with a bachelor's degree in studio art. Applicants with bachelor's degrees in other fields will be considered if they have completed substantial coursework in studio art and history or if their portfolio proves demonstrated interest and accomplishment in studio art. Students apply to up to two of the five specializations and submit online a 20-image portfolio representing a coherent body of work made within the previous two years. Transmedia applicants must submit work online and may also provide additional materials on DVD or USB flash drive. Full application instructions are available on the program's website.

### Degree Requirements, Studio Art

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

The student must begin coursework in the fall semester. The program requires the completion of the following 60 semester hours over a period of two years in residence: 32 to 35 hours of studio coursework, three hours in art history and/or criticism, eight hours in studio seminars, four hours in professional practice seminar, three hours in a Master's portfolio report, four hours in a Master's exhibition seminar, and six hours in approved elective courses in support of the student's studio research. In addition, students must pass a review by faculty committee at the end of each semester. The 30-hour midpoint review is presented before all studio art Graduate Studies Committee faculty and studio art graduate students while the other semester-end reviews are private. The final review takes place at the thesis exhibition.

### Theatre and Dance

**Master of Arts (Theatre)**

**Master of Fine Arts (Dance)**

**Master of Fine Arts (Theatre)**

**Doctor of Philosophy (Theatre)**

### For More Information

**Campus address:** F. Loren Winship Drama Building (WIN) 1.142, phone (512) 471-5793, fax (512) 471-0824; campus mail code: D3900

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of Theatre and Dance, 300 East 23rd Street Stop D3900, Austin TX 78712
Facilities for Graduate Work

The rare and unique materials in the Performing Arts Collection of the Harry Ransom Center, along with the collections in the Fine Arts Library and other units of the University Libraries, constitute one of the most extensive research facilities in the country. The Department of Theatre and Dance also maintains a collection of historical clothing for research purposes. The theatrical production facilities of the Performing Arts Center, described in the Fine Arts (p. 94) section, are unsurpassed.

Areas of Study

Master of Arts. The Master of Arts with a major in theatre is offered in two areas: performance as public practice, and teacher training. The Master of Arts in performance as public practice is appropriate preparation for doctoral study; the Master of Arts in teacher training is an appropriate terminal degree for K-12 teaching.

Master of Fine Arts. The Master of Fine Arts is offered in both theatre and dance. The major in theatre includes five specializations: directing, drama and theatre for youth and communities, live design and production, performance as public practice, and playwriting. While cross-over study among all of the MFA specializations is encouraged, live design and production students declare a primary discipline among scene design, lighting design, costume design, costume technology, or integrated media. The major in dance has an emphasis in dance and social justice. The Master of Fine Arts provides advanced training for those specializing in theatre and dance and is an appropriate terminal degree in these areas.

Doctor of Philosophy. The doctoral degree in theatre is offered in performance as public practice. The program requires competence in research and allows the student to develop both a broad understanding of the field, including practical skills, and in-depth knowledge of a specialized area.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Admission Requirements

Master's degrees. The applicant must have a bachelor's degree and must have demonstrated interest and experience in theatre and/or dance. The Graduate Record Examinations General Test (GRE) is required for admission to the performance as public practice and drama and theatre for youth and communities specializations.

Doctoral degree. Students admitted to the doctoral program must hold a master's degree from an accredited institution. All applicants must submit GRE scores.

Degree Requirements, Theatre and Dance

Master of Arts

Of the 30 semester hours required for the degree, no more than nine hours may be in upper-division courses. At least 15 hours must be in the major; at least six must be outside the major. A written thesis is required, for which the student earns six hours of credit in Theatre and Dance 698. Other coursework is determined following an evaluation of the student’s background and preparation.

Master of Fine Arts

The master of Fine Arts degree is offered with a major in theatre and a major in dance. The MFA in Dance requires 60 semester hours. The MFA in Theatre includes multiple areas of specialization. The specializations in drama and theatre for youth and communities; live design and production; and performance as a public practice require 60 semester hours; the specialization in directing or playwriting require 54 semester hours. For all MFA degree options, no more than nine semester hours may be upper-division courses. A minor of at least six hours in a supporting subject or subjects outside the major field is required. A thesis is required, for which the student earns six hours of credit in Theatre and Dance 698. Other coursework is determined following an evaluation of the student’s background and preparation.

Master of Fine Arts degree requirements assume that the entering student has a Bachelor of Arts degree in theatre or dance, or a degree in a related field. Students with degrees in other disciplines may not have the necessary training or proficiency for some areas of the Master of Fine Arts program and may be required to take additional upper-division coursework in theatre and/or dance.

Doctor of Philosophy

The student’s program of study, including coursework and other requirements to be met, must be approved by a committee appointed by the chair of the Graduate Studies Committee. Each student must demonstrate reading competence in two foreign languages, or in-depth knowledge of one foreign language. The student must pass qualifying examinations, write an acceptable dissertation, and pass an oral examination related to the dissertation. Detailed information about the requirements is available from the graduate advisor.

Courses, Fine Arts

Please see the General Information Catalog for a list of courses. The following fields of study are housed at the college level: Fine Arts (F A).

For courses offered by each department within the College of Fine Arts, please see the corresponding department page in the following sections.

Courses, Department of Art and Art History

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Art and Art History: Art Education (AED), Art History (ARH) and Studio Art (ART).
Courses, Department of Theatre and Dance

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Theatre and Dance: Theatre and Dance (T D).

Courses, Sarah and Ernest Butler School of Music

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the School of Music: Bassoon (BSN), Clarinet (CLA), Conducting (CON), Double Bass (D B), Drum Set (DRS), Ensemble (ENS), Euphonium (EUP), Flute (FLU), French Horn (FH), Guitar (GUI), Harp (HAR), Harpsichord (HSC), Music (MUS), Oboe (OBO), Opera (OPR), Organ (ORG), Percussion (PER), Performance (PRF), Piano (PIA), Recorder (REC), Saxophone (SAX), Trombone (TRO), Trumpet (TRU), Tuba (TBA), Vibraphone (VIB), Viola (VIA), Violin (VIO), Violoncello (V C), and Voice (VOI).

Courses, School of Design and Creative Technologies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the School of Design and Creative Technologies: Design (DES) and Integrated Design (ITD).

John A. and Katherine G. Jackson School of Geosciences

Energy and Earth Resources

Master of Arts
Master of Science in Energy and Earth Resources

For More Information

Campus address: E. P. Schoch Building (EPS) 1.144, phone (512) 471-9875, fax (512) 471-5585; campus mail code: C9000

Mailing address: The University of Texas at Austin, Energy and Earth Resources, 2275 Speedway Stop C9000, Austin TX 78712

E-mail: lstephens@jsg.utexas.edu

URL: http://www.jsg.utexas.edu/eer/

Facilities for Graduate Work

The program in energy and earth resources is interdisciplinary. The facilities of the Departments of Geological Sciences, Petroleum and Geosystems Engineering, Economics, Government, and Geography and the Environment, the Lyndon B. Johnson School of Public Affairs, and the McCombs School of Business are available. Materials located in the Walter Geology Library, the McKinney Engineering Library, and the Perry-Castañeda Library include an array of specialized publications, such as the contract research of the United States Department of Energy and its predecessors, a selective collection of United States and Texas government documents, conference proceedings, and society and association publications. In addition, a wide range of electronic information resources in science, business, and the social sciences is accessible through the University Libraries website.

Areas of Study

Graduate study in energy and earth resources includes study in geological sciences, petroleum and geosystems engineering, economics, resource management, government, law, and policy studies. The student's program should represent as broad a spectrum as possible of energy and earth resources courses.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Jay L Banner  Benjamin D Leibowicz
Fred C Beach  David Mohrig
J Eric Bickel  Dev Niyogi
John C Butler  Sheila M Olmstead
Richard J Chuchla  Jon E Olson
James S Dyer  Suzanne A Pierce
John S Dzienkowski  Varun Rai
David J Eaton  Ehd I Ronn
Caroline E Farrior  Bridget R Scanlon
Kasey M Faust  Kamy Sepehmoori
William L Fisher  John W Snedden
Genaro J Gutierrez  David B Spence
Seyyed Abolfazl Hosseini  Melinda E Taylor
Susan D Hovorka  Scott W Tinker
Charles Kerans  Carlos Torres-Verdin
Carey W King  Andrew Waxman
J Richard Kyle  Michael Webber
Larry W Lake  Kenneth W Wisian
Stephen E Laubach  Michael Howard Young

Admission Requirements

The entering student who wishes to pursue an advanced degree in energy and earth resources should have a bachelor's degree in one of the participating disciplines. Each advanced degree program is designed to provide a broad acquaintance with energy and earth resources problems, both from a technological and from a business, economic, law, or policy perspective.

Degree Requirements, Energy and Earth Resources

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts degree in Energy and Earth Resources (EER) is intended for those who seek to build critical knowledge and skills with qualitative underpinnings and who desire to take graduate coursework and conduct a thesis project along the lines of the types carried out in the areas of business, humanities, law, liberal arts, policy, and some technical fields. Our belief is that every EER student, regardless of concentration, needs to be able to understand Earth and its controls on resource distribution; gather and analyze large data sets and derive useful information; make energy and earth resource decisions in the context of commercial viability; and make energy and earth resource decisions in the context of risk and uncertainty.

Candidates for the Master of Arts degree must complete 30 semester hours of graduate-level coursework, three of which may be at the upper-
division undergraduate level with approval by the graduate advisor. All students must complete the following required courses: Geographical Sciences 386R, Geology of Earth Resources/Energy and Earth Resources 396 (Topic 5: Geology of Earth Resources), Energy and Earth Resources 396, Seminar in Energy and Earth Resources, or Energy and Earth Resources 396 (Topic 4: Resource Economics and Econometrics), Energy and Earth Resources 396 (Topic 2: Business, Finance, and Management), and Operations Research and Industrial Engineering 390D (Topic 2: Decision Analysis). The thesis (Energy and Earth Resources 698) counts for six of the 30 semester hours required for the degree. The program is offered with three concentrations: Resource Economics/Finance, Policy/Law, and Technology (Resource Science and Engineering). Students must complete at least one course in each concentration and at minimum two courses in a single concentration. The thesis is designed to supplement the coursework in the concentration.

Master of Science in Energy and Earth Resources

The Master of Science in Energy and Earth Resources degree is intended for those who seek a quantitative underpinning for their graduate work and who desire to conduct a thesis project that is research-based, along the lines of those prepared in engineering and the sciences. Our belief is that every EER student, regardless of concentration, needs to be able to understand Earth and its controls on resource distribution; gather and analyze large data sets and derive useful information; make energy and earth resource decisions in the context of commercial viability; and make energy and earth resource decisions in the context of risk and uncertainty.

Candidates for the Master of Science degree must complete 30 semester hours of graduate-level coursework, three of which may be at the upper-division undergraduate level with approval by the graduate advisor. All students must complete the following required courses: Geographical Sciences 386R, Geology of Earth Resources/Energy and Earth Resources 396 (Topic 5: Geology of Earth Resources), Energy and Earth Resources 396, Seminar in Energy and Earth Resources, or Energy and Earth Resources 396 (Topic 4: Resource Economics and Econometrics), Energy and Earth Resources 396 (Topic 2: Business, Finance, and Management), and Operations Research and Industrial Engineering 390D (Topic 2: Decision Analysis). Energy and Earth Resources 698, Thesis counts for six of the 30 semester hours required for the degree. The program is offered with three concentrations: Resource Economics/Finance, Policy/Law, and Technology (Resource Science and Engineering). Students must complete at least one course in each concentration and at minimum two courses in a single concentration. The thesis is designed to supplement the coursework in the concentration.

Dual Degree Programs

The program in energy and earth resources offers the following dual degree programs in cooperation with the Lyndon B. Johnson School of Public Affairs and the McCombs School of Business. More information is available from the graduate advisor in each program.

<table>
<thead>
<tr>
<th>Major(s)</th>
<th>Degree(s)</th>

<td>Master of Public Affairs</td>
</tr>
</tbody>
</table>

The Department of Geological Sciences houses a dual high-resolution X-ray computed tomographic scanner used for nondestructive three-dimensional visualization and analysis of the internal structure of geologic samples; a Siemens D500 X-ray diffractometer with Datascan automation software and JADE pattern analysis; and a paleomagnetic laboratory with a shielded room, 2G cryogenic magnetometer, Bartington susceptibility meter, and ASC impulse magnetizer. Special microscopy facilities incorporate an Edge R400 real-time high-resolution three-dimensional light microscope; a USGS-type gas-flow fluid inclusion stage; and a Technosyn luminoscope. Among additional facilities are a 1-m × 1.5-m × 10-m flume for sediment transport studies and an
experimental petrology laboratory containing hydrothermal pressure apparatus and one-atmosphere gas-mixing furnaces.

Geophysical research employs portable multichannel seismographs with vertical and three-component geophones; a ground-penetrating radar system; a LaCoste-Romberg gravimeter; an airborne Optech LIDAR system for fine-scale topographic mapping; an Optech ILRIS tripod-mounted laser scanning system for very-high-resolution outcrop topography; five portable broadband Guralp seismographs for telesismic studies; two Vibroseis seismic sources, for both low- and high-frequency three-axis shaking; 10 dual-frequency geodetic-quality GPS receivers with choke-ring antennas; portable field magnetometers; and an aerogeophysical instrument package (radar, gravity, LIDAR, magnetometers) most often used in Antarctica. A field site south of San Antonio is available for calibration and testing of seismic instruments and techniques. Graduate students are frequent members of scientific crews on vessels of the University-National Oceanographic Laboratory System and of other nations, and students regularly conduct fieldwork in Antarctica using National Science Foundation Polar Programs facilities.

Facilities for data processing, data interpretation, and numerical simulation are extensive. There are multiple workstation clusters with Sun and SGI hardware, as well as Windows and Macintosh systems. Most major commercial software packages for seismic data processing and interpretation are available, along with software for GIS, potential field, synthetic aperture radar, and other applications.

The two research components of the Jackson School—the Bureau of Economic Geology and the Institute for Geophysics—are housed in adjoining buildings on the J. J. Pickle Research Campus. The two units contribute the expertise of more than 50 research scientists to the Jackson School. The bureau functions as the state geological survey for Texas and sells many different types of publications to the public. The institute includes the Hockley Seismic Station, located in Hockley, Texas, just north of Houston. The station, part of the IRIS Global Seismic Network, houses a broadband seismometer that collects information on global as well as Texas seismic events.

Reference materials include the 165,000-item Joseph C. and Elizabeth C. Walter Geology Library and Tobin International Map Collection, both located in the John A. and Katherine G. Jackson Geological Sciences Building. Research collections of about one million vertebrate paleontology specimens and about four million nonvertebrate specimens, including a type collection of about five thousand specimens, are housed at the J. J. Pickle Research Campus. The Bureau of Economic Geology maintains three major core storage facilities, containing nearly two million boxes of core and cuttings, mostly from North American sedimentary basins. The bureau also maintains a collection of nearly one million electric logs from Texas oil and gas wells.

Research support is provided by a well-equipped petrographic laboratory with a separate thin-section laboratory for student use, a machine shop, and an electronics shop. The department’s staff includes analytical chemists, computer support specialists, a petrographic section technician, a computer graphics specialist, a photographer, and a machinist.

Areas of Study

Areas of active research in the Department of Geological Sciences include studies in sedimentary depositional systems; hydrogeology; climate systems science; structural geology; marine geology and geophysics; regional tectonics; seismology; paleomagnetism; seismic reflection and refraction; isotope and aqueous geochemistry; sedimentary geochemistry; geomicrobiology; igneous, sedimentary, and metamorphic petrology; high-temperature geochemistry; ore deposits and industrial mineral resources; and vertebrate and invertebrate paleontology. Cooperative research projects are under way with the Center for Space Research, the Institute for Geophysics, and the Bureau of Economic Geology.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Nathan L Bangs  
Jay L Banner  
Jaime D Barnes  
Thorsten Becker  
Christopher J Bell  
Srinivas V Bettpadur  
Donald D Blankenship  
Daniel O Breecker  
Meinhard Bayani Cardenas

Kyle Thomas Spikes  
Daniel Stockli  
Chenguang Sun  
Scott W Tinker  
Nicola Tisato  
Harm J Van Avendonk  
Zong-Liang Yang  
Duncan A Young  
Michael Howard Young

Admission Requirements

The preliminary education of students who intend to become candidates for a graduate degree in geological sciences usually includes coursework in general geology, paleontology, mineralogy, petrology, structural geology, and field geology, as well as physics, chemistry, and calculus. Geophysicists and climatologists are expected to have a sound foundation in both mathematics and physics; paleontologists should include suitable preparation in the comparative morphology and genetics of living organisms. Students without the necessary foundation for advanced study and research may be required to take additional coursework.

Degree Requirements, Geological Sciences

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.
All graduate students must take Geological Sciences 398T, Supervised Teaching in Geological Sciences in their first semester.

**Master of Science in Geological Sciences**

The Master of Science in Geological Sciences requires 30 semester hours of coursework including a six-hour thesis; it is designed for those planning doctoral study or seeking employment in which research and problem-solving skills are essential. A program of work is designed for each student by their committee. Within that design, students must complete a minimum of 24 hours of coursework in Geological Sciences, including a six-hour Master’s Thesis (Geological Sciences 698A and Geological Sciences 698B), in addition to six hours of coursework taken outside the major area.

**Master of Arts**

The Master of Arts degree program requires 30 hours of coursework including a three-hour Master’s Report (Geological Sciences 398R); it is designed for students who wish to enhance their technical education. The program of work for the Master of Arts degree is designed in coordination with the student’s faculty supervisor and requires approval of the graduate advisor.

**Doctor of Philosophy**

A program of work for the Doctor of Philosophy degree is designed for each student by their committee. Within that design, students must complete 24 hours of formal coursework. A minimum of 15 hours must be taken in the major area for a letter grade. In addition, six hours must be taken outside the major area. All PhD students must earn at least 30 credit hours at The University of Texas at Austin for the degree.

**Stackable Certificate Programs, Geological Sciences**

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

**Geological Sciences: Machine Learning and Data Analytics (ML/DA)**

The stackable graduate certificate in Geological Sciences: Machine Learning and Data Analytics (ML/DA) provides an organized framework to train students to be world leaders at the forefront of earth and data science. This stackable certificate program is designed primarily for geoscience graduate students and working geoscientists from industry, academia, and government organizations who desire additional expertise in modern tools of data analytics and machine learning. Geoscientists with their domain expertise and required training in ML/DA are better placed to make use of these advanced techniques for geoscientific problem solving. The program will require completion of four graduate courses (12 semester credit hours) in Geological Sciences, including a three-hour capstone project course. The program is available to degree-seeking and non-degree-seeking students.

**Courses, Geosciences**

For courses offered by each department within the John A. and Katherine G. Jackson School of Geosciences, please see the corresponding department page in the following sections.

**Courses, Department of Geological Sciences**

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Geological Sciences: Geological Sciences (GEO).

**Courses, Energy and Earth Resources Graduate Program**

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Energy and Earth Resources Graduate Program: Energy and Earth Resources (EER).

**School of Information**

**Information Security and Privacy**

**Master of Science in Information Security and Privacy**

For More Information

**Campus address**: UT Administration Building (UTA) 5.202, phone (512) 588-3511; campus mail code: C4300

**Mailing address**: The University of Texas at Austin, Center for Identity, 2501 Speedway, C4300, Austin TX 78712
Facilities for Graduate Work

Facilities for students in the School of Information include an Information Technology Laboratory, two computer classrooms, conservation and preservation laboratories, a video-editing suite, multimedia teaching stations in all classrooms, access to a usability and accessibility laboratory, an information retrieval and crowdsourcing lab, and a digital archeology lab, a computer vision lab, and a virtual reality lab. Students have access to advanced computer equipment and software for instructional and research use. Students receive a full-service Internet account and have access to various computer operating systems, such as Macintosh, Windows, and Linux.

Areas of Study

The Master of Science in Information Security and Privacy (MSISP) at the School of Information and the Center for Identity educates professionals who engage in information security and privacy at all levels of responsibility. The School of Information and the Center for Identity manage the program and cooperate in its planning and execution. The degree program offers a holistic, interdisciplinary curriculum ensuring that professionals from multiple market sectors, roles, and levels of responsibility acquire the knowledge and skills necessary to be effective stewards of information. Graduates of the program will be leaders of technological, policy, legal, and societal initiatives to advance information security and privacy.

The 21-month executive program provides graduate education for professionals while they continue their careers, as well as others with an interest in information security and privacy. Classes meet on one Friday and Saturday each month for five semesters. Students complete a capstone Professional Experience and Project course integrating their experience and their coursework to complete a project of their choice under faculty supervision. Students may participate in classes on campus or via distance learning, using synchronous online technologies. All students are required to attend an orientation session before beginning their first semester.

The Master of Science in Information Security and Privacy (MSISP) uses the depth and breadth of expertise that exists both within the School of Information and academic units throughout The University of Texas at Austin in order to provide an interdisciplinary program that addresses all aspects of information security and privacy. Coursework includes courses in technology, law, public policy, communications, social and cultural perspectives on identity, and business. All courses required for program completion are offered in accordance with University policies governing non-formula-funded (Option III) programs.

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Suzanne Barber
Philip Doty
Kenneth Robert Fleischmann
Matthew S McGlone
Soo Young Rieh
Huseyin Tanriverdi

Admission Requirements

A student seeking to enter the Master of Science in Information Security and Privacy (MSISP) program must complete a bachelor's degree from an accredited institution in the United States or proof of equivalent education at a foreign institution. MSISP applicants must submit an application for admission to The University of Texas at Austin Graduate School including:

- UT Graduate and International Admissions Center (GIAC) Application for admission and Admission Fee. The electronic application is available here.
- One official transcript from each college or university attended.
- Satisfactory letters of reference from three persons attesting to the applicant's scholarly ability, character, and professional promise.
- Résumé/CV.
- Personal Statement addressing how the MS ISP program aligns with their intellectual, educational, and career pursuits. If the applicant wishes any special consideration of their past academic, personal, or career experiences, their statement of purpose is an appropriate place to make those requests.
- TOEFL or IELTS scores (international students only) International Students must submit official test results from either the TOEFL or IELTS exams, according to the guidelines provided by GIAC.
- GRE test scores are not required for admission to the MSISP program.
- The MSISP program requires accepted applicants to submit a nonrefundable enrollment deposit to secure enrollment in the program. This deposit is applied to Fall tuition.

Degree Requirements, Information Security and Privacy

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Information Security and Privacy

Students in the MSISP program must complete 30 hours of required coursework, including a three-hour Professional Experience and Project (PEP) course, under Information Security and Privacy 388L. The PEP Information Security and Privacy 388L will be undertaken during the student’s final semester in the program and overseen by a Master of Science in Information Security and Privacy faculty member.

Applicants for MSISP degree candidacy are required to have an overall grade point average (GPA) of at least 3.00 in their MSISP coursework. Information Security and Privacy courses to be listed on the program of work for the MSISP degree may not be taken on the credit/no credit basis, with the exception of Information Security and Privacy 388L.

Information Studies

Master of Science in Information Studies
Doctor of Philosophy

Areas of Study

Master of Science in Information Studies (MSIS)

The School of Information Master of Science in Information Studies (MSIS) program offers a pathway to diverse, high-demand information careers. As the field of information rapidly expands within the digital age, MSIS students engage in a flexible curriculum that provides the tools necessary to study, manage, and innovate the information systems around us. Our students learn to design new tools, analyze human activities, organize information, and ensure technology serves its intended users. Join the next generation of information creators, innovators, brokers, and designers.

- Informatics
- Human-Computer Interaction
- User Experience (UX) Research and Design
- Health Informatics
- Information Security, Privacy, and Policy
- Human-Centered AI and Data Science
- Data Engineering
- Information Organization and Access
- Information Retrieval and Search
- Curation and Preservation
- Archives and Records Management
- Librarianship
- Information Literacy

Doctor of Philosophy (PhD)

Information systems and technologies are fundamentally shaping the behaviors of individuals, organizations, and society. To understand the dynamics of our world, and to help shape a future that reflects social values, research at the School of Information crosses disciplinary divides, bridges the arts and the sciences, and applies human insights to technological advances.

The School of Information Ph.D. program curriculum and immersive mentorship prepare students to become high-quality, high-impact researchers, scholars, and teachers. Throughout the doctoral program, students will learn to reason and evaluate ideas and data across disciplines, see beyond current approaches to problems, and cross disciplinary boundaries in search of answers to the grand challenges facing today’s modern information society.

Facilities for Graduate Work

Facilities for students in the School of Information include an Information Technology Laboratory, two computer classrooms, conservation and preservation laboratories, audio and video editing suites, multimedia teaching stations in all classrooms, and access to a usability and accessibility laboratory, an information retrieval and crowdsourcing lab, a digital archeology lab, a computer vision lab, and a virtual reality lab. Students have access to advanced computer equipment and software for instructional and research use, including 3-D printing and fabrication, supplementing the school’s physical and wireless network and computer facilities. Students receive a full-service Internet account and have access to various computer operating systems, such as Macintosh, Windows, and Linux.

Accreditation

The University’s program for the degree of Master of Science in Information Studies is accredited by the American Library Association.
Degree Requirements, Information Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Information Studies

The Master of Science in Information Studies curriculum includes three elements:

a. Core Course - Required course that all School of Information students must take early in their program (three semester credit hours)
b. Electives - Elective courses (30 semester credit hours)
c. Capstone Experience - Capstone experience course (three semester credit hours)

Endorsement of Specialization

The School of Information offers MSIS students the option to pursue an Endorsement of Specialization (EoS). The Endorsement of Specialization recognizes that a student has created a program of concentrated study within the 36 credit hours required for the Master of Science in Information Studies. The MSIS curriculum offers any number of options for students to craft a concentration or specialization once they have completed their required courses. Suggested areas of study and curriculum requirements can be located at: https://www.ischool.utexas.edu/programs/endorsement

Capstone Experience (including E-portfolio)

In the final semester of their academic studies, all MSIS students must complete a "capping" experience, which enables them to integrate their professional education and the intellectual and institutional vocations toward which they are striving. This is to be a culminating experience that synthesizes a variety of skills, knowledge, and expertise while demonstrating that the student can lead an independent project. When considering a Capstone experience, students are strongly encouraged to review the Capstone student manual and consult with their individual academic advisor as well as the iSchool's Career Development Director.

Capstone Options

Students must complete one of the following options as an exit course only in their final semester:

Information Studies 388L, Professional Experience and Project: The PEP is intended to allow you to apply the knowledge you gleaned from your coursework to a real-world problem in a real-world setting. In a single semester, you will complete a fieldwork-based project under the primary guidance of a field supervisor from the organization sponsoring your project.

Information Studies 398R, Master’s Report: - The master’s report is a substantive, publishable-quality paper synthesizing a domain or area of investigation that demonstrates familiarity with major concepts and issues in a theoretical and rigorous manner. Working with the guidance of a faculty advisor and a second faculty reader, you will write a publishable-quality paper on a topic of your choice in a single semester.

Information Studies 698A/Information Studies 698B, Thesis: A master’s thesis is a research project resulting in a substantive paper that involves original collection or treatment of data and/or results. Working with the guidance of a faculty advisor and a second faculty reader, you will write a publishable-quality paper on a topic of your choice across two semesters. Since the master's thesis requires two consecutive semesters of coursework, students who would like pursue the thesis option must make that decision before the end of the second semester in the program (if attending full-time).

Integrated Program with Computer Science (BSCS/MSIS)

The integrated program requires completion of a total of 150 credit: 120 hours for the Option IV BSCS degree program and 30 hours of graduate coursework offered by the School of Information for the MSIS degree program. Students can complete the integrated program in five academic years of full-time study.

Integrated Program with Informatics (BSI or BA/MSIS)

The integrated program requires completion of a total of 150 credits: 120 hours for the BSI/BA degree program and 30 hours of graduate coursework offered by the School of Information for the MSIS degree program. Students can complete the integrated program in five academic years of full-time study.

Doctor of Philosophy

Students must complete at least 39 semester hours of coursework prior to entering candidacy, consisting of nine hours of core courses, nine hours of methods courses, and 21 hours of electives in the student’s major area within and/or beyond the School of Information.

Students must also pass a qualifying examination before being admitted to candidacy. Finally, students must complete and defend a dissertation representing an original contribution to knowledge in the discipline.

Detailed information is available at the School of Information’s website.

Dual Degree Programs

The School of Information offers the following dual degree programs in cooperation with other divisions of the University.

Stackable Certificate Programs, Information Studies

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Information Studies: School Librarian

The Information Studies: School Librarian stackable graduate certificate is designed for certified teachers with at least two years of full-time classroom teaching experience from a public or private accredited school who plan to seek certification as a School Librarian from the Texas Education Agency (TEA). The program requires completion of 15 semester credit hours of coursework, including a three-hour practicum course. The stackable graduate certificate is available to degree-seeking and non-degree-seeking graduate students in the School of Information. Students are accepted in a summer semester and normally spend four semesters completing program requirements.

**Mailing address**: The University of Texas at Austin, Graduate Program, African and African Diaspora Studies Department, Mailcode E3400, Austin, TX 78712

**Email**: afr@austin.utexas.edu

**URL**: http://liberalarts.utexas.edu/aads/

Facilities for Graduate Work

Graduate students in the African and African Diaspora Studies Department (AADS) have access to four specialized units dedicated to Black Studies scholarship. All four units are housed within the Gordon-White Building (GWB), a newly renovated space dedicated to scholarship, community building, and art.

African and African Diaspora Studies Department (AADS), as an academic unit, promotes scholar-activism through the study of the intellectual, political, artistic, and social experiences of people of African descent throughout Africa and the African diaspora. The more than 30 full-time departmental faculty members and jointly-affiliated faculty members represent the interdisciplinary nature of Black Studies.

The John L. Warfield Center for African and African American Studies (WCAAAS) supports the research and programmatic initiatives of faculty affiliates and students, and collaborates with local organizations in the investigation and enhancement of Black peoples’ lives. Through research, programming, and community engagement, the Center supports scholarship and creative work that fosters social justice for people of African descent.

The Institute for Urban Policy Research and Analysis (IUPRA) produces cutting-edge policy and legal research aimed at strengthening Black communities, promoting social justice, and combating anti-Black racism. The institute’s staff, academic fellows, and graduate students generate publications, reports, briefs, grants, and contracts with the aim of shaping policy that will lead to societal and institutional change beneficial to the lives of African Americans and other people of color in the state of Texas.

The Art Galleries at Black Studies (AGBS), formerly known as the Warfield Center Galleries, is the sole on-campus entity dedicated to showcasing narratives of the African and the African Diaspora. Comprised of two galleries—The Christian-Green Gallery and the Idea Lab—AGBS spaces serve as platforms for critical exchanges concerning the experiences, narratives, and histories of the Black Diaspora. AGBS is a living arts space that encourages, promotes, and sustains Black artistic expression.

Black Studies graduate students also have access to the University’s extensive and world-renowned research library system, including the Perry-Castañeda Library with over 2.5 million volumes, the Human Rights Documentation Initiative, the Benson Latin American Collection, and the Harry Ransom Center. Additionally, the Black Diaspora Archive (BDA), the only archive of its kind at a higher education institution in the U.S., collects documentary, audiovisual, digital, and artistic works related to the Black Diaspora. While the geographic collecting area for the Black Diaspora is global, this collection is focused on materials generated in and/or describing experiences from the Americas and the Caribbean. Through a partnership between Black Studies, The University of Texas Libraries, and the Lozano Long Institute of Latin American Studies (LLILAS), the archive continues to grow into a collection sought after
by researchers and students throughout the world. Another collection, The Black Queer Studies Collection, features, promotes, and increases the discoverability of The University of Texas at Austin libraries’ unique holdings in the area of Black Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies. This groundbreaking project in librarianship addresses standard obstacles posed by the Library of Congress Subject Headings and information retrieval systems used to locate materials by and about Black diasporic LGBTQ people. Students are also encouraged to utilize campus-wide arts facilities including the Fine Arts Library, the Texas Performing Arts Center, and the Blanton Museum of Art.

Areas of Study

The graduate program in AADS provides students with the skills and analytical frameworks necessary to engage interdisciplinary approaches for examining the lives of people of African descent throughout Africa and the African Diaspora, including the United States, the Caribbean, and Latin America.

AADS students interrogate understandings of Blackness and how it is expressed throughout the Diaspora, while engaging in subfields of critical race theory, Black queer theory, Black political theory and economics, Black arts and performance studies, Black diaspora history and anthropology, and Black feminisms. Students also critically engage Black Studies within the contexts of areas such as healthcare, education, psychology, and sociology. The program’s objective is to provide students with the broad foundational knowledge necessary to pursue an academic career or conduct scholarly research in Black Studies, African and African Diaspora Studies, Africana Studies and/or related fields.

Doctoral Portfolio Program in African and African Diaspora Studies

University of Texas at Austin doctoral students enrolled in other departments who are interested in African and African Diaspora Studies are invited to apply to the AADS Doctoral Portfolio Program. The program engages students in an advanced approach to interdisciplinary studies and provides tools for mapping of the intellectual, political, and creative breadth of African and African Diaspora Studies. Students in the program sustain a rigorous dialogue about African and African Diaspora Studies from an interdisciplinary methodological standpoint, become familiar with the diversity of faculty specialties within African and African Diaspora Studies, and are instructed in the application of the theoretical and conceptual tools of analysis and research on African-descended peoples.

Applicants to the portfolio program must submit a research statement along with their application. This statement will help the AADS Portfolio Administrator guide the student in the completion of 12 hours of graduate-level AADS coursework, including at least one AADS core course. All portfolio students are required to present their field-related research to an open audience prior to graduation.

The certification requirements for the doctoral portfolio program differ from the requirements for graduate degrees and should be undertaken only with the approval of the student’s supervising advisor and the student’s departmental graduate advisor. With the consent of a graduate student’s home department, courses used to satisfy portfolio requirements may be included in the program of work for the doctoral degree. Applicants must be in good standing in an approved doctoral program, maintain a grade point average of 3.3 or better, and receive approval to join the portfolio program from their faculty advisor, their department’s graduate advisor, and the African and African Diaspora Studies Portfolio Steering Committee. Although students can enter the African and African Diaspora Studies Portfolio Program at any point in their doctoral work, it is recommended that they complete the portfolio requirements before being admitted to candidacy.

Additional requirements and application information are available here.

Graduate Studies Committee

Degree Requirements, African and African Diaspora Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

Students must complete 36 semester hours of coursework, including a prescribed number of hours in core coursework, professional development, and supporting coursework. As part of the 36 hours, students must complete a two-part Master’s Report that consists of African and African Diaspora Studies 397R and 398R. African and African Diaspora Studies 398R must be taken in the final semester of program enrollment. Core coursework explores the theoretical and methodological foundations of black studies. Additional information about the Program of Work is available from the department.

Doctor of Philosophy

AADS offers a 51-hour PhD degree plan for students entering with a graduate degree in a related field. This plan includes 45 hours of coursework and a minimum of 6 hours of dissertation, as required by the Graduate School. Coursework for the PhD varies based on a student’s preparation in the field of Black Studies and/or their research interests. This most often affects students entering with a graduate degree; students who enter without a graduate degree must complete the African and African Diaspora Studies (AADS) MA degree requirements before taking the PhD qualifying examinations. Each student’s degree plan will be determined by the AADS Graduate Studies Committee (GSC), the AADS graduate advisor, and the student’s faculty advisor upon entry to the program. Students must complete a prescribed number of hours in core coursework, professional development, supporting coursework, and dissertation reading and writing, in addition to
The University Libraries provide some of the best research facilities in the United States. Convenient to the University are other research facilities, including the Lyndon Baines Johnson Library and Museum, the C. R. Smith Collection of Art of the American West. Winedale, an extensive collection of rare and scarce books, pamphlets, and broadsides related to Texas and Southwestern history, as well as major national collections related to journalists, political figures, and activists from the 1960s and 1970s. The holdings of the Blanton Museum of Art include the Mari and James A. Michener Collection of American Painting and the C. R. Smith Collection of Art of the American West. Winedale, an outdoor museum of restored 19th-century Texas buildings, is a center for research in historic preservation and material culture.

The University Libraries provide some of the best research facilities in the United States. Convenient to the University are other research facilities, including the Lyndon Baines Johnson Library and Museum, the Texas State Library and Archives, the United Daughters of the Confederacy Library, the Catholic Archives of Texas, the Archives of the Episcopal Church, and the Republic of Texas Museum.

### Areas of Study

The University has one of the oldest and most highly regarded programs in American studies, which focuses on the cultural, social, and intellectual life of the United States, as well as the place of the United States and US citizens in the world. Students in the department analyze the American past and present from the perspectives of several disciplines, learn to synthesize their knowledge, and acquire the habits of mind needed for cultural analysis.

The program offers courses in areas such as American intellectual, cultural, and artistic life; race, ethnicity, and gender; cultural geography and material culture; and the public arts and popular culture. Specific courses are offered on topics such as immigration, transnationalism, and diaspora; American political theory; property, race, and critical legal studies; religion and psychology; childhood studies; food and foodways; animals; technology and design; social movements and radical political cultures; feminism, fashion, and beauty; the experiences of Latin American and Caribbean descendants in the United States; space and place; and public memory. The program also invites students to take advantage of the resources of the John L. Warfield Center for African and African American Studies, the Center for Asian American Studies, the Center for Jewish Studies, the Center for Women's and Gender Studies, and the Américo Paredes Center for Cultural Studies. American studies courses are sometimes cross-listed with other courses throughout the University; in addition to the department's core faculty, students may work with faculty members from departments such as anthropology, art and art history, English, geography and the environment, government, history, radio-television-film, religious studies, and from the School of Architecture, School of Law, and College of Education.

The courses that American studies students take outside the program train them in areas of expertise relevant to their central interests. With the approval of the graduate advisor in American studies, these courses may be in any of the liberal arts or in architecture, business, communication, education, fine arts, law, the sciences, or public affairs.

Degree Requirements, American Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

Master of Arts

The student's program must total 36 semester hours of credit and must have the approval of the graduate advisor. Requirements are 15 semester hours in American studies, consisting of six hours in the research course (American Studies 390), three hours in the required methodology course (American Studies 393), and six hours in cultural history (American Studies 385 and 386); the remaining required hours are nine semester hours in a field, or fields, outside of American studies; an additional nine semester hours of electives, primarily American in content, in another field, or fields, within American studies. The program culminates in a master's report course (American Studies 398R) consisting of an article, after approval from the supervisor and second reader, submitted to a scholarly journal during the student's fourth semester. Typically, the article is based on a term paper or project from a course taken within the program.

Doctor of Philosophy

To obtain the doctoral degree, a student must demonstrate reading competence in a foreign language, pass the American studies oral qualifying examination, prepare and defend a dissertation prospectus, which is intended to be an exploratory document and should be no longer than 20 pages, and write and defend a dissertation that is an original contribution to knowledge about American culture and that involves interdisciplinary research.

Students entering the PhD program, who did not complete their MA within the program, are required to complete six semester hours in cultural history (American Studies 385 and 386); three semester hours in the required methodology course (American Studies 393); three semester hours in the research course (American Studies 390); and six semester hours in electives (non conference courses), which may be within American studies or from outside departments. Additional hours may be required by the graduate advisor. The required coursework should be completed within the student's first year in the program.

While preparing for the oral examination, doctoral students will take independent reading courses (American Studies 392) under the direction of faculty members and with consultation from the graduate advisor. Through such coursework, the student will master three fields of specialization—American studies, a field of interest, and a dissertation field. These are the three fields of specialization on which the student is questioned in the oral qualifying exam. While preparing for the qualifying examination, students will be advised by the graduate advisor if additional coursework is needed. For students completing the Masters of Art degree in American studies at The University of Texas at Austin, the qualifying examination should be taken during the spring semester of the student’s third year in the program. Following the qualifying examination, the student is expected to convene a dissertation prospectus meeting during the fall semester of the fourth year in the program. For students entering the doctoral program with a qualifying master’s degree from an outside program, the qualifying examination should be taken in the spring semester of the student’s second year in the program. Following the qualifying examination, the student is expected to convene a dissertation prospectus meeting during the fall of the third year in the program.

Anthropology

Master of Arts

Doctor of Philosophy

For More Information

Campus address: William C. Powers Jr. Student Activity Center (WCP) 4.102, phone (512) 471-4206, fax (512) 471-6535; campus mail code: C3200

Mailing address: The University of Texas at Austin, Graduate Program, Department of Anthropology, 2201 Speedway C3200, Austin TX 78712

URL: [http://liberalarts.utexas.edu/anthropology/](http://liberalarts.utexas.edu/anthropology/)

Facilities for Graduate Work

Facilities available to graduate students in anthropology include the Dolph Briscoe Center for American History, the John L. Warfield Center for African and African American Studies, the Benson Latin American Collection, the Américo Paredes Center for Cultural Studies, and the Texas Archaeological Research Laboratory. The J. J. Pickle Research Campus and the Department of Anthropology offer facilities for research in antiquities conservation; geophysical survey; physical anthropology; paleontology; archaeomagnetic research; and primate anatomy and behavior. The department also maintains research facilities in archaeology, social anthropology, and linguistic anthropology.

Areas of Study

Graduate study in anthropology is offered in the areas of biological anthropology; archaeology; linguistic anthropology; and sociocultural anthropology, with emphasis on North, Central, and South America, Micronesia, Central, South, and Southeast Asia, Madagascar, the Middle East, and Africa.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Areas of Study

Graduate study in anthropology is offered in the areas of biological anthropology; archaeology; linguistic anthropology; and sociocultural anthropology, with emphasis on North, Central, and South America, Micronesia, Central, South, and Southeast Asia, Madagascar, the Middle East, and Africa.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Native American and indigenous studies, and ethnomusicology. and African diaspora studies, Mexican American and Latino/a studies, philosophy, psychology, sociology, statistics, Middle Eastern studies, government, history, kinesiology, Latin American studies, linguistics, philosophy, psychology, sociology, statistics, Middle Eastern studies, American studies, women’s and gender studies, cultural studies, African and African diaspora studies, Mexican American and Latino/a studies, Native American and indigenous studies, and ethnomusicology.

Degree Requirements, Anthropology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The degree program is offered in two options: with a thesis or with a report. The thesis option requires 30 semester hours of coursework; the report option requires 33. Both options require students to complete the following: six semester hours of core coursework in anthropology; a minimum of 12 additional semester hours of coursework in anthropology; a minimum of six semester hours of coursework commonly taken as a minor outside the Department of Anthropology; and either a dedicated report or thesis course. Students in archaeology, linguistic anthropology, and biological anthropology must take at least one core course from their particular subfield. Students in sociocultural anthropology must complete the core course in social anthropology (Anthropology 392M, Introduction to Graduate Social Anthropology) as well as the core course in cultural forms (Anthropology 392P, Introduction to Cultural Forms). Recommended minor areas for supporting work include Asian studies, art history, biology, communication, comparative literature, computer science, economics, English, geography, geological sciences, government, history, kinesiology, Latin American studies, linguistics, philosophy, psychology, sociology, statistics, Middle Eastern studies, American studies, women’s and gender studies, cultural studies, African and African diaspora studies, Mexican American and Latino/a studies, Native American and indigenous studies, and ethnomusicology.

Doctor of Philosophy

A Master of Arts or an equivalent degree in anthropology or a closely related field is required for admission to the doctoral program. The student must complete a total of three of the following core courses:

- Anthropology 392K, Introduction to Graduate Archaeology
- Anthropology 392J, Introduction to Biological Anthropology: Behavior, Genetics, and Variation
- Anthropology 392L, Introduction to Biological Anthropology: Primate Morphology and Evolution
- Anthropology 392M, Introduction to Graduate Social Anthropology
- Anthropology 392N, Introduction to Graduate Linguistic Anthropology
- Anthropology 392P, Introduction to Cultural Forms
- Anthropology 392R, African Diaspora Anthropology
- Anthropology 392S, Introduction to Graduate Feminist Anthropology
- Anthropology 392T, Mesoamerica and Borderlands.

Students in archaeology, linguistic anthropology, and biological anthropology are required to complete the core course(s) in their subfield. Students in the sociocultural anthropology subfield are required to include both Anthropology 392M, Introduction to Graduate Social Anthropology and Anthropology 392P, Introduction to Cultural Forms among their core courses and may also, at their supervisor’s request, be required to complete the graduate portfolio in cultural studies. Additional information about the graduate portfolio in cultural studies is published by the Américo Paredes Center for Cultural Studies. Additionally all students must complete at least one core course from outside of their subfield.

Students with an extensive background in a subfield may petition the Graduate Studies Committee for exemption from the core courses in that area.

Finally, all PhD students, regardless of subfield, must also fulfill a foreign language requirement; information about this requirement is available from the graduate advisor. Before advancing to candidacy, a comprehensive examination is given in three areas of specialization. The topics are selected by the student in consultation with an examination committee. Students must also write and defend a detailed prospectus on their dissertation research. After completing the comprehensive examination(s), the student files an application for candidacy and researches, writes and defends the dissertation.

Asian Studies

Master of Arts (in Asian Studies)
Master of Arts (in Asian Cultures and Languages)
Doctor of Philosophy (in Asian Cultures and Languages)

For More Information

Campus address: Will C. Hogg Building (WCH) 4.134, phone (512) 471-5811, fax (512) 471-4469; campus mail code: G9300
Mailing address: The University of Texas at Austin, Graduate Program, Department of Asian Studies, 120 Inner Campus Drive G9300, Austin TX 78712
URL: http://liberalarts.utexas.edu/asianstudies/

Facilities for Graduate Work

Asian materials are distributed throughout the University of Texas Libraries, including the Perry-Castañeda Library, the Fine Arts Library, the Benson Latin American Collection, the Lyndon Baines Johnson Library...
The Ransom Center houses one of the finest rare book and manuscript collections in North America. Among its archives are items from the personal library of Sir William Jones, founder of the Asiatic Society; correspondence and manuscripts of novelist Paul Scott, Anita Desai, and Raja Rao; papers of Samuel Selvon and Nancy Wilson Ross; rare photographs attributed to Deen Dayal; and photo albums once owned by the Earl of Mayo. Sanskrit manuscripts from Dr. Patrick Olivelle were also added after he completed work on the Manavadharmasastra. Within the manuscript and book collections acquired from Great Britain are numerous titles on the British Empire. Among the materials in the Lyndon Baines Johnson Library and Museum are oral histories and policy papers related to Kashmiri politics, the Food for Peace Program, international relations with the subcontinent, and an extensive collection on the Vietnam War. The Benson Latin American Collection contains over 4,000 volumes that cover immigration from Asia to the Caribbean and South America, and the associated cultural phenomena of the diasporic communities.

Areas of Study

The Master of Arts with a major in Asian studies is an interdisciplinary degree with a regional concentration on East Asia (China, Japan, Korea), South Asia, or both. The degree is intended primarily for those preparing for careers in fields such as business, communication, government, information studies, law, the military, and teaching, or to prepare for further advanced study in another discipline or area studies program.

The Master of Arts and Doctor of Philosophy degrees with a major in Asian cultures and languages are intended for students whose career objective is college or university teaching. For these degrees, students concentrate in Chinese, Hindi, Japanese, Korean, Malayalam, Sanskrit, Tamil, Telugu, or Urdu.

There is considerable flexibility in meeting degree requirements. Each student, in consultation with the graduate advisor and faculty mentor, designs an individual program within the framework of the requirements given in Degree Requirements (p. 114).

Graduate courses are offered regularly in the histories, cultures, religions, languages, and literatures of Asia. The study of these languages and cultures may also be included in programs leading to master’s or doctoral degrees in other disciplines.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Manasicha Akepiyapornchaisiri
- Kamran Ali
- Joel P Brereton
- Kirsten Cather
- Sung-Sheng Yvonne Chang

- Dalpat Singh Rajpurohit
- Mark Ravina
- Elizabeth Richmond-Garza
- Sharmila Rudrappa
- Rupert Snell
- Josep Straubhaar
- Luke Christopher Waring
- Alexandra K Wettlaufer

Admission Requirements

Master of Arts with a Major in Asian Studies

This program is intended for students who wish to acquire deeper knowledge in Asian studies and related language skills in order to pursue a career in business, government, nongovernmental organizations, or the like, or to prepare for further study in another discipline or area studies program. Successful applicants hold a bachelor's degree, often in a related field, and have a strong interest in China, Japan, Korea, South Asia, or some combination of these. Since they will specialize in one of these geographic areas and study at least one language of that area to an advanced level, previous language training is highly recommended. Those who apply to the program without language training may complete first- and second-year college level language coursework after they are admitted, but these courses will not count toward the semester hours required for the master's degree.

Master of Arts / Doctor of Philosophy with a Major in Asian Cultures and Languages

This program is intended for students who wish to obtain a doctorate in order to pursue an academic career in the study of China, Japan, Korea, or South Asia. They may apply to enter the program with a bachelor's degree in area studies or a related field. Most applicants will have knowledge of an Asian language before applying for admission. Students without this knowledge but whose applications are otherwise outstanding may also be accepted into the program. Students may complete first- and second-year college level language coursework after they are admitted, but these courses will not count toward the credit hours required for their master's and doctoral degrees. Successful applicants holding only a bachelor's degree will initially be enrolled in the master of arts program, with the expectation that after obtaining the master's degree they will continue their study in the doctoral phase of the program. Applicants who already hold a master's degree in a related field may be admitted directly to the doctoral phase of the program. Such applicants normally have an advanced level of proficiency in the language and graduate-level coursework in the area of their specialization.

Degree Requirements, Asian Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office.
and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

All graduate students in the Department of Asian Studies are required to complete an annual report detailing their progress in the program. Annual reports are reviewed by the Graduate Studies Committee each spring.

**Master of Arts with a Major in Asian Studies**

Students are required to take three semester hours of coursework in Asian history, in addition to either an additional three hours in Asian history or three hours in social sciences relating to their regional area of study. Students are also expected to show proficiency in a language relevant to their interests as determined by their advisor and mentor, either by completing six semester hours of advanced language study with a grade of at least B in each course, or by passing a proficiency examination.

Students may choose either the report option or the thesis option to conclude their master's program. The report option consists of at least 30 semester hours of coursework, including the report course, which is a three-hour, one-semester project in which the student conducts research and writes a report on a given topic. The thesis option consists of at least 30 semester hours of coursework, including the thesis course, which is a six-hour, two-semester project in which the student does in-depth research on a given topic.

Students who choose the thesis option must take at least 12 hours of courses in their area of specialization, with no more than six hours in any one discipline (such as literature, religion, visual culture, etc.). Students who choose the report option must take at least 15 semester hours of such electives, with no more than nine hours in any one discipline.

Up to nine hours of undergraduate upper-division coursework, including language coursework, may be counted toward the degree.

**Master of Arts / Doctor of Philosophy with a Major in Asian Cultures and Languages**

This program requires a minimum of 48 semester hours of coursework and consists of two phases. The first phase (master of arts) requires 30 semester hours of coursework, including the report course. Students must take at least three courses in their area of specialization—for example, in Japanese culture, Indian religion, or Chinese literature. They must also take one graduate course that introduces them to research methods of the appropriate discipline—for example, in historiography, ethnography, or literary theory/criticism—and another course in history or in the social sciences relating to their regional area of study. Up to nine hours of upper-division undergraduate coursework may be counted toward the master’s degree.

In December of the second year in the master’s program, students will receive a formal review to determine if they may continue on to the doctoral program. To complete the master’s degree phase, students are expected to show proficiency in a language offered by the Department of Asian Studies, either by completing six semester hours of advanced language study with a grade of at least B in each course or by passing a proficiency examination. To complete the master’s degree program, students must submit, in the last semester of their coursework (normally the fourth semester), a report that shows their ability to conduct independent research. Successful completion of this report is required for admission to the PhD phase.

The PhD phase of the program requires at least 18 semester hours of coursework beyond the master’s degree, prior to the completion of dissertation courses. In total, MA/PhD students must complete at least 24 semester hours in the major and minor areas of specialization and six semester hours in theory and methodology related to the major and/or minor area(s).

Students admitted directly to the PhD program must complete at least 30 semester hours of coursework in addition to the dissertation courses. Within their field of expertise (China, Japan, Korea, or South Asia), students must complete 24 semester hours in the major and minor areas of specialization, and six semester hours in theory and methodology related to the major and/or minor area(s). Areas of specialization must be approved by the graduate advisor and mentor.

All PhD students are expected to demonstrate fifth-year proficiency in one Asian language prior to defending the dissertation.

Competency in at least one modern foreign language that will be used in research is required. The research language may be a European language, such as French or German, or a modern Asian language. If the student chooses to study an Asian language as the research language, the language should be one that is pertinent to the student's professional development, such as Hindi for students whose primary language of study is Sanskrit. The choice of language(s) and the required level of proficiency are determined by the mentor and dissertation supervisor in consultation with the graduate advisor.

To be admitted to candidacy for the doctoral degree, students must take comprehensive examinations in their area of specialization, pass a dissertation prospectus hearing, and demonstrate research-level proficiency in the language(s) of their field. Normally, students take their comprehensive examination, including an oral defense, in the third or fourth semester of the PhD phase.

After passing the comprehensive examination, the student, in consultation with the graduate advisor and graduate mentor, selects five faculty members to form a dissertation committee; the chair of the committee is the student's dissertation supervisor. After passing the dissertation prospectus hearing, the student may advance to doctoral candidacy.

Published guidelines regarding the comprehensive examination, dissertation prospectus hearing, admission to candidacy, and completion of the dissertation are available from the Department of Asian Studies.

**Dual Degree Programs**

The Department of Asian Studies offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

**Classics**

*Master of Arts*  
*Doctor of Philosophy*
Facilities for Graduate Work

The Classics Library, located within the department in Waggener Hall and managed by its own staff, houses more than 30,000 volumes spanning all areas of classical studies. Supporting collections and staff members are located in the Perry-Castañeda Library, the Architecture and Planning Library, the Fine Arts Library, and other University Libraries units. Holdings of the Harry Ransom Center include a collection of Greek papyri from Egypt and numerous Renaissance editions of classical texts. The Battle Collection of Plaster Casts and a collection of ancient pottery are housed in the Blanton Museum of Art. Graduate students also have access to the Swenson Coin Collection; the Meritt and Reinmuth squeeze collections; a collection of drawings, photographs, and notes on ancient architecture by Lucy Shoe Meritt; and a substantial study collection of material objects from around the ancient Mediterranean, including Egypt and the Near East. Additional resources within the department include a comprehensive photographic archive of prehistoric Aegean and Cypriot inscriptions and related research materials maintained by the Program in Aegean Scripts and Prehistory; visual media that include more than 15,000 digital images and more than 70,000 slides; a well-equipped computer laboratory linked to major classical databases; and a full-time instructional technology and media staff.

The department sponsors archaeological fieldwork at Morgantina in Sicily (the Contrada Agnese Project) and at Histria in Romania (the Histra Multiscalar Archaeological Project), as well as ongoing work on the Aqua Traiana aqueduct near Rome and publication of excavations as Chersonesus in Crimea.

Areas of Study

Classics is an interdisciplinary field embracing all areas of classical antiquity: language, history, literature, material culture, philosophy, religion, and so on. Within this broad area, the only limitation on programs of study is the availability of specialists to direct a student’s work. The department offers a special concentration in classical archaeology, and the Departments of Classics and Philosophy offer a cooperative doctoral program in ancient philosophy. The faculty also maintains close links with the Departments of Art and Art History, English, French and Italian, History, and Religious Studies, and with the comparative literature program. A cooperative arrangement with the Institute of Nautical Archaeology at Texas A&M University makes courses in nautical archaeology and ancient seafaring available for University of Texas at Austin credit.

Degree Requirements, Classics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [url]. Please contact the program with concerns or questions.

Master of Arts

Course requirements are 33 semester hours of coursework. For students in the language and literature program this may, and for students who concentrate in archaeology it typically does, include the report course, a one semester course of supervised research. No more than nine hours of upper-division coursework may be included in the program. The program of coursework is planned individually by the student in consultation with the graduate advisor. At least 18 semester hours must be in Greek, Latin, or both. At least six semester hours of supporting work is required, either in classics or in related fields such as anthropology, art history, comparative literature, geography, history, linguistics, and philosophy. The master’s degree student has no formal qualifying examinations before beginning the report as such, but the program requires the completion of certain PhD qualifying exams during the period of work on the Master’s.

Doctor of Philosophy

Admission to the doctoral program is subject to the approval of the Graduate Studies Committee and normally requires a Master of Arts degree with a major in classics or a closely related field. The department awards the PhD in classics, and all students must demonstrate competence in both Greek and Latin. Students with a special interest in classical archaeology or ancient philosophy may pursue a concentration in either area.

Course requirements. Students who concentrate in language and literature must complete one seminar in each of the following categories: Latin, Greek, prose literature, verse literature, material culture, as well as two historical courses and one upper division or graduate course offered outside the department. A broad and changing menu of seminars provides training in many areas of study and methods of research. Students who concentrate in classical archaeology or ancient philosophy have special course requirements, which are described on the department’s website.

Examination requirements. To be admitted to candidacy for the doctoral degree, students must pass the following written examinations: translation in Greek; translation in Latin; ancient history; separate exams on Greek and Latin literature followed by an oral examination covering both; translation in German; and translation in a second modern language. A timetable with the recommended schedule for completion of the PhD requirements is available on the department’s website.

Students who concentrate in ancient philosophy must pass an examination in ancient philosophy and take additional coursework in Philosophy.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Students who concentrate in classical archaeology must pass the following written examinations: translation in Greek or in Latin; Greek archaeology; Roman archaeology; ancient history; translation in German; and translation in a second modern language.

Other requirements. Students concentrating in language and literature or in classical archaeology must also submit a portfolio of research papers. For the precise requirements (which vary between the two programs), see the department's website.

Comparative Literature

Master of Arts
Doctor of Philosophy

For More Information
Campus address: Calhoun Hall (CAL) 217, phone (512) 471-1925; campus mail code: B5003
Mailing address: The University of Texas at Austin, Graduate Program in Comparative Literature, 208 West 21st Street B5003, Austin TX 78712
E-mail: complit@austin.utexas.edu
URL: http://liberalarts.utexas.edu/complit/

Facilities for Graduate Work

Comparative Literature offers a core of courses in the discipline and draws on the teaching and scholarly resources of faculty members in more than 20 programs in language, literature, culture, and area studies. In addition to the University Libraries facilities, special collections in the Harry Ransom Center and the Benson Latin American Collection, for example, offer opportunities for research.

Areas of Study

Students seeking the Master of Arts degree are expected to develop a broad knowledge of the theory and practice of comparative literature, both through coursework and through the completion of a report or thesis. In addition, they expand their acquaintance with a single world-language literature by studying it at the graduate level.

Students seeking the doctoral degree are expected to develop extensive knowledge of one world-language literature and broad knowledge of a second. They are required to complete, in effect, the equivalent of a master’s degree in one world-language literature, while demonstrating proficiency in either two additional languages or in one additional language and a third area of relevant study. The program also prepares students in literary theory and criticism and in the scholarly and critical methods of studying the relationships among various literatures and cultures. Interdisciplinary study is also encouraged, as students explore the interrelationships between literature and other fields (such as art history, gender studies, ethnic studies, anthropology, film, philosophy, and psychology) as part of their programs of work. After fulfilling all requirements in the areas of literature, theory, and language and passing both qualifying and comprehensive examinations, students choose a period, genre, or historical, cultural, intellectual, or critical problem on which to write a dissertation.

Work toward the Master of Arts and Doctor of Philosophy is offered in collaboration with the Departments of Asian Studies, Classics, English, French and Italian, Germanic Studies, Middle Eastern Studies, Slavic and Eurasian Studies, and Spanish and Portuguese, as well as many area-studies centers within the College of Liberal Arts. Additionally students may undertake relevant coursework in anthropology, history, linguistics, philosophy, LGBTQ studies, women’s and gender studies, African and African diaspora studies, Asian-American studies, Mexican-American and Latina/o studies, art and art history, music, radio-television-film, and other units approved by the graduate advisor in comparative literature.

Degree Requirements, Comparative Literature

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

To earn the Master of Arts degree with a major in comparative literature, the student must complete either 31 semester hours of coursework, including the six-hour thesis course, or 34 hours of coursework, including the three-hour report course. The student must also demonstrate a high degree of competence in one world language and sufficient competence in a second world language. Additional information about these requirements is available from the graduate advisor.

Doctor of Philosophy

To be admitted to candidacy for the doctoral degree, the student must have earned a master’s degree in comparative literature, in a single world language and literature, or in a related discipline such as art history, folklore, or philosophy. In addition, they must have passed the qualifying examination, which tests the student’s knowledge of literary theory and critical methodology and of the first world language and literature.

The student is expected to take at least 30 semester hours of coursework beyond the Master of Arts level, including six semester hours for the dissertation. Each student must also pass a comprehensive examination, which is normally taken upon completion of coursework, and a prospectus examination, which must be taken by the end of the fall
or spring semester after the semester in which the student passes the comprehensive examination. The student must then write a dissertation, which may involve, for example, the comparison of works, traditions, themes, writers, or periods from two or more different literatures and cultures. The dissertation may involve the study of literature and some other discipline. It may be a substantial translation, equipped with a general introduction analyzing the work chosen and/or discussing the problems and theory of translation and provided with detailed, explanatory notes. It may be some other project that the student designs under the supervision of the dissertation committee and that satisfies the aims and interests of the program. Each student should develop a thorough command of two world languages, and proficiency in either a third world language or a relevant area of study. For the purposes of the comprehensive examination, a student may designate as the third area of study either the third world language or another discipline related to the program—for example, an interdisciplinary field, a set of courses linked by a critical or theoretical question, or a topic in cultural studies.

Complete information about the world language requirement, course requirements, and the qualifying and comprehensive examinations is available from the graduate advisor.

### Economics

**Master of Arts**  
**Master of Science in Economics**  
**Doctor of Philosophy**

### For More Information

**Campus address:** Bernard and Audre Rapoport Building (BRB) 1.116, phone (512) 471-3211, fax (512) 471-3510; campus mail code: C3100

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of Economics, 2225 Speedway Stop C3100, Austin TX 78712

**URL:** [http://liberalarts.utexas.edu/economics/](http://liberalarts.utexas.edu/economics/)

### Areas of Study

The Department of Economics offers graduate study and research in the core areas of microeconomics, macroeconomics, and econometrics and in a broad selection of applied areas. Current area offerings are listed in the graduate program’s handbooks.

### Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Jason Ira Abrevaya
- Daniel A Ackerberg
- Manuela Angelucci
- Jorge Francisco Balat
- Peter S Bergman
- Venkataraman Bhaskar
- Saroj Bhattacharai
- Christoph Boehm
- Svetlana Boyarchenko
- Marika Cabral
- Eric Chyn
- Olivier Coibion
- Stephen Donald
- Jackson Dorsey
- Andres Pablo Drenik
- Stefano M Eusepi
- Michael L Geruso
- Brendan Andrew Kline
- Leigh L Linden
- Victoria Marone
- Eugenio Javier Miravete
- Andreas I Mueller
- Richard Murphy

- Nitya Pandalai-nayar
- Aysegul Sahin
- David S Sibley
- Vasiliki Skreta
- Daniel T Slesnick
- Dean E Spears
- Maxwell B Stinchcombe
- Caroline Desiree Thomas
- Robert Town
- Stephen J Trejo
- Cody Tuttle
- Thomas E Wiseman
- Haiqing Xu

### Admission Requirements

Applicants may apply directly to the PhD and Master of Arts (Option III) degree programs. The Master of Science in Economics degree is only available to students who are admitted to the PhD program in Economics. Admission to the PhD program requires significant prior training in economics and mathematics. Admission to the Master of Arts (Option III) program requires sufficient prior training in mathematics, while undergraduate coursework in economics is strongly encouraged. Note that applicants admitted to the Master of Arts (Option III) program must submit a nonrefundable enrollment deposit to secure enrollment in the program.

### Degree Requirements, Economics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

### Master of Arts

The Master of Arts Option III degree program is designed for students pursuing a terminal master's degree in economics with 10-month, 18-month, and 24-month tracks. The degree is offered on a coursework-only basis; i.e. it is not offered with a thesis option or a report option. Students are required to take a minimum of 30 hours of coursework, including a foundational sequence of courses in economic theory and econometrics. All courses required for program completion are offered in accordance with University policies that govern non-formula-funded (Option III) programs and are delivered in a face-to-face format with the option for a hybrid online format in limited circumstances. Course requirements and details of hybrid online coursework are described in depth in the Department's MA Program Handbook. This degree is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension. Applicants admitted to the program must submit a nonrefundable pre-enrollment tuition fee to secure enrollment in the program.

### Master of Science in Economics

The Master of Science in Economics (MSEcon) degree is designed for students pursuing the Doctor of Philosophy in Economics. To complete the degree, students must complete at least 39 hours* of coursework. First, students must complete a foundational sequence of core courses
in macroeconomic theory, microeconomic theory, econometrics, and mathematics for economists. Second, they must also complete the field course requirements designed to provide students with expertise in specific research areas. These requirements are described in more detail in the Department’s MSEcon, PhD Program Handbook. This degree does not require completion of a thesis or final report. This degree is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

**Doctor of Philosophy**

To obtain the Doctor of Philosophy degree, students must complete the requirements for the Master of Science in Economics degree, as well as the following requirements:

a. Students must complete the comprehensive exam requirements.

b. Students must pass the second-year paper requirement.

c. Starting with the third year, students must participate in the writing seminar for their area of specialization and must make significant progress on their research by the end of each academic year.

d. Students must complete a minimum of six credit hours of dissertation.

e. Finally, students must write a dissertation of original research and have the dissertation approved by their dissertation committee following an oral defense.

Most students finish their degree in five years with 93 total credit hours, but some take six years with 111 total credit hours. This includes credits for writing seminar, research, and dissertation courses taken in the third and later years. These requirements are described in more detail in the Department’s MSEcon, PhD Program Handbook. This degree is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

**English**

*Master of Arts*

*Master of Fine Arts (in Creative Writing)*

*Doctor of Philosophy*

**For More Information**

**Campus address:** Calhoun Hall (CAL) 210, phone (512) 471-5132 or (512) 475-6356; campus mail code: B5000

**Mailing address:** The University of Texas at Austin, Department of English, Graduate Program, 204 West 21st Street Stop B5000, Austin TX 78712

**URL:** [http://liberalarts.utexas.edu/english/graduate-program/information.php](http://liberalarts.utexas.edu/english/graduate-program/information.php)

**Facilities for Graduate Work**

Facilities for graduate work include an excellent library system and a world-renowned research library, the Harry Ransom Center. The Ransom Center provides materials for critical, textual, and bibliographical studies, with its extensive holdings in earlier British literature (including the Pforzheimer Library), modern British and American literature, theatre arts, photography, and other significant subjects for literary and cultural research. The Benson Latin American Collection is one of many campus resources for advanced work in non-European literature and language. The Department of Rhetoric and Writing offers rich opportunities for teaching and study; and the Digital Writing and Research Laboratory enjoys a national reputation for investigating the intersections among technology, language, and literature.

**Areas of Study**

Courses are offered in the following areas of study: American literature to 1900; 20th and 21st-century American literature; African American and African Diaspora literature; Mexican American and Latinx literature; U.S. race and ethnic studies; archival studies; comparative literature; film and media studies; literary and critical theory; medieval literary studies; Renaissance literature; 18th-century British literature; 19th-century British literature; modern British and Irish literature; modernist studies; global anglophone literature; book history and bibliography and textual studies; digital literacies and literatures; drama, theatre, and performance; ethnic and Third-World literature; language and linguistics; literature and the environment; disability studies and health humanities; poetry and poetics; popular culture and cultural studies; rhetoric; feminist and LGBTQ studies; and women’s literature.

The department also offers workshops in poetry and fiction for students enrolled in the MFA program, as well as craft seminars in fiction, poetry, and creative non-fiction.

**Graduate Studies Committee**

Degree Requirements, English

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

A total of 30 semester hours of coursework is required. Details are available from the graduate advisor.

As preparation for the English graduate program, a strong undergraduate background in British and American literature and language is desirable, as well as advanced coursework in related fields.

Master of Fine Arts (in Creative Writing)

The Master of Fine Arts (MFA) degree is offered in creative writing. Students choose to write either fiction or poetry. A total of 48 semester hours of coursework is required during the three-year program of study. As a part of the program of study, students work as teaching assistants for undergraduate literature and creative writing courses. Students complete the MFA degree program with a successful master’s report displaying their talent and craft as fiction writers or poets.

Doctor of Philosophy

To enter the doctoral degree program, all students must pass an early career review which focuses on their graduate coursework and their performance as teachers. Students must pass the review at the end of the spring semester of the second year of graduate study.

Students advance to candidacy for the doctoral degree after completing a minimum of 39 hours of formal coursework, including the hours completed before the early career review; certifying their foreign language competency; and passing both the third year examination and the prospectus examination. Specific details about each requirement are available from the graduate advisor.

Dual Degree Programs

The Department of English offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

French and Italian

Master of Arts (in French)
Master of Arts (in Italian Studies)
Doctor of Philosophy (in French)
Doctor of Philosophy (in Italian Studies)

For More Information

Campus address: Rainey Hall (HRH) 2.110A, phone (512) 471-5531, fax (512) 471-8492; campus mail code: B7600

Mailing address: The University of Texas at Austin, Graduate Program, Department of French and Italian, 201 West 21st Street Stop B7600, Austin TX 78712

URL: [http://liberalarts.utexas.edu/frenchitalian/](http://liberalarts.utexas.edu/frenchitalian/)

Facilities for Graduate Work

The University offers excellent resources to serve the needs of graduate students in French and Italian. Among the outstanding collections are the Carlton Lake collection of manuscripts and rare editions of modern French writers from Baudelaire to Beckett, the papers of the Princess Bibesco, the Artinian collection of Guy de Maupassant material, and the Surrealist archive of reviews and original documents. The Italian collections (Ranuzzi, Aldine, Medici, Bodoni, Parsons, and Weinreb) in the Harry Ransom Center offer medieval and Renaissance manuscripts and incunabula, as well as thousands of manuscripts from modern and contemporary writers such as Luigi Pirandello, Paolo Volponi, and Carlo Levi. The Suida-Manning Collection, in the Blanton Museum of Art, is one of the finest collections of Renaissance and Baroque art in the United States and constitutes another world-class resource for graduate study.

Several multimedia language laboratories, equipped with the latest digital aids, furnish excellent opportunities for technical and professional preparation for teaching and research in Romance languages and linguistics. A large collection of recordings of dialect materials in the Romance languages is also available.
Areas of Study

Graduate programs in French include concentrations in French studies (literature, film, and culture) and linguistics. The program in Italian studies addresses Italian literature, cinema, and culture.

French

Degree Requirements

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

Applicants to the graduate program in French apply directly to the PhD. The Master of Arts (MA) degree is awarded on the way to the PhD provided that the student fulfills the requirements described below. The master's degree program in French requires that the candidate have a bachelor's degree with a major in French or demonstrate equivalent knowledge. Master of Arts (MA) degree plans are available with a concentration in French studies or linguistics.

The program in French Studies requires 30 semester hours of coursework, including two courses outside the department. Coursework is designed around three main organizing structures: Historic Periods, Literary/Artistic Genres, and Theoretical Approaches. Students are expected to gain breadth of exposure in the various areas and begin to develop a depth of knowledge in a specific field.

Completion of the program in French Linguistics requires four semesters or 30 semester hours of coursework with a minimum of 24 semester hours of coursework in French Linguistics.

Doctor of Philosophy

The doctoral program is offered in French Studies and French Linguistics. Information about required courses in each of these areas is available from the department. An examination committee is formed for each candidate; with the graduate advisor, the committee oversees the student’s progress and eventually administers a comprehensive examination based on coursework and reading lists. One of the graduate faculty members conducting the examination may come from outside the program. Eighteen to 36 semester hours of coursework beyond the MA are normally required for the degree. An approved dissertation prospectus is required for all doctoral candidates before they may begin to write the dissertation. A final oral defense of the dissertation is required of all candidates.

In French Studies, the candidate is expected to take courses outside the department in related areas of interest, such as French history, art history, comparative literature, and anthropology. During the first two years within the program, students are required to take a minimum of 24 semester hours of coursework in French Studies graduate courses. Candidates must pass a comprehensive exam on three areas of expertise before beginning work on the dissertation. The comprehensive examination will consist of a one-to two-hour oral examination conducted by three to four graduate faculty members. For the concentration in French Studies, students must demonstrate competency in Italian, Spanish, German, Russian, Arabic, or any other modern language approved by the graduate advisor at a fourth semester level or a classical language at the second semester level.

In French Linguistics, students are expected to take courses that provide a thorough understanding of both the theory and the practice of their subject. Coursework for the PhD normally consists of 60 semester credit hours of graduate content courses. The precise nature of the courses will vary with the needs of the individual student, and must be approved in consultation with the graduate advisor.

Coursework completed for the master's degree may be counted toward the requirements described below. Students who are admitted with an MA in French from another institution should expect to take a minimum of 30 to 36 semester hours beyond the MA level. Students must demonstrate competency in Italian, Spanish, German, Russian, Arabic, or any other modern language approved by the graduate advisor at the fourth semester level or a classical language at the second semester level. Candidates must pass a comprehensive exam structured into two parts: a written component consisting of two research papers based on topics proposed by the members of the student’s comprehensive exam committee, and an oral component consisting of a discussion and question session based on the exam papers. The students’ comprehensive exam committee will comprise three to four graduate faculty members, one of which may come from outside the program.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- David P Birdsong
- Marc Bizer
- Carl S Blyth
- Benjamin Claude Brower

Italian

Degree Requirements

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The master's degree program in Italian studies requires that the candidate have a bachelor's degree with a major in Italian or demonstrate equivalent knowledge. A Master of Arts in Italian studies may be awarded on the way to the Ph.D provided that the student fulfills the requirements described below.

The program requires 36 semester hours of coursework, which may include one three-hour upper-division undergraduate course approved by the graduate advisor. Students must take at least 24 semester hours of graduate coursework in Italian literature, cinema, and culture offered by the Italian graduate faculty of the Department of French and Italian, and six to nine graduate-level semester hours in a supporting subject or subjects in another program, department, or college. Italian studies students must take C L 380F , French 381M , or another graduate course on critical or literary theory approved by the graduate advisor. Students must also demonstrate reading competence in one foreign language other than Italian by earning a grade of at least B in a reading course approved by the graduate advisor, in a second-year college language course, or on an examination approved by the graduate advisor.

Lynn R Wilkinson
Hannah Chapelle Wojciechowski
Doctor of Philosophy

Several courses are required of all doctoral candidates; information about them is available from the department. An examination committee is formed for each candidate; with the graduate advisor, the committee oversees the student's progress and eventually administers a comprehensive examination based on coursework and reading lists.

Although the doctoral degree is not awarded on the basis of a specific number of courses or semester hours of credit, six courses (or eighteen semester hours) beyond the master's degree are usually required. With the approval of the graduate advisor, one of these courses may be an undergraduate course that satisfies the requirement for proficiency in a foreign language other than Italian. With the help of the graduate advisor, each student is expected to design an individual course of study and define a primary subject and supporting subject(s) of study. The graduate advisor must approve the student's selection of courses; at least nine hours of coursework must be in one supporting subject. Students must also demonstrate reading competence in a foreign language other than Italian by earning a grade of at least B in a reading course approved by the graduate advisor, in a fourth-semester college course, or on an examination approved by the graduate advisor.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Geography

Master of Arts
Doctor of Philosophy

For More Information

Campus address: Patton Hall (RLP) 3.306, phone (512) 471-5116, fax (512) 471-5049; campus mail code: A3100

Mailing address: The University of Texas at Austin, Graduate Program, Department of Geography and the Environment, 305 East 23rd Street Stop A3100, Austin TX 78712

URL: http://liberalarts.utexas.edu/geography/

Facilities for Graduate Work

The teaching and research facilities of the Department of Geography and the Environment are housed in Patton Hall, home to other liberal arts programs and departments. There are also research labs in the adjacent Student Activities Center.

Environmental Information Systems Laboratory. This laboratory provides comprehensive resources for learning and research in cartography, geographic information systems (GIS), remote sensing, and spatial statistics. It contains 25 microcomputers connected by Ethernet to the campus network and the Internet. The laboratory is also equipped with scanners, digitizers, plotters, GPS receivers, a station for field mapping, and audiovisual equipment for hypermedia production. The computers run a variety of software for microcomputer mapping and GIS, remote sensing, computer-assisted drafting, and statistical analysis.

Digital Landscape Laboratory. The Digital Landscape Laboratory is a GIS and remote sensing facility designed to support research in the modeling and characterizing of Earth’s varied processes through geomorphology, biogeography, and landscape ecology. The laboratory includes a server, high-speed Ethernet connections, Windows-based workstations, scanners, and a large-format plotter.

Environmental Analysis Laboratories. The Soils and Geoarchaeology Laboratory, the Laboratory of Soils and Sediments, the Geosciences Laboratory, and the Environmental Hydrology and Water Quality Laboratory are equipped for field study and laboratory analysis of soils, sediments, pollen, water, fluvial and lake systems, and archaeological materials. Used as research facilities, these laboratories are integral to graduate study in geomorphology, paleoecology, hydrology, biogeography and cultural ecology, morphodynamics, and geoarchaeology. High technology equipment includes a laser granulometer, an X-ray fluorescence analyzer, magnetic susceptibility meters, 210Pb dating by alpha spectroscopy, an Acoustic Doppler Current Profiler (ADCP), a digital echosound coupled to a DGPS system, a dual frequency Stratabox for geophysics surveys, microscopes, samplers, mechanical augers, a vibracorer, spectrophotometers, and other water quality multi-analyzers, among other equipment. Two small boats and two outboard engines are available for research in rivers, lakes, and dams. Additionally, there is a dedicated environmental geoscience classroom for hands-on laboratory learning.

University Libraries. The University Libraries are noted for their collections on Latin America, the Middle East, South Asia, and the American West.

Special research, training, and financial aid opportunities are available through area studies centers and research institutes in African and African American studies; Australian studies; East Asian studies; Latin American studies; Middle Eastern studies; Russian, East European, and Eurasian studies; and South Asian studies. Language training is available in Arabic, Bengali, Chinese, Hebrew, Hindi, Japanese, Korean, Malayalam, Persian, Sanskrit, Serbian/Croatian, Tamil, Telugu, Turkish, Urdu, Yoruba, and all major European languages. Additional University research facilities used by graduate students in the Department of Geography and the Environment include the Bureau of Economic Geology, the Center for Energy and Environmental Resources, the Center for Research in Water Resources, the Center for Transportation Research, the Marine Science Institute, the Center for Space Research, and the Population Research Center.

Areas of Study

The graduate curriculum in geography enables students to obtain an understanding of the heritage and philosophical foundations of the discipline, of contemporary thought and practice in its various subfields, and of the theories, analytical tools, and techniques currently used in geographic research.

Faculty and graduate students have contributed in many ways to understanding and managing the earth's diverse cultural and physical environments, ranging from local to global scales across the full range of human history. Current clusters of faculty research include space, place, and social worlds; environmental changes and surface processes; and digital landscapes.

Faculty associated with the space, place, and social worlds cluster investigate how socio-cultural and political-economic processes such as urbanization, agricultural transformation, industrialization, poverty, health
care, migration, and mediated communication interact to produce diverse socio-spatial realities across urban, regional, national, and global scales.

Faculty associated with the environmental changes and surface processes cluster study biotic, climatic, geomorphic, and anthropogenic factors and processes.

Faculty associated with the digital landscapes cluster explore the theoretical and applied issues associated with the acquisition, measurement, representation, analysis, simulation, and visualization of digital geographic information.

The faculty has a strong international orientation and is well prepared to guide students in research in Latin America, South Asia, Southern Africa, and Europe, as well as in the Southwestern and Western regions of the United States. The department encourages interdisciplinary and collaborative work that takes advantage of the University’s extensive scholarly resources.

Degree Requirements, Geography

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

To obtain a master's degree in geography, students must complete either 30 semester hours of coursework, including 18 hours of geography, six hours in a minor subject, and six hours in the thesis course; or 36 semester hours of coursework, including 27 hours of geography, six hours in a minor subject, and three hours in the report course. Students who wish to substitute courses in another field for geography courses must demonstrate that these substitutions are appropriate to their program of study and must have the consent of the graduate advisor and the supervising professor for the courses substituted. First-year master's degree students must complete Geography 390K in the fall semester and Geography 390L in the spring semester, with a grade of at least B in each course. All students must also demonstrate proficiency in a foreign language or in a quantitative or qualitative method. The student's supervising committee and the graduate advisor oversee fulfillment of this requirement.

Each student must enroll in at least two organized courses in geography during their time in the graduate program. These courses must be taught by different full-time faculty members within the department, as approved by the graduate advisor. Geography 390K, 390L, 397, and 398T may not be counted toward this requirement. Geography 397, Conference Course in Geography, may be counted only once toward the degree. By the middle of the second semester, the student should have chosen a supervising committee.

When all course requirements and the language or methods requirement have been fulfilled, the student completes the degree by presenting independent research in the form of a thesis or report.

Doctor of Philosophy

All students entering the doctoral program must hold a Master of Arts degree or the equivalent.

To qualify for advancement to candidacy, a student must do the following:

a. Complete, with a grade of at least B, two required seminars, Geography 390K and 390L, in the first year of study. All doctoral students must also take three courses taught by different full-time faculty members within the department, as approved by the graduate advisor. Geography 390K, 390L, 397, and 398T may not be counted toward this requirement. Doctoral students may repeat Geography 397, Conference Course in Geography, but this course may be counted only twice toward the degree.

b. Fulfill the language requirement by demonstrating proficiency in one language other than English. Non-native English speakers may fulfill the requirement by demonstrating proficiency in English. Proficiency must be approved by the student's dissertation supervisor and the graduate advisor. In exceptional cases, the requirement may be waived with the approval of the graduate advisor.

c. Fulfill the methods requirement by demonstrating proficiency in either a quantitative or a qualitative method, as approved by the student's dissertation supervisor and the graduate advisor.

d. Select a faculty supervisor and dissertation committee by the end of the second semester; the student may later change supervisors and alter the committee if appropriate.

e. Present a Program of Work that meets the approval of the dissertation supervisor.

f. Demonstrate comprehensive knowledge in two areas of specialization in geography.

g. Pass a qualifying examination.

After admission to candidacy, a student has completed the formal program of coursework and engages in the research and writing of the dissertation, culminating in an oral defense of the dissertation.

Dual Degree Program

The Department of Geography and the Environment offers the following dual degree program in cooperation with another division of the University. More information is available from the graduate advisor in each program.

Facilities for Graduate Work

The Department of Germanic Studies is committed to scholarship and teaching at high professional standards, nationally and internationally, in order to support students’ individual achievement and to foster their career development, both within and beyond the academy. Faculty research and teaching activities are interdisciplinary and transcultural, engaging cultural studies, linguistics, literature, digital humanities, and second language studies. The graduate program offers coursework informed especially by twenty-first century research on emerging and traditional forms of textuality and media; contemporary problems of cultural identity, migration and exile, and cultural contact; and significant theoretical, practical, and digital approaches to the humanities. Primary sources and archives (digital, media, or textual) feature prominently in the program, approached through the lenses of contemporary theories, models, and tools for language, cultural and media studies. The Department’s research profile stresses work with texts as part of media cultures, investigating cultural practices, and understanding language communities; it does so by building on and moving beyond traditional scholarly models to create contemporary contexts for research and teaching in the humanities, as well as for related careers in the public sphere.

The department encourages programs of study that combine German and other Germanic cultures, especially Danish, Dutch, Norwegian, and Swedish; it welcomes work that makes substantial links between cultural sites in different periods and different regions, as well as between different scholarly disciplines and research paradigms. Course offerings of the resident faculty are supplemented by visiting scholars from Europe, including long-term German Academic Exchange Service (DAAD) lecturers, and occasional writers or scholars in residence. While completing core requirements within the department, students are encouraged to pursue links to and coursework in other programs in the University. The campus’ infrastructure for digital research and teaching is first-rate and rapidly evolving, aiming to create new communities and forums for scholarly research and teaching, as well.

The University Libraries are state-of-the-art. They are among the 10 largest collections in the country and focus especially on digital collections. The Harry Ransom Center, the campus rare books library, has substantial holdings in German drama, manuscripts, and publishers’ correspondence; and the Blanton Museum of Art has one of the largest collections of prints, drawings, and paintings in the country, including significant holdings in European graphic arts.

Areas of Study

All students in the graduate program take a core of required courses. In consultation with the graduate advisor, each student chooses a concentration to aid in the choice of electives. Concentrations are developed by students in consultation with the graduate program to accommodate their individual career goals and interests. Students’ concentrations may include courses from outside the department that are related to the major area of study.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Admission Requirements

Entering graduate students must have a bachelor’s degree (or the equivalent from a university outside the United States), ordinarily with a major in German or the appropriate Germanic language.

Degree Requirements, Germanic Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The master’s degree program requires 33 semester hours of coursework, of which three hours are earned in the report course, German 398R, Master’s Report.

The core program consists of three courses: usually German 381 (Topic 2: Introduction to Synchronic Linguistics: German) or German 381 (Topic 3: Introduction to Diachronic Linguistics: Germanic); German 398T, Supervised Teaching in German; and one course from among German 386, Periods in Germanic Literature; German 382M, Topics in Cultural History; or German 382N, Topics in Intellectual History. Additional coursework required for program completion will accommodate the student’s declared area of specialization and will include seven electives chosen in consultation with the graduate advisor.

In their final semester, while enrolled in German 398R, Master’s Report, students must pass an oral examination of up to one and one-half hours based on the master’s report and coursework completed in the declared area of the specialization.

Students must also demonstrate reading competence in one foreign language other than English and the language of the students’ major field of study (usually German); students with competence in English and another Germanic language are strongly encouraged to choose German as their other language.

Doctor of Philosophy

The doctoral program usually requires 27 semester hours of coursework beyond the master’s degree. In consultation with the graduate advisor, students develop primary and supporting areas of specialization, with the primary area usually being the area of the proposed dissertation. These areas should represent professionally acknowledged focuses for research and teaching in the field, covering the broad spectrum of literature, cultural, and linguistic specializations represented in the major professional organizations.

Students are expected to complete the core program for the Master of Arts degree or its equivalent before final admission to the doctoral program (including demonstrated reading competence in an additional foreign language, as described above). Students must fulfill the following requirements: (1) successfully complete the qualifying procedure
to confirm entrance into the doctoral program, administered by the Graduate Studies Committee; (2) demonstrate reading competence in one additional foreign language other than German or the language of concentration; (3) near the completion of all coursework, pass the candidacy procedure; and (4) defend the completed dissertation in the final oral examination.

Government

Master of Arts
Doctor of Philosophy

For More Information

Campus address: Batts Hall (BAT) 2.116, phone (512) 471-5121, fax (512) 471-1061; campus mail code: A1800
Mailing address: The University of Texas at Austin, Graduate Program, Department of Government, 158 West 21st Street A1800, Austin TX 78712
E-mail: gov-gpo@austin.utexas.edu

Facilities for Graduate Work

With more than 60 full-time or jointly appointed members, the Department of Government is one of the largest political science faculties in the country. The department houses important research centers, including the Innovations for Peace and Development Lab, the Politics of Race and Ethnicity Lab, the Public Policy Institute, and the Policy Agendas Project, and its faculty are affiliated with a variety of global research initiatives, like the Comparative Constitutions Project and the AidData Research Consortium. The department's research resources include excellent computer facilities and an extensive collection of machine-readable social science data.

Students in the department also take advantage of many of the University's research facilities and programs, including the Teresa Lozano Long Institute of Latin American Studies and Centers for East Asian Studies; Russian, East European, and Eurasian Studies; and Middle Eastern Studies. Many other units provide institutional support for political scientists, including the Brazil Center, the Edward A. Clark Center for Australian and New Zealand Studies, the Center for European Studies, the John L. Warfield Center for African and African American Studies, and the South Asia Institute.

The University has one of the largest academic libraries in the United States, with many collections of value for research in government and politics; these include the Benson Latin American Collection, the Grattan collection on Australia, the Woodrow Wilson collection, the Tobenkin collection on the Russian Revolution, the Jaffe collection on political radicalism, and a variety of special materials on southern and western Americana, Southwestern history and politics, India, East Asia, the Middle East, Africa, and the British Commonwealth. The library system also includes the Dolph Briscoe Center for American History, the Harry Ransom Center, and the Tarlton Law Library. The campus is the site of the Lyndon Baines Johnson Library and Museum, an invaluable resource for the study of twentieth-century politics.

Areas of Study

All candidates for graduate degrees are expected to develop a broad competence in the discipline as a whole as well as expertise in specific areas. The program offers specialized instruction in the following fields: American politics, comparative politics, international relations, methodology, political theory, public law, and public policy.

Degree Requirements, Government

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The master’s degree program requires either 24 semester hours of coursework and Government 698, the thesis course; or 30 hours of coursework and Government 398R, the report course. At least six hours must be taken as supporting work outside the department.

Doctor of Philosophy

A doctoral degree candidate must earn credit for a minimum of 42 hours of coursework while fulfilling the following general requirements: (1) complete foundation courses in political science and more specialized coursework in major and minor fields of study; (2) participate in a second-year review; (3) pass a written examination in the major field; (4) prepare and defend a dissertation proposal; and (5) write an original dissertation and successfully defend it in oral examination. Additional
information on specific requirements and procedures is available from the department.

**History**

*Master of Arts*

*Doctor of Philosophy*

**For More Information**

**Campus address:** Garrison Hall (GAR) 1.104B, phone (512) 471-3261, fax (512) 475-7222; campus mail code: B7000

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of History, 128 Inner Campus Drive, Stop B7000, Austin TX 78712

**URL:** [http://liberalarts.utexas.edu/history/graduate/overview.php](http://liberalarts.utexas.edu/history/graduate/overview.php)

**Facilities for Graduate Work**

Graduate students in history have access to major collections of research materials in a number of fields. The Benson Latin American Collection of printed and manuscript materials is of international importance for research and study in the history of Latin America in general and Mexico in particular. The Lyndon Baines Johnson Library and Museum and its Oral History Project offer an unprecedented wealth of material for the study of United States history in the Eisenhower, Kennedy, and Johnson years. In the Perry-Castañeda Library, the Harry Ransom Center, and the Dolph Briscoe Center for American History are major collections related to the history of science, twentieth-century writers, British and European history, and the history of Texas, the South, and the West, and documents of the United States and of the United Nations. The Natchez Trace Collection in the Dolph Briscoe Center for American History provides an unparalleled resource for the study of the history of the lower Mississippi region in the nineteenth century. At the Episcopal Theological Seminary of the Southwest near the University campus are the national archives of the Episcopal Church, containing books and manuscripts from the colonial period onward.

**Areas of Study**

Graduate study in history is offered in the following major fields: Africa; Atlantic; East Asia; early modern Europe; history of science, technology, and medicine; Latin America; medieval Europe; Middle East; modern Europe; South Asia; and United States.

**Degree Requirements, History**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Arts**

The degree is offered in three options: with thesis, with report, and without thesis or report. The thesis option requires at least 30 semester hours of coursework, including one research seminar; the report option requires at least 33 hours, including two research seminars; and the option without thesis or report requires at least 36 hours, including two research seminars. All options require at least six hours of supporting coursework taken outside the major field of specialization in history; some or all of these six hours may be taken either within or outside the department. With the exception of the major field in United States history, all options require demonstrated competence in a foreign language. Each student’s Program of Work must be approved by the student’s primary advisor and the graduate advisor.

**Doctor of Philosophy**

The Graduate Program Committee maintains close control over admission to the doctoral program; students are reviewed each year.
Facilities for Graduate Work

The human dimensions of organizations (HDO) program combines faculty and resources from the departments of anthropology, English, government, linguistics, philosophy, psychology, religious studies, rhetoric and writing, sociology, marketing, and mathematics, as well as the School of Information. Facilities of these academic units, including laboratory, library, and other research facilities, are available for use. Students also have access to University-wide library and computer facilities; to the vast archival materials held at the Harry Ransom Center; and to personnel, facilities, and expertise at the IC² Institute.

Additionally, classrooms, meeting spaces, and research facilities are accessible to students during the program’s non-standard teaching times twice a month on Friday evenings and Saturdays. This schedule has been tailored to meet the needs of the program’s graduate students, who are typically employed full time while in the program.

As part of the distance-learning program, live videoconferencing facilities are also available to students unable to commute to Austin, enabling distance learners to attend classes in real time.

Areas of Study

The Master of Arts degree in human dimensions of organizations, designed for students with at least three years of work experience, provides working professionals with a comprehensive understanding of human behavior and experience as it relates to today’s global marketplace. To deepen students’ understanding of these principles, the program’s coursework focuses on conceptualizing and implementing organizational change from a range of approaches, including cultural, ethical, linguistic, and psychological perspectives, and using both qualitative and quantitative research methods.

The program’s curriculum requires students to examine real-world challenges through a variety of disciplinary lenses. By acquiring skills central to specific disciplines, students are able to draw on a range of approaches to analyze, consider, and improve the structure and function of organizations.

The program’s faculty is made up of specialists in the College of Liberal Arts and from across the University.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Daniel A Bonevac
- Mary Rose
- Clay Spinuzzi
- Zachary S Elkins
- Pauline T Strong
- Elizabeth Keating
- Jeremi Suri
- Arthur B Markman
- Eric Tang
- Elizabeth Richmond-Garza
- John W Traphagan

Admission Requirements

An admissions committee composed of Human Dimensions of Organizations Graduate Studies Committee members evaluates applications, giving preference to candidates who demonstrate a strong academic background and a clear sense of their research goals in the HDO program. Other requirements include: (1) an official GRE or GMAT score taken within the past five years (foreign students are required to submit TOEFL scores as well); (2) a resume or CV detailing relevant work and academic experience; (3) two essays; and (4) three letters of recommendation. Applicants must also meet the minimum requirements for graduate study at the University.

Degree Requirements, Human Dimensions of Organizations

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts Option III degree program is designed for students pursuing a terminal master’s degree in human dimensions of organizations. Students are required to take 36-hours of coursework, which are offered in a prescribed sequence. Each semester begins with an intensive week of study on the University campus, followed by twice-monthly classes on both Friday evenings and Saturdays. The degree is offered in a coursework-only option and culminates with the completion of a capstone project, which should apply to a challenge facing a specific organization. All courses required for program completion are offered
in accordance with University policies that govern non-formula-funded (Option III) programs. Applicants admitted to the program must submit a nonrefundable enrollment deposit to secure enrollment in the program.

Humanities, Health, and Medicine

Master of Arts

FOR MORE INFORMATION

Campus address: Humanities Institute, William C. Powers Student Activity Center (WCP) 4.138, phone (512) 471-9056

Mailing address: The University of Texas at Austin, Humanities Institute, HHM Graduate Program, Mail Stop F1900, P.O. Drawer 7219. Austin, TX 78713-7219

E-mail: HHM@austin.utexas.edu

URL: https://liberalarts.utexas.edu/humanitiesinstitute/health-and-humanities/ma-in-humanities-health-medicine/index.php

Facilities for Graduate Work

The field of Humanities, Health, and Medicine (HHM) explores and promotes relationships among the humanities on the one hand and health and health care on the other. The methods and substance of humanistic disciplines have the power to transform health care for all by enhancing human connections, deepening the capacity for empathy, and improving our understanding of the cultural and social contexts in which health, illness, and care occur. At the same time, focusing on health and health care reinvigorates and reveals new relevance for humanistic scholarship and teaching in a society increasingly dominated by STEM fields. The transdisciplinary nature of Humanities, Health, and Medicine and the flexible design of the Master of Arts program allow students to take courses and study with faculty across campus, including in the College of Liberal Arts, the Moody College of Communications, the Steve Hicks School of Social Work, the College of Education, the School of Nursing, and the School of Information, among other campus units. Faculty from the Dell Medical School are also available to help advise student research. The Humanities, Health, and Medicine program is housed in the University of Texas Humanities Institute, which sponsors monthly Health Humanities Research Seminars and other health humanities initiatives. Other facilities for graduate work include the University’s excellent library system, which is equipped with reference librarians who have subject expertise in all relevant fields, and the Harry Ransom Center, a world-renowned center for humanities research.

Areas of Study

Both the conceptual capaciousness of the field and the significant inventory of relevant graduate and upper-division undergraduate courses that the University offers gives students the ability to design, in collaboration with the graduate advisor, a coherent program of study that matches their interests, desires, and post-degree goals. A combination of structure and flexibility allows for the creation of individualized study plans with different emphases, some of which might include, for example, Health and Culture; History of Medicine; Health, Ethics, and Social Justice; Narrative Health and Medicine; and Critical Disability Studies. Students also have the option of complementing their MA degrees with Graduate Portfolios in, for example, Disability Studies and Health Communications.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Phillip J Barrish
- Erin Eileen Donovan
- Gloria Gonzalez-Lopez
- Scott Graham
- Alison Kafer
- Philippa Judith Levine
- Michael S Mackert
- Julie A Minich
- Chelsi West Ohueeri
- Abena Dove agyepoma Osseo-asare
- James W Pennebaker
- Sharmila Rudrappa
- Margo L Sawyer
- Pauline T Strong
- Kevin J Thomas

Degree Requirements, Humanities, Health, and Medicine

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

A total of 30 semester credit hours of coursework is required. These 30 hours may but are not required to include a Master’s Report (three hours) or a Master’s Thesis (six hours). Up to nine hours of upper-division coursework may also be included. Further details are available from the graduate advisor.

Dual Degree Programs

The Humanities Institute offers the following dual degree program. More information is available from the graduate advisor.

Iberian and Latin American Languages and Cultures

Master of Arts

For More Information

Campus address: Benedict Hall (BEN) 2.116, phone (512) 471-4936, fax (512) 471-8073; campus mail code: B3700

Mailing address: The University of Texas at Austin, Graduate Program, Department of Spanish and Portuguese, 150 W 21st St., B3700, Austin TX 78712

URL: http://liberalarts.utexas.edu/spanish/

Facilities for Graduate Work

The Perry-Castañeda Library contains extensive holdings related to the history, languages, and cultures of Spain, Portugal, and Latin America. Students also have access to an array of electronic databases, journals, and books related to these areas through the University Libraries website. In addition, the Benson Latin American Collection is the world’s foremost university research collection for Latin American studies, with more than eight hundred thousand volumes as well as extensive collections of manuscripts, maps, photographs, and broadsides.

The several language and computer laboratories furnish excellent opportunities for technical and professional preparation for teaching and research in Romance languages and linguistics. A large collection of tape recordings of dialect materials is also available.
Areas of Study

Graduate work in Iberian and Latin American languages and cultures is offered in three tracks: Iberian and Latin American Literatures and Cultures, Luso-Brazilian Cultural and Media Studies, and Iberian and Latin American Linguistics.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Admission Requirements

All entering students must hold a bachelor’s degree with a major in Spanish and Portuguese or must demonstrate equivalent knowledge. All students must demonstrate proficiency in a second language; this requirement may be fulfilled by exam, previous credit, or 10 to 12 semester hours of additional coursework at The University of Texas at Austin.

Degree Requirements, Iberian and Latin American Languages and Cultures

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts (MA) degree is available only to students enrolled in the PhD degree program in Iberian and Latin American languages and cultures who are allowed by the Graduate Studies Committee to receive a master's degree after having successfully submitted and defended a doctoral qualifying paper in the fourth semester. If the doctoral qualifying paper is deemed unacceptable, the student may still petition to receive the MA after successfully completing 30 semester credit hours.

Doctor of Philosophy

General Requirements

The doctoral program in Iberian and Latin American languages and cultures includes three tracks that share the same five-year structure, described below. These tracks are (1) Iberian and Latin American literatures and cultures, (2) Luso-Brazilian cultural and media studies, and (3) Iberian and Latin American linguistics. All students must demonstrate proficiency in a second language beyond Spanish or Portuguese. In the first and third tracks, the second language may be any language other than English that is relevant to the student's proposed field of study and is approved by the graduate advisor. Students in the second track must choose Spanish or Portuguese as the second language.

Students seeking the PhD in Iberian and Latin American languages and cultures must complete a minimum of 54 semester hours of coursework. Coursework includes the following required courses: Iberian and Latin American Languages and Cultures 380 (Tracks 1 and 2), 385T, 394, 395, 396, 398T, and 399W, 699W, or 999W. The remaining semester hours may be fulfilled through elective courses at the graduate level, as approved by the graduate advisor. At least 15 of the 27 semester hours of elective coursework must come from courses offered by the Department of Spanish and Portuguese. Of these electives at least one must be a graduate seminar on a Peninsular topic, and at least one must be a graduate seminar on a Luso-Brazilian topic (total of two courses).

For doctoral students, the fourth long semester is dedicated to the elaboration of the doctoral qualifying paper. In the first half of the semester, each student must write and submit a paper demonstrating a mastery of a specialized topic, theoretical rigor, sophisticated research techniques, and a command of structure, academic style, and organization. If the committee, consisting of the student's advisor and two other readers deems the paper acceptable, the student will defend the paper before the committee during the second half of the semester.

Upon the successful completion of the doctoral qualifying paper, in the fifth long semester, students will enroll in nine hours of additional elective coursework.

The sixth and seventh long semesters are dedicated to the preparation of the doctoral dissertation fields and proposal. In the sixth long semester, in consultation with a Dissertation Fields Committee (consisting of the three Graduate Studies Committee faculty members from the department, including the student's advisor, and one faculty member from outside the department), each student will prepare and write critical summaries of a number of field lists. If the Dissertation Fields Committee considers the list and accompanying summaries acceptable, the student will develop a doctoral dissertation proposal, under the supervision of their supervisor(s), which the student will defend in a meeting with the Dissertation Proposal Committee (consisting of the four committee members with the option of adding one more) before the twelfth week of the seventh long semester. The student will also enroll in Iberian and Latin American Languages and Cultures 385T during the seventh long semester.

Tracks

All graduate students in Tracks 1 and 2 must complete Iberian and Latin American Languages and Cultures 380 as well as 12 semester hours of elective coursework in their first three long semesters. By the end of the third long semester, students must have selected or been assigned a mentor from among the department's graduate faculty.

Iberian and Latin American Literatures and Cultures

The Iberian and Latin American literatures and cultures track addresses the broad range of linguistic and cultural contacts that currently comprise our field. This track allows students to complete their primary coursework in Spanish, with a focus that may include the multiple languages and cultures of Latin America (including the U.S.), Spain, the Caribbean, Africa, or Asia, or related diasporas. Students will then choose a specialization in the literature and culture of a second language relevant to their research. This could be Portuguese, Nahuatl, a Mayan language, French, Arabic, Hebrew, Yiddish, Yoruba, a Creole language, etc.

Luso-Brazilian Cultural and Media Studies

The Luso-Brazilian cultural and media studies track is designed for students who wish to acquire the cultural capital and critical thinking skills crucial to a global understanding of Brazil, Portugal, and the Portuguese-speaking populations of Africa and Asia. While also addressing a range of media and cultural contacts, this option allows students to complete their primary coursework in Luso-Brazilian literature, film, and culture, choosing either Spanish or another relevant language as the basis of a secondary research focus. This track is...
designed to bridge the traditional divide between Brazil, the Americas, and the Lusophone world.

**Track 3: Iberian and Latin American Linguistics**

In the Iberian and Latin American linguistics track, students pursue coursework in areas that bridge theoretical and applied approaches in the study of the structural and meaning-bearing properties of standardized and local languages, the sociolinguistics of the Ibero-American world, the development of second languages in natural and academic settings, and the qualitative and quantitative analysis of speech samples collected in the field and in the laboratory. This training is supported and augmented by coursework in the core linguistic areas of phonology and syntax as well as in the research methods of phonetics, discourse analysis, corpus linguistics, psycholinguistics, and anthropological linguistics through the offerings of graduate programs in the Department of Spanish and Portuguese and allied departments, including linguistics, French and Italian, curriculum and instruction, psychology, communication, anthropology, and Latin American studies.

**Latin American Studies**

*Master of Arts*  
*Doctor of Philosophy*

**For More Information**

**Email:** lilas-graduate-program@utlists.utexas.edu (lilas-graduate-program@utlists.utexas.edu)

**Facilities for Graduate Work**

The Benson Latin American Collection is the most complete library of its kind in the United States, containing more than 800,000 volumes of printed material in addition to manuscripts, maps, newspapers, and microfilms. Of special interest are the 20,000 reels of microfilm copies of archival material sourced in Mexico, Spain, England, and Washington DC. Other campus libraries, including the Perry-Castañeda Library, the Fine Arts Library, the Walter Geology Library, and the Architecture and Planning Library, contain additional Latin American material. Students also have access to a variety of electronic journals, books, and bibliographic tools through the University Libraries website.

About 65 faculty members regularly teach courses dealing with Latin America, and some 150 additional faculty members have Latin American interests in a wide variety of fields.

**Areas of Study**

Graduate work toward a degree in Latin American studies may be concentrated in any academic area in which courses with Latin American content are offered.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Omoniyi Afolabi
- Ricardo C Ainslie

- Emilio Zamora
- Luis H Zayas

**Admission Requirements**

The entering master's degree student must have a bachelor's degree, with a major in any discipline. Reading and speaking knowledge of Spanish or Portuguese is required.

Students must hold a master's degree by the time they enter the doctoral program. On rare occasions, admission to the doctoral program may be granted to students without a master's degree; such students are required to earn the master's degree en route to the PhD.

**Degree Requirements, Latin American Studies**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office.
and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

**Master of Arts**

The Latin American Studies Master's Program is interdisciplinary and very flexible. In consultation with the graduate advisor and faculty mentor(s), students should design their program of study to incorporate basic theory and methodology courses relevant to their academic interests. Two degree plans are available: Plan A: Thesis Option and Plan B: Two Reports in Lieu of Thesis (one in the major field and one in the minor).

Students must choose a major (15 semester hours of coursework) and a minor (nine semester hours). Major and minor fields may be: (a) any disciplinary areas that offer Latin American or relevant methodological content coursework, such as Anthropology, Community and Regional Planning, Economics, Geography, Government, History, Sociology, Public Policy, Literature/Culture, Art History, etc.; (b) any interdisciplinary areas with content relevant to the student's academic interests such as African and African Diaspora Studies, Mexican American and Latina/o Studies, Native American and Indigenous Studies, Religious Studies, Women's and Gender Studies, etc.; (c) general themes such as violence, feminism, the environment, media, LGBTQ studies, etc.; or (d) methodologies such as Statistics, Geographical Information Systems, Information Technologies, qualitative methods, etc.

Students may also organize their coursework to fulfill the requirements for one of the Portfolio Programs offered by the Graduate School. Typical Portfolio Programs that some Latin American Studies Master's students complete include: Digital Studies, Native American and Indigenous Studies, and Women's and Gender Studies.

Most plans require the completion of at least 33 semester hours of coursework. The only required courses for the LAS MA program are the Proseminar (Latin American Studies 384) and the thesis (Latin American Studies 698A and Latin American Studies 698B) or the primary and secondary report courses (Latin American Studies 397R and 398R). Dual degree programs may require a different number of hours.

Under all of the Master of Arts degree plans, the student must develop a proficiency in Spanish, Portuguese, or an indigenous language of Latin America. Examinations are held each academic year, and the student may repeat them until proficiency is indicated.

During the first year after admission, students will work to select two supervising professors to serve in their thesis committee. The committee chair or mentor must be a member of the Latin American Studies Graduate Studies Committee. The second member or reader can be a faculty member from any other unit within The University of Texas at Austin. The thesis format must be in accordance with the Graduate School requirements and must also be approved by the two thesis committee members. Master's students who wish to write a thesis may submit a formal petition to the Graduate School.

**Doctor of Philosophy**

The doctoral program in Latin American Studies is dedicated to providing flexible yet rigorous training for a select number of excellent students whose proposed doctoral program requires an interdisciplinary approach. Our doctoral students combine interdisciplinary training with a focus on practical applications, acquiring not only specialist knowledge of their chosen subject, but also a range of skills and expertise in problem solving and connecting ideas. Upon completion of the degree, students frequently enter academic and non-academic professions in which they apply theoretical and methodological knowledge to real-world problems. As part of this training, students are required to participate in a professional placement before defending their doctoral dissertation.

Doctoral students must complete at least 30 semester hours of coursework beyond the master's degree program, excluding hours in the dissertation courses (Latin American Studies 399W, Latin American Studies 699W, and/or Latin American Studies 699W). The only required course for the LAS Doctoral program is the Proseminar (Latin American Studies 384). Upon approval of the Graduate Advisor, the LAS 384 requirement may be waived only for those students that satisfactorily completed this requirement as part of their MA program in Latin American Studies at UT Austin.

**PhD Years 1 and 2**

The first two years of the doctoral program are typically dedicated to coursework. Doctoral students must choose a major (15 semester hours of coursework), a first minor (nine semester hours), and a second minor (six hours) using this form. Major and minor fields may be: (a) any disciplinary areas that offer Latin American or relevant methodological content coursework, such as Anthropology, Community and Regional Planning, Economics, Geography, Government, History, Sociology, Public Policy, Literature/Culture, Art History, etc.; (b) any interdisciplinary areas with content relevant to the student's academic interests such as African and African Diaspora Studies, Mexican American and Latina/o Studies, Native American and Indigenous Studies, Religious Studies, Women's and Gender Studies, etc.; (c) general themes such as violence, feminism, the environment, media, LGBTQ studies, etc.; or (d) methodologies such as Statistics, Geographical Information Systems, Information Technologies, qualitative methods, etc.

Students may also organize their coursework to fulfill the requirements for one or more of the Portfolio Programs offered by the Graduate School. Typical Portfolio Programs that some Latin American Studies doctoral students complete include: African and African Diaspora Studies, Cultural Studies, Digital Studies, Native American and Indigenous Studies, and Women's and Gender Studies.

During the first year after admission, students will work to select one or two supervising professor(s) from within the Latin American Studies Graduate Studies Committee membership for their dissertation committee. The supervising professor(s) will serve as chair(s) of the dissertation committee and will be responsible for coordinating the program of study with the student and the Teresa Lozano Long Institute of Latin American Studies graduate advisor. The supervising professor must be from the academic area about which the work is being written. Coursework and other requirements for the degree are decided upon jointly by the student, the dissertation committee chair, and the graduate advisor.

**PhD Year 3: Advancing to Candidacy**

Students are required to take comprehensive examinations and to defend their dissertation prospectus by the end of the third year in residence. Students are admitted to candidacy upon passage of written and oral examinations conducted by a three member examination committee. The three member examination committee must be comprised of members of the Latin American Studies Graduate Studies Committee and are chosen by the student in consultation with the mentor(s) and graduate advisor. A dissertation research proposal (i.e., the dissertation prospectus) must be submitted and be approved by the three-member examination committee no later than one semester after the student has successfully passed the comprehensive exams. Doctoral students in Latin American studies must prepare a dissertation prospectus of an interdisciplinary nature. Approval of the proposal...
requires defending it in an oral forum. More information regarding the doctoral examination and prospectus defense process can be found here.

PhD Years 4 and 5: Research, Dissertation Writing, & Defense

A dissertation committee of at least four professors will be selected by the student and the mentor before being approved by the graduate advisor and the Graduate School. This is required to complete the process of advancing to candidacy. Three of those members (including the dissertation chair) must be members of the Latin American Studies Graduate Studies Committee. The fourth member should be from a unit outside of Latin American Studies and could be either a faculty at UT-Austin or elsewhere (i.e., pending approval of dissertation chair and graduate advisor). Once the student has advanced to candidacy, the remaining of the doctoral program is centered on the preparation of the dissertation.

The dissertation format must be in accordance with the Graduate School requirements and must also be approved by all members of the dissertation committee. Doctoral students who wish to write a dissertation in a language other than English must consult with their mentor(s) and the graduate advisor before submitting a formal petition to the Graduate School.

Students are expected to develop a high level of competence in reading and speaking in Spanish, Portuguese, or an indigenous language. They must also attain reading-level competence in another language appropriate to the program of study and approved by the dissertation committee and graduate advisor.

Additional details on both the master’s and the doctoral degree program are available here or from the graduate advisor.

Examples on previous theses and dissertations produced by the Latin American Studies program can be found here.

Linguistics

Master of Arts

Doctor of Philosophy

For More Information

Campus address: Sherri and Robert L. Patton, Jr. Hall (RLP) 4.304, phone (512) 471-1701, fax (512) 471-4340; campus mail code: B5100

Mailing address: The University of Texas at Austin, Graduate Program, Department of Linguistics, 305 East 23rd Street Stop B5100, Austin TX 78712

URL: http://liberalarts.utexas.edu/linguistics/

Facilities for Graduate Work

The University Libraries have extensive collections in linguistics and related fields, in major world and regional languages, and in minority and indigenous languages. The Benson Latin American Collection houses a major archive of materials on or in indigenous and colonial languages of Latin America. The Archive of the Indigenous Languages of Latin America (AILLA) is a digital archive of original sound recordings and related documentary resources on indigenous languages of Latin America that is curated on campus.

Members of the department maintain laboratories for research in experimental phonetics and laboratory phonology, descriptive and documentary linguistics, psycho- and neurolinguistics, and signed language linguistics. The facilities of Information Technology Services and Liberal Arts Instructional Technology Services (LAITS) are among the most comprehensive at American universities.

The principal areas of study within the department (phonology and phonetics, syntax and semantics, descriptive and documentary linguistics, linguistics of signed languages, and computational linguistics) maintain active student-faculty research groups that sponsor colloquia, conferences, and/or reading groups. The department also hosts a general linguistics colloquium with outside and on-campus speakers. Conferences include the biennial Conference on Indigenous Languages of Latin America and an annual student-run conference, the Texas Linguistics Society conference.

The Department of Linguistics has close links, including cross-listed faculty members and courses, to such adjacent departments as Anthropology; Computer Science; Speech, Language, and Hearing Sciences; Philosophy; Psychology; Slavic and Eurasian Studies; English; Germanic Studies; Middle Eastern Studies; Mexican-American and Latina/o Studies; French and Italian; Spanish and Portuguese, as well as area studies centers such as the South Asia Institute and the Teresa Lozano Long Institute of Latin American Studies.

Areas of Study

Through its core courses, the Department of Linguistics provides every doctoral student a thorough foundation in phonetics, phonology, syntax, semantics, and linguistic field methods. The department has five primary research areas: computational linguistics, phonetics and phonology, syntax and semantics, documentary and descriptive linguistics (especially of Latin American languages), and signed language linguistics. The department also offers strong training in historical linguistics and psycho- and neurolinguistics. The faculty seek to give students broad training in linguistics alongside their eventual specialization in one or more subfields.

A student's Program of Work in linguistics may be combined with supporting work in other areas such as specific languages; anthropology;
computer science; philosophy; psychology; statistics; or speech, language, and hearing sciences.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

David I Beaver  
John T Beavers  
Megan J Crowhurst  
Ashwini S Deo  
Patience L Epps  
Katrin E Erk  
Johan A Epps  
Daniel A Law  
Jessy Li

Fernando Llanos Lucas  
Kyle Mahowald  
Richard P Meier  
Scott P Myers  
David G Quinto-Pozas  
Raika Smiljanic  
Stephen M Wechsler  
Anthony C Woodbury

Admission Requirements

Admission to graduate work is not necessarily restricted to those who have a Bachelor of Arts degree with a major in linguistics, although this background is recommended. A number of other fields can also provide valuable preparation.

Degree Requirements, Linguistics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

Master of Arts

The Department of Linguistics only rarely accepts Master’s-only seeking students, and only in the area of Computational Linguistics. Students in the Doctoral program are able to acquire a Master’s degree on the way to attaining their PhD.

Candidates for the master's degree must complete 36 semester hours of coursework and submit a thesis or report for approval by a supervising committee.

The following coursework is required. A course used to fulfill requirement 1 or 2 may not also be used to fulfill requirement 3.

b. Six additional hours of research equivalencies (Linguistics 381K, 381L, 389C, 389D, 389P, 389S, 389V, 395, any advanced course or non-core area course) in the primary area of interest.

c. Six hours in a minor area.

d. Linguistics 398R or 698.

e. The remaining six hours of coursework for the report option, or the remaining three semester hours for the thesis option, must be fulfilled by courses approved by the graduate advisor.

During the first year, students write a first-year paper in conjunction with a research course. During the second year, they write their master’s report or thesis.

The department has no formal language requirement, but the faculty recommends that students have or acquire some familiarity with at least one language other than their native language.

Doctor of Philosophy

Candidates for the doctoral degree in linguistics must complete the following courses. A course used to fulfill requirement 1 or 2 may not also be used to fulfill requirement 3.

b. At least one research equivalency (Linguistics 381K, 381L, 389C, 389D, 389P, 389S, 389V, 395, any advanced course or non-core area course, including approved courses in other departments) each semester during the first three years.

c. Six hours in a minor area.

d. The remaining 12 hours of coursework must be fulfilled by courses approved by the graduate advisor.

The minor area and research equivalency courses form a core part of the Program of Work which must be approved by the graduate advisor.

The department has no formal language requirement, but the faculty recommends that students have or acquire some familiarity with at least one language other than their native language.

Admission to candidacy. To qualify for admission to candidacy for the doctoral degree, a student must complete 54 semester hours approved for the Program of Work; complete first- and second-year research papers approved for the requirement by the graduate advisor; and submit a qualifying paper and have it approved by a faculty committee.

Mexican American and Latina/o Studies

Master of Arts

Doctor of Philosophy

For More Information

Campus address: Gordon White Building (GWB) 2.102, phone (512) 471-4557, fax (512) 471-9639; campus mail code: F9200

Mailing address: The University of Texas at Austin, Graduate Advisor, Department of Mexican American and Latina/o Studies, 210 West 24th Street Inner Campus Drive Stop F9200, Austin TX 78712

E-mail: lvg@austin.utexas.edu

URL: [https://liberalarts.utexas.edu/mals/graduate/phd-program.php](https://liberalarts.utexas.edu/mals/graduate/phd-program.php)

Facilities for Graduate Work

In the 1960s, Mexican American student activists at The University of Texas at Austin agitated for the creation of an academic program responsive to their lives, experiences, and ways of knowing. From their efforts, in 1970, UT Austin created the Center for Mexican American Studies (CMAS), with América Paredes named as its first director. Over the past fifty years, UT Austin has become an important scholarly center for Mexican American, Chicano/a/x, and Latino/a/x Studies. What was once a small center borne of struggle is now the Center for Mexican American Studies (CMAS), the Latino Research Institute (LRI), and the Department of Mexican American and Latina/o Studies (MALS).

In addition to the expertise of the faculty, graduate students have access to the extensive resources of the Nettie Lee Benson Latin American Collection, the Mexican American Library Program, and the Harry Ransom Center. The University’s Central Texas location also provides opportunities for field research within the growing Mexican American

2023-2024 Graduate Catalog  ▶  Graduate  133
and Latina/o/x population across the Southwestern United States, and for research in Mexico, Central America, and the Caribbean as well.

Areas of Study

The Department of Mexican American and Latina/o Studies (MALS) is comprised of faculty members whose teaching and research are at the forefront of innovation in multiple areas of study, including the following: immigration, borders, carcerality, race, language, gender, sexuality, class, public health, culture, indigeneity, performance, disability, and digital humanities.

The Doctor of Philosophy Degree is designed to prepare graduates not only for traditional academic employment in the field of Mexican American and Latina/o studies and related fields, but also for careers in the arts, advocacy and related professions in which advanced knowledge of Mexican American and Latina/o studies is crucial. Emphasis is placed on the knowledge, methods, and skills needed for scholarly teaching, original research, intellectual leadership, creative expression, and problem solving in both the interdisciplinary field of Mexican American and Latina/o/x Studies and in core disciplines identified by each student.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Admission Requirements

Applicants must meet the minimum requirements for graduate study at the University. An admissions committee composed of Graduate Studies Committee members in Mexican American and Latina/o studies also evaluates applications, giving preference to candidates who demonstrate a strong academic background and a clear sense of the areas they wish to pursue through the doctoral degree program.

Degree Requirements, Mexican American and Latino/a Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts (MA) degree is only open to students enrolled in the PhD degree program in Mexican American and Latina/o Studies. Students admitted to the PhD program without a master’s degree must complete the requirements listed below to earn the MA degree; students admitted with a master’s degree are not required to earn a second master’s degree.

Students must complete a minimum of 36 credit hours of coursework including two required courses: Mexican American Studies 395C, Theories in Mexican American and Latina/o Studies and Mexican American Studies 395M, Interpretive Methods. In addition, students must complete at least 30 credit hours of related coursework that includes no more than six hours of Mexican American Studies 382, Conference Course in Mexican American Studies; no more than 15 hours of Mexican American Studies 392, Topics in Mexican American and Latina/o Studies; and no more than nine hours of graduate coursework taken outside the department.

Students who complete these requirements and pass the PhD qualifying exam are eligible to apply for MA degree certification. Students who choose to leave the program after completing these requirements and students who do not pass the PhD qualifying exam must complete Mexican American Studies 398R, Master’s Report, before seeking MA degree certification.

Doctor of Philosophy

Students pursuing the Doctor of Philosophy (PhD) degree must complete a minimum of 45 credit hours of coursework including the 36 credit hours required for the MA degree and six credit hours of dissertation. Students must earn a minimum grade of B (3.0) in all coursework taken in satisfaction of PhD program requirements.

Required Courses (not including dissertation) include: Mexican American Studies 395C, Theories in Mexican American and Latina/o Studies; and Mexican American Studies 395M, Interpretive Methods

Required Dissertation Courses include: Mexican American Studies 399W, Mexican American Studies 699W, and Mexican American Studies 999W.

Required for Students Seeking Employment as Assistant Instructors: Mexican American Studies 398T, Supervised Teaching in Mexican American and Latina/o Studies (may be taken outside the department with the permission of the graduate advisor when not offered in Mexican American and Latina/o Studies).

Elective courses (27 credit hours) are chosen in consultation with the student’s primary advisor and the MALS graduate advisor. Elective courses should satisfy the following requirements: 1) At least five graduate-level courses offered by Mexican American and Latina/o Studies; 2) Up to four graduate-level courses offered by other departments or interdisciplinary programs/institutes; 3) One humanities course; and 4) One social science course.

Students with a master’s degree from another institution may elect to take up to a maximum of six credit hours of conference coursework in preparation for the qualifying exam and Mexican American Studies 398T, Supervised Teaching in Mexican American and Latina/o Studies.

Students without a master’s degree must write a master’s report and take a Master’s Report Course: Mexican American Studies 398R.

Students entering the doctoral program without a master’s degree may elect to take up to a maximum of nine credit hours of conference coursework in their third year to prepare for the qualifying exam. All students must complete a qualifying exam prior to advancing to candidacy and continuing in the program. If a student does not pass the examination, they will not continue onto candidacy and their doctoral degree program will be terminated. If a student is given a conditional pass, they will have one month to make the corrections and/or edits requested by the committee. Failure to meet the one-month deadline or implement the requested changes will result in termination from the PhD program.

Before completing the program, all students must demonstrate competence in one language in addition to English (preferably Spanish, Portuguese, or a relevant Indigenous language) by means approved by the Graduate Studies Committee.
Middle Eastern Languages and Cultures

Master of Arts
Doctor of Philosophy

The Department of Middle Eastern Studies administers the master’s and doctoral degree programs in Middle Eastern Languages and Cultures.

Facilities for Graduate Work

University library holdings on the Middle East form one of the leading collections in North America. These include over 200,000 items in Arabic, Hebrew, Persian, Turkish, Kurdish, Tajiki, and Azerbaijani, among other relevant languages of the region. The collection includes a comprehensive set of Western-language reference works, general texts, monographs, and essential journals (print and electronic) that support teaching at all levels, alongside a large body of more specialized books, periodicals, manuscripts, archival documents, and electronic resources serving the needs of advanced researchers. Among the collection’s strengths are robust holdings of late nineteenth- and early twentieth-century Arabic periodicals; works of Islamic law; Arabic, Persian, and Azeri literature; a unique set of microfilms of Arabic manuscripts of the Zaydis of Yemen; Middle East banking ephemera; Iranian cinema and film studies; a virtually complete set of Turkish and Azerbaijani periodicals that forms a unique national resource; and more than 2,000 volumes of census records on Middle Eastern countries. Among our unique Israeli resources are cinema periodicals in print, the literary journal *Itan 77* and the fanzine *Queer Eye* digital collections, a collection of publications (in Arabic) by the Palestinian Forum of Israel Studies based in Ramallah, and a collection of publications by the Zochrot NGO, Tel Aviv.

Electronic material supporting Middle Eastern studies is also extensive and includes electronic databases such as JSTOR and ATLA; the Perry-Castañeda digitized map collection; the *Encyclopedia of Islam*, *Geschichte der arabischen Litteratur und Brockelmann in English*, *Foreign Office Files for the Middle East*; the Kotobarabia Arabic e-book collections; the *Encyclopaedia Judaica*; *Encyclopedia of Jewish History and Culture*, the *Encyclopedia of Jews in the Islamic World* and the Judaic Classics Library. The department has also donated to the main library a collection of approximately four thousand English-language books and reference works, some 10,000 digitized slides, and hundreds of films and periodicals. The Harry Ransom Center holds writers’ personal papers, including those of T. E. Lawrence, Paul Bowles, Freya Stark, Richard Burton, and others with a special Middle Eastern connection. The Ransom Center has significant holdings relating to Judaica, including the Isaac Bashevis Singer Archive, the Leon Uris Archive, and a portion of the literary archive of Bernard Malamud. The Dolph Briscoe Center for American History holds the Development Communication Archive, donated by the federal Agency for International Development, which consists of more than 350 linear feet of original records on issues ranging from agriculture and the environment to health and community development; about a quarter of the documents cover Middle Eastern projects. University faculty members and students also have access to vast centralized resources such as the Center for Research Libraries’ (CRL) collection in Chicago and the digital, full-text searchable CRL Alliance Global Press Archive with Eastview.

Areas of Study

The Department of Middle Eastern Studies offers master’s and doctoral degrees in Middle Eastern Languages and Cultures. At the doctoral level, students select a field of study from among the following: linguistics (theoretical linguistics or language pedagogy), literature & culture, history, Hebrew Bible/ancient Near East, or Islamic studies.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Admission Requirements

**Master of Arts**

Offered by the Department for Middle Eastern Studies, the Master of Arts (MA) in Middle Eastern Languages and Cultures (MELC) is an interdisciplinary academic degree designed to broaden and deepen the student’s knowledge of the languages and cultures of the Middle East prior to taking advanced PhD coursework. Courses taken at The University of Texas at Austin for the MA degree in MELC, but not the MA report or thesis courses, may count toward the hours required for the PhD. The MELC MA degree is to be taken as part of the MELC PhD program. It is not a terminal MA degree. Students who are interested in a terminal MA degree should consider the MA in Middle Eastern Studies offered by the Center for Middle Eastern Studies. The MA program in Middle Eastern Languages and Cultures is understood as a step in preparing students for the PhD. Students will not be admitted for the MA alone. The entering student must have a bachelor’s degree from an accredited college or university.

**Doctor of Philosophy**

In applying to the doctoral program in Middle Eastern Languages and Cultures, students select an area of study from among the following: linguistics (theoretical linguistics or language pedagogy), literature & culture, history, Hebrew Bible/ancient Near East, or Islamic studies. Through the course of their studies, students develop methodological expertise in at least one of the following areas: textual analysis, literary theory, linguistic theory, cultural theory, or the theories and
methodologies of historical inquiry. Because scholarship in Middle Eastern languages and cultures requires a high degree of language proficiency, students normally complete a Master of Arts in the area of concentration before acceptance into the PhD program. In exceptional cases, the Graduate Admissions Committee may take extensive study outside of a master's program into account. For students specializing in a living language tradition, advanced proficiency in the language of concentration is required. Students focusing on the ancient Near East should have three years of Biblical Hebrew and either knowledge of Biblical Aramaic or experience with a second ancient Semitic language, as well as background in the critical study of the Hebrew Bible.

Degree Requirements, Middle Eastern Languages and Cultures

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

Both the thesis and report options require 30 semester hours of coursework, which is to be chosen in consultation with the student’s supervisor or the graduate advisor. The thesis option requires at least 24 semester hours of coursework, to be taken on a letter-grade basis, and six semester hours (Middle Eastern Studies 698A and 698B) of thesis coursework culminating in an approved thesis. The report option requires 27 semester hours of coursework, to be taken on a letter-grade basis, and three semester hours (Middle Eastern Studies 398R) of report coursework culminating in an approved report.

All students are expected to maintain a minimum 3.50 grade point average in order to remain in good standing. Failure to maintain this minimum average will result in a warning letter and one semester of probation, during which time the student is expected to return to a minimum 3.50 average. The program has the discretion to dismiss students who are unable to meet this requirement after one additional semester.

Doctor of Philosophy

The program is designed to increase the breadth and depth of the student’s knowledge and to develop a capacity for independent scholarly research. The courses required are determined by the student’s interests in consultation with the doctoral supervisor.

The aim of the program is to educate and mentor scholars and teachers of the languages and cultures of the Middle East with the depth to support a sustained research career and the breadth to teach a range of courses on Middle Eastern topics. Students learn to design and execute research projects that will help redefine the frontiers of discovery in their field. Teaching experience helps prepare them to communicate new knowledge to experts and non-experts alike.

In applying to the program, students select an area of study from among the following: linguistics (theoretical linguistics or language pedagogy), literature & culture, history, Hebrew Bible/ancient Near East, or Islamic studies. Through the course of their studies, they develop methodological expertise in at least one of the following areas: textual analysis, literary theory, linguistic theory, cultural theory, or the theories and methodologies of historical inquiry. During their first year, incoming students choose or are assigned a faculty mentor with whom they plan to work in their major field. This mentor oversees the student’s selection of courses for registration and the design of the student’s course of study. Students are also encouraged to seek the advice of other faculty members in the program on their studies and their progress.

Students must develop a mastery of at least one major Middle Eastern language and must demonstrate scholarly research skills and potential. A period of study abroad in the region of specialization is strongly recommended for students of living languages. Study of a second Middle Eastern language is strongly encouraged, and competency in a research language (typically German or French) is required. Doctoral candidates are also expected to present papers at academic or professional conferences before graduation.

PhD students normally take three years of coursework beyond the master’s degree. Before taking the comprehensive examinations, each student must demonstrate, through formal testing, proficiency in the language required by their major field. Reading knowledge in one research language (typically German or French) is required and must be demonstrated by passing a reading test administered by the department.

To be admitted to candidacy for the degree, the student must pass comprehensive written and oral examinations. The purpose of the examinations is to certify that the student has sufficient knowledge for an academic career, and has the skills and abilities required to complete a doctoral dissertation. Examinations are normally taken during the fourth year of the program.

After passing these examinations, candidates set up a dissertation committee with the help of their supervisor. This committee approves the dissertation prospectus as a prerequisite to candidacy, guides the student in writing and revising the dissertation, and administers the final oral dissertation defense.

All students are expected to maintain a minimum 3.50 grade point average in order to remain in good standing. Failure to maintain this minimum average will result in a warning letter and one semester of probation, during which time the student is expected to return to a minimum 3.50 grade point average. The program has the discretion to dismiss students who are unable to meet this requirement after one additional semester.

Middle Eastern Studies

The Center for Middle Eastern Studies administers the master’s degree in Middle Eastern studies.

University faculty members and students also have access to vast centralized resources such as the Center for Research Libraries’ (CRL) collection in Chicago and the digital, full-text searchable CRL Alliance Global Press Archive with Eastview.

**Areas of Study**

Offered by the Center for Middle Eastern Studies (CMES), the Master of Arts (MA) in Middle Eastern studies (MES) is an interdisciplinary academic degree designed to broaden and deepen the student’s knowledge of the Middle East and its languages. The MES MA degree is a terminal MA degree. It may be undertaken in the context of one of seven dual degree programs that allow graduate students to simultaneously earn an MA in MES and a second degree from one of UT’s professional schools. MA degree requirements are the same for all MES MA students, whether or not they pursue a dual degree. There is a good deal of flexibility in meeting degree requirements; each student, in consultation with the graduate advisor, designs an individual program within the framework of the requirements described in Degree Requirements (p. 137). Many students in this program enter careers in academia, business, communication, government, global policy studies, public affairs, information studies, law, and the military.

- Bruce Wells

**Admission Requirements**

**Master of Arts**

Students seeking admission to the MA in MES must have a BA from an accredited college or university. Students seeking admission to a Dual Degree program must apply to both CMES and the second academic unit for admission, and undergo admissions evaluations by both units. Dual degree students typically spend a third year at CMES (or a fourth, in the case of the dual degree in Law).

**Degree Requirements, Middle Eastern Studies**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Arts**

This program consists of at least 30 semester hours, including a six-semester-hour thesis; or at least 33 semester hours, including a three-semester-hour report. With the exception of Middle Eastern Studies 698A, 698B, and 398R, all courses must be taken on the letter-grade basis. For the 30-semester-hours thesis option, students complete 12 semester hours of Middle Eastern studies graduate coursework, six hours of intermediate to advanced Middle Eastern language coursework, up to six semester hours of concentration coursework relevant to their thesis, and six semester hours of thesis. For the 33-semester-hours report option, students complete 15 hours of Middle Eastern studies coursework, six hours of intermediate to advanced Middle Eastern language courses, up to nine semester hours of concentration coursework relevant to their report, and three semester hours of report.

For administrative purposes, a coursework option is available to dual-degree students who are required by their other graduate program to take the 698A and 698B courses, or 398R course, so that the student does not need to complete two theses, two reports, or one thesis/one report. In such cases, a Center for Middle Eastern Studies Graduate Studies Committee member must still serve as either the supervisor, co-supervisor, or second reader.

Language requirement (six semester hour minimum): The student must complete either two upper-division or graduate-level courses in one modern Middle Eastern language while enrolled in the degree program. These two courses shall be applied to the Middle Eastern studies major.
area coursework requirement. Students who are native speakers of a Middle Eastern language must complete these courses in a different modern Middle Eastern language than their native language.

All students are expected to maintain a minimum 3.50 grade point average in order to remain in good standing in the program. Failure to maintain this minimum average will result in a warning letter and one semester of probation, during which time the student is expected to return to a minimum 3.50 grade point average. The program has the discretion to dismiss students who are unable to meet this requirement after one additional semester.

Dual Degree Programs
The Center for Middle Eastern Studies offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Degree Requirements, Philosophy
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts
The master's degree program with report requires completion of Philosophy 384F and 389R, and 27 additional semester hours of graduate coursework in philosophy or 21 additional semester hours of graduate coursework in philosophy and six hours of upper-division or graduate coursework in a supporting subject. The master's degree program with thesis requires completion of 30 hours of graduate coursework in philosophy, or 24 hours of graduate coursework in philosophy including Philosophy 698 and six hours of upper-division or graduate coursework in a supporting subject.

Doctor of Philosophy
In addition to the general requirements given in Degree Requirements (p. 21), the requirements for the doctoral degree are as follows:

a. Philosophy 384F and 389, completed in the first year of graduate study.

b. A graduate course in each of the following: history of philosophy (any period up to or including Kant), metaphysics and epistemology, and ethics.

c. Philosophy 398T, a one-semester teaching internship.

d. Five additional graduate courses in philosophy.

e. Proficiency in a language other than English, or two additional graduate seminars in philosophy, or two additional upper-division or graduate seminars in a related area approved by the Graduate Studies Committee chair. Proficiency in a foreign language may be shown by completion of four semesters of coursework, or the equivalent, either before or after admission to the program.

f. Completion and defense of a dissertation prospectus, by the end of the third year.

g. Completion and defense of a dissertation.

Facilities for Graduate Work

The Department of Psychology is located in the Sarah M. and Charles E. Seay Building. State-of-the-art computer networking is integrated into the building; there are computer facilities, computerized laboratories, and technological support for students and faculty members. Laboratory facilities include environmental control of sound, light, and temperature, with vibration-free areas for auditory and vision research. A number of specialized research centers are located in the building, including the Children’s Research Center, the Center for Perceptual Systems, the Institute for Mental Health Research, and the Clinical Training Clinic.

The Biomedical Imaging Center (BIC), located in the Norman Hackerman Building, and in the Health and Discovery Building at the Dell Medical School, is an interdisciplinary, multi-methods facility specializing in non-invasive neuroimaging. The core of the center are two Siemens 3T MRI scanners used by many researchers for studies of human perception, memory, decision-making, and behavior. Unique emphases at the BIC include a strong connection to supercomputing resources at the Texas Advanced Computing Center (TACC), real-time fMRI, high-resolution / 3D visual presentation, and support for developmental studies. The facility also contains a number of resources for imaging in model systems, as well as imaging-informed fabrication and machining.

Graduate students and faculty members in the Department of Psychology participate in research programs with graduate students and faculty members in the Department of Human Development and Family Sciences, also housed in the Seay Building, and in many other fields, including biological sciences, communication, computer science, educational psychology, kinesiology, linguistics, pharmacy, and sociology. The Hogg Foundation for Mental Health and the Waggoner Center for Alcohol and Addiction Research provide additional collaborative opportunities.

Areas of Study

Graduate work is offered in the following areas of specialization: behavioral neuroscience; clinical psychology; cognition, brain and behavior; developmental psychology; individual differences and evolutionary psychology; perception, brain, and behavior; and social personality psychology; Students are admitted for graduate work in one of these areas. Students in any of these areas may also complete a portfolio in applied statistical modeling. The program in clinical psychology has been approved by the Commission on Accreditation of the American Psychological Association (APA) and the Psychological Clinical Science Accreditation System (PCSAS). The program in general psychology is a STEM Designated Degree Program, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

Degree Requirements, Psychology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The psychology graduate program is designed primarily to lead to the degree of Doctor of Philosophy. Students intending to earn the doctoral degree may enroll for the Master of Arts with special permission. The department does not admit students solely for a Master’s degree. The department’s requirements for the Master of Arts are 30 hours of coursework, including Psychology 384M; one course from two of the core content groups (the core content groups are available on the Department of Psychology website); at least two thesis courses (Psychology 698A and 698B); and fulfillment of the general requirements of the Graduate School. An empirical thesis is required.

Doctor of Philosophy

Graduate training in the Department of Psychology is flexible and every effort is made to permit students to take courses that fit their own interests and professional goals. Students may engage in considerable work in computer sciences, biology, sociology, mathematics, or other fields. All graduate students must complete at least two advanced statistics courses, one to be taken during the first year, an ethics course, coursework in their area of specialization, research hours, dissertation courses, and three core courses from at least two of the following core content groups: (1) behavioral neuroscience/psychopharmacology;
Religious Studies

Master of Arts
Doctor of Philosophy

Facilities for Graduate Work

Graduate students in religious studies have access to significant collections of research materials in a number of fields. The Perry-Castañeda Library houses nearly 200,000 volumes cataloged under categories pertaining to religious studies. The University Libraries also have extensive microfilm and microfiche holdings of document collections and provide access to important online collections of source materials. University Libraries' substantial holdings in history, classics, sociology, anthropology, Asian studies, and Middle Eastern studies are invaluable to students studying religion. Special collections in the Harry Ransom Center, the Benson Latin American Collection, and the Dolph Briscoe Center for American History also offer opportunities for research.

Areas of Study

Students develop specialization in areas of concentration that are defined geographically, historically, or in some cases, methodologically. In all areas of concentration, students study the development of and interactions between religious phenomena in their particular cultural and historical contexts, and they use relevant theories and methodologies to understand these phenomena. Students define their major, supporting, and thematic fields within their area(s) of concentration.

Students take a set of required courses established by each of these concentrations and fields in order to develop the research and interpretative skills necessary for original research and to learn the contextual knowledge necessary for understanding religion within a particular geographical and chronological framework.

The four areas of concentration are Religion in the Ancient Mediterranean, Religion in the Americas, Religion and Society, and Religions in History.

Degree Requirements, Religious Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

To obtain the master's degree in religious studies, students must complete a total of 30 semester hours: either 27 hours of coursework and a three-hour report; 24 hours of coursework and a six-hour thesis; or 30 hours of coursework with no thesis or report. Students who wish to pursue the no-thesis, no-report degree option must obtain approval in advance from the Department of Religious Studies. Prior graduate coursework will be taken into consideration. All students must complete at least 18 semester hours of graduate coursework in religious studies. No more than six hours of upper-division undergraduate credit may be counted toward the degree. All students must complete a theory and methods course (Religious Studies 383M) and must participate in departmental and concentration colloquia.

Students also complete the core courses required for their area of specialization. Specific course numbers are available from the office of the graduate coordinator.
In addition, in consultation with a faculty advisor, each student identifies a related field outside the major field in which to complete six hours of graduate coursework. This coursework may be either from outside the department or in another area of religious studies. The related field must be approved by representatives of the Graduate Studies Committee.

Each student’s progress is reviewed after the fourth semester of study by the Graduate Studies Committee. This committee makes one of three recommendations: that the student (1) proceed to the doctoral degree requirements upon satisfactory completion of the master’s degree requirements; (2) be reviewed again before proceeding to the doctoral degree requirements; or (3) leave the program.

Doctor of Philosophy

A doctoral student in religious studies must complete 60 semester hours of coursework, including the doctoral seminar in religious studies (Religious Studies 384D), dissertation research and writing courses, and additional courses related to the student’s concentration. Courses taken to complete the master’s degree requirements (except for the master’s report or thesis) also count toward the total number of hours. Students who enter with a master’s degree from another institution may petition to have up to six hours of coursework (not including the thesis hours) transferred toward the doctoral requirements. While in residence, doctoral students must participate in the departmental and concentration colloquia.

Students enter the program having chosen one of the four areas of concentration. They must fulfill the foreign language requirements for the concentration. In addition, each student identifies a thematic topic that crosses geographical and temporal boundaries and completes other courses necessary for exam preparation. Each student’s progress is reviewed during the eighth semester of study, at which time it is normally expected that the student has been admitted to doctoral candidacy.

To qualify for admission to candidacy for the doctoral degree, students must complete the prescribed course of study in the concentration area and pass qualifying exams in four fields: (1) the major field; (2) the supporting field(s); (3) the thematic field; and (4) the special topic or dissertation field. The exams consist of written essays for each field and an oral defense of the essays. Candidacy is also contingent upon regular participation in the departmental and concentration colloquia, as certified by the graduate advisor. To file for doctoral candidacy, the student must establish a dissertation committee and have a dissertation proposal accepted by the committee. Students then write the dissertation and defend it in a final oral examination before the dissertation committee. Students are expected to write the dissertation, have it approved, and pass the final oral examination within two years of admission to candidacy.

Rhetoric and Writing Studies*

For More Information

Campus address: Parlin Hall (PAR) 3, phone (512) 471-6109 or (512) 475-6356; campus mail code: B5500

Mailing address: The University of Texas at Austin, Department of English, Graduate Program, 208 West 21st Street Stop B5500, Austin TX 78712

URL: https://liberalarts.utexas.edu/rhetoric/graduate-studies/

Facilities for Graduate Work

The Department of Rhetoric and Writing [DRW] offers innovative curriculum, research, and pre-professional training that prepares students to engage scholarly conversations about rhetorical theory from historical and global perspectives and to conduct empirical research using qualitative and quantitative methodologies. The program offers practical training in rhetoric and writing pedagogy and opportunities to apply rhetorical principles to nonacademic problems. Our faculty have diverse specialties in rhetorical history; digital rhetorics; feminist rhetorics; cultural rhetorics; technical communication; rhetorical theory; writing theory and pedagogy; queer rhetorics; public rhetorics; and rhetorics of science and technology. Training in this program will include core disciplinary and interdisciplinary perspectives for a multi-dimensional understanding of rhetoric and how it can be ethically applied to academic, practical, and community problems.

The DRW houses the Digital Writing and Research Lab [DWRL] and the University Writing Center [UWC], both of which offer unique training and employment opportunities for graduate students. Positioned at the intersection of rhetoric, writing, and technology, the DWRL was established in the 1980s and remains dedicated to the practice, teaching, and theory of the emerging digital literacies that are a requisite part of any 21st century liberal arts education. The UWC, founded in 1993, offers a wealth of practical and pedagogical resources for graduate and undergraduate students, including in-person and online writing consultations. Additional facilities for graduate work include an excellent library system and the world-renowned Harry Ransom Center.

Areas of Study

Courses are offered in the following areas of study: rhetorical history; digital rhetorics; feminist rhetorics; cultural rhetorics; technical communication; rhetorical theory; writing theory and pedagogy; queer rhetorics; public rhetorics; and rhetorics of science and technology.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Casey A Boyle Davida H Charney

* The Rhetoric and Writing doctoral program pending approval of the Texas Higher Education Coordinating Board at the time of Publication.

Degree Requirements, Rhetoric and Writing Studies*

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Doctor of Philosophy*

The Ph.D. program in Rhetoric and Writing Studies requires a minimum of 57 hours of coursework, six semester hours in a digital writing and research practicum, and a minimum of six exam hours and six dissertation hours. Students advance to candidacy for the doctoral degree after completing the required coursework and practicum; demonstrating language proficiency in one language in addition to English; and passing both the third-year area exam and the prospectus examination. Specific details about each requirement are available from the graduate advisor.

2023-2024 Graduate Catalog  Graduate  141
Curricular requirements are the same for students entering with or without an M.A. However, with the approval of the Graduate Studies Committee (G.S.C.), students may apply up to six hours taken outside the program to their degree requirements.

* The Rhetoric and Writing doctoral program pending approval of the Texas Higher Education Coordinating Board at the time of Publication.

**Russian, East European, and Eurasian Studies**

**Master of Arts**

**For More Information**

Campus address: Burdine Hall (BUR) 452, phone (512) 471-3607, fax (512) 471-6710; campus mail code: F3600

Mailing address: The University of Texas at Austin, Graduate Program, Center for Russian, East European, and Eurasian Studies, 2505 University Avenue, Stop F3600, Austin TX 78712

URL: [http://liberalarts.utexas.edu/slavic/graduate/about.php](http://liberalarts.utexas.edu/slavic/graduate/about.php)

**Facilities for Graduate Work**

The University Libraries contain about 80,000 volumes and excellent supporting material on Russia and Eastern Europe. The Harry Ransom Center holds important original documents, including the Alexander Kerensky papers and collections on Soviet history and literature. The Population Research Center houses extensive census data for Eastern Europe and the former Soviet Union, dating back to the Russian census of 1897. The Audio Visual Library in the Fine Arts Library has several hundred films and video recordings from Russia, Eastern Europe, and Eurasia. The Lyndon B. Johnson Presidential Library and Archive holds millions of pages of state documents, many of which relate to Cold War diplomacy, arms control, East-West trade, and major historical events like the 1968 Prague Spring.

The Center for Russian, East European, and Eurasian Studies Resource Center houses about five hundred books and journals on the region, as well as audio and video recordings. More than sixty faculty members regularly teach courses dealing with Russia, Eastern Europe, and Eurasia.

**Areas of Study**

The Master of Arts in Russian, East European, and Eurasian studies is a two-year, multidisciplinary program that offers advanced scholarly training for students who seek integrated knowledge of the language, history, society, and culture of the former Soviet Union and Eastern/ Central/Southeast Europe, or one or more of their subareas. The program is designed for students preparing for careers in the professions and for those seeking an intermediate, interdisciplinary master’s degree before pursuing a doctorate in a particular discipline. Within the requirements of the program, students may choose an individual course of study to meet their needs, with a broader choice of courses than is possible in a traditional disciplinary master's degree program.

The program of study may involve work in any of the following academic disciplines: anthropology; architecture; art history; business; comparative literature; economics; European studies; geography; government; history; law; linguistics; Middle Eastern studies; music; philosophy; public affairs; radio-television-film; Russian, East European and Eurasian studies; and sociology.

Candidates for the degree are expected to acquire extensive knowledge of the country or countries of their specialization, as well as working competence in one of the region's languages.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Katherine M Arens
Kiril Avramov
Zoltan D Barany
Vladislav Beronja
Craig A Campbell
David J Eaton
James K Galbraith
Thomas Jesus Garza
Sabine Hake
Alan J Kuperman
Mark A Lawrence
Tatjana Lichtenstein
Amy H Liu

Robert G Moser
Mary C Neuberger
Chelsi West Ohueri
Lorinc Redei
Jason Edward Roberts
Steven Seegel
Maria Sidorkina
Jeremi Suri
Danilo F Udovicki
Rachel Wellhausen
Charters S Wynn

**Admission Requirements**

Applicants must have a bachelor's degree in any field from an accredited college or university. Preferred qualifications include significant course work on and/or professional experience in the former Soviet Union or East/Central/Southeast Europe, and/or intermediate low proficiency in at least one of the languages spoken in the region.

**Degree Requirements, Russian, East European, and Eurasian Studies**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Arts**

The program requirements are designed to give students a broad background in the area of Russian, East European, and Eurasian studies. Master’s candidates may choose the thesis option, consisting of at least 31 semester hours of coursework (including the thesis); or the report option, consisting of at least 34 semester hours (including the report).

Under either option, at least 18 hours must be in non-language graduate coursework that deals primarily with the region of Russia, Eastern Europe, and Eurasia. Requirements include the interdisciplinary core course, Russian, East European, and Eurasian Studies 381 and the Master’s Writing Colloquium (Russian, East European, and Eurasian Studies 189). Additionally, each student must take at least one course from each of the following categories:

- Topics in Literature and Culture (Russian, East European, and Eurasian Studies 386);
- Topics in History, Economics, and Government (Russian, East European, and Eurasian Studies 387);
- Topics in Sociology, Geography, and Anthropology (Russian, East European, and Eurasian Studies 388); and
- a methodology or theory course from a list of approved courses.
All courses counted toward the degree must have content relevant to the former Soviet Union or East/Central/Southeast Europe. The student must pass an oral proficiency test in the selected language at the Interagency Language Roundtable (ILR) level 1+ or the American Council of Teachers of Russian intermediate-mid level. Credit earned in fulfilling the language requirement may not be counted toward the degree, since language competence is a necessary tool for graduate study in Russian, East European, and Eurasian studies; however, content courses taught in a foreign language at the advanced level (fourth year or above) may be counted as electives courses towards the MA degree.

Dual Degree Programs

The Center for Russian, East European, and Eurasian Studies offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Facilities for Graduate Work

The Department of Sociology at The University of Texas at Austin is one of the top graduate programs in the country. Its 40 faculty members are involved in research and publication on a broad range of topics. Among the department’s specialties are gender; race/ethnicity; demography; family; health; poverty and inequality; political sociology/development and globalization; and work, occupations, and organizations. Graduate students receive instruction in the full range of sociological methodologies, including comparative/historical methods, ethnographic fieldwork, and quantitative data analysis. Professionalization courses include formal instruction on publishing, presenting papers at professional conferences, and teaching. The department has housed a number of prominent journals, including *Gender & Society*, *The Journal of Health and Social Behavior*, and the *Latin American Research Review*. Faculty members serve key roles in a number of national and international professional societies, including the American Sociological Association and the Population Association of America.

The Department of Sociology is located in Robert L. Patton Hall (RLP), which also houses the innovative Urban Ethnography Lab and the Population Research Center (PRC), one of the preeminent demographic research and training centers in the United States. Research grant and fellowship opportunities are available through the PRC. The research foci of the PRC include children, youth, and families; population health; religion and demographic processes; and Latin American and border demography. Both the Department of Sociology and the PRC have computer laboratories, data archives, and a weekly lecture series. There are also opportunities for students to receive travel and fellowship funds to support their work.

Faculty and students are also affiliated with the Center for Women’s and Gender Studies (CWGS), which provides graduate students with the opportunity to receive a certification in women’s studies. Many sociology students present their original research at the annual CWGS graduate student conference. Other centers on campus provide research and teaching opportunities for sociology graduate students, including the Warfield Center for African and African American Studies, the Department of Mexican American and Latino/a Studies, the Center for Asian American Studies, the Center for Middle Eastern Studies, the Schusterman Center for Jewish Studies, and the Teresa Lozano Long Institute of Latin American Studies.

Areas of Study

Graduate study is offered in theory; education; health; family; race and ethnicity; gender; political sociology, development and globalization; crime, law, and deviance; demography; and work, occupations, and organizations.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Sociology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

Students typically earn the Master of Arts in the course of work leading to a doctoral degree, rather than as an end in itself. The master’s degree requires 30 semester hours of graduate work, including six hours in the thesis course. The coursework must include: two courses in social statistics, one in research methods, two in theory and three sociology elective courses. The degree program usually takes two years. Students often enter the graduate program with a master’s degree from another institution. Such students must take the required courses at the University or transfer credit for them as described in Degree Requirements (p. 21).

Doctor of Philosophy

The doctoral program requires at least 42 semester hours of graduate coursework, including two dissertation courses. The coursework requirements include the 24 semester hours of work required for the
master's degree and a variety of methodological and substantive courses in sociology. Specific course requirements may vary depending on the demography or the non-demography program of work. Additional information is available from the department.

To be admitted to candidacy for the doctoral degree, the student must have completed all master's degree requirements and the doctoral course requirements, must pass a comprehensive examination in an area of specialization, and must defend a dissertation proposal (also called a dissertation prospectus). The degree is awarded after completion and defense of the dissertation. Most students need three or four years beyond the master's degree to complete the doctorate.

Stackable Certificate Programs, Sociology

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Sociology: Demography

The Sociology: Demography stackable graduate certificate is designed for students who wish to develop a specialization in theories and methods related to the study of demography and population sciences. The stackable graduate certificate is open to any University of Texas at Austin degree-seeking graduate student and requires three courses (nine credit hours). All courses required for the stackable graduate certificate are offered in a face-to-face format on the UT Austin campus.

Women’s and Gender Studies

Master of Arts

For More Information

Campus address: Burdine Hall (BUR) 536, phone (512) 471-5765, fax (512) 475-8146; campus mail code: A4900

Mailing address: The University of Texas at Austin, Graduate Program, Center for Women's and Gender Studies, 2505 University Avenue Stop A4900, Austin TX 78712

E-mail: cwgs@austin.utexas.edu

URL: https://liberalarts.utexas.edu/cwgs/graduate-studies/

The mission of the Center for Women's, Gender and Sexuality Studies (CWGS) at The University of Texas at Austin is to promote research, teaching, and learning that centers the categories of gender and sexuality, recognizing that experiences of gender and sexuality are also inextricable from race, nationality, caste, disability, and socio-economic class. Through rigorous intersectional and feminist scholarship, decolonial and feminist teaching, and creative and public-facing programming, we seek to articulate, analyze, and critique relationships among gender, sexuality, power, knowledge, oppression, and liberation. We seek to be an international resource for research, teaching, and learning, cultivating intellectual spaces where students, faculty, and community can produce and proliferate knowledge about gender and sexuality that will create a more equitable and just world.

Our areas of expertise include: feminist theory; intersectional feminisms; LGBTQ+ studies; disability studies; the history, culture and socio-political processes of genders and sexualities; and the transnational politics of gender and sexuality (including transnational Black and indigenous feminisms, feminisms of the global South, and gender and migration). We are committed in all aspects of our work to anti-racist and queer feminisms.

Within CWGS, the LGBTQ Studies Program contributes to campus-wide resources for an LGBTQ-friendly and gender-inclusive campus. Central to our mission is the affirmation of queer and trans students, faculty, and staff including people of color, undocumented people, Indigenous peoples, disabled people, and people with multiple marginalized identities – as well as a commitment to engaging with queer and trans scholarship, including critical race scholarship, disability studies, Indigenous studies, and other interconnected critical frameworks.

Facilities for Graduate Work

The Center for Women's and Gender Studies, which administers the master's degree program in women's and gender studies, is a campus-wide interdisciplinary program with almost three hundred affiliated faculty members from almost all colleges and schools. The center hosts a major lecture series or scholarly conference each year and its annual Emerging Scholarship in Women's and Gender Studies Conference in which graduate and undergraduate students present their work.

The University offers several unique resources for interdisciplinary and cross-cultural research in women's and gender studies. Students and faculty have the support and collaboration of a dedicated Women's and Gender Studies/LGBTQ Studies Librarian at the University Libraries. The Harry Ransom Center includes celebrated rare book and manuscript collections in American and modern literature, including letters by Radclyffe Hall and the papers of Una Troubridge; papers of twentieth-century authors including Anne Sexton and Julia Alvarez; papers, including diaries and recipes, reflecting women’s daily life; artwork, including Frida Kahlo’s Self-Portrait with Thorn Necklace and Hummingbird (1940), as well as the photographs of Victorian photographer Julia Margaret Cameron; and more, as reflected on the HRC’s Women’s Studies area guide. The Nettie Lee Benson Latin American Collection is one of the world’s great collections of materials in Latin American, Mexican American, and Latino studies. Archival collections at the Benson include the materials of queer Chicana feminist author Gloria E. Anzaldúa, Texan author of Borderlands/La Frontera: The New Mestiza; letters of Nobel-prize winning Chilean author and diplomat Gabriela Mistral; materials of internationally-renowned Austin musician Tish Hinojosa; and the papers of the National Latino/a Lesbian and Gay Organization. The Dolph Briscoe Center for American History holds the largest collection of extant historical manuscripts dealing with Texas, including the Black Texas Women Archive of materials and oral
The limited size of the program enables a small, dynamic group of students who will make a difference in the community. Both in and outside of academia, the program prepares graduates to pursue doctoral work in a traditional discipline or work, health care, education, the arts, technology, and business. It also raises new questions, formulates theories, or carries out empirical research or creative work that prepares them for research or professional work that prepares them for research or professional careers in which knowledge about women, gender, and sexuality is crucial. Students who complete the program graduate with a substantial understanding of and commitment to resisting interlocking oppressions; critical knowledge of women’s human rights; and scholarly connections to the center’s faculty. The master’s degree in women’s and gender studies is excellent preparation for further training in public policy, social work, health care, education, the arts, technology, and business. It also prepares graduates to pursue doctoral work in a traditional discipline or in women’s and gender studies at another institution.

The Center for Women’s and Gender Studies offers a Master of Arts degree, a dual degree (p. 145) master’s program, and a graduate portfolio (p. ) program.

Areas of Study

Women’s and gender studies comprises research or creative work that raises new questions, formulates theories, or carries out empirical investigations that further understanding of science, social science, history; the humanities and arts, education, public and social policy, and paradigms of knowledge in applied and professional fields in such a way that women and gender systems are brought to the center of scholarship. Students pursue disciplinary and interdisciplinary research or creative work that prepares them for research or professional careers in which knowledge about women, gender, and sexuality is crucial. Students who complete the program graduate with a greater understanding of the field of women’s and gender studies; an understanding of and commitment to resisting interlocking oppressions; critical knowledge of women’s human rights; and scholarly connections to the center’s faculty. The master’s degree in women’s and gender studies is excellent preparation for further training in public policy, social work, health care, education, the arts, technology, and business. It also prepares graduates to pursue doctoral work in a traditional discipline or in women’s and gender studies at another institution.

The Center for Women’s and Gender Studies offers the Master of Arts degree, two doctoral degree (p. 145) master’s programs, and a graduate portfolio (p. ) program.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Admission Requirements

An admission committee composed of Graduate Studies Committee members evaluates all applications. The committee seeks to admit a small, dynamic group of students who will make a difference in the community, both in and outside of academia. The limited size of the incoming cohort allows the program to provide each student with personal attention and fosters a sense of community among students and faculty members.

The Admissions Committee looks for candidates with an understanding of women’s and gender studies as a field, commitment to antiracist feminist practice, a strong academic background, and a clear sense of the topics or areas they wish to pursue during the two-year master’s degree. The Center for Women’s and Gender Studies depends on students to be activists and leaders in the community. The Admissions Committee also looks for students who will not only attend class but also attend workshops and conferences, form organizations, volunteer, and participate in extracurricular activities.

A complete list of required application materials is published by the Center for Women’s and Gender Studies.

Graduate Portfolio Program

The women’s and gender studies graduate portfolio program is open to all graduate students at The University of Texas at Austin. It offers graduate students from all disciplines an opportunity to incorporate women’s and gender studies into their degree programs. Students may enter the program at any point in their graduate work, but it is recommended that they do so as soon as they decide to pursue the portfolio.

The program builds upon the Center’s rich and broad-based expertise across disciplines and colleges/schools. Portfolio students develop a specialization unique to their own program of work through women’s and gender studies courses, scholarly papers, and presentations.

Once all portfolio requirements are completed and the student’s graduate degree is awarded, their official University transcript will indicate completion of the graduate portfolio in women’s and gender studies.

In addition, interested students may receive an in-house certificate for the “WGS Portfolio Program with LGBTQ/Sexualities Track” by taking courses identified as having LGBTQ (lesbian, gay, bisexual, transgender, queer) studies content. This list of courses is known as the “Pink Book” and is published on the Women’s and Gender Studies website.

Requirements and application information are available online.

Graduate Seminar Courses

The Center for Women’s and Gender Studies offers an interdisciplinary program that focuses on understanding women’s experiences from a variety of perspectives and on the role gender plays in shaping society. The program’s large and diverse faculty draws on the scholarship of more than 270 distinguished faculty members from twenty-nine departments and 14 colleges and schools. Women’s and Gender Studies 393, Seminar: Topics in Women’s and Gender Studies, provides access to cutting-edge scholarship from multiple perspectives by offering topics from nearly every graduate discipline. The program’s faculty affiliates offer as many as thirty different seminar classes every semester.

Degree Requirements, Women’s and Gender Studies

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.
Master of Arts

The master’s degree is a two-year program that prepares graduates to pursue PhD work in Women's and Gender Studies at another institution or in another discipline. The master’s degree also provides good intellectual grounding for further training and professional development in the arts, business, community and non-profit organizations, education, health care, public policy, social work, and technology. Students pursuing the Master of Arts degree in Women’s and Gender Studies will write either a Thesis or a Report at the end of their coursework. The Thesis option requires 36 semester hours of coursework, of which six hours are earned in the Thesis courses. The Report option requires 36 semester hours of coursework, of which three hours are earned in the Report course.

All students must complete the following three core foundations courses in their first year: Women’s and Gender Studies 390W, Writing Workshop, Women's and Gender Studies 391, Feminist Theories, and Women's and Gender Studies 392, Research Methods Seminar in Women's and Gender Studies. Students are required to meet regularly with their thesis advisor during their second year.

In addition, each student must demonstrate competence in the research skills appropriate to the student’s overall academic and career objectives and to the final thesis or report. A minimum of four additional courses related to women, gender, sexuality, or feminism may be selected from the extensive offerings of faculty members affiliated with the Center for Women’s and Gender Studies. Other courses may be substituted with the graduate advisor’s approval.

All WGS students must also present their work at least once during the Annual Emerging Scholarship in Women's and Gender Studies Graduate Student Conference.

Integrated BA/MA Program in Women's and Gender Studies

The Center for Women's and Gender Studies offers an integrated program to enable currently enrolled, highly motivated undergraduate students with strong intellectual capacities to earn a Bachelor of Arts in Women's and Gender Studies and a Master of Arts in Women’s and Gender Studies within a five-year period. Eligible students in the integrated degree program will be granted their bachelor’s degree upon satisfactory completion of BA degree requirements, which typically occurs at the end of the fourth year in the program.

The Integrated BA/MA (WGS) program serves to highlight the intellectual rigor of the WGS program; promote opportunities for undergraduate students to pursue advanced study; improve student preparation for competitive PhD programs; and improve job market opportunities for Liberal Arts graduates.

This program is open to current University of Texas at Austin WGS Undergraduates. Interested students should contact the Undergraduate Academic Advisor in WGS before the end of their Sophomore Year (if possible) to determine eligibility.

Dual Degree Programs

The Center for Women's and Gender Studies offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Courses, Liberal Arts

Please see the General Information Catalog for a list of courses. The following fields of study are housed at the college level: Cognitive Science (CGS), Human Dimensions of Organizations (HDO), Language Teaching Coordination (LTC), and Liberal Arts (L A).

For courses offered by each department within the College of Liberal Arts, please see the corresponding department page in the following sections.

Courses, Applied Archaeology Graduate Program

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Applied Archaeology Graduate Program: Applied Archaeology (AAR).

Courses, Center for Asian American Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Center for Asian American Studies: Asian American Studies (AAS).

Courses, Center for European Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Center for European Studies: European Studies (EUS).

Courses, Center for Middle Eastern Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Center for Middle Eastern Studies: Middle Eastern Studies (MES).

Courses, Center for Russian, East European, and Eurasian Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Center for Russian, East European, and Eurasian Studies: Russian, East European, and Eurasian Studies (REE).

Courses, Center for Women's and Gender Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Center for Women's and Gender Studies: Women’s and Gender Studies (WGS).
Courses, Department of African and African Diaspora Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of African and African Diaspora Studies: African and African Diaspora Studies (AFR), and Yoruba (YOR).

Courses, Department of American Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of American Studies: American Studies (AMS).

Courses, Department of Anthropology

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Anthropology: Anthropology (ANT) and Science, Technology, and Society (STS).

Courses, Department of Asian Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Asian Studies: Asian Studies (ANS), Bengali (BEN), Chinese (CHI), Hindi (HIN), Japanese (JPN), Korean (KOR), Malayalam (MAL), Sanskrit (SAN), Tamil (TAM), Telugu (TEL), Urdu (URD).

Courses, Department of Classics

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Classics: Classical Civilization (CC), Greek (GK), and Latin (LAT).

Courses, Department of Economics

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Economics: Economics (ECO).

Courses, Department of English

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of English: English (E).

Courses, Department of French and Italian

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of French and Italian: French (FR) and Italian (ITL).

Courses, Department of Geography and the Environment

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Geography and the Environment: Geography (GRG).

Courses, Department of Germanic Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Germanic Studies: German (GER).

Courses, Department of Government

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Government: Government (GOV).

Courses, Department of History

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of History: History (HIS).

Courses, Department of Linguistics

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Linguistics: American Sign Language (ASL) and Linguistics (LIN).

Courses, Department of Mexican American and Latina/o Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Mexican American and Latina/o Studies: Mexican American Studies (MAS).

Courses, Department of Middle Eastern Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Middle Eastern Studies: Arabic (ARA), Hebrew (HEB), Middle Eastern Languages and Cultures (MEL), Persian (PRS), and Turkish (TUR).

Courses, Department of Philosophy

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Philosophy: Philosophy (PHL).
Courses, Department of Psychology

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Psychology: Psychology (PSY).

Courses, Department of Religious Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Religious Studies: Religious Studies (R S).

Courses, Department of Rhetoric and Writing

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Rhetoric and Writing: Rhetoric and Writing (RHE).

Courses, Department of Slavic and Eurasian Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Slavic and Eurasian Studies: Czech (CZ), Polish (POL), Romanian (ROM), Russian (RUS), Serbian/Croatian (S.C), and Slavic and Eurasian Languages (SEL).

Courses, Department of Sociology

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Sociology: Sociology (SOC).

Courses, Department of Spanish and Portuguese

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Spanish and Portuguese: Iberian and Latin American Languages and Cultures (ILA), Portuguese (POR), and Spanish (SPN).

Courses, Humanities, Health, and Medicine Graduate Program

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Humanities, Health, and Medicine graduate program: Humanities, Health, and Medicine (HHM).

Courses, Program in Comparative Literature

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Program in Comparative Literature: Comparative Literature (C L).

Courses, Schusterman Center for Jewish Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Schusterman Center for Jewish Studies: Jewish Studies (J S).

Courses, Teresa Lozano Long Institute of Latin American Studies

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Teresa Lozano Long Institute of Latin American Studies: Indigenous Languages of Latin America (LAL) and Latin American Studies (LAS).

College of Natural Sciences

Artificial Intelligence

Master of Science in Artificial Intelligence

For More Information

Campus address: Gates Dell Complex (GDC) 2.702, phone (512) 232-7407, fax (512) 471-8885; campus mail code: D9500

E-mail: msai@utexas.edu (prospective) / msaiGradCoordinator@utexas.edu (graduate coordinator)

URL: https://cdso.utexas.edu/msai

Facilities for Graduate Work

This degree is 100% online and uses none of the physical facilities associated with The University of Texas at Austin, nor the department providing the degree. Students in the program will have access to university electronic resources such as library services.

Areas of Study

Graduate degree candidates are expected to develop broad competence in the discipline of Artificial Intelligence as a whole. The Master of Science in Artificial Intelligence is a 100% online program, with recommended completion models of one-and-a-half to three years. This program will provide working professionals with an opportunity to develop technical expertise in areas that contribute to the simulation of human learning and reasoning process and the modeling of human motor control and motion (e.g. deep learning, computer vision, information retrieval, robotics, human-AI interaction, natural language processing, etc.). The program will provide its graduates with the skill sets necessary to work across a host of sectors including, but not limited to, forecasting consumer behavior, fraud detection, energy, healthcare, intellectual property, manufacturing, and software development.

Admission Requirements

To be considered for admission, candidates must have a bachelor’s degree from a regionally accredited institution in the United States or a comparable degree from a foreign academic institution in a related field that demonstrates their capacity for success in a technical field of study. Common examples would include computer science,
computer engineering, electrical engineering, statistics, data science, or mathematics. Applicants with degrees in non-technical subject areas may be eligible for admission if the admissions committee determines they have completed sufficient relevant coursework to be fully prepared to pursue graduate study. Courses to demonstrate preparedness can be found at this link. These courses should be of a technical nature and are typically offered by a CS, engineering, math, or statistics department and will not be counted toward the degree.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Joydeep Biswas  Philipp Kraehenbuehl
Constantine Caramanis  Qiang Liu
Eunsol Choi  Roberto Martin-Martin
Isil Dillig  Raymond J Mooney
Gregory C Durrett  Sujay Sanghavi
Warren A Hunt Jr  Peter H Stone
Adam R Klivans

Degree Requirements, Artificial Intelligence

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Artificial Intelligence

The 100% online program requires a Program of Work consisting of 30 semester hours of coursework (10 courses), distributed as follows:

  a. Twelve hours of foundational coursework in machine learning, deep learning, reinforcement learning, and planning and reasoning.
  b. Eighteen hours of advanced elective study

The online program is presented as a flexible degree, developed for working professionals, and includes coursework designed to broaden and deepen their knowledge in the field.

Astronomy

Master of Arts
Doctor of Philosophy

For More Information

Campus address: Physics, Math, and Astronomy (PMA) 15.204, phone (512) 471-0481, fax (512) 471-6016; campus mail code: C1400

Mailing address: The University of Texas at Austin, Department of Astronomy, Graduate Program, 2515 Speedway C1400, Austin TX 78712

E-mail: studentinfo@astro.as.utexas.edu

URL: https://astronomy.utexas.edu/

Facilities for Graduate Work

Facilities for research in astronomy are located on the campus in Austin and at McDonald Observatory in West Texas. Equipment in Austin includes a 16-inch reflector and several smaller telescopes. In addition to the many workstations, desktop, and laptop computers owned by the Department of Astronomy and McDonald Observatory for use in data reduction and analysis, image processing, and other computer needs, Texas astronomers have privileged access to the Texas Advanced Computing Center, a nationally prominent supercomputer facility with cutting-edge computational systems and a state-of-the-art visualization laboratory. The department operates an electronics shop, engineering and instrumentation laboratories, and a well-stocked research library. The Kuehne Physics Mathematics Astronomy Library is located in the Physics, Math, and Astronomy building.

Facilities for research at McDonald Observatory include the 2.7-m reflector, which has a variety of auxiliary instruments, including optical Cassegrain and coudé spectrometers and an imager as well as a novel high-resolution near-infrared spectrometer. The 2.1-m Struve reflector is used at the Cassegrain focus. Its instrumentation includes a low-resolution optical spectrophotograph and camera, high-speed photometers, a polarimeter, and a high resolution optical spectrometer.

The 10-m class Hobby-Eberly Telescope (HET), co-located with the above facilities in west Texas, is equipped for and dedicated to spectroscopic work. A low-resolution spectrophotograph, a medium-resolution spectrophotograph, and a high-resolution spectrophotograph are available. The HETDEX (HET Dark Energy Experiment), a survey employing blank-field spectroscopy to discover high-redshift Lyman alpha emitters and probe the nature of cosmological dark energy, is currently in progress. The data collected in this survey will also be used to study galaxy evolution. The location in west Texas also hosts the only 1 m telescope node of the Las Cumbres Observatory (LCO) in the continental U.S.

Areas of Study

Graduate instruction and research are conducted in observational astronomy, and theoretical astrophysics including analytical and computational methods. Observational opportunities are available in conventional photometry, polarimetry, and fast photometry of stellar oscillations; spectroscopy and spectrophotometry of planets, stars, nebulae, galaxies, and quasars; galactic and extragalactic research; optical and infrared instrument development; planetary and cometary studies; extrasolar planets; and infrared, millimeter, submillimeter, and radio astronomy. There are also instruction and research opportunities in theoretical astrophysics, including the origin of the elements, cosmology, stellar structure and evolution, star and planet formation, and high-energy astrophysics. There are opportunities for cooperative interdepartmental research with groups in the Department of Physics and the Department of Aerospace Engineering and Engineering Mechanics.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Taft E Armandroff  Gary J Hill
Danielle Amanda Berg  Daniel T Jaffe
Brendan Peter Bowler  Sharda Jogee
Michael Boylan-Kolchin  Adam Levi Kraus
Volker Bromm  Pawan Kumar
Caitlin M Casey  Caroline V Morley
John Chisholm  Julian B Munoz
Harriet L Dinerstein  Stella S Offner
Steven Lyle Finkelstein  Paul R Shapiro
Karl Gebhardt  Christophe A Sneden
Keith Hawkins  Don Winget

Admission Requirements

Prerequisites for graduate work in astronomy are at least 15 to 18 semester hours of upper-division coursework in astronomy and physics,
including courses in mechanics, electricity and magnetism, statistical physics, and quantum mechanics. The General GRE and GRE Physics tests are not considered in selecting applicants to the PhD program. A detailed evaluation is made of each new student's physics and astronomy background to identify any deficiencies that should be addressed in order to ensure success in the program.

Degree Requirements, Astronomy

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The Master of Arts degree in Astronomy requires completion of 33 credit hours of coursework, including a six-hour Master's Thesis course. Students must also complete two elective courses selected from categories A through C below. Students must earn a grade of B- or higher in all courses that count towards the degree. At least seven courses must be drawn from categories A through C below. Students must also complete two elective courses selected from categories A through D below. With approval of the student’s research supervisor and the graduate advisor, electives may include graduate coursework offered by other related programs. In addition, all students are required to attend a professional development seminar in the fall semester of their first year.

Students begin research during their first year. Research is done under the supervision of a research supervisor and committee and normally takes a year and a half. A Master's Thesis is developed under the guidance of the committee. The thesis must be approved by the committee and submitted in electronic format to the Graduate School.

Doctor of Philosophy

Students must complete at least 33 credit hours of coursework, including a minimum of six credit hours of the dissertation course. Students must also complete two elective courses selected from categories A through D below. With approval of the student’s research supervisor and the graduate advisor, electives may include graduate coursework offered by other related programs. In addition, all students are required to attend a professional development seminar in the fall of their first year.

Students are strongly encouraged to begin research during their first year. Research is done under the supervision of a research supervisor and dissertation committee and normally takes four to five years. In the spring of their second year, students must present their research to date and pass an oral qualifying examination. Students normally apply for PhD candidacy by the end of the fall of the third year. Students must present their research in a colloquium or seminar once per year. All PhD students must complete a dissertation that constitutes a contribution to knowledge in the field. A satisfactory oral examination is required for approval of the dissertation. The dissertation must be approved by the committee and submitted in electronic format to the Graduate School.

Category A Courses (Fundamental Astrophysics):

- Astronomy 380E, Radiative Processes and Radiative Transfer
- Astronomy 381C, Gravitational Dynamics
- Astronomy 382C, Astrophysical Gas Dynamics

Category B Courses (Astronomy Main Subfields):

- Astronomy 386C, Properties of Galaxies
- Astronomy 393F, Survey of the Interstellar Medium
- Astronomy 396C, Elements of Cosmology
- Astronomy 383C, Stellar Atmospheres
- Astronomy 383D, Stellar Structure and Evolution
- Astronomy 392J, Astronomical Instrumentation
- Astronomy 394F, Planetary Astrophysics

Category C Courses (Applied Methods):

- Astronomy 382D, Astronomical Data Analysis

Category D Courses (Specialized Topics):

- Astronomy 392D, Mathematical Methods of Astrophysics

Biochemistry

Master of Arts

Doctor of Philosophy

For More Information

Campus address: Norman Hackerman Building (NHB) 2.606, phone: (512) 471-5105; campus mail code: A6500

Mailing address: The University of Texas at Austin, Graduate Program in Biochemistry, 1 University Station A4810, Austin TX 78712

E-mail: ilsgrad@austin.utexas.edu

URL: www.ils.utexas.edu/biochemistry

Areas of Study

Graduate study in biochemistry is offered in a wide range of areas including mechanisms of drug action; genetics of human disease; metabolic compartmentalization and regulation; structure and function of enzymes, toxins, viruses, ion channels, and receptors; mechanism and regulation of cellular processes; enzymology of DNA repair and replication, transcription, and translation; and computational biology. Additional details are available on the program website and from the graduate advisor.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Courses required for the major in biochemistry are:

- Biology 391 and Biochemistry 395J or 395G. Six of the 30 hours must be in a field of study outside of biochemistry, such as chemistry, biology or business. Most students take two and one-half years to earn the Master of Arts.

**Doctor of Philosophy**

For admission to candidacy for the doctoral degree, a student must complete the following courses with a grade of at least B in each: BCH 190C (any topic), BCH 290C (any topic), 395G, 395J, and Biology 391 while maintaining a GPA of 3.0. Students are also required to complete two elective courses. Electives should be graduate level science courses in biochemistry, chemistry, medicinal chemistry, microbiology, physics, or related fields. Upper-level undergraduate science courses in areas outside of biochemistry may be used as electives, if appropriate for the student's scientific development, with the approval of the graduate advisor. A qualifying examination designed to test the student's knowledge of the basic principles of biochemistry must be completed by the spring or summer of the second year. A major part of this examination consists of a research proposal written in the form used for a National Institutes of Health grant application. Students present and defend this proposal orally and are examined in terms of their ability to do independent research.

After the requirements for admission to candidacy have been completed, the chair of the Graduate Studies Committee petitions the dean of the Graduate School to appoint a dissertation committee. A student must do dissertation research under the supervision of a member of the Graduate Studies Committee. Generally this faculty member, chosen by mutual consent of the student and the professor, serves as chair of the dissertation committee.

**Integrated Degree Program (BSBCH/MA)**

The graduate program in Biochemistry offers an integrated program to enable currently enrolled, highly motivated undergraduate students with strong intellectual capacities to earn a Bachelor of Science in Biochemistry and a Master of Arts with a major in Biochemistry within a six-year period. The program requires 150 total credit hours: 120 for the Bachelor of Science in Biochemistry (BSBCH) and 30 for the MA. The integrated program is designed to prepare students for competitive post-graduate programs and provide strong leadership skills and technical depth to students entering professional positions in the life sciences, medicine or the biotechnology industry.

**Cell and Molecular Biology**

**Master of Arts**

**Doctor of Philosophy**

**For More Information**

**Campus address:** Norman Hackerman Building (NHB) 2.606, phone (512) 232-9660, campus mail code: A6500

**Mailing address:** The University of Texas at Austin, Graduate Program in Cell and Molecular Biology, 1 University Station A4810, Austin TX 78712

**E-mail:** ilsgrad@austin.utexas.edu

**URL:** https://ils.utexas.edu/cmb/

**Facilities for Graduate Work at the Center for Biomedical Research Support (CBRS)**

CBRS is a group of shared resource core facilities operated under the Vice President for Research and open to all faculty, staff, and students at The University of Texas at Austin. The cutting-edge technology, services, and expert advice offered by CBRS core facilities are valuable to many students in Cell and Molecular Biology research programs. The facilities
offer a wide range of services in nucleic acid and protein sequencing, microscopy, mass spectrometry, protein purifications and analysis, next-generation sequencing, high performance computing, bioinformatics, cryo-electron microscopy, biomedical imaging, and transgenic knock-out mice. Additionally, a large variety of supplies are available from the STEM Stockroom and freezer supply core. Keeping the core facilities as comprehensive and accessible as possible increases faculty, staff, and student research productivity.

**Microscopy and Imaging Facility.** The Microscopy and Imaging Facility provides extensive equipment and services for microscopy and structural analysis. The facility’s expert staff offer assisted use and training on instrumentation and consult on microscopy and flow cytometry research. Equipment in the facility includes scanning and transmission electron microscopes; fluorescence-based cell analyzers and cell sorters; super-resolution, TIRF, confocal, spinning disk confocal, multiphoton, and widefield fluorescence microscopes; a cryostat; vibrotome and paraffin microtomes; an ultramicrotome; and a laser microdissection system. More information about the facility’s services is available on the Microscopy and Imaging Facility website.

**Genomic Sequencing and Analysis Facility.** The Genomic Sequencing and Analysis Facility provides advanced analytical resources for analysis of DNA and RNA at scales ranging from single cells to whole-genomes. The facility operates two full-service laboratories for nucleic acid sequencing: the Next Generation Sequencing (NGS) Lab and the Sanger DNA Sequencing Lab.

The NGS Sequencing Lab has staff available for consultations to assist with project planning needs. Once research samples are ready, the NGS lab can take DNA or RNA, transform it into sequence ready libraries, and deliver data ready for analysis.

The NGS Sequencing Lab supports one Illumina NovaSeq, which is excellent for large whole genome, RNA-Seq, or single cell sequencing projects. The facility also has two Illumina MiSeq next-generation DNA sequencers that are best for smaller projects or for projects requiring longer read lengths. Additionally, the facility has two Illumina NextSeq sequencers that are ideal for intermediate scale projects, requiring more read depth than is feasible on the MiSeq. One of the NextSeq instruments has scanning capabilities allowing the core to offer the Illumina Infinium EPIC microarray.

The NGS Sequencing Lab includes a fully equipped molecular laboratory, which is outfitted with Agilent Bioanalyzers, NanoDrop, the Tecan Freedom Evo robotic liquid handling station, Hamilton Nimbus liquid handler, two Covaris shearing instruments, a 10X Chromium controller, and two automated Pippin gel electrophoresis systems.

The GSAF also houses the Sanger DNA Sequencing Lab and provides automated DNA sequencing and fragment analysis using capillary-based Applied Biosystems 3730 and 3130 DNA analyzers. These instruments offer high throughput and sensitivity with a capability of handling more than 800 samples per day, with reads greater than 700 base pairs and a success rate of over 90 percent. The AB 3730 and 3730XL are also used for the analysis of microsatellites, AFLP SNPs, and other fragment applications. Walk-up equipment available for quantitative real-time PCR include three Life Technologies ViA sytems. More information about the facility’s services is available on the Genome Sequencing and Analysis Facility website.

**Biological Mass Spectrometry Facility.** The Biological Mass Spectrometry Facility provides proteomics and metabolomics services, develops methods for collaborative research projects, and trains users on self-service mass spectrometry instrumentation. Two high-resolution, high-sensitivity Thermo Orbitrap Fusion mass spectrometers with Ultimate 3000 RSLCnano UPLC chromatography systems provide qualitative and quantitative proteomics analyses. Proteome Discoverer database searches using Sequest HT and Scaffold, MaxQuant, Perseus, and Skyline software are provided for data processing, validation and visualization, capable of identifying thousands of proteins in a single run. Techniques for quantitation include stable isotope labeling and tandem mass tags, as well as label free methods. Fractionation enables in-depth proteomics analysis. Protein post-translational modifications including phosphorylation, acetylation, methylation, oxidation, and ubiquitination are identified from the high-resolution data. De novo sequencing of antibodies and glycoepitope searches are conducted with Byonic, and Supernovo software, respectively. The Intavis DigestPro robot automatically digests and desalts samples for analysis. Protein molecular weight determination service provides good quality control for expressed and modified proteins. A self-service Bruker Autoflex maX MALDI-TOF/TOF instrument is available for analyzing proteins, nucleic acids, peptides, polymers and chemicals, with training provided by core staff. A Vanquish Duo UPLC in line with Thermo Q-Exactive is utilized for metabolomics experiments with Compound Discoverer for metabolite identification and quantitation. More information about the facility’s services and protocols can be found on the Biological Mass Spectrometry website and Wiki pages.

**Computational Biology and Bioinformatics.** The Computational Biology and Bioinformatics core (https://research.utexas.edu/cbcr) provides support for students, postdoctoral fellows, and faculty interested in the use of computational approaches to solving biological problems. This group helps lower the threshold to enter the -omics area of the life sciences. To achieve this goal this core offers an on-demand Bioinformatics Consulting Group that works with researchers on big data analysis projects. Through Training Initiatives, numerous short courses on diverse topics for learning computational approaches to biological problems; annual Summer School for Big Data in Biology; peer-led working groups, and community events that complement semester-long for-credit courses are available for the community.

Finally, the Biomedical Research Support Facility provides researchers with local computation and managed storage capabilities suitable for research computing workflows not addressed by the Texas Advanced Computing Center. For more information, visit the Center for Computational Biology and Bioinformatics website.

**Mouse Genetic Engineering Facility.** The Mouse Genetic Engineering Facility is in the Animal Resource Center and provides services to generate and archive custom-made transgenic mouse models. Services include CRISPR microinjection, DNA pronuclear injection, embryonic stem (ES) cell microinjection, gene targeting in ES cells, expansion of ES cell clones from the International Knockout Mouse Consortium, embryo cryopreservation, and re-derivation of mouse strains to pathogen-free status. The lab also performs sperm cryopreservation and in vitro fertilization. More information about the facility’s services is available on the Mouse Genetic Engineering Facility website.

**STEM Stockroom.** The STEM Stockroom is located in the Norman Hackerman Building and provides many lab and office supplies. The STEM Stockroom carries different items ranging from lab consumables, chemicals, office and cleaning supplies, as well as kits from companies such as Qiagen, Sigma, LifeTech and Fisher. Enzymes are also available from New England BioLab and ThermoFisher (Fermentas). The STEM Stockroom also does special orders. For a full inventory list, please check the Center for Biomedical Research Support website.

**Biomedical Research Supply Core (BioResSCo).** This Core maintains automated refrigerators and freezers from multiple vendors of molecular biology reagents. These units are available 24/7 to registered users. Primers can also be purchased from Sigma or IDT via a customized
website for free delivery to the Core. More information about the reagents available at this facility is available at the BioResCo website.

**Electronics Repair.** This core provides electronics services including maintenance, service, and repair of biomedical/scientific equipment and instrumentation. This is one of the only SMD (surface-mount device) rework and fabrication services on campus. Additionally, this core offers electrical and mechanical safety consultations related to classrooms and laboratories. More information about the facility’s services is available on the Electronics Repair website.

**Sauer Structural Biology Laboratory (SSBL).** The Sauer Structural Biology Laboratory is a state-of-the-art cryo-electron microscopy facility. The SSBL houses an FEI Titan Krios equipped with a Gatan K2 Summit direct electron detector and an FEI Glacios also equipped with a Gatan K2 Summit direct electron detector. Both instruments are capable of imaging macromolecular machines at atomic or near atomic resolution. The facility also contains all the accessory equipment required for high-resolution structure determination. More information about the facility’s services is available on the SSBL website.

**Biomedical Imaging Center (BIC).** The Biomedical Imaging Center is an interdisciplinary, multi-methods facility specializing in non-invasive neuroimaging. The center supports a Siemens VIDA 3T MRI scanner and a Siemens Skyra 3T MRI scanner. These instruments are used by many researchers for studies of human perception, memory, decision-making, and behavior. Unique emphases at the BIC include a strong connection to supercomputing resources at the Texas Advanced Computing Center (TACC), real-time fMRI, high-resolution / 3D visual presentation, and support for developmental studies. The facility also contains several resources for imaging in model systems, as well as imaging-informed fabrication and machining. More information about the facility’s services is available on the BIC website.

**Areas of Study**

The Interdisciplinary Life Sciences Graduate Programs, a research unit housed in the College of Natural Sciences, provides the support and infrastructure for the Cell and Molecular Biology (CMB) graduate program at The University of Texas at Austin. The CMB graduate program is supported by more than 130 faculty members from four colleges and over 10 academic departments.

The program offers students training in seven different research tracks: bioinformatics and computational biology, biomolecular structure and function, cell and developmental biology, chemical biology and drug discovery, molecular genetics, neurobiology, and plant molecular biology. Each of the tracks provides specialized courses and training for the graduate student beyond the basic core curriculum of genetics, biochemistry, molecular biology, and cell biology.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Admission Requirements

Applicants must provide evidence of strong accomplishment in the natural sciences, documented by undergraduate grades and a bachelor's degree or the equivalent in an area such as one of the biological sciences, chemistry, or physics. Preparation should include at least one semester each of cell biology and molecular biology, and one year each of calculus, organic chemistry, and general physics. Coursework in genetics and biochemistry is also required. Deficiencies in undergraduate work should be corrected before application to the program.

Because the graduate program is focused on the doctoral degree, students seeking only the master's degree are not admitted.

Degree Requirements, Cell and Molecular Biology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The master's degree is only granted under special circumstances. The student must have the approval of the graduate advisor.

Doctor of Philosophy

The doctoral degree program requires the student to accomplish creative, independent research and to document the research in a scholarly dissertation. In preparation, the student must acquire a strong foundation in biochemistry, molecular genetics, and cell biology, and a working knowledge of the area of biology in which the student intends to conduct research. This preparation is provided by the core courses and electives required for the master's degree. The student must earn a grade of at least B in each core course. To be admitted to candidacy for the degree, the student must formulate a feasible research program and pass a qualifying examination.

Chemistry

Master of Arts

URL: http://www.cm.utexas.edu/

Facilities for Graduate Work

The University Libraries provide access to key database resources such as SciFinder, Reaxys, and Web of Science, as well as hundreds of electronic scientific journals and thousands of e-books. These resources are available through the University Libraries website. The library also
maintains extensive print collections in all areas of chemistry and chemical engineering.

The Department of Chemistry maintains world-class core facilities staffed by experienced scientists. Facilities include NMR, mass spectrometry, x-ray diffraction, scientific glassblowing, and electronics maintenance and design. For further information on our facilities, including specific instrumentation available, visit Department Facilities.

Areas of Study

Graduate study in chemistry is offered in the areas of chemical biology, chemical physics, analytical, inorganic, organic, or physical chemistry. Each of these broad areas encompasses specialized aspects of the subject. Details are available from the chair of the department’s Graduate Admissions Committee.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Eric V Anslyn  
Michael Aubrey  
Carlos R Baiz  
Brian Belardi  
J Thomas Brenna  
Jennifer S Brodbelt  
Cassandra E Callmann  
James R Chelikowsky  
Richard M Crooks  
Ron Elber

Admission Requirements

The preliminary training of students seeking a graduate degree in chemistry must include at least 24 semester hours of undergraduate work in chemistry, consisting of 12 or more semester hours of upper-division coursework and at least two courses (including laboratory) in organic chemistry and two in physical chemistry; one in analytical chemistry; and one in inorganic chemistry.

Degree Requirements, Chemistry

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

One semester of Chemistry 398T is required of all candidates for advanced degrees.

Master of Arts

Master's degree students must complete 30 semester hours of coursework, including a minor of at least six semester hours. No more than nine hours of upper-division work may be counted; these hours must be divided between the major and the minor. Candidates normally must also submit a thesis based on individual research. The thesis course may be counted as six of the 30 semester hours required for the degree. In general, two and one-half years are necessary to finish the Master of Arts. A Master of Arts degree with report is not offered, nor is a non-thesis Master of Arts.

Doctor of Philosophy

Doctoral degree students who plan to specialize in analytical chemistry, chemical biology, inorganic chemistry, organic chemistry, or physical chemistry must complete six courses on the letter-grade basis. The qualifying examinations are usually completed within the first 20 months in residence or before application for candidacy. Students are examined by members of the Graduate Studies Committee in their areas of concentration before admission to candidacy. While the doctoral degree program requires a minimum of 30 credit hours of coursework including the dissertation, four to five years of full-time study, or 80-105 hours of coursework, are usually required to complete program requirements.

Facilities for Graduate Work

To provide the most advanced resources for teaching and research, the Department of Computer Science manages its own network and system of more than 1,000 hosts.

A staff of 12, under the direction of the department chair, specifies, buys, installs, and maintains this computing infrastructure. Through accounts on the department’s Linux and MacOS workstations, students, faculty members, and staff have access to public laboratories and private equipment.

Many different computer systems are available for research use by faculty members and students in the department. The department operates a general-purpose high-throughput computing (HTC) Linux cluster with over 2,000 cores, Dell PowerEdge checkpoint servers, 100 nVidia GPUs of various types, and a NetApp filer with 77TB of storage. This cluster, as well as all public computing resources, are available to everyone via HTCondor, a resource management tool for widely distributed systems. There are several hundred Linux machines in public labs, and there are over 100 linux boxes on graduate desks. Several hundred other workstations of varying configurations and platforms are located in private research labs or on researchers’ desks.

All departmental computers are networked together using one or 10 Gigabits per second Ethernet. The network, managed and maintained by staff, consists of over 100 Cisco switches, with a Cisco 6513 serving as its point of presence and firewall. Network-accessible storage is provided by a NetApp filer with 77TB of space dedicated to cluster computing work and 75TB for home directories as well as infrastructural, project and course-related storage.
Areas of Study
Graduate study in computer science is offered in the following areas: analysis of algorithms; artificial intelligence; automated reasoning; communication protocols; compilers; computational biology; computational complexity; computational visualization; computer architecture; computer graphics; computer networks; computer vision; cryptography; data mining; database management; distributed systems; fault-tolerant computing; formal methods; machine learning; mathematical software; mobile and ad hoc networks; natural language processing; neural networks; numerical analysis; operating systems; parallel programming; programming language design and implementation; randomized algorithms; real-time systems; robotics; scientific computing; secure computing; software construction from components; system modeling; theoretical computer science; and wireless networks. The Master of Science and PhD degrees in Computer Science are STEM Designated Degree Programs, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension.

Admission Requirements
Most entering graduate students have degrees in computer science. Students with degrees in other areas may be considered for admission; if admitted, they may be required to take undergraduate courses in computer science, without credit toward a graduate degree, to satisfy background requirements.

Degree Requirements, Computer Science
Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science
On-Campus. The Department of Computer Science offers two on-campus options for the Master of Science in Computer Science degree program. The thesis option requires 30 semester hours of coursework, which includes six hours in the thesis course. The option without thesis requires 30 semester hours of coursework.

Online. The Department of Computer Science also offers the Master of Science in Computer Science degree in an online format. The thesis option requires 30 semester hours of coursework, which includes six hours in the thesis course. The option without thesis requires 30 semester hours of coursework. All courses required for program completion are offered in accordance with University policies that govern non-formula-funded (Option III) degree programs. The online program is primarily designed for working professionals with coursework designed to broaden and deepen their knowledge in the field.

Five-Year Integrated Bachelor’s and Master’s Program. The Department of Computer Science offers an integrated program to enable currently enrolled, highly motivated undergraduate students with strong intellectual capacities to earn a Bachelor of Science in Computer Science and a Master of Science in Computer Science within a five-year period. The integrated program is designed to prepare students for competitive doctoral programs and provide strong leadership skills and technical depth to students entering professional positions.

Doctor of Philosophy
The Doctor of Philosophy is a research degree for students who wish to pursue research careers in academia or industry. The main goal of the doctoral program is to prepare students to do outstanding research. Doctoral students take courses that provide the foundation on which to build their research programs, and are expected to become involved in research during their first semester and continue their involvement throughout their study at the University.

Students should complete all course requirements within a three-year period and maintain a grade point average of at least 3.00 in all computer science graduate courses. After application to candidacy, students must complete at least two semesters in residence. The Doctor of Philosophy degree requires a minimum of 30 semester hours of coursework, including dissertation hours.

Data Science

Master of Science in Data Science

For More Information
Campus address: Welch Hall (WEL) 5.216, phone (512) 232-0693, fax (512) 475-8297, campus mail code: D9800
**Mailing address:** Graduate Program in Data Science, Department of Statistics and Data Sciences, The University of Texas at Austin, 105 East 24th St. Stop D9800, Austin TX 78712

**E-mail:** msdatascience@utexas.edu

**URL:** https://ms-datascience.utexas.edu

---

**Facilities for Graduate Work**

This degree is 100% online, and uses none of the physical facilities associated with The University of Texas at Austin, nor the departments jointly providing the degree (the Department of Statistics and Data Sciences and the Department of Computer Science). Students in the program will have access to university electronic resources such as library services.

**Areas of Study**

Graduate degree candidates are expected to develop broad competence in the discipline of Data Science as a whole. The Master of Science in Data Science is a 100% online program, with recommended completion models of one-and-a-half to three years. The program provides advanced training in the theory and methodologies that comprise the field of data science. That training includes, but is not limited to, courses in probability, simulation, data visualization, data mining, data ethics, data analysis, large scale data-based inquiry for big data, non-standard design methodologies, machine learning, deep learning, algorithmic techniques, and optimization. The program integrates some of the following substantive areas of application: biology, computer science, economics, education, engineering, government, neuroscience, and psychology. All courses required for program completion are offered in accordance with University policies that govern non-formula-funded (Option III) programs.

**Admission Requirements**

To be considered for admission to the program, the student should demonstrate a background knowledge of mathematics and statistics equivalent to that acquired in upper-division courses in probability and statistics, multivariable calculus and linear algebra. Students should have a degree of mathematical maturity and critical thinking skills. Students should also demonstrate a technical acumen in relevant statistical/mathematical software, and experience in computing environments and programming. Deficiencies may be made up by taking courses suggested by the graduate advisor. In most cases, these courses may not be counted toward the degree.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Catherine Calder
- Gregory C Durrett
- Adam R Klivans
- Philipp Kraehenbuehl
- Calvin Lin
- Raymond J Mooney
- Peter Mueller
- Purnamrita Sarkar
- Stephen G Walker
- Corwin Zigler

---

**Master of Science in Data Science**

The 100% online program requires a Program of Work consisting of 30 semester hours of coursework (10 courses), distributed as follows:

a) Nine hours of foundational coursework in probability, statistical inference, regression, and algorithms,
b) Nine hours of additional coursework in visualization and data ethics, natural language processing, or current topics in data science,
c) Twelve hours of coursework in advanced topics including predictive models, causal inference, machine learning, deep learning, and optimization.

The online program is presented as a flexible degree, developed for working professionals, and includes coursework designed to broaden and deepen their knowledge in the field.

---

**Ecology, Evolution, and Behavior**

*Master of Arts*

*Doctor of Philosophy*

**For More Information**

**Mailing address:** The University of Texas at Austin, Graduate Program in Ecology, Evolution, and Behavior, 100 E 24th Street Stop A6500, Austin TX 78712-1598

**E-mail:** tamra@austin.utexas.edu

**URL:** https://cns.utexas.edu/eeb-graduate-program

---

**Areas of Study**

The graduate program in ecology, evolution, and behavior encompasses a range of fields. Research ranges from the molecular level to the ecosystem, with approaches that include fieldwork, laboratory analyses, and mathematical modeling.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Degree Requirements, Ecology, Evolution, and Behavior

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The graduate program is focused on the doctoral degree; this degree is designed for those who anticipate careers in research, possibly combined with teaching or other activities. Students seeking only the master’s degree are rarely admitted. If a master’s student is admitted, their proposed program must be approved by the Graduate Studies Committee. The Master of Arts degree consists of 30 hours of coursework, including Biology 698 or 398R. The coursework must include a minor of six hours of coursework acceptable for graduate credit in another area of study.

Doctor of Philosophy

For the Doctor of Philosophy, preliminary training should have provided a working core of knowledge in general biology and the history of biology; other helpful areas are plant biology, vertebrate and invertebrate zoology, genetics, ecology, evolution, animal behavior, and physiology. Statistics and computational skills are also valuable.

Students must take a one semester core course in their first year in the program. Students take an additional three lecture courses. At least two of these must be taught by ecology, evolution, and behavior faculty. At least one must satisfy a requirement for quantitative skills. Students must also take Biology 384L, Issues in Population Biology, and a minimum of three additional courses that may include seminars or reading courses.

Human Development and Family Sciences

Master of Arts

For More Information

Campus address: Sarah M. and Charles E. Seay Building (SEA) 1.432A, phone (512) 475-7504, fax (512) 475-8662; campus mail code A2702

Mailing address: The University of Texas at Austin, Graduate Program in Human Development and Family Sciences, School of Human Ecology, 108 East Dean Keeton Street Stop A2702, Austin TX 78712

E-mail: he-hdfgrad@utlists.utexas.edu

URL: http://www.he.utexas.edu/hdfs/academics/graduate

Facilities for Graduate Work

The Department of Human Development and Family Sciences is housed in the Sarah M. and Charles E. Seay Building, which provides excellent resources for teaching and research. Computer facilities are extensive. In addition to the facilities of Information Technology Services, students have access to the department’s computer laboratory, a state-of-the-art facility equipped with advanced computers and statistical software. These resources are supplemented by extensive computer equipment in individual faculty laboratories.

The Human Development and Family Sciences Reference Room houses a non-circulating collection of more than 500 volumes and 20 journals.

The half-day preschool and infant/toddler programs of the Priscilla Pond Flawn Child and Family Laboratory provide a setting for research by faculty members and graduate students, a facility for student observation and training, and a model program for children and their families. They also provide opportunities for family involvement in the classroom, parent education programs, parent conferences, and family research. Because the laboratory has served Austin families for over 80 years, the opportunities for multigenerational and longitudinal research are significant.

The department has extensive facilities for observing and recording social interaction. The Marital and Family Interaction Laboratory is available for recording couple and family interactions in a comfortable setting. The laboratory consists of a naturalistic living room connected to well-equipped control rooms that enable interactions to be recorded unobtrusively. The facility is augmented by numerous other one-way observation and coding rooms that enable recorded data to be analyzed using state-of-the-art computer-video analysis systems.

The department also has excellent facilities for conducting survey research. These include a series of individual interview rooms and a telephone research center.

Several rich sets of data, many of which include longitudinal data from families, are housed in the department and are available to graduate students for research. These sets of data focus on a wide range of topics, including the early years of marriage; the transition to parenthood; the prediction of divorce and remarriage and their impact on children; parent-child interaction; intergenerational ties; the connection between family and peer relationships; the connection between work roles and family relationships; and the impact of poverty, television, child care policy, and adoption policy on children.

Areas of Study

The graduate program in human development and family sciences is designed to prepare students for research, teaching, and administrative positions in colleges and universities, as well as for positions in government, policy-related research organizations, and other public
and private settings. The program emphasizes research and theory on the interplay among individual development, family relationships, and institutions outside the family. Development of the individual is considered within the contexts of the family, peer group, community, and culture. The family is studied as a system of relationships, with attention to roles, communication, conflict resolution and negotiation, and family members’ perceptions of each other and of their family. Public policies and care settings outside the family are among the community influences considered in relation to the development of individuals and families. The program emphasizes the investigation of the family and other social processes that contribute to competence and optimal development in individuals from birth to maturity and how such competence is reflected in interpersonal relationships and family interactions.

Graduate Studies Committee

Degree Requirements, Human Development and Family Sciences

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The master’s degree requires completion of at least 36 semester hours of coursework; a core course sequence of 18 semester hours, consisting of theoretical and methodological foundations courses; 12 hours in research and thesis; and six hours of electives. The graduate program in human development and family sciences is designed primarily to lead to the Doctor of Philosophy degree. Students normally earn the Master of Arts degree only in the course of work leading to the doctoral degree. Further information is available from the graduate advisor.

Doctor of Philosophy

Detailed descriptions of admission procedures and program requirements are available from the graduate advisor. Work leading to the Doctor of Philosophy includes: (1) the substantive major, which consists of a cohesive sequence of courses in human development and family sciences and related disciplines; (2) coursework in research design and statistics; (3) the supporting program, which consists of work complementary to the substantive major; (4) ongoing supervised research experience; (5) a pre-doctoral research project (the equivalent of a master’s thesis); (6) a series of field-relevant tasks, such as preparing manuscripts for publication and applying for external funding in order to advance to candidacy; and (7) the dissertation.

Marine Science

Master of Science in Marine Science

For More Information

Location: 750 Channel View Drive, Port Aransas, phone (361) 749-6801, fax (361) 749-6777; campus mail code: T2500

Mailing address: University of Texas Marine Science Institute, Graduate Program, 750 Channel View Drive, Port Aransas TX 78373-5015

E-mail: gradinfo@utlists.utexas.edu

URL: http://www.utmsi.utexas.edu/

Facilities for Graduate Work

Facilities for graduate work in marine science are located at the shoreside laboratory of the Marine Science Institute in Port Aransas. The institute is located on the Aransas Pass ship channel among the dunes at the tip of Mustang Island, with easy access to bays, beaches, and the Gulf of Mexico. Environmental systems nearby include the hypersaline Laguna Madre, seagrass meadows, rivers, oyster reefs, fresh and saltwater marshes, and the nearshore and offshore Gulf of Mexico waters. The Port Aransas facility offers classrooms, laboratories (wet and dry), core facilities laboratory, research pier, seawater system, mariculture tank systems, and a specialized library. The institute’s fleet includes a 57-foot trawler (R/V Katy) and 10 smaller boats. In addition, there is a pool of four-wheel-drive vehicles for work in and around the local habitats. The shoreside research and teaching facilities also include a cafeteria, dormitories, and graduate student apartments.

Graduate students take their early coursework in Austin, including supporting work in other departments. Many courses taught in Port Aransas are available to students on the Austin campus via video teleconference facilities. Normally, one or two long semesters are spent in Austin. Most students then reside in Port Aransas while they undertake thesis and dissertation research at the Marine Science Institute. These students also take additional instruction at the Institute, including organized courses and seminars.

Areas of Study

Graduate study is organized around a curriculum with three core areas: fish physiology and ecology, ecosystems dynamics, and biogeochemistry. Each of these broad core areas includes specialized topics. Further information is available from the graduate advisor.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Admission Requirements

A prospective student’s undergraduate training should include 24 semester hours in one of the life or physical sciences. At least 12 of these hours must be in upper-division work. Adequate preparation in mathematics is expected of all students.
Degree Requirements, Marine Science

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Marine Science

For the master's degree, students must complete at least 30 semester hours of acceptable graduate work in marine science and related natural sciences, including Marine Science 698. Each student must complete the three core courses listed below and is expected to complete six semester hours of advanced courses in marine science as required by the Graduate Studies Committee or the supervising committee. A minimum of six semester hours of coursework outside of the area of specialization selected by the student and approved by the graduate advisor and supervising professor make up the minor or supporting area.

Doctor of Philosophy

Doctoral candidates must complete the three core courses listed below, for a total of 12 semester hours. While additional courses are not specified, each student is expected to complete six semester hours of advanced courses in marine science, as required by the Graduate Studies Committee or the supervising committee. A minimum of six semester hours of coursework outside of the area of specialization, selected by the student and approved by the graduate advisor and supervising professor, make up the minor or supporting area.

Students are expected to fulfill all requirements for candidacy before the end of their third year in the program at the University. This involves, as a minimum, completion of the required core courses and passage of a candidacy examination to demonstrate competence in the core areas and mastery of the chosen area of specialization, as well as selection of a dissertation committee and supervising professor.

Further information on graduate work and on available fellowships and assistantships may be found at the Marine Science Institute's website and by consultation with the graduate advisor.

Core Courses

Marine Science 481C, Marine Ecosystem Dynamics
Marine Science 482C, Marine Biogeochemistry
Marine Science 483C, Adaptations to the Marine Environment

Mathematics

Master of Arts
Doctor of Philosophy

Degree Requirements, Mathematics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office.

Facilities for Graduate Work

The Kuehne Physics Mathematics Astronomy Library has a broad range of mathematical literature for study and research. The collection offers access to a wide variety of print-based and electronic research tools, including bibliographic databases and research and teaching journals in all areas of mathematics. The collection of e-journals is extensive. Electronic resources are accessible through the University Libraries website.

The Department of Mathematics computer system is available for use in connection with courses and investigations in both pure and applied mathematics.

Areas of Study

The Department of Mathematics offers a Doctor of Philosophy (PhD) degree and a Master of Arts (MA) degree with a focus in actuarial mathematics.

Note that Master's programs are not offered in other areas of mathematics.

Graduate study in mathematics is offered in the areas of algebra, number theory, analysis, topology, geometry, applied mathematics, probability and statistics, numerical analysis, network and information theory, and actuarial mathematics.

Degree Requirements, Mathematics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office.
and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The MA degree focuses on actuarial mathematics and requires completion of at least 33 semester hours of coursework (11 three-credit-hour courses) to include Mathematics 389U, 389V, 389W, 389J, and 389P. Up to nine hours of upper-division undergraduate coursework may be used to satisfy program requirements, with no more than six of those nine in a single subject. At least 18 semester hours must be completed in Mathematics coursework, and at least six hours must be completed in supporting work, or coursework offered outside of Mathematics. Graduate program requirements vary by individual and are determined based upon each student’s exam status on arrival.

Doctor of Philosophy

The Doctor of Philosophy (PhD) in Mathematics is a research degree designed to prepare students to discover, integrate, and apply knowledge as well as to communicate and disseminate it. At the core of the program is the completion of a research project leading to a dissertation worthy of the PhD degree.

The PhD degree formally requires a minimum of 30 semester hours of advanced coursework, including a minimum of six dissertation hours. High-performing students normally require five to six years of full-time enrollment (9-12 semesters or 81 to 108 semester hours) to complete requirements of the PhD degree. It is quite exceptional (applies to less than 1% of students, and only in unusual circumstances) that a student is able to complete the requirements in less than nine semesters.

Students enrolled in the Mathematics Ph.D. program may apply to receive the MA degree after completing 30 semester hours of coursework and the report course Mathematics 398R, Master's Report, or 33 semester hours of coursework without thesis or report. The 30-33 hours are divided into major and minor areas. The major area consists of mathematics courses and the minor area consists of courses that are related to mathematics. Students should consult the graduate advisor about the courses that are allowable for the minor. Students must complete 18 to 24 semester hours in the major area and 6 to 12 semester hours in the minor area.

While the overall degree generally requires five to six years, the distribution of the coursework and dissertation components of the degree varies considerably. Among other factors, it depends on the mathematical preparation of the student on entry.

Each student is first required to pass preliminary examinations. The preliminary examinations are given once each semester. Of the 12 Prelim segments, students must pass at least seven in distinct areas, of which at least three must be by exam. A passing grade in a Prelim course is a “B”, while the passing standard for a Prelim exam is determined by the faculty committee administering that exam.

The following list lays out the kinds of coursework required of all PhD students:

• Required coursework: Prelim courses
• Elective coursework: Topics courses and graduate courses offered by other departments
• Conference courses
• Dissertation hours (minimum six hours)

It is of key importance that PhD students identify a faculty research supervisor who will supervise their dissertation research as early as possible in the program.

A small advisory committee consisting of members of the Graduate Studies Committee and the faculty research supervisor is then formed. The advisory committee administers an advanced examination in the chosen area of specialization, during which the student gives an oral presentation and is questioned by members of the committee. The student must pass the advanced examination before admission to candidacy will be approved. A detailed description of the procedure for admission to candidacy is available in the Mathematics graduate handbook.

Microbiology

Master of Arts

Doctor of Philosophy

Degree Requirements, Microbiology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

The microbiology graduate program does not accept applications for the master’s degree. However, a student accepted into and in good standing with the doctoral program may, at the discretion of the graduate advisor, be permitted to pursue a master’s degree in lieu of the PhD. The student must complete 30 semester hours of coursework, including Biology 190 (any topic), 290 (any topic), 395J, 395M, and 698, and three hours in related fields outside the microbiology program. The student must earn a grade of at least B in Biology 190 (any topic), 290 (any topic), 395J, and 395M. No more than nine semester hours of upper-division coursework may be counted toward the degree, and no more than six of these nine may be in any one field of study. In addition to the above requirements, a master’s degree student must pursue original research under the direction of a faculty member and submit an approved thesis.

Doctor of Philosophy

To be admitted to candidacy for the doctoral degree, the student must complete their preliminary examination during the spring semester of their second year. This examination consists of a presentation and defense of (1) a mock National Institutes of Health grant proposal on the topic of their PhD thesis research and (2) a proposed Specific Aims page in NIH format on a topic selected by their committee. Students will be admitted to candidacy after the successful passing of this preliminary examination. The candidate will then be required to convene their first meeting with their dissertation committee by the end of the semester following the successful passing of their preliminary examination. Individual programs of study are tailored to the student’s interests, but each student must earn a grade of at least B in the following coursework: Biology 190 (any topic), 290 (any topic), 395J, and 395M, and at least three additional hours in graduate lecture courses approved by the graduate advisor. The student must also pursue independent, original research under the direction of a faculty member; the results of this research constitute the dissertation, which fulfills the requirements of the required course Biology 399W. Each student must serve as a teaching assistant for one fall or spring semester; two six-week summer terms are considered equivalent to a semester. A well-qualified student can usually complete the doctoral degree program in five to seven years.

Neuroscience

Master of Science in Neuroscience
Doctor of Philosophy

For More Information

**Campus address:** Norman Hackerman Building Building (NHB) 2.504, phone (512) 471-3640; campus mail code: C7000

Facilities for Graduate Work

The Institute for Neuroscience offers excellent opportunities for multidisciplinary graduate study in the neurosciences. Facilities include those maintained by the participating programs in the Colleges of Natural Sciences, Liberal Arts, Pharmacy, Education, Communication, Dell Medical School and in the Cockrell School of Engineering. Institutional support, training grants, and federal and state grants to investigators in the institute provide stipends and support research. Faculty members throughout the institute participate in interdisciplinary seminars, two semester-long broad based neuroscience courses and multiple topicaly oriented neuroscience courses. The goal of the institute is to train students to employ multidisciplinary approaches in their careers in neuroscience research, teaching and industry. Toward this end, the faculty seeks to provide a diverse, cohesive, and interactive atmosphere and a flexible curriculum that meets the needs of each individual.

Areas of Study

Neuroscience encompasses behavioral, systems, cellular, molecular, and computational approaches to understanding the nervous system. The faculty use a wide variety of state-of-the-art techniques for their studies, including functional magnetic and optical imaging, various behavioral analyses of animals and humans, transmission and scanning electron microscopy, molecular and cellular biophysics, cellular- and systems-level neurophysiology, biochemistry, molecular genetics, and various types of computer modeling. The research-intensive environment emphasizes multidisciplinary investigations. The program offers students both a sound education in neuroscience and a broad research experience.

Degree Requirements, Neuroscience

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science in Neuroscience

The master’s degree program is only granted under special circumstances. The student must have approval of the graduate advisor and director.

Doctor of Philosophy

Students must complete a core curriculum that includes Neuroscience 382T, Principles of Neuroscience I, Neuroscience 383T, Principles of Neuroscience II; a statistics course; an ethics course; four graduate elective courses in neuroscience; and a graduate seminar in neuroscience. A qualifying exam is taken at the beginning of the second year that consists of an oral exam on fundamental knowledge in neuroscience. Students will also prepare a written literature review and defend it before an examining committee made up of Institute for Neuroscience faculty members who are experts in the relevant scientific areas. All eligible students must submit a predoctoral fellowship application by the end of their third year of study, and all students must serve as a teaching assistant for at least one undergraduate or graduate course.

Nutritional Sciences

Master of Science in Nutritional Sciences

For More Information

Campus address: Gearing Hall (GEA) 313, phone (512) 471-0337, fax (512) 471-5844; campus mail code: A2703

Mailing address: The University of Texas at Austin, Graduate Program in Nutritional Sciences, Department of Nutritional Sciences, 200 W 24th Street Stop A2703, Austin TX 78712

E-mail: tomatchity@utexas.edu

URL: https://he.utexas.edu/ntr/graduate-students

Facilities for Graduate Work

The Department of Nutritional Sciences research faculty are housed within the Dell Pediatric Research Institute (DPRI). The DPRI is a state-of-the-art research facility with over 150,000 gross square feet of research related lab, core facilities, vivarium resources, and administrative space. The DPRI Pediatric Assessment Center (DPAC) also includes space for pediatric subject collection. The DPAC also includes space for pediatric subject assessment and interviews as well as computing space with dedicated computers for processing nutritional intake data. The DPRI also houses a Histopathology Core (used for histologic and immunohistochemical analysis), Cell and Tissue Analysis Facility Core (confocal microscopy, laser capture microdissection and flow cytometry), and a Molecular Biology Core (genotyping and microarray analyses). Instrumentation
Programs of Study

The Nutritional Sciences graduate program includes study in the following areas: molecular and cellular aspects of nutrient function; molecular and cellular approaches to the study of nutrition and disease; nutritional biochemistry; behavioral and child nutrition; nutrient requirements and intakes and health assessment; nutrition and cancer, obesity, ingestive behavior, aging, immunity; genetics and genomics, community nutrition, and nutrition education.

The Master of Science degree program is designed to prepare individuals for advanced practitioner knowledge, preparation for advanced education in nutrition research, administration in public health programs; research and development positions at food, pharmaceutical, and chemical laboratories; and other nutrition-related fields.

The Doctoral degree program is designed to prepare students for research, teaching, and other academic positions in colleges, universities, government, and industry. Competence in related fields is emphasized, and supporting work is selected from areas such as biochemistry, biology, molecular biology, computer science, genetics, communication, geriatrics, immunology, physiology, kinesiology, psychology, ingestive behavior, or health promotion.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

- Steven Abrams
- Ryan S Gray
- Molly S Bray
- Christopher A Jolly
- J Thomas Brenna
- Laura M Lashinger
- Marissa Burgemaster
- Heather Leidy
- Jaimie N Davis
- Alessia Lodì
- Linda Ann deGraffenried
- Monica Jane Milonovich
- John Digiovanni
- Sara Johnson Sweitzer
- James C Fleet
- Stefano Tiziani
- Jeanne H Freeland-Graves
- Elizabeth Widen

Admission Requirements

The foundational training of students seeking a graduate degree should include courses in the following fields: inorganic chemistry with laboratory, organic chemistry with laboratory, biochemistry with laboratory, vertebrate or human physiology, cellular and molecular biology, statistics, and nutrition. The Graduate Studies Committee may recommend that some or all of these courses be completed as a prerequisite for admission to the program or in addition to the courses required for the graduate degree.

A handbook available from the graduate coordinator gives details of policies, procedures, and requirements.

Degree Requirements, Nutritional Sciences

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Science

There are three options to complete a Master of Science in Nutritional Sciences (MSNS). In-residence graduate students can complete 24 credit hours of graduate coursework (described in detail below) combined with six credit hours of original Master's thesis research OR 27 credit hours of graduate coursework combined with three credit hours of Master's Report (a review of the research literature in a specified area of study). Online master's students also have the option of completing 30 credit hours of graduate coursework, without completing a thesis or report. Students who complete a Master's thesis are eligible to transition to the PhD program, while students who complete the Master's Report are not eligible to transition to the PhD program.

In Residence Program. The Master of Science in Nutritional Sciences in-residence program requires 30 credit hours of coursework, distributed as follows: (1) 18 credit hours in specified nutrition courses; (2) six credit hours in a minor or supporting field such as biology, anthropology, biochemistry, immunology, educational psychology, curriculum and instruction, health education, public health, pharmacology, or kinesiology; and (3) six credit hours of Master's thesis, involving an original research project. The 18 credit hours of nutrition coursework must include the following core courses: Nutrition 390 (Topic 1: Advances in Nutritional Sciences I), Nutrition 390 (Topic 7: Advances in Nutritional Sciences II), Nutrition 390 (Topic 6: Molecular Nutritional Sciences), and Nutrition 394, Graduate Seminar in Nutritional Sciences (any topic), and at least six hours in Nutrition 390, Recent Advances in Nutritional Sciences (any topic) and/or Nutrition 392, Research Problems in Nutritional Sciences (any topic).

For students seeking a terminal master’s degree, a degree program with Report option (non-original research) is also available. For the Report option, Nutrition 398R and three additional hours in either research methods or Nutrition 390 replace the thesis courses.

Integrated Coordinated Program in Dietetics (ICPD). The ICPD integrated program is designed to allow undergraduate students in the dietetics track to complete their training in an accelerated program that offers undergraduate- and graduate-level coursework, as well as the supervised practice hours required for professional certification to become a Registered Dietitian (RD). The ICPD requires 120 hours of undergraduate coursework (see Undergraduate Catalog for details) and 30 hours of graduate level coursework. For the ICPD, the 30 hours of graduate coursework are distributed as follows: (1) 15 hours in core nutrition courses, including Nutrition 390 (Topic 1: Advances in Nutritional Sciences I), Nutrition 390 (Topic 7: Advances in Nutritional Sciences II), Nutrition 390 (Topic 6: Molecular Nutritional Sciences), Nutrition 380K (Topic 3: Experimental Design and Statistics) and Nutrition 380K (Topic 4: Advanced Experimental Design and Statistics) and (2) 15 hours of graduate coursework in Nutrition 390, Recent Advances in Nutritional Sciences (any topic) and/or Nutrition 392, Research Problems in Nutritional Sciences (any topic), selected from among areas of concentration (health promotion and disease prevention, biochemical and functional nutrition, community nutrition, lifecycle nutrition). Students also have a thesis option, which includes completing the 15 hours of core nutrition courses, along with nine hours in a chosen concentration, and six thesis hours.

Online Program. The Master of Science in Nutritional Sciences (MSNS) online degree program is designed to provide advanced nutrition training to students who have already completed their Bachelor’s in nutrition or a related science field such as biology, biochemistry, health education, kinesiology, nursing, medicine or public health. This degree does not provide a path to the Registered Dietitian (RD) certification. For additional information about becoming a registered dietitian, please visit Dietetics’ website. For the online MSNS degree, 30 semester hours are
required, distributed as follows: (1) 15 hours in core nutrition courses, including Nutrition 390 (Topic 1: Advances in Nutritional Sciences I), Nutrition 390 (Topic 7: Advances in Nutritional Sciences II), Nutrition 390 (Topic 6: Molecular Nutritional Sciences), Nutrition 380K (Topic 3: Experimental Design and Statistics) and Nutrition 380K (Topic 4: Advanced Experimental Design and Statistics) and (2) 15 hours of graduate coursework in Nutrition 390, Recent Advances in Nutritional Sciences (any topic) and/or Nutrition 392, Research Problems in Nutritional Sciences (any topic), selected from among areas of concentration (health promotion and disease prevention, biochemical and functional nutrition, community nutrition, lifecycle nutrition). Students also have a thesis option, which includes completing the above 15 hours of core nutrition courses, along with nine additional hours in their chosen concentration, and six thesis hours.

**Doctor of Philosophy**

The doctoral program typically requires four to five years of full-time study. Students are expected to meet the following requirements for admission to PhD candidacy by the end of the second year: (1) completion of courses conditional to admission; (2) 12 semester hours in nutrition, consisting of the following courses with a grade of at least B in each: Nutrition 390 (Topic 1: Advances in Nutritional Sciences I), Nutrition 390 (Topic 6: Molecular Nutritional Sciences), Nutrition 390 (Topic 7: Advances in Nutritional Sciences II), and Nutrition 394, Graduate Seminar in Nutritional Sciences (any topic); (3) six hours of additional graduate coursework in nutrition (Note: At least three hours of graduate level statistics are required; Nutrition 380K (Topic 3: Experimental Design and Statistics) and Nutrition 380K (Topic 4: Advanced Experimental Design and Statistics) are recommended); (4) six hours of graduate coursework outside nutrition in fields germane to the dissertation research, such as biology, biochemistry, molecular biology, educational psychology, curriculum and instruction, health education, and kinesiology; (5) presentation and defense of a dissertation research proposal and satisfactory response to questions on nutrition and related sciences; and (6) approval by the Graduate Studies Committee of the proposed course plan and proposed dissertation research program. Further supporting work in nutrition or related sciences may be needed to augment the program. All doctoral candidates must write a dissertation based on the results of their original research and must make a formal oral defense of the dissertation. The Graduate Studies Committee must certify that all of the degree requirements have been completed.

**Physics**

*Master of Arts*

*Doctor of Philosophy*

**For More Information**

**Campus address:** Physics, Math, & Astronomy Building (PMA) 7.326, phone (512) 471-1664, fax (512) 471-9637; campus mail code: C1600

**Mailing address:** The University of Texas at Austin, Graduate Program, Department of Physics, 2515 Speedway Stop C1600, Austin TX 78712

**E-mail:** graduate@physics.utexas.edu

**URL:** http://www.ph.utexas.edu/

**Facilities for Graduate Work**

Modern facilities for graduate study and research include a large-scale cryogenic laboratory; extensive facilities for tunneling and force microscopy and nanostructure characterization, SQUID magnetometry, and electron spectroscopy; well-equipped laboratories in optical spectroscopy, quantum optics, femtosecond spectroscopy and diagnostics, and facilities including two tabletop 100-terawatt lasers for strong-field physics, studies of wakefield electron acceleration, and a pulsed 50T magnetic field for studies of laser heating of magnetized plasmas, and two petawatt lasers (one Ti-sapphire providing 30J in 30fs and another glass laser at 200J in 150fs). The department is a member of LASER NET, a DOE supported consortium of laser laboratories for high energy density plasma physics. The Center for Gravitational Physics conducts research in conjunction with several Gravitational Wave Observatories (ground-based US LIGO, Italian/French Virgo, Japanese Kagra, and the space-based ESA/NASA mission LISA). Plasma physics experiments are conducted at the major national tokamaks in Boston and San Diego. Experiments in high-energy heavy ion nuclear and particle physics are conducted at large accelerator facilities such as the large hadron collider and ALICE at CERN, the STAR detector on the RHIC collider at Brookhaven National Lab, neutrino production at FERMI National Laboratory (Illinois), and Germany’s Deutsches Electron Synchrotron.

Theoretical work in plasma physics, condensed matter physics, acoustics, nonlinear dynamics, relativity, astrophysics, statistical mechanics, and particle theory is conducted within the Department of Physics.

Students have access to excellent computer and library facilities, including computers at TACC: Ranger, a multiprocessor computer at 504 Tflops and Stampede which provides 3.5 Pflops in a computer cluster and 7+ Pflops of coprocessor support.

The department maintains and staffs a machine shop, student workshop, low-temperature and high-vacuum shop, and an electronics design and repair shop.

**Areas of Study**

The Department of Physics has active research groups in ten main areas of current physics research: atomic, molecular, and optical physics; classical physics; nuclear physics; statistical and thermal physics; fusion plasma physics and high energy density plasma physics; condensed matter physics; biophysics; nonlinear dynamics; gravitation and cosmology; and elementary particle physics. In most of these fields both experimental and theoretical work is in progress.

**Graduate Studies Committee**

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Degree Requirements, Physics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

It is assumed that the student has an undergraduate background that includes upper-division classical mechanics, electricity and magnetism, statistical mechanics and thermodynamics, and quantum mechanics.

Master of Arts

The Master of Arts is not a part of the qualifying process for the doctoral degree. First-year students plan the first semester registration with the graduate advisor in physics. Students are encouraged to investigate all research groups in the department before selecting a professor to supervise a thesis project. The degree plan is then designed by the student, the supervising professor, and the graduate advisor. The time involved for completing a master’s degree is related to the quality of the student’s undergraduate background: the average time for completion by students with a good undergraduate background is one calendar year and one semester.

Doctor of Philosophy

To be admitted to candidacy for the doctoral degree, the student must (1) fulfill the core course requirement described below; (2) show evidence of exposure to modern methods of experimental physics—this exposure may be gained in an experimental senior thesis or internship completed by the student as an undergraduate and approved by the graduate advisor and the chair of the Graduate Studies Committee, by previous participation in an experimental program, or in Physics 380N; and (3) fulfill the oral examination requirement described below.

Core courses. During the first two years of graduate study, the student must take four from among the following core courses: Physics 385K, 385L, 387K or 387L, and 389K or 389L. The student must earn an official grade of at least B- in each course and a grade point average of at least 3.33 across the four courses. The student may ask for the grade they earn in Physics 380N to be substituted for the grade in one of the core courses when the average is computed. A well-prepared student may seek to fulfill the core course requirement by earning satisfactory grades on the final examinations for one or two of these courses rather than by registering for them; in this case, the student does not receive graduate credit for these courses, but the grade is counted toward the required core-course average for the purposes of qualifying.

The oral qualifying examination. After satisfying the first two requirements above, and within 27 months of entering the program, the student must take an oral qualifying examination. The examination consists of a presentation before a committee of four physics faculty members, one of whom is a member of the Graduate Studies Subcommittee (GSSC). The presentation is open to all interested parties. It is followed by a question period restricted to the student and the committee. The questions during this session are directed toward clarifying the presentation and helping the committee determine whether the student has a solid grasp of the basic material needed for research in their specialization. The student passes the examination by obtaining a positive vote from at least three of the four faculty members on the oral qualifying committee.

Each Program of Work for the doctoral degree must include at least four advanced courses in physics (with a letter grade of at least B-, at least one of which must be in a specialty other than that of the student’s dissertation; a list of acceptable courses is maintained by the GSSC. In order to provide greater flexibility particularly for multidisciplinary degrees, one of the four advanced courses may be selected from courses outside of the department, such a course must be approved by the GSSC. A dissertation is required of every candidate, followed by a final oral examination covering the dissertation and the general field of the dissertation.

Plant Biology

Master of Arts

Doctor of Philosophy

For More Information

Campus address: Norman Hackerman Building (NHB) 2.634, phone (512) 471-8490, fax (512) 232-3699; campus mail code: A6500

Mailing address: The University of Texas at Austin, Plant Biology Graduate Program, 100 E 24th Street Stop A6500, Austin TX 78712

E-mail: tamra@austin.utexas.edu

URL: https://integrativebio.utexas.edu/plant-biology-graduate-program

Areas of Study

Graduate study in plant biology is available in the following areas: algal physiology, plant biochemistry, cell biology, development, ecology, evolution, molecular biology, natural products chemistry, photobiology, phyology, plant anatomy, plant biogeography, plant morphology, plant physiology, population biology, systematics, and ultrastructure.
Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Z Jeffrey Chen
Caroline E Farrior
Norma L Fowler
Lawrence E Gilbert
Justin C Havird
Enamul Huq
Robert K Jansen
Shalene Jha
Thomas E Juenger
Craig R Linder

Alan M Lloyd
Mona Mehdy
Nancy A Moran
Jose L Panero
Hong Qiao
Stanley J Roux Jr
Sibum Sung
Edward C Theriot
Keiko Torii
Amelia Wolf

Admission Requirements

The undergraduate training of students planning to undertake graduate study in plant biology should ordinarily include at least 24 semester hours in plant biology and/or other biological sciences. At least 12 of these must be in upper-division work. This requirement in the major should be supported by coursework in the other sciences, especially chemistry, physics, and mathematics.

Degree Requirements, Plant Biology

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Arts

At least 30 semester hours of coursework, including Biology 698 or 398R, are required. The coursework must include a minor of six hours of work acceptable for graduate credit in another area or areas. In general, at least one full year (including the summer) is needed to meet the requirements for the master's degree.

Doctor of Philosophy

Mastery of an integrated and meaningful program of graduate study is deemed more important than the completion of a prescribed number of semester hours. Most programs include at least four graduate courses in plant biology. Further supporting work in related sciences augments the program.

Admission to candidacy for the Doctor of Philosophy degree requires approval of the Graduate Studies Committee and is based on the total record of the student, performance in graduate courses, and such further examinations as the committee may require. A research proposal, written by the student, is a major part of the qualifying exam, which is administered by the student's Qualifying Exam Committee by the end of the second year in residence.

Statistics

Master of Science in Statistics
Doctor of Philosophy

For More Information

Campus address: Welch Hall (WEL) 5.216, phone (512) 232-0693, fax (512) 475-8297, campus mail code: D9800

Mailing address: The University of Texas at Austin, Graduate Program in Statistics, Department of Statistics and Data Science, 105 E. 24th St. Stop D9800, Austin TX 78712

E-mail: stat.admin@austin.utexas.edu

URL: https://stat.utexas.edu/academics#graduate-programs

Facilities for Graduate Work

The Department of Statistics and Data Sciences (SDS) is primarily located in Welch Hall, which houses the department's administrative suites and office space for the tenured/tenure-track faculty. PhD students and postdocs have shared office space in Welch Hall. This newly renovated space also includes three state-of-the-art conference rooms and a flexible collaboration space. In addition, the department maintains a footprint in the Dell Gates Complex (GDC), which is located immediately across the street from Welch Hall. The department's instructional faculty have offices in GDC and flexible space is used for informal instruction and office hours. The department's statistical consulting center is located in GDC. The department partners with the Population Research Center and the Texas Advanced Computing Center to provide support for secure data and computationally intensive research.

Areas of Study

Graduate degree candidates are expected to develop broad competence in the discipline of Statistics as a whole as well as expertise in their chosen area of concentration. The Master of Science in Statistics is a two-year program that offers advanced training for students in classical and modern statistical methods. The program is designed for students preparing for careers in statistical professions, as well as those seeking additional statistical training while pursuing a doctoral degree in another discipline. The PhD in Statistics is a five-year degree that focuses on training students in the theory and practice of modern statistical science and computation so that they are prepared to make novel contributions to the field. Major emphasis is placed on training in application-driven methodological research, probability modeling, and statistical computation. Throughout the program, students are exposed to central ideas of both Bayesian and classical approaches to statistical inference, as well as statistical machine learning methodology.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Statistics

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Prior to admission to the program, the student should demonstrate a background knowledge of mathematics and statistics equivalent to that acquired in upper-division courses in probability and statistics. Deficiencies may be made up by taking courses suggested by the
graduate advisor. In most cases, these courses may not be counted toward the degree.

**Master of Science in Statistics**

A master's degree may be obtained with report or without report (coursework only). Both options require a Program of Work consisting of 30 semester hours of coursework (10 courses). The report option also requires satisfactory completion of a written report and one associated three-hour report course taken on credit/no credit basis for a 33-hour total. Pursuit of the report option requires the student to find a willing supervising professor who is a member of the Graduate Studies Committee for the graduate program in Statistics.

Degree requirements for both options are distributed as follows: (1) five core courses that provide a foundation for further study, including the following coursework with a grade of at least B: a two-course sequence in theoretical statistics, two courses in statistical modeling, and one course in Bayesian statistics, (2) nine hours of statistics courses chosen from an approved list, including three hours of SDS coursework; (3) six hours of supporting coursework, which may be in a subject area other than statistics but must be logically related and, together with the other degree coursework, constitute a coherent degree program. The report option also requires three hours of master's report, which is expected to approximate a publishable journal article in length and quality.

**Doctor of Philosophy**

The Doctor of Philosophy in Statistics requires a minimum of 47 credit hours of coursework; however, it is typical for a student to complete the program in five years with over 90 credit hours of coursework, including dissertation hours. A doctoral student in statistics must complete a core set of courses in statistical theory and methods. At the end of the first year, students must complete a preliminary written examination covering the main concepts in these core courses. At the end of the second year or during the third year, students must successfully present a plan of study and demonstrate research proficiency in an oral examination to qualify for candidacy. Students are expected to write and defend their dissertation within two years of admission to candidacy. After advancing to candidacy, students are expected to write and defend a dissertation, completing program requirements within a total of five years.

**Courses, Natural Sciences**

Please see the General Information Catalog for a list of courses. The following fields of study are housed at the college level: Natural Sciences (NSC) and UTeach-Natural Sciences (UTS).

**Courses, Biology Instruction Office**

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Statistics and Data Sciences: Data Science (DSC) and Statistics and Data Sciences (SDS).
Courses, School of Human Ecology

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the School of Human Ecology: Human Ecology (H E).

Courses, Department of Human Development and Family Sciences

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Human Development and Family Sciences: Human Development and Family Sciences (HDF).

Courses, Department of Nutritional Sciences

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Department of Nutritional Sciences: Nutrition (NTR).

Courses, Division of Textiles and Apparel

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Division of Textiles and Apparel: Textiles and Apparel (TXA).

School of Nursing

Master of Science in Nursing
Doctor of Philosophy
Doctor of Nursing Practice

The Master of Science in Nursing degree and the Doctor of Nursing Practice programs are fully accredited by the Commission on Collegiate Nursing Education (CCNE). All graduate degree programs, including the Doctor of Philosophy program, are reviewed periodically by the Texas Higher Education Coordinating Board.

Facilities for Graduate Work

In addition to the extensive library and computer resources of the University, certain special resources within the School of Nursing provide support for graduate work.

The Cain Center for Nursing Research. The focus of this office is the promotion of funded research by nursing faculty members. The staff provides support and consultation services and compiles information about opportunities for research funding and presentations, including some for which graduate students are eligible. The computer laboratory is used for graduate courses and is available for graduate student research projects. The Cain Center also provides employment opportunities for graduate students interested in experience as research assistants.

The Learning Enhancement and Academic Progress (LEAP) Center.

The LEAP Center is a link to a variety of services to optimize student support and development. The center contains a simulation and skills lab, where students practice basic to advanced psychomotor skills; student academic support — including individual academic counseling, academic peer tutoring; study skills workshops, and a Computer Testing Center. LEAP Center staff offer referrals to campus services.

Clinical research and practice sites. The School of Nursing has access to a variety of private practice, community, and state facilities for field research and clinical placement. These include all major health care facilities in Austin and surrounding communities.

Areas of Study

Graduate work in the School of Nursing may lead to the Master of Science in Nursing, Doctor of Nursing Practice, Doctor of Philosophy, a post-master’s Advanced Practice Registered Nurse certificate, and a Teaching Nursing certificate.

The Master of Science in Nursing (MSN) degree program is designed to give students theoretical, analytical, and clinical knowledge and skills needed for specialized nursing practice. Those preparing for advanced practice should choose either the clinical nurse specialist track, with a concentration in adult-gerontology nursing; or the nurse practitioner track, with a concentration in family, primary care pediatric, acute care pediatric, or psychiatric mental health. Students preparing for a career emphasizing leadership in the emerging health care system should choose the leadership in diverse settings track.

The Doctor of Nursing Practice (DNP) program emphasizes leadership in the clinical area through the application of evidence-based practice and knowledge to solve problems and create a culture of change through leadership. Graduates of the DNP program typically enter clinical leadership positions in health care institutions and faculty positions in schools of nursing.

The Doctor of Philosophy (PhD) program emphasizes the acquisition of a sound foundation in nursing science and research methods as a basis for developing nursing knowledge and scholarship. Graduates of the PhD program typically enter positions in nursing education, research, or executive management of health care agencies. Some prepare to make contributions to the development of nursing theory or health policy.

The Advanced Practice Registered Nurse certificate program is a post-master’s nursing program for students wishing to complete coursework necessary to sit for national certification as an Adult-Gerontology Clinical Nurse Specialist, Family Nurse Practitioner, Primary Care Pediatric Nurse Practitioner, Acute Care Pediatric Nurse Practitioner, or Psychiatric-Mental Health Nurse Practitioner.

The Teaching Nursing stackable certificate program is designed for nurses who are seeking to enhance their teaching pedagogy and skills in preparation for teaching nursing in academic and clinical programs.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.
Admission Requirements
Master of Science in Nursing

The Master of Science in nursing degree is designed for registered nurses who want to become nursing leaders or certified advanced practice nurses. The entering student normally holds a bachelor’s degree from a program accredited by the National League for Nursing or the Commission on Collegiate Nursing Education, or a recognized degree from a foreign academic institution. The entering student must be a registered nurse who holds either a bachelor’s and a master’s degree in nursing from a program accredited by the National League for Nursing; the Commission on Collegiate Nursing Education, or a bachelor’s degree in nursing and a master’s in a related field or a recognized degree from a foreign academic institution. Factors considered in the admission decision include; a grade point average of at least 3.00 in upper-division and graduate coursework; information derived from academic and professional references; personal and professional background; congruence of the student’s research goals with the expertise of the nursing faculty; a satisfactory interview; and proficiency in the English language. The composite picture presented by these factors is an important part of the admission review and decision.

Doctor of Philosophy

The Doctor of Philosophy in Nursing degree is designed for the student who desires a career as a nurse scientist. The entering student must be a registered nurse who holds either a bachelor’s or a master’s degree in nursing from a program accredited by the National League for Nursing, the Commission on Collegiate Nursing Education, or a recognized degree from a foreign academic institution. The student who holds no master’s degree or a master’s degree in another discipline will be required to complete prescribed graduate bridge courses in nursing as a condition of admission. Bridge courses are not counted toward degree requirements. These students may also choose to complete a Master of Science in Nursing degree en route to the Ph.D.

Factors considered in the admission decision include satisfactory scores on the Graduate Record Examinations General Test, with attention given to the relative balance between verbal and quantitative scores; a grade point average of at least 3.00 in upper-division and graduate coursework; information derived from career history; and professional references; personal and professional background; congruence of the student’s research goals with the expertise of the nursing faculty; and proficiency in the English language. The composite picture presented by these factors is an important part of the admission review and decision.

Doctor of Nursing Practice

The Doctor of Nursing Practice degree prepares nurses to practice and provide leadership at the highest levels in healthcare and clinical nursing education. The entering student must be a registered nurse who holds either a bachelor’s and a master’s degree in nursing from a program accredited by the National League for Nursing, the Commission on Collegiate Nursing Education, or a bachelor’s degree in nursing and a master’s in a related field or a recognized degree from a foreign academic institution. Factors considered in the admission decision include; a grade point average of at least 3.00 in upper-division and graduate coursework; current Texas RN licensure or Texas Board of Nursing eligible; information derived from academic and professional references; personal and professional background; congruence of the student’s research goals with the expertise of the nursing faculty; a satisfactory interview; and proficiency in the English language. The composite picture presented by these factors is an important part of the admission review and decision.
presented by these factors is an important part of the admission review and decision.

**Advanced Practice Registered Nurse Certification**

The Advanced Practice Registered Nurse Certification program is designed for nurses who already hold a master's degree in nursing and desire to be eligible to sit for the national certification examination for advanced practice nursing. The entering student holds a master's degree from a program accredited by the National League for Nursing or the Commission on Collegiate Nursing Education and holds a registered nurse license that allows the student to practice as a registered nurse in Texas.

Factors considered in the admission decision include a grade point average of at least 3.00 in upper-division and graduate coursework; information derived from academic and professional references; professional background and goals; and proficiency in the English language. An interview may also be required. The composite picture presented by these factors is an important part of the admission review and decision.

**Nursing: Teaching Certification**

The Teaching Nursing stackable certificate program is designed for nurses who are seeking to enhance their teaching pedagogy and skills in preparation for teaching nursing in academic and clinical programs.

Factors considered in the admission decision include a grade point average of at least 3.00 in upper-division and graduate coursework; information derived from academic and professional references; professional background and goals; and proficiency in the English language. The composite picture presented by these factors is an important part of the admission review and decision.

**Degree Requirements, Nursing**

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at [https://utexas.box.com/v/UTAustinGraduateHandbooks](https://utexas.box.com/v/UTAustinGraduateHandbooks). Please contact the program with concerns or questions.

**Master of Science in Nursing**

All students are expected to complete an approved upper-division statistics course prior to the first semester of enrollment.

The advanced practice registered nurse tracks (Adult-Gerontology Clinical Nurse Specialist, Family Nurse Practitioner, Primary Care Pediatric Nurse Practitioner, Acute Care Pediatric Nurse Practitioner, and Psychiatric-Mental Health Nurse Practitioner) require a minimum of 48 semester hours of coursework. The Leadership in Diverse Settings track requires a minimum of 39 hours.

Preparation of a thesis is optional; when this option is chosen, an additional three to six semester hours are required.

Program components are (1) core courses that provide advanced theoretical and empirical research knowledge and a deeper understanding of professional issues; (2) courses in the student's track/concentration; (3) advanced practice core courses; and (4) supporting/elective courses, which may include courses from outside nursing.

**Master of Science in Nursing: Alternate Entry**

Prerequisite courses in upper-division statistics and the natural and behavioral sciences must be completed prior to enrollment. Of the required prerequisites, the courses in anatomy and microbiology and any other three must be completed by December 31 of the application year. All students must be fully compliant with program requirements prior to starting the program, including completing all seven required prerequisite courses, criminal background clearance from the Texas Board of Nursing prior to beginning the alternate entry pre-licensure summer courses. All pre-licensure courses must be completed with a grade of at least C to progress to the post-licensure alternate entry curriculum.

Practicing nurses and nursing students are held to high standards of competence to perform responsible and safe care. Successful completion of the nursing program requires that students demonstrate the ability to perform several essential skills effectively and safely. Additionally, students must demonstrate proficiency in interpersonal and organizational skills, as well as ethical comportment. Students considering this major must meet the required standards. For more information, please see [Professional and Technical Standards for Nursing Practice (PDF)](https://utexas.box.com/v/UTAustinGraduateHandbooks).

The alternate-entry student is eligible to take the licensure examination to become a registered nurse (NCLEX-RN) in the state of Texas after completing 38 semester hours of foundation courses. The student must pass Nursing 290S and have an unencumbered nursing license to enroll in graduate nursing courses beyond the foundation year. Depending on the chosen track, students must complete a minimum of 74 to 83 semester hours of coursework.

Preparation of a thesis is optional; when this option is chosen, an additional three to six semester hours are required.

Program components are (1) accelerated foundation courses in all major clinical areas of nursing; (2) core courses that provide advanced theoretical and empirical research knowledge and a deeper understanding of professional issues; (3) courses in one of the nursing tracks available to the alternate-entry student; (4) advanced practice core courses, and (5) supporting/elective courses, which may include courses from outside nursing.

**Doctor of Nursing Practice**

Students will complete nine hours of core courses before enrolling in supporting or practicum courses. Following the completion of the core courses, 24 hours of supporting courses can be taken in any order. Additionally, a minimum of 12 hours of practicum specialization courses are taken in sequential order after the core courses are completed. Within these practicum specialization seminars, students will select and develop an area of focus that will culminate in the Doctor of Nursing Practice (DNP) scholarly project. Students must complete a minimum of 45 semester hours of coursework.

All courses required for program completion are offered in accordance with university policies that govern non-formula-funded (Option III) programs.

**Doctor of Philosophy**

All students are expected to complete an approved upper-division statistics course prior to the first semester of enrollment. In addition, all students must pass a doctoral preliminary examination in their second year before entering candidacy for the degree. Students must complete at least 57 semester hours of coursework. Established
milestones must be completed for students to progress and complete the Doctor of Philosophy program in nursing.

The degree program requires completion of the following coursework: (1) core courses focused on advanced theory, analytical, and research methods and skills; (2) seminars and related supporting courses in a focused area of study; (3) research practicum courses; and (4) dissertation courses leading to the completion of approved research for the dissertation.

**Doctor of Philosophy: Alternate Entry**

Prerequisite courses in upper-division statistics and the natural and behavioral sciences must also be completed prior to enrollment. Of the required prerequisites, the courses in anatomy and microbiology must be completed by December 31 of the application year. All students must be fully compliant with program requirements, including clearance of a background check from the Board of Nursing prior to beginning the alternate entry pre-licensure summer courses. All pre-licensure courses must be completed with a grade of at least C to progress in the alternate entry curriculum.

Practicing nurses and nursing students are held to high standards of competence to perform responsible and safe care. Successful completion of the nursing program requires that students demonstrate an ability to perform several essential skills effectively and safely. Additionally, students must demonstrate proficiency in interpersonal and organizational skills, as well as ethical comportment. Students considering this major must meet the required standards. For more information please view Professional and Technical Standards for Nursing Practice (PDF).

The alternate-entry Ph.D. student is eligible to take the licensure examination to become a registered nurse (NCLEX-RN) in the state of Texas after completing thirty-eight semester hours of foundation courses. The student must pass Nursing 290S and have an unencumbered nursing license in order to enroll in graduate nursing courses beyond the first semester of courses following the foundation courses. The student must pass a doctoral preliminary examination before entering candidacy for the doctoral degree. Students must complete at least 106 semester hours of coursework. Established milestones must be completed for students to progress and complete the Doctor of Philosophy program in nursing.

Program components are: (1) accelerated foundation courses in all major clinical areas of nursing; (2) master’s level bridge courses, which provide advanced theoretical and research knowledge and a deeper understanding of professional issues; (3) doctoral core courses focused on advanced theory, analytical, research methods and skills; (4) seminars and related supporting courses in a focused area of study; (5) research practicum courses; and (6) dissertation courses leading to the completion of approved research for the dissertation.

**Advanced Practice Registered Nurse Certification**

The post-master’s Advanced Practice Registered Nurse Certification (APRN) certificate programs are designed for those nurses who have a master’s degree in nursing from a program accredited by the National League for Nursing or the Commission on Collegiate Nursing Education or a recognized degree from a foreign academic institution and wish to complete the course work necessary to sit for national certification as an APRN. Students choose a certificate track as a Family Nurse Practitioner, Primary Care Pediatric Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, Acute Care Pediatric Nurse Practitioner, or Adult-Gerontology Clinical Nurse Specialist. Depending on the chosen track, students must complete a minimum of 24 to 29 semester hours of coursework.

Upon completion of the advanced practice coursework, one of the following will appear on the student’s transcript: Family Nurse Practitioner, Pediatric Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, Acute Care Pediatric Nurse Practitioner, or Adult-Gerontology Clinical Nurse Specialist.

**Nursing: Teaching Certification**

The Certificate in Nursing: Teaching is designed for nurses who are seeking to enhance their teaching pedagogy/skills and for those who are seeking an academic career in teaching nursing. For those students who hold a master’s or higher degree, the Certificate in Teaching Nursing will qualify them to sit for the National League for Nursing’s certification exam, Certified Nurse Educator. Students must complete at least 9 semester hours of coursework.

All courses required for program completion are offered in accordance with university policies that govern non-formula-funded (Option III) programs.

**Legal Requirements**

In the interest of public safety, there are legal restrictions on enrollment in some nursing courses and on eligibility for RN licensure. Factors that may make an individual ineligible for licensure in Texas include prior denial of a license by a licensing authority; disciplinary action by a licensing/certifying authority; conviction for a crime other than a minor traffic violation; diagnosis/treatment/hospitalization in the past five years for schizophrenia or other psychotic disorders, bipolar disorder, paranoid personality disorder, antisocial personality disorder, or borderline personality disorder; addiction or treatment for addiction to alcohol or any other drug during the previous five years; and having been issued a declaratory order concerning eligibility for NCLEX examination or licensure or having received a proposal of ineligibility by the Texas Board of Nursing.

To avoid delay in course enrollment, delay or denial of licensure, or possible disciplinary action and criminal prosecution for later discovery of falsified records, those with a history of any of the factors listed above are strongly urged to apply for a determination of eligibility for licensure. Request for a determination should be made as early as possible, prior to or upon enrolling in the nursing program. Such a determination, called a Declaratory Order, is issued by the Texas Board of Nursing. Issuance of a Declaratory Order takes a minimum of three to six months. More information is available on the Texas Board of Nursing website.

**Compliance**

Students must provide documentation confirming completion of compliance requirements prior to commencement of degree program. Log in to the School of Nursing intranet site for more information.

- Medical clearance requirements—immunizations.
- Criminal background check—required of alternate entry students and registered nurses who received initial licensure prior to 2003. Students with concerns about eligibility are urged to seek an official determination from the Texas Board of Nursing six months in advance of beginning clinical courses to allow sufficient time for Texas Board of Nursing approval.
- Drug screen—a clear drug screen to be completed one month prior to the first day of class in the first semester of a student’s program.
- CPR certification (Basic Life Support for Health Care Providers, offered by the American Heart Association).
Stackable Certificate Programs, Nursing

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of all stackable certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

Nursing: Teaching

The Nursing: Teaching stackable certificate is designed for nurses who seek an academic career in teaching nursing. The program requires completion of nine semester credit hours of coursework and is available to degree-seeking and non-degree-seeking students. All courses required for program completion are offered in an online format in accordance with University policies that govern non-formula-funded (Option III) programs.

Facilities for Graduate Work

State-of-the-art research facilities are available for graduate education. Laboratories are equipped with the latest instrumentation and specialized support units for research in all of the areas of study mentioned below. Research space on the Austin campus is located in two pharmacy buildings, the Biomedical Engineering Building, the Dell Pediatric Research Institute, and in the Animal Resources Center. In San Antonio, basic laboratory and clinical research space is available in the McDermott Building on the campus of the University of Texas Health Science Center, and at affiliated institutions. Additional facilities for collaborative research in Austin are available in the College of Natural Sciences, the Cockrell School of Engineering, the Institute for Neuroscience, and the Institute for Cellular and Molecular Biology. Students pursuing either the MS or PhD in the Pharmacotherapy area will have courses, lab and clinical hours in San Antonio. Students in both Austin and San Antonio have access to extensive electronic journal holdings through the University Libraries website.

Drug Dynamics Institute. The Drug Dynamics Institute provides novel approaches and solutions that promote the preclinical development of technologies, facilitate bioscience startups, and cultivate interdisciplinary technology readiness utilizing state of the art translational research tools, laboratory facilities, and educational approaches. The Drug Dynamics Institute uses its extensive scientific expertise in seamless collaboration with our academic, industry, and government partners to foster and facilitate advancement of health innovations to commercialization. The institute serves as a training opportunity for graduate and postdoctoral researchers across the health disciplines working on projects ranging from material characterization and formulation new therapies to conduction analytical, animal, and stability studies to allow innovations to move from preclinical development to clinical trials. The Drug Dynamics Institute closes the gap between academia and industry in three key areas: TherapeUtex: a preclinical core lab/service center, UTech Dorm Room: the wet lab incubator spacer bioscience startups, and UT Advance: innovation, entrepreneurship, and education programs.

Texas Center for Health Outcomes Research & Education (TxCORE). Texas Center for Health Outcomes Research and Education (TxCORE). TxCORE addresses population and individual patient health through innovative, high-quality research and education, and serves our community by responding to critical health care issues that impact patients’ daily lives. The interdisciplinary team of researchers has expertise in health care utilization and costs, health outcomes and value assessment, medication use and adherence, health behavior and health disparities, public health and policy, and integrative clinical practice, pharmacy practice, and education. The Center’s researchers and graduate students provide research design, data collection, and data analysis expertise to health care providers, payers, institutions, and organizations, as well as the pharmaceutical industry. Center personnel also develop, present, and support educational programs focused on the delivery of high-quality health care. For more information, visit the TxCORE website.

For More Information

Campus address: Pharmacy Building (PHR) 4.220, phone (512) 471-6590; campus mail code: A1900
excellence in environmental health sciences education and research and to prepare students for careers that address the molecular and cellular mechanisms by which environmental agents instigate toxicity and disease, including cancer. CMCT faculty come from a variety of colleges and departments of The University of Texas at Austin including: the Division of Pharmacology and Toxicology and the Division of Chemical Biology & Medicinal Chemistry of the College of Pharmacy; the Department of Cell and Molecular Biology and the UT Marine Science Institute in the College of Natural Sciences; the Departments of Nutritional Science and Pediatrics of the Dell Medical School; and the Department of Epigenetics and Molecular Carcinogenesis of the UT MD Anderson Cancer Center.

The CMCT fosters interdisciplinary graduate training programs by providing the mechanism by which students can work with a range of faculty interested in toxicology. This includes facilitating interdisciplinary research collaborations and providing ancillary student and research infrastructure support. The center’s faculty represent a wide variety of scientific disciplines, including pharmacology, toxicology, medicinal chemistry, pharmaceutics, neuroscience, nutrition, biochemistry, chemistry, marine biology, and civil and mechanical engineering.

Areas of Study

The College of Pharmacy offers graduate study leading to the Master of Science in Pharmaceutical Sciences and the Doctor of Philosophy with a major in pharmaceutical sciences. Both degrees are STEM Designated Degree Programs, as identified by the Department of Homeland Security for purposes of the 24-month STEM optional practical training extension. Areas of doctoral specialization are: chemical biology and medicinal chemistry, pharmacology and toxicology, molecular pharmaceutics and drug delivery. Areas of masters and doctoral specialization are: health outcomes and pharmacotherapy. Students pursuing either the Master of Science or the Doctor of Philosophy who hold a PharmD degree from a pharmacy program accredited by the Accreditation Council for Pharmacy Education have opportunities for advanced practice training. They may complete a specialty practice residency while pursuing the graduate degree. More information is available from the graduate advisor.

Admission Requirements

The applicant should have a bachelor’s degree in pharmaceutical sciences, biology, chemistry, or a related field, or a professional pharmacy degree from an accredited institution in the United States or another country. Students are admitted to the program upon recommendation of the Graduate Studies Committee, provided that their undergraduate training includes appropriate work in fields related to the pharmaceutical and health sciences. Applicants without the appropriate background may be required to complete additional coursework after admission. For some areas of study, preference is given to students who have a Doctor of Pharmacy degree from a college accredited by the Accreditation Council for Pharmacy Education. Preference is also given to applicants for the doctoral degree.

Degree Requirements, Pharmaceutical Sciences

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Pharmacy Graduate Studies 196S, Seminar in Pharmacy is required of all graduate students in pharmacy and is taught every fall and spring in each division. This requirement may be waived for a specific semester by the Graduate Studies Committee for sufficient reason upon petition by the student’s major professor. No more than two semester hours of credit earned in this course are counted toward the number of hours required in master’s degree programs.

Master of Science in Pharmaceutical Sciences

The Master of Science in Pharmaceutical Sciences is offered by the Health Outcomes and Pharmacotherapy divisions.

Students must complete at least 30 semester hours of graduate coursework. Typically, students complete their coursework, thesis proposal defense, and research and writing the thesis paper in three
years. An overall grade point average of 3.00 must be maintained for program continuation and completion. While there is no prescribed sequence of courses for the program, students and their graduate advisors must develop an individualized education plan that accounts for the varied semester course offerings and prerequisites and that can be completed in two to three years.

**Doctor of Philosophy**

The student selects a major professor who will supervise the qualifying examinations, act as chair of the dissertation committee, and assist with selection of suitable dissertation committee members. Upon completion of the qualifying examinations, an application is forwarded to the Graduate Studies Committee and the graduate advisor, who then recommends to the graduate dean whether the student should be admitted to doctoral candidacy. After admission to doctoral candidacy, the student must enroll in the dissertation course each fall and spring semester.

Students must complete at least 30 semester hours of required graduate coursework followed by at least six semester hours of research and dissertation courses for a minimum of 36 semester hours for the doctoral degree. Typically, students complete their coursework, qualifying exams, dissertation proposal defense, and research and writing the dissertation in four to six years. An overall grade point average of 3.00 must be maintained for program continuation and completion. While there is no prescribed sequence of courses for the program, students and their graduate advisors must develop an individualized education plan that accounts for the varied semester course offerings and prerequisites and that can be completed in two or three years. Upon completion of the qualifying examinations, the student meets with the appropriate committee and graduate advisor, who then recommend to the graduate dean whether the student should be admitted to doctoral candidacy. After admission to candidacy, the student must enroll in the dissertation course each fall and spring semester.

**Stackable Certificate Programs, Pharmaceutical Sciences**

Stackable graduate certificates are available to degree-seeking and non-degree-seeking graduate students. Some stackable certificates may be awarded following completion of program requirements, while others require simultaneous awarding of the graduate certificate and a graduate degree.

See the Stackable Certificates section (p. 14) of this catalog for additional information and policies related to stackable certificates.

The graduate program for this catalog section offers the following stackable certificate programs. To see a full list of graduate certificates offered at the University, please see the Graduate Study (p. 7) section of the Graduate Catalog.

**Pharmaceutical Sciences: Innovating in Health**

The program requires completion of nine semester credit hours of coursework and is available to degree-seeking and non-degree-seeking students.

Students in both Austin and San Antonio have access to extensive electronic journal holdings through the University Libraries website. In addition to these facilities, students will have access to facilities at the partner institutions.

The University of Texas Health Science Center at San Antonio, one of the components in the University of Texas System, consists of five schools: the School of Medicine, the School of Dentistry, School of Nursing, School of Health Professions, and Graduate School of Biomedical Sciences. The UT Health Science Center has become the primary training site for health professionals serving the south Texas region.

The University of Texas at San Antonio is the second largest university in the UT System and one of the state's fastest growing public universities. It is designated by the United States Department of Education as a Hispanic-serving institution.

The University of Texas Health Science Center at Houston is comprised of six schools, including the School of Public Health. The School of Public Health in Houston coordinates programs at regional campuses in Dallas, San Antonio, El Paso, Austin, and Brownsville. This statewide presence makes the School of Public Health a pivotal public health resource for Texas.

**Areas of Study**

The College of Pharmacy offers graduate study leading to the Doctor of Philosophy degree with a major in translational science. An individualized educational plan will be developed for each student. More information is available from the graduate advisor. This program is a STEM Designated Degree Program, as identified by the Department
of Homeland Security for purposes of the 24-month STEM optional practical training extension.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Jamie C Barner  Kenneth A Lawson Jr
Carolyn M Brown  Grace Lee
Craig A Champlin  Leticia R Moczygemba
Maria A Croyle  Somshuvra Mukhopadhyay
Kevin N Dalby  Karen L Rascati
John Digiovanni  Kelly Renee Reveses
James C Fleet  John H Richburg
Christopher R Frei  Hugh D Smyth
Andrea C Gore  Stefano Tiziani
Dawit Kidane-Mulat  Karen Marie Vasquez
Jim M Koeller  Robert O Williams III

Admission Requirements

Prospective students applying to the translational science PhD program must have a master's or professional degree (MD, DDS, or PharmD) prior to enrollment in the program. Students are admitted to the program upon recommendation of the translational science admission committee, comprised of representatives from each partner institution's Graduate Studies Committee.

Degree Requirements, Translational Science

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Students must complete at least 72 semester hours of graduate coursework. An overall grade point average of 3.00 must be maintained for program continuation and completion. Students are required to take a minimum of 24 semester hours of core curriculum; 12 semester hours of prescribed track electives selected from the list of elective courses for this program; six semester hours of free electives selected from any course offered at participating graduate programs; and 30 semester hours of research and dissertation work. The Translational Science PhD Program also offers a Data Science track required as 12 semester credit hours, which are counted towards the 72 hours of graduate coursework required to complete the program.

While there is no prescribed sequence of courses for the program, students and their graduate advisors must develop an individualized education plan that accounts for the varied semester course offerings and prerequisites and that can be completed in three years. Upon completion of the qualifying examinations, the student meets with the appropriate committee and graduate advisor, who then recommend to the graduate dean whether the student should be admitted to doctoral candidacy. After admission to candidacy, the student must enroll in the dissertation course each fall and spring semester.

Courses, Pharmacy

Please see the General Information Catalog for a list of courses. The following field of study is housed in the College of Pharmacy: Pharmacy Graduate Studies (PGS).

Lyndon B. Johnson School of Public Affairs

Global Policy Studies

Master of Global Policy Studies

For More Information

Campus address: Sid Richardson Hall (SRH) 3.104, phone (512) 471-4292, fax (512) 471-8455; campus mail code: E2700

Mailing address: The University of Texas at Austin, Lyndon B. Johnson School of Public Affairs, P O Box Y, Austin TX 78713

E-mail: lbjadmit@austin.utexas.edu

URL: https://lbj.utexas.edu

Facilities for Graduate Work

The Lyndon B. Johnson School of Public Affairs is housed in Sid Richardson Hall, adjacent to the Lyndon Baines Johnson Library and Museum.

The LBJ School Computer Lab is reserved for public affairs students and is available 24 hours a day. It provides access to a variety of software useful for completing coursework such as ArcGIS and Stata. Ten dual-boot systems (run both Windows and macOS) are physically available in the lab along with four monitors that can be connected to a personal laptop using a ring of adapters. Additionally, the Computer Lab has 12 Windows systems available for remote connections which enable access to this software from a personal computer while off campus.

Areas of Study

The graduate program in Global Policy Studies is designed to provide students with the tools and knowledge necessary to be leaders in an increasingly interdependent world. The program offers a multidisciplinary approach to studying the complex economic, political, technological, and social issues of the twenty-first century. Students pursuing the Master of Global Policy Studies select a specialization in security, law, and diplomacy; international trade and finance; development; global governance and international law; international energy, environment, and technology; or regional international policy. Students may also propose their own specialization, which is subject to approval.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Richard Patrick Bixler  Alan J Kuperman
Joshua W Busby  Erin Lentz
Robert M Chesney  Ji Ma
George M De Shazo Jr  Sheila M Olmstead
David J Eaton  Todd A Olmstead
Mary Evans  Varun Rai
Raissa Fabregas robles gil  Jaganath Sankaran
Kenneth Flamm  David W Springer
James K Galbraith  Jeremi Suri
Sheena Elise Greitens  Andrew Waxman
William Inboden  Catherine Elizabeth Weaver
Peniel E Joseph
Admissions Requirements

Admission decisions are made by the Admissions Committee. The committee considers applicants’ academic and employment records, their scores on the Graduate Record Examinations General Test, three letters of recommendation from professors or employers, and a statement of purpose addressing the applicant’s background and interest in public policy. A résumé and transcripts for all college coursework are also required.

While there are no prescribed course prerequisites, students entering the Master of Global Policy Studies program are expected to have completed undergraduate coursework in statistics. In addition, many students find the following courses to be useful: two semesters of principles of economics, at least one semester of undergraduate international relations or world history, and one semester of calculus.

Additional information on degree requirements and the application process is available on the Lyndon B. Johnson School of Public Affairs website.

Degree Requirements, Global Policy Studies

Graduate handbook information is updated and maintained by each program. Graduate programs are available within each program's office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Global Policy Studies

In residence program. The curriculum for the Master of Global Policy Studies consists of 49 hours of coursework. In addition to required coursework in the student's specialization, the curriculum combines courses in the development of global policy and principles of international relations, microeconomics, analytical methods, international economics, and a crisis management seminar with a practical applications sequence that includes a client-oriented policy research project and professional writing courses. Field experience is appropriate in most specializations and may be satisfied with a noncredit internship experience. A typical 49 semester-hour program of study includes five core courses (15 credit hours); a crisis simulation course (one credit hour); a policy research project that spans two semesters (six credit hours); five specialization courses (15 credit hours); three elective courses (nine credit hours); and an individual writing requirement (three credit hours).

Students must fulfill all academic requirements within six years of their entrance into the program. Most students are expected to complete the program in two years of full-time study.

DC program. The DC program option offers a master's student a unique two-semester curriculum in federal policymaking relating to international affairs thereby facilitating entry into federal careers. The track requires completion of 45 semester hours of coursework. Students attend The University of Texas at Austin their first two semesters, taking 24 semester credit hours. After the first year, students will spend the summer and fall in Washington, DC. Coursework will include a unique apprenticeship opportunity in a public or non-profit agency based on the student's area of policy.

Dual Degree Programs

Master of Global Policy Studies/Master of Public Health

The graduate program in Global Policy Studies offers a dual degree program with the University of Texas Health Science Center at Houston School of Public Health (UTSPH). Applicants must apply separately and be admitted to both the Master of Global Policy Studies program at The University of Texas at Austin and the Master of Public Health at UTSPH. Students accepted into the dual degree program complete the three-year program of work in both schools. The degrees are conferred separately by each institution. Additional information is available from the director of admissions at the LBJ School.

The Lyndon B. Johnson School of Public Affairs offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Additionally, the Computer Lab has 12 Windows systems available for remote connections which enable access to this software from a personal computer while off campus.
Areas of Study

This degree program aims to provide students with the skills and understanding required for effective professional leadership in developing and implementing public policies. Master of Public Affairs students may elect to organize their studies around certain areas of specialization. Depending on their qualifications, students can pursue the Master of Public Affairs degree through the regular program or through a dual degree program arrangement.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Gordon B Abner

Admission Requirements

Admission decisions are made by the Admissions Committee. The committee considers applicants’ academic and employment records, their scores on the Graduate Record Examinations General Test, three letters of recommendation from professors or employers, and a statement of purpose addressing the applicant’s background and interest in public policy. A résumé and transcripts for all college coursework are also required.

While there are no prescribed course prerequisites, students entering the Master of Public Affairs program are expected to have completed coursework in three areas: mathematics and statistics, economics, and American government. Many students find it useful to take a review course in college algebra, calculus, and statistics the summer before entering the program.

Additional information on degree requirements and the application process is available from the Lyndon B. Johnson School of Public Affairs website.

Degree Requirements, Public Affairs

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Master of Public Affairs

The curriculum for the Master of Public Affairs degree program normally consists of 48 semester hours of coursework. Up to nine hours in core courses may be waived and substituted with approved electives if a student demonstrates prior training and proficiency substantially equivalent to core courses in introductory quantitative methods, microeconomics, and public financial management. The curriculum combines courses in politics and the policy process, economic analysis, empirical methods, and management with a practical applications sequence that includes a client-oriented policy research project. A public service internship is required in the absence of relevant prior public service experience. A typical 48 semester-hour program of study includes eight one-semester core courses, at least one policy research project, a 12-week internship generally completed between the first and second years, six or seven electives, and an optional professional report.

The student must fulfill all academic requirements within six years of entering the program. Dual degree programs require additional coursework.

Full-time program. Most students are admitted to the full-time program, which they are generally expected to complete in two years of full-time study. A student who cannot attend full time may choose to complete the degree program on a part-time basis; the applicant must submit a written request for admission on a part-time basis when applying for admission to the program. A student enrolled in the full-time program may be allowed, for good reason, to change to part-time status.

DC program. The DC program option offers a student enrolled in the master’s program a unique two-semester curriculum in federal policy which facilitates entry into federal careers. The track requires completion of 45 semester hours of coursework. Students attend The University of Texas at Austin their first two semesters, taking 24 semester credit hours. After the first year, students will spend the summer and fall in Washington, DC. Coursework will include a unique apprenticeship opportunity in a public or non-profit agency based on the student’s area of policy.

Dual Degree Programs

Master of Public Affairs/Master of Public Health

The graduate program in Public Affairs offers a dual degree program with the University of Texas Health Science Center at Houston School of Public Health (UTSPH). Applicants must apply separately and be admitted to both the Master of Public Affairs program at The University of Texas at Austin and the Master of Public Health at UTSPH. Students accepted into the dual degree program complete the three-year program of study in both schools. The degrees are conferred separately by each institution. Additional information is available from the director of admissions at the LBJ School.

The Lyndon B. Johnson School of Public Affairs offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

Additionally, the Computer Lab has 12 Windows systems available for remote connections which enable access to this software from a personal computer while off campus.

Area of Study

The Executive Master of Public Leadership (MPL) degree is designed for 21st century public leaders to cultivate modern-day leadership skills. The program combines substantial coursework, interaction with high-performing leaders, and simulations to help executives raise the bar on their personal brand of leadership for the public they serve.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Gordon B Abner
Jacqueline L Angel
Richard Patrick Bixler
Michele Y Deitch
David J Eaton
Sheri R Greenberg
Martin Joseph Luby

Steven Wayne Pedigo
James Paul Pope
Stephen Slick
David W Springer
Jeremi Suri
Patrick P Wong

Admission Requirement

All applicants to the MPL program must satisfy the Graduate School's general requirements for admission except an official score on the Graduate Record Examinations General Test (GRE). MPL admission decisions also include consideration of the quality of an applicant's work experience, the applicant's reasons for attending an executive program, letters of recommendation from employment supervisors, and an interview with the MPL program director. All admissions decisions will be made by the GSC for Public Leadership.

Additional information on degree requirements and the application process is available on the Lyndon B. Johnson School of Public Affairs website.

Degree Requirements, Public Leadership

Master of Public Leadership

The Executive Master of Public Leadership (MPL) is a 12-month, 30-credit-hour degree program designed for mid-career professionals who seek promotions to leadership positions within their organizations. All students must complete 30 semester hours of required coursework. The program takes one year to complete. Students enroll in four consecutive terms (two summer terms, one fall term, and one spring term). Students will begin the program in the first Summer Term and end in the following Spring Term. Attendance in all four terms is required. Cohorts do not overlap.

Students will complete the 10 required courses following the order in which they are offered and present their professional Research Capstone project during their final semester and at the conclusion of all coursework. Students attend the in-person portion of the program during one weekend a month. The remaining course hours can be completed online in the evenings. All courses required for program completion are offered in accordance with University policies that govern non-formula-funded (Option III) programs.

Applicants admitted to the program must submit a nonrefundable enrollment deposit to secure enrollment in the program. Information is available online and by email (lbjadmit@austin.utexas.edu).

Public Policy

Doctor of Philosophy

Areas of Study

The doctoral degree program in public policy is a research-oriented program designed to give the student substantial knowledge of one or more disciplines, an understanding of the policy process, and technical mastery of advanced research skills. It aims to develop research scholars and university faculty who will make substantive contributions to our understanding of complex public policy problems and who can conduct research in multidisciplinary settings.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

Gordon B Abner
Abigail Rosemary ann Aiken
Jacqueline L Angel

Admission Requirements

Admission decisions are made by an admissions committee. The committee considers applicants’ academic and employment records, three letters of recommendation, a writing sample, and a proposal of study that addresses the applicant’s interest in and preparation for doctoral-level public policy research. A résumé and transcripts for all college coursework are also required.

Additional information on degree requirements and the application process is available from the Lyndon B. Johnson School of Public Affairs website.

Degree Requirements, Public Policy

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Doctor of Philosophy

The doctoral program in public policy requires at least 36 hours of coursework beyond the master’s degree (in addition to the dissertation reading and writing courses) and includes supporting work in courses outside public affairs. The supporting work is intended to deepen the student’s understanding of an organized discipline and its application to public policy. Doctoral degree candidates must fulfill the following general requirements: (1) complete four core courses; (2) complete at least two research methods courses typically taken in the first two years of study; (3) complete at least two other courses in their substantive area of research; (4) pass a qualifying paper requirement; (5) defend a dissertation proposal; and (6) write and defend a dissertation. A student without a graduate degree from a policy-related academic or professional program may be required to complete supplementary coursework in addition to the number of hours required for the doctoral degree. Additional information on specific requirements and procedures is available from the school.

Courses, Public Affairs

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Lyndon B. Johnson School of Public Affairs: Public Affairs (P A).

Courses, Public Leadership Graduate Program

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Public Leadership Graduate Program: Public Leadership (P L).

Steve Hicks School of Social Work

Master of Science in Social Work
Doctor of Philosophy

For More Information

Campus address: School of Social Work Building (SSW) 2.222, phone (512) 471-5457, fax (512) 471-9600; campus mail code: D3500
Mailing address: The University of Texas at Austin, School of Social Work, 1925 San Jacinto Boulevard Stop D3500, Austin TX 78712
E-mail: utssw@lists.cc.utexas.edu
URL: http://socialwork.utexas.edu/

Facilities for Graduate Work

The School of Social Work Building houses classrooms, faculty and administrative offices, and a student lounge. The building also houses the school’s Learning Resource Center, which contains computer and
video laboratories and reading rooms; the center provides an extensive reference library of social work–related journals and other materials.

The school offers students several other services and resources, including the Office of Academic Affairs, which coordinates advising, registration, and other academic matters. Career planning is available through the DiNitto Center for Career Services. The Office of the Associate Dean for Research administers faculty-conducted research in such areas as substance use and mental health; child welfare; cultural diversity; domestic and community violence; gerontology; families, children, and youth; social work education; organizational structures; restorative justice; health; health disparities; and behavioral health.

Areas of Study

The Steve Hicks School of Social Work offers graduate study leading to the Master of Science in Social Work and the Doctor of Philosophy with a major in social work.

The Master of Science in Social Work program prepares students for advanced social work practice with individuals, families, groups, organizations, and communities, as well as for policy-related and administrative positions. Two areas of concentration are available: clinical social work or administration and policy practice.

The Doctor of Philosophy degree prepares students to be academicians and researchers. Students pursuing this degree design their own areas of study based on their academic and research interests.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Admission Requirements

Master of Science in Social Work

Applicants for admission to this degree program should have a general liberal arts education with a broad range of studies in the behavioral sciences. All applicants must have completed at least one college-level statistics course that includes inferential applications.

Applicants with a Bachelor of Social Work degree from a school accredited by the Council on Social Work Education may be admitted into a modified program of study.

Doctor of Philosophy

Applicants to the doctoral degree program must have a master’s degree from an accredited school of social work, or a master’s degree in a related discipline with extensive experience in human services. Preference is given to individuals with research experience and at least two years of professional experience beyond the master’s degree.

Professional Liability Insurance

Professional liability insurance is required and a criminal background check may be required of all students enrolled in field placement or internship courses. The insurance policy must cover the duration of the course, beginning on or before the first regular class period.

Degree Requirements, Social Work

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

Approval of the graduate advisor is required for registration in any social work courses.

Master of Science in Social Work

Developed in accordance with the Council on Social Work Education curriculum standards and policies, the full-time Master of Science in Social Work degree program requires 60 semester hours of coursework. Experiential learning is provided through internships in selected government, nonprofit, and for-profit agencies. Course content and field experiences are organized and integrated using a systems/developmental framework and a biopsychosocial perspective.

Of the 60 semester hours required for graduation, a maximum of 24 may be accepted by waiver from an accredited Bachelor of Social Work or Master of Social Work program. Waivers are awarded only after careful evaluation by the faculty of a student’s training and experience in the areas in which waivers are sought.

Most students enroll in the regular full-time program, which can be completed in two academic years. Extended and part-time programs of work can be completed in two and one-half to three and one-half years. Students accepted into a modified program of study complete a 42 to 48-semester-hour program in 12 to 16 months. Each option provides students with opportunities to study independently with individual faculty members and to take elective courses in other University departments. The school offers required courses during evening hours but cannot guarantee that the degree program can be completed by taking courses only at night.

Doctor of Philosophy

Students seeking the doctoral degree must meet the following requirements:

a. Completion of a program of courses prescribed by the Graduate Studies Committee.

b. Completion of a written comprehensive examination that tests the student’s knowledge of theory, research design and methodology in social work, and of selected aspects of social work practice.

c. Completion of an acceptable program of original research, including the submission of a dissertation that extends the knowledge base of social work.

Students should consult the graduate advisor for additional requirements.

Dual Degree Programs

Master of Science in Social Work/Master of Divinity

The graduate program in social work offers a dual degree program with the Austin Presbyterian Theological Seminary (APTS). Applicants must apply separately and be admitted to both the Master of Science in Social Work program at The University of Texas at Austin and the Master of...
Divinity program at APTS. The degrees are conferred separately by each institution. Additional information is available from the director of admissions at the School of Social Work.

**Master of Science in Social Work/Master of Public Health**

The graduate program in social work offers a dual degree program with the University of Texas Health Science Center at Houston School of Public Health (UTSPH). Applicants must apply separately and be admitted to both the Master of Science in Social Work program at The University of Texas at Austin and the Master of Public Health at UTSPH. Students accepted into the dual degree program complete the three-year program of work in both schools. The degrees are conferred separately by each institution. Additional information is available from the director of admissions at the School of Social Work.

In addition, the School of Social Work offers the following dual degree programs in cooperation with other divisions of the University. More information is available from the graduate advisor in each program.

**Intercollegial Programs**

**Computational Science, Engineering, and Mathematics**

*Master of Science in Computational Science, Engineering, and Mathematics Doctor of Philosophy*

**For More Information**

**Campus address:** Peter O'Donnell Building (POB) 4.102A, phone (512) 232-3356, fax (512) 471-8694, campus mail code: C0200

**Mailing address:** The University of Texas at Austin, Graduate Program in Computational Science, Engineering, and Mathematics, 201 East 24th Street C0200, Austin TX 78712-1229

**E-mail:** csemgrad@oden.utexas.edu

**URL:** [https://www.oden.utexas.edu/academics/](https://www.oden.utexas.edu/academics/)

**Overview**

The program is unique in its interdisciplinary emphasis. Faculty are drawn from a large number of academic departments representing five schools and colleges. The program is designed for outstanding students who desire expertise in multiple disciplines and are willing to take on new challenges by working alongside faculty involved in research at the forefront of computational science.
least 24 hours must be chosen from courses in the three concentration areas, with at least six hours from each area. These 24 hours of approved coursework must be taken on the letter-grade basis.

### Integrated Program with Computer Science (BSCS/MSCSEM):

Admission to the integrated Bachelor of Science in Computer Science and Master of Science in Computational Science, Engineering, and Mathematics (BSCS/MSCSEM) program is open only to undergraduate students within the Department of Computer Science at The University of Texas at Austin. It results in the simultaneous awarding of a BSCS degree and an MSCSEM degree. The integrated program requires completion of a total of 150 credit hours which is eight hours fewer than is required to complete the BSCS and MSCSEM degree programs individually. For the MSCSEM program of work, students in the integrated program must complete 30 semester hours of approved coursework, including a three hour master's report. At least 24 hours must be chosen from courses in the three concentration areas (applicable mathematics, numerical analysis/computational science, and mathematical modeling/applications), with at least six hours from each area.

### Doctor of Philosophy

Before admission to candidacy for the degree, each student develops a program of study that draws courses from each of the three areas of concentration; the program must be approved by the Graduate Studies Subcommittee. The student must also pass an examination in each area. In addition to meeting the area requirements, the student must prepare a written dissertation proposal. Oral presentation of the proposal and an oral examination are required. A dissertation is required of every candidate, followed by a final oral examination covering the dissertation and the general field of the dissertation.

### Graduate Studies

Students enrolling in Graduate School courses associated with The University of Texas System's Archer Center must be admitted to the summer program in public policy at the Archer Center in Washington, DC. Coursework will take place at the Archer Center, 1750 Pennsylvania Avenue NW, Suite 900, Washington, DC.

The program provides an opportunity to live and work in Washington, DC, and a unique educational experience for graduate students interested in American government. The curriculum consists of an internship with a federal government-related agency or organization and coursework to complement the internship experience.

### Writing

Master of Fine Arts

For More Information

**Campus address:** J. Frank Dobie House (FDH), 702 East Dean Keeton Street, phone (512) 471-1601, fax (512) 471-9997; campus mail code: A3400

**Mailing address:** The University of Texas at Austin, MFA in Writing, James A. Michener Center for Writers, 702 East Dean Keeton Street Stop A3400, Austin TX 78705-3201

**E-mail:** mcw@utexas.edu

**URL:** http://michener.utexas.edu/
Facilities for Graduate Work

The James A. Michener Center for Writers offers a cross-disciplinary Master of Fine Arts program that draws on strong programs in the New Writers Project (fiction and poetry), radio-television-film (screenwriting), and theatre (playwriting). The University Libraries, including the Fine Arts Library, provide rich resources for students interested in the creative process. The Harry Ransom Center houses a number of noted book collections as well as manuscripts, edited drafts, and early editions of creative works. The Jesse H. Jones Communication Center has extensive film and video production facilities, and the Performing Arts Center offers outstanding theatrical production facilities.

Students admitted to the program are offered James A. Michener Fellowships to support their study.

Areas of Study

Students seeking the MFA are expected to develop professional skills in at least two of the following fields of creative work: fiction, poetry, screenwriting, and playwriting. The curriculum requires students to work across disciplines; for example, the student might study fiction as a primary field and screenwriting as a secondary field. Candidates must each write a thesis in their primary field.

Graduate Studies Committee

The following faculty members served on the Graduate Studies Committee (GSC) in the spring 2023 semester.

The GSC Committee list was not available at publication time; please check directly with the department for an up-to-date list.

Degree Requirements, Writing

Graduate handbook information is updated and maintained by each program. Graduate handbooks are available within each program’s office and online at https://utexas.box.com/v/UTAustinGraduateHandbooks. Please contact the program with concerns or questions.

The student must complete at least 54 semester hours of coursework, including a three-hour first-year seminar; nine hours of creative work and six hours of studies courses in the primary field; six hours of creative work and three hours of studies courses in the secondary field; 21 hours of supporting coursework; and either the six-hour thesis course or (in cases where the student elects to complete a coursework-only degree plan with departmental report option) three additional elective hours and a three-hour departmental report course. The coursework-only degree-plan with departmental report option is only available with approval of the graduate advisor. Reviews are conducted each semester determine the student’s eligibility to continue in the program. Further information about degree requirements is available from the graduate advisor.

Courses, Intercollegial Programs

For courses offered by intercollegiate programs, please see the corresponding page in the following sections.

Courses, Computational Science, Engineering, and Mathematics Program

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Computational Science, Engineering, and Mathematics program: Computational Science, Engineering, and Mathematics (CSE).

Courses, Graduate School

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the Graduate School: Graduate School (GRS).

Courses, James A. Michener Center for Writers

Please see the General Information Catalog for a list of courses. The following fields of study are housed in the James A. Michener Center for Writers: Writing (WRT).

English as a Second Language

English as a second language (ESL) courses are offered as a requirement of the Office of Graduate Studies under the supervision of the Office of the Executive Vice President and Provost and Texas Global. The courses are designed for international graduate students who have a below-passing score on certain assessment tests. The courses are graded on the credit/no credit basis only. In order to register for an ESL course, a student must also register for at least three semester hours of coursework at the University. These three hours must be taken on the letter-grade basis.

English as a second language courses may not be counted toward any degree, but are included in determining if a student’s course load satisfies requirements for issues such as immigration, employment, housing, and financial aid.

More information is available from Texas Global.

Courses, English as a Second Language

Please see the General Information Catalog for a list of courses. The following fields of study are housed in Texas Global: English as a Second Language (ESL).

Appendix Course Abbreviations

Please see the Courses section of the General Information Catalog for fields of study and their corresponding abbreviations.

Members of Graduate Studies Committees

The following list represents those appointed in the 2023 spring semester.

Scott J Aaronson Schlumberger Centennial Chair in Computer Sciences, Professor, Department of Computer Science PhD, University of California-Berkeley, 2004

Gordon B Abner, Assistant Professor, Lyndon B Johnson School of Public Affairs PhD, Indiana University Bloomington, 2017

Jacob A Abraham Cockrell Family Regents Chair in Engineering #8, Professor, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 1974

Lawrence D Abraham, Professor Emeritus, Department of Kinesiology and Health Education
EdD, Teachers College, Columbia University, 1975

Steven Abrams, Professor, Department of Pediatrics; Professor, Department of Biomedical Engineering; Professor, Department of Nutritional Sciences
MD, The Ohio State University Main Campus, 1982

Jason Ira Abrevaya Murray S. Johnson Chair in Economics, Professor, Department of Economics
PhD, Massachusetts Institute of Technology, 1996

Patricia Abril-Gonzalez, Assistant Professor, Center for Mexican American Studies; Assistant Professor, Department of Curriculum and Instruction
MA, University of Colorado at Denver, 2009

Beverly Dominique Acha, Assistant Professor, Department of Art and Art History
MFA, Yale University, 2012

Amelia Acker GSLIS Alumni Teaching Fellowship, Associate Professor, School of Information
PhD, University of California-Los Angeles, 2014

Daniel A Ackerberg Addison Baker Duncan Centennial Professorship in Economics, Professor, Department of Economics
PhD, Yale University, 1997

Jennifer Keys Adair, Professor, Department of Curriculum and Instruction
PhD, Arizona State University Main, 2009

Paul C Adams, Professor, Department of Geography and the Environment
PhD, University of Wisconsin-Madison, 1993

Michelle Addington Henry M. Rockwell Chair in Architecture, Dean, School of Architecture
DEnvirond, Harvard University, 1997

Christopher O Adejumo, Associate Professor, Department of Art and Art History; Associate Professor, John L Warfield Center for African and African American Studies
PhD, The Ohio State University Main Campus, 1997

Abimbola Adunni Adelakun, Faculty Associate; Assistant Professor, Department of African and African Diaspora Studies
PhD, University of Texas at Austin, 2017

David E Adelman Harry M. Reasoner Regents Chair in Law, Faculty Associate; Professor, School of Law
JD, Stanford University, 1996

Ari Adut, Associate Professor, Department of Sociology
PhD, University of Chicago, 2004

Omoniyi Afolabi, Professor, Department of African and African Diaspora Studies; Professor, John L Warfield Center for African and African American Studies
PhD, University of Wisconsin-Madison, 1997

Ashish Agarwal Fayez Sarofim & Co. Centennial Fellowship #1, Associate Professor, Department of Information, Risk, and Operations Management
PhD, Carnegie Mellon University, 2009

Shiva Agarwal, Assistant Professor, Department of Management
PhD, University of Pennsylvania, 2017

Seema Agarwala, Associate Professor, Department of Molecular Biosciences
PhD, State University of New York at Stony Brook, 1990

Ahmad Agbaria, Assistant Professor of Instruction, Schusterman Center for Jewish Studies
PhD, University of Texas at Austin, 2018

Kamran S Aghaie, Associate Professor, Department of Middle Eastern Studies; Associate Professor, Center for Women’s and Gender Studies; Associate Professor, Center for Middle Eastern Studies; Associate Professor, Department of History
PhD, University of California-Los Angeles, 1999

Abigail Rosemary Ann Aiken, Associate Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Texas at Austin, 2014

Ricardo C Ainslie M. K. Hage Centennial Professorship in Education, Director (Medical); Professor, Department of Educational Psychology; Professor, Center for Mexican American Studies; Professor of Population Health, Department of Population Health
PhD, University of Michigan-Ann Arbor, 1979

Aditya Akella Regents Chair in Computer Sciences #1, Professor, Department of Computer Science
PhD, Carnegie Mellon University, 2005

Maruthi R Akella Cockrell Family Chair in Engineering #19, Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Texas A & M University, 1998

Manasicha Akepiyapornchai, Assistant Professor, Department of Asian Studies
MA, Cornell University, 2016

Bukky Akinsanmi, Assistant Professor, Department of Management
MArch, University of Oklahoma Norman Campus, 2006

Deji Akinwande Temple Foundation Endowed Professorship No. 1, Faculty Associate; Professor, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 2010

Ola N Al-Shalchi, Assistant Professor of Instruction, Department of Middle Eastern Studies
PhD, Old Dominion University, 2015

Bedour Alagraa, Assistant Professor, Department of African and African Diaspora Studies
PhD, Brown College, 2019

Farshid Alambeigi, Assistant Professor, Walker Department of Mechanical Engineering
MSE, Johns Hopkins University, 2017

Richard Albert William Stamps Farish Professorship in Law, Professor, School of Law; Professor, Department of Government
JD, Yale University, 2003

Bethany L Albertson, Associate Professor, Department of Management
PhD, University of Chicago, 2006

Kizzy Albritton, Associate Professor, Department of Educational Psychology
PhD, Georgia State University, 2014
Frederick Luis Aldama Jacob and Frances Sanger Mossiker Chair in the Humanities #1, LMAS Affiliated; Professor, Department of English  
PhD, Stanford University, 1999

Richard W Aldrich Karl Folkers Chair in Interdisciplinary Biomedical Research II, Professor Emeritus, Department of Neuroscience  
PhD, Stanford University, 1980

Kamran Ali Dallas TACA Centennial Fellowship in the Liberal Arts #1, Professor, Department of Anthropology; Professor, Department of Asian Studies; Professor, Center for Middle Eastern Studies; Professor, Department of Middle Eastern Studies  
PhD, Johns Hopkins University, 1998

Daniel J Allcock, Professor, Department of Mathematics  
PhD, University of California-Berkeley, 1996

David T Allen Melvin H. Gertz Regents Chair in Chemical Engineering, Professor, McKetta Department of Chemical Engineering; Director Research Unit, Center for Energy and Environmental Resources  
PhD, California Institute of Technology, 1983

Gregory D Allen, Professor, Sarah and Ernest Butler School of Music MM, Peabody Institute of Johns Hopkins University, 1972

Ahmer Arif, Associate Professor, School of Architecture  
MArch, University of Texas at Austin, 1989

Hal S Alper Kenneth A. Kobe Professorship in Chemical Engineering, CBRS Executive Director; Professor, McKetta Department of Chemical Engineering  
PhD, Massachusetts Institute of Technology, 2006

Kevin S Alter The Sid W. Richardson Centennial Professorship in Architecture, Professor, School of Architecture  
MArch, Harvard University, 1990

Aydogan Alti Bank of America Centennial Fellowship (No. 2), Associate Professor, Department of Finance  
PhD, Carnegie Mellon University, 2002

Andrea Alu, Senior Research Scientist; Adjunct Professor, Chandra Department of Electrical and Computer Engineering  
PhD, Universita degli Studi Roma Tre, 2007

Narayana R Aluru Ernest Cockrell, Sr. Chair in Engineering #1, Core Faculty, Oden Institute; Professor, Walker Department of Mechanical Engineering  
PhD, Stanford University, 1995

Jose R Alvarado, Assistant Professor, Department of Physics  
PhD, Vrije Universiteit Amsterdam, 2013

Chad Alvarez, Associate Professor, Department of Mexican American and Latino/a Studies; Associate Professor, Center for Mexican American Studies; Associate Professor, Department of History  
PhD, University of Chicago, 2014

Rosental C Alves Knight Chair in Journalism, Director for the Knight Center for Journalism in the Americas; Professor, School of Journalism and Media  
BA, Universidade Federal do Rio de Janeiro, 1976

Timothy R Andeen Jr, Associate Professor, Department of Physics  
PhD, Northwestern University, 2008

Edward G Anderson Jr Betty and Glenn Mortimer Centennial Professorship in Business, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Management  
PhD, Massachusetts Institute of Technology, 1997

Stephen J Anderson, Assistant Professor, Department of Marketing  
PhD, London Business School, Regent's Park, 2015

Alice Andrews, Assistant Professor of Medicine, Department of Medical Education; Clinical Associate Professor, Department of Management; Director of Education, PhD, Cornell University, 1995

Jeffrey G Andrews Truchard Family Chair in Engineering, Professor, Chandra Department of Electrical and Computer Engineering  
PhD, Stanford University, 2002

Jacqueline L Angel Wilbur J. Cohen Professorship in Health and Social Policy, Professor, Lyndon B Johnson School of Public Affairs; Professor, Department of Sociology  
PhD, Rutgers the State University of New Jersey New Brunswick Campus, 1989

Manuela Angelucci, Associate Professor, Department of Economics  
PhD, University College London, 2005

Eric V Anslyn Welch Regents Chair in Chemistry, Professor, Department of Chemistry  
PhD, California Institute of Technology, 1988

Dean R Appling, Professor Emeritus, Department of Molecular Biosciences  
PhD, Vanderbilt University, 1981

Todd J Arbogast W. A. "Tex" Moncrief, Jr. Distinguished Professorship in Computational Engineering and Sciences - Applied Mathematics, Core Faculty, Oden Institute; Professor, Department of Mathematics; Professor, Institute for Computational Engineering and Science  
PhD, University of Chicago, 1987

Tasheka Arceneaux Sutton, Associate Professor, School of Design and Creative Technologies  
MFA, California Institute of the Arts, 2007

Katherine M Arens, Professor, Department of Germanic Studies; Professor, Center for Women's and Gender Studies  
PhD, Stanford University, 1981

Ahmer Arif, Assistant Professor, School of Information  
PhD, University of Washington - Seattle, 2020

Eugenio Yatsuda Arima, Associate Professor, Department of Geography and the Environment  
PhD, Michigan State University, East Lansing, 2005

Minou Arjomand, Associate Professor, Department of English  
PhD, Columbia University (New York), 2013

Taft E Armandroff Frank and Susan Bash Endowed Chair for the Director of McDonald Observatory, Professor, Department of Astronomy; Director Research Unit, McDonald Observatory  
PhD, Yale University, 1988

Maria Mercedes Anredondo, Assistant Professor, Department of Human Development and Family Sciences; Assistant Professor, Department of Psychology  
MS, University of Michigan-Ann Arbor, 2014
Jossiana Arroyo Martinez, Professor, Department of Spanish and Portuguese; Professor, John L. Warfield Center for African and African American Studies; Professor, Department of African and African Diaspora Studies
PhD, University of California-Berkeley, 1998
Mark L Ascher, Professor, School of Law
JD, Harvard University, 1978

Rowland Atiase Ernst & Young Faculty Fellowship in Teaching Excellence, Professor, Department of Accounting
PhD, University of California-Berkeley, 1980
Lucy Atkinson, Associate Professor, Stan Richards School of Advertising and Public Relations; Associate Professor, Center for Women’s and Gender Studies
PhD, University of Wisconsin-Madison, 2009
Nigel S Atkinson, Professor, Department of Neuroscience
PhD, Pennsylvania State University Main Campus, 1986
Michael Aubrey, Assistant Professor, Department of Chemistry
PhD, University of California-Berkeley, 2017

Javier Auyero Joe R. & Teresa Lozano Long Endowed Professorship #3, Professor, Department of Sociology
PhD, New Sch for Soc Research, 1998
Anton Avancena, Assistant Professor, College of Pharmacy; Assistant Professor, Department of Medicine
PhD, University of Michigan-Ann Arbor, 2022
Jacqueline Angelina Avila, Associate Professor, Sarah and Ernest Butler School of Music
PhD, University of California-Riverside, 2011

Kiril Avramov, Assistant Professor, Department of Slavic and Eurasian Studies; Assistant Professor, Department of Government; Assistant Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Sofia, 2008
Germine Gigi Awad, Volunteer; Academic Center Affiliate- EDP; Department of Educational Psychology
PhD, Southern Illinois University Carbondale, 2005
Nicole Awai, Associate Professor, Department of Art and Art History
MFA, University of South Florida, 1996
Samy Ayoub, Assistant Professor, School of Law; Assistant Professor, Department of Middle Eastern Studies
PhD, University of Arizona, 2014
Hina Azam, Faculty Associate; Associate Professor, Department of Middle Eastern Studies; Associate Professor, Center for Middle Eastern Studies
PhD, Duke University, 2007
Flavio S Azevedo, UTeach Faculty Associate; Associate Professor, Department of Curriculum and Instruction
PhD, University of California-Berkeley, 2005
Ivo M Babuska, Professor Emeritus, Department of Aerospace Engineering and Engineering Mechanics
PhD, Academy of Sciences (Prague), 1955
Uttarayan Bagchi John S. Burns Faculty Fellowship, Professor, Department of Information, Risk, and Operations Management
PhD, Pennsylvania State University Main Campus, 1985

Vaibhav Bahadur Carl J. Eckhardt Fellowship in Mechanical Engineering, Associate Professor, Walker Department of Mechanical Engineering
PhD, Purdue University Main Campus, 2008
Jakki Bailey Scott C. and Vickie S. Reeve Endowed Faculty Fellowship, GSLIS Alumni Teaching Fellowship, Assistant Professor, School of Information
PhD, Stanford University, 2018

Christina Bain, Associate Professor, Department of Art and Art History
PhD, University of Georgia, 2001
Carlos R Baiz, Associate Professor, Department of Chemistry
PhD, University of Michigan-Ann Arbor, 2011

Chandrajit L Bajaj CAM Chair in Visualization, Core Faculty, Oden Institute; Professor, Department of Computer Science; Professor, Institute for Computational Engineering and Science
PhD, Cornell University, 1984

Aaron Blair Baker W.A. (Bill) Cunningham Professorship in Engineering, Affiliated Faculty, Oden Institute; Professor, Department of Biomedical Engineering
PhD, Harvard University, 2006

Brett J Baker, Associate Professor, Department of Marine Science; Associate Professor, Department of Integrative Biology
PhD, University of Michigan-Ann Arbor, 2014

Doris Luft Baker, Associate Professor, Department of Special Education; Associate Professor, Department of Curriculum and Instruction
PhD, University of Oregon, 2007

Lynn A Baker Frederick M. Baron Chair in Law, Professor, School of Law
JD, Yale University, 1985

Samuel Baker, Associate Professor, Department of English
PhD, University of Chicago, 2001

Efstathios Bakolas Eli H. and Ramona Thornton Centennial Fellowship in Engineering, Affiliated Faculty, Oden Institute; Associate Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Georgia Institute of Technology, 2011

Anantaram Balakrishnan Kenneth M. and Susan T. Jastrow II Chair in Business, Professor, Department of Information, Risk, and Operations Management
PhD, Massachusetts Institute of Technology, 1985

Jorge Francisco Balat, Assistant Professor, Department of Economics
PhD, Yale University, 2012

Michael Baldea Henry Beckman Professorship in Chemical Engineering, Core Faculty, Oden Institute; Professor, McKetta Department of Chemical Engineering
PhD, University of Minnesota-Twin Cities, 2006

Edoardo Baldini, Assistant Professor, Department of Physics
ScD, Swiss Federal Institute of Technology, Lausanne, 2017

Matthew Thomas Balhoff Bank of America Centennial Professorship in Petroleum Engineering, Affiliated Faculty, Oden Institute; Professor, Hildebrand Department of Petroleum and Geosystems Engineering; Director Research Unit, Center for Subsurface Energy and the Env
PhD, Louisiana State University and Agricultural and Mechanical College, 2005

Dawna Ballard William David Blunk Memorial Professorship, Associate Professor, Department of Communication Studies
Graduate 01/05/24

Caroline A Bartel College of Business Administration Foundation Advisory Council Centennial Fellowship #6, Professor, Department of Management
PhD, University of Michigan-Ann Arbor, 1998

John Bartholomew Teresa Lozano Long Endowed Chair in Kinesiology and Health Education, Professor, Department of Kinesiology and Health Education; Associate Dean for Academic Affairs, College of Education
PhD, Arizona State University Main, 1996

Matthew David Bartos, Assistant Professor, Department of Civil, Architectural, and Environmental Engineering
MSE, University of Michigan-Ann Arbor, 2019

Anitesh Barua David Bruton, Jr. Centennial Chair in Business Decision Support Systems, Professor, Department of Information, Risk, and Operations Management
PhD, Carnegie Mellon University, 1990

Donald S Batory, Professor Emeritus, Department of Computer Science
PhD, University of Toronto, 1981

Oguzhan Bayrak Cockrell Family Chair in Engineering #20, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Toronto, 1999

Fred C Beach, Lecturer, McKetta Department of Chemical Engineering; Lecturer, Department of Finance; Lecturer, Department of Business, Government and Society
PhD, University of Texas at Austin, 2010

Sheryl Luzzadder Beach Raymond Dickson Centennial Professorship #1, Professor, Department of Geography and the Environment
PhD, University of Minnesota-Twin Cities, 1990

Timothy Beach C. B. Smith, Sr. Centennial Chair in United States-Mexico Relations #2, Professor, Department of Geography and the Environment
PhD, University of Minnesota-Twin Cities, 1989

Joseph J Beaman Jr Earnest F. Gloyna Regents Chair in Engineering, Professor, Walker Department of Mechanical Engineering
ScD, Massachusetts Institute of Technology, 1979

Sarah Kate Beaman, Associate Professor, Department of Educational Psychology; Associate Professor, Department of Psychiatry
PhD, University of Texas at Austin, 2005

Alex A Beasley, Assistant Professor, Department of American Studies; Assistant Professor, Department of History; Assistant Professor, Center for Women's and Gender Studies
PhD, Yale University, 2016

David I Beaver, Faculty Associate; Professor, Department of Linguistics; Professor, Program in the Human Dimensions of Organizations; Professor, Department of Philosophy
PhD, University of Edinburgh, 1995

John T Beavers, Professor, Department of Linguistics
PhD, Stanford University, 2006

Deborah Beck, Associate Professor, Department of Classics
PhD, Harvard University, 1997

Owen Beck, Assistant Professor, Department of Kinesiology and Health Education
PhD, University of Colorado at Boulder, 2017

Heather A Becker, Lecturer, School of Nursing; Research Scientist
PhD, University of Texas at Austin, 1981
Michael Franklin Becker, Professor Emeritus, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 1974

Thorsten Becker Shell Companies Foundation Distinguished Chair in Geophysics, Shell Companies Foundation Distinguished Chair in Geophysics, Program Director (Academic); Professor, Department of Geological Sciences
PhD, Harvard University, 2002

William Beckner Paul V. Montgomery Centennial Memorial Professorship in Mathematics, Core Faculty, Oden Institute; Professor, Department of Mathematics
PhD, Princeton University, 1975

Jennifer S Beer, Professor, Department of Psychology; Professor, Department of Psychiatry
PhD, University of California-Berkeley, 2002

Christopher G Beevers Wayne H. Holtzman Regents Chair in Psychology, Faculty Associate; Professor, Department of Psychology; Professor, Department of Psychiatry
PhD, University of Miami, 2002

Brian Belardi, Assistant Professor, McKetta Department of Chemical Engineering
PhD, University of California-Berkeley, 2014

Kirsten L Belgum, Associate Professor, Department of Germanic Studies
PhD, University of Wisconsin-Madison, 1989

Christopher J Bell, Professor, Department of Geological Sciences
PhD, University of California-Berkeley, 1997

Andrew Belnap, Assistant Professor, Department of Accounting
PhD, University of North Carolina at Chapel Hill, 2020

Adela Ben-Yakar Harry L. Kent, Jr. Professorship in Mechanical Engineering, Professor, Walker Department of Mechanical Engineering; Professor, Department of Biomedical Engineering
PhD, Stanford University, 2001

David D Ben-Zvi, Professor, Department of Mathematics
PhD, Harvard University, 1999

Michael L Benedikt Hal Box Endowed Chair in Urbanism, Professor, School of Architecture; Professor, School of Design and Creative Technologies
MEnvRiorD, Yale University, 1975

Miroslava Benes, Associate Professor, School of Architecture
PhD, Yale University, 1989

Aprile D Benner, Professor, Department of Human Development and Family Sciences
PhD, University of California-Los Angeles, 2007

Chad J Bennett, Associate Professor, Department of English; Associate Professor, Center for Women's and Gender Studies
PhD, Cornell University, 2011

Magdalena Bennett, Assistant Professor, Department of Information, Risk, and Operations Management
PhD, Columbia University (New York), 2020

Tasha Beretvas John L. and Elizabeth G. Hill Centennial Professorship, Professor, Department of Educational Psychology; Professor, Department of Psychiatry; Senior Vice Provost for Faculty Affairs, Office of the Executive Vice President and Provost
PhD, University of Washington - Seattle, 2000

Charles E Berg Joe M. Dealey, Sr. Professorship in Media Studies, LMAS Affiliate; Professor, Department of Radio-Television-Film; Professor, Center for Mexican American Studies
PhD, University of Texas at Austin, 1987

Danielle Amanda Berg, Assistant Professor, Department of Astronomy
PhD, University of Minnesota-Twin Cities, 2013

Peter S Bergman, Associate Professor, Department of Economics
PhD, University of California-Berkeley, 2012

Jay Michael Bernhardt Walter Cronkite Regents Chair in Communication, DeWitt C. Reddick Regents Chair in Communication, Dean, Moody College of Communication; Professor, Department of Communication Studies; Professor, Stan Richards School of Advertising and Public Relations
PhD, University of North Carolina at Chapel Hill, 1999

Vladislav Beronja, Faculty Associate; Assistant Professor, Department of Slavic and Eurasian Studies
PhD, University of Michigan-Ann Arbor, 2014

Lance Bertelsen Iris Howard Regents Professorship in English Literature, Professor, Department of English
PhD, University of Washington - Seattle, 1979

Srinivas V Betadapur, Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Applied Research Laboratories; Professor, Department of Geological Sciences
PhD, University of Texas at Austin, 1993

Amit Bhasin The Joe King Professorship, Professor, Department of Civil, Architectural, and Environmental Engineering; Director Research Unit, Center for Transportation Research
DPhil, Texas A & M University, 2006

Venkataraman Bhaskar Sue Killam Professorship in the Foundations of Economics, Professor, Department of Economics
DPhil, University of Oxford, 1988

Chandra R Bhat Joe J. King Chair of Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering; Professor, Department of Economics
PhD, Northwestern University, 1991

Saroj Bhattacharai, Associate Professor, Department of Economics
PhD, Princeton University, 2010

J Eric Bickel Engineering Foundation Endowed Professorship No. 1, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering; Professor, Hildebrand Department of Petroleum and Geosystems Engineering; Professor, Department of Information, Risk, and Operations Management
PhD, Stanford University, 1999

Kory Bieg, Associate Professor, School of Architecture
MArch, Columbia University (New York), 2002

Douglas G Biow The Superior Oil Company - Linward Shivers Centennial Professorship in Medieval and Renaissance Studies, Professor, Department of French and Italian; Professor, Department of History; Director Academic Center, Center for European Studies
PhD, Johns Hopkins University, 1990

Alexander Birchler, Faculty Associate; Professor of Practice, Department of Art and Art History
MFA, Nova Scotia College of Art and Design, 1992

David P Birdsong, Professor, Department of French and Italian
PhD, Harvard University, 1979

Daniel J Birkholz, Associate Professor, Department of English
PhD, University of Minnesota-Twin Cities, 1999

George Biros W. A. "Tex" Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 2, Core Faculty, Oden Institute; Professor, Walker Department of Mechanical Engineering; Professor, Institute for Computational Engineering and Science; Professor, Department of Computer Science
PhD, Carnegie Mellon University, 2000

Fabrizio Bisetti, Affiliated Faculty, Oden Institute; Associate Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, University of California-Berkeley, 2007

Joydeep Biswas, Assistant Professor, Department of Computer Science
PhD, Carnegie Mellon University, 2014

George D Bittner, Professor, Department of Neuroscience
PhD, Stanford University, 1967

Richard Patrick Bixler, Assistant Professor, Lyndon B Johnson School of Public Affairs; Assistant Professor, School of Architecture
PhD, Colorado State University, 2014

Marc Bizer, Professor, Department of French and Italian
PhD, Princeton University, 1993

Donald D Blankenship, Senior Research Scientist,
PhD, University of Wisconsin-Madison, 1989

Mary E Blockley, Professor, Department of English
PhD, Yale University, 1984

Carl S Blyth, Director (0382); Associate Professor, Department of French and Italian
PhD, Cornell University, 1990

Hans C Boas The Raymond Dickson, Alton C. Allen and Dillon Anderson Centennial Professorship, Professor, Department of Germanic Studies; Professor, Department of Linguistics
PhD, University of North Carolina at Chapel Hill, 2000

Mary A Bock, Associate Professor, School of Journalism and Media; Associate Professor, Center for Women’s and Gender Studies; Associate Professor, Department of Communication Studies
PhD, University of Pennsylvania, 2009

Kimberly Kay Boddy, Assistant Professor, Department of Physics
PhD, California Institute of Technology, 2014

Marion Enid Bodian, Professor Emeritus, Department of History
PhD, Hebrew University, 1988

Christoph Boehm, Assistant Professor, Department of Economics
PhD, University of Michigan-Ann Arbor, 2016

David G Bogard Baker Hughes Incorporated Centennial Professorship, Professor, Walker Department of Mechanical Engineering
PhD, Purdue University Main Campus, 1982

Raghu Bollapragada, Affiliated Faculty, Oden Institute; Assistant Professor, Walker Department of Mechanical Engineering
MS, Northwestern University, 2015

Robert G Bone G. Rollie White Teaching Excellence Chair in Law,
Professor, School of Law
JD, Harvard University, 1978

Daniel A Bonevac, Faculty Associate; Professor, Department of Philosophy; Professor, Program in the Human Dimensions of Organizations
PhD, University of Pittsburgh at Pittsburgh, 1980

Paola Bonifazio, Associate Professor, Department of French and Italian;
Associate Professor, Center for Women’s and Gender Studies
PhD, New York University, 2008

Roger T Bonnecaze Jack and Beverly Randall Dean’s Chair for Excellence in Engineering, Dean’s Chair for Excellence in Engineering, Cockrell Family Dean’s Chair in Engineering Excellence, Cockrell Family Regents Chair in Engineering #5, Affiliated Faculty, Oden Institute; Professor, McKetta Department of Chemical Engineering; Interim Dean, Cockrell School of Engineering, Office of the Executive Vice President and Provost
PhD, California Institute of Technology, 1991

Kayla Booth, Assistant Professor of Instruction, School of Information
PhD, Pennsylvania State University Park, 2018

Jason R Borge, LMAS Affiliated; Professor, Department of Spanish and Portuguese; Professor, Department of American Studies
PhD, University of California-Berkeley, 2002

James Bornholt, Assistant Professor, Department of Computer Science
PhD, University of Washington - Seattle, 2019

Maura Borrego William J. Murray, Jr. Fellowship in Engineering No. 2, Professor, Walker Department of Mechanical Engineering; Professor, Department of Curriculum and Instruction
PhD, Stanford University, 2003

Pascale R Bos, Associate Professor, Department of Germanic Studies;
Associate Professor, Center for Women’s and Gender Studies
PhD, University of Minnesota-Twin Cities, 1998

Carlos Botero, Associate Professor, Department of Integrative Biology
PhD, Cornell University, 2007

Alan C Bovik Cockrell Family Regents Chair in Engineering #3, Affiliated Faculty, Oden Institute; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Illinois at Urbana-Champaign, 1984

Lewis P Bowen Jane and Roland Blumberg Centennial Professorship in Mathematics, Professor, Department of Mathematics
PhD, University of Texas at Austin, 2002

Matthew Bowers, Associate Professor of Instruction, Department of Kinesiology and Health Education
PhD, University of Texas at Austin, 2011

Brendan Peter Bowler, Assistant Professor, Department of Astronomy
PhD, University of Hawaii at Manoa, 2013

Svetlana Boyarchenko, Associate Professor, Department of Economics
PhD, Rostov State University, 1983

Michael Boylan-Kolchin, Associate Professor, Department of Astronomy
PhD, University of California-Berkeley, 2006

Casey A Boyle Lillian and Tom B. Rhodes Centennial Teaching Fellowship #1, Faculty Associate; Associate Professor, Department of Rhetoric and Writing; Associate Professor, Department of Communication Studies

Graduate 01/05/24
PhD, University of South Carolina - Columbia, 2011

Stephen Boyles Charles Elmer Rowe Fellowship in Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Texas at Austin, 2009

Kevin Bozic, Professor, Department of Surgery and Perioperative Care MD, University of California-San Francisco, 1994

Oren Bracha William C. Conner Chair in Law, Howrey LLP and Arnold, White & Durkee Centennial Professorship in Law, Professor, School of Law
SJJD, Harvard University, 2005

Darrin H Brager, Research Associate Professor, Department of Neuroscience
PhD, University of Maryland Baltimore, 2002

Simon J Brandl, Assistant Professor, Department of Marine Science
PhD, James Cook University, 2016

Henry W Brands Jack S. Blanton, Sr. Chair in History, Faculty Associate; Professor, Department of History
PhD, University of Texas at Austin, 1985

Joel Braun, Associate Professor, Sarah and Ernest Butler School of Music
MM, The Juilliard School, 2007

Troy D Brautuch, Professor, Department of Art and Art History
BFA, California Institute of the Arts, 1975

Ria Bravo, Assistant Professor, School of Architecture
MArch, University of Tennessee at Knoxville, 2019

Molly S Bray Susan T. Jastrow Human Ecology Chair for Excellence in Nutritional Sciences, Jean Andrews Centennial Faculty Fellowship in Human Nutrition, Professor, Department of Nutritional Sciences; Professor, Department of Pediatrics
PhD, University of Texas Health Science Center at Houston, 1998

Daniel O Breecker, Professor, Department of Geological Sciences
PhD, University of New Mexico-Albuquerque, 2008

Boris Breizman, Research Professor, Institute for Fusion Studies; Research Professor, Department of Physics
PhD, Budker Institute of Nuclear Physics, 1978

J Thomas Brenna, Professor, Department of Pediatrics
PhD, Cornell University, 1985

Joan F Brennecke Cockrell Family Chair in Engineering #16, Professor, McKetta Department of Chemical Engineering
PhD, University of Illinois at Urbana-Champaign, 1989

Joel P Brereton, Professor Emeritus, Department of Asian Studies; Professor, Department of Chinese and Japanese Studies
PhD, University of Texas at Austin, 1985

Nathaniel O Brickens
PhD, Yale University, 1975

Laura F Bright Mrs. Mary Gibbs Jones Fellowship in Communication, Acting Associate Director, Advertising and Public Relations; Associate Professor, Stan Richards School of Advertising and Public Relations
PhD, University of Texas at Austin, 2008

Daniel M Brinks, Professor, Department of Government; Professor, School of Law
PhD, University of Notre Dame, 2004

Danelle Irene Briscoe, Associate Professor, School of Architecture
MArch, Yale University, 2002

Amy Brock Raymond F. Dawson Centennial Teaching Fellowship in Engineering, Associate Professor, Department of Biomedical Engineering
PhD, Harvard University, 2004

Patrick L Brockett Gus Wortham Memorial Chair in Risk Management and Insurance, Affiliated Faculty, Oden Institute; Professor, Department of Information, Risk, and Operations Management; Professor, Department of Finance; Professor, Department of Mathematics
PhD, University of California-Irvine, 1975

Jennifer S Brodbelt Rowland Pettit Centennial Chair in Chemistry, Larry R. Faulkner Departmental Chair for Excellence in Chemistry and Biochemistry, Professor, Department of Chemistry; Professor, Department of Oncology
PhD, Purdue University Main Campus, 1988

Andrew Brodsky, Assistant Professor, Department of Management
PhD, Harvard University, 2017

Volker Bromm Josey Centennial Professorship in Astronomy, Professor, Department of Astronomy
PhD, Yale University, 2000

Susan M Broniarczyk Susie and John L. Adams Endowed Chair in Business, Professor, Department of Marketing; Associate Dean, Red McCombs School of Business
PhD, University of Florida, 1992

Benjamin Claude Brower, Associate Professor, Department of History; Associate Professor, Center for Middle Eastern Studies
PhD, Cornell University, 2005

Anthony L Brown, Heman Sweatt Center Research Lab Lead; Professor, Department of Curriculum and Instruction; Professor, John L Warfield Center for African and African American Studies; Professor, Department of African and African Diaspora Studies
PhD, University of Wisconsin-Madison, 2006

Carolyn M Brown Henry M. Burtle Centennial Endowed Professorship in Pharmacy, Professor, College of Pharmacy; Professor, John L Warfield Center for African and African American Studies; Professor, Department of African and African Diaspora Studies
PhD, University of Florida, 1994

Christopher P Brown, Professor, Department of Educational Leadership and Policy
PhD, University of Wisconsin-Madison, 2004

Jonathan C Brown, Professor Emeritus, Department of History
PhD, University of Texas at Austin, 1976

Keffrelyn D Brown Suzanne B. and John L. Adams Endowed Professorship in Education, Faculty Associate; Professor, Department of Curriculum and Instruction; Professor, Center for Women's and Gender Studies; Professor, John L Warfield Center for African and African American Studies; Professor, Department of African and African Diaspora Studies
PhD, University of Wisconsin-Madison, 2006

Keith C Brown Fayez Sarofim & Co. Centennial Fellowship #2, Professor, Department of Finance
PhD, Purdue University Main Campus, 1981

Khytie Brown, Assistant Professor, Department of Religious Studies
MTS, Harvard University, 2013
Richard Allen Brown, Professor of Psychiatry, Department of Psychiatry; Research Professor, School of Nursing; Research Professor, Department of Psychology
PhD, University of Oregon, 1981

Simone Arlene Browne, Associate Professor, John L Warfield Center for African and African American Studies; Associate Professor, Department of African and African Diaspora Studies; Associate Professor, Department of Sociology; Associate Professor, Center for Women's and Gender Studies
PhD, University of Toronto, 2007

Andrew A Brownell, Assistant Professor, Sarah and Ernest Butler School of Music
DMA, Guildhall School of Music and Drama, 2010

Karen S Browning, Professor, Department of Molecular Biosciences
PhD, University of Illinois at Urbana-Champaign, 1980

Jason M Brownlee, LAITS Faculty Associate; Professor, Department of Government; Professor, Center for Middle Eastern Studies; Professor, Department of Middle Eastern Studies
PhD, Princeton University, 2004

Audrey C Brumback, Assistant Professor, Department of Pediatrics; Assistant Professor, Department of Neurology; Assistant Professor, Department of Neuroscience
PhD, University of Colorado at Denver, 2006

Douglas S Bruster Louann and Larry Temple Centennial Professorship in English Literature, ODPS Director; Professor, Department of English
PhD, Harvard University, 1990

Erika M Bsume, Associate Professor, Department of History
PhD, Rutgers the State University of New Jersey New Brunswick Campus, 2000

Lawrence Ray Buchanan, Associate Professor, Department of Philosophy
PhD, New York University, 2008

J Budziszewski, Faculty Associate; Professor, Department of Government; Professor, Department of Philosophy
PhD, Yale University, 1981

Walter L Buenger Jr Summerlee Foundation Chair in Texas History, Barbara White Stuart Centennial Professorship in Texas History, Professor, Department of History
PhD, Rice University, 1979

James W Buhler, Professor, Sarah and Ernest Butler School of Music
PhD, University of Pennsylvania, 1996

Tan Thanh Bui William J. Murray, Jr. Fellowship in Engineering No. 4, Core Faculty, Oden Institute; Associate Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Massachusetts Institute of Technology, 2007

Beth E Bukoski, Associate Professor of Practice, Department of Educational Leadership and Policy
PhD, University of Texas at Austin, 2012

Barbara Ellen Bullock, Professor, Department of French and Italian; Professor, Department of Spanish and Portuguese
PhD, University of Delaware, 1990

Marissa Burgener, Assistant Professor, Department of Nutritional Sciences; Assistant Professor, Department of Population Health
PhD, Columbia University (New York), 2015

JD Burnett, Assistant Professor, Sarah and Ernest Butler School of Music
DMA, University of North Texas, 2013

Chelsea Burns, Assistant Professor, Sarah and Ernest Butler School of Music
PhD, University of Chicago, 2016

Ethan R Burris King Ranch Chair for Business Leadership, Professor, Department of Management; Professor, Department of Medical Education; Senior Associate Dean, Academic Affairs, Red McCombs School of Business
PhD, Cornell University, 2005

Thomas A Burritt, Professor, Sarah and Ernest Butler School of Music
DMA, Northwestern University, 2000

Ashay Burungale, Assistant Professor, Department of Mathematics
PhD, University of California-Los Angeles, 2015

Joshua W Busby, Professor, Lyndon B Johnson School of Public Affairs
PhD, Georgetown University, 2004

Adam Bush, Assistant Professor, Department of Biomedical Engineering
PhD, University of Southern California, 2017

Edward J Buskey Nancy Lee and Perry R. Bass Regents Chair in Marine Science, Professor, Department of Marine Science; Director, Marine Science Institute, Marine Science Institute
PhD, University of Rhode Island, 1983

David M Buss, Professor, Department of Psychology
PhD, University of California-Berkeley, 1981

John C Butler, Associate Director, Energy Management and Innovation Center; Clinical Associate Professor, Department of Finance
PhD, University of Texas at Austin, 1998

Johnny S Butler, Professor Emeritus, Department of Management; Professor Emeritus, Department of Sociology
PhD, Northwestern University, 1974

Matthew J Butler, Associate Professor, Department of History
PhD, University of Bristol, 2000

Michael Butterworth, Director of the Center for Sports Communication and Media; Professor, Department of Communication Studies
PhD, Indiana University Bloomington, 2006

Courtney T Byrd Dale and Tina Holder Endowed Chair in Stuttering Leadership, Executive Director, Arthur M. Blank Center for Stuttering Education and Research; Distinguished Teaching Professor, Department of Speech, Language, and Hearing Sciences
PhD, Vanderbilt University, 2003

Marika Cabral, Associate Professor, Department of Economics
PhD, Stanford University, 2011

Elena Caceres, Associate Professor, Department of Physics
PhD, University of Texas at Austin, 1996

Luis A Caffarelli Sid W. Richardson Foundation Regents Chair in Mathematics #1, Core Faculty, Oden Institute; Professor, Department of Mathematics
PhD, University of Buenos Aires, 1972
Carlos H Caldés Gerard A. Rohlich Regents Professorship in Civil Engineering, Faculty Associate-ENGR; Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Illinois at Urbana-Champaign, 2003

Catherine Calder, Professor, Department of Statistics and Data Sciences
PhD, Duke University, 2003

Rebecca Marie Callahan, Other University Affiliate,
PhD, University of California-Davis, 2003

Cassandra E Callmann, Assistant Professor, Department of Chemistry
PhD, University of California-San Diego, 2018

Esther Calzada Norma and Clay LeBen Professorship in Child and Family
Behavioral Health, Associate Dean, School of Social Work; Academic
Center Affiliate, Department of Educational Psychology
PhD, University of Florida, 2000

Xiaolu Cambronne, Assistant Professor, Department of Molecular
Biosciences
PhD, Harvard University, 2009

Naomi Campa, Assistant Professor, Department of Classics
PhD, University of Washington - Seattle, 2014

Craig A Campbell, Associate Professor, Department of Anthropology;
Associate Professor, Department of Slavic and Eurasian Studies
PhD, University of Alberta, 2009

Julia Campbell, Assistant Professor, Department of Speech, Language,
and Hearing Sciences
PhD, University of Colorado at Boulder, 2015

Katherine Canales, Department Chair, School of Design and Creative
Technologies
BS, Stanford University, 2002

Jorge Canizares Alice Jane Drysdale Sheffield Regents Professorship in
History, Professor, Department of History
PhD, University of Wisconsin-Madison, 1995

David Cannatella, Associate Director (Academic); Professor, Department
of Integrative Biology
PhD, University of Kansas Main Campus, 1986

Paola Canova, Associate Professor, Department of Anthropology
PhD, University of Arizona, 2014

Debra Cantu, Special Assistant for District Partnerships; Associate
Professor of Practice, Department of Educational Leadership and Policy
PhD, University of Texas at Austin, 2013

Norma V Cantu Ken McIntyre Professorship for Excellence in School
Leadership, Professor, Department of Educational Leadership and Policy
JD, Harvard University, 1977

Junyu Cao, Assistant Professor, Department of Information, Risk, and
Operations Management
PhD, University of California-Berkeley, 2020

Constantine Caramanis Chandra Family Endowed Distinguished
Professorship in Electrical and Computer Engineering #1, CS OM Faculty
Associate - 9/1/22 - 8/31/23; Professor, Chandra Department of Electrical
and Computer Engineering
PhD, Massachusetts Institute of Technology, 2006

Luis Ernesto Carcamo-Huechante, Director (Academic); Associate
Professor, Department of Spanish and Portuguese
PhD, Cornell College, 2001

Meinhard Bayani Cardenas J. Nalle Gregory Regents Professorship in
Geological Sciences, Professor, Department of Geological Sciences
PhD, New Mexico Institute of Mining and Technology, 2006

Roberto Carlos, Assistant Professor, Department of Government
PhD, University of Chicago, 2018

Caryn L Carlson, Faculty Associate; Professor, Department of
Psychology; Professor, Program in the Human Dimensions of
Organizations
PhD, University of Georgia, 1984

Cindy I Carlson, Professor, Department of Educational Psychology
PhD, Indiana University Bloomington, 1982

Charles Daniel Carson, Associate Professor, Sarah and Ernest Butler
School of Music; Associate Professor, John L Warfield Center for African
and African American Studies
PhD, University of Pennsylvania, 2008

Daniela Bini Carter, Professor, Department of French and Italian
PhD, University of Texas at Austin, 1970

Mia E Carter, Associate Professor, Department of English; Associate
Dean, College of Liberal Arts
PhD, University of Wisconsin-Milwaukee, 1992

Carlos Marinho Carvalho La Quinta Motor Inns, Inc. Centennial
Professorship in Business, Executive Director of the CEPA; Salem Center
for Policy; Professor, Department of Information, Risk, and Operations
Management; Professor, Department of Finance; Professor, Department
of Statistics and Data Sciences
PhD, Duke University, 2006

Oscar H Casares Susan Taylor McDaniel Regents Professorship in
Creative Writing #1, Professor, Department of English; Professor, Center
for Mexican American Studies
MFA, University of Iowa, 2001

Caitlin M Casey, Associate Professor, Department of Astronomy
PhD, University of Cambridge, 2011

Jordan Casey, Assistant Professor, Department of Marine Science
PhD, James Cook University, 2015

Sergio Castellanos, Faculty Associate, Fulbright JFDP Egypt; Assistant
Professor, Department of Civil, Architectural, and Environmental
Engineering
PhD, Massachusetts Institute of Technology, 2015

Darla Marie Castelli Catherine Mae Parker Centennial Professorship in
Education, Professor, Department of Kinesiology and Health Education
PhD, University of South Carolina - Columbia, 2002

Edward Castillo, Affiliated Faculty, Oden Institute; Associate Professor,
Department of Biomedical Engineering
PhD, Rice University, 2008

Iokepa Casumbal-Salazar, Assistant Professor, Department of
Anthropology
PhD, University of Hawaii at Manoa, 2014

Ginny A Catania, Program Director (Academic); Professor, Department of
Geological Sciences; Professor, Institute for Geophysics
PhD, University of Washington - Seattle, 2004

Kirsten Cather, Associate Professor, Department of Asian Studies
194 

PhD, University of California-Berkeley, 2004

Elizabeth Jacqueline Catlos Geology Foundation Advisory Council
Centennial Teaching Fellowship in Geological Sciences, Associate
Professor, Department of Geological Sciences
PhD, University of California-Los Angeles, 2000

Alexandra Kate Catterall, Associate Professor, School of Design and
Creative Technologies; Associate Professor, School of Information
MA, Glasgow School of Art, 1992

Stephanie Washbourn Cawthon, Faculty Associate; Professor,
Department of Educational Psychology; Professor, Department of Special
Education
PhD, University of Wisconsin-Madison, 2000

Sylvia Celedon-Pattichis, Professor, Department of Curriculum and
Instruction
PhD, University of Texas at Austin, 1998

Can Cenik, Assistant Professor, Department of Molecular Biosciences
PhD, Harvard University, 2012

Ivan Y Chaar Lopez, Assistant Professor, Department of American
Studies
PhD, University of Michigan-Ann Arbor, 2018

Deepayan Chakrabarti, Associate Professor, Department of Information,
Risk, and Operations Management
PhD, Carnegie Mellon University, 2005

Edward Chambers David Bruton, Jr. Centennial Professorship in Art
History, Professor, Department of Art and Art History; Professor, John L
Warfield Center for African and African American Studies
PhD, University of London, 1998

Frances Anne Champagne, Professor, Department of Psychology;
Professor, Department of Psychiatry
PhD, McGill University, 2004

Jane Dimmitt Champion Lee and Joseph D. Jamail Endowed
Professorship in Nursing, Faculty Associate Honors Fall 2022 Seminar;
Professor, School of Nursing
PhD, University of Texas Health Science Center at San Antonio, 1994

Craig A Champlin, Professor Emeritus, Department of Speech, Language,
and Hearing Sciences
PhD, University of Kansas Main Campus, 1987

Clarence Shiu Man Chan, Associate Professor Emeritus, Department of
Molecular Biosciences
PhD, Cornell University, 1985

Eric Chan, Assistant Professor, Department of Accounting
PhD, University of Pittsburgh at Pittsburgh, 2015

Chih-Hao Chang Temple Foundation Endowed Teaching Fellowship
in Engineering No. 1, Associate Professor, Walker Department of
Mechanical Engineering
PhD, Massachusetts Institute of Technology, 2008

Jennifer T Chang, Associate Professor, Department of English
PhD, University of Virginia, 2017

Joshua Tsukang Chang, Affiliated Faculty, Oden Institute; Assistant
Professor of Medicine, Department of Neurology; Assistant Professor of
Medicine, Department of Population Health
PhD, University of Massachusetts Amherst, 2017

Sung-Sheng Yvonne Chang, Professor, Department of Asian Studies

PhD, Stanford University, 1985

Terrence Leon Chapman, Professor, Department of Government
PhD, Emory University, 2007

Michael Ray Charles, Professor, Department of African and African
Diaspora Studies; Professor, School of Design and Creative Technologies
MFA, University of Houston, 1993

Michael J Charlesworth, Professor, Department of Art and Art History
PhD, The University of Kent, 1990

William S Charlton John J. McKetta Energy Professorship in Engineering,
Professor, Walker Department of Mechanical Engineering, Professor,
Applied Research Laboratories; Director, Nuclear Engineering Teaching
Laboratory, Nuclear Engineering Teaching Laboratory
PhD, Texas A & M University, 1999

Davida H Charney Lillian and Tom B. Rhodes Centennial Teaching
Fellowship #4, Faculty Associate; Professor, Department of Rhetoric and
Writing; Professor, Department of English
PhD, Carnegie Mellon University, 1985

Indrani Chatterjee, Professor, Department of History; Professor,
Department of Asian Studies
PhD, University of London, 1996

Prem Chaudhuri Rachael and Ben Vaughan Faculty Fellowship in
Classics, Associate Professor, Department of Classics
PhD, Yale University, 2008

Swarat Chaudhuri, Associate Professor, Department of Computer
Science
PhD, University of Pennsylvania, 2007

Karma Ruth Chavez Bobby and Sherri Patton Endowed Professorship
in Mexican American and Latina/o Studies, LMAS Affiliated; Professor,
Department of Communication Studies; Professor, Department of
Rhetoric and Writing; Professor, Department of Mexican American and
Latina/o Studies; Professor, Center for Women's and Gender Studies
PhD, Arizona State University Main, 2007

C Ondine Chavoya John D. Murchison Regents Professorship in Art,
Professor, Department of Art and Art History
PhD, University of Rochester, 2002

Shuchi Chawla Professorship in Computer Sciences #2, Professor,
Department of Computer Science
PhD, Carnegie Mellon University, 2005

James R Chelikowsky W. A. "Tex" Moncrief, Jr. Chair in Computational
Materials, Core Faculty, Oden Institute; Professor, McKetta Department
of Chemical Engineering; Professor, Department of Physics; Professor,
Department of Chemistry
PhD, University of California-Berkeley, 1975

Dongmei Chen Chevron Centennial Fellowship in Engineering (No. 2),
Professor, Walker Department of Mechanical Engineering
PhD, University of Michigan-Ann Arbor, 2006

Gina Chen, Associate Professor, School of Journalism and Media
PhD, Syracuse University Main Campus, 2012

Graduate 01/05/24
Hsin-Yu Chen, Assistant Professor, Department of Physics
PhD, University of Chicago, 2017

Jingyi Chen, Affiliated Faculty, Oden Institute; Assistant Professor, Department of Geological Sciences; Assistant Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Stanford University, 2014

Jonathan Yan Chen, Professor, Division of Textiles and Apparel; Professor, School of Human Ecology
PhD, University of Leeds, 1995

Patricia Chen, Assistant Professor, Department of Educational Psychology
PhD, University of Michigan-Ann Arbor, 2015

Ray T Chen Keys and Joan Curry/Cullen Trust Endowed Chair, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Irvine, 1991

Shuping Chen, Professor, Department of Accounting
PhD, University of Southern California, 2003

Thomas Chen Frank E. Gerth III Faculty Fellowships, Professor, Department of Mathematics
PhD, Swiss Federal Institute of Technology, 2001

Wen-hong Chen, Director (Academic); Associate Professor, Department of Radio-Television-Film; Associate Professor, Department of Sociology
PhD, University of Toronto, 2007

Z Jeffrey Chen, Professor, Department of Molecular Biosciences; Professor, Department of Integrative Biology
PhD, Texas A & M University, 1993

Robert M Chesney Honorable James A. Baker III Chair in the Rule of Law and World Affairs, John Jeffers Research Chair in Law, Charles I. Francis Professorship in Law, Dean, School of Law, School of Law
JD, Harvard University, 1997

Lina Chhun, Assistant Professor, Department of American Studies
PhD, University of California-Los Angeles, 2019

Joshua Childs, Faculty Fellow; Assistant Professor, Department of Educational Leadership and Policy
PhD, University of Pittsburgh at Pittsburgh, 2015

Sanjeev Chinchali Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 2020

Derek Chiou, Professor, Chandra Department of Electrical and Computer Engineering
PhD, Massachusetts Institute of Technology, 1999

John Chisholm, Assistant Professor, Department of Astronomy
PhD, University of Wisconsin-Milwaukee, 2016

Eunsol Choi, Assistant Professor, Department of Computer Science
MS, University of Washington - Seattle, 2015

Seung William Choi Pearson Endowed Professorship in Psychometrics, Faculty Associate; Professor, Department of Educational Psychology; Professor of Population Health, Department of Population Health
PhD, University of Texas at Austin, 1996

Shwetadwip Chowdhury Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, Duke University, 2016

Richard J Chuchla, Lecturer, Department of Finance; Lecturer, Department of Geological Sciences; Energy and Earth Resources Graduate Program Director, MA, University of Texas at Austin, 1981

Doug Chung, Director of the Professional Sales and Business Development Minor and Sales Foru; Associate Professor, Department of Marketing
PhD, Yale University, 2012

Jessica Alice Church-Lang, Associate Professor, Department of Psychology
PhD, Washington University in St Louis, 2008

Michael J Churgin Raybourne Thompson Centennial Professorship in Law, Professor, School of Law
JD, Yale University, 1973

Hsiang Chyi, Professor, School of Journalism and Media
PhD, University of Texas at Austin, 1999

Eric Chyn, Associate Professor, Department of Economics
PhD, University of Michigan-Ann Arbor, 2016

Mirela Ciperiani, Associate Professor, Department of Mathematics
PhD, Princeton University, 2006

Josh M Cisler, Associate Professor, Department of Psychiatry
PhD, University of Arkansas at Fayetteville, 2010

Erica Ciszek Stan Richards Faculty Fellowship in Advertising and Public Relations Media Strategy, Associate Professor, Stan Richards School of Advertising and Public Relations
PhD, University of Oregon, 2014

Alexandra Clara Saracho, Assistant Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Cambridge, 2020

Alexandra L Clark, Assistant Professor, Department of Psychology
PhD, San Diego State University, 2019

John R Clarke Annie Laurie Howard Regents Professorship in Fine Arts, Professor, Department of Art and Art History
PhD, Yale University, 1973

John-Paul Clarke Ernest Cockrell, Jr., Memorial Chair in Engineering, Professor, Department of Aerospace Engineering and Engineering Mechanics
ScD, Massachusetts Institute of Technology, 1997

Julia Allison Clarke John A. Wilson Professorship in Vertebrate Paleontology, Professor, Department of Geological Sciences; Associate Dean, Strategic Educational and Research Impact, John A and Katherine G Jackson School of Geosciences
PhD, Yale University, 2002

Kevin Clarno Charlotte Maer Patton Centennial Fellowship in Engineering, Affiliated Faculty, Oden Institute; Associate Professor, Walker Department of Mechanical Engineering
PhD, Texas A & M University, 2004

Christian Claudel William J. Murray, Jr. Fellowship in Engineering No. 1, Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of California-Berkeley, 2010
Patricia Clayton, Adjunct Associate Professor, Department of Civil, Architectural, and Environmental Engineering 
PhD, University of Washington - Seattle, 2013

Danielle P Clealand, Associate Professor, Department of Mexican American and Latino/a Studies; Associate Professor, Department of African and African Diaspora Studies 
PhD, University of North Carolina at Chapel Hill, 2011

Noel T Clemens Clare Cockrell Williams Centennial Chair in Engineering, Professor, Department of Aerospace Engineering and Engineering Mechanics 
PhD, Stanford University, 1991

Michael B Clement Clark W. Thompson, Jr. Chair in Accounting, Professor, Department of Accounting 
PhD, Stanford University, 1997

Tanya Elizabeth Clement, Associate Director, Initiative for Digital Humanities; Associate Professor, Department of English; Associate Professor, School of Information 
PhD, University of Maryland College Park, 2009

Mark P Cloos, 2022 Retiree Other University Affiliate; Professor Emeritus, Department of Geological Sciences 
PhD, University of California-Los Angeles, 1981

Adam John Clulow, Professor, Department of History 
PhD, Columbia University (New York), 2008

Tanya M Coakley, Professor, School of Nursing 
PhD, University of Tennessee at Knoxville, 2004

Geoffrey A Coalon, Clinical Associate Professor, Department of Speech, Language, and Hearing Sciences 
PhD, University of Texas at Austin, 2013

Judith G Coffin, Professor, Department of History 
PhD, Yale University, 1985

Jane M Cohen Edward Clark Centennial Professorship in Law, Professor, School of Law 
JD, Yale University, 1971

Jonathan B Cohn, Program Director of the Financial Analyst Program; Associate Professor, Department of Finance 
PhD, University of Michigan-Ann Arbor, 2008

Olivier Coibion Malcolm Forsman Centennial Professorship, Professor, Department of Economics 
PhD, University of Michigan-Ann Arbor, 2007

Iyaxel Ixkan Cojti Ren, Faculty Associate; Assistant Professor, Department of Anthropology 
PhD, Vanderbilt University, 2019

William R Coker, Professor, Department of Physics 
PhD, University of Georgia, 1966

Kevin O Cokley Oscar and Anne Mauzy Regents Professorship for Educational Research and Development, Academic Center Affiliate, Department of Educational Psychology 
PhD, Georgia State University, 1998

Ashley Coleman Taylor, Assistant Professor, Department of Religious Studies; Assistant Professor, Department of African and African Diaspora Studies 
PhD, Emory University, 2016

Renita Beth Coleman, Professor, School of Journalism and Media 
PhD, University of Missouri - Columbia, 2001

Laura Lee Colgin, HSS Faculty Director; Associate Professor, Department of Neuroscience; Director Research Unit, Center for Learning and Memory 
PhD, University of California-Irvine, 2003

Miriam S Collins, Assistant Professor, School of Architecture 
MCityP Massachusetts Institute of Technology, 2012

Avinash Collis, Assistant Professor, Department of Information, Risk, and Operations Management 
PhD, Massachusetts Institute of Technology, 2020

Jason Cons, Faculty Associate; Associate Professor, Department of Anthropology 
PhD, Cornell University, 2011

Lydia Maria Contreras Paul D. and Betty Robertson Meek Centennial Professorship in Chemical Engineering, Professor, McKetta Department of Chemical Engineering; Professor, John L Warfield Center for African and African American Studies; Vice Provost, Office of the Executive Vice President and Provost 
PhD, Cornell University, 2008

Kerry H Cook John A. and Katherine G. Jackson Centennial Teaching Fellowship in Geological Sciences, Professor, Department of Geological Sciences 
PhD, North Carolina State University, 1984

Cary Cordova, LMAS Affiliated; Associate Professor, Department of American Studies; Associate Professor, Center for Mexican American Studies; Associate Professor, Department of Mexican American and Latino/a Studies 
PhD, University of Texas at Austin, 2005

Lawrence K Cormack, Professor, Department of Psychology 
PhD, University of California-Berkeley, 1992

Elizabeth Cosgriff-Hernandez Cullen Trust for Higher Education Endowed Professorship in Engineering #2, Professor, Department of Biomedical Engineering 
PhD, Case Western Reserve University, 2005

Maria Eugenia Cotera, Associate Professor, Department of Mexican American and Latino/a Studies 
PhD, Stanford University, 2001

Jacob Aaron Covault, Lecturer, Department of Geological Sciences; Senior Research Scientist, PhD, Stanford University, 2008

Ronald Covey, Professor, Department of Anthropology 
PhD, University of Michigan-Ann Arbor, 2003

James H Cox Jane and Roland Blumberg Centennial Professorship in English, Professor, Department of English; Professor, Center for Mexican American Studies; Associate Dean, Office of the Vice Provost and Dean of Graduate Studies 
PhD, University of Nebraska at Lincoln, 1999

Edward F Coyle, Professor, Department of Kinesiology and Health Education 
PhD, University of Arizona, 1979

Rowena Crabbe, Assistant Professor, Department of Marketing 
PhD, University of Illinois at Chicago, 2018

Alison Craig, Assistant Professor, Department of Government
PhD, The Ohio State University Main Campus, 2017
Isabella C Cunningham Stan Richards Chair in Advertising and Public Relations Strategy, Faculty Associate; Professor, Stan Richards School of Advertising and Public Relations
PhD, Michigan State University, East Lansing, 1972

Richard H Crawford, Earl N. and Margaret Brasfield Endowed Faculty Fellowship in Engineering, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering
PhD, Purdue University Main Campus, 1989

David F Crew, Distinguished Teaching Professor; Department of History
PhD, Cornell University, 1975

Kelley A Crews, Associate Professor, Department of Geography and the Environment
PhD, University of North Carolina at Chapel Hill, 2000

M Lynn Crisman, Professor, College of Pharmacy
PharmD, University of Texas at Austin, 1979

LEAH CROCETTO, Lecturer, Sarah and Ernest Butler School of Music
BA, Siena Heights University, 2007

Richard M Crooks The Robert A. Welch Chair in Chemistry (Materials Chemistry), Professor, Department of Chemistry
PhD, University of Texas at Austin, 1987

Jonathan Crosson, Associate Professor, Department of Religious Studies; Associate Professor, Department of Anthropology; Associate Professor, John L Warfield Center for African and African American Studies
PhD, University of California-Santa Cruz, 2014

Megan J Crowhurst, Professor, Department of Linguistics
PhD, University of Arizona, 1991

Maria A Croyle Glaxo Wellcome Inc. Endowed Professorship in Pharmacy, Professor, College of Pharmacy
PhD, University of Michigan-Ann Arbor, 1997

Paul Cruz, Professor of Practice, Department of Educational Leadership and Policy
PhD, University of Texas at Austin, 1995

Heather E Cuevas Luci Baines Johnson Fellowship in Nursing, LRI
Faculty Associate; Assistant Professor, School of Nursing
PhD, University of Texas at Austin, 2013

Jackie Cuevas, Faculty Associate; Associate Professor, Department of English
PhD, University of Texas at Austin, 2010

Zhengrong Cui, Alfred and Dorothy Mannino Fellowship in Pharmacy, Alumni Centennial Endowed Fellowship in Pharmacy, ViaTherapeutics; Professor, College of Pharmacy; Professor, Department of Pediatrics; Professor of Oncology, Department of Oncology
PhD, University of Kentucky, 2002

Michael Arthur Cullinan Temple Foundation Endowed Faculty Fellowship No. 3, Affiliated Faculty, Oden Institute; Associate Professor, Walker Department of Mechanical Engineering
PhD, Massachusetts Institute of Technology, 2011

Elizabeth Cullingford Jane Weinert Blumberg Chair in English, Professor, Department of English; Professor, Center for Women’s and Gender Studies
PhD, University of Oxford, 1977

Molly E Cummings, Professor, Department of Integrative Biology
PhD, University of California-Santa Barbara, 2001

Isabella C Cunningham Stan Richards Chair in Advertising and Public Relations Strategy, Faculty Associate; Professor, Stan Richards School of Advertising and Public Relations
PhD, Michigan State University, East Lansing, 1972

William H Cunningham James L. Bayless Chair for Free Enterprise, Professor, Department of Marketing
PhD, Michigan State University, East Lansing, 1971

James Patrick Curley, Associate Professor, Department of Psychology
PhD, University of Cambridge, 2003

Tracy S Dahlby, Distinguished Teaching Professor Emeritus, School of Journalism and Media
AM, Harvard University, 1976

Hugh C Daigle Anadarko Petroleum Corporation Centennial Fellowship #2 in Petroleum Engineering, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, Rice University, 2011

Rene M Dailey, Professor, Department of Communication Studies
PhD, University of California-Santa Barbara, 2005

Kevin N Dalby Johnson & Johnson Centennial Professorship in Pharmacy, Research Service Core; Professor, College of Pharmacy; Professor of Oncology, Department of Oncology
PhD, University of Cambridge, 1992

John A Daly Texas Commerce Bancshares, Inc. Centennial Professorship in Business Communication, Frank A. Liddell, Sr. Centennial Professorship in Communication, College of Business Administration Foundation Advisory Council Centennial Fellowship #8, Faculty Associate; Professor, Department of Management; Professor, Department of Communication Studies
PhD, Purdue University Main Campus, 1977

Ian W Dalziel, Professor, Department of Geological Sciences; Research Professor, Institute for Geophysics
PhD, University of Edinburgh, 1963

Paul Damien (Mack) Rankin, Jr. Professorship in Business Administration, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Finance; Professor, Department of Statistics and Data Sciences
PhD, University of London, 1994

Jens Christian Dammann The Ben H. and Kitty King Powell Chair in Business and Commercial Law, Professor, School of Law
JSD, Yale University, 2003

Jeffrey E Danciger, Associate Professor, Department of Mathematics
PhD, Stanford University, 2011

Jonathan Dancy, Professor Emeritus, Department of Philosophy
MA, University of Oxford, 1972

Ulrich C Dangel, Associate Professor, School of Architecture
MArch, University of Oregon, 1999

Elizabeth A Danze Bartlett Cocke Regents Professorship in Architecture, Professor, School of Architecture; Professor, Program in the Human Dimensions of Organizations
MA, Yale University, 1990

Celina Aisha Davidson de Sa, Assistant Professor, Department of Anthropology; Assistant Professor, Department of African and African Diaspora Studies
PhD, University of Pennsylvania, 2018

Bryan William Davies, Associate Professor, Department of Molecular Biosciences; Associate Professor, Department of Medical Education
PhD, Massachusetts Institute of Technology, 2008

Penelope J Davies, Professor, Department of Art and Art History
PhD, Yale University, 1994

Denise Davila, Assistant Professor, Department of Curriculum and Instruction
PhD, The Ohio State University Main Campus, 2012

Amira Rose Davis, Assistant Professor, Department of African and African Diaspora Studies
PhD, Johns Hopkins University, 2016

Diane Davis Lillian and Tom B. Rhodes Centennial Teaching Fellowship #4, Professor, Department of Rhetoric and Writing; Professor, Department of Communication Studies; Professor, Department of English
PhD, University of Texas at Arlington, 1995

Donald R Davis Jr Ralph B. Thomas Regents Professorship in Asian Studies, Professor, Department of Asian Studies
PhD, University of Texas at Austin, 2000

Jaimie N Davis, Associate Professor, Department of Nutritional Sciences; Associate Professor of Pediatrics, Department of Pediatrics
PhD, University of Texas at Austin, 2004

Janet M Davis, Faculty Associate; Professor, Department of American Studies; Professor, Department of History
PhD, University of Wisconsin-Madison, 1998

Patrick J Davis, Professor, College of Pharmacy
PhD, University of Iowa, 1976

Clinton N Dawson John J. McKetta Centennial Energy Chair in Engineering, Cockrell Family Chair for Departmental Leadership #2, Core Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Rice University, 1988

Maria De Arteaga Gonzalez, Assistant Professor, Department of Information, Risk, and Operations Management
PhD, Carnegie Mellon University, 2020

Kaya de Barbaro, Assistant Professor, Department of Psychology; Assistant Professor, Department of Psychiatry
PhD, University of California-San Diego, 2012

Donna De Cesare, Associate Professor, School of Journalism and Media
MPhil, University of Essex, 1979

Noah De Lissovoy, Professor, Department of Curriculum and Instruction
PhD, University of California-Los Angeles, 2005

Alejandro L De Lozanne, Professor, Department of Physics
PhD, Stanford University, 1982

Arturo De Lozanne, Associate Professor, Department of Molecular Biosciences
PhD, Stanford University, 1988

George M De Shazo Jr J. J. "Jake" Pickle Regents Chair in Public Affairs, Lyndon B. Johnson Centennial Chair in National Policy, Professor, Lyndon B. Johnson School of Public Affairs
PhD, Harvard University, 1997

Lisa Nicole De Simone Gordon S. Moore Faculty Fellowship in Taxation, Associate Professor, Department of Accounting
PhD, University of Texas at Austin, 2013

Gustavo A De Veciana Cockrell Family Chair in Engineering #18, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Berkeley, 1993

Lesley A Dean-Jones, Professor, Department of Classics
PhD, Stanford University, 1987

Susan Deans-Smith, Associate Professor, Department of History
PhD, University of Cambridge, 1984

Linda Ann de Graffenried, Associate Professor, Department of Nutritional Sciences; Associate Professor, Department of Pediatrics; Associate Professor of Oncology, Department of Oncology
PhD, University of Texas Health Science Center at San Antonio, 2001

John Deigh, Professor, School of Law; Professor, Department of Philosophy
PhD, University of California-Los Angeles, 1979

Michele Y Deitch, Director (Academic); Distinguished Senior Lecturer, Lyndon B Johnson School of Public Affairs; Distinguished Senior Lecturer, School of Law
JD, Harvard University, 1986

Lina Maria Del castillo, Associate Professor, Department of History
PhD, University of Miami, 2007

Matias Gonzalez Delgadino, Assistant Professor, Department of Mathematics
PhD, University of Maryland College Park, 2016

Andrew F Delf'Antonio, Professor, Sarah and Ernest Butler School of Music
PhD, University of California-Berkeley, 1991

Mojdeh Delshad, Affiliated Faculty, Oden Institute; Research Professor, Center for Subsurface Energy and the Env; Research Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Texas at Austin, 1986

Yvon Delville, Professor, Department of Psychology
PhD, University of Massachusetts Amherst, 1992

David Edward DeMatthews Joe R. & Teresa Lozano Long Endowed Faculty Fellows Fund, Associate Professor, Department of Special Education; Associate Professor, Department of Educational Leadership and Policy
PhD, University of Maryland College Park, 2012

Alexander A Demkov, Core Faculty, Oden Institute; Professor, Department of Physics
PhD, Arizona State University Main, 1995

Leszek F Demkowicz W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and Sciences II, Core Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Department of Mathematics; Professor, Institute for Computational Engineering and Science
PhD, Cracow Univ of Technology, 1982

Sharon DeMorrow, Professor, College of Pharmacy; Professor, Department of Medicine
PhD, University of Queensland, 1999

Ashwini S Deo, Professor, Department of Linguistics
Ashish Deshpande Carroll D. Simmons Centennial Teaching Fellowship in Engineering, Associate Professor, Walker Department of Mechanical Engineering
PhD, University of Michigan-Ann Arbor, 2007

Joshua Dever, Professor, Department of Philosophy
PhD, University of California-Berkeley, 1998

Natalie Brown Devlin, Assistant Professor, Stan Richards School of Advertising and Public Relations
PhD, The University of Alabama at Tuscaloosa, 2014

Heath Dewrell, Assistant Professor, Department of Middle Eastern Studies
PhD, Johns Hopkins University, 2012

Inderjit S Dhillon Gottesman Family Centennial Professorship in Computer Sciences, Core Faculty, Oden Institute; Professor, Department of Computer Science; Professor, Department of Mathematics
PhD, University of California-Berkeley, 1997

Anthony F Di Fiore Centennial Commission Professorship in the Liberal Arts #3, Dallas TACA Centennial Fellowship in the Liberal Arts #1, Professor, Department of Anthropology
PhD, University of California-Davis, 1997

Yoav Di-Capua, Professor, Department of History
PhD, Princeton University, 2004

Rasha Diab Lillian and Tom B. Rhodes Centennial Teaching Fellowship #2, Associate Professor, Department of Rhetoric and Writing; Associate Professor, Department of Middle Eastern Studies; Associate Professor, Department of English
PhD, University of Wisconsin-Madison, 2009

David DiCarlo George H. Fancher Centennial Teaching Fellowship in Petroleum Engineering, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, Cornell University, 1994

C Tyler Dick, Academic Center Affiliate, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Illinois at Urbana-Champaign, 2019

Mechelle Dickerson Arthur L. Moller Chair in Bankruptcy Law and Practice, Professor, School of Law; Professor, Lyndon B Johnson School of Public Affairs
JD, Harvard University, 1988

Daniel James Dickinson, Assistant Professor, Department of Molecular Biosciences
PhD, Stanford University, 2011

John Digiovanni Coulter R. Sublett Chair in Pharmacy, Director CMCT; Professor, College of Pharmacy; Professor, Department of Pediatrics
PhD, University of Washington - Seattle, 1978

Kenneth R Diller Robert M. and Prudie Leibrock Endowed Professorship in Engineering, Professor, Department of Biomedical Engineering
ScD, Massachusetts Institute of Technology, 1972

Isil Dillig, Professor, Department of Computer Science
PhD, Stanford University, 2011

Andrew P Dillon Vara Martin Daniel Regents Professorship in Libraries, Archives & Information Studies, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Psychology; Professor, School of Information
PhD, Loughborough University, 1991

Georgios-Alex Dimakis Stanley F. Finch Centennial Professorship in Engineering, Faculty Associate; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Berkeley, 2008

Harriet L Dinerstein, Professor, Department of Astronomy
PhD, University of California-Santa Cruz, 1980

Ming-Chieh Ding, Assistant Professor, Department of Neurology
PhD, Harvard University, 2008

Ying Ding Bill and Lewis Suit Professorship, IFML Faculty Associate; Professor, School of Information; Professor, Department of Population Health
PhD, Nanyang Technological University, 2001

Jacques Distler, Professor, Department of Physics
PhD, Harvard University, 1987

Todd Ditmire, Professor, Department of Physics
PhD, University of California-Davis, 1995

Dragan Djurdjanovic Accenture Endowed Professorship in Manufacturing Systems Engineering, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering
PhD, University of Michigan-Ann Arbor, 2002

Lauren K Dobbs, Assistant Professor, Department of Neurology; Assistant Professor, Department of Neuroscience
PhD, Oregon Health and Science University, 2012

Ananth Dodabalapur Motorola Regents Chair in Electrical and Computer Engineering #1, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Texas at Austin, 1990

Sinan Dogramaci, Associate Professor, Department of Philosophy
PhD, New York University, 2009

Juan M Dominguez, Professor, College of Pharmacy; Professor, Department of Psychology; Vice Provost, Academic, Curricular and Career Innovation, Office of the Executive Vice President and Provost
PhD, State University of New York at Buffalo, 2002

Hector Dominguez-Ruvalcaba, Professor, Department of Spanish and Portuguese; Professor, Center for Women’s and Gender Studies
PhD, University of Colorado at Boulder, 1999

Michael P Domjan, Professor, Department of Psychology
PhD, McMaster University, 1973

Stephen Donald Edward Everett Hale Centennial Professorship in Economics, Professor, Department of Economics
PhD, University of British Columbia, 1990

Jennifer Jane Donegan, Assistant Professor, Department of Psychiatry; Assistant Professor, Department of Neuroscience
PhD, University of Texas Health Science Center at San Antonio, 2014

Erin Eileen Donovan, Faculty Associate; Professor, Department of Communication Studies; Professor, College of Pharmacy
PhD, University of Illinois at Urbana-Champaign, 2008

William Doolittle Erich W. Zimmermann Regents Professorship in Geography, Professor Emeritus (interim appointment), Department of Geography and the Environment
PhD, University of Oklahoma Norman Campus, 1979

Aysa A Dordzhieva, Assistant Professor, Department of Accounting
MS, Moscow State University, 2011

Edwin Dorn, Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, Yale University, 1978

Jackson Dorsey, Assistant Professor, Department of Economics
PhD, University of Arizona, 2018

Berkin Dortdivanlioglu, Affiliated Faculty, Oden Institute; Assistant Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Stanford University, 2020

Philip Doty, Associate Professor Emeritus, School of Information
PhD, Syracuse University Main Campus, 1995

Michael Wayne Downer Professorship in Physics #2, Professor, Department of Physics
PhD, Harvard University, 1983

Andres Pablo Drenik, Assistant Professor, Department of Economics
PhD, Stanford University, 2016

Michael Drew, Associate Professor, Department of Neuroscience; Interim Associate Dean, Undergraduate Education, College of Natural Sciences
PhD, Columbia University (New York), 2004

Julia L Driver Darrell K Royal Regents Professorship in Ethics and American Society, Professor, Department of Philosophy
PhD, Johns Hopkins University, 1990

Eric A Drott, Associate Professor, Sarah and Ernest Butler School of Music
PhD, Yale University, 2001

Daniel Drucker, Assistant Professor, Department of Philosophy
PhD, University of Michigan-Ann Arbor, 2017

Emily L Drumsta, Assistant Professor, Department of Middle Eastern Studies; Assistant Professor, Department of French and Italian
PhD, University of California-Berkeley, 2016

Minette E Drumwright, Faculty Associate; Distinguished Teaching Professor, Stan Richards School of Advertising and Public Relations; Professor, Department of Business, Government and Society
PhD, University of North Carolina at Chapel Hill, 1986

Rex Du Shelby H. Carter, Jr. and Patricia Carter Regents Professorship in Global Business Marketing, Professor, Department of Marketing
PhD, Duke University, 2005

Jason A Duan Zale Corporation Centennial Teaching Fellowship in Retail Merchandising, Associate Professor, Department of Marketing
PhD, Duke University, 2006

Audrey Duarte, Professor, Department of Psychology; Professor, Department of Neurology
PhD, University of California-Berkeley, 2004

JB Duck-Mayr, Assistant Professor, Department of Government
JD, Baylor University, 2015

Jaquelin P Dudley, Professor, Department of Molecular Biosciences; Professor of Oncology, Department of Oncology
PhD, Baylor College of Medicine, 1978

Tara A Dudley, Assistant Professor, School of Architecture
PhD, University of Texas at Austin, 2013

Anthony David Dudo, Associate Professor, Stan Richards School of Advertising and Public Relations
PhD, University of Wisconsin-Madison, 2011

Robert A Duke Marlene and Morton Meyerson Centennial Professorship in Music, Faculty Associate; Professor, Sarah and Ernest Butler School of Music; Affiliate Faculty, Department of Medical Education
PhD, Florida State University, 1983

Janet M Dukerich Hugh Roy Cullen Centennial Chair in Business Administration, Faculty Associate - HR Learning and Development; Professor, Department of Management; Vice Provost for Advocacy and Dispute Resolution, Office of the Executive Vice President and Provost
PhD, University of Minnesota-Twin Cities, 1985

Katherine Laura Dunlop, Associate Professor, Department of Philosophy
PhD, University of California-Los Angeles, 2005

Andrew K Dunn Edward S. Hyman Endowed Chair in Engineering, Professor of Diagnostic Medicine, Department of Diagnostic Medicine; Professor, Department of Biomedical Engineering
PhD, University of Texas at Austin, 1997

Joseph Edward Dunsmoor Jr, Assistant Professor, Department of Neuroscience; Assistant Professor, Department of Psychiatry
PhD, Duke University, 2012

Kenneth H Dunton, Professor, Department of Marine Science
PhD, University of Alaska Fairbanks, 1985

Gregory C Durrett, Assistant Professor, Department of Computer Science
PhD, University of California-Berkeley, 2016

Christine L Duvauchelle, Associate Professor, College of Pharmacy; Associate Professor, Department of Psychology
PhD, University of California-Santa Barbara, 1991

James S Dyer The Fondren Foundation Centennial Chair in Business, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Management
PhD, University of Texas at Austin, 1969

Justin Dyer Jack G. Taylor Regents Professorship in Business Administration, Executive Director; Professor, Department of Government; Professor, Department of Business, Government and Society
PhD, University of Texas at Austin, 2009

John S Dzienkowski Dean John F. Sutton, Jr. Chair in Lawyering and the Legal Process, Professor, School of Law
JD, University of Texas at Austin, 1983

Matthew S Eastin, Professor, Stan Richards School of Advertising and Public Relations
PhD, Michigan State University, East Lansing, 2001

David J Eaton Bess Harris Jones Centennial Professorship in Natural Resource Policy Studies, Professor, Lyndon B Johnson School of Public Affairs; Professor, Center for Middle Eastern Studies; Professor, Department of Geography and the Environment; Professor, Department of Middle Eastern Studies; Professor, Department of Integrative Biology
PhD, Johns Hopkins University, 1977

Jennifer V Ebbeler Faculty Fellowship in Classics, Faculty Associate - ITL Symposium; Associate Professor, Department of Classics
PhD, University of Pennsylvania, 2001

Johann K Eberhart, Professor, Department of Molecular Biosciences
PhD, University of Missouri - Columbia, 2002

Catharine H Echols, Associate Professor, Department of Psychology
PhD, University of Illinois at Urbana-Champaign, 1987

Gail Eckhardt, Associate Dean, LIVESTRONG Cancer Institutes; Professor, Department of Oncology; Professor, Department of Medicine
MD, University of Texas Medical Branch, 1985

J Mark Eddy, Professor, Department of Educational Psychology; Professor, Department of Kinesiology and Health Education
PhD, University of Oregon, 1992

Thomas F Edgar, Professor Emeritus, McKetta Department of Chemical Engineering
PhD, Princeton University, 1971

Lauren Ilsey richie Ehrlich Lorene Morrow Kelley Endowed Faculty Fellowship Fund, Associate Professor, Department of Molecular Biosciences; Associate Professor of Oncology, Department of Oncology
PhD, Stanford University, 2002

Peter Eichhubl, Senior Research Scientist,
PhD, University of California-Santa Barbara, 1997

John G Ekerdt Norbert Dittrich-Welch Chair in Chemical Engineering, Associate Dean, Cockrell School of Engineering; Professor, McKetta Department of Chemical Engineering
PhD, University of California-Berkeley, 1979

Chadi Said El Mohtar Fluor Centennial Teaching Fellowship in Engineering #1, Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Purdue University Main Campus, 2008

Ron Elber W. A. "Tex" Moncrief, Jr. Chair in Computational Life Sciences and Biology, Core Faculty, Oden Institute; Professor, Department of Chemistry; Professor, Institute for Computational Engineering and Science
PhD, Hebrew University, 1985

Robert B Eldridge, Research Engineer; Distinguished Senior Lecturer, McKetta Department of Chemical Engineering
PhD, University of Texas at Austin, 1986

Zachary S Elkins, Faculty Associate; Associate Professor, Department of Government
PhD, University of California-Berkeley, 2003

Andrew Ellington Wilson M. and Kathryn Fraser Research Professorship in Biochemistry, Professor, Department of Molecular Biosciences; Professor, Applied Research Laboratories
PhD, Harvard University, 1988

Martha M Ellis, A&P (Part-Time) TempleEXT; Professor of Practice, Department of Educational Leadership and Policy
PhD, University of North Texas, 1996

Janet L Ellzey Engineering Foundation Centennial Teaching Fellowship in Engineering No. 2, Faculty Associate; Professor, Walker Department of Mechanical Engineering
PhD, University of California-Berkeley, 1985

Erik Encarnacion, Assistant Professor, School of Law
JD, Columbia University (New York), 2006

Michael D Engelhardt Adnan Abou-Ayyash Centennial Professorship in Transportation Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of California-Berkeley, 1989

Karen Engle Minerva House Drysdale Regents Chair, Professor, School of Law
JD, Harvard University, 1989

Bjorn Engquist CAM Chair I, Core Faculty, Oden Institute; Professor, Department of Mathematics; Professor, Institute for Computational Engineering and Science
PhD, Uppsala University, 1969

Derek Epp, Assistant Professor, Department of Government
PhD, University of North Carolina at Chapel Hill, 2015

Patience L Epps Dallas TACA Centennial Professorship in the Humanities, Faculty Associate; Professor, Department of Linguistics; Professor, Department of Anthropology
PhD, University of Virginia, 2005

Deana L Erdner, Professor, Department of Marine Science
PhD, Massachusetts Institute of Technology, 1997

Mattan Erez Cullen Trust for Higher Education Endowed Professorship in Engineering #7, Affiliated Faculty, Oden Institute; Professor, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 2007

Katrin E Erk, Professor, Department of Linguistics
PhD, Saarland University, 2002

Veit F Erlmann History of Music Chair, Professor, Sarah and Ernest Butler School of Music; Professor, Department of Anthropology
PhD, University of Cologne, 1978

Andrew Jerome Esbaugh, Associate Professor, Department of Marine Science
PhD, Queens University, 2005

David N Espinoza Frank W. Jessen Centennial Fellowship in Petroleum Engineering, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, Georgia Institute of Technology, 2011

Stefano M Eusepi, Associate Professor, Department of Economics
PhD, University of Warwick, 2005

Brian L Evans Engineering Foundation Professorship, Professor, Chandra Department of Electrical and Computer Engineering
PhD, Georgia Institute of Technology, 1993

Mary Evans, Professor, Lyndon B Johnson School of Public Affairs; Professor, Department of Economics
PhD, University of Colorado at Boulder, 2001

Matthew L Evans, Associate Professor, Department of Philosophy
PhD, University of Texas at Austin, 2004

Ofodike A Ezekoye Joe C. Walter, Jr. Chair in Engineering, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering; Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of California-Berkeley, 1991

Raissa Fabregas robles gil, Assistant Professor, Lyndon B Johnson School of Public Affairs
MS, University of Oxford, 2009
Eric P Fahrenthold Temple Foundation Endowed Faculty Fellowship No. 2, Professor, Walker Department of Mechanical Engineering
PhD, Rice University, 1984

Matt Fajkus, Associate Professor, School of Architecture
MArch, Harvard University, 2005

Toni L Falbo, Professor, Department of Educational Psychology;
Professor, Department of History;
Professor, John L Warfield Center for African and American Studies;
Professor, Department of African and African Diaspora Studies
PhD, Obafemi Awolowo University, 1981

Nessette Falu, Faculty Associate, DES Option III; Assistant Professor, Department of African and African Diaspora Studies
PhD, Rice University, 2015

Donglei Emma Fan Robert and Jane Mitchell Endowed Faculty Fellowship in Engineering, Faculty Associate, Fulbright JFDP Egypt;
Associate Professor, Walker Department of Mechanical Engineering
PhD, Johns Hopkins University, 2007

Caroline Faria, Associate Professor, Department of Geography and the Environment;
Associate Professor, Department of African and African Diaspora Studies;
Associate Professor, Center for Women's and Gender Studies
PhD, University of Washington - Seattle, 2009

Ashley Farmer, Associate Professor, Department of African and African Diaspora Studies;
Associate Professor, John L Warfield Center for African and African American Studies;
Associate Professor, Department of History
PhD, Harvard University, 2013

Ward Farnsworth W. Page Keeton Chair in Tort Law, Professor,
Department of Philosophy; Professor, School of Law; Professor, Department of Classics
JD, University of Chicago, 1994

Caroline E Farrior, Assistant Professor, Department of Integrative Biology
PhD, Princeton University, 2012

Walter L Fast William I. Dismukes Fellowship in Pharmacy, Division Head - Chemical Biology and Medicinal Chemistry; Professor, College of Pharmacy
PhD, Northwestern University, 1998

Kasey M Faust, Faculty Associate-ENGR; Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Purdue University Main Campus, 2015

Nerea Feliz Arrizabalaga, Associate Professor, School of Architecture
BArch, Universidad Politecnica de Madrid (UPM), 2001

Juliana Felkner, Assistant Professor, School of Architecture
MArch, University of Kansas Main Campus, 2008

Lief Fenno, Assistant Professor, Department of Neuroscience; Assistant Professor, Department of Psychiatry
PhD, Stanford University, 2016

Anca-Cristina Ferche, Assistant Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Toronto, 2020

Linda Ferreira-Buckley Lillian and Tom B. Rhodes Centennial Teaching Fellowship #3, Associate Professor, Department of English; Associate Professor, Department of Rhetoric and Writing
PhD, University of Pennsylvania, 1990

Raissa Patricia Ferron Austin Industries Endowed Faculty Fellowship in Civil Engineering, Faculty Associate-ENGR; Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Northwestern University, 2008

Nicholas P Fey, Assistant Professor, Walker Department of Mechanical Engineering
PhD, University of Texas at Austin, 2011

Michael G Findley Frank C. Erwin, Jr. Centennial Chair in Government, Other University Affiliate; Professor, Department of Government;
Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Illinois at Urbana-Champaign, 2007

Karen L Fingerman Sonia Wolf Wilson Regents Administrative Professorship in Human Ecology, Professor, Department of Human Development and Family Sciences; Professor, Department of Psychology
PhD, University of Michigan-Ann Arbor, 1993

Ilya J Finkelstein Lorene Morrow Kelley Endowed Faculty Fellowship Fund, Associate Professor, Department of Molecular Biosciences
PhD, Stanford University, 2007

Steven Lyle Finkelstein, Professor, Department of Astronomy
PhD, Arizona State University Main, 2008

Janice A Fischer, Professor, Department of Molecular Biosciences;
Director Academic Center, Biology Instruction Office
PhD, Harvard University, 1988

Willy Fischer Jane and Roland Blumberg Centennial Professorship in Physics, Professor, Department of Physics
PhD, Vrije Universiteit Brussel, 1976

William L Fisher, Leonidas T. Barrow Centennial Chair Emeritus in Mineral Resources, Department of Geological Sciences
PhD, University of Kansas Main Campus, 1980

Richard Fitzpatrick, Directorship, Professor, Department of Physics
PhD, University of Sussex, 1988

George F Flaherty, LMAS Affiliated; Associate Professor, Department of Art and Art History; Associate Professor, Center for Mexican American Studies
PhD, University of California-Santa Barbara, 2010

Kenneth Flamm Dean Rusk Chair in the Lyndon Baines Johnson School of Public Affairs, Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, Massachusetts Institute of Technology, 1979

James C Fleet Margaret McKean Love Chair in Nutrition, Cellular and Molecular Sciences, Professor, Department of Nutritional Sciences
PhD, Cornell University, 1988

Kenneth Robert Fleischmann, Professor, School of Information
PhD, Rensselaer Polytechnic Institute, 2004

Peter Barry Flemings Leonidas T. Barrow Centennial Chair in Mineral Resources, Program Director of GeoFluids; Professor, Department of Geological Sciences; Professor, Bureau of Economic Geology; Professor, Institute for Geophysics
PhD, Cornell University, 1990
Richard R Flores C. B. Smith, Sr. Centennial Chair in United States-Mexico Relations #3, Deputy to the President for Academic Strategies; Professor, Department of Anthropology; Professor, Center for Mexican American Studies; Professor, Department of Mexican American and Latino/a Studies
PhD, University of Texas at Austin, 1989

Stella Marie Flores, Associate Professor, Department of Educational Leadership and Policy; Associate Professor, Department of Curriculum and Instruction; Associate Professor, Lyndon B Johnson School of Public Affairs
EdD, Harvard University, 2007

Tracey Terece Flores, Assistant Professor, Department of Curriculum and Instruction
PhD, Arizona State University Main, 2017

Ernst-Ludwig Florin, Associate Professor, Department of Physics; Associate Professor, Center for Nonlinear Dynamics
PhD, Technische Universitat Munchen, 1995

Kevin J Folliard Warren S. Bellows Centennial Professorship in Civil Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of California-Berkeley, 1995

Sergey B Fomel, Program Director (Academic); Professor, Department of Geological Sciences
PhD, Stanford University, 2001

Laura K Fonken, Assistant Professor, Department of Psychology; Assistant Professor, College of Pharmacy
PhD, The Ohio State University Main Campus, 2013

Greg Anthony Fonzo, Faculty Associate - Pharmacy; Assistant Professor, Department of Psychiatry; Assistant Professor, Department of Psychology
PhD, San Diego State University, 2013

William E Forbath Lloyd M. Bentsen Chair in Law, Professor, School of Law; Professor, Department of History
JD, Yale University, 1983

John Timothy Foster, Core Faculty, Oden Institute; Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering; Associate Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Purdue University Main Campus, 2009

Kevin M Foster, Associate Professor, Department of Educational Leadership and Policy; Associate Professor, John L Warfield Center for African and African American Studies; Associate Professor, Department of African and African Diaspora Studies; Associate Professor, Department of Anthropology
PhD, University of Texas at Austin, 2001

Norma L Fowler, Faculty Associate; Professor, Department of Integrative Biology
PhD, Duke University, 1978

Cesare Fracassi, Associate Professor, Department of Finance
PhD, University of California-Los Angeles, 2009

Jessica Franco, Faculty Associate; Clinical Associate Professor, Department of Speech, Language, and Hearing Sciences
PhD, University of Texas at Austin, 2008

Maria Franklin, Professor, Department of Anthropology; Professor, Department of African and African Diaspora Studies; Professor, John L Warfield Center for African and African American Studies
PhD, University of California-Berkeley, 1997

Maria E Franquiz, Professor, Department of Curriculum and Instruction
PhD, University of California-Santa Barbara, 1995

Alison K Frazier, Associate Professor, Department of History; Associate Professor, Department of Religious Studies; Associate Professor, Department of French and Italian
PhD, Columbia University (New York), 1996

Daniel S Freed Mildred Caldwell and Baine Perkins Kerr Centennial Professorship in Mathematics, Professor, Department of Mathematics
PhD, University of California-Berkeley, 1985

Mike Freedberg, Assistant Professor, Department of Kinesiology and Health Education
PhD, University of Iowa, 2016

Jeanne H Freeland-Graves Bess Heflin Centennial Professorship in Nutritional Sciences, Professor, Department of Nutritional Sciences
PhD, Rutgers the State University of New Jersey New Brunswick Campus, 1975

Benny D Freeman William J. (Bill) Murray, Jr. Endowed Chair of Engineering, Professor, Mcketta Department of Chemical Engineering
PhD, University of California-Berkeley, 1988

Robert N Freeman, Professor Emeritus, Department of Accounting
PhD, University of Texas at Austin, 1977

Katherine Freese Jeff and Gail Kodosky Endowed Chair in Physics, Professor, Department of Physics
PhD, University of Chicago, 1984

Christopher R Frei William J. Sheffield Centennial Endowed Professorship in Pharmacy, Division Head - Pharmacotherapy; Professor, College of Pharmacy
PharmD, University of Texas at Austin, 2001

Oliver Freiberger, Professor, Department of Asian Studies; Professor, Department of Religious Studies
PhD, Georg-August Universitat, 1999

John M Fremgen, Associate Professor, Sarah and Ernest Butler School of Music
MMus, University of Southern California, 1993

Joshua Frens-String, Assistant Professor, Department of History
PhD, New York University, 2015

Caroline J Frick, Associate Professor, Department of Radio-Television-Film
PhD, University of Texas at Austin, 2005

Daniel G Fridman, Associate Professor, Department of Sociology; Associate Professor, Teresa Lozano Long Institute of Latin American Studies
PhD, Columbia University (New York), 2010

David Fridovich-Keil, Affiliated Faculty, Oden Institute; Assistant Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, University of California-Berkeley, 2020

Alan W Friedman, Visiting Researcher/Scholar; Professor Emeritus, Department of English
204

Graduate 01/05/24

PhD, University of Rochester, 1966

Steven J Friesen, Professor Emeritus, Department of Religious Studies
PhD, Harvard University, 1990

Kim Fromme, Professor Emeritus, Department of Psychology
PhD, University of Washington - Seattle, 1988

William Fuchs The Spurgeon Bell Centennial Fellowship, Professor, Department of Finance
PhD, Stanford University, 2005

Lee A Fuiman Perry R. Bass Chair in Fisheries and Mariculture, Professor, Department of Marine Science; Professor, Department of Integrative Biology; Associate Director for Fisheries and Mariculture Laboratory, PhD, University of Michigan-Ann Arbor, 1983

Kirkland Alexander Fulk, Assistant Professor of Instruction, Department of Germanic Studies
PhD, University of North Carolina at Chapel Hill, 2013

Kathryn Fuller William R. Hobby Centennial Professorship in Communication, Faculty Associate; Professor, Department of Radio-Television-Film
PhD, Johns Hopkins University, 1992

Donald S Fussell Trammell Crow Regents Professorship in Computer Science, Affiliated Faculty, Oden Institute; Professor, Department of Computer Science; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Texas at Dallas, 1980

James Gabrillo, Assistant Professor, Sarah and Ernest Butler School of Music
PhD, University of Cambridge, 2019

Michael Gagarin, Professor Emeritus, Department of Classics
PhD, Yale University, 1968

Anna Gal, Professor, Department of Computer Science
PhD, University of Chicago, 1995

James K Galbraith Lloyd M. Bentsen, Jr. Chair in Government/Business Relations, Professor, Lyndon B Johnson School of Public Affairs; Professor, Department of Government
PhD, Yale University, 1981

Nicholas Galitzki, Assistant Professor, Department of Physics
DSc, University of Pennsylvania, 2016

Irene M Gamba W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and Sciences III, Core Faculty, Oden Institute; Professor, Department of Mathematics; Professor, Institute for Computational Engineering and Science
PhD, University of Chicago, 1989

Denisa Gandara, Assistant Professor, Department of Educational Leadership and Policy
PhD, University of Georgia, 2016

Venkat Ganesan Les and Sherri Stuewer Endowed Chair in Chemical Engineering, Affiliated Faculty, Oden Institute; Professor, McKetta Department of Chemical Engineering
PhD, Massachusetts Institute of Technology, 1999

Shiv Ganesh, Professor, Department of Communication Studies
PhD, Purdue University Main Campus, 2000

Mira Ganor Judge Solomon Casseb, Jr. Research Professorship in Law, Professor, School of Law

JSD, University of California-Berkeley, 2008

Rui Gao, Assistant Professor, Department of Information, Risk, and Operations Management
PhD, Georgia Institute of Technology, 2018

Liliana M Garces W. K. Kellogg Professorship of Community College Leadership, Professor, School of Law; Professor, Department of Educational Leadership and Policy
EdD, Harvard University, 2011

Alexandra A Garcia, Professor, School of Nursing; Professor of Population Health, Department of Population Health
PhD, University of Texas at Austin, 2002

Sergio I Garcia, Associate Director (Academic); Assistant Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Washington - Seattle, 2015

Scherezade Garcia-Vazquez John D. Murchison Fellowship in Art, Assistant Professor, Department of Art and Art History
MFA, City University of New York The City College, 2011

James E Gardner John A. and Katherine G. Jackson Centennial Teaching Fellowship in Geological Sciences, Professor, Department of Geological Sciences
PhD, University of Rhode Island, 1993

Seth W Garfield, Professor, Department of History; Professor, Teresa Lozano Long Institute of Latin American Studies
PhD, Yale University, 1996

Rajiv Garg, Research Affiliate - Sr Research Fellow, PhD, Carnegie Mellon University, 2013

Vijay K Garg Cullen Trust for Higher Education Endowed Professorship in Engineering #5, Faculty Associate-ENGR; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Berkeley, 1988

Emma Gargroetzi, UTeach Faculty Associate; Assistant Professor, Department of Curriculum and Instruction
PhD, Stanford University, 2020

Gray B Garmon, Faculty Associate; Assistant Professor of Practice, School of Design and Creative Technologies
MArch, University of Pennsylvania, 2014

Michael L Garrison The Cass Gilbert Centennial Teaching Fellowship in Architecture, Professor, School of Architecture
MArch, Rice University, 1971

Thomas Garrison, Assistant Professor, Department of Geography and the Environment; Assistant Professor, Department of Anthropology
PhD, Harvard University, 2007

Thomas Jesus Garza, Faculty Associate Honors Spring 2023 Seminar; Associate Professor, Department of Slavic and Eurasian Studies; Associate Professor, Center for Mexican American Studies
EdD, Harvard University, 1987

Andrew David Gaudet, Assistant Professor, Department of Neurology; Assistant Professor, Department of Psychology
PhD, University of British Columbia, 2010

Kishore Gawande Fred H. Moore Centennial Professorship in International Management, Professor, Department of Business, Government and Society
PhD, University of California-Los Angeles, 1991
Linda L Golden, Joseph H. Blades Centennial Memorial Professorship in Insurance, Professor, Department of Marketing; Professor, Department of Business, Government and Society
PhD, University of Florida, 1975

Nace L Golding, Director, Institute for Neuroscience; Professor, Department of Neuroscience
PhD, University of Wisconsin-Madison, 1996

Marcel Goldschen, Assistant Professor, Department of Neuroscience
PhD, University of Wisconsin-Madison, 2009

David B Goldstein Bob R. Dorsey Professorship in Engineering, Affiliated Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, California Institute of Technology, 1990

Francisco Henning Gomes, Associate Professor, School of Architecture
MArch, Harvard University, 1995

Carlos Nicolas Gomez Marchant, Assistant Professor, Department of Curriculum and Instruction
PhD, University of Georgia, 2016

Edgar Gomez-Cruz, Associate Professor, School of Information
PhD, Universitat Oberta de Catalunya, 2011

Juan C Gonzales, Professor of Practice, Department of Educational Leadership and Policy
PhD, University of Illinois at Urbana-Champaign, 1981

Rueben A Gonzales, Professor, College of Pharmacy
PhD, University of Texas at Austin, 1983

Celestine Gonzalez De Bustamante Mrs. Mary Gibbs Jones Centennial Chair in Communication, L-MAS Affiliate; Professor, School of Journalism and Media; Associate Dean, Moody College of Communication
PhD, University of Arizona, 2006

John M Gonzalez J. Frank Dobie Regents Professorship in American and English Literature, Professor, Department of English; Professor, Center for Mexican American Studies; Acting Director, Plan II Honors Program, Plan II Honors Program
PhD, Stanford University, 1998

Oscar Gonzalez, Affiliated Faculty, Oden Institute; Professor, Department of Mathematics
PhD, Stanford University, 1996

Maria Gonzalez-Howard, Assistant Professor, Department of Curriculum and Instruction
PhD, Boston College, 2017

F Gonzalez-Lima George I. Sanchez Centennial Professorship in Liberal Arts, Faculty Associate; Professor, Department of Psychology; Professor, College of Pharmacy; Professor, Department of Psychiatry
PhD, University of Puerto Rico Medical Sciences-Rio Piedras, 1980

Gloria Gonzalez-Lopez C. B. Smith, Sr. Centennial Chair in United States-Mexico Relations #1; Professor, Department of Sociology; Professor, Center for Mexican American Studies; Professor, Center for Women's and Gender Studies
PhD, University of Southern California, 2000

Rachel Valentina Gonzalez-Martín, LMAS Affiliated; Associate Professor, Department of Mexican American and Latino/a Studies; Associate Professor, Center for Mexican American Studies
PhD, Indiana University Bloomington, 2014

Steven Goode W. James Kronzer Chair in Trial and Appellate Advocacy, Professor, School of Law
JD, Yale University, 1975

John B Goodenough Virginia H. Cockrell Centennial Chair in Engineering, Professor, Walker Department of Mechanical Engineering; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Chicago, 1952

Michael A Goodman, Faculty Associate - UGS/EM (Admissions); Assistant Professor of Practice, Department of Educational Leadership and Policy
PhD, University of Maryland College Park, 2020

Lalitha Gopalan, Faculty Associate; Associate Professor, Department of Radio-Television-Film; Associate Professor, Department of Asian Studies; Associate Professor, Center for Women's and Gender Studies
PhD, University of Rochester, 1993

Caitlin Gorback, Assistant Professor, Department of Finance
PhD, University of Pennsylvania, 2020

Cameron M Gordon Sid W. Richardson Foundation Regents Chair in Mathematics #2, Professor, Department of Mathematics
PhD, University of Cambridge, 1971

Edmund T Gordon Friar Centennial Teaching Fellowship, Executive Director of Commemorative and Contextualization Projects; Associate Professor, Department of African and African Diaspora Studies; Associate Professor, John L Warfield Center for African and African American Studies
PhD, Stanford University, 1981

Vernita Gordon, Associate Professor, Department of Physics
PhD, Harvard University, 2003

Andrea C Gore Mildred Hajek Vacek and John Roman Vacek Chair in Pharmacology, in Honor of Professor C. C. Albers, Professor, College of Pharmacy; Professor, Department of Psychology
PhD, University of Wisconsin-Madison, 1990

Robbe Lieve Theofel Goris, Assistant Professor, Department of Psychology
PhD, Katholieke Universiteit Leuven, 2009

Carma Ryanne Gorman, Faculty Associate; Associate Professor, School of Design and Creative Technologies; Associate Professor, Department of Art and Art History
PhD, University of California-Berkeley, 1998

Samuel D Gosling, Professor, Department of Psychology
PhD, University of California-Berkeley, 1998

Timothy Andrew Goudge, Assistant Professor, Department of Geological Sciences
PhD, Brown University, 2015

Jennifer Graber The Gwyn Shive, Anita Nordan Lindsay and Joe & Cherry Gray Professorship, Professor, Department of Religious Studies
PhD, Duke University, 2006

Scott Graham Lillian and Tom B. Rhodes Centennial Chair in Engineering, Professor, Walker Department of Mechanical Engineering; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Berkeley, 1998

Stephen P Grand, Professor, Department of Geological Sciences; Professor, Institute for Geophysics
PhD, California Institute of Technology, 1986
Michael H Granof, Distinguished Teaching Professor Emeritus, Department of Accounting
PhD, University of Michigan-Ann Arbor, 1972

Donald J Grantham Frank C. Erwin, Jr. Centennial Professorship in Music, Professor, Sarah and Ernest Butler School of Music
DMA, University of Southern California, 1980

Stephanie Marie Grasso, Assistant Professor, Department of Speech, Language, and Hearing Sciences
PhD, University of Texas at Austin, 2020

Kristen L Grauman Professorship in Computer Sciences #4, Professor, Department of Computer Science; Professor, Applied Research Laboratories
PhD, Massachusetts Institute of Technology, 2006

Jane S Gray, Faculty Associate-Von Sternberg-SSW; Assistant Professor of Practice, Department of Educational Psychology; Assistant Professor of Psychiatry, Department of Psychiatry
PhD, University of Texas at Austin, 2006

Kelcey C Gray, Assistant Professor of Practice, School of Design and Creative Technologies
MFA, Maryland Institute College of Art, 2013

Kenneth E Gray, Professor Emeritus, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Texas at Austin, 1963

Ryan S Gray, Assistant Professor, Department of Nutritional Sciences; Assistant Professor of Pediatrics, Department of Pediatrics
PhD, University of Texas at Austin, 2009

Steven Gray Jr, Assistant Professor, Department of Management
PhD, Washington University in St Louis, 2017

Laurie B Green, Associate Professor, Department of History; Associate Professor, Center for Women's and Gender Studies; Associate Professor, Department of African and African Diaspora Studies
PhD, University of Chicago, 1999

Paul Green, Assistant Professor, Department of Management
MBA, Drexel University, 2010

Terrance L Green, Associate Professor, Department of Educational Leadership and Policy; Associate Professor, Department of African and African Diaspora Studies
PhD, University of Wisconsin-Madison, 2013

Sherri R Greenberg, Professor of Practice, Lyndon B Johnson School of Public Affairs; Professor of Practice, School of Social Work
MSc, University of London, 1981

Kenneth F Greene, Associate Professor, Department of Government; Associate Professor, Center for Mexican American Studies
PhD, University of California-Berkeley, 2002

Benjamin G Gregg, Professor, Department of Government
PhD, Princeton University, 1996

Sheena Elise Greitens, Associate Professor, Lyndon B Johnson School of Public Affairs; Associate Professor, Department of Government
PhD, Harvard University, 2013

John M Griffin James A. Elkins Centennial Chair in Finance, Professor, Department of Finance
PhD, The Ohio State University Main Campus, 1997

Lisa Griffin, Associate Professor, Department of Kinesiology and Health Education
PhD, University of Western Ontario, 1999

Zenzi Margareta Griffin, Professor, Department of Psychology; Professor, Department of Speech, Language, and Hearing Sciences; Professor, Department of Linguistics
PhD, University of Illinois at Urbana-Champaign, 1998

Jeffrey Martin Gross, Professor, Department of Molecular Biosciences
PhD, Duke University, 2002

Tara Grove Vinson & Elkins Chair in Law, Professor, School of Law
JD, Harvard University, 2002

Karen Grumbert Arnold S. Chaplak Professorship in Israel and Diaspora Studies, Faculty Associate; Director Academic Center, Center for Middle Eastern Studies; Professor, Department of Middle Eastern Studies
PhD, University of California-Los Angeles, 2004

Maria Pia Pia Gualdani Frank E. Gerth III Faculty Fellowships, Associate Professor, Department of Mathematics
PhD, Johannes Gutenberg Universitat Mainz, 2005

Julia E Guernsey D. J. Sibley Family Centennial Faculty Fellowship in Prehistoric Art, Jeanette and Ferris Nassour Faculty Fellowship in Art History, Professor, Department of Art and Art History
PhD, University of Texas at Austin, 1997

Sumit Guha Frances Higginbotham Nalle Centennial Professorship in History, Professor, Department of History; Professor, Department of Asian Studies
PhD, University of Cambridge, 1982

Lauren E Gulbas, Associate Professor, School of Social Work; Associate Professor, Department of Anthropology; Associate Professor, Department of Population Health; Associate Professor, Department of Health Social Work
PhD, Southern Methodist University, 2008

Sean S Gulick, Research Professor, Institute for Geophysics; Research Professor, Department of Geological Sciences
PhD, Lehigh University, 2000

Joann Gulizio, Faculty Associate; Senior Lecturer, Department of Classics
PhD, University of Texas at Austin, 2011

Jonathan F Gunn, Associate Professor, Sarah and Ernest Butler School of Music
MM, Duquesne University, 1997

Joshua G Gunn, Professor, Department of Communication Studies; Professor, Department of Rhetoric and Writing
PhD, University of Minnesota-Twin Cities, 2002

Diwakar Gupta Daniel B. Stuart Centennial Professorship in the Application of Computers to Business & Management, Professor, Department of Information, Risk, and Operations Management
PhD, University of Waterloo, 1988

Danna Gurari, Research Affiliate - Research Fellow
PhD, Boston University, 2015

Sean Gurd Faculty Fellowship in Classics, Professor, Department of Classics
PhD, University of Toronto, 2001
Genaro J Gutierrez, Director for MSBA; Associate Professor, Department of Information, Risk, and Operations Management; Associate Professor, Department of Management
PhD, Stanford University, 1988

Laura G Gutierrez Andrew W. Mellon Foundation Faculty Fellowships in Latin American Studies, LMAS Affiliated; Associate Professor, Center for Mexican American Studies; Associate Professor, Department of Mexican American and Latino/a Studies
PhD, University of Wisconsin-Madison, 2000

Lauren Jae Guterman, Associate Professor, Department of American Studies; Associate Professor, Department of History
PhD, New York University, 2012

Jacek Gwizdka Temple Teaching Fellowship, Associate Professor, School of Information
PhD, University of Toronto, 2004

Derek A Haas, Associate Professor, Walker Department of Mechanical Engineering; Associate Professor, Applied Research Laboratories
PhD, University of Texas at Austin, 2008

Michael Richard Haberman, Assistant Professor, Applied Research Laboratories; Assistant Professor, Walker Department of Mechanical Engineering
PhD, Georgia Institute of Technology, 2007

Marvin L Hackert William Shive Centennial Professorship in Biochemistry, Associate Dean, Office of the Vice Provost and Dean of Graduate Studies; Professor, Department of Molecular Biosciences
PhD, Iowa State University, 1970

Jo Ann Hackett, Professor Emeritus, Department of Middle Eastern Studies
PhD, Harvard University, 1980

Ronny Hadani, Associate Professor, Department of Mathematics
PhD, Tel Aviv University, 2006

Warren J Hahn, Associate Dean for Graduate Programs; Clinical Professor, Department of Finance
PhD, University of Texas at Austin, 2005

Sabine Hake Texas Chair of German Literature and Culture, Professor, Department of Germanic Studies; Professor, Center for Women’s and Gender Studies; Professor, Department of Geography and the Environment
PhD, Gottfried Wilhelm Leibniz Universität Hannover, 1984

Jeffrey Hales Charles T. Zlatkovich Centennial Professorship in Accounting, Executive Director of the Global Sustainability Leadership Institute (GSLI); Professor, Department of Accounting
PhD, Cornell University, 2003

Andreana P Haley Sarah M. and Charles E. Seay Regents Professorship in Clinical Psychology, Professor, Department of Psychology
PhD, University of Virginia, 2005

Matthew J Hall Louis T. Yule Fellowship in Engineering, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering
PhD, Princeton University, 1987

Neal Hall Temple Foundation Endowed Faculty Fellowship No. 5, Associate Professor, Chandra Department of Electrical and Computer Engineering
PhD, Georgia Institute of Technology, 2004

Nicholas Jennings Hallman, Assistant Professor, Department of Accounting
PhD, University of Missouri - Columbia, 2016

Mike Hames-Garcia, Professor, Department of Mexican American and Latino/a Studies
PhD, Cornell University, 1998

Liberty Hamilton, Assistant Professor, Department of Speech, Language, and Hearing Sciences; Assistant Professor, Department of Neurology
PhD, University of California-Berkeley, 2013

Mark F Hamilton W. R. Woolrich Professorship in Engineering, Professor, Walker Department of Mechanical Engineering; Professor, Applied Research Laboratories
PhD, Pennsylvania State University Main Campus, 1983

Xiaofeng Deng Hamilton, Professor, Department of Curriculum and Instruction
PhD, University of Illinois at Urbana-Champaign, 2000

Sae Hwang Han, Assistant Professor, Department of Human Development and Family Sciences
MS, University of Massachusetts Boston, 2017

Grani Adiwena Hansusanto, Adjunct Assistant Professor, Walker Department of Mechanical Engineering
PhD, Imperial College London, 2015

Ian F Hancock, Professor Emeritus, Department of Linguistics
PhD, University of London, 1971

Courtney Handman, Associate Professor, Department of Anthropology
PhD, University of Chicago, 2010

Robert J Hankinson, Professor, Department of Philosophy; Professor, Department of Classics
PhD, University of Cambridge, 1985

Maggie Hansen Meadows Foundation Centennial Fellowship in Architecture, Assistant Professor, School of Architecture
MLA, University of Virginia, 2010

Patricia I Hansen J. Waddy Bullion Professorship in Law, Professor, School of Law
JD, Yale University, 1987

Alex Hanson Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Assistant Professor, Chandra Department of Electrical and Computer Engineering
SM, Massachusetts Institute of Technology, 2016

Kathryn Paige Harden, Professor, Department of Psychology
PhD, University of Virginia, 2009

Julie Hardwick John E. Green Regents Professorship in History, Professor, Department of History
PhD, Johns Hopkins University, 1991

Michael P Harney, Professor, Department of Spanish and Portuguese
PhD, University of California-Berkeley, 1983

Arbel Harpak, Assistant Professor, Department of Population Health; Assistant Professor, Department of Integrative Biology
PhD, Stanford University, 2018

Kristen M Harris, Professor, Department of Neuroscience
PhD, Northeastern Ohio Universities College of Medicine, 1982
David A Harrison Charles and Elizabeth Prothro Regents Chair in Business Administration, Charles and Elizabeth Prothro Regents Distinguished University Chair in Business, Professor, Department of Management PhD, University of Illinois at Urbana-Champaign, 1988

Rasika M Harshaey Lorene Morrow Kelley Professorship in Microbiology, Professor, Department of Molecular Biosciences PhD, Indian Institute of Science - Bangalore, 1977

Roderick P Hart Allan Shivers Centennial Chair in Communication, Faculty Associate; Professor, Department of Communication Studies; Professor, Department of Government PhD, Pennsylvania State University Park, 1970

Elin J Hartelius, Associate Professor, Department of Communication Studies PhD, University of Texas at Austin, 2008

Jay C Hartzell Regents Chair in Higher Education Leadership, Ed and Caroline Hyman Endowed Presidential Leadership Chair, Trammell Crow Regents Professorship in Business, President, Professor, Department of Finance PhD, University of Texas at Austin, 1998

Hope Hasbrouck, Associate Professor, School of Architecture MLArch, Harvard University, 1996

John J Hasenbein June and Gene Gillis Endowed Faculty Fellowship in Manufacturing Systems Engineering, William B. Blakemore II Centennial Fellowship, Affiliated Faculty, Oden Institute; Professor, Walker Department of Mechanical Engineering PhD, Georgia Institute of Technology, 1999

John William Hatfield Arthur Andersen & Co. Alumni Centennial Professorship in Finance, Century Club Professorship, Professor, Department of Finance; Professor, Department of Economics; Professor, Department of Business, Government and Society PhD, Stanford University, 2005

Robert S Hatten, Professor Emeritus, Sarah and Ernest Butler School of Music PhD, Indiana University Bloomington, 1982

Elliott Hauser John P. Commons Teaching Fellowship, Assistant Professor, School of Information PhD, University of North Carolina at Chapel Hill, 2020

Justin C Havird, Assistant Professor, Department of Integrative Biology PhD, Auburn University, 2014

Keith Hawkins, Assistant Professor, Department of Astronomy PhD, University of Cambridge, 2016

Mary Myleen Hayhoe, Professor, Department of Psychology PhD, University of California-San Diego, 1979

Richard D Hazeltine, Professor Emeritus, Department of Physics PhD, University of Michigan-Ann Arbor, 1968

Nancy L Hazen Swann, Professor Emeritus, Department of Human Development and Family Sciences PhD, University of Minnesota-Twin Cities, 1979

Robert W Heath Jr, Senior Research Scientist; Adjunct Professor, Chandra Department of Electrical and Computer Engineering PhD, Stanford University, 2002

Matt Heddon J. Hugh and Betty Liedtke Centennial Fellowship in Engineering, Associate Professor, Department of Civil, Architectural, and Environmental Engineering PhD, Purdue University Main Campus, 2015

Robert E Helber, Other University Affiliate; Research Professor, Walker Department of Mechanical Engineering; Director Research Unit, Center for Electromechanics PhD, University of Missouri - Rolla, 1971

Elizabeth A Hedrick, Associate Professor, Department of English PhD, Columbia University (New York), 1986

Bjorn Hegelich, Associate Professor, Department of Physics PhD, Ludwig-Maximilians-Universitat Munchen, 2002

Zoya Heidari Anadarko Petroleum Corporation Centennial Fellowship #1 in Petroleum Engineering, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering PhD, University of Texas at Austin, 2011

Patrick Heimbach W. A. "Tex" Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 3, Core Faculty, Oden Institute; Professor, Department of Geological Sciences; Professor, Institute for Computational Engineering and Science PhD, University of Hamburg, 1998

Daniel J Heinzen The Fondren Foundation Centennial Chair in Physics, Professor, Department of Physics PhD, Massachusetts Institute of Technology, 1988

Donalyn Heise, Associate Professor of Instruction, Department of Art and Art History EdD, Nova Southeastern University, 2001

Elizabeth M Heitkemper, Assistant Professor, School of Nursing PhD, Columbia University (New York), 2017

Raymond C Heitmann, Professor, Department of Mathematics PhD, University of Wisconsin-Madison, 1974

Jeffrey L Hellmer Priscilla Pond Flawn Regents Professorship in Organ or Piano Performance, Professor, Sarah and Ernest Butler School of Music MM, University of Rochester, 1983

Todd A Helwig, Jewel McAlist Smith Professorship in Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering PhD, University of Texas at Austin, 1994

Andrew D Henderson The J. Anderson Fitzgerald Centennial Fellowship, Associate Professor, Department of Management PhD, University of Texas at Austin, 1996

Linda D Henderson, Distinguished Teaching Professor Emeritus, Department of Management PhD, University of Texas at Austin, 1975

Marlene Deshaun Henderson, Associate Professor, Department of Psychology PhD, New York University, 2006
Ty Thomas Henderson, Associate Professor, Department of Marketing; Associate Dean, Undergraduate Programs, Red McCombs School of Business
PhD, University of Wisconsin-Madison, 2007

Geraldine Heng Mildred Hajek Vacek and John Roman Vacek Chair in English, in Honor of Professor Willet T. Conklin, Professor, Department of English; Professor, Center for Middle Eastern Studies
PhD, Cornell University, 1990

Jacqueline M Henkel, Associate Professor Emeritus, Department of Rhetoric and Writing
PhD, University of Minnesota-Twin Cities, 1985

Graeme Andrew Henkelman George W. Watt Centennial Professorship, Core Faculty, Oden Institute; Professor, Department of Chemistry
PhD, University of Washington - Seattle, 2001

Ashley M Henneghan Ed and Molly Smith Fellowship in Nursing, Assistant Professor, Department of Oncology; Assistant Professor, School of Nursing
PhD, University of Texas at Austin, 2017

Maya L Henry, Associate Professor, Department of Speech, Language, and Hearing Sciences; Associate Professor, Department of Neurology; Assistant Dean, Moody College of Communication
PhD, University of Arizona, 2009

Nick A Henry, Assistant Professor, Department of Germanic Studies
PhD, Pennsylvania State University Park, 2015

Peter Hess, Professor, Department of Germanic Studies; Professor, Center for European Studies
PhD, University of Michigan-Ann Arbor, 1984

Marc Andre Hesse, Core Faculty, Oden Institute; Associate Professor, Department of Geological Sciences
PhD, Stanford University, 2008

David D Heymann Harwell Hamilton Harris Regents Professorship in Architecture, Professor, School of Architecture
MArch, Harvard University, 1988

Kathleen M Higgins, Professor, Department of Philosophy
PhD, Yale University, 1982

Lea Hildebrandt Ruiz Chevron Centennial Teaching Fellowship in Chemical Engineering, Associate Professor, McKetta Department of Chemical Engineering
PhD, Carnegie Mellon University, 2011

Angela Hill Lillian and Tom B. Rhodes Centennial Teaching Fellowship #2, Assistant Professor, Department of Rhetoric and Writing
PhD, University of California-Berkeley, 2011

Gary J Hill, Research Professor, McDonald Observatory; Research Professor, Department of Astronomy
PhD, University of Hawaii at Hilo, 1988

David M Hillis Alfred W. Roark Centennial Professorship in Natural Sciences, Director (Academic); Professor, Department of Integrative Biology
PhD, University of Kansas Main Campus, 1985

Michael C Hillmann, Professor Emeritus, Department of Middle Eastern Studies
PhD, University of Chicago, 1974

Heather Anne Hindman, Associate Professor, Department of Asian Studies; Associate Professor, Department of Anthropology; Associate Professor, Center for Asian American Studies
PhD, University of Chicago, 2003

Lars Hinrichs, Associate Professor, Department of English
PhD, Albert Ludwig University Freiburg im Breisgau, 2006

Ran Hirsch Earl E. Sheffield Regents Chair, Professor, Department of Government; Professor, School of Law
PhD, Yale University, 1999

D E Hirst Glenn A. Welsch Centennial Professorship in Accounting, Professor, Department of Accounting
PhD, University of Minnesota-Twin Cities, 1992

Neville Hoad, Faculty Associate; Associate Professor, Department of English; Associate Professor, Center for Women's and Gender Studies
PhD, Columbia University (New York), 1998

John M Hoberman, Professor, Department of Germanic Studies
PhD, University of California-Berkeley, 1975

Ben R Hodges Carl Ernest and Mattie Ann Muldrow Reistle, Jr. Centennial Fellowship in Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Stanford University, 1997

Steven D Hoelscher Stiles Professorship in American Studies, Faculty Associate; Professor, Department of American Studies; Professor, Department of Geography and the Environment; Associate Dean, College of Liberal Arts
PhD, University of Wisconsin-Madison, 1995

David W Hoffman, Associate Professor, Department of Molecular Biosciences
PhD, Duke University, 1986

Johann Hofmann, Faculty collaboration with Gore lab; Professor, Department of Integrative Biology
PhD, Universitat Leipzig, 1997

Charles J Holahan, Professor, Department of Psychology
PhD, University of Massachusetts Amherst, 1971

Joan A Holladay, Professor Emeritus, Department of Art and Art History
PhD, Brown University, 1982

Michael HOLLERAN, Associate Professor, School of Architecture
PhD, Massachusetts Institute of Technology, 1991

Jennifer J Holme, Professor, Department of Educational Leadership and Policy
PhD, University of California-Los Angeles, 2000

Adam Holzman Parker C. Fielder Regents Professorship in Music, Professor, Sarah and Ernest Butler School of Music
MM, Florida State University, 1984

Sharon D Horner Dolores V. Sands Chair in Nursing Research, Associate Dean, School of Nursing
PhD, Medical College of Georgia, 1992

Brian K Horton J. Nalle Gregory Chair in Sedimentary Geology, Program Director (Academic); Professor, Department of Geological Sciences; Professor, Institute for Geophysics
PhD, University of Arizona, 1998

Seyyed Abolfazl Hosseini, Senior Research Scientist,
Heather Houser Mody C. Boatright Regents Professorship in American and English Literature; Professor, Department of English
PhD, Stanford University, 2010

Susan D Hovorka, Senior Research Scientist, PhD, University of Texas at Austin, 1990

Mackenzie A Howard, Courtesy Faculty; Assistant Professor of Medicine, Department of Neurology; Research Assistant Professor, Department of Neuroscience
PhD, University of Washington - Seattle, 2008

James L Howison, Associate Professor, School of Information
PhD, Syracuse University Main Campus, 2009

Wayne D Hoyer James L. Bayless/W. S. Farish Fund Chair for Free Enterprise, Professor, Department of Marketing
PhD, Purdue University Main Campus, 1980

Hao-Yuan Hsiao, Assistant Professor, Department of Kinesiology and Health Education
PhD, University of Delaware, 2015

Madeleine Y Hsu Mary Helen Thompson Centennial Professorship in the Humanities, Professor, Department of History; Professor, Center for Asian American Studies; Professor, Department of Asian Studies
PhD, Yale University, 1996

Vox Jo Hu Lillian and Tom B. Rhodes Centennial Teaching Fellowship #1, Assistant Professor, Department of Rhetoric and Writing
PhD, Pennsylvania State University Park, 2016

Henry T C Hu Allan Shivers Chair in the Law of Banking and Finance, Professor, School of Law
JD, Yale University, 1979

Qin Huang Dula D. Cockrell Centennial Chair in Engineering #1, Faculty Associate, Fulbright JFD P Egypt; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Cambridge, 1992

Qixing Huang, Associate Professor, Department of Computer Science
PhD, Stanford University, 2012

Rui Huang Bettie Margaret Smith Professorship in Engineering, Faculty Associate-ENGR; Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Princeton University, 2001

Teresa Hubbard William and Bettye Newlin Endowed Professorship in Photography, Grace Hill Milam Centennial Fellowship in Fine Arts, Faculty Associate; Professor, Department of Art and Art History
MFA, Nova Scotia College of Art and Design, 1992

John Huehnergard, Professor Emeritus, Department of Middle Eastern Studies
PhD, Harvard University, 1979

Earl Huff Jr, Assistant Professor, School of Information
MS, Rowan University, 2013

Joan Hughes, Associate Professor, Department of Curriculum and Instruction
PhD, Michigan State University, East Lansing, 2000

Patrick Hughes, Associate Professor, Sarah and Ernest Butler School of Music
MMus, University of Wisconsin-Madison, 1988

Thomas J Hughes Peter O'Donnell, Jr. Chair in Computational and Applied Mathematics, John O. Hallquist Endowed Distinguished Chair in Computational Mechanics, Core Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Institute for Computational Engineering and Science
PhD, University of California-Berkeley, 1974

Jon M Huibregtse Benjamin Clayton Centennial Professorship in Biochemistry, Professor, Department of Molecular Biosciences
PhD, University of Michigan-Ann Arbor, 1989

Kami Hull, Associate Professor, Department of Chemistry
PhD, University of Michigan-Ann Arbor, 2009

Simon M Humphrey, Professor, Department of Chemistry
PhD, University of Cambridge, 2006

Todd E Humphreys Ashley H. Priddy Centennial Professorship in Engineering, Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Applied Research Laboratories; Director Research Unit, Wireless Networking and Communications Group, Wireless Networking and Communications Group
PhD, Cornell University, 2008

Bruce J Hunt, Professor, Department of History
PhD, Johns Hopkins University, 1984

Thomas M Hunt, Associate Professor, Department of Kinesiology and Health Education
PhD, University of Texas at Austin, 2007

Warren A Hunt Jr, Professor, Department of Computer Science
PhD, University of Texas at Austin, 1985

Wendy A Hunter, Professor, Department of Government
PhD, University of California-Berkeley, 1992

Nick Hunter-Jones, Assistant Professor, Department of Physics; Assistant Professor, Department of Computer Science
DSc, California Institute of Technology, 2018

Enamul Huq, Professor, Department of Molecular Biosciences
PhD, Purdue University Main Campus, 1997

Brian Hurley, Assistant Professor, Department of Asian Studies
PhD, University of California-Berkeley, 2014

Insiya Hussain, Assistant Professor, Department of Management
PhD, University of Maryland College Park, 2018

Sara J Hussain, Assistant Professor, Department of Kinesiology and Health Education
PhD, University of Iowa, 2016

Robert L Hutchings, Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, University of Virginia, 1979

Coleman Hutchison, Associate Professor, Department of English
PhD, Northwestern University, 2006

Alexander Huth, Faculty Associate Honors Fall 2022 Seminar; Assistant Professor, Department of Neuroscience; Assistant Professor, Department of Computer Science
PhD, University of California-Berkeley, 2013

Tanya Hutter, Assistant Professor, Walker Department of Mechanical Engineering
PhD, University of Cambridge, 2013
Gyeong S Hwang Matthew Van Winkle Regents Professorship in Chemical Engineering, Professor, McKetta Department of Chemical Engineering  
PhD, California Institute of Technology, 1999

Hyun Hwang, Assistant Professor, Department of Accounting  
MS, Carnegie Mellon University, 2000

Syed A Hyder, Associate Professor, Department of Asian Studies;  
Associate Professor, Center for Middle Eastern Studies  
PhD, Harvard University, 2000

Benjamin Ibarra Sevilla, Faculty Associate;  
Associate Professor, School of Architecture  
MS, Universidad de Alcala, 2005

Mary E Ibarrola, Assistant Professor, Department of Anthropology  
PhD, University of Florida, 2021

William Inboden, Executive Director;  
Associate Professor, Lyndon B Johnson School of Public Affairs;  
Associate Professor, Department of History  
PhD, Yale University, 2003

Jean Incorvia, Assistant Professor, Chandra Department of Electrical and Computer Engineering  
PhD, Harvard University, 2015

Yasmiyn Irizarry, Associate Professor, Department of Sociology;  
Associate Professor, Department of African and African Diaspora Studies  
PhD, Indiana University Bloomington, 2011

Julie R Irwin Marlene and Morton Meyerson Centennial Professorship in Business, Professor, Department of Business, Government and Society  
PhD, University of Colorado at Boulder, 1992

Arie Israel, Associate Professor, Department of Mathematics  
PhD, Princeton University, 2011

Brent L Iversion Warren J. and Viola Mae Raymer Professorship,  
Professor, Department of Chemistry  
PhD, California Institute of Technology, 1988

Vishwanath R Iyer, Professor, Department of Molecular Biosciences;  
Professor of Oncology, Department of Oncology  
PhD, Harvard University, 1996

Jose Guadalupe Izaguirre III Lillian and Tom B. Rhodes Centennial Teaching Fellowship #4, Assistant Professor, Department of Rhetoric and Writing;  
Assistant Professor, Department of Communication Studies  
PhD, University of Illinois at Urbana-Champaign, 2020

Huriya Jabbar, Associate Professor, Department of Educational Leadership and Policy  
PhD, University of California-Berkeley, 2014

Mbemba Jabbi, Assistant Professor, Department of Psychiatry  
PhD, University of Groningen, 2007

Gary J Jacobsohn H. Malcolm Macdonald Chair in Constitutional and Comparative Law, Professor, Department of Government  
PhD, Cornell University, 1972

Deborah B Jacobowitz Phyllis L. Richards Endowed Professorship in Child Development, Professor, Department of Human Development and Family Sciences  
PhD, University of Minnesota-Twin Cities, 1987

Alesandra Jaeschke Meadows Foundation Centennial Fellowship in Architecture, Assistant Professor, School of Architecture  
DDes, Harvard University, 2018

Daniel T Jaffe Jane and Roland Blumberg Centennial Professorship in Astronomy, Professor, Department of Astronomy;  
Vice President for Research, Office of the Vice President for Research  
PhD, Harvard University, 1981

Moriba Jah Mrs. Pearlie Dashiel Henderson Centennial Fellowship in Engineering, Core Faculty, Oden Institute;  
Associate Professor, Department of Aerospace Engineering and Engineering Mechanics  
PhD, University of Colorado at Boulder, 2005

Robert K Jansen Sidney F. and Doris Blake Centennial Professorship in Systematic Botany and the Blake Collection, Professor, Department of Integrative Biology;  
Director Research Unit, Plant Resources Center  
PhD, The Ohio State University Main Campus, 1982

Xavier Janson, Senior Research Scientist,  
PhD, University of Miami, 2002

Andres Jara-Oseguera Lorene Morrow Kelley Endowed Faculty Fellowship Fund, Assistant Professor, Department of Molecular Biosciences  
PhD, Universidad Nacional Autonoma de Mexico, 2013

Sirkka L Jarvenpaa James L. Bayless/Rauscher Pierce Frefsnes, Inc. Chair in Business Administration, Professor, Department of Information, Risk, and Operations Management  
PhD, University of Minnesota-Twin Cities, 1986

Sharon E Jarvis, Faculty Associate;  
Distinguished Teaching Professor, Department of Communication Studies  
PhD, University of Texas at Austin, 2000

Makkuni Jayaram, Professor, Department of Molecular Biosciences  
PhD, Indian Institute of Science - Bangalore, 1977

Ross G Jennings, Distinguished Teaching Professor Emeritus, Department of Accounting  
PhD, University of California-Berkeley, 1987

Kristin Wolfe Jensen, Professor, Sarah and Ernest Butler School of Music  
MM, The Juilliard School, 1991

Nathan Michael Jensen, Professor, Department of Government;  
Professor, Department of Business, Government and Society  
PhD, Yale University, 2002

Connor T Jerzak, Assistant Professor, Department of Government  
AM, Harvard University, 2020

Stephen August Jessee, Associate Professor, Department of Government  
PhD, Stanford University, 2007

Shalene Jha Jean Andrews Centennial Faculty Fellowship in Tropical and Economic Botany, Faculty Associate;  
Associate Professor, Department of Integrative Biology  
PhD, University of Michigan-Ann Arbor, 2009

Yaoyao Jia, Assistant Professor, Chandra Department of Electrical and Computer Engineering  
PhD, Georgia Institute of Technology, 2019

Junfeng Jiao, CS Opt III Fall 2022 Faculty Associate;  
Associate Professor, School of Architecture;  
Associate Professor, Department of Population Health
PhD, University of Florida, 1988

Alison Kafer, Associate Professor, Department of English; Associate Professor, Center for Women's and Gender Studies
PhD, Claremont Graduate University, 2005

Lee Ann Kahlor, Professor, Stan Richards School of Advertising and Public Relations; Professor, Center for Women's and Gender Studies
PhD, University of Wisconsin-Madison, 2003

Loukas F Kallivokas Carrol Allen Teaching Fellowship in Civil Engineering, Affiliated Faculty, Oden Institute; Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Carnegie Mellon University, 1995

Marilyn C Kameen A. M. Aikin Regents Chair in Junior and Community College Education Leadership, Professor, Department of Educational Leadership and Policy
EdD, University of Virginia (Old Code), 1974

Neil D Kamil, Associate Professor, Department of History
PhD, Johns Hopkins University, 1989

Johan A Kamp, Visiting Professor, Department of Philosophy; Visiting Professor, Department of Linguistics
PhD, University of California-Los Angeles, 1968

Hyeon-Ah Kang Pearson Endowed Faculty Fellowship in Psychometrics, Assistant Professor, Department of Educational Psychology
PhD, University of Illinois at Urbana-Champaign, 2016

Hyeun Ah Kang, Assistant Professor, College of Pharmacy
PhD, University of Texas at Austin, 2019

Jonathan Kaplan, Associate Professor, Department of Middle Eastern Studies; Director, Schusterman Center for Jewish Studies, Schusterman Center for Jewish Studies
PhD, Harvard University, 2010

Vadim Kaplunovsky, Professor, Department of Physics
PhD, Tel Aviv University, 1984

John W Kappelman Jr, Professor, Department of Anthropology; Professor, Department of Geological Sciences
PhD, Harvard University, 1987

Andreas Karch, Professor, Department of Physics
MA, University of Texas at Austin, 1996

Alex Kerner, Associate Professor, School of Architecture
PhD, University of California-Davis, 2012

Lynn E Katz Hussein M. Alharthy Centennial Chair in Civil Engineering, Faculty Ombudsperson; Professor, Department of Civil, Architectural, and Environmental Engineering; Director Research Unit, Center for Water and the Environment
PhD, University of Michigan-Ann Arbor, 1993

Jasdeep Kaur, Assistant Professor, Department of Kinesiology and Health Education
PhD, Wayne State University, 2016

Elizabeth L Keating, Professor, Department of Anthropology; Professor, Department of Linguistics
PhD, University of California-Los Angeles, 1994

Adrian T Keatinge-Clay, Associate Professor, Department of Molecular Biosciences
PhD, University of California-San Francisco, 2004

Tony Keddie, Associate Professor, Department of Religious Studies
PhD, University of Texas at Austin, 2017

Sean M Keel Frank E. Gerth III Faculty Fellowships, Professor, Department of Mathematics
PhD, University of Chicago, 1989

Ward W Keeler, Professor, Department of Anthropology
PhD, University of Chicago, 1982

Timothy H Keitt The William H. and Gladys G. Reeder Fellowship in Ecology, Affiliated Faculty, Oden Institute; Professor, Department of Integrative Biology
PhD, University of New Mexico-Albuquerque, 1995

Benjamin Keith Keitz Frank A. Liddell, Jr. Centennial Fellowship in Chemical Engineering, Assistant Professor, McKetta Department of Chemical Engineering
PhD, California Institute of Technology, 2013

Brian T Keller, Assistant Professor, Department of Educational Psychology
PhD, University of California-Los Angeles, 2019

Melessa Kelley, Assistant Professor, School of Nursing
PhD, Florida Atlantic University, 2016

Ryan S Kelly, Faculty Associate; Associate Professor of Practice, Sarah and Ernest Butler School of Music
DMA, University of Texas at Austin, 2014

Orlando R Kelm, Faculty Associate, ELC; Associate Professor, Department of Spanish and Portuguese; Associate Professor, Department of Marketing
PhD, University of California-Berkeley, 1989

Deena Kemp Arthur W. Page Faculty Fellowship in Public Relations, Assistant Professor, Stan Richards School of Advertising and Public Relations
PhD, Cornell University, 2018

Melissa Kemp, Assistant Professor, Department of Integrative Biology; Assistant Professor, Department of Geological Sciences
PhD, Stanford University, 2015

Charles Kerans, Program Director (Academic); Professor, Department of Geological Sciences; Professor, Bureau of Economic Geology
PhD, Carleton University, 1982

Shelli Kesler Luci Baines Johnson Fellowship in Nursing, Associate Professor, School of Nursing; Associate Professor of Diagnostic Medicine, Department of Diagnostic Medicine; Associate Professor of Oncology, Department of Oncology
PhD, Brigham Young University, 2000

Richard A Ketcham, Professor, Department of Geological Sciences
PhD, University of Texas at Austin, 1995

John W Keto, Professor, Department of Physics
PhD, University of Wisconsin-Madison, 1972

Martin W Kevorkian, Faculty Associate; Professor, Department of English
PhD, University of California-Los Angeles, 2000

Eslam Khalaf, Assistant Professor, Department of Physics
PhD, University of Stuttgart, 2017

Urooj Khan Deloitte & Touche Centennial Faculty Fellowship in Accounting (No. 1), Associate Professor, Department of Accounting
PhD, University of California-Los Angeles, 1997
David D Kornhaber, Associate Professor, Department of English
PhD, Columbia University (New York), 2009
Donna Marie Kornhaber, Professor, Department of English
PhD, Columbia University (New York), 2009
Rajinder Koul Houston Harte Centennial Professorship in Communication, Professor, Department of Speech, Language, and Hearing Sciences
PhD, Purdue University Main Campus, 1994
Desiderio Kovar The BFGoodrich Endowed Professorship in Materials Engineering, Professor, Walker Department of Mechanical Engineering PhD, Carnegie Mellon University, 1995
Lee Kovarsky Bryant Smith Chair in Law, Professor, School of Law JD, University of Virginia, 2004
Zach Kowaleski, Assistant Professor, Department of Accounting PhD, University of Wisconsin-Madison, 2018
Mikiya Koyagi, Assistant Professor, Department of Middle Eastern Studies PhD, University of Texas at Austin, 2015
Philipp Kraehenbuehl, Associate Professor, Department of Computer Science PhD, Stanford University, 2014
Adam Levi Kraus, Associate Professor, Department of Astronomy PhD, California Institute of Technology, 2009
Scott Kravitz, Assistant Professor, Department of Physics PhD, Stanford University, 2017
Michael J Krische The Robert A. Welch Chair in Science, Professor, Department of Chemistry PhD, Stanford University, 1997
Samuel Arthur Kruger, Assistant Professor, Department of Finance PhD, Harvard University, 2014
Robbie Kubala, Assistant Professor, Department of Philosophy PhD, Columbia University (New York), 2018
Matthew R Kubic, Assistant Professor, Department of Accounting PhD, Duke University, 2020
Jaydeep Prakash Kulkarni, Assistant Professor, Chandra Department of Electrical and Computer Engineering PhD, Purdue University Main Campus, 2009
Amit Kumar, Assistant Professor, Department of Psychology; Assistant Professor, Department of Marketing PhD, Cornell University, 2015
Krishna Kumar, Affiliated Faculty, Oden Institute; Assistant Professor, Department of Civil, Architectural, and Environmental Engineering PhD, University of Cambridge, 2015
Manish Kumar Mr. N. Doug Williams Memorial Centennial Fellowship in Engineering, Associate Professor, Department of Civil, Architectural, and Environmental Engineering PhD, University of Illinois at Urbana-Champaign, 2010
Pawan Kumar Edward Randall, Jr., M.D. Centennial Professorship in Astronomy, Professor, Department of Astronomy
PhD, California Institute of Technology, 1988
Shanti Kumar, Faculty Associate; Associate Professor, Department of Radio-Television-Film; Associate Professor, Center for Asian American Studies; Associate Professor, Department of Asian Studies PhD, Indiana University Bloomington, 1987
Paul D Kunz, Adjunct Associate Professor, Department of Physics DSc, University of Colorado at Boulder, 2013
John S Kuo, Professor of Medicine, Department of Oncology; Professor of Medicine, Dell Medical School PhD, Massachusetts Institute of Technology, 1998
Alan J Kuperman, Associate Professor, Lyndon B Johnson School of Public Affairs PhD, Massachusetts Institute of Technology, 2002
Erhan Kutanoglu William B. Blakemore II Centennial Fellowship, Associate Professor, Walker Department of Mechanical Engineering PhD, Lehigh University, 1999
Jung Kwak Ed and Molly Smith Centennial Fellowship in Nursing, Associate Professor, School of Nursing; Associate Professor, Department of Health Social Work PhD, University of South Florida, 2006
J Richard Kyle, Faculty Associate; Professor, Department of Geological Sciences PhD, University of Western Ontario, 1977
Stelios Kyriakides John Webb Jennings Chair in Engineering, Professor, Department of Aerospace Engineering and Engineering Mechanics; Director Research Unit, Center for Mechanics of Solids, Structures, and Materials PhD, California Institute of Technology, 1980
Pablo Laguna, Affiliated Faculty, Oden Institute; Professor, Department of Physics PhD, University of Texas at Austin, 1987
Keji Lai, Associate Professor, Department of Physics PhD, Princeton University, 2006
Larry W Lake Shahid and Sharon Ullah Endowed Chair in Petroleum and Geosystems Engineering, Professor, Hildebrand Department of Petroleum and Geosystems Engineering PhD, Rice University, 1973
Sophie Lalande, Assistant Professor, Department of Kinesiology and Health Education PhD, University of Auckland, 2008
Alan Lambowitz Mr. and Mrs. A. Frank Smith, Jr. Regents Chair in Molecular Biology, Professor, Department of Molecular Biosciences; Professor of Oncology, Department of Oncology PhD, Yale University, 1972
Melanie Lamotte, Assistant Professor, Department of African and African Diaspora Studies; Assistant Professor, Department of History; Assistant Professor, Department of French and Italian PhD, University of Cambridge, 2016
Yan Leng, Assistant Professor, Department of Information, Risk, and Operations Management
PhD, Massachusetts Institute of Technology, 2020

Erin Lentz, Associate Professor, Lyndon B Johnson School of Public Affairs
MS, Cornell University, 2005

Janice Leoshko, Associate Professor, Department of Art and Art History; Associate Professor, Department of Asian Studies
PhD, The Ohio State University Main Campus, 1987

Rosemary Anne Lester-Smith, Faculty Associate; Assistant Professor, Department of Speech, Language, and Hearing Sciences
PhD, University of Arizona, 2014

Lorraine Leu, Professor, John L Warfield Center for African and African American Studies; Professor, Department of Spanish and Portuguese
PhD, King's College, University of London, 2000

Mark Lever, Associate Professor, Department of Marine Science
PhD, University of North Carolina at Chapel Hill, 2008

Philippa Judith Levine Walter Prescott Webb Chair in History and Ideas, Jo Anne Christian Centennial Professorship in British Studies, Professor, Department of History; Professor, Center for Women's and Gender Studies
PhD, University of Oxford, 1984

Sanford V Levinson W. St. John Garwood and W. St. John Garwood, Jr. Centennial Chair in Law, Professor, School of Law; Professor, Department of Government
JD, Stanford University, 1973

Brian D Lewis David and Mary Winton Green Chair in String Performance and Pedagogy, Professor, Sarah and Ernest Butler School of Music
MM, The Juilliard School, 1993

Hannah Lewis, Associate Professor, School of Design and Creative Technologies; Associate Professor, Sarah and Ernest Butler School of Music
PhD, Harvard University, 2014

Marc S Lewis, Associate Professor, Department of Psychology
PhD, University of Cincinnati-Main Campus, 1973

Randolph R Lewis, Faculty Associate; Professor, Department of American Studies; Professor, Department of Anthropology
PhD, University of Texas at Austin, 1994

Rebecca J Lewis, Professor, Department of Anthropology
PhD, Duke University, 2004

William L Lewis, Professor, Sarah and Ernest Butler School of Music
BM, Texas Christian University, 1967

Jarrod Alan Lewis-Peacock, Associate Professor, Department of Psychology; Associate Professor, Department of Psychiatry; Associate Professor, Department of Neuroscience
PhD, University of Wisconsin-Madison, 2010

Cha Li, Assistant Professor, Department of Management
PhD, University of Michigan-Ann Arbor, 2021

Huaiyin Li, Professor, Department of History; Professor, Department of Asian Studies
PhD, University of California-Los Angeles, 2000

Jessy Li, Faculty Associate; Assistant Professor, Department of Linguistics
PhD, University of Pennsylvania, 2017

Jiabao Li, Assistant Professor, School of Design and Creative Technologies
MDES, Harvard University, 2018

Kathleen T Li, Assistant Professor, Department of Marketing
MS, University of Pennsylvania, 2014

Sensen Li, Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, Georgia Institute of Technology, 2020

Wei Li John T. MacGuire Professorship in Mechanical Engineering, Professor, Walker Department of Mechanical Engineering
PhD, University of Michigan-Ann Arbor, 1999

Xiaqin Li Jack S. Josey Professorship in Energy Studies, Professor, Department of Physics
PhD, University of Michigan-Ann Arbor, 2003

Xiuling Li Temple Foundation Endowed Professorship No. 3, Professor, Chandra Department of Electrical and Computer Engineering; Professor, Department of Chemistry
PhD, University of California-Los Angeles, 1993

Yang Li, Assistant Professor, School of Nursing
PhD, University of Michigan-Ann Arbor, 2018

Tatjana Lichtenstein, Associate Professor, Department of History; Associate Professor, Department of Slavic and Eurasian Studies
PhD, University of Toronto, 2009

Phoebe Lickwar, Associate Professor, School of Architecture
MLA, Rhode Island School of Design, 2006

Katherine E Lieberknecht, Assistant Professor, School of Architecture
PhD, Cornell University, 2008

Kenneth M Liechti, Professor Emeritus, Department of Aerospace Engineering and Engineering Mechanics
PhD, California Institute of Technology, 1980

Howard M Liljestrand, Faculty Associate-ENGR; Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, California Institute of Technology, 1980

Stephen T Limberg PricewaterhouseCoopers Centennial Professorship in Accounting, Professor, Department of Accounting; Professor of Medical Education, Department of Medical Education
PhD, Arizona State University Main, 1982

Calvin Lin Computer Sciences Endowed Faculty Fellowship No. 8, Sport Club Coach Volunteer; Professor, Department of Computer Science
PhD, University of Washington - Seattle, 1992

Jung-Fu Lin Total E&P USA Petroleum Faculty Fellowship in Geological Sciences, Professor, Department of Geological Sciences
PhD, University of Chicago, 2002

Tse-Min Lin, Associate Professor, Department of Government
PhD, University of Minnesota-Twin Cities, 1990

Yi-Chih Lin, Assistant Professor, Department of Chemistry
PhD, University of Pennsylvania, 2017

Leigh L Linden, Associate Professor, Department of Economics; Associate Professor, Lyndon B Johnson School of Public Affairs; Associate Professor, Center for Women's and Gender Studies
PhD, Massachusetts Institute of Technology, 2004

Craig R Linder, Associate Professor, Department of Integrative Biology
PhD, Brown University, 1984

Naomi E Lindstrom Gale Family Foundation Professorship in Jewish Arts and Culture, Professor, Department of Spanish and Portuguese
PhD, Arizona State University Main, 1974

Elizabeth Thomas Cox Lippard, Assistant Professor of Psychiatry, Department of Psychiatry
PhD, University of North Carolina at Chapel Hill, 2012

Jon E Litland, Associate Professor, Department of Philosophy
PhD, Harvard University, 2012

Angela K Littwin Ronald D. Krist Professorship in Law, Professor, School of Law
JD, Harvard University, 2002

Amy H Liu, Associate Professor, Department of Government
PhD, Emory University, 2009

Beili Liu Leslie Waggener Professorship in the College of Fine Arts, Faculty Associate; Professor, Department of Art and Art History
MFA, University of Michigan-Ann Arbor, 2003

Chang Liu, Professor, Department of Speech, Language, and Hearing Sciences
PhD, Indiana University Bloomington, 2002

Hung-Wen Liu George H. Hitchings Regents Chair in Drug Design, Professor, College of Pharmacy; Professor, Department of Chemistry
PhD, Columbia University (New York), 1981

Min Liu, Professor, Department of Curriculum and Instruction
EdD, West Virginia University, 1992

Qiang Liu Computer Sciences Endowed Faculty Fellowship No. 7, Assistant Professor, Department of Computer Science
PhD, University of California-Irvine, 2014

Xiao Liu, Assistant Professor, Department of Educational Psychology
PhD, University of Notre Dame, 2022

Yuanyue Liu, Assistant Professor, Walker Department of Mechanical Engineering
PhD, Rice University, 2014

Zhanfei Liu, Associate Professor, Department of Marine Science
PhD, State University of New York at Stony Brook, 2006

Keith A Livers, Associate Professor, Department of Slavic and Eurasian Studies
PhD, University of Michigan-Ann Arbor, 1995

Silviu Livescu Anadarko Petroleum Corporation Centennial Fellowship #1 in Petroleum Engineering, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Delaware, 2006

Fernando Llanos Lucas, Assistant Professor, Department of Linguistics
PhD, Purdue University Main Campus, 2016

Alan M Lloyd, Professor, Department of Molecular Biosciences
PhD, Stanford University, 1993

Alexia Lodt, Assistant Professor, Department of Nutritional Sciences
PhD, The Ohio State University Main Campus, 2006

James N Loehlin Shakespeare at Winedale Regents Professorship, Professor, Department of English
PhD, Stanford University, 1993

Kristie J Loescher, Director, Healthcare Initiative; Assistant Dean, Red McCombs School of Business; Professor of Instruction, Department of Management; Professor of Medicine, Department of Medical Education
PhD, Nova Southeastern University, 2004

Christopher A Long Martin S. Kermacy Centennial Professorship in Architecture, Professor, School of Architecture
PhD, University of Texas at Austin, 1993

Mark G Longaker Lillian and Tom B. Rhodes Centennial Teaching Fellowship #1, Professor, Department of Rhetoric and Writing; Professor, Department of Communication Studies; Professor, Department of English
PhD, Pennsylvania State University Main Campus, 2003

Raul G Longoria General Motors Foundation Centennial Teaching Fellowship in Mechanical Engineering, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering
PhD, University of Texas at Austin, 1989

Elma Ines Lorenzo-blanco, Associate Professor, Department of Human Development and Family Sciences
PhD, University of Michigan-Ann Arbor, 2013

Robert G Loucks, Senior Research Scientist, PhD, University of Texas at Austin, 1976

Alexandra Loukas Barbie M. and Gary L. Coleman Professorship in Education, Professor, Department of Kinesiology and Health Education; Associate Dean, College of Education
PhD, Michigan State University, East Lansing, 1997

Brad Love, Faculty Associate; Associate Professor, Stan Richards School of Advertising and Public Relations
PhD, Michigan State University, East Lansing, 2007

John Ronald Lowe Joseph H. Blades Centennial Memorial Professorship in Nursing, Professor, School of Nursing
PhD, University of Miami, 1996

Christopher Lowery, Lecturer, Department of Geological Sciences; Research Associate, PhD, University of Massachusetts Amherst, 2015

James Richard Lowery Jr, Associate Director; Associate Professor, Department of Finance
PhD, Carnegie Mellon University, 2009

Nanshu Lu Frank and Kay Reese Endowed Professorship in Engineering, Faculty Associate; Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Chandra Department of Electrical and Computer Engineering; Professor, Department of Biomedical Engineering; Professor, Walker Department of Mechanical Engineering
PhD, Harvard University, 2009

Ruochen Lu, Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Illinois at Urbana-Champaign, 2019

Xiaobo Lu, Associate Professor, Department of Government
PhD, Yale University, 2011

Yi Lu Richard J. V. Johnson - Welch Regents Chair in Chemistry, Professor, Department of Chemistry
Yingda Lu, University of California-Los Angeles, 1992

Raul L Madrid Harold C. and Alice T. Nowlin Regents Professorship in Liberal Arts, Professor, Department of Government; Professor, Center for Mexican American Studies
PhD, Stanford University, 1999

Professor, Department of Curriculum and Instruction
PhD, University of California-Berkeley, 2016

Ms. Mohammed Maniruzzaman, Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

Mohammed Maniruzzaman, Assistant Professor, College of Pharmacy
PhD, University of Greenwich, 2013

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992

Professor, Department of Petroleum Engineering
Assistant Professor, College of Pharmacy
PhD, Universitat Zurich, 2011

PhD, University of California-Los Angeles, 1992
Eric T Meyer Mary R. Boyvey Chair for Excellence, Louis T. Yule Regents Professorship in Library and Information Science, Dean, School of Information PhD, Indiana University Bloomington, 2007

Lauren A Meyers Denton A. Cooley Centennial Professorship in Zoology, Affiliated Faculty, Oden Institute; Professor, Department of Integrative Biology; Professor, Department of Statistics and Data Sciences; Professor, Department of Population Health PhD, Stanford University, 2000

Julia L Mickenberg, Faculty Associate; Professor, Department of American Studies; Professor, Center for Women's and Gender Studies PhD, University of Minnesota-Twin Cities, 2000

S J Milic, Associate Professor, Department of Neuroscience; Associate Professor, College of Pharmacy PhD, University of Toronto, 1992

Risto P Miikkulainen, Professor, Department of Computer Science PhD, University of California-Los Angeles, 1990

Jose del R Millan Carol Cockrell Curran Chair in Engineering, Faculty Associate; Professor, Chandra Department of Electrical and Computer Engineering; Professor, Department of Neurology; Professor, Department of Biomedical Engineering PhD, Universitat Autonoma de Barcelona, 1992

Jennifer A Miller, Professor, Department of Geography and the Environment PhD, San Diego State University, 2003

Kyle M Miller, Associate Professor, Department of Molecular Biosciences PhD, University College London, 2004

Delia Milliron Bill L. Stanley Endowed Leadership Chair in Chemical Engineering, T. Brockett Hudson Professorship in Chemical Engineering, Professor, McKetta Department of Chemical Engineering PhD, University of California-Berkeley, 2004

Brian M Mills, Associate Professor, Department of Kinesiology and Health Education PhD, University of Michigan-Ann Arbor, 2012

John R Mills, Professor, Sarah and Ernest Butler School of Music DMA, University of Texas at Austin, 1998

Lillian Fawn Mills Beverly H. and William P. O'Hara Endowed Chair in Business, Centennial Chair in Business Education Leadership, Lois and Richard Folger Dean’s Leadership Chair in the McCombs School of Business, Centennial Chair in Business Education Leadership, Professor, Department of Accounting; Dean, McCombs School of Business, Red McCombs School of Business PhD, University of Michigan-Ann Arbor, 1996

Monica Jane Milonovich, Associate Professor of Instruction, Department of Nutritional Sciences MS, Bowling Green State University, 1999

S Milovanovic-Bertram, Associate Professor, School of Architecture MArch, Harvard University, 1974

Julie A Minich, Associate Professor, Department of English; Associate Professor, Department of Mexican American and Latino/a Studies; Associate Professor, Center for Mexican American Studies; Associate Professor, Center for Women's and Gender Studies PhD, Stanford University, 2008

Steven Mintz, Professor, Department of History PhD, Yale University, 1979

Daniel P Miranker, Professor, Department of Computer Science PhD, Columbia University (New York), 1987

Eugenio Javier Miravete Rex G. Baker, Jr., Professorship of Political Economy, Professor, Department of Economics PhD, Northwestern University, 1996

Juan Miro Dick Clark, III, Endowed Chair in Architecture, Professor, School of Architecture MArch, Yale University, 1991

Srikanta Mishra, Associate Professor, Department of Speech, Language, and Hearing Sciences PhD, University of Southampton, 2009

Paweł Misztal, Assistant Professor, Department of Civil, Architectural, and Environmental Engineering PhD, University of Edinburgh, 2010

David Mitlin, Professor, Walker Department of Mechanical Engineering; Professor, Applied Research Laboratories PhD, University of California-Berkeley, 2000

Leticia R Moczyczka Lonnie F. Hollingsworth, Sr. Centennial Fellowship in Pharmacy, Associate Professor, College of Pharmacy PhD, University of Texas at Austin, 2008

Mohammad A Mohammad, Associate Professor, Department of Middle Eastern Studies; Associate Professor, Center for Middle Eastern Studies PhD, University of Southern California, 1989

Javad Mohammadi, Assistant Professor, Department of Civil, Architectural, and Environmental Engineering PhD, Carnegie Mellon University, 2016

Kishore Mohanty W. A. "Monty" Moncrief Centennial Chair in Petroleum Engineering, W. A. "Monty" Moncrief Centennial Chair in Petroleum Engineering, Professor, Hildebrand Department of Petroleum and Geosystems Engineering PhD, University of Minnesota-Duluth, 1981

David Mohrig Peter T. Flawn Centennial Chair in Geology, Professor, Department of Geological Sciences; Associate Dean, John A and Katherine G Jackson School of Geosciences PhD, University of Washington - Seattle, 1994

A Azfar Moin, Associate Professor, Department of Religious Studies; Associate Professor, Department of History PhD, University of Michigan-Ann Arbor, 2010

Aloysius K Mok Quincy Lee Centennial Professorship in Computer Science, Professor, Department of Computer Science PhD, Massachusetts Institute of Technology, 1983

Aryan Mokhtari Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Affiliated Faculty, Oden Institute; Assistant Professor, Chandra Department of Electrical and Computer Engineering PhD, University of Pennsylvania, 2017

Ian J Molineux, Professor, Department of Molecular Biosciences DPhil, University of Oxford, 1969

Marie Helene Monfils, Professor, Department of Psychology; Professor, Department of Neuroscience PhD, University of Lethbridge, 2005

Michelle Montague, Professor, Department of Philosophy
PhD, University of Colorado at Boulder, 2002
Raymond J. Mooney Professorship in Computer Sciences #3, Professor, Department of Computer Science
PhD, University of Illinois at Urbana-Champaign, 1987

Leonard Nathaniel Moore George W. Littlefield Professorship in American History, Executive Director, Historically Black Colleges and Universities (HBCU); Professor, Department of History
PhD, The Ohio State University Main Campus, 1998

Lisa L. Moore Archibald A. Hill Regents Professorship in American and English Literature, Professor, Department of English; Professor, Center for Women's and Gender Studies
PhD, Cornell University, 1991

Robin D. Moore, Professor, Sarah and Ernest Butler School of Music; Professor, Department of African and African Diaspora Studies; Professor, John L. Warfield Center for African and African American Studies; Professor, Center for Mexican American Studies
PhD, University of Texas at Austin, 1995

Claudia I. Mora John A. and Katherine G. Jackson Decanal Chair in the Geosciences, Professor, Department of Geological Sciences; Dean, John A. and Katherine G. Jackson School of Geosciences
PhD, University of Wisconsin-Madison, 1988

Nancy A. Moran Warren J. and Viola Mae Raymer Chair, Professor, Department of Integrative Biology
PhD, University of Michigan-Ann Arbor, 1982

Hitoshi Morikawa, Associate Professor, Department of Neuroscience; Associate Professor, Waggoner Center for Alcohol and Addiction Research; Associate Professor, Department of Psychiatry
PhD, Kyoto University, 1999

Caroline V. Morley, Assistant Professor, Department of Astronomy
PhD, University of California-Santa Cruz, 2016

Douglas J. Morrice Bobbie and Coulter R. Sublett Centennial Professorship, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Management; Professor of Medical Education, Department of Medical Education
PhD, Cornell University, 1990

Philip J. Morrison Texas Atomic Energy Research Foundation Professorship, Affiliated Faculty, Oden Institute; Professor, Department of Physics
PhD, University of California-San Diego, 1979

Susan C. Morse Angus G. Wynne, Sr., Professorship in Civil Jurisprudence, Professor, School of Law
JD, Harvard University, 1996

Lorena G. Moscardelli, Research Scientist, PhD, University of Texas at Austin, 2007

Robert D. Moser W. A. "Tex" Moncrief, Jr. Chair in Computational Engineering and Sciences, Deputy Director, Oden Institute; Professor, Walker Department of Mechanical Engineering; Professor, Institute for Computational Engineering and Science
PhD, Stanford University, 1984

Robert G. Moser, LAITS Faculty Associate; Professor, Department of Government; Professor, Department of Slavic and Eurasian Studies
PhD, University of Wisconsin-Madison, 1995

Sharon Mosher, 2022 9/1-8/31/23 Professor Emeritus -Other University Affiliate; Professor Emeritus, Department of Geological Sciences; Dean Emeritus, John A. and Katherine G. Jackson School of Geosciences
PhD, University of Illinois at Urbana-Champaign, 1978

Dana Hadar Moshkovitz aaronson, Associate Professor, Department of Computer Science
PhD, Weizmann Institute of Science, 2008

Andreas I. Mueller, Associate Professor, Department of Economics
PhD, Stockholm University, 2011

Elizabeth Mueller, Associate Professor, School of Architecture; Associate Professor, School of Social Work
PhD, University of California-Berkeley, 1992

Peter Mueller, Affiliated Faculty, Oden Institute; Professor, Department of Mathematics; Professor, Department of Information, Risk, and Operations Management; Professor, Department of Statistics and Data Sciences
PhD, Purdue University Main Campus, 1991

Ulrich G. Mueller William Morton Wheeler-Lost Pines Professorship, Professor, Department of Integrative Biology
PhD, Cornell University, 1993

Katherine M. Muenks, Assistant Professor, Department of Educational Psychology
PhD, University of Maryland College Park, 2016

Somshuvra Mukhopadhayay Alan W. Hamm Centennial Fellowship in Pharmacy, Associate Professor, College of Pharmacy
PhD, New York Medical College, 2008

Stephennie Mulder, Associate Professor, Department of Art and Art History; Associate Professor, Center for Middle Eastern Studies
PhD, University of Pennsylvania, 2008

Linda S. Mullenix Morris and Rita Atlas Chair in Advocacy, Professor, School of Law
PhD, Columbia University (New York), 1977

Charles B. Mullins Richard B. Curran Centennial Chair in Engineering, Professor, McKetta Department of Chemical Engineering; Professor, Department of Chemistry
PhD, California Institute of Technology, 1990

Santiago Munoz Arbelaez, Assistant Professor, Department of History
PhD, Yale University, 2018

Elizabeth Munoz, Assistant Professor, Department of Human Development and Family Sciences
PhD, Pennsylvania State University Park, 2015

Julian B. Munoz, Assistant Professor, Department of Astronomy
PhD, Johns Hopkins University, 2017

Gretchen Murphy Sue Goldston LeBermann Endowed Professorship in Liberal Arts, Professor, Department of English; Professor, Center for Women's and Gender Studies
PhD, University of Washington - Seattle, 1999

Laura E. Murphy, Clinical Instructor, School of Nursing
MSN, University of Texas at Austin, 2009

Richard Murphy, Assistant Professor, Department of Economics
PhD, University College London, 2014

Jared Scott Murray, Assistant Professor, Department of Statistics and Data Sciences; Assistant Professor, Department of Information, Risk, and Operations Management
PhD, Duke University, 2013

Paula C Murray Fiona D. Stokes Centennial Teaching Fellowship in Business, Professor, Department of Business, Government and Society JD, University of Texas at Austin, 1980

Dhiraj Murthy William Randolph Hearst Faculty Fellowship Endowment, Professor, School of Journalism and Media; Professor, Department of Sociology PhD, University of Cambridge, 2008

Felicity Muth, Assistant Professor, Department of Integrative Biology PhD, University of St Andrews, 2013

Kumar Muthuraman H. Timothy (Tim) Harkins Centennial Professorship in Business, Faculty Director of the Center for Research and Analytics; Professor, Department of Information, Risk, and Operations Management PhD, Stanford University, 2003

Roger E Myers, Professor, Sarah and Ernest Butler School of Music MM, University of Southern California, 2001

Robert W Newberry, Assistant Professor, Department of Chemistry PhD, University of Wisconsin-Madison, 2016

Scott P Myers, Professor, Department of Linguistics PhD, University of Massachusetts Amherst, 1987

Martha G Newman, Professor, Department of History; Professor, Department of Religious Studies PhD, Stanford University, 1988

Scott David Niekum, Associate Professor, Department of Computer Science PhD, University of Massachusetts Amherst, 2013

Joy M Neuberg, Professor Emeritus, Department of History PhD, Stanford University, 1985

David Neumayer, Associate Professor, Department of Sociology, College of Liberal Arts and Sciences PhD, University of California-Berkeley, 2013

Kristin Nielsen, Assistant Professor, Department of Psychology; Associate Professor, Department of Neuroscience PhD, University of California-Los Angeles, 2008

Joseph Neuman, Assistant Professor, Department of Mathematics PhD, University of California-Berkeley, 2013

Maria-Aikaterini Nikolinakou, Associate Professor, Department of Computer Science PhD, University of North Texas, 2016

Evdokia Nikolova, Program Director (Academic), Other University Affiliate; Professor, Chandra Department of Electrical and Computer Engineering PhD, Massachusetts Institute of Technology, 2009

Hiroshi Nishiyama, Associate Professor, Chandra Department of Electrical and Computer Engineering PhD, University of North Carolina at Chapel Hill, 2002

Mila Nisimovski, Clinical Associate Professor, School of Information Science; Assistant Professor of Practice, School of Information PhD, Duke University, 2013

Michael Evan Nava, Associate Professor, Department of Integrative Biology; Assistant Professor, Department of Statistics and Data Sciences PhD, University of Cambridge, 2017

Kumar V Narasimhan, Associate Professor, Department of Computer Science; Assistant Professor, Department of Computer Science and Engineering PhD, Massachusetts Institute of Technology, 2004

Stephanie G Nazario, Associate Professor, Department of Psychology PhD, University of California-Davis, 2013

Noomi Naveh, Associate Professor, Department of Psychology; Associate Professor, Department of Neuroscience PhD, University of California-Berkeley, 1997

José Navas, Associate Professor, Department of Computer Science; Associate Professor, Department of Computer Science and Engineering PhD, University of California-Los Angeles, 1985

Anton Nesic, Associate Professor, Department of Business Administration PhD, University of Texas at Austin, 2008

Hiroshi Nishiyama, Associate Professor, Chandra Department of Electrical and Computer Engineering PhD, University of North Carolina at Chapel Hill, 2002

Mila Nisimovski, Clinical Associate Professor, School of Information Science; Assistant Professor of Practice, School of Information PhD, Duke University, 2013

Michael Evan Nava, Associate Professor, Department of Integrative Biology; Assistant Professor, Department of Statistics and Data Sciences PhD, University of Cambridge, 2017

Kumar V Narasimhan, Associate Professor, Department of Computer Science; Assistant Professor, Department of Computer Science and Engineering PhD, Massachusetts Institute of Technology, 2004

Stephanie G Nazario, Associate Professor, Department of Psychology PhD, University of California-Davis, 2013

Noomi Naveh, Associate Professor, Department of Psychology; Associate Professor, Department of Neuroscience PhD, University of California-Berkeley, 1997

José Navas, Associate Professor, Department of Computer Science; Associate Professor, Department of Computer Science and Engineering PhD, University of California-Los Angeles, 1985

Anton Nesic, Associate Professor, Department of Business Administration PhD, University of Texas at Austin, 2008

Hiroshi Nishiyama, Associate Professor, Chandra Department of Electrical and Computer Engineering PhD, University of North Carolina at Chapel Hill, 2002

Mila Nisimovski, Clinical Associate Professor, School of Information Science; Assistant Professor of Practice, School of Information PhD, Duke University, 2013

Michael Evan Nava, Associate Professor, Department of Integrative Biology; Assistant Professor, Department of Statistics and Data Sciences PhD, University of Cambridge, 2017

Kumar V Narasimhan, Associate Professor, Department of Computer Science; Assistant Professor, Department of Computer Science and Engineering PhD, Massachusetts Institute of Technology, 2004

Stephanie G Nazario, Associate Professor, Department of Psychology PhD, University of California-Davis, 2013

Noomi Naveh, Associate Professor, Department of Psychology; Associate Professor, Department of Neuroscience PhD, University of California-Berkeley, 1997

José Navas, Associate Professor, Department of Computer Science; Associate Professor, Department of Computer Science and Engineering PhD, University of California-Los Angeles, 1985

Anton Nesic, Associate Professor, Department of Business Administration PhD, University of Texas at Austin, 2008

Hiroshi Nishiyama, Associate Professor, Chandra Department of Electrical and Computer Engineering PhD, University of North Carolina at Chapel Hill, 2002
MS, University of Texas at Austin, 2009

Bryan E Norwood, Assistant Professor, School of Architecture
PhD, Harvard University, 2018

Gordon S Novak Jr, Professor, Department of Computer Science
PhD, University of Texas at Austin, 1976

Atila Novoselac Marion E. Forsman Centennial Professorship in Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Pennsylvania State University Main Campus, 2004

Avigail Noy, Assistant Professor, Department of Middle Eastern Studies
PhD, Harvard University, 2016

Liesl Nydegger, Program Manager (Part-Time),
PhD, Claremont Graduate University, 2015

Jessica J O’Brien, Assistant Professor of Practice, Department of Educational Psychology
PhD, University of Iowa, 2015

William J O’Brien C. T. Wells Professorship in Project Management, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Stanford University, 1998

Aaron O’Connell, Director of Research; Associate Professor, Department of History
PhD, Yale University, 2009

Jessica L O’Connell, Assistant Professor, Department of Marine Science
PhD, Oklahoma State University Main Campus, 2012

James T O’Connor, Faculty Associate-ENGR; Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Texas at Austin, 1983

Angela Ximena Ocampo, Assistant Professor, Department of Mexican American and Latino/a Studies
PhD, University of California-Los Angeles, 2018

Howard Ochman Joseph J. & Jeanne M. Lagowski Regents Professorship in Molecular Bioscience, Professor, Department of Molecular Biosciences
PhD, University of Rochester, 1984

J T Oden Cockrell Family Regents Chair in Engineering #2, W. A. "Tex" Moncrief, Jr. Distinguished Faculty Fellowship in Computational Sciences, Core Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Oklahoma State University Main Campus, 1962

Michael Oden, Associate Professor, School of Architecture
PhD, New Sch for Soc Research, 1992

Clay D Odom, Associate Professor, School of Architecture
MS, Columbia University (New York), 2003

Gerald S Oettinger, Associate Professor, Department of Economics
PhD, Massachusetts Institute of Technology, 1993

Stella S Offner, Affiliated Faculty, Oden Institute; Associate Professor, Department of Astronomy
PhD, University of California-Berkeley, 2009

Jeeyun Oh, Associate Professor, Stan Richards School of Advertising and Public Relations
PhD, Pennsylvania State University Park, 2013

Youjeong Oh, Texas Global, GPT East & Southeast Asia Workday Speaker; Associate Professor, Department of Asian Studies; Associate Professor, Center for Asian American Studies; Associate Professor, Department of Geography and the Environment
PhD, University of California-Berkeley, 2013

Chelsi West Ohueri, Assistant Professor, Department of Slavic and Eurasian Studies; Assistant Professor of Population Health, Department of Population Health; Assistant Professor, Department of African and African Diaspora Studies; Assistant Professor, Department of Anthropology
PhD, University of Texas at Austin, 2016

Moyosore Benjamin Okediji, Professor, Department of Art and Art History; Professor, Department of African and African Diaspora Studies; Professor, John L Warfield Center for African and African American Studies
PhD, University of Wisconsin-Madison, 1995

Yuko M Okumura, Research Scientist,
PhD, University of Hawai‘i at Manoa, 2005

Ryosuke Okuno Pioneer Corporation Faculty Fellowship on Petroleum Engineering, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Texas at Austin, 2009

Jeanette Okur, Assistant Professor of Instruction, Department of Middle Eastern Studies
PhD, Ankara University, 2007

Cornel Olariu, Research Scientist; Lecturer, Department of Geological Sciences
PhD, University of Texas at Dallas, 2005

Ruben D Olivarez, Professor Emeritus, Department of Educational Leadership and Policy
PhD, University of Texas at Austin, 1976

Joseph P Olivelle, Professor Emeritus, Department of Asian Studies
PhD, University of Pennsylvania, 1974

Guido Olivieri, Professor of Instruction, Sarah and Ernest Butler School of Music
PhD, University of California-Santa Barbara, 2005

Sheila M Olmstead, Professor, Lyndon B Johnson School of Public Affairs
PhD, Harvard University, 2002

Todd A Olmstead, Faculty Associate; Associate Professor, Lyndon B Johnson School of Public Affairs
PhD, Harvard University, 2000

Jon E Olson Lois and Richard Folger Leadership Chair in Petroleum and Geosystems Engineering, Cockrell Family Chair in Engineering #17; Professor, Hildebrand Department of Petroleum and Geosystems Engineering; Professor, Bureau of Economic Geology
PhD, Stanford University, 1991

Lisa Olstein Ellen Clayton Garwood Centennial Professorship in Creative Writing #2, Professor, Department of English
MFA, University of Massachusetts Amherst, 2003

Robert A Olwell, Associate Professor, Department of History
PhD, Johns Hopkins University, 1991
Desmond Ong, Assistant Professor, Department of Psychology
PhD, Stanford University, 2017

Peter Onyisi, Associate Professor, Department of Physics
PhD, Cornell University, 2008

Robert M Oppenheim POSCO Chair in Korean Studies, Professor,
Department of Asian Studies; Professor, Department of Anthropology; Professor, Center for Asian American Studies
PhD, University of Chicago, 2003

Raymond Lee Orbach, Professor, Walker Department of Mechanical Engineering
PhD, University of California-Berkeley, 1960

Andrey Ordin, Assistant Professor, Department of Finance
MS, New Economic School (Moscow), 2014

Michael E Orshansky John E. Kasch Endowed Faculty Fellowship in Engineering, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Berkeley, 2001

Caitlin A Orsini, Assistant Professor, Department of Psychology; Assistant Professor, Department of Neurology; Assistant Professor of Psychiatry, Department of Psychiatry
PhD, University of Michigan-Ann Arbor, 2012

Abena Dove agyepoma Osseo-asare, Professor, Department of Population Health; Professor, Department of History
PhD, Harvard University, 2005

Annette M Ostling, Core Faculty, Oden Institute; Associate Professor, Department of Integrative Biology
PhD, University of California-Berkeley, 2004

Francie Ostrower, Professor, Lyndon B Johnson School of Public Affairs; Professor, College of Fine Arts
PhD, Yale University, 1991

M Ovando Villanueva, Professor Emeritus, Department of Educational Leadership and Policy
PhD, University of Utah, 1981

Tolga Ozyurtcu, Associate Professor of Instruction, Department of Kinesiology and Health Education
PhD, University of Texas at Austin, 2014

Sonia Paban, Associate Professor, Department of Physics
PhD, University of Barcelona, 1988

Stephen C Page, Associate Professor, Sarah and Ernest Butler School of Music
DMA, University of Iowa, 2011

Zachariah Allen Page, Assistant Professor, Department of Chemistry
PhD, University of Massachusetts Amherst, 2015

Marcelo Paixao Andrew W. Mellon Foundation Faculty Fellowships in Latin American Studies, Associate Professor, Department of African and African Diaspora Studies; Associate Professor, John L Warfield Center for African and African American Studies
PhD, Instituto Universitario de Pesquisas do Rio De Janeiro, 2005

Thomas G Palaima Robert M. Armstrong Centennial Professorship, Professor, Department of Classics
PhD, University of Wisconsin-Madison, 1980

Nik Palomares William Randolph Hearst Faculty Fellowship Endowment, Professor, Department of Communication Studies
PhD, University of California-Santa Barbara, 2005

Zhigang Pan Silicon Laboratories Endowed Chair in Electrical Engineering, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Los Angeles, 2000

Nathaniel Aaron Pancost, Assistant Professor, Department of Finance
PhD, University of Chicago, 2016

Nitya Pandalai-nayar, Assistant Professor, Department of Economics
PhD, University of Michigan-Ann Arbor, 2016

Jose L Panero, Associate Director (Academic); Associate Professor, Department of Integrative Biology
PhD, University of Tennessee at Knoxville, 1990

Lorraine S Pangle, Professor, Department of Government; Director, Thomas Jefferson Center for the Study of Core Texts and Ideas, TH Jefferson Ctr for Core Texts and Ideas
PhD, University of Chicago, 1999

Thomas L Pangle Joe R. Long Endowed Chair in Democratic Studies, Professor, Department of Government; Director, Thomas Jefferson Center for the Study of Core Texts and Ideas, TH Jefferson Ctr for Core Texts and Ideas
PhD, University of Chicago, 1972

Athanasio Papalexandrou The Walter and Gina Ducloix Fine Arts Faculty Fellowship Endowment, Jeanette and Ferris Nassour Faculty Fellowship in Art History, Professor, Department of Art and Art History; Professor, Center for Middle Eastern Studies
PhD, Princeton University, 1998

Sapun Harshad Parekh, Assistant Professor, Department of Biomedical Engineering
PhD, University of California-Berkeley, 2008

Michael Parent, CMHC Faculty Associate / Clinical Supervisor; Associate Professor, Department of Educational Psychology; Associate Professor, Center for Women's and Gender Studies
PhD, University of Florida, 2013

Chanhyun Park, Assistant Professor, College of Pharmacy
PhD, University of Texas at Austin, 2016

Andrew A Parker, Associate Professor, Sarah and Ernest Butler School of Music
DMA, University of Michigan-Ann Arbor, 2009

Deborah Parra-Medina Chair in Mexican American Studies, Professor, Department of Mexican American and Latino/a Studies; Professor, Department of Kinesiology and Health Education; Professor, Department of Population Health; Director Research Unit, Latino Research Initiative
PhD, University of California-San Diego, 1998

Robert Parrino Lamar Savings Centennial Professorship in Finance, Professor, Department of Finance
PhD, University of Rochester, 1992

Keryn Elizabeth Pasch, Associate Professor, Department of Kinesiology and Health Education; Director, Texas Center for Equity Promotion, Texas Center for Equity Promotion
PhD, University of Minnesota-Twin Cities, 2007

Paola Passalacqua Leland Barclay Fellowship in Engineering, Faculty Associate; Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Minnesota-Twin Cities, 2009

Na’ama Pat-El, Professor, Department of Middle Eastern Studies; Professor, Center for Middle Eastern Studies; Professor, Department of Linguistics
PhD, Harvard University, 2008

Robert G Paterson, Associate Professor, School of Architecture
PhD, University of North Carolina at Chapel Hill, 1993

Shefali V Patil The William R. Spriegel Centennial Fellowship, Director of the Center for Leadership and Ethics; Associate Professor, Department of Management
PhD, University of Pennsylvania, 2014

Stefania Patrizi, Assistant Professor, Department of Mathematics
PhD, Universita degli Studi di Roma La Sapienza, 2010

Yale N Patt Ernest Cockrell, Jr. Centennial Chair in Engineering #1, Professor, Chandra Department of Electrical and Computer Engineering; Professor, Department of Computer Science
PhD, Stanford University, 1966

Tanya T Paull Burl G. and Lorene L. Rogers Chair in Human Health, Professor, Department of Molecular Biosciences; Professor of Oncology, Department of Oncology
PhD, University of California-Los Angeles, 1996

Amy Pavel Computer Sciences Endowed Faculty Fellowship No. 1, Assistant Professor, Department of Computer Science
PhD, University of California-Berkeley, 2019

Natasa Pavlovic Frank E. Gerth III Faculty Fellowships, Professor, Department of Mathematics; Associate Dean, College of Natural Sciences
PhD, University of Illinois at Chicago, 2002

David Paydarfar, Director of the Mulva Clinic for the Neurosciences; Professor, Department of Neurology
MD, University of North Carolina at Chapel Hill, 1985

Katherine A Payne, Associate Professor, Department of Curriculum and Instruction
MA, Adelphi University, 2004

Samuel Payne Pennzoil Company Regents Professorship in Mathematics, Frank E. Gerth III Faculty Fellowships, Professor, Department of Mathematics
PhD, University of Michigan-Ann Arbor, 2006

Shelley M Payne Marie Betzner Morrow Centennial Chair, Professor, Department of Molecular Biosciences; Professor of Medical Education, Department of Medical Education; Director Research Unit, Center for Infectious Disease, Center for Infectious Disease
PhD, Texas Health Science Center Dallas, U, 1977

John A Pearce, Professor Emeritus, Chandra Department of Electrical and Computer Engineering
PhD, Purdue University Main Campus, 1980

Ami Pedahzur Ralph W. Yarborough Centennial Professorship of Liberal Arts, Professor, Department of Government; Professor, Center for Middle Eastern Studies; Professor, Department of Middle Eastern Studies
PhD, University of Haifa, 1999

Steven Wayne Pedigo Harry H. Ransom Centennial Fellowship, Director (0382); Professor of Practice, Lyndon B Johnson School of Public Affairs
MS, Carnegie Mellon University, 2005

Suzanne M Pence, Associate Professor, Sarah and Ernest Butler School of Music
DMA, University of Missouri-Kansas City, 1992

Monica Penick, Associate Professor, School of Design and Creative Technologies
PhD, University of Texas at Austin, 2007

James W Pennebaker Liberal Arts Foundation Centennial Professorship, Distinguished Teaching Professor Emeritus, Department of Psychology
PhD, University of Texas at Austin, 1977

Nicholas A Peppas Cockrell Family Regents Chair in Engineering #6, Professor, McKetta Department of Chemical Engineering; Professor, Department of Biomedical Engineering; Professor, College of Pharmacy; Professor, Department of Surgery and Perioperative Care; Professor, Department of Pediatrics
ScD, Massachusetts Institute of Technology, 1973

Jorge Perez Perez Peter T. Flawn Centennial Professorship in Spanish Language and Literature, Professor, Department of Spanish and Portuguese
PhD, University of California-Santa Barbara, 2003

Domino R Perez, Associate Professor, Department of English; Associate Professor, Center for Mexican American Studies
PhD, University of Nebraska at Lincoln, 1998

Jose Manuel Perez, Assistant Professor of Practice, School of Design and Creative Technologies
MFA, University of Texas at Austin, 2015

Paula J Perlman Centennial Professorship in Classical Archaeology, Professor, Department of Classics
PhD, University of California-Berkeley, 1983

Robert J Peroni The Fondren Foundation Centennial Chair for Faculty Excellence, Professor, School of Law
JD, Northwestern University, 1976

H W Perry Jr, Faculty Associate; Associate Professor, School of Law; Associate Professor, Department of Government
PhD, University of Michigan-Ann Arbor, 1987

Nicole Perry, Assistant Professor, Department of Human Development and Family Sciences
PhD, University of North Carolina at Greensboro, 2013

Geeta Persad, Program Director (Academic); Assistant Professor, Department of Geological Sciences; Assistant Professor, Institute for Geophysics
PhD, Princeton University, 2016

Timothy Perutz, Associate Professor, Department of Mathematics
PhD, University of London, 2005

Bogdan P Perzynski, Professor, Department of Art and Art History
MFA, Poznan Academy of Fine Arts, 1979

Franco Pestilli, Associate Professor, Department of Psychology
PhD, New York University, 2008

Simon Peter, Adjunct Assistant Professor, Department of Computer Science
PhD, Swiss Federal Institute of Technology, 2012

Marina Louise Peterson, Professor, Department of Anthropology
PhD, University of Chicago, 2005
Robert A. Peterson, John T. Stuart III Centennial Chair in Business, Affiliated Faculty, Oden Institute; Professor, Department of Marketing
PhD, University of Minnesota-Twin Cities, 1970

Ethan H. Pew, Program Director for the Master’s of Science in Marketing Program; Clinical Assistant Professor, Department of Marketing
PhD, University of Colorado at Boulder, 2010

Steven M. Phelps, Professor, Department of Integrative Biology
PhD, University of Texas at Austin, 1999

Carolyn Phillips, Assistant Professor, School of Nursing
PhD, University of Texas at Austin, 2019

Stephen H. Phillips, Professor Emeritus, Department of Philosophy
PhD, Harvard University, 1982

Tasha S. Phlipot, Professor, Department of Government; Professor, John L. Warfield Center for African and African American Studies
PhD, University of Michigan-Ann Arbor, 2003

Herve Picherit, Associate Professor, Department of French and Italian
PhD, Stanford University, 2008

Colette Pierce Burnette, Professor of Practice, Department of Educational Leadership and Policy
EdD, University of Pennsylvania, 2015

Jonathan T. Pierce, Associate Professor, Department of Neuroscience; Associate Professor, Waggoner Center for Alcohol and Addiction Research
PhD, University of Oregon, 2000

Marc Pierce, Associate Professor, Department of Germanic Studies
PhD, University of Michigan-Ann Arbor, 2002

Suzanne A. Pierce, Research Scientist,
PhD, University of Texas at Austin, 2006

Miguel Pinedo Joe R. & Teresa Lozano Long Endowed Faculty Fellows Fund, LRI Faculty Associate; Assistant Professor, Center for Mexican American Studies; Assistant Professor, Department of Kinesiology and Health Education
PhD, University of California-San Diego, 2015

Keshav K Pingali W. A. "Tex" Moncrief, Jr. Chair in Distributed and Grid Computing, Core Faculty, Oden Institute; Professor, Department of Computer Science; Professor, Institute for Computational Engineering and Science
ScD, Massachusetts Institute of Technology, 1986

Samantha Nicole Pinto, Director, Humanities Institute; Professor, Department of English; Professor, Department of African and African Diaspora Studies; Professor, Center for Women’s and Gender Studies; Professor, John L. Warfield Center for African and African American Studies
PhD, University of California-Los Angeles, 2007

C. Greg Plaxton, Professor, Department of Computer Science
PhD, Stanford University, 1989

Martin Poenie, Associate Professor, Department of Molecular Biosciences
PhD, Stanford University, 1986

Paula M. Poindexter, Professor, School of Journalism and Media
PhD, Syracuse University Main Campus, 1980

Francisco Polidoro Jr College of Business Administration Foundation
Advisory Council Centennial Fellowship #2, Professor, Department of Management
PhD, University of Michigan-Ann Arbor, 2006

Gabriela Polit, Professor, Department of Spanish and Portuguese
PhD, New York University, 2002

George D. Pollak, Professor Emeritus, Department of Neuroscience
PhD, University of Maryland College Park, 1970

Samuel Poloyac James T. Doluisio Regents Chair in Pharmacy, The Hoescht-Roussel Centennial Endowed Professorship in Pharmacy, Dean, College of Pharmacy
PhD, University of Kentucky, 1999

Maria Ponomarenko, Assistant Professor, School of Law
JD, New York University, 2014

Gary A. Pope, Professor Emeritus, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, Rice University, 1972

James Paul Pope, Faculty Associate; Professor of Practice, Lyndon B Johnson School of Public Affairs
MA, Naval Postgraduate School, 1982

Emily Porter, Affiliated Faculty, Oden Institute; Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, McGill University, 2015

Tyrone Porter Cockrell Family Chair for Departmental Leadership #1, Donald J. Douglass Centennial Professorship in Engineering, Professor, Department of Biomedical Engineering
PhD, University of Washington - Seattle, 2003

Kathrynn Pounds, Associate Professor, Stan Richards School of Advertising and Public Relations
PhD, Louisiana State University and Agricultural and Mechanical College, 2010

Lucas A. Powe Jr Anne Green Regents Chair, Professor, School of Law; Professor, Department of Government
JD, University of Washington - Seattle, 1968

John T. Powers, Assistant Professor of Medical Education, Department of Medical Education; Assistant Professor of Oncology, Department of Oncology; Assistant Professor, College of Pharmacy; Assistant Professor, Department of Pediatrics
PhD, University of Texas at Austin, 2006

Aaron Thomas Pratt, Lecturer, Department of English; Carl and Lily Pforzheimer Curator of Early Books and Manuscripts,
PhD, Yale University, 2016

Robert A. Prentice, Ed and Molly Smith Centennial Professorship in Business Law, Professor, Department of Business, Government and Society
JD, Washburn University, 1975

William H. Press, Leslie Surginer Endowed Professorship, Core Faculty, Oden Institute; Professor, Department of Computer Science; Professor, Department of Integrative Biology
PhD, California Institute of Technology, 1972

Alison R. Preston, Dr. A. Wilson Nolle and Sir Raghunath P. Mahendroo Professorship in Neuroscience, Professor, Department of Psychology; Professor, Department of Neuroscience; Professor, Department of...
Psychiatry, Vice Provost, Office of the Executive Vice President and Provost  
PhD, Stanford University, 2004

Eric Price, Associate Professor, Department of Computer Science  
PhD, Massachusetts Institute of Technology, 2013

Nicholas J Priebe, Professor, Department of Neuroscience  
PhD, University of California-San Francisco, 2001

Masa Prodanovic Frank W. Jessen Professorship in Petroleum Engineering, Professor, Hildebrand Department of Petroleum and Geosystems Engineering  
PhD, New York University, 2005

Ian N Proops, Professor, Department of Philosophy  
PhD, Harvard University, 1998

Jorge A Prozzi Satish Family Endowed Professorship, Professor, Department of Civil, Architectural, and Environmental Engineering  
PhD, University of California-Berkeley, 2004

Mitchell W Pryor, Other University Affiliate; Lecturer, Walker Department of Mechanical Engineering  
PhD, University of Texas at Austin, 2002

Michael Pyrcz, Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering; Associate Professor, Department of Geological Sciences  
PhD, University of Alberta, 2004

Hong Qiao Lorene Morrow Kelley Endowed Faculty Fellowship Fund, Associate Professor, Department of Molecular Biosciences  
PhD, Chinese Academy of Sciences, 2004

Lili Qiu, Professor, Department of Computer Science  
PhD, Cornell University, 2001

Chad Chad Quarles, Other University Affiliate,  

Emily Que, Associate Professor, Department of Chemistry  
PhD, University of California-Berkeley, 2009

Laura Elena Quinones Camacho, Assistant Professor, Department of Educational Psychology; Assistant Professor, Department of Psychology  
PhD, University of California-Riverside, 2018

David G Quinto-Pozos, Professor, Department of Speech, Language, and Hearing Sciences; Professor, Department of Linguistics  
PhD, University of Texas at Austin, 2002

David M Rabban Dahr Jamail, Randall Hage Jamail, and Robert Lee Jamail Regents Chair in Law, Faculty Associate; Professor, School of Law  

JD, Stanford University, 1974

Adam Thomas Rabinowitz, Faculty Associate; Associate Professor, Department of Classics  
PhD, University of Michigan-Ann Arbor, 2004

Megan Margaret Raby, UTeach Faculty Associate; Associate Professor, Department of History  
PhD, University of Wisconsin-Madison, 2012

Kavita Radhakrishnan Luci Baines Johnson Fellowship in Nursing, Associate Professor, School of Nursing  
PhD, University of Massachusetts Amherst, 2011

Charles L Radin, Professor, Department of Mathematics  
PhD, University of Rochester, 1971

Maksym Radziwill University Chair in Mathematics, Frank E. Gerth III Faculty Fellowships, Professor, Department of Mathematics  
PhD, Stanford University, 2013

Guy P Raffa, Professor Emeritus, Department of French and Italian  
PhD, Indiana University Bloomington, 1991

Rajagopal Raghunathan Zale Corporation Centennial Professorship in Business, Professor, Department of Marketing; Professor, Program in the Human Dimensions of Organizations  
PhD, New York University, 2000

Varun Rai Walt and Elspeth Rostow Chair in National Security, Professor, Lyndon B Johnson School of Public Affairs; Professor, Walker Department of Mechanical Engineering  
PhD, Stanford University, 2008

Esther L Raizen, Associate Professor, Department of Middle Eastern Studies; Associate Professor, Center for Middle Eastern Studies  
PhD, University of Texas at Austin, 1987

Mark G Raizen Sid W. Richardson Foundation Regents Chair in Physics #2, Professor, Department of Physics; Professor, Department of Pediatrics; Professor, Department of Diagnostic Medicine  
PhD, University of Texas at Austin, 1989

Laxminarayan L Raja Robert L. Parker, Sr. Centennial Professorship in Engineering, Affiliated Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics  
PhD, University of Texas at Austin, 1996

Ashwin Rajadesingan, Assistant Professor, Department of Communication Studies  
MS, Arizona State University Main, 2014

Dalpat Singh Rajpurohit, Assistant Professor, Department of Asian Studies  
MPhil, Jawaharlal Nehru University, 2008

Vijaya Ramachandran William B. Blakemore II Regents Professorship in Computer Sciences, Professor, Department of Computer Science  
PhD, Princeton University, 1983

Carlos E Ramos Andrew W. Mellon Foundation Faculty Fellowships in Latin American Studies, Associate Professor, Department of Geography and the Environment; Associate Professor, Teresa Lozano Long Institute of Latin American Studies; Associate Professor, Department of History  
PhD, Colorado State University, 2004

Ramkumar Ranganathan College of Business Administration Foundation Advisory Council Centennial Fellowship #7, Associate Professor, Department of Management  
PhD, University of Pennsylvania, 2012

Raghunath S Rao Ambassador Edward Clark Centennial Endowed Fellowship in Business, Professor, Department of Marketing  
PhD, University of Minnesota-Twin Cities, 2007

Ramesh K Rao The Margaret and Eugene McDermott Centennial Professorship of Banking and Finance, Director of Wealth Management Program; Professor, Department of Finance  
DBA, Indiana University Bloomington, 1978

Karen L Rascati Stewart Turley/Eckerd Corporation Centennial Endowed Professorship in Pharmacy, Professor, College of Pharmacy  
PhD, University of Florida, 1986
Samuel David Raskin, Assistant Professor, Department of Mathematics
PhD, Harvard University, 2014

Susan W Rather Meredith and Cornelia Long Chair in Art and Art History, Professor, Department of Art and Art History
PhD, University of Delaware, 1986

Ellen M Rathje Janet S. Cockrell Centennial Chair in Engineering, Research Affiliate - Sr Research Fellow; Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of California-Berkeley, 1997

Manuel Karl Rausch, Affiliated Faculty, Oden Institute; Assistant Professor, Department of Aerospace Engineering and Engineering Mechanics; Assistant Professor, Department of Biomedical Engineering
PhD, Stanford University, 2013

D Theodore Rave, Professor, School of Law
JD, New York University, 2006

Krishnaswa Ravi-Chandar M. C. (Bud) and Mary Beth Baird Endowed Chair, Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, California Institute of Technology, 1982

Arvind P Ravikumar, Research Associate Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, Princeton University, 2015

Mark Ravina Mitsubishi Heavy Industries Chair in Japanese Studies, Professor, Department of History
PhD, Stanford University, 1991

Soncia Reagins-Lilly, Professor of Practice, Department of Educational Leadership and Policy; Vice President for Student Affairs and Dean of Students,
EdD, University of Southern California, 1999

Wayne A Rebhorn Jr, Professor Emeritus, Department of English
PhD, Yale University, 1968

Richard J Reddick, Faculty Associate-KUT; Professor, Department of Educational Leadership and Policy; Professor, Department of African and African Diaspora Studies; Professor, John L Warfield Center for African and African American Studies; Senior Vice Provost for Curriculum & Enrollment and Dean of Undergraduate Study, Office of the Executive Vice President and Provost
EdD, Harvard University, 2007

Lorinc Redei, Associate Professor of Instruction, Lyndon B Johnson School of Public Affairs
PhD, Central European University, 2013

Gregory Paul Reece, Other University Affiliate,

Cory A Reed, Associate Professor, Department of Spanish and Portuguese
PhD, Princeton University, 1989

Denne N Reed, Associate Professor, Department of Anthropology
PhD, State University of New York at Stony Brook, 2003

Ashante M Reese, Faculty Associate; Assistant Professor, Department of African and African Diaspora Studies; Assistant Professor, Department of Anthropology
PhD, American University (Washington DC), 2015

Stephen D Reese Jesse H. Jones Professorship in Journalism, Professor, School of Journalism and Media
PhD, University of Wisconsin-Madison, 1982

Roger William Reeves, Associate Professor, Department of English; Associate Professor, John L Warfield Center for African and African American Studies
PhD, University of Texas at Austin, 2012

Leonard F Register J. H. Herring Centennial Professorship in Engineering, Professor, Chandra Department of Electrical and Computer Engineering
PhD, North Carolina State University, 1990

Linda E Reichl, Professor, Department of Physics
PhD, University of Denver, 1969

Daniella M Rempe, Other University Affiliate; Assistant Professor, Department of Geological Sciences
PhD, University of California-Berkeley, 2016

Hang Ren, Assistant Professor, Department of Chemistry
PhD, University of Michigan-Ann Arbor, 2016

Pengyu Ren E. C. H. Bantel Professorship for Professional Practice, Affiliated Faculty, Oden Institute; Professor, Department of Biomedical Engineering
PhD, University of Cincinnati-Main Campus, 1999

Joaquin Resasco, Assistant Professor, McKetta Department of Chemical Engineering
PhD, University of California-Berkeley, 2017

Susanne Ressl, Assistant Professor, Department of Neuroscience
PhD, Max Planck Institute for Mathematics in the Sciences, 2009

Paul E Resta, Professor Emeritus, Department of Curriculum and Instruction
PhD, Arizona State University Main, 1968

Kelly Renee Reveles, Associate Professor, College of Pharmacy
PharmD, University of Texas at Austin, 2010

Donna L Rew Denton and Louise Cooley and Family Centennial Professorship in Nursing, Professor, School of Nursing
EdD, Northern Illinois University, 1979

Pedro Reyes, Professor, Department of Educational Leadership and Policy; Professor, Lyndon B Johnson School of Public Affairs; Professor, Center for Mexican American Studies; Professor, Department of Educational Psychology
PhD, University of Wisconsin-Madison, 1985

Sylvia Ramirez Reyna, Social Science/Humanities Research Associate V; Assistant Professor of Practice, Department of Educational Leadership and Policy
PhD, Texas A & M University, 2008

Ann M Reynolds, Associate Professor, Department of Art and Art History; Associate Professor, Center for Women's and Gender Studies
PhD, City University of New York Graduate Center, 1993

Hyekyun Rhee, Assistant Professor, McKetta Department of Chemical Engineering
PhD, University of Texas at Austin, 2002

Jacqueline R Rhodes Joan Negley Kelleher Centennial Professorship in Rhetoric and Composition, Lillian and Tom B. Rhodes Centennial Teaching Fellowship #1, Director (Academic); Professor, Department of Rhetoric and Writing
PhD, University of Southern Mississippi, 1999
Richard M Rhodes, Professor of Practice, Department of Educational Leadership and Policy
PhD, University of Texas at Austin, 1996

Kristin McKeithan Richards, Senior Research Scientist,

John H Richburg Gustavus and Louise Pfeiffer Professorship in Toxicology, Professor, College of Pharmacy; Professor, Department of Oncology
PhD, Rutgers the State University of New Jersey Camden Campus, 1993

Elizabeth Richmond-Garza, Faculty Associate; Associate Professor, Department of English; Associate Professor, Program in the Human Dimensions of Organizations
PhD, Columbia University (New York), 1992

Catherine Riegle-Crumb Elizabeth Glenadine Gibb Teaching Fellowship in Education, Professor, Department of Curriculum and Instruction; Professor, Department of Sociology
PhD, University of Chicago, 2000

Soo Young Rieh, Associate Dean, School of Information
PhD, Rutgers the State University of New Jersey Newark Campus, 2000

Thorsten Ries, Assistant Professor, Department of Germanic Studies
PhD, University of Hamburg, 2013

Andrew M Riggsby Lucy Shoe Meritt Professorship in Classics, Professor, Department of Classics; Professor, Department of Art and Art History
PhD, University of California-Berkeley, 1993

Marius A K Ring, Assistant Professor, Department of Finance
PhD, Northwestern University, 2020

Jackie L Ritchie, Professor Emeritus, Department of Physics
PhD, University of Rochester, 1984

Mary Magdalen Rivas-Rodriguez, Director of the VOCES - Oral History Project; Professor, School of Journalism and Media; Professor, Center for Mexican American Studies
PhD, University of North Carolina at Chapel Hill, 1998

Diego Rivera Foxworth Centennial Fellowship, Associate Professor, Sarah and Ernest Butler School of Music
BA, Michigan State University, East Lansing, 2011

Annabelle R Roberts, Assistant Professor, Department of Marketing
BA, Tufts University, 2016

Brian E Roberts, Executive Director, Data to Insights - Major Programs; Professor, Department of Government; Professor, Department of Economics; Professor, Department of Business, Government and Society; Interim Associate Dean for Instructional Technology and Facilities, College of Liberal Arts
PhD, Washington University in St Louis, 1986

Jason Edward Roberts, Assistant Professor of Instruction, Department of Religious Studies; Assistant Professor of Instruction, Department of Slavic and Eurasian Studies; Assistant Professor of Instruction, Department of Germanic Studies
PhD, University of Texas at Austin, 2017

Sean Thomas Roberts, Associate Professor, Department of Chemistry
PhD, Massachusetts Institute of Technology, 2009

Patricia Roberts-Miller, Professor Emeritus, Department of Rhetoric and Writing
PhD, University of California-Berkeley, 1985

Gary T Rochelle Carol and Henry Groppie Professorship in Chemical Engineering, Professor, McKetta Department of Chemical Engineering
PhD, University of California-Berkeley, 1977

Aaron B Rochlen, Clinical Professor, Department of Educational Psychology
PhD, University of Maryland College Park, 2000

Gregory J Rodin, Other University Affiliate; Professor Emeritus, Department of Aerospace Engineering and Engineering Mechanics
PhD, Massachusetts Institute of Technology, 1986

Annette M Rodriguez, Assistant Professor, Department of History
PhD, Brown University, 2016

Enrique R Rodriguez, Professor, Department of Anthropology
PhD, University of Chicago, 2002

Erin M Rodriguez, Associate Professor, Department of Psychiatry; Associate Professor, Department of Educational Psychology
PhD, Vanderbilt University, 2012

Nestor P Rodriguez, Professor, Department of Sociology; Professor, Center for Mexican American Studies
PhD, University of Texas at Austin, 1984

Victoria E Rodriguez, Other University Affiliate; Ashbel Smith Professorship, Lyndon B Johnson School of Public Affairs
PhD, University of California-Berkeley, 1987

Sergio Romero, Associate Professor, Department of Spanish and Portuguese; Associate Professor, Teresa Lozano Long Institute of Latin American Studies
PhD, University of Pennsylvania, 2006

Sonia Roncador, Associate Professor, Department of Spanish and Portuguese
PhD, New York University, 1999

Ehud I Ronn Carl Fink, Jr. Endowed Faculty Fellowship in Business Administration, Affiliated Faculty, Oden Institute; Professor, Department of Finance
PhD, Stanford University, 1983

Adrienne M Rosales Jim and Barbara Miller Endowed Faculty Fellowship in Chemical Engineering, Faculty Associate; Assistant Professor, McKetta Department of Chemical Engineering
PhD, University of California-Berkeley, 2013

Connie Rosati, Professor, Department of Philosophy; Professor, School of Law
PhD, University of Michigan-Ann Arbor, 1989

Mary Rose, Faculty Associate - HDO MA; Professor, Department of Sociology; Professor, Program in the Human Dimensions of Organizations
PhD, Duke University, 1998

Michael Rose, Director, Organized Research Unit; Associate Professor, Department of Chemistry
PhD, University of California-Santa Cruz, 2009

Arlene Rosen, Professor, Department of Anthropology
PhD, University of Chicago, 1985

Sandra Rosenbloom, Research Professor, School of Architecture
PhD, University of California-Los Angeles, 1975

Christopher J Rossbach Computer Sciences Endowed Faculty Fellowship No. 10, Associate Professor, Department of Computer Science
PhD, University of Texas at Austin, 2009

Rebecca Rossen, Faculty Associate; Associate Professor, Department of Theatre and Dance

PhD, Northwestern University, 2006

Stanley J Roux Jr, Professor, Department of Molecular Biosciences

PhD, Yale University, 1971

Loriene Roy, Professor Emeritus, School of Information

PhD, University of Illinois at Urbana-Champaign, 1987

Sharmina Rudrappa Gregory A. Koznetsky Centennial Fellowship, Professor, Department of Sociology; Professor, Center for Asian American Studies; Professor, Center for Women's and Gender Studies; Director Academic Center, South Asia Institute

PhD, University of Wisconsin-Madison, 2001

John P Rumrich Celanese Centennial Professorship, Professor, Department of English

PhD, University of Virginia, 1981

Astrid Runngaldier The Walter and Gina Ducloux Fine Arts Faculty Fellowship Endowment, Associate Professor of Instruction, Department of Art and Art History; Assistant Director for the Mesoamerica Center

PhD, Boston University, 2009

Rick Russell Lorene Morrow Kelley Endowed Faculty Fellowship Fund, Professor, Department of Molecular Biosciences

PhD, Johns Hopkins University, 1998

Ryan P Russell George and Dawn L. Coleman Centennial Fellowship in Engineering, Professor, Department of Aerospace Engineering and Engineering Mechanics

PhD, University of Texas at Austin, 2004

Stephen Russell Amy Johnson McLaughlin Administrative Chair in Human Ecology, Priscilla Pond Flawn Regents Professorship in Child Development, Elizabeth Tarpley Regents Fellowship in Textiles and Clothing, Professor, Department of Human Development and Family Sciences; Professor, Department of Sociology; Director Academic Center, School of Human Ecology; Professor of Population Health, Department of Population Health

PhD, Duke University, 1994

Cinzia Russi, Professor, Department of French and Italian

PhD, University of Washington - Seattle, 2003

Michael J Ryan Clark Hubbs Regents Professorship in Zoology, Professor, Department of Integrative Biology

PhD, Cornell University, 1982

David Michael Ryfe G. B. Dealley Regents Professorship in Journalism, Dan Rather Professorship in News and Guts, Professor, School of Journalism and Media

PhD, University of California-San Diego, 1997

Christopher G Rylander, Associate Professor, Walker Department of Mechanical Engineering; Associate Professor, Department of Biomedical Engineering; Associate Professor of Surgery and Perioperative Care, Department of Surgery and Perioperative Care

PhD, University of Texas at Austin, 2005

Henry G Rylander III Harry H. Power Professorship in Engineering, Professor, Department of Biomedical Engineering; Professor, Chandra Department of Electrical and Computer Engineering

MD, University of Texas Health Science Center at San Antonio, 1974

Marissa N Rylander Werner W. Dornberger Centennial Teaching Fellowship in Engineering, Affiliated Faculty, Oden Institute; Associate Professor, Walker Department of Mechanical Engineering

PhD, University of Texas at Austin, 2005

Maytal Saar-Tsechansky Mary John and Ralph Spence Centennial Professorship, Professor, Department of Information, Risk, and Operations Management

PhD, New York University, 2002

Donnie Johnson Sackey Lillian and Tom B. Rhodes Centennial Teaching Fellowship #2, Faculty Associate Honors Seminar; Assistant Professor, Department of Rhetoric and Writing

PhD, Michigan State University, East Lansing, 2013

Michael S Sacks W. A. "Tex" Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 1, Core Faculty, Oden Institute; Professor, Department of Biomedical Engineering; Professor, Institute for Computational Engineering and Science; Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Walker Department of Mechanical Engineering; Professor, Department of Diagnostic Medicine; Professor, Department of Medicine

PhD, University of Texas at Arlington, 1992

Lorenzo A Sadun Marian Harris Thornberry Centennial Professorship in Mathematics or Physics, Professor, Department of Mathematics

PhD, University of California-Berkeley, 1987

Victor Saenz L. D. Haskew Centennial Professorship in Public School Administration, Professor, Department of Educational Leadership and Policy; Professor, Center for Mexican American Studies; Associate Dean, Student Success, Community Engagement, and Administration, College of Education

PhD, University of California-Los Angeles, 2005

Demian M Saffer Scott Petty, Jr. Endowed Director's Chair for the University of Texas Institute for Geophysics; Professor, Department of Geological Sciences; Director, Institute for Geophysics, Institute for Geophysics

PhD, University of California-Santa Cruz, 1999

Lawrence Sager Alice Jane Drysdale Sheffield Regents Chair, Professor, School of Law

LLB, Columbia University (New York), 1966

Thomas W Sager College of Business Administration Foundation Advisory Council Centennial Fellowship #4, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Statistics and Data Sciences

PhD, University of Iowa, 1973

Aysegul Sahin Richard J. Gonzalez Regents Chair in Economic Progress Based on Freedom and Private Enterprise, Professor, Department of Economics

PhD, University of Rochester, 2002

Richard M Sainsbury, Professor, Department of Philosophy

DPhil, University of Oxford, 1970

Salvatore Salamone Phil M. Ferguson Centennial Teaching Fellowship in Civil Engineering, Associate Professor, Department of Civil, Architectural, and Environmental Engineering

PhD, Universita degli Studi di Palermo, 2007
Navid Saleh Chevron Centennial Fellowship in Engineering (No. 1), Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Carnegie Mellon University, 2007

Cesar A Salgado, Associate Professor, Department of Spanish and Portuguese
PhD, Yale University, 1993

Cynthia S Salinas Ruben E. Hinojosa Regents Professorship in Education, Professor, Department of Curriculum and Instruction; Professor, Center for Mexican American Studies; Associate Dean for Curriculum and Instruction, College of Education
PhD, University of Texas at Austin, 1999

Deborah Salvo, Associate Professor, Department of Kinesiology and Health Education
PhD, Emory University, 2013

Devleena Samanta, Assistant Professor, Department of Chemistry
PhD, Stanford University, 2017

Victor Sampson, Associate Professor, Department of Curriculum and Instruction
PhD, Arizona State University Main, 2007

Dilida Sanchez, EDP Academic Center Affiliate, Department of Educational Psychology
PhD, Columbia University (New York), 2002

Aaron G Sandel, Assistant Professor, Department of Anthropology
PhD, University of Michigan-Arbor, 2017

Amy K Sanders, Associate Professor, School of Journalism and Media; Associate Professor, School of Law
PhD, University of Florida, 2007

Sujay Sanghavi Fluor Centennial Teaching Fellowship in Engineering #2, CSOM Faculty Associate - 9/1/22 - 8/31/23; Associate Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Illinois at Urbana-Champaign, 2006

Tamara Sanikidze Sarah and Ernest Butler Professorship in Opera, Professor, Sarah and Ernest Butler School of Music
DMA, University of Maryland College Park, 2010

Jaganath Sankaran, Assistant Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Maryland College Park, 2012

Gabriel Sanoja, Assistant Professor, McKetta Department of Chemical Engineering
PhD, University of California-Berkeley, 2016

Samantha Rose Santacruz, Assistant Professor, Department of Biomedical Engineering
PhD, Rice University, 2014

Surya Santoso Engineering Foundation Centennial Teaching Fellowship in Electrical Engineering No. 2, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Texas at Austin, 1996

Elif Sarinay Cenik, Assistant Professor, Department of Molecular Biosciences
PhD, University of Massachusetts Worcester, 2012

Purnamrita Sarkar, Affiliated Faculty, Oden Institute; Associate Professor, Department of Statistics and Data Sciences

PhD, Carnegie Mellon University, 2010

Sahotra Sarkar, Professor, Department of Philosophy; Professor, Department of Integrative Biology
PhD, University of Chicago, 1989

Margo L Sawyer Jack G. Taylor Regents Professorship in Fine Arts, Professor, Department of Art and Art History
MFA, Yale University, 1982

Elizabeth D Scala Perceval Professorship in Medieval Romance, Historiography, and Culture, Professor, Department of English
PhD, Harvard University, 1994

Bridget R Scanlon, Hydrogeologist, PhD, University of Kentucky, 1985

Karl Schaffer, Professor, Department of Philosophy
PhD, New York University, 2009

Diane L Schallert, Professor Emeritus, Department of Educational Psychology
PhD, Arizona State University Main, 1975

Livia Schiavinato Eberlin, Other University Affiliate,
PhD, Purdue University Main Campus, 2012

Cathy Jean Schlund-Vials Iris Howard Regents Professorship in English Literature #2, Professor, Department of English
PhD, University of Massachusetts Amherst, 2006

Jaime Joy Schmidt KPMG Centennial Fellowship in Accounting, Associate Professor, Department of Accounting
PhD, Texas A & M University, 2009

Mary Schmitt, Associate Professor, Department of Speech, Language, and Hearing Sciences
PhD, The Ohio State University Main Campus, 2013

David M Schnyer, Professor, Department of Psychology; Professor, Department of Psychiatry
PhD, University of Arizona, 1998

Miriam Schoenfield, Associate Professor, Department of Philosophy
PhD, Massachusetts Institute of Technology, 2012

Jonathan Wyn Schofer, Associate Professor, Department of Religious Studies
PhD, University of Chicago, 2000

Roxanne Schroeder-Arce, Associate Professor, Department of Theatre and Dance; Associate Professor, Center for Mexican American Studies; Associate Dean, College of Fine Arts
MFA, University of Texas at Austin, 2000

Lauren Schudde, A&P (Part-Time); Associate Professor, Department of Sociology; Associate Professor, Department of Educational Leadership and Policy
PhD, University of Wisconsin-Madison, 2013

Ana Schwartz, Assistant Professor, Department of English
PhD, University of Pennsylvania, 2017

Seth Schwartz, Professor, Department of Kinesiology and Health Education; Professor, Department of Educational Psychology
PhD, Florida International University, 2000

William Schwartz, Professor of Medicine, Department of Neurology; Professor of Instruction, Biology Instruction Office
PhD, Stanford University, 2007
Luis Sentis
Department of Aerospace Engineering and Engineering Mechanics
PhD, Stanford University, 2007
Luis Sentis
General Dynamics Endowed Faculty Fellowship, Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, Stanford University, 2007
Michael E Shepherd
PhD, Cornell University, 2021
Subrina Shen
PhD, Harvard University, 2003
Allan W Shearer
PhD, Stanford University, 1994
Jason B Shear
PhD, University of California-Los Angeles, 1994
Daron R Shaw
PhD, Stanford University, 2005
Sanjay Shakkottai Cockrell Family Chair in Engineering #15, CS OM Faculty Associate: 1/16 - 8/31/23; Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Illinois at Urbana-Champaign, 2002
Timothy Michael Shanahan
Bill R. Payne Centennial Teaching Fellowship, Associate Professor, Department of Geological Sciences
PhD, University of Arizona, 2006
Shyam Shankar
Professor, Department of Psychology; Professor, Department of Government
PhD, Harvard University, 1978
Elizabeth W Sepper
PhD, University of Texas at Austin, 1977
Kamy Sepehnoori
Texaco Centennial Chair in Petroleum Engineering, Affiliated Faculty, Oden Institute; Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Texas at Austin, 1977
Sandro Sessarego
Associate Professor, Department of Spanish and Portuguese; Associate Professor, John L Warfield Center for African and African American Studies; Associate Professor, Department of African and African Diaspora Studies
PhD, The Ohio State University Main Campus, 2010
Jonathan L Sessler R. P. Doherty, Jr. - Welch Regents Chair in Chemistry, Professor, Department of Chemistry
PhD, Stanford University, 1982
Zhenghui Sha
Affiliated Faculty, Oden Institute; Assistant Professor, Walker Department of Mechanical Engineering
PhD, Purdue University Main Campus, 2015
Hovav Shacham
Professorship in Computer Sciences #5, Professor, Department of Computer Science
PhD, Stanford University, 2005
Liza J Shapiro
Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, Princeton University, 2010
Yevgeniy Sharlat
Assistant Professor, School of Design and Creative Technologies
PhD, University of California-Berkeley, 2009
Gian Claudia Sciara
PhD, Stanford University, 2000
PhD, University of California-Berkeley, 2007
Michael E Shepherd
PhD, University of Oregon, 2009
Eric Senning
Assistant Professor, Department of Neuroscience
PhD, Stanford University, 2007
Stephanie K Seidlits
Professor, Department of Integrative Biology
PhD, University of Michigan-Ann Arbor, 2013
Steven Seegal
Professor, Department of Slavic and Eurasian Studies
PhD, Brown University, 2006
Sonia T Seeman
Faculty Associate-Education Abroad Texas Global; Associate Professor, Sarah and Ernest Butler School of Music; Associate Professor, Center for Middle Eastern Studies; Associate Professor, Department of Middle Eastern Studies
PhD, University of California-Los Angeles, 2002
Carolyn Conner Seepersad J. Mike Walker Professorship in Mechanical Engineering, Professor, Walker Department of Mechanical Engineering; Professor, Applied Research Laboratories
PhD, Georgia Institute of Technology, 2004
Eyal Seidemann
Professor, Department of Psychology; Professor, Department of Neuroscience
PhD, Stanford University, 1998
Stephanie K Seidlits
Associate Professor, Department of Biomedical Engineering
PhD, University of Texas at Austin, 2010
Polina Sela
Associate Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Technion-Israel Institute of Technology, 2011
Mukul M Sharma
W. A. "Tex" Moncrief, Jr. Centennial Chair in Petroleum Engineering, Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Southern California, 1985
Daron R Shaw Frank C. Erwin, Jr. Centennial Chair in State Government, Professor, Department of Government
PhD, University of California-Los Angeles, 1994
Jason B Shear
Professor, Department of Chemistry
PhD, Stanford University, 1994
Allan W Shearer
Associate Professor, School of Architecture
PhD, Harvard University, 2003
Subrina Shen
Assistant Professor, Department of Management
PhD, Cornell University, 2021
PhD, Columbia University (New York), 1979

Michael Smith Jesse H. Jones Regents Professorship in Fine Arts, Faculty Associate; Professor, Department of Art and Art History
BA, Colorado College, 1974

Spencer Smith, Assistant Professor, Department of Speech, Language, and Hearing Sciences
PhD, University of Arizona, 2017

Tara A Smith, Professor, Department of Philosophy
PhD, Johns Hopkins University, 1990

Jasper A Smits, Professor, Department of Psychology; Professor, Department of Psychiatry
PhD, University of Texas at Austin, 2004

Hugh D Smyth Alcon Centennial Professorship in Pharmacy, ViaTherapeutics; Professor, College of Pharmacy
PhD, University of Otago, 2000

Nicholas Snashall-Woodhams, Assistant Professor, Department of Finance
PhD, Yale University, 2020

John W Snedden, Senior Research Scientist,

Christophe A Sneden, Professor Emeritus, Department of Astronomy
PhD, University of Texas at Austin, 1974

Rupert Snell, Professor Emeritus, Department of Asian Studies
PhD, University of London, 1984

Max Snodderly, Professor Emeritus, Department of Neuroscience
PhD, Rockefeller University, 1969

Vincent L Snyder, Professor, School of Architecture
MArch, Princeton University, 1988

Michael Sockin, Assistant Professor, Department of Finance
PhD, Princeton University, 2015

Konstantin V Sokolov, Adjunct Associate Professor, Department of Biomedical Engineering
PhD, Moscow State University, 1992

David Soloveichik Temple Foundation Endowed Faculty Fellowship No. 4, Associate Professor, Chandra Department of Electrical and Computer Engineering
PhD, California Institute of Technology, 2008

Zeynep Somer-Topcu, Associate Professor, Department of Government
PhD, University of California-Davis, 2009

Wen Song, Assistant Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, Stanford University, 2019

Xisai Song, Assistant Professor, Department of Anthropology
PhD, Cornell University, 2022

Garrett P Sonnier Zale Corporation Centennial Fellowship in Retail Merchandising, Director, CCIMS Academic Research Relationships; Associate Professor, Department of Marketing
PhD, University of California-Los Angeles, 2006

Roy Sorensen, Faculty Associate; Professor, Department of Philosophy
PhD, Michigan State University, East Lansing, 1982

Cristina Soriano, Associate Professor, Department of History
PhD, New York University, 2011

David Sosa Louann and Larry Temple Centennial Professorship in the Humanities, Professor, Department of Philosophy
PhD, Princeton University, 1996

Stacey K Sowards Mark L. Knapp Professorship in Communication Studies, LMAS Affiliated; Professor, Department of Communication Studies
PhD, University of Kansas Main Campus, 2001

Bartholomew H Sparrow, Professor, Department of Government
PhD, University of Chicago, 1991

Emily Sparvero, Program Director (Academic); Assistant Professor of Instruction, Department of Kinesiology and Health Education
PhD, University of Texas at Austin, 2008

Dean E Spears, Assistant Professor, Department of Economics
PhD, Princeton University, 2013

Lawrence W Speck The W. L. Moody, Jr. Centennial Professorship in Architecture, Professor, School of Architecture; Professor, Department of Geography and the Environment
PhD, University of North Carolina at Chapel Hill, 1985

Denise A Spellberg, Professor, Center for Middle Eastern Studies; Professor, Department of Middle Eastern Studies; Professor, Department of Religious Studies; Professor, Department of History
PhD, Columbia University (New York), 1989

William G Spelman, Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, Harvard University, 1988

David B Spence The Rex G. Baker Centennial Chair in Natural Resources Law, Professor, Department of Business, Government and Society; Professor, Department of Government; Professor, School of Law
PhD, Duke University, 1997

Kyle Thomas Spikes, Associate Professor, Department of Geological Sciences
PhD, Stanford University, 2008

James C Spindler Mark L. Hart, Jr. Endowed Chair in Corporate and Securities Law, Professor, School of Law; Professor, Department of Business, Government and Society
JD, Harvard University, 2000

Clay Spinuzzi Lillian and Tom B. Rhodes Centennial Teaching Fellowship #3, Faculty Associate; Professor, Department of Rhetoric and Writing; Professor, Department of English; Professor, School of Information; Professor, Program in the Human Dimensions of Organizations
PhD, Iowa State University, 1999

David W Springer, Professor, Lyndon B Johnson School of Public Affairs; Director (0379), PhD, Florida State University, 1997

S V Sreenivasan Cockrell Family Regents Chair in Engineering #7, Professor, Walker Department of Mechanical Engineering; Director Research Unit, Nanomanufacturing Systems for Mobile Computing and Mobile Energy Technologies
PhD, The Ohio State University Main Campus, 1994
Rajashri Srinivasan Jack R. Crosby Regents Chair in Business Administration, Professor, Department of Marketing
PhD, Pennsylvania State University Main Campus, 2000
Jeanne Casstevens Stachowiak Banks McLaurin Fellowship in Engineering, Associate Professor, Department of Biomedical Engineering
PhD, University of California-Berkeley, 2008
Mark A Stadtherr, Research Professor, McKetta Department of Chemical Engineering
PhD, University of Wisconsin-Madison, 1976
Ioannis Stamatopoulos, Associate Professor, Department of Information, Risk, and Operations Management
PhD, Northwestern University, 2016
Michael P Starbird, Faculty Associate; Professor, Department of Mathematics
PhD, University of Wisconsin-Madison, 1974
Laura T Starks George Kozmetsky Centennial Distinguished University Chair, Professor, Department of Finance
PhD, University of Texas at Austin, 1981
Devin A Stauffer, Professor, Department of Government
PhD, Boston College, 1998
Jordan M Steiker Judge Robert M. Parker Chair of Law, Professor, School of Law
JD, Harvard University, 1988
David S Stein, Professor, Department of Molecular Biosciences
PhD, Stanford University, 1989
Mary A Steinhardt, Associate Vice-President for Research; Professor, Department of Kinesiology and Health Education
EdD, University of Houston, 1985
Paul J Stekler, Professor Emeritus, Department of Radio-Television-Film; Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, Harvard University, 1983
Keri K Stephens E. D. Walker Centennial Fellowship, Distinguished Teaching Professor, Department of Communication Studies
PhD, University of Texas at Austin, 2005
Scott W Stevens, Associate Professor, Department of Molecular Biosciences
PhD, University of North Carolina at Chapel Hill, 1996
Kathleen C Stewart, Professor Emeritus, Department of Anthropology
PhD, University of Michigan-Ann Arbor, 1987
Dawn Stienecker, Assistant Professor of Instruction, Department of Art and Art History
PhD, University of North Texas, 2012
Maxwell B Stinchcombe E. C. McCarty Centennial Professorship, Professor, Department of Economics
PhD, University of California-Berkeley, 1986
Daniel Stockli, Professor, Department of Geological Sciences
PhD, Stanford University, 2000
Kenneth H Stokoe II Jennie C. and Milton T. Graves Chair in Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Michigan-Ann Arbor, 1972
Chandler W Stolp, Associate Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, Carnegie Mellon University, 1982
Audrey J Stone Joe R. & Teresa Lozano Long Endowed Faculty Fellows Fund, Associate Professor, Department of Kinesiology and Health Education
PhD, University of Arkansas at Little Rock, 2010
Peter H Stone Truchard Foundation Chair in Natural Sciences, Robotics Consortium Director; Professor, Department of Computer Science
PhD, Carnegie Mellon University, 1998
John S Stoney, Associate Professor, Department of Art and Art History
MFA, Cranbrook Academy of Art, 1998
Stephen M Strakowski, Professor of Medicine, Department of Psychiatry
MD, Vanderbilt University, 1988
Joseph Straubhaar Amon G. Carter Centennial Professorship in Communication, LMAS Affiliated; Professor, School of Journalism and Media
PhD, Tufts University, 1981
Galen Strawson Chair in Philosophy, Professor, Department of Philosophy
DPhil, University of Oxford, 1983
Jurgen K Streeck, Professor, Department of Communication Studies; Professor, Department of Anthropology; Professor, Department of Germanic Studies
PhD, Free University of Berlin, 1981
Pauline T Strong, Professor, Department of Anthropology; Professor, Center for Women's and Gender Studies; Professor, Program in the Human Dimensions of Organizations
PhD, University of Chicago, 1992
Natalie J Stroud E. M. "Ted" Dealey Professorship in the Business of Journalism, Director for the Center of Media Engagement; Professor, Department of Communication Studies; Professor, School of Journalism and Media
PhD, University of Pennsylvania, 2006
Scott R Stroud, Associate Professor, Department of Communication Studies; Associate Professor, Department of Rhetoric and Writing
PhD, Temple University, 2006
Sharon L Strover Philip G. Warner Regents Professorship in Communication, Director (Academic); Professor, School of Journalism and Media
PhD, Stanford University, 1982
David S Stuart Linda and David Schele Chair in the Art and Writing of Mesoamerica, Professor, Department of Art and Art History; Professor, Department of Anthropology
PhD, Vanderbilt University, 1995
Alexa M Stuifbergen Laura Lee Blanton Chair in Nursing, James R. Dougherty, Jr. Centennial Professorship in Nursing, Dean, School of Nursing
PhD, University of Texas at Austin, 1988
Michael F Sturley Fannie Coplin Regents Chair, Professor, School of Law
JD, Yale University, 1981
Circe Sturm, Faculty Associate; Professor, Department of Anthropology
PhD, University of California-Davis, 1997

Venkat Subramanian, Affiliated Faculty, Oden Institute; Professor, Walker Department of Mechanical Engineering
PhD, University of South Carolina - Columbia, 2001

Laura J Suggs Zarrow Centennial Professorship in Engineering, Affiliated Faculty, Oden Institute; Professor, Department of Biomedical Engineering; Professor of Oncology, Department of Oncology
PhD, Rice University, 1998

Marie-Anne P Suizzo, Associate Professor, Department of Educational Psychology
EdD, Harvard University, 1997

Julija Vida Sukys, Associate Professor, Department of English
PhD, University of Toronto, 2001

Christopher S Sullivan, Faculty Associate BSP Seminar; Professor, Department of Molecular Biosciences
PhD, University of Pittsburgh at Pittsburgh, 2000

James Samuel Sulzer, Adjunct Assistant Professor, Walker Department of Mechanical Engineering
PhD, Northwestern University, 2009

Chenguang Sun, Assistant Professor, Department of Geological Sciences
PhD, Brown University, 2014

Sibum Sung, Associate Professor, Department of Molecular Biosciences
PhD, University of Wisconsin-Madison, 2004

Jeremi Suri Mack Brown Distinguished Chair for Leadership in Global Affairs, Faculty Associate; Professor, Lyndon B Johnson School of Public Affairs; Professor, Department of History; Professor, Center for Middle Eastern Studies; Professor, Program in the Human Dimensions of Organizations
PhD, Yale University, 2001

Daniel D Sutherland, Associate Professor, Department of Art and Art History
MFA, Syracuse University Main Campus, 1991

William B Swann Jr William Howard Beasley III Professorship in the Graduate School of Business, Professor, Department of Psychology; Professor, Department of Management
PhD, University of Minnesota-Twin Cities, 1978

Earl E Swartzlander Jr, Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Southern California, 1972

Sara Johnson Sweitzer, Associate Professor of Instruction, Department of Nutritional Sciences
PhD, University of Texas at Austin, 2009

Thibaud Olivier Taillefumier, Assistant Professor, Department of Mathematics; Assistant Professor, Department of Neuroscience
PhD, Rockefeller University, 2012

Cynthia M Talbot, Professor Emeritus, Department of History
PhD, University of Wisconsin-Madison, 1988

Eric M Taleff Temple Foundation Endowed Faculty Fellowship No. 6, Professor, Walker Department of Mechanical Engineering
PhD, Stanford University, 1995

Jon I Tamir Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Affiliated Faculty, Oden Institute; Assistant Professor, Chandra Department of Electrical and Computer Engineering; Assistant Professor of Diagnostic Medicine, Department of Diagnostic Medicine
PhD, University of California-Berkeley, 2018

Hirofumi Tanaka Ruth Knight Millikan Centennial Professorship, Professor, Department of Kinesiology and Health Education
PhD, University of Tennessee at Knoxville, 1995

Takashi Tanaka, Core Faculty, Oden Institute; Assistant Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, University of Illinois at Urbana-Champaign, 2012

Eric Tang, Faculty Associate; Associate Professor, Department of African and African Diaspora Studies; Associate Professor, John L Warfield Center for African and African American Studies; Associate Professor, Department of Sociology; Director, Center for Asian American Studies, Center for Asian American Studies
PhD, New York University, 2006

Huseyin Tanriverdi Joseph Paschal Dreibelbs Fellowship in Business, Faculty Associate; Associate Professor, Department of Information, Risk, and Operations Management
DBA, Boston University, 2001

David William Taylor Jr Lorenz Morrow Kellogg Endowed Faculty Fellowship Fund, Faculty Associate Honors Fall 2022 Seminar; Associate Professor, Department of Molecular Biosciences
PhD, Yale University, 2013

Melinda E Taylor, Senior Lecturer, School of Law
JD, University of Texas at Austin, 1986

Rabun M Taylor Floyd A. Cailloux Centennial Professorship, Professor, Department of Classics; Professor, School of Architecture
PhD, University of Minnesota-Twin Cities, 1997

Mehran Tehrani, Adjunct Assistant Professor, Walker Department of Mechanical Engineering
PhD, Virginia Polytechnic Institute and State University, 2012

Elizabeth Teisberg Cullen Trust for Higher Education Distinguished University Chair in Value-Based Care for Dell Medical School, Professor, Department of Medical Education; Professor, Department of Business, Government and Society; Executive Director, Value Institute for Health and Care,
PhD, Stanford University, 1988

Januibe Tejera, Assistant Professor, Sarah and Ernest Butler School of Music
MM, Conservatoire national supérieur de musique et de danse de musique de Paris, 2011

Michael J Telch, Professor, Department of Psychology
PhD, Stanford University, 1982

Anna Tenerani, Assistant Professor, Department of Physics
PhD, Université de Paris VI, Pierre et Marie Curie, 2012

Ahmed Hossam Tewfik Cockrell Family Regents Chair in Engineering #1, Professor, Chandra Department of Electrical and Computer Engineering
ScD, Massachusetts Institute of Technology, 1987

Sean M Theriault, Professor, Department of Government
PhD, Stanford University, 2001

Edward C Theriot Harold C. and Mary D. Bold Regents Professorship of Cryptogamic Botany (Phycology), Director; Professor, Department of Integrative Biology
PhD, University of California-San Diego, 2017
Gayle M Timmerman, Associate Dean, School of Nursing; Professor, Department of Medical Education
PhD, The Ohio State University Main Campus, 1994
Adela Timmons, Assistant Professor, Department of Psychology
PhD, University of Southern California, 2018
Natalie T J Tindall Isabella Cunningham Chair in Advertising, Professor, Stan Richards School of Advertising and Public Relations
PhD, University of Maryland College Park, 2007
Scott W Tinker Edwin Allday Centennial Chair in Subsurface Geology, Professor, Department of Geological Sciences; Director, Bureau of Economic Geology, Bureau of Economic Geology
PhD, University of Colorado at Boulder, 1996
Nicola Tisato, Assistant Professor, Department of Geological Sciences
PhD, Swiss Federal Institute of Technology, 2013
Sheridan Titman Walter W. McAllister Centennial Distinguished University Chair in Financial Services, Professor, Department of Finance; Professor, Department of Economics; Director Research Unit, Energy Management and Innovation Center
PhD, Carnegie Mellon University, 1981
Mohit Tiwari The Raytheon Company Faculty Fellowship, Associate Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Santa Barbara, 2011
Stefano Tiziani, Associate Professor, Department of Nutritional Sciences; Associate Professor, Department of Pediatrics; Associate Professor, Department of Oncology
PhD, The Ohio State University Main Campus, 2006
Janice S Todd Roy J. McLean Centennial Fellowship in Sports History, Professor, Department of Kinesiology and Health Education; Professor, Center for Women's and Gender Studies
PhD, University of Texas at Austin, 1995
Puay khoon Toh Juanita Dreibelbis Fellowship in Business, Associate Professor, Department of Management
PhD, University of Michigan-Ann Arbor, 2007
Efstathios Tompaidis The Capitol City Savings Regents Professorship, Affiliated Faculty, Oden Institute; Professor, Department of Information, Risk, and Operations Management; Professor, Department of Finance
PhD, University of Texas at Austin, 1994
Ufuk Topcu, Core Faculty, Oden Institute; Associate Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, University of California-Berkeley, 2008
Almeida J Toribio, Professor, Department of Spanish and Portuguese; Professor, John L Warfield Center for African and African American Studies; Professor, Department of African and African Diaspora Studies; Professor, Center for Mexican American Studies
PhD, Cornell University, 1993
Keiko Torii Johnson & Johnson Centennial Chair in Plant Cell Biology, Professor, Department of Molecular Biosciences
PhD, Univ of Tsukuba, 1993
Rebecca M Torres, Associate Professor, Department of Geography and the Environment; Associate Professor, Department of Mexican American and Latino/a Studies
PhD, University of California-Davis, 2000

Robert A Van De Geijn, Core Faculty, Oden Institute; Professor, Institute for Computational Engineering and Science; Professor Emeritus, Department of Computer Science
PhD, University of Maryland University College, 1987

Eric van Oort Joe J. King Chair of Engineering No. 2, Professor, Hildebrand Department of Petroleum and Geosystems Engineering
PhD, University of Amsterdam, 1990

Carla L Vandenbreghe, Developmental Therapeutics Lab Co-Director, Livestrong Cancer Institute; Associate Professor, College of Pharmacy; Associate Professor of Oncology, Department of Oncology
PharmD, University of Texas at Austin, 1991

David A Vandenbout Robert E. Boyer Chair in Natural Sciences, Mary Ann Rankin Leadership Chair for the College of Natural Sciences, Professor, Department of Chemistry; Dean, College of Natural Sciences, College of Natural Sciences
PhD, University of Texas at Austin, 1995

Anita Vangelisti Jesse H. Jones Centennial Chair in Communication, Senior Associate Dean for Faculty Affairs and Graduate Education; Professor, Department of Communication Studies
PhD, University of Texas at Austin, 1989

Philip L Varghese Ernest H. Cockrell Centennial Chair in Engineering, Core Faculty, Oden Institute; Professor, Department of Aerospace Engineering and Engineering Mechanics; Director Research Unit, Center for Aeromechanics Research
PhD, Stanford University, 1983

Anita Varma, Assistant Professor, School of Journalism and Media
PhD, Stanford University, 2018

Fatima Alesia Varner, Faculty Associate; Assistant Professor, Department of Human Development and Family Sciences
PhD, Northwestern University, 2010

Karen Marie Vasquez James T. Doluisio Regents Professorship in Pharmacy, Division Head - Pharmacology and Toxicology; Professor, College of Pharmacy; Professor, Department of Pediatrics; Professor, Department of Oncology
PhD, Baylor College of Medicine, 1996

Alexis F Vasquez John T. Stuart III Centennial Professorship in Mathematics, Affiliated Faculty, Oden Institute; Professor, Department of Mathematics
PhD, Universite de Paris VI, Pierre et Marie Curie, 1999

Pavithra Vasudevan, Assistant Professor, Center for Women's and Gender Studies; Assistant Professor, Department of Geography and the Environment; Assistant Professor, Department of African and African Diaspora Studies; Assistant Professor, John L Warfield Center for African and African American Studies
MA, University of North Carolina at Chapel Hill, 2013

Vijaychidambaram Velayudhan Pillai, Associate Professor, Department of Computer Science
PhD, University of Wisconsin-Madison, 2013

Arhu Venkat, Assistant Professor, Department of Accounting
MA, American University (Washington DC), 2016

Haris Vikalo William W. Hagerty Fellowship in Engineering, Faculty Associate-ENGR; Professor, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 2003

Ann Twinam Villalon, Professor Emeritus, Department of History
PhD, Yale University, 1976

Charles W Villarrubia, Professor, Sarah and Ernest Butler School of Music
MM, Boston University, 1988

Maurizio Viroli, Professor, Department of Government; Professor, Department of French and Italian
PhD, European University Institute, 1985

Mikhail M Vishik, Affiliated Faculty, Oden Institute; Professor, Department of Mathematics
PhD, University of Moscow, 1980

Sriram Vishwanath, Professor, Chandra Department of Electrical and Computer Engineering
PhD, Stanford University, 2004

Stephen I Vladeck Charles Alan Wright Chair in Federal Courts, Professor, School of Law
JD, Yale University, 2004

Steven A Vokes, Associate Professor, Department of Molecular Biosciences
PhD, University of Texas at Austin, 2002

Paul Von Hippel, Professor, Lyndon B Johnson School of Public Affairs; Professor, Department of Sociology
PhD, The Ohio State University Main Campus, 2010

Paul Etienne Vouga, Associate Professor, Department of Computer Science
PhD, Columbia University (New York), 2011

Maria D Wade, Associate Professor, Department of Anthropology
PhD, University of Texas at Austin, 1998

Wendy E Wagner Richard Dale Endowed Chair in Law, Joe A. Worsham Centennial Professorship in Law, Professor, School of Law
JD, Yale University, 1987

Louis A Waldman, Associate Professor, Department of Art and Art History; Associate Professor, Department of French and Italian
PhD, New York University, 1999

Hannah L Walker, Assistant Professor, Department of Government
PhD, University of Washington - Seattle, 2016

Lorraine O Walker Luci B. Johnson Centennial Professorship in Nursing, Professor, School of Nursing
EdD, Indiana University Bloomington, 1971

Stephen G Walker Paul D. and Betty Robertson Meek and American Petrofina Foundation Centennial Professorship in Business, Professor, Department of Mathematics; Professor, Department of Statistics and Data Sciences
PhD, Imperial College of Science, Technology and Medicine University of London, 1995

Scott Wallace, Associate Professor of Medicine, Department of Medical Education; Clinical Associate Professor, Department of Accounting; Managing Director, Value Institute for Health and Care
JD, University of Chicago, 1988

John B Wallingford Mr. and Mrs. Robert P. Doherty, Jr. Regents Chair in Molecular Biology, Professor, Department of Molecular Biosciences
PhD, University of Texas at Austin, 1998

Patrick F Walter, Assistant Professor of Instruction, Department of African and African Diaspora Studies
PhD, State University of New York at Buffalo, 2012

Denton Walthall Faculty Fellowship in Classics, Associate Professor, Department of Classics
PhD, Princeton University, 2013

C Michael Walton, Professor Emeritus, Department of Civil, Architectural, and Environmental Engineering
PhD, North Carolina State University, 1971

Atlas Wang Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Affiliated Faculty, Oden Institute; Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Illinois at Urbana-Champaign, 2016

Huiliang Wang, Assistant Professor, Department of Biomedical Engineering
PhD, Stanford University, 2015

Jun Wang, Associate Professor, Department of Speech, Language, and Hearing Sciences; Associate Professor, Department of Neurology
PhD, University of Nebraska at Lincoln, 2011

Junmin Wang Lee Norris & Linda Steen Norris Endowed Professorship in Mechanical Engineering, Professor, Walker Department of Mechanical Engineering
PhD, University of Texas at Austin, 2007

Wennie Wang, Assistant Professor, McKetta Department of Chemical Engineering
PhD, University of California-Santa Barbara, 2018

Yagu Wang Temple Foundation Endowed Faculty Fellowship No. 1, Faculty Associate-ENGR, Associate Professor, Walker Department of Mechanical Engineering
PhD, Purdue University Main Campus, 2011

Adrian F Ward, Assistant Professor, Department of Marketing
PhD, Harvard University, 2013

Peter M Ward, Professor Emeritus, Department of Sociology; Professor Emeritus, Lyndon B Johnson School of Public Affairs
PhD, University of Liverpool, 1976

Rachel A Ward, Core Faculty, Oden Institute; Professor, Department of Mathematics
PhD, Princeton University, 2009

Luke Christopher Waring, Assistant Professor, Department of Asian Studies
PhD, Princeton University, 2019

Jamie Warner Hayden Head Centennial Professorship, Professor, Walker Department of Mechanical Engineering; Professor, Chandra Department of Electrical and Computer Engineering; Director Research Unit, Texas Materials Institute, Texas Materials Institute
PhD, University of Queensland, 2005

Daniel M Wasserman Cullen Trust for Higher Education Endowed Professorship in Engineering #3, Professor, Chandra Department of Electrical and Computer Engineering
PhD, Princeton University, 2004

Melissa Feeney Wasserman Charles Tilford McCormick Professorship in Law, Professor, School of Law
JD, New York University, 2007

Brent R Waters, Professor, Department of Computer Science
PhD, Princeton University, 2004

Samuel C Watkins Ernest A. Sharpe Centennial Professorship in Communication, Michael Scott Endowed Research Fellowship, Cynthia Hendrick Kozmetsky Endowed Research Fellowship, Jack S. Blanton Endowed Research Fellowship, Gerhard J. Fonken Endowed Research Fellowship, George A. Roberts Endowed Research Fellowship, Henry E. Singleton Endowed Research Fellowship, Judson Neff Centennial Fellowship, Bonita Granville Wather Centennial Fellowship, Jack D. Warther, Jr. Centennial Fellowship, Charles A. Lemaistre Centen, Director of the Institute for Digital Media Innovation; Professor, School of Journalism and Media
PhD, University of Michigan-Ann Arbor, 1994

Andrew Waxman, Assistant Professor, Lyndon B Johnson School of Public Affairs
PhD, Cornell University, 2016

Catherine Elizabeth Weaver, Associate Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Wisconsin-Madison, 2003

Lauren J Webb, Professor, Department of Chemistry
PhD, California Institute of Technology, 2005

Michael Webber Josey Centennial Professorship in Energy Resources, Faculty Associate-ENGR; Professor, Walker Department of Mechanical Engineering
PhD, Stanford University, 2001

Anthony K Webster, Professor, Department of Anthropology; Professor, Department of Linguistics
PhD, University of Texas at Austin, 2004

Stephen M Wechsler, Professor, Department of Linguistics
PhD, Stanford University, 1991

Jacob A Wegmann, Associate Professor, School of Architecture; Associate Professor of Social Work, School of Social Work
MCP, Massachusetts Institute of Technology, 2006

Xuexin Wei, Assistant Professor, Department of Neuroscience; Assistant Professor, Department of Psychology
PsyD, University of Pennsylvania, 2015

Jana Weiss, Adjunct Associate Professor, Department of Germanic Studies
PhD, Westphalian Wilhelms University Munster, 2013

Rachel Wellhausen, Associate Professor, Department of Government; Associate Professor, Department of Business, Government and Society
PhD, Massachusetts Institute of Technology, 2012

Bruce Wells, Associate Professor, Department of Middle Eastern Studies
PhD, Johns Hopkins University, 2003

Wen Wen Chevron Centennial Fellowship in Business (No. 2), Associate Professor, Department of Information, Risk, and Operations Management
PhD, Georgia Institute of Technology, 2012

Timothy Daniel Werner Eleanor T. Mosle Fellowship, Associate Professor, Department of Business, Government and Society
PhD, Massachusetts Institute of Technology, 2002

Charles J Werth Bettie Margaret Smith Chair in Environmental Health Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, Stanford University, 1997
Justin West, Assistant Professor, Sarah and Ernest Butler School of Music
PhD, University of North Texas, 2018

Katharine West, Assistant Professor of Instruction, School of Journalism and Media
PhD, University of Texas at Austin, 2012

Jay L Westbrook Benno C. Schmidt Chair of Business Law, Professor, School of Law
JD, University of Texas at Austin, 1968

Alexandra K Wettlaufer Stuart W. Stedman Director's Chair in Plan II, Hayden W. Head Regents Chair in the Plan II Honors Program, Professor, Department of French and Italian; Professor, Plan II Honors Program
PhD, Columbia University (New York), 1993

Melissa R Wetzel, Professor, Department of Curriculum and Instruction
PhD, Washington University in St Louis, 2007

Kurt G Weyland Mike Hogg Professorship in Liberal Arts, Professor, Department of Government
PhD, Stanford University, 1991

Marianne Wheeldon, Professor, Sarah and Ernest Butler School of Music
PhD, Yale University, 1997

Mary F Wheeler Ernest and Virginia Cockrell Chair in Engineering, Core Faculty, Oden Institute; Professor, Hildebrand Department of Petroleum and Geosystems Engineering; Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Department of Mathematics; Professor, Institute for Computational Engineering and Science
PhD, Rice University, 1971

Andrew B Whinston Harkins & Company Centennial Distinguished University Chair, Professor, Department of Information, Risk, and Operations Management; Professor, Department of Economics; Professor, Department of Computer Science
PhD, Carnegie Mellon University, 1962

Lloyd M White, Distinguished Teaching Associate Professor Emeritus, Department of Religious Studies
PhD, Yale University, 1982

Stephen A White, Professor, Department of Classics; Professor, Department of Philosophy
PhD, University of California-Berkeley, 1987

Christian P Whitman Romeo T. Bachand, Jr. Regents Professorship in Pharmacy, Professor, College of Pharmacy
PhD, University of California-San Francisco, 1984

Tiffany A Whittaker, Professor, Department of Educational Psychology
PhD, University of Texas at Austin, 2003

Abraham Lee Wickelgren Fred and Emily Marshall Wulff Centennial Chair in Law, Professor, School of Law
JD, Harvard University, 1994

Elizabeth Widen, Assistant Professor, Department of Pediatrics; Assistant Professor, Department of Nutritional Sciences; Assistant Professor, Department of Women’s Health
PhD, University of North Carolina at Chapel Hill, 2012

Nichole Wiedemann The Paul Philippe Cret Centennial Teaching Fellowship in Architecture, Associate Professor, School of Architecture
MA, Princeton University, 1992

Gary B Wilcox John A. Beck Centennial Professorship in Communication, Professor, Stan Richards School of Advertising and Public Relations
PhD, Michigan State University, East Lansing, 1982

Darlene C Wiley, Professor Emeritus, Sarah and Ernest Butler School of Music
MM, University of Illinois at Urbana-Champaign, 1969

Claus O Wilke Jane and Roland Blumberg Centennial Professorship in Molecular Evolution, Dwight W. and Blanche Faye Reeder Centennial Fellowship in Systematic and Evolutionary Biology, IOR - DSC 385 Data Exploration; Professor, Department of Integrative Biology; Professor, Department of Statistics and Data Sciences
PhD, Ruhr-Universitat Bochum, 1999

Lynn R Wilkinson, Professor, Center for Women's and Gender Studies; Professor, Department of Germanic Studies; Director, Program in Comparative Literature, Program in Comparative Literature
PhD, University of California-Berkeley, 1983

Jennifer M Wilks, Associate Professor, Department of English; Associate Professor, John L Warfield Center for African and African American Studies; Associate Professor, Department of African and African Diaspora Studies
PhD, Cornell University, 2003

Karen E Willcox Peter O'Donnell, Jr. Centennial Chair in Computing Systems, Peter and Edith O'Donnell Distinguished Chair at ICES, W. A. “Tex” Moncrief, Jr. Endowment in Simulation-Based Engineering and Sciences - Endowed Chair No. 5, Associate Vice President for Research-Oden Institute, Professor, Department of Aerospace Engineering and Engineering Mechanics; Professor, Institute for Computational Engineering and Science
PhD, Massachusetts Institute of Technology, 2000

Braden Mern Williams, Associate Professor, Department of Accounting
MAcc, Brigham Young University, 2009

Jeff Williams John D. Murchison Fellowship in Art, Associate Professor, Department of Art and Art History
MFA, Syracuse University Main Campus, 2002

Robert O Williams III Johnson & Johnson Centennial Chair in Pharmacy, Division Head - Molecular Pharmaceutics and Drug Delivery; Professor, College of Pharmacy
PhD, University of Texas at Austin, 1986

Sean H Williams F. Scott Baldwin Research Professorship in Law, Professor, School of Law
JD, University of Chicago, 2004

Eric B Williamson Phil M. Ferguson Professorship in Civil Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of Illinois at Urbana-Champaign, 1996

Hannah Williamson, Assistant Professor, Department of Human Development and Family Sciences; Assistant Professor, Department of Psychology
PhD, University of California-Los Angeles, 2017

Sinead Williamson, Associate Professor, Department of Statistics and Data Sciences
PhD, University of Cambridge, 2012

Byron Wilson Foxworth Centennial Fellowship, Associate Professor of Practice, School of Design and Creative Technologies
MSc, Art Center College of Design, 2012
Patricia A Wilson, Professor Emeritus, School of Architecture
PhD, Cornell University, 1975

Preston S Wilson Paul D. and Betty Robertson Meek Centennial Professorship in Engineering, Affiliated Faculty, Oden Institute; Professor, Walker Department of Mechanical Engineering; Professor, Applied Research Laboratories
PhD, Boston University, 2002

Samuel M Wilson, Professor Emeritus, Department of Anthropology
PhD, University of Chicago, 1986

Don Winget Harlan J. Smith Centennial Professorship in Astronomy, Professor, Department of Astronomy
PhD, University of Rochester, 1982

Thomas E Wiseman, Professor, Department of Economics
PhD, Northwestern University, 2001

Kenneth W Wisian, Other University Affiliate; Lecturer, Department of Aerospace Engineering and Engineering Mechanics; Lecturer, Department of Geological Sciences
PhD, Southern Methodist University, 1999

Emmett Witchel, Professor, Department of Computer Science
PhD, Massachusetts Institute of Technology, 2004

Christopher Wlezien Mike Hogg Professorship in Government, Professor, Department of Government
PhD, University of Iowa, 1989

Hannah Chapelle Wojciechowski Arthur J. Thaman and Wilhelmina Dore’ Thaman Endowed Professorship in English #2, Professor, Department of English
PhD, Yale University, 1984

Amelia Wolf, Assistant Professor, Department of Integrative Biology
PhD, Stanford University, 2011

Michael Scott Wolford, Professor, Department of Government
PhD, Emory University, 2008

Patrick P Wong, Associate Professor, Lyndon B Johnson School of Public Affairs
PhD, University of Wisconsin-Madison, 1988

Sharon L Wood Cockrell Family Chair in Engineering #14, Professor, Department of Civil, Architectural, and Environmental Engineering; Executive Vice President & Provost, Office of the Executive Vice President and Provost
PhD, University of Illinois at Urbana-Champaign, 1986

Helena Woodard, Professor, Department of English; Professor, John L Warfield Center for African and African American Studies; Professor, Department of African and African Diaspora Studies
PhD, University of North Carolina at Chapel Hill, 1991

Anthony C Woodbury Jesse H. Jones Regents Professorship in Liberal Arts, Professor, Department of Linguistics; Professor, Department of Anthropology
PhD, University of California-Berkeley, 1981

Paul B Woodruff, Distinguished Teaching Professor Emeritus, Department of Philosophy
PhD, Princeton University, 1973

Marjorie C Woods, Distinguished Teaching Professor Emeritus, Department of English
PhD, University of Toronto, 1977

Jacqueline D Woolley, Professor, Department of Psychology
PhD, University of Michigan-Ann Arbor, 1990

Patrick Woolley A. W. Walker Centennial Chair in Law, Professor, School of Law
JD, Yale University, 1987

Samuel Christopher Woolley, Assistant Professor, School of Information; Assistant Professor, School of Journalism and Media
MA, Claremont Graduate University, 2011

Mary J Worthy, Professor Emeritus, Department of Curriculum and Instruction
PhD, University of Virginia (Old Code), 1989

Sarah L Woulfin, Associate Professor, Department of Educational Leadership and Policy
PhD, University of California-Berkeley, 2012

John Wright, Adjunct Assistant Professor, Department of Computer Science
PhD, Carnegie Mellon University, 2016

Michelle L Wright Ed and Molly Smith Fellowship in Nursing, Assistant Professor, Department of Women’s Health; Assistant Professor, School of Nursing
PhD, University of North Dakota-Grand Forks, 2014

David Junzi Wu Computer Sciences Endowed Faculty Fellowship No. 5, Assistant Professor, Department of Computer Science
PhD, Stanford University, 2018

Charters S Wynn, Associate Professor, Department of History; Associate Professor, Department of Slavic and Eurasian Studies
PhD, Stanford University, 1987

Blerta Xhemalce, Associate Professor, Department of Molecular Biosciences
PhD, Universite de Paris VII, Denis Diderot, 2006

Mindy Xiaolan, Assistant Professor, Department of Finance
PhD, University of California-Los Angeles, 2014

Bo Xie, Professor, School of Nursing; Professor, School of Information
PhD, Rensselaer Polytechnic Institute, 2006

Haiqing Xu, Associate Professor, Department of Economics
PhD, Pennsylvania State University Park, 2011

Neeraja Jayant Yadwadkar, Assistant Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of California-Berkeley, 2018

Gizem Yalcin, Assistant Professor, Department of Marketing
MPhil, Erasmus Universiteit, 2017

Satoko S Yamamoto Eva and Marvin Womack Faculty Fellowship in Music, Associate Professor of Practice, Sarah and Ernest Butler School of Music
MMus, Cleveland Institute of Music, 1998

Veronica Yan, Assistant Professor, Department of Educational Psychology; Assistant Professor, Department of Psychology
PhD, University of California-Los Angeles, 2014

John A Yancey, Professor Emeritus, Department of Art and Art History
MFA, Georgia Southern University, 1993

Jin Yang, Assistant Professor, Department of Aerospace Engineering and Engineering Mechanics
PhD, California Institute of Technology, 2019
Kun Yang, Assistant Professor, College of Pharmacy
PhD, University of Delaware, 2016
Zong-Liang Yang John A. and Katherine G. Jackson Chair in Earth
System Sciences, Affiliated Faculty, Oden Institute; Professor,
Department of Geological Sciences
PhD, Macquarie University, 1992
Thomas Yankeelov W. A. "Tex" Moncief, Jr. Chair in Computational
Engineering and Sciences IV - Computational Oncology, W. A. "Tex"
Moncief, Jr. Chair in Computational Engineering and Sciences IV
- Computational Oncology, Core Faculty, Oden Institute; Professor,
Department of Biomedical Engineering; Professor, Institute for
Computational Engineering and Science; Professor, Department of
Oncology; Professor, Department of Diagnostic Medicine
PhD, State University of New York at Stony Brook, 2003
Zhen Yao, Associate Professor, Department of Physics
PhD, Harvard University, 1997
David Scott Yeager, Associate Professor, Department of Psychology
PhD, Stanford University, 2011
Cathery Yeh, Assistant Professor, Department of Curriculum and
Instruction
PhD, University of California-Irvine, 2016
Hsin-Chih Yeh David and Doris Lybarger Endowed Faculty Fellowship in
Engineering, Associate Professor, Department of Biomedical Engineering
PhD, Johns Hopkins University, 2008
Stephen Yi, Director of Bioinformatics; Assistant Professor, Department
of Biomedical Engineering; Assistant Professor, Department of Oncology
PhD, Harvard University, 2016
Ali E Yilmaz William H. Hartwig Fellowship in Electrical Engineering, Core
Faculty, Oden Institute; Professor, Chandra Department of Electrical and
Computer Engineering
PhD, University of Illinois at Urbana-Champaign, 2005
Linda H Yoder Luci Baines Johnson Fellowship in Nursing, Professor,
School of Nursing
PhD, University of Pennsylvania, 1992
Cara Young Ed and Molly Smith Centennial Fellowship in Nursing,
Associate Professor, School of Nursing
PhD, Vanderbilt University, 2010
Duncan A Young, Research Scientist,
Hershini Young, Professor, Department of African and African Diaspora
Studies; Professor, John L Warfield Center for African and African
American Studies
PhD, University of California-Berkeley, 1999
Kenneth R Young, Professor, Department of Geography and the
Environment
PhD, University of Colorado at Boulder, 1990
Michael Howard Young, Senior Research Scientist,
PhD, University of Arizona, 1995
Chen Yu Charles and Sarah Seay Regents Professorship in
Developmental Psychology, Professor, Department of Psychology
PhD, University of Rochester, 2004
Edward T Yu Judson S. Swearingen Regents Chair in Engineering,
Professor, Chandra Department of Electrical and Computer Engineering
PhD, California Institute of Technology, 1991
Guihua Yu Temple Foundation Endowed Professorship No. 2, Professor,
Walker Department of Mechanical Engineering
PhD, Harvard University, 2009
Yong Yu C. Aubrey Smith Professorship in Accounting, Professor,
Department of Accounting
PhD, Pennsylvania State University Park, 2006
Harold H Zakon, Faculty Associate BSP Seminar; Professor, Department
of Neuroscience; Professor, Department of Integrative Biology
PhD, Cornell University, 1981
Emilio Zanaria Clyde Rabb Littlefield Chair in Texas History, Professor,
Department of History; Professor, Center for Mexican American Studies
PhD, University of Texas at Austin, 1983
Kelly R Zamudio, Professor, Department of Integrative Biology
PhD, University of Washington - Seattle, 1996
Renato Zanetti, Core Faculty, Oden Institute; Assistant Professor,
Department of Aerospace Engineering and Engineering Mechanics
PhD, University of Texas at Austin, 2007
Thaleia Zariphopoulou Chair in Mathematics, V. F. Neuhaus Centennial
Professorship in Finance, Affiliated Faculty, Oden Institute; Professor,
Department of Mathematics; Professor, Department of Information, Risk,
and Operations Management
PhD, Brown University, 1989
Luis H Zayas The Robert Lee Sutherland Chair in Mental Health and
Social Policy, Faculty Associate; Professor, Department of Psychiatry;
Professor, School of Social Work
PhD, Columbia University (New York), 1986
Boris Zemelman, Associate Professor, Department of Neuroscience
PhD, Stanford University, 1997
Amy Zhang Jack Kilby/Texas Instruments Endowed Faculty Fellowship in
Computer Engineering, Assistant Professor, Chandra Department of
Electrical and Computer Engineering
ME, Massachusetts Institute of Technology, 2012
Feng Zhang, Associate Professor, College of Pharmacy
PhD, University of Texas at Austin, 1999
Ming Zhang, Professor, School of Architecture
PhD, Massachusetts Institute of Technology, 2002
Yan Zhang, Professor, Department of Molecular Biosciences
PhD, The Scripps Research Institute, 2004
Yan Zhang, Associate Professor, School of Information
PhD, University of North Carolina at Chapel Hill, 2009
Yunlan Zhang, Assistant Professor, Department of Civil, Architectural, and
Environmental Engineering
PhD, Purdue University Main Campus, 2019
Bo Zhao, Core Faculty, Oden Institute; Assistant Professor, Department
of Biomedical Engineering; Assistant Professor of Diagnostic Medicine,
Department of Diagnostic Medicine
PhD, University of Illinois at Urbana-Champaign, 2014
Wuyang Zhao, Assistant Professor, Department of Accounting
PhD, Fudan University, 2013
Ronghuo Zheng, Assistant Professor, Department of Accounting
PhD, Carnegie Mellon University, 2016

Yuebing Zheng Temple Foundation Endowed Teaching Fellowship in Engineering No. 2, Associate Professor, Walker Department of Mechanical Engineering
PhD, Pennsylvania State University Park, 2010

Jianshi Zhou, Research Professor, Walker Department of Mechanical Engineering
PhD, Northeast Normal University, 1991

Lei Zhou, Assistant Professor, Walker Department of Mechanical Engineering
SM, Massachusetts Institute of Technology, 2014

Mingyuan Zhou Curtis Mathes Memorial Fellowship, Associate Professor, Department of Information, Risk, and Operations Management; Associate Professor, Department of Statistics and Data Sciences
PhD, Duke University, 2013

Hao Zhu Jack Kilby/Texas Instruments Endowed Faculty Fellowship in Computer Engineering, Texas Atomic Energy Research Foundation Centennial Fellowship in Electrical Engineering, Associate Professor, Chandra Department of Electrical and Computer Engineering
PhD, University of Minnesota-Twin Cities, 2012

Yuke Zhu, Assistant Professor, Department of Computer Science
MS, Stanford University, 2015

Corwin Zigler, Associate Professor, Department of Statistics and Data Sciences
PhD, University of California-Los Angeles, 2010

Aaron Zimmerman, Assistant Professor, Department of Physics
PhD, California Institute of Technology, 2013

Gordan Zitkovic Frank E. Gerth III Faculty Fellowships, The President's Associates Centennial Teaching Fellowship in Mathematics, Professor, Department of Mathematics
PhD, Columbia University (New York), 2003

Janeta Zoldan William J. Murray, Jr. Fellowship in Engineering No. 3, Associate Professor, Department of Biomedical Engineering
PhD, Technion-Israel Institute of Technology, 2004

Jorge G Zornberg Brunswick-Abernathy Regents Professorship in Soil Dynamics and Geotechnical Engineering, Professor, Department of Civil, Architectural, and Environmental Engineering
PhD, University of California-Berkeley, 1994

David I Zuckerman Professorship in Computer Sciences #1, Professor, Department of Computer Science
PhD, University of California-Berkeley, 1991

Julie A Zuniga Ed and Molly Smith Centennial Fellowship in Nursing, Faculty Associate; Associate Professor, School of Nursing
PhD, University of Texas at Austin, 2013

Graduate A-Z Index
# Index

## A
- Accounting ......................................................... 41
- Ad Hoc Interdisciplinary Doctoral Program .......................... 12
- Adding and Dropping Courses ...................................... 21
- Admission .................................................................. 19
- Admission and Registration .......................................... 18
- Advertising ................................................................ 51
- Aerospace Engineering ................................................ 70
- African and African Diaspora Studies .............................. 109
- American Studies ....................................................... 111
- Anthropology ............................................................ 112
- Appendix Course Abbreviations ..................................... 184
- Application to Another Graduate Major (Change of Major) ... 23
- Architecture ............................................................. 28
- Architecture ................................................................ 29
- Areas of Study ........................................................... 27
- Art Education ............................................................. 95
- Art History .................................................................. 96
- Artificial Intelligence .................................................... 148
- Asian Studies ............................................................. 113
- Astronomy ................................................................. 149

## B
- Biochemistry .............................................................. 150
- Biomedical Engineering ................................................ 72
- Board of Regents ........................................................ 6
- Business ..................................................................... 38
- Business Administration ................................................ 38
- Business Analytics ...................................................... 42

## C
- Cell and Molecular Biology .............................................. 151
- Certificates .................................................................. 13
- Chemical Engineering ................................................... 75
- Chemistry ..................................................................... 154
- Civil Engineering ........................................................ 76
- Classics ...................................................................... 115
- Cockrell School of Engineering ....................................... 69
- College of Education .................................................... 57
- College of Fine Arts ..................................................... 94
- Communication .......................................................... 50
- Communication Studies ................................................ 52
- Community and Regional Planning ................................. 34

Comparative Literature ................................................. 117
Computational Science, Engineering, and Mathematics .......... 182
Computer Science ......................................................... 155
Continuous Registration .................................................. 22
