General Information, 2026-2027

Introduction

The benefits of education and of useful knowledge, generally diffused through a community, are essential to the preservation of a free government.

Sam Houston

Cultivated mind is the guardian genius of Democracy, and while guided and controlled by virtue, the noblest attribute of man. It is the only dictator that freemen acknowledge, and the only security which freemen desire.

Mirabeau B. Lamar

Where liberty has arisen, learning must be cherished—or liberty itself becomes a fragile thing.

Lyndon B. Johnson

Mission of the University

The mission of The University of Texas at Austin *is to achieve excellence in the interrelated areas of undergraduate education, graduate education, research, and public service. The university provides superior and comprehensive educational opportunities at the baccalaureate through doctoral and special professional educational levels.*

The university contributes to the advancement of society through research, creative activity, scholarly inquiry, and the development and dissemination of new knowledge, including the commercialization of University discoveries. The university preserves and promotes the arts, benefits the state's economy, serves the citizens through public programs, and provides other public service.

Officers of Administration

The University of Texas at Austin

James Davis, President
William Inboden, Executive Vice President and Provost
Nancy Brazzil, Deputy to the President
Kathleen Brock, Vice President and Chief Operating Officer
Cole Camplese, Vice President for Technology and Chief Information Officer
Amanda Cochran-McCall, Vice President for Legal Affairs and General Counsel
Christopher Del Conte, Vice President and Athletics Director
Jeffery Graves, Chief Compliance Officer
Sandy Jansen, Chief Audit Executive
Fernanda Leite, Vice President for Research
David Livingston, Vice President for Development
Claudia Lucchinetti, Senior Vice President for Medical Affairs and Dean of the Dell Medical School
Andrea Sheridan, Deputy to the President for Governmental Affairs and Initiatives
Brian Smith, Senior Vice President and Chief Financial Officer
Miguel Wasielewski, Vice President for Student Experience
Patrick Wiseman, Vice President for Communications and Brand Strategy

Administrative Officers of the Colleges and Schools

Michael Drew, Senior Vice Provost, Academic Affairs
Roger Bonnecaze, Dean, Cockrell School of Engineering
Robert Chesney, Dean, School of Law
Allan Cole, Jr., Dean, School of Social Work
J. Paul Pope, Interim Dean, Lyndon B. Johnson School of Public Affairs
Justin Dyer, Dean, School of Civic Leadership
Kavita Radhakrishnan, Dean, School of Nursing
Claudia Lucchinetti, Senior Vice President for Medical Affairs and Dean of the Dell Medical School
Daniel Hamlin, Dean, College of Education
Bradley Staats, Dean, Red McCombs School of Business
Danny Stockli, Dean, John A. and Katherine G. Jackson School of Geosciences
Samuel Poloyac, Dean, College of Pharmacy
Ramón Rivera-Servera, Dean, College of Fine Arts
David Sosa, Interim Dean, College of Liberal Arts
David Vanden Bout, Dean, College of Natural Sciences
Anita Vangelisti, Interim Dean, Moody College of Communication
Heather Woofter, Dean, School of Architecture

The University of Texas System

John Zerwas, Chancellor
Archie Holmes Jr., Executive Vice Chancellor for Academic Affairs
David Lakey, Vice Chancellor for Health Affairs and Chief Medical Officer
Jonathan Pruitt, Executive Vice Chancellor and Chief Operating Officer (effective until August 31, 2026)
Julia Jeffrey Rathgeber, Deputy Chancellor and Senior Policy Advisor
Daniel Sharphorn, Vice Chancellor and General Counsel
Randa Safady, Vice Chancellor for External Affairs, Communications and Advancement Services
Melissa Villarreal Garcia, Deputy Vice Chancellor and Chief of Staff

Board of Regents

Officers

Kevin P. Eltife, *Chairman*
Janiece M. Longoria, *Vice Chairman*
James C. "Rad" Weaver, *Vice Chairman*
Stacey Napier, *General Counsel to the Board of Regents*

Members

Terms scheduled to expire February 1, 2027

Kevin P. Eltife, Tyler
Nolan E. Perez, M.D., Harlingen
Stuart W. Stedman, Houston

Terms scheduled to expire February 1, 2029

Janiece M. Longoria, Houston
James C. "Rad" Weaver, San Antonio
Robert P. Gauntt, Austin

Terms scheduled to expire February 1, 2031

Christina M. Crain, Dallas
Jodie Lee Jiles, Houston
Kelcy L. Warren, Dallas

Student Regent with term to expire May 31, 2027

Jeremiah S. Clarke, San Antonio

Each Regent's term expires when a successor has been appointed and qualified and has taken the oath of office. The Student Regent serves a one-year term.

Academic Calendar

Overview

The academic calendar indicates key dates and deadlines for important academic requirements and/or activities including, but not limited to, the start and end dates of classes, holidays, exam days, and registration dates.

Set by the University's Faculty Council according to the Principles for the Development of the Academic Calendar, the academic calendar is typically divided into the fall, spring, and summer semesters.

The academic calendar is based on a semester model that contains terms within each semester:

- Fall Semester has two designated terms:
  - Fall Term (formerly known as the "Fall Long Semester") is the primary term for Fall Semester classes
  - Winter Term is an optional period to offer education abroad courses, internships, etc.
- Spring Semester has two designated terms:
  - Spring Term (formerly known as "Spring Long Semester") is the primary term for Spring Semester classes
  - May Term is an optional four-week period for education abroad courses, internships, etc.
- Summer Semester has four designated terms:
  - First Term
  - Second Term
  - Nine-Week Term
  - Summer Term

All classes associated with a semester will start and end within that semester. Tuition calculations, financial aid, and registration processes are based on classes taken during the assigned semester.

The academic calendar published in this catalog reflects approved dates at the time of publication. See https://registrar.utexas.edu/calendars for additional information about current, upcoming, and archived academic calendars.

2026-2027 Academic Dates and Deadlines

Fall semester

August 18, 2026 - January 9, 2027, includes Fall and Winter Terms

Fall Term 2026

August 24 - December 14, 2026

Date	Event
July 28	Tuition bills for the fall semester distributed to students electronically
August 13	Tuition payment deadline is 5:00 p.m. for undergraduate students who registered for the fall semester on or before August 7
August 14	Orientation for new international students
August 19	Fall registration for new undergraduate and all graduate students who have not yet registered (check your registration information sheet for access times)
August 20 - 27	Fall registration for all students
August 21	Last day a graduate student may register in absentia
August 21	University residence halls open
August 24	First day of classes
August 24 - 27	Fall registration for graduate and law students
August 24 - 31	Fall registration for all students (will require either department and/or dean's approval)
August 27	4th class day
	Last day for graduate and law students to add a class
	Tuition payment deadline is 5:00 p.m. CST for graduate and law students
August 31	6th class day
	Last day for undergraduate students to add a class
September 7	Labor Day holiday; no classes held
September 9	12th class day
	Last day to drop a class without permission
	Tuition payment deadline is 5:00 p.m. CST for anyone who registered after July 18
	Payment for added classes ("Add Bill") due 11:59 p.m. Any owed balance after this will be automatically placed on an installment plan.
	Official Pell Recalculation Date (PRD). Any courses added after this date are not included to determine Pell Grant eligibility.
October 16	Payment for remaining tuition balances due by 11:59 p.m. CST
October 27	Last day to apply for an undergraduate degree
November 2 - 13	Spring 2027 registration
November 13	Last day to apply for a graduate degree
November 17	Spring 2027 tuition bills distributed to students
November 18	Last day an undergraduate may: Q-drop a class; withdraw; change a class to pass/fail
November 20	Last day a doctoral candidate may hold a dissertation defense for the Fall 2026 semester
November 23	Last day a graduate student may change registration in a class to or from the credit/no credit basis
November 23 - 28	Fall break/Thanksgiving; no classes held

December 4	Last day to submit master's report, recital, thesis, doctoral dissertation, or treatise to the vice provost for graduate and postdoctoral studies
December 7	Last class day
	Last day an undergraduate may, with the required approvals, request a non-academic Q-drop
	Last day an undergraduate may register in absentia
	Last day a graduate student may, with the required approvals, drop a class or withdraw from the university
December 8 - 9	Study days
December 10 - 12 & 14	Final exams
December 14 - 18	Spring 2027 registration period for continuing and readmitted students
December 15	University residence halls close
December 19	Official graduation date (No public exercises)

Winter Term 2026

Date	Event
December 15, 2026 - January 9, 2027	Winter Term (optional; may be used for courses such as study abroad, etc.)

Spring semester

January 11 - June 2, 2027, and includes Spring and May Terms

Spring Term 2027

January 11 - May 3, 2027

Date	Event
January 5	Tuition payment deadline is 5:00 p.m. for undergraduate students
	Orientation for new international students
January 7	Spring 2027 registration for new undergraduate and all graduate students who have not yet registered (check your registration information sheet for access times)
January 7 - 10	Spring 2027 registration for all students
January 8	University residence halls open
January 11	First day of classes
January 11 - 14	Spring 2027 registration for graduate and law students
January 11 - 19	Spring 2027 registration for undergraduate students
January 14	4th class day
	Last day for graduate and law students to add a class
	Tuition payment deadline is 5:00 p.m. CST for graduate and law students
January 18	Martin Luther King, Jr. Day; no classes held
January 19	6th class day
	Last day for undergraduate students to add a class
January 27	12th class day
	Last day to drop a class without permission
	Tuition payment deadline is 5:00 p.m. CST for undergraduate, graduate, and law students
	Payment for added classes ("Add Bill") due 11:59 p.m. Any owed balance after this will be automatically placed on an installment plan.
March 15 - 20	Spring Break
March 16	Payment for remaining tuition balances due by 11:59 p.m. CST
March 24	Last day to apply for an undergraduate degree
April 5 - 16	Summer 2027 and Fall 2027 registration for continuing and readmitted students
April 9	Last day to apply for a graduate degree
	Last day a doctoral candidate may hold a dissertation defense for the Spring 2027 semester
April 12	Last day a graduate student may change registration in a class to or from the credit/no credit basis
April 14	Last day an undergraduate may: Q-drop a class; withdraw; change a class to pass/fail
April 23	Last day to submit a master's report, recital, thesis, doctoral dissertation, or treatise to the vice provost for graduate and postdoctoral studies
April 26	Last class day
	Last day a graduate student may, with the required approvals, drop a class or withdraw from the university
	Last day an undergraduate may, with the required approvals, request a non-academic Q-drop
	Last day an undergraduate may register in absentia
April 27 & 28	Study days
April 29 - 30, May 1 & 3	Final exams
May 4	Summer 2027 tuition bills distributed to students
	University residence halls close
May 8	University commencement (official graduation date)

May Term 2027

Date	Event
May 4 - June 2	May Term (optional; may be used for courses such as study abroad, etc.)
May 31	Memorial Day; no classes held

Summer Semester

June 3 - August 16, 2027, includes First Term, Second Term, Nine-week Term, and Summer Term

Date	Event
May 19	Tuition payment deadline is 5:00 p.m. CST for undergraduate students
June 3	First day of classes for First Term, Nine-week Term, and Summer Term
June 8	Last day to drop a class without permission for First Term, Nine-week Term, and Summer Term
	2nd payment deadline is 5:00 p.m. CST for undergraduate students
	Payment deadline is 5:00 p.m. CST for graduate and law students
	Payment for added classes ("Add Bill") due for First Term, Nine-week Term, and Summer Term
June 19	Juneteenth holiday; no classes held
June 23	Last day to change a class to pass/fail for First Term, Nine-week Term, and Summer Term
July 8	Last class day for First Term
	Last day an undergraduate or graduate student may, with the required approvals, drop a First Term class
July 9 - 10	Final exams for First Term
July 12	First day of classes for Second Term
July 15	4th class day for Second Term
	Last day to drop a class without permission for Second Term
	3rd and final tuition payment deadline is 5:00 p.m. CST for undergraduate, graduate, and law students
	Payment for added classes ("Add Bill") due for Second Term
July 16	Last day to apply for undergraduate or law degree
July 27	Last class day for Nine-week Term
	Last day an undergraduate or graduate student may, with the required approvals, drop a Nine-week Term class
July 28	Tuition bills for the fall semester distributed to students electronically
July 28 - 29	Final exams for Nine-week Term
July 30	Last day to change a class to pass/fail for Second Term
	Last day to apply for a graduate degree
August 13	Last day a doctoral candidate may hold a dissertation defense for the Summer 2025 semester
	Last class day for Second Term and Summer Term
	Last day an undergraduate or graduate student may, with the required approvals, drop a Second or Summer Term class or withdraw
	Last day to submit a master's report, recital, thesis, doctoral dissertation, or treatise to the vice provost for graduate and postdoctoral studies
August 14 & 16	Final exams for Second Term and Summer Term
August 16	Official graduation date (no public exercises)

The University

The University Catalog

The University catalog is an official University publication describing academic programs, student services, general regulations, requirements and procedures.

The catalog of the University is the document of authority for all students. Any academic unit may issue additional or more specific information that is consistent with approved policy. However, the information in the catalog supersedes that issued by any other unit if there is a conflict between the two. The University reserves the right to change the requirements given in the catalog at any time.

The catalog consists of five issues: the Undergraduate Catalog, the Graduate Catalog, the Law School Catalog, the *Medical School Catalog*, and the *General Information Catalog*.

The *Undergraduate Catalog* is published in even-numbered years; the *Graduate Catalog* is published annually; the *Law School Catalog* is published in even-numbered years; the *Medical School Catalog* is published annually. These issues contain regulations and degree requirements that apply to undergraduate, graduate, School of Law, and School of Medicine students. Regulations are valid only for the academic years indicated by the dates in the title of each publication; for an explanation of the period for which degree requirements are valid, see the section "Graduation Under a Particular Catalog" in each issue.

The *General Information Catalog*, published annually, contains current and historical information about the University's organization and physical facilities. It gives important information about academic policies and procedures that apply to all students for the academic year indicated in the title of the publication. It includes the official academic calendar, admission procedures and residence requirements, information about tuition and fees, and policies on quantity of work, grades and the grade point average, credit by examination and correspondence, adding and dropping courses, withdrawal from the University, and academic warning and dismissal. *General Information* is meant to be used along with each of the other issues; students must be familiar with the regulations given there and with those given in the issue that covers their degree program.

The lists of available course offerings for each academic unit are correct at the time of publication but are subject to change. They are superseded by course offerings published each semester in the *Course Schedule.*

Assistance in obtaining information about the University—including costs, refund policies, withdrawal, academic programs, the faculty, accreditation, and facilities and services for disabled persons—is available from Brenda Schumann, Assistant Vice Provost for Enrollment Services and University Registrar, at (512) 475-7510 and at The University of Texas at Austin, Office of the Registrar, PO Box 302666, Austin TX 78703.

Statement on Equal Education Opportunity

The University of Texas at Austin is committed to an educational and working environment that provides equal opportunity to all members of the University community. In accordance with federal and state law, the University prohibits unlawful discrimination, including harassment, on the basis of race; color; religion; national origin; gender, including sexual harassment; age; disability; citizenship; and veteran status. Discrimination on the basis of sexual orientation, gender identity, and gender expression is also prohibited pursuant to University policy. Any member of the University community who believes they have been subject to discrimination, harassment, or retaliation should contact the Department of Investigation and Adjudication (DIA) via e-mail at dia@austin.utexas.edu; or by phone at (512) 471-3701.

Accreditation

The University of Texas at Austin is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, professional, and doctorate degrees. The University of Texas at Austin also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of The University of Texas at Austin may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

Affiliations

The University is a member of the Association of American Universities and the Oak Ridge Associated Universities, among others.

Student Honor Code

As a student of The University of Texas at Austin, I shall abide by the core values of the University and uphold academic integrity.

University Code of Conduct

The core values of The University of Texas at Austin are learning, discovery, freedom, leadership, individual opportunity, and responsibility. Each member of the University is expected to uphold these values through integrity, honesty, trust, fairness, and respect toward peers and community

Organization of the University's Academic Units

Through the following academic units, the University offers hundreds of undergraduate, graduate, and professional degree programs.

School of Architecture

Red McCombs School of Business

- Jonathan K. Shulkin Department of Accounting
- Department of Business, Government, and Society
- Department of Finance
- Department of Information, Risk and Operations Management
- Rozanne and Billy Rosenthal Department of Management
- Department of Marketing

School of Civic Leadership

Moody College of Communication

- Stan Richards School of Advertising and Public Relations
- Department of Communication Studies
- School of Journalism and Media
- Department of Radio-Television-Film
- Department of Speech, Language, and Hearing Sciences

College of Education

- Department of Curriculum and Instruction
- Department of Educational Leadership and Policy
- Department of Educational Psychology
- Department of Kinesiology and Health Education
- Department of Special Education

Cockrell School of Engineering

- Department of Aerospace Engineering and Engineering Mechanics
- Department of Biomedical Engineering
- Materials Science and Engineering Program
- John J. McKetta Jr. Department of Chemical Engineering
- Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering
- Chandra Family Department of Electrical and Computer Engineering
- J. Mike Walker Department of Mechanical Engineering
- Hildebrand Department of Petroleum and Geosystems Engineering

College of Fine Arts

- Department of Art and Art History
- Department of Arts and Entertainment Technologies
- Department of Design
- Sarah and Ernest Butler School of Music
- School of Design and Creative Technologies
- Department of Theatre and Dance

John A. and Katherine G. Jackson School of Geosciences

- Department of Earth and Planetary Sciences
- Energy and Earth Resources Graduate Program

Graduate and Postdoctoral Studies

School of Law

College of Liberal Arts

- Department of Air Force Science
- Department of Anthropology
- Center for Asian American Studies
- Department of Asian Studies
- Edward A. Clark Center for Australian and New Zealand Studies

- Department of Classics
- Program in Comparative Literature
- Thomas Jefferson Center for the Study of Core Texts and Ideas
- Américo Paredes Center for Cultural Studies
- Department of Economics
- Department of English
- Department of European and Eurasian Studies
- Department of Geography and the Environment
- Department of Government
- Department of History
- Department of Human Dimensions of Organization
- Humanities Institute
- Schusterman Center for Jewish Studies
- Teresa Lozano Long Institute of Latin American Studies
- Department of Linguistics
- Center for Middle Eastern Studies
- Department of Middle Eastern Studies
- Department of Military Science
- Department of Naval Science
- Department of Philosophy
- Plan II Honors Program
- The Population Research Center
- Department of Psychology
- Department of Religious Studies
- Department of Rhetoric and Writing
- Department of Social and Cultural Analysis
- Department of Sociology
- South Asia Institute
- Department of Spanish and Portuguese
- UTeach- Liberal Arts

Dell Medical School

- Department of Cardiovascular and Thoracic Surgery
- Department of Diagnostic Medicine
- Department of Medical Education
- Department of Internal Medicine
- Department of Medical Education
- Department of Neurology
- Department of Neurosurgery
- Department of Ophthalmology
- Department of Pediatrics
- Department of Population Health
- Department of Psychiatry and Behavioral Sciences
- Department of Surgery and Perioperative Care
- Department of Women's Health

College of Natural Sciences

- Department of Astronomy
- Biology Instruction Office
- Department of Chemistry
- School of Computing
- Department of Computer Science
- School of Health and Human Sciences
- Department of Human Development and Family Sciences
- Department of Information
- Department of Integrative Biology
- Department of Marine Science
- Department of Mathematics
- Department of Molecular Biosciences
- Department of Neuroscience
- Neuroscience Graduate Program
- Department of Nutritional Sciences
- Department of Physics
- Department of Statistics and Data Science
- Division of Textiles and Apparel
- UTeach- Natural Sciences

School of Nursing

College of Pharmacy

Lyndon B. Johnson School of Public Affairs

School of Social Work

University-level undergraduate education

- Bridging Disciplines Program

Historical Sketch

The idea of a university for Texas is as old as the state itself. The Declaration of Texas Independence includes in its indictment of the government of Mexico the charge that it "has failed to establish any public system of education, although possessed of almost boundless resources (the public domain), and although it is an axiom in political science that, unless a people are educated and enlightened, it is idle to expect the continuance of civil liberty or the capacity of self-government." In accordance with the doctrine thus proclaimed, the first Constitution of the Republic declares it to be the duty of Congress "to provide, as soon as circumstances will permit... a general system of education."

Attempts to establish a University of Texas were made by the Congress of the Republic and then by the state legislature in 1837, 1839, 1858, and 1866, but the times were unpropitious and the idea failed to become a reality. The Constitution of 1876 again called for the organization and maintenance of "a university of the first class to be located by a vote of the people of this state, and styled 'The University of Texas,' for the promotion of literature, and the arts and sciences, including an agricultural and mechanical department." This constitution also established an endowment of one million acres of land in west Texas, which was increased in 1883 to two million acres. In 1881, the legislature again called for the organization and location of the University and for the appointment of a Board of Regents to be entrusted with its establishment and government. Among the provisions of the act were the limitation of the matriculation fee to $30, the admission of men and women on equal terms without charge for tuition, and the injunction that no religious qualifications should be required for admission to any office or privilege connected with the University and that no sectarian instruction should be given therein.

By popular election in September 1881, the Main University was located at Austin and the Medical Branch, at Galveston. The academic and law departments were organized, and on September 15, 1883, the University was formally opened in the incomplete west wing of the old Main Building.

As the University grew, work in other fields was added to that offered by the academic and law departments. The College of Engineering was added in 1894; in 1906, the School of Education; in 1909, the Division of Extension; in 1910, the Graduate School; in 1922, the School of Business Administration; in 1924, the College of Physical Activities; in 1938, the

College of Fine Arts; in 1948, the Graduate School of Library Science; in 1950, the Graduate School of Social Work; in 1951, the School of Architecture; in 1965, the School of Communication; in 1970, the Lyndon B. Johnson School of Public Affairs; in 1976, the School of Nursing; and in 2016, the Dell Medical School. The current organization of the University is described in Organization of the University's Academic Units (p. 10).

Until 1895, the chair of the faculty was the chief executive officer of the University. Professor J. W. Mallet was chair for the opening year, 1883–1884; then Professor Leslie Waggener until the summer of 1894; then Professor Thomas S. Miller for 1894–1895. In 1895, the office of president was created, and has been filled as follows:

Leslie Waggener, MA, LLD (ad interim)	1895–1896
George Tayloe Winston, MA, LLD	1896–1899
William Lambdin Prather, BL, LLD	1899–1905
David Franklin Houston, MA, LLD	1905–1908
Sidney Edward Mezes, PhD, LLD	1908–1914
William James Battle, PhD, DCL, LLD (ad interim)	1914–1916
Robert Ernest Vinson, DD, LLD	1916–1923
William Seneca Sutton, MA, LLD (ad interim)	1923–1924
Walter Marshall William Splawn, PhD, LLD	1924–1927
Harry Yandell Benedict, PhD, LLD	1927–1937
John William Calhoun, MA, LLD (ad interim)	1937–1939
Homer Price Rainey, PhD, LLD	1939–1944
Theophilus Shickel Painter, PhD, DSc, LLD, MNAS (Acting President)	1944–1946
Theophilus Shickel Painter, PhD, DSc, LLD, MNAS	1946–1952
James Clay Dolley, PhD (Acting President)	1952
Logan Wilson, PhD, LLD	1953–1960
Harry Huntt Ransom, PhD, LittD, LLD, LHD	1960–1961
Harry Huntt Ransom, PhD, LittD, LLD, LHD (Acting President)	1961
Joseph Royall Smiley, PhD	1961–1963[1]
Norman Hackerman, PhD	1967–1970
Bryce Jordan, PhD (ad interim)	1970–1971
Stephen H. Spurr, MF, PhD, DSc	1971–1974
Lorene Lane Rogers, PhD, DSc, FAIC (ad interim)	1974–1975
Lorene Lane Rogers, PhD, DSc, FAIC	1975–1979
Peter Tyrrell Flawn, PhD	1979–1985
William H. Cunningham, PhD	1985–1992
William S. Livingston, PhD (Acting President)	1992–1993
Robert M. Berdahl, PhD	1993–1997
Peter Tyrrell Flawn, PhD (ad interim)	1997–1998
Larry R. Faulkner, PhD	1998–2006
William Powers Jr., JD	2006–2015
Gregory L. Fenves, PhD	2015–2020
Jay C. Hartzell, PhD	2020–2025
James E. Davis, JD	2025-

1. From 1963 until 1967 there was no office of president.

Government

The University of Texas System is governed by a board of nine regents, selected from different areas of the state, nominated by the governor, and appointed with the advice and consent of the Senate. Additionally, the board includes a nonvoting student regent appointed by the governor upon recommendation of the chancellor of The University of Texas System. A complete statement of the duties of the officers and a description of the organization and authority of the General Faculty, the faculties of the colleges and schools, divisions, and departments, is published in the *Rules and Regulations* of the Board of Regents.

Support

As a public institution, the University receives part of its income directly from the state. The state constitution prohibits any appropriation from the general revenue for the construction of buildings, but appropriations for equipment, research, and operating expenses have been made by each legislature since 1889. An additional source of income is the Permanent University Fund, which consists of revenue from the two million acres of land in west Texas granted to the University and its branches in 1876 and 1883. The land has been leased since 1884 for grazing and other purposes; since oil production began there in 1923, income from mineral leases and royalties has also been added to the fund. Income earned by the Permanent University Fund is called the Available University Fund. One-third of the Available University Fund is dedicated to the support of the Texas A&M University System; two-thirds is dedicated to The University of Texas System for operating expenses and permanent improvements.

Tuition paid by students is a third source of income, and the proceeds of endowment funds donated by individuals and organizations provide important additional support to research and teaching at the University.

Federal and other sponsored research funding provides an additional source of support crucial to the success of the University's mission of discovery.

Buildings and Grounds

The grounds of the University consist of the original forty-acre campus just north of the state capitol and additional land acquired by gift and purchase. The main campus now covers more than 350 acres. Also part of the University are the J. J. Pickle Research Campus, a 476-acre tract eight miles north of the main campus that houses research organizations in engineering, science, and the social sciences; the Brackenridge tract, 445 acres bordering Lady Bird Lake where research is conducted in the life sciences; and the Montopolis Research Center, 94 acres located in southeast Austin. In addition, the University owns the Marine Science Institute at Port Aransas, the McDonald Observatory near Fort Davis, the Stengl–Lost Pines Biological Station near Smithville, the Winedale museum and conference center near Round Top, the Bee Cave Research Center west of Austin, the Lady Bird Johnson Wildflower Center in southwest Austin, the Sam Rayburn Library in Bonham, the John Nance Garner House and Museum in Uvalde, and J. Frank Dobie's ranch, Paisano.

Major buildings and other facilities are listed below.

For Teaching, Research, and Administration

Aerospace Engineering Building	Formerly the North Office Building A; houses the Department of Aerospace Engineering and the Center for Aeromechanics Research
Animal Resources Center	
Art Building and Museum	Houses the Department of Art and Art History
AT&T Executive Education and Conference Center	Houses classrooms and meeting facilities
Battle Hall	Formerly the Old Library Building; renamed for William James Battle, former professor of classical languages and president ad interim of the University; houses part of the School of Architecture
Batts Hall	Named for Judge R. L. Batts, former chair of the Board of Regents; houses the Department of Government
Beauford H. Jester Center	Named for former governor of Texas and former member of the Board of Regents; houses classrooms, the John L. Warfield Center for African and African American Studies, and the Sanger Learning and Career Center
Bellmont Hall	Named for L. Theo Bellmont, former professor and director, Physical Training for Men; houses Intercollegiate Athletics for Men and Women, the Department of Kinesiology and Health Education, and the Department of Social and Cultural Analysis
Belo Center for New Media	An expansion of the Moody College of Communication, named for gifts from the Belo Foundation and the Dealey, Decherd, and Moroney families; houses the dean's office, Student Advising and Career Services, the Stan Richards School of Advertising and Public Relations, the School of Journalism and Media, and the KUT Public Media Studios
Benedict Hall	Named for former University president H. Y. Benedict; houses the Department of Spanish and Portuguese
Bernard and Audre Rapoport Building	Formerly the Petroleum Engineering Building, then the Economics Building; renamed in 1998 for alumnus and benefactor Bernard Rapoport and his wife; houses the Department of Economics
Biological Laboratories	Houses part of the School of Biological Sciences
Biomedical Engineering Building	Houses the Department of Biomedical Engineering; provides research space for the Colleges of Natural Sciences and Pharmacy, and teaching labs for the School of Biological Sciences
Blanton Museum of Art	Named for Jack S. Blanton, former chairman of Houston Endowment Inc.; houses more than 17,000 works of art and is comprised of the Mari and James A. Michner Gallery Building and the Edgar A. Smith Building.
Burdine Hall	Named for John Alton Burdine, former dean of the College of Arts and Sciences and first vice president of the University; houses the Departments of Sociology and Germanic Studies
Calhoun Hall	Named for former University president John William Calhoun; houses the Department of Linguistics, the Department of Slavic and Eurasian Studies, and the comparative literature program
Chemical and Petroleum Engineering Building	Houses the John J. McKetta Jr. Department of Chemical Engineering and the Hildebrand Department of Petroleum and Geosystems Engineering
College of Business Administration Building	Formerly the Business Administration–Economics Building; renamed in 1984
Continuing Engineering Education	Houses the Center for Lifelong Engineering Education
Health Learning Building	Houses the Dell Medical School
Development Office Building	Houses the Development Office and the Charles A. Dana Center
Dorothy L. Gebauer Building	Formerly the Engineering Building; renamed the Journalism Building, then the Speech Building; renamed in 1984 for former dean of women; houses the Office of the Dean of the College of Liberal Arts and the Department of Social and Cultural Analysis
E. P. Schoch Building	Formerly the Chemical Engineering Building; renamed for former professor of chemical engineering; houses part of the John A. and Katherine G. Jackson School of Geosciences
E. William Doty Fine Arts Building	Formerly the Fine Arts Library and Administration Building; renamed in 1998 for first dean of the College of Fine Arts; houses the Office of the Dean of the College of Fine Arts
Edgar A. Smith Building	Named for University alumnus and benefactor; houses the administrative, educational, and outreach activities of the Blanton Museum of Art
Engineering Education and Research Center	
Engineering Teaching Center II	Houses the J. Mike Walker Department of Mechanical Engineering and the Texas Materials Institute
Ernest Cockrell Jr. Hall	Named for an alumnus and benefactor of the College of Engineering; houses the Department of Civil, Architectural, and Environmental Engineering and the Office of the Dean of the Cockrell School of Engineering
F. Loren Winship Drama Building	Formerly the Drama Building; renamed in 1979 for former chair of the Department of Theatre and Dance
Garrison Hall	Named for George P. Garrison, former professor of history
Gates Dell Complex	Named for gifts from the Bill and Melinda Gates Foundation and the Michael and Susan Dell Foundation; houses the Artificial Intelligence Lab and the Department of Computer Science

George I. Sánchez Building	Formerly the College of Education Building; renamed in 1994 for former professor of education; houses part of the College of Education and the College of Liberal Arts Departments of Air Force Science, Military Science, and Naval Science
Goldsmith Hall	Formerly the Architecture Building; renamed in 1978 for former professor of architecture Goldwin Goldsmith; houses part of the School of Architecture
Gordon-White Building	Formerly the Black and Latino Studies Building; renamed in 2015; before that formerly the Geography Building; renamed in 2014; and before that the Journalism Building; renamed in 1974; houses the African and African Diaspora Studies Department and the Department of Social and Cultural Analysis
Graduate School of Business Building	
Harry Ransom Center	Formerly the Humanities Research Center; renamed in 1974 for University chancellor emeritus
Hogg Memorial Auditorium	Named for former governor James S. Hogg and his son Will C. Hogg; houses facilities for Texas Performing Arts
Homer Rainey Hall	Formerly the Music Building; renamed in 1995 for former University president; houses the Department of French and Italian
J. T. Patterson Laboratories Building	Named for former professor of zoology; houses part of the School of Biological Sciences
Jesse H. Jones Communication Center	Formerly the Communication Building; renamed in 1981 for Houston philanthropist; houses the Moody College of Communication Departments of Speech, Language, and Hearing Sciences, Communications Studies, and Radio-Television-Film, and KLRU TV
Jesse H. Jones Hall	Named for Houston philanthropist; houses part of the School of Law
Joe C. Thompson Conference Center	Named for former member of the Board of Regents
John A. and Katherine G. Jackson Geological Sciences Building	Named for alumnus and benefactor John A. Jackson and his wife; houses the Office of the Dean of the John A. and Katherine G. Jackson School of Geosciences
John B. Connally Center for the Administration of Justice	Named for alumnus and benefactor who was a member of the Board of Regents, governor of Texas, and United States secretary of the treasury; houses programs for advocacy and dispute resolution in the School of Law
John W. Hargis Hall	Formerly Building H of the Little Campus property (now the Heman Sweatt Campus); renamed in 1983 for former special assistant to the president of the University. Houses a research facility for the School of Social Work.
Laboratory Theatre Building	
Lake Austin Centre	Located three miles west of the University; houses the Hogg Foundation for Mental Health and some units of the Division of Continuing and Innovative Education
Larry R. Faulkner Nano Science and Technology Building	Named for former University president; houses several affiliated programs for the promotion of nanoscience and nanotechnology
Littlefield Home and Littlefield Carriage House	Houses part of the University Development Office
Louise and James Robert Moffett Molecular Biology Building	Named for alumni benefactors
Lyndon B. Johnson Library	
Main Building (Tower)	Located on the site of Old Main; houses University administrative offices
Mari and James A. Michener Gallery Building	Named for the Pulitzer Prize–winning novelist and University benefactor, and his wife; provides gallery space for the Blanton Museum of Art
Mary E. Gearing Hall	Formerly the Home Economics Building; renamed in 1976 for the first chair of the Department of Home Economics; houses part of the School of Human Ecology
Mezes Hall	Named for former University president Sidney E. Mezes; houses the Center for European Studies and the Schusterman Center for Jewish Studies
Music Building East and Music Building/ Recital Hall	Houses the Kate Broocks Bates Recital Hall and the Office of the Director of the Sarah and Ernest Butler School of Music
Neural and Molecular Science Building	Houses classrooms, laboratories, and offices
Norman Hackerman Building	Named for the late president of UT Austin and Rice University; houses parts of the School of Biological Sciences and the Department of Chemistry and Biochemistry
Nursing School	
Parlin Hall	Formerly the English Building; renamed for Hanson Tufts Parlin, former professor of English and dean of the College of Arts and Sciences; houses the Department of English and the Department of Rhetoric and Writing
Patton Hall	Formerly known as the College of Liberal Arts Building; houses many College of Liberal Arts departments, programs, and centers; includes two dozen classrooms and auditoriums, offices for campus groups, and study spaces
Performing Arts Center	Houses the Nancy Lee and Perry R. Bass Concert Hall and the Ralph H. and Ruth J. McCullough Theatre
Perry-Castañeda Library	Named for Ervin S. Perry, former associate professor of civil engineering, and Carlos E. Castañeda, former professor of Latin American history
Peter O'Donnell Jr. Building	Houses facilities for research and graduate study in computer sciences, electrical and computer engineering, and computational sciences, engineering, and mathematics
Peter T. Flawn Academic Center	Formerly the Undergraduate Library and Academic Center; renamed in 1985 for University president emeritus; houses part of the University Undergraduate Programs
Pharmacy Building	Houses the College of Pharmacy
Robert A. Welch Hall	Formerly the Chemistry Building; renamed in 1974 for Houston philanthropist; houses the Department of Chemistry and Biochemistry

Robert B. Rowling Hall	Named for Dallas businessman Robert B Rowling; houses the McCombs School of Business graduate programs
Physics, Math, and Astronomy Building	Formerly known as Robert Lee Moore Hall; renamed in 2020; before that formerly the Physics-Mathematics-Astronomy Building; renamed in 1974; houses the Departments of Astronomy, Mathematics, and Physics
Sarah M. and Charles E. Seay Building	Named for alumni benefactors; houses the Department of Psychology and research facilities of the Department of Human Development and Family Sciences
School of Social Work Building	Formerly University Junior High School
Sid Richardson Hall	Named for Texas philanthropist; houses the Lyndon B. Johnson School of Public Affairs, the Dolph Briscoe Center for American History, and the Teresa Lozano Long Institute of Latin American Studies
Student Services Building	Houses University Health Services, Counseling and Mental Health Center, Office of the Dean of Students, Office of the Ombudsperson, Office of Financial Aid, Student Government, and the Senate of College Councils
Sutton Hall	Named for William S. Sutton, former dean and professor of education; houses part of the School of Architecture
T. S. Painter Hall	Formerly the Physics Building; renamed in 1974 for former University president Theophilus Shickel Painter; houses parts of the Schools of Biological Sciences and Human Ecology, and parts of the Departments of Computer Science and Physics
Texas Memorial Museum	Built to commemorate the centennial of the Republic of Texas in 1936; funded in part by the sale of centennial coins and a University student donation drive; serves as the exhibit hall for the Texas Natural Science Center
Townes Hall	Named for Judge John Charles Townes; houses part of the School of Law
University Teaching Center	
UT Administration Building	Houses the School of Information and part of the Department of Computer Science.
Waggener Hall	Named for the University's first president, Leslie Waggener; houses the Departments of Classics and Philosophy
Walter Webb Hall	Named in 1975 for former professor of history; houses the Visitor Center, and the Office of Public Affairs
West Mall Office Building	Houses part of the School of Architecture, the Center for Mexican American Studies, the Department of Middle Eastern Studies, and the University Station Post Office
Will C. Hogg Building	Formerly the Geology Building; renamed for distinguished alumnus and benefactor; houses the Department of Asian Studies, the Plan II Honors Program, and the Office of the Dean of the College of Natural Sciences
William C. Powers, Jr. Student Activity Center	Houses the Department of Anthropology and the Américo Paredes Center for Cultural Studies on the fourth and fifth levels
William Randolph Hearst Building	Named for gifts from the Hearst Foundations; houses Texas Student Media

For Student Activities

Anna Hiss Gymnasium	Formerly Women's Gymnasium; renamed in 1974 for former director of Physical Training for Women
Clark Field	Named for Judge James Benjamin Clark, first proctor of the University
Darrell K Royal-Texas Memorial Stadium	Formerly Texas Memorial Stadium; renamed in 1997 to honor former head football coach and athletics director
Denton A. Cooley Pavilion	Basketball practice and training facility; named for University alumnus and heart transplant pioneer
Frank C. Erwin Jr. Special Events Center	Formerly the Special Events Center; renamed in 1981 for former chairman of the Board of Regents
Frank Denius Practice Field	Named for alumnus and benefactor Franklin Wofford Denius
Gregory Gymnasium	Named for former United States attorney general Thomas Watt Gregory; houses the Gregory Aquatics Facility and part of the Department of Recreational Sports
Lee and Joe Jamail Texas Swimming Center	Named for alumni benefactors
Mike A. Myers Track and Soccer Stadium	Named for alumnus benefactor
Moncrief-Neuhaus Athletic Center	Named for alumni benefactors Vernon F. Neuhaus and W. A. "Tex" Moncrief; called the Neuhaus-Royal Athletic Center until the 1997 renaming of Memorial Stadium
Recreational Sports Center	
Red and Charline McCombs Field	Named for alumnus and benefactor Red McCombs and his wife
Richard Mithoff Track and Soccer Fieldhouse	Named for University of Texas and School of Law alumnus
William C. Powers Jr. Student Activity Center	Features a variety of unique, informal lounge spaces, four food vendors, and thirteen reservable spaces such as a black box theatre, a legislative assembly room, and a dance rehearsal space with a sprung floor.
Texas Union Building	Houses dining areas, entertainment venues, meeting rooms for student organizations, reading rooms, banquet rooms, the Informal Classes program, and the Union Underground
UFCU Disch-Falk Field	Named for former baseball coaches Billy Disch and Bibb Falk and for the sponsorship of the University Federal Credit Union
Whitaker Field	Named for Berry M. Whitaker, former director of intramurals; located at 51st and Guadalupe streets

Admission

A comprehensive college education depends on a robust exchange of ideas, exposure to differing cultures, preparing for the challenges of an increasingly diverse workforce, and acquiring competencies required of future leaders. The Office of Admissions recruits prospective undergraduate students, manages the admissions application process,

and reviews applications in order to admit and enroll undergraduate students who are best able to contribute to, and benefit from, the University's rich, diverse, and challenging educational environment. Similarly, the Office of Graduate Admissions (OGA) manages the admissions application process and assists in the review of applications in order to admit and enroll all applicants to the University's many master's and doctoral programs.

The University receives a large number of applications and admits the number of students to whom it can offer a high-quality educational experience, including providing the resources needed for timely graduation. As a result, the University must often admit a limited number of applicants from among those who are qualified.

The procedures and criteria for admission given in this section are effective as of the date of publication but are subject to change by action of the Texas Legislature or the Board of Regents. The information here is intended for use by students applying for admission for the academic years covered by this catalog.

In compliance with the Federal Student Right-to-Know Act, information about graduation rates and crime statistics is available from the Office of Admissions.

Questions about undergraduate admission may be addressed to the Office of Admissions by telephone or by e-mail. The Office of Admissions may also be contacted by mail at The University of Texas at Austin, Office of Admissions, PO Box 300609, Austin, TX 78703. Questions about graduate admission should be directed to the Office of Graduate Admissions.

Undergraduate Admission

The Office of Admissions is responsible for the admission and readmission of undergraduate students to the University. Application procedures for freshman, transfer, returning, international, and transient (visiting summer) students are outlined later in this chapter and details are available on Texas Admissions.

Undergraduate Admission Application

Application deadlines

For undergraduate admission, application materials must be received in the Office of Admissions by the deadlines published on Applying for Admission.

Prospective students are encouraged to apply early for the enrollment period in which they are interested. Beginning the process early allows ample time for applicants to assure that their applications are complete by the deadline.

	Summer Semester 2026	Fall Semester 2026	Spring Semester 2027
US and international freshmen	December 1, 2025	December 1, 2025	September 1, 2026
US and international transfer students	March 1, 2026	March 1, 2026	September 1, 2026
Returning students	May 1, 2026	July 1, 2026	December 1, 2026
Transient students	May 1, 2026	not applicable	not applicable

Application processing fees

A nonrefundable fee of $75 is required with each application for domestic undergraduate admission. (The undergraduate fee for transient admission, admission for visiting summer students, is $60). Fee waivers based on financial need are available. International applicants (those who are not United States citizens or permanent residents) must submit a nonrefundable fee of $90; waivers are not available for international applicants.

Admission to requested majors

Although Texas state law offers automatic admission to the University for eligible undergraduate applicants, it does not guarantee admission to an applicant's requested major. All undergraduate applicants are considered on a competitive basis through holistic review for admission to the majors they request.

Accepting admission

Applicants who are offered undergraduate admission to the University must take steps to accept the offer of admission. To accept admission, admitted students must pay a $200 enrollment deposit, which is applied to the payment of tuition when the student enrolls. Students who demonstrate financial need may qualify for assistance to cover the amount of the deposit. Enrollment deposits are not refundable.

Major changes following acceptance of admission

Undergraduate students are limited in their ability to change majors (p. 28) after accepting admission offers. Incoming undergraduates are not allowed to change majors from one college/school to another during summer or during orientation, but may join the Waitlist for a desired major after receiving their admission decision. Students interested in changing majors within their college/school should speak with an academic advisor about the requested change during orientation. Visit Internal Transfer for more information.

Rescinding offers of admission

The Office of Admissions has the authority to rescind an offer of admission to a student who, after being admitted to the University, fails to maintain the level of academic, achievement, or honor code standards that were displayed in the information the student submitted when applying for admission to the University. Applicants who falsify any part of their application or the documents required to complete the application process are subject to cancellation of their offer of admissions or disciplinary action.

Students at the University are expected to conduct themselves in ways that reflect the University's Student Honor Code (p.).

Scholarship recipients

The Assistant Vice Provost of Admissions may admit recipients of bona fide scholarships.

Submitted application items

Official transcripts and test score reports submitted to the Office of Admissions will not be duplicated or returned to the student. Faxes of transcripts and applications are not accepted.

Undergraduate Applicants with College Credit

Many undergraduate applicants come to the University after enrolling in college-level coursework or earning college credit.

Reporting previous college coursework

An applicant who has undertaken coursework at another collegiate institution (including freshman, transfer, reentry, and international applicants) must report all such coursework when applying for admission. Applicants who fail to report all college coursework or who otherwise falsify any part of their application or the documents required to complete the application process are subject to disciplinary action. Disciplinary action will include a one-year ban on enrollment and a permanent statement on the student's record about the failure or falsification. Action may include expulsion and loss of credit for work taken subsequently at the University, as well as appropriate action by the dean of students.

Awarding college credit

The University awards college credit to some incoming undergraduate students for courses that are transferable from other colleges and universities, for designated scores on Advanced Placement and International Baccalaureate exams, for OnRamps courses and for dual credit courses the student took while in high school.

Students seeking transferable credit must submit official transcripts of all coursework taken at all other institutions for evaluation by the Office of Admissions. This evaluation determines whether the coursework could in any circumstances qualify for transfer credit at UT Austin, but it does not constitute approval of the credit for use toward a degree; such approval is solely within the jurisdiction of a student's academic dean.

The following policies govern evaluation of credit:

- **Institution types:** Transfer credit is generally awarded for academic course credit earned from regionally accredited institutions or from institutions that are candidates for regional accreditation if the course credit was earned during the candidacy period. In rare circumstances, course credit earned at other institutions may be accepted.
- **Courses that are not transferable:** Workforce (vocational) courses, developmental and remedial courses, and courses classified as below freshman level by the institution at which the student took them are not transferable and will not count toward a degree.
- **Credit for military training:** Transfer credit is awarded for some kinds of military training. Credit awarded for military training usually does not count toward the 24 hours of transferable credit needed to apply for admission.
- **Coursework level:** Junior and community college courses transfer as lower-division (freshman or sophomore) credit. Undergraduate courses from senior colleges transfer at the level (lower- or upper-division) at which the student took them. Graduate-level coursework is not transferable as undergraduate credit.
- **Limits on use of credit toward degree:** No limit is placed on the total amount of course credit accepted in transfer from either junior- or senior-level institutions. However, use of transfer credit toward a degree may be limited by the student's academic dean.
- **Credit by exam at another institution:** Credit earned by examination at another institution is treated as transfer credit only if the sending institution records the credit on the student's transcript with regular catalog course numbers and with a grade of at least *C-*, the symbol *CR*, or a similar designation representing credit earned without letter grade.
- **Computing an applicant's GPA:** When computing an applicant's grade point average (GPA) for admissions purposes, the Office of Admissions includes grades earned in all academic courses (except developmental courses), whether passed, failed, or repeated, including those in which the student earned a grade of *D+*, *D*, or *D-*. However, a course in which the student earned a grade of *D+*, *D*, *D-*, or *F* is not transferable and will not count toward a degree. An *A* or *A +* earned on transferable coursework is awarded four points in admission GPA calculations. (See Academic Policies and Procedures (p. 62) for information about how the University computes GPA.)
- **Transfer coursework and the University's GPA:** Grades earned at other institutions are not averaged with grades earned at the University to determine the student's internal University grade point average.

Disputed credit

If the University refuses to accept lower-division credit earned at another Texas public institution of higher education, the student and the sending institution will be given written notice that transfer credit was refused. If nontransfer of credit is disputed, the University will attempt to resolve the matter with the student and the sending institution according to applicable rules and guidelines of the Texas Higher Education Coordinating Board. If the dispute is not resolved to the student's or the sending institution's satisfaction within forty-five days of the initial notification, the University will notify the Coordinating Board of the refusal of the transfer credit and the reasons for refusal. The Coordinating Board will resolve the dispute and notify the parties of its findings.

College credit for earning an International Baccalaureate diploma

Students who are admitted to the University and have earned an International Baccalaureate (IB) diploma during high school may qualify for 24 hours of college credit. Details about the program are available from Student Testing Services.

College credit for military service

Military veterans who enroll as entering undergraduates (freshman, transfer, or returning students) at UT Austin and meet certain requirements are eligible to receive up to 12 semester hours of undergraduate elective coursework credit for the time they spent in the service. Eligibility requirements are defined in Section 51.3042 of the Texas Education Code.

The credit is awarded for having served, not for any college-level courses that the veteran may have taken while in the military. To be eligible to receive credit for military service, a veteran must

- Have graduated from a public or private high school accredited by a generally recognized accrediting organization or from a high school operated by the United States Department of Defense.
- Have completed at least two years of service in the armed services (unless the veteran was discharged because of a disability).
- Have been honorably discharged from the armed forces.

Admitted students who may qualify for credit for military service should speak with a representative of the Office of Admissions upon enrollment at the University.

Recruiting Students for Undergraduate Admission

The Office of Admissions offers a variety of services and resources to assist prospective students with the undergraduate admissions

application process. Undergraduate applicants are encouraged to use all available resources, especially consultation with the University's admissions representatives and counselors.

Admissions representatives work in communities throughout the state of Texas. The University's admissions representatives provide detailed information about, and assistance with, the freshman and transfer admissions and enrollment processes through consultation, information sessions, and local events.

The Office of Admissions participates in a variety of activities and efforts designed to recruit prospective freshman and transfer students.

- Collaborating with high school counselors in Texas and in other states and with junior and community college officers across the state.
- Hosting counseling and information sessions and conducting campus tours for prospective freshman and transfer students.
- Hosting meetings with representatives from UT Austin admissions, student affairs, and academic affairs offices for prospective transfer students visiting the campus.
- Hosting on-campus events for prospective freshman and transfer students.
- Participating in community college recruiting events across the state and visiting community colleges and business and industry locations to provide information for prospective transfer students.
- Participating in college nights and college fairs across the state and the nation to provide information to prospective freshman and transfer students.
- Working with academic and student affairs offices and departments across campus to assist students in their transition to UT Austin.
- Working with alumni and outreach centers across the state and nation to facilitate student recruiting through information distribution, events, and activities.

Freshman Admission

Freshman applicants should take advantage of the detailed information and resources available through Texas Admissions - Freshman.

Eligibility to Apply

To be eligible to apply for freshman admission, an applicant must:

- Have graduated or be on track to graduate from high school or receive a GED and
- Have not enrolled in another college or university after graduating from high school or earning a GED.

To be eligible to apply for freshman admission, a Texas public high school applicant must also be on track to graduate under the high school coursework requirements defined in the state's Uniform Admission Policy. Texas private high school applicants and applicants from Department of Defense schools must be on track to complete coursework that is equal in content and rigor to the requirements in the Uniform Admission Policy. See Admission Decisions below for information about requirements for automatic admission.

No student is exempt from the University's minimum coursework requirements: four units of language arts, two units of a single foreign language, three units of mathematics at the level of Algebra I or higher, two units of science, three units of social studies, one and one-half units of electives, and one-half unit of fine arts. (Computer science/programming courses may be used to fulfill the admissions foreign language requirement.)

Meeting the minimum requirements makes a student eligible to apply for admission, but exceeding the minimum is often necessary for applicants to be competitive for admission to many of the University's academic programs.

Under Texas law, graduates of unaccredited high schools may seek admission to the University.

Admission Deficiencies

Some applicants may be required to complete the University's deficiency process in order to meet UT Austin's minimum coursework requirements. Applicants who appear to be deficient after applying for admission are notified by the Office of Admissions that they must submit additional information through an online process. Notified students who fail to complete the deficiency process will not be considered for admission.

Admitted students must complete the coursework required to remove a deficiency before they enroll at the University. A deficiency in foreign language must be removed by achieving first-year college-level credit in a foreign or classical language, by earning a passing score on the appropriate placement examination given by the University, or by taking computer science/programming coursework, when applicable. A deficiency in mathematics must be removed by earning credit for M X01 College Algebra, or M X03D Applicable Mathematics, or an equivalent transfer course. For all other subjects, one semester of college credit is required to remove a deficiency of one year or less of high school credit.

Freshman Application Procedures

To be considered for admission as a freshman, an applicant must submit all required items by the deadline published on Texas Admissions.

1. **Application.** A completed Freshman application.
2. **Transcript and rank.** An official high school transcript showing coursework information through the end of the junior year along with information about the applicant's class rank and high school class size (usually noted on the transcript). If your high school does not rank students, provide a statement from your school describing its policy, a copy of your school's profile, and a GPA or grade distribution report.
3. **High school coursework or exemption information.** Documentation showing that the applicant is on track to meet high school coursework requirements or is requesting an exemption to meet the state's Uniform Admissions Policy; applicants who claim an exemption based on equivalent coursework must submit a certification/exemption form as described above.
4. **Test score.** An official test score report for the SAT Reasoning Test or the ACT Assessment is required. More information may be found on Texas Admissions-Freshman.
5. **Fee or waiver request.** The application processing fee or a request for a fee waiver.

Additional requirements for some applicants

In addition to the items required of all applicants, some applicants are required to submit additional items. Some applicants, for example, may be required to submit the online Student Information Form to provide details about high school coursework. In addition, international freshman applicants must submit Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores as well as evidence of sufficient financial support while studying in the United States. In addition, some majors require applicants to submit major-specific application requirements.

Additional information about applying for freshman admission, including details about reporting rank, high school coursework requirements, and testing requirements, is available on Texas Admissions - Freshman.

Keeping prospective students informed

In accordance with the admissions policy adopted by the University of Texas System Board of Regents, the Office of Admissions works diligently to keep students informed about items needed to complete an admissions application and about the status of their individual applications throughout the process. MyStatus – a secure online portal for UT Austin applicants – provides detailed information about application status (incomplete, complete, in review, etc.) and about items needed to complete an application for admission. The Office of Admissions also notifies applicants by email of the need to visit MyStatus for application information.

Reporting dual credit

A freshman applicant may not disregard any part of their academic record, including college credit earned as dual credit. Such coursework must be reported when applying for admission, and the applicant must submit official transcripts of the coursework.

Freshman Application Review Process

In keeping with the admissions policy adopted by the University of Texas System Board of Regents, the Office of Admissions uses an individualized, holistic review process to consider each completed freshman application. Annual file review training is conducted to assure that files are reviewed consistently and fairly based on admission criteria.

Applications from students who qualify for automatic admission are reviewed to determine majors. Applications from students who are not eligible for automatic admission are reviewed to determine admissibility and to make decisions about majors.

The following items are considered during holistic review:

1. Class rank
2. Strength of academic background
3. SAT Reasoning Test or ACT scores
4. Record of achievements, honors, and awards
5. Special accomplishments, work, and service both in and out of school
6. Essay(s) and required short answers
7. Special circumstances that put the applicant's academic achievements into context, including the applicant's socioeconomic status, experience in a single parent home, family responsibilities, experience overcoming adversity, and other information in the applicant's file
8. Recommendations (although not required)
9. Competitiveness of the major to which the student applies

No specific class rank, test score, or other qualification by itself—other than automatic admission based on section 51.803 of the Texas Education Code or admission for top students from small Texas high school graduating classes—ensures admission.

Admission decisions are made on the basis of the information submitted as part of the student's application. Applicants who believe that supplemental items will help convey information about their qualifications are encouraged to submit such items with their applications. Supplemental items often included with applications are expanded résumés of accomplishments and extracurricular activities, letters of recommendation, and letters addressing an applicant's special circumstances.

Admission Decisions

The Office of Admissions uses an individualized, holistic review process to consider each completed freshman application. Applications from students who do not qualify for automatic admission are reviewed to determine which students will be offered admission and to determine majors for those offered admission. Applications from students who do qualify for automatic admission are reviewed to make decisions about majors.

Texas applicants eligible for automatic admission

Section 51.803 of the Texas Education Code defines the rules that govern automatic admission to Texas universities. Under these rules, the University is required to use automatic admission to fill at least 75 percent of the spaces available to Texas residents in each admitted freshman class.

Each September, the University informs school districts of the rank that will be required to earn automatic admission to the University in the next application cycle. More information can be found at Admission Decisions.

In addition to graduating under the coursework requirements found in the state's Uniform Admission Policy, to be eligible for automatic admission, applicants from Texas public high schools must complete the Foundation High School Program with the Distinguished Level of Achievement. High school coursework exemptions are available for applicants who may be eligible for automatic admission and who attend private high schools in Texas or Department of Defense high schools. Available exemptions are based on achieving certain benchmarks on either the SAT or the ACT or completing high school coursework that is equal in content and rigor to the state's high school graduation requirements.

In order for a student to qualify for automatic admission, the high school must report the student's rank as prescribed by section 51.803 of the Texas Education Code.

To be considered for admission to the Cockrell School of Engineering, the Jackson School of Geosciences, and the Environmental Science major in the College of Liberal Arts and the College of Natural Sciences, applicants who are otherwise eligible for automatic admission to the University should meet the calculus-readiness requirement. To be considered for admission to other math-intensive majors (mathematics, business, physics, or computer science), an applicant who is otherwise eligible for automatic admission to the University should demonstrate math proficiency.

Automatic admission for military/veteran applicants

Students who qualify for automatic admission to UT Austin at the time they graduate from high school and who join the military after graduation maintain eligibility for automatic admission for the period of time they serve in the military. Military or veteran applicants interested in enrolling at UT Austin following military service who have not enrolled in college-level coursework since high school graduation should apply for freshman admission. Such applicants are reviewed holistically with the freshman applicant pool to determine the major to which they will be offered admission. Qualified applicants who have enrolled in college-

level coursework since high school graduation should apply for transfer admission.

Applicants not eligible for automatic admission

To be considered for freshman admission, applicants who are not eligible for consideration under the provisions of section 51.803 of the Texas Education Code must normally have graduated from or be on track to graduate from high school and have met the high school preparation requirements.

As a state-assisted institution, the University reserves 90 percent of its spaces for Texas residents per Texas law; 10 percent of the spaces are reserved for out-of-state and international students.

Notifying applicants of admission decisions

In keeping with the admissions policy adopted by the University of Texas System Board of Regents, the Office of Admissions notifies freshman applicants of their admission decisions as soon as possible. Summer/fall applicants who qualify for automatic admission are notified of their admissibility soon after their applications are complete. All freshman admissions decisions for summer/fall are communicated by the spring before the entry semester. The Office of Admissions also works to deliver spring decisions in a timely manner.

Alternative paths to admission

The University works to identify and develop alternative admission programs that offer prospective students a clear path to completion of an undergraduate degree at the University. These programs include: Path to Admission through Co-Enrollment (PACE), a co-enrollment program with Austin Community College, and the Coordinated Admission Program (CAP), a University of Texas System program through which students enroll in a UT System university during their freshman year and then transfer to UT Austin—after successfully completing the program requirements—in order to complete their undergraduate studies.

Information about PACE and CAP requirements are available on Texas Admissions - Freshman.

Transfer Admission

Prospective transfer applicants should take advantage of the detailed information and resources available on Texas Admissions - Transfer.

Eligibility to Apply

In most circumstances to be eligible for transfer admission consideration, an applicant must:

1. Have graduated from high school or earned a GED
2. Have enrolled in an institution of higher education following high school graduation or receipt of the GED
3. Have earned 24 semester hours of transferable coursework at another college of university

While 30 semester hours of transfer credit is recommended for transfer applicants, students with at least 24 hours of credit will be considered based on the strength of their application and available spaces in the incoming class. In exceptional circumstances, students with fewer than 24 semester hours of credit may be considered for transfer admission under special review by appeal to the assistant vice provost of admissions.

Ineligible at other institutions

An applicant who is ineligible to continue at a previous institution for academic or disciplinary reasons is not eligible for admission to the University. There is no probationary or provisional admission for transfer applicants.

Students interested in transferring to the University will need to work with their previous institution and obtain good standing status before applying to UT Austin.

Degree holders

Students who have obtained a degree at another college or university but are interested in working toward an undergraduate degree at UT Austin must apply for undergraduate transfer admission in the same way as students who have not yet earned a degree.

Former CAP and PACE participants

Students who participated in the Coordinated Admission Program (CAP) or Path to Admission through Co-Enrollment (PACE) but did not complete the requirements or decided not to enroll at UT Austin despite successful completion of the requirements must apply for transfer admission if interested in attending UT Austin at a later date.

Additional situations requiring application for transfer

UT Austin graduate students who are interested in taking undergraduate courses but who have never attended UT Austin as an undergraduate must apply for undergraduate transfer admission. The same is true for students who have taken only correspondence or extension courses at UT Austin as well as students who have taken only summer courses when enrolled as a visiting transient student.

Transfer Application Procedures

To be considered for transfer admission, an applicant must submit the items listed below by the application deadline. Official transcripts and test score reports submitted to the Office of Admissions will not be duplicated or returned to the student. Faxes of transcripts and applications are not accepted.

1. **Application and essays:** A completed Transfer application, including the required essays and statement of purpose.
2. **Transcripts:** Separate, official transcripts from each college attended, including any at which the applicant enrolled while in high school. Every college-level course the student took must be reported on a transcript from the institution at which the student enrolled in the course, even if it also appears on the transcript of another institution that accepted it for transfer credit. Summer and fall applicants must submit official transcripts of all coursework undertaken through the previous fall; spring applicants must submit official transcripts of all coursework undertaken through the previous summer.
3. **Fee (or exemption request):** The nonrefundable application fee or a request for an exemption, described in the section Application Processing Fee (p. 16).
4. **Résumé:** An expanded résumé that provides information about the applicant's previous five years of academic, extracurricular, community, and work activities, honors, and awards.

The following items are required for some applicants:

1. Permanent resident alien applicants must submit a photocopy of the front of the permanent resident card or temporary evidence of I-551 in the passport.
2. Transfer applicants (including United States citizens and permanent residents) who have undertaken a significant amount of their college coursework in a country in which English is not the only language spoken must show proficiency in English by presenting a score

on either the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET). Details about possible exemptions are available on Texas Admissions - Transfer.

3. International transfer applicants must submit evidence of sufficient financial support while studying in the United States.

Required for enrollment

Before enrolling at the University, admitted transfer students must submit an official high school transcript. The transcript is used to verify completion of the units in foreign language and mathematics that are requirements of many university degrees. Although the high school transcript is not required for admission, applicants are strongly encouraged to submit it with other admissions credentials by the deadline.

Automatic admission for eligible transfer applicants

Section 51.8035 of the Texas Education Code establishes criteria for automatic admission to the University for qualifying transfer applicants who began their studies at a Texas community or junior college following high school graduation. Visit Automatic Transfer Admission for details.

Automatic admission for military/veteran applicants

Students who qualify for automatic admission to UT Austin at the time they graduate from high school and who join the military after graduation maintain eligibility for automatic admission for the period of time they serve in the military. Qualified military or veteran applicants interested in enrolling at UT Austin following military service who have enrolled in any college-level coursework since high school graduation should apply for transfer admission. UT Austin waives the 24 semester-hour transfer coursework requirement for qualified military/veteran applicants. Such applicants are reviewed holistically with the transfer applicant pool to determine the major to which they will be offered admission. Applicants who have not enrolled in college-level coursework since high school graduation should apply for freshman admission.

Transfer Application Review Process

All applications for transfer admission are reviewed and evaluated individually and holistically. Admission decisions are made after careful consideration of the strength of the applicant's academic background; their record of achievement and accomplishment, both in and outside of the classroom; and related factors reported by the applicant in writing.

The Office of Admissions considers the following items when looking for evidence of a strong academic background:

1. Substantial coursework from a challenging academic institution or program
2. Evidence of relevant coursework and experiences related to requested field of study
3. Required and appropriate courses for specific areas of study
4. Evidence of a positive academic trend

The following items form the basis for evaluating an applicant's record of achievement and accomplishment:

1. Indications of a superior level of achievement in a particular area, or particular attributes that would be an asset to a department or college
2. Letters from deans, department chairs, or faculty members that attest to the applicant's qualifications for their respective programs
3. Information on a personal résumé that attests to the applicant's skills, abilities, experiences, or background
4. Performance at an audition or the quality of a portfolio, when required for the applicant's proposed major
5. Scores on the Test of English as a Foreign Language or the International English Language Testing System, when required
6. Other special circumstances, including socioeconomic standing; educational goals; employment, internships, etc.; personal experiences and hardships; personal responsibilities; and any additional information submitted by the applicant

Enrollment pressures at the University may not permit admission of all who qualify for certain academic programs. When this occurs, the Office of Admissions, within applicable law, admits those students who are judged to be most able to contribute to and benefit from the University's rich, diverse, and academically challenging environment. Additional admissions requirements for some undergraduate programs are described in Major-Specific Application Requirements.

Grade point average computation

A transfer applicant's grade point average on transferable college coursework is a significant indicator of the applicant's academic strength. Because the Office of Admissions considers academic background as a factor when making transfer decisions, the grade point average can play an important role in an applicant's final admission decision.

The admission grade point average (GPA) is computed on all transferable college coursework the student has undertaken, whether passed, failed, or repeated. The Office of Admissions uses the University's numerical equivalents as described in Academic Policies and Procedures (p. 62) when computing GPA for transferable coursework.

- GPA is computed by dividing the total number of grade points by the total number of semester hours pursued. (Credit hours and grade points earned on the quarter system carry 2/3, or .66, the numerical value of those on the semester system.)
- Transfer credit is not given for courses in which incoming students have earned a grade of *D+*, *D*, *D-*, or *F*. However, if such courses would normally be eligible for transfer, they are included when GPA is calculated.
- During transfer GPA calculations, an *A* or *A+* earned on transferable coursework is awarded four points.
- Each instance in which a course is taken is counted when GPA is computed. For example, a course that a student takes twice in an effort to raise a grade is counted twice when the GPA is computed. However, transfer credit for a repeated course is counted only once.

Transfer and evaluation of credit

Applicants for transfer admission must submit official transcripts of all coursework taken at all other institutions for evaluation by the Office of Admissions. This evaluation determines whether the coursework could in any circumstance qualify for transfer credit at the University, but it does not constitute approval of the credit for use toward a degree; such approval is solely within the jurisdiction of a student's academic dean.

Additional information about evaluation of credit is available in Undergraduate Applicants with College Credit (p. 17).

Catalog eligibility for Texas transfer students

A student who transfers from another Texas public institution of higher education has the same catalog choices that the student would have had if the dates of attendance at the University had been the same as

the dates of attendance at the other institution. However, the student's choice of major may affect whether or not transferable coursework may be counted toward a degree. Rules about catalog choice are given in the undergraduate catalog in the section Graduation Under a Particular Catalog.

Coursework-in-residence requirement

Candidates for all undergraduate degrees must complete at least 60 semester hours of coursework in residence at the University. A transfer student who has completed a substantial amount of transferable, degree-applicable coursework may be obliged to take more courses at the University than their degree program requires, in order to meet the residence requirement. Students considering transfer after earning more than 60 hours of transferable credit should carefully review their options and the possible ramifications of the coursework-in-residence requirement before transferring. For more information, review the Non-Resident Tuition for Resident Students policy.

Transient Admission (Summer Only)

Undergraduate students who are pursuing degrees at other U.S. colleges and universities and wish to continue their studies at the University during the summer only may be admitted to some undergraduate programs as visiting transient students. A transient student who then wishes to be admitted to the University on a regular basis must apply for admission as a transfer student.

Visiting transient students may not register in Graduate and Postdoctoral Studies but may take graduate courses if qualified. If a visiting transient student is subsequently admitted to the University as a regular student, credit earned while enrolled as a transient student may be used to meet undergraduate degree requirements but may not be used to fulfill the requirements for a graduate degree.

Students who attend the University as transient students and then are admitted on a regular basis are immediately subject to the University's academic regulations. In particular, such a student will be placed on academic warning upon enrollment if their grade point average for work undertaken as a transient student at the University is below 2.00.

Fresh Start

Section 51.931 of the Texas Education Code provides that a resident of Texas may apply for admission to the University as an undergraduate student without consideration of course credit or grades earned 7 or more years prior to the semester the applicant plans to enroll. To be admitted, the applicant must meet the admission standards in effect at the time of application. Students admitted under fresh start receive no credit for coursework taken 7 or more years before enrollment, even if a degree was earned.

Fresh start applicants must apply for transfer admission (or readmission if they attended UT Austin in the past), must submit transcripts for all college-level coursework taken and all required application items by the transfer deadline, and must have the minimum number of transferable courses.

Enrollment as a Nondegree Student

A student who holds a bachelor's degree from an accredited institution, including UT Austin, may apply for admission as a nondegree student in one of the undergraduate colleges or schools. Students seeking nondegree admission follow the process for undergraduate transfer applicants and are considered on a competitive basis with transfer applicants for the same semester. Some undergraduate majors are not open to nondegree students; applicants must select from available nondegree majors.

Nondegree students are subject to the rules that apply to other undergraduates. With the approval of the Office of Admissions and the dean's office of the applicable college or school, nondegree students may change to degree-seeking status in an university undergraduate program or school. Such students must meet the criteria required of all transfer applicants.

With the approval of the instructor and the graduate advisor, a nondegree student may take any graduate course for which they meet the prerequisite. However, graduate courses that a student takes while enrolled as an undergraduate nondegree student may not later be counted toward a graduate degree.

Exchange students

A student who is admitted to the University through a reciprocal exchange program is also classified as a nondegree student. An exchange student may not register for more than two fall or spring semesters and one summer semester. The transferability of academic credit to the student's home institution is determined by the home institution.

An exchange student may later apply for admission to the University as a degree-seeking student, but only after completion of the exchange period. If the student is admitted as a degree-seeker, credit that they earned as an exchange student may be counted toward a university degree only on a limited basis and only with the approval of the student's dean.

To be considered for admission to some undergraduate majors, applicants must submit additional information or meet additional requirements beyond those for applying to the University.

Major Specific Requirements and Prerequisites

A full list of major specific requirements for freshman or transfer applicants can be found on the College and School section of the Office of Admissions website.

All freshman applicants must meet the appropriate high school prerequisites. Additional information is available on the Prerequisites page of the Office of Admissions website.

Information on Prerequisites and Major Specific application items are also shared with applicants as applicable through MyStatus, the University's secure admissions portal.

Foreign language requirement

UT Austin undergraduate students are expected to have completed two years of a single foreign language in high school. Applicants who meet the University's foreign language high school coursework requirement with computer science coursework may be required to earn credit at the beginning level proficiency in a single foreign language to complete their undergraduate degree requirements. See Foreign Language in the Undergraduate Catalog.

Admission to upper-division work and requirements for continuing study

Some undergraduate academic programs admit new students as undeclared or entry-level majors within a college or school. In such cases, students must meet certain requirements—earn a certain grade point average in specified coursework, for example—to move into upper-

level study. In some cases, students must apply for admission to a concentration or to a professional program after meeting the specified requirements.

Readmission of Former Undergraduate Students

Former University students who were not enrolled the previous fall or spring semester must apply for readmission. Students who completed the requirements for a degree from the University in the previous semester or summer semester must also apply for readmission. (Former graduate students who have never been enrolled at UT Austin as undergraduates and who wish to take undergraduate courses must apply for undergraduate transfer admission.) Application materials must be submitted by the deadline for former students. To be eligible to re-enroll, a former student who has subsequently attended another college must submit an official transcript from each college showing a grade point average of at least 2.50 on a 4.00 scale for all transferable coursework the student has undertaken since leaving the University. (Students who have taken only one transferable course in their absence must earn at least a 2.00 on that course.) Each application will be reviewed by the office of Admissions for continued eligibility. Readmission requires official approval from the Office of Admissions. This requirement does not apply to work taken during a summer semester that falls between consecutive spring and fall semesters in which the student is enrolled at the University.

A student who leaves the University on academic warning will be on academic warning when readmitted, even if they have attended another institution in the interim. Students previously dismissed from the university for academic reasons, contact the dean's office of your college or school before applying to find out if you are eligible to re-enter.

Former students who wish to enter the School of Law, the Graduate School, or the graduate program of the McCombs School of Business for the first time must meet the requirements and deadlines given in the appropriate section of this chapter. Additional information about graduate and law programs is given in their respective catalogs.

Readmission Following Military Service

In accordance with section 51.9242 of the Texas Education Code, a student who withdraws from the University in order to perform required military service will be readmitted for any semester that begins within a year after the student's release from required service. The student is not required to apply for readmission or pay an application fee. However, the student must submit the Notification of Intent to Re-Enroll. This form allows the University to prepare for the former student's return. If the form is submitted late, the student's registration may be delayed. To prevent a delay, the former student should submit the form at least two weeks before they expect to register for classes.

This policy applies to students who withdraw for service with the United States armed forces or the Texas National Guard; however, it does not apply to students who withdraw solely to perform one or more training exercises as members of the Texas National Guard.

Graduate Admission

A summary of the general requirements, application fees, deadlines, and procedures for graduate admission follows. Prospective students should refer to the Graduate Catalog for further information.

Requirements

General requirements for admission to Graduate and Postdoctoral Studies are:

1. A bachelor's degree from a regionally accredited institution in the United States or a comparable degree from a foreign academic institution. The Office of Graduate Admissions (OGA) will determine eligibility for admission in consultation with prospective graduate programs.
2. A grade point average of at least 3.00 in upper-division (junior- and senior-level) coursework and in any graduate work already completed.
3. An official score for the Graduate Record Examinations General Test (GRE), unless otherwise specified by the graduate program to which the student is applying. The McCombs School of Business requires master's and doctoral degree applicants to submit a satisfactory score for either the GRE or the Graduate Management Admission Test (GMAT). Applicants to dual or combined degree programs with the School of Law must submit a satisfactory score for the Law School Admission Test (LSAT) as well as for the GRE or GMAT. International students who native language is not English must also submit scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET). The Institutional TOEFL (ITP) and the IELTS General Training are not accepted. For more information on which countries qualify for a waiver of this requirement, as well as programs that do not waive the requirement, please visit the Graduate School's website. Applicants should consult the graduate advisor for the program of interest to learn which test the program requires.
4. Adequate subject preparation for the proposed major. Evidence of adequate preparation varies by program, but examples include letters of reference, auditions, samples of work, and personal statements.
5. A recommendation for acceptance by the Graduate Studies Committee for the proposed major area.

Applicants may apply simultaneously to more than one graduate program, but they may enroll in only one program, with the exception of applicants admitted to dual degree programs. All complete applications are forwarded to the Graduate Studies Committee(s) for the proposed area(s). Admission decisions are based on a careful and holistic review of all aspects of the applicant's file including standardized tests, grade point average, letters of recommendation, research and teaching experience, etc. Scores on standardized tests such as the GRE are not the sole criterion for making an admission decision or ending consideration of the application. Information about admission criteria for each graduate program is available from the graduate advisor.

When there are more qualified applicants than can adequately be instructed by the faculty or accommodated in the facilities, the Graduate Studies Committee (GSC) for the proposed area may deny admission to students who have met the prescribed requirements. GSC admissions recommendations to the vice provost for graduate and postdoctoral studies are final; there is no appeal. All admissions must be approved by the vice provost for graduate and postdoctoral studies.

Applicants who feel that their grade point averages or test scores are not valid indicators of ability should explain their concerns in a letter to the graduate advisor of the program to which they are applying.

Admission Tests

The Graduate Record Examinations General Test (GRE), the Graduate Management Admission Test (GMAT), and the Test of English as a Foreign Language (TOEFL) are offered at testing centers throughout

North America and at selected international sites. Current information about GRE and TOEFL test dates, locations, and registration procedures is published by the Educational Testing Service. Similar information about the GMAT is published by the Graduate Management Admission Council.

The International English Language Testing System (IELTS) is administered in more than 120 countries and is available off-site in additional countries. Information about IELTS test dates, locations, and procedures is published on their website.

The Duolingo English Test (DET) is only administered online. Information about the DET registration procedures is published on their website.

The Institutional TOEFL (ITP) and the IELTS General Training are not accepted.

Applicants to dual or combined programs with the School of Law must also take the Law School Admission Test (LSAT), administered by the Law School Admission Council. Information about the LSAT is published by the Council.

Rescinding Offers of Admission

The Office of Graduate Admissions (OGA) has the authority to rescind an offer of admission to a student who, after being admitted to the University, fails to maintain the level of academic, achievement or honor code standards that were displayed in the information the student submitted when applying for admission to the University. Applicants who falsify any part of their application or the documents required to complete the application process are subject to cancellation of their offer of admissions or disciplinary action.

Students at the University are expected to conduct themselves in ways that reflect the University's Student Honor Code.

Graduate and Postdoctoral Studies Select Admission Program

The Graduate and Postdoctoral Studies Select Admission Program allows graduate programs to recommend academically outstanding University of Texas at Austin undergraduates for admission to seek a graduate degree in a state formula-funded degree program. Students are normally nominated in the junior year, and programs are encouraged to limit their nominations each year to one or two outstanding undergraduates.

Nominations are forwarded to the Office of Graduate and Postdoctoral Studies by the program's graduate advisor or graduate admissions office with the recommendation of the Graduate Studies Committee. Undergraduate candidates may be extended an offer of admission and financial aid as early as the junior year, conditional upon completion of the baccalaureate degree. Application and transcript fees are waived; some graduate programs may waive submission of GRE scores. Admitted students may enroll in graduate courses at undergraduate tuition rates during the senior year and reserve the courses for graduate credit.

Additional information about the Graduate and Postdoctoral Studies Select Admission Program is available in the Office of Graduate and Postdoctoral Studies and from the graduate advisor of the nominating graduate program.

Conditional Admission

Almost all of the students who are admitted to the Graduate and Postdoctoral Studies have qualifications equal to or better than the minimum standards outlined in Graduate Admission Requirements (p. 23). However, a Graduate Studies Committee may recommend, with the consent of the vice provost for graduate and postdoctoral studies, that a student be admitted to the Graduate and Postdoctoral Studies with conditions. The Graduate Studies Committee may require the student to maintain a certain grade point average or to take a certain number of semester hours of coursework. A conditionally admitted student may also be required to remedy deficiencies in undergraduate preparation by taking upper-division or graduate courses. The graduate advisor notifies the student of these conditions at the time of admission. The Graduate Studies Committee petitions the vice provost for graduate and postdoctoral studies for removal of conditions once the conditions have been met.

A student who does not fulfill the conditions within the specified time may be barred from subsequent registration in Graduate and Postdoctoral Studies. If the student changes their major before the conditions have been fulfilled, the conditions remain in effect unless the graduate advisor for the new program, on behalf of the Graduate Studies Committee, petitions the vice provost for graduate and postdoctoral studies and receives approval for them to be changed.

Students admitted with conditions are not eligible to be graduate student academic employees, except under rare and unusual circumstances and with the approval of the vice provost for graduate and postdoctoral studies.

Admission as a Nondegree Student

A person who would like to take graduate coursework without becoming a candidate for an advanced degree may apply for admission to a graduate program as a nondegree student. Admission as a nondegree student is not available in all graduate programs. Enrollment as a nondegree student is normally limited to one year. Nondegree students are not eligible to be teaching assistants, assistant instructors, graduate research assistants, academic assistants, assistants (graduate), or tutors (graduate).

The applicant must submit an application and transcripts of all college coursework to the Office of Graduate Admissions (OGA). As with degree-seeking applicants, nondegree applicants must possess a bachelor's degree from a regionally accredited institution in the United States or a comparable degree from a foreign academic institution. The Office of Graduate Admissions (OGA) will determine eligibility for admission in consultation with prospective graduate programs. Graduate Record Examinations (GRE) scores are not required unless otherwise specified by the graduate program. International students who native language is not English must also submit scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET) unless otherwise exempt. Admission must be recommended by the Graduate Studies Committee for the program and approved by the vice provost for graduate and postdoctoral studies.

A graduate nondegree student who later wishes to seek a graduate degree must meet the requirements for admission (p.), submit all required materials and items by the program's deadline, and must pay the usual application fee. A degree-seeking student may petition to have applied to the master's degree up to six semester hours of graduate credit earned while they were a graduate nondegree student.

Exchange students. A graduate student who is admitted to the University through a reciprocal exchange program is classified as a nondegree student. An exchange student may not register for more than two long terms and one summer term. The transferability of academic credit to the student's home institution is determined by the home institution.

An exchange student who wishes to take a graduate course must 1) obtain the approval of the instructor and of the graduate advisor for the program that offers the course, 2) meet all course prerequisites and, 3) meet any other requirements affecting nondegree students. An exchange student may later apply for admission to the University as a degree-seeking graduate student. To do so, the student must submit the usual test scores, application fee, and other required material by the graduate program's deadline.

Exchange students admitted as graduate nondegree students. If a graduate nondegree exchange student is later admitted to Graduate and Postdoctoral Studies as a degree seeker, the Graduate Studies Committee may ask for the vice provost for graduate and postdoctoral studies approval to include on the student's master's degree Program of Work up to six hours of graduate coursework that the student completed as a graduate nondegree exchange student. All requirements related to courses that may be counted toward graduate degrees apply, including rules concerning courses counted toward another degree.

Exchange students admitted as undergraduate nondegree students. If an undergraduate nondegree exchange student is later admitted to Graduate and Postdoctoral Studies, graduate courses that they took as an undergraduate nondegree exchange student may not be counted toward a graduate degree.

Recommended Application Dates for Graduate Study

Each graduate program sets its own application deadline. Summer and fall applications typically open on August 1 for the following year. Few graduate programs admit new students for the spring term; those that do generally open applications in January for the following year and have deadlines no later than October 1. Deadlines posted are the dates by which all documents and test scores must be received. It is the applicant's responsibility to monitor their application status, to ensure all required items are submitted, and to meet the deadline set by the graduate program. A list of program deadlines is published by the Office of Graduate and Postdoctoral Studies. Applicants should complete and submit their applications, as well as all supporting documents, well in advance of the application deadline. Certain items, such as test scores, take several weeks to arrive and applicants should plan accordingly.

To apply for financial aid in the form of gift aid, which includes grants and scholarships, and self-help aid, which includes student employment programs and long-term loans, applicants are encouraged to complete the Free Application for Federal Student Aid (FAFSA). More information about these programs and deadlines for filing the FAFSA are published by the Office of Scholarships and Financial Aid. Information is also available by mail from The University of Texas at Austin, Office of Scholarships and Financial Aid, PO Box 7758, Austin TX 78713-7758.

Individual graduate programs may also offer financial assistance to their students in the form of assistantships or fellowships. For more information about these programs and deadlines for applying to them, applicants should contact the graduate program of interest. Financial aid decisions are made soon after program application deadlines, and applicants whose materials have not been received may not be given full consideration.

Fellowships

University fellowships, which are administered through the Graduate School, are awarded to both entering and continuing graduate students in most academic areas. Students must be nominated by their graduate advisors for any fellowship administered by the Office of Graduate and Postdoctoral Studies, but many award decisions are made at the college or program level. Additional information on University fellowships is published by the Office of Graduate and Postdoctoral Studies.

University recruiting fellowships for entering graduate students are awarded on the basis of scholastic excellence and adequate preparation for graduate study in the student's chosen field, as shown by their academic record and letters of recommendation. University fellowships for continuing students are awarded on the basis of the student's record since entering Graduate and Postdoctoral Studies, including performance in relevant coursework and research or creative activity, letters of recommendation from University faculty members, and the endorsement of the graduate advisor. Financial need is also a consideration for some fellowships. There are a number of other competitive fellowships awarded by the University or by graduate programs with specific qualifications.

Generally, fellowships require no service from the recipient. Many major fellowships provide for payment of all or nearly all tuition in addition to the stipend. Recipients of certain graduate fellowships of $10,000 or more per year are eligible to participate in the University's staff group health insurance plan. Note that while access to the staff health plan is provided, funding may or may not be included depending on the fellowship award.

Application Processing Fee

All applicants to Graduate and Postdoctoral Studies must submit a nonrefundable application processing fee along with their application materials. Applicants may apply simultaneously to more than one graduate program; a fee may be charged for each application. An applicant may be eligible for a waiver of the fee on the basis of documented financial need. Applicants may consult with the Office of Graduate Admissions (OGA) to determine eligibility for a waiver. Application fees cannot be refunded, even if the application is not completed or the applicant is deemed ineligible.

US citizens, permanent residents, and University of Texas at Austin undergraduates

The fee for applicants to Graduate and Postdoctoral Studies is $65. The fee for applicants to the full-time, working professional, and executive Master of Business Administration (MBA) programs is $200. The fee for applicants to the Master in Professional Accounting (MPA) program, including students in the integrated BBA/MPA program, is $125. Applicants applying to a dual-degree program with the Master of Business Administration (MBA) program will pay only the higher of the application fees.

International applicants

The fee for applicants who are not citizens or permanent residents of the United States is $90. The fee for applicants to the full-time, working professional, and executive Master of Business Administration (MBA) programs is $200. The fee for applicants to the MPA program is $125. Applicants applying to a dual-degree program with the Master of Business Administration (MBA) program will pay only the higher of the application fees.

Enrollment Deposit

Some graduate programs require students to pay a nonrefundable enrollment deposit upon admission to indicate that they accept the offer of admission. For students applying to dual degree programs, one deposit serves to confirm the student's intention to enroll in both programs. When both programs require a deposit, only the higher fee is required. The deposit is applied to the payment of fees when the

student enrolls. Students who demonstrate financial need may qualify for assistance to cover the deposit.

An enrollment deposit is assessed in the following graduate programs:

Programs	Degree	Deposit
Accounting	MPA	$950.00
Business administration	MBA, full-time	$2,000.00
Business administration	MBA, working professional and executive	$2,000.00
Business Analytics	MSBA, Option III	$2,000.00
Communication Studies	MA, Option III	$1,000.00
Communication Studies-Strategic Communication Stackable Certificate	Stackable Certificate, Option III	$1,000.00
Communication Studies-Sports Communication Stackable Certificate	Stackable Certificate, Option III	$1,000.00
Computer Science	MSCS, Online Option III	$500.00
Data Science	MSDS, Online Option III	$500.00
Design	MA, Option III	$1,500.00
Economics	MA, Option III	$2,000.00
Electrical and Computer Engineering	MSE, Option III	$1,000.00
Electrical and Computer Engineering - Software Engineering	MSE, Option III	$1,000.00
Engineering Management	MSE, Option III	$1,000.00
Finance	MSFin, Option III	$2,000.00
Health Care Transformation	MSHCT	$2,000.00
Human Dimensions of Organizations	MA, Option III	$1,500.00
Identity Management and Security	MSIMS, Option III	$1,000.00
Information Security and Privacy	MSISP, Option III	$1,000.00
Information Technology and Management	MSITM, Option III	$2,000.00
Marketing	MSMkt, Option III	$2,000.00
Mechanical Engineering	MSE, Option III	$1,000.00
Nutritional Sciences	MSNS, Option III	$500.00
Public Leadership	MPL, Executive Option III	$1,000.00
Social work	MSSW, PhD	$150.00
School of Architecture	M Arch I, MAAD, MAAH, MID I, MID II, MLA I, MLA II, MSAS, MSCRP, MSHP, MSSD, MSUD, PhD in ARC, PhD in CRP	$350.00

Law School Admission

Overview

The primary goals of the admission process for the School of Law are:

- to identify those students with the greatest probability of success in law school, considering proven predictors (standardized test scores, undergraduate grade point average, the applicant's undergraduate school and major) and giving appropriate weight to all other factors in the applicant's file;
- to identify students who exhibit a demonstrated commitment to public service, leadership, and other qualities valuable to the legal profession;
- to identify students whose background, experience, and other qualities are likely to be of value in the classroom and in the School of Law; and
- to provide a service to the state of Texas by educating its citizens from underrepresented regions of the state and disadvantaged socioeconomic backgrounds.

The School of Law takes great care in reviewing each application holistically. The many factors the Admissions Committee takes into consideration include but are not limited to: academic rigor of undergraduate study; graduate study; demonstrated commitment to public service; work experience; leadership experience; extracurricular or community activities; disability; socioeconomic disadvantage and/or first-generation college-student status; exceptional communication and writing ability; proficiency in languages other than English; honors and awards; service in the Armed Forces; publications; and any other personal characteristics or experiences that would contribute to the overall enrichment of the School of Law.

Application Procedures

Please refer to the School of Law admissions website for detailed information about the policies and procedures.

First-Year Applicants

To be considered for admissions at the School of Law as a first-year student, an applicant must register with the Law School Admission Council (LSAC) and the Credential Assembly Service (CAS), take the Law School Admission Test (LSAT) or Graduate Record Examination (GRE), and demonstrate that they have earned a bachelor's degree from a regionally accredited U.S. university, or the foreign equivalent whose program has been deemed of comparable quality, prior to the start of the first fall semester at the School of Law. Further, all applicants must have achieved a minimum undergraduate grade point average of 2.20, as calculated by LSAC (unless the applicant was enrolled as an undergraduate under the Academic Fresh Start option pursuant to Section 51.931 of the Texas Education Code).

Transfer Applicants

To be considered for admissions at the School of Law as a transfer student, an applicant must be attending a law school that is accredited by the American Bar Association and a member of the Association of American Law Schools. The applicant must register with the Law School Admission Council (LSAC) and the Credential Assembly Service (CAS), and demonstrate that they have completed the first-year curriculum in good academic standing.

Transient (Visiting) Applicants

To be considered for admissions at the School of Law as a transient (visiting) student, an applicant must have completed the first-year

curriculum in good academic standing at a law school that is accredited by the American Bar Association and a member of the Association of American Law Schools and register with the Law School Admission Council (LSAC).

Deadlines

The following deadlines are non-negotiable.

First-Year Applicants

- **September 1** - Application opens
- **November 1** - Application deadline for Early Decision
- **March 1** - Application deadline for Regular Decision

The School of Law must receive a student's valid LSAT and/or GRE score by the appropriate deadline to consider their application for admission.

Transfer Applicants

- **May 1** - Application opens
- **June 15** - Application deadline

The School of Law admits transfer students on a rolling basis once applications are complete; therefore, applicants are strongly encouraged to apply early.

Transient Applicants

- Summer Semester
  - **April 1** - Application opens
  - **May 15** - Application deadline
- Fall Semester
  - **May 1** - Application opens
  - **June 15** - Application deadline
- Spring Semester
  - **September 1** - Application opens
  - **November 15** - Application deadline

Please contact the School of Law Admissions Office to confirm whether courses will be available to visiting students before submitting an application. The School of Law is unable to refund any application fees.

Enrollment Deposit

Applicants admitted to the School of Law must submit a nonrefundable deposit of $500 (amount subject to change) to confirm their acceptance of the offer of admission. The deposit will be applied to the first semester tuition statement when the student enrolls.

Residency Regulations

Under Texas law and rules established by the Texas Higher Education Coordinating Board, each student applying to a public institution of higher education is classified for tuition purposes as a Texas resident, nonresident, or international student.

A student may be eligible for classification as a Texas resident if they meet the requirements to establish domicile in Texas, as defined by state law and Coordinating Board rules.

A U.S. citizen, national, or permanent resident who does not meet residency requirements is classified as a nonresident. A student who is not a U.S. permanent resident may be classified as an international student unless they hold an immigration status that allows them to establish domicile in the United States.

In some cases, students classified as nonresident or international may still qualify for in-state tuition through specific waivers or exceptions, as outlined in Coordinating Board rules.

Students entering the University for the first time, or returning after an extended absence, should review residency requirements carefully to understand their tuition obligations. Residency determinations are made through the Core Residency Questionnaire and supporting documentation submitted to the Office of the Registrar.

Students returning after an absence of more than two long semesters are required to submit a new residency questionnaire for review.

Information and advice on residency status is available from the Office of the Registrar.

Registration, Tuition, and Fees

Students at the University register for classes online; instructions are given in the Course Schedule. The only way to enroll in a class is to register for it through the proper registration procedure or to add a class after the initial registration. The instructor receives the student's name only by official notice from the registrar. Students may not receive credit for a course for which they are not registered.

By registering, a student enters a college or school of the University and, except in matters of conduct, is under the jurisdiction of the dean of that college or school. The dean has jurisdiction over the student's program of study and degree requirements. A student pursuing simultaneous majors in two colleges is subject to the regulations of both colleges. Students taking a course in a college or school other than the one(s) in which they are registered are subject, so far as that course is concerned, to the regulations of the college or school in which the course is given. In matters of conduct, all students are under the jurisdiction of the dean of students.

Texas Success Initiative

Undergraduate students who have not fulfilled requirements of the Texas Success Initiative (TSI) may be subject to enrollment restrictions or may have a hold for registration. TSI is described in Academic Policies and Procedures (p. 70).

Concurrent Enrollment at the University and Another Collegiate Institution

Concurrent enrollment occurs when a student is enrolled at two separate institutions simultaneously. Prior written approval of a student's academic dean is required to assure that a course taken at another institution while the student is concurrently registered at the University will count toward the student's degree. Concurrent enrollment policies of the colleges and schools are given in the Undergraduate Catalog. Information about fees for students enrolled concurrently at two institutions is given in Additional Fees (p. 42).

Continuous Registration of Graduate Students

All graduate students are expected to enroll and pay tuition by the twelfth class day of the fall term and the spring term of each academic year until graduation. If the student has been admitted to candidacy for the doctoral degree, registration in the dissertation course or the equivalent or in international study and research (ISR)

is required. The only alternative to continuous registration is a leave of absence, discussed in the Leave of Absence for Graduate Students (p. 28) section. In order to fulfill the continuous registration requirement, doctoral candidates who are readmitted must register retroactively and pay tuition for all long terms that have elapsed since they were last enrolled.

If a student who is not on approved leave fails to register by the twelfth class day, the student may not return to the University without applying for readmission. The student must apply for readmission both to the University and to the graduate program and must pay the general application fee. The application is reviewed by the Graduate Studies Committee, which may choose to readmit the student or to deny readmission.

Leave of Absence for Graduate Students

Degree-seeking graduate students may apply for a leave of absence of no more than two long terms. Requests for a leave of absence must be approved in advance by the graduate advisor and the vice provost for graduate and postdoctoral studies. Applications from students who have been admitted to candidacy will be approved by the vice provost of graduate and postdoctoral studies only in rare and unusual circumstances.

A student on approved leave must apply for readmission in order to return to the University, but readmission during the approved period is automatic and the application fee is waived.

A student on leave may not use any University facilities; nor is the student entitled to receive advice from any member of the faculty. A leave of absence does not alter the time limits for degrees or coursework.

Registration in Graduate and Postdoctoral Studies Following Graduation

Graduate students who wish to continue enrollment beyond the term in which their degree is awarded must be admitted as nondegree-seeking students or as degree-seeking students in a new degree program. Students must request a change of major or degree-seeking status from the Office of Graduate and Postdoctoral Studies.

In Absentia Registration

A student who is taking the final course(s) remaining to complete degree requirements via nonresident credit or a candidate for a degree who has completed the requirements for graduation and needs to register only for the purpose of having a degree conferred, may register in absentia. In absentia registration is not permitted for any other purpose; for graduate students, in absentia registration is allowed at the end of the summer semester for fall graduation as described below. In order for the degree to be awarded, the remaining coursework must be completed, the final grade recorded on the student's academic record, and degree requirements certified by the established deadlines for the term. Students registering in absentia must still meet in-residence requirements for a degree to be conferred.

Undergraduate Students

After registering for classes, undergraduate students may change to in absentia status only with the approval of their dean. The classes for which the student is registered should be dropped and the in absentia registration added through the normal add/drop procedure. If the change is made during the first 12 class days, the student's tuition is refunded.

Graduate Students

Students must be registered for the semester in which they graduate and must apply for graduation by the deadline published in the academic calendar. A student who fails to complete all degree requirements or misses the deadline for acceptance of the thesis, report, recital, dissertation, or treatise must register and pay tuition the following semester in order to receive the degree.

An exception is made for students who apply to graduate in the summer semester but miss the deadline for acceptance of the thesis, report, recital, dissertation, or treatise. In this case, the student will be registered in absentia for the fall semester, only for the purpose of receiving the degree, by degree evaluators in the Office of Graduate and Postdoctoral Studies. The thesis, report, recital, dissertation, or treatise must be accepted by the deadline for in absentia registration, which falls before the beginning of the following fall semester. Additional exceptions may be granted by the graduate dean under unusual administrative circumstances. The student will be registered in absentia only once.

Transfer from One Division to Another Within the University

Students in any university undergraduate program or school of the University may transfer to any other college or school within the University only under the general procedures and conditions described below.

1. To transfer, students must apply using the university internal transfer application. The application process is described on the Office of Admissions website. Transfer procedures must be completed by the end of the eighth class day in the fall or spring or the fourth class day in the summer for the transfer to be effective in the current term.
2. Students may apply to transfer only two times to each new college or school that has limited space for internal transfers. For these colleges and schools, the student must apply within the student's first four fall or spring semesters of enrollment at the University.
3. Students who transfer to a new college or school retain the same University warning status, if any, that was in effect at the time of the transfer.
4. Students who are dismissed under University-wide regulations from one college or school are ineligible to transfer to another college or school.
5. Restrictions based on credit earned:
   a. Students who have completed 45 or fewer semester hours of college credit are eligible to apply for transfer between colleges and schools regardless of their University grade point average, provided they satisfy all conditions and procedures that apply to students who enter the same college or school, and any program thereof, when first admitted to the University.
   b. Students who have completed more than 45 semester hours of college credit must have a University grade point average of at least 2.00 to qualify for transfer between colleges and schools. Generally, students with more than 45 semester hours of credit and a grade point average less than 2.00 may not transfer to another division within the University and must enroll in courses approved by their current college or school. All colleges are authorized to allow such students to register for courses required for the students' potential new majors, provided the normal prerequisites are met.

c. Students may not transfer to another college or school after they have completed 60 semester hours of coursework in residence. A student who wishes to seek an exception to this rule should petition the dean's office of the college into which the student would like to transfer. Approval of the petition will take into account the student's ability to graduate within four[1] years of entering the University.

6. Students may not transfer to another college or school after they have completed four fall or spring semesters in residence, regardless of the amount of credit they have earned. A student who wishes to seek an exception to this rule should petition the dean's office of the college into which the student would like to transfer. Approval of the petition will take into account the student's ability to graduate within four[1] years of entering the University.
7. Transfer students from other institutions of higher education are eligible to apply for transfer between colleges and schools within the University upon completion of their first fall or spring semester or summer semester at the University, regardless of the number of semester hours accumulated, provided they satisfy all conditions and procedures that apply to students entering the same college or school, and any program thereof, when first admitted to the University.
8. Students who are readmitted to the University after not enrolling for one or more fall or spring semesters are readmitted to the college or school in which they were last enrolled. Currently enrolled students may apply for transfer to another college or school (internal transfer), provided they meet the general conditions for transfer given in this section and any special admission requirements of the college or school to which they wish to transfer.
9. Graduate students not previously admitted to the University as undergraduates may apply to transfer from Graduate and Postdoctoral Studies to a university undergraduate program or school under the general conditions for transfer noted in items 1 and 2 only if they (a) satisfy any pertinent admission requirements for that university undergraduate program or school, and (b) have the additional approval of the director of admissions.

[1] Or more than four years if dictated by the length of the program.

Auditing a Course

Auditing a course is usually done for academic exploration and self-enrichment.

Permission to audit a course entitles the student to attend class but not to hand in papers, take part in discussion, or receive evaluations. An auditor does not receive University credit for the course audited. The audited course will not appear on the student's transcript.

A law student may not audit a law course.

A University student who wishes to audit a course should obtain a Class Auditor Permit from the Texas One Stop and secure the consent of the course instructor and the student's dean. A nonstudent must obtain the Class Auditor Permit from the Texas One Stop and the consent of the instructor. Nonstudents under the age of 65 are charged an audit fee of $20 a course.

Auditors are permitted only when space is available. An instructor or dean may refuse any request to audit a course. Nothing in these rules prohibits an instructor from permitting guests and visitors in a class.

Tuition and Fees

Policies governing the payment and refund of tuition, fees, and other charges are approved by the Board of Regents of The University of Texas System and comply with applicable state statutes. All charges are subject to change by legislative or regental action and become effective on the date enacted. For clarification of any matter relating to payment or refund of charges, a student should contact the office or administrative unit that originated the charge or refund.

Financial Responsibility

Students must sign a Financial Responsibility Statement (FRS) each semester prior to registration, and are expected to meet financial obligations to the University when they are due. Tuition is due on the date given in the academic calendar and can be found on My Tuition Bill. Students are not entitled to attend classes unless the tuition bill has been paid in full or in accordance with an installment plan. Failure to comply with tuition payment deadlines may result in the cancellation of registration. Other charges are due within 10 days after the bill is issued by the University, or according to any payment instructions on the bill. If the student does not pay the amount owed by the due date, the University may place a hold on the account, restrict the student from registration and may withhold diplomas.

Payment of registration fees must be made in full each semester by the payment deadline(s), or late fees will be assessed. Methods of payment include personal check, eCheck, electronic funds transfer, cash, money orders, cashiers check, or credit card (subject to a 2.3% convenience fee). Payments for larger amounts, the difference to be paid in cash to the student, cannot be accepted. All checks must be drawn on United States banks in United States dollars; collection charges that result from checks drawn otherwise are charged to the student.

For any questions, please contact Texas One Stop.

Returned Checks

Returned Checks are payments received by the University that cannot be processed due to reasons such as insufficient funds, incorrect account number, or stop payment. A $25 service charge is applied when a check or electronic payment is returned. Students must pay the balance within 10 days using cash, cashier's check, credit card, or money order (EFT, eCheck, or personal checks cannot be used to resolve the balance on the What I Owe website.) The University does **not** redeposit a check returned unpaid for any reason.

Failure to comply will result in refusal of future personal checks. If the returned check was for registration fees or bar clearance, the student's registration will be canceled, and additional fees will be charged. These fees will be added to the students account (see Additional Fees (p. 42)).

The University will not accept EFT, eCheck or personal checks from individuals who have had their registration canceled, was not responsive to request for payment, wrote a dishonored check to clear a bar or have a history of returned checks, even though restitution is promptly made. The restriction may last for a minimum of one year (dependent on the reason for the restriction), after which the student may appeal to have the bar lifted. All returned checks and bursar bar fees must be paid prior to consideration of the appeal. A written request must be sent by email to receive the personal check restriction appeal form.

For more information regarding returned checks, please review the Returned Checks page.

Payment Plans

An installment plan is a method of payment during the fall, spring, and summer semesters. Tuition payments must be made according to the plan's guidelines. Students sign an Installment Plan Note in the Financial Responsibility Statement (FRS) prior to registration each semester. Payment due dates are found on My Tuition Bill and are provided in the Academic Calendar (p. 7). Any student who does not pay their tuition bill in full by 11:59 PM CST on the 12th class day (4th class day for the summer) will automatically be enrolled in the installment plan and assessed a nonrefundable $15 installment plan fee. If the remaining balance of the tuition is not paid by the installment deadline, they will be charged an additional $25 late fee. It is the student's responsibility to track the amount due and payment deadlines on My Tuition Bill. If applicable, the following charges may also appear on a student's tuition bill: the international student health insurance program fee, the general property deposit and the late registration fee. The first payment is due by the date given in the Academic Calendar (p. 7).

First payment

There are three ways for students to make their first payment:

- Students have the option of paying their tuition bill in full, the minimum amount due, or any amount in between on My Tuition Bill.
- Students who have a "Zero Bill" must click the "Confirm Attendance" button to secure their registration before their tuition deadline.
- Students who have financial aid covering the bill in full, must click the "Pay with Financial Aid" button before their posted tuition deadline. Students who have financial aid posted on their bill may have a lower initial payment.

Additional payments

All tuition must be paid in full by 11:59 PM CST on the 12th class day in the fall and spring semesters, or by the 4th class day in the summer semester. Students who choose to initially pay the minimum amount due should pay their tuition in full by the above days, or they will be automatically placed on the installment plan, and will be assessed a nonrefundable $15 service charge. Students who do not pay the balance by the installment deadline, will be assessed a nonrefundable $25 late fee. It is the student's responsibility to track the amount due on My Tuition Bill. Students who add classes, change their major, or otherwise change their registration record may incur additional tuition fees after their initial payment. In this case, payment for additional tuition is due by the date given in the Academic Calendar (p. 7) or shown on My Tuition Bill.

Students who withdraw from the University after the first four weeks of class are responsible for the full amount of tuition. If a student fails to make a full payment on time, including late fees, they may be subject to one or more of the following actions, at the University's option: (1) hold against readmission to the institution; (2) withholding of degree; (3) all penalties and actions authorized by law.

Any questions regarding Financial Aid should be referred to Texas One Stop.

Specific information about paying the tuition bill is available in each semester's *Course Schedule.*

For additional questions about payment plans, please contact Texas One Stop.

Admission Application Processing Fees

Each applicant for admission to the University must submit a nonrefundable application processing fee. The amounts of these fees for undergraduate applicants are given in Undergraduate Admission (p. 16); for graduate applicants, in Graduate Admission (p. 23); and for law applicants, in Law School Admission (p. 26).

Applicants to the professional sequence in nursing must pay a nonrefundable processing fee; applicants to the professional curriculum in pharmacy must also pay a nonrefundable processing fee.

Tuition

The flat-rate tuition for each program covers the student's academic program costs, mandatory fees and charges, and college course incidental fees. It does not include the general deposit, the international student health insurance fee, the international student orientation fee, or fees for extended field trips that require students to live off-campus.

Flat-rate tuition for Fall 2026 and Spring 2027 is given in the tuition tables (p. 31). After selecting classes for a future semester, the student may view their estimated tuition bill at My Tuition Bill. Flat-rate tuition for Summer 2027 will be published on the Texas One Stop website.

The tables (p. 31) show tuition for students enrolled in a single college. Undergraduates with simultaneous majors in more than one college are charged only the higher college rate. Tuition for graduate dual degree programs is unique to each program; amounts are available from Texas One Stop.

The information in the tuition tables is not intended to be comprehensive and is subject to change. Tuition, fees, and charges are subject to change by administrative, legislative or regental action, and changes become effective on the date enacted. This information should be used only as a guideline for estimating charges.

Tuition Deferment

In accordance with the Veterans Benefits and Transition Act of 2018, Section 103 became effective August 1, 2019. Students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Veteran Readiness and Employment (Ch. 31) benefits must register for classes, submit a G.I. Bill® Questionnaire and VA Certificate of Eligibility for entitlement (or the equivalent award letter) to the Office of the Registrar, Veteran Certification team. This must be done no later than four business days prior to the initial tuition bill deadline for the semester requesting education benefits.

These students will not be restricted in any way for 90 days from the tuition bill deadline, if payment has not been received due to a delay in receipt of benefits from the VA. After the 90 days, the University will review each student on a case-by-case basis. The student is responsible for payment of any tuition balance not covered by their VA Education Benefit by the appropriate deadlines.

Nonresident Tuition for Resident Students

Because the University is a state-assisted institution, tuition rates are lower for Texas-resident students than for nonresidents, including both out-of-state and international students. Information about residency is given in Residency Regulations (p. 27). In the following

circumstances, a student who is classified as a Texas resident may be charged nonresident tuition:

Undergraduates

State law allows colleges and universities to charge a Texas-resident undergraduate the nonresident tuition rate, if the student has attempted an excessive number of hours beyond the number required for their degree. In addition, a higher tuition rate may be charged if a student enrolls again in a course they have completed.

As of the current academic year, the University does not charge undergraduates additional tuition for an excessive number of hours or for repeated courses.

Graduate students

A student who has earned more than 99 semester hours of credit at the doctoral level is subject to the nonresident tuition rate, even if the student is a Texas resident or holds an appointment that would normally entitle the holder to pay resident tuition. This policy, sometimes called the "99 hour rule," is authorized by section 54.012 of the Texas Education Code. More information about charges for excessive graduate coursework is available from the Office of Graduate and Postdoctoral Studies.

As of the current academic year, the University does not charge graduate students additional tuition for an excessive number of hours or for repeated courses.

Tuition Tables

House Bill 29, passed by the 83rd Texas Legislature, requires public institutions of higher education to offer a fixed tuition price plan to incoming freshman and transfer students. The University of Texas at Austin has met the requirements of the law by establishing Longhorn Fixed Tuition which is offered to eligible undergraduate students. Tuition rates for the academic year, including Longhorn Fixed Tuition rates for entering undergraduates, are published below. Undergraduates who enrolled in the Longhorn Fixed Tuition plan prior to this catalog's academic year can view their cohort rates online.

Non-Funded Program Fee Estimates: Fall 2026- Summer 2027

The University offers non-formula-funded (Option III) graduate programs to meet market demand which cannot be accommodated by formula-funded programs. Option III programs enable the University to fulfill demonstrated higher education and workforce needs as well as to serve a greater number of students than state resources support. Click the following link for additional details: UT Austin Partially Funded and Non-Funded Program Fees with VA-eligible expenses.

The fees published in this section assume continuous attendance by students. International students may be subject to additional fees, such as those associated with full-time enrollment required for a visa. When required, the deposit is included in the first semester's costs. Refer to the "Additional Fees (p. 42)" section of this catalog for details.

Estimate of per semester program fees is based on an example program schedule which may vary. Refer to the program for further information.

Texas Resident, New Student Fee Estimate

Degree Programs

Program	Total Program	Fall	Spring	Summer
Artificial Intelligence (MSAI)	$10,000	2,000 (F)	1,000	1,000
Business Administration, Evening/ Austin (MBA)	$141,000	28,200 (F)	28,200	28,200
Business Administration, Dallas (MBA)	$141,000	28,200 (F)	28,200	28,200
Business Administration, Houston (MBA)	$141,000	28,200 (F)	28,200	28,200
Business Administration, Houston (MD/MBA)	$79,000	26,333 (F)	26,333	26,334 (L)
Business Analytics (MSBA)	$55,600	N/A	N/A	12,600 (F)
Business Analytics, Working Professionals (MSBA)	$55,600	N/A	N/A	8,250 (F)
Communication Studies (MA)	$49,500	13,500 (F)	13,500	N/A
Computer Science (MSCompSci)	$10,000	2,000 (F)	1,000	1,000
Data Science (MSDS)	$10,000	2,000 (F)	1,000	1,000
Economics, 10-Month (MA)	$36,000	N/A	N/A	6,600 (F)
Economics, 18-Month (MA)	$43,500	N/A	N/A	6,600 (F)
Economics, 24-Month (MA)	$54,600	N/A	N/A	6,600 (F)
Educational Leadership and Policy (EdD)	$76,215	N/A	N/A	11,955 (F)
Educational Psychology, Applied Data Analytics (MSEdP)	$21,000	4,200 (F)	4,200	2,100
Electrical & Computer Engineering, Software Engineering and Systems (MSE)	$38,000	7,600 (F)	7,600	3,800
Engineering Management (MSE)	$50,000	10,000 (F)	10,000	5,000
Engineering Management, Fast Track (MSE)	$50,000	20,000 (F)	20,000	5,000
Finance (MSF)	$55,600	N/A	N/A	12,600 (F)
Human Dimensions of Organizations (MA)	$60,000	18,000 (F)	14,000	14,000
Information Security and Privacy (MSISP)	$50,000	10,000 (F)	10,000	10,000
Information Technology and Management (MSITM)	$55,600	N/A	N/A	12,600 (F)
Kinesiology, Sports Management (MSKin)	$20,250	4,050 (F)	4,050	2,025
Marketing (MSM)	$55,600	N/A	N/A	12,600 (F)
Mechanical Engineering (MSE)	$42,000	8,400 (F)	8,400	4,200
Nursing Practice (DNP)	$30,000	6,000 (F)	6,000	6,000
Nutritional Sciences, 1-Year (MSNS) Fall Cohort	$25,722	10,231 (F)	10,231	5,271 (L)
Nutritional Sciences, 1-Year (MSNS) Spring Cohort	$25,722	N/A	10,231 (F)	5,271
Nutritional Sciences, 2-Year (MSNS) Fall Cohort	$26,670	5,281 (F)	5,281	2,789
Nutritional Sciences, 2-Year (MSNS) Spring Cohort	$26,670	N/A	5,281 (F)	2,789
Public Leadership (MPL)	$48,000	N/A	N/A	16,000 (F)
Technology Commercialization (MSTC)	$59,250	N/A	N/A	19,750 (F)

Stackable Certificate Programs (Texas Resident, New Students)

Program	Total Program	Fall	Spring	Summer
Artificial Intelligence: Foundations and Applications in AI/ML	$5,000	N/A	1,250 (F)	1,250
Artificial Intelligence in Nursing and Healthcare	$6,000	2,000 (F)	2,000	2,000 (L)

Partially Funded Program Fee Estimates: Fall 2026- Summer 2027

The University offers partially formula-funded (Option II) graduate programs to meet market demand which cannot be accommodated by fully formula-funded programs. Option II programs enable the University to fulfill demonstrated higher education and workforce needs as well as to serve a greater number of students than state resources support. Click the following link for additional details: UT Austin Partially Funded and Non-Funded Program Fees with VA-eligible expenses.

The fees published in this section assume continuous attendance by students. International students may be subject to additional fees, such as those associated with full-time enrollment required for a visa. When required, the deposit is included in the first semester's costs. Refer to the "Additional Fees (p. 42)" section of this catalog for details.

Estimate of per semester program fees is based on an example program schedule which may vary. Refer to the program for further information.

Texas Resident, New Student Fee Estimate

Program	Total Program	Fall	Spring	Summer
Business Administration (MBA, Executive)	$174,000	34,800 (F)	34,800	34,800

(F) First Semester
(L) Last Semester

Additional Fees

Flat rate tuition covers most program and service related costs. The following fees are charged to defray the costs of specific programs and services.

Affiliated studies registration fee

The fee of $600 per semester defrays costs associated with registration, record keeping, and certification for students participating in sanctioned study abroad programs.

Concurrent enrollment

When a student registers at two public Texas institutions of higher education at the same time, section 54.011 of the Texas Education Code provides for the following tuition procedure:

1. The student must register first at the institution with the lower minimum tuition and pay the full tuition charge.
2. Normally, only the hourly rate is paid at the second institution. However, if the minimum amount is less at the first institution, the student must pay the difference in the two minimums to the second institution, but not less than the hourly rate.

Other required and optional fees are billed by each institution at its regularly authorized rates.

The University of Texas at Austin does not charge a minimum tuition. A student who registers first at the University (if the University is the institution with the lower tuition rate) and then at a second public institution must request concurrent enrollment by contacting tuition@austin.utexas.edu.

Duplicate fee receipt

A charge of $1 is assessed for a duplicate fee receipt. The charge must be paid to the Bursar's Office when the application for a duplicate receipt is submitted. The application must be submitted by the student whose name appears on the fee receipt.

Field trip fees

Students in courses that include a field trip are assessed a fee to defray transportation and related costs of the trip.

Freshman and transfer orientation program fees

A fee of $175 is assessed for all first-time freshmen attending a summer orientation program. A fee of $65 is assessed for new transfer students attending a summer orientation program. Additional room and board charges also apply.

For first-time freshmen and new transfer students enrolling in a summer semester or the spring semester, a fee of $50 is assessed for a one-day orientation program.

General deposit

A fee of $10 is assessed for every student in the first semester of enrollment to help offset the cost of property loss or damage and nonpayment of any University billing. The deposit, less outstanding charges, is returned on request when the student leaves the University with no intention to return. Applications for refund are available online and in Student Accounts Receivable, MAI 4. A general deposit that remains without request for refund for four years from the date of the student's last attendance at the University is forfeited to the Student Property Deposit Scholarships.

In absentia fee

There is no fee for graduate or undergraduate students with an in absentia registration.

International student health insurance fee

International students holding non-immigrant visas are assessed a fee that reflects the actual cost of the premium for health insurance. The fee varies, matching the premium for approved UT System student insurance plans.

International insurance administrative fee

A fee to defray the costs associated with complying with the UT System's requirement for all enrolled international students to have valid insurance coverage. The fee is based on the insurance coverage type.

International student support services fee

A fee of $225.00 per semester is assessed to international students to defray costs associated with orientation, immigration advising and compliance, and support services.

Independent student and research registration fee

The fee of $600 per semester defrays costs associated with registration, record keeping, and certification for students enrolled in international study and research (ISR).

Joint and cooperative program fees

The University has agreements with several other University of Texas System institutions that allow students to enroll in courses at the other institution. Tuition and required fees for full-time students are normally paid at the degree-granting campus and allocated by that unit to the other institution involved. Graduate students enrolled at the University may apply for admission to another University of Texas System institution through the appropriate dean's office at that institution. Evidence of support from the University should include the approval of the vice provost for graduate and postdoctoral studies. Programs are available only where formal agreements exist between institutions.

Late registration charge

A student who registers late is assessed a charge to defray the cost of the extra services required to effect the late registration. Late registration periods are identified in the Course Schedule. In the fall and spring semesters, the late registration charge is $25 through the fourth class day of a semester, $50 from the fifth through the twelfth class day, and $200 after the twelfth class day. In the summer semester, the late registration charge is $25 through the second class day, $50 from the third through the fourth class day, and $200 after the fourth class day.

Matriculation fee

The $15 matriculation fee is charged when a student withdraws prior to the first class day and receives a full tuition refund. It is also charged when the student is withdrawn by the University because of a returned check.

Reciprocal Exchange fee

The fee of $500 per semester defrays the costs associated with registration, record keeping, and certification for students enrolled in study abroad exchange programs.

Reinstatement fee

A fee of $50 is assessed to defray the cost of correcting student and accounting records after repayment of a check for tuition and fees that was returned.

Returned Check Fees

All returned checks are assessed a service charge of $25. Additional fees may apply.

Tuition Exemptions

Tuition exemptions are issued only for the period in which a student is currently enrolled; therefore, unless otherwise stated, applications must be submitted no later than the date of commencement at the end of the spring semester or the official graduation date at the end of the summer semester or fall semester. Satisfactory Academic Progress must be met in order to maintain eligibility for most exemptions.

Applications and supporting documents for the Hazlewood exemption must be submitted to the Veteran Certification team in the Office of the Registrar, https://bit.ly/uthazlewood, by the last class day of the semester for which you are seeking exemption.

Highest Ranking High School Graduate

Who is eligible	What is exempted	Where to apply
Highest ranking graduate of an accredited Texas high school.	Tuition during first two consecutive semesters following graduation.	The "To Public Colleges and Universities" certificate, issued by the high school, may be scanned and submitted to tuition@austin.utexas.edu. Include the student's EID and first semester of use.

Blind/Deaf Student Exemption

Who is eligible	What is exempted	Where to apply
A blind disabled person, or a person whose sense of hearing is nonfunctional. The student must be a Texas resident.	Tuition General deposit	Provide Student Accounts Receivable, tuition@austin.utexas.edu, with certification from Texas Workforce Commission (TWC) or the Texas Health and Human Services Commission (HHSC); http://www.twc.state.tx.us/jobseekers/vocational-rehabilitation-services

Exemption for Children of Disabled or Deceased Texas Firefighters and Peace Officers

Who is eligible	What is exempted	Where to apply
Children under 21 of disabled or deceased full-paid or volunteer firefighters; full-paid or volunteer municipal, county, or state peace officers; custodial officers of the Texas Department of Criminal Justice; and game wardens.	Tuition	Texas Higher Education Coordinating Board, Attn: Student Services, PO Box 12788, Austin TX 78711-2788

Exemption for Children of Prisoners of War or Persons Missing in Action

Who is eligible	What is exempted	Where to apply
Dependent person under 25 years of age who receives majority of support from parent classified by Department of Defense as a Prisoner of War or Missing in Action at time of registration.	Tuition	Student Accounts Receivable, tuition@austin.utexas.edu

Exemption for Children of Professional Nursing Faculty and Staff Members

Who is eligible	What is exempted	Where to apply
The student must be a Texas resident under 25 years of age. The faculty or staff member must be a registered nurse and must be employed or under contract at the School of Nursing during all or part of the academic term for which an exemption is sought. Children of part-time faculty and staff members receive an exemption equivalent to the parent's percentage of employment. Eligibility ends when the student has received an exemption for 10 semesters at any institution(s) or has received a baccalaureate degree.	Tuition	The University of Texas at Austin, School of Nursing, Assistant Dean for Administration, 1700 Red River Street, Austin TX 78701, 512-471-9906; http://nursing.utexas.edu/faculty/ "Forms & Policies" (EID required)

Exemption for Clinical Nursing Preceptors and their Dependents

Who is eligible	What is exempted	Where to apply
The student must be a Texas resident under 25 years of age and must be enrolled at the University. The preceptor must be a registered nurse and must be under a written preceptor agreement with the School of Nursing during the semester for which an exemption is sought. Eligibility ends when the student has received an exemption for 10 semesters at any institution(s) or has received a baccalaureate degree.	Tuition up to $500 per semester	The University of Texas at Austin, School of Nursing, Clinical Placement Coordinator, 1700 Red River Street, Austin TX 78701, 512-471-8039; https://nursing.utexas.edu/sites/default/files/preceptor_tuition_exemption_form.pdf

Exemption for Foster and Adopted Children

Who is eligible	What is exempted	Where to apply
A student who was in the care or conservatorship of the Texas Department of Family and Protective Services (DFPS) on the day before their eighteenth birthday; the day of the student's fourteenth birthday if the student was also eligible for adoption on or after that day; or the day of their graduation from high school or receipt of a GED; or was in the care or conservatorship of DFPS through their fourteenth birthday and was then adopted. The student must enroll within three years of the relevant date, but no later than their twenty-fifth birthday. A student who was adopted and was the subject of an adoption assistance agreement under subchapter D, chapter 162, Texas Family Code.	Tuition	Obtain documents from the Department of Family and Protective Services and present them to Student Accounts Receivable, tuition@austin.utexas.edu.

Hazlewood Act Exemption for Spouses/Children of Texas Ex-Servicemembers

Who is eligible	What is exempted	Where to apply
Spouses and biological children, adopted children, and stepchildren of an eligible veteran (per the Hazlewood Act Statute, https://statutes.capitol.texas.gov/Docs/ED/htm/ED.54.htm#54.341) who is determined by the VA to be 100% total and permanent service-connected disabled veteran or one who became totally disabled for purposes of employability as a result of a service-related injury or illness. Additional information is available at https://www.tvc.texas.gov/education/hazlewood.	Tuition in state-supported courses (except, but not limited to, student services, general deposit, optional, travel, and field trip fees)	Veteran Certification in the Office of the Registrar, The University of Texas at Austin, https://bit.ly/uthazlewood

Hazlewood Act Exemption for Texas Ex-Servicemembers

Who is eligible	What is exempted	Where to apply
The applicant must meet all the eligibility requirements per the Hazlewood Act Statute (https://statutes.capitol.texas.gov/Docs/ED/htm/ED.54.htm#54.341) and 40 Texas Administrative Code §461; have entered service at a location in Texas, have declared Texas as their home of record, or have been eligible to be declared a resident in accordance with 40 Texas Administrative Code §461.40; and meet other requirements stipulated by the Hazlewood Act Statute. Additional information is available at https://www.tvc.texas.gov/education/hazlewood/	Tuition in state-supported courses (except, but not limited to, student services, general deposit, optional, travel, and field trip fees)	Veteran Certification in the Office of the Registrar, The University of Texas at Austin, https://bit.ly/uthazlewood

Hazlewood Legacy Act Exemption for Children of Texas Ex-Servicemembers

Who is eligible	What is exempted	Where to apply
The ex-servicemember must meet the Hazlewood Act Statute (https://statutes.capitol.texas.gov/Docs/ED/htm/ED.54.htm#54.341) and 40 Texas Administrative Code §461 requirements given above and the child must be a Texas resident who is 25 years of age or younger on the first day of the semester or summer term; and be a child or dependent of a veteran who has received unused hours. Additional information can be found at https://www.tvc.texas.gov/education/hazlewood/.	Tuition in state-supported courses (except, but not limited to, student services, general deposit, optional, travel, and field trip fees)	Veteran Certification in the Office of the Registrar, The University of Texas at Austin, https://bit.ly/uthazlewood

Peace Officers Disabled in the Line of Duty Exemption

Who is eligible	What is exempted	Where to apply
The applicant must be a Texas resident and be classified as an undergraduate.	Tuition in state-supported courses, up to 12 semesters	Texas Higher Education Coordinating Board, Attn: Student Services, PO Box 12788, Austin TX 78711-2788

Exemption for the Surviving Spouse and Dependent Children of Certain Deceased Public Servants (Employees)

Who is eligible	What is exempted	Where to apply
Surviving spouses and minor children of those killed in the line of duty while employed in certain public service positions.	Tuition, room and board (textbook stipend)	Student Accounts Receivable, tuition@austin.utexas.edu

Exemption for Senior Citizens

Who is eligible	What is exempted	Where to apply
Those age 65 or older. Applicant must submit copy of birth certificate.	Tuition up to six credit hours	Student Accounts Receivable, tuition@austin.utexas.edu

Exemption for Participants in a Military Funeral

Who is eligible	What is exempted	Where to apply
Students in grades six through 12 and postsecondary students who sound Taps during a military funeral in Texas. The student receives a voucher for the exemption from the funeral director.	$25 per voucher in tuition	Student Accounts Receivable, tuition@austin.utexas.edu

Tuition Waivers

A waiver allows for a portion of a student's tuition not to be paid. The student is responsible for payment of the remaining tuition not covered by the waiver. Waivers are issued only for the period in which a student is currently enrolled; therefore, applications must be submitted no later than the date of commencement at the end of the spring semester or the official graduation date at the end of the summer semester or fall semester. Satisfactory Academic Progress must be met in order to maintain eligibility for most waivers.

Competitive Scholarship Waiver

Who is eligible	What is exempted	Where to apply
A limited number of nonresident and international students who have received a competitive scholarship. The scholarship must be administered by a school-recognized scholarship committee	Nonresident portion of tuition. The student is responsible for payment of resident tuition.	Student's department (undergraduate or graduate student service office).

Economic Development and Diversification Waiver

Who is eligible	What is exempted	Where to apply
Nonresident and domiciled international students whose families transferred to Texas as part of the state's Economic Development and Diversification Plan.	Nonresident portion of tuition. The student is responsible for payment of resident tuition.	The University of Texas at Austin, https://gov.texas.gov/business/page/economic-development-diversification-in-state-tuition-for-employees

Waiver for Faculty Members, Teaching Assistants, and Research Assistants, and their Dependents

Who is eligible	What is exempted	Where to apply
Employee, or employee's dependent. The employee must have a qualifying job title for at least 20 hours per week. The beginning employment date must be on or before the twelfth class day (fourth class day for a summer term), and the end date must be no earlier than the last class day; these dates are published in the academic calendar. If the dependent is the spouse of the employee, a marriage license must be on file with Special Billing, Student Accounts Receivable, MAI 4.	Nonresident portion of tuition. The student is responsible for payment of resident tuition.	Enrolled students apply directly to the hiring department. Graduate School applicants may indicate interest in a teaching or research assistantship when they apply for admission. https://utdirect.utexas.edu/acct/fb/waivers

Good Neighbor Scholarship

Who is eligible	What is exempted	Where to apply
Native-born citizens and residents from nations of the Western Hemisphere other than the United States. Applicants must furnish certified evidence of native-born citizenship and scholastic qualifications.	Tuition.	The University of Texas at Austin, Texas Global, ISSS, 1925 San Jacinto Blvd., G14 Austin, TX 78712; https://global.utexas.edu/isss/advising-services/financial-aid

Waiver for International Students Who Hold Visas Allowing for Domicile in the United States

Who is eligible	What is exempted	Where to apply
International students establishing domicile in Texas and meeting residency requirements.	Nonresident portion of tuition. The student is responsible for payment of resident tuition.	The University of Texas at Austin, Office of the Registrar, Residency, https://registrar.utexas.edu/residency

Waiver for Mexican Citizens with Financial Need

Who is eligible	What is exempted	Where to apply
A limited number of students from Mexico who have financial need.	Nonresident portion of tuition. The student is responsible for payment of resident tuition.	The University of Texas at Austin, Texas Global, ISSS, 1925 San Jacinto Blvd., G14 Austin, TX 78712; https://global.utexas.edu/isss/advising-services/financial-aid

Waiver for Military: Persons Eligible for Veterans Education Benefits, Their Spouses and Children who Move to Texas

Who is eligible	What is exempted	Where to apply
Veteran or dependent eligible for VA Post-9/11 GI Bill® or another federal law authorizing VA Education Benefits. Child must be 25 years of age or younger on the first day of the semester or summer term for which the benefit is used. Eligibility may be extended if child can provide proof of severe illness or debilitating condition that prevented prior enrollment. Applicant must provide a letter of intent to establish residence in Texas.	Nonresident portion of tuition. The student is responsible for payment of resident tuition.	The University of Texas at Austin, Office of the Registrar, Residency, https://registrar.utexas.edu/residency

Waiver for Military: After Assignment in Texas, Assigned to Duty in Texas, and other Military Exemptions

Who is eligible	What is exempted	Where to apply
Members of the U.S. Armed Forces, their spouses, and/or dependent children in accordance with the Texas Education Code (TEC), Texas Administrative Code (TAC), and Texas Higher Education Coordinating Board (THECB) statutes and regulations.	Tuition waivers can vary depending on a student's status and/or benefits. The nonresident portion of tuition is waived for eligible students. Students are responsible for payment of any resident portion of tuition not exempted.	The University of Texas at Austin, Office of the Registrar, Residency, https://registrar.utexas.edu/residency

Waiver for students in Reserve Officers' Training Corps (ROTC) Program

Who is eligible	What is exempted	Where to apply
A person who is enrolled and in good standing in a Reserve Officers' Training Corps (ROTC) program.	The nonresident portion of tuition is waived for eligible students. Students are responsible for payment of any resident portion of tuition not exempted.	The University of Texas at Austin, Office of the Registrar, Residency, https://registrar.utexas.edu/residency

Nonresidents Enrolled in the Texas Guaranteed Tuition Plan or Texas Tuition Promise Fund

Who is eligible	What is exempted	Where to apply
Nonresident students whose tuition is paid by the Texas Guaranteed Tuition Plan or the Texas Tuition Promise Fund for the semester for which the waiver is issued.	Nonresident portion of tuition.	The University of Texas at Austin, Student Accounts Receivable, Special Billing, tuition@austin.utexas.edu

Third-Party Billing

Agencies outside the University may set up a third-party billing arrangement that pays all or a part of a student's tuition bill. The student is responsible for any amount not covered by the third party. Arrangements must be made in advance with Student Accounts Receivable at tuition@austin.utexas.edu.

Description	Who is eligible	What is exempted	Where to apply
Post 9/11 GI Bill® (Ch. 33)	Eligibility for veteran and dependent education benefits is determined by the U.S. Department of Veterans Affairs (VA) and may be earned by members of Active Duty, Selected Reserve and National Guard Armed Forces and their families.	A percentage of tuition and mandatory fees based on the length of active duty service as determined by the VA.	Student pursuing VA State Approving Agency (SAA) approved programs should visit our Veteran Education Benefits website and must request benefit certification using the Office of the Registrar Veteran Certification's GI Bill® portal. For additional information contact Veteran Certification in the Office of the Registrar. Main Building (MAI) Room 1, gibill@austin.utexas.edu, Phone 512-475-7540 The University of Texas at Austin Office of the Registrar, Veteran Certification PO Box 302666, Austin TX 78703
Staff Tuition Assistance Program (STAP)	Active employees appointed as full-time for at least 12 continuous months as of the first class day. Eligibility is determined by Human Resource Services.	Tuition for the college in which the employee is enrolled for one eligible course or more than one course not to exceed three credit hours.	Applications for the Staff Tuition Assistance Program are processed through Human Resource Services. https://hr.utexas.edu/current/career/staff-tuition-assistance-program
Teaching assistant/ assistant instructor/ graduate research assistant tuition reduction	Students employed as teaching assistants, assistant instructors, or graduate research assistants.	Tuition reduction amount is indexed to the number of hours the student is employed.	Student's academic department regarding employment https://gradschool.utexas.edu/academic-employment
Texas Guaranteed Tuition Plan (TGTP)	Students enrolled in the Texas Guaranteed Tuition Plan. Plan enrollment, requirements, and payments determined and maintained by the Texas Comptroller of Public Accounts.	Resident tuition and fees required of all students. The student is responsible for all other fees.	A student's TGTP ID card(s) may scanned and emailed to tuition@austin.utexas.edu. Include student's EID and first semester to use.
Texas Tuition Promise Fund (TTPF)	Undergraduate students enrolled in the Texas Tuition Promise Fund. Plan enrollment, requirements, and payments determined and maintained by the Texas Comptroller of Public Accounts.	Resident tuition and fees required of all undergraduate students. The student is responsible for all other fees.	The purchaser should authorize use of units, using student's EID, at www.texastuitionpromisefund.com at least three weeks prior to the tuition payment deadline each semester to allow for TTPF to submit the information to Students Accounts Receivable.

Tuition Adjustments

Refunds are applied to any current and outstanding debts owed to the University before releasing to the student. Section 54.006(d) of the Texas Education Code requires that the University refund tuition paid by a sponsor, donor, or scholarship to the source, rather than directly to the student, if the funds were made available through the University.

Refunds for Students Withdrawing from the University

Students who withdraw from the University receive a refund of a percentage of their tuition. The percentage varies as shown below according to the student's effective withdrawal date.

Spring and Fall Semester and Summer term

Official withdrawal date	Percentage refund
Prior to the first class day	100% less $15 matriculation fee
During the first five class days	80%
During the second five class days	70%
During the third five class days	50%
During the fourth five class days	25%
After the fourth five class days	none

Summer Semester (First-Term, Second-Term, and Nine-Week Classes)

Official withdrawal date	Percentage refund
Prior to the first class day	100% less $15 matriculation fee
During the first, second, or third class day	80%

During the fourth, fifth, or sixth class day	50%
After the sixth class day	none

Withdrawal refunds are based upon the effective date on the withdrawal form. Adds and drops are included in the calculation. In some cases, a student may receive two refund checks, one based on dropped courses and one based on withdrawal percentages for remaining courses.

A student who elects to pay their tuition on the installment plan and then withdraws from the University may still owe a portion of the tuition and fees; the installment service charge is not refundable. Likewise, a student who defers their tuition to financial aid and withdraws before the aid disburses may be responsible for a portion of the tuition. A hold will be placed on the student's record until all financial obligations are met.

Students withdrawn by the University because of a returned check are assessed a $25 service charge, a $15 matriculation fee (p. 42), and a $50 reinstatement fee. A student withdrawn by the University for scholastic reasons, class cancellations, or other reasons receives a full refund; the matriculation fee is not charged.

A student who withdraws as a result of being called to required military service may choose to receive a tuition refund. More information about withdrawal for active service is given in the section Withdrawal (p. 70).

A student who withdraws after receiving any cash payment from the Office of Financial Aid may be required to make full or partial repayment. Funds received through the Federal College Work-Study Program are not subject to repayment. Students should contact the Office of Financial Aid for information regarding repayment obligations.

Student Accounts Receivable initiates refunds for all eligible students who submit approved withdrawal petitions to the Office of the Registrar as described in the section Withdrawal (p. 70). A refund is issued no earlier than thirty days after the date the student paid the initial tuition bill. The refund is sent to the address specified on the withdrawal petition.

A student using Post-9/11 GI Bill® (Chapter 33) who withdraws after being certified to the Department of Veterans Affairs (VA) may be required to make full or partial repayment to the University. Students should contact Office of the Registrar Veteran Certification for information regarding repayment obligations. Student Accounts Receivable will refund tuition and fees paid by the VA to the University. Per Section 1019 of the Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020, the refund will be sent to the VA. The University will then collect the debt from the student.

Policy on Return of Unearned Tuition Assistance

The Department of Defense (DoD) Memorandum of Understanding requires The University of Texas at Austin to return unearned Military Tuition Assistance (TA) funds on a prorated basis through 60% of an academic course. The university will not return any TA funds once a student completes 60% of an academic course. Visit the Student Veteran Services TA page for more information.

Adjustments for Added and Dropped Classes

Charges for added classes must be paid by the end of the twelfth class day in the fall and spring semesters and by the end of the fourth class day in the summer. Revised tuition bills are not sent to the student when they change their schedule. It is the student's responsibility to check "My Tuition Bill" or "What I Owe" to see what payments are still outstanding. Failure to pay for additional tuition on time will result in fees being assessed to the student's tuition bill per the Financial Responsibility Statement. Students can determine what they owe by viewing My Tuition Bill .

Overpayments of tuition resulting from classes that a student drops (1) during the first twelve class days in a fall or spring semester; (2) during the first four class days in any summer term will be refunded. No refunds are made for classes dropped after these dates. Tuition refunds begin processing the week after the twelfth (or fourth) class day. They are mailed to the student's local address or deposited into the account the student has designated if an electronic funds transfer authorization is in effect. The student may contact Texas One Stop at onestop@utexas.edu to verify account information.

Tuition Rebates for Certain Undergraduates

An undergraduate may be eligible for a tuition rebate of up to $1,000 if, at graduation, they have attempted no more than three semester hours beyond the minimum number of hours required for the degree. The student must meet the following eligibility requirements:

1. The student must not have been enrolled at any institution of higher education before the fall semester 1997.

2. At the time the student earns a first undergraduate degree, they must have attempted no more than three semester hours beyond the minimum number of hours required for the degree. Hours attempted include all courses the student has undertaken, such as transfer credit, courses the student dropped or from which the student withdrew after the date the official enrollment count was taken, developmental courses taken for credit, optional internship and cooperative education courses, courses the student failed, and courses the student repeated. If the student has earned credit by examination for more than nine hours of coursework, the hours in excess of nine are also counted as hours attempted.
   Courses dropped for reasons that are determined by the institution to be totally beyond the control of the student shall not be counted.

   Beginning with degrees awarded on September 1, 2007, or later, course credit is not counted if the student earned it to meet ROTC requirements but it is not required for the degree. Beginning with degrees awarded August 2011, or later, course credit is not counted if it is earned before graduating from high school (except for course credit earned exclusively by examination).

   If the student earned a bachelor's degree and a Texas teaching certificate concurrently, required teacher education courses are not counted as hours attempted if they exceed the number of hours of free electives allowed in the bachelor's degree program.

3. The student must have been a Texas resident and must have been eligible to pay resident tuition at all times while pursuing the degree.

4. If the student received a bachelor's degree in architecture, engineering, or any other program that is determined by the Texas Higher Education Coordinating Board to require more than four years to complete, then the student must have graduated within five calendar years after first enrolling in a Texas public senior college or university. If the student's degree is in a field other than those that have been determined to take more than four years to complete, the student must graduate within four calendar years after that first enrollment.

Requirement 4 applies only to students who enrolled in a public Texas senior college or university for the first time on or after September 1, 2005.

A student who was unable to meet requirement 4 because of a hardship may seek an exception to this requirement from their dean.

An eligible student should submit a request for a rebate in their dean's office when the student files an application for graduation. The request must be submitted before the official date of graduation. If the student's request for a rebate is denied, they may appeal to the vice provost and registrar in the Office of the Registrar. The rebate may be reduced by the amount of any outstanding student loan owed to or guaranteed by the State of Texas.

Tuition rebate policies are governed by section 54.0065 of the Texas Education Code and by the rules of the Texas Higher Education Coordinating Board.

If a student does not qualify for a tuition rebate only because of study abroad coursework that exceeds the number of hours required for the degree, then the student may be eligible for an institutional award from the University in place of the tuition rebate. Students who are interested in this institutional award should apply for a tuition rebate. They will be considered for the institutional award if they are eligible.

Longhorn Fixed Tuition Rebates

An undergraduate who enrolled in the Longhorn Fixed Tuition program may be eligible for an additional $2,500 tuition rebate if, at graduation, they meet the following eligibility requirements:

1. Resident and Non-Resident undergraduate students must have enrolled in the Longhorn Fixed Tuition before the twelfth class day (fourth class day in summer) of their first semester at The University of Texas at Austin.
2. Student must not have attempted more than three semester credit hours in excess of the minimum number required to complete the degree in the catalog under which they graduate.
3. Students who want to receive the rebate must graduate within four calendar years for a four-year degree program or within five calendar years if the degree requires more than four years to complete.
4. Students must complete at least 60 semester credit hours of coursework counted toward the degree in residence.
5. Student must not have already received a bachelor's degree.
6. A student is required to apply for his/her tuition rebates through his/her dean's office prior to graduation.
7. Resident undergraduate students are eligible for an additional $1,000 rebate if they meet the criteria for the existing tuition rebate program.

Short-Term Loans

The University provides short-term tuition loans and emergency cash loans to students. Tuition loans have a one- to three-month repayment period and are applied directly to the student's tuition bill. Emergency cash loans are due in full one month from the date of issue. Web cash loans are limited to one every 30 days. Any subsequent refund of tuition is applied to a tuition or emergency cash loan balance, regardless of the due date of the loan. Questions regarding short-term tuition loans should be directed to Texas One Stop.

Payment of Fees for Students with Disabilities

The Texas Workforce Commission (TWC) and the Texas Health and Human Services Commission (HHSC) offer payment of tuition and other services to students (normally nonveterans) who have certain disabilities, if the student's vocational objective is approved by a representative of the agency. Application for vocational rehabilitation should be made to TWC.

Optional Fees

Students may select the following optional fees when they register. Those who select an optional fee for the fall semester pay the academic year rate. The spring semester rate is available only during the spring semester.

Cactus fee

The fee of $55 entitles the student to a copy of the University yearbook.

Department of Theatre and Dance Package

The fee entitles the student to a specified number of tickets to major season productions at no additional cost as long as tickets are available. Associated performance fees may arise in the event of severe and unforeseen disruption to fall or spring programming. See the Theatre and Dance Discounted Student Tickets page for additional information.

Big Ticket Pass

The Big Ticket is the annual sports pass giving UT students access to all Texas Athletics home regular season events. UT students can purchase either a Big Ticket **WITH** football access or a Big Ticket **WITHOUT** football access. That's over 120 home regular season events each year including football, men's basketball, women's basketball, volleyball, baseball, softball, and Texas Relays! All active full-time UT-Austin students are eligible to purchase beginning June 15 and receive email communication from Texas Athletics to their email address on file with the University. For more information or to purchase, visit TexasLonghorns.com/BigTicket or call 512-471-3333 (Monday through Friday 9 a.m. – 4 p.m. Central).

Parking permit fee

Class C, M, or N parking permits purchased in the fall semester enable students to park in any appropriately designated lot or area for the academic year; a permit purchased in the spring is valid through the summer semester. See the Student Parking (p. 80) page for all parking permit fees. All fees are prorated for permits purchased after September 30.

Only class C, M, and N permits may be purchased during registration. Information about other parking permits available to students is given in Student Parking (p. 80), along with more information about class C, M, and N permits.

Texas Performing Arts Bass Pass

The fee enables a student to purchase tickets for professional touring events presented by Texas Performing Arts at a discount, as long as tickets are available. For more information or to purchase, visit Texasperformingarts.org/BassPass.

Student Speaker Series fee

The fee of $2 a semester supports the Student Endowed Centennial Lectureship. The endowment is used to bring speakers to the University to lecture, teach, or meet with students.

Optional Fee Refunds

Refunds for the *Cactus* yearbook may be requested at the Texas Student Media office in the William Randolph Hearst Building (HSM 3.202).

Parking permit refunds may be requested at the Parking and Transportation Services office.

No refunds will be issued for The Big Ticket after the twelfth class day. Pro-rated refunds will only be issued the semester of purchase and must be requested prior to the twelfth class day for students who have terminated enrollment.

Student Insurance

Student Health Insurance Plan

All students are encouraged to have health insurance coverage. The Student Health Insurance Plan is an optional University of Texas System sponsored health insurance plan available to currently enrolled University of Texas at Austin students. Information and enrollment is available online. The Student Health Insurance Plan pays 100% for all covered services at University Health Services and includes in- and- out-of-network benefits for off-campus providers and facilities (deductibles, co-pays and/or coinsurance may apply for off-campus services).

International Student Health Insurance

The Student Health Insurance Plan described above is mandatory for international students; the cost is included in the student's tuition bill each semester. International students may be eligible to waive the cost and coverage of the Student Health Insurance Plan if they are able to present to International Student and Scholar Services an alternative insurance policy that provides benefits comparable to the Student Health Insurance Plan. Additional information about international students and student health insurance is given in the International Student and Scholar Services (p. 76) section of this catalog.

Student Liability Insurance

Students must show evidence of student liability insurance when enrolled in field experience courses that use off-campus facilities if such facilities require the insurance.

Identification Cards

Student identification cards (ID Card)

Students attending classes on campus must obtain a University photo identification card issued by the ID Center, which is located on the first floor of the Flawn Academic Center. Photos for ID Cards may be submitted online or taken in person. Visit the ID Center page for more information. The proximity-enabled photo ID card is needed for many purposes, including use of the libraries and University Health Services and access to residence halls and other University buildings. ID cards may also be used for purchases at stores that accept Bevo Pay and for admission to athletic and other special events.

Students receive their first ID card at a cost of $20. This ID card is intended to be used throughout the student's enrollment at the University. It is not replaced unless changes in data are required, the card is defective or damaged through normal wear and tear, or the card is lost or stolen. In some cases, an additional $28 replacement fee may apply. Students should report lost or stolen ID cards; found cards should be returned to the ID Center on the first floor of the Flawn Academic Center.

University community members are expected to maintain control and possession of their photo ID cards and to have them in their possession whenever they are on University grounds. The ID card should not be loaned to others, and its benefits are not transferable. Those who lend their cards or use them for fraudulent purposes are subject to disciplinary action. More information is available in the University Identification Card Policy.

Faculty/staff identification cards

The ID Center provides all faculty and staff members with an official University ID card. The card allows access to certain buildings and can be used as a campus library card. Upon loss of eligibility, the individual's ID card must be surrendered to an employee's supervisor, Human Resource, or the ID Center. More information about ID cards is available on the ID Center page.

Obtaining an ID Card

To obtain an identification card, visit utexas.edu/idcenter and scroll down to UT ID Card Online Photo Submission. For more information, please visit the ID Center page.

Fees for Nonstudents

Auditor's fee

A fee of $20 a course is required of individuals not registered at the University who wish to audit one or more courses. In accordance with section 54.210 of the Texas Education Code, a person 65 years of age or older may audit a course without paying the fee if space is available. More information about auditing a course is given in Auditing a Course (p. 29).

Library card fee for non-University borrowers

Libraries are open to the public for use of materials. Adult Texas residents who are not members of the University community may borrow materials for home use by purchasing a courtesy borrower card at the Courtesy Borrower Services Desk at the Perry-Castañeda Library, entrance level. A photo ID and proof of Texas residence are required at the time of purchase. The fee may be waived for current members of the Texas Exes, for users who present valid TexShare cards from libraries participating in the TexShare Card Program, and for other users included in reciprocal borrowing agreements in which the University Libraries participates. More information on fees and waivers is published by the University Libraries. Card expiration dates are determined by the period of enrollment, membership, or appointment.

The Big Ticket guest pass for football season option

Guest season tickets for football are currently not available. More information is available on the Texas Longhorn Athletics website.

Recreational and facility use fees

Recreational Sports memberships, which allow access to University recreational facilities, are available to current faculty and staff members, UT retirees, UT alumni, community members, and minor children. The recreational facilities are the Caven Lacrosse and Sports Center at

Clark Field, the Charles Alan Wright Fields at the Berry M. Whitaker Sports Complex, Gregory Gymnasium, the Gregory Gymnasium Aquatic Complex, the Recreational Sports Center, Whitaker Courts and the recreational spaces inside Bellmont Hall and the Robert B. Rowling Hall at the McCombs School of Business. Below are RecSports membership fees. Additional information is available from the Recreational Sports Membership and Guest Services Office, GRE 2.200. A $15 replacement fee is charged for RecSports identification cards. Find more information at https://www.utrecsports.org/.

Membership Category	Membership Fee Per Calendar Month Through 8/31/26
Faculty/Staff Member	$26
Retired Faculty/Staff	$14
Minor Child (Age 17 and Younger)[8]	$14
UT Alumni and Community Members	$50
Gregory Gym Locker Rental	$10
Recreational Sports Center Locker Rental	$10
Bellmont Hall Locker Rental	$10
Towel Service	$8

Day Pass	Daily Fee
Adult Pass	$14
Minor Child (Age 17 and Younger)[8]	$7
Official Visitor[9]	Fee Varies

[8] Children 17 and under must have adult supervision at all times; certain restrictions apply.

[9] Consultants, lecturers, or others with a clearly defined connection with a University agency or program on a short-term basis. Additional information is available from Recreational Sports

Academic Policies and Procedures

The following terms are used throughout the Academic Policies and Procedures section.

Urgent. An event that happened after or immediately before the deadline, typically mid-semester or shortly thereafter, that was reasonably unforeseeable and beyond the student's control. This event must have either prevented the student from meeting the deadline or significantly altered the student's ability to successfully complete the class. Consideration will be given if the event or condition occurred before the deadline but significantly worsened after the deadline and the worsening of the condition prohibited the student from successfully completing the class.

Substantiated. The student must have credible documentation to corroborate the claims made in the appeal. This documentation may include, but is not limited to, documents from a law enforcement agency, court, or other governmental agency, hospital records or signed statements from physicians, and the bereavement records or obituaries.

Non-academic. The reason must be related to some issue outside the normal academic work, such as the onset of a major illness, accident, or sudden death of a family member. Any reasons having to do with the actual performance in the class will be considered academic.

Academic Warning and Dismissal

Undergraduate Students

An undergraduate must maintain a minimum cumulative University grade point average (GPA) to remain academically eligible to register for the subsequent semester or summer semester. The cumulative University grade point average is calculated on the basis of all work undertaken at the University, including credit by examination, correspondence, and extension, for which a letter grade was given. Courses for which the symbols *Q, S, U, X, W, CR,* and *NC* were given are not included. (Note: Since September 15, 2006, the University has awarded only the symbol *CR,* rather than a letter grade, for credit earned by exam. As a result, credit earned by exam and recorded since that date is not included in the student's cumulative University grade point average. Through September 15, 2006, students chose either a letter grade or the symbol *CR* for credit earned by exam; credit by exam that was recorded with a letter grade is included in the student's cumulative University grade point average.) Grades earned at any institution other than the University are not included in the University grade point average, but semester hours of transfer credit accepted by the University are added to hours taken at the University to determine the total college hours undertaken.

As shown in the following table, the minimum grade point average required varies with the total number of college credit hours the student has undertaken.

Table of Academic Standards

Total College Hours Undertaken	UT Austin GPA for Academic Warning	UT Austin GPA for Academic Dismissal
Below 15	less than 2.00	less than 1.50
15-44	less than 2.00	less than 1.70
45-59	less than 2.00	less than 1.85
60 or more	less than 2.00	less than 2.00

Warning and Dismissal

The following rules govern academic warning and dismissal.

1. *Change of academic status.* Academic status is determined when grades are reported at the end of each fall and spring semester and at the end of the summer semester. Although a student's University grade point average may change between these grade-reporting periods (because a final grade has been recorded in place of an *X,* for example), the student's academic status is not changed until the next official grade-reporting period during which the student is enrolled at the University.
2. *Effect of grades in courses repeated.* All grades earned in University courses, whether repeated or not, count in a student's grade point average. However, in counting grade points for any semester, a student who earned a grade of at least *C-* in a course taken in a previous semester may not use grade points earned in that same course in the current semester to meet the minimum requirements for continuance given below without written permission from the dean.
3. *Academic warning.* (a) A student whose cumulative University grade point average falls below 2.00 at the end of a grade-reporting period is placed on academic warning. Warning status is reflected on the student's permanent academic record. (b) Any student returning to the University after a period of academic dismissal returns on academic warning. (c) Under exceptional circumstances, the director

of admissions may admit a student to the University on academic warning.

4. *Quantity of work while on academic warning.* A student on academic warning must maintain a course load of at least 12 semester hours in a fall or spring semester, unless the student's dean approves a reduced course load in writing before the student registers. Permission to take fewer than 12 hours is based on extenuating circumstances and is not routinely granted. In the summer semester, no minimum course load is required of a student on academic warning.
5. *Removal from academic warning.* A student on academic warning who achieves a cumulative University grade point average of at least 2.00 at the end of a grade-reporting period during which they are registered at the University is removed from academic warning. Removal from warning is reflected on the student's permanent academic record.
6. *Academic dismissal.* Under the conditions noted in items a, b, and c below, a student is subject to academic dismissal at the end of a fall or spring semester. A student is not placed on academic dismissal at the end of a summer semester unless the dismissal is the result of a previous condition prescribed by their academic dean. Academic dismissal is reflected on the student's permanent academic record.
   a. Any beginning student, freshman or transfer, who has not earned previous credit in residence at the University and who fails 12 or more semester hours of coursework in a fall or spring semester is subject to academic dismissal without a prior warning period.
   b. To be subject to academic dismissal, a student, except the beginning students described above, must first be placed on academic warning. A student on academic warning is subject to academic dismissal under either of the following conditions:
      i. At the end of a fall or spring semester, a student on academic warning who fails to attain the cumulative University grade point average shown in the Table of Academic Standards above will be dismissed from the University.
      ii. A student on academic warning who withdraws from the University after the first four weeks of classes in a fall or spring semester will be placed on academic dismissal, unless the withdrawal is under exceptional conditions approved by the student's dean.
   c. When a student who has been dismissed from the University returns, the student reenters on academic warning and may be subject to dismissal under the policies stated in (b)(i) and (b)(ii) above.
7. *Student responsibility.* A student who is dismissed from the University after completing registration for the next semester will have their registration canceled and may not attend classes. The student is responsible for knowing their academic status and may not appeal the cancellation of registration based on lack of such knowledge.
8. *Length of academic dismissal.*
   a. First dismissal—One fall or spring semester and any intervening summer semester.
   b. Second dismissal—Three calendar years; readmission must be approved by the student's dean.
   c. Third dismissal—A student dismissed for the third time will not be readmitted.
9. *Effect of academic dismissal on correspondence courses or registration in another institution.* A student who is dismissed from the University for academic reasons is not prohibited from taking courses by correspondence or from enrolling in another institution. The period of dismissal will not be decreased as a result of coursework completed while on dismissal.
10. *Exceptions permitting continuance in the University.* Normally, a student subject to dismissal will be dismissed; however, each college and school within the University has an appeals procedure administered by the Office of the Dean. A student who wishes to appeal should contact the office of their academic dean for procedures and deadlines. In unusual circumstances, a student may be allowed to continue subject to conditions prescribed by the dean. Approval to continue will not be given, regardless of the circumstances, unless the dean believes that the student has a reasonable chance of attaining a degree.
11. *Special college regulations.* Each college and school of the University determines its own policies regarding the minimum academic standards required of its students. Any college or school may require a higher minimum grade point average than is required to avoid academic warning under University-wide rules. In addition, a college or school may restrict enrollment because of the limitation of instructional resources. A student may be ineligible to continue in a particular college or school while remaining eligible to transfer to another; however, no student on academic dismissal from the University may be enrolled in any academic program of the University.

Graduate Students

To continue in Graduate and Postdoctoral Studies beyond the first term of enrollment, the student must make satisfactory progress in fulfilling any admission conditions that were imposed, meet any requirements made in writing by the Graduate Studies Committee, maintain a graduate grade point average of at least 3.00, and receive the approval of the student's Graduate Studies Committee.

Graduate Studies Committees are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If the Graduate Studies Committee finds that a student is not making satisfactory progress, it may recommend to the vice provost for graduate and postdoctoral studies that the student's program be terminated.

A graduate student whose cumulative graduate grade point average falls below 3.00 at the end of any term of enrollment will be warned by the Office of Graduate and Postdoctoral Studies that their continuance as a graduate student is in jeopardy. The student must attain a cumulative graduate grade point average of at least 3.00 during the next term they are enrolled or be subject to dismissal. During this period, the student may not drop a course or withdraw from the University without the approval of the graduate advisor and the vice provost for graduate and postdoctoral studies.

A graduate student who has been dismissed may be readmitted for further graduate study only by petition of the Graduate Studies Committee in the student's major area or by the Graduate Studies Committee of another program that will accept the student. The petition must be approved by the vice provost for graduate and postdoctoral studies and will only be approved for rare and extenuating non-academic reasons.

Scholastic warning status and academic dismissal are reflected on the student's permanent record.

Law Students

Minimum Performance Standards

A law student must receive a final grade of at least D in a course to receive credit for that course. A student must have a cumulative grade point average (GPA) of at least 2.10 on all law courses taken to graduate from the School of Law.

Grades of F are included in the GPA, but courses in which the student earned an F are not counted toward the number of hours required for a degree. A student who fails a required course must repeat it until the student has passed. A student who fails an elective course may, at their option, repeat it only once. When a student repeats a course, the original and all subsequent grades are included in the student's GPA.

Dismissal

A student who has received final grades for 20 or more semester hours will be dismissed from the School of Law for failure if their cumulative GPA falls below 2.10.

A student who receives a total of two grades of F, or three grades of D and one grade of F, or four grades of D for law courses during their law school career will be dismissed for failure.

Academic Probation

A student will be placed on academic probation if their cumulative GPA falls below 2.40, or they receive a grade of F in a law course, or two grades of D for law courses in any one semester. A student on academic probation is not in good standing.

A student on academic probation must participate in academic counseling from the Student Affairs Office (SAO), receive SAO approval for course selection, and successfully complete any additional courses required by the Dean of the School of Law.

A student who fails to comply with the requirements of the academic probation policy will be dismissed for failure. Such a dismissal may be appealed to a committee of the law school faculty designated by the Dean of the School of Law.

Academic probation is lifted after one fall or spring semester in which the student has completed one or more law courses and satisfied the requirements of the academic probation policy, provided that the student does not receive a grade of F or two grades of D for law courses during that semester and their cumulative GPA is at or above 2.40. If the student does not raise their cumulative GPA to 2.40 or above after one fall or spring semester, the student will continue on academic probation.

Academic Concern

A student will be placed on academic concern if their cumulative GPA is at or above 2.40 but below 2.80. A student on academic concern remains in good standing.

A student on academic concern must participate in academic counseling from the Student Affairs Office (SAO), receive SAO approval for course selection, and successfully complete any additional courses required by the Dean of the School of Law.

A student who fails to comply with the requirements of the academic concern policy will be subject to a registration hold and placed on a leave of absence for the following semester. The registration hold and leave of absence may be appealed to a committee of the law school faculty designated by the Dean of the School of Law.

Academic concern is lifted after one fall or spring semester in which the student has completed one or more courses and satisfied the requirements of the academic concern policy, provided the student's cumulative GPA is at or above 2.80. If the student does not raise the cumulative GPA to 2.80 or above, the student will continue on academic concern.

Leave of Absence, Withdrawal, and Readmission

A student who has been dismissed for failure after receiving grades for fewer than 20 semester hours may submit a new application to the School of Law after the student has remained out of the School of Law for at least 12 months. The Law School Admissions Committee may attach significance to the prior failure. No student who has been dismissed for failure from the School of Law will be permitted, prior to readmission, to visit classes.

A student who has been dismissed from the School of Law for failure after receiving grades for 20 or more semester hours will not be readmitted to the School of Law, with this exception: if the student has never been on academic probation in the School of Law, the student may be readmitted with permission of the Dean of the School of Law after the student has remained out of the School of Law for at least 12 months. The student must show evidence of changed circumstances that demonstrate a likelihood of academic success. A student admitted under this rule will continue on academic probation.

A student who has withdrawn from the School of Law after receiving nine or more hours of credit may be readmitted to the school if the student was not on academic probation or academic concern when he or she withdrew or took a leave of absence. Such a student must submit an application for readmission to the University. The Dean of the School of Law may also require the student to show evidence of circumstances that demonstrate a likelihood of academic success.

A student who, while on academic probation or academic concern, withdrew from the School of Law, took a leave of absence, or was placed on a leave of absence may be readmitted on these conditions: the student must submit an application for readmission to the University; provide evidence of changed circumstances that demonstrate a likelihood of academic success; and have permission of the Dean of the School of Law to return. A student readmitted under this rule will continue on academic probation or academic concern.

Adding and Dropping Classes

Overview

Procedures for adding and dropping classes are given in the Course Schedule. Each student is responsible for properly initiating and completing adds and drops. Information about tuition adjustments resulting from adds and drops is given in Adjustments for Added and Dropped Classes (p.).

Course Load Reduction

Approval of requests for course load reductions are always the prerogative of the academic dean when medical reasons are given. Applications to request consideration of a course load reduction should be submitted to Disability and Access. Disability and Access will request a recommendation from the UHS chief medical officer. Once the chief medical officer signs the application, UHS will submit it to the appropriate dean's office for a final decision.

Adding a Class

The addition of a class is governed by the following requirements: (1) the student must obtain all required approvals; (2) the student must be eligible to take the class; (3) there must be space available in the class; and (4) the student must remain in conformity with the Enrollment Status (p. 60).

Subject to these requirements, a registered undergraduate student may add themselves to a class through the sixth class day of a fall or spring semester or the second class day of a summer semester. Undergraduate students are expected to be settled in their classes their classes by the sixth class day of the fall or spring semester or the second class day of the summer semester.

After the sixth class day of a fall or spring semester or after the second day of a summer semester, approval to add a class must be obtained from the chair of the offering department, or their designee.

After the twelfth class day of a fall or spring semester or the fourth class day of a summer semester, with the approval of the student's dean and the chair of the department offering the class, a student may add a current or past semester class (either with or without a grade) only[1]:

1. If there was a rare or extenuating circumstance such that the student was unable to attempt to register for the class during the regular registration or add/drop access periods; or
2. When evidence exists that the student made an unsuccessful attempt to register for the class using normal registration procedures and that space was available in the class at that time.

The addition of a class for a semester prior to the current fall or spring semester must be signed by the dean or the appropriate associate dean of the college/school. For graduate students, this is the graduate dean or the associate dean for student services.

1 This section does not apply to college/school programmatic processes as typically described in the *Undergraduate Catalog*.

Adding a Class

The addition of a class is governed by the following requirements: (1) the student must obtain all required approvals; (2) the student must be eligible to take the class; (3) there must be space available in the class; and (4) the student must remain in conformity with the Enrollment Status (p. 60).

Subject to these requirements, a registered graduate student may add themselves to a class through the fourth class day of a fall or spring semester or the second class day of a summer semester; the approval of the chair of the department offering the class may be required. Graduate students are expected to be settled in their classes their classes by the fourth class day of the fall or spring semester or the second class day of the summer semester.

After the fourth class day of a fall or spring semester or after the second day of a summer semester, approval to add a class must be obtained from the instructor, the graduate advisor of the department offering the course, and the vice provost for graduate and postdoctoral studies.

After the twelfth class day of a fall or spring semester or the fourth class day of a summer semester, with the approval of the student's dean and the chair of the department offering the class, a student may add a current or past semester class (either with or without a grade) only[1]:

1. If there was a rare or extenuating circumstance such that the student was unable to attempt to register for the class during the regular registration or add/drop access periods; or
2. When evidence exists that the student made an unsuccessful attempt to register for the class using normal registration procedures and that space was available in the class at that time.

The addition of a class for a semester prior to the current fall or spring semester must be signed by the dean or the appropriate associate dean of the college/school. For graduate students, this is the vice provost for graduate and postdoctoral studies or the associate dean for student services.

1 This section does not apply to college/school programmatic processes as typically described in the *Undergraduate Catalog*.

Dropping a Class: Rules for Undergraduate Students

The deadlines for dropping a class are provided in the Academic Calendar. (p. 7) To drop a class, the student must meet the conditions described below and must abide by the Quantity of Work Rule (p. 60). Students considering dropping a course are encouraged to speak with the course's instructor to determine if options exist for completing the course.

In addition to other required approvals, international students must have the written consent of Texas Global (p. 76) to drop a class.

On the recommendation of the instructor and with the approval of the student's academic dean, a student may be required to drop a class at any time because of neglect or lack of preparation. Delete drops (which remove all indications of the course registration from a student's academic record) may be requested only in the cases of University error or in response to rare and extenuating circumstances. The form requesting the delete drop must be signed by the dean or the appropriate associate dean of the college or school in which the student is enrolled.

Limitations

In accordance with section 51.907 of the Texas Education Code, undergraduate students may drop no more than six classes for academic reasons. This rule applies to all students who entered a public Texas institution of higher education as first-time undergraduates in the fall semester 2007 or later.

A dropped class is counted toward the six-drop limit if the student dropped it from the thirteenth class day through the deadline to drop a class for academic reasons in a fall or spring semester or from the fifth through the last class day in a summer semester, and if the student did not drop the class for a substantiated, nonacademic reason as defined below.

Any such dropped class, for which the symbol Q is assigned, will not be considered final until any investigations of scholastic dishonesty for the class in question are resolved.

Nonacademic Reasons for Dropping a Class

A dropped class will not be counted toward the six-drop limit if it occurs for a nonacademic reason such as those listed below. The student's dean will decide, at the time the student drops a class, whether the reason for the drop is academic or nonacademic.

1. A severe illness or other debilitating condition that affects the student's ability to satisfactorily complete the course.
2. The student's responsibility for the care of a sick, injured, or needy person if the provision of that care affects the student's ability to satisfactorily complete the course.
3. The death of a person who is considered to be a member of the student's family or who is otherwise considered to have a sufficiently close relationship to the student that the person's death is considered to be a showing of good cause.
4. The required duty service as a member of the Texas National Guard or the armed forces of the United States of either the student or a person who is considered to be a member of the student's

family or who is otherwise considered to have a sufficiently close relationship to the student that the person's required military service is considered to be a showing of good cause.

5. A change of the student's work schedule that is beyond the control of the student and that affects the student's ability to complete the course.

Procedures

Through the twelfth class day. From the first through the twelfth class day in a fall or spring semester, and from the first through the fourth class day in a summer semester, a student may drop a class through the registration system. If the dropped class must be taken in conjunction with another class, the student must drop the second class as well. Each student should meet with their advisor before dropping a class.

A class dropped during this period is deleted from the student's academic record. It does not count toward the six-drop limit described above.

From the thirteenth class day through the deadline to drop a class for academic reasons. From the thirteenth class day through the deadline to drop a class for academic reasons in a fall or spring semester, and from the fifth through the last class day in a summer semester, a student may drop a class only with the approval of their dean. In some colleges and schools, the approval of the student's advisor is also required. If the student is allowed to drop, the class remains on the student's academic record with the symbol *Q,* which identifies a drop without academic penalty. In addition, the student's dean determines whether the student is dropping the class for an academic or a nonacademic reason. If the dean determines that the reason is academic, the drop is counted toward the six-drop limit described above.

After the deadline to drop a class for academic reasons. After the deadline to drop a class for academic reasons has passed, there are only two possible ways for a student to drop a class. One way is in the case of urgent, substantiated, nonacademic reasons, which must be approved by their dean. Approved nonacademic drops that occur during this period are not counted toward the six-drop limit described above. The other way is for the student to seek approval to use the One-Time-Exception. Approved One-Time-Exception (OTE) drops that occur during this period are counted toward the six-drop limit described above. To seek either type of drop within this period a student must submit the completed OTE form to the student's dean's office by the last class day.

One-Time Exception

Undergraduate students who may not have urgent, substantiated, nonacademic reasons will be allowed to drop a single class or withdraw from the University after the deadline to drop or withdraw for academic reasons under the provisions of the One-Time Exception (OTE). The OTE may be invoked only once during the student's entire university undergraduate program career regardless of the college the student was enrolled in at the time the exception was allowed. The provisions of the OTE are as follows.

General Provisions

1. The OTE does not apply to students in Graduate and Postdoctoral Studies, the College of Pharmacy, the LBJ School of Public Affairs, or the School of Law.
2. A student must submit the completed OTE form to the student's dean's office by the last class day.
3. Any drop or withdrawal allowed under the OTE will be subject to the same academic and financial aid rules governing other drops or withdrawals taken during the semester.

Provisions for Drops

1. A student may not drop a class in which a final grade has been assigned. This will be verified by the student's dean's office.
2. A student may not drop a class if there are any pending investigations of scholastic dishonesty for the class in question. Any drop assigned will not be considered final until any investigations of scholastic dishonesty for the class in question are resolved.
3. Drops allowed under the provisions of the OTE will be considered academic drops and will count toward the six-drop limit. Students who have reached the six-drop limit are not eligible to use the OTE to drop a course.

Provisions for Withdrawals

1. Students who are requesting to use the OTE for a withdrawal will be allowed to withdraw regardless of current grades in classes.
2. No instructors' signatures will be required on the form.
3. Pending scholastic dishonesty will be verified by the student's dean's office with the Dean of Students Office. Withdrawal will not be approved if there is a pending scholastic dishonesty case.

Dropping a Class: Rules for Graduate Students

With the required approvals, a graduate student may drop a class through the last class day of the semester or summer semester; after the twelfth class day of the semester or the fourth class day of the summer semester, the vice provost for graduate and postdoctoral studies approval is also required. If the student drops the class by the twelfth class day of the semester or the fourth class day of the summer term, the class is deleted from the student's academic record. After this time, delete drops (which remove all indications of the course registration from a student's academic record) may be requested only in the cases of University error or in response to rare and extenuating circumstances. The form requesting the delete drop must be approved by the vice provost for graduate and postdoctoral studies.

If the student drops the class from the thirteenth through the twentieth class day of the fall or spring semester or from the fifth through the tenth class day of the summer semester, the symbol *Q* appears on the academic record to indicate a drop without academic penalty. After these dates, if the student is registered on the letter-grade basis, the class instructor assigns the symbol *Q* or a grade of *F;* if the student is registered on the credit/no credit basis, the symbol *NC* is recorded.

A student who is in warning status for failing to maintain a 3.00 grade point average may not drop a class without the recommendation of the graduate advisor and the approval of the vice provost for graduate and postdoctoral studies.

International students, in addition to obtaining the required approvals, must be advised by the International Office before dropping a class if their remaining course load will be fewer than nine hours.

Students appointed as graduate student academic employees may not reduce their course load to fewer than nine hours during a fall or spring semester or fewer than three hours in a summer semester (in any combination of summer terms).

Any Q-drop assigned will not be considered final until any investigations of scholastic dishonesty for the class in question are resolved.

Students should note that dropping a course may cause their course load to drop below that required for full-time status.

Specific deadlines for adding and dropping courses are given in the academic calendar; procedures are given in the Course Schedule.

Attendance

Regular attendance at all class meetings is expected. Instructors are responsible for implementing an attendance policy and must notify students of any special attendance requirements.

Special regulations of colleges and schools, required by the unique nature of their programs of study, may be enacted through the normal approval process. These special regulations may not conflict with University regulations on class attendance and absence.

Religious holy days

A student who misses classes or other required activities, including examinations, for the observance of a religious holy day should inform the instructor as far in advance of the absence as possible so that arrangements can be made to complete an assignment within a reasonable period after the absence. A reasonable accommodation does not include substantial modification to academic standards, or adjustments of requirements essential to any program of instruction. Students and instructors who have questions or concerns about academic accommodations for religious observance or religious beliefs may contact the Office of the Dean of Students. The University does not maintain a list of religious holy days.

Absence for military service

In accordance with section 51.9111 of the Texas Education Code, a student is excused from attending classes or engaging in other required activities, including exams, if they are called to required military service of a reasonably brief duration. The maximum time for which the student may be excused has been defined by the Texas Higher Education Coordinating Board (THECB) as "no more than 25 percent of the total number of class meetings or the contact hour equivalent (not including the final examination period) for the specific course or courses in which the student is currently enrolled at the beginning of the period" of required military service. The student will be allowed a reasonable time after the absence to complete assignments and take exams. Policies affecting students who withdraw from the University for military service are given in the Withdrawal (p. 70) section.

Availability of Coursework to Students

A student has the right to have all written materials that are submitted to meet the requirements of a course returned or made available for review. To be "made available" does not ensure the right to a photocopy, but the materials may be examined in the office of the faculty member or the academic department. Written materials that are not returned to the student must be retained by the faculty member or the department for at least one year following the completion of the course.

Changing Registration to or from the Pass/Fail Basis or the Credit/No Credit Basis

Some courses must be taken for a letter grade; others must be taken on the pass/fail or credit/no credit basis. These requirements are given in catalogs and the Course Schedule. If registration in a course is not restricted to a specific grading basis, the student may choose to register either for a letter grade or for credit.

An undergraduate student may change registration in a class from the pass/fail basis to the letter-grade basis or from the letter-grade basis to the pass/fail basis until the deadline given in the Academic Calendar (p. 7). The basis of registration for a course may be changed only once.

A graduate student may change registration in a class from the credit/no credit basis to the letter-grade basis or from the letter-grade basis to the credit/no credit basis until the deadline given in the Academic Calendar (p. 7).

In designated classes only, a law student may change registration in a class from the pass/fail basis to the letter-grade basis or from the letter-grade basis to the pass/fail basis until the deadline given in the Academic Calendar (p. 7).

For more information, including related policies, see General Information > Academic Policies and Procedures > Evaluation > Symbols. (p. 63)

Class Syllabi

Each instructor must provide students with a syllabus by the first day that the class meets. To the extent practicable, the syllabus must include the following information by the first day:

- The course number and title
- The instructor's name, office location, and office hours
- The names, office locations, and office hours of any teaching assistants
- An overview of the class, including prerequisites, the subject matter of each lecture or discussion, and the learning outcomes for the course and how they will be assessed
- Grading policy, including:
  1. The means of evaluation and assignment of class grades;
  2. Whether plus and minus grades will be used for the final class grade; and
  3. Whether and, if so, how attendance will be used in determining the final class grade
- A Course AI Policy Statement that includes whether generative AI use is permitted, prohibited, or partially permitted in each course according to the specifications detailed on the UT Austin Your Syllabus website.
- A brief descriptive overview of all major course requirements and assignments, along with the dates of exams and assignments that count for 20 percent or more of the class grade
- A list of required and recommended materials, such as textbooks, image collections, audio and audiovisual materials, supplies, articles, chapters, and excerpts as appropriate, identified by author, title, and publisher
- Final exam date and time (when available)
- A link to the class Canvas site
- A notice that students with disabilities may request appropriate academic accommodations from the Division of Student Affairs, Disability and Access
- A notice that HOP 2-9970 prohibits students from recording class instruction (audio or video) unless a student obtains the instructor's permission or Disability & Access has approved audio recording as an accommodation.

Instructors must provide a syllabus to students by uploading and publishing a complete syllabus to a course's Canvas site as a file OR by using the Simple Syllabus tool. Instructors must also ensure the Canvas

site has been published and made available to students by the first day of class.

Each instructor of record for an organized undergraduate course must also submit a copy of their course syllabus and curriculum vitae to their departmental office or dean's office on or before the first day of classes each semester so that they can be made publicly available at the university's **Access Syllabi and CVs website**. Making undergraduate course information available to the public is mandated by HB 2504, passed by the 81st Texas Legislature (2009). The administrative units must upload instructor CVs and syllabi of undergraduate courses to the University's public website no later than seven days after the first day of classes. Listing of office location, office hours, and teaching assistant information is not required for the publicly available version of the syllabus. Instructors for organized graduate courses must submit their course syllabi and curriculum vitae according to their departmental office or dean's office (for non-departmentalized units) specifications.

Classification of Students

Undergraduate students are classified as freshmen, sophomores, juniors, or seniors, based on the number of semester credit hours passed and transferred, regardless of the hours' applicability toward a degree. Semester hours used to determine classification include coursework completed in residence; transferred credit; and credit by examination, extension, and correspondence. A student is a freshman until 30 hours have been accepted; a sophomore until 60 hours have been accepted; a junior until 90 hours have been accepted; and a senior until graduation. Freshmen and sophomores are referred to as lower-division students; juniors and seniors, as upper-division students.

Credit Value and Course Numbers

The Semester Hour

The credit value of courses is expressed in semester hours. Most courses are designed to require approximately three hours of work a week throughout the semester for each semester hour of credit given; that is, for each hour a class meets, an average of two additional hours of preparation is expected of the student. The time requirement in the laboratory, field, or studio varies with the nature of the subject and the aims of a course, so there is no fixed ratio of laboratory to class hours. Most courses meet three hours a week in the fall and spring semesters and have a credit value of three hours. In a six-week summer term, courses meet seven and a half hours a week for three semester hours of credit. Fall and spring semester classes that meet on Monday, Wednesday, and Friday are scheduled for an hour (50 minutes with a 10-minute interval between classes); classes that meet on Tuesday and Thursday are scheduled for an hour and a half (75 minutes with a 15-minute interval between classes). Monday/Wednesday/Friday classes normally begin on the hour and are dismissed after 50 minutes; Tuesday/Thursday classes normally begin on the hour or half-hour as appropriate and are dismissed after 75 minutes. Summer classes normally are scheduled every day for an hour and a half (75 minutes with a 15-minute interval between classes).

Course Numbers

Each field of study taught at the University is identified by a name and a one-, two-, or three-letter abbreviation. Lists of fields (p. 167) are included in the *General Information Catalog*. Each course in the field is identified by a number made up of three digits, which may be followed by a letter. Except in the Dell Medical School, the first digit of the course number indicates the credit value of the course in semester hours. Courses numbered 201 through 299 have a value of two semester hours; 301 through 399, a value of three semester hours; and so on. A zero as the first digit indicates that the course is noncredit. Except in the Dell Medical School, the second and third digits of the course number indicate the rank of the course; if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; and if 80 through 99, of graduate rank.

Courses that have the same field of study abbreviation and the same course number, but differing credit values, may not both be counted for credit unless the course is designated as repeatable for credit. For example, Mechanical Engineering 136N and 236N may not both be counted because they are substantially the same; however, English 326K and 326L may both be counted.

A course number ending with the letter *A* designates the first half of a two-semester course; *B,* the second half. For example, Music 612A is the first half of Music 612; Music 612B, the second half. A student who completes half of a two-semester course earns half the semester-hour value of the course; for example, Music 612A has a value of three semester hours. A course number ending with the letter *X* designates the first third of a three-semester course; *Y,* the second third; and *Z,* the last third. Each third of the course has one-third the semester-hour value of the course as a whole.

Digital Badging Initiative

The Digital Badging Initiative allows colleges, schools, and units to offer non-transcriptable, not-for-credit recognition of a student's academic accomplishments. Digital badges (or microcredentials) signify the smaller academic achievements of a learner or student. Digital badges may represent work that a learner has participated in (completion badge), or a skill that they have demonstrated and been assessed on (competency badge).

Completion Badges

A completion badge is a digital record that acknowledges a learner's completion of an assignment, training, or other activity. These offerings require participation of a minimum of four contact hours.

Competency Badges

A competency badge is a digital record that acknowledges the assessed mastery of knowledge, skills and/or abilities in a given context. These badges have associated learning outcomes, assessment, and rubrics.

Diplomas

The diploma is a formal document issued by the University to recognize that a degree has been awarded by the institution.

University diplomas display the student's legal name or designated diploma name, graduation date, and degree earned (e.g. Bachelor of Arts, Bachelor of Science in Chemistry, or Doctor of Philosophy), along with the name and seal of the institution and the signatures of University and University of Texas System officials. If the student has graduated with University honors as described in Graduation with University Honors (p.), this accomplishment is indicated. The diploma does not display the student's major(s), minors or certificates.

Information regarding multiple degrees for undergraduate students can be found in the Graduation section of the Undergraduate catalog.

A graduating student has the option to have their diploma name printed with a chosen name instead of the name on their University record. This option must be submitted by the name change deadline as set by the Registrar during the final semester before graduation.

Any requests to reprint the diploma based upon a name change after the deadline will be assessed a $50 fee.

Diplomas are mailed about six to eight weeks after the student's graduation. A student who owes a debt to the University may be unable to obtain a diploma until the debt is paid.

A graduate may purchase a replacement diploma through the Office of the Registrar for $50. The signatures of University and University of Texas System officials may not be the same as those on the original

diploma, since the signatures of former officials are not maintained on file, therefore your diploma may reflect a reissued date. A graduate who requests a replacement diploma based on a name change (either legal or chosen) must pay the replacement fee.

Enrollment Status (Quantity of Work Rule)

The policies described in this section apply to to undergraduate, graduate, Pharm.D., and law students.

Enrollment Status

Fall or Spring

	Undergraduates	Graduate students	Pharm.D. students	Law students
Full-time	12 hours	9 hours	9 hours	10 hours
Half-time	6 hours	5 hours	5 hours	5 hours

Summer

	Undergraduates	Graduate students	Pharm.D. students	Law students
Full-time	12 hours	3 hours	3 hours	6 hours
Half-time	6 hours	2 hours	2 hours	3 hours

A student is also considered to be enrolled full-time if enrolled in a cooperative engineering course, taking a reduced course load because of a documented disability, or enrolled in a specific course that carries no hours of credit. An undergraduate enrolled in at least six hours of coursework in the student's semester of graduation may also be considered full-time; the student's dean must submit a request to the registrar's office that the student's enrollment status be changed from half-time to full-time.

Course Load Reduction

Approval of requests for course load reductions are always the prerogative of the academic dean when medical reasons are given. Applications to request consideration of a course load reduction should be submitted to Disability and Access. Disability and Access will request a recommendation from the UHS chief medical officer. Once the chief medical officer signs the application, UHS will submit it to the appropriate dean's office for a final decision.

[1] Graduate Quantity of Work rules apply to the Pharm.D. program.

Maximum Hours in the Fall and Spring Semesters

Undergraduates. An undergraduate student may not register for more than 17 semester hours in any fall or spring semester without the approval of their dean, unless the degree plan published in the undergraduate catalog for the student's major specifies otherwise.

Graduate students. The maximum course load for a graduate student is 15 semester hours. A heavier course load must have the recommendation of the graduate advisor and the approval of the graduate dean. It is permitted only under exceptional circumstances.

Pharm.D. students. A Pharm.D. student must register for a minimum of 12 semester hours and may not register for more than 17 semester hours in any fall or spring semester without the approval of their dean, unless the degree plan published in the undergraduate catalog for the Pharm.D. major specifies otherwise.

Law students. The maximum course load for a law student is 16 semester hours. In rare situations, the Assistant Dean for Student Affairs may, for good cause shown, permit a student to register for a maximum of 17 hours. Law students may take courses in other schools and colleges only with the express prior permission of the dean. Normally, a student may not take a course in another school or college, except an ROTC course, in addition to the maximum load in the School of Law.

Maximum Hours in the Summer Semester

Undergraduates. Except as permitted by their academic dean, no undergraduate student may register for more than 14 semester hours in a 12 week summer semester or for more than eight semester hours in either six-week term. A student whose maximum period of summer registration is nine weeks may not register for more than ten semester hours except as permitted by their academic dean.

Graduate students. The maximum course load for a graduate student is 12 semester hours in a 12 week summer semester. A heavier course load must have the recommendation of the graduate advisor and the approval of the vice provost for graduate and postdoctoral studies. It is permitted only under exceptional circumstances.

Pharm.D. students. A Pharm.D. student must register for a minimum of three semester hours in a 12 week summer semester, beginning the summer preceding the third professional year.

Law students. The maximum course load for a law student is 16 semester hours in a 12-week summer semester. In rare situations, the Assistant Dean for Student Affairs may, for good cause shown, permit a student to register for a maximum of 17 hours. Law students may take courses in other schools and colleges only with the express prior permission of the dean. Normally, a student may not take a course in another school or college, except an ROTC course, in addition to the maximum load in the School of Law.

Full-Time and Half-Time Enrollment

A student's enrollment status is determined by the number of credit hours for which the student is enrolled in residence in a semester. University Extension semester-based coursework is included in the total along with in-residence coursework. Semesters include multiple subterms. Fall and Winter Terms are subterms included in Fall Semester enrollment while Spring and May Terms are subterms included in Spring Semester enrollment. First Term, Second Term, Nine-Week Term, and Summer Term are subterms included in Summer Semester enrollment. The following table shows the minimum number of hours required.[1]

Minimum Hours in the Fall and Spring Semesters

Undergraduates. An undergraduate student may not carry fewer than 12 semester hours of coursework without the approval of their academic dean. Failure to obtain approval for a reduced course load may jeopardize the student's continuance in school. A student who is a minor must present a written statement from a parent or guardian accepting the conditions under which permission to carry a reduced course load is granted.

An international undergraduate student must have written permission from the International Office as well as from their dean to carry fewer than 12 hours.

Graduate students. Course load requirements for graduate student academic employees are given on that page in this section. Graduate students who are not also academic employees are not subject to minimum course load requirements.

An international graduate student must have written permission from the International Office as well as from their dean to carry fewer than nine hours.

Pharm.D. students. A Pharm.D. student must register for a minimum of 12 semester hours in any fall or spring semester.

Law students. A first-year law student may not register for less than 16 hours in the first fall or spring semester nor less than 14 hours in the second fall or spring semester without special permission of the Assistant Dean of Student Affairs. A minimum load of 10 semester hours is required of all other law students with 20 semester hours of credit or more.

Minimum Hours in the Summer Semester

There is no minimum course load in the summer semester.

Undergraduate Student Employees

An undergraduate student's combined University employment and semester-hour course load may not exceed 40 hours a week in any semester. Any academic unit may require a lower work-study load of students in the unit who are employed by the University. A student who wishes to exceed the maximum work-study load set by their college must have the approval of the dean of the college. More information is available at the student employment website.

Graduate Student Academic Employees

A "graduate student academic employee" is a graduate student who is also employed by the University under one of the following titles: assistant instructor, teaching assistant, assistant (graduate), academic assistant, graduate research assistant, and tutor (graduate). To hold one of these positions, a student must have no unfulfilled conditions imposed by the Office of Graduate and Postdoctoral Studies, must be in good academic standing, and must be making satisfactory progress toward a degree. Graduate student academic employees must be registered for at least nine semester hours in a fall or spring semester or at least three semester hours in a summer semester, in any combination of summer terms.

Student employment at UT Austin in any student academic job title may not total more than 20 hours a week during the student's first two fall or spring semesters of enrollment or more than 30 hours a week during subsequent fall or spring semesters. International student employment may not total more than 20 hours a week during any fall or spring semester without the approval of the International Office and the vice provost for graduate and postdoctoral studies.

Graduate student academic employees may not accept payment from a student for tutoring services, except on the recommendation of the department chair and with the approval of the vice provost for graduate and postdoctoral studies. If approved, the student may tutor only in a course with which they have no connection.

Examinations

The final examinations for each semester and summer term are scheduled by the Office of the Registrar. Classes that meet at the same time during a semester also have a common examination time. An index of these examination times is included in the Course Schedule; the examination schedule for a specific class is available through the Texas One Stop's website. The final exam schedule will be available by the first-class day of each semester. Students may access their individual examination schedules through the Texas One Stop's site.

Final examinations should begin promptly at the scheduled hour. They should not continue beyond the period (two or three hours) allocated in the official schedule, but may be shorter at the instructor's discretion.

No final examinations may be given before the examination period begins, and no change in time from that published in the official schedule is permitted without approval. An instructor with a compelling reason to change the time of an examination must obtain the approval of the department chair and the dean of the college or school in which the course is taught before announcing an alternative examination procedure to the students. No substantial examinations may be given during the last class week or during the study days preceding the final examination period. An examination is considered to be substantial if it counts for more than 30 percent of the final course grade. A change in the room assignment for a final examination may be made only with the approval of the registrar.

The study days preceding final examinations are not to be used as dates on which assignments are to be turned in, examinations are to be given, quizzes are to be scheduled, or for any other class-related activity, other than office hours or review sessions. In addition, the final examination period is reserved for scheduled final examinations. No other class-related activity, with the exception of office hours, may be scheduled during the final examination period.

An instructor may choose not to give a final examination. However, if an examination is given, all students must take it unless there is a uniform exemption policy announced to the class.

For good cause, an instructor may give a student permission to take an examination with a different class section than the one in which the student is registered.

For good cause, students may petition their academic dean for permission to change the time or place of an examination from that specified in the official schedule. If permission is given by the dean and the instructor, no penalty (such as a reduction in grade) may be assessed.

Uniform exams, also known as departmental exams, occur when an academic unit administers a single exam to all students in multiple classes at the same time.

In the event of a student having a regular exam and a uniform exam scheduled at the same time resulting in a conflict, the student should plan to take the final exam during the make-up exam period as written on the final exam public search because uniform exams already have a make-up exam scheduled for another date and time.

In the event of a student having two regular final exams scheduled at the same time resulting in a conflict, the instructor who chose the non-default exam period for their regular exam is responsible for accommodating the student by providing another time to take the exam that works with the student's schedule.

In the event of a student having two uniform final exams scheduled at the same time resulting in a conflict, the student should plan to take one of the final exams during the corresponding make-up exam period as written on the final exam public search because uniform exams already have a make-up exam scheduled for another date and time.

Instructors cannot require students to make up an exam on a day that would cause the student to exceed the three-exam limit. In the event a student has more than three (3) final exams scheduled in a single day, the student may petition the instructor(s) to allow them to take the additional exam on an alternate day. Students should ask the instructor of their latest two-hour exam time(s) on days they are scheduled for more than three exams for an alternate exam day.

Instructors of asynchronous courses are presumed to be offering asynchronous final exams. An instructor of an asynchronous course who wishes to give a synchronous final exam must contact their unit's course scheduler no later than one week before their first class meeting of the semester to request a synchronous final examination time. The instructor of the asynchronous course must accommodate students who

have regularly scheduled final exams that conflict with the asynchronous course scheduled final exam time.

All instructors must communicate dates and times of all final exams to all students on the syllabus, on the first class day.

In the event a student has an exam accommodation through Disability and Access (D&A) that causes an overlap with another scheduled exam, the instructor of the course causing the overlap must work with the student to find an alternative time for the exam or allow the student to take the exam through the designated D&A exam proctoring system.

A student should address complaints related to the final examination procedures in a course to the chair of the department offering the course. The student may appeal the decision of the department chair to the dean of the college or school in which the course is offered.

The following instructions govern the conduct of final examinations as well as other examinations given during the semester.

- Students must be informed that all written work handed in by them is considered to be their own work, prepared without unauthorized assistance.
- Students should be asked to cooperate in maintaining the integrity of examinations and encouraged to inform the instructor, without specifying the offenders, when cheating goes on in class.
- Instructors are responsible for advising students of the rules governing examinations and for supervising examinations in their respective classes. They, or their representatives, must remain in the examination room and take necessary actions to ensure an orderly examination and minimize the temptations and opportunities for cheating.
- Students are expected to (a) remain in the examination room until the test is completed; (b) refrain from talking; and (c) leave all notes and books where they are not accessible during the examination, unless otherwise directed by the instructor.
- An instructor who suspects academic dishonesty must report the case to the Office of the Dean of Students.

Grade Point Average (GPA) Computation

While a student's performance in a course is represented by a letter grade, a grade point average is used to represent the student's academic performance more broadly. For undergraduates, the official grade point average is called the cumulative University grade point average; the official grade point average for graduate students is called the graduate grade point average. Official grade point averages are calculated by the registrar and appear on the student academic record maintained by the registrar.

The following numerical equivalents of letter grades are used in the calculation of both the cumulative University grade point average for undergraduates and the graduate grade point average:

Letter grade	Grade points	Letter grade	Grade points
A	4.00	C	2.00
A-	3.67	C-	1.67
B+	3.33	D+	1.33
B	3.00	D	1.00
B-	2.67	D-	0.67
C+	2.33	F	0.00

Undergraduate Students

The cumulative University grade point average for an undergraduate includes all work undertaken at The University of Texas at Austin (including credit by examination, correspondence, and extension) for which a letter grade is recorded. Courses in which the symbol *I, Q, W, X, S, U,* or *CR* is recorded are excluded. (Note: Since September 15, 2006, the University has awarded only the symbol *CR*, rather than a letter grade, for credit earned by exam. As a result, credit earned by exam and recorded since that date is not included in the student's cumulative University grade point average. Through September 15, 2006, students chose either a letter grade or the symbol *CR* for credit earned by exam; credit by exam that was recorded with a letter grade is included in the student's cumulative University grade point average.)

Graduate Students

The graduate grade point average includes all upper-division undergraduate and graduate courses in which the student earns a letter grade while enrolled in Graduate and Postdoctoral Studies; the following are excluded: undergraduate courses taken through the University's TEXAS Extended Campus; courses for which the symbol *Q, W, X, I, CR,* or *NC* is recorded; graduate or undergraduate courses the student took at the University before enrolling in Graduate and Postdoctoral Studies; credit earned by examination; and courses taken at other institutions. The graduate grade point average also excludes grades in all undergraduate courses the student took from fall 1999 through summer 2008; upper-division undergraduate courses the student took as a graduate student before fall 1999 and after summer 2008 are included.

Grading (Evaluation)

Overview

Faculty members are free to develop their own methods of evaluating the performance of students in their classes, both undergraduate and graduate, but they are required to make the methods of evaluation to be used known in writing by the first class day. Responsibility for assuring adequate methods of evaluation rests with departmental faculties and is subject to administrative review. In courses with multiple sections, departments should provide for necessary coordination. Materials used in evaluating a student's performance must be collected by the instructor at or before the regularly scheduled final examination. The final examination is a common method of final evaluation in courses.

Grades

Letter grades are used to record the instructor's evaluation of student performance in a course. The following grades are used: *A, A-, B+, B, B-, C+, C, C-, D+, D, D-,* and *F*.

To receive credit for a course, an undergraduate student must earn a grade of at least *D-*. To include a course in the Program of Work for a graduate degree, a graduate student must earn a grade of at least *C*. More information about the Program of Work is given in the Graduate Catalog. In addition to earning adequate grades in courses, undergraduates must have a cumulative University grade point average of at least 2.00 to maintain satisfactory progress toward a degree; graduate students must maintain a graduate grade point average of at least 3.00. Information about these requirements is given in the section Academic Warning and Dismissal (p. 53). Computation of the grade point average is explained in the section Computation of the Grade Point Average (p. 62).

Grades are given by semester; however, in a course extending through two or three semesters, credit is not counted toward the degree until all semesters have been completed.

Members of the faculty are not authorized, without the academic dean's approval, to withhold a final grade or to defer reporting a final grade at the end of the semester other than by the use of the symbol *X*, described in Symbols (p. 63). If a grade is withheld without the dean's approval, the grade may not be added to the official records later without the written approval of the academic dean. Issues involving withholding or deferring grades for graduate students are handled by the deans of the colleges and schools.

After a grade has been reported to the registrar, it may not be changed unless an error was made by the instructor. A college or school may approve an appeal for change of final grade for a semester prior to

the previous fall or spring semester, but only for the most compelling nonacademic reasons. If approved, the appeal must be signed by the dean or the appropriate associate dean of the college/school. For graduate students, this is the vice provost for graduate and postdoctoral studies or the associate dean for graduate student services.

Symbols

Under specific conditions, instructors may use a symbol rather than a letter grade to report a student's standing in the semester's work. The following symbols are used:

CR	Credit
NC	No credit
Q	Course was dropped
W	Student withdrew from the University
X	Temporary delay of course grade
I	Permanent incomplete
*	Course is continuing
S	Satisfactory
U	Unsatisfactory
#	Grade was not submitted in time for this report
Z	Student is registered on the pass/fail or credit/no credit basis

Symbol *X*: Temporary Delay in Reporting the Final Course Grade

A student is expected to complete a course, including a self-paced course, in a single fall or spring semester, summer semester, or summer term. If the course is not completed as expected, the student normally will not be given additional time to complete it, or allowed to complete additional work to achieve a better grade. In rare instances, for nonacademic reasons and at the discretion of the instructor, a temporary delay of the final course grade, symbol *X,* may be recorded.

Improper uses of the symbol *X*

A student must not be assigned the symbol *X* to provide (1) the opportunity to raise a grade for any reason other than the approved reasons cited below; (2) time to prepare coursework in addition to that assigned the entire class; or (3) time to repeat the entire course.

Approved uses of the symbol *X*

The symbol *X* is not issued for student or faculty convenience; it may be issued for one of the following reasons only in the case of compelling, nonacademic circumstances beyond the student's control.

1. **Missing the final examination.** The student is unable to take a final examination because of illness or for another nonacademic reason. A physician's statement or other satisfactory verification is required.
2. **Incomplete classroom assignment.** The student has not been able to complete the required class or laboratory assignments for a reason other than lack of adequate effort. A request for temporary delay of the final course grade because of incomplete class or laboratory work can be made only if the student has a passing average on the classwork or laboratory work already completed and has taken and passed the final examination (unless a final examination is not given in the course or the student is unable to take the examination for reasons indicated in the previous paragraph).
3. **Reexamination petition.** Only a student who has a grade average of at least *C-* on all classwork and laboratory work submitted before the final examination may request a temporary delay of the final course grade because the student failed the final examination, which is the examination given during the final examination period as defined in the official examination schedule. If the instructor denies the student's reexamination petition, the student's final course grade remains as originally determined. If the instructor grants the petition, and the student earns a grade of at least *C-* on the reexamination, then the instructor substitutes the reexamination grade for the original examination grade in determining the student's final course grade. If the instructor grants the petition, and the student earns a grade on the reexamination of less than *C-,* then a final course grade of *F* must be recorded.

Assignment of the symbol *X* by the registrar

If a faculty member fails to report a grade for a student, the registrar enters the symbol *X;* an *X* is also entered for a student who is given the symbol *CR* by the instructor when the student is not registered for the course on the pass/fail or credit/no credit basis. In either case, the student should contact the instructor promptly so that a final grade may be reported to the registrar. If no final grade is reported, the symbol *X* is converted to a grade of *F* or the symbol *I* as described in the following section.

Replacement of the Symbol *X* with a Grade or the Symbol *I*

Undergraduates

If an undergraduate student receives the symbol *X* in a course, the student must complete the requirements for the course and the instructor must report a final course grade by the last date for grade reporting in the next fall or spring semester, or an *F* will be recorded as the final grade in the course. The period for completion of the coursework may be extended only for unusual circumstances beyond the student's control, as recommended by the instructor and approved by the student's academic dean. A student who has received an *X* in a course may not register for that course again until a final grade has been recorded, unless the course is one that may be repeated for credit.

The registrar will notify the student when a grade change is recorded. While the symbol *X* appears on a student's record, the course for which the symbol is recorded is not included in the student's University grade point average. When the final grade has been recorded as described above, then the course is included in the student's grade point average. More information about the grade point average is given in Computation of the Grade Point Average (p. 62).

Graduate students

If a graduate student receives the symbol *X* in a course, the student must complete the course requirements by the last class day in their next fall or spring semester of enrollment; the instructor must report a final grade by the end of the grade reporting period in that semester. If these deadlines are not met, the symbol *X* is converted to the symbol *I* (permanent incomplete). If the student is not enrolled during a fall or spring semester for 24 months following the end of the semester in which the *X* is reported, and the instructor does not report a final grade, then the symbol *X* is converted to the symbol *I.* The symbol *I* cannot be converted to a grade.

The period for completion of course requirements may be extended only under unusual circumstances beyond the student's control and only upon the recommendation of the instructor and the approval of the graduate dean.

The registrar will notify the student when a grade change is recorded. A course for which the symbol *X* or *I* is recorded is not included in the graduate grade point average and may not be listed on the student's Program of Work. When the symbol *X* is converted to a grade as described above, the course is included in the graduate grade point average and may be listed on the Program of Work. More information about the graduate grade point average is given in Computation of the Grade Point Average (p. 62); more information about the Program of Work is given in the Graduate Catalog.

Symbols *CR* and *NC*

Some courses must be taken for a letter grade; others must be taken on the pass/fail or credit/no credit basis. These courses are identified in the *General Information Catalog* and the Course Schedule. If registration for a course is not limited to the letter-grade basis, then the student may choose to register for credit rather than for a grade. Undergraduate, Law, Medical, and PharmD students register on the pass/fail basis and

earn either the symbol *CR* (credit) or a grade of *F;* graduate students register on the credit/no credit basis and earn either the symbol *CR* or the symbol *NC* (no credit).

The student should choose the pass/fail or credit/no credit option at the time of registration and may not change the grading basis in a course after the deadline given in the Academic Calendar (p. 7). Undergraduates may not change the grading basis in a course more than once.

Coursework requirements and methods of evaluation in a course must be the same for students registered on the pass/fail or credit/no credit basis as they are for students registered on the letter-grade basis.

Pass/Fail

Rules affecting registration on the pass/fail basis apply to all courses taken by an undergraduate.

An undergraduate who registers for a course on the pass/fail basis and earns a grade of *D-* or better is awarded the symbol *CR* for the course; if the student fails the course, a grade of *F* is awarded. If the student receives the symbol *CR,* the course is not included in the grade point average; if the student receives a grade of *F,* the course is included in the University grade point average.

Provided the following conditions are met, an undergraduate may take a limited amount of coursework on the pass/fail basis as part of the hours required for the student's degree. Other regulations may be imposed by the student's college or school.

1. The course must be in an elective subject outside the student's major field.
2. The student must have received at least 30 hours of college credit before registering for any course on the pass/fail basis, unless the course is offered only on the pass/fail basis.
3. The student may take no more than two courses a semester on the pass/fail basis.

Students in the College of Liberal Arts and students pursuing the Bachelor of Arts in the College Natural Sciences may take up to 16 semester hours of classroom or correspondence work in elective courses on the pass/fail basis. Students in the College of Natural Sciences pursuing a Bachelor of Science or a Bachelor of Science and Arts may take up to six semester hours of classroom or correspondence work in elective courses on the pass/fail basis. For students in the College of Natural Sciences pursuing a B.S. in Medical Laboratory Science (MLS) degree, hours taken in fulfillment of MLS clinical education program requirements may exceed the limit on pass/fail hours. Plan II students may take up to 19 semester hours in elective courses on the pass/fail basis. All other undergraduates may take up to five one-semester courses, including correspondence courses, on the pass/fail basis.

If students decide to major in a subject in which they have taken a course on the pass/fail basis, it is the prerogative of the department to decide whether or not the course will count toward degree requirements. Each department may offer as many as two courses in its major entirely on the pass/fail basis.

Credit by examination

Undergraduates may earn credit by exam on the pass/fail basis in required courses. Accepting credit by exam with the symbol *CR* does not reduce the number of elective courses for which the student may register on the pass/fail basis. (More information about credit by examination is given in Course Placement and Credit by Examination (p. 68).)

Credit/No Credit

Rules affecting registration on the credit/no credit basis apply to all courses—undergraduate, graduate, and professional—taken by a graduate student.

The student must have the graduate advisor's approval to take a course on the credit/no credit basis. There is no limit on the number of courses a graduate student may take on this basis. However, up to 20 percent of the hours on the Program of Work for a master's degree may have been taken on the credit/no credit basis, and no more than a comparable portion of the Program of Work for a doctoral degree. (Additional information about the Program of Work is given in the Graduate Catalog.)

Performance at the level of *C* or above is required to earn credit (*CR*) for a course taken on the credit/no credit basis. Courses taken on the credit/no credit basis are not included when the grade point average is computed.

Symbols *S* and *U*

The symbols *S* (satisfactory) and *U* (unsatisfactory) are assigned only in developmental studies (DEV) courses. These courses are not included in the student's grade point average.

Repetition of a Course

If a student repeats a course and has two or more grades, all grades and all semester hours are used to calculate the University grade point average and to determine the student's scholastic eligibility to remain in school. The official grade in a course is the last one assigned.

Students enrolled in any of the following colleges and schools may not repeat for credit a course in which they have earned a grade of *C-* or better: the McCombs School of Business, the Moody College of Communication, the Cockrell School of Engineering, the College of Liberal Arts, the College of Natural Sciences, the School of Nursing, and the College of Pharmacy.

Honors

Overview

Except as noted, the opportunities displayed in the following sections are open to all qualified undergraduates. Honors available through the colleges and schools, and the interdisciplinary programs and activities offered by the University Undergraduate Program, are described in the Undergraduate Catalog.

University Honors

Each fall and spring semester, undergraduates who complete a full course load and earn outstanding grades are recognized by inclusion on the University Honors list. Each time a student is included on the list, their official record also shows the award of University Honors for that semester. The list is compiled at the end of each fall and spring semester; it is based on the student's work in that semester only. To be included, a student must earn at least 45 grade points and a grade point average of at least 3.50 on courses completed in residence and must have no incomplete grades (symbol *X*).

Students are notified on the semester grade report of their inclusion on the list.

Graduation with University Honors

To be eligible to graduate with University honors, an undergraduate must have completed at least 60 semester hours at The University of Texas at Austin. Graduation with University honors is based on the average of all grades earned in courses taken in residence at the University, whether the courses were passed, failed, or repeated. Courses taken pass/fail are counted in the 60-hour minimum, but only letter grades (including *F*s in pass/fail courses) are used to determine the grade point average.

The faculty of each college or school determines the percentage of the graduating class of that division to receive honors, high honors, and highest honors and the minimum grade point average for each category, subject to the following requirements:

1. No more than 20 percent of the May graduating class of each college or school may receive honors, high honors, and highest honors. No more than 10 percent of the class may receive high honors and highest honors. No more than four percent may receive highest honors.
2. Honors graduates must have a grade point average of at least 3.30 in courses taken in residence at the University.

The faculty may adopt college- or school-wide standards or may designate grade point average and percentage requirements for each

program within the college or school, but the percentage of the college or school class receiving honors, high honors, and highest honors may not exceed those above.

Percentage requirements are not applied to August and December graduating classes. The grade point averages established for May graduates are applied to the following August and December classes to determine honors, high honors, and highest honors.

	Honors		High Honors		Highest Honors	
College or School	**Rank**	**Min. GPA**	**Rank**	**Min. GPA**	**Rank**	**Min. GPA**
School of Architecture	top 20%	3.30	top 10%	3.30	top 4%	3.30
McCombs School of Business	top 20%	3.50	top 10%	3.65	top 4%	3.80
Moody College of Communication	top 20%	3.465	top 10%	3.665	top 4%	3.865
College of Education	top 20%	3.50	top 10%	3.65	top 4%	3.80
Cockrell School of Engineering	top 20%	3.50	top 10%	3.70	top 4%	3.85
College of Fine Arts	top 20%	3.30	top 10%	3.60	top 4%	3.85
Jackson School of Geosciences	top 20%	3.30	top 10%	3.667	top 4%	3.867
School of Information	top 20%	3.30	top 10%	3.30	top 4%	3.30
College of Liberal Arts	top 20%	3.30	top 10%	3.667	top 4%	3.867
College of Natural Sciences	top 20%	3.30	top 10%	3.667	top 4%	3.867
School of Nursing	top 20%	3.30	top 10%	3.30	top 4%	3.30
College of Pharmacy	top 20%	3.60	top 10%	3.70	top 4%	3.80
School of Social Work	top 20%	3.30	top 10%	3.30	top 4%	3.30

Each grade point average listed is the minimum required for graduation with honors, high honors, or highest honors. Because only a certain percentage of the class may receive honors, the average required for each category may be higher.

In the McCombs School of Business, the Moody College of Communication, the Cockrell School of Engineering, and the College of Fine Arts, a student must have completed at least 60 semester hours of coursework in residence at the University to graduate with University honors.

In the Cockrell School, a student may receive only one bachelor's degree with University honors.

In the College of Fine Arts, to graduate with University honors, a student must rank in the indicated percent of students graduating that semester from their academic unit (art and art history, music, or theatre and dance) and must have no outstanding delay of grade (symbol X). A student may receive only one bachelor's degree with University honors from the College of Fine Arts.

College Scholars

On Honors Day each spring, the University designates outstanding students as College Scholars and Distinguished College Scholars, on the basis of registration and grade point average requirements for courses taken in residence at the University, as specified below.

To be designated a College Scholar, a student must meet all of the following requirements:

1. The student must be registered as an undergraduate in the current semester. Students who hold a bachelors degree or are registered in-absentia are not eligible.
2. The student must have completed at least 30 semester hours of coursework in residence at the University, and at least 60 semester hours of college coursework, including transferred work and credit by examination.
3. The student must rank in the top 20 percent of their class in each college or school in which they are enrolled, based on in-residence cumulative grade point average.
4. The student must have an in-residence University grade point average of at least 3.50.

To be designated a Distinguished College Scholar, a student must meet one of the following requirements:

1. The student in each class of each college or school meeting the above requirements for College Scholars with the highest in-residence University grade point average will be designated a Distinguished College Scholar.
2. All other students in each college or school who meet the first, second, and fourth College Scholar requirements stated above and are also in the top 4 percent of their class in each college or school in which they are enrolled will be designated as Distinguished College Scholars.

A student is ineligible for honors recognition as a College Scholar or a Distinguished College Scholar if, in the last two years prior to the creation of the Honors Day report, the student received final sanctions under Subchapter 11-701 (a)(2)-(a)(14) of the Institutional Rules for:

(1) academic misconduct and/or

(2) non-academic misconduct involving warning or higher.

Designation as a College Scholar or a Distinguished College Scholar will be based on eligibility calculations by the Office of the Registrar as of 5 p.m. on the 20th class day of the semester in which the Honors Day Ceremony is held. Students who are eligible for recognition receive invitations to the Honors Day convocation.

Marshall, Rhodes, and Truman Scholarships

The Marshall scholarship allows young Americans of high ability to study for a degree in the system of higher education of their choice in the United Kingdom. Each scholarship offers up to two years of postgraduate study. Up to 40 new awards are offered every year in the United States. Students should apply in their senior year. Applications are typically due to the Office of Distinguished and Postgraduate Scholarships in early August.

The Rhodes scholarship is for outstanding students between 18 and 24 years of age on October 1 of the year of application. Students should apply in their senior year. Each scholarship offers two years of postgraduate study at the University of Oxford. Thirty-two scholarships are assigned annually to the United States. Applications are typically due to the Office of Distinguished and Postgraduate Scholarships in early August.

The Harry S. Truman Scholarship Foundation awards $30,000 merit-based scholarships annually to college students who wish to attend graduate school in preparation for careers in government or elsewhere in public service. Applicants must be United States citizens or nationals, or applying for citizenship at the time of application. Truman Scholars receive leadership training, graduate school counseling, preferential admission and merit-based aid at some premier graduate institutions, and internship opportunities with federal agencies. Students who will be seniors the following academic year should apply to the Office of Distinguished and Postgraduate Scholarships in October.

Alpha Lambda Delta and Phi Eta Sigma

Alpha Lambda Delta and Phi Eta Sigma (ALDPES) are national honor societies that recognize scholastic achievement during a student's first year at The University of Texas at Austin. Both chapters were installed at UT in the 1930s and are now run as a combined chapter. The purpose of ALDPES is to encourage superior academic achievement among students beyond their first year at institutions of higher education, to promote intelligent living and a continued high standard of learning, and to assist students in recognizing and developing meaningful goals for their roles in society.

Membership is by invitation only to students who earn a grade point average of at least 3.50 after completing at least twelve semester hours of coursework in their first semester at the University. Eligible students are notified by the University Undergraduate Programs at the beginning of the spring semester. More information can be found on the Honors Societies website.

Junior Fellows Program

The Junior Fellows Program provides recognition for outstanding students who have completed four semesters, or approximately 60 semester hours of coursework. Chosen annually from the best students across the campus, junior fellows are given the opportunity to participate in independent study and research with distinguished professors of their choice, and to have that research supported by small grants, if necessary. The program is administered by the College of Liberal Arts, but undergraduates in all colleges and schools are eligible to take part. Students who wish to be considered should apply by April 15. Applications are available online.

Phi Beta Kappa

Phi Beta Kappa, the oldest honorary society in America, was founded by students at the College of William and Mary in 1776. The Alpha of Texas chapter was organized at The University of Texas at Austin in 1904. Membership is by invitation only to upper-division students who achieve distinguished scholastic records in disciplines that Phi Beta Kappa designates as liberal arts and sciences.

Students eligible for early membership must have at least 60 hours of credit in residence at The University of Texas at Austin and a 4.0 GPA at the time of the election. Because the chapter seeks to elect no more than 2% of any class for early induction, additional criteria may be added in the future for early election if the number of students obtaining a 4.0 continues to rise.

Students eligible for regular membership as a degree candidate must have at least 60 in residence hours at The University of Texas at Austin, have applied for graduation, and have at least a 3.90 GPA at the time of the election. The exact GPA cutoff varies year to year because PBK seeks to elect no more than the top 8% of students graduating. For this reason, 3.9 is a guideline — not an entitlement to election. (In 2021, for example, the GPA cutoff for election was 3.94).

Students eligible for regular membership as a recent graduate must have at least 60 in residence hours at The University of Texas at Austin, have graduated from UT immediately prior to the most recent election eligibility period, and have at least a 3.90 GPA at the time of the election, but the exact GPA cutoff will be the same as students who are in the graduating class being inducted. For this reason, 3.9 is a guideline, not an entitlement to election.

All eligible students are notified by the University Undergraduate Programs after spring chapter elections. More information can be found on the Honors Societies website.

Phi Kappa Phi

Founded in 1897 at the University of Maine, Phi Kappa Phi is the nation's oldest, largest, and most selective honor society for all academic disciplines. The University of Texas chapter was established in 1962. Phi Kappa Phi awards more than $800,000 annually through graduate and undergraduate scholarships, member and chapter awards, and grants for local and national literacy initiatives.

Membership is by invitation only to the top 7.5 percent of second-semester juniors, the top 10 percent of seniors, and graduate students with a grade point average of 4.00. Students are eligible for membership if they have completed the minimum required hours and have the required grade point average. Eligible students are notified by the University Undergraduate Programs in the spring. More information can be found on the Honors Societies website.

Tau Sigma

Tau Sigma is a national honor society that recognizes the scholastic achievement of transfer students at The University of Texas at Austin. The purpose of Tau Sigma is to recognize and promote academic excellence and involvement among transfer students. The UT Austin Beta Theta Chapter was established in 2007. Tau Sigma members have opportunities to earn scholarships, take leadership positions within the chapter, and serve others at the university and community level while connecting with other academically oriented transfer students.

Membership is by invitation only to students who earn a grade point average of at least 3.50 after completing at least twelve semester hours of coursework at UT Austin. Eligible students are notified by the University Undergraduate Programs at the beginning the spring semester.

Personal Record Information

Name change

The University maintains educational records under the student's full, legal name. Official documents such as transcripts will not be issued bearing any other name.

Currently enrolled and former students may change the name on their permanent academic record by presenting an original or certified copy of the appropriate documentation to the registrar. In addition, students may be asked to present a notarized copy of their request. To change the first, middle, last name, suffix, or sequence of names the student must present an original or certified copy of one of the following: government issued ID (US only), such as driver's license; valid passport (any country); signed certificate of naturalization; original or certified copy of birth certificate (US only), marriage certificate; court order (must show change to new name); or divorce decree (must show change to new name). The registrar may request additional documentation if necessary.

Change of address, telephone number, or e-mail address

The student must give the correct local and permanent postal addresses, telephone number(s), and e-mail address to the Office of the Registrar and to the office(s) of the student's dean(s) and must notify these offices immediately of any changes. Official correspondence is sent to the postal or e-mail address last given to the registrar; if the student has failed to correct this address, the student will not be relieved of responsibility on the grounds that the correspondence was not delivered.

Searches

General searches of a student's personal papers and belongings may be conducted at the discretion of an instructor only when there is reasonable suspicion that the student has engaged in misconduct in violation of the Appendix C, chapter 11, Student Conduct and Academic Integrity (p. 117). In addition, the instructor must believe that the search is necessary to maintain the academic integrity of an examination or to maintain an environment in which learning can occur.

Self-Paced Distance Education Coursework by Resident Students

Students enrolled in residence must have the prior approval of their dean to count correspondence work toward degree requirements. Correspondence courses taken from The University of Texas at Austin

and used toward a degree at the University are subject to the same pass/fail rules that apply to courses taken in residence; information about pass/fail registration is given in Symbols CR and NC, Pass/Fail (p. 63).

Summons to Administrative Offices

A summons to the office of any administrative officer must be observed. Failure to respond to a summons may result in suspension from the University. A summons to the dean may be sent by post or by e-mail, so it is important that the student keep both the dean and the Office of the Registrar informed of all current addresses.

Teacher Certification

The University conducts a large, field-based educator preparation program leading to certification for future teachers, administrators, and educational support personnel. This program is evaluated each year by the State of Texas and by the federal government. The results of these evaluations attest to the high quality of educator preparation at the University. Teacher preparation requires extensively supervised field experiences, with most programs requiring approximately 800 hours in the field. Based on certification exam pass rates for all applicant demographic groups, the Texas Education Agency (TEA) rated the University educator preparation program "accredited," its highest rating. The University recommends students for teacher certification to TEA. To be recommended for a certificate to teach in elementary or secondary school, an undergraduate student must earn a degree as well as complete an approved teacher certification program. Students complete the following requirements for approved programs in conjunction with degree requirements:

1. *Enrollment.* Students seeking certification to teach at the elementary school level (option a below) must register in the College of Education and major in education, an interdisciplinary program. Students seeking secondary (option b), or all-level (option c) certification must earn a degree from the college or school that houses the academic program in their prospective teaching field. Students should be advised by both an advisor in their academic department and a teacher certification advisor to confirm that the courses for which they register are applicable to their certification program.
   Students who are seeking teacher certification should select from the following options:
   a. Elementary (early childhood through grade 6): ESL generalist or ESL bilingual generalist
   b. Secondary (grades 6 through 12): dance; (grades 7 through 12): mathematics, science, computer science, English language arts and reading, history, or social studies
   c. All-level: special education, art, music, theatre, or languages other than English
2. *Admission to the Professional Development Sequence.* All students seeking teacher certification must complete a sequence of professional development courses. Admission to the Professional Development Sequence is restricted, and students must apply for admission. Academic performance, completion of prerequisite courses, documented evidence of proficiency in reading and in oral and written communication, and the number of hours needed to complete the program may be factors in the admission decision.

   For students seeking early childhood through grade six or all-level generic special education certification, admission to the Professional Development Sequence requires a minimum University grade point average and minimum course grades prescribed by each program. To progress within the sequence, the student must maintain the minimum grade point average for the program. In addition, when they enter the Professional Development Sequence, students seeking early childhood through grade six and all-level generic special education certification may lack no more than one class outside the sequence. Additional information about these requirements is available in the Student Division Office, College of Education.

   For students in other teacher certification programs, requirements for admission to and continuation in the Professional Development Sequence are set by the college in which the student majors.
3. *Certification exam.* An individual seeking certification is required to achieve a satisfactory level of performance on the appropriate Texas Examinations of Educator Standards (TExES) test to be approved for initial or additional certification. Students who do not apply for their teaching certificate within three years of completing student teaching may be required to complete additional fieldwork hours and coursework before applying for the certificate.
4. *Legal questions.* In accordance with state law, the commissioner of education may suspend or revoke a teaching certificate or refuse to issue a teaching certificate for a person who has been convicted of a felony or misdemeanor for a crime that directly relates to the duties and responsibilities of the teaching profession. Information about legal issues is available from the teacher certification officer, George I. Sánchez Building, Certification Office, (512) 471-3223.

For students who hold a bachelor's degree, separate programs are available that lead to teacher certification at all levels. The requirements of these postbaccalaureate programs may be different from those of the undergraduate certification programs.
For more information about teacher certification programs, students should see an academic advisor in the Student Division Office of the College of Education, in the George I. Sánchez Building.

Criminal History Acknowledgement

As required by HB1508, teacher certification applicants need to be aware of the following:

- In order to earn a State of Texas teacher certification, you must pass a criminal history background check.
- If you have been convicted of an offense that is considered not appropriate for an educator, you could be ineligible to earn a teacher certification from the State of Texas. Details about potential eligibility of persons with a criminal history can be found in Texas Administrative Code, §249.16.
- You have a right to request a preliminary criminal history evaluation letter from the Texas Education Agency before admission into a program. The Texas Education Agency currently charges a fee for this criminal history evaluation. More information about the preliminary criminal history evaluation is online at https://tea.texas.gov/Texas_Educators/Investigations/Preliminary_Criminal_History_Evaluation-FAQs/.

Testing and Evaluation Services

Testing and Evaluation Services

Testing and Evaluation Services (TES) coordinates many exam-related programs and services for UT Austin students and faculty, and in some cases, public exams.

Campus Testing Center

The Campus Testing Center (CTC) collaborates with Disability and Access to provide a centralized testing location for in-person accommodated tests for UT Austin students.

Student Testing Services

Student Testing Services (STS) coordinates the credit by examination (CBE) program and administers many exams for course credit and placement for UT Austin students. In addition to tests developed by University departments, STS also serves as a testing center for some worldwide testing programs, including:

- College Level Examination Program (CLEP)
- Graduate Record Examinations (GRE) General Test
- Praxis Series (Professional Assessments for Beginning Teachers)
- Test of English as a Foreign Language (TOEFL)

Scanning Services

Scanning Services are provided to any UT Austin instructor who administers coursework for an official class using the standard answer sheets or Remark answer sheets.

Public Testing Center

The Public Testing Center offers proctoring services to the public for the following exam types:

- Exams from Other Universities: Students may visit our testing center to take proctored exams from outside universities, including international universities.
- Kryterion Exams: Kryterion is a secured exam delivery company that offers high-stakes test delivery. The UT Public Testing Center serves a HOST Location (High-stakes Online Secured Testing) for Kryterion.
- State Exams: The UT Public Testing Center partners with various state of Texas organizations to provide specified licensing and credentialing exams.

More information about exams, programs, and services can be found on the Testing and Evaluation Services website.

Credit by Examination (CBE) and Course Placement

Student Testing Services (STS) coordinates the credit by exam (CBE) program as well as many placement tests within the University. UT Austin students may use qualifying scores on accepted exams to earn course credit and determine the appropriate level of placement for certain undergraduate coursework. Many exams are optional, while others are recommended or required for enrollment in certain courses. Most serve as a basis for both placement and course credit.

Any current, former, or prospective University student may attempt to earn credit by exam for any required or elective undergraduate course, provided the student has neither passed nor failed that course at the University or at any other collegiate institution. The sole exception to this policy is when a student has received transfer credit for a course with fewer semester hours than the corresponding University course carries; in those instances, the student may earn credit by exam for the University course. Additional eligibility requirements may be established by the academic department awarding credit, with the approval of the dean of the college or school. Information about additional requirements is available from Student Testing Services and from the academic department.

Credit earned by examination satisfies degree requirements in many of the same ways as credit earned by passing a course, except that it does not count as credit earned in residence. Credit earned by examination does not jeopardize eligibility for scholarships that require freshman standing. Credit earned by examination is designated on the student's transcript with a grade of 'CR,' and does not impact the student's GPA. The student's official transcript does not reflect unsuccessful attempts to earn credit by examination.

A student's academic dean may approve an exception to the course placement and credit by exam policies for compelling academic reasons. If the exception involves the student's eligibility to be tested or to receive credit by exam in a particular course, the exception must also be approved by the department in which the course is offered.

All tests administered at the University for course placement and credit by exam require a fee. Information, including the testing schedule, eligibility requirements, test descriptions, sample questions, and the amount of test fees (including a $25 nonrefundable test registration fee), is available on the STS website.

Petitioning for Placement and/or Credit

A student who has earned an eligible score on an accepted exam has the option of using the score to meet a prerequisite requirement, as well as to earn credit for a given course. Course credit is not automatically added to a student's academic record upon enrollment; a student must accept credit for the specific courses they wish to add to their academic record via the course petitioning process. Students may choose to petition for placement or petition for credit.

- Petitioning for Placement allows a student to "place out" of a given course, as well as enroll in any courses that require the petitioned course as a prerequisite.
- Petitioning for Credit allows a student to "place out" of a given course, enroll in any courses that require the petitioned course as a prerequisite, and earn credit for the petitioned course.

If the student petitions for credit, STS reports the petitioned course to the Registrar's Office and the course then becomes part of the student's academic record. If the student wishes to use the test score as a course prerequisite without earning credit hours for the prerequisite course (petition for placement), they may use the qualifying score, after consulting their academic advisor, to enroll in the subsequent course. In this case, the student does not earn the hours associated with the course and the course does not appear on the student's academic record. A student who uses a test score for placement only may later petition for credit for that course, but once the score has been used for course credit it may not be changed to placement only. Credit by examination cannot be reported to the Registrar for former students who are prohibited from enrolling in Texas public colleges and universities due to noncompliance with Texas Success Initiative regulations. Students may not petition for credit by examination while on academic dismissal.

A fee is assessed for using the test score to earn course credit. There is no fee assessed for using a test score for placement purposes only. The STS website gives complete instructions for petitioning and paying for exam and credit-related fees.

Although prospective students may take examinations to establish their eligibility to receive credit or placement, credit is awarded only to officially enrolled students and former students. Enrollment on the twelfth class day of a semester or the fourth class day of a summer term constitutes official enrollment.

In deciding whether to petition for credit by exam, students should consider the impact of the credit on their eligibility for a tuition rebate (p.); and the possibility that they will be charged additional tuition (p. 30) if they have excessive credit. They should also consider their program requirements and recommendations, future graduate or professional education plans, as well as any residency requirements. It is strongly advised that a student speak with their academic advisor prior to claiming credit by exam. Once credit for a petitioned course is written to a student's academic record, it cannot be removed.

Language Placement Testing

Most of the tests mentioned below are given during various periods throughout the academic year, and in some cases, during the summer session. Scheduled administrations for each exam may vary. General testing periods for the exams listed below may be found on the Yearly Testing Schedule on the STS website.

Foreign language placement tests serve not only to determine the level of work appropriate for students but also as the basis for credit by exam, which normally may be earned in lower-division courses. Credit by exam

may be used to absolve a high school unit deficiency or to fulfill degree requirements. Language credit that exceeds degree requirements often may be used as elective credit.

For course placement and credit by examination, the University uses the University of Wisconsin College-Level Placement Test in French; the College-Level Examination Program (CLEP) Test in German Language: Levels 1 and 2; and The University of Texas at Austin tests for credit in American Sign Language (ASL), Chinese, Hebrew, Hindi, Japanese, Korean, Latin, Persian, Polish, Portuguese, Russian, Spanish, and Turkish. Information about the language tests and in some cases, sample questions and recommended preparation materials, are available on the STS website and from the STS office.

Students who have taken either a College Board Advanced Placement (AP) Examination in Chinese, French, German, Italian, Japanese, Latin, or Spanish or any International Baccalaureate (IB) Examination in a foreign language do not need to take the corresponding recommended placement test, because the AP or IB examination results can be used for placement. Students should contact STS for information about potential testing options for foreign languages taught by the University but not listed in this section.

Students with transfer credit in a foreign language are encouraged to take the placement test before enrolling in further coursework in that language; however, in most languages, students with transfer credit are not required to take the placement test.

Students without transfer credit or eligible AP or IB scores but with knowledge of American Sign Language or a foreign language, however acquired, are strongly encouraged and in some cases required to take the associated placement test before enrolling in a course in that language. Please contact STS for additional information.

Examinations Used for Course Credit and Placement

The following tests serve as basis for placement and credit by examination at the University. A complete list of exams, required scores, and course numbers awarded can be found on the STS website.

1. **College Board Advanced Placement (AP) Examinations.** Credit is granted to students who have earned satisfactory scores of 3 or higher on the College Board Advanced Placement (AP) Examinations in Art (Art History and Studio Art), Biology, Calculus, Chemistry, Chinese, Computer Science, English, European History, French, German, Human Geography, Italian, Japanese, Latin, Macroeconomics, Microeconomics, Music Theory, Physics, Precalculus, Psychology, Spanish, Statistics, United States Government and Politics, United States History, and World History: Modern. The AP Examination in US Government and Politics is supplemented with test items on Texas government; these additional items are administered only at the University. Advanced Placement Examinations are offered only once each year, in May, at specific high schools across the country. More information about AP Examinations is published by the College Board.
2. **College-Level Examination Program (CLEP).** The CLEP examinations in American Government, American Literature, Calculus, English Literature, German Language: Levels 1 and 2, Principles of Macroeconomics, Principles of Microeconomics, Introductory Psychology, and Introductory Sociology are used as basis for credit by examination. The tests in American Government, American Literature, and English Literature are supplemented with items prepared by University faculty members; these items are available only on the University campus. Information about locally prepared items may be obtained from STS. All CLEP examinations used by the University as a basis for credit by exam are given on campus on an ongoing basis.
3. **International Baccalaureate (IB) Higher-Level Examinations.** Credit is granted by the University to students who earn satisfactory scores on the IB Higher-Level Examinations in Arabic, Biology, Chemistry, Chinese, Computer Science, Danish, Dutch, Economics, English, French, Geography, German, Hebrew, Hindi, History (concentrations in Africa, the Americas, Europe, and Islamic History), Italian, Japanese, Korean, Mathematics, Norwegian, Philosophy, Physics, Portuguese, Psychology, Russian, Social and Cultural Anthropology, Spanish, Swedish, and Visual Arts.
4. **International Baccalaureate (IB) Diploma.** Students who have earned the IB Diploma and enter the University as freshmen (p. 16) are awarded credit based on scores of 4 or higher on IB Higher-Level (HL) and Standard-Level (SL) examinations as described by Texas Education Code section 51.968. Before petitioning for credit, students should consider the impact of these hours on their eligibility for a tuition rebate (p.); and the possibility that they will be charged additional tuition (p. 30) if they have excess credit. Each student is strongly encouraged to discuss these issues with an academic advisor in their college before claiming credit. The student and advisor should also discuss the student's academic preparation for subsequent courses based on IB test scores. Credit by exam is awarded as described below to students who have participated in the IB program and submitted scores to the University:
   - Students who earn the IB Diploma and enter the University as freshmen (p. 18) may earn credit by exam for HL and SL subject exam scores of 4 or higher, as well as Theory of Knowledge.
   - Students who enter the university as transfer (p. 20) students or who complete some IB exams but do not earn the IB Diploma and may be eligible for credit by exam for qualifying scores on HL exams.
5. **The University of Texas at Austin tests for credit in American Sign Language (ASL), Arabic, Biology, Chemistry, Chinese, Computer Science, Government, Hebrew, Hindi, History, Japanese, Korean, Latin, Math, Physics, Persian, Polish, Portuguese, Spanish, Russian, and Turkish.** Eligible students can earn credit for specified courses in these fields. Descriptions of the tests are available on the STS website and from the STS office. These exams are offered at various times throughout the academic year. General testing periods can be found on the Yearly Testing Schedule on the STS website.
6. **Placement in rhetoric and writing.** A student must have an eligible score on the ACT Writing test, the SAT Writing and Language Test (paper-based SAT), or SAT Reading and Writing test (digital SAT) to receive credit for RHE 306 . Students first admitted to UT Austin as freshmen who were first enrolled at the University in the summer 2021 and subsequent semesters may be eligible to use a qualifying score on the essay portion (Writeplacer) of the TSI Assessment (TSIA) to earn credit for RHE 306 when taken during their first two long semesters of enrollment. A score on the Advanced Placement (AP) Examination in English Language and Composition or transfer credit for RHE 306 may also be used for credit and placement. Additional information is available from STS.

   International students whose native language is not English must submit satisfactory scores on the Internet-based Test of English as a Foreign Language (TOEFL iBT) for admission to a lower-division rhetoric and writing course. The TOEFL does not serve as a basis for awarding course credit.
7. **Other credit by examination.** With the approval of the appropriate academic dean and department chair or program director, a student may take an examination in any undergraduate course offered by the University for which they have reason to feel qualified. A candidate may apply to take a **Department Administered Exam (DAE)** only after registering as a student at the University and obtaining permission from the academic department in which the course is taught. Exams are given at the discretion of the administering department. A student who earns a satisfactory score will receive credit for the course. A student who intends to apply for a Department

Administered Exam should obtain a copy of the syllabus for the course or courses for which they are interested; only students who have the equivalent in knowledge or training of that presented in the outline should attempt the exam. After obtaining permission from the academic department to attempt the exam, students should contact Student Testing Services to obtain a Department Administered Exam form.

The Texas Success Initiative

The Texas Success Initiative (TSI) is a state-mandated program designed to improve student success in college. There are two components of the program: (1) an assessment to diagnose students' basic skills in reading, mathematics, and writing and (2) developmental instruction to strengthen academic skills that need improvement.

Developmental instruction options include a co-requisite model under which students concurrently enroll in a developmental studies course and credit-bearing course for each subject area for which the student is referred to developmental coursework. Co-requisite courses are available only to students who meet both Texas Success Initiative (TSI) eligibility and specific program requirements.

All non-exempt students are required by law to take the TSI Assessment (TSIA), which is the only college-readiness assessment approved by the Texas Higher Education Coordinating Board. Students admitted to The University of Texas at Austin may register to take the TSIA by completing this form. If a student chooses to take the TSIA at another institution, it is the responsibility of the student to see that scores are sent to the University's TSI office. Please check our Navigating TSI Requirements page to find more information on how to be TSI Complete.

A student may be exempt from all TSI requirements under any one of the following conditions:

- The student has earned a bachelor's degree or an associate degree.
- The student is serving on active duty as a member of the armed forces of the United States, the Texas National Guard, or as a member of a reserve component of the armed forces of the United States and has been serving for at least three years preceding enrollment.
- The student was honorably discharged, retired, or released from active duty as a member of the armed forces of the United States or the Texas National Guard or served as a member of a reserve component of the armed forces of the United States on or after August 1, 1990.
- The student is a non-degree-seeking or a non-certificate-seeking student.
- The student has attended another Texas public institution of higher education and has been determined to have met readiness standards by that institution.
- The student has transferred to the University from a private or independent institution of higher education, an accredited out-of-state institution of higher education, or an international institution of higher education and has completed college-level coursework, as determined by the University.

A student may be exempt from one or more TSI requirements under the following conditions:

- For SAT scores:
  - A student with a math score of 530 or higher is exempt from the math requirement.
  - A student with an Evidence-Based Reading and Writing (EBRW) score of 480 or higher is exempt from the English Language Arts and Reading (ELAR) requirement.
- For ACT administered prior to February 15, 2023:
  - A student with an ACT composite score of at least 23 and a math score of at least 19 is exempt from the math requirement.
  - A student with an ACT composite score of at least 23 and an English score of at least 19 is exempt from the English Language Arts and Reading (ELAR) requirement.
- ACT administered on or after February 15, 2023:
  - A combined score of 40 on the English and Reading (E+R) tests is exempt from the English Language Arts and Reading (ELAR) requirement.
  - A score of 22 on the mathematics is exempt from the math requirement. There is no composite score.
- For STAAR scores:
  - A student with a score of at least Level 2 on the STAAR English III end-of-course (EOC) is exempt from the English Language Arts and Reading (ELAR) requirement.
  - A student with a score of at least Level 2 on the STAAR Algebra II end-of-course (EOC) is exempt from the math requirement.
- For GED scores:
  - A student with a minimum score of 165 on the Mathematical Reasoning subject test is exempt from the math requirement.
  - A student with a minimum score of 165 on the Reasoning Through Language Arts (RLA) subject is exempt from the English Language Arts and Reading (ELAR) requirement.
- For HiSET scores:
  - A student with a minimum score of 15 on the Mathematics subtest is exempt from the math requirement.
  - A student with a minimum score of 15 on the Reading subtest and a minimum score of 15 on the Writing subtest, including a minimum score of 4 on the essay, is exempt from the English Language Arts Reading (ELAR) requirement.

SAT, ACT, STAAR, GED, and HiSET scores used to support an exemption must be less than five years old. Students who fail to meet the minimum passing standards on the TSIA are required to enroll in a developmental education course designed to strengthen skills in reading, writing, or mathematics. Students will meet with a TSI advisor to decide which course is best suited to their individual needs. For further information, students may visit the Texas Success Initiative website.

Withdrawal

A student who wishes to withdraw from the University after completing registration for a semester must secure the dean's acknowledgement. Following withdrawal, students are required to meet with the appropriate school/college academic advisor or other designated individual before the first class day of the semester for which they plan to re-enroll. A student who is a minor must present a written statement from a parent, guardian, or sponsor indicating that the responsible person knows of the student's intent to withdraw. In addition, international students must have permission from the International Office to withdraw.

The dean's signed acknowledgement to withdraw must be submitted to the registrar, where the student may request a refund of tuition, if eligible. Note that tuition refunds are strictly limited according to University policy as described at the following page: Tuition Adjustments (p. 49). No refund will be made to anyone other than the payer, except on the payer's written order.

After the last day for withdrawing, an undergraduate student may petition for withdrawal only for urgent, substantiated, nonacademic reasons. Withdrawal by an undergraduate student on academic warning may affect the student's academic standing. Information about academic warning and dismissal is given in Academic Warning and Dismissal (p. 53).

A graduate student in good standing may withdraw with the acknowledgement of the vice provost for graduate and postdoctoral studies through the last class day of the semester. A graduate student who is in warning status may not withdraw without the recommendation

of the graduate advisor and the acknowledgement of the vice provost for graduate and postdoctoral studies.

Withdrawal for military service

A student who withdraws as a result of being called to required military service may choose (1) to receive a refund of tuition for the semester; (2) if eligible, to be assigned an incomplete (symbol *X*) in each course as described in Symbol X: Temporary Delay in Reporting the Final Class Grade (p. 63); or (3) at the instructor's discretion, to receive a final grade in courses where the student has completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material. Policies affecting students who are absent for military service but do not withdraw are described on the following page: Attendance (p. 58).

Medical withdrawal

After the last day for withdrawing, a student who has an urgent, substantiated, and significant medical or mental health condition which impacts the student's academic functioning may be withdrawn from the University as of the date, and under the conditions, specified at the time of the withdrawal. Note that tuition refunds are strictly limited according to University policy as described at the following page: Tuition Adjustments (p. 49).

A student must request a medical withdrawal from UHS/CMHC by the last class day. Forms must be returned to UHS/CMHC before the first day of final exams. A student who requests medical withdrawal must submit copies of medical records from each medical and mental health care provider treating the condition. The medical records must include the date of onset of the illness or injury, dates of care, and diagnosis and prognosis. If the withdrawal is approved, the registrar and other appropriate officials will be notified. Specific information about the medical withdrawal process is available at the University Health Services website.

- ### Course Load Reduction

  Approval of requests for course load reductions are always the prerogative of the academic dean when medical reasons are given. Applications to request consideration of a course load reduction should be submitted to Disability and Access. Disability and Access will request a recommendation from the UHS chief medical officer. Once the chief medical officer signs the application, UHS will submit it to the appropriate dean's office for a final decision.

Retroactive withdrawal

A student who wishes to leave the University for nonacademic reasons is expected to withdraw by the last class day of the current semester as described above. Requests to withdraw after the last class day are considered only if there were compelling documented circumstances that reasonably prevented the student from withdrawing by that day. Note that tuition refunds are strictly limited according to University policy as described at the following page: Tuition Adjustments (p. 49). Students considered under this standard may include, but are not limited to, students who were hospitalized or incarcerated, called away at the end of the semester because of a family crisis, asked to perform military service, or experienced a mental or physical health problem documented by an appropriate healthcare professional, that seriously inhibited their mental or physical functioning.

In these cases, students may discuss the situation with the dean or an academic advisor in the dean's office. If there is sufficient and compelling documentation, and if the request for retroactive withdrawal is submitted to the dean's office before the end of the next fall or spring semester, the dean or the dean's staff will review the request and consider approval of a retroactive withdrawal. Appropriate documentation could include written recommendations from University Health Services and the Counseling and Mental Health Center.

A college or school may approve an appeal for retroactive withdrawal for a semester prior to the previous fall or spring semester, but only for the most compelling nonacademic reasons that reasonably prevented the student from requesting a withdrawal in a timely manner, consistent with the policies described above. Support for the appeal from a college or school must be indicated through a signature of the dean or the appropriate associate dean of the college/school; such appeals are subject to review by the Provost for final approval.

Student Services

Vice President for Student Affairs

The Vice President for Student Affairs leads the following departments in the Division of Student Affairs: the Counseling and Mental Health Center, Disability and Access, Longhorn Wellness Center, the Office of the Dean of Students, Recreational Sports, Texas Parents, University Health Services, University Unions. The vice president is the liaison between the president of the University and the department directors providing leadership to develop student-focused programs, spaces and resources that enhance the student experience and complement their academic work. Below are links to find more information about these departments within the Division of Student Affairs, as well as other student services on campus.

Office of the Dean of Students

The Office of the Dean of Students develops student leaders, fosters involvement, and supports all Longhorns throughout their UT Austin experience.

Student Conduct and Academic Integrity

Student Conduct and Academic Integrity provides oversight, intervention, and management for behavioral and academic misconduct for students and student organizations to reinforce UT Austin's core values of Learning, Discovery, Freedom, Leadership, Individual Opportunity, and Responsibility. Student Conduct and Academic Integrity staff administer the University Code of Conduct and provide proactive educational programming for students, faculty, and staff on community expectations related to behavior and academic integrity, emphasizing the prevention of policy violations. Student Conduct and Academic Integrity staff offer support and resources on navigating the conduct process, responding to behavior(s) that may rise to a policy violation, and consulting with community members on strategies for addressing classroom disruption.

Student Governance Organizations

The University seeks to enrich students' educational experiences and opportunities for productive communication between the student body and the University by sponsoring Student Governance Organizations. The Student Government, Senate of College Councils, and Graduate Student Assembly are student-led Student Governance Organizations. Although each organization has a specialized mission and purpose, they both serve as voices for students on campus to enhance the student experience.

Student Involvement

The Student Involvement areas of the Office of the Dean of Students provide engagement opportunities and enrichment for students, student leaders, and student organizations to support connectedness and involvement across the entire UT Austin campus. Programs provided for engagement and development include Student organization resources, such as event planning, space reservations, and organizational development; support for Sorority and Fraternity Life to foster safe and responsible Greek communities; Prevention and risk education workshops, training and resources, including the Successful Student Organization Program to reduce high-risk behavior and reinforce positive organizational culture; training and coaching for leadership development; opportunities to serve the campus and the community through volunteerism and service-learning; and programming for students both on and off campus.

Student Support

The Student Support areas in the Office of the Dean of Students provide assistance, intervention, and referrals to support students' holistic well-being and academic success. Programs provided for support and resources include Basic Needs resources, such as assistance applying for SNAP benefits, demonstration planning and response support, emergency aid for financial hardships, Legal Services for Students, non-clinical case management, and UT Outpost (food pantry and career closet). In addition to these programs, the Behavioral Concerns Advice Line (BCAL) is a resource for reporting behavioral concerns of an individual affiliated with the University (i.e., student, faculty, staff, or visitors). BCAL is operated in partnership with the Counseling and Mental Health Center, Healthpoint-Employee Assistance Program, and the UT Police Department.

Recreational Sports

Recreational Sports develops and conducts programs through which students and anyone with a RecSports membership, including faculty and staff members, may participate in recreational activities. Intramural Sports tournaments and events are scheduled throughout the year for individual, dual, and team participation. Sport clubs provide students an opportunity to participate in a single sport on a continuing basis. About 40 clubs, ranging from taekwondo to lacrosse to sailing, are active each term. Outdoor Recreation provides equipment rental through the Outdoor Center, an indoor Climbing Wall inside Gregory Gym, and facilitates guide-led trips in a variety of activities such as backpacking, camping, canoeing, kayaking, hiking, and rock climbing. Opportunities through the Fitness and Wellness program include group fitness classes, clinics and series, and personal training. The Instructional Program provides access to safety education, swimming and sport skills classes.

In addition to structured sports programs, the department promotes the concept of informal recreational use of its facilities through the Informal Recreation program. Recreational Sports manages the following facilities: the recreational spaces at Bellmont Hall, Caven Lacrosse and Sports Center at Clark Field, Charles Alan Wright Fields at the Berry M. Whitaker Sports Complex, Gregory Gym, Gregory Gym Aquatic Complex, Recreational Sports Center, and Whitaker Courts. Student organizations and University departments may request to reserve spaces within Recreational Sports facilities for a variety of events.

Currently enrolled UT students and anyone with a current Recreational Sports membership may utilize Recreational Sports facilities and register for programs. Current UT faculty and staff, retired UT faculty and staff, alumni, and members of the community are eligible to purchase a RecSports membership. Members may also purchase youth memberships for children; youth facility guidelines apply.

Participants may check out sports equipment at the recreational spaces at Bellmont Hall, Caven-Clark Field, Gregory Gym, Gregory Gym Aquatic Complex, the Recreational Sports Center, Wright-Whitaker Sports Complex, and Whitaker Courts.

Other services offered at Gregory Gym are an Amazon Pickup Point, offering the campus community a convenient location to pick up and return Amazon orders; Shake Smart, a purveyor of freshly-blended protein shakes, cold brew coffee, and healthy on-the-go foods; and a University Federal Credit financial center.

Membership and Guest Services manages recreation facility access systems and provides amenities to students, and anyone with a RecSports membership. Amenities include rental lockers and towel service.

University Housing and Dining

All students enrolled in The University of Texas at Austin are eligible to live in University-owned housing. Students are not required to live on campus and may choose to live on or off campus. Freshmen are encouraged to consider living in University residence halls. The experience of many students indicates that adjustment to University life is often easier for those who live on campus. Research indicates that students who live in residence halls are more fully involved in academic and extracurricular activities, earn higher grade point averages, more frequently exceed predicted levels of learning and personal development, and more frequently complete their college education within four years, as compared to students who live off campus.

A brief description of University housing follows. More information about housing is available online and from The University of Texas at Austin, University Housing and Dining, 200 W Dean Keeton St, Austin, TX 78712. Institutional rules regarding university-owned residences are listed in Appendix C, Chapter 5. University-Owned Residences (p. 96).

Applying for housing in University residence halls

Students may apply to live on campus after they have completed the admission application. Contracts are offered to students who are admitted to the University; incoming freshmen must be admitted and have paid or satisfied the enrollment deposit. More information about the housing application process is available online. Housing is not guaranteed for students.

University-owned residence hall for men

The University residence hall for men is Creekside Residence Hall, which can accommodate approximately 200 students.

University-owned residence halls for women

The University residence halls for women are Kinsolving and Littlefield, which can accommodate approximately 900 students. Freshmen women who apply for housing with Littlefield as their first building choice are given priority consideration for assignment to Littlefield.

University-owned residence halls for men and women

Jester Center, San Jacinto Hall, Almetris Duren Hall, Brackenridge Hall, Prather Hall, Moore-Hill Hall, and Roberts Hall accommodate approximately 5,300 students. Andrews, Blanton, and Carothers honors residence halls accommodate about 500 students. Dobie Twenty21 accommodates approximately 750 students.

University-owned apartments

2400 Nueces, located off campus in the west campus area, is open to continuing students. Continuing students include undergraduate students in their second year (or later) at UT Austin, graduate students and transfer students. 2400 Nueces offers fully furnished studio, one-, two-, three- and four-bedroom apartments. More information about 2400 Nueces is available online.

East Campus Graduate Apartments, located in East Austin close to the Forty Acres, opens Fall 2024 and is exclusively for graduate students. This six-building complex offers 545 fully furnished studio, one- and two-bedroom apartments with all utilities included in the monthly rates, controlled card access to residential areas, live on staff support and onsite maintenance. More information about East Campus Graduate Apartments is available online.

The University Apartments, located in off campus areas that have shuttle bus service, are open to graduate and undergraduate students who have completed at least 30 semester hours of coursework, including those with families. Gateway Apartments and Colorado Apartments have approximately four hundred air-conditioned, unfurnished units; Brackenridge Apartments have approximately 300 one-, two-, and three-bedroom, air-conditioned, unfurnished units. Rates for all units include utilities, internet and laundry. Apartment contracts may be signed up to 60 days before move-in. More information about University Apartments is available online and from The University of Texas at Austin, University Apartments, 3501 Lake Austin Boulevard, Austin TX 78703-5533.

Privately owned housing

A wide range of privately owned housing is available for men, women and families in the University community. Arrangements for living in these residence halls, rooming and boarding houses, cooperative houses, apartments and private homes are made directly with the management of each residence. The University maintains a website that includes links to other housing and real estate listings.

The University accepts no responsibility for the terms of rental or the accommodations offered and will not be a party to the enforcement of contracts between students, parents, and landlords for privately owned housing.

Scholarships and Financial Aid

The Office of Scholarships and Financial Aid provides financial assistance to students who might otherwise be unable to attend the University. Financial aid awarded through the office may include grants, scholarships, loans, or work-study. Most financial aid is determined based on documented financial need, which is the difference between the cost of attending the University, the Student Aid Index, and the financial resources available to the student.

Students must complete a need analysis form each year to apply for financial assistance. The office requires students to complete either the Free Application for Federal Student Aid (FAFSA) or the Texas Application for State Financial Aid (TASFA). The FAFSA should be completed by students who are U.S. citizens or eligible resident aliens. The TASFA should be used by non-citizens who are classified as Texas residents; the Apply page of the Texas One Stop website has more information on the TASFA. The information submitted through these applications helps the Office of Scholarships and Financial Aid assess family resources and determine eligibility for specific aid programs. Students who are admitted as transient/non-degree-seeking and attend the University are not eligible for financial aid through the Office of Scholarships and Financial Aid.

Estimated Costs

Pursuant to state law, The University of Texas System Board of Regents (the Board) is authorized to set tuition. Please visit Tuition Rates on the Texas One Stop website for up-to-date information regarding Fall 2025 rates.

Estimated costs for tuition, fees, housing, food, books, transportation, and personal and miscellaneous items for a typical student (both undergraduate and graduate) living in University-owned housing for the 2025-2026 fall, spring, and summer semesters are available on the Cost of Attendance page of the Texas One Stop website. The tuition amounts included in these figures are based on an average course load of 12 or more semester hours for undergraduates and nine or more semester hours for graduate students.

Application dates

The University strongly recommends that all students complete their financial aid applications by the Texas Higher Education Coordinating Board's priority filing date. More information about the priority filing date and financial aid is published by Texas One Stop.

A student may apply for financial aid before being officially admitted to the University, but the awarding of aid is contingent upon admission. Aid cannot be disbursed until the student is officially enrolled.

Once they have a UT EID, prospective freshmen can apply for scholarships via the Scholarship Interest Form. Continuing and transfer students may apply for annually awarded scholarships by completing the UT Austin Continuing and Transfer Student Scholarship Application. Both applications are available in the scholarship management system, Longhorn Awards and Student Scholarship Opportunities (LASSO).

For more information, including deadlines and other scholarship opportunities, see Scholarships on the Texas One Stop website

Course load requirements

Most financial aid programs are based on a minimum full-time enrollment of 12 credit hours for undergraduate students and from nine to 15 credit hours for graduate students, depending on the student's academic program. Students may receive financial aid for less than full-time enrollment, but the amount of aid awarded may be adjusted based on the student's final enrollment status. Some financial aid programs require that award amounts be reduced proportionally for less than full-time enrollment. To receive financial assistance for summer semester, students (except those admitted as transient/non-degree-seeking) must enroll for classes in a designated summer semester.

Changes in financial circumstances

Students are responsible for reporting to the Office of Scholarships and Financial Aid any change in their financial resources that occurs after the initial application for aid is submitted. A documented decrease in resources may make a student eligible for an increase in financial aid if funds are available; an increase in resources may result in a reduction or cancellation of financial aid funds or a requirement to repay awards already released to the student. Students can submit a Special Circumstance Appeal to report changes in student or parent income.

Satisfactory Academic Progress

Federal law requires that institutions of higher education monitor the academic progress of students who receive federal financial aid. To remain eligible for federal, state, and some institutional financial aid, students must comply with The University of Texas at Austin's standards for Satisfactory Academic Progress (SAP); requirements for satisfactory progress are:

1. Minimum GPA: An undergraduate student must maintain a cumulative University grade point average (GPA) of at least 2.00. A graduate student must maintain a cumulative GPA of at least 3.00.
2. Minimum Pace: A student must successfully complete at least 67% of the credit hours they attempt.
3. Maximum Timeframe: A student may attempt no more than 150% of the credit hours required by their degree program.

Undergraduate and Graduate students will be evaluated annually at the end of the spring semester. For more specific information about the policy and the appeal procedure, see Maintaining Eligibility on the Texas One Stop website.

Types of Financial Aid

A student who submits a FAFSA or TASFA is considered for all applicable federal, state, and institutional funds that are administered by the Office of Scholarships and Financial Aid. The composition of the aid package depends on the characteristics of the student, including program eligibility and degree of financial need, as well as on the availability of funds. For more information, see Types of Financial Aid on the Texas One Stop website.

Scholarships and Grants

Students who apply for financial assistance by the priority deadline are considered for all scholarship and grant awards administered through the Office of Scholarships and Financial Aid. To be considered for a Federal Pell Grant, a student must be enrolled as an undergraduate and must not have received a bachelor's degree. Many scholarships and grants awarded through the financial aid process are based on financial need. For more information, see Scholarships or Grants on the Texas One Stop website.

In addition to specific qualifications for competitive undergraduate scholarships and fellowships awarded by the University, the entity responsible for selecting recipients for a given scholarship or fellowship may consider such factors as the following in designating recipients:

- Standardized test scores
- Class rank
- Grade point average
- Leadership and extracurricular activities
- Status in national academic competitions
- Academic performance within a major and other performance criteria
- Financial need
- Educational level

Loans

Federal loan programs are available to assist students with cost of attendance at the university. These programs have interest rates that may be adjusted annually and do not require repayment of principle or interest until the student has graduated or is no longer enrolled half-time. In addition, the loans offer a grace period between the time the student leaves school and the time repayment begins. Deferment or cancellation of repayment is available for certain situations, such as military service, periods of unemployment, or teaching service in designated schools. Federal and state loans are available to both students and parents of students who do not show financial need. Interest rates on these loans are set by federal and state law. Under certain conditions, repayment of these loans may be deferred while the student is enrolled in school. For more information, see Loans on the Texas One Stop website.

Work-Study

Federal, state and institutional Work-Study programs provide jobs for students who show financial need and want to earn money to cover part of their educational expenses while attending school. Most Work-Study jobs are on campus, though some may be at off-campus nonprofit agencies. Depending on their educational interests and experience, students may choose from a variety of employment opportunities. For more information, see Work-Study on the Texas One Stop website.

Other Services Not Based on Financial Need

Emergency Loans

Short-term loans are available for emergency expenses related to educational costs. For more information on what type of short-term loans are available, visit Loans on the Texas One Stop website.

Student Employment

In addition to overseeing the work-study program at The University of Texas at Austin, the Office of Scholarships and Financial Aid works in conjunction with the Career Success office assisting students in finding part-time, seasonal, and summer employment through HireUTexas powered by Handshake.

Requirements for Student Borrowers

Mandatory counseling sessions

Prior to receiving the first disbursement of a Federal Direct Subsidized or Unsubsidized Loan, Federal Direct Graduate PLUS, or Federal Perkins Loan, student borrowers must complete an online loan counseling session, in which they receive information about their obligations, rights, and privileges as borrowers. In addition, student loan recipients who withdraw, graduate, or drop to less than half-time will be required to complete an online exit interview. The exit interview gives information about their repayment obligations and the consequences of failure to repay.

Identification and release of official transcript

Records of students who have received loans are identified to the Office of the Registrar.

Tuition Refunds and Repayment of Financial Aid

Students who are awarded financial aid for a specific semester but cease attendance/withdraw prior to the beginning of classes are required to repay all funds released back to the University. Students who cease attendance/withdraw after the beginning of classes may be required to repay at least some portion of the funds received. The amount to be repaid is calculated according to a repayment policy determined by the Office of Scholarships and Financial Aid, according to federal regulations. Repayment varies depending on the amount and type of funds received and when the student leaves the University. Any refund of tuition or University housing charges due to a student may be used to meet the repayment requirement.

Students who received financial aid may have all or part of the calculated refund credited to the student aid programs from which the student was paid. The remaining refund, if any, will be paid to the student.

Federal regulations require that refunds due to student aid programs be credited in the following order: (1) Federal Direct Unsubsidized Loan; (2) Federal Direct Subsidized Loan; (3) Federal Direct Grad Plus; (4) Federal Direct Parent Loan for Undergraduate Students; (5) Federal Pell Grant; (6) Federal Supplemental Educational Opportunity Grant; (7) other federal student aid programs; (8) nonfederal student aid program. Nonfederal student aid programs are refunded in the following order: (1) state grants; (2) institution grants; (3) state loans; (4) scholarships, if specified by donor.

Longhorn Orientation

Orientation

Longhorn Orientation programs are designed to aid in the transition of all newly admitted undergraduate students into the academic and social climate of the University. Longhorn Orientation programming serves new freshman and transfer students by: acclimating them to the campus and surrounding community; providing information and assistance concerning academic policies, procedures, requirements, and class registration; serving as a campus information and referral agent; and hosting opportunities for campus offices and organizations to interact with new students through programs and events. Longhorn Orientation strives to provide a holistic, encompassing student development approach to achieve goals that ultimately support the missions of the University. Program fees provide the budget for student programs and services coordinated by the unit.

Texas One Stop for Enrollment Services

As part of the University's commitment to providing exceptional customer service to support student success, the Texas One Stop for Enrollment Services was developed in late 2019 to maximize service to students and make it easier for them to get help with registration, financial aid, and billing in one central location while maintaining the high standards for compliance and integrity of student records.

In a newly remodeled location on the ground floor of the UT Tower (MAI 1), Texas One Stop offers upgraded technology and professional staff support who are cross-trained in registration and records, student accounts, and financial aid.

Along with the new, integrated center, the virtual Texas One Stop website launched in November 2019 to help students find important information easily to complete important steps in the enrollment process. The launch of the website included the new Bevo Bot automated chatbot to provide immediate answers to questions and connect students to the resources they're looking for.

Texas One Stop offers students:

- A central location to have questions answered regarding financial aid, billing, payment, registration and records.
- Support by having cross-trained staff answer questions from a student-life-cycle perspective.
- Updated technologies and support to better serve students across campus.
- A central website with student-focused content to support student success.

University Health Services

University Health Services (UHS) is located in the Student Services Building and is a fully accredited ambulatory healthcare facility. It provides medical services primarily for currently enrolled students at The University of Texas at Austin and extends its travel health and physical therapy services to university faculty and staff. UHS offers certain services for some non-students who are officially enrolled in particular university programs. UHS also provides public health leadership and initiatives, including the promotion of a healthy campus.

The medical staff includes board-certified physicians (family medicine, internal medicine and sports medicine), nurse practitioners, physician assistants, physical therapists, registered dietitians and an integrated behavioral health team in conjunction with the Counseling and Mental Health Center (CMHC). UHS offers laboratory, radiology, and ultrasound services and other specialty services, including an allergy shot/immunization/travel health clinic, gynecology, and sports medicine.

For routine health concerns, students can schedule appointments by calling (512) 471-4955 on weekdays during posted business hours. Students can also schedule many types of appointments online. UHS has same-day and next-day appointment availability for illness or injury that requires more prompt medical attention. Regular operating hours, as well as those for the summer semester, holidays, and semester breaks, are posted on the UHS website.

Students with medical emergencies should go directly to an emergency facility or call 911.

The UHS Nurse Advice Line, (512) 475-NURS (6877), is available 24 hours a day to offer guidance to ill or injured students. Students who need medical treatment when UHS is closed must go to a healthcare facility in the community and are responsible for any charges incurred.

There are charges associated with UHS clinic visits. The complete University Health Services Charges Statement is posted on the UHS website.

Students sometimes are affected by medical conditions beyond the scope of services offered by UHS. Payment for services at other healthcare facilities is the sole responsibility of the student; therefore, students are encouraged to purchase the optional student health insurance plan or have insurance coverage under another policy. Additional information about the student health insurance plan can be found here.

UHS accepts most types of health insurance; however, students are not required to have health insurance to use UHS. For more information, including types of plans with which claims cannot be filed, go to the UHS website.

Counseling and Mental Health Center

The Counseling and Mental Health Center (CMHC) assists University of Texas at Austin students in coping effectively with aspects of their personal, social and psychological well-being and growth, so they may realize their full academic potential. CMHC programs address problems that can affect day-to-day living; respond to student crises; support student mental health, well-being and safety; and prepare the student to respond more effectively to the challenges of university life. CMHC also provides support to the University community by consulting with faculty, staff and administrators and by responding to traumatic events affecting university students when requested.

CMHC services include brief assessment for referral to the most appropriate CMHC or community service; short-term individual counseling; group counseling; support and skills development workshops; psychiatric evaluation and medication, if indicated; and prevention and education programs designed to support student safety, growth and development. Crisis counseling is provided during business hours, and a 24-hour crisis line is available at (512) 471-CALL (471-2255).

CMHC also offers TimelyCare, a virtual mental health and well-being platform for currently enrolled students. Through the mobile app or desktop, students receive 24/7 access to virtual care through phone or secure video visits. Scheduled counseling and psychiatry visits are available to students anywhere in the United States, and additional services such as TalkNow, health coaching, and self-care content can be accessed anywhere in the world. TimelyCare providers offer support in over 240 languages.

The Counselors in Academic Residence (CARE) program provides convenient and accessible counseling for students in most colleges and schools, as well as consultation for their faculty and staff.

The Integrated Health Program, a collaboration with University Health Services (UHS), offers mental health services within the UHS clinical setting, as well as self-help MindBody Lounge for stress reduction and biofeedback.

The Voices Against Violence Program provides clinical services for survivors of interpersonal violence including crisis, individual and group counseling.

The Mindful Eating Program provides treatment options for students with disordered eating or body image concerns.

The Substance Use Support Team provides assessment, support services and short-term counseling for students with alcohol and other drug use/abuse issues.

CMHC clinical staff includes psychologists, professional counselors, psychiatrists and social workers. It is approved by the American Psychological Association for internship training and partners with various departments on campus to provide training for graduate students in social work, counseling psychology, and clinical psychology. Additionally, CMHC partners with University of Texas at Austin Dell Medical School Psychiatry Residency Program in training psychiatry residents and the Child and Adolescent Psychiatry Fellowship Program in training child and adolescent psychiatry fellows.

The CMHC has two locations. The primary location will a full array of services is on the fifth floor of the Student Services Building, 100 West Dean Keeton Street, and is open weekdays 8:00 am to 5:00 pm. Services are available in-person and through virtual visits. The second location, CMHC @ WCP, offers a more limited range of services and is located in the William C. Powers, Jr. Student Activity Center room 1.102. The hours are Monday, Tuesday, Wednesday, Friday: 9:00 am to – 5 pm and Thursday: Noon to 5 pm. The telephone number for both locations is (512) 471-3515.

Longhorn Wellness Center

The Longhorn Wellness Center (LWC) supports student life and academic success by promoting student well-being and creating a healthier campus community. Professional and student staff lead evidence-informed health promotion initiatives including peer education, social marketing, workshops and trainings, environmental change strategies and strategic campus partnerships.

Focus areas of the Longhorn Wellness Center include:

- Interpersonal violence prevention
- Healthy sexuality
- Social connections
- Sleep

- Stress
- Suicide prevention

Student organizations, residence hall staff, faculty and other units can request workshops on a variety of topics. Students on campus can get involved with the Longhorn Wellness Center through opportunities like:

- Longhorn Wellness Peer Education Program
- Longhorn SHARE Peer Mental Health Support Program
- Employment and internships

Staff in the Longhorn Wellness Center are trained health promotion professionals with multidisciplinary backgrounds and work experiences. The Longhorn Wellness Center is located on the first floor of the Student Services Building (SSB 1.106). UT Austin campus members visiting the office can access well-being resources, inquire about programs and services, and utilize student study and work spaces. The office is open Monday-Friday 9 a.m. - 5 p.m. when the University is open. The LWC can be reached by either calling (512) 475-8252 or emailing longhornwellnesscenter@austin.utexas.edu.

Sanger Learning Center

The Sanger Learning Center is a university-wide resource dedicated to helping students master course content and develop transferable academic skills. Services are free to currently enrolled students in all schools and colleges (some restrictions may apply). The center's services are described on the Sanger Learning Center website.

Career Success

Undergraduate Students

Explore career-related programs and resources available to UT Austin students, including a zero-credit internship course, the Archer Fellowship, Home To Texas, job simulations, skill certifications and life design support. Details available at the Career Success Undergraduate Student site.

University Unions

The mission of University Unions is to enhance the student experience and enrich campus life by providing cultural, educational, social, and recreational programs as well as related goods and services to the campus community.

Unions spaces include the Texas Union, William C. Powers, Jr. Student Activity Center, Hogg Memorial Auditorium, and several additional managed spaces that serve as community centers for The University of Texas at Austin. Our facilities offer spaces for studying, programming, events, gatherings, and varied food options. In addition, there are outdoor gathering spaces, patios, and mobile food truck locations for the campus community.

Campus Events + Entertainment (E+E) is the premier student programming organization on campus. With over 120 events annually, there is something for everyone. E+E offers students an array of concerts, movies, lectures, celebrations, campus traditions, theater productions, trivia nights, and more. Through volunteer opportunities, students can strengthen leadership experience, self-expression, and management skills.

The board of directors recommends policy for University Unions. The voting membership of the board includes six students and three faculty members. The executive director of University Unions, as well as an appointee of the vice president for Student Affairs, serve as ex officio members without vote.

Texas Global

Overview

Texas Global is the central home for international student and scholar services, education abroad, English as a second language instruction, global risk and safety, and cross-disciplinary international projects. For location, hours of operation, and contact information visit our website.

International Student and Scholar Services

International student advisors are available to assist international students with matters related to their immigration status, cross-cultural adjustment, orientation to the University, housing resources, employment eligibility, social security regulations, and personal issues or concerns. International Student and Scholar Services (ISSS) also assists with student emergencies. Office hours and further information about services can be found on the ISSS website.

Immigration advising and compliance

International student advisors issue immigration documents, provide personalized advising on student visa rules and benefits, and process requests to facilitate international travel, employment authorization, and other activities subject to student visa regulations. ISSS also monitors student and University immigration compliance. For example, in accordance with immigration regulations, an international student who seeks to be enrolled for fewer than twelve hours as an undergraduate or fewer than nine hours as a graduate student is referred to ISSS. Withdrawal petitions for international students are referred to ISSS before the appropriate academic dean's office takes final action.

Reciprocal exchange students

Students enrolled at The University of Texas at Austin as reciprocal exchange students receive ISSS support with admission coordination, immigration document issuance, enrollment verification letters, and home university collaboration.

Sponsored student services

ISSS provides customized services to sponsored students and their sponsoring agencies, including student immigration consultation, customized programming, and the facilitation of third-party billing.

Intercultural and social programming

ISSS offers programs to help international students adjust to life and study in the United States including orientation programs, social hours, informational sessions, and intercultural events.

Mandatory health insurance

Enrollment in the Student Health Insurance Program is mandatory for F-1 and J-1 international students. Insurance fees are included in the student's tuition bill each semester. A student who has an acceptable level of coverage under another insurance plan ***may*** be eligible for a waiver of insurance fees, as long as the completed waiver is submitted by the waiver deadline. Dependents in J-2 (exchange visitor) status are also required to have an acceptable level of coverage.

English Language Center

English classes for nonnative speakers are available through the English Language Center (ELC). More information about courses and associated fees is available through the English Language Center.

Classes for University undergraduate and international exchange students

The English Language Center offers courses for undergraduate students who need English language support. Each five-hour course counts toward full-time enrollment, but the courses do not count toward The University of Texas at Austin's degree requirements. However, most exchange students may count the credits toward degree requirements in their home universities with advanced approval. Courses are available for

English language improvement in writing or listening/speaking and are placed in the appropriate class after taking a placement test.

Classes for University graduate students

The English Language Center offers courses for graduate students who want to improve their English or are required by their departments to do so. Each three-semester-hour course counts toward full-time enrollment, but the courses do not count toward degree requirements. Courses are available in oral communication, academic writing, and communication for international teaching assistants.

Classes for everyone

The English Language Center offers two intensive English programs that are open to adult nonnative speakers of English. The *Academic English Program* (AEP) is a full-time academic program for prospective graduate students who have completed their first university degree and plan to pursue a master's or doctoral degree in the United States. English proficiency at the intermediate level or above is required for admission to the program. The *English Language Program* (ELP) provides both full-time and part-time instruction in general-purpose English for students at all levels of English proficiency, including prospective undergraduates and those interested in improving their communication skills. Both programs offer optional test preparation instruction for the Test of English as a Foreign Language (TOEFL) and other admission tests. Discounts are available for ELC part-time study by University students, faculty and staff, and University-affiliated family members.

Education Abroad

Education Abroad provides information on educational opportunities in other countries, including study abroad, exchange, international internships, research abroad, and education abroad scholarships. Information sessions are offered throughout the year, and students are strongly encouraged to attend a session before seeking advising to select the program most appropriate to their needs and interests. University programs available to students include reciprocal exchanges with foreign universities; affiliated studies through other organizations and institutions; faculty-led programs, including May Term and summer sessions; internships and international study and research. All applicants must submit a $75 application fee, which is non-refundable, regardless of acceptance into or enrollment in a program.

Exchange Programs

Exchange programs allow The University of Texas at Austin's students to enroll at a partner university abroad while continuing to pay The University of Texas at Austin's tuition. These cost-effective programs integrate students into courses at the host university. Students in exchange programs register for a block of coursework in Education Abroad that maintains their full-time enrollment. Students pay a $500 fee per semester to participate in an exchange. Faculty members in the appropriate academic departments review the student's work to identify equivalent University courses; Education Abroad staff convert grades from the foreign credit system used by the host institution into their University equivalents. Courses and grades are recorded as resident credit. All courses reported to The University of Texas at Austin on the official transcript from abroad must be represented in some way on the official University transcript.

Affiliated Programs

Students register for affiliated studies (A S) when they participate in education abroad programs offered by organizations and institutions with which the University has an affiliation agreement. Students enrolled in affiliated studies pay a fee of $600 per semester. Students who enroll in a part-time affiliated study program are considered part-time students by the University. Students who enroll in a full-time affiliated study program are considered full-time students by the University.

After a student participates in a program offered under an affiliation agreement, University faculty members in the appropriate academic units review the student's work to identify the equivalent University courses. Courses and grades appear on the student's academic record, but they are not included in the University grade point average. A student must make a C- or better to earn credit in accordance with UT transfer credit policies. In some circumstances, affiliated studies credit is treated as resident credit; more information is given in the General Requirements for Graduation in the *Undergraduate Catalog*.

Faculty-Led Programs

Academic units may offer courses taught abroad as a part of their regular curriculum. Students who take these courses follow normal registration procedures and are assessed normal tuition and fees. Additional fees are charged to cover program costs.

International Study and Research

Students may register for international study and research (ISR) if they are conducting research or studying independently abroad. Enrollment requires the approval of the student's faculty sponsor, graduate advisor (for graduate students) or departmental undergraduate advisor (for undergraduates), and Education Abroad. The approval may last for up to four consecutive semesters and contiguous summer terms.

Students enrolled in ISR pay a fee of $600 per semester and are considered full-time students by the University.

Students who register for ISR are not guaranteed credit for work completed abroad. Students must consult with the departmental undergraduate advisor or the graduate advisor and with the Office of Graduate Admissions to determine whether credit will be granted.

Scholarship Opportunities through Texas Global

Texas Global offers a range of scholarship and funding opportunities to support students participating in international education experiences, as well as international students studying at The University of Texas at Austin. These awards are designed to increase access to global learning and to reduce financial barriers to participation.

For UT Austin students studying abroad, Texas Global provides scholarships that support a variety of program types, including semester exchange, faculty-led programs, internships, and research abroad. Funding is awarded based on a combination of academic merit, financial need, program alignment, and demonstrated commitment to global engagement.

International students enrolled at UT Austin may be eligible for scholarships that support academic success, leadership development, and global engagement initiatives. These opportunities are often tied to specific programs, partnerships, or areas of study and may include merit-based and need-based awards.

In addition to centrally administered scholarships, Texas Global works in coordination with colleges, schools, and external partners to expand funding opportunities and connect students with additional sources of support. Students are encouraged to explore available opportunities early and identify funding options aligned with their academic and professional goals.

Overseas Insurance

Ensuring that University of Texas at Austin students have adequate health and safety support while abroad is a primary goal of the University. All students participating in UT-sponsored international travel are automatically enrolled in the UT System overseas insurance plan, On Call International and are required to pay associated fees for this coverage. This policy was established to ensure that all students are comprehensively covered by an international health insurance policy, an emergency services policy, and a general liability policy. The fee is non-refundable and is scaled to correspond to the length of international activity. Students are also encouraged to maintain their domestic health insurance coverage. The only exception is UT Austin students studying in their country of citizenship, who must submit a request for exemption from UT Austin Overseas Insurance. All students are also encouraged to maintain their domestic health insurance coverage; international

students are **required** to maintain continuous coverage as long as their I-20 or DS-2019 is active, even if not physically in the United States.

Health Clearances

Students participating in an official education abroad program lasting **15 days or longer** must obtain a medical exam from a healthcare provider, who will complete and submit the mandatory health clearance form on their behalf. Some shorter programs may also require a health clearance - contact your program coordinator or program faculty leader for specific requirements.

Transfer Credit Policies for Coursework from International Institutions

Evaluation by the Office of Admissions of course credit earned at an international institution does not constitute approval of the credit for use toward a degree; such approval is solely within the jurisdiction of the student's academic dean. Policies governing the evaluation of transfer credit from international institutions include the following:

1. Transfer credit is generally awarded for academic course credit earned from Ministry of Education–accredited institutions.
2. Rules governing the assignment of transfer credit from United States institutions also apply to transfer credit from international institutions. These rules are given in the Transfer Application Review Process (p. 20).
3. To receive credit, the student must earn a grade that is comparable to at least a *C-* on the grading scale used at the University. The Office of Graduate Admissions (OGA) establishes grading scale equivalencies for international institutions.
4. If the credit was not earned as part of a University-affiliated study abroad program, the symbol *CR* (credit) will appear on the student's University record instead of a letter grade.
5. Transfer credit from a nonaffiliated study abroad (language and culture) program is not assigned a specific University course number. Instead, undesignated credit may be recorded, and the student's academic dean will determine the specific credit to be allowed for degree purposes on a substitution basis. Both current and previously enrolled University students who attend a nonaffiliated study abroad program may be required, at the discretion of the appropriate language department, to take an examination to earn credit for specific language courses.

Student Government

Established in 1902 (as the Students' Association), Student Government serves as the representative body of students whose primary purpose is advocating for and representing the interests of the student body to University of Texas at Austin administration, faculty, and other organizations. All students enrolled at the University are constituents of Student Government; official actions of the organization are carried out by the Executive Board, the Assembly, and the Supreme Court.

Student Government provides input and presents initiatives to the University administration on matters related to student welfare. It helps facilitate responsible student participation in the university's policy and decision-making processes, enhances the quality and scope of the student experience at the university, and ensures responsible and effective participation in the organization with a focus on issues that impact students. Additionally, Student Government works to transparently and responsibly utilize student fees to promote student welfare, preserves the tradition of the University, and helps to provide university students with an educational experience for leadership development. Student Government nominates and appoints undergraduate and graduate students from the student body for various university-wide councils and committees when student body representation is requested or required.

Campus Wide Elections for president, vice president, and members of the Assembly are held each spring. Elections for the first-year student assembly members are held each fall.

More information about Student Government is available in the Student Government office located in suite 2.102 of the William C. Powers, Jr. Student Activity Center or at the Student Governance Organization website.

Senate of College Councils

The Senate of College Councils is the coordinating body for the individual college councils, which are composed of student leaders enrolled in the University's colleges and schools. Since 1973, the Senate of College Councils has represented students in matters related to their academic experience through their college councils and provided the opinions and sentiments of their constituents on academic issues to the university administration.

Senate of College Councils provides input and presents initiatives to University administration on matters related to improving the academic experience of students, programming that promotes academic excellence and, fosters relationships between students and faculty, and initiatives that encourage a sense of belonging and positive student experiences. Senate of College Councils nominates active members of college councils for various university-wide councils and committees as requested or required. The president and vice president are elected each spring by college council representatives. The membership includes active members of recognized college councils. Official actions of the organization are carried out by the Executive Board and the Assembly.

More information about the Senate of College Councils is available in the Senate of College Councils office located in suite 2.102 of the William C. Powers, Jr. Student Activity Center or at the Student Governance Organization website.

Graduate Student Assembly

The Graduate Student Assembly (GSA) is the official representative body for graduate students. GSA addresses issues that are important to its constituents, not only as students but also as teaching assistants, research assistants, and assistant instructors. GSA reports administratively to the Office of the Dean of Students with support from the Office of Graduate and Postdoctoral Studies. Administrative expenses are funded through an allocation from students' tuition.

The objectives of GSA are to represent the views of graduate students to the University community and the community at large; to facilitate graduate student communication and interaction; to gather and disseminate information pertinent to graduate students; to conduct activities that promote the general welfare of graduate students; and to provide a means of assisting in the selection of graduate student members of departmental, college, and University bodies.

More information about GSA, including contact information for officers, current representatives, meeting agendas and minutes, and current and past activities, is available at the GSA website.

Student Media

Texas Student Media (TSM) offers an incredible range of real-world work experience for students in multiple areas of student-managed media. With opportunities in print, digital media, television, radio, video production, podcasting, marketing, and advertising, students learn skills that can prove invaluable once they begin their professional careers. Texas Student Media is open to students of all majors and attracts and welcomes a diverse group of student staff from a wide variety of backgrounds and experience levels.

TSM comprises the following student-managed and student-produced media entities: The Daily Texan newspaper, KVRX 91.7 FM radio, Texas Student Television (TSTV), the Cactus yearbook, Burnt X Orange, and the

Texas Travesty humor publication. Additional experiential opportunities exist with Texas Connect magazine, Bevo Video Productions, The Drag Audio Production House, Tower & Bridge Communications agency, and advertising sales. Texas Student Media is supported through University funding allocated by the Student Services Budget Committee, and through efforts of a sales team that sells advertisements and performs promotional/marketing duties.

TSM is administratively supported by the Moody College of Communication and is governed by an eleven-member Board of Operating Trustees composed of six student members elected by the student body, three faculty members, and two media professionals appointed by the president. Student managers (editors and station managers) are appointed by the Operating Trustees, while the Daily Texan editor-in-chief is elected by the student body. Student managers, the Texas Student Media director, and representatives from Student Government and the Office of the Dean of Students serve as non-voting board members.
Students interested in being a part of one or more of TSM's media entities should visit participateTSM.com.

Office of the University Ombuds for Students

The Office of the University Ombuds for Students provides a neutral, impartial, and confidential environment for students to voice concerns related to life at The University of Texas at Austin, and provides information and assistance to students who have University-related questions, concerns, or complaints. The office functions in an independent and informal manner to help students explore options for effective problem solving and conflict resolution. The office also identifies and provides recommendations to the University regarding systemic issues. The Ombuds advocates for fair and equitably administered processes and does not side with individuals or the University. The office helps the University uphold the institutional core values, Student Honor Code, and University Code of Conduct.
The Office of the University Ombuds for Students:

- Provides students with information, referrals, and assistance with appropriate policies and processes for addressing University-related concerns.
- Helps students receive expeditious, fair, and impartial treatment.
- Provides students with voluntary conflict management for disputes and concerns related to student life at the University, both academic and nonacademic. This includes identification of options, policy clarification, conflict coaching, mediation, training, and other conflict resolution or consultative services as appropriate.

In order to create a safe place for students to voice concerns, evaluate issues, and identify options, the office maintains privacy and confidentiality to the extent permitted by law and University policy. Additionally, the office is considered an informal and off the record resource, and does not maintain identifying records.

Student Grievance Procedures

Academic-Related Grievances

Academic grievances involving grade disputes should be discussed with the course instructor. Grade disputes that are not resolved and all other academic grievances of undergraduate students should be submitted in writing to the department chair or other designated administrator of the academic program to which the grievance relates. Appeals may be directed to the appropriate academic dean, who will render the final decision. A grade will not be changed by the department chair (or other designated administrator) and/or the dean without first consulting with and considering fully the position of the course instructor. The course instructor will be advised by the department chair, another appropriate administrator, or dean of the resolution of the grievance.
Procedures for the resolution of grievances of graduate students are specified in the Handbook of Operating Procedures 9-1240.
The dean of the college or school in which a student is enrolled has jurisdiction over the student's program of study, degree requirements, and all other academic matters, including grievances, except as described below. A student pursuing simultaneous majors in two colleges is considered to be enrolled in both colleges and is under the jurisdiction of both deans. Students taking a course in a college or school other than the one(s) in which they are enrolled are subject, so far as the course and academic grievances regarding the course are concerned, to the dean of the college or school in which the course is offered. Procedures for cases of alleged academic dishonesty are given in Appendix C, Sec 11-402 (p. 117).

Student Program and Student Activity Related Grievances

Grievances related to non-academic student programs and activities should be submitted in writing to the dean of students or director of the specific student affairs area. Appeals may be directed to the vice president for student affairs, and then to the president for final disposition.
Appendix C (p. 91) of this catalog describes the institutional rules on student services and activities and includes provisions for formal hearings. Additional information on these provisions is available from the Office of the Dean of Students.
Disability-related grievances. No qualified student with a disability shall, on the basis of disability, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any academic program or activity at The University of Texas at Austin. Complaints alleging discrimination on the basis of disability should be submitted according to the procedures outlined in the Nondiscrimination Policy, Appendix I (p. 147). The policy is in accord with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (ADA).
Sex discrimination and sexual conduct. The following policies address sex discrimination and sexual conduct:

- Policy on Sex Discrimination, Sexual Harassment, Sexual Assault, Sexual Misconduct, Sexual Misconduct, Interpersonal Violence, and Stalking, Appendix D (p. 143)
- Policy on Consensual Relationships, Appendix F (p. 143)

Hate and bias incidents. The policy regarding acts of hate or bias and reporting such incidents is described in HOP 9-1810.

Student Discipline

Under the direction of the president, the dean of students has primary responsibility for the administration of student discipline.

General statement

The University's expectations for student conduct are grounded in the University Code of Conduct, which can be found in Appendix C (p. 117). University students are also expected to uphold the Student Honor Code and expected to abide by all city, state, and federal laws and statutes and all regulations of the University and the University of Texas System. However, as a community of scholars, the University expects from its students a higher standard of conduct than that required simply to avoid discipline. The principles of the Student Honor Code together with the University Code of Conduct should govern and direct student conduct to promote a safe environment that is conducive to academic success, and to ensure that each University student graduates ready to contribute to society as an ethical citizen.

Academic dishonesty

Since the value of a university degree depends on the absolute integrity of the work done by each student for that degree, a student should maintain a high standard of individual honor in their academic work. Academic dishonesty includes, but is not limited to plagiarism, collusion, falsifying academic records, and misrepresenting facts. More information about academic dishonesty is given in Appendix C, chapter 11 (p. 117).

Group responsibility

Any student organization is subject to disciplinary sanctions, including revocation of the group's registration as a student organization, for violation of the penal or civil statutes of the local, state, or federal government or a rule or regulation of the University of Texas System or a Regents' *Rule,* University regulation, or administrative rule. More information about discipline of student organizations is given in Appendix C, chapter 6 (p. 98).

Disciplinary procedures

The University of Texas at Austin administers student discipline according to the procedures defined and described in the Regents' *Rules and Regulations*, Rule 50101, in the Model Policy of Student Conduct and Discipline promulgated by the Office of General Counsel of the University of Texas System and in Appendix C, chapter 11 (p. 117).

Religious Organizations

State institutions are constitutionally restricted with regard to the establishment of religion; however, many sectarian activities are available to students through the sponsorship of various denominational organizations. Several places of worship are located in the University area. A number of student centers are maintained near campus, and many student religious organizations are registered with the University.

Shuttle Bus Service

The University shuttle bus system is operated for the benefit of students, faculty and staff members, and retirees of the University. The system is funded through students' tuition. Shuttle bus patrons should be prepared to show and/or swipe their UT IDs upon boarding.

Shuttle service is provided on scheduled class and final examination days. On most routes, service is not provided on holidays or on Saturdays that are not final examination days. Shuttle bus maps and schedules are available at the Parking and Transportation Services website. Questions about routes or policies should be sent by e-mail (shuttle@utexas.edu).

Student Parking

Students who drive or park a vehicle on campus must purchase a permit from Parking and Transportation Services (PTS). To park within the campus boundaries, a proper permit must be displayed as required. Purchase of a surface lot permit (A, C, M, N) does not assure a parking space in a specific lot. Purchase of a garage permit (R or S) generally assures an unassigned parking space in the garage in which it is valid. If you need to use a car, there is no free parking on campus aside from signed 30-minute loading zones. Everywhere else requires either a permit or payment of a fee to park.

Policies, fees, and regulations are given below. For the most recent information, students should visit the PTS website or email parking@utexas.edu.

Students are eligible for the following types of parking permits:

1. Class C (surface student) parking permits are available to all students enrolled at the University. The fee is $184 for the year. This permit allows parking in C and Longhorn lots.
2. Class C+ (surface student plus night garage access) parking permits are available to all students enrolled at the University. The fee is $277 per year. This permit allows parking in C and Longhorn lots. It also allows parking in university garages, within the limits given for night garage access (N+) permits below.
3. Class D (students with disabilities) parking permits are available to qualifying students with disabilities. The fee is $184 for the year. This permit requires display of a valid state-issued ADA license plate or placard to be valid. It allows parking in D, A, and C spaces as well as Longhorn Lots. It also allows parking in garage ADA SPACES.
4. Class D+ (special accommodation disabilities) parking permits are available to qualifying students with disabilities. The fee is $369 for the year. This permit requires display of a valid state-issued ADA license plate or placard to be valid. It allows parking in the same areas as a Class D permit. Additionally, it allows parking in D+/F Special Accommodation spaces throughout campus.
5. Class A (surface faculty/staff) parking permits are available to university graduate students who are also employed by the University for at least 20 hours a week. The student's employment must be verified by an active appointment in Work Day or a signed copy of the appointment or reappointment form or a letter from the dean, director, or department chair. The fee is $210 a year. This permit allows parking in A parking areas, in Longhorn lots, and in C lots after 2:00 p.m.
6. Class M (motorcycle/moped/motor scooter) parking permits are available to any university student. The fee is $111 a year, but there is no charge for the first Class M permit with the purchase of another permit except an R, N, or N+ permit. The Class M permit allows parking in M parking areas; motorcycles, mopeds, and motor scooters may not be parked in automobile parking areas between 7:30 a.m. and 3:30 p.m. Monday through Friday.
7. Class R (garage resident student) parking permits are available to residents of university-owned housing located on the main campus. The fee is $245, $462, $558 or $588 for a semester, or $369, $833, $1055, or $1058 for two semesters, depending on the garage. Students may purchase a permit for the summer semester. The fee is $74, $136, $166 or $216 depending on the garage. The Class R permit allows parking in R areas in the designated garage purchased; it also allows parking in Longhorn lots.
8. Class S (garage commuting student) parking permits are available to University students who live off campus. The fee is $245 or $421 per semester, $72 or $161 for the summer semester, $358 or $857 for 12 months, depending on the garage. Class S permits allow parking in the garage designated on the permit and in Longhorn lots. For overnight storage, the annual fee is $197, fall/spring is $115. There is no overnight parking at MAG.
9. Class N (night surface access) parking permits are available to anyone affiliated with the university. The fee is $56 for the year. Class N permits allow parking Monday through Thursday from 5:45 p.m. to 7:30 a.m. and from Friday at 5:45 p.m. until Monday at 7:30 a.m. in otherwise unrestricted spaces and in spaces that require any UT permit.
10. Class N+ (night garage access) parking permits are available to anyone affiliated with the university. The fee is $93 for the year. Class N+ permits allow weeknight and weekend surface parking within the limits described for the Class N permit. In addition, they allow parking when space is available in any University garage except the Conference Center, Health Center, Nueces, and Rowling Hall Garages from 5:00 p.m. to 4:00 a.m., Monday through Thursday, and from 5:00 pm Friday to 4:00 am Monday.

Class C, C+, D, D+, M, N, N+, and A permits purchased in the fall semester are valid through August 18. Permits are prorated daily with the refunds for returned permits available until the last month in which the permit is valid. Additional fees may apply.

Parking may be restricted in any garage or surface lot for special events.

The following table lists the charges for violation of the Parking & Traffic Regulations. Parking and Transportation Services reserves the right to refer any violator to the Office of the Dean of Students or the appropriate academic dean, chair, or director.

Violation	Penalty
Unauthorized parking in an "AT ALL TIMES" space.	$75
Improper method of parking.	$35
Disabled vehicle.**	$75
Unauthorized special event parking.	$75
Inhabiting a vehicle of any kind on University property without authorization.	$75
Parking overtime at a meter.	$20
Improper use of a controlled access area or a key card.	$75
Unauthorized parking in a space reserved for persons with disabilities.	$200*
Unauthorized parking in Thompson Conference Center or LBJ Library lot.	$35
Moped/motorcycle/motorbike parked in a space designated for four-wheeled vehicles.	$25
Unregistered bicycle.	$15
Bicycle or EPAMD parking in areas other than those designated for bicycles.**	$25*
Violating temporary parking restrictions.	$35
Parked in violation of set time parameters.	$35
Idling at air intake louvers.**	$35
Damage to PTS Property	$100 + cost
Failure to display proper permit on a registered vehicle. (Three warning tickets per academic year, then $15 per incident.)	warning/ $15
The unauthorized sale, distribution, possession, counterfeiting, or alteration of a university parking permit and/or the possession of an illegally purchased, distributed, counterfeited, or altered permit (plus cost of the permit)	$250 + permit cost*+
Obstruction to vehicular or pedestrian traffic.**	$35
Parking at a fire lane, fire hydrant, red, or yellow curb.**	$75
Parking or driving on sidewalks, grass, or shrubbery (plus the actual cost of repairs).	$35 + cost
Improper passenger pickup and drop off.	$35
Exceeding 15 miles per hour speed limit or other posted speed limit on campus.	$75
Violation of an official traffic control device, such as a STOP or YIELD sign.	$75
Moving violation of Texas Motor Vehicle Laws not otherwise specified in these regulations.	$75
Other non-moving violation of Texas Motor Vehicle Laws.	$75
Moving a barricade or parking within any barricaded area or moving a vehicle without permission of owner/operator.**	$35
Failure to stop and heed instructions given by a University police officer or guard.	$75
Parking or operating a motor vehicle while privileges are suspended.**	$200*
Having a vehicle of any type within a University building (except parking facilities).	$100
Parking without authorized valid permit.	$35
Theft of property or damaging property by either unauthorized boot removal or tampering/attempted removal of the boot (plus replacement cost of damaged property)	$125 + cost
Improper exit from a university parking garage (plus maximum daily fee due).	$75 + fee*
Vehicle relocation or towing.	$125
Operation of a non-registered commercial scooter or dockless commercial bicycle on The University of Texas campus	$35
Reckless Operation of a Vehicle	$75
Unauthorized Parking on Speedway Pedestrian Mall	$75
Unauthorized Entry into Speedway Pedestrian Mall	$100
Scooter Impound: violation of scooter parking regulations related to a university event, parking in a manner that obstructs ADA access or parking, doorways, ramps and stairways, and on Speedway Mall and the Main Mall	$150
Automobile Boot Fee	$150
Bicycle Impound Fee	$25
Commercial Scooter and Dockless Commercial Bicycle Impound Fee	$75-$150 + $25/day storage fee
Unauthorized Moody Special Event Citation	$150
Multiple Vehicles Parked On Campus	$35***

*Penalty doubles upon second offense and all subsequent violations are subject to immobilization or impound.

** Offense subject to citation and vehicle impound.

+ All relevant and currently outstanding fines and fees must be paid prior to the release of the boot.

***Penalty increases to $75 for each additional offense

The Texas Exes

The Texas Exes, the alumni association for The University of Texas at Austin, was established in 1885 and now boasts more than 120,000 members. It is one of the largest alumni organizations in the nation. The association is self-governed and works to unite alumni and friends around the world, create a passionate voice that strengthens the university, promote alumni accomplishments, and celebrate Longhorn spirit and traditions.

Members of the Texas Exes support the mission of the association and receive benefits tailored for people who love UT Austin. Click here to join.

The Texas Exes is the premier scholarship administrator at The University of Texas at Austin. Hundreds of entering freshmen and current UT Austin students are impacted by these awards every year. Classifications include Chapter, Named, and Opportunity Scholarships. The Forty Acres Scholars Program is administered by the Texas Exes and is The University of Texas at Austin's premier full-ride, merit-based scholarship. On average, approximately $4 million in scholarship funds are awarded to UT Austin students.

News about the university and its more than 580,000 living alumni reaches members through the bimonthly Alcalde magazine and its website. The association engages alumni and friends through its lively social channels, including Facebook, Twitter, and Instagram.

There are around 150 Texas Exes chapters and networks across the globe. Chapters are geographically based groups that engage alumni through social, community service, cultural, business networking, student development, and scholarship-fundraising events. Networks are national groups organized around ethnicity, profession, or strong affinity to a university student organization.

Recently the Texas Exes expanded the ways that Longhorns could connect and help one another through the additions of HookedIn and the Longhorn Business Network. HookedIn is the official networking platform for UT Austin alumni and students. This powerful online networking and career-boosting community offers a single platform for alumni, students, faculty and staff to connect and transform lives. The Longhorn

Business Network was launched to support alumni-run businesses. From a Business Directory to networking events, Longhorn faithful can now shop and support one another.

The Texas Exes provides lifetime learning opportunities through the Flying Longhorns travel program, virtual lectures from rockstar faculty, student programming, and online university library access. The association is the keeper of The University of Texas at Austin traditions and works to create unforgettable moments for students on campus, while supporting their academic success.

The Texas Exes' home on campus is the Etter-Harbin Alumni Center, which stands on San Jacinto Boulevard across from Darrell K Royal-Texas Memorial Stadium. Facilities include a banquet hall, offices, meeting rooms, outdoor pavilion, and underground parking. The building is named for Lila B. Etter and John P. Harbin. Etter, whose bequest to the university financed much of the original structure in 1965, was the daughter of the University's first president, Leslie Waggener. Harbin was a Distinguished Alumnus and past president of the Texas Exes. His gift provided site preservation, development, and landscaping.

The university depends on the time and talents of Texas Exes members to support and carry out many of its programs. Membership is a charitable contribution. For more information, click here or call 512-471-8839.

Libraries and Other Academic Resources

The University Libraries

The University Libraries, one of the largest academic libraries in North America, include the University of Texas Libraries, the Dolph Briscoe Center for American History, the Harry Ransom Center, and the Joseph D. Jamail Center for Legal Research: Tarlton Law Library. The libraries are open and information services are available to the University community and to visitors, including students and faculty members from other institutions.

The University of Texas Libraries

The University Libraries website offers a range of services and resources. Each year this site is visited more than a billion times by information seekers around the world.

Online Services

- Check the library catalog for a listing of on-site and electronic information resources.
- Libraries hours information. Most circulation desks close fifteen minutes before the library closes.
- Renew an item or recall an item loaned to another borrower.
- Ask a Librarian: Use e-mail or instant messaging to obtain assistance from a librarian.
- Request books, photocopies of articles, and other material not owned by the University Libraries from another library in the United States or abroad.
- Request that the University Libraries purchase an item it does not currently own.
- Ask for an item in remote storage to be delivered to a library.
- View jobs available in the University Libraries.

Online Resources

Campus-affiliated users may access specially licensed scholarly information, including the full text of articles and illustrations from thousands of journals and the full text of about 80,000 books in electronic format. They may search hundreds of indexes and view the world's largest and most heavily used online map collection.

Subject specialists are responsible for developing the extensive collections that make up the University Libraries. Users who have questions about resources or need research assistance are encouraged to consult one of the subject specialists listed.

On-Site Services and Resources

The University of Texas Libraries includes several libraries on the Austin campus and the Marine Science Library in Port Aransas. Each location offers a range of services and specialized resources.

Library classes and tours

The University Libraries offers a variety of classes on how to use the library and how to access and evaluate information, as well as advanced classes covering databases and other electronic and on-site materials in specific subject areas. Virtual and on-site tours are also offered.

Information and research help

Staff members are available in all libraries to help users find information.

Computing facilities

Computing facilities available to UT Austin students, faculty members, and staff members are located in all libraries. The Perry-Castañeda Library, the Fine Arts Library, and the science libraries offer the largest number of available workstations.

Copying and printing facilities

Printing, copying, and scanning are available in all UT Libraries locations.

Individual and group study areas

All libraries offer individual study spaces. Many also offer group study rooms, designated collaborative study areas, or closed studies or carrels. Group study rooms may be reserved online.

Libraries

Perry-Castañeda Library

This six-level open stack library contains more than 2.5 million volumes, computers for public use, a coffee shop, and enclosed studies as well as group study areas.

This main library of the University serves most subject areas, with emphasis on the humanities, the social sciences, business, education, nursing, social work, and European, East European, Asian, Middle Eastern, Hebraic, and Judaic studies. Special materials include United States and United Nations official documents, current journals, and newspapers. Reference and information help is provided in the lobby area. Library users are also encouraged to make appointments with subject specialists in their areas to discuss information needs. A list of subject specialists, with contact information and office locations, is published online. Service units in the library include Borrower Services, Courtesy Borrower Services, Library Business Services, and Interlibrary Services. The Office of the Vice Provost and Director of the University Libraries and the University Libraries administrative staff are also housed in the Perry-Castañeda Library.

Nettie Lee Benson Latin American Collection

The Benson Latin American Collection holds over one million books, periodicals, pamphlets, and newspapers; and over 7,000 linear feet of archives and manuscripts. The collection acquires research material from across Latin America, the Caribbean, and the United States, on Latin Americans and U.S. Latinas/os, with subject focuses including the humanities, social sciences, natural resources, natural sciences, history of medicine, law, human rights, civil rights, and technology. In 2011, the Nettie Lee Benson Latin American Collection entered into a partnership with the Teresa Lozano Long Institute for Latin American Studies (LLILAS), creating LLILAS Benson Latin American Studies and Collections.

The Benson's Special Collections consist of archival and digital collections, and include manuscripts, publications, and other written works. Other formats include broadsides, newspapers, photographs, slides, musical scores, oversize materials such as posters, artwork, and architectural drawings and blueprints. Audiovisual materials are found

throughout the collections, including VHS tapes, cassettes, vinyl records, DVDs, CDs, and others audiovisual formats. The collecting areas of focus for the Benson Special Collections are Latin American Archives, U.S. Latina/o Archives, the Black Diaspora Archive, and Rare Books. Major resources include the Guatemalan National Police Historical Archive (AHPN) and the Archive of the Indigenous Languages of Latin America (AILLA). The Benson and UT Libraries are founding partners in Primeros Libros de las Américas, an international digital initiative providing access to the earliest printed works published in the Americas.

Science libraries

The science libraries on the main campus are the Walter Geology Library, the Life Science Library, and the Kuehne Physics Mathematics Astronomy Library. The Marine Science Library is located at the Marine Science Institute in Port Aransas.

Fine Arts Library

The Fine Arts Library contains collections that support learning and research in art, music, theatre, and dance. The collections include a variety of formats, including books, journals, musical scores, plays, CDs, and DVDs. UT Austin students, faculty and staff members, and courtesy borrowers may check out digital cameras, camcorders, and boom boxes. Cassette players may be checked out for use in the listening carrels.

John S. Chase Architecture and Planning Library

Learning and research in architecture, interior design, urban planning, landscape architecture, and related disciplines are supported by the John S. Chase Architecture and Planning Library and, within it, the extensive collection of architectural drawings and other records in the Alexander Architectural Archive.

Other units

Other units of the University Libraries include the Classics Library. The Collections Deposit Library is a limited-access facility that houses a number of specialized collections.

Information for Borrowers

Loan periods

Courtesy borrowers may borrow most library materials for 28 days. All other holders of University ID cards may borrow most materials for one semester.

A borrower may place a recall request online for a book checked out to another borrower. When the recalled item is returned, the requestor is notified and the item is held for eight days.

Borrower responsibilities

Borrowers are responsible for maintaining correct records of their identification numbers and email addresses with the University and for obtaining corrected borrower cards in case of error or a change in data. Borrowers are responsible for items checked out to them until they are checked in. The University Libraries is not responsible for notifying borrowers that materials are overdue.

Fines and fees for overdue materials

Borrowers are fined for failing to return library materials by the date they are due. Fines vary depending on the loan period of the material; detailed information is published at Charges for Overdue and Lost Material.

Charges for lost or damaged materials

Borrowers are charged for lost and damaged items. Charges include a rebinding or repair charge if a damaged item can be repaired; the cost of replacing a lost item or a damaged item that cannot be repaired, plus a rebinding fee if applicable; a processing fee when an item is reported lost or is presumed by the University Libraries to be lost; and a billing service fee. A detailed list of charges is published by the University Libraries.

Library cards for non-University borrowers

Libraries are open to the public for use of materials. Adult Texas residents who are not members of the University community may borrow materials for home use by purchasing a courtesy borrower card at the Courtesy Borrower Services Desk at the Perry-Castañeda Library, entrance level. A photo ID and proof of Texas residence are required at the time of purchase. The fee may be waived for current members of the Texas Exes, for users who present valid TexShare cards from libraries participating in the TexShare Card Program, and for other users included in reciprocal borrowing agreements in which the University Libraries participates. More information on fees and waivers is published by the University Libraries. Cards are valid for the period of enrollment, membership, or appointment, not to exceed one year.

Blanton Museum of Art

Founded in 1963, the Blanton Museum of Art at The University of Texas at Austin is one of the foremost university art museums in the country and holds the largest public collection of art in Central Texas. The museum is recognized for its Italian Renaissance and Baroque paintings, modern and contemporary U.S. and Latin American art collection, an encyclopedic collection of prints and drawings, and *Austin* by Ellsworth Kelly. The Blanton's reimagined grounds, designed by Snøhetta and led by School of Architecture alumni, opened in spring 2023.

The Blanton is a vital resource for faculty and students, supporting the University's goal of providing students with a transformative education. The museum serves more than 25,000 UT Austin students each year and has ongoing teaching partnerships with every school and college at the University, ranging from the Dell Medical School to the Cockrell School of Engineering to the College of Fine Arts. The Blanton's education team facilitates curricular experiences to engage classes from across UT Austin, from courses on cell biology and engineering to courses in the humanities.

The Julia Matthews Wilkinson Center for Prints and Drawings offers students, scholars, and other visitors access to the Blanton's collection of more than 18,000 works on paper. The H-E-B Study Room, located within the Wilkinson Center for Prints and Drawings, is one of the most active print study rooms in the country, welcoming nearly 3,500 visitors per year. The print study room provides a venue for close examination of works on paper, a valuable resource for scholars at the University and beyond.

The Blanton offers a range of fellowships to graduate students at UT Austin to provide hands-on learning opportunities and other pre-professional experiences to students who are interested in the museum field. This is in addition to the museum's extensive volunteer program, which is open to both undergraduate and graduate students from the University, as well as others from the community who have a special interest in volunteering at the museum.

Computing Resources

Access to and use of campus information technology resources is governed by university policies and state and federal law. All students, faculty members, staff members, and other users are responsible for knowing and abiding by these regulations on computer use.

While Enterprise Technology is the largest on-campus provider of IT resources, individual schools, colleges, and departments also offer technology services for their students, faculty, staff, and guests. UT Austin's IT services portal, IT@UT, lists services provided by any campus unit, including links to departmental IT resources.

Enterprise Technology (ET)

ET supports the university's mission of education, research, and public service by providing centralized IT services in a strategic, connected, and transformative way. ET enables UT Austin to adapt, compete, innovate, and thrive well into the future and focus on mission-enabling endeavors. Enterprise Technology (ET) provides the core networking, telecommunications, systems, and application services infrastructure at the university. ET is committed to providing a diverse set of secure, high-quality products and services that support and enhance the academic mission of the institution.

ET Services Available to All UT Students

MyUT

MyUT is a customized, responsive web portal into university resources students need, including information about registration, classes, tuition bills, financial aid, events, and other official university business. Information is personalized based on student classification and major and is accessed with their EID.

Accounts and Access

Multi-Factor Authentication (MFA)

The university has implemented a multi-factor authentication system to provide an additional level of security when using sensitive online services. Currently, the university is using a tool called Duo. Duo provides a user-friendly and secure multi-factor authentication solution. With multi-factor authentication, the regular UT EID sign on process is enhanced with an additional authentication step.

University of Texas Electronic ID (UT EID)

Each member of the university community is provided with an electronic identifier, or EID, that is used to access secure online campus services and information. A UT EID is required for all secure electronic transactions at the university, including registering for classes, claiming a university email address, and accessing the university Library's online resources. Self-service tools allow users to manage their UT EIDs online.

ID Center

The ID Center, located on the first floor of the Flawn Academic Center (FAC), is responsible for upgrading your electronic identifier (EID) to allow full access to secure online services and creating identification cards. For example, a service that requires an upgraded EID is claiming financial aid.

Students must present a driver's license, passport, or other forms of government-issued identification to receive an upgraded EID and a University ID card.

To upgrade an EID online, visit utexas.edu/idcenter and scroll to the "Online EID Upgrade" request.

To obtain an identification card, visit utexas.edu/idcenter and scroll down to the "UT ID Card Online Photo Submission" request.

If you cannot complete the transactions online, please see us in person at the FAC.

Acceptable Use Policy

The university's Acceptable Use Policy (AUP) provides students, faculty, staff, and university affiliates with guidelines on appropriate and legal uses of computers and information technology at the university. The policy outlines each person's responsibility when accessing and using these resources; it includes the university's position on downloading copyrighted materials.

Violating the AUP can lead to serious consequences, including disciplinary action and criminal prosecution. All members of the university community are urged to become familiar with the AUP.

The student AUP can be found here.

The faculty and staff AUP can be found here.

Email and Collaboration

Email is recognized as an official means of communication from the university to students. Policy and expectations are provided in Appendix M: Use of Email for Official Correspondence to Students.

Available Email Accounts

Two email environments are available to current students, faculty, and staff. Microsoft (Office) 365 and UTMail powered by Google. Refer to the knowledge article 'What Email Accounts are Available to Me?' to decide which best fits your requirements or choose both.

Microsoft 365

When you become an official UT Austin student, you will automatically receive a free Microsoft 365 account. This includes access to communication and productivity applications such as the Microsoft Office suite (Word, PowerPoint, Excel and Outlook) in addition to Microsoft Teams, Sharepoint, Planner and more. To learn more and to login please visit the Microsoft 365 student page. For additional help, refer to the student Microsoft knowledge article.

UTmail

UTmail, UT's Google Workspace tenant, provides UT Austin students, alumni, faculty, and staff with a University affiliated e-mail address in the @utexas.edu domain. Those who opt in to the service can choose their email address and will receive 5GB of storage. In addition, when you leave the university, you will have the option to keep your email address indefinitely.

Mailing lists

Mailing lists are forums for teaching, collaboration, discussion, entertainment, announcements, and more. Messages are sent directly to subscribers via email.

UTBox

UTBox cloud storage is a campus-wide file sharing service for business and academic purposes. It offers unlimited storage for students, faculty, and staff, a secure way for sharing files across campus, and easy synching between a desktop, laptop, smartphone, and tablet device. Group accounts are also available for research groups and teams with unlimited storage quotas.

University Blog Service

The University Blog Service, which uses the WordPress platform, is available for use by all students, faculty, and staff. Blogs can be created by, and are available for, individuals, groups, projects, or departments.

Learning and Instructional Tools

Canvas

Canvas, a cloud-hosted learning management system (LMS), is the university's online instructional hub. It enables students to connect and communicate with their instructors and classmates online, as well as access class materials, engage in discussion threads, receive assignments, and learn in a media rich environment. Canvas also integrates with Zoom to support hybrid and fully remote learning activities.

Zoom

Zoom is a centrally supported video conferencing solution available to university faculty, staff and students that enables you to meet, teach, and learn from anywhere. It is integrated with Canvas, and you can host and join meetings from your mobile device, desktop client or the web. With your Zoom Pro account, you can host up to 300 users in a meeting. Visit https://utexas.zoom.us to access your account. Other video conferencing and collaboration tools are available on campus.

Qualtrics Survey Tool

Qualtrics, a generalized survey service, permits the creation of survey instruments, distribution of the surveys, data storage, and analysis. Qualtrics is user-friendly and able to handle complex designs. Students using Qualtrics are limited to 1000 responses per survey.

UTprint

UTprint is a convenient way for students to print documents. Students simply log in with their UT EID and print to one of the university printers available in select labs and buildings across campus. Items can be printed in black and white or color and are purchased using Bevo Pay.

Wi-Fi, Internet, and Telecommunications

Public Internet Access

Enterprise Technology provides the campus community with wireless access to the university's network, *utexas*. Wireless connectivity is available throughout campus.

Current students, faculty, staff, and official visitors can access *utexas* by logging in using their UT EID and password. Visitors can gain wireless access using the university's *utguest* network. *Utguest* should not be used by students, faculty or staff. Official university affiliates should use

the *utexas* network. For more information on the campus network, visit the university wireless networks page.

Support Services

Service Desk

The Service Desk provides the university community with a centralized point of contact for help with a variety of topics, including questions concerning information technology, business processes, services and applications. Whether the problem is related to email, EID, Wi-Fi access, or some other inquiry, the Service Desk provides support and troubleshooting by telephone, email, or on a walk-in basis at the FAC.

Campus Computer Store

Conveniently located in the Flawn Academic Center (FAC), the Campus Computer Store is the official technology store of The university of Texas at Austin. The store is an Apple Authorized Campus Store and a Dell Authorized Reseller. We provide service for Apple, Dell and most computer brands. The store carries computer hardware for all major brands including Microsoft Surface, Apple, Dell, HP, Lenovo, MSI and many others! We offer students, alumni, retirees, faculty, and staff exclusive discounts on computers and other select products. The Campus Computer Store is conveniently located on campus in the Flawn Academic Center.

Flawn Academic Center

The Flawn Academic Center (FAC), which has convenient hours, offers flexible study spaces, relaxed collaboration, and printing solutions.. Students and others in the campus community are invited to conduct research, write papers, and use the internet. In addition, the ID Center, Service Desk, and the Campus Computer Store are located at the FAC.

Texas Advanced Computing Center

The Texas Advanced Computing Center (TACC) is one of the nation's leading supercomputing centers. TACC enables discoveries that advance science and society through the application of advanced computing technologies, including high-performance computing, scientific visualization, and massive data storage/archival systems and software. TACC's technologies enhance the capabilities of university faculty members, staff members, and students, and TACC's computational experts help researchers and students use these technologies most effectively. Through regional and national partnerships, including the university of Texas Research Cyberinfrastructure (UTRC) initiative and the National Science Foundation's Extreme Science and Engineering Discovery Environment (XSEDE), TACC resources and services are made available to the national open science research community, but UT Austin researchers have unique access to TACC systems and staff. TACC staff also conduct research and development to produce new advanced computing technologies and techniques that increase the performance, usability, and reliability of advanced computing systems.

Dolph Briscoe Center for American History

The Briscoe Center for American History is one of the nation's leading research centers for historical study. The center's archives, libraries, museums, and historic buildings are part of the University of Texas at Austin's commitment to collecting, preserving, and making available the evidence of the past. The Briscoe Center promotes the university's teaching and research mission through classes, academic fellowships, faculty collaborations, and student internships. The center fosters public exploration of history through research services, exhibits, books, public programs, and digital humanities projects inspired by archival holdings.

The Office of the Director of the Briscoe Center is located in the Arno Nowotny Building, the oldest building on the Austin campus. The Briscoe Center has four additional divisions, each serving a unique purpose.

- The Research and Collections Division is located in Sid Richardson Hall Unit 2, on the main campus of the University. It is the Briscoe Center's main research facility, and the reading room provides access to most of the Briscoe Center's book, manuscript, map, newspaper, photographic, sound, and ephemera collections. The location includes three exhibit galleries and two classrooms for a variety of public and academic programs such as lectures, panel discussions, symposia, book talks, and film screenings. The Military History Institute, also located in Sid Richardson Hall, is an educational outreach and archival program.
- The Sam Rayburn Museum documents the life and career of former Texas congressman and Speaker of the United States House of Representatives Sam Rayburn (1882–1961). It is located in Rayburn's hometown of Bonham in northeast Texas.
- The Briscoe-Garner Museum in Uvalde, Texas, is dedicated to the remarkable lives of John Nance "Cactus Jack" Garner and Dolph Briscoe, both Uvalde natives and historically important political figures from Texas.
- Winedale is a complex of historical structures and modern facilities situated on 225 acres near Round Top, Texas. Winedale's mission is to foster an understanding of Texas history, culture, and native plants and landscapes through research, teaching, and public service.

The Briscoe Center's Texas history archives have no peer in size, quality, and diversity. Within its collections, the Briscoe Center has primary sources—documents, records, newspapers, photographs, maps, and oral histories—of great breadth and depth on almost all subjects related to the story of Texas. The Briscoe Center's Texana library of rare books on the history of Texas is the largest and most valuable collection of its kind. The Briscoe Center is also one of the nation's leading research centers for Southern history. Its Southern history holdings include the Littlefield Southern History Collection, the Natchez Trace Collection, the Parsons Collection on the Louisiana Purchase, and the Pugh Plantation (Louisiana) Archive.

The Briscoe Center has the largest congressional and political history collection outside Washington, D.C., with a special focus on Texas congressional and gubernatorial papers.

The Briscoe Center's photography holdings include the largest collection of photographs of the United States presidency outside Washington, D.C., as well as the largest existing collection of photographs of Martin Luther King, Jr. The Briscoe Center owns more than ten million photographic images from the late 1840s to the present, including the Alamo daguerreotype, the oldest datable photograph taken in Texas. The collections place special emphasis on the archives of leading photojournalists and documentary photographers.

The Briscoe Center is also one of the leading institutions in the United States for the study of news media history. Collections include the papers of media professionals (including Walter Cronkite, Dominick Dunne, Robert Trout, Morley Safer, Andy Rooney, and Harry Reasoner), the research archives of media industry leaders, and one of the largest newspaper collections in the United States, with original editions of some of the earliest known newspapers published in Texas. Another major research strength is the history of political activism in the United States including the civil rights movement. Highlights include the papers of John Henry Faulk, James Farmer, and C. Wright Mills, and the historical archives of the *Texas Observer* and the Field Foundation.

The archives of the University of Texas at the center include the historically valuable official records of UT Austin and the UT System, the personal and professional papers of significant individuals from its history, and additional materials that substantively document its growth from a regional college to a world-leading research institution. Currently, the archives maintain some 4,500 linear feet of records in addition

to personal papers, books, and periodicals. They also house student publications; sound recordings and oral histories; and photographs, maps, and drawings.

The Briscoe Center's collections document more than three hundred years of United States military history, including America's involvement in foreign wars from Mexico to Iraq.

The American Energy History Collection provides a comprehensive view of the modern age and the influence of energy in business, society, politics, and culture. It includes the extensive ExxonMobil archives, the largest publicly available collection documenting a single energy company.

The Briscoe Center also has an extensive material culture collection comprised of thousands of museum objects at the Briscoe Center's four sites. The collection includes rare historical artifacts, clothing, textiles (notably quilts), furniture, and other decorative arts dating from the Anglo-American settlement of Texas in the early nineteenth century to the present.

The Briscoe Center presents a wide variety of permanent and temporary exhibits drawn from its collections. Exhibit topics have encompassed Texas and Southern history, news media history, civil rights, women's history, decorative arts, the entertainment industry, and Texas music.

The Briscoe Center offers exhibits of photographs on tour to museums across the country.

The Briscoe Center's website provides access to valuable resources to researchers worldwide. The site includes a digital media repository of more than twenty thousand photographs, maps, documents, and videos; finding aids to hundreds of major collections; and online exhibits.

Harry Ransom Center

The Harry Ransom Center is an internationally renowned humanities research library and museum at The University of Texas at Austin. Its extensive collections provide unique insight into the creative process of writers and artists, deepening our understanding and appreciation of literature, photography, film, art, and the performing arts. The Center's collections include nearly one million books, more than 42 million manuscripts, five million photographs, and 100,000 works of art.

Visitors engage with the Center's collections through research and study, exhibitions, publications, and a rich variety of program offerings including readings, talks, symposia, and film screenings. For more information about the Center and its collections, please consult the Ransom Center's website.

The Ransom Center invites use by University faculty members, staff members, students, and members of the public engaged in research across a range of scholarly disciplines. University faculty are encouraged to work with the Center to design collaborative teaching experiences in the galleries and seminar rooms. Each year, the Center awards more than 50 fellowships for projects that require substantial on-site use of its collections including fellowships for graduate students writing their dissertations. In addition, undergraduate internships and volunteer opportunities for students are available.

Visitors may access collection materials in the second-floor Reading and Viewing Rooms. The first-floor galleries feature rotating exhibitions, as well the Gutenberg Bible, one of only 20 complete copies in the world that survive intact, and the Niépce Heliograph, one of the oldest surviving photographs taken in a camera, both of which are on permanent display in the lobby.

Hours of operation for the Reading and Viewing Rooms and the exhibition galleries are available on the Ransom Center's website or by calling (512) 471-8944.

Hogg Foundation for Mental Health

The Hogg Foundation for Mental Health envisions a future in which the people of Texas thrive in communities that support mental health and well-being. Health is not solely an individual responsibility, but is also a product of community conditions. Working collaboratively, we can change the impact of mental illness across Texas, for all Texans.

In recognition of the systemic and structural nature of barriers to mental health, the foundation addresses challenges through a variety of approaches, including grantmaking, convening, research and public policy. Additionally, the foundation offers graduate-level scholarships and fellowships to encourage and support research and study in the field of mental health. The foundation's operations include the Texas Grants Resource Center.

The foundation was established in 1940. The original $2.5 million endowment came from the estate of Will C. Hogg. Upon his death, his sister Ima and his brother Mike established the foundation in his memory at The University of Texas at Austin. Ima, who is known fondly as the mother of the foundation, imagined a future in which people with mental health challenges would be treated with respect and dignity, and mental health would be seen as indivisible from all other aspects of a flourishing and healthy life.

The foundation is an administrative unit of The University of Texas at Austin and is located three miles west of the main campus at 3001 Lake Austin Boulevard.

Learn more at hogg.utexas.edu. Check the website frequently for updates and changes to programs and activities.

KUT and KUTX Public Media

KUT Public Media informs, connects, and strengthens the Central Texas community through independent news, transformative music and community storytelling. As a voice of – and for – the greater Austin community, we bring people together, amplify diverse voices and provide critical information that influences public dialogue and drives meaningful change.

KUT News provides reliable, independent reporting that informs and engages Central Texans. Our award-winning journalism – which is free to all – sparks public dialogue and influences policy, from housing affordability and zoning reforms to water conservation efforts. Known for our in-depth and investigative journalism, we play a vital role in shaping local conversations and driving meaningful change.

Texas Standard, an hourlong weekday news-magazine, airs on 30 public radio stations statewide. It is produced by KUT News in Austin in collaboration with KERA North Texas, Houston Public Media and Texas Public Radio in San Antonio.

KUTX 98.9, The Austin Music Experience, launched in 2013 and named "Best Radio Station" in the Austin Music Awards poll 10 times, is the destination for music from local, national and international artists driving the sound of Austin and Texas today.

KUT and KUTX Studios, the podcast arm of KUT Public Media, creates distinct listening experiences for people who care about the people, places, culture and history shaping the greater Austin community.

A Standard-Bearer for Trusted, Independent News – and a Catalyst for Civic Engagement

- Independent, paywall- and subscription-free journalism via KUT News and Texas Standard
- Non-partisan voter guides that help Central Texans stay civically engaged and make informed decisions.
- Spanish-language news via KUT En Español
- Statewide news collaboration with The Texas Newsroom, a collaborative effort among KUT News, KERA North Texas, Houston Public Media and Texas Public Radio in San Antonio, to optimize resources and capitalize on journalistic expertise from across the state.

A Lifeline in Emergencies

- Real-time safety updates on severe weather, wildfires and other disasters via radio, KUT News app notifications and social media; updates also reach KUTX 98.9 audiences
- KUT News social media channels harnessed for emergency communications, earning the Excellence in Social Media Engagement award for 2023 ice storm coverage
- The Central Texas broadcast emergency alert system relies on KUT News and KUTX 98.9 to reach the public

Promoting Local Culture and Music

- Showcasing Austin's music scene and elevating local artists to a national audience through award-winning KUTX 98.9
- Amplifying Texas artists and musicians of all genres on TMX.fm, the Texas Music Experience, a 24-hour live stream of an all-Texas playlist powered by KUTX 98.9
- Podcasts that tell unique Texas stories: *Black Austin Matters*, *Tacos of Texas*, *24 Hours in Austin*, *Vamos Verde*, about Austin FC, and more
- Highlighting Austin arts and culture through the *Austin Cultura* and *Arts Eclectic* programs on air and online
- Uncovering stories about Austin's people, places and culture through *ATXplained*, the podcast and semi-annual live journalism event, which draws 1000+ people to each performance

Bringing Central Texans Together

- Free public educational forums and live events encouraging civic engagement, plus listener meet ups that support local restaurants and venues
- Free and low-cost community music events like family-friendly KUTX Rock the Park and KUTX Live at Scholz Garten, featuring local, national and international musicians and drawing hundreds of guests every year
- 5,500+ Public Service Announcements annually supporting Central Texas nonprofits
- 12 local non-profits spotlighted annually, on air and online, to support volunteer recruitment via KUT's Get Involved series
- A comprehensive online field guide to Austin for newcomers and old-timers, highlighting the sites, sounds and stories that make Austin "Austin"

Investing in the Next Generation

- 30+ paid interns annually from UT Austin, Texas State University, St. Edward's University, Austin Community College and more, who gain hands-on experience in preparation for journalism and other media-related careers
- A university resource for journalism expertise: KUT journalists serve as adjunct professors or guest lecturers for area journalism programs
- Intensive, hands-on mentoring for a small cohort of students each year during a weeklong, digital-first intensive via the NPR Next Generation Radio program

Supported by a dedicated community of sustaining members, local businesses and foundations, KUT Public Media powers the news, music and conversations that matter to Central Texas.
KUT 90.5 was established in 1958 and is licensed by the Federal Communications Commission to The University of Texas at Austin.

Marine Science Institute

The Marine Science Institute (UTMSI), located in Port Aransas, Texas, is home to the Department of Marine Science in the College of Natural Sciences. The Institute is dedicated to advancing and sharing knowledge of estuaries, coastal, and blue-water oceans through research, education, and outreach programs. Marine science faculty, students, and professional staff conduct basic and applied research with global reach, from the Gulf waters to the polar oceans. The department is well known for its master's and doctoral degree programs in marine science. A Bachelor of Science in Biology: Option III: Marine Science undergraduate degree is available through the College of Natural Sciences at The University of Texas at Austin.
Founded in 1941, the 62-acre UTMSI main campus and 10-acre Port Street campus are strategically located on Mustang Island's north shore, offering unparalleled access to open Gulf waters and the pristine bays and estuaries of Texas. These natural habitats include fresh to hypersaline waters, seagrass and mud flats, oyster reefs, sand beaches, dune areas, the open Gulf, and estuarine nurseries. Core research areas include marine ecosystem structure and function, fisheries biology, organismal biology, fish physiology, and marine biogeochemistry.
The Marine Science Institute facilities include approximately 216,000 square feet of research and teaching laboratories, digital classrooms, study areas, a library, visitor centers, an auditorium, meeting rooms, offices, and seawater for laboratory experiments. The Institute has an advanced seawater filtration system and associated diverse tank laboratories to support a wide range of research. Dormitories, apartments, cottages, and a fitness facility support resident student and visiting scholar needs. The institute's boat basin harbors watercraft ranging from shallow water skiffs to the *R/V Katy*, a 57-foot trawler.
A new 78-foot research vessel is under construction and slated to be completed in 2026.
The Marine Science Institute is home to several unique programs. A mile west of the main campus is the Port Street Campus, which includes the Fisheries and Maricultural Laboratory (FAML) and the Center for Coastal Ocean Science on 10 acres adjacent to the ship channel. The FAML complex provides facilities for research on the spawning and rearing of marine finfish. The Center for Coastal Ocean Science provides newly renovated laboratories for toxicological research on marine ecosystems. The Marine Science Institute also manages two federally sponsored programs: the Mission-Aransas National Estuarine Research Reserve and the Beaufort Lagoon Ecosystems Long Term Ecological Research Program (LTER). The Mission-Aransas Reserve, at 186,189 acres, is the third-largest estuarine reserve in the nation and focuses on research, education, and stewardship. The Mission-Aransas Reserve maintains outreach facilities and programs of the Patton Center for Marine Science Education in Port Aransas and the Bay Education Center in Rockport, Texas. The Reserve also operates the Amos Rehabilitation Keep (ARK), which rescues and rehabilitates hundreds of sea turtles and marine birds annually. The Beaufort Sea (LTER) is a research program along the northern Alaskan Arctic coastline in the Beaufort Sea, and the program is focused on studying the relationship of seasons and Arctic ecosystems.
Faculty, graduate, undergraduate students, and professional research staff at UTMSI have achieved landmark discoveries in marine science spanning decades of local and global interests. The record of excellence in research, teaching, and mentorship provides an outstanding opportunity for new students interested in marine science career paths.

The University of Texas McDonald Observatory at Fort Davis

Understanding the nature of dark energy—a force that is causing the universe to expand faster as it ages—is one of the great challenges in modern science. McDonald Observatory is meeting that challenge with the Hobby-Eberly Telescope Dark Energy Experiment (HETDEX), an innovative experiment that will examine more than one million galaxies that are billions of light-years from Earth. These observations will reveal new details about how the expansion rate has changed over the eons, helping narrow the list of possible explanations for dark energy.
This experiment and many others are adding to McDonald Observatory's legacy of innovation and discovery. Dedicated in 1939 in the Davis

Mountains of West Texas, the Observatory is a leader in astronomical research, education, and outreach. It hosts a battery of telescopes, including one of the world's largest. Its astronomers study everything from our own solar system to the most distant galaxies, and they develop new instruments for observing the universe.

McDonald Observatory is extending its reach far beyond Texas as a partner in the Giant Magellan Telescope, a mammoth instrument under construction in Chile. Its primary mirror, which gathers and focuses starlight, will consist of seven segments. Combined, they will cover almost as much area as a basketball court, and will see deeper into space than any telescope yet built. With this telescope, astronomers expect to snap pictures of planets in other star systems and look at the dawn of the universe, allowing them to see the formation of the first galaxies.

McDonald Observatory has been operating some of the world's largest telescopes since its beginning. Its first telescope, with a mirror spanning 82 inches (2.1 meters), was the second-largest in the world. Its second major telescope, completed three decades later, was the world's third-largest at the time. And today, McDonald Observatory hosts the Hobby-Eberly Telescope (HET), with a segmented primary mirror that spans 33 feet (10 meters).

HET has been upgraded to host HETDEX and many other research projects. Engineers have replaced the top half of the telescope, installing new optics that provide a wider view of the sky. And they are finalizing powerful new instruments, including a suite of 156 spectrographs known collectively as VIRUS (Visible Integral-Field Replicable Unit Spectrographs). These instruments allow astronomers to measure an object's temperature, chemical composition, and motion through space. VIRUS will be able to look at as many as 34,000 galaxies or other objects at a time, which is almost like looking at the sky with 34,000 individual telescopes.

In addition to its research role, McDonald Observatory is a busy training ground for astronomy students, both graduate and undergraduate. Students conduct their own observations with some of the telescopes, providing valuable experience for their future careers as scientists and teachers. They also have opportunities to help develop new instruments, which extend the capabilities of the telescopes.

McDonald Observatory is also a leader in astronomy outreach. It produces a daily radio program, StarDate, that airs on more than 350 stations and reaches millions of listeners every week, as well as the bimonthly StarDate magazine.

The Frank N. Bash Visitors Center at the Observatory hosts tens of thousands of visitors every year. It offers interactive exhibits and observatory tours, and conducts star parties every Tuesday, Friday, and Saturday night. The Visitors Center also hosts regular workshops for science teachers and special events for students. These programs have impacted thousands of teachers and hundreds of thousands of students. For more information about McDonald Observatory outreach, education, and research, visit the website.

Other Libraries in Austin

The Lyndon Baines Johnson Library and Museum, located on the eastern edge of the campus, is operated by the National Archives and Records Administration. Though not part of the University library system, this library is a rich resource for scholars studying the twentieth century. Faculty members and students also have access to other public and private libraries in the Austin area, including several that focus on special areas of interest.

The Nettie Lee Benson Latin American Collection is world-renowned for Latin American materials. The library holds over one million books, periodicals, pamphlets, and newspapers; and over 7,000 linear feet of archives and manuscripts. The collection acquires research material from across Latin America, the Caribbean, and the United States, on Latin Americans and U.S. Latinas/os, with subject focuses including the humanities, social sciences, natural resources, natural sciences, history of medicine, law, human rights, civil rights, technology, and Latina/o Studies. The Benson Collection proudly marked its centennial in 2021.

Tarlton Law Library/The Joseph D. Jamail Center for Legal Research

The Tarlton Law Library in the Jamail Center for Legal Research supports the research and curricular needs of the students and faculty of the School of Law, and provides legal research support and assistance to the University community. The highly qualified library staff provides reference services, offers individual and group instruction, and maintains and organizes the collection for efficient use. Librarians teach advanced legal research courses on a range of topics, including Texas law, corporate and securities law, foreign and international law, and general advanced legal research. Courses include conventional legal research instruction as well as the emerging use of artificial intelligence technology.

The Tarlton Law Library is one of the largest academic law libraries in the country, with a collection including extensive print and electronic resources. Tarlton has a comprehensive collection of United States primary and secondary legal materials, as well as an excellent collection of foreign and international legal resources. Tarlton is a selective depository for United States government documents. Tarlton also has a broad interdisciplinary collection from the social sciences and humanities. Special collections at Tarlton include the papers of former United States Supreme Court Justice Tom Clark, law school history archival collections, and an extensive collection of rare and antiquarian law books. Collections also include paintings, prints, documents, textiles, and pieces of furniture on display in the library from the Hyder Collection. Tarlton offers law students access to Bloomberg Law, Lexis, Westlaw, and other legal research databases. Computers, a building-wide wireless network, printers, and scanners are available for law student use. The facility has group study rooms; a student collaborative study space; and tables, carrels, and comfortable seating throughout. The Tarlton Law Library website offers online resources and finding aids, including digital collections highlighting Texas legal history and law school history.

The Teresa Lozano Long Institute of Latin American Studies (LLILAS)

Founded in 1940 and renamed in 2000 in honor of Joe R. and Teresa Lozano Long, whose endowment supports the Institute's scholarly and student-funding mission, LLILAS is among the oldest Latin American Studies centers in the United States, and one of the most comprehensive. LLILAS is recognized as a premier center for Latin American Studies, distinguished by its integration of research, teaching, outreach, and public programming — and by its standing as one of just five university programs nationally, alongside Columbia, Stanford, Chicago, and Wisconsin, recognized through the Tinker Foundation's endowed professorship.

LLILAS operates through a dual structure that integrates academic and resource functions.

Academic Unit

LLILAS offers an undergraduate major in Latin American Studies and three graduate options: a stand-alone MA, a dual MA combining Latin American Studies with any of ten professional degrees at UT Austin — including Law, Journalism, Information Studies, Business, Communication Studies, Community and Regional Planning, Global Policy Studies, Public Affairs, Radio-Television-Film, and Social Work — and a PhD for students pursuing interdisciplinary expertise on Latin America. The graduate program admits approximately 10–15 students per year, each supported through a competitive funding

package combining fellowships, teaching assistantships, and grant- and endowment-funded awards such as the E.D. Farmer Fellowship.
More than 180 LLILAS-affiliated faculty teach across 40 departments and 13 colleges and schools, offering an average of 120 Latin American Studies courses each semester in fields as varied as Literature, History, Political Science, Sociology, Anthropology, Geography, Public Affairs, Law, Architecture, Education, and Journalism. This faculty community includes 101 Mexicanists, 43 Brazilianists, 13 Mesoamericanists, and 32 Caribbeanists, with some faculty claiming more than one region, reflecting the breadth of the Institute's regional coverage. LLILAS has developed a system of shared faculty hires with academic departments, holding formal appointments at LLILAS, extending the Institute's reach. The Institute leads the Indigenous Languages Initiative (ILI), currently offering coursework in K'iche' (Maya).

Resource Center

As a resource and research center, LLILAS funds faculty and student research, supports thematic working groups, and fosters public engagement across Texas, the U.S., and Latin America. The Institute is home to the Mexico Center (est. 1980) and the Brazil Center (est. 1995), and supports the Argentine Studies Program, the Caribbean Studies Initiative, and the Maya Studies Initiative. LLILAS also hosts distinguished Latin American visiting professors annually through endowments and grants, such as the Edward Larocque Tinker Chair in Latin American Studies.
LLILAS's institutional reach extends well beyond campus: the Institute maintains 29 formal exchange agreements with Latin American universities and draws on Texas Global's more than 60 approved programs across 12 Latin American countries. These global and interdisciplinary linkages support current dual-degree partnerships with professional schools including the LBJ School of Public Affairs, the School of Law, and the Moody College of Communication, and extend to standing collaborations with units such as Dell Medical School's Global Health Division.
For research and digital scholarship, students and faculty draw on the Nettie Lee Benson Latin American Collection (BLAC), a unit of UT Libraries and the second-largest research collection of its kind in the United States after the Library of Congress. BLAC's physical holdings total over 1.5 million books, periodicals, pamphlets, and microforms, alongside thousands of linear feet of manuscripts, maps, and rare materials that include some of the first books published in the Americas. Since 2011, a formal LLILAS Benson partnership, jointly led by the directors of LLILAS and BLAC, has integrated these collections directly into LLILAS's academic programs, building a joint research and teaching-driven digital scholarship program. Together, LLILAS and BLAC provide students and faculty with an essential library resource for coursework, thesis research, and dissertation work, reinforcing LLILAS's standing as a hub for both traditional area-studies scholarship and emerging digital humanities methods.
The LLILAS Benson partnership is also the home of AILLA, the Archive of the Indigenous Languages of Latin America, a digital archive of recordings and texts in a wide range of genres that includes a wealth of language documentation materials. LLILAS Benson's online magazine, *Portal,* publishes the work of faculty, students, staff, and invited authors on a wide variety of topics relating to Latin America.
LLILAS is located in Sid Richardson Hall, on the eastern edge of The University of Texas at Austin campus. Additional information is available through the LLILAS website.

Texas Science & Natural History Museum

Texas Science & Natural History Museum is located in the Texas Memorial Museum building (TMM) on the main University campus at 2400 Trinity Street. The museum excites, engages, and connects curious minds of all ages.
The Art Deco style building was constructed 1936-1938 with state and federal funds, contributions, and proceeds from the sale of Texas Centennial coins sponsored by the American Legion. The museum opened to the public January 15, 1939. It became part of The University of Texas at Austin in 1959 by legislative enactment.
The museum displays the university's stunning biological and geological collections, including meteorites, rocks, fossils and Texas wildlife. New exhibits tell stories of Texas science and natural history, connecting visitors to the natural world from prehistoric life to the impacts made by current research and technology.
The museum is open from 10:00 am to 5:00 pm Tuesday through Saturday and 1:00 pm to 5:00 pm on Sunday; closed on Monday and major holidays. General admission is $10 for adults, $5 for children 12 and under, and free for The University of Texas at Austin students, staff, and faculty with valid UT ID. Public education programs and special events are held throughout the year.

University of Texas Press

The University of Texas Press publishes approximately 85 new books and 15 journals each year in both print and digital formats. Although books have been published under the University of Texas imprint since 1922, the Press was formally established in 1950. The imprint is guided by a nine-member Faculty Advisory Committee, with members drawn from the President's Faculty Advisory Cohort and the university faculty at large.
In the years since its founding, UT Press has become a publisher of international scope, issuing more than 3,500 works in a wide range of fields. The major areas of concentration are American studies, architecture, classics and the ancient world, film and media studies, food studies, history, Jewish studies, Latin American and Latinx studies, Middle Eastern studies, music, and photography; as part of its mission to serve the people of Texas, the Press also produces books on the history, culture, arts, and environment of the state.
UT Press regularly collaborates with the Dolph Briscoe Center for American History, the Center for Mexican American Studies, the Center for Middle Eastern Studies, the Institute of Classical Archaeology, the Schusterman Center for Jewish Studies, the Stark Center for Physical Culture and Sports, and the Teresa Lozano Long Institute for Latin American Studies, as well as the Blanton Museum of Art and the Harry Ransom Center.
The Press also offers a fellowship program designed to give one year of experience in book publishing. The objective of the program is to help prepare the fellow for a career in book publishing by providing intensive training in selected departments with exposure to and instruction in the operations of the other departments.
The Press offices are located at the Lake Austin Centre, 3001 Lake Austin Boulevard.
For more information, please see the UT Press website.

Appendices

Appendix A: Emergency Notification Policy

A. **Policy Statement**
As safety and emergency notification practices are under greater scrutiny at institutions of higher education, it is the position of The University of Texas at Austin that at least one emergency contact person must be listed for each student enrolled at the University. A student's cell phone number is also part of the emergency notification protocol in case the University should need to contact the student via text message about critical incidents on campus. Information gathered remains confidential to the extent allowed by law.

B. **Scope**
This policy applies to all admitted and enrolled students of the University. This policy provides for two distinctly different types of emergency notification. First, it details all the ways the University provides notification about emergencies to students, faculty members, and staff members. Second, it indicates the way the University will follow to notify a student's designated emergency contact in the event of personal distress or missing person status.

C. **University Communication of Emergency**
Emergencies may range from inclement weather to building evacuations to campus closures, and the University has a variety of tools to communicate with the public in the event of these and other possible emergencies. Depending on the type of emergency, some or all of the following tools may be used to communicate with faculty members, staff members, and students:

1. **Siren System**
This system is tested at about noon on the first Wednesday of every month. It delivers a siren warning and public address in the event of certain outdoor emergencies. More information about the siren system is available.
2. **Emergency Website**
The emergency website is updated with information during actual emergencies or campus closures.
3. **University Emergency Information Line, (512) 232-9999**
Students and faculty and staff members may call this main number for information about campus closures.
4. **Campus Television Emergency Announcement System**
Emergency announcements will override residence hall and campus cable television, instructing the viewer where to go for additional information.
5. **Text Messaging Service**
The University contracts with a third-party vendor that provides the technological ability to send text messages to members of the campus community. Only text messages about emergencies and messages used periodically to test the system are sent. Any data provided to the vendor by the University is protected by contractual arrangements.
6. **Pager System**
Campus first responders, resident advisors, and some building managers are part of the Austin Warning and Communication System paging system. Pagers send text messages about emergencies on campus and alert city responders like the Austin Police Department, the Austin Fire Department, Emergency Medical Services, and the Office of Emergency Management to campus crisis situations.
7. **Fire Panel Systems**
Residence halls are equipped with fire panel systems that have a public address capability. Resident advisors are trained to use these systems in emergencies in order to make announcements to the entire building regarding evacuation, shelter in place, or other responses.
8. **University Group E-mail**
During emergencies, UT Safety Alert sends an "urgent" group e-mail to every student and faculty and staff member. The message directs individuals to the emergency Web site for additional information and instructions.
9. **Voice Mail to Office Telephones**
This system leaves a voice message on every faculty and staff member's office phone on campus.
10. **Local News Media**
The Office of Public Affairs sends press releases and makes calls to contacts on a local media list. Because of the transient nature of its population, the University depends a great deal on broadcast media to notify students, faculty members, and staff members of emergencies before or during their commutes.
11. **Public Safety Patrol Car Announcements**
University of Texas Police Department patrol cars are equipped with public address systems that officers can use to provide instructions to pedestrians during emergencies.
12. **Telephone Tree**
The president's office has a telephone tree of department contacts that is activated during an emergency

D. **Emergency Contact Information**
Using the online update form in UT Direct, every student must provide the University with the name and contact information of at least one individual who could be contacted in the event of an individual emergency or to report the student missing. Students under the age of eighteen (unless emancipated) must provide contact information for at least one custodial parent. Students over the age of eighteen may designate anyone of their choosing to be the emergency contact. If a student living in University housing is determined to have been missing for more than twenty-four hours, University Housing and Dining will notify law enforcement (The University of Texas Police Department) and the Student Emergency Services unit in the Office of the Dean of Students to initiate missing person procedures. Student Emergency Services will notify the designated emergency contact for a student identified as a missing person within twenty-four hours of receiving the report.

E. **Updating Emergency Contact Information**
Students are required to update their primary cell phone and emergency contact information annually in order to keep the information current. Students who fail to update their emergency contact information have holds placed on their records that keep them from registering for classes. The hold is removed when the student submits the required emergency contact information.

F. **Privacy and Confidentiality**
Official use of emergency contact information is subject to the same privacy and record retention requirements as other official University information.

G. **Authoritative Source**
The authoritative source of this policy and responsibility for its implementation rests with the vice president for student affairs. The University emergency protocols are managed by the associate vice president for University operations.

H. **For Assistance**
Questions about data security should be directed to the registrar at (512) 475-7575. Questions about acceptable use standards should be directed to the Office of the Dean of Students at (512) 471-5017.

Appendix B: Official Extracurricular Student Activities

Athletic Activities

Intercollegiate Athletics

The University is a member of the National Collegiate Athletic Association and the Southeastern Conference and, in matters involving intercollegiate athletics, is bound by the provisions contained in the constitutions, bylaws and rules of these organizations. The Lois and Richard Folger Athletics Director/Vice President reports to the University president.

The University has men's intercollegiate athletics teams in baseball, basketball, cross country, football, golf, swimming and diving, tennis, indoor track and field and outdoor track and field.

The University has women's intercollegiate athletics teams in basketball, beach volleyball, cross country, golf, rowing, soccer, softball, swimming

and diving, tennis, indoor track and field, outdoor track and field and volleyball.

The Intercollegiate Athletics Council. Members of the Intercollegiate Athletics Council are advisory to the president of the University on issues relevant to athletics. The IAC is comprised of:

a. Eight members of the General Faculty appointed by the president to four-year staggered terms that begin at the start of the fall semester
b. Four presidential appointees appointed to four-year terms that begin at the start of the fall semester;
c. One former student appointed by the Texas Exes to a one-year term that begins at the start of the fall semester;
d. One student appointed by the president to a one-year term that begins at the start of the fall semester;
e. Up to four ex-officio and non-voting appointees (including the Faculty Athletics Representative, who is appointed to a five-year term)

Each IAC member serves until a successor is appointed, and each member may be reappointed to one or more additional terms.

EADA reports. The Equity in Athletics Disclosure Act (EADA), an amendment to the 1994 Improving America's Schools Act, requires certain coeducational institutions of higher education to prepare annually and make available a report on participation rates, financial support, and other information on men's and women's intercollegiate athletic programs.

Sport Clubs

A variety of sports and recreation programs are administered by Recreational Sports through the Sport Club program. Where applicable, the regulations for sport clubs are consistent with the requirements established by appropriate national sports organizations. In each sport club, the University reserves the right to adopt additional regulations.

Nonathletic Activities

Nonathletic activities include extracurricular student events, contests, and programs, and elective, honorary, and appointive positions under the jurisdiction and supervision of a University agency. Eligibility rules for participation in each official nonathletic student activity shall be determined, adopted, and administered by the agency having jurisdiction over and responsibility for the activity. Participation in any of the above named nonathletic activities means

a. managing or taking part in an intercollegiate or other public contest, program, or performance under the jurisdiction of an official nonathletic agency;
b. holding, by official election or official appointment, any office, title, or honorary or representative position recognized by the constitution or governing regulations of an official nonathletic agency; and
c. holding a special all-University honorary or representative position designated as such by the dean of students.

Appendix C: Institutional Rules on Student Services and Activities

There are in the *Institutional Rules on Student Services and Activities* (known as the *Institutional Rules*) a number of references to portions of the Rules and Regulations of the Board of Regents of The University of Texas System (known as the Regents' *Rules and Regulations*). These references are included because (1) all of the Regents' *Rules and Regulations* have full force and effect as concerns The University of Texas at Austin; (2) certain aspects of student services and activities are treated only in the Regents' *Rules and Regulations*; and (3) certain portions of the *Institutional Rules* have since their enactment been superseded or amended by the Regents' *Rules and Regulations*.

The Regents' *Rules and Regulations* (http://www.utsystem.edu/board-of-regents/rules) are published by the board.

Chapter 1. Student Orientation

Subchapter 1–100. General Provisions

Sec. 1–101. Purpose and Application

a. Student orientation programs are designed to initiate the integration of newly admitted first-year and transfer undergraduate students into the academic and social climate of the University.
b. The primary purpose of a University orientation program is to help new undergraduates understand the nature of the University, the educational opportunities available to them, the values and functions of the University community, and the central objective of the University as an academic enterprise. It also permits students to participate in academic advising and to learn about matters relating to student registration, housing, campus activities, and other aspects of University life.

Sec. 1–102. Definitions

In this chapter, unless the context requires a different meaning,

1. "director" means director of orientation;
2. "student" means a person enrolled in residence at the University or a person accepted for admission or readmission to the University while that person is on the campus;
3. "University" means The University of Texas at Austin; and,
4. "Senior Vice Provost for Strategic Enrollment Management" means the Senior Vice Provost for Strategic Enrollment Management or the Senior Vice Provost for Strategic Enrollment Management's delegate or representative.

Subchapter 1–200. Administration of Orientation

Sec. 1–201. Duties of Director

The director, in direct coordination with the Offices of the Provost, shall actively guide, plan, implement, and evaluate the programs and services designed to introduce incoming students to the University. In carrying out their responsibilities, the director is administratively responsible to and will report to the Senior Vice Provost for Strategic Enrollment Management.

Subchapter 1–300. Student Conduct

Sec. 1–301. Rules and Regulations Applicable to Student Conduct

Prospective students attending an orientation program are subject to the rules and regulations governing student discipline and conduct set out in chapter 11 of the *Institutional Rules*.

Chapter 2. The Office of Admissions and the Office of the Registrar

Subchapter 2–100. General Provisions

Sec. 2–101. Definitions

In this chapter, unless the context requires a different meaning,

1. "student" means a person enrolled in residence at the University or a person accepted for admission or readmission to the University while that person is on the campus; and
2. "University" means The University of Texas at Austin.

Subchapter 2–200. The Office of Admissions

Sec. 2–201. The Assistant Vice Provost of Admissions

The assistant vice provost of admissions is the administrative officer responsible for supervising the Office of Admissions and reports to the Vice President for Student Experience.

Sec. 2–202. The Office of the Assistant Vice Provost of Admissions: Duties

a. Serve as the coordinating office for University relations with high schools, junior and community colleges, and other educational institutions. The responsibility of this office is to disseminate information to prospective students about the University and about the admission process.
b. Be responsible for the University's program of visitation to high schools and junior and community colleges. Develop outreach programs through which the University communicates with its constituents concerning the educational opportunities at the University.
c. Receive and evaluate the admission credentials of each undergraduate applicant and determine the admission eligibility for these students and inform them of their admission status.
d. Receive and examine credentials of returning students who have not been in residence during a fall/spring semester to ascertain their eligibility for reentry.
e. Evaluate, in conjunction with the academic departments, the courses from other colleges, universities, and junior colleges to determine their transferability to the University.
f. Be responsible for maintaining and coordinating admissions programs with the various academic areas.

Subchapter 2–300. Admissions

Sec. 2–301. Requirements, Procedures, and Policies

The requirements, procedures, and policies for admission and transfer to the University and for reentry after a student's absence are set out in *General Information* and in the *Undergraduate*, *Graduate*, and *Law* catalogs.

Sec. 2–302. Waitlist and Appeals

a. On request of a student, the Admission Appeals Committee will review decisions of the Office of Admissions pertaining to admission or transfer.
b. A student may join the waitlist to be considered for a different decision by the Admission Appeals Committee appointed by the assistant vice provost of admissions.
c. A student may appeal a decision of the assistant vice provost of admissions to the vice president of student experience.

Subchapter 2–400. Rules Applicable to Nonresidents

Sec. 2–401. Where Found

General Information prescribes rules applicable to nonresidents in the Admission Section (p. 15).

Sec. 2–402. Appeal

A student or applicant may appeal a decision of the Office of Admissions pertaining to residence status through the Office of General Counsel of The University of Texas System to the Office of the Chancellor by following the established procedure administered through the Office of Admissions.

Subchapter 2–600. The Office of the Registrar

Sec. 2–601. The Registrar

The registrar is the administrative officer responsible for supervising the Office of the Registrar and reports to the Senior Vice Provost for Academic Affairs.

Sec. 2–602. The Office of the Registrar: Duties

The Office of the Registrar will

1. maintain the official inventory of courses;
2. maintain, by department and subject, records and reports about the class sizes;
3. assist departments in scheduling classes in a manner that results in optimum space utilization;
4. supervise and administer registration procedures;
5. prepare official publications, including bulletins, catalogs, and course schedules;
6. prepare statistical studies and reports of enrollment;
7. schedule final examinations, except in the School of Law and the Dell Medical School;
8. collect, record, and distribute grades;
9. maintain official academic records and issue transcripts;
10. prepare and issue official certifications regarding attendance, enrollment, and status;
11. prepare and issue diplomas;
12. certify student athletes for NCAA competition;
13. administer degree audits;
14. certify the eligibility for student veterans for Veteran Services; and
15. review and determine student Texas residency classification.

Subchapter 2–700. Jurisdiction and Transfer

Sec. 2–701. Jurisdiction

1. Each student by registering enters a college or school of the University and is subject to the rules and regulations of that college or school. A student pursuing simultaneous majors in two colleges or schools is subject to the rules and regulations of both.
2. Each student who takes a course in a college or school other than the college(s) or school(s) in which he or she is registered is subject to the requirements and rules applicable to that course in the college or school in which the course is taught.

Sec. 2–702. Transfer to Another Division: Internal Transfer

1. Students who have completed 45 or fewer semester hours of college credit and are not on academic dismissal are eligible to transfer between colleges and schools within the University , provided they satisfy all conditions and procedures that apply to students who enter the new college or school and any program thereof when first admitted to the University. Students who have completed more than 45 semester hours of credit must present a 2.00 University grade point average to qualify for transfer between colleges and schools within the University. Transfer students from other institutions are eligible to transfer between colleges and schools within the University upon completion of their first semester (including summer) session at The University of Texas at Austin regardless of the number of semester hours accumulated, provided they satisfy all conditions and procedures that apply to students who enter the new college or school and any program thereof when first admitted to the University.
2. Students must complete transfer procedures by the end of the eighth class day of the semester (or the fourth class day of the summer session).
3. Graduate students not previously admitted to the University as undergraduates may transfer from Graduate and Postdoctoral Studies to an university undergraduate program or school only if they (1) meet the general conditions for transfer, (2) satisfy any pertinent admission requirements for that university undergraduate program or school, and (3) have the additional approval of the vice provost of admissions.

Subchapter 2–800. The Official Transcript of Academic Record

Sec. 2–801. Nature of Transcript

1. The provisions of chapter 9 of the *Institutional Rules* describe the official transcript of academic record.
2. A student may obtain from the Office of the Registrar a copy of his or her transcript of academic record by paying a fee prescribed by the

registrar. The transcript includes the recorded results of the student's classwork at the University.

Subchapter 2–900. Reports of Academic Work

Sec. 2–901. Semester Reports from Registrar

At the end of each semester and at the end of the summer session, the registrar will provide a report of each student's academic achievement to the student through a secure Web site.

Chapter 3. Financial Aid

Subchapter 3–100. General Provisions

Sec. 3–101. Purpose

a. As a state institution of higher education, the University endeavors to provide higher education for all eligible persons and to assist in the pursuit of their studies those who do not have sufficient financial resources.

b. The Office of Scholarships and Financial Aid is responsible for administering certain funds for financial aid to students; for keeping abreast of programs relating to financial aid for higher education and to employment opportunities for students funded through federal, state and institutional work-study programs; for disseminating information relating to available financial aid programs and the cost of attending the University to enrolled students and prospective students; and for assisting students who have been accepted for enrollment at the University or who are enrolled at the University in obtaining loans, grants, scholarships, and employment to supplement payment of their educational expenses.

Sec. 3–102. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Advisor" means the single individual a student has elected to accompany him or her to a meeting with the director or a hearing regarding an aid decision. As the student is solely responsible for presenting his or her case during the hearing, an advisor serves only in a support capacity and may not verbally advocate for the student in a meeting with the director or in a hearing. If an advisor poses a conflict of interest, the director or the Subcommittee on Appeals may elect to excuse his or her presence, and advisors may be dismissed from any proceedings if they disrupt the process.
2. "Aid decision" means a written decision regarding the amount of financial aid award to a student by the University under a financial aid program administered by the Office of Scholarships and Financial Aid and includes the findings of fact in support of the decision.
3. "Day" means calendar day.
4. "The Director" means the associate vice provost for financial aid and Texas One Stop or the director's delegate.
5. "Financial aid record" means a student record as defined in subsection 9–202(a)(4) of the *Institutional Rules* that is maintained by the director in connection with a financial aid program administered by the Office of Scholarships and Financial Aid. The record may include applications, forms, notices, hearing records, aid decisions, and other documents required under this chapter or deemed relevant by the director.
6. "Student" means a person who is currently enrolled at the University, or who is accepted for admission or readmission to the University, or who has been enrolled at the University in a prior semester and is eligible to continue enrollment in the semester (including summer) that immediately follows.
7. "University" means The University of Texas at Austin.
8. "Senior Vice Provost" means the senior vice provost for strategic enrollment management and student success of The University of Texas at Austin, or his or her designee.
9. "Weekday" means Monday through Friday.

Subchapter 3–200. The Director of The Office of Scholarships and Financial Aid

Sec. 3–201. Administration of Financial Aid

a. The director will administer institutional, state, and federal programs for scholarships, loans, grants, and other specified financial aid in accordance with the legal provisions and limitations, if any, of particular funds, or in accordance with policies recommended by the Committee on Financial Aid to Students.

b. The director is in charge of the Office of Scholarships and Financial Aid and is administratively responsible to and will report regularly to the senior vice provost.

Sec. 3–202. Duties of Staff

Staff members will process applications for students who need assistance in financing their educational expenses.

Subchapter 3–300. The Committee on Financial Aid to Students

Sec. 3–301. Membership

a. The Committee on Financial Aid to Students has fourteen members and at least three administrative advisors. The members are
   1. five members from the General Faculty, representing five colleges or schools of the University, appointed by the president for two-year staggered terms;
   2. two staff members appointed by the president for staggered two-year terms;
   3. five students (four undergraduate and one graduate), including at least two who are receiving or have received financial aid from the Office of Scholarships and Financial Aid; four of the students are appointed by the president from a panel submitted by Student Government; the fifth student is appointed by the president from a panel submitted by the chair of the Graduate Student Assembly; student members will be appointed for two-year staggered terms; and
   4. two members from the Faculty Council, appointed by the chair of the Faculty Council for one-year terms.

b. The director, a representative of the dean of students, and a representative of the Office of Graduate and Postdoctoral Studies serve as administrative advisors without vote. The president may appoint additional nonvoting administrative advisors from the general administration areas of the University.

c. A Subcommittee for Appeals is designated from the full committee. The subcommittee is composed of no fewer than three of the five members from the General Faculty as voting members and the administrative advisors without vote.

Sec. 3–302. Duties of Committee

a. The full committee initiates and reviews policies and procedures for the Office of Scholarships and Financial Aid.

b. The Subcommittee for Appeals hears appeals regarding Satisfactory Academic Progress (SAP).

Subchapter 3–400. Appeals to the Committee on Financial Aid to Students

Sec. 3–401. Procedure for Denial due to not meeting Satisfactory Academic Progress (SAP)

a. A recipient of a loan, grant, or scholarship administered by the Office of Scholarships and Financial Aid who does not make satisfactory academic progress (SAP) will be notified in writing. An appeal

process is available to students who do not meet SAP due to extenuating circumstances.

Sec. 3–402. Appeal

a. A person whose aid has been denied or revoked under section 3–401, after exhausting all internal review processes through the Office of Scholarships and Financial Aid, may appeal the decision to the Subcommittee for Appeals.

Sec. 3–403. Appeal to Subcommittee for Appeals

a. To appeal a denial or revocation of aid to the Subcommittee for Appeals, the student must submit a written appeal to the director. The appeal must state the student's name, the date the director issued the aid decision, and specific reasons for the appeal, including any related argument and all relevant documentation.
b. The appeal must be submitted by letter or e-mail within 10 days from the date the student received the aid decision from the director. A letter will be considered to have been received on the third day after the day of mailing. An e-mail message will be considered to have been received on the second day after sending the message.

Sec. 3–404. Hearing Before the Subcommittee for Appeals

The Subcommittee for Appeals will preside over the hearing and will:

1. facilitate the hearing process, which includes the ability to excuse any party present at the hearing if he or she is disrupting the process; render a written decision, which will contain findings of fact; approve, reject, or modify the decision of the director; and provide the student and the director with a copy of the decision.

Sec. 3–405. Duties of the Director

The director, in consultation with the Subcommittee for Appeals, will:

1. set the date, time, and place for the hearing and notify the student of the date, time, and place;

Sec. 3–406. Notice of Hearings

a. The Office of Scholarships and Financial Aid will notify the student by letter or by e-mail of the date, time, and place for the hearing. The notice will be delivered in person or sent to the student by e-mail or postal mail at an address listed in the registrar's records.
b. The notice will specify a hearing date at least ten days after the letter or e-mail message is received. A letter or an e-mail message sent to an address listed in the registrar's records will constitute full and adequate notice. A letter will be considered to have been received on the third day after the day of mailing. An e-mail message will be considered to have been received on the second day after sending the message.
c. The student may request, in writing, that an earlier hearing date be set if feasible to arrange.

Sec. 3–407. Preliminary Matters in Hearings

a. At least five days before the hearing date, the student will furnish the Subcommittee for Appeals with
    1. any objection that, if sustained, would postpone the hearing; and
    2. the name and relationship of the advisor to the student, if any, who will appear with the student.

Sec. 3–408. Hearing Procedure

a. The Subcommittee for Appeals will review written arguments and then meet with both parties together to ask questions, seek clarification, and hear any final comments from the parties.
b. The Subcommittee for Appeals' meeting with the parties is informal and is closed.

Sec. 3–409. Evidence in Hearings

a. The Subcommittee for Appeals will review the aid decision made under section 3–401 and subsection 3–402(a) based on admitted evidence. The Subcommittee for Appeals may consider the student's financial aid record admitted into evidence at the hearing in determining an aid decision.

Sec. 3–410. Decision of the Subcommittee for Appeals

a. Within 14 days from the completion of the hearing, the Subcommittee for Appeals will render a written decision. The student and the director will each be given a copy of the decision. The Subcommittee for Appeals' written decision is the official decision on the matter from which any appeal is taken.
b. The criteria the Subcommittee for Appeals' decision will be based on are fairness, reasonableness, compliance with the Institutional Rules and federal and state law, and the student's financial aid record, if any. The Subcommittee for Appeals may approve, reject, or modify the director's decision.

Subchapter 3–500. Suspected Federal Financial Aid Fraud

Sec. 3–501. Procedures Reporting Suspected Federal Financial Aid Fraud

It is the responsibility of the Office of Scholarships and Financial Aid to report any suspicions or evidence of fraud, or intent to defraud, or indication of other disciplinary offenses regarding a student's application for aid to the Office of the Inspector General of the United States Department of Education, following federal and state law.

Chapter 4. University Health Services

Subchapter 4–100. General Provisions

Sec. 4–101. Purpose

University Health Services (UHS) provides: (1) a broad range of professional health services for the diagnosis and treatment of illnesses and injuries; (2) preventive health services such as physicals and annual wellness exams; (3) physical therapy and nutrition services; (4) public health initiatives, including the promotion of a healthy campus; (5) immunizations for vaccine-preventable diseases; and (6) other public health services such as responding to certain infectious diseases on campus.

For a detailed discussion of benefits and services offered, see the UHS website.

Sec. 4–102. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Assistant Vice President" means the Assistant Vice President of UHS.
2. "Chief Medical Officer" means the chief medical officer of UHS.
3. "President" means the president of The University of Texas at Austin.
4. "Student" means a person enrolled at the university.
5. "University" means The University of Texas at Austin.

Subchapter 4–200. The Assistant Vice President and Chief Medical Officer

Sec. 4–201. The Assistant Vice President and Chief Medical Officer

a. The Assistant Vice President is responsible for all clinical services, initiatives and programs; provides organizational oversight, campus leadership and strategic planning activities of UHS and reports to the associate vice president for health and well-being.
b. The Assistant Vice President is responsible for serving as a liaison to campus leaders and media and for planning for and responding to campus public health emergencies in consult with the Chief Medical Officer.

c. The Assistant Vice President and Chief Medical Officer are responsible for establishing the clinic structure and specifying functional relationships among organizational components of clinical and clinic support operations, providing for the orderly development and management of the unit, supporting a policy on patients' rights and responsibilities, maintaining a program that evaluates the quality of care provided and appropriately addressing identified problems.

d. The Assistant Vice President and Chief Medical Officer are responsible for providing consultation in matters concerning the delivery of healthcare services and emerging public health issues affecting The University of Texas at Austin.

Subchapter 4–300. Medical Clearance Requirements for New and Returning Students, Fees, Payment for Services and Eligibility for University Health Services

Sec. 4–301. Medical Clearance Requirements

Entering students who have not provided acceptable documentation to comply with applicable medical clearance requirements below will not be allowed to register for classes until they do so. Students should submit medical clearance documentation (including acceptable documentation for exemptions) advanced of their intended registration date to allow for sufficient processing time.

Information about acceptable documentation to comply with the requirement below, how to submit documentation, allowable exemptions for certain requirements and acceptable documentation to claim an exemption resides on the UHS website. During emergencies or epidemics declared by the governor or commissioner of health of the State of Texas or disasters or other emergencies, exemptions on the basis of reasons of conscience (including religious conflict) may be denied if allowed by rule, executive order or law.

a. All entering students, regardless of age or classification, must submit documentation that they are immune to measles before they will be allowed to register for classes.

b. All entering students who will be under the age of 22 on the first class day of the semester in which they are enrolling must submit documentation that they have received a meningococcal disease (bacterial meningitis) vaccine administered within five years of and at least ten days before the first class day of the semester in which they are enrolling. This includes transfer students and students who previously attended the university or another institution of higher education (or private or independent institution of higher education) and who are entering the university following a break in enrollment of at least one fall or spring semester. Students age 22 or older or who are enrolled only in online or distance courses are exempt from the meningococcal vaccine requirement.

c. International students entering any semester must provide proof of the following by submitting acceptable documentation as described on the UHS website. If they meet the criteria described in Sec. 4-310b, they must also provide proof of a meningococcal vaccine as described in that section.

    1. Proof of immunity to measles, mumps, and rubella as documented by one of the methods described on the UHS website.
    2. If indicated following an online screening questionnaire, proof of an acceptable tuberculosis screening test as described at Medical Clearance Requirements for International Students and administered on or after the date listed on that page. If either acceptable test is positive, documentation of a chest x-ray performed in the U.S. on or after the same date is required, regardless of a history of previous treatment.

Sec. 4–302. Fees

UHS is funded by tuition paid by students and by charges for supplies and services. There are charges associated with UHS clinic visits. A charge applies for missed appointments or appointments not canceled in the specific time frame for that appointment type. Complete information about UHS charges is detailed online.

Sec. 4–303. Payment for Services

Any student who incurs a charge for services rendered by UHS must pay the charges owed, but they do not have to pay for services on the date they are provided, except for students who have health insurance and request that a claim not be filed with their insurance company. UHS can assist a student in arranging a payment plan. If payment is not received or arrangements for payment are not made within ten days of the date charges are posted to "What I Owe," a financial hold will be placed on the student's record. Students with a hold can contact the UHS/CMHC Billing and Insurance Office to discuss options that will allow them to register. Diplomas and/or continued registration will be withheld until outstanding charges have been paid.

UHS can file claims for payment with most health insurance plans; however, health insurance is not required to be seen at UHS. For more information, including the Student Administrative Health Fee and the types of plans with which claims can and cannot be filed, go to the UHS website.

By providing their insurance information, a student authorizes UHS to file a claim with the student's insurance company for services rendered. A student who does not want an insurance claim to be filed for medical services must let UHS know at the time of their appointment.

A student's insurance company may determine that some or all charges incurred at UHS are not covered. The student is responsible for learning what their insurance covers.

For students who do not have health insurance and cannot or prefer not to pay at the time of service or who have health insurance that does not pay for a part or all charges, UHS will post their balance to "What I Owe." Discounted rates are available for students who do not have insurance, who are underinsured or who are covered by Medicare or Medicaid.

Sec. 4–304. Eligibility to Use University Health Services

a. An individual may use UHS if:
    1. the person is a currently enrolled student at the university,
    2. the person has been admitted to the university and needs required or recommended immunizations or medical tests to matriculate,
    3. for acute medical services only, the person is participating in university-sponsored short-term activities such as seminars, institutes and workshops provided the sponsoring agency has entered into an agreement with UHS by properly completing the Request to Use University Health Services form and paying the associated agreement fee. The sponsoring department is responsible for any unpaid charges incurred by program participants,
    4. the person is a university faculty or staff member who is participating in a public health or immunization program. Faculty and staff are not eligible for regular services except for travel-related immunizations, physical therapy, certain campus outreach and educational programs and services arranged and paid for by Interdepartmental Transfer by a university department,
    5. the person was registered during the semester immediately preceding the semester when services are requested (excluding university students who have graduated or who withdrew from the university before the twelfth class

day of the prior semester) and will enroll the semester immediately following the time services are requested,

6. the person has paid an access fee and is a visiting scholar/researcher who is not officially registered for classes at the university, a post-doctoral fellow or a person enrolled in the English as a Second Language Program, or,
7. the person is a student from another University of Texas System institution that has entered into an agreement with the university, otherwise called a Contractual Student.

b. Registered students are eligible to use UHS services following this general eligibility calendar: fall semester eligibility starts August 1 and runs through December 31; spring semester eligibility starts January 1 and runs through the last day of the Maymester; summer eligibility beings the first day after the Maymester ends and runs through summer session graduation day. International Students become eligible on the first day of coverage of the student health insurance plan. Specific eligibility dates are given in the Academic Calendar (p. 7) published in the *General Information Catalog* and at the registrar website.

c. For telehealth, persons must meet the above eligibility criteria and reside in the state of Texas at the time of the visit.

Subchapter 4–400. General Administrative Policies

Sec. 4–401. Informed Consent

The parent or guardian of a minor student must give appropriate consent for treatment before care can be provided at UHS, except when a minor student meets State of Texas criteria to consent for their own care or in cases where immediate medical care is required to stabilize a patient for transfer to an emergency facility.

Sec. 4–402. Medical Withdrawal from the University

Requests for withdrawal from the university for medical reasons may be initiated at the request of a student. Applications to request consideration of a medical withdrawal should be submitted to Disability and Access. Disability and Access will involve UHS as indicated by the student's individual circumstances.

Sec. 4–403. Responsibility of University Health Services

Any intentional action on the part of the student that is against the advice of a UHS health care provider abrogates all responsibility on the part of UHS.

Sec. 4–404. Requests to Administer Medications

Requests to administer medications ordered by a private physician must be within the scope of services offered at UHS, meet the standard of care provided by UHS medical staff, be supported by appropriate medical documentation from the prescribing physician and be approved by the chief medical officer.

Sec. 4–405. Routine, Urgent and Emergency Care Services

a. UHS is not equipped to manage medical emergencies. In the case of a medical emergency, students should call 911.

b. For routine health concerns, students may schedule appointments by calling (512) 471-4955 during posted weekday business hours. Students can also schedule many types of appointments online.

c. UHS is not an urgent care facility. Students who need prompt medical attention for illnesses or injuries may be able to make a same-day or next-day appointment at UHS. If you require medical attention for a non-emergency illness or injury outsides of UHS operating hours (Monday-Friday, 8 am - 5 pm), visit an urgent care facility for prompt medical care.

d. Current operating hours are posted on the University Health Services website.

Sec. 4-406. 24-hour Nurse Advice Line

The UHS Nurse Advice Line (512-475-6877) is available for students 24 hours a day, every day of the year. Advice Line nurses can help students determine whether and how soon they need medical care or can provide self-care advice for illnesses and injuries when appropriate.

Sec. 4–407. Treatment at Other Facilities

a. UHS assumes no financial responsibility for a student's care at another medical facility.

b. A student who goes to or is taken to another medical facility for emergency or other treatment, regardless of geographical location or other circumstantial factors, is responsible for all resulting costs.

Sec. 4–408. Personal Property

a. UHS is not responsible for a student's personal belongings; the student is responsible for arranging for the safekeeping of these articles.

b. In instances when it is necessary for UHS to maintain custody of a patient's property or when a patient leaves personal possessions in waiting rooms or clinics, UHS will exercise all prudent means of securing and returning such property to the owner but cannot be held responsible for losses through theft.

Sec. 4–409. Medical Records

All original medical records (whether electronic or paper) and other records of treatment, whether originating within UHS or another facility or provider, are the property of UHS. Medical information may be disclosed as required by state or federal law. Many items summarizing patient care are available on the patient portal. Additional information from patient records will be released only with informed written consent. Students have the right to review, inspect or request copies of their medical records.

Chapter 5. University-Owned Residences

Subchapter 5–100. General Provisions

Sec. 5–101. Purpose

University-owned residences are provided and operated by The University of Texas at Austin with the welfare of students as the primary goal. The University provides a variety of living accommodations for students and endeavors to maintain a high quality of life within residences through the development of counseling, educational, and social programs within the residence units.

Sec. 5–102. Application

Student residents and their guests are subject to the applicable provisions of this chapter and to the provisions set forth in Sec. 11–401, Sec. 11–403, and Sec. 11–404 of the *Institutional Rules on Student Services and Activities*.

Sec. 5–103. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Guest" means an individual who has been personally invited by a University Resident to enter into the resident's residence; remaining there, for a period of time not to exceed 72 hours.
2. "Residence" means a University-owned family housing unit, a University-owned residence hall or cooperative, or any other subsidiary facility.
3. "Student" means a person who has applied for or entered into a residence contract with the University or who occupies a room or dwelling in a residence.
4. "University" means The University of Texas at Austin.

5. "Associate vice president" means the associate vice president of University Housing and Dining at The University of Texas at Austin.
6. "Assistant vice president" means the assistant vice president of Residence Life at The University of Texas at Austin.

Sec. 5–104. Eligibility

a. To be eligible for residence in 2400 Nueces, Dobie Twenty21, University Apartments, or the University residence halls, undergraduate students must be enrolled for at least twelve semester hours during each fall/spring semester; graduate and law students must be enrolled for at least nine semester hours or six dissertation hours each fall/spring semester. To be eligible for residence in East Campus Graduate Apartments, graduate students must be enrolled for at least nine semester hours or six dissertation hours each fall/spring semester.

b. Exceptions for undergraduate students must be approved by the dean of the student's college or school and the assistant vice president. The vice provost for graduate and postdoctoral studies and the assistant vice president must approve exceptions for graduate students. The assistant vice president will review the contract status of residents who drop below the minimum hours requirement to determine the necessity of contract cancellation.

c. To be eligible as a student resident in the University Apartments, (1) you must be a graduate student at The University of Texas at Austin; or (2) you must be an undergraduate student with at least thirty semester hours credit and in good standing with the University. Registered sex offenders are not permitted to live in University-owned housing, which includes the University Apartments. Full-time students will be given preference to live in University-owned housing over part-time or full-time employees of The University of Texas at Austin, even if the employees are also full-time graduate students or undergraduate students with at least 30 semester hours credit. Subject to applicable law, University rules and policy, the Contract Holder may allow guests to visit their assigned apartments. "Guest" means an individual who has been personally invited by a Contract Holder to enter into the Contract Holder's apartment. Guests are permitted to visit for a period of time, not to exceed 72 consecutive hours. Guests are not permitted to reside in (or occupy) the apartment on a long term basis. "Family Members" means individuals who are related to the Contract Holder by marriage, civil union, domestic partnership, informal marriage, dependency or some other form of recognized familial relationship. Family members are permitted to reside in the apartments that are designated for family housing. Certain stipulations apply. See the University Apartment Manual for the complete policy and rules pertaining to family members. Any changes in occupancy must be reported to the University Apartment's staff within 48 hours of the change. A Contract Holder's invitation to a guest or family member may be revoked at their discretion and be withdrawn by the Contract Holder without the need to express any reason or basis for the revocation. The following restrictions to occupancy apply: In Colorado and Gateway (Single-Occupant Apartments): one-bedroom apartment, maximum of one (1); two-bedroom apartment, maximum of two (2). In Brackenridge (Family Housing): one-bedroom apartment, two to three (2-3) occupants; two-bedroom apartment, two to five (2-5) occupants; three-bedroom apartment, four to seven (4-7) occupants. These limits will be strictly enforced.

d. Should residents violate any of the conditions of the contract, the assistant vice president may, in the future, refuse to contract any premises to those residents.

Subchapter 5–200. Administration of Housing

Sec. 5–201. Responsibilities of Supervisory Officials

The assistant vice president is responsible to the associate vice president for discipline, counseling, and the quality of life in residences, and the fiscal and physical management of residences.

Sec. 5–202. Rule Making in Residences

a. The occupants of each student residence may make reasonable rules governing life in that residence.

b. Residence rules may not conflict with the *Institutional Rules*, *Handbook of Operating Procedure*, Regent's *Rules and Regulations*, local, state or federal law, and will take effect when they are approved by the assistant vice president and associate vice president. Such rules will be publicized to all residents immediately upon taking effect.

Subchapter 5–300. Contracts

Sec. 5–301. Terms of Contract

a. Charges for housing and meals begin and end on the official dates of the contract period.

b. The effective dates and terms and conditions of the contract are provided with each contract.

c. Students who are under contract may not terminate the contract except as provided in the contract and in Subchapter 5–400.

d. Expenses incurred in collecting the total amounts due under a contract, including collection fees up to a maximum of 33 1/3% of the amount due, attorney's fees, and other costs, including court costs, will be the responsibility of the obligor.

Sec. 5–302. Enforcement of Contracts

a. The assistant vice president, or the assistant vice president's delegate, enforces residence contracts.

b. The associate vice president is the final level of appeal in contract disputes.

Sec. 5–303. Student Responsibility

a. Each student will meet all obligations for housing and meals and will observe all conditions of the contract.

b. Students in the residence halls have the option to pay for housing and meals:
   1. in full;
   2. in half payments due once each semester;
   3. in six payments due three times each semester; or
   4. for spring only, in three payments.

c. Students in 2400 Nueces, East Campus Graduate Apartments and University Apartments pay for housing on the first of each month. Students may purchase an optional meal plan.

d. Students who do not comply with the terms of the housing and meals contract may be subject to University disciplinary action as provided in Chapter 11 of the *Institutional Rules*.

Subchapter 5–400. Termination of Contracts

Sec. 5–401. Graduation

Except as provided under Sec. 5–405, students who leave the University at the end of the fall semester because of graduation will not be liable for room rent or meals charges beyond the end of the semester, provided notification of graduation is filed by the official cancellation date for the spring semester. Students will be billed for any damages to the premises and any other applicable charges. Students who cancel after the official cancellation date will be charged $300 for liquidated damages. Cancellations received after the residence halls open for the spring will be handled as withdrawals during the spring semester. Students who are released from a contract because of graduation will again become liable for the contract if they fail to graduate from the University during the original contract period.

Sec. 5–402. Voluntary Withdrawal from the University

Except as provided under Sec. 5–405,

a. Students who voluntarily withdraw from the University during a contract period are normally required to pay liquidated damages of $300 in addition to standard room and meals charges through the date of checkout. Students who withdraw from the University at the end of the fall semester will be billed through the end of the fall semester, provided notice of cancellation is received by the official cancellation date for the spring semester. Students who cancel after the official cancellation date will be charged $300 for liquidated damages. Cancellations received after the residence halls open for the spring will be handled as withdrawals during the spring semester. Students must normally move within twenty-four hours after withdrawing from the University.

b. Students who are released from a contract because of voluntary withdrawal from the University will again become liable for the contract if they re-enroll in the University during the original contract period.

Sec. 5–403. Required Withdrawal from the University

Except as provided under Sec. 5–405, students who are required by the university to withdraw from the university are not liable for paying room rent or meals charges beyond the date of moving, but they will pay all charges that accrue under the contract through the checkout date plus $300 in liquidated damages, any charges for damage to the premises, and any other applicable charges. The University will refund any prepaid room or meals balance less any charges for damages to the premises or any other applicable charges. The University reserves the right to suspend a student from the residence halls for failure to abide by the terms and conditions of the contract. Students who fail to register as regularly enrolled students will be required to move as outlined in Sec. 5–402(a).

Sec. 5–404. Withdrawal from University-Owned Residences during the Contract Period

Except as provided under Sec. 5–405, students granted permission to move within the contract period are required to pay liquidated damages of $300 in addition to standard room and meals charges through the date of checkout.

Sec. 5–405. University Apartments Contracts

a. In any event mentioned below you must fill out the Contract Release Request Form. If you are approved for a release, your housing bill will be adjusted to the end of the month in which you check out.

b. If you withdraw from the University during the semester in which the cancellation occurs, you must notify University Housing within 24 hours.

c. If you fail to register with the University during the semester in which the cancellation occurs, you must notify University Housing by the 12th class day.

d. Once your withdrawal or non-registration is confirmed by the Registrar, you will be charged $300 in liquidated damages and your fall housing bill will be adjusted based on the date the University received notification of official withdraw or termination based on the date the University received notification of official withdraw or termination or your check-out date, whichever occurs last.

e. If you graduate from the University at the end of the fall term, you must notify Housing and Dining on or before November 15. if you graduate from the University at the end of the spring term, you must notify Housing and dining on or before April 15. If you graduate from the University at the end of the summer term, you must notify Housing and Dining on or before July 15. Once your graduation is confirmed by the Registrar, you will pay to the University all charges accrued under the Contract through the end of the fall term. If you notify Housing and Dining after the due date, you will be charged an additional $300 in liquidated damages and your housing bill will be adjusted based on the date the University received notification of official withdraw or termination or your check-out date, whichever occurs last.

f. If you are moving out due to an academic internship, academic study abroad or academic co-op program for the spring term you must notify Housing and Dining on or before November 15. Once your program commitment is confirmed, you will pay to the University all charges accrued under the Contract through the end of the fall term. If you notify Housing and Dining after November 15, you will be charged an additional $300 in liquidated damages.

g. Failure to move out on or before 5 p.m. on the exact date required under the contract (e.g. the end of the contract term or the date listed on the vacancy notice) you must pay 100% of one month's rate and utilities charges plus $50 per day for each day you are occupying the apartment past the notice to vacate date. You agree to indemnify The University and/or prospective residents for damages incurred, including lost income, storage, lodging expenses, and attorney's fees, if such damages are incurred.

h. Failure to follow established check out procedures will result in a $25.00 improper check out charge.

Chapter 6. Student Organizations

Subchapter 6–100. General Provisions

Sec. 6–101. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Academic or Administrative Unit" means any office or department of the University.
2. "Day " means an 8:00 a.m. to 5:00 p.m. calendar day, excluding weekends, university holidays, and days on which regularly scheduled classes are suspended or cancelled due to emergent situations. If a deadline defined in this Chapter falls on a day outside of this definition, that deadline will be moved to the next day.
3. "Dean of Students" means the Dean of Students of The University of Texas at Austin or the Dean of Students' delegate.
4. "Officer" means a student designated to represent or speak for a Student Organization in its relations with the University and to receive official notices, directives, or information from the University on behalf of the Student Organization.
5. "Registered Student Organization" means a Student Organization holding a valid registration under this Chapter. Registered Student Organizations are considered private entities and are not viewed as extensions of an Academic or Administrative Unit, or of the University. Student Organizations must register annually with the University and meet all obligations of Registered Student Organizations listed in subsection 6-302 to ensure privileges as outlined in subsection 6-301 and allow the Registered Student Organization to function within the institutional context.
6. "Registered Student Organization Advisor" means a person serving in an advisory capacity to a Registered Student Organization to provide guidance to the Registered Student Organization and its members. In accordance with section 51.9361 of the Texas Education Code, a person serving as an advisor to a Registered Student Organization must be someone who
   a. is at least twenty-one years of age;
   b. is not enrolled as a student at the University;
   c. serves as either;
      i. a part-time or full-time employee of the University; or
      ii. a representative of a national or alumni organization that is associated with the Registered Student Organization.

d. completes the Safety Education Program advisor training at least once in their tenure as an advisor; and

e. if categorized as a sorority or fraternity advisor, must comply with additional requirements administered by the Sorority and Fraternity Life unit.

7. "Safety Education Program" means an annual compliance and educational initiative administered by the Office of the Dean of Students in accordance with Texas Education Code, Section 51.9361. Its purpose is to promote a safer university community by equipping student organizations with essential knowledge and resources related to risk management and prevention.
8. "Sponsored Student Organization Advisor" means a university staff or faculty member from the sponsoring Academic or Administrative Unit who is serving in an advisory capacity to provide guidance to the Sponsored Student Organization and its members. In accordance with section 51.9361, a person serving as an Advisor to a Sponsored Student Organization must be someone who
   a. is at least twenty-one years of age;
   b. is not enrolled as a student at the University;
   c. serves as a part-time or full-time employee of the University; and
   d. completes the Safety Education Program advisor training at least once in their tenure as an advisor.
9. "Sponsorship" or "Sponsored Student Organization" means a Student Organization whose purpose and activities are in accord with the mission of an Academic or Administrative Unit, for whose actions and activities the sponsoring unit provides endorsement, support, and supervision that has been officially approved by the Vice President through an annual application as prescribed by the Dean of Students.
   a. "Endorsement" means that the sponsoring Academic or Administrative Unit gives approval of the Sponsored Student Organization's status as an official extension of the unit and sanctions the mission, goals, and approved activities of the Sponsored Student Organization.
   b. "Support" means to provide for or to maintain by contributing the necessary money, physical space, staff, advising, mentoring, and other resources that the Sponsored Student Organization needs to carry out its mission, goals, and activities.
   c. "Supervision" means to monitor, oversee, and advise the Sponsored Student Organization. Supervision includes sanctioning and approving all activities and events of the Sponsored Student Organization; maintaining personal knowledge of the Sponsored Student Organization's structure, operations, and activities; and acting as necessary to ensure that all affairs of the Sponsored Student Organization are consistent with the mission of the sponsoring Academic or Administrative Unit and the University.
   d. "Assumption of responsibility" means to ensure endorsement, support, and supervision of all aspects of the Sponsored Student Organization. Assumption of responsibility includes managing the organization to operate with financial accountability for all funds collected or spent; making sure the Sponsored Student Organization conducts its affairs in accordance with all applicable university rules and regulations, Regents' Rules, and local, state, and federal laws; and providing the necessary physical and personnel resources, including a dedicated Sponsored Student Organization Advisor.
10. "Student " means a person who is currently enrolled at the University, or who is accepted for admission or readmission to the University, or who has been enrolled at the University in a prior term and is eligible to continue enrollment in the term that immediately follows, or who is attending an educational program sponsored by the University while that person is on campus, or who engaged in prohibited conduct at a time when they met the above criteria. For the purposes of this Chapter, individuals who are do not currently meet the definition of a student remain subject to the disciplinary process for conduct that occurred while they were a student.
11. "Student Governance Organization" means a student association as defined by the Regents' Rules and Regulations, Rule 50203. Student Governance Organizations include Student Government, the Senate of College Councils, and the Graduate Student Assembly. Student Governance Organizations are sponsored by the Office of the Dean of Students.
12. "Student Organization" means a Sponsored Student Organization or a Registered Student Organization.
13. "University " means The University of Texas at Austin. For the purposes of this Chapter, "University" also includes all activities and programs sponsored by or affiliated with The University of Texas at Austin regardless of the actual location where such activities or programs occur, including but not limited to, field trips, internships, rotations, and clinical assignments.
14. "Vice President " means the Vice President of Student Experience at The University of Texas at Austin or the Vice President's delegate.

Subchapter 6–200. Registration

Sec. 6–201. Registration Required

Any group of students seeking to exercise any of the rights and privileges listed in section 6–301 must apply to be recognized as a Student Organization. An application for a new organization may be submitted during a period prescribed by the Dean of Students. Annual registration for existing Student Organizations occurs during a period prescribed and advertised by the Dean of Students.

Sec. 6–202. Application and Obligations

1. A group of students that wants to be recognized or maintain their status as a Student Organization must
   A. apply on a form prescribed by the Dean of Students;
   B. identify at least six members, three of which must be identified as Officers including one as president;
   C. provide a complete and accurate roster of all members;
   D. submit a current organization constitution; and
   E. provide additional information required by the Dean of Students.
2. To maintain status as a Student Organization, a group of students must provide and maintain the following, as prescribed by the Dean of Students:
   A. a complete and accurate roster of all members, including identifying at least six members, three of which must be identified as Officers including one as president;
   B. a current organization constitution; and
   C. provide additional information as required by the Dean of Students.

Sec. 6–203. Membership

1. Student Organizations may not deny membership on the basis of race, color, religion, national origin, sex, pregnancy, age, disability, citizenship, veteran status, genetic information, sexual orientation, gender identity, or gender expression, except that
   A. a Registered Student Organization created primarily for religious purposes may restrict the right to vote or hold office to persons who subscribe to the Registered Student Organization's statement of faith; and
   B. a Registered Student Organization may restrict membership to a single sex in accordance with the provisions of Title IX of the Education Amendments Act of 1972,

2. Student Organizations must limit membership to students, faculty members, and staff members of the University (as defined in this Chapter).

Sec. 6–204. Use of University Name

1. No student, unregistered group, or Registered Student Organization may use the name of the University or an abbreviation of the name of the University as part of its name.
2. No student, unregistered group, or Registered Student Organization may advertise or promote any event or activity in a manner that suggests that the event or activity is sponsored by the University.
3. The Office of Brand, Trademark and Licensing must approve requests to use the University name and/or protected marks.

Sec. 6–205. Action on Registration Application

1. A Student Organization Registration Application may only be denied according to the following criteria:
   A. the organization is ineligible under sections 6–202, 6-203, 6-204, or 6-512 of this Chapter;
   B. there are bars, including financial, against the organization; or
   C. the organization is under a disciplinary sanction prohibiting registration.
2. If an organization is denied registration, the Executive Director of Student Involvement or their delegate will provide the organization with a written statement detailing the reason(s) for denial.
3. The organization may appeal the denial to the Dean of Students by letter or by e-mail no more than five days after the day the written statement is provided . The appeal must contain the organization's name and email address, a concise description of the decision, the organization's reason(s) for disagreeing with the decision, and the date the decision was announced.
4. When timely notice of appeal is received, the Executive Director of Student Involvement will send to the Dean of Students a copy of the written statement and the reason given for the decision.
5. The decision of the Dean of Students will be communicated by e-mail to the organization.

Sec. 6-206. University Sponsorship of Student Organizations

1. All Sponsored Student Organizations must apply and receive approval for sponsorship through the application process prescribed by the Dean of Students.
2. A Sponsored Student Organization may use the name of the University or an abbreviation of the name of the University or any of the university trademarks or service marks as part of or in conjunction with its Student Organization name, but only with the prior written approval of the Dean of Students and the Office of Brand, Licensing and Trademark.
3. The University may not sponsor a student organization designed or implemented in reference to race, color, ethnicity, gender identity, or sexual orientation, or that is involved in projects for private gain.
4. Student Governance Organizations must be sponsored by the University.
5. Sponsored Student Organizations must comply with all applicable fiscal and accounting procedures of The University of Texas at Austin.
6. Sponsored Student Organizations may not engage in political speech and should not issue statements or express positions on issues of the day. This prohibition does not apply to the speech of individual students in their personal capacities, and only relates to official sponsored student organization statements, functions, ceremonies, and publications. A Sponsored Student Organization that wishes to engage in political speech should reorganize as a Registered Student Organization.
7. Sponsored Student Organizations must comply with all provisions of HOP 3-2010-PM that apply to Sponsored Student Organizations.
8. Membership in a Sponsored Student Organization is at the discretion of the sponsoring department and subject to meeting the administrative and organizational requirements of the Sponsored Student Organization. The sponsoring department of a Sponsored Student Organization may remove a student member of the organization when the sponsoring department receives credible evidence that the student member engaged in activities under the color of their role within the organization that are inconsistent with the requirements of the organization or the scope of their authority to act on behalf of the organization.

Subchapter 6–300. Recognition, Activities and Obligations

Sec. 6–301. Recognition and Activities

1. A Student Organization is granted the following privileges:
   a. to be listed as a Student Organization;
   b. to reserve the use of university facilities under subchapter 10–200 of the Institutional Rules;
   c. to raise funds or make other permissible solicitations on university property under section 13–205 of the Institutional Rules;
   d. to distribute literature under subchapter 13–400 of the Institutional Rules;
   e. to post signs, hang banners, and set up A-frames under subchapter 13–500 of the Institutional Rules;
   f. to set up a table under subchapter 13–600 of the Institutional Rules;
   g. to set up exhibits under subchapter 13–700 of the Institutional Rules;
   h. to use amplified sound under subchapter 13–800 of the Institutional Rules;
   i. to publicly assemble under subchapter 13–900 of the Institutional Rules;
   j. to present a guest speaker on university property in accordance with subchapter 13–1000 of the Institutional Rules;
   k. to apply for storage or office space;
   l. to apply for recognition and awards; and
   m. to access event coordination consultations with staff in the Student Organizations in the Office of the Dean of Students.

Sec. 6–302. Obligations

1. To maintain Student Organization status, each organization must:
   A. submit required registration materials each academic year.
   B. keep a complete and accurate roster of all members. Identify at least six members, including three Officers, one of whom must be designated as President.
   C. ensure a current email address is on file for Officers to receive university communications.
   D. maintain and provide an up-to-date organizational constitution.
   E. provide any additional information as requested by the Office of the Dean of Students.
   F. complete the Safety Education Program annually. Advisors must complete the Safety Education Program Advisor Training at least once during their tenure.
   G. file a final report with the Office of the Dean of Students within 30 days of the start of the spring and fall semesters. The report must include:
      1. Full disclosure of the sources and amounts of money obtained from solicitations during the preceding semester or summer session and

2. Full disclosure of the purposes and amounts of expenditures made during the preceding semester or summer session.
3. Any other information required by the Dean of Students about solicitation activities, per Regents' Rules and Regulations, Rule 80103, Number 2.

H. conduct all organizational affairs in accordance with local, state, and federal laws and the Regents' Rules and Regulations.

2. A Registered Student Organization that is a social Greek letter fraternity or sorority chapter (as defined under the provisions of Chapter 38, Section 1681 of the U.S. Education Amendments of 1972) will automatically be categorized as a sorority or fraternity and must comply with additional requirements administered by Sorority and Fraternity Life in the Office of the Dean of Students.
3. No Student Organization may re-register or use the facilities of the University if it owes a monetary debt to the University and the debt is considered delinquent by the crediting University department.
4. The Dean of Students retains discretion to revoke or deny registration of Student Organizations under disciplinary action; groups disciplined by their governing body; or groups that attempt to register under a different name to circumvent University policy or a disciplinary sanction.
5. A Student Organization may be subject to discipline by the University under subchapters 6-400 and 6–500 for violating a Regents' Rule, University of Texas System policy, or University policy, including, but not limited to, this Chapter.

Subchapter 6–400. Student Organization Discipline

Sec. 6–401. Administration and Jurisdiction

1. The Dean of Students has primary authority and responsibility for the administration of the University process for Student Organizations alleged to have engaged in conduct that violates this Chapter. The Dean of Students delegates authority to, and is represented by, Student Conduct and Academic Integrity during the administration of the conduct process.
2. The leadership of a Student Organization is provided a copy of this policy annually in the form of a link on the university catalog (p. 98). Hard copies are available upon request from the Office of the Dean Students. Students who are members of Student Organizations are responsible for reading and abiding by the provisions of this policy.
3. This policy and the student conduct process apply to the conduct of all Student Organizations. Suspended Student Organizations not currently recognized by the University but participating in the provisional return program remain subject to this policy. Individual students who are members of a suspended Student Organization are subject to Chapter 11 of the Institutional Rules as individual students and may be held individually accountable for their behaviors related to the Student Organization. Individuals who are members of a Student Organization may, through their actions, subject the Student Organization to disciplinary action under this policy, whether or not those individuals are also adjudicated under Chapter 11 of the Institutional Rules.
4. This policy applies to behaviors that take place on University property, at University or organization sponsored events whether on or off-campus, and may also apply to other off-campus behaviors when the Dean of Students determines that the off-campus conduct affects a university interest. Off-campus conduct that affects a university interest includes, but is not limited to:
   A. Any situation where it appears that the Student Organization's conduct may present a danger or threat to the health or safety of individuals;
   B. Any situation that significantly impinges upon the rights, property or achievements of others or significantly breaches the peace and/or causes social disorder; or
   C. Any situation that is detrimental to the educational mission and/or interests of the University.
5. This policy applies to behavior conducted electronically, including, but not limited to email, blogs, web postings, chats, social networking sites, and electronic applications, when the behavior falls within the scope of behaviors described in Section 6-401(4).
6. Student Organizations may be held accountable for the misconduct of their guests, regardless of their affiliation to the University. Visitors to and guests of the University may seek resolution of violations of this policy committed against them by a Student Organization and/or members of a Student Organization.
7. While there is no time limit on reporting violations of this policy, the University encourages individuals to submit reports of alleged violations in a timely fashion.
8. Anonymous complaints are permitted.
9. University disciplinary action will be based upon the "Preponderance of Evidence" standard. This standard is satisfied if the alleged violation is deemed more likely to have occurred than not. If an alternative set of facts is deemed by a Hearing Officer or Student Conduct and Academic Integrity to be equally plausible to the set of facts that results in a finding of a violation, the standard is not met.
10. Notification of conduct proceedings, including but not limited to notice of allegations, interim action, meeting requests, hearings, and resolution, shall be sent by the Student Conduct to the Student Organization by letter or by e-mail, using the addresses on file with the Office of the Registrar or provided by the Student Organization per Sec. 6-302(a)(2).
    A. A letter or email sent to an address listed in the registrar's records or provided per Sec. 6-302(a)(2) will constitute full and adequate notice.
    B. The Student Organization's failure to provide and/or maintain current addresses, refusal to accept delivery of a letter, or failure to open an electronic message will not absolve the Student Organization from the requirements or directives contained therein. Policies on the use of e-mail for official correspondence are provided in Appendix M (p. 156).
11. Allegations of organizational conduct that is prohibited by HOP 3-3031 will be adjudicated in accordance with that policy. Incidents that indicate possible violations of this Chapter and the University Handbook of Operating Procedures 3-3020 ("HOP 3-3020") may be investigated jointly or concurrently by Student Conduct and the Department of Investigation and Adjudication ("DIA"), and the investigatory work produced as a result of the investigations may be shared between the two offices.
    A. In instances where an investigation by Student Conduct results in a finding of a violation of this Chapter, Student Conduct may consider a joint or concurrent finding of a violation of HOP 3-3020 as an aggravating factor in assessing appropriate sanctions.

Sec. 6-402 Other General Definitions

1. In this Chapter, unless the context requires a different meaning, the following definitions apply.
    a. "Administrative Disposition" means a written statement of the alleged conduct, institutional rule(s) implicated, investigative findings, assessed sanction(s), and resolution options, that is issued to a Student Organization as part of a Case Resolution Form.
    b. "Advisor" means a single individual who may accompany a Student Organization to a meeting with the Student Conduct or

a hearing regarding an alleged violation of University policy. An Advisor may confer with and advise the Student Organization but may not advocate for the Student Organization in a meeting with the Student Conduct or in a hearing or directly address the Student Conduct Panel or Hearing Officer. An Advisor cannot be an individual alleged to be involved in the same disciplinary matter as the Student Organization. An advisor cannot serve as a witness for the Student Organization. If an Advisor is directly related to a conduct case or if the advisor's presence poses a conflict of interest, the Student Conduct or Hearing Officer, may dismiss the advisor from the meeting or hearing. Advisors may be dismissed from any meeting, hearing, or conduct proceeding if they disrupt the process. A Sponsored Student Organization must use their Sponsored Student Organization Advisor or a University staff or faculty member from the sponsoring Academic or Administrative Unit as their Advisor

c. "Appellate Officer" means a person designated by the President to evaluate appeals and issue appellate decisions in Student Organization conduct matters.

d. "Case Resolution Form" means a form issued to a student found to have engaged in a violation of this Chapter, and which includes the Administrative Disposition and the available resolution options.

e. "Disciplinary Decision" – A written decision issued the Dean of Students following a conduct hearing that communicates whether a Student Organization is responsible or not responsible for a violation of this Chapter. The Disciplinary Decision includes the findings of fact in support of the decision along with the assessed sanction(s), if applicable.

f. "Disciplinary Record" means an administrative record maintained by Student Conduct in connection with a Student Organization's violation or alleged violation of university policy. The disciplinary record may include complaints, notices, hearing records, disciplinary decisions, and other documents required under this Chapter or deemed relevant by the Student Conduct.

g. "Executive Director" means the Executive Director for Student Conduct and Academic Integrity in the Office of the Dean of Students or their delegate.

h. "Hearing" means a formal proceeding in which a Student Organization, accused of violating university policy as defined in this Chapter and facing either suspension or expulsion, may present their case to a Hearing Officer. A Student Organization's meeting with a Student Conduct staff member shall not be classified as a 'Hearing' for the purposes of this Chapter.

i. "Hearing Officer" means a staff or faculty member appointed by the President of the University to conduct hearings of alleged violations of policy.

j. "Interim Action" means an action taken by Student Conduct against a Student Organization while Student Conduct is assessing an alleged violation of university policy by the Student Organization. Actions include but are not limited to suspension, suspension of rights or privileges, or a prohibition from activities or operations.

k. "President" means the president of The University of Texas at Austin or the President's delegate.

l. "Referral" means a report received by Student Conduct alleging conduct that may violate this Chapter.

m. "Responsibility Decision" - A written determination issued by a Hearing Officer following a conduct hearing, reflecting the Hearing Officer's determination on whether a student is responsible for a violation of this Chapter. This determination includes findings of fact and is submitted to the Dean of Students to make a Disciplinary Decision, including the assessment of sanctions, if applicable.

n. "Sanction" means an official action by the University against a Student Organization found responsible for violating this Chapter. Sanctions include all items listed in Section 6-510 of this Chapter.

o. "Student Conduct" means Student Conduct and Academic Integrity in the Office of the Dean of Students or its delegate.

p. "University Investigation" means a process used to adjudicate allegations of Prohibited Conduct pursuant to Section 6-507 of this Chapter.

Sec. 6-404 Prohibited Conduct of Student Organizations

F. The Student Conduct may initiate disciplinary proceedings under subchapter 6–500 against a Student Organization suspected of engaging in or attempting to engage in any of the following activities:

A. **Local, State, or Federal Law Violations** – any behavior that may violate any federal, state, or local law, ordinance, or regulation;

B. **Weapons –** possesses, uses, or displays firearms, facsimile firearms, ammunition, explosives, or other items that could be used as weapons, including but not limited to sticks, poles, clubs, swords, shields, body-armor or make shift body-armor, masks, helmets and other garments, such as sporting protective gear, that alone or in combination could be reasonably construed as weapons or body-armor on property owned or controlled by the University, without written permission from the Dean of Students, unless authorized by federal, state or local laws; or, violates Policy 8-1060, Campus Carry, of the Handbook of Operating Procedures;

C. **Dangerous Materials** – unauthorized use or attempted use of a hazardous substance (chemicals, fireworks, explosives, etc.) with the intent to cause harm, threat, or fear;

D. **Threatening or Endangering Behavior –** any behavior that threatens or endangers the health or safety of any student, employee, or visitor to the University;

E. **Theft –** use, possession, taking, or removal of property, services, or resources of others without permission or authorization;

F. **Hazing or Hazing Activity** – any intentional, knowing, or reckless act, occurring on or off of the campus of an educational institution, by one person alone or acting with others, directed against a person, for the purpose of pledging, joining, being initiated into, affiliating with, holding office in, or maintaining membership in any organization, and for which consent may not serve as a defense . Hazing includes but is not limited to:

i. any type of physical brutality, such as whipping, beating, striking, branding, electric shocking, placing of a harmful substance in or on the body, or similar activity;

ii. any type of physical activity that involves or results in sleep deprivation, exposure to the elements, confinement in a small space, calisthenics, or other activity that subjects the person to an unreasonable risk of harm or that adversely affects the mental or physical health or safety of the person;

iii. any activity involving consumption of a food, liquid, alcoholic beverage, liquor, drug, or other substance, in addition to those described by Paragraph D, that subjects the person to an unreasonable risk of harm or that adversely affects the mental or physical health or safety of the person;

iv. any activity that involves coercing, as defined by Section 1.07 Penal Code, a student to consume a drug or an alcoholic beverage or liquor in any amount.

v. any activity that induces, causes, or requires the person to perform a duty or task that involves a violation of the Penal

Code. See Texas Education Code, Section 37.151(6) for more information.

G. **Alcohol Misconduct**
   i. engages in unauthorized use, possession, sale, distribution, or consumption of alcoholic beverages on or in university property, including but not limited to a classroom, laboratory, auditorium, office, athletic facility, or residence hall;
   ii. engages in the improper use, possession, sale, distribution, or consumption of alcoholic beverages, including but not limited to underage possession of alcohol, underage consumption of alcohol, providing alcohol to a minor, public intoxication, minor driving under the influence of alcohol, or driving while intoxicated;

H. **Drugs**
   i. engages in the unauthorized use or possession of a drug, or possession of drug paraphernalia;
   ii. engages in the unauthorized sale or distribution of a drug;

I. **Property**
   i. **Unauthorized Use** – engages in unauthorized use of property, keys, equipment, resources, supplies, buildings, or facilities owned or controlled by the University or The University of Texas System;
   ii. **Unauthorized Entry** – engages in unauthorized entry into property, buildings, structures, or facilities owned or controlled by the University or The University of Texas System;
   iii. **Damage** – damages, defaces, destroys, or tampers with property of the University, property belonging to any student or employee of the University, or property of a visitor to the University;
   iv. **Water and Fountains** – enters, remains, or is in the water of any fountain or other artificial body of water on the university campus that is not designed and maintained for recreational or therapeutic purposes; dumps, throws, places, or causes to be placed any material, object, trash, person, animal, waste, or debris in the water of any fountain or other artificial body of water located on the university campus;

J. **Technology Misuse**
   i. engages in unauthorized use of an information technology resource owned or controlled by the University or The University of Texas System;
   ii. engages in unauthorized access or entry into a computer, computer system, network, database, software, or data;
   iii. engages in unauthorized downloading, copying, or distribution of computer software or data;

K. **Stalking –** a course of conduct directed at a specific person that would cause a reasonable person to fear for the person's safety or the safety of others or would cause that person to suffer substantial emotional distress. (Please note that Stalking here in 11-402(a)(14) is separate from the gender or sex-based stalking rule included in HOP 3-3031.)
   i. A "course of conduct" means two or more acts, including, but not limited to, acts in which a person directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveils, threatens or communicates to or about a person or interferes with a person's property.
   ii. "Reasonable person" means a hypothetical person of average caution and prudence under similar circumstances to the complainant.
   iii. "Substantial emotional distress" means significant mental suffering or anguish that disrupts or impairs usual functioning. It may, but does not necessarily, require medical or other professional treatment or counseling.

L. **False and Misleading Information**
   i. engages in the falsification of academic records, including but not limited to altering or assisting in the alteration of any official record of the University or The University of Texas System and submitting false information or omitting requested information that is required for or related to any academic record of the University or The University of Texas System. Academic records include, but are not limited to, applications for admission, the awarding of a degree, registration materials, grade change forms, and reporting forms used by the Office of the Registrar;
   ii. furnishes false information to or withholds material information from any university official, Faculty Member, or staff member acting in the course of their duties;
   iii. alters or assists in the alteration of any official nonacademic record or document, including parking permits and athletic tickets, of any university office or of The University of Texas System.

M. **Unauthorized Surveillance or Distribution**
   i. engages in surveillance or recording of any type without the consent of the person or persons being surveilled or recorded in areas where there is a reasonable expectation of privacy;
   ii. engages in broadcasting or distribution, without the consent of all involved parties, of a recording or other surveilled material, that meets the definition of Unauthorized Surveillance in Sec. 11-402(a)(17)(A).

N. **Disruptive Conduct**
   i. engages in conduct that interferes with or disrupts any teaching, research, administrative, disciplinary, public service, learning, or other authorized activity;
   ii. engages in promoting or inciting conduct that interferes with or disrupts any teaching, research, administrative, disciplinary, public service, learning, or other authorized activity;

O. **Failure to Comply**
   i. failure to comply with the directions of any university official(s) acting in the performance of their duties, and who has the authorization to issue such directives;
   ii. failure to identify oneself to a university official(s) when requested to do so;
      1. A person identifies themself by giving their name and complete address, substantiated by a current driver's license, voter registration card, or other official documentation, and by stating truthfully whether or not they are a student or employee of the University.
   iii. failure to comply with rules, regulations, procedures, policies, standards of conduct, or any other directive of the University, including but not limited to schools, colleges, departments, or labs;

P. **Targeted Residential Disturbance -** engages in conduct that violates federal or state law, or city ordinance, either individually or in concert with others , and in close proximity to a University employee's residence, that intimidates the employee or otherwise diminishes the employee's or their fellow residents' ability to maintain the peaceful enjoyment of their home.

Q. **Violent Conduct –** any conduct that physically harms or injures another person;

R. **Animal Cruelty** – any conduct with an animal that may violate any provision of federal, state, or local laws;
   i. Intentionally, knowingly, or recklessly torturing or in a cruel manner killing or causing serious bodily injury to an animal;
   ii. Failing to provide proper care for an animal in a person's custody, including but not limited to failing to provide necessary food or water, unreasonably abandoning an animal, or transporting or confining an animal in a cruel manner;

iii. any other conduct with an animal that may violate any provision of federal, state, or local laws;
1. Conduct occurring solely for the purpose of or in support of fishing, hunting, or trapping; or wildlife management, wildlife or depredation control, or shooting preserve practices as regulated by state and federal law; or animal husbandry or agriculture practice involving livestock animals shall not be interpreted as a violation of this rule.

S. **University System Violations –** any conduct that violates any provision of the Regents' *Rules and Regulations* of The University of Texas System;

T. **Retaliation** – any action taken to materially and adversely affect the terms or conditions of an individual's academic experience or employment with the University, or other institutional status of a student, employee, university affiliate, visitor, or applicant for admission to or employment with the University, because an individual has, in good faith:
i. reported or intends to make a report under university policies or rules;
ii. opposed an unlawful practice;
iii. participated in an investigation or conduct proceeding; or,
iv. requested supportive or protective measures;

U. **Aiding in Academic Misconduct** - the Student Organization aids, encourages, organizes, approves or otherwise participates in behaviors that would constitute collusion, plagiarism, misrepresentation (e.g. having another Student Organization member check into a class or take an exam) and/or other forms of Academic Misconduct. Evidence of a violation of this policy must demonstrate systemic participation and/or knowledge of misconduct beyond 1-2 Student Organization members participating in the violation.

V. **Institutional Rules Violations** – any conduct that violates any provision or rule defined in other chapters of the *Institutional Rules on Student Services and Activities.*

Subchapter 6–500. Disciplinary Procedures

Sec. 6–501. Notice and Initiation of Disciplinary Proceeding

1. Allegations of Prohibited Conduct committed by Student Organizations shall be referred to the Student Conduct for a determination of responsibility and, if applicable, assessment of sanctions(s), in accordance with the procedures detailed in this Chapter.
   A. In accordance with Sec. 10-202(a)(3), Academic and Administrative Units possess the authority to establish and enforce administrative policies regarding access to and the use of building space; however, those units shall not engage in further action related to the Student Organizations. If there are issues regarding other possible policy and rule violations, the Academic and Administrative Units should refer those to the Student Conduct for processing in accordance with this Chapter's procedures.
2. A Student Organization engages in Prohibited Conduct when:
   A. one or more of its Officers acting in the scope of their organizational capacities engages in Prohibited Conduct;
   B. one or more of its members engages in Prohibited Conduct and the action that constitutes Prohibited Conduct was approved by majority vote of those members of the Student Organization present and voting;
   C. one or more members of a committee of the Student Organization engages in Prohibited Conduct while acting in the scope of the committee's assignment;
   D. a member of the Student Organization engages in Prohibited Conduct while acting with apparent authority of the Student Organization;
   E. the Student Organization, its officers, or a cohort of its members, engage in orchestrated conduct to permit, encourage, aid, or assist any of its members in engaging in Prohibited Conduct;
   F. the Student Organization, its officers, or a cohort of its members, under circumstances where such persons knew or should have known that orchestrated conduct constituting Prohibited Conduct was occurring or about to occur, and fails to take steps to stop the conduct; or
   G. the Student Organization, its officers, or a cohort of its members engage in orchestrated conduct to prevent the appropriate university or civil authorities from investigating alleged conduct.
3. When the Student Conduct receives notice that a Student Organization has allegedly engaged in Prohibited Conduct under Section 6-404, the alleged violation will be preliminarily investigated. Upon completing the preliminary investigation, the Dean of Students may:
   A. dismiss the allegation if there is insufficient evidence to proceed with an investigation, and/or the information collected, even if true, would not constitute Prohibited Conduct; or
   B. pursue the appropriate resolution option as outlined in Section 6-503.
4. Dismissal at this stage is not a determination of responsibility. The Dean of Students may reopen a matter dismissed at this stage and proceed to resolution pursuant to Section 6-503 if it receives additional information that supports such a determination.
5. If the Dean of Students determines that there are reasonable grounds for proceeding with the disciplinary process, the Dean of Students will identify the appropriate resolution option as outlined in section 6-503.
6. If an organization chooses to self-report Prohibited Conduct, the Dean of Students may, in its sole discretion, only investigate the individual(s) implicated in the report.
   A. If information is uncovered in the investigation that suggests that the Student Organization aided, encouraged, sanctioned or organized the Prohibited Conduct, the Dean of Students may initiate an investigation of the Student Organization as outlined in Sec. 6-507.

Section 6-502. Interim Actions

1. Pending an investigation, hearing, or outcome of the allegations against a Student Organization, the Executive Director or the President may take immediate action, as is appropriate to the circumstances, against a Student Organization that is alleged to have engaged in Prohibited Conduct, when, in the opinion of the official, the interest of the University or The University of Texas System would be served by interim action.
2. Student Organizations seeking a review of an interim action must submit a written request for an administrative review to the Dean of Students.
   A. This administrative review will occur within two (2) business days of the Dean of Student's receipt of the request unless the Dean of Students, in their discretion, determines that additional time is needed to conduct the review.
   B. Notice will be sent to the Student Organization if the Dean of Students extends the time for review beyond the initial five day period.
   C. This administrative review is not a hearing on the merits of the underlying allegations, but is merely a review to determine what, if any, interim actions are appropriate. The review may lead to a continuance, revocation, and/or modification of the interim actions, including modifications that may be more restrictive than the initial actions. The Dean of Students will notify the Student Organization officers of the outcome of the review

in writing within three (3) days of the review meeting. This notification will include the decision and the rationale for that decision.

3. If the University Investigation lasts beyond 30 days (as outlined below, beginning from the date of the Preliminary Conference), the Student Organization may request another review of the interim action(s), which will be handled similarly to the initial request for review as outlined above.

Sec. 6-503. Resolution Options

1. Allegations that a Student Organization has engaged in Prohibited Conduct may be resolved pursuant to one of four available processes:
   A. Prescribed Resolution (Tier 1) pursuant to Section 6-504;
   B. Partnership Process Resolution (Tier 2) pursuant to Section 6-506;
   C. University Investigation (Tier 3) pursuant to Section 6-507;
   D. A Mutual Resolution Agreement pursuant to Section 6-509.
2. The University will develop, publish and regularly update a Violation Rubric to use in determining which resolution option may be available to a Student Organization to resolve allegations that it engaged in Prohibited Conduct. The Violation Rubric provides a recommendation for an appropriate resolution option that is based on the following criteria:
   A. the severity of the alleged violations
   B. the allegation of physical, sexual or other forms of violence
   C. the risk of harm to other persons
   D. the conduct history of the Student Organization
   E. the current status of the Student Organization; and
   F. other relevant factors.
3. Upon notice of a potential violation, Student Conduct will use the Violation Rubric to assess the allegations and determine which resolution options may be made available to address the allegations of Prohibited Conduct. The recommendation provided by the Violation Rubric is not binding upon the Student Conduct, and Student Conduct reserves the right, at any time during the resolution process, to require the allegations of Prohibited Conduct be resolved through a higher tier resolution process. The Student Organization may, in all cases, elect to resolve the allegations through a University Investigation.
4. At any time, the University may offer to the organization the opportunity to resolve the matter through a Mutual Resolution Agreement as outlined in Sec. 6-509.

Sec. 6-504. Prescribed Resolution Process

1. The Prescribed Resolution Process permits the Student Conduct and the Student Organization to resolve allegations of Prohibited Conduct without engaging in a formal investigation. In these cases, Student Conduct may determine that the preponderance of the evidence supports a conclusion that the Prohibited Conduct occurred without further investigation or meeting with the Student Organization's representative and send an outcomes letter to the Student Organization's Officer(s) outlining the finding, the sanctions, and the rationale for both.
2. Upon receipt of this letter, the Student Organization may do one of the following:
   A. Accept the finding and sanctions
      i. If the Student Organization follows the directives outlined in the outcomes letter, the matter will be considered closed once the sanctions are completed. Failure to complete the sanctions may result in Student Conduct opening an additional disciplinary action; or
   B. Accept the finding, but appeal the assessed sanctions with a written appeal to an Appellate Officer; or
   C. Decline to accept the findings and sanctions
      i. The Student Organization may reject the findings, and the matter will be resolved through a University Investigation as described in Sec. 6-507.
3. The Student Organization must notify Student Conduct of their choice from the above within three (3) business days of receipt of the letter.
4. If the Student Organization does not respond to the letter, the findings and sanctions assessed by Student Conduct will be formally adopted and the Student Organization must comply with the assessed sanctions.

Sec. 6-505. Organizational Response

1. In instances in which allegations of Prohibited Conduct will be resolved through the Partnership Process or a University Investigation, Student Conduct will provide the organization with notice of the charges and an opportunity for the Student Organization Officer(s), the Student Organization Advisor(s), and the Student Organization's inter/national governing body (if applicable) to respond. This opportunity may be provided during an in-person conference or via email and will include information regarding the nature of the allegations, the rights and responsibilities of the Student Organization, the resolution options available to the Student Organization, and the specific steps involved in the different resolution options.
2. If the Student Organization fails provide a response, whether offered in-person or via email, Student Conduct will pursue the allegations using the University Investigation process described in Section 6-507.

Sec. 6-506 - Partnership Process

1. The Partnership Process permits the Student Organization to conduct an internal investigation subject to oversight and approval of the Student. Student Conduct may also conduct a concurrent investigation as described in Sec. 6-507.
2. If the organization agrees to the Partnership Process, Student Conduct will, in consultation with the Student Organization Officer(s), Advisor, and other appropriate parties, develop an investigation scope and timeline.
3. The Student Organization must conduct an investigation and submit a written report within the agreed-upon timeline, or as otherwise specified by Student Conduct. The report should be detailed, including the names of specific individuals involved in the alleged violation, and any internal disciplinary action the Student Organization implemented for those individuals.
4. Student Conduct will review the Student Organization's investigation report and will make one of the following determinations:
   A. Student Conduct agrees that the report is complete and may schedule a Partnership Process Resolution Meeting to discuss the report and findings and review next steps;
   B. Student Conduct determines that the report is insufficient, incomplete, or inconsistent with the university's investigation, if applicable, and provides feedback and instruction for further investigation to the Student Organization; or
   C. Student Conduct determines that the Student Organization has intentionally provided inaccurate or incomplete information, obstructed the process, is non-compliant, is uncooperative, or is unable to complete the investigation and report in a satisfactory manner. Student Conduct will then determine whether to move forward with investigation and adjudication of the allegations as described in Sec. 6-507.

5. Once Student Conduct has determined that the report is complete, Student Conduct will communicate with the Student Organization's Officer(s), Advisor, and other parties as appropriate, and one of the following determinations will be made:
6. **No Policy Violation:** If Student Conduct determines that the Student Organization report indicates that no policies were violated by the Student Organization the process concludes.
7. **Policy Violation(s)**: If Student Conduct determines that the Student Organization report indicates that the Student Organization was responsible for some or all policy violation(s) that were alleged, Student Conduct will issues and Administrative Disposition formally outlining the violation(s) and the proposed sanction(s).
8. Following the presentation of an Administrative Disposition, the Student Organization may choose to:
   a. Accept the finding and assessed sanctions;
   b. Accept the finding, but appeal the assessed sanctions with a written appeal to an Appellate Officer; or,
   c. Contest the finding in a hearing if the sanction proposed by Student Conduct included Suspension or Expulsion.
   d. If the assessed sanctions do not include Suspension or Expulsion, the Student Organization may contest the finding with a written appeal to an Appellate Officer.

When issued an Administrative Disposition, the Student Organization must communicate its choice to Student Conduct in no more than five (5) business days.

9. If the Student Organization does not respond to the Administrative Disposition, the findings and sanctions assessed by Student Conduct will be formally adopted and the Student Organization must comply with the assessed sanctions.

Sec. 6–507. University Investigation

1. Student Conduct or the Student Organization may elect to resolve any allegations of Prohibited Conduct through a University Investigation.
2. An investigation is an administrative process by which Student Conduct gathers information related to the alleged Prohibited Conduct. The investigation may include but is not limited to, meeting with Officer(s) and members of the accused Student Organization; requesting documents from the Student Organization; reviewing organizational records; reviewing information received by off-campus persons or organizations, including law enforcement; reviewing information received by an academic or administrative unit; and calling witnesses.
3. Student Organizations that fail to respond to meeting requests from Student Conduct may be subject to interim action as described in subsection 6-502.
4. At the completion of the investigation, Student Conduct will provide a written draft investigation report to the Student Organization for review and comment. Student Conduct will make the final determination of the relevance of any information gathered during the investigation.
5. The Student Organization must provide any comments related to the investigation report in writing to Student Conduct within five (5) business days of the receipt of the report.
6. At the completion of the investigation, if no policy violation has been found Student Conduct will provide a copy of the final report and the determination to the Student Organization. Student Conduct may choose to meet with the Student Organization's Officer(s) to discuss the findings of the report and ongoing behavioral expectations.
7. the completion of the investigation, if there is sufficient evidence to issue a finding of responsibility for violation of policy, Student Conduct will issue an Administrative Disposition, including a determination of responsibility and related sanction(s).
8. At the completion of the investigation, if there is sufficient evidence to issue a finding of responsibility for violation of policy, Student Conduct will issue an Administrative Disposition, including a determination of responsibility and related sanction(s).
9. Following the presentation of an Administrative Disposition, the Student Organization may choose to:
   A. Accept the finding and assessed sanctions;
   B. Accept the finding, but appeal the assessed sanctions with a written appeal to an Appellate Officer; or,
   C. Contest the finding in a hearing if the sanction proposed by Student Conduct included Suspension or Expulsion.
   D. If the assessed sanctions do not include Suspension or Expulsion, the Student Organization may contest the finding with a written appeal to an Appellate Officer.
10. The Student Organization must make their selection and notify Student Conduct of their choice in no more than five (5) business days.
11. If the Student Organization does not respond to the Administrative Disposition, the findings and sanctions assessed by Student Conduct will be formally adopted and the Student Organization must comply with the assessed sanctions.

Sec. 6-508. Formal Hearing

1. If hearing-eligible, the Student Organization may have the case adjudicated by a Hearing Officer.
2. Student Conduct will give notice, per Sec. 6-401(k), to the Student Organization's Officer(s) at least five (5) days before the hearing date.
3. The notice will:
   A. state the date, time, and location of the hearing;
   B. inform the Student Organization Officer(s) of their rights as outlined in this section.
4. Student Conduct will establish hearing procedure and share that procedure with the student organization in advance of the hearing. Hearing procedures are posted on Student Conduct website.
5. The Student Organization may bring an Advisor of their choosing to the hearing. The Advisor may not speak on behalf of the Student Organization, question witnesses, or actively participate in the hearing other than to advise the Student Organization Officer(s). In accordance with Sec. 6-402(2), a Sponsored Student Organization must use their Sponsored Student Organization Advisor or a university staff or faculty member from the sponsoring Academic or Administrative Unit as their disciplinary proceeding Advisor.
6. The Hearing Officer will render a written Responsibility Decision that includes whether the Student Organization is believed to be responsible for a violation of policy and the facts in support of the finding. The Responsibility Decision will be submitted to the Dean of Students for sanctioning. The Hearing Officer shall complete the written Responsibility Decision within five (5) days of the hearing. If the Hearing Officer is unable to issue the written Responsibility Decision within five days, they shall provide notice of the delay to the student, Student Conduct, and the Dean of Students. Student Conduct will establish the new deadline for submission of the decision.
7. In cases involving allegations of crimes of violence, as defined in the Family Educational Rights and Privacy Act (FERPA) and other applicable law, Student Conduct shall notify the alleged victim(s) of the final outcome.

Sec. 6-509. Mutual Resolution Agreement

1. At any point during the conduct process, the Student Organization may submit a request to Student Conduct to enter into a Mutual

Resolution Agreement. A Mutual Resolution Agreement is a collaboration between Student Conduct and the Student Organization to resolve the disciplinary matter in a way that eliminates the behavior(s) and prevents its recurrence, within the practice and culture of the organization. Student Conduct may continue pursuing an investigation even if a Student Organization requests to enter into a Mutual Resolution Agreement. A Mutual Resolution Agreement is not a finding of responsibility, nor does it absolve the Student Organization of responsibility for any alleged violations. Rather, it is an opportunity to resolve an allegation of misconduct through a set of agreed-upon terms designed to improve the Student Organization's culture.

2. The result of this resolution process is an agreement between the Student Organization and the university intended to restructure and rehabilitate the conduct and practices of the Student Organization through the completion of specified terms and conditions, which may include the development of Sanctions as outlined in Sec. 6-510.
3. This agreement will last for a specified period of time, during which the Student Organization will be granted conditional registration. This conditional registration may be terminated if the organization is found in violation of any university policies as outlined in the Institutional Rules, or if the organization fails to comply with the terms and conditions of the agreement.

Sec. 6–510. Sanctions

1. At the conclusion of the conduct process, sanctions will be imposed for any Student Organization that has engaged in Prohibited Conduct. The Sanctions may include Status Sanctions, Educational Sanctions, and/or Structural Sanctions as described below.
2. The Sanctions may be assessed individually, in combination, or to follow consecutively**.**
3. Record of the finding of a violation shall be maintained by Student Conduct for a period of no less than seven (7) years. If a Student Organization loses campus recognition, Student Conduct will maintain the Sanctions Letter indefinitely. If applicable, a copy of the case resolution may be sent to their Inter/National Organizational Governing Body or other appropriate parties.
4. Student Conduct and/or the appropriate university department will oversee the completion of sanction(s). If the student organization misses any deadlines, fails to complete any sanction(s), and/or has a subsequent violation(s), the Student Organization may be subject to additional sanction(s) and/or disciplinary actions at the discretion of the Student Conduct.
5. **Status Sanctions -** Pursuant to section 6–501, the following status sanctions may be assigned to a Student Organization for violation of a *Regents' Rule*, university regulation, or administrative rule:
   A. "Written Warning" means that the Student Organization's Officer(s) have been notified that the organization has engaged in behavior that violated a rule or regulation of The University of Texas System or the University. Student Conduct or the Dean of Students may impose conditions related to the violation to address the behavior that led to the violation. Further violations may result in a minimum of probation for the organization.
   B. "Probation" means a specified period of time during which the Student Organization is required to comply with specified terms and conditions to address the behavior that led to the violation. During this specified period of time, Student Conduct or the Dean of Students may restrict one or more of the organization's privileges, as listed in Section 6-300.
   C. "Deferred Suspension" means that the conduct of the Student Organization could have resulted in suspension, but the suspension is deferred for a period of observation and review. During the period of deferred suspension, Student Conduct or the Dean of Students may restrict one or more of the organization's privileges, as listed in Section 6-300.
   D. "Suspension" means a specified period of time during which the Student Organization is prohibited from utilizing specified privileges, as listed in Section 6-300, and is required to comply with specified terms and conditions to address the behavior that led to the violation.
   E. "Expulsion" means a permanent separation from the University and prohibits the Student Organization from university recognition. This status results in the automatic loss of all rights and privileges associated with university recognition. Formerly referred to as Cancellation.
6. A Student Organization placed on Suspension or Expulsion is prohibited from sponsoring, co-sponsoring, or participating in any and all social, intramural, athletic, or other similar activities on campus. Suspension or Expulsion may also include the forfeiture of other specifically listed privileges. Suspension should be for a specific and determined time period, and will include a written return agreement outlining specific conditions for return. The Suspension may be delayed or extended at the discretion of Student Conduct or the Dean of Students based on ongoing activity during a period of suspension.
7. If the Student Organization dissolves or loses recognition, as a result of organizational conduct, and then attempts to seek recognition under the guise of a different organizational name, the University reserves the right to deny the request for recognition or withdraw the recognition. This conclusion may be based on multiple factors, including but not limited to, overlapping membership, similarity of purpose, and the timing of the dissolution or prior loss of recognition and the request for new recognition.
8. **Educational Sanctions -** Educational Sanctions may include, but are not limited to, educational programming, community service, interventions, restorative practice, or workshops determined to help develop the culture and community of the Student Organization.
9. **Structural Sanctions -** Structural Sanctions are related to the structure, membership, or governance of the organization. Structural sanctions, developed in collaboration with the inter/national organizational governing body (if applicable), may include, but are not limited to, changes to organizational operating procedures, a review of organization membership/leadership, an external review of the organization, and changes to organization advisor support.

Sec. 6–511. Appeals

1. The Student Organization may appeal the finding of responsibility or sanction(s) issued as a result of an Administrative Disposition or the Dean of Student's Disciplinary Decision.
2. Requests for appeals must be submitted in writing to Student Conduct within five (5) days from the date on which the Student Organization signed the Administrative Disposition or within five (5) business days of receipt of Disciplinary Decision from the Dean of Students. The request for appeal must state the ground(s) for appeal and include the Student Organization's argument in support of appeal.
3. The Student Organization may appeal based on one or more of the following limited grounds:
   A. A procedural error or omission occurred that significantly impacted the outcome of the hearing.
   B. New Evidence: New evidence is information that was unknown or unavailable during the original hearing or investigation that could substantially impact the original finding or sanction. A summary of this new evidence, how it was previously unknown or unavailable, and its potential impact must be included.
      i. If a person or Student Organization Officer refused to testify or participate in the investigation and now wishes to submit

their testimony as new evidence at the appellate level, that testimony will not be considered "new evidence" under this ground.

C. Disproportionate Sanction(s): The Sanctions(s) imposed is significantly disproportionate the violation(s), or are of such nature that the Student Organization could not reasonably complete them within the allotted timeframe.

4. An Appellate Officer will review the request for appeal to determine if the request states one or more of the permissible grounds for appeal. If the request for appeal states one or more of the permissible grounds for appeal, the Appellate Officer will consider the appeal on its merits.
5. The burden is on the appealing party to show that the grounds for an appeal are met using the preponderance of the evidence standard.
6. If there is a challenge to any member of the process (e.g., a challenge of bias by an investigator or Hearing Officer), Student Conduct may share all or part of the appeal with the challenged party to allow them to respond. The response must be provided to Student Conduct within five (5) business days of receipt of the notice of the request for appeal. The Appellate Officer serving in the reviewer role will issue their decision to allow the appeal to proceed in whole or in part or to deny the appeal within five (5) days of receipt of all information and responses.
7. The Appellate Officer will issue their decision within five (5) days of receipt of all information and responses. In instances where the Appellate Officer needs additional time, the Appellate Officer will notify the Student Organization's Officer(s) within the allotted time for issuing a decision.
8. Appeals are not intended to be full re-hearings of the original allegation(s). Appeals are confined to a review strictly limited to the matters being appealed.
9. When an appeal is granted for the appellant. the Appellate Officer may alter the finding or Sanction or remand the case with recommendations to Student Conduct for reconsideration, rehearing, or further investigation.
10. The decision of the Appellate Officer is final.

Sec. 6-512. Provisional Return.

1. In some circumstances, Student Organizations assigned a sanction of Suspension, or Expulsion for a violation of this Chapter, may petition the University for a provisional early return to campus. This subchapter sets out the standards regarding the application and the eligibility determination to begin the provisional return process.
   A. Criteria – Student Organizations must meet the following criteria to be eligible to begin the early provisional return process:
      i. a Student Organization may petition for a disciplinary review by the Dean of Students after completion of no less than half the term assigned Suspension, or Expulsion;
      ii. the suspended Student Organization has not applied for recognition under this Chapter using a different name; and
      iii. members of the organization at the time of the suspension have not had any documented instances of misconduct during the period of loss of recognition that could be reasonably associated with the Student Organization.
   B. Advisor Designation - An applicant must identify an advisor, who meets the criteria established in Section 6-101(8), who will assist in working through the early provisional return process with the Student Organization and university officials. In the event the applicants cannot identify such an advisor, or if they prefer assistance in selecting one, the Office of the Dean of Students, will assign an advisor. Advisor designations for this subsection must be approved by the Dean of Students.
   C. Eligibility Determination – The Executive Director will assess the application and determine whether or not the organization has met the eligibility requirements. If eligibility criteria are met, the Executive Director will convene a review committee to recommend to the Executive Director whether to uphold the existing sanction or allow the organization to begin the provisional return process. The Executive Director will review the application materials and the recommendation of the committee, to make the determination. An organization may make a request, in writing, for reconsideration of that determination to the Dean of Students. Requests for reconsideration must be made within three business days of the Executive Director's determination. The Dean of Students' determination is final and not appealable.
   D. Approval to begin early provisional return process - If the application is approved, a Student Organization will begin the process prescribed by the Dean of Students and published on the Student Conduct and Academic Integrity website. If a Student Organization fails to meet the requirements of the early provisional return process or has any conduct violations during the period of provisional return, the University may revoke the Student Organization's provisional status.
   E. A Student Organization approved for early provisional return will remain on provisional status until it has completed all requirements of the early provisional return process and the original Suspension, or Expulsion term has been met.
2. In circumstances where a Student Organization has completed its full Suspension or Expulsion term for a violation of this Chapter, the organization may petition the University for a provisional return to campus.
   A. Criteria – Student Organizations must meet the following criteria to be eligible to begin the provisional return process:
      i. a Student Organization may petition for a disciplinary review by the Dean of Students after completing the term assigned for Suspension, or Expulsion;
      ii. the suspended Student Organization has not applied for recognition under this Chapter using a different name; and
      iii. members of the organization at the time of the Suspension or Expulsion have not had any documented instances of misconduct during the period of loss of recognition that could be reasonably associated with the Student Organization.
   B. Advisor Designation. An applicant must identify an advisor, who meets the criteria set at above at 6-101(8), who will assist in working through the early provisional return process with the Student Organization and university officials. In the event the applicants cannot identify such an advisor, or if they prefer assistance in selecting one, the Office of the Dean of Students, will assign an advisor. Advisor designations for this subsection must be approved by the Dean of Students.
   C. Eligibility Determination. The Executive Director of Student Conduct and Academic Integrity, or designee, will assess the application and determine whether or not the organization has met the eligibility requirements. If eligibility criteria are met, the director will convene a review committee to recommend to the Dean of Students whether to uphold the existing sanction or allow the organization to begin the provisional return process. The director will review the application materials and the recommendation of the committee, to make the determination. An organization may make a request, in writing, for reconsideration of that determination to the Dean of Students. Requests for reconsideration must be made within three (3) business days of the director's determination. The Dean of Students' determination is final and not appealable.

D. Approval to begin provisional return process. If the application is approved, a Student Organization will begin the process prescribed by the Dean of Students and published on the Student Conduct and Academic Integrity. If a Student Organization fails to meet the requirements of the provisional return process or has any conduct violations during the period of provisional return, the University may revoke the Student Organization's provisional status. If a Student Organization fails to meet the requirements of the provisional return process or has any conduct violations during the period of provisional return, the University may revoke the Student Organization's provisional status.

E. A Student Organization approved for provisional return will remain on provisional status until they have completed all requirements of the provisional return process.

Relates to *Handbook of Operating Procedures*, 3-3031.
Updated to reflect policy changes effective

Chapter 7. The Department of Recreational Sports

Subchapter 7–100. General Provisions

Sec. 7–101. Purpose

The University of Texas at Austin seeks to promote and conduct officially organized sports activities and athletic recreation programs for the University community. The purposes of these programs are:

a. to provide students at the University with an opportunity for interesting and rewarding sports competition and recreation;

b. to present a varied program of sports and recreational activities so that every student and individual with a Recreational Sports membership has the opportunity to participate regardless of athletic ability.

Sec. 7–102. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Student" means a person currently enrolled at the University.
2. "University" means The University of Texas at Austin.
3. "Executive Director" means the executive director of Recreational Sports.
4. "Department" means Recreational Sports.
5. "President" means the president of The University of Texas at Austin.

Subchapter 7–200. The Recreational Sports Committee

Sec. 7–201. Membership

a. The Recreational Sports Committee has fifteen voting members. They are:
   1. six representatives of the General Faculty, appointed by the president for three-year staggered terms;
   2. two staff members appointed by the president for two-year staggered terms;
   3. two students as designated by the Councils of Recreational Sports and two other students as designated by Student Government, all of whom are representative of the student body;
   4. one staff representative designated by Recreational Sports for a one-year term; and,
   5. two members of the Faculty Council, appointed by the chair of the Faculty Council, for one-year terms.

b. The executive director of Recreational Sports will serve as administrative advisor without vote.

Sec. 7–202. Duties of Committee

The Recreational Sports Committee will:

a. advise on policy for the conduct of the Intramural Sports and Sport Clubs programs;

b. hear appeals of decisions made by the Councils of Recreational Sports; and,

c. advise on other matters pertaining to Recreational Sports and its programs, facilities, and services.

Sec. 7–203. Quorum

A majority of the committee constitutes a quorum and a majority of the quorum rules.

Sec. 7–204. Appellate Jurisdiction

The committee may employ the Sport Club Council or appoint a group of students, student employees or faculty/staff members to hear appeals should the need arise.

Subchapter 7–300. Participation in Recreational Sports Programs

Sec. 7–301. Group Eligibility

a. A group is eligible to participate in Recreational Sports programs if:
   1. its membership is not denied to anyone on any basis prohibited by applicable law, including but not limited to race, color, religion, national origin, gender, age, disability, citizenship, veteran status, sexual orientation, gender identity, or gender expression; and,
   2. it is not under a disciplinary sanction prohibiting participation.

b. The application form for participating in recreational sports will set out the provisions of Sec. 7–301(a)(1). By submitting an application, a group affirms that it is in compliance with the policy against discrimination.

Sec. 7–302. Individual Eligibility

An individual is eligible to participate in recreational sports programs if they are not under disciplinary sanction prohibiting participation and if they meet the requirements of rules governing the specific Recreational Sports program.

Sec. 7–303. Reservation of Recreational Sports Facilities

a. University departments and registered student organizations may request event space reservations at Recreational Sports facilities through the Recreational Sports facility operations office.

b. The provisions of Subchapter 10–200 of the *Institutional Rules* do not apply to the use of recreational sports facilities for athletic purposes.

Subchapter 7–400. Administration of Recreational Sports Programs

Sec. 7–401. The Executive Director of Recreational Sports

a. The executive director:
   1. will establish and maintain effective working relations with other University departments, with faculty and staff members, with students and student groups, and with outside groups and special services that utilize recreational sports facilities and programs;
   2. will formulate, plan, and administer, with the support of the Recreational Sports Committee, the following kinds of programs:
      A. a program of organized intramural competition in various sports;
      B. a recreational program to provide leisure-time activities;
      C. an outdoor recreation program;
      D. competitive, recreational, and instructional programs for students, faculty and staff; and
      E. the University of Texas Sport Club Association.
   3. is responsible for developing program innovations in recreational sports, providing for program expansion, providing for acquisition of additional recreational facilities, and supervising senior staff;

4. is responsible for the maintenance, repair, use, and security of all facilities and equipment used in department programming; and,
5. is responsible for enforcing the eligibility requirements of Subchapter 7–300.

b. The executive director is administratively responsible to and reports to the associate vice president for health and well-being.

Sec. 7–402. The University of Texas Sport Club Association Council

a. The University of Texas Sport Club Association (UTSCA) Council has six members. The members are:
   1. the executive director or the executive director's delegate; and,
   2. five student members, representing the participants in the sport club program.
   3. The executive director or the executive director's delegate will serve as administrative advisor without vote.

b. The council will:
   1. elect a student chair to facilitate the business of the council;
   2. participate in the designation of one student for appointment to the Recreational Sports Committee for a one-year term;
   3. assist the sport club staff in formulating sport club program policies;
   4. hear appeals of decisions of the sport club program administrators; and,
   5. make recommendations on student organizations that have completed the application process for UTSCA membership.

c. A majority of the council constitutes a quorum and a majority of the quorum rules.

Sec. 7–403. The Intramural Sports Council

1. The Intramural Sports Council has ten members. The members are:
   a. the executive director or the executive director's delegate; and,
   b. nine student members, representing the participants in the intramural program.
   c. The executive director or the executive director's delegate will serve as administrative advisor without vote.
2. The council will:
   a. elect a student chair to facilitate the business of the council;
   b. participate in the designation of one student for appointment to the Recreational Sports Committee for a one-year term;
   c. assist the intramural staff in formulating intramural program policies;
   d. rule on protests, individual or group eligibility, and related matters.
3. A majority of the council constitutes a quorum and a majority of the quorum rules.

Subchapter 7–500. Areas of Recreational Sports

Sec. 7–501. The Intramural Sports Program

a. The program of organized student sports competition provides the opportunity for competition among individual students and among teams representing student groups or organizations such as fraternities, clubs, and residences, and/or graduate or undergraduate teams organized solely for the purpose of competing in a tournament or event.

b. The purpose of this program is to provide the opportunity for competition among students and to foster the physical, social, and emotional benefits of participation in sports activities, accompanied by a sense of sportsmanship.

Sec. 7–502. The Informal Recreation Program

a. The Informal Recreation program provides an opportunity for students and Recreational Sports members to participate in unstructured recreational activities when facilities are not scheduled for formal programming.

b. The purpose of the program is to assist the participant in developing beneficial and satisfying leisure-time sports activities.

Sec. 7–503. The Outdoor Recreation Program

a. The Outdoor Recreation program provides equipment rental and supervised trips in a variety of activities such as backpacking, camping, canoeing, kayaking, nature hiking, and rock climbing. Trips are open to currently enrolled students and Recreational Sports members. Equipment rental is available to currently enrolled students and Recreational Sports members.

b. The Outdoor Recreation program provides an indoor climbing wall with 2,600 square feet of climbing surface inside Gregory Gym for the leisure-time use of students and Recreational Sports members.

c. The purpose of the Outdoor Recreation program is to provide an opportunity for students to experience outdoor, wilderness activities in educationally oriented, supervised events.

Sec. 7–504. The Fitness and Wellness Program

a. The Fitness and Wellness program offers group fitness classes, clinics and series, and personal training. It is open to currently enrolled students and Recreational Sports members.

b. The purpose of the program is to provide participants with the opportunity to improve and maintain physical fitness and to engage in leisure-time activities.

Sec. 7–505. The University of Texas Sport Club Association

a. The University of Texas Sport Club Association is composed of sport or physical-activity-related student organizations sponsored by Recreational Sports.

b. The purpose of the University of Texas Sport Club Association is to promote interest in specific sport activities and to provide the opportunity for students to compete among themselves and in extramural competition with students from other colleges and universities, or with other approved sources of competition.

c. The association offers sport club members opportunities for the development of leadership and organizational skills as well as opportunities for social interaction.

d. The University of Texas Sport Club Association operates under the administration of Recreational Sports.

Sec. 7–506. The Instructional Program

a. The Instructional Program provides students, Recreational Sports staff, the campus community, and non-UT community with non-credit educational classes in the areas of safety education, swimming, and sport skills.

b. The purpose of the program is to provide opportunities for participants to learn and enhance skills.

Sec. 7–507. Membership and Guest Services

a. Membership and Guest Services manages recreation facility access systems and provides amenities to students and Recreational Sports members. Access is provided through membership, and amenities include rental lockers and towel service.

b. The purpose of this area is to meet the leisure-time needs of the University community and to create a campus culture of wellness.

Chapter 8. The University Unions

Subchapter 8–100. General Provisions

Sec. 8–101. Purpose

The mission of University Unions is to enhance the student experience and to enrich campus life by providing cultural, educational, social and

recreational programs, as well as related goods and services, to the campus community.

Sec. 8–102. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Board" means the board of directors of University Unions.
2. "Chancellor" means the Office of the Chancellor of The University of Texas System.
3. "Executive director" means the executive director of University Unions.
4. "President" means the chief administrative officer of The University of Texas at Austin.
5. "Student" means a person enrolled in residence at the University.
6. "Unions" means:
   a. the Texas Union; and
   b. the William C. Powers, Jr. Student Activity Center.
7. "Unions-managed facilities" means:
   a. Hogg Memorial Auditorium;
   b. Student Services Building; and,
   c. 2609 University Avenue; and
   d. Levels 1 and 2 of Dobie Twenty21
8. "E+E" means Campus Events and Entertainment.
9. "University" means The University of Texas at Austin.
10. "Vice president" means the vice president for Student Affairs at The University of Texas at Austin.

Subchapter 8–200. The Board of Directors of University Unions

Sec. 8–201. Membership

a. The board has nine voting members. The members are as follows:
   a. Three members of the faculty, appointed by the president for three-year overlapping terms, one to be appointed each year, effective May 1.
   b. Six students, including the Student Government president, the E +E president, and four others as follows:
      i. Two students registered for at least six semester hours during each semester of service, to be selected by the president of Student Government after announcement of the position opening in the Daily Texan and other appropriate media. Appointments will be ratified by a majority vote of the Student Government Assembly and will become effective May 1, for two-year overlapping terms. Should a vacancy occur during a term, (i) the Student Government president will appoint a new member who will receive proper approval of the Student Assembly before taking a seat on the board; (ii) the new member will become a full voting member of the board immediately.
      ii. Two students registered for at least six semester hours during each semester of service, to be elected for one-year terms by the student body during Student Government elections each year. Should a vacancy occur during a term, the chair of the University Unions board of directors will nominate another student who must receive a majority vote of the board. A quorum must be present to approve a new member.
b. The executive director and an appointee of the vice president are members of the board without a vote.

Sec. 8–202. Officers

The officers of the board are the chair, the vice chair, and the executive director. The chair will be elected each year from the student membership of the board by the voting members of the board to serve a term to extend from the first official board meeting of the fall term until May 15, the following year or until a new chair is elected. To qualify for election as chair, a student will have at least one year's experience on either E+E or the board. This qualification may be waived by a two-thirds vote. Both outgoing and new board members will be eligible to vote for chair. The vice chair of the board will be a student member, chosen each term by the elected chair. The Student Government president and the E+E president cannot serve as chair of the board of directors. The officers of the board will perform the usual duties of their respective offices.

Sec. 8–203. Meetings

The board will meet once a month during each fall/spring term, setting its own dates for meetings, formulating its own rules of procedure, and setting up and appointing such committees as it may deem necessary and desirable for the proper use of the University Unions' facilities consistent with the Regents' Rules and Regulations.

Sec. 8–204. Executive Committee

a. The board may authorize three of its voting members to serve between meetings as an executive committee.
b. An executive committee may act for the board only during the period beginning annually on May 15, and ending the first day of registration for the fall term or during official University breaks or holiday periods. All actions taken by the executive committee are subject to ratification by the board.

Sec. 8–205. Duties

The board shall:

1. recommend rules, regulations, and procedures regarding the operation and use of the Unions, advise and consult on rules, regulations, and procedures regarding the operations and use of the Unions-managed facilities;
2. approve the E+E budget, the appointment of E+E officers, all changes in E+E by-laws, and the addition or deletion of any E+E committees;
3. advise the president, through the vice president, on the selection of the Unions' executive director; and;
4. be involved in the future development of the Unions.

Subchapter 8–300. Review of Board Action

Sec. 8–301. Review by the Vice President

a. The board will deliver promptly to the vice president of student affairs at least two copies of the minutes of each board or executive committee meeting.
b. No recommendation of the board or executive committee will have any force or effect until said recommendation has been approved by the vice president and has received such other approval as required.
c. Every action of the board or of a committee or subcommittee of the board is subject to review by the vice president. The vice president may approve, reverse, or modify each such action.
d. No budget or budget amendment adopted by the board is effective until it is approved by the vice president through normal budget procedure.
e. No expenditure will be made by the board unless it is made pursuant to a budget item that has been adopted by the board and has received final approval from the vice president.

Subchapter 8–400. The executive director of University Unions

Sec. 8–401. Duties of the executive director

a. The executive director is administratively responsible to and will report periodically to the vice president, serves as the chief executive official in the Unions, and is responsible for the operation of Unions and Unions-managed facilities, programs, and activities. The executive director will:

a. coordinate all functions involving Unions and Unions-managed facilities and the interests of the various groups served by the facilities;
b. employ, supervise, and direct the work of all subordinate employees; and,
c. be a member of all committees without vote.

b. Annually, on or before November 15, the executive director will submit to the board a report of Unions activities for the year. Copies of the report will be distributed to the vice president and to others as the vice president may direct.

Subchapter 8–500. University Unions Campus Events + Entertainment

Sec. 8–501. Purpose

E+E is chartered by University Unions to organize and present a program of activities and events for the University student body in areas of general interest.

Sec. 8–502. Members and Officers

a. E+E is composed of the various committees, their chairs, and the officers of E+E.
b. E+E has a president who is elected by the student body in the general student elections in the spring term each year and such other officers as approved by the University Unions board.

Sec. 8–503. Duties

E+E is the decision-making, coordinating, evaluating, and recommending body of the Union's activities and events program. E+E will:

1. coordinate the Union's activities and events program;
2. evaluate the Unions activities and events program, and recommend changes to its components; and,
3. recommend to the board actions, policies, and procedures affecting the Unions activities and events program.

Sec. 8–504. Review of E+E Actions by the Board

All actions of E+E are subject to review by the board.

Subchapter 8–600. Creative 40 Acres at Hogg Memorial Auditorium

Sec. 8–601. Purpose

The Creative 40 Acres at Hogg Memorial Auditorium is the result of a partnership between the College of Fine Arts and the Division of Student Affairs and will serve as a center of creative engagement for students, staff, and faculty.

Sec. 8–602. The Creative Forty Acres Advisory Committee

The Creative Forty Acres advisory committee exists to provide informed input to the committee chair on specific objectives as the initiative is being developed. This committee is a recommending body to the University Unions board of directors

Sec. 8–603. Membership

The committee can have up to 11 voting members. The desired membership is as follows:

1. Two members of the College of Fine Arts faculty;
2. Five students, including representation from Student Government, Senate of College Councils, College of Fine Arts, and University Unions Campus Events + Entertainment; and,
3. Four staff members, including representation from the School of Undergraduate Studies, Student Activities, Hogg Memorial Auditorium, and University Unions.

Sec. 8–604. The Creative Forty Acres Chair

The chair of the Creative Forty Acres at Hogg Memorial Auditorium is the University Unions executive director or his/her designee. He/she is responsible for reporting periodically to the University Unions board of directors and for the development of the Creative Forty Acres initiative. The chair will:

1. Facilitate meetings; and,
2. Present recommendations from the committee to the board.

The committee will meet twice per term during each fall/spring term, setting its own dates for meetings, formulating its own rules of procedure, and setting up and appointing such committees as it may deem necessary and desirable for the purpose of developing the initiative.

Subchapter 8–700. Unions and Union-Managed Facilities

Sec. 8–701. Reservations and Use of Unions and Union-Managed Facilities

a. Unions and Unions-managed facilities are reserved primarily for use by students, faculty members, and staff members.
b. In accordance with recommendations developed by the board, the executive director or the executive director's representative may permit special persons, groups, or organizations to reserve and use portions of Unions-managed facilities when the intended use does not interfere with regular union programs or activities. The executive director may charge a reasonable rental fee for use of Unions-managed facilities by such persons, groups, or organizations. The executive director will permit persons, groups, or organizations officially designated as guests of the University by the president, the chancellor, or the Board of Regents to use Unions facilities without cost. All requests for the use of Unions facilities are subject to prior reservations, therefore, requests should be made as early as possible.

Sec. 8–702. Policy Against Discrimination

No person or organization will be excluded from participation in or denied the benefits of Unions facilities, services, and programs on any basis prohibited by applicable law, including, but not limited to, race, color, religion, national origin, age, disability, citizenship, veteran status, sexual orientation, gender identity, or gender expression.

Sec. 8–703. Naming and Recognition

The vice president for Student Affairs shall consult with and seek the advice of the University Unions board of directors on all naming or recognition initiatives for the facilities listed in this section as being under the purview of the board.

Chapter 9. Educational Records

Subchapter 9–100. General Provisions

Sec. 9–101. Purpose

The student educational records maintained by the University fall into two general categories: directory information and student records. The purpose of this chapter is to describe various kinds of educational records and to state the permissible uses of these records. These policies and procedures are in full accord with the final regulations implementing the Family Educational Rights and Privacy Act of 1974 (FERPA).

Sec. 9–102. Confidentiality of Records

a. Directory information: That part of a student's educational record defined as directory information in section 9–201 is public information. It will be made available to the public unless the student has restricted it as described in subsection 9–201(c).
b. Student records: Student records include all educational records except for directory information and are not public records. The University will maintain the confidentiality of these student records as indicated in section 9–202.
c. Information in a student's educational record may be released by the University as directed by the president in an emergency if the information is necessary to protect the health or safety of the student or other persons.

Sec. 9–103. Information Not Recorded

No record will be kept that reflects a student's political attitudes, beliefs, or activities.

Sec. 9–104. Definitions

In this chapter, unless the context requires a different meaning,

1. "educational record" means the official record of a student that is maintained by the University for use by the University and includes directory information and student records. "Educational record" does not include the personal records of University personnel that are maintained in the sole possession of and for the sole use of the maker thereof or of a temporary substitute for the maker; the records of law enforcement units that are maintained solely for law enforcement purposes; employment records related exclusively to an individual's employment capacity (except as indicated in subsection 9–201[a]); medical and psychological records; thesis or research papers; or records that contain information about an individual only after the individual is no longer a student at the University.
2. "student" means a person enrolled on or after the first class day of the initial semester of attendance or a person formerly enrolled at the University;
3. "president" means the president of The University of Texas at Austin;
4. "transcript" means a comprehensive record of an individual's academic progress at the University; and
5. "University" means The University of Texas at Austin.

Subchapter 9–200. Directory Information and Student Records

Sec. 9–201. Directory Information

a. "Directory information" is defined as a student's name, local and permanent addresses, electronic mail addresses, UT EID, telephone listing, place of birth, major field(s) of study, participation in officially recognized activities and sports, weight and height if a member of an athletic team, dates of attendance, enrollment status, degrees, awards and honors received (including selection criteria), the most recent previous educational institution attended, job title and dates of employment when employed by the University in a position that requires student status, and other similar information. Other similar information includes a student's classification and expected date of graduation and student parking permit information.

b. Directory information is public information and will be made available to the public unless the student has restricted it as described in subsection 9–201(c).

c. A currently enrolled student may request that all or some directory information not be made public by completing an appropriate request online or in the Office of the Registrar during the first twelve class days of any spring or fall semester or the first four class days of a summer term. This request will remain in effect until revoked by the student. In the event of such a request, this restricted information will be treated as student records information as defined in subsection 9–202(a). In response to public inquiries, the University will state that the student has requested that the University not release part of the student's information; if the student has requested that all information be kept confidential, the University will state that the University has no information to provide regarding the person about whom the inquiry has been made.

Sec. 9–202. Student Records

a. Student records include educational records maintained by the University except for directory information. Student records include official University academic and personal records relating to scholastic, disciplinary, and fiscal matters, as well as records maintained by University offices and agencies that provide services sought voluntarily by individual students. The authorized use of and access to disciplinary records are described in subchapter 9–300 and subchapter 11–900 of the *Institutional Rules*. The University will not permit access to or the release of personally identifiable information contained in these records without the written consent of the student to any party other than the following:
   1. appropriate University administrators, faculty members, or staff members, appropriate administrators or staff members of the Texas Exes, and contractors or others acting on behalf of the University who require access to educational records in order to perform their legitimate educational duties, when such records are needed in furtherance of the educational or business purposes of the student or the University;
   2. officials of other schools in which the student seeks or intends to enroll, upon request of these officials, and upon the condition that the student be notified and receive a copy of the record if desired;
   3. federal, state, or local officials or agencies authorized by law;
   4. in connection with a student's application for, or receipt of, financial aid;
   5. accrediting organizations or organizations conducting educational studies, provided these organizations do not release personally identifiable data and provided they destroy such data when it is no longer needed for the purpose for which it was obtained. If the University discovers that an organization that has received student records from the University has released or failed to destroy such records in violation of this policy, it will prohibit access by that organization to educational records for five years;
   6. the parents of a dependent student as defined in section 152 of the Internal Revenue Code of 1954, provided a reasonable effort is made to notify the student in advance;
   7. in compliance with a judicial order or subpoena, provided a reasonable effort is made to notify the student in advance unless the subpoena specifically directs the institution not to disclose the existence of a subpoena; or
   8. to an alleged victim of any crime of violence or a nonforcible sexual offense, the results of the alleged perpetrator's disciplinary proceeding may be released.

   The University will maintain, as part of a student's student record, a record of all parties who have obtained access to data in the record, except the parties listed in subsection 9–202(a)(1). The record of access will include the legitimate interest of the party in obtaining the information.

b. Upon written request, the University will provide a student access to his or her records described in subsection 9–202(a), except for
   1. financial records of the student's parent or guardian; and
   2. confidential letters of recommendation placed in the student's educational record prior to January 1, 1975; and confidential letters of recommendation placed in the student's educational record after January 1, 1975, if the student has signed a waiver of the right of access to letters of recommendation.

c. The official custodian of records at the University is the vice president and chief financial officer. Since the University does not maintain a central repository for student records, inquiries for access to specific student records should be made to the University office or agency concerned with the particular record. Requests for assistance in locating individual student records should be directed in writing to the custodian of records.

d. A student may obtain copies of his or her records described in subsection 9–202(a) at a cost of ten cents per page, except for an official transcript of academic record, $20, and an unofficial copy of the permanent academic record, $20. Educational records covered by the Family Educational Rights and Privacy Act of 1974 (FERPA) normally will be made available within forty-five days of the request.

e. A student may challenge the contents of his or her educational record on the grounds that the record is inaccurate, misleading, or otherwise in violation of his or her privacy rights. The student submits such a challenge by writing to the custodian of records. If the dispute cannot be resolved by informal proceedings, the student may request a formal hearing. The request for a hearing must be made in writing to the custodian of records. Within a reasonable period of time after receiving the request, the custodian of records will inform the student of the date, place, and time of the hearing. The student may present evidence relevant to the issues raised and may be assisted or represented at the hearing by one or more persons of the student's choice, including attorneys, at the student's expense. The hearing officer who will adjudicate the challenge will be appointed by the president. Decisions of the hearing officer will be based solely on the evidence presented at the hearing, will consist of written statements summarizing the evidence and stating the reasons for the decision, will be delivered to all parties concerned, and will be final. The educational record will be corrected or amended in accordance with the decision of the hearing officer, if the decision is in favor of the student. If the decision is unsatisfactory to the student, the student may place with the educational record statements commenting on the information in the record, statements setting forth any reasons for disagreeing with the decision of the hearing officer, or both. The statements will be maintained as part of the student's records and released whenever the record in question is disclosed. A student who believes that the adjudication of the challenge was unfair or was not in keeping with the provisions of FERPA may request, in writing, assistance from the president.

f. Complaints about alleged failure to comply with the provisions of FERPA may be submitted in writing to the Family Policy Compliance Office, US Department of Education, 400 Maryland Avenue, SW, Washington DC 20202.

g. In addition to the procedures described in subsection 9–202(e), general categories of educational records are periodically reviewed and obsolete information is removed and destroyed in accordance with an established record retention schedule.

Sec. 9–203. Official Transcripts of Records

a. The Office of the Registrar will send, issue, or release a student's official transcript of record only
   1. at the student's written request;
   2. after formal authentication of the student's identity; or
   3. in accordance with subsection 9–202(a).

b. A transcript of record will contain only the information described in section 9–402 and will not be furnished either in part or with information omitted or deleted.

c. The registrar will maintain a "Register of Requests for Official Transcripts." The register of requests is part of the student record.

d. The sanction of withholding a degree may be imposed upon a student who fails to pay a debt owed to the University. The sanction is lifted when the student has paid the debt.

e. The dean of students, the president, or the Office of the Chancellor may withhold the issuance of a transcript or a degree pending a hearing against a student who violates a rule or regulation of The University of Texas System or the University when, in the opinion of the official, the interest of The University of Texas System or the University would be served by interim action.

Subchapter 9–300. Disciplinary Records

Sec. 9–301. Disciplinary Record

a. The University will maintain a permanent written disciplinary record for every student assessed the sanction of suspension, expulsion, denial or revocation of a degree, dismissal from an academic program, withdrawal of a diploma, or permanent bar from admission or enrollment. Disciplinary suspension and temporary bars from admission or enrollment are noted on the official transcript during the term of the sanction. The notation can be removed upon the request of the student when all conditions of the sanction are met. The request for the removal of the transcript notation of suspension should be directed to the Office of the Dean of Students. A notation of disciplinary expulsion will be placed on the official transcript of a student who is assessed the sanction of bar from admission or bar from enrollment. In accordance with law, a notation of ineligible to enroll due to reasons other than academic or financial will be placed on the official transcript of a student who is assessed the sanction of bar from admission or bar from enrollment. A written record of any other case investigated by University Compliance Services or the dean of students will be maintained for at least seven years. The disciplinary record will reflect the nature of the charge, the sanction assessed, and any other pertinent information.

b. The contents of a student's disciplinary record may be made available upon written request of the student, or in accordance with state or federal law.

c. Upon request by a student, the University may remove, from a student's transcript, a notation required under (a) if:
   1. The student becomes eligible to reenroll in the postsecondary educational institution; or
   2. The University determines that good cause exists to remove the notation.

Subchapter 9–400. Official Transcripts

Sec. 9–401. Office of the Registrar

The registrar compiles, maintains, and administers official transcripts of record.

No partial or incomplete record (such as a record with grades of *F* omitted) will be issued. In accordance with amended regulations of the Higher Education Act of 1965 (HEA), effective July 1, 2024, a student who owes a debt to the University is eligible to obtain an official transcript**.** Texas law provides criminal penalties for forgery of a transcript or similar document.

Sec. 9–402. Content of Transcripts

Each student's official transcript of record contains the following information:

1. name of the student;
2. birthdate;
3. name and city of high school attended and date of graduation (unless admitted as a transfer student);
4. transfer credits, if any;
5. courses taken, hours completed, grades received, grading system, and grade point average;
6. for undergraduate students, a symbol showing academic warning or academic dismissal, if any, during the period of warning or dismissal; for graduate students, a symbol showing academic dismissal;
7. type of degree granted by the University and honors received;
8. date of graduation from the University; and
9. notation of disciplinary suspension or disciplinary expulsion, or ineligible to enroll due to reasons other than academic or financial, if applicable.

Chapter 10. Use of University Property, Rooms, and Spaces

Subchapter 10–100. General Provisions

Sec. 10–101. Purpose and Application

a. The University of Texas at Austin permits the orderly use of rooms and spaces on its property, as provided in this Chapter, to further the educational process. The University does not endorse any statement or activity that does not represent official University action.

b. This Chapter authorizes and regulates the reservation of University rooms and spaces; the identification of persons present on University property; and the use of alcoholic beverages on University property. Speech, assembly, and expression by students, faculty members, staff members and members of the public on University property are further protected and regulated in Chapter 13 of the *Institutional Rules*.

c. No person or organization may use a University facility for any purpose other than in the course of the regular mission of the University or the University of Texas System unless authorized by the Regents' *Rules and Regulations*. Any authorized use must be conducted in compliance with the provisions of the Regents' *Rules and Regulations*, the approved rules and regulations of the University, and applicable federal, state, and local laws and regulations.

Sec. 10–102. General Definitions—Categories of Speakers and Users

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Academic or Administrative Unit" means any office or department of the University.
2. "Faculty Member and Staff Member" includes any person who is employed by the University.
3. "Member of the Public" means any person, organization, or business that is not an Academic or Administrative Unit, a Registered Student, Faculty, or Staff Organization, or a Student, Faculty Member, or Staff Member.
4. "Registered Faculty or Staff Organization" includes a faculty or staff organization under the Regents' *Rules and Regulations*, Rule 40201.
5. "Registered Student Organization" means a Student Organization holding a valid registration under Chapter 6. Registered Student Organizations are considered private entities and are not viewed as extensions of an Academic or Administrative Unit, or of the University. Registered Student Organizations must register with the University and meet all obligations of Registered Student Organizations listed in Subsection 6-302 to ensure privileges as outlined in subsection 6-301 and allow the Registered Student Organization to function within the institutional context.
6. "Sponsored Student Organization" means a Student Organization whose purpose and activities are in accord with the mission of an Academic or Administrative Unit, for whose actions and activities the sponsoring unit provides endorsement, support, and supervision that has been officially approved by the Vice President through an annual application as prescribed by the Dean of Students.
7. "Student" means a person who is currently enrolled at the University or has been enrolled at the University in a prior semester or summer session and is eligible to continue enrollment in the semester or summer session that immediately follows.
8. "University Organization" includes Academic and Administrative Units, Sponsored student organizations, and Registered Student, Faculty, and Staff Organizations.

Sec. 10–103. Other General Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Common Outdoor Area" means outdoor space that is not regularly used for dedicated University business and its primary purpose is not an educational function or a research function. This space is generally open for use and enjoyment by University community members in the regular course of their days, pursuant to applicable rules. It does not include the outside surfaces of a University building, surfaces associated with or connected to a University building, a University structure, spaces dedicated to temporary outdoor banners, spaces dedicated to temporary outdoor exhibits, or any Dedicated Areas. It is a Limited Public Forum not open to the general public for their expressive activities.
2. "Co-sponsorship" means an event held within the University's limited public forum where an Academic or Administrative unit is delegated authority from the president of the University to partner with an off-campus person or organization for such event and does so. Co-sponsored events are University events by virtue of being partially sponsored by a University Academic or Administrative Unit.
3. "Day" means an 8:00 a.m. to 5:00 p.m. calendar day, and excludes weekends, University holidays, skeleton crew days, and days on which regularly scheduled classes are suspended due to emergent situations. "University holiday" and "skeleton crew days" means days identified in the holiday schedule published by the Office of Human Resource Services. If a deadline in this Chapter falls on a Saturday, Sunday, University holiday or skeleton crew day, that deadline will be moved to the next day.
4. "Dean of Students" means the Dean of Students of The University of Texas at Austin or any delegate of the Dean of Students.
5. "Dedicated Areas" means the University property, both indoors and outdoors, that is not the Common Outdoor Area. This includes the outside surfaces of a University building, surfaces associated with or connected to a University building, a University structure, spaces dedicated to temporary outdoor banners, spaces dedicated to temporary outdoor exhibits, and residential outdoor spaces managed by University Housing and Dining, including Jester Plaza, San Jacinto Amphitheatre, Honors Quad, Duren Courtyard, the Blanton Museum's outdoor Plaza and Art Garden, the Union Building Patios, the William C. Powers Jr. Student Activity Center patios, Goldsmith Hall, the pedestrian bridge adjoining the Graduate School of Business, Moody Pedestrian Bridge, and the Cronkite Plaza. These spaces are also part of the Limited Public Forum.
6. "Limited Public Forum" refers to the University's status as a place for University students, faculty, and staff to engage in expressive activity pursuant to the reasonable restrictions on the time, place, and manner of expressive activities as set out in Chapter 13 of the Institutional Rules.
7. "Residential Conference Center" means facilities that are designated by the president as allowed by the Regents' *Rules and Regulations*, Rule 80112. Residential Conference Centers include the AT&T Hotel & Conference Center.
8. "Room or Space" includes any Room or Space, indoors or outdoors, owned or controlled by the University.
9. "Special Use Facilities" means facilities that are designated by the president as allowed by the Regents' *Rules and Regulations*, Rule 80106. Special use facilities include the facilities controlled by Texas Performing Arts and the Moody Center.
10. "University" means The University of Texas at Austin.
11. "Vice President for Student Affairs" means the Vice President for Student Affairs at The University of Texas at Austin, or his or her designee.

Subchapter 10–200. Reservation of a Room or Space on University Property

Sec. 10–201. Permission to Use

1. Academic or Administrative Units and Registered Student, Sponsored Student, Faculty, or Staff Organizations may reserve a space to assemble in the limited public forum areas in accordance with subchapter 13–902 of the *Institutional Rules*. University Organizations may reserve the use of a room for purposes permitted by the Regents' *Rules and Regulations*.
2. Academic or Administrative Units and Registered Student, Sponsored Student, Faculty, or Staff Organizations may reserve a temporary outdoor exhibit space on weekends in accordance with subchapter 13-700 of the Institutional Rules.
3. Academic or administrative units and registered student, sponsored student, faculty, or staff organizations may reserve a temporary banner space on weekends in accordance with subchapter 13-500 of the Institutional Rules.
4. University persons and University organizations may reserve an outdoor weekday amplified sound area in accordance with section 13–803 of the Institutional Rules.
5. University persons and University organizations may reserve a space within the Common Outdoor Areas for amplified sound on evenings or weekends in accordance with section 13-804 of the Institutional Rules.
6. University persons and University organizations may reserve a space within the Common Outdoor Areas for assembly in accordance section 13–902 of the Institutional Rules.
7. Academic and administrative units of the University will have priority in reserving the use of rooms and spaces.
8. Any person or organization with a reservation has the right to the room or space for the time covered by the reservation. Any person or organization using or occupying the room or space without a reservation must yield control of the room or space in time to permit a user with a reservation to begin using the room or space promptly at the beginning of its reserved time.
9. Reservations are subject to cancellation for extenuating circumstances, including but not limited to health and safety concerns, credible evidence that the organizing group intends to violate University policy, or business reasons which may require the university to close unexpectedly or with little notice.
10. Except as provided within subchapters 13-600, 13-700, 13-800, 13-900 and 13-1000, reservations are not required but are strongly encouraged. A University organization or faculty member, staff member, or student planning to use a room or indoor space without a reservation may find the facility locked or in use by another University organization.

Sec. 10–202. Application

1. University persons and organizations wishing to reserve a space in the Common Outdoor Area will apply through a process prescribed by the dean of students.
   A. Registered student organizations wishing to reserve a general-purpose classroom will apply through a process prescribed by the Dean of Students.
   B. Individual faculty and staff members using space for academic or administrative purposes, registered faculty and staff organizations, and academic and administrative units wishing to reserve a general-purpose classroom will apply through a process prescribed by the registrar.
   C. Reservations for rooms and spaces controlled by academic or administrative units other than the registrar and the Dean of Students will be made through the unit that controls the room or space.
      i. Rooms and spaces controlled by other units include special use facilities, residential conference centers, athletic facilities, classrooms that are not general-purpose classrooms, many conference rooms, reception areas, and other specialized rooms and spaces and may be subject to special rules.
2. The Dean of Students will maintain the following information online:
   A. the procedures for reserving outdoor space for University persons or organizations and any additional rules applicable to outdoor reservations;
   B. the procedures for registered student organizations reserving general purpose classrooms and any additional rules applicable to such reservations; and,
3. a list of general-purpose classrooms.

Sec. 10–203. Consideration of Application

1. The Dean of Students will approve a properly completed application to reserve an outdoor space and will facilitate a properly completed application to reserve a general-purpose classroom, unless the Dean of Students finds that:
   A. the proposed use of the room or space would violate Regents' *Rules and Regulations*, University regulation, or administrative rule;
   B. another event or exhibit has been scheduled for the proposed time and location, or so near that there is a practical conflict;
   C. the room or space requested is inadequate to accommodate the proposed use;
   D. the proposed use of the room or space would violate reasonable and nondiscriminatory fire, health, or safety standards;
   E. the proposed use of the room or space would constitute an immediate and actual danger to students, faculty members, or staff members or to the peace or security of the University that available law enforcement officials could not control with reasonable effort;
   F. the applicant is under a disciplinary sanction or is the subject of a criminal trespass warning that prohibits reserving the use of a University room or space or that prohibits the proposed use of the room or space;
   G. for indoor spaces and spaces within the University's limited public forum, the applicant owes a monetary debt to the University and the debt is considered delinquent by the crediting agency; or,
   H. the applicant has attempted to reserve space under a different name or different organization name to circumvent university policy or a disciplinary sanction.
2. If the Dean of Students does not approve an application under Sec. 10–203(a), the applicant may request a written statement detailing the grounds for refusal
   A. The written statement shall be provided by the Dean of Students no more than five days after receiving such a request.

Subchapter 10–300. Regulations Applicable to University Property

Sec. 10–301. Identification

1. Any person will identify himself or herself when asked to do so by an institutional representative while in any building or on property owned or controlled by the University or The University of Texas System. A person identifies himself or herself by:
   A. giving his or her name and complete address, substantiated by a current driver's license, voter registration card, or other official documentation; and,
   B. stating truthfully whether they are a student or employee of the University or The University of Texas System.

2. An "institutional representative" is any regent, executive officer, administrative officer, attorney, peace officer, or security officer of the University or the University of Texas System, or the designee of any of the foregoing.
3. Any person who refuses to identify themself in accordance with Sec. 10–301(a) while in any building owned or controlled by the University or The University of Texas System may be referred to the Dean of Students and/or law enforcement, as referenced in the Regents' *Rules and Regulations*, Rule 80101.

Sec. 10–303. Unauthorized Access

Permitting or allowing unauthorized individuals to enter into buildings and facilities restricted from unauthorized access by deliberately disengaging, deactivating, or otherwise circumventing locking devices is prohibited. Unauthorized access includes but is not limited to:

1. an individual leaving the door open or holding it open to individuals without badges or to unauthorized personnel and
2. if an unauthorized person enters at the same time as an authorized individual.

Sec. 10-304. Co-sponsorship

a. Only Academic or Administrative Units delegated authority from the President of the University may partner with an off-campus person or organization for a co-sponsored event in the University's limited public forum.
b. Registered Student, Faculty, or Staff Organizations, individual students, faculty members, and staff members may not co-sponsor any event on campus with an off-campus person or organization. Sponsored Student Organizations are an extension of the sponsoring Academic or Administrative Unit under the authority of subsection 6-101(9) of the Institutional Rules.
c. An event is a prohibited co-sponsorship if an individual or a registered student, faculty, or staff organization
    1. depends on an off-campus person or organization for planning, staffing, or management of the event; or
    2. advertises the event as co-sponsored by an off-campus person or organization; or
    3. operates the event as agent of, or for the benefit of, an off-campus person or organization, except for solicitation of charitable contributions under the authority of subsection 13–205(2)(A); or
    4. distributes any proceeds of the event to an off-campus person or organization, except for
        i. the proceeds of charitable contributions solicited under the authority of subsection 13–205(2)(A); or
        ii. payment of a fair market price for goods or services provided to the University person or organization; or
    5. reserves a room or space for the primary use of an off-campus person or organization; or
    6. engages in any other behavior that persuades the Dean of Students that an off-campus person or organization is in fact responsible for the event, in full or in substantial part.
d. The following facts do not, in and of themselves, indicate a prohibited co-sponsorship:
    1. that a University person or organization endorses an off-campus person or organization or its message;
    2. that a University person or organization sells, distributes, or displays literature prepared by an off-campus person or organization or containing contact information for an off-campus person or organization (subject to the rules in section 13–205);
    3. that a University person or organization has purchased goods or services from an off-campus provider;
    4. that a registered student, faculty, or staff organization has invited a guest speaker under subchapter 13–1000;
    5. that a registered student, faculty, or staff organization has received financial contributions to support the event from an off-campus donor.
e. Speech events occurring in the common outdoor areas, which adhere to the time, place, and manner rules of Chapter 13 of the Institutional Rules, are not prohibited as co-sponsored events even when University persons or organizations partner with an off-campus person or organization for the planning, staffing, or management of such events.

Subchapter 10–400. Enforcement and Appeals

Sec. 10–401. Response to Violations

A student who violates a prohibition in this Chapter may be disciplined under the procedures in Chapter 11 of the Institutional Rules. A Registered Student Organization or a Sponsored Student Organization that violates a prohibition in this Chapter may be disciplined under Chapter 6 of the Institutional Rules. A member of the public who violates a prohibition in this chapter may be issued a criminal trespass warning banning such person from all or part of University property.

Sec. 10–402. Decision Review

a. A person or organization seeking to appeal a denied reservation request made under this chapter may submit a written appeal to the dean, vice president, or executive leaders designated to receive appeals by the Academic or Administrative Unit. The appeal must be sent by e-mail within fourteen days after the day the decision is announced. A copy of the appeal must also be sent to the decision maker within fourteen days after the day the decision is announced.
    1. An appeal regarding a reservation request made through the process prescribed by the Executive Director of Student Involvement may be sent to the Dean of Students.
    2. An appeal regarding a reservation request made through the process prescribed by the registrar may be sent to the Assistant Vice Provost and University Registrar.
    3. An appeal regarding a reservation request for rooms and spaces controlled by another academic or administrative unit may be sent to the dean of the school or college or the executive leader of the administrative unit.
b. The appeal must contain the person or organization's name, contact information, a concise description of the decision complained of, and the person or organization's rationale for appealing, and the date the decision was announced.
c. When timely notice of appeal is received, the decision maker from the Academic or Administrative Unit that controls the room or space will prepare and send a copy of the written decision and the rationale for the decision to the dean, vice president, or executive leader.
d. The dean, vice president, or executive leader will communicate a decision on the appeal by e-mail to the person or organization and the decision maker within five days after the appeal and related documents were received.

Chapter 11. Student Conduct and Academic Integrity

Subchapter 11–100. General Provisions

Sec. 11–101. Preamble

a. As a member of The University of Texas at Austin community, students accept not only the rights and privileges of membership, but also the responsibility to uphold a long and steadfast tradition of excellence. In abiding by the core values of the University – learning, discovery, freedom, leadership, individual opportunity, and responsibility – and adhering to the tenets of academic

integrity, students will uphold an Honor Code reflective of a scholarly community devoted to academic and personal success.

b. This Chapter contains rules for dealing with alleged violations of university policy in a manner consistent with the requirements of procedural due process and in accordance with The University of Texas System Rules and Board of Regents' Rule: 50101.

Sec. 11–102. Application and Jurisdiction

1. The Dean of Students has primary authority and responsibility for the administration of the university process for students alleged to have engaged in conduct that violates this Chapter. The Dean of Students delegates authority to, and is represented by, Student Conduct and Academic Integrity during the administration of the conduct process.
2. Any student who engages in conduct that violates: the institutional rules and policies; federal, state or local laws; instructions issued by an administrative official of the institution or the University of Texas System acting in the course of his or her authorized duties; or instructions issued by a law enforcement officer; is subject to discipline.
3. The provisions of this rule cover conduct occurring on campus, as well as conduct occurring off-campus when the conduct substantially affects a person's education or employment with the University or poses a risk of harm to members of the University community. This Rule does not apply to matters subject to the University Handbook of Operating Procedures 3-3031 ("HOP 3-3031") as that policy's provisions control and require processing by the Department of Investigations and Adjudications.
4. Incidents that indicate possible violations of this Chapter and the University Handbook of Operating Procedures 3-3020 ("HOP 3-3020") may be jointly or concurrently investigated by Student Conduct and the Department of Investigation and Adjudication ("DIA"), and the investigatory work produced as a result of the investigations may be shared between the two offices.
    1. In instances where an investigation by Student Conduct results in a finding of a violation of this Chapter, Student Conduct may consider a joint or concurrent finding of a violation of HOP 3-3020 as an aggravating factor in assessing appropriate sanctions.
5. University disciplinary action may be instituted against a student charged with conduct that potentially violates both the civil/criminal law and University policy or rules without regard to the existence, status, or pendency of civil or criminal litigation in court or criminal arrest and prosecution. Proceedings under this Chapter may be carried out prior to, simultaneously with, following, or in the absence of criminal proceedings. Disciplinary decisions and sanctions imposed under this Chapter will not be subject to change based upon the outcome of criminal charges or decisions.
6. University disciplinary action instituted by Student Conduct will be based upon the "Preponderance of Evidence" standard. This standard is satisfied if the alleged violation is deemed more likely to have occurred than not. If an alternative set of facts is deemed to be equally plausible to the set of facts that would result in a finding of a violation, the standard is not met.
7. Administrative processing of any alleged violation of institutional rules will advance procedurally under *The General Information Catalog* that is in effect on the day that an allegation of misconduct is referred to Student Conduct receives notification of the alleged violation and not the date on which the alleged violation is noted to have occurred.
8. Following the finding of a violation and the resolution of a matter, the student is obligated to abide by the assessed sanctions. Failure to complete or meet the condition(s) of assessed sanctions may be considered an additional violation.
9. Student Conduct may reopen an investigation and/or re-engage the conduct process if it obtains new information regarding an allegation.

Subchapter 11–200. Student Conduct Administration

Sec. 11–201. Notice

1. Notification of conduct proceedings, including but not limited to notice of allegations, interim action, meeting requests, hearings, and resolution, shall be sent by Student Conduct to the student by letter or by e-mail, using addresses on file with the Office of the Registrar.
    1. A letter or email sent to an address listed in the registrar's records will constitute full and adequate notice.
2. The student's failure to provide and/or maintain current addresses, refusal to accept delivery of a letter, or failure to open an e-mail message will not constitute good cause for failure to comply with the meeting request. Policies on the use of e-mail for official correspondence are provided in Appendix M (p. 156).

Subchapter 11–300. Definitions

1. In this Chapter, unless the context requires a different meaning, the following definitions apply.
    1. "Academic Record" – University or University of Texas System documents relating to a student's scholastic record. Components of a student's academic record may include, but are not limited to, applications for admission, academic transcripts, the awarding of a degree, registration materials, grade change forms, and reporting forms used by the Office of the Registrar.
    2. "Administrative Disposition" – A written statement of the alleged conduct, institutional rule(s) implicated, investigative findings, assessed sanctions (s), and resolution options, that is issued to a student as part of a Case Resolution Form.
    3. "Advisor" – A single individual who may accompany a student to a meeting with Student Conduct or a hearing regarding an alleged violation of this Chapter. An Advisor may confer with and advise the student but may not advocate for the student in a meeting with Student Conduct or in a hearing or directly address the Student Conduct Panel or Hearing Officer. An Advisor cannot be an individual allegedly involved in the same disciplinary matter as the accused student, or any individual who will serve as a witness for the accused student. Advisors may be dismissed from any meeting or conduct proceeding if they disrupt the process.
    4. "Appeal" – To contest the outcome of an Administrative Disposition or a hearing decision for an additional review.
    5. "Appellate Officer" – A person designated by the President to issue final decisions in a student conduct matter.
    6. "Case Resolution Form" - A from issued to a student found to have engaged in a violation of this Chapter, and which includes the Administrative Disposition and the available resolution options.
    7. "College Liaison" – An employee designated by each academic college that serves as the primary contact between Student Conduct and the academic college to facilitate communication and process regarding academic misconduct referrals and cases.
    8. "Day" – An 8:00 a.m. to 5:00 p.m. calendar day, excluding weekends, university holidays, and days on which regularly scheduled classes are suspended due to emergent situations. If a deadline defined in this Chapter falls on a Saturday, Sunday, university holiday, or skeleton crew day, that deadline will be moved to the next day.

9. “Dean of Students” – The Dean of Students of The University of Texas at Austin or the Dean of Students’ delegate or representative.
10. “Disciplinary Decision” – A written decision issued by the Dean of Students following a conduct hearing that communicates whether a student is responsible or not responsible for violation of this Chapter. The Disciplinary Decision includes the findings of fact in support of the decision along with the assessed sanction(s), if applicable.
11. “Disciplinary Record” – A student record maintained by Student Conduct in connection with a violation or an alleged violation of this Chapter. The Disciplinary Record may include complaints, notices, hearing records, disciplinary decisions, and other documents required under this Chapter or deemed relevant by Student Conduct. Disciplinary Records may be disclosed to outside parties in accordance with subchapter 9–300 of the Institutional Rules.
12. “Educational Release” – A method of case resolution (detailed in Sec. 11-504 of this Chapter) that is not formal discipline. A referral for misconduct is eligible for Educational Release upon the determination by the Dean of Students. A matter resolved via Educational Release is not considered discipline by the University and need not be reported by a student completing future applications at another institution.
13. “Executive Director” – The Executive Director for Student Conduct and Academic Integrity in the Office of the Dean of Students.
14. “Faculty Member” – A person who teaches a class as part of their employment, and who has authority to assign grades for the class.
15. “Hearing” – A formal proceeding, as outlined in Section 11-600 of this Chapter, in which a student, accused of violating university policy as defined in this Chapter, may present their case to a Hearing Officer or a Student Conduct Panel.
16. “Hearing Officer” – A university employee appointed by the President to conduct hearings and issue responsibility decisions regarding alleged violations of policy.
17. "Interim Action" – An immediate action taken against an accused student before completion of the student conduct process. Interim Action may include, but is not limited to, suspension, suspension of a right or privilege, or a prohibition from entering campus or any part of campus.
18. “President” – The president of The University of Texas at Austin or the President’s delegate or representative.
19. “Responsibility Decision" - A written determination issued by a Hearing Office following a conduct hearing, reflecting the Hearing Office's determination on whether a student is responsible for a violation of this Chapter. This determination includes findings of fact and is submitted to the Dean of Students to make a Disciplinary Decision, including the assessment of sanctions, if applicable.
20. "Responsibility Recommendation" - A written recommendation issued by a Student Conduct Panel following a conduct hearing, reflecting the panel's view on whether a student is responsible for a violation of this Chapter. This recommendation includes findings of fact and is submitted to the Dean of Students to make a Disciplinary Decision, including the assessment of sanctions, if applicable.
21. "Referral" - A report received by Student Conduct alleged conduct that may rise to a violation of this Chapter.
22. “Sanction” – Official action by the University against a student found responsible for a violation of the Institutional Rules. University sanctions include all items listed in Section 11-700 of this Chapter.
23. “Student” – A person who is currently enrolled at the University, or who is accepted for admission or readmission to the University, or who has been enrolled at the University in a prior term and is eligible to continue enrollment in the term that immediately follows, or who is attending an educational program sponsored by the University while that person is on campus, or who engaged in prohibited conduct at a time when he or she met the above criteria. For the purposes of this Chapter, individuals who are not currently enrolled at the University remain subject to the disciplinary process for conduct that occurred while they were enrolled.
24. "Student Conduct" – Refers to Student Conduct and Academic Integrity in the Office of the Dean of Students or its delegate or representative.
25. “Student Conduct Board” (SCB) – A group comprised of students appointed by the President to serve on Student Conduct Panels.
26. “Student Conduct Panel” (SCP) – The entity or group of persons composed of a combination of Hearing Officer(s) and member(s) of the Student Conduct Board, who conduct hearings and issue a written responsibility recommendation to the Dean of Students.
27. “Title IX” – Refers to Title IX of the Education Amendments of 1972, Pub. L. 92-318, as amended by section 3 of Pub. L. 93-568, 88 Stat. 1855, except sections 904 and 906 thereof; 20 U.S.C. 1681, 1682, 1683, 1685, 1686.
28. “Title IX Coordinator” – The employee of the University with major responsibility for Title IX compliance efforts and who is designated to handle complaints under Title IX.
29. “University” – Refers to The University of Texas at Austin. For the purposes of this Chapter, "University" also includes all activities and programs sponsored by or affiliated with The University of Texas at Austin regardless of the actual location where such activities or programs occur, including but not limited to, field trips, internships, rotations, and clinical assignments.
30. “Vice President for Student Affairs” – Refers to the Vice President for Student Affairs of The University of Texas at Austin, or the Vice President’s delegate or representative.
31. "Witness” – A person who may have information or who provides testimony related to a complaint or referral, including the accused student.

Subchapter 11–400. Prohibited Conduct

Sec. 11–401. Academic Misconduct

a. Student Conduct or a Faculty Member may initiate conduct proceedings under subchapter 11–500 against a student suspected of engaging in or attempting to engage in academic misconduct, as defined in this section and which may consist of any of the following activities:
    1. **Copying –** copying answers or information from another individual’s academic assignment;
    2. **Failure to Comply with Instructions –** failing to comply with instructions pertaining to an academic assignment or course requirement, and where that failure results in an unfair academic advantage;
    3. **Unauthorized Materials –** obtaining, accessing, or possessing materials without authorization, including but not limited to class notes, textbooks, calculators, online resources, and/or electronic devices;
    4. **Unauthorized Aid or Assistance** – providing aid or assistance to, or utilizing aid or assistance from, another individual or source without authorization, and pertaining to an academic assignment or course requirement;

5. **Substitution** – substituting for another person, or permitting another person to substitute, to attend a class or complete any academic assignment or other course requirement;
6. **Falsification or Fabrication** – falsifying or fabricating any information, data, or citation in any academic work offered for credit, or academic work done in conjunction with the completion of course or degree requirements;
7. **Plagiarism**
   i. when a person represents another's material as their own work without attribution;
   ii. when a person misrepresents citation or attribution for purposes of an academic advantage; or,
   iii. when a person submits essentially the same work for two assignments without the permission of the Faculty Member.
8. **Collusion** – unauthorized collaboration with another student or students;
9. **Failure to Follow Course Requirements –** conduct that fails to adhere to standards promulgated by an academic unit or Faculty Member, and that is not otherwise constitutionally protected;
10. **Other Academic Misconduct –** any activity in which a student receives or attempts to receive an unfair academic advantage.

Sec. 11–402. Behavioral Misconduct

a. Student Conduct may initiate conduct proceedings under subchapter 11–500 against a student suspected of engaging in or attempting to engage in behavioral misconduct, as defined in this section and not otherwise controlled by another University policy or rule. Behavioral misconduct may consist of any of the following activities:
   1. **Local, State, or Federal Law Violations** – any behavior that may violate any federal, state, or local law, ordinance, or regulation;
   2. **Weapons** – possesses, uses, or displays firearms, facsimile firearms, ammunition, explosives, or other items that could be used as weapons, including but not limited to sticks, poles, clubs, swords, shields, body-armor or make shift body-armor, masks, helmets and other garments, such as sporting protective gear, that alone or in combination could be reasonably construed as weapons or body-armor on property owned or controlled by the University, without written permission from the Dean of Students, unless authorized by federal, state or local laws; or, violates Policy 8-1060, Campus Carry, of the Handbook of Operating Procedures;
   3. **Dangerous Materials –** unauthorized use of a hazardous substance (chemicals, fireworks, explosives, etc.) with the intent to cause harm, threat, or fear;
   4. **Threatening or Endangering Behavior –** any behavior that threatens or endangers the health or safety of any student, employee, or visitor to the University;
   5. **Theft –** use, possession, taking, or removal of property, services, or resources of others without permission or authorization;
   6. **Hazing or Hazing Activity** – any intentional, knowing, or reckless act, occurring on or off of the campus of an educational institution, by one person alone or acting with others, directed against a person, for the purpose of pledging, joining, being initiated into, affiliating with, holding office in, or maintaining membership in any organization, and for which consent may not serve as a defense. Hazing includes but is not limited to:
      i. any type of physical brutality, such as whipping, beating, striking, branding, electric shocking, placing of a harmful substance in or on the body, or similar activity;
      ii. any type of physical activity that involves or results in sleep deprivation, exposure to the elements, confinement in a small space, calisthenics, or other activity that subjects the person to an unreasonable risk of harm or that adversely affects the mental or physical health or safety of the person;
      iii. any activity involving consumption of a food, liquid, alcoholic beverage, liquor, drug, or other substance, in addition to those described by Paragraph E, that subjects the person to an unreasonable risk of harm or that adversely affects the mental or physical health or safety of the person;
      iv. any activity that subjects a person to conduct or circumstance that adversely affects the mental health, physical health, or property of others, and which affects were reasonably foreseeable;
      v. any activity that involves coercing, as defined by Section 1.07 Penal Code, a student to consume a drug or an alcoholic beverage or liquor in any amount.;
      vi. any activity that induces, causes, or requires the person to perform a duty or task that involves a violation of the Penal Code. See Texas Education Code, Section 37.151 for more information.
   7. **Alcohol Misconduct**
      i. engages in unauthorized use, possession, sale, distribution, or consumption of alcoholic beverages, on or in university property, including but not limited to a classroom, laboratory, auditorium, office, athletic facility, or residence hall;
      ii. engages in the improper use, possession, sale, distribution, or consumption of alcoholic beverages, including but not limited to underage possession of alcohol, underage consumption of alcohol, providing alcohol to a minor, public intoxication, minor driving under the influence of alcohol, or driving while intoxicated;
   8. **Drugs**
      i. engages in the unauthorized use or possession of a drug, or possession of drug paraphernalia;
      ii. engages in the unauthorized sale or distribution of a drug.
   9. **Harassment –** hostile or threatening conduct that:
      i. is sufficiently severe, pervasive, and objectively offensive to create an objectively hostile or threatening environment that interferes with or diminishes the impacted party's ability to participate in or benefit from the services, activities, or privileges provided by the University; and
      ii. is personally directed to one or more specific individuals.
         1. When harassment is sex or gender based, the harassment provision in HOP 3-3031 applies over this policy's harassment provision.
         2. Sec. 13-204 of the Institutional Rules addresses verbal harassment.
   10. **Property**
      i. **Unauthorized Use** – engages in unauthorized use of property, keys, equipment, resources, supplies, buildings, or facilities owned or controlled by the University or The University of Texas System;
      ii. **Unauthorized Entry** – engages in unauthorized entry into or onto property owned or controlled by the University or The University of Texas System;
      iii. **Damage** – damages, defaces, destroys, or tampers with property of the University, property belonging to any student or employee of the University, or property of a visitor to the University
      iv. **Water and Fountains** – enters, remains, or is in the water of any fountain or other artificial body of water on the university campus that is not designed and maintained for recreational or therapeutic purposes; dumps, throws, places, or causes to be placed any material, object, trash, person, animal, waste,

or debris in the water of any fountain or other artificial body of water located on the University campus;

11. **Technology Misuse**
    i. engages in unauthorized use of an information technology resource owned or controlled by the University or The University of Texas System;
    ii. engages in unauthorized access or entry into a computer, computer system, network, database, software, or data;
    iii. engages in unauthorized downloading, copying, or distribution of computer software or data;
12. **Stalking** – a course of conduct directed at a specific person that would cause a reasonable person to fear for the person's safety or the safety of others and causes that person to fear for their safety or suffer substantial emotional distress. (Please note that Stalking as defined here is separate from the gender or sex-based stalking rule included in HOP 3-3031.)
    i. A "course of conduct" means two or more acts in which a person directly, indirectly or through third parties, by any action, method, device or means, follows, monitors, observes, surveils, threatens or communicates to or about a person or interferes with a person's property.
    ii. "Reasonable person" means a hypothetical person of average caution and prudence under similar circumstances to the complainant.
    iii. "Substantial emotional distress" means significant mental suffering or anguish that disrupts or impairs usual functioning. It may, but does not necessarily, require medical or other professional treatment or counseling.
13. **False and Misleading Information**
    i. engages in the falsification of academic records, including but not limited to altering or assisting in the alteration of any official record of the University or The University of Texas System and submitting false information or omitting requested information that is required for or related to any academic record of the University or The University of Texas System. Academic records include, but are not limited to, applications for admission, the awarding of a degree, registration materials, grade change forms, and reporting forms used by the Office of the Registrar;
    ii. furnishes false information to or withholds material information from any university official, Faculty Member, or staff member acting in the course of their duties;
    iii. alters or assists in the alteration of any official nonacademic record or document, including parking permits and athletic tickets, of any university office or of The University of Texas System.
14. **Unauthorized Surveillance or Distribution**
    i. engages in surveillance or recording of any type without the consent of the person or persons being surveilled or recorded in areas where there is a reasonable expectation of privacy;
    ii. engages in broadcasting or distribution, without the consent of all involved parties, of a recording or other surveilled material, that meets the definition of Unauthorized Surveillance in Sec. 11-402(a)(17)(A).
15. **Disruptive Conduct**
    i. engages in conduct that interferes with or disrupts university activities, including but not limited to any teaching, research, administrative, disciplinary, public service, learning, or other authorized activity;
    ii. engages in promoting or inciting conduct that interferes with or disrupts university activities, including but not limited to any teaching, research, administrative, disciplinary, public service, learning, or other authorized activity;
16. **Failure to Comply**
    i. failure to comply with the directives of any university official(s) acting in the performance of their duties, and who has the authorization to issue such directives;
    ii. failure to identify oneself to a university official(s) when requested to do so.
        1. A person provides identification by giving their name and complete address, substantiated by a current driver's license, voter registration card, or other official documentation, and by stating truthfully whether or not they are a student or employee of the University.
    iii. failure to comply with rules, regulations, procedures, policies, standards of conduct, or any other directive of the university, including but not limited to schools, colleges, departments, or labs;
17. **Targeted Residential Disturbance** - engages in conduct that violates federal or state law, or city ordinance, either individually or in concert with other and in close proximity to a University employee's residence, that intimidate the employee or otherwise diminishes the employee's or their fellow residents' ability to maintain the peaceful enjoyment of their home.
18. **Violent Conduct –** any conduct intended to physically harm or injure a person;
19. **Animal Cruelty**
    i. Intentionally, knowingly, or recklessly torturing or in a cruel manner killing or causing serious bodily injury to an animal;
    ii. Failing to provide proper care or safety for an animal in a person's custody, including but not limited to failing to provide necessary food or water, unreasonably abandoning an animal, or transporting or confining an animal in a cruel manner;
    iii. any other conduct with an animal that may violate any provision of federal, state, or local laws;
        1. Conduct occurring solely for the purpose of or in support of fishing, hunting, or trapping; or wildlife management, wildlife or depredation control, or shooting preserve practices as regulated by state and federal law; or animal husbandry or agriculture practice involving livestock animals shall not be interpreted as a violation of this rule.
20. **University System Violations** – any conduct that violates any provision of the Regents' *Rules and Regulations* of The University of Texas System;
21. **Retaliation –** any action taken to adversely affect the terms or conditions of an individual's academic experience or employment with the University, or other institutional status of a student, employee, university affiliate, visitor, or applicant for admission to or employment with the University, because an individual has, in good faith:
    i. reported or intends to make a report under university policies or rules;
    ii. opposed an unlawful practice;
    iii. participated in an investigation or conduct proceeding; or,
    iv. requested supportive or protective measures;
22. **Residence Hall Manual Violations** – any conduct that violates any provision of the *Residence Hall Manual*.
23. **Institutional Rules or other University Policy Violations** – any conduct that violates any provision or rule defined in other chapters of the *Institutional Rules on Student Services and Activities or the Handbook of Operating Procedures.*

Subchapter 11–500. Conduct Procedures

The Dean of Students utilizes the following procedures in working with students and campus partners. Dean of Students maintains the authority and discretion to take other necessary and appropriate actions in the interest of students, their development, and the University.

Sec. 11–501. Investigation

a. When Student Conduct receives information that a student has allegedly violated university policy, Student Conduct will perform an initial assessment and determine, based on the information contained in the referral, if an investigation is merited, or if the referral shall be maintained without further action. If further investigation is merited, Student Conduct will investigate the allegation(s) and afford the accused student an opportunity to hear and respond.

b. After conducting the investigation, Student Conduct will:
   1. Issue a No Finding Letter in instances where the preponderance of the evidence does not support the finding of a violation; or
   2. Issue an Administrative Disposition in instances where the preponderance of the evidence supports the finding of violation, and which shall include:
      i. the results of the investigation;
      ii. the basis for the finding of a violation;
      iii. the specific section(s) of this Chapter the student has violated; and
      iv. any assessed sanction(s).

c. Scientific Misconduct or Misconduct in Other Scholarly Research
   1. If the information received by Student Conduct makes allegations of misconduct in scientific or other scholarly research, Student Conduct will refer the information to the Vice President for Research and/or the Research Integrity Officer for further investigation in accordance with the Handbook of Operating Procedures, 7-1230.
   2. The findings will be set forth in an investigation report. The report will then be provided to Student Conduct for adjudication of any academic integrity violations that may be outlined in the report.
   3. Additional Information regarding the Scientific Misconduct or Misconduct in Other Scholarly Research can be found at http://www.policies.utexas.edu/policies/misconduct-science-and-other-scholarly-activities

d. Investigations involving students enrolled in the Dell Medical School
   1. If Student Conduct receives a referral involving a student enrolled in the Dell Medical School, Student Conduct will notify the dean of the Dell Medical School or designee. Prior to the final resolution of an incident involving a student enrolled in the Dell Medical School, Student Conduct shall consult the dean or designee to determine appropriate sanctions consistent with the professional standards outlined by the Dell Medical school and other applicable university rules.
   2. Additional information regarding the professional standards of the Dell Medical School can be found at https://dellmed.utexas.edu/education/student-resources.

Sec. 11–502. Interim Action

1. Pending an investigation, hearing, or outcome of the allegations against a student, the Executive Director may take immediate interim action appropriate to the circumstances including instances when the continuing presence of the student: (i) poses an immediate or potential danger to persons or property, or (ii) disrupts the academic process, or any activity authorized by the University.
2. The Executive Director may take the following interim actions, individually or in combination: suspending the student's access to the entirety or selected parts of campus (including university-owned housing), prohibiting a student from attending in-person and/or virtual classes, altering the status of the student, withholding grades or an official transcript, or denying the conferral of a degree while the conduct process is ongoing and where the matter will not be resolved until after the completion of all degree requirements, or any other actions deemed necessary to address the risk presented by the student.
3. Notice of the interim action shall be sent to the student in accordance with Sec. 11-201 of this Chapter.
4. A student subject to interim action under Sec. 11–502(a) may meet with the Dean of Students to contest the interim action. A request for a meeting under this subsection must be submitted in writing to the Dean of Students no more than three (3) days after the student is notified (in accordance with Sec. 11-201) that the interim action was taken. If a meeting is requested by the student, such a meeting will be conducted within five (5) days after the request for a meeting is mad. At the discretion of the Dean of Students, the five-day period may be extended for a period not to exceed an additional five days.
   1. During the meeting with the Dean of Students, the student may present documentation or other evidence for review in consideration of lifting or altering the interim action. The Dean of Students shall make every effort to issue a written decision within three (3) days of the meeting regarding whether the decision to take interim action will be reversed, altered, or otherwise left unchanged. If the Dean of Students is unable to issue the written decision within five days, the Dean shall provide notice of the delay and the new date for completion to the student.
5. A student is subject to disciplinary action for prohibited conduct that takes place during a period of interim disciplinary action imposed under Sec. 11-502(a).

Sec. 11–503. Meeting with a Student

a. Student Conduct may require a meeting with a student in connection with an alleged violation of this Chapter.

b. Notice of the meeting shall be sent by Student Conduct to the student in accordance with Sec. 11-201 of this Chapter. The message will direct the student to appear at a specific time and place at least two (2) days after the date of the message.

c. Student Conduct may issue a registration hold, or cancel the enrollment or otherwise alter the status of a student (or of a former student as described in Sec. 11–300(22)) who fails without good cause to comply with a meeting notice sent in accordance with Sec. 11–503(b) until the student complies.

d. If a student fails to appear for a required meeting, or otherwise fails to participate in an investigation into an allegation of misconduct, Student Conduct may proceed with resolving the matter based upon the available information and without the student's participation in the process.

Sec. 11–504. Educational Release

The University is committed to the growth and development of its students in all University interactions. The Educational Release path recognizes that, in some circumstances where a violation of the Institutional Rules may have occurred, the interests of fairness, proportionality, and student learning may be best served by partnering with students in a manner that does not result in a formal finding of responsibility or the creation of a disciplinary file.

1. The University is committed to the growth and development of its students in all University interactions. The Educational Release path recognizes that, in some circumstances where a violation of the Institutional Rules may have occurred, the interests of fairness, proportionality, and student learning may be best served by partnering with students in a manner that does not result in a formal finding of responsibility or the creation of a disciplinary file. The

Dean of Students develops and maintains the parameters for when Educational Release may be implemented for all matters referred to Student Conduct. The Dean of Students may, at their discretion, adjust these parameters in the interest of fairness, proportionality, and student learning.

2. Designated Student Conduct staff shall review all referred conduct matters in accordance with the Educational Release parameters established by the dean. Following this review, or at any subsequent point during the administration of the conduct process, when staff believe those parameters are met, Student Conduct shall recommend the matter to the Dean of Students for the dean's consideration and determination as to whether the matter meets the established parameters. The Dean of Students maintains discretion to direct any student conduct matter to the dean for review under the established parameters.
3. Educational Release review shall not be used to negotiate, pressure, or induce a student to agree to culpability of alleged violations.
4. The Dean of Students shall assess the matter and make the determination regarding whether Educational Release is appropriate. In making the determination, the Dean of Students may require the student to attend a meeting or provide additional information, and may request further information from the Student Conduct staff or other University personnel.
5. The determination by the Dean of Students shall state whether the matter will proceed via Educational Release or be directed back to Student Conduct for further processing, which may include the issuance of an Administrative Disposition in accordance with Sec. 11-505 of the Institutional Rules.
    1. If directed back to Student Conduct, the determination shall provide notice to the student of the next steps in that process. It will also notify the student that they may seek review as set out below at Section 11-504(g);
6. If proceeding via Educational Release, the student will be notified and assigned actions tailored to support positive character development and learning. Other conditions may be implemented at the dean's discretion. Successful completion of the Educational Release actions and meeting assigned conditions fully resolves the referred matter.
    a. Failure to complete assigned actions and meet any other conditions required under the Educational Release may result in the matter being reinstated with Student Conduct, an Administrative Disposition being issued, and the conduct process continued in accordance with Sec. 11-505 of the Institutional Rules.
7. Review of Educational Release decision. A student may accept the dean's determination on the availability of Educational Release for the matter or may seek review of that determination.
    1. Failure to seek review within 3 business days of the issuance of the dean's determination makes the determination final and not reviewable upon student request.
    2. If timely review is requested, the Vice President for Student Affairs will review the determination and will issue a decision, as soon as is practicable, either upholding or reversing the determination. The student may accept that decision or within 3 business days of its issuance, petition the president for review.
    3. The petition to the president is denied by operation of this rule after 3 business days if the president does not provide notice accepting presidential review. If accepted, the president will either uphold or reverse the previous determination. The president's decision is final and unappealable.
8. **Not reportable as discipline.** A matter resolved via Educational Release is not considered University action, sanction, or discipline against the student. It is not a finding that any rule or policy has been violated.
    1. Record of the Educational Release will be maintained by the Dean of Students in accordance with record retention policy outlined in Chapter 9 of the Institutional Rules.
9. Nothing in this rule's provisions shall be construed to prohibit the Dean of Students from implementing an Educational Release path for any matter, at any time.

Sec. 11–505. Administrative Disposition

a. Students found responsible for violating university policy will be issued an Administrative Disposition (in accordance with Sec. 11-501(b)(2)).
b. Following the presentation of an Administrative Disposition, a student may choose to:
    1. Accept the finding and assessed sanctions;
    2. Accept the finding, but appeal the assessed sanctions with a written appeal to an Appellate Officer; or,
    3. Contest the finding in a hearing if the sanction proposed by Student Conduct included:
        i. reduced or no credit on the assessment(s) in question;
        ii. reduced or failing final grade for the course in question;
        iii. bar against readmission, bar against enrollment, withdrawal from the University or from a period of enrollment, and/or drop from one or more classes;
        iv. Suspension; or
        v. Expulsion
c. If the assessed sanctions do not include reduced or no credit on the assessment(s) in question, reduced or a failing final grade for the course in question, Suspension or Expulsion, a student may contest the finding with a written approval to an Appellate Officer.
d. A student may request a hearing (if eligible, as determined by Sec. 11-505(b)(3)) before a Hearing Officer for behavioral or academic misconduct, or before a Student Conduct Panel for academic misconduct only, in which the sanction proposed by Student Conduct did not include separation from the university or a reduced or failing course grade.
    1. The student must request a hearing and select their choice of either a Hearing Officer or a Student Conduct Panel within five (5) days of receipt of the Administrative Disposition. If a student requests a hearing but fails to choose their preference of hearing body, a Hearing Officer will be assigned after the 5-day deadline.
e. If the student's selected option of either a Hearing Office or a Student Conduct Panel is unavailable within 14 days, the Dean of Students reserves the right to override the student's selection in order to ensure timely resolution of the case.
f. If a student fails to inform Student Conduct of their decision within five (5) days of receiving the Administrative Disposition, and their case (as determined by Sec. 11-505(b)(3)) is:
    1. Not hearing-eligible – the finding and sanction (s) assessed by Student Conduct will be formally adopted and the student must comply with the assessed sanctions;
    2. Hearing-eligible – Student Conduct will proceed with a hearing before a Hearing Officer.
g. If a student fails to complete an assigned sanction, Student Conduct may place a registration hold on the student's registration and/or pursue a separate rule violation under Sec. 11-402(a)(16)(C).
h. A student who has been issued an Administrative Disposition may request additional time from Student Conduct to make their choice regarding responsibility or, if applicable, whether their hearing will be heard by a Hearing Officer or a Student Conduct Panel. Student Conduct will determine whether a postponement will be granted based upon the reason shared by the student and will notify the student of the decision and new deadline as soon as possible.

Sec. 11-506. Academic Investigations, Course Withdrawals, and Grade Adjustments

a. A student who is alleged to have engaged in academic misconduct, and who is still enrolled in the class associated with the allegation, may not withdraw from the class while the conduct process in ongoing.

b. A student who is alleged to have engaged in academic misconduct, and who has been granted a withdrawal from the class associated with the allegation, will have the withdrawal rescinded and will be re-enrolled in the class while the conduct process is ongoing.
   1. If the class from which the student has withdrawn has completed prior to an allegation of academic misconduct, the withdrawal shall be rescinded and a grade of X will be recorded while the conduct process in ongoing.
   2. Should the student be found not responsible for engaging in academic misconduct, the previously granted withdrawal will be reinstated.

c. Any student found responsible for academic misconduct and issued sanction(s) will not be eligible to withdraw from the class associated with violation or change the course grade to Pass/Fail or to Credit/ No Credit.

d. Notwithstanding Sec. 11-507(a), a student may seek permission to drop a course where an academic violation has been alleged or determined if there are exceptional circumstances, including but not limited to medical withdrawal, and where both Student Conduct and academic college approve of the withdrawal.

e. The Dean of Students encourages all Faculty Members to submit referrals of academic misconduct allegations in a timely manner. It is recommended that Faculty Members submit referrals of academic misconduct allegations no more than 30 Days after the reporting Faculty Member becomes, or should reasonably have become aware of the alleged violation.

Sec. 11-508. Amnesty and Immunity

1. Amnesty
   1. Alcohol and Drug Amnesty
      i. The University empowers students to prevent high-risk behavior by seeking help for fellow students and community members who are experiencing a medical emergency due to drug or alcohol consumption. A student who seeks emergency medical assistance for themselves or others experiencing a medical emergency due to drug or alcohol consumption may qualify for amnesty from formal disciplinary action under this Chapter, provided the student satisfies all three of the following conditions:
         1. Contacts emergency, medical, law enforcement, and/or university personnel promptly for assistance;
         2. Remains with the person experiencing the medical emergency until medical assistance arrives; and,
         3. Cooperates with all emergency and law enforcement personnel.
      ii. Eligibility for amnesty, as outlined above, also applies to the student experiencing the medical emergency due to drug or alcohol consumption.
      iii. Student Conduct will evaluate a student's eligibility for amnesty under this Chapter on a case-by-case basis; amnesty is not guaranteed. Students may receive amnesty under this policy on more than one occasion.
      iv. Students eligible for amnesty will be required to participate in an educational program and may be referred for individual drug and/or alcohol counseling, but may otherwise avoid formal disciplinary action under this Chapter. Student records related to a grant of amnesty are not considered disciplinary records by the University. Students who receive amnesty but decline or fail to complete the educational component may become subject to formal disciplinary action under this Chapter.
      v. This amnesty policy applies only to university rules and policies; it does not preclude or prevent law enforcement from taking legal actions. Amnesty does not apply to other prohibited behavior such as the sale of an illegal drug or narcotic.
   2. Amnesty Policy for Students Reporting Certain Violations
      i. Consistent with Texas Education Code Section-51.284, the University will not take any disciplinary action against a student who in good faith reports to the institution being the victim of, or witness to, an incident of sex discrimination, sexual harassment, sexual assault, interpersonal violence (domestic violence and dating violence), stalking, or other HOP 3-3031 related allegations, provided the alleged conduct of the reporting student occurred at or near the time of the reported incident, regardless of where the incident occurred or the outcome of the conduct process.
      ii. Eligibility for amnesty under this section shall be determined by Student Conduct, is final, and may not be appealed.
      iii. This policy does not apply to a student who reports their own commission or assistance in the commission of any prohibited conduct as defined in HOP 3-3031.
2. Immunity
   1. Immunity from Institutional Discipline
      i. In an effort to encourage reporting of hazing incidents, the Dean of Students, at their discretion and through written agreement, may grant immunity from University disciplinary action under Chapter 11 of the Institutional Rules to a person who voluntarily reports a specific hazing event, if the person cooperates in good faith by providing a complete and factual account of the incident(s) throughout the conduct process, and either:
         1. reports the indecent(s) before being contacted by the Dean of Students concerning the incident(s) or otherwise being included in the University's investigation of the incident(s); or,
         2. reports the incident after being contacted by the Dean of Students concerning the incident or otherwise being included in the University's investigation of the incident, and was a victim of the hazing conduct.
      ii. A person will not be granted immunity under subsection 15-508(b)(1) if the person:
         1. reports the person's own act of inflicting hazing;
         2. reports an incident of hazing in bad faith or with malice as determined by the Dean of Students; or
         3. reports the incident after being contacted by the Dean of Students concerning the incident or otherwise being included in the University's investigation of the incident, and was not the victim of the hazing.
      iii. The Dean of Students may revoke the immunity granted under subsection 11-508(b)(1) and initiate disciplinary action in accordance with Chapter 11 of the Institutional Rules if the person:
         1. is found to have conducted the hazing activity under investigation.
         2. fails to cooperate fully and in good faith, as determined by the Dean of Students, by providing a complete and factual account of the incident(s) throughout the conduct process regarding the incident(s); or

3. otherwise acts in bad faith or with malice as determined by the Dean of Students

Sec. 11-509. Grade Assignments and Class Participation During Conduct Process

In instances where a student is accused of academic misconduct, Faculty Members shall: allow for the accused student's continued participation in the course during resolution of the conduct process and shall assign a grade of Incomplete ("X") for the accused student if the course concludes prior to the case's resolution. After receiving confirmation that the matter has been fully resolved, the Faculty Member shall make all timely and reasonable efforts to accurately adjust the student's grade, such that any impact on registration, course enrollment, and/or graduation is minimized. In instances where the student would otherwise graduate, Student Conduct shall take reasonable steps to expedite resolution of the matter to reduce the potential impact on the student.

Subchapter 11–600. Hearing

Sec. 11–601. Duties of the Hearing Officer and Student Conduct Panel Forepers

1. The Hearing Officer or Student Conduct Panel Foreperson shall:
   a. preside over the hearing;
   b. determine whether Student Conduct has satisfied the requirements of Sec. 11–602;
   c. hear objections and make decisions during the hearing;
   d. determine the admissibility of evidence;
   e. facilitate the hearing process, which includes the authority to mute (in a virtual setting) or remove (whether virtual or in-person) anyone from the hearing who is disrupting the process;
2. The Hearing Officer shall:
   a. issue a written determination, in accordance with Sec. 11-609, that identifies the finding of fact and Responsibility Decision to the Dean of Students.
3. The Student Conduct Foreperson shall:
   a. issue a written recommendation that identifies findings of fact and Responsibility Recommendation to the Dean of Students.

Sec. 11–602. Duties of Student Conduct

a. Student Conduct shall:
   1. determine the date, time, and location of the hearing and provide notice in accordance with Sec. 11-201 and Sec. 11-604 of this Chapter;
   2. arrange for the hearing to be recorded; and
   3. establish hearing procedures that include, but are not limited to, deadlines for submission of supporting documentation/evidence, a list of witnesses to be called by the student, the role of the advisor, and hearing logistics. Hearing procedures will be provided to the student along with the hearing notice and are available on the Student Conduct website.

Sec. 11–603. Student Rights and Responsibilities

a. An accused student has the right to:
   1. have an advisor at the hearing;
   2. challenge the objectivity of the Hearing Officer or the members of the Student Conduct Panel designated to hear the charges at least two (2) days prior to the hearing (in accordance with Sec. 11-606);
   3. know the identity of each witness who will participate in the hearing;
   4. present documentation, witness testimony, and other supporting information for consideration in the hearing process;
   5. provide a personal statement or account of the incident in question;
   6. question each witness who appears at the hearing; and,
   7. appeal a disciplinary decision in accordance with Subchapter 11-800.

Sec. 11–604. Notice of Hearing

a. Student Conduct will notify the accused student of the date, time, and location of the hearing with a hearing notice sent to the student in accordance with Sec. 11-201 of this Chapter.
b. The student shall be given notice of the hearing at least five (5) days before the hearing date.
c. Notice sent under subsection 11–604(a) will:
   1. state the time, date, and location of the hearing;
   2. contain the name of the Hearing Officer or the names of the members of the Student Conduct Panel appointed to hear the matter;
   3. contain the names of Student Conduct's witnesses who may testify against the accused student;
   4. include a list of documentation and evidence that may be presented by Student Conduct during the hearing; and,
   5. contain a copy of the complaint, which outlines the alleged violation(s).
d. In situations where a student fails to attend a scheduled hearing, the Hearing Officer or Student Conduct Panel will determine if Student Conduct provided notice in accordance with Sec. 11-604, and if so, will proceed with the hearing without the student's participation.

Sec. 11–605. Preliminary Matters for a Hearing

a. **Multiple Charged Students:** Allegations against more than one student that arise out of a single incident or course of conduct may be heard together.
   1. A student may request a separate hearing in writing directly to Student Conduct.
   2. Student Conduct will determine whether to grant the request.
b. A least two (2) days before the hearing date, the accused student must provide the following information, if any, to Student Conduct:
   1. A list of any witnesses the student may call to participate in the hearing. The list must include a summary of each witness's connection to the case;
   2. Copies of any supporting documentation the student intends to use in the hearing; and
   3. The name of their advisor, if any, and the advisor's relationship to the student.
c. **Other Advisors:** The Hearing Officer, Student Conduct Panel, and Student Conduct are entitled to advice and legal counsel from The University of Texas System Office of General Counsel and/or The University of Texas at Austin's Office of the Vice President for Legal Affairs, and may request their presence at a hearing or a meeting with a student.
d. **Hearing Postponement:** An accused student may request a hearing postponement from Student Conduct. The student must provide a reason for the requested postponement, including, but not limited to, a procedural error, an emergency situation, or a documented academic impact that would prevent the student from participating in the hearing. Student Conduct will determine whether or not a postponement will be granted based upon the reason shared by the student, and will notify all parties of the decision as soon as possible.
   1. A postponement must be requested by the student in advance of the hearing date or the hearing will proceed without the student's participation.
   2. In instances where an accused student is unable to request a postponement due to incapacity or emergent situation, Student

Conduct may postpone the hearing for good cause and on their behalf.

Sec. 11–606. Challenges to the Hearing Officer or Members of the Student Conduct Panel

a. A student may challenge the fairness, impartiality, or objectivity of a Hearing Officer or any member of the Student Conduct Panel but is not entitled to disqualify that person from serving. The challenge must be:
   1. in writing,
   2. state the reasons for the challenge, and
   3. be submitted to the Hearing Officer or the Panel Foreperson through Student Conduct at least two (2) days prior to the hearing.

b. The hearing officer or the challenged members(s) of the Student Conduct Panel will determine independently or with the assistance of an advisor whether they can serve with fairness, impartiality, and objectivity, and will communicate their determination in a written response. If the challenged person disqualifies themself, another Hearing Officer or Student Conduct Panel member will be appointed by Student Conduct.

Sec. 11–607. Hearing Procedure

a. In accordance with Sec. 11-602, Student Conduct will establish hearing procedure and share that procedure with the student in advance of the hearing. Hearing procedures are posted on the Student Conduct website.

Sec. 11–608. Evidence in Hearings

a. Legal rules of evidence do not apply to university hearings for alleged violations of the Institutional Rules.

b. All university hearings shall use the "preponderance of the evidence" standard, defined in Sec. 11-102(d) as that which is "more likely to have occurred than not".

c. Student Conduct has the burden of providing evidence and proving the charges by the preponderance of the evidence.

d. During the hearing, the Hearing Officer or the Foreperson of the Student Conduct Panel may admit evidence, including testimony and documentary evidence. The Hearing Officer or the Foreperson of the Student Conduct Panel may exclude irrelevant, immaterial, and unduly repetitious evidence. All evidence admitted during the hearing will be made a part of the record.

e. Any party that provides testimony at a hearing, including the accuses student and the Student conduct case administrator, is subject to questioning from accused student, Student Conduct, and the Hearing Office or Student Conduct Panel.

Sec. 11–609. Disciplinary Decision

a. The Hearing Officer will render a written Responsibility Decision that includes whether the student is believed to be responsible for a violation of policy and the facts in support of the finding. The Responsibility Decision will be submitted to the Dean of Students for sanctioning. The Hearing Office shall complete the written Responsibility Decision with (5) day of the hearing. If the Hearing Office is unable to issue a written Responsibility Decision with five days, they shall provide notice of the delay to the student, Student Conduct, and the Dean of Students. Student Conduct will establish the new deadline for submission of the decision.

b. The Foreperson of the Student Conduct Panel will render a written recommendation, reflective of the majority of the Student Conduct Panel, that includes whether the student is believed to be responsible for a violation and the findings of fact in support of the Responsibility Recommendation. The recommendation will be submitted to the Dean of Students for final Disciplinary Decision, including sanction(s), if applicable. The Responsibility Recommendation will be submitted to the Dean of Students for sanctioning. The Foreperson of the Student Conduct Panel shall complete the written Responsibility Recommendation within five days, they shall provide notice of the delay to the student, Student Conduct, and the Dean of Students. Student Conduct will establish the new deadline for submission of the decision.

c. The Dean of Students will render a written Disciplinary Decision, which includes the Responsibility Decision and Sanction(s). The student and Student Conduct will each be given a copy of the decision. The written decision is the official outcome on the matter from which any appeal is based.

d. The Dean of Students shall complete the written Disciplinary Decision within five (5) days of receipt of the Hearing Office's Responsibility Decision or Student Conduct Panel's Responsibility Recommendation. If the Dean of Students is unable to issue the written Disciplinary Decision within five day, they shall provide notice of the delay to the student and Student Conduct. Student Conduct will establish the new deadline for submission of the decision.

e. In case involving the allegations of crimes of violence, as defined in the Family Educational Rights and Privacy Act (FERPA) and other applicable law, Student Conduct shall notify the alleged victim(s) of the final outcome.

f. Student Conduct may also disclose information regarding student conduct matters, as needed, in conformance with FERPA.

Sec. 11–610. Hearing Record

1. The hearing record shall include, but is not limited to:
   1. a copy of the notice required under Sec. 11–604;
   2. the recording of the hearing;
   3. all evidence admitted under Sec. 11–608;
   4. a copy of the complaint/hearing letter; and
   5. Hearing Officer's Responsibility Decision or Student Conduct Panel's Responsibility Recommendation.

Subchapter 11–700. Sanctions

Sec. 11–701. Disciplinary Sanctions

a. When a student is found responsible for behavioral misconduct, as defined in Sec 11-402, Student Conduct, under Subchapter 11–500, or Dean of Students after a hearing under Subchapter 11–600, may impose one or more of the following sanctions for violation of this Chapter:
   1. written warning;
   2. disciplinary probation;
   3. educational sanction;
   4. restorative practice;
   5. bar against re-admission;
   6. bar against enrollment;
   7. withdrawal from one or more classes;
   8. restitution or reimbursement for damage to or misappropriation of University or University of Texas System property;
   9. suspension of rights and privileges, including, but not limited to, a bar from participating in athletic or extracurricular activities or residing in or entering university housing;
   10. deferred suspension;
   11. suspension from the University for a specified period of time;
   12. expulsion (permanent separation from the University);
   13. other sanction or sanctions as deemed appropriate under the circumstances.

b. Student Conduct or the Dean of Students, may consider mitigating and/or aggravating factors, including but not limited to a student's

prior conduct, when determining proportionate sanctions in response to the finding of a violation.

c. If a violation of the University's Institutional Rules is committed because of the race, color, religion, national origin, age, disability, citizenship, veteran status, of a student or students directly harmed by the violation, or constitutes antisemitism as that term is defined at Sec. 13-104(2) of the Institutional Rules, such a discriminatory purpose will be treated as an aggravating factor for the purpose of determining the appropriate sanction or sanctions under subsection 11-701(a). For a complete set of cross-references to all regulation of harassment on the campus, see subsection 13-204 (covering verbal harassment) of the Institutional Rules, and 3-3020 and 3-3031(V)(D) (covering harassment based on gender, sexual orientation, gender identity, or gender expression) of the Handbook of Operating Procedures.

Sec. 11–702. Academic Sanctions

a. When a student is found responsible for academic misconduct, as defined in Sec. 11-401, either through an Administrative Disposition from Student Conduct issued in accordance with Sec. 11–505, or after a hearing from the Dean of Students, administered in accordance with subchapter 11–600, Student Conduct or the Dean of Students, may impose any of the following sanctions:
   1. Academic integrity probation;
   2. no credit or reduced credit for the graded assessment in question;
   3. retaking of examination or resubmission of assignment;
   4. failing or reduced final grade for the course in question.

b. Student Conduct or the Dean of Students may also impose any of the disciplinary sanctions listed in Sec. 11–701.

c. If a student is found responsible for academic misconduct, as defined in Sec. 11-401, and in accordance with Sec. 11-505, Sec. 11-506, or after a hearing in accordance with Subchapter 11-600, and is also enrolled in an academic program requiring (1) a supplemental application in conjunction with application to UT Austin, (2) a minimum grade point average to matriculate through the program as defined in the Undergraduate Catalog, and (3) a signed commitment to adhere to a program-specific honor code and/or code of conduct, removal from the program will be considered by Student Conduct as a potential sanction.

Sec. 11–703. Pending Actions

Student Conduct may withhold an official transcript, grade, diploma, or degree of a student found to have violated a rule or regulation of The University of Texas System or the University that would reasonably allow the imposition of such sanction. Student Conduct may take such action pending a hearing, resolution by Administrative Disposition, and/or exhaustion of appellate rights when, in the opinion of Student Conduct, the best interests of The University of Texas System or the University would be served by this action.

Sec. 11-704 Authorized Sanction Definitions

a. **Withdrawal, Bar from Readmission/Re-enrollment –** As appropriate under the circumstances, Student Conduct or Dean of Students may impose a bar against the student's readmission or enrollment, may drop the student from one or more classes, or may withdraw the student from the University or from a period of enrollment. This bar may be temporary or permanent in nature. One or more of these sanctions may also be imposed on a student who fails to respond to a meeting notice from Student Conduct to discuss an alleged violation of the Regent's *Rules and Regulations*, university regulation, administrative rules, or the University's expectations of conduct. If imposed for failure to respond to a meeting request, the sanction or sanctions may be reversed when the student responds to the request. A bar from readmission or reenrollment will be noted on the student's official transcript in accordance with Sections 9-301 and 9-402 of the Institutional Rules.

b. **Written Warning –** Notification to the student that they have engaged in behavior that violated a rule or regulation of The University of Texas System or the University and that further violation(s) of the regulations may result in more severe disciplinary action.

c. **Disciplinary Probation –** A specified period of time during which the student is required to comply with specified terms and conditions that include not engaging in further conduct that would violate a rule or regulation of The University Texas System or the University. Further violation or violations will result in consideration of suspension.

d. **Academic Integrity Probation –** A specified period of time during which the student is required to comply with specified terms and conditions that include not engaging in further academic conduct that would violate a rule or regulation of The University Texas System or the University. Further academic violation or violations during this time could result in additional sanctions, which may include the student's suspension or expulsion.

e. **Educational Sanction –** Student Conduct or the Dean of Students may impose conditions related to the violation, such as counseling, educational seminars, or educational assignments.

f. **Restorative Practice** – An agreement that offers students found in violation of the Institutional Rules the opportunity to take ownership of their decisions, to be held accountable for their actions, and to work collaboratively to repair any harm caused to the impacted party and/or the university community. Examples of Restorative Practice include, but are not limited to, conferences, circles, and/or an educational coaching session.
   1. Eligibility for Restorative Practice as a sanction shall be determined at the discretion of Student Conduct, and will be based upon a number of factors including the category and severity of the conduct of the responsible student. Additionally, the responsible student must voluntarily agree to participate in Restorative Practice and accept responsibility for their conduct.

g. **Restitution –** Reimbursement for damage to or misappropriation of university property. Reimbursement may take the form of appropriate service to repair or otherwise compensate for damages. Other than in extraordinary circumstances deemed necessary by Student Conduct, the University will not facilitate restitution between individuals for conduct-related occurrences.

h. **Suspension of Rights and Privileges –** Student Conduct or the Dean of Students may impose limitations to fit the particular case, as in the suspension of rights and privileges to enter or reside in university housing facilities. Suspension of eligibility for official athletic and nonathletic extracurricular activities prohibits the student on whom it is imposed, during the period of suspension, from joining a registered student organization; from taking part in a registered student organization's activities or attending its meetings or functions; and from participating in an official athletic or nonathletic extracurricular activity.

i. **Academic Sanction –** A failing grade or other academic sanction may be assigned to a student for a class in which they are found to have violated the University's regulations regarding academic misconduct.

j. **Rescission of Degree –** The University may rescind a degree already conferred where it has been determined, in accordance with the procedures outlined in this chapter, that the degree holder, while enrolled as a student and while in the process of completing their degree requirements, engaged in academic misconduct, as defined in the University's Institutional Rules, and where a finding of that violation also affects whether the degree holder completed the applicable degree requirements.

k. **Deferred Suspension –** Permits the sanction of suspension to be deferred for a student where mitigating circumstances can be identified and determined by Student Conduct or the Dean of Students. If a student is found to have violated any rule of the University or The University of Texas System while the sanction of deferred suspension is in effect, the sanction for such a violation may be immediate suspension except in extraordinary circumstances as deemed appropriate by Student Conduct. Student Conduct or the Dean of Students may impose conditions related to the violation, and failure to meet such conditions will be considered an additional violation.

l. **Suspension –** Prohibits the student on whom it is imposed, during the period of suspension, from entering the university campus without prior written approval from the Vice President for Student Affairs, being initiated into an honorary or service organization, and receiving credit for academic work done during the period of the suspension. Suspension is noted on the student's official transcript in accordance with Sections 9-301 and 9-402 of the Institutional Rules. Suspension may also prohibit the student from being admitted to, enrolling at, or entering the campus of another component institution of The University of Texas System without prior written approval of the chief student affairs officer of the institution at which the student wishes to be present. Student Conduct, the student's home department or school, and/or the Office of the Registrar may permit the student to receive credit for academic work completed at another institution during the period of suspension, except in cases where suspension is imposed for academic misconduct.

m. **Expulsion –** A permanent separation from the University which prohibits the student on whom it is imposed from entering the university campus without prior written approval from the Vice President for Student Affairs. Expulsion may prohibit the student from being admitted to, enrolling at, or entering the campus of another component institution of The University of Texas System without prior written approval of the chief student affairs officer of the institution at which the student wishes to be present. A permanent notation of expulsion will also be placed on the student's official transcript in accordance with Sections 9-301 and 9-402 of the Institutional Rules.

n. Sanctions not listed in this section may be imposed when, in the opinion of Student Conduct or the Dean of Students, the best interests of The University of Texas System or the University would be served.

Subchapter 11–800. Appeal

Sec. 11–801. Request for Appeal

a. The accused student may request to appeal:
   1. a finding of responsibility and sanction(s) assessed by Student Conduct in an Administrative Disposition to an Appellate Officer, in accordance with Sec. 11-802(b) of this Chapter, where the sanction(s) assessed render the case ineligible for a hearing, in accordance with Sec. 11-505(b)(3);
   2. only the sanction(s) assessed by Student Conduct in an Administrative Disposition to an Appellate Officer, in accordance with Sec. 11-802(c) of this Chapter;
   3. a finding of responsibility and sanction(s) assessed as a result of a hearing decision to an Appellate Officer, in accordance with Sec. 11-803 of this Chapter.

b. Either Student Conduct or the student may request to appeal a hearing outcome to the Appellate Officer.

c. The accused student or Student Conduct may appeal an Administrative Disposition or Disciplinary Decision based only on one or more of the following grounds:
   1. Significant procedural error inconsistent with the processes as outlined in subchapters 11-500 and 11-600.
   2. Discovery of any new information unknown or not reasonably foreseeable to the accused student or Student Conduct at the time of the hearing that was material to and could have reasonably impacted the Disciplinary Decision.
   3. The sanction(s) determined by Student Conduct or the Dean of Students are significantly disproportionate to the violation.

d. The Appellate Officer shall first determine if sufficient grounds for appeal exist under section 11-801(d). The Appellate Officer shall take no more than (5) five days to make this initial determination. If the Appellate Officer is unable to make an initial decision within (5) five days, they shall provide notice of the delay to all parties and the new date for completion.
   1. If sufficient grounds do not exist, the Appellate Officer will deny the request for appeal thereby sustaining the original decision.
   2. If the Appellate Officer determines that sufficient grounds for appeal exist, the Appellate Officer will notify the non-appealing party that they may provide a response to the appeal in no more than five (5) days.
   3. After those five (5) days, the Appellate Officer will review the appeal and any response in full and issue a final decision.

Sec. 11–802. Appeal of Administrative Disposition by Student Conduct

a. An Administrative Disposition, presented in accordance with Sec. 11-501(b)(2), and in which the student agrees to both the finding of responsibility and the sanction(s) assessed by Student Conduct, is final and is not eligible for appeal.

b. In instances where a matter has been determined ineligible for a hearing, in accordance with Sec. 11-505(b)(3), the student may appeal a finding of responsibility and/or sanction(s) assessed by Student Conduct in an Administrative Disposition by submitting a written appeal to the Appellate Officer within five (5) days from the date on which the student signed the Administrative Disposition. Appeals submitted after 5:00 pm will be received the next day. The written appeal must cite at least one of the three grounds for appeal, as outlined in Sec. 11-801(d), and must include any related argument.

c. A student who accepts a finding of responsibility, as determined in an Administrative Disposition, but chooses to contest only the sanction(s) assessed, in accordance with Sec. 11-505(b)(2), may submit a written appeal to the Appellate Officer within five (5) days from the date on which the student signed the Administrative Disposition. Appeals submitted after 5:00 pm will be received the next day. The written appeal may only cite 'Disproportionate Sanctions' (Sec. 11-801(d)(3)) as the basis for the appeal, and must include any related argument. The appeal is restricted to the assessed sanction(s).

d. If the accused student does not submit a written appeal to the Appellate Officer by the deadline, the sanction(s) will become final, and all rights to appeal will be waived.

e. Student Conduct may also submit a written response to the appeal to the Appellate Officer. The response, if any, must be submitted no later than five (5) days after the Appellate Officer informs Student Conduct that the accused student's appeal has adequately raised an appellate issue, in accordance with Sec. 801(d). Student Conduct must provide a copy of the response to the accused student.

f. The appeal of the sanction(s) assessed by Student Conduct will be reviewed solely on the basis of the Administrative Disposition, the student's written appeal submission, and the response to the appeal submitted by Student Conduct, if any. Oral argument will not be considered.

g. The decision of the Appellate Officer will be communicated in writing to the accused student and Student Conduct no more than ten (10) days after Student Conduct's appeal response has been received

by the Appellate Officer. If the Appellate Officer is unable to issue the written decision within ten (10) days, the Appellate Officer shall contact both the accused student and Student Conduct with notice of the delay. Student Conduct will determine a new deadline for completion.

h. An appeal that is granted for the appellant based on Section 11-801(d)(1) (Procedural Error) or Section 11-801(d)(2) (New Information) of the Institutional Rules may be remanded to Student Conduct for reconsideration or further investigation.

i. When an appeal of an Administrative Disposition is granted for the appellant based on Section 11-801(d)(3) (Disproportionate Sanction(s)) of the Institutional Rules, the Appellate Officer may alter the sanction(s) or remand the case with recommendations for reconsideration or further action.

j. The decision of the Appellate Officer shall be final and will conclude the appellate process.

Sec. 11–803. Appeal of the Disciplinary Decisions Resulting from a Hearing

a. Either the accused student or Student Conduct may appeal the disciplinary decision by submitting a written appeal to the Appellate Officer within five (5) days from the date the appealing party was notified of the disciplinary decision. Appeals submitted after 5:00 pm will be received the next day. The written appeal must cite at least one of the three grounds for appeal, as outlined in subsection 11-801(d), and must include any related argument.

b. If Student Conduct submits an appeal, Student Conduct will provide the accused student with a copy of the appeal submitted to the Appellate Officer on the same day that Student Conduct submits the appeal to the Appellate Officer. Following submission of the appeal to the Appellate Officer, the non-appealing party may submit a written response to the Appellate Officer. No later than five (5) days after the Appellate Officer informs the non-appealing party that the appeal has adequately raised an appellate issue, in accordance with Sec. 801(d), the non-appealing party must provide a copy of the response to the other party.

c. The appeal of the disciplinary decision will be reviewed solely on the basis of the hearing record; the written appeal submission; and any documents submitted by the non-appealing party's in response to the appeal, if any. Student Conduct will submit the record from the hearing to the Appellate Officer as soon as it is available to Student Conduct.

d. The decision of the Appellate Officer will be communicated in writing to the accused student and Student Conduct within ten (10) days after receipt of the non-appealing party's appeal response by the Appellate Officer. If the Appellate Officer is unable to issue the written decision within ten (10) days, the Appellate Officer shall contact both the accused student and Student Conduct with notice of the delay. Student Conduct will determine a new deadline for completion.

e. When an appeal that is granted for the appellant based on Section 11-801(d)(1) (Procedural Error) or Section 11-801(d)(2) (New Information) of the Institutional Rules may be remanded to Student Conduct for reconsideration, rehearing, or further investigation.

f. When an appeal of a disciplinary decision is granted for the appellant based on Section 11-801(d)(3) (Disproportionate Sanction(s)) of the Institutional Rules, the Appellate Officer may alter the sanction or remand the case with recommendations to Student Conduct for reconsideration, rehearing, or further investigation.

g. The decision of the Appellate Officer shall be final and will conclude the appellate process.

Sec. 11–804. Effect of Appeal Upon Disciplinary Action

A timely appeal suspends the imposition of the sanction(s) until the appeal is final, but any interim action issued in accordance with Sec. 11-502 will remain in effect while the appeal is being considered. Official transcripts, diplomas, grades, or degrees may also be withheld pending conclusion of the appeal as permitted by subsection 11–703(a).

Subchapter 11–900. Disciplinary Records

Sec. 11–901. Details of Disciplinary Records

a. The definition of a Disciplinary Record is listed in Subchapter 9-300 and Sec. 11-300(12). Disciplinary records are confidential and may not be disclosed in whole or part except as provided in subchapter 9–300 of the Institutional Rules.

b. The Disciplinary Record will be separate from the student's academic record, will be confidential, and will not be revealed except on request of the student or in accordance with applicable state and federal law, or as otherwise provided in subchapter 9-300.

Sec. 11–902. Notice to Administrative Offices

a. Student Conduct will notify the Office of the Registrar and other appropriate administrative offices if a disciplinary sanction restricts a student from being enrolled at the University during the period of the sanction. A bar may be imposed by Student Conduct if one of the following sanctions has been assessed because of violation of a Regents' *Rule* or university rule or regulation:
   1. bar against readmission or bar against reenrollment;
   2. suspension from the University; or
   3. expulsion from the University.

b. Student Conduct will notify the Office of the Registrar and other appropriate administrative offices if any of the following sanctions are imposed: withholding grades, withholding official transcript or degree, denial of degree, or revocation of degree and withdrawal of diploma.

Sec. 11–903. Maintenance of Disciplinary Records

a. Disciplinary Records shall be maintained in accordance with Sec. 9-301 (p. 112).

b. A Disciplinary Record indicating an unresolved case (i.e., where a student has failed to respond to a summons, or where a student has failed to complete all assessed sanctions) shall be maintained by the University until such time as the case is resolved, at which point it will be maintained in accordance with Sec. 9-301 (p. 112).

Relates to *Handbook of Operating Procedures*, 3-3031.
Updated September 2025 to reflect policy changes effective September 1, 2025.

Chapter 12. Counseling and Mental Health Center

Subchapter 12 –100. General Provisions

Sec. 12–101. Purpose

The purpose of the Counseling and Mental Health Center (CMHC) is to assess the needs of students with mental health concerns and connect them to the most appropriate CMHC or community resource. The CMHC provides crisis intervention, individual counseling, group counseling and psychiatric services and medication, if indicated.

Sec. 12–102. Definitions

In this chapter, unless the context requires a different meaning, the following definitions apply.

1. "Assistant Vice President" means the assistant vice president of the Counseling and Mental Health Center.
2. "Services" means services provided by the Counseling and Mental Health Center.

3. “University” means The University of Texas at Austin.
4. “Student” means a person enrolled at the University.

Subchapter 12–200. Administration

Sec. 12–201. Duties of the Assistant Vice President

a. The assistant vice president will:
    1. maintain and administer programs and services so they relate meaningfully to the mental health needs of the student body and the consultation or training needs of students, faculty and staff,
    2. appoint assistants and coordinators for various phases of program planning, administration and development, and
    3. designate specific staff members to perform assigned duties in the absence of the assistant vice president.
b. The assistant vice president is responsible for the mission and services of the CMHC and is administratively responsible to and reports regularly to the associate vice president for health and well-being.

Sec. 12–202. Duties of the Directors and Associate Directors

a. The directors and associate directors are responsible for the duties assigned by the assistant vice president.
b. During the assistant vice president's absence, the directors, as designated, will assume the duties of the assistant vice president.

Subchapter 12–300. Services Provided

Sec. 12–301. Services Provided to Students

The services provide general and specific functions which include:

a. brief assessment and referral to determine which CMHC or community resources are most appropriate for the needs of the student;
b. individual counseling,
c. group counseling,
d. psychiatric evaluation and medication services,
e. crisis intervention, triage and 24/7 CMHC crisis line,
f. access to 24/7 real-time virtual counseling available via chat and phone,
g. integrated health services in collaboration with University Health Services,
h. counselors in academic residence (CARE),
i. mental health consultation and workshops,
j. traumatic events responses as requested, and
k. internships, practicum and residency programs for graduate-level, professional and medical students.

Sec. 12–302. Services Provided to the University

CMHC provides mental health consultation services to faculty, staff and administrators regarding student mental health concerns. Upon request, CMHC also responds to traumatic events impacting the campus and provides consultation to students, faculty, staff and administrators about coping with these events. CMHC is also a training facility for university professional and graduate students in counseling psychology, clinical psychology, social work, and medical school.

Subchapter 12–400. Counseling and Mental Health Center Records

Sec. 12–401. Confidentiality of Records

a. All original medical records (whether electronic or paper) and other records of treatment, whether originating within CMHC or another facility or provider, are the property of CMHC.
b. Confidentiality of CMHC records is governed by the laws of the State of Texas and applicable federal law. A notice of CMHC privacy practices is available at https://healthyhorns.utexas.edu/docs/HS-Notice-Privacy-Practices.pdf.
c. With certain exceptions, a student has the right to review, inspect or request copies of their medical record.
d. Many items summarizing patient care are available on the patient portal. Additional information from patient records will be release only with informed written consent.

Subchapter 12–500. Fees, Payment for Services, Eligibility for Counseling and Mental Health Center Services and Medical Withdrawals

Sec. 12–501. Fees

CMHC is funded by student tuition, university subsidies, charges to student clients, and grants and private contributions. Services are currently provided at no charge to students, except for psychiatric services. For more information about CMHC charges and payments go to http://www.cmhc.utexas.edu/charges.html.

Sec. 12–502. Payment for Services

Any student who incurs charges for CMHC services must pay the charges owed. If payment is not received or arrangements for payment are not made within 10 days of the date charges are posted to "What I Owe," a financial hold will be placed on the student's record. Students with a hold can contact the UHS/CMHC Billing and Insurance Office to discuss options that will allow them to register. Diplomas and/or continued registration will be withheld until outstanding charges have been paid. When necessary, CMHC will assist students in making arrangements for payment

Sec. 12–503. Eligibility for Counseling and Mental Health Center Services

An individual may use CMHC if:

a. the person is a currently registered student at the University;
    - Registered students are eligible to use CMHC services following this general eligibility calendar: fall semester eligibility starts August 1 and runs through December 31; spring semester eligibility starts January 1 and runs through the last day of the Maymester; summer eligibility begins the first day after the Maymester ends and runs through summer session graduation day. Specific eligibility dates are given in the Academic Calendar, published in the General Information Catalog and at the registrar website.
b. the person is a student covered by the Texas Student Experience Inter-agency Agreements such as the University of Texas Medical Branch and the University of Texas Health Science Center,
c. the person was registered during the semester immediately preceding the semester when services are requested (excluding University students who have graduated or withdrawn from the University before the twelfth class day of the current semester) and will enroll the semester immediately following the time services are requested,
d. the person has paid the access fee and is a visiting scholar/researcher who is not officially registered for classes at the University, a post-doctoral fellow or a person enrolled in the English as a Second Language Program,
e. the person has withdrawn from the University but was enrolled after the twelfth class day of the current semester,
f. the person is attending an orientation session for new students, but is not registered for the current semester, and requires CMHC crisis services,
g. the person is admitted to the University but is not registered for the current semester and requires CMHC Brief Assessment and Referral (BART) services or
h. the person meets one of the criteria above (a-h), is age 12 to 17 and is able either to consent to their own treatment according to the

State of Texas statute or has appropriate written consent from a parent or guardian.

Sec. 12-504. Medical Withdrawal

Requests for withdrawal from the university due to mental health reasons may be initiated at the request of the student. Applications to request consideration of a medical withdrawal should be submitted to Disability and Access. Disability and Access will involve CMHC as indicated by the student's individual circumstances.

Chapter 13. Speech, Expression, and Assembly

Subchapter 13–100. Governing Principles

Sec. 13–101. Freedom of Speech, Expression, and Assembly

1. The freedoms of speech, expression, and assembly are fundamental rights of all persons and are central to the mission of the University. In accordance with this Chapter, students, faculty members and staff members, have the right to assemble, to speak, and to attempt to attract the attention of others, and corresponding rights to hear the speech of others when they choose to listen, and to ignore the speech of others when they choose not to listen. Generally, University events and programming, and events at University spaces leased or managed by other parties, are outside the scope of this Chapter and are not considered expressive activity under this chapter. These events and activities may be implemented as approved by the appropriate vice president or under the applicable contractual terms.
2. In furtherance of the University's educational mission, the University is a limited public forum open only to the expressive activities of students, faculty and staff, as set forth in this Chapter. Students, faculty and staff may engage in expressive activities at the University in accordance with the rules contained in this Chapter, including applicable "time, place, and manner" rules as described in Subsection 13-304. Student, faculty, and staff organizations may not invite the public at large to events in the Common Outdoor Areas or Dedicated Areas while academic and administrative units may continue to invite the general public to their events.
3. Texas law reserves the authority and discretion to designate areas on campus that may be treated as traditional public forums open to the general public with The University of Texas System Board of Regents. No such areas are designated on campus.
4. Students, faculty, and staff members are free to express their views, individually or in organized groups, orally or in writing or by other symbols, on any topic, in all parts of the campus as permitted by law, and subject to the applicable University rules and policies. Teaching, research, and other official functions of the University will have priority in allocating the use of space on campus. The University's time, place, and manner rules in this Chapter apply to individuals and groups engaging in expressive activity and are necessary to preserve the University's efficient and effective operations and functions.
5. The University will not discriminate on the basis of the political, religious, philosophical, ideological, or academic viewpoint expressed by any person, either in the enforcement and administration of these rules or otherwise. This subsection does not limit the University's ability to enforce provisions involving prohibited conduct or categories of expression described in Subchapter 13–200.
6. The University of Texas at Austin Police Department (UTPD) and any other peace officer with lawful jurisdiction may immediately enforce these rules if a violation of these rules constitutes a breach of the peace, compromises public safety, or violates the law. They may also assist Dean of Students staff or other University officials, as appropriate, when individuals refuse to follow University rules.

Sec. 13–102. Scope of This Chapter and Related Provisions

1. This Chapter protects and regulates on-campus speech, expression, and assembly of students, faculty members, and staff members, regardless of whether those activities are part of the teaching, research, or other official functions of the University or whether they are sponsored by the University or any academic or administrative unit.
2. This Chapter applies to speech and expressive activity by University persons and University organizations defined in Section 13-103 that occur in the Common Outdoor Areas or Dedicated Areas. It also applies to speech made or conducted using university information resources as defined in University policies, regardless of whether the speech or expression was submitted for academic credit. The Dean of Students administers and schedules reservations for the use of temporary exhibit and banner spaces, University tables, and amplified sound because scheduling through a single office is necessary to avoid conflicts.
3. Any program or event sponsored by an academic or administrative unit of the University will have priority in the use of space and facilities over any speech, expression, or assembly that is not sponsored by an academic or administrative unit, except that programs or events sponsored by an academic or administrative unit will not have priority in the use of weekday amplified sound areas defined in Section 13–802. This Chapter does not limit other existing authority of University officials to authorize programs and events sponsored by the University or an academic or administrative unit that are not provided for in this Chapter.
4. Section 13–204 on harassment applies to all speech on campus, to speech made using University resources, and to off-campus speech that materially interferes with a person's education or employment.
5. Additional rules concerning free speech and academic freedom of faculty members are found in the Regents' *Rules and Regulations*, Rule 31004, Paragraph 2, Sections 1 and 2.
6. Additional rules concerning free speech at the University are found in the Regents' *Rules and Regulations*, Rule 40501, Rule 80101, Rule 80103, and Rule 80104. Chapter 13 of the *Institutional Rules* implements those provisions and applies them to UT Austin.
7. Rules requiring University employees to make clear that controversial statements are made in their personal capacity are found in the Regents' *Rules and Regulations*, Rule 10101, Section 7. Rules restricting use of University equipment, supplies, services, and working hours for political activities are found in the Regents' *Rules and Regulations*, Rule 30103.
8. If a deadline stated in this Chapter falls on a Saturday, Sunday, University holiday, or skeleton crew day, that deadline will be moved to the next day that is not a Saturday, Sunday, University holiday, or skeleton crew day.

Sec 13–103. General Definitions—Categories of Speakers and Users

In this Chapter, unless the context requires a different meaning, the following definitions apply.

1. "Academic or administrative unit" means any office or department of the University.
2. "Event" means something that occurs in a certain place during a particular interval of time. Events include but are not limited to presentations by guest speakers, assemblies, and other speech activities, which may include the distribution of literature or the use of exhibits, tables, or signs.
3. "Faculty member and staff member" includes any person who is employed by the University.
4. "Limited Public Forum" refers to the University's status as a place for University students, faculty, and staff to engage in expressive

activity pursuant to the reasonable restrictions on the time, place, and manner of expressive activities as set out this Chapter. This forum is not open to the general public for their expressive activity.

5. "Off-campus person or organization" and "member of the public" mean any person, organization, or business that is not an academic or administrative unit, a registered student, faculty, or staff organization, or a student, faculty member, or staff member.
6. "Registered faculty or staff organization" means a faculty organization or staff organization under the Regents'-*Rules and Regulations*, Rule 40201 and Handbook of Operating Procedures 4-1110-PM that has completed the University's registration process in Handbook of Operating Procedures 4-1110_PM.
7. "Registered or sponsored student organization" means a registered student organization or a sponsored student organization under Subchapter 6–200 of the *Institutional Rules*.
8. "Student" means a person who is currently enrolled at the University, or has been enrolled at the University in a prior semester or summer session and is eligible to continue enrollment in the semester or summer session that immediately follows.
9. "University person or organization" includes academic or administrative units, registered or sponsored student organizations, registered faculty or staff organizations, and individual students, faculty members, and staff members.

Sec. 13–104. Other General Definitions

In this Chapter, unless the context requires a different meaning, the following definitions apply.

1. "Amplified Sound" means sound whose volume is significantly increased by any electric, electronic, mechanical, or motor-powered means customarily used at large assemblies This includes public address systems, megaphones, microphones, and speakers. It does not include individual use of a cell phone or other small personal electronic device. Shouting, group chanting, and acoustic musical instruments are exempt from this definition and are not subject to the special rules on amplified sound, but are subject to general rules on disruption.
2. "Common Outdoor Area(s)" means outdoor space that is not regularly used for dedicated University business and its primary purpose is not an educational function or a research function. This space is generally open for use and enjoyment by University community members in the regular course of their days, pursuant to applicable rules. It does not include the outside surfaces of a University building, surfaces associated with or connected to a University building, a University structure, spaces dedicated to temporary outdoor banners, spaces dedicated to temporary outdoor exhibits, or any other Dedicated Areas. It is a Limited Public Forum not open to the general public for their expressive activities.
3. "Dean of Students" means the Dean of Students of The University of Texas at Austin or any delegate or representative of the Dean of Students.
4. "Dedicated Areas" means the University property, both indoors and outdoors, that is not the Common Outdoor Area. This includes the outside surfaces of a University building, surfaces associated with or connected to a University building, a University structure, spaces dedicated to temporary outdoor banners, spaces dedicated to temporary outdoor exhibits, and residential outdoor spaces managed by University Housing and Dining, including Jester Spanish Oaks Terrace, San Jacinto Amphitheatre, Honors Quad, Duren Courtyard, the Blanton Museum's outdoor Plaza and Art Garden, the Union Building Patios, the William C. Powers Jr. Student Activity Center patios, Goldsmith Hall, the pedestrian bridge adjoining the Graduate School of Business, Moody Pedestrian Bridge, and the Cronkite Plaza. These spaces are also part of the Limited Public Forum. This forum is not open to the general public for their expressive activity.
5. "Main Mall" means the area bounded by the south wall of the Main Building, the west walls of Garrison Hall, the north edge of Inner Campus Drive, the south wall of the Dorothy L. Gebauer Building and the east wall of Battle Hall. The Main Mall includes the south steps and south porches of the Main Building.
6. "Room or Space" includes any Room or Space, indoors or outdoors, owned or controlled by the University.
7. "Temporary Banner Space" means designated outdoor or indoor display area reserved for University persons and University organizations' use, as managed by the Dean of Students, where a University person or organization's temporary banner may be affixed for multiple days as permitted by Subsection 13–503. These areas are Dedicated Areas.
8. "Temporary Exhibit Space" means an outdoor display area, designated and managed by the Dean of Students, where an authorized person or organization may erect a temporary exhibit as permitted by Subsection 13–503. These areas are Dedicated Areas.
9. "University" means The University of Texas at Austin.
10. "Vice President" means the Vice President for Student Affairs at The University of Texas at Austin.

Sec. 13-105. Prohibited Items or Actions

The following restrictions apply to a person's expressive activities and are intended to protect the health and safety of all persons on campus, to maintain the free flow of pedestrian traffic in and out of University buildings, and to protect the educational mission of the University.

1. The following items are prohibited on campus:
   a. A mask, facial covering, or disguise that conceals the identity of the wearer that is calculated to obstruct the enforcement of these rules or the law, or to intimidate others, or hinder or interrupt a University official, UTPD officer, or other person in the lawful performance of their duty;
   b. The possession, use, or display of firearms, facsimile firearms, ammunition, explosives, or other items that could be used as weapons, as determined by University staff, including but not limited to sticks, poles, clubs, swords, shields, or rigid signs that can be used as shields, without prior written permission from the Dean of Students, unless authorized by federal, state or local laws;
   c. Body armor or makeshift body armor, helmets and other garments, such as sporting protective gear, that alone or in combination could be reasonably construed as weapons or body armor, without prior written permission from the Dean of Students; and
   d. Open flame, unless approved in advance by The University of Texas at Austin Fire Marshal with notice of that approval provided in advance to the Dean of Students.
2. The following activities are prohibited on campus:
   a. Engaging in expressive activities using Amplified Sound in a manner that is calculated to obstruct the enforcement of these rules or the law, to intimidate others, to hinder or interrupt a University official, UTPD officer, or other person in the lawful performance of their duty, or to interfere with the operation of the educational mission of the University;
   b. Camping, erecting tents, or constructing other living accommodations;
   c. Lowering a flag of the United States of the State of Texas owned or maintained by the University with the intent to raise the flag of or representing another nation, an organization, or a group of people;
   d. Engaging in expressive activities in Common Outdoor Areas or outdoor spaces in the Dedicated Areas in a manner that materially and substantially disrupts the functioning or education

mission of the University. This may include using Amplified Sound, drums, or other musical or percussive instruments (including makeshift instruments), engaging in coordinated group chanting and yelling, or presenting Guest Speakers in a manner that results in distracting or intrusive sounds that can be heard in an academic, administrative, or residential building. The time, day, and point in the semester all may impact whether an activity in a specific location is disruptive. For example, events in the evening during the last two weeks of the fall or spring semesters may disrupt course review sessions and studying for or taking final exams. At other points in the semester, the same activity in that location may not cause a disruption if academic activity is not occuring.

3. No person or organization may engage in expressive activity within a ten-foot clearance around points of entry and the perimeter of all University buildings. In some instances, as determined by University staff and based on specific circumstances, a greater perimeter may be required to prevent disruption to events occurring inside buildings.
4. Students and employees of the University must present proof of identity and status at the University on request by a University official on campus engaging in an official duty.
5. No University person or organization, other than an academic or administrative unit, may invite Off-campus persons or organizations to attend their events in the Common Outdoor Area.

Subchapter 13–200. Prohibited Expression

Sec. 13–201. Obscenity

No person or organization will distribute or display on the campus any writing or visual image, or engage in any public performance, that is obscene. A writing, image, or performance is "obscene" if it is obscene as defined in Texas Penal Code, Section 43.21 or successor provisions, and is within the constitutional definition of obscenity as set forth in decisions of the United States Supreme Court.

Sec. 13–202. Defamation

1. No person shall publish to a third party any statement that defames any other person.
2. A statement defames another person if it is: (i) published to a third party other than the subject of the statement or their legal representative; (ii) of and concerning that person; (iii) is a false statement of fact; (iv) that holds the person up to hatred ridicule or contempt; (v) is made negligently, if the person is a private figure or, if the person is a public official or public figure, with knowledge of falsity or reckless disregard of the truth; (vi) which proximately causes damages; and (vii) is not privileged.

Sec. 13–203. Incitement to Imminent Violations of Law

No person will make, distribute, or display on the campus any threat to engage in unlawful activity or any statements directed to inciting or producing imminent violations of law under circumstances such that the statements are likely to actually and imminently incite or produce violations of law.

Sec. 13–204. Harassment

1. No person will engage in conduct that constitutes harassment of another person or make, distribute, or display on the campus or through University information resources any statement that constitutes harassment of any other person. This Section applies to all speech at UT Austin, all speech made using University resources, including speech that is part of teaching, research, or other official functions of the University whether in person or not, and whether oral, written, or symbolic, and off-campus speech that materially interferes with a person's education or employment.
2. "Harassment" means hostile or threatening conduct or speech, whether oral, written, or symbolic, that (1) is sufficiently severe, pervasive, and objectively offensive to create an objectively hostile or threatening environment that interferes with or diminishes the victim's ability to participate in or benefit from the services, activities, or privileges provided by the University; and (2) personally describes or is personally directed to one or more specific individuals. When harassment is sex or gender based, the definitions for quid pro quo and hostile environment harassment, set out in Handbook of Operating Procedures 3-3031(V)(B), apply over this policy's harassment provision.
3. To make an argument for or against the substance of any political, religious, philosophical, ideological, or academic idea is not harassment, even if some listeners are offended by the argument or idea.
4. Verbal harassment may consist of threats, insults, epithets, ridicule, personal attacks, or the categories of harassing sexual speech set forth in Policy 3-3031 of the Handbook of Operating Procedures.
5. Harassment can also consist of nonverbal conduct, such as hazing, practical jokes, damage to property, and physical assault. In the case of sexual harassment and other sex-based misconduct, sexual conduct is often central to the offense. These forms of harassment are prohibited by Policy 3-3031 of the Handbook of Operating Procedures, and by the Regents' *Rules and Regulations*, Rule 30105. Some forms of harassment violate the Prohibition of Campus Violence, Policy 8-1010, in the Handbook of Operating Procedures. Harassment directed at an individual or group of individuals because of race, sex, or certain other characteristics is prohibited by Handbook of Operating Procedures 3-3020. For enhanced sanctions for disciplinary offenses motivated by the race, color, or national origin of a student harmed by the offense, see Subsection 11–701(b) of the *Institutional Rules*. To the extent of any conflict in the definition of verbal harassment, the more detailed definition in this Section controls.
6. An essential part of higher education is to learn to separate substantive argument from personal offense. Inherent in freely exploring ideas and engaging in educational inquiry is discussion where controversial and offensive ideas may be expressed and even welcomed in furtherance of free inquiry and pursuit of knowledge. We strive as a university community to express even the deepest disagreements in a manner that reflects mutual respect, understanding, and sensitivity within the University and in the larger society. These are community norms, even though they cannot be enforced by disciplinary rules. Sometimes community members may engage in a manner that falls short of the desired norms, but this failure does not convert the communication at issue to harassment or a conduct violation.
7. This policy should be interpreted as narrowly as need be to preserve its constitutionality.
8. Members of the University community are encouraged to report harassment and in some cases are required to do so by law. See Handbook of Operating Procedures 3-3031 and 3-3020 for more information. Investigation of the information provided, and any remedial or disciplinary proceedings, will proceed under the procedures set out in the appropriate policy.

Sec. 13–205. Solicitation & Commercial Speech

1. General Rules.
   a. Except as expressly authorized by Subsection 13-205(2), by Section 13-403, or by the Regents' *Rules and Regulations*, no person--including a University person, a University organization, or a member of the public shall make or display any statements that:
      i. promote, offer, or advertise a product or service for sale or lease;

ii. include commercial identifiers, like logos, trademarks, or service marks, associated with a for-profit entity; or

iii. request gifts or donations unless it's specifically authorized under University rule or policy, or Regents' Rules.

b. Words or symbols on personal apparel, or on decals or bumper stickers affixed to a vehicle by an owner of that vehicle, are not solicitation within this definition.

c. Unadorned acknowledgments or thanks to donors are not solicitation within this definition.

2. Rules specific to campus community members.

a. A registered or sponsored student organization or a registered faculty or staff organization may advertise or sell merchandise, publications, food, or nonalcoholic beverages, or request contributions: for the benefit of the registered or sponsored student organization or registered faculty or staff organization; for the benefit of another registered or sponsored student organization or registered faculty or staff organization; or for the benefit of an organization that is tax-exempt under Section 501(c)(3) of the Internal Revenue Code. No organization may sell items obtained on consignment. No organization may request contributions for an off-campus tax-exempt organization for more than fourteen days in any fiscal year.

b. Registered or sponsored student organizations, registered faculty or staff organizations, and academic or administrative units may sell, distribute, or display literature that contains advertising, subject to the limits in Section 13–403. Individual students, faculty members, and staff members may distribute or display such literature, but may not sell it.

c. Individual students, faculty members, and staff members may post advertisements for roommates, subleases, and sales of used goods that the seller has personally owned and used, but only on a bulletin board or website designated for that purpose by an academic or administrative unit in space that the unit occupies or controls. Any unit that designates a bulletin board or website for this purpose may regulate that bulletin board or website under the procedures set forth in Section 13–504.

d. A resident of a University residence hall or apartment building may occasionally invite one or more salespersons to come to the resident's room or apartment, and in that room or apartment, the salesperson may offer products or services for sale to other residents of that residence hall or apartment building.

e. A registered or sponsored student organization or a registered faculty or staff organization may collect admission fees for programs scheduled in advance in accordance with Subchapter 10–200 of the *Institutional Rules*.

f. A registered or sponsored student organization or a registered faculty or staff organization may collect membership fees or dues at meetings of the organization scheduled in advance under Subchapter 10–200 of the *Institutional Rules*.

g. A registered student organization that is a qualified organization as that term is defined in the Texas Charitable Raffle Enabling Act, Texas Occupations Code, Chapter 2002 or successor provisions, may sell charitable raffle tickets pursuant to that act.

h. A registered or sponsored student organization or a registered faculty or staff organization may host a public performance of a film scheduled in advance in accordance with Subchapter 10–200 of the- *Institutional Rules*. In accordance with the Regents' *Rules and Regulations*, Rule 80103, admission fees may be collected. All registered or sponsored student organizations or registered faculty or staff organizations that exhibit films on campus must obtain a Public Performance License for the individual film(s) from a licensing agent. This license is required even if the exhibition of the film is offered to the public for free and is educational in nature. Registered or sponsored student organizations and registered faculty or staff organizations will be required to follow the process prescribed by the film distributor to obtain approval to exhibit the film. Federal copyright laws generally protect all films viewed in public areas, regardless of format. However, registered or sponsored student organizations and registered faculty or staff organizations may exhibit a film publicly if:

i. the film is in the public domain; or

ii. the organization has written permission from the film's producer or other holder of the right to grant such permission; or

iii. the film is obtained from a company that provides a Public Performance License with the purchase or rental of the film.

3. More detailed regulation of solicitation appears in the Regents' - *Rules and Regulations*, Rule 80103.

Sec. 13–206. Antisemitic and other discriminatory conduct.

1. "Antisemitism" means a certain perception of Jews that may be expressed as hatred toward Jews. The term includes rhetorical and physical acts of antisemitism directed toward Jewish or non-Jewish individuals or their property or toward Jewish community institutions and religious facilities.

2. Any incitement of violence, incitement of imminent violation of law, harassment, property damage, disruption of a university activity, or any other violation of state or federal law or university policy that was committed because of antisemitism or the offender's bias or prejudice against a group identified by race, color, disability, religion, national origin or ancestry, age, gender, or sexual preference will be subject to discipline, up to and including possible termination/ expulsion.

3. Any registered student group that engages in incitement of violence, incitement of imminent violation of law, harassment, property damage, disruption of a university activity, or any other violation of state or federal law or university policy because of antisemitism or bias or prejudice against a group identified by race, color, disability, religion, national origin or ancestry, age, gender, or sexual preference, is subject to discipline, up to and including possible loss of recognized status for the registered student group.

4. The University's Nondiscrimination Policy, Handbook of Operating Procedures 3-3020, separately prohibits subjecting individuals or groups to discrimination or harassment because of their race, color, sex, pregnancy, gender, gender identity, sexual orientation, gender expression, religion, age, national origin, ethnicity, veteran status, disability, genetic information, military status, or any other legally protected basis.

Subchapter 13–300. General Rules on Means of Expression

Sec. 13–301. Disruption

1. Except as expressly authorized in Section 13–802, or by an authorized University official responsible for a program or event sponsored by an academic or administrative unit, no speech, expression, or assembly may be conducted in a way that disrupts or interferes with:

a. Any teaching, research, administration, function of the University, or other authorized activities on the campus;

b. The free and unimpeded flow of pedestrian and vehicular traffic on the campus; or

c. Any public assemblies, distribution of literature, guest speakers, or use of signs, tables, exhibits, or approved amplified sound by the University or another person or organization acting under the rules in this Chapter.

2. Scope

a. The term “disruption” and its variants, as used in this Rule, are distinct from and broader than the phrase “disruption of activities,” as used in the Regents’ *Rules and Regulations,* Rule 30103, Number 2, Section 2, and the phrase “disruptive activities,” as used in the Regents’ *Rules and Regulations*, Rule 40502. This Rule is concerned not only with deliberate disruption, but also with scheduling and coordination of events to manage or minimize the inevitable conflicts between legitimate events conducted in close proximity, and to preserve the University’s ability to execute its functions.

b. In determining whether speech or expressive activity constitutes "disruption" as used in this Rule, University authorities shall exercise their reasonable discretion to protect the rights of University persons to engage in speech and expressive activities while preserving the University's ability to execute is function. In making this assessment, University officials shall not be influenced by the viewpoint of the speaker or by the viewpoint of any person objecting to allegedly disruptive expression.

c. During the period of final exams and the week immediately preceding final exams, the use of Amplified Sound, drums, or other musical or percussive instruments (including makeshift instruments) in the Common Outdoor Areas or outdoor spaces of the Dedicated Areas is in fact disruptive of University students' ability to prepare for and take their final exams if the activity produces distracting or intrusive sound that can be heard in an academic, administrative, or residential building. During this two week period, the University prohibits these activities and other expressive activites in the Common Outdoor Areas or outdoor spaces of the Dedicated Areas, including presentations by guest speakers, if they result in distracting or intrusive sound that can be heard in an academic, administrative, or residential building. During this time, persons may still engage in other expressive activity permitted by this Chapter. This provision does not limit the University's ability to hold University events during this time period.

d. If amplified sound is authorized for an event under this Chapter, the sound must be turned off by 10:00 p.m. that day.

e. Drums or other musical or percussive instruments (including makeshift instruments) without amplified sounds may be used except when they become disruptive whether because of volume, repeated sound audible in academic or administrative buildings, or any other appropriate basis as determined by the University official charged with managing disruption during the public assembly.

f. As part of the University's educational mission, the University provides dormitories and other living spaces for its students and employees. The University strives to create living spaces that permit a resident to live comfortably, including providing quiet hours to ensure residents have conditions conducive to adequate study, rest, and sleep. With this in mind, any expressive activity in the Common Outdoor Area and outdoor spaces of the Dedicated Areas is deemed disruptive if the sound created by the activity can be heard from a University residence after 10:30 p.m. and before 8:00 a.m. the following morning.

3. Potentially disruptive events can often proceed without disruption if participants, administrators, and law enforcement officials cooperate to avoid disruption without stopping the event. In cases of marginal or unintentional disruption, administrators and law enforcement officials should clearly state what they consider disruptive and seek voluntary compliance before stopping the event or resorting to disciplinary charges or arrest.

4. The University is responsible for safety on campus. During periods of disruption as determined by the president, president's delegate, dean of students, or other university official charged with managing activities, events, or space, staff may ask an individual to briefly open a cooler, ice chest, or other receptacle to allow a visual inspection for the presence of weapons or other prohibited items. If a person declines to open the container, they may not remain in the area with the container capable of holding weapons or other prohibited items. Before staff can conduct visual inspections, it must contact the Office of the Vice President for Legal Affairs to ensure the course of action is reasonable, considering the circumstances, and does not violate the law, including but not limited to the Fourth Amendment to the United States Constitution. This provision does not modify, limit, or supersede security measures and policies concerning student housing, athletic events, performances in University venues, or other officially sanctioned events.

5. No assembled groups or individuals may refuse the direction of a University official or police officer to disperse or to cease conduct because it is a disruption to University functions or the educational environment.

Sec. 13–302. Impermissible Use of and Damage to Property

1. No speech, expression, or assembly may be conducted in a way that damages, defaces, marks (including by chalking), discolors, or alters in any way property of the University or of any person who has not authorized the speaker to damage or deface his or her property.
2. No person may damage, deface, mark, discolor, alter, or interfere with any sign, table, or exhibit posted or displayed by another person or organization acting under the rules in this Chapter.
3. No person may affix a sign, banner, hammock or other item on University property unless otherwise permitted by this Chapter.
4. No person may use or access University property, whether in the Common Outdoor Areas or the Dedicated Areas, in a manner outside of its intended or approved use or access. For example, this provision prohibits persons hanging items from University statues and outdoor art installations and from climbing, hanging from, or otherwise accessing University property in a way that is not otherwise permitted by this Chapter or other University policy. This prohibition also includes, but is not limited to, the activities prohibited by Section 11-402(12)(A-D) of Chapter 11 of the Institutional Rules on Student Services and Activities.

Sec. 13–303. Coercing Attention

1. No person may attempt to coerce, intimidate, or badger any other person into viewing, listening to, or accepting a copy of any communication.
2. No person may follow another person or persist in requesting or demanding the attention of any other person after that other person has attempted to walk away or has clearly refused to attend to the speaker’s communication.

Sec. 13–304. Other Rules with Incidental Effects on Speech

1. Other generally applicable or narrowly localized rules, written and unwritten, incidentally limit the time, place, and manner of speech, but are too numerous to compile or cross-reference here. For example, libraries typically have highly restrictive rules concerning noise; laboratories and rooms containing the electrical and mechanical infrastructure of the University typically have safety rules and rules excluding persons without specific business there; fire and safety codes prohibit the obstruction of exits and limit the constriction of hallways. Speech within classrooms is generally confined to the subject matter of the class; the right to attend a class at all is subject to registration and payment of tuition; individual professors may have rules of decorum in their classrooms. These “time, place, and manner” rules limit the rights of persons to enter and speak in the places to which these rules apply.
2. Reasonable and nondiscriminatory “time, place, and manner” rules generally control over the rights of free speech guaranteed in this

Chapter. But even "time, place, and manner" rules are subject to the constitutional right of free speech. Accordingly, such rules must be viewpoint neutral and cannot regulate speech more restrictively than they regulate other activities that cause the problems to be avoided by the rule, or more than is reasonably necessary to serve their purpose. Such rules cannot ban unobtrusive forms of communication with no potential for disruption even in the specialized environment subject to the localized rule. Thus, for example, means of silent expression or protest confined to the speaker's immediate person, such as armbands, buttons, and T-shirts, are nearly always protected because they are rarely disruptive in any environment.

3. While the University's Common Outdoor Areas are generally available to its students, faculty, and staff, for expressive activity, subject to the rules herein, the primary purpose and function of the University is an institution of higher education. In order to protect the core functions inherent to such an institution and its students, faculty, and staff, the Common Outdoor Area is generally open for expressive activity from 8:00 a.m. through 10:00 p.m., subject to this Chapter. Individuals and groups engaging in expressive activity outside of this permitted time period that is disruptive under Section 13-301 are subject to University discipline, removal, and/or arrest by law enforcement. University events and programming are not expressive activity subject to this curfew or other limitations in this rule.

Subchapter 13–400. Distribution of Literature

Sec. 13–401. General Rule on Distribution of Literature

1. "Literature" means any printed material, including any newspaper, magazine, or other publication, and any leaflet, flyer, or other informal matter, that is produced in multiple copies for distribution to potential readers.
2. Registered or sponsored student organizations, registered faculty or staff organizations, and academic or administrative units may sell, distribute, or display literature on campus, subject to the rules in this Subchapter and to the general rules in Subchapter 13–200 and Subchapter 13–300. Individual students, faculty members, and staff members may distribute or display literature, subject to the rules in this Subchapter and to the general rules in Subchapter 13–200 and Subchapter 13–300, but may not sell it. In either case, no advance permission is required.

Sec. 13–402. Not-for-Profit Literature Only

1. Except as expressly authorized by the Regents' *Rules and Regulations* or by contract with the University, no person or organization may sell, distribute, or display on campus any publication operated for profit. A registered or sponsored student organization or a registered faculty or staff organization may sell publications operated for profit as part of a fundraiser authorized by, and subject to the limits of, Subsection 13–205(b)(1).
2. A publication is operated for profit if any part of the net earnings of the publication, or of its distribution, benefits any private shareholder or individual.

Sec. 13–403. Limits on Advertising

Literature distributed on campus may contain the following advertising:

1. advertising for a registered or sponsored student organization, a registered faculty or staff organization, or an academic or administrative unit;
2. advertising for an organization that is tax exempt under Section 501(c)(3) of the Internal Revenue Code;
3. paid advertising in a publication primarily devoted to promoting the views of a not-for-profit organization or to other bona fide editorial content distinct from the paid advertising; and
4. other advertising expressly authorized by the Regents' *Rules and Regulations* or by contract with the University.

All other advertising in literature distributed on campus is prohibited.

Sec. 13–404. Clean Up of Abandoned Literature

Any person or organization distributing literature on campus will pick up all copies dropped on the ground in the area where the literature was distributed.

Subchapter 13–500. Signs, Banners, and A-Frames

Sec. 13–501. General Rule on Signs

1. "Sign" means any method of displaying a visual message to others, except that transferring possession of a copy of the message is distribution of literature and not a sign.
2. Subject to the rules in this Subchapter and to the general rules in Subchapter 13–200 and Subchapter 13–300, a University person or organization may display a sign by holding or carrying it, by displaying it at a table (see Subchapter 13–600), or by posting it on a bulletin board or other designated location, as permitted in the specific location. Signs may not be staked in the ground or posted in any other location except for those areas allowed by Subsections 13–304(a)-(b) and 13–504(a). Subject to viewpoint-neutral size requirements, University Housing and Dining has designated the windows and doors of a residence hall room as locations where the resident(s) of that room may post signs. Section 13–504 lists other designated locations.

Sec. 13–502. Hand-Held Signs

1. A University person or University organization may display a sign on campus by holding or carrying it by hand or attaching it to their person. No advance permission is required. Signs on sticks or poles or otherwise attached to any device are prohibited.
2. Hand-held signs constructed of materials that create a hazard to other people are not permitted. Signs constructed of rigid materials, including sticks, poles, wood, metal, hard plastic, or other materials that could be construed as a hazard are not permitted.
3. Any person holding or carrying a sign will exercise due care to avoid bumping, hitting, or injuring any other person.
4. Any person holding or carrying a sign at a speech, performance, or other event will exercise due care to avoid blocking the view of any other person observing the speech, performance, or event. Depending on the venue, this may mean that signs may be displayed only around the perimeter of a room or an audience.
5. A law enforcement officer, the Dean of Students, or an usher or other University employee (if authorized by officials responsible for managing the venue), may warn any person that his or her sign is being handled in violation of Subsections 13–502(a), (b), (c) or (d). If the violation persists after a clear warning, the law enforcement officer, Dean of Students, authorized usher, or other authorized employee may confiscate the sign. A law enforcement officer may take any appropriate action necessary to keep the peace, including but not limited to requiring the person to leave the area, issuing a criminal trespass warning to, or arresting the violator.

Sec. 13–503. Banners

"Banner" means an affixed, stationary sign hung from a structure or building or between two buildings, structures, or poles. Banners on poles may not be carried by individuals.

1. Hand-held banners. University persons and University organizations are permitted to display a hand-held banner carried by two or more individuals without poles, in accordance with Rule 13–502 above, in the Common Outdoor Areas.
2. Temporary banner space designations.

a. The Dean of Students will designate temporary banner spaces where banners may be hung in outdoor locations not occupied or controlled by any other academic or administrative unit.
b. Other academic or administrative units may designate one or more temporary banner spaces where banners may be hung in indoor or outdoor locations that the unit occupies or controls.

3. Space priority.
   a. Academic or administrative units, registered or sponsored student organizations, and registered faculty or staff organizations may hang banners in locations designated under Subsection 13–503(b). The Dean of Students may set reasonable limits on the number of banners that any unit or organization may hang at one time.
   b. Advance permission is required from the unit administering the location; usually, advance reservations are required. Academic or administrative units advertising official University events or programs may be given priority. In locations administered by academic or administrative units other than the Dean of Students, organizations affiliated with the unit administering the location may be given priority.
4. Time limits.
   a. In locations administered by the Dean of Students, each banner may be hung with a minimal commitment of one week. After the initial week reservation, the banner may be renewed from week to week, for up to four weeks, if space is available.
   b. Other units administering a location for banners may limit the time each banner may hang. Any such time limit will be applied without discrimination to all organizations, except that academic or administrative units may be given preference.
5. The Dean of Students will maintain, on a website or on a flyer or pamphlet available at the Dean of Students' office:
   a. a list of outdoor temporary banner spaces where banners may be hung;
   b. the academic or administrative unit that administers this banner policy at each outdoor location; and
   c. a current description of the rules and procedures for reserving a temporary banner space in order to hang a banner in locations administered by the Dean of Students.
6. The unit administering a banner location may require that the physical work of hanging the banners be performed only by Department of Facilities Services employees or other appropriate University personnel.
7. A law enforcement officer, a dean of students staff member, or other University official charged with managing activities, events, or spaces may confiscate banners handled or affixed in violation of this Policy or in instances that create a safety concern.

Sec. 13–504. Signs in Other Designated Locations (Including Departmental Bulletin Boards)

1. Each academic or administrative unit may authorize the posting of signs in spaces that unit occupies and controls. Such authorization may be granted by general rule, by stamping or initialing individual signs, or by longstanding tradition.
2. Signs in spaces occupied by academic or administrative units may be:
   a. confined to bulletin boards or other designated locations;
   b. subjected to viewpoint-neutral rules limiting the size of signs, limiting how long they may be posted, requiring each sign to show the date it was posted and the name of the person or organization who posted it, and similar rules designed to facilitate fair and equal opportunities to post signs; and
   c. confined to official statements or business of the unit, or to certain subject matters of interest within the unit, or to signs posted by persons or organizations affiliated with the unit.
3. confined to bulletin boards or other designated locations; Each academic or administrative unit will post on or near each bulletin board or other designated location that it administers:
   a. either the rules applicable to that bulletin board or location, or a particular office or website where the rules applicable to that bulletin board or location may be found; and
   b. if a stamp or initials are required on signs before they are posted on that bulletin board or location, the name and office location of the person whose stamp or initials are required. This notice will be posted in the upper left corner of each bulletin board or other designated location for posting signs, or conspicuously in another nearby location. If no such notice is posted, then the only applicable rules are those contained in Subchapter 13–200 and Sections 13–301 to 13–304.
4. Within the scope of the subject matters permitted on a particular bulletin board or other designated location, no academic or administrative unit will discriminate on the basis of the political, religious, philosophical, ideological, or academic viewpoint expressed on a sign.
5. This Section does not apply to any enclosed bulletin board or display case that is accessible only to authorized personnel for official University business.

Subchapter 13–600. Tables

Sec. 13–601. General Rule on Tables

University persons and University organizations may set up tables to display literature, disseminate information and opinions, and raise funds, subject to the location restrictions and other rules in this Subchapter and to the general rules in Subchapter 13–200, Subchapter 13–300, and Subchapter 13–1000. University persons and University organizations do not need advance permission to set up tables but are encouraged to reserve tabling space on the West Mall and in other high-demand areas where tabling spaces are designated and limited.

Sec. 13–602. Locations

1. Subject to the restrictions elsewhere in these rules, including in Subsection 13–602(b) and the rules on disruption of other functions and interference with vehicular and pedestrian traffic (see Section 13–301), University persons and University organizations may set up tables on impervious surfaces in the Common Outdoor Areas on the campus. University persons and University organizations may set up tables in University buildings in any large, open, indoor location as permitted by the specific building protocols and with permission of the academic or administrative unit controlling the space. In some buildings, tabling may be prohibited completely. The Main building is not available for tabling at any time
2. Additional restrictions.
   a. Tables may not be set up on the Main Mall between 8:00 a.m. and 5:00 p.m. on weekdays, or on the west side of any portion of Speedway at any time.
   b. Tables may not be set up in areas covered by grass, landscaping, or other pervious substances.
   c. Tables may not be set up inside any library, classroom, laboratory, performance hall, stadium, or office, or in any hallway less than ten feet wide, without permission from the academic or administrative unit that controls the space, or from the faculty member or staff member who controls the space at a particular time.
   d. An academic or administrative unit may further specify these rules by restricting tables to reasonable locations in spaces occupied by that unit. Academic and administrative units are encouraged to state any such rules clearly in writing and to

publish those rules on a website or on a flyer or pamphlet available at the chief administrative office of the unit.

e. Tabling space on the West Mall or on the east side of Speedway between 21st Street and the south edge of Gregory Plaza may be reserved by University persons and University organizations by submitting a request using the appropriate form on HornsLink.org. University persons and University organizations are not required to have a reservation to table on the West Mall or on the east side of Speedway between 21st Street and the south edge of Gregory Plaza, but are encouraged to secure a reservation. Tabling space on the West Mall or on the east side of Speedway between 21st Street and the south edge of Gregory Plaza may be reserved up to four weeks in advance by University persons or organizations.

f. Tables must be attended at all times. Unattended tables and their contents may be confiscated by University personnel.

3. If any table is set up in a prohibited or disruptive location, any University employee pointing out the violation is encouraged to also point out other locations, as nearby as is reasonably possible, where the table is permitted.

Sec. 13–603. Tabling Cleanup

Every person or organization sponsoring a table will remove their table, items used during tabling, and any litter from the area around the table before vacating the space.

Sec. 13–604. Sources of Tables

University persons and organizations may supply their own tables. In addition, the Dean of Students maintains a supply of tables for registered or sponsored student organizations that may be checked out for use on campus in designated areas. The Dean of Students will maintain on a website a current description of the rules and procedures for checking out tables. University persons and organizations, other than registered or sponsored student organizations, must supply their own tables.

Subchapter 13–700. Exhibits

Sec. 13–701. General Rule on Exhibits

1. "General exhibit" means an object or collection of related objects, designed to stand on the ground or on a raised surface, which is not a table, is designed for temporary display, and is not permanently attached to the ground including, but not limited to floor decals, flags, outdoor decorations, and panels.
2. "A-frame exhibit" means a movable and self-supported sign board designed to stand on the ground and remain overnight in a temporary outdoor exhibit space. A-frame exhibits may not exceed five feet in height or width. Structures that do not meet these criteria will be considered general exhibits and will be subject to the rules governing general exhibits.
3. Academic or administrative units, registered or sponsored student organizations, and registered faculty or staff organizations may erect general exhibits and A-frame exhibits, subject to the rules in this Subchapter and to the general rules in Subchapter 13–200, Subchapter 13–300, and Subchapter 13–1000. Advance permission is required from the Dean of Students, except that an academic unit may authorize indoor exhibits in a space that it occupies and controls. A-frame exhibits may not be erected on the Main Mall at any time. Individual students, faculty, or staff may not erect general exhibits, but may—with permission from the Dean of Students—erect A-frame exhibits in approved locations, subject to the rules in this Subchapter and the general rules in Subchapter 13–200, Subchapter 13–300, and Subchapter 13–1000.

Sec. 13–702. Application Process

Requests for approval of, or reservation of space for, outdoor general exhibits and A-frame exhibits may be submitted via the appropriate form on HornsLink.org.

Sec. 13–703. Approval Process

1. General exhibits.
   a. The Dean of Students will designate temporary outdoor exhibit spaces where academic or administrative units, registered or sponsored student organizations, and registered faculty or staff organizations may place general exhibits upon approval by the Dean of Students. Applications must, where feasible, be submitted at least fourteen days in advance of the beginning of the requested display period. The Dean of Students will approve a general exhibit described in a completed and timely application under Section 13–702 unless the Dean of Students disapproves the application under the criteria in Section 10–203 of the Institutional Rules, or for other good cause. The Dean of Students will, if possible, advise the applicant how to correct any conditions that preclude approval of the application.
   b. The Dean of Students will consider the totality of the circumstances, including safety concerns, as part of the approval process.
2. A-frame exhibits.
   a. The Dean of Students will designate locations where A-frame exhibits may be placed. If an academic or administrative unit, a registered or sponsored student organization, or a registered faculty or staff organization wishes to place an A-frame exhibit in a location that is not one of the designated A-frame exhibit locations, then the structure will be considered a general exhibit under this Subchapter and may be placed, if approved, only in a designated temporary outdoor exhibit space. Individual students, faculty, or staff may not erect A-frame exhibits outside of the designated A-frame exhibit locations.
   b. The Dean of Students will maintain, on a website, a current description of the rules and procedures for reserving a space for A-frame exhibits on campus. Space for A#frame exhibits may be reserved up to four weeks in advance by University persons or organizations and up to three weeks in advance by members of the general public. The Dean of Students may establish reasonable limits on the number of times per semester or per academic year an individual or organization may reserve space for an A-frame exhibit.
   c. The Dean of Students may establish reasonable limits on the number of A-frame exhibits that an individual or organization may display in a designated area, or on campus, at any time.

Sec. 13–704. Time Limits

1. General exhibits.
   a. In locations administered by the Dean of Students, each exhibit may be displayed for up to fourteen consecutive days. The exhibit may be renewed for an additional fourteen days if space is available.
   b. The exhibit may be displayed no earlier than 8:00 a.m. and must be removed by 10:00 p.m. each day and may be re-erected each morning during the permit period. Requests to display exhibits overnight will be considered on a case-by-case basis and subject to Subsection 13–703.
   c. If an exhibit is displayed without permission, including outside the permit period, the exhibit may be removed by the Department of Facilities Services at the expense of the person or organization sponsoring the exhibit.
2. A-frame exhibits.
   a. Each A-frame exhibit may be placed for up to fourteen consecutive days and remain overnight. The A-frame exhibit may be renewed for an additional fourteen consecutive days if space is available.
   b. If an A-frame exhibit is left on campus without permission, including outside the permit period, the exhibit may be removed

by the Department of Facilities Services at the expense of the person or organization sponsoring the exhibit.

Sec. 13–705. Exhibit Cleanup

The person or organization sponsoring an exhibit will remove the exhibit and any litter from the area around the exhibit before vacating the space.

Sec. 13–706. Liability

The person or organization sponsoring an exhibit assumes full responsibility for the exhibit, including all injuries or hazards that may arise from the exhibit. The University will not be liable for any damage that may occur to the exhibit, and the person or organization sponsoring the exhibit will indemnify the University for any claims arising from the exhibit's presence on campus.

Subchapter 13–800. Amplified Sound

Sec. 13–801. General Rule on Amplified Sound

University persons and organizations may use amplified sound on campus at designated times and locations, subject to the rules in this Subchapter and to the general rules in Subchapter 13–200 and Subchapter 13–300. Advance permission is required. Academic and administrative units need not obtain permission from the Dean of Students to use amplified sound in areas under their control, but should provide advance notice to the Dean of Students when feasible so that the Dean of Students can coordinate timing and help units avoid conflicts. This Subchapter creates limited exceptions to the general rule on disruption in Section 13–301. An Amplified Sound Areas Map may be found here.

Sec. 13–802. Location and Times of Weekday Amplified Sound Areas

1. Winship Circle Amplified Sound Area.
   a. The Winship Circle Amplified Sound Area is the grassy area east of the East Mall Fountain, west of Waller Creek, and south of Winship Hall.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.
2. Battle Oaks Amplified Sound Area.
   a. The Battle Oaks Amplified Sound Area is the area bounded by the north wall of Hogg Auditorium, by an extension drawn northward from the east wall of the Texas Union, by the south edge of the sidewalk on the south side of 24th Street, and by the west edge of the sidewalk on the west side of Inner Campus Drive.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.
3. Mustangs Amplified Sound Area.
   a. The Mustangs Amplified Sound Area is the area bounded by the sidewalk on the east side of San Jacinto Boulevard, by the west wall of the Texas Memorial Museum, and by the outer edge of the two stairways on either side of the lawn.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.
4. San Jacinto Street Amplified Sound Area.
   a. The San Jacinto Street Amplified Sound Area is the area bounded by the south wall of the Art Building, by the east edge of the sidewalk on the east side of San Jacinto Boulevard, by the north edge of the sidewalk on the north side of 23rd Street, and by the west edge of the sidewalk on the west side of Trinity Avenue.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.
5. LBJ Fountain Amplified Sound Area.
   a. The LBJ Fountain Amplified Sound Area is the area bounded by the east edge of Robert Dedman Drive, by the first sidewalk north of the LBJ Fountain, by a line drawn tangent to the west side of the LBJ Fountain and parallel to Robert Dedman Drive, and by the base of the hill on the south side of the LBJ Fountain.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.
6. 2609 University Avenue Courtyard Amplified Sound Area.
   a. The 2609 University Avenue Courtyard Amplified Sound Area is the area bounded by the 2609 University Avenue Building on the north, south and east sides, and by the east edge of the sidewalk on the east side of University Avenue.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.
7. Creekside Residence Hall Lawn Amplified Sound Area.
   a. The Creekside Residence Hall Lawn Amplified Sound Area is the area bounded by Dean Keeton Street on the north, by Waller Creek on the east and south, and by San Jacinto Boulevard on the west and south.
   b. University persons and University organizations may use amplified sound in this area from 8:00 a.m. to 5:00 p.m. on weekdays.

Sec. 13–803. Regulation and Scheduling of Weekday Amplified Sound

1. The Dean of Students may prescribe rules concerning scheduling, sound levels, the location of speakers and the direction in which they are pointed, and other rules to facilitate the use of weekday amplified sound areas, to mediate any conflict with University functions and other nearby activities, and to manage environmental impact. All such rules will be reasonable and nondiscriminatory.
2. Reservations.
   a. University persons and University organizations wishing to use a weekday amplified sound area must reserve a particular area at a particular time. Reservations by University persons and University organizations must be made with the Dean of Students on the appropriate form on HornsLink.org prescribed by the Dean of Students. The Dean of Students will approve a properly completed application to reserve an amplified sound area, unless the application or request must be disapproved under the criteria in Section 10–203 of the *Institutional Rules* or under rules promulgated by the Dean of Students under the authority of this Section.
   b. The Dean of Students may limit the number or frequency of reservations for each applicant to ensure reasonable access for all persons and organizations desiring to use amplified sound on weekdays.
   c. When amplified sound areas are not reserved for use for an assembly including amplified sound, they are available to University persons and University organizations without reservation, for permitted expressive activities that do not involve amplified sound. Permission to use such areas without a reservation does not include permission to use amplified sound without a reservation. Any University person or University organization using or occupying the space without a reservation must yield control of the space in time to permit any user with a reservation to begin using the space promptly at the beginning of the reserved time.
3. Amplified sound in the West Mall Sound Area is in fact disruptive of teaching, administration, and research in the Main Building, in the Flawn Academic Center, in Goldsmith Hall, in the West Mall Office Building, and in Battle Hall. Amplified sound in the Winship Circle Amplified Sound Area is in fact disruptive of teaching, administration, research and performance in College of Liberal Arts Building, the

Laboratory Theatre and Winship Hall. The disruption inherent in this use of amplified sound is expressly authorized, but no other disruption is authorized. Disruption is permitted to this extent because otherwise, it would be necessary to ban all use of amplified sound in and near the center of campus during working hours.

4. University persons and University organizations using amplified sound are responsible for maintaining a passageway for pedestrians that is adequate to the volume of pedestrian traffic passing through the area. Should the size of the assembly exceed the maximum number of participants that is safe for a given location, participants will be directed by campus authorities to relocate to a space that is better suited to the size of the assembly.
5. The amplified sound locations are maintained on the Amplified Sound Areas Map. Any designations of additional areas, any additional rules regulating the designated areas, and the rules and procedures for reserving the use of a designated area, will be clearly stated on a Dean of Students site.

Sec. 13–804. Amplified Sound on Evenings and Weekends

1. With advance permission, University persons and University organizations may use amplified sound in any location in the Common Outdoor Areas of campus, including the weekday amplified sound areas designated in Section 13–802, after 5:00 p.m. on weekdays, and after 8:00 a.m. on weekends.
2. If amplified sound is authorized for an event , the sound must be turned off by 10:00 p.m.
3. The Dean of Students may prescribe reasonable and nondiscriminatory rules concerning scheduling, sound levels, the location of speakers and the direction in which they are pointed, and other rules to facilitate the use of amplified sound on evenings and weekends, to mediate any conflict with University functions and other nearby activities, and to manage environmental impact.
4. Use of amplified sound on evenings and weekends requires advance permission from the Dean of Students. Reservations by University persons and University organizations must be made with the Dean of Students on the appropriate form on HornsLink.org prescribed by the Dean of Students. The Dean of Students will authorize amplified sound as described in a completed application unless the Dean of Students finds that the application or request must be disapproved under the criteria in Section 10–203 of the *Institutional Rules* or under rules promulgated by the Dean of Students under the authority of this Section. The Dean of Students will advise each applicant or requestor how to correct, if possible, any conditions that preclude approval of its application.

Sec. 13–805. Amplified Sound Indoors

University persons and University organizations may use amplified sound indoors. Amplified sound sufficient to be heard throughout the room may be used in any room in any building, but the Dean of Students or the administrative head of the academic or business unit managing the space may limit or prohibit sound that would be disruptive outside the room. Reservations may be required. Rules concerning use of University buildings are contained in Chapter 10 of the *Institutional Rules*.

Subchapter 13–900. Public Assemblies

Sec. 13–901. General Rule on Public Assemblies

1. "Publicly assemble" and "public assembly" include any gathering of persons, including discussions, rallies, and demonstrations. The rules in Subchapter 13–800 apply to any use of amplified sound at a public assembly.
2. University persons and University organizations may publicly assemble on campus in any place where, at the time of the assembly, the persons assembling are permitted to be. This right to assemble is subject to the rules in this Chapter and to the rules on use of University property in Chapter 10 of the *Institutional Rules*. No advance permission is required in the Common Outdoor Areas.
3. University persons and organizations, other than academic and administrative units may not invite Off-campus persons or organizations to attend their events in the Common Outdoor Area.
4. Registered and sponsored student organizations and registered faculty and staff organizations may invite Off-campus persons or organizations to attend their events in Dedicated Areas only after coordinating with staff in the Office of the Dean of Students, Office of the Executive Vice President and Provost, or Office of the Chief Operating Office, to obtain appropriate approvals.
5. Academic and administrative units may invite Off-campus persons or organizations to attend their events in the Dedicated Areas following the units' usual processes for event planning and management.

Sec. 13–902. Reservation of Space

1. Common Outdoor Areas reservations. The following provisions apply in the Common Outdoor Areas:
   a. University persons and University organizations may, but are not required to, reserve a space to assemble in the Common Outdoor Areas, as defined by this Chapter. This is in addition to the amplified sound areas which are also available for reservation. Reservations by University persons and University organizations must be made with the Dean of Students on the appropriate form on HornsLink.org prescribed by the Dean of Students. Applications and requests for a reservation for such assemblies will be approved pursuant to Subchapter 10–200 of the *Institutional Rules*.
   b. If the expected attendance at an assembly is twenty-five or more people, advance notice of no less than two weeks is recommended. Persons and organizations are encouraged to seek a reservation of a space that is suited to their assembly's anticipated size.
2. Dedicated Area reservations. The following provisions apply in the Dedicated Areas:
   a. Registered student organizations, sponsored student organizations, registered faculty or staff organizations, and academic or administrative units may reserve a space to assemble in permitted Dedicated Areas, as defined by this Chapter.
   b. Registered and sponsored student organizations and registered faculty and staff organizations inviting Off-campus persons or organizations to attend their event in Dedicated Areas must first secure a space reservation and event approval through the process required by the Office of Dean of Students, Office of the Executive Vice President and Provost, or Office of the Chief Operating Office. This coordination ensures appropriate planning for logistics and avoidance of disruption to the University and the planned event.
   c. The Dean of Students will receive applications for reservations of a space within the Dedicated Areas. Applications for a reservation for such assemblies will be processed under the provisions in Subchapter 10–202 of the *Institutional Rules*. Individual faculty, staff, and students may not reserve space under the provisions in Chapter 10 in Dedicated Areas but may reserve space in the Common Outdoor Areas.
   d. If the expected attendance at an event with a guest speaker is twenty-five or more people, advance notice of no less than two weeks is required.
3. Any person or organization with a reservation has the right to the reserved room or space for the time covered by the reservation. Any person or organization using or occupying the room or space without a reservation must yield control of the room or space in time to

permit any user with a reservation to begin using the room or space promptly at the beginning of its reserved time.

4. Should the size of any assembly exceed the maximum number of participants that is safe for a given location, including a reserved space, assembly participants will be directed by campus authorities to relocate to a space that is better suited to the size of the assembly to the extent relocation is practicable.
5. While reservations are not always required, they are strongly encouraged. Without a reservation, a person or organization may find the facility locked or the space in use by another person or organization.
6. In some buildings, public assemblies unrelated to the purpose of the building may be prohibited completely. University persons and organizations seeking to engage in a public assembly inside a building are responsible for confirming such assembly is permitted in a given building. To avoid disruption of University operations, the Main Building may not be used for such public assembly at any time.

Sec. 13–903. Notice and Consultation

1. University persons and University organizations may publicly assemble on campus in any place where, at the time of the assembly, the persons assembling are permitted to be.
2. University persons or University organizations that are planning a public assembly in a Common Outdoor Area with an expected attendance of more than twenty-five participants, including potential counter-demonstrators, are encouraged to provide advance notice of no less than two weeks to the Dean of Students to help the University improve the safety and success of the expressive activity. However, advanced notice and consultation is not required in these areas, If there is uncertainty about applicable University rules, the appropriateness of the planned location, or possible conflict with other events, University persons and organizations are encouraged to consult the Dean of Students. Should the size of the assembly exceed the maximum number of participants that is safe for a given location, participants will be directed by campus personnel to relocate to a space that is better suited to the size of the assembly.
3. University organizations planning an event in the Dedicated Areas with an expected attendance of more than twenty-five participants, are required to provide advanced notice of no less than two weeks to the Dean of Students to help the University improve the safety and success of the expressive activity. Notice will be provided on the appropriate form on HornsLink.org prescribed by the Dean of Students.
4. The notice and consultation requirements of this Subchapter do not apply to academic or administrative units.
5. The notice periods of this Subchapter may be waived by the Dean of Students or his or her designee.
6. Registered student organizations, sponsored student organizations, and registered faculty or staff organizations are afforded privileges not available to individual faculty, staff, and students. Individuals may not reserve space on campus in Dedicated Areas.

Subchapter 13–1000. Guest Speakers

Sec. 13–1001. Definitions

"Guest speaker" means a speaker or performer who is not a student, faculty member, or staff member.

Sec. 13–1002. Who May Present

1. Subject to the rules in this Chapter, University organizations and academic and administrative units may present guest speakers in Common Outdoor Areas of the campus. No advanced permission or notice is required.
2. Registered student organizations, sponsored student organizations, registered faculty or staff organizations, and academic or administrative units may present guest speakers in Dedicated Areas. In the case of registered student organizations and sponsored student organizations, advance permission from the Dean of Students is required. Registered faculty organizations are required to seek advance permission from the Executive Vice President and Provost. Registered staff organizations are required to seek advance permission from the Vice President and Chief Operating Officer.
3. Individuals may not present a guest speaker on University property.

Sec. 13–1003. Location and Form of Presentation

1. No reservation or prior approval is necessary in the Common Outdoor Area, but notice and reservations are encouraged for assemblies of twenty-five or more people. Only academic and administrative units may invite Off-campus persons or organizations to attend their guest speaker event in the Common Outdoor Area.
2. In Dedicated Areas, a guest speaker may present a speech or performance, or lead a discussion of specified duration, at a time announced in advance, in a fixed location approved by the Dean of Students or the appropriate academic or administrative unit. A guest speaker may distribute literature indoors only immediately before, during, and immediately after the normal course of his or her speech, presentation, or performance, and only to persons in attendance. Only literature that complies with Subchapter 13–400 may be distributed.
3. A guest speaker may not:
   a. accost potential listeners who have not chosen to attend the speech, performance, or discussion; or
   b. staff a table or set up exhibits. However, the registered or sponsored organization's guest speaker may conduct their guest speaking engagement while seated at the organization's table. University organization members shall not leave their guest speaker alone at their tabling location to conduct the speaking engagement without members of the organization also remaining present throughout the speaking event.
4. No University organization may present a guest speaker in violation of the prohibitions against solicitation in Section 13–205 or co-sponsorship in Chapter 10, Section 13–304 of the Institutional Rules.

Sec. 13–1004. Application for University Building or Facility Space for Presentation of Guest Speakers

In accordance with Regents' *Rules and Regulations*, Rule 40501, Section 3.5, all registered student organizations, sponsored student organizations, and registered faculty or staff organizations that wish to present a guest speaker in Dedicated Areas will apply through a prescribed process, at least two weeks before the scheduled event or any planned advertising for the event, whichever is earlier.

1. A registered or sponsored student organization that wishes to present a guest speaker will apply to the Dean of Students, through a process prescribed by the Dean of Students, at least two weeks before the scheduled event or any planned advertising for the event, whichever is earlier. The application will be combined with an application under Section 10–202 of the- *Institutional Rules*- to reserve the use of a University room or space for the event. The Dean of Students will approve an application properly made under Subsection 13–1004(a) unless it must be disapproved under the criteria in Chapter 10, Section 10–203 of the *Institutional Rules*.
2. A registered faculty organization that wishes to present a guest speaker will apply to the Executive Vice President and Provost through a process prescribed by the Executive Vice President and Provost, at least two weeks before the scheduled event or any planned advertising for the event, whichever is earlier. The application will be combined with an application under Chapter 10, Section 10–202 of the *Institutional Rules* to reserve the use of a University room or space for the event. The Executive Vice President and Provost will approve an application properly made

under Subsection 13–1004(a) in consultation with the Dean of Students unless it must be disapproved under the criteria in Chapter 10, Section 10–203 of the *Institutional Rules*.

3. A registered staff organization that wishes to present a guest speaker will apply to the Vice President and Chief Operating Officer through a process prescribed by the Vice President and Chief Operating Officer, at least two weeks before the scheduled event or any planned advertising for the event, whichever is earlier. The application will be combined with an application under Chapter 10, Section 10–202 of the *Institutional Rules* to reserve the use of a University room or space for the event. The Vice President and Chief Operating Officer will approve an application properly made under Subsection 13–1004(a) in consultation with the Dean of Students unless it must be disapproved under the criteria in Chapter 10, Section 10–203 of the *Institutional Rules*.

Sec. 13–1005. Obligations of Presenting Organization

A registered student organization or registered faculty or staff organization that presents a guest speaker University property must make clear that:

1. the organization, and not the University, invited the speaker;
2. the views expressed by the speaker are his or her own and do not necessarily represent the views of the University, The University of Texas System, or any System institution; and
3. Off-campus persons or organizations may not be invited to attend the guest speaker's presentation except in conformance with parameters set out in this Policy.

Subchapter 13–1100. Responding to Speech, Expression, and Assembly

Sec. 13–1101. General Rule on Responding

Persons and organizations may respond to the speech, expression, or assembly of others, subject to all the rules in this Chapter.

Sec. 13–1102. Applications of Section

1. Responders may not damage or deface signs or exhibits, disrupt public assemblies, block the view of participants, or prevent speakers from being heard.
2. Means of response that are permitted in many locations and without advance permission or reservation, such as signs, distribution of literature, and public assembly without amplified sound, may be used immediately and in any location authorized in this Chapter.
3. Means of response that require advance permission or reservation, such as temporary banners, A-frames exhibits, general exhibits, and amplified sound, may be used as soon as the needed permission or reservation may be arranged. Temporary banner space, temporary outdoor exhibit space, and some amplified sound areas may be unavailable on short notice because of earlier reservations, but the Dean of Students will, where feasible, expedite approval of available temporary banner spaces, available temporary outdoor exhibit spaces, and amplified sound areas where necessary to permit appropriate response to other speech, assembly, or expression.
4. Means of response that are confined to authorized locations, such as banners, exhibits, and amplified sound, may be used only in those locations. It is not possible to respond to amplified sound with amplified sound in the same location; similarly, if an exhibit or public assembly is in a location where amplified sound is not permitted, it is not possible to respond with amplified sound in that location. In either case, it is possible to respond with amplified sound in another location and to use signs or distribution of literature to advertise the response at the other location.

Subchapter 13–1200. Enforcement and Appeals

Sec. 13–1201. Police Protection

1. It is the responsibility of the University to protect the safety of all persons on campus and to provide police protection for speakers, public assemblies, persons staffing or viewing exhibits, and other events. The normal patrolling of officers during regular duty in the area of such events will be at the cost of the University. When the magnitude, timing, or nature of an event in a University building, University facility, Common Outdoor Area or other Dedicated Areas requires overtime hours from police officers (including contract hours for officers hired from other departments or private security agencies), the University will, to the extent specified in Subsection 13–1201(b) and Subsection 13–1201(c), charge the cost of overtime or contract officers to the person or organization sponsoring the event or exhibit that requires overtime police protection. The purpose of Subsection 13–1201(b) and Subsection 13–1201(c) is to charge for police overtime where reasonably possible, but not to charge for police overtime made necessary by the content of speech at the event or by the controversy associated with any event.
2. University persons or organizations planning such events should budget for the cost of police protection. A reasonable and nondiscriminatory fee for overtime police work will be charged to the registered student organization, sponsored student organization, or faculty or staff organization for events in a University building, University facility, other Dedicated Area, or the Common Outdoor Area that require overtime police protection, and
   a. charge a price for admission; or
   b. have a paid speaker, band, or other off-campus person or organization for services at the event.
3. The University will have the sole power to decide, after reasonable consultation with the person or organization planning the event, whether and to what extent overtime police protection is required. No fee will be charged for officers assigned because of political, religious, philosophical, ideological, or academic controversy anticipated or actually experienced at the event. All fees will be based on the number of officers required for an uncontroversial event of the same size and kind, in the same place and at the same time of day.
4. Nothing in this Section applies to any interdepartmental charge or transfer among units or accounts funded by the University.

Sec. 13–1202. Response to Violations

1. Students wishing to make a grievance regarding a violation of Texas Education Code § 51.9315 may report it via the University compliance and ethics hotline by emailing compliance@austin.utexas.edu.
2. A student who violates a prohibition in this Chapter may be disciplined under the procedures in Chapter 11 of the *Institutional Rules*. A registered student or sponsored student organization that violates a prohibition in this Chapter may be disciplined under the procedures in Chapter 6 of the *Institutional Rules*.
3. A faculty member who violates a prohibition in this Chapter may be disciplined under applicable procedures provided by other rules. If no such procedures exist, violations by faculty members will be referred to the Office of the Executive Vice President and Provost for handling.
4. A staff member who violates a prohibition in this Chapter may be disciplined under applicable procedures provided by other rules. If no such procedures exist, violations by staff members will be referred to Human Resource Services for handling.
5. Authorized University personnel may prevent imminently threatened violations, or end ongoing violations, of a prohibition in this Chapter, by explanation and persuasion, by reasonable physical intervention, by arrest of violators, or by any other lawful measures. Alternatively

or additionally, they may initiate disciplinary proceedings under Subsection 13–1202(2), or Subsection 13–1202(3), or other applicable rule. Discretion regarding the means and necessity of enforcement will be vested in the Chief of Police, or in University personnel designated by the President, as appropriate, but such discretion will be exercised without regard to the viewpoint of any speaker.

6. University persons and University organizations on the campus will comply with instructions from University administrators and law enforcement officials at the scene. A University person or University organization that complies with an on-the-scene order limiting speech, expression, or assembly may test the propriety of that order in an appeal under Section 13–1203.
7. Off-campus person(s) or organization(s) on the campus who violate a prohibition in this Chapter may be subject to criminal trespass charges, arrest, or other lawful measures.

Sec. 13–1203. Appeals

1. A person or organization that is denied permission for an activity requiring advance permission under this Chapter may appeal the denial of permission.
2. A University person or organization that complies with an on-the-scene order limiting speech, expression, or assembly may, on or before the fifth business day after complying with the order, file an appeal to determine the propriety of the order limiting the speech, expression, or assembly. The question on appeal will be whether, under the circumstances as they reasonably appeared at the time of the order, the appellant's speech, expression, or assembly should have been permitted to continue. Such an appeal may be useful to clarify the meaning of a rule, or to resolve a factual dispute that may recur if the appellant desires to resume the speech, expression, or assembly that was limited by the order.
3. An appeal authorized by this Section will be heard under the procedures set out in Subchapter 10–400 of the *Institutional Rules*.

Chapter 14.

Chapter 14 has been removed from this catalog effective August 22, 2024.

Appendix D: Policy on Sex Discrimination, Sexual Harassment, Sexual Assault, Sexual Misconduct, Interpersonal Violence, and Stalking

This policy is no longer published in the university catalog and is now included as part of HOP 3-3031: Prohibition of Sexual Assault, Interpersonal Violence, Stalking, Sexual Harassment, and Sex Discrimination, effective fall 2020.
See the University Policy Office's website for for current and archived versions of this policy at https://policies.utexas.edu.

Appendix E: Policy on Sexual Misconduct

This policy is no longer published in the university catalog and is now included as part of HOP 3-3031: Prohibition of Sexual Assault, Interpersonal Violence, Stalking, Sexual Harassment, and Sex Discrimination, effective fall 2020.
See the University Policy Office's website for for current and archived versions of this policy at https://policies.utexas.edu/.

Appendix F: Policy on Consensual Relationships

I. Policy Statement

The University of Texas at Austin ("University") is committed to maintaining an academic community (including associated teaching, research, working and athletic environments) free from conflicts of interest, favoritism, and exploitation. This policy addresses romantic relationships and/or sexual interactions that, although consensual, may create actual and perceived conflicts of interests, and create the possibility for exploitation or favoritism.
Except as expressly permitted herein, this policy prohibits consensual relationships between:

- employees (including faculty) or University affiliates ("affiliates") and undergraduate students;
- employees (including faculty) or affiliates and any graduate student whom that individual teaches, manages, supervises, advises, or evaluates in any way;
- Intercollegiate Athletics coaches, affiliates, or athletics employees and student-athletes;
- student employees and any student whom that student employee teaches, manages, supervises, advises, or evaluates in any way; and
- employees (including faculty) and/or affiliates where one teaches, manages, supervises, advises, or evaluates the other in any way, unless the person in the position of greater authority or power notifies appropriate University offices and a mitigation plan (as defined below) is in place.

II. Reason for Policy

The University recognizes that consenting individuals associated with the University should be free to enter into personal relationships of their choice. At the same time, such relationships must not put at risk the fundamental interest of every member of the University community to participate in University activities free from conflicts of interests, favoritism, and/or exploitation. Romantic relationships between certain categories of individuals affiliated with the University risks undermining the essential educational purpose of the University and can disrupt the workplace and learning environment.

III. Scope and Audience

This policy applies to all University employees (including faculty), student employees, students, and affiliates. This policy is applicable regardless of the sex/gender of the individual with managerial, supervisory, teaching, evaluation, coaching or advisory authority, and/or the sex/gender of the individual who is managed, supervised, taught, coached, advised, or evaluated in any way.

IV. Definitions (specific to this policy)

Coach: Any person serving in the capacity as an Intercollegiate Athletics head coach, associate head coach, assistant coach, graduate assistant coach, coaching intern, volunteer coach, or any individual exercising coaching responsibilities.
Consensual Relationship: A romantic relationship and/or sexual interaction agreed to by the involved parties.
Employee: Except as specifically stated herein, employee includes faculty, classified staff, administrative and professional staff, post-doctoral positions, and employee positions requiring student status.

Mitigation Plan: A written plan developed as provided in this policy that mitigates the conflict of interest and the potential for exploitation or the appearance of exploitation or favoritism created by the consensual relationship and which plan is acknowledged and signed by the parties involved.
Student-Athlete: Any student (undergraduate or graduate) who is currently participating as a member of an intercollegiate varsity sport sponsored by the University.
Supervisee: Any individual whose terms and conditions of employment, student, student-athlete, or affiliate status are controlled or affected by a supervisor, as defined by this policy.
Supervisor: An employee (including faculty), student, or affiliate who:

- teaches, manages, supervises, advises, coaches, or evaluates in any way other employees, students, student- athletes, or affiliates; and/or
- has a position of power, control, or the ability to influence decisions with regard to other individuals in the learning, intercollegiate athletics, or working environment of the University.

University Affiliate: An individual associated with the University in a capacity other than as a student or employee who has access to University resources through a contractual arrangement or other association that has been reviewed and approved in accordance with guidelines established by Human Resources ("HR"), the Executive Vice President and Provost ("EVPP"), or the Vice President for Research. Examples of a University Affiliate may include, but are not limited to:

- employees of contractors hired to conduct repair work at the University;
- employees of vendors engaged to provide training to University administrators;
- health care providers retained by the University to provide medical services to students/staff;
- volunteers in academic and/or operational units within the University; and
- post-doctoral positions who receive external funding;
- researchers or recent graduates who are self-funded or independently funded, but utilize University facilities to further the University's research endeavors.

Additional information regarding other types of University Affiliates may be found at: http://www.utexas.edu/business/erp/hrms/help/UniversityAffiliateTypes.php

VII. Responsibilities and Procedures

A. Prohibited Consensual Relationships
The following consensual relationships, even if a single interaction, are prohibited and cannot be mitigated by a mitigation plan.

1. Considering the potential for exploitation or the appearance of exploitation or favoritism and the inherent differential in authority, the University prohibits any employee (including faculty) or affiliate of the University from engaging in a consensual relationship with any student currently enrolled as an undergraduate at the University.*

*_Note_: "Employee"; as used in Section VII.A.1 does not include student employees. See Section VII.A.4 below for prohibitions applicable to University student employees. Also, for purposes of this policy, the term "undergraduate" does not include any individual who is considered an undergraduate at the University solely because the individual is taking course(s) through the Staff Educational Benefit offered to University employees.

2. Considering the potential for exploitation or the appearance of exploitation or favoritism and the inherent differential in authority between graduate students and their educators, advisors, supervisors, and others holding positions of authority over them, the University prohibits any employee (including faculty) or affiliate of the University from engaging in a consensual relationship with any graduate student whom they teach, manage, supervise, advise, or evaluate in any way.

3. Considering the potential for exploitation or the appearance of exploitation or favoritism and the inherent differential in authority, the University prohibits consensual relationships between Intercollegiate Athletics coaches, employees, or affiliates, with any student-athlete or student assigned to or associated with Intercollegiate Athletics, such as interns and student employees.

*_Note_: "Employee" as used in Section VII.A.3 does not include student employees except for those

who teach, manage, supervise, advise, coach, or evaluate any student-athlete or student assigned to or associated with Intercollegiate Athletics.

4. Considering the potential for exploitation or the appearance of exploitation or favoritism and the inherent differential in authority, the University prohibits any student employee (including resident life advisors/assistants, assistant instructors, teaching assistants, graduate research assistants, etc.) from engaging in a consensual relationship with any student whom they teach, manage, supervise, advise, or evaluate in any way.

B. Reporting Requirements

1. Considering the potential for exploitation or the appearance of exploitation or favoritism and the inherent differential in authority, the University prohibits consensual relationships between employees (including faculty) and/or affiliates where one teaches, manages, supervises, advises, or evaluates the other in any way unless the person in the position of greater authority or power notifies appropriate University offices (as detailed in Section VII.B.2.a of this policy) and a mitigation plan is put in place that mitigates the conflict of interest and the potential for exploitation or the appearance of exploitation or favoritism.

2. In the event a consensual relationship exists between employees (including faculty) and/or affiliates, the following steps ***must immediately*** be followed by the person in the position of greater authority or power:

   a. report the consensual relationship to the appropriate dean and the EVPP (when the relationship involves a faculty member), and/or the appropriate unit head and HR (when the relationship involves a staff member and/or affiliate);
   b. report any relationship that currently exists prior to the effective date of this policy to the University offices specified above as soon as possible and cooperate in the development of a mitigation plan as outlined in Section VII.C, below;
   c. cooperate in the development of a mitigation plan designed to reduce or eliminate the conflict of interest and the potential for exploitation or the appearance of exploitation or favoritism.

3. If a consensual relationship exists between employees of the University and one of those employees is presented with the opportunity to teach, manage, supervise, advise, or evaluate the other in any way, the existing relationship must be reported by the individual in the position of greater authority or power to the appropriate University offices designated above as soon as possible and prior to the individual accepting a role that would create a conflict of interest and the potential for exploitation or the appearance of exploitation or favoritism, and a mitigation plan must be developed.

4. Departments and offices that receive reports of consensual relationships as outlined in this policy will notify the applicable VP, Dean, or the EVPP, each of whom will, in turn, notify DIA of the relationship and provide DIA a copy of the mitigation plan for record keeping purposes.

C. Mitigation Plan

1. If the conflict of interest and the potential for exploitation or the appearance of exploitation or favoritism can be successfully mitigated and managed, a written mitigation plan will be produced within ten (10) business days of the report (unless there are reasonable grounds for additional time) by the appropriate chair, dean, and EVPP (when the relationship involves a faculty member) or the appropriate unit head, DIA, and HR (when the relationship involves a staff member and/or University affiliate) in collaboration with both parties to the consensual relationship.

2. If the mitigation plan is not agreed to by all parties to the plan, resolution of the disagreement will be handled through consultation with the appropriate vice president of the individual(s) opposing the plan and DIA. In the case of a relationship involving individual(s) associated with Intercollegiate Athletics, the consultation will involve the Office of the Senior Vice President and Chief Financial Officer and DIA.

3. If the conflict of interest and potential for exploitation or the appearance of exploitation or favoritism created by the consensual relationship cannot be successfully mitigated and managed, then the consensual relationship is prohibited.

4. The mitigation plan will:

   a. provide an alternative means for managing, supervising, teaching, evaluating and/or advising of the supervisee or otherwise mitigate the conflict;
   b. give priority to the interest of the supervisee;
   c. be in writing and signed by both parties to the consensual relationship;
   d. provide notice of HOP 3-3031 - Prohibition of Sexual Assault, Interpersonal Violence, Stalking, Sexual Harassment, and Sex Discrimination; and
   e. be reassessed on an annual basis (or sooner if circumstances warrant) by the parties, and the applicable department/unit for necessary modification.

D. Exemptions

Exemptions to any of these provisions will be considered on a case-by-case basis and will be approved by the Associate Vice President for Investigation and Adjudication, with input from the supervisor(s) of the individual(s) involved. Questions about the application or effect of this policy to an existing or potential relationship should be directed to DIA, HR and/or the EVPP. This policy is not intended to apply to marriage relationships. Refer to HOP 5-1260 - Employment of Close Relatives (Nepotism), for information concerning these types of relationships.

E. Reporting Alleged Violations

An employee (including faculty) or affiliate who is notified, or becomes aware of, an alleged violation of this policy has an obligation to report it timely. Report Here

F. Investigation and Discipline

1. Alleged violations of this policy, including concerns of conflicts of interests, favoritism, and/or exploitation will be investigated by DIA in collaboration with the Office of the Vice President for Legal Affairs.
2. If there is a complaint of sexual harassment/sexual misconduct relating to a relationship covered by this policy, and the relationship has not been disclosed and no Mitigation Plan is in place, the responsibility will be on the person in the position of greater authority or power to explain the failure to comply with this policy. Such failure will be a factor in determining whether the relationship was consensual and free of sexual harassment/ misconduct.
3. Disciplinary action against faculty and staff will be handled under the University's policies for discipline and dismissal of faculty and staff. Disciplinary actions may include, but are not limited to, written reprimands, the imposition of conditions, reassignment, suspension, and dismissal. Affiliates in violation of this policy may be disciplined as appropriate under the circumstances.

G. Safe Harbor

It is critical the University receive notification of consensual relationships covered by this policy so as to prevent conflicts of interest, favoritism, and exploitation. Unreported consensual relationships pose a significant risk to the University community. With this in mind, if the person in the consensual relationship who is in the position of greater authority or power ***immediately notifies*** appropriate University offices of the development of a consensual relationship covered by this policy and cooperates to mitigate the effects of the consensual relationship, then a conduct/ discipline investigation may not be pursued. Unreported consensual relationships will be considered more severe violations of this policy.

**Note*: This safe harbor provision does not apply to potential violations of HOP 3-3031 - Prohibition of Sexual Assault, Interpersonal Violence, Stalking, Sexual Harassment, and Sex Discrimination.

H. Retaliation Prohibited

Retaliation against a person who reports a potential violation under this policy, assists someone with a report of a violation, or participates in any manner in an investigation or in the resolution of a complaint made under this policy is strictly prohibited and will not be tolerated. Retaliation includes, but is not limited to threats, intimidation, reprisals and/or adverse actions related to an individual's employment or education. The University will take appropriate steps to assure a person who in good faith reports, complains about, or participates in an investigation pursuant to this policy will not be subjected to retaliation. Individuals who believe they are experiencing retaliation are strongly encouraged to lodge a complaint with DIA and/or URCS.

I. Counseling

Confidential counseling services are available to employees through the Employee Assistance Program at 512-471-3366 and to students through the UT Counseling and Mental Health Center at 512-471-3515.

VIII. Forms and Tools

Appendix G: Policy on AIDS and HIV Infection

Background

The University of Texas at Austin recognizes human immunodeficiency virus (HIV) as a serious public health threat and is committed to promoting an informed, educated and responsive University community regarding HIV and the associated Acquired Immune Deficiency Syndrome (AIDS). This policy provides the framework for managing risks associated with HIV and AIDS in compliance with state laws and in the context of the medical, educational, legal, administrative, and ethical issues involved.

The reason for this policy is to provide the roles and responsibilities for responding to specific situations involving persons with AIDS or HIV infections in compliance with Texas Administrative Code (Title 25, part 1, chapter 96, Bloodborne Pathogen Control) and Texas Education Code (Sec. 51.919 HIV and AIDS Policy; Information Dissemination) covering areas of administrative policy, residence life, health education, testing, confidentiality, and patient care.

Throughout this appendix, "HIV infection" denotes the total spectrum of the disease, from HIV seropositive but asymptomatic infection to fully developed AIDS.

General Policies

1. **Institutional committee.** The University establishes the Bloodborne Pathogens Control Committee (BPCC) authorized to annually review and update the University's written Bloodborne Pathogens Exposure Control Plan. The committee will be minimally comprised of representatives from the Environmental Health & Safety

(EHS) department, University Health Services (UHS), the HealthPoint Occupational Health Program and representation from departments that employ workers with reasonable anticipation of exposure to bloodborne pathogens, including HIV.

2. **Admissions.** The existence of HIV infection will not be considered in admissions decisions unless current scientific information indicates required academic activities may expose others to risk of transmission.
3. **Employment.** The existence of HIV infection will not be used to determine suitability of applicants for employment by the University. An HIV-infected employee will remain employed as long as he or she is able to perform the essential functions of the job and is able to meet the job performance standards.
4. **Class attendance.** A student with HIV infection will be allowed to attend all classes without restrictions, as long as the student is physically and mentally able to participate and perform assigned work, and poses no health risk to others.
5. **Facilities Access.** A person with HIV infection will not be denied access to any University facility on the basis of HIV-positive status.
6. **Residential housing.** The University residential housing staff will not exclude HIV-positive students from University housing, and will not inform other students that a person with HIV infection lives in University housing.
7. **Safety precautions.** The University has guidelines for health care workers and students in the health professions concerning the prevention of transmission of bloodborne pathogens, which includes HIV among others. Training requirements are detailed in the University's Bloodborne Pathogens Exposure Control Plan.
8. **Education, Risk Management and Safety.**
    a. **Education on HIV prevention provided to students.** The University will routinely offer education to students based on HIV education and prevention programs. These programs will be developed in conjunction with federal and state health agencies and other health authorities and will be tailored to students' cultural, educational, language, and developmental needs. UHS will provide information to students pertaining to HIV infection on a variety of related topics. UHS will also make referrals for anonymous HIV counseling and testing services.
    b. **Laboratory courses.** Department managers/heads of departments offering lab courses or operating labs where possible risk of exposure to material that has potential for transmitting HIV must develop written, lab safety protocol using standard precautions for handling such material. This written protocol must be distributed to students and staff members prior to such exposure in accordance with the Bloodborne Pathogens Exposure Control Plan.
    c. **Education of students entering health professions.** Each college or school offering medical, dental, nursing, allied health, counseling, and/or social work degree programs must ensure its program curricula contains information about:
        1. methods of transmission and methods of prevention of HIV infection;
        2. federal and state laws, rules, and regulations concerning HIV infection and AIDS; and
        3. the physical, emotional, and psychological stress associated with the care of patients with incurable illnesses.
    d. **Education of employees where risk of exposure to HIV may be part of their employment duties.** Departments requiring employees to perform employment duties where risk of exposure to HIV is possible will provide training about HIV transmission specific to their employment duties and methods to minimize or eliminate that risk by following standard precautions. Standard precautions includes an overview of the engineering controls, administrative controls, and personal protective equipment used to minimize or eliminate risk of exposure. The University's Bloodborne Pathogens Exposure Control Plan includes information specific to HIV and standard precautions.
9. **Confidentiality of Records.** Except where release is required or authorized by law, information concerning the HIV or AIDS status of students, employees, or patients, and any portion of a medical record will be kept confidential and will not be released without written consent. Information concerning HIV or AIDS status held in non-medical records will be limited to that which is necessary to determine reasonable accommodations, if applicable, or to investigate an occupational exposure. Non-medical records containing personal health information (PHI) will follow privacy standards established by federal and state law.
10. **HIV testing and bloodborne pathogens post-exposure testing.** In the event of a work-related bloodborne pathogens exposure, the employee must contact the HealthPoint Occupational Health Program as soon as practical for guidance on post-exposure testing services, available at no cost to the employee. Refer to the University's Bloodborne Pathogens Exposure Control Plan for details. Students may obtain HIV testing services from UHS.
11. **Unemployment compensation benefits.** When applicable, the University will inform employees that state law provides that an individual will be disqualified for unemployment compensation benefits if the Texas Workforce Commission finds the employee left work voluntarily rather than provide services included within the course and scope of employment to an individual infected with a communicable disease, including HIV. This disqualification applies if the University provided facilities, equipment, training, and supplies necessary to take reasonable precautions against infection.
12. **Health benefits.** No University student or employee will be subjected to impermissible discrimination under a health benefits plan endorsed by the University on the basis of a positive HIV test result.

Policy Website: Excerpted from the *Handbook of Operating Procedures*, 3-1310

Appendix H: Prohibition of Sexual Assault

This policy is no longer published in the university catalog and is now included as part of HOP 3-3031: Prohibition of Sexual Assault, Interpersonal Violence, Stalking, Sexual Harassment, and Sex Discrimination, effective fall 2020.
See the University Policy Office's website for for current and archived versions of this policy at https://policies.utexas.edu/.

Appendix I: Nondiscrimination Policy

I. Policy Statement

The University of Texas at Austin (University) is committed to providing an educational and working environment for students, faculty, and staff that is free from discrimination and harassment based on race, color, sex, pregnancy, gender, gender identity, sexual orientation, gender expression, religion, age, national origin, ethnicity, veteran status, disability, genetic information, military status, or any other legally protected basis[1]. This Policy prohibits such conduct.
This Policy also prohibits retaliation against someone because the individual reported under this Policy, opposed an unlawful practice, participated in an investigation, or requested supportive measures. Finally, this Policy prohibits failing to cooperate in good faith, filing false complaints or providing materially false information, interfering with this Policy's processes, abusing the investigation process, or failing to report

incidents reasonably believed to constitute discrimination, harassment, or retaliation.

This Policy does not cover prohibited conduct of a sexual nature. Procedures for reporting sexual assault, interpersonal violence, stalking, and sexual harassment, are addressed by Handbook of Operating Procedures (HOP) 3-3031. While these are forms of sex discrimination, their sexual nature removes them from the purview of this Policy.

Inquiries regarding this Policy may be directed to the Department of Investigation and Adjudication (DIA) at 512-471-3701 or dia@austin.utexas.edu. (dia@austin.utexas.edu)

II. Who this Policy Applies To

This Policy applies to all University faculty, staff, employees, students, student organizations, visitors, contractors, University affiliates, and applicants for admission to or employment with the University and others conducting business on campus. Reports and Complaints against individuals subject to this Policy are processed according to the parameters set out below. Reports and Complaints against individuals not subject to this Policy are processed to provide support resources to the affected individual where appropriate.

III. Where this Policy Applies

This Policy applies to conduct that occurs on campus, in University-owned housing, or in an education program or activity. Campus means any building or property owned or leased by the University that is used in direct support of the University's educational purposes. An education program or activity means locations, events, or circumstances over which the University exercises substantial control, and includes any building owned or controlled by a registered student organization. This Policy applies to off-campus conduct when the conduct substantially affects a person's education or employment with the University or poses a risk of harm to members of the University community.

IV. Policy Violations

The following are categories of conduct that violate this Policy. Individuals who believe they have been subjected to conduct that violates this Policy are encouraged to file a Complaint with the University using the procedures described below (See Section VII.B.1). Any person found in violation of this Policy is subject to disciplinary action, up to and including termination or expulsion, or losing affiliate status.

(A)

Discrimination: Conduct directed at an individual or group of identifiable individuals that subjects them to treatment that creates a materially adverse impact to their employment or education because of their race, color, sex, pregnancy, gender, gender identity, sexual orientation, gender expression, religion, age, national origin, ethnicity, veteran status, disability, genetic information, military status, or any other legally protected basis.

(B) Harassment: Verbal or physical conduct that is directed at an individual or group because of their race, color, sex, pregnancy, gender, gender identity, sexual orientation, gender expression, religion, age, national origin, ethnicity, veteran status, disability, genetic information, military status, or any other legally protected basis. This conduct must be sufficiently severe or pervasive so as to have the purpose or effect of interfering with the impacted individual's academic or work performance. Constitutionally protected speech or expression is not considered Harassment under this Policy [2]. Harassment that is not based on the protected characteristics set out here is governed by Chapter 13 of the Institutional Rules (See Section 13-204). Sexual harassment is governed by HOP 3-3031.

When examining whether behavior was sufficiently severe or pervasive or materially adverse, DIA will look to how an objectively reasonable person would have experienced or viewed the behavior.

(C) **Retaliation**: Any action taken to cause a materially adverse effect in the terms or conditions of an individual's academic experience or employment with the University, or other institutional status of a student, employee, University affiliate, visitor, or applicant for admission or employment with the University, because an individual has in good faith reported or brought a complaint under this Policy, opposed an unlawful practice, participated in an investigation, or requested supportive or protective measures. Examples of retaliation include, but are not limited to, denial of an educational opportunity, experience or promotion; non-selection/refusal to hire; denial of job benefits; demotion or negative impact on grades or academic status; suspension; discharge; reprimands; negative evaluations; harassment; or other adverse treatment that is likely to deter reasonable people from pursuing their rights.

Retaliation may be found even when an underlying Report or Complaint made in good faith was not substantiated.

(D) Investigation Participant Violations:

(1) Failing to Cooperate

Everyone who is subject to this Policy must cooperate in good faith with University investigations. Failing to cooperate in good faith is a violation of this Policy. Good faith cooperation includes, but is not limited to:

- providing full and truthful answers during the investigation;
- identifying witnesses to the alleged conduct or other relevant witnesses;
- providing full and complete documents relevant to the alleged conduct;
- responding to requests for interviews or information from DIA or any other University administrator; and
- appearing for scheduled meetings or interviews.

(2) Filing of False Complaints and Providing Materially False Information

It is a violation of this Policy to knowingly and intentionally file a false Complaint or Report under this Policy or to knowingly and intentionally provide materially false information about an alleged violation under this Policy. A Complaint or Report that is ultimately unsubstantiated is not a false Complaint or Report unless it was filed in bad faith. Bad faith is an intent to harm or deceive. Information is materially false if it is untrue and would tend to influence the outcome of an investigation of an alleged violation under this Policy.

(3) Investigation Process Interference

Any person who intentionally interferes with the administration of this Policy commits a violation of this Policy. Interference may include, but is not limited to:

- attempting to coerce, compel, or prevent an individual from providing testimony or relevant information;
- removing, destroying, withholding, or altering documentation relevant to the Complaint or Report; or
- knowingly providing false or misleading information to DIA or any other University administrator or encouraging others to do so.

(4) Abuse of Investigation Process

This Policy prohibits individuals from abusing the investigative process. DIA will determine whether conduct is an abuse of the process by assessing the totality of the circumstances. Abuse of the investigation process is a pattern of behavior that overburdens DIA staff and resources, including but not limited to:

- repeatedly refusing to specify Complaint or Report allegations;
- repeatedly failing to timely schedule or appear at investigative interviews or meetings, without good cause; or
- filing multiple Complaints or Reports on the same or substantially similar events

(E) Failing to Report Known Incidents of Discrimination, Harassment, and Retaliation: Every supervisor, administrator, University official, or other employee who has the authority to take action to redress an alleged violation, *must* promptly report to DIA any incidents reasonably believed to constitute discrimination, harassment, or retaliation in violation

of this Policy that come to their attention during the course of their employment.

(F) Failing to Implement an Approved Academic Accommodation for a Disability: The failure to implement, or hinder the implementation of a student's approved academic accommodation(s) from Disability and Access, is a violation of this Policy.

VII. Responsibilities & Procedures

A. Definitions

1. **Complainant:** The individual who is alleged to be the victim of any prohibited conduct under this Policy.
2. **Complaint:** Information, including oral statements (if appropriately acknowledged), submitted to DIA by a Complainant, alleging a violation of this Policy.
3. **Notification:** Notification under this Policy occurs on the date any document is sent by electronic mail and/or facsimile, when properly addressed. Notification may also occur two days after the date of posting of any document in the United States mail, properly addressed, or upon the date of receipt of any document, when placed in the campus mail, properly addressed. DIA will use the address included in the Complaint or the last known address contained in DIA's file.
4. **Parties:** The "Complainant" and the "Respondent" under this Policy.
5. **Preponderance of the Evidence:** The greater weight of the credible evidence. Preponderance of the evidence is the standard for determining allegations of conduct that violate this Policy. This standard is satisfied if the action is deemed more likely to have occurred than not.
6. **Relevant:** Evidence that has (i) any tendency to make a fact more or less probable than it would be without its existence, and (ii) the fact is of consequence in determining if a policy violation has occurred.
7. **Report:** Information, including oral statements (if appropriately acknowledged), submitted to DIA by a Reporter, alleging a violation of this Policy.
8. **Reporter:** An individual, other than a Complainant, making a Report of an incident(s) under this Policy.
9. **Respondent:** The individual and/or organization reported to be the alleged perpetrator of conduct that violates this Policy.

B. General Procedures

The University recognizes the rights of Parties to report an incident to the University and to receive a prompt and equitable resolution of the Report.

1. Reporting Incidents. Any person may report an incident under this Policy to DIA—via email at dia@austin.utexas.edu, (dia@austin.utexas.edu) via mail at 100 W. Dean Keeton, Suite 4.102, Mail Code D9250, by calling 512-471-3701, or via https://compliance.utexas.edu/programs/dia—regardless of whether the person reporting is the person alleged to be subject to the complained-of behavior. Any person may report incidents anonymously via the online reporting form found at DIA's website. A person who believes that they have experienced discrimination, harassment, or retaliation should promptly report the incident to any official, administrator, supervisor, or employee with the authority to redress an alleged violation. They are also encouraged to report such incidents to DIA directly. No person is required to report Discrimination or Harassment to the alleged offender.

2. Complaints and Reports. A Complaint or Report alleging a violation of this Policy shall be submitted to DIA. The Complaint or Report should contain the following information:

- Name and UT EID of the Complainant(s);
- Contact information, including address, telephone, and e-mail;
- Name of person(s) directly responsible for alleged violation(s);
- Date(s) and place(s) of alleged violation(s);
- Nature of alleged violation(s) as defined in this Policy;
- Detailed description of the defined conduct that is the basis of the alleged violation(s);
- Copies of any documents about the alleged violation(s);
- Names of any witnesses to the alleged violation(s) and witnesses' contact information;
- Action requested to resolve the situation; and
- Any other relevant information.

While an initial review or formal investigation may begin on the basis of a verbal Complaint or Report, the University strongly encourages individuals to file a written Complaint or Report with DIA via email (dia@austin.utexas.edu) or via DIA's online reporting system (https://compliance.utexas.edu/programs/dia).

If the Complaint or Report is not in writing, DIA will prepare a statement of what it understands the allegations to be and seek to obtain verification from the Complainant or Reporter.

3. Time Limit. Individuals must file a Complaint or Report within 180 calendar days of the most recent unlawful act. DIA may extend the 180-day filing deadline when good cause supports the extension.

4. Acknowledgement. Within five business days after receipt of a Complaint or Report, excluding University holidays and closures, DIA will send the Complainant or Reporter a brief acknowledgment of the Complaint or Report, and may request to schedule an intake interview to gather more information regarding the allegation(s). DIA's acknowledgement will include a copy of this Policy.

C. Initial Review and Assessment Procedures

1. Purpose. DIA will conduct an initial review of all Reports and Complaints. This initial review is to assess whether a Complaint or Report describes in sufficient detail the conduct that is the basis of the Complaint, whether the alleged conduct (if true) implicates this Policy, and whether a formal investigation is warranted.

2. Intake Review. DIA will conduct an intake review, which may include interviews to gather more information regarding the allegation(s). DIA will determine whether the Complaint or Report should be dismissed and referred to an appropriate department for resolution or for dispute resolution. If additional information is needed to evaluate the Complaint or Report, DIA will conduct a due diligence inquiry.

3. Due Diligence Inquiry. A due diligence inquiry is not a formal investigation but includes all appropriate steps to properly and thoroughly evaluate a Complaint or Report. DIA will take appropriate steps to gather sufficient information to determine whether a formal investigation is warranted.

4. Potential Outcome/Resolution of Complaints or Reports. DIA will ultimately determine whether the Complaint or Report should be (i) dismissed due to insufficient evidence or information; (ii) dismissed because the Respondent is not a University faculty, staff, student, student organization, visitor, contractor, University affiliate, or applicant for admission or employment; (iii) dismissed and referred to the appropriate department for informal resolution;

(iv) dismissed and referred for dispute resolution; or (v) elevated to a formal investigation. Additionally, if a Complaint or Report is withdrawn, DIA may choose to initiate a due diligence inquiry if the alleged conduct implicates this Policy.

Complaints and Reports that are dismissed may be re-opened if additional information is later available and it is still within the 180 calendar day limitations period.

5. Notification of Results. If DIA determines that a Complaint or Report should be dismissed, DIA will provide a dismissal notice to the Complainant and Respondent (if interviewed during the initial review and/or DIA has reason to believe that Respondent is aware of the Complaint) that includes a brief summary of the Relevant known information and a brief explanation for DIA's determination. DIA will submit the dismissal notice to the appropriate vice president, dean, or designee and departments based on a need-to-know basis.

6. Appeal of the Initial Review Outcome. If DIA dismisses a Complaint or Report and determines that it will not proceed with a formal investigation, a Party may appeal to the University's Chief Compliance Officer within 10 business days of receiving Notification. The appeal must be in writing and describe in sufficient detail the basis for the appeal. An appeal may be based upon any of the following:

- A procedural irregularity that affected DIA's determination;
- There is new, relevant evidence that was unavailable at the time of DIA's dismissal that could affect the outcome of the matter; or
- The DIA investigator had a conflict of interest or bias for or against a Party that affected the outcome of the matter.

A disagreement with DIA's determination, without more, is not a sufficient basis for appeal. Appeal requests should be submitted electronically at dia@austin.utexas.edu or via mail or in person at 100 W. Dean Keeton, Suite 4.102, Mail Code D9250. The Chief Compliance Officer will determine within 10 business days whether DIA's decision was in error. If the Chief Compliance Officer upholds DIA's determination, the decision is final. If the Chief Compliance Officer overturns DIA's determination, the Complaint or Report will be sent back to DIA for further investigation.

D. Informal Resolution Procedure

DIA may determine in its discretion whether informal resolution is appropriate and, if so, will refer the Complaint or Report to the appropriate department.

Methods for informal resolution may include, but are not limited to:

- coaching the person on how to directly address a situation which is causing a problem;
- mediating the dispute with the Parties;
- aiding in the modification of a situation in which the offensive conduct occurred;
- assisting a division with the resolution of a real or perceived problem; or
- arranging a documented meeting to discuss the University's requirements for behavior.

The University will document any informal resolution. DIA will retain this documentation and keep it confidential to the extent permitted by law.

E. Option for Dispute Resolution

The University recognizes that in some circumstances, pursuing facilitated dispute resolution in lieu of the formal investigation process is preferable to the Parties involved. When appropriate, the University supports and encourages the benefits available through this alternative method.

Dispute resolution may be an appropriate means of addressing some incidents reported under this Policy. DIA within its discretion, may recommend this alternative to address some incidents reported under this Policy that have not been elevated to a Formal Investigation.

F. Formal Investigation Procedures

1**. Investigation Responsibility.** DIA is responsible for conducting formal investigations of Complaints and Reports involving possible violations of this Policy. DIA will initiate a formal investigation if a Complaint is within the scope of this Policy and articulates sufficient specific facts, which, if determined to be true, would support a finding that this Policy was violated.

Notwithstanding the above, DIA may initiate an investigation at the request of Human Resources representatives, deans, directors, department or unit heads, or vice-presidents, or at DIA's sole discretion when the facts or circumstances warrant such [3]. Additionally, if a Complaint/Report is withdrawn, DIA may choose to initiate a formal investigation if the alleged conduct implicates this Policy.

2. Delegation in Certain Circumstances. If a Complaint or Report is directed against an individual who would otherwise play a role in investigating or resolving the Complaint, or there is any other conflict of interest present, the function assigned to that person by these procedures will be delegated to another person, as determined appropriate by the Chief Compliance Officer, in consultation with the Vice President for Legal Affairs.

3. Notice of Investigation. If a formal investigation is warranted, DIA will provide the Parties a written Notice of Investigation (NOI). The NOI will include:

- A statement of the allegation(s) to be investigated;
- A statement notifying the Respondent that they have an opportunity to submit a written response to the allegation(s) within seven calendar days of receiving the NOI, unless unusual circumstances warrant additional time;
- A statement advising the Parties that Retaliation is prohibited and that engaging in Retaliation will result in appropriate disciplinary action;
- A statement notifying the Parties that they have a right to an advisor during the investigation process;
- A statement requesting confidentiality by the Parties to preserve the integrity of the investigation;
- A statement regarding the Parties' duty to cooperate;
- Information regarding resources available to the Parties; and
- Contact information for the DIA investigator assigned to the formal investigation

4. Investigative Process—Gathering of Evidence

a. Respondent Statement. Within seven calendar days of receiving the NOI, the Respondent has an opportunity to submit to DIA a written response to the allegations. DIA may extend this deadline if it determines circumstances warrant it.

b. Notice of Meetings. DIA will notify the Parties and witnesses of the date, time, location, participants, and purpose of any meeting. DIA will also notify them of their right to be accompanied by an advisor.

c. Interviews. During a formal investigation, DIA may interview the Complainant(s), Respondent(s), and persons that have Relevant information related to the Complaint or Report. Parties should submit the name(s) and contact information for any witnesses they would like to be interviewed and a brief explanation of the witness' relevance to the investigation. In most cases, DIA will not interview character witnesses.

d. Evidence. The Parties may present any information or evidence that may be Relevant to the investigation. DIA may also gather Relevant evidence from witnesses or other departments as appropriate.

e. Findings. DIA will use the Preponderance of the Evidence standard to determine if a policy violation has occurred.

5. Investigation Report and Referral

a.

Preliminary Investigation Report and Access to Evidence. After completion of the investigative process, DIA will provide the Parties a Preliminary Investigation Report (PIR) and access to Relevant evidence. The PIR will outline each of the allegations that potentially constitutes a violation of this Policy, provide the timeline of the investigation, and fairly summarize the Relevant evidence, participant statements, responses to questions, and documentary evidence. The PIR will also include a statement of finding of violation or no finding of violation and the related rationale.

DIA will redact student identifiable information and other information that is confidential by law. DIA also reserves the right to redact the names of witnesses for confidentiality and privacy reasons, as well as to mitigate a perceived risk of Retaliation.

DIA will provide a copy of the PIR and access to the Relevant evidence to the appropriate vice president, dean, or designee.

b. Opportunity to Respond. The Parties and their advisors will have 10 business days to review, inspect, and submit a written response to the PIR and the Relevant evidence. The written response should include any additional fact(s) or witnesses who may provide Relevant information. DIA will review and consider the responses received from the Parties, if any, and determine whether further investigation is warranted.

c. Discipline Decision-maker Review of PIR. The PIR will be provided to the appropriate discipline decision-maker, who may consult with DIA before the report is finalized regarding the investigation process, evidence collected, and the rationale provided for the determination of a finding or no finding of violation.

d. Completed Investigation Report and Referral. After the Parties have an opportunity to respond to the PIR, DIA will provide a Completed Investigation Report (CIR) and access to the Relevant evidence to the Parties and the appropriate vice president, dean, or assigned designee. Within 10 business days of receiving the CIR, the appropriate vice president, dean, or designee should discuss the findings with DIA, and review the record, along with any comments and proposed corrections submitted by the Complainant and Respondent, if necessary.

If there is a finding of violation, the CIR will be provided to the appropriate discipline decision-makers for disciplinary determinations as follows:

- If the Respondent is a student, it will be referred to the Dean of Students for discipline decision, in accordance with University's student disciplinary procedures;
- If the Respondent is faculty, it will be referred to the Executive Vice President and Provost for discipline decision, in accordance with the University's policies for discipline and termination of faculty; and
- If the Respondent is staff, it will be referred to the Associate Vice President of Human Resources for discipline decision, in accordance with the University's policies for discipline and termination of staff.

The vice president, dean, or designee will inform the Parties, DIA, and the appropriate department head in writing of the decision.

e. Privacy. As required by federal law, any disclosure of the findings and decision of the Office of the Dean of Students will be governed by the provisions of the Family Educational Rights and Privacy Act and other applicable law.

G. Right to Advisor

The Complainant(s) and the Respondent(s) may be accompanied by an advisor, who may be an attorney, to any meeting or interview with DIA. No advisor may examine witnesses or otherwise actively participate in a meeting or interview. An individual may only have one advisor present at a time.

H. Submission of Evidence

During an initial review or formal investigation, the Complainant(s) and the Respondent(s) should provide DIA with all relevant evidence in their care, custody, or control. They should also identify any witnesses that they believe have Relevant information. Any witness list should include a summary of the information the witness can provide regarding the issues raised in the Complaint.

I. Miscellaneous

1. Grievance of a Disciplinary Action

a. Any employee disciplined pursuant to this Policy, except faculty, teaching assistants, assistant instructors or members of the University of Texas Police Department (each of whom are subject to separate procedures [4]), may grieve that action by submitting a written grievance, within 10 business days of the imposition of the disciplinary action, to the President's Office. Ordinarily, the President will assign responsibility for review and action on the appeal of the vice president's action to another vice president; however, when required by unusual circumstances, the President may review and handle a grievance pursuant to this Policy.

b. If the disciplinary action that is being grieved does not involve termination, demotion, or suspension without pay, the vice president will thoroughly review and finally decide the matter within 30 calendar days of its receipt unless unusual circumstances require more time.

c. If the disciplinary action that is being grieved involves the termination, demotion or suspension without pay of an employee who is covered by HOP 5-2420 the vice president who is assigned to review the grievance will follow the procedures for appealing such actions contained in that section. Complainants will be required to appear and testify at hearings that may be a part of such proceedings.

d. Any student disciplined under this Policy has the right to appeal as provided in General Information Catalog, Appendix C, Chapter 11-Institutional Rules on Student Services and Activities.

2. Effect on Pending Personnel Actions

The filing of a Report or Complaint under this Policy will not stop or delay any personnel/academic actions including: (1) any evaluation or disciplinary action relating to a person who is not performing up to acceptable standards or who has violated University rules or policies; (2) any evaluation or grading of students participating in a class, or the ability of a student to add/drop a class, change academic programs, or receive financial reimbursement for a class; or (3) any job-related functions of a University employee. Nothing in this section shall limit the University's ability to take interim action or execute an emergency removal.

3. Relationship of Complaint Process to Outside Agency Time Limits

The filing of a Discrimination or Harassment Complaint does not excuse the Complainant from meeting deadlines set by law or an outside administrative agency.

4. Time Frames

DIA may extend the time frames mentioned in this Policy at its discretion.

5. Documentation and Confidentiality

The University will maintain documents related to Complaints under this Policy as required by law. The Office of the Dean of Students will be responsible for records related to Complaints against students.

DIA will be responsible for records related to Complaints against non-students. The confidentiality of a Complaint under this Policy and all documents, correspondence, interviews and discussions relating to the investigation of the information contained in a Complaint will be maintained on a need-to-know basis to the extent

permitted by law. Any person who knowingly and intentionally makes an unauthorized disclosure of confidential information contained in a Complaint or otherwise relating to the investigation of a Complaint under this Policy is subject to disciplinary action. The University may release information in the event of a lawsuit, official inquiry, or administrative action.

For Assistance: Questions regarding this policy should be directed to DIA.

Appendix J: Prohibition of Campus Violence

The University of Texas at Austin is committed to creating and maintaining an environment that is free from threatening and violent behavior. Such behavior while on University owned or controlled property, or while engaged in official University business, will not be tolerated. The University encourages students, faculty, staff, visitors and contractors to promptly report any emergency or crime to University Police (UTPD). The University will respond promptly, positively, and aggressively to deal with threatening and violent behavior.

I. **General Policy Guidelines**

A. **Scope**
This policy applies to the conduct of any person on University premises or at University sponsored activities, including faculty, students, staff, visitors or contractors while on University owned or controlled property, or while engaged in official University business.

B. **Definitions**
Violent behavior includes any behavior, whether intentional or reckless, which results in bodily injury to one's self, another person and/or damage to property.
Threatening behavior includes any behavior, whether intentional or reckless, that by its nature would be interpreted by a reasonable person as an intent to harm one's self, another person or damage property belonging to another. Threats may be oral, written, or communicated through conventional mail, electronic, fax, or telephonic means and may be direct or implied.
Campus violence encompasses threatening and violent behavior. Campus violence can include, but is not limited, to the following:

- Physically assaulting a person, including slapping, hitting, punching, pushing, poking or kicking; or physical threats to inflict physical harm;
- Arson, sabotage, equipment vandalism, damaging or destroying property, throwing or hitting objects;
- Displaying a weapon or an object which appears to be a weapon in a threatening manner; carrying a firearm of any kind onto University-owned or University-controlled property (except those permitted by state law or University policy 8-1060, Campus Concealed Carry, of the Handbook of Operating Procedures); or using a weapon to harm someone
- Using greater physical size/strength to intimidate another; intimidating or threatening gestures, bullying, or hazing
- Intimidating, threatening, hostile, or abusive language directed toward another person that communicates the intention to engage in violence against that person and leads a reasonable person to expect that violent behavior may occur
- Stalking another person

C. **Campus Violence Prohibited**
Any person who engages in campus violence while on University owned or controlled property, or while engaged in official University business, may be removed and/or barred from the premises pending the outcome of an investigation.

II. **Procedures**

A. **Reporting Immediate Emergencies or Crimes**
Any individual who experiences, is aware of, or witnesses campus violence, or who has reason to suspect that campus violence is occurring that may be of a criminal nature or poses clear and present danger should immediately dial "911." The emergency dispatcher will direct the call to the University of Texas Police Department or the Austin Police Department as appropriate. In addition, the university department head where the incident occurred should be informed.

B. **Reporting Less Immediate Threats**
Every supervisor, administrator and university official is responsible for responding promptly and thoroughly to allegations of campus violence and for reporting such behavior through normal lines of administrative responsibility. For assistance the incident may also be reported directly to the Behavior Concerns Advice Line (BCAL) at (512) 232-5050 or at the website. The caller will be advised how to proceed and/or will be routed to the appropriate resource.

- Incidents involving staff members shall be directed to the Associate Vice President for Human Resources. The Associate Vice President for Human Resources will contact the appropriate officials and department personnel to address the potential campus violence.
- Incidents involving students shall be directed to the Office of the Dean of Students. The Office of the Dean of Students will contact the appropriate officials and department personnel to address the potential campus violence.
- Incidents involving faculty members should be directed to the Office of the Executive Vice President and Provost. The Provost's Office will contact the appropriate officials and department personnel to address the potential campus violence.

C. **Protective or Restraining Orders**
Any member of the University community who takes out a protective or restraining order against another person, or receives a protective or restraining order which lists University owned or leased premises as a protected area, shall provide their supervisor and The University of Texas at Austin Police Department with a copy of such order along with a photograph of the person against whom the order has been issued when possible.

D. **Sanctions**
Individuals who violate this policy may be removed from campus, arrested and be subject to legal action. University employees and students who violate this policy may also be subject to disciplinary action up to and including dismissal.

E. **Filing of False Reports**
Any person who knowingly and intentionally files a false report shall be subject to disciplinary action that may include dismissal, expulsion, and/or legal action.

F. **Documentation and Confidentiality**
The University shall document the report and the investigation. Such documentation shall be retained by The University of Texas at Austin Police Department or the appropriate office listed in II.B. above. Subject to the provisions of the Texas Public Information Act, Chapter 552, Texas Government Code, the University will maintain the confidentiality of the report and the identity of the reporting person during the investigation. The identity of the reporter and perpetrator may become apparent, or disclosed, as a result of the actions taken to resolve the investigation.

G. **Retaliation Prohibited**
A faculty, student, or staff member who retaliates in any way against an individual who has brought a complaint in good faith pursuant to this policy or participated in good faith in an investigation of such a complaint, is subject to disciplinary action, including dismissal.

For assistance: Questions regarding campus violence should be directed to Human Resource Services or the Office of the Dean of Students.

Appendix K: Student Travel Policy for University-Organized or Sponsored Events

A. **Policy Statement**
It is the policy of The University of Texas at Austin to promote safe travel by students to and from certain events and activities covered by this policy.

B. **Scope**
This policy applies to the travel of enrolled undergraduate or graduate students to attend activities or events that are organized and/or sponsored by The University of Texas at Austin and occur more than 25 miles from the University campus or an event that has a duration of 24 hours or more.
The types of activities and events covered by this policy include course-related field trips, Recreational Sports club trips, the activities of sponsored student organizations, and meetings of academic organizations where a student is officially representing the University.
The policy does not apply to travel undertaken by students to attend out of town athletic events, or to engage in student-teaching, internships, practicums, observations or research, unless the research is organized by a University employee.

C. **Definitions**
1. An **organized event** is one that is initiated, planned, and arranged by a member of the University's faculty or staff, or by the members of a sponsored student organization, and is approved by an appropriate administrator.
2. A **sponsored event** or activity is one that the University endorses by supporting it financially, or by sending students to participate in it as official representatives of the University.
3. An **enrolled student** is one who has been admitted to and is attending classes at the University.
4. An **appropriate administrator** is a dean, department chair, or director of an administrative unit, or their delegate.

D. **Travel Authorization**
In order to assure that the events or activities that involve student travel are within the course and scope of the University's mission, and that student safety issues have been addressed, travel undertaken pursuant to this policy must be authorized in advance by an appropriate administrator.
1. To request authorization, members of the faculty, staff or sponsored student organizations who organize activities covered by this policy must submit a completed Student Travel Request Authorization form, along with the required documents and information, to the appropriate administrator for approval. The request must be submitted at least five business days in advance of travel to the activity or event.
2. The following information/documents must be submitted along with the Travel Authorization Request form:
   a. A list of participants including their names and EID.
   b. The name, phone number, and address of lodgings, if applicable.
   c. The date and time of the arrival and departure from lodgings, if applicable.
   d. The date and time of the departure and return to campus.
   e. The name and phone number for the responsible University employee(s) who will be available to the students at all time during the travel and activity.
   f. Copies of valid operators' licenses for any students who will operate vehicles.
   g. A schedule for the trip that includes travel, planned activities, meals, and sleep period(s). Organizations utilizing personal vehicles for travel must allow for travelers to have at least six hours of sleep before driving.
3. When leading group trips, faculty or staff must collect and take a copy of the following documents and information with them while on the trip:
   a. A list of the names, phone numbers, and the name and number of an emergency contact for each participant;
   b. Copies of valid operators' licenses for any participants who will operate vehicles; and
   c. Copies of current medical insurance certificates or a copy of both sides of an insurance group membership card for each person who wishes to participate in the activity or event. Purchase of a reasonably priced, short-term special events policy can be arranged by Student Activities on behalf of students who do not have, or cannot verify, current medical coverage. Information concerning this coverage is available from Student Activities, (512) 471-3065.
   d. Completed and signed Release and Indemnification Agreements for each participant.
   e. Completed and signed Authorization for Medical Treatment forms for each participant.
4. Faculty who teach courses that involve frequent field trips can collect the following information from students at the beginning of each semester and keep it on file with the appropriate administrator for use throughout a semester.
   - Proof of current medical insurance
   - Completed and signed medical authorization forms
   - Completed and signed release and indemnification agreements (a single release and indemnification agreement may be used if a single description fits all the proposed trips)
   - Proof of a valid vehicle operator's license for students who will operate vehicles
5. One-time approval can be provided for multiple trips led by faculty or staff that involve the same locations and same participants.
6. The Travel Authorization Request, the Authorization for Medical Treatment, and the Release and Indemnification Agreement forms are available from the Office of the Vice President of Student Affairs or can be downloaded from the Student Travel website.

E. **Travel by Motor Vehicle**
1. **Compliance with Laws and Policies**
   a. Motor vehicles used for travel covered by this policy shall have a current proof of liability insurance card and a state inspection certification.
   b. Travel undertaken by means of 15 passenger vans must comply with the requirements of The University of Texas System's Business Procedure Memorandum 16.5.2.
2. **Vehicle Operator Requirements**
   a. All students who will operate vehicles while engaged in travel covered by this policy must have a valid operator's license and be trained as required by law to drive the vehicle that will be used.
   b. Operators shall comply with all laws, regulations and posted signs or directions regarding speed and traffic control.
   c. Operators shall take a mandatory 30-minute rest break every four hours.

d. Operators shall drive no more than 10 hours in any 24 hour period.

e. Trips requiring more than 10 hours driving time to reach a point of destination shall require overnight lodging.

f. A navigator shall be assigned for all trips scheduled to take more than two hours. The navigator must stay awake while on duty.

3. **Safety Requirements for Both Operators and Passengers**

a. **Seat Belts.** Occupants of motor vehicles shall use seat belts or other approved safety restraint devices required by law or regulation at all times when the vehicle is in operation.

b. **Alcohol and Illegal Substances.** Occupants of motor vehicles shall not possess, consume, or transport any alcoholic beverages or illegal substances.

c. **Passenger Capacity.** The total number of passengers in any vehicle at any time it is in operation shall not exceed the manufacturer's recommended capacity, or the number specified by University policy, or federal or state law or regulations, whichever is lowest.

4. **Travel by Rental Vehicle**

Rentals of vehicles to use for travel to activities or events covered by this policy are governed by the following guidelines:

a. **Vehicle Reservations**

The University is a participant in the State Travel Management Program, which has negotiated favorable vehicle rental rates with a number of car rental companies. While use of one of the University's travel agencies is not required, doing so will help assure that: 1) vehicles are rented pursuant to the State Travel Management plan whenever possible; 2) that vehicle rental agreements are valid; and 3) that necessary insurance coverage has been purchased. Information concerning those agencies is available from the University Travel Management Services website.

b. **Payment of Costs for Rental Vehicles**

Vehicle rental charges can be a) billed centrally to University Travel Management Services; or b) billed directly to those Departments or Divisions that have uniquely numbered accounts with state contract car rental companies. If the rental costs are to be centrally billed, it will be necessary for the driver to obtain a voucher from the University's Travel Management Services prior to picking up the rental vehicle.

If necessary, personal credit cards may be used to rent vehicles for travel covered by this policy, and cardholders will be reimbursed for appropriate and approved costs. If rentals are from companies that are not under the state contract, the reimbursement amount will be limited to that which would have been incurred for equivalent state contract rentals.

F. **Insurance Coverage**

1. **Rentals from companies participating in the State Travel Management Program.** Loss/Damage Waiver and Primary Liability insurance coverage are automatically included in the rates charged by companies participating in the State Travel Management Program. That protection does not cover injuries to persons or possessions inside a rental vehicle. Therefore, it is suggested that the personal injury insurance protection and the personal effects insurance protection offered by rental companies be purchased for student travel covered by this policy, particularly if there will be numerous passengers in the vehicle. The cost of the extended coverage is reimbursable only from funds held in 18, 19, 26, 29, and 30 accounts.

2. **Rentals from non-state contract rental companies.**

If no state contract cars are available and it is necessary to rent vehicles from non-contract companies, then both the Loss/Damage Waiver and Primary Liability Coverage must be purchased unless the rental is charged to a University issued Diner's Club card. It is suggested that the personal injury insurance protection and the personal effects insurance protection offered by rental companies be purchased for student travel covered by this policy, particularly if there will be numerous passengers in the vehicle. The cost of the extended coverage is reimbursable only from funds held in 18, 19, 26, 29 and 30 accounts.

3. **Travel by Means of a Vehicle Owned or Leased Long-Term by the University**

In addition to complying with the general rules set out above, travel by means of a vehicle that is owned or leased long-term (for a period of more than one year) by the University must comply with the following requirements:

a. **Proof of Insurance, Inspection, and Safety Devices**

Vehicles used for travel activity covered by this policy must:

1. Have a current proof of liability insurance card;
2. Have a valid state inspection sticker;
3. Have all devices or equipment required by federal or state law or regulations and any applicable UT System policy; and
4. Comply with any other applicable federal or state law or regulation and any applicable UT System policy.

b. **Service and Maintenance**

A University-owned or long-term leased vehicle used for student travel under this policy must be subject to scheduled periodic service and maintenance by qualified persons and comply with all applicable requirements of any UT System policy.

c. **Employee Operators**

All operators of vehicles described in this section shall be on the payroll of The University of Texas at Austin. All operators must have a valid license for the operation of a particular vehicle; must be authorized to operate the vehicle in accordance with UT System policy; and have a current BMDRIV rating on file. Human Resources or the Controller's Office can be contacted for information on how employees may obtain a rating.

4. **Travel by Privately Owned Vehicles**

The use of personal vehicles by students for travel to events covered by this policy is strongly discouraged.

a. When requesting authorization for travel that involves the use of personally owned vehicles, the requestor, in addition to submitting the information described in Part D.2., shall also submit a copy of a current liability insurance certificate for any vehicle to be used for the proposed travel.

b. The persons responsible for the proposed activity and travel shall inform students who will drive their privately owned vehicles that their personal liability insurance policy will be looked to first to cover any liability that may result from the use of the vehicle for the proposed travel.

5. **Volunteer Drivers and Passengers**

Non-student/non-employee drivers and passengers who accompany students on travel covered by this policy must sign the Release and Indemnification and the Authorization for Medical Treatment forms prior to the trip. Forms can be downloaded at the Student Travel website.

For assistance: Questions regarding this policy should be directed to the Office of the Vice President for Student Affairs.

Appendix L: Student Travel Policy for Registered Student Organizations

1. **Policy Statement**
   It is the policy of The University of Texas at Austin to promote safe travel by members of its registered student organizations to certain events and activities.
2. **Scope**
   This policy applies to the travel of student members of a registered student organization when the registered student organization requires or coordinates an activity or event for its student members and the activity or event occurs overnight or more than twenty-five miles from the campus of the University. For all international travel, also refer to Appendix N. For travel by sponsored student organizations, please refer to Appendix K (p. 154) HOP 9-1420, Student Travel Policy for University Organized or Sponsored Events.
3. **Trip Approval Requirements**
   A. Registered student organizations that organize events or activities covered by this policy must obtain prior authorization.
   B. To obtain authorization to travel, the registered student organization must apply through a process prescribed by the Assistant Vice President of Student Life. The application must be submitted at least ten days prior to the proposed trip.
   C. Students must follow guidelines and processes set forth by the Assistant Vice President of Student Life for all travel. Specific information of the process and requirements is available on the university website at https://deanofstudents.utexas.edu/safetyed/registered-student-organization-travel.php.
4. **Travel by Motor Vehicle**
   A. **Compliance with State Law**
   Each motor vehicle must have a current proof of liability insurance card and state inspection certification, be equipped with all safety devices or equipment required by federal or state law or regulation, and comply with all other applicable requirements of federal or state law or regulations and any applicable UT System policy.
   B. **Vehicle Operator Requirements**
      i. All students who will operate vehicles while engaged in travel covered by this policy must have a valid operator's license, valid insurance, and be trained as required by law to drive the vehicle that will be used, and comply with applicable requirements of The University of Texas Systemwide Policy UTS 157, Automobile Insurance Coverage for Officers and Employees and General Requirements for the Use of Vehicles.
      ii. Operators of motor vehicles shall comply with all laws, regulations, and posted signs or directions regarding speed and traffic control.
      iii. Operators shall drive no more than two hours without a minimum rest stop of thirty minutes.
      iv. Operators shall drive no more than ten hours in any twenty-four-hour period.
      v. Members must assign a navigator for trips if more than one member is traveling. The navigator shall remain awake while on duty. The navigator's responsibility is to assist with way finding and route planning.
      vi. Trips requiring more than ten hours of driving time shall include overnight lodging.
   C. **Safety Requirements for Both Operators and Passengers**
      i. **Seat Belts.** Occupants of motor vehicles shall use seat belts or other approved safety restraint devices required by law or regulation at all times when the vehicle is in operation.
      ii. **Alcohol and Illegal Substances.** Occupants of motor vehicles shall not possess, consume, or transport any alcoholic beverages or illegal substances.
      iii. **Passenger Capacity.** The total number of passengers in any vehicle at any time it is in operation shall not exceed the manufacturer's recommended capacity, or the number specified by University policy, UT System Policy 157, or federal or state law or regulations, whichever is lowest.
5. Non-Compliance
   Any organization that fails to comply with this policy may result in the Office of the Dean of Students initiating disciplinary proceedings under subchapter 6-500 and/or subchapter 11-500 of the *Institutional Rules*.

For assistance: Questions regarding this policy should be directed to the Office of the Dean of Students, studentorgtravel@austin.utexas.edu.

Appendix M: Use of E-mail for Official Correspondence to Students

A. **Policy Statement**
Electronic mail (email), like postal mail, is a mechanism for official University communication to students. The University will exercise the right to send email communications to all students, and the University will expect that email communications will be received and read in a timely manner.

B. **Scope**
This policy applies to all admitted and enrolled students of The University of Texas at Austin. Official communications using email can include email to a group, such as all admitted students, or an email message to only one student.

C. **E-mail Addresses**
All current students are provided with an official UT Microsoft 365 email address before they start their first semester at the University. Incoming students will receive an email confirmation when their UT Microsoft 365 is created. While a current student, all University email communication will be routed to the Microsoft 365 email address. More information about using the official UT Microsoft email address is available at the Official Student Email Help Page.
Every student must also provide the University with an up-to-date personal email address using the online update form in UT Direct. The personal email address will be used to send communication once the student has departed from the University.
Students may elect to forward email from their official UT Microsoft 365 email address to their personal email address, if they choose. However, when doing so students accept all risks associated with email not being delivered by their personal email address provider. Email returned to the University with "User Unknown" is not an acceptable excuse for missed communication. Note that students who are also employees are not permitted to forward email to their personal email address while they are a UT employee.

D. **Expectations Regarding Frequency of Reading E-mail**
Students are expected to check email on a frequent and regular basis in order to stay current with University-related communications,

recognizing that certain communications may be time-critical. It is recommended that email be checked daily, but at a minimum, twice per week. Regular email management will also minimize the risk that the inbox will be full, causing the email to be returned to the sender with an error. Undeliverable messages returned because of either a full inbox or use of a spam filter will be considered delivered without further action required of the University.

E. **Privacy and Confidentiality**
Official University communications sent by email are subject to the same public information, privacy, and records retention requirements and policies as other official University communications.

F. **Instructional Uses of E-mail**
Faculty members retain autonomy in determining how email or other forms of electronic communication will be used in their classes, but they must specify the requirements in the course syllabus. Faculty may expect that students are checking email regularly, and faculty members may use email for their courses accordingly.

G. **Authoritative Source**
The authoritative source on this policy and responsibility for its implementation rest with the Chief Information Officer.

H. **For Assistance**
Contact the UT Service Desk for technical support at (512) 475-9400 or send email to the help@utexas.edu (%20help@utexas.edu).

Appendix N: Student Travel Policy for International Locations

A. **Policy Statement** It is the policy of The University of Texas at Austin to promote safe international travel for students participating in activities and/or events covered under this policy. Under this policy, the University reserves the right to cancel any international activity and/or require UT students to depart their international location due to health, safety and/or other concerns, to include academic and disciplinary misconduct. Current international travel policy and Restricted Region travel information can be found on the Texas Global website.

B. **Scope**
This policy applies to the travel of enrolled undergraduate, graduate, or professional students attending activities and/or events (whether required or optional) that occur in an international location (including U.S. protectorates and insular areas). This policy applies to UT-affiliated student travel with or without university funding.
The types of activities and events covered by this policy include:

- trips organized and/or sponsored by The University of Texas at Austin that are part of or contribute to an academic course or degree program, including internships, practicums, and research;
- academic-related international service learning, internships, practicums, research, and volunteer opportunities organized and/or sponsored by The University of Texas at Austin;
- travel by members of a registered student organization regardless of whether or not the organization requires its student members to attend the activity or event;
- other trips organized and/or sponsored by The University of Texas at Austin, including the activities of sponsored student organizations;
- travel to meetings of academic-related, professional associations including conferences; and
- official education abroad programs.

C. **Definitions**
1. An **organized event** is one that is initiated, planned, and arranged by a member of the University's faculty or staff, or by the members of a sponsored student organization, and is approved by an appropriate administrator.
2. A **sponsored event** or activity is one that the University endorses by supporting it financially, or by sending students to participate in it as official representatives of the University.
3. An **enrolled student** is one who has been admitted to and is attending classes at the University.
4. An **appropriate administrator** is a dean, department chair, or director of an administrative unit, or their delegate.

D. **Travel Authorization and Registration**
In order to ensure that events or activities which involve student international travel are within the course and scope of the University's mission, and that student safety issues have been addressed, international travel undertaken pursuant to this policy must be authorized in advance by an appropriate administrator and registered as described below:

1. Acceptance into an officially recognized exchange, affiliate or faculty led program. Students participating in approved education abroad programs are registered in the MyAbroad portal.
2. Receive group travel authorization through the Safety Assessment for an International Group Experience (SAIGE).
3. All travel outside the scope of approved education abroad programs must register through the UT Austin International Travel Registry.
4. If applicable, obtain approval to travel to a Restricted Region. All travelers are responsible for ensuring compliance with Restricted Regions travel approval policy, as set forth by the International Oversight Committee (IOC).

Participant Category	Signature Required
Individual Student	Department Chair for Restricted Region
Group Travel with Accompanying Faculty	Department Chair
Registered Student Organization	Student Activities – Student Organization Travel, Office of the Dean of Students (and Department Chair for Restricted Region)
Sponsored Student Organization	Sponsoring Department (and Department Chair for Restricted Region)

E. **Non-Compliance**
This applies to any individual, organization or group travel that falls within the scope of this policy. Failure or refusal to comply with this policy may result in the Dean of Students initiating disciplinary proceedings under subchapter 6-500 and/or subchapter 11-500 of the *Institutional Rules*.
If a faculty or staff member administratively responsible for the program fails or refuses to comply with policy directives, Texas Global will inform the appropriate chair and dean. Sanctions could result in the withholding of reimbursement for travel expenses.
If a student fails to obtain Restricted Regional approval for travel from the IOC they will not be reimbursed for costs from the sponsoring college/school department or unit.
If the University incurs expenses on behalf of the student, faculty/staff, organization, or program, the individual or corresponding

college/school, department or unit will be held financially responsible.

Appendix O: Preventing Discrimination Against Pregnant & Parenting Students

This policy is included as HOP 3-3021: Preventing Discrimination Against Pregnant & Parenting Students. See the University Policy Office's website for current and archived versions of this policy at https://policies.utexas.edu/.

Total number of degrees conferred in all colleges and schools	7,254	8,767	16,021	410,402	354,960	765,363

1. Figures are given by academic year for the years complete at the time of publication. The number of degrees conferred is accurate as of the date of publication. Changes to the data, if any, will be reflected in the "Total Conferred" columns of the next General Information.
2. Beginning for the long session 2009-2010, information about degrees conferred is provided by the Institutional Reporting, Research, and Information Systems.
3. Through the session 1905–1906, the master's degree was given in the Department of Literature, Science, and Arts; then through the session 1909–1910, in the College of Arts. Prior to the 1923–1924 session, the master's degree in engineering, with designation of the branch in which given, was awarded in the College of Engineering. Branch designations were discontinued in 1978.
4. Prior to 1998–1999, the Doctor of Pharmacy was conferred in the Graduate School. In 1998–1999, the degree was awarded in both the Graduate School and the College of Pharmacy; thereafter it was awarded in the College of Pharmacy.
5. Prior to the long session 1951–1952, the School of Architecture was a part of the College of Engineering.
6. Prior to 2000–2001, the Bachelor of Science in Interior Design was conferred in the College of Natural Sciences. In 2000–2001, the degree was awarded in both the College of Natural Sciences and the School of Architecture.
7. After the long session 1970–1971, degrees previously conferred by the College of Arts and Sciences were awarded in the Colleges of Humanities, Natural Sciences, and Social and Behavioral Sciences and the Division of General and Comparative Studies. Beginning with the spring semester 1979, the degrees for the Colleges of Humanities and Social and Behavioral Sciences and the Division of General and Comparative Studies have been awarded in the College of Liberal Arts.
8. Prior to the long session 1965–1966, the Bachelor of Journalism degree was conferred in the College of Arts and Sciences. Total numbers of Bachelor of Journalism degrees conferred up to that time were: men, 911; women, 850; both, 1,761. These totals are now listed in the College of Communication and are not included in the totals for the College of Arts and Sciences.
9. Prior to 1990–1991, the Bachelor of Science in Kinesiology was designated the Bachelor of Science in Physical Education.
10. The Bachelor of Science in Geosystems Engineering and Hydrogeology is offered jointly by the Cockrell School of Engineering and the Jackson School of Geosciences.
11. Prior to February 1969, the Bachelor of Arts in Art was designated Bachelor of Science in Art.
12. In spring 1997, the Bachelor of Arts in Drama and the Bachelor of Arts in Dance were replaced by the Bachelor of Arts in Theatre and Dance.
13. Prior to February 1969, the Bachelor of Arts in Drama was designated Bachelor of Science in Drama. In spring 1997, the Bachelor of Arts in Drama and the Bachelor of Arts in Dance were replaced by the Bachelor of Arts in Theatre and Dance.
14. Prior to February 1969, the Bachelor of Arts in Music was designated Bachelor of Science in Music.
15. Beginning in summer 1971, the degrees formerly conferred in the College of Arts and Sciences were conferred instead in the College of Humanities, the College of Natural Sciences, the College of Social and Behavioral Sciences, and the Division of General and Comparative Studies. In spring 1979, degrees in the College of Humanities, the College of Social and Behavioral Sciences, and the Division of General and Comparative Studies were moved to the College of Liberal Arts.
16. The Bachelor of Arts with a major in geological sciences and the Bachelor of Science in Geological Sciences were conferred in the College of Natural Sciences through summer 2006; in fall 2006, they were conferred in both the College of Natural Sciences and the Jackson School of Geosciences; since spring 2007, they have been conferred only in the Jackson School.
17. Beginning in summer 1971, the degrees formerly conferred in the College of Arts and Sciences were conferred instead in the College of Humanities, the College of Natural Sciences, the College of Social and Behavioral Sciences, and the Division of General and Comparative Studies. In spring 1979, degrees in the College of Humanities, the College of Social and Behavioral Sciences, and the Division of General and Comparative Studies were moved to the College of Liberal Arts.
18. Prior to April 1969, this degree was designated Bachelor of Laws.
19. Prior to the summer session 1971, degrees in the Colleges of Humanities and Social and Behavioral Sciences and the Division of General and Comparative Studies were conferred in the College of Arts and Sciences. Beginning with the spring semester 1979, these degrees have been awarded in the College of Liberal Arts.
20. Prior to 1987–1988, the Bachelor of Science in Architectural Studies was conferred in the College of Liberal Arts. In 1987–1988, the degree was conferred in both the School of Architecture and the College of Liberal Arts. Since 1988–1989, the degree has been awarded in the School of Architecture.
21. Prior to summer session 1971, degrees now in the College of Natural Sciences were conferred in the College of Arts and Sciences.
22. The Bachelor of Arts with a major in geological sciences was conferred in the College of Natural Sciences through summer 2006; in fall 2006, it was conferred in both the College of Natural Sciences and the Jackson School of Geosciences; sice spring 2007, it has been conferred only in the Jackson School.
23. In fall 2000, the Bachelor of Science in Clinical Laboratory Science replaced the Bachelor of Science in Medical Technology.
24. The Bachelor of Science in Geological Sciences was conferred in the College of Natural Sciences through summer 2006; in fall 2006, it was conferred in both the College of Natural Sciences and the Jackson School of Geosciences; since spring 2007, it has been conferred only in the Jackson School.
25. Prior to the summer session 1992, this degree was designated Bachelor of Science in Home Economics.
26. Prior to the summer session 1992, this degree was designated Bachelor of Science in Home Economics. Through 1999–2000, the Bachelor of Science in Interior Design was conferred in the College of Natural Sciences; in 2000–2001, it was awarded in both the College of Natural Sciences and the School of Architecture.
27. In fall 2000, the Bachelor of Science in Medical Technology was replaced by the Bachelor of Science in Clinical Laboratory Science.
28. Prior to the summer session 1992, this degree was designated Bachelor of Science in Home Economics.
29. Between 1929 and 1943, the Bachelor of Science in Nursing degree was conferred in the College of Arts and Sciences. Eleven women graduated in the program.
30. Prior to 1998–1999, the Doctor of Pharmacy was conferred in the Graduate School. In 1998–1999, the degree was awarded in both the Graduate School and the College of Pharmacy; thereafter it was awarded in the College of Pharmacy.
31. Prior to summer session 1971, degrees in the Colleges of Humanities, Natural Sciences, and Social and Behavioral Sciences and the Division of General and Comparative Studies were conferred in the College of Arts and Sciences. Beginning with the spring semester 1979, the degrees for the Colleges of Humanities and Social and Behavioral Sciences and the Division of General and Comparative Studies have been awarded in the College of Liberal Arts.
32. The degree is offered by the Jackson School of Geosciences with a major in geological sciences, by the College of Liberal Arts with a major

in geographical sciences, and by the College of Natural Sciences with a major in biological sciences. The degree programs share common prescribed work, but each major has its own specific requirements.

33. In fall 2018, the Bachelor of Arts in Art was replaced in the College of Fine Arts by the Bachelor of Arts.

34. In fall 2023, the Bachelor of Science in Electrical Engineering was replaced in the Cockrell School of Engineering by the Bachelor of Science in Electrical and Chemical Engineering.

Summary of Enrollment in Residence

	Men	Women	Both
Fall semester 2023	23,184	29,898	53,082
Spring semester 2024	22,193	28,583	50,776
Summer session 2024	6,840	9,187	16,027

Enrollment in Residence, 1883-2024 [1]

For the period prior to 1983–84, enrollment is given for every fifth year. Annual enrollment for the years 1883–84 through 1932–33 is given in the 1951–52 edition of *General Information*; annual enrollment for 1933–34 through 1982–83 is given in the 2007–08 edition.

	Fall Semester	Summer Session
1883–1884	221

2022-2023	52,384	15,515
2023-2024	53,082	16,027

1. Prior to the session of 1929–1930, the summer session figures are grouped with the following fall semester and the extension year used is the September 1–August 31 year preceding the fall semester. Beginning with the session of 1929–1930, statistics are given for the academic year (September 1–August 31), the summer session being grouped with the preceding fall semester, and the extension year used being the September 1–August 31 year concurrent with the fall semester and summer session indicated.

2. Because of the change in the method of recording enrollment figures, as explained in footnote 1, the figures for the 1929 summer session and the 1928–1929 extension year are given separately.

Texas Common Course Numbering System

To help students transfer credit from one institution to another, Texas community colleges employ a statewide numbering system for their courses. The Texas Common Course Numbering system (TCCN) is a standard set of four-character abbreviations for academic disciplines and four-digit course numbers. The first digit of the number represents the academic level of the course (0 for subfreshman, 1 for freshman, and 2 for sophomore); the second represents the semester credit hour value of the course. Texas public universities, and some private ones, cross-reference their courses with TCCN.

Listed below are TCCN course designations and their University transfer credit evaluations. In the University's three-digit numbering system, the first digit indicates the semester credit hour value of the course. The suffixes *A* and *B* indicate the first and second parts of a course; credit for each part is half the value indicated by the first digit.

[1] This is a modified course number with a higher credit value than is normally offered at the University. The higher value does not affect the course's prerequisite or degree applicability.

[2] Lower-division biology courses may transfer as generic credit, without a specific University course number. The terms "Frmn" and "Soph" identify freshman- and sophomore-level lecture credit. "Lab" identifies lower-division laboratory credit. For students in the School of Biological Sciences, such credit is applicable toward prerequisite and degree requirements only with department approval. For students in other degree plans that require specific biology courses, such credit is applicable only with the approval of the student's academic dean. Introductory major-track lecture credit (TCCN BIOL 1406, 1407, 1306,

or 1307) generally transfers as BIO 311C and BIO 311D. Major-track laboratory credit (TCCN BIOL 1106, 1107, or the lab components of 1406 and 1407) generally transfers with the modified course numbers BIO 206LA and 206LB.
Nonmajor lecture credit (TCCN BIOL 1408, 1409, 1308, or 1309) generally transfers as BIO 302E and BIO 302D. Nonmajor laboratory credit (TCCN BIOL 1108, 1109, or the lab components of 1408 and 1409) transfers generically, because the University does not offer nonmajor lab courses.

[3] This is a modified course number with a lower credit value than is normally offered at the University. In many cases, such transfer credit may be counted toward prerequisite or degree requirements in place of the higher-value University course; however, such substitution is at the discretion of the student's academic dean.

[4] This is a course no longer offered at the University but still used in awarding transfer credit and still applicable toward certain degree requirements. For students in the School of Nursing, BIOL 2420, 2421, 2320, 2321, 2120, and 2121 transfer as retired Microbiology (MIC) courses.

[5] Texas community colleges do not offer direct equivalents of The University of Texas at Austin's GOV 310L, GOV 312L. or GOV 312P. GOVT 2305+2306 together fulfill the core 070 requirement. Either GOVT 2305 or 2306 combines with GOV 310L (but not with GOV 312L or GOV 312P) to fulfill the core 070 requirement.

[6] For School of Architecture students, ARCH 1311 transfers as generic architecture credit and ARC 308 must be taken in residence.

Courses

The University offers courses in the following fields of study. The abbreviations are used in catalogs, course schedules, and student records. For Medical courses, please see the courses section in the Medical School Catalog. For Law courses, please see the courses section in the Law School Catalog.
Not all courses are taught each semester. Consult the Course Schedule to determine which courses and topics will be offered during a particular semester. The Course Schedule reflects changes made to the course inventory after the publication of this catalog.
A full explanation of course numbers is given in the Credit Value and Course Numbers (p. 59) section.

A I - Artificial Intelligence

Artificial Intelligence: A I

Lower-Division Courses

Upper-Division Courses

Graduate Courses

A I X80E. Ethics in Artificial Intelligence.
Examine important responsibilities and ethical challenges faced by an AI professional. Identify design decisions with ethical implications and consider the perspectives of users and other stakeholders when making ethically significant design decisions.

A I X80H. Artificial Intelligence in Healthcare.
Explore health IT systems, ranging from data semantics, data interoperability, diagnosis code, to workflow in clinical decision support systems. Discuss how AI innovations are transforming healthcare systems by focusing on AI in drug discovery, AI in medical image diagnosis, explainable AI for health risk prediction, and ethics of AI in healthcare.

A I X88. Natural Language Processing.
Explore computational methods for syntactic and semantic analysis of structures representing meanings of natural language; study of current natural language processing systems; methods for computing outlines and discourse structures of descriptive text.

A I X88J. Optimization.
Explore the background on convex sets and functions, linear programming, convex programming, and iterative first-order and second-order methods.

A I X88K. Online Learning and Optimization.
Explore algorithms for convex optimization and algorithms for online learning. Focus on algorithms for large scale convex optimization. Discuss problems in machine learning. Apply these ideas to online learning.

A I X88U. Planning, Search, and Reasoning Under Uncertainty.
Introduction to three key foundational problems in AI: planning, search, and reasoning under uncertainty. Investigate how to define planning domains, including representations for world states and actions, covering both symbolic and path planning. Study algorithms to efficiently find valid plans with or without optimality, and partially ordered, or fully specified solutions.

A I X89L. Automated Logical Reasoning.
Explore automated reasoning techniques for propositional logic, first-order logic, linear arithmetic over reals and integers, theory of uninterpreted functions, and combinations of these theories. Examine automated logical reasoning both from a theoretical and practical perspective, including building useful tools, such as SAT and SMT solvers.

A I X91L. Machine Learning.
Explore computing systems that automatically improve their performance with experience, including various approaches to inductive classification such as version space, decision tree, rule-based, neural network, Bayesian, and instance-based methods; as well as computational learning theory, explanation-based learning, and knowledge refinement.

A I X91M. Case Studies in Machine Learning.
Explore major concepts, techniques, algorithms, and applications in machine learning. Evaluate machine learning methods and discuss practical case studies to produce solutions for real-world data analysis problems.

A I X94D. Deep Learning.
Explore the basic building blocks and intuitions behind designing, training, tuning, and monitoring of deep networks. Examine both the theory of deep learning, as well as hands-on implementation sessions in pytorch. Explore a series of application areas of deep networks in: computer vision, sequence modeling in natural language processing, deep reinforcement learning, generative modeling, and adversarial learning.

A I X94R. Reinforcement Learning: Theory and Practice.
Introduction to the theory and practice of modern reinforcement learning, with emphasis on temporal difference learning algorithms.

A I X95T. Topics in Artificial Intelligence.

A I X98. Thesis.

Professional Courses

AAR - Applied Archaeology

Applied Archaeology: AAR

Lower-Division Courses

Upper-Division Courses

Graduate Courses

AAR X80. Topics in Applied Archaeology.

Professional Courses

AAS - Asian American Studies

Asian American Studies: AAS

Lower-Division Courses

AAS X01. Introduction to Asian American Studies.
Introduces the interdisciplinary study of Asian immigrants and Asian Americans in the United States. Explores key concepts, including immigration history, identity and community formation, cultural representation, and the intersections of race, class, gender, and sexuality.

AAS X02. Immigration and Ethnicity.
Examine the changing population of the United States from colonial times to present.

AAS X03. Introduction to the Asian Diaspora.
Examine the global dispersal of Asian populations from the mid-1800s to the present.

AAS X10. Introductory Topics in Asian American Studies.
An introduction to Asian American studies through a variety of disciplines.

AAS X10.1. Psychological Perspectives on Asian American Identity.
Examines the unique culturally-influenced psychologies of various Asian American groups, including such concepts as identity formation, enculturation, assimilation and resistance, and racial and psychological normativity.

AAS X10.2. Race, Politics, and Identity in Asian America.
An introduction to Asian American politics. Subjects include the American political process, and the historic and contemporary role of Asian Americans within that process.

AAS X10.3. Mixed Race Identities.
Analyzes the historical and contemporary significance of issues of race" and "mixing" in a North American context. Subjects include the situation of "mixed race" people throughout United States history; historical policies that have shaped racial formation in the United States; comparative conceptions of "mixed" people transnationally; and racial, ethnic, and cultural identity.

AAS X10.4. Asian American Creative Arts.
Issues and identities shaped by issues of race, ethnicity, gender, immigration status, and family dynamics. These subjects are explored through production of literary, artistic, performance, or other creative projects.

AAS X10.5. Race, Immigration, and Family.
Introduction to family systems in the United States in a post-WWII framework with a central focus on Asian Americans. Students will investigate how gender, race, and ethnicity intersect and inform our understanding of the institution of the family.

AAS X10.6. Asian American Film History.

AAS X12. Introduction to Asian American History.
Introduces students to the national and transnational histories of Asian Americans in the United States. Explores a wide range of themes related to the Asian American experience.

AAS X14. Asian American Literature and Culture.
Explores how authors and artists over the course of the past century have imagined what it means to be Asian American. Covers a diverse range of Asian immigrant histories and the formation of Asian American identities according to ethnicity, gender, sexuality, class, and citizenship.

AAS X18Q. Supervised Research.
Supervised, student-derived research in Asian American studies.

AAS X19S. Topics in Asian American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Asian American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

AAS X20C. Contemporary Asian American Novels.

AAS X20D. Asian American Media Cultures.
Examine popular and critical roles, representations, and politics of Asian Americans in U.S. media including Hollywood cinema, U.S. network and cable television, Asian American independent film, and online media.

AAS X20F. Documenting Difference.
Explore the theory, history, practice and poetics of minority documentary, as well as the related fields of oral history and archiving with a particular emphasis on Asian American examples.

AAS X20G. Race, Internet, and Social Media.
Explores the critical, theoretical and practical analysis of race and new media.

AAS X20J. Japanese Popular Culture: Anime, Manga, and the Otaku.
Examine a wide variety of Japanese popular media within the historical context during which these unique cultural forms developed. Focus on the popular manga and anime Japan has exported since becoming an economic superpower in the 1980s, the utopian/dystopian expression in Japanese sci-fi narratives of this era, and the complex interplay of gender and technology in the new post-human societies these narratives envision.

AAS X20K. Theorizing the Human.
Trace the continuities and transformations in constructions of populations as more or less human, from settler-colonial conquest to the post-Trump era. Examine what logics mark racialized populations as disposable during the colonization of the Americas, and which systematically condition racialized subjects to a state of enduring siege.

AAS X25C. The Chinese in Diaspora.
Explores narratives of migration, race, ethnicity, and a wide range of experiences of acculturation and assimilation from the perspective of a sending society--China--which has one of the longest and most diverse histories of sending people overseas. Over the last millennia, Chinese have migrated around the world and made homes under a great range of adversity and opportunity, producing many stories of human differences and commonalities.

AAS X25D. The Chinese in the United States.
History of the Chinese in the United States from their first arrival in significant numbers during the California Gold Rush of the mid-nineteenth century to the present.

AAS X25E. Taiwan: Colonization, Migration, and Identity.
Explores issues of ethnicity, empire, and modernization in East Asia from the sixteenth century to the present, as seen through encounters between Taiwan and aborigines, Han Chinese, Dutch, Portuguese, the imperial Qing, Japanese, mainland Chinese Nationalist Party (KMT), and the United States.

AAS X25F. The Two Koreas and the United States.
The political, social, and cultural relationship between North and South Korea, and between the Koreas and the United States, since 1945.

AAS X25G. History of the Southeast Asian Diaspora in the United States.

AAS X25J. South Asian Migration to the United States.
Examine the South Asian diaspora in the United States.

AAS X25K. Refugees in Twentieth-Century United States.
Explores the history of refugees in the twentieth century, with special attention to the United States and its engagement in the international arena of refugee politics.

AAS X25L. Global Economies: Asia and the United States.
Examines key trends in the economies of the United States and Asia, with emphasis on the links between these two major trading blocs.

AAS X25M. Political Economy of Development in Postwar Korea.
Explore the political economy of South Korean development during the postwar period. Examine the history, society, and culture of South Korea. Discuss compressed modernity, developmental state, social movements, gender politics, financial crisis, urbanization, migration, and recent globalization of Korean popular culture.

AAS X25N. Asian American Jurisprudence.
Examine the historical development of United States law and its relationship to Asian Americans, and of Asian American jurisprudence as an independent field of legal scholarship.

AAS X25O. Greater China and United States Economic Relations.
Explore contemporary interconnections between the United States and Greater China. Examine economic frameworks (for example, state-led, market-led, mixed, etc.); the economies of the PRC including Hong Kong as well as Taiwan and the Chinese diaspora; and linkages such as investments, supply chains, tech transfer, non-profit cooperation, and the globalized workforce.

AAS X29S. Topics in Asian American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Asian American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AAS X30C. Racism and Antiracism.
Examines the theories and definitions of racism across several fields: anthropology, sociology, psychology, cultural studies, postcolonial studies, and gender/sexuality studies. Also includes a section that focuses on anti-racist activism, particularly within people of color and immigrant communities.

AAS X30D. Blacks and Asians: Race and Social Movements.
Examines the relations between Asians and Blacks in the United States.

AAS X30E. The Sociology of Race and Work.
Critical examination of work in the United States over the twentieth and twenty-first centuries through a gendered, Asian American lens, using a comparative race perspective. Subjects include the sociological examination of concepts such as labor markets, globalization, care work, and gender/racial segregation in the workplace along with the ways race and gender shape how and where individuals are fitted into the workplace, how skills are evaluated, and how labor markets emerge.

AAS X30F. Transnational Korea.
Recent and contemporary manifestations of the Koreas in the world and the world in the Koreas. Subjects include labor and marriage migration, educational sojourning, transnational adoption, tourism, international sport, corporate expatriation, and media flows.

AAS X30G. Urban Unrest.
Analysis of the roots of urban unrest, exploring a range of origins: joblessness, state violence, white flight, backlash against civil rights gains, new immigration, and interracial strife. Beyond race and class, subjects include exploring unrest as a mode of pushing the normative boundaries of gender and sexuality in public space. Course material will draw from film, literature, history, geography, and anthropology.

AAS X30I. Asian Diaspora on Indigenous Lands.
Explore Indigenous and Asian entanglements and solidarities on Turtle Island (North America) and the Pacific. Examine settler colonialism, racial capitalism, war and militarism, racism and power, and environmental change.

AAS X30J. Asian Mobilities.
Explore alternative research methods and spatialities, in an attempt to produce new understandings of how people live in an increasingly mobile world.

AAS X30K. Asian Americans in the South.

AAS X30L. Anthropology of the Himalayas.
Examine the history and culture of the Himalayan region, including Northeast India, sections of Pakistan and Afghanistan, Tibet, and especially Nepal.

AAS X30M. Reproductive Justice and Race.
Examine the links between reproductive care and social inequality, and explore reproductive outcomes for women in the context of social justice.

AAS X30N. Migration Crisis.

AAS X35. Topics in Asian American Studies.

AAS X35.1. Bridging Community Through Service Learning.
Explores culture in community life and how it affects the collaboration of service providing entities. Through service learning, students will take what they learn in the classroom and apply those theories and techniques within the community. Special emphasis will be given to the understanding of the Asian/Asian American community and multiculturalism in community services.

AAS X58Q. Supervised Research.
Supervised, student-derived research in Asian American studies.

AAS X77. Capstone Seminar.

AAS X78. Community Internship.
Supervised internship in a community, civic, or government organization or program that facilitates the economic, political, and social development of the Asian American community.

AAS X79. Conference Course in Asian American Studies.
Supervised individual study of selected problems in Asian American studies.

AAS X79H. Honors Tutorial Course.
Supervised individual reading for one semester, followed by a semester of research and writing to produce a substantial paper on a specific topic in Asian American studies.

Graduate Courses

AAS X81. Topics in Asian American Studies.
Theoretical and methodological training through key texts in Asian American studies.

AAS X91C. Conference Course.
Designed to expand the graduate student's opportunity for individual consultation. Complements courses fulfilling the Asian American studies graduate portfolio.

Professional Courses

ACC - Accounting

Accounting: ACC

Lower-Division Courses

ACC X10F. Foundations of Accounting.
An introduction to financial and managerial accounting, with emphasis on the content, interpretation, and uses of accounting reports. Discussion of the determination and reporting of net income and financial position, and the theories underlying business financial statements; consideration of managerial accounting topics designed to extend the student's knowledge to the planning and controlling of the operations of the firm.

ACC X11. Fundamentals of Financial Accounting.
Concepts and their application in transaction analysis and financial statement preparation; analysis of financial statements.

ACC X11H. Fundamentals of Financial Accounting: Honors.
An exploration of concepts and their application in transaction analysis and financial statement preparation; and analysis of financial statements.

ACC X12. Fundamentals of Managerial Accounting.
Introduction to cost behavior, budgeting, responsibility accounting, cost control, and product costing.

ACC X12H. Fundamentals of Managerial Accounting: Honors.
Introduction to cost behavior, budgeting, responsibility accounting, cost control, and product costing.

ACC X19S. Topics in Accounting.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Accounting. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ACC X26. Financial Accounting--Intermediate.
Theoretical foundation, concepts, and principles underlying financial statements; current assets; current liabilities; property, plant, and equipment; short-term investments; present value analysis.

ACC X27. Financial Statement Analysis.
Study of financial statements and their related footnotes; tools and procedures common to financial statement analysis; the relationships among business transactions, environmental forces (political, economic, and social), and reported financial information; and how financial statement information can help solve certain business problems.

ACC X28. Management Accounting.

ACC X29. Managerial Accounting and Control.
The origination, processing, reporting, and use in business operations of accounting information for management purposes.

ACC X29S. Topics in Accounting.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Accounting. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ACC X31. Intermediate Accounting I.

ACC X32. Intermediate Accounting II.

ACC X32F. Topics in Foundations of Accounting.

ACC X34M. Healthcare Accounting.
Identify and analyze healthcare revenues, expenses, management problems, and ethical dilemmas, applying theories and tools to recommend strategic solutions.

ACC X40S. Topics in Accounting.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Accounting. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

ACC X51. Accounting Careers Exploration.
Presentations by professional accountants and managers.

ACC X52. Master in Professional Accounting Distinguished Speaker Lyceum.
Discussion of current issues confronting the accounting profession.

ACC X55. Introduction to Taxation.
The role of taxes in contemporary society and their impact on individuals and business.

ACC X56. Financial Accounting Concepts and Research.
Conceptual framework of financial accounting; research methods in financial reporting; and financial reporting institutions and regulations.

ACC X58C. Auditing and Other Assurance Services.
Information quality assurance, auditing, and control, considered from the perspective of a business manager who must decide the type and amount of assurance to acquire.

ACC X59. Managerial/Cost Accounting.
Analysis of manufacturing costs, development of cost estimates, and preparation of relevant information for management decision making.

ACC X62. Auditing and Control.
Professional practice standards and procedures of auditing: ethics, legal liability, sampling methods, control systems, control design, and control evaluation.

ACC X64. Fundamentals of Taxation.
Introduction to the role of taxes in contemporary society and their impact on individuals and business entities; emphasis on federal income taxation.

ACC X66C. International Accounting and Transfer Pricing.
Discover how to price transactions between subsidiaries of multinational corporations buying and selling goods, services, intellectual property and other assets in light of tax obligations and other considerations.

ACC X66P. Accounting Practicum.
Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

ACC X67P. Internal Auditing Practicum.

ACC X70C. Financial Statement Analysis Capstone.

ACC X71T. Topics in Accounting.
Study selected accounting topics.

ACC X72T. Topics in Accounting.
Study selected accounting topics.

ACC X72T.1. Oil and Gas Accounting and Sustainability.

ACC X72T.11. Financial Planning for Wealth Management.
Introduction to basic concepts of personal wealth management and financial planning, including insurance and risk management, investment management, tax planning, estate planning, and retirement planning. Designed for upper-level finance and accounting majors interested in a career in financial services or students pursuing master in professional accounting with interest in this area of the accounting profession.

ACC X72T.12. Global Business Sustainability.
Explore the role of sustainability in the corporate sector. Examine how businesses partner with others for sustainability goals, how to value sustainable business practices, and how to report on corporate sustainability.

ACC X72T.13. Taxation of Real Estate Investments.
Identify accounting practices in the real estate industry.

ACC X72T.6. Corporate Sustainability.
Explore corporate sustainability focused on the management of environmental, social, and governance (ESG) issues, with an emphasis on ESG identification, measurement, and reporting. Designed for upper-level accounting and finance majors interested in a career in professional accounting or financial services with interest in corporate sustainability.

ACC X79C. Independent Research in Accounting.

Graduate Courses

ACC X80C. MPA Distinguished Speaker Lyceum.
Discussion of current issues confronting the accounting profession.

ACC X80D. Advanced Topics in Financial Reporting.
Examines issues in financial reporting from a user's perspective, including how important economic transactions of large public companies are reflected in financial statements.

ACC X80J. Financial Statement Analysis for Executives.
Explore an overview of the skills executives will need in order to analyze a company's performance and financial position in the context of the company's industry and strategic environment.

ACC X80K. Contemporary Accounting Topics.
In-depth study of selected accounting topics.

ACC X80K.1. Financial Accounting Standards and Analysis I.
ACC X80K.10. Tax Factors in Business Management.
ACC X80K.11. Introduction to Taxation.
ACC X80K.12. Computer Auditing and Systems Security.
ACC X80K.13. Information Technology for Accounting and Control.
ACC X80K.14. Managing Information.
ACC X80K.15. Business and Systems Change.
ACC X80K.16. Cross-Functional Integrated Systems.
ACC X80K.17. Cross-Functional Project Management.
ACC X80K.18. Project Management in Fast-Cycle Environments.
ACC X80K.19. International Accounting Policies and Procedures.
ACC X80K.2. Financial Accounting Standards and Analysis II.
ACC X80K.20. International and European Accounting Standards.
ACC X80K.21. Global Teams.
ACC X80K.23. Accounting Issues in Measurement and Valuation.
Examines the predictive analytics of financial statement numbers and how these accounting forecasts, estimates and judgments are made in practice, and how external auditors evaluate them. Insights from financial economics, psychology, and statistics provide a foundation for exploring accounting and auditing measurement challenges such as customer behavior analytics for loan default or loyalty award redemption; actuarial methods for establishing product warranty or insurance reserves; fair value models for brand names, trade secrets, and customer relationships; and other applications involving uncertain accounting numbers.
ACC X80K.24. Financial Planning for Wealth Management.
Introduction to basic concepts of personal wealth management and financial planning, including insurance and risk management, investment management, tax planning, estate planning, and retirement planning. Designed for upper-level accounting and finance majors interested in a career in financial services and MPA students with interest in this area of the accounting profession.
ACC X80K.25. Accounting in the Entertainment Industry.
Explores challenges and rewards of accounting in the entertainment industry. Covers the requisite skills needed to account for film and television production costs, while utilizing the latest software.
ACC X80K.26. Government and Not-for-Profit Accounting.
ACC X80K.27. Taxation of Real Estate Investment.
Exposure to accounting practices in the real estate industry.
ACC X80K.28. Corporate Sustainability.
Introduction to corporate sustainability focused on the management of environmental, social, and governance (ESG) issues with an emphasis on ESG identification, measurement, and reporting. Designed for MPA and MBA students interested in a career in professional accounting or financial services with interest in corporate sustainability.
ACC X80K.29. Tax Factors for Financial Planning.
Develop a fundamental understanding of the principles of taxation and financial planning.
ACC X80K.3. Financial Reporting Institutions and Regulations.
ACC X80K.31. Coding and Data Analysis in Accounting.
Explore data analytics with an emphasis on finding, collecting, cleaning, and drawing business- and accounting-related inferences from large and often messy datasets using Python. No prior experience in Python is required or expected.
ACC X80K.32. International Accounting and Transfer Pricing.
Discover how to price transactions between subsidiaries of multinational corporations buying and selling goods, services, intellectual property and other assets in light of tax obligations and other considerations.
ACC X80K.33. Healthcare Accounting and Finance.
Explore the nuances of finance and accounting using case-based studies in the healthcare industry to prepare for careers in healthcare finance, managerial accounting, or careers adjacent to those fields.
ACC X80K.34. Merger and Acquisition Advisory Services.
Explore services provided by advisory firms to clients seeking to add value in merger, acquisition, and other significant corporate transactions.
ACC X80K.35. Oil and Gas Accounting.
Examine accounting and financial practices across the energy sector, with a focus on oil and gas operations, sustainability and ESG reporting, and the emerging role of renewable energy.
ACC X80K.36. Fraud and Folly in Financial Markets.
Examine the frameworks and models by which investors and practitioners detect and analyze fraud in the capital markets.
ACC X80K.4. Auditing and Other Assurance Services.
ACC X80K.5. Introduction to Management Advisory Services.
ACC X80K.7. Financial Statement Analysis.
ACC X80K.9. Accounting Research Fundamentals and Applications.
Evaluate, formulate, and conduct scholarly research in financial reporting. Discuss advantages of archival, experimental, and theoretical methods, evaluating validity of design, and overcoming research barriers.
ACC X81. Financial Accounting.
Concepts and issues involved in the preparation and interpretation of financial statements; the use of financial information to evaluate and control an organization.
ACC X81M. Financial Accounting Issues in Business Decisions.
An integrative and intensive examination of financial accounting, with emphasis on management's alternative reporting strategies and investors' decisions.
ACC X81N. Managerial Accounting and Financial Statement Analysis.
Surveys the strategic uses of the most important elements of internal accounting systems, including cost accounting systems and management control systems used for planning and budgeting, and the use of publicly available financial accounting information to evaluate past performance, forecast future performance, and estimate the value of debt and equity securities.
ACC X81P. Performance Management and Control for Executives.
Examine accounting information and tools executives need to plan and evaluate personnel and operations of the firm. Explore a framework that provides a better understanding of when and why executives need specific types of accounting information to both facilitate their own decisions and influence the decisions of their employees.
ACC X82K. Topics in Accounting Information Systems.
Quantitative and/or computerized applications to business problems; computer-based accounting information systems; analysis of optimizing models; simulation of important functional activities; large-scale simulation of the firm.
ACC X82K.1. Principles of Systems Analysis.
ACC X82K.2. Computer Auditing.
ACC X82K.3. Topics in Accounting Systems and Control.
ACC X82K.4. Database Management in Accounting.
ACC X82K.5. Topics in Information Systems.
ACC X83K. Topics in Auditing.
Professional and technical aspects of practice; ethics and legal responsibilities; review of fieldwork, emphasizing materiality, sampling, and working papers; reporting problems, including long-form and special purpose reports; fraud examination and audit methods.

ACC X83K.3. Auditing and Control, MBA Program.
ACC X83K.4. Fraud Examination.
ACC X83K.5. Topics in Auditing.
ACC X83K.6. Practicum in Accounting.
ACC X83K.7. Internal Auditing Practicum.
ACC X83K.8. Advanced Auditing.
ACC X84. Topics in Research and Planning in Federal Taxes.
Study selected accounting topics in taxation.
ACC X84.1. Tax Research Methodology.
ACC X84.10. Corporate Tax.
Focus on taxation of C corporations and their shareholders.
ACC X84.11. Flow-through Entities Tax.
Focus on flow-through entities, including partnerships.
ACC X84.12. Multijurisdictional Tax.
Focus on the main systems for taxing transactions involving more than one jurisdiction, as well as how these systems mitigate double taxation and approaches to preventing abuses of the system.
ACC X84.13. Tax Practicum.
Work with the Tax Help Program that partners with the IRS to implement the Volunteer Income Tax Assistance (VITA) program for low-income filers.
ACC X84.4. Tax Planning for Business Entities.
ACC X84.5. Family Tax Planning--Estates, Trusts, and Gifts.
ACC X84.7. Fundamentals of Taxation--Advanced Topics.
ACC X84.8. Miscellaneous Tax Topics.
ACC X84.9. Oil and Gas Taxation.
An analysis of the United States federal income taxation of domestic oil and gas operations and transactions. Examines taxation associated with the operational life cycle of oil and gas operations including exploration, development, production, and abandonment, as well as transactions involving oil and gas interests analysis acquisition, disposition, structuring and investment.
ACC X86E. Topics in Accounting.
ACC X86K. Topics in Accounting Theory.
Financial accounting theory; current pronouncements on theory; problems of income determination; accounting research and research methodology applied to accounting issues.
ACC X86K.1. Contemporary Accounting Topics.
ACC X86K.2. Introduction to Research Methodology in Accounting.
ACC X86K.3. Empirical Research in Accounting.
ACC X86K.4. Analytical Research in Accounting.
ACC X86K.5. Behavioral Research in Accounting.
ACC X86K.6. Doctoral Research Topics.
ACC X86K.7. Foundations of Financial Accounting Research.
ACC X87. Topics in Profit Planning and Control.
The use of accounting information by managers within the organization for decision making, planning, and the design of control systems for implementing the organization's strategy. Topics include long-range planning, annual profit planning, activity-based costing, cost prediction, strategic control systems, and performance evaluation. Case studies are used.
ACC X87.1. Introduction to Managerial Accounting.
ACC X87.2. Topics in Profit Planning and Control.
ACC X87.3. Strategic Cost.
ACC X87.4. Strategic Control Systems.
ACC X87.5. Performance Management and Control.
ACC X87.6. The Strategic Chief Financial Officer.
Explore how to think and function as the Chief Financial Officer (CFO) of an enterprise. Discuss CFO responsibilities, interactions with the Board of Directors, the Chief Executive Officer (CEO), and other top-level executives, and how a CFO can maximize their effectiveness.
ACC X91S. Independent Study.
ACC X92N. Master in Professional Accounting Internship.
Focus on academic and professional development through valuable work experience and the integration of accounting knowledge by working with public or private enterprises. A minimum of 320 hours of work, a daily work-related journal, and paper are needed for internship credit.
ACC X98. Thesis.
ACC X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
ACC X99W. Dissertation.

Professional Courses

ACF - Actuarial Foundations

Actuarial Foundations: ACF

Lower-Division Courses

ACF X10C. Conference Course.
Supervised study of selected subjects by individual arrangement with department and instructor.
ACF X12M. Actuarial Laboratory on Probability and Statistics.
Problems and supplementary instruction in probability and statistics, especially as required for the Society of Actuaries and Casualty Actuarial Society Exam 110.
ACF X19S. Topics in Actuarial Foundations.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ACF X29D. Introductory Actuarial Financial Mathematics.
Introductory analysis of financial derivatives. Covers the financial derivatives portion of the syllabus for the professional actuarial exam on financial mathematics.
ACF X29S. Topics in Actuarial Foundations.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

Professional Courses

ADV - Advertising

Advertising: ADV

Lower-Division Courses

ADV X03. Advertising and Popular Culture.
An introduction to the role advertising plays in American society, and the values and relationships offered in the messages that are delivered.
ADV X05. Fundamentals of Advertising.
Fundamentals and practices of advertising in relation to economies, societies, and mass communication.
ADV X05S. Introduction to Integrated Communication for Sports.
Examination of the mass media industry in relation to the field of sports. Focus on the "off-the-field" industries of advertising, marketing, and public relations that impact sports; rights fees contracts; pre-game shows; gameday production; in-stadium activities; and press coverage.

ADV X09R. Introduction to Advertising and Public Relations Research.
Introduction to concepts and methods of statistics, with emphasis on analyzing personal and group behaviors. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing.

ADV X11. Topics in Advertising.

ADV X14. Social and Ethical Issues.
Designed to identify, analyze, and respond to social and ethical issues in advertising and public relations. Covers race, ethnicity, and gender identity.

ADV X15. History and Development of Advertising.
The evolution and development of advertising in the United States in a social, historical, economic, and cultural context.

ADV X16. Creativity and American Culture.
A cross-disciplinary view of the creative process and creative products. The conceptual core of film, fine arts, advertising, architecture, and literature.

ADV X18J. Introduction to Integrated Brand Communication.
The functions of advertising and public relations; role in marketing/communications mix; economic and social influence; advertising and public relations institutions and media; campaigns and appropriations; retail and business-to-business aspects.

ADV X19. Psychology of Advertising.
A review of basic findings of the behavioral sciences dealing with perception, personality, group behavior, psychological appeals, and their application to advertising, public relations, and marketing as persuasive communication.

ADV X19S. Topics in Advertising.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Advertising and Public Relations. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ADV X20. Integrated Communication for Nonprofit Organizations.
Explores integrated communication and branding in a variety of nonprofit settings. Examines the strategic, integrated use of multiple communication approaches, including advertising, public relations, new media, promotions, sponsorships, and special events.

ADV X21. Leadership and Ethics.
Explores leadership, communication, ethics, and the ability to lead others ethically and effectively. Examine concepts and frameworks related to skills that are integral to ethical, effective leadership.

ADV X22. Health Communication: Messages, Campaigns, and the Media.
Covers the development of effective health messages, the design of health campaigns, and investigate the role of the media in influencing people's health and perceptions of health.

ADV X23. Public Communication of Science and Technology.
Explores the rapidly growing field of science communication. Examines the intersection of science, media, and society, focusing on media's impact on how people come to understand, perceive, and act relative to scientific issues. Special attention will be directed toward the strategic communication of science and maximizing scientists' engagement with public audiences.

ADV X24. Communicating Sustainability.
Focuses on persuasion in the context of environmental attitudes and behaviors. Explores how humans think about and interact with the environment, paying particular attention to climate change. Drawing on theory and examples, examines the challenges and opportunities that arise when people try to communicate about the environment and change individual attitudes and behaviors.

ADV X25. Introduction to Advertising Creativity.
Introduction to the theory and practice of creativity, basic elements and principles of design and software applications as they relate to the development of advertising.

ADV X27. Account Planning.
Explores the role of account planning in an agency environment. Covers how to understand the business the client is in, the customers of the client, general environment of that business and all aspects of marketing practice that might affect the overall performance of the client's business.

ADV X28. Psychology of Video Game Advertising.
Explores communication components (broadly defined) within game play and apply understanding of communication processes within game play to better understand how advertisers can leverage games to reach consumers.

ADV X29S. Topics in Advertising.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Advertising. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ADV X30. Strategic Science Communication.
Using insights from strategic communication and social science, explore how to design effective science communication. Examine the crucial roles that strategic thinking plays in maximizing science communication's ability to achieve positive behavioral impacts. Investigate case studies and focus on how to evaluate the effectiveness of science communication efforts.

ADV X31. Environmental Communication Campaigns.
Combine discussions of environmental current events with hands-on agency/client experience to understand how to develop authentic communication strategies and tactics that can protect the environment and advance cutting-edge sustainability technologies.

ADV X32. Technology Marketing and Advertising.
Explores case histories, interviews with leading technology advertising and marketing executives, and latest trends in digital advertising, both mobile and social, as well as its impact across marketing segments and industries.

ADV X32C. New Media Entrepreneurialism.
Covers real life experience/exposure with a series of interviews with real-life practitioners from social media, venture capital, and others with expertise in the field. Explores important trends in digital content and digital business models; a primer for those who wish to learn about entrepreneurialism, technology, and it's intersection with media.

ADV X32D. Entrepreneurialism in Communication.
Project-oriented exercise where small teams conceptualize a business idea in communications, curate the insights and opinions of fellow team members, and ultimately develop a business plan around their new endeavor. A panel of local entrepreneurs will provide feedback and critique.

ADV X34. International Advertising.
Major issues in international advertising and advertising directed at cultural minorities within countries.

ADV X36. Topics in Multicultural Issues in Advertising and Public Relations.
Special topics exploring the impact of the major social, economic, and cultural aspects of advertising and public relations on ethnic and cultural groups in the United States.

ADV X38K. Digital Creative Portfolio.
Examines the digital landscape in advertising and beyond. Examines existing advertising work and producing an advertising project. Present

and describe digital projects in collaborative group settings using terms clients will value.

ADV X38L. Copywriting.

Explore concepts, formats, and skills relevant to the work of copywriters in the field of advertising, including writing, editing, and creating a voice for brands.

ADV X39K. Digital Graphic Communication.

Introduction to the fundamentals of good graphic design, as well as production basics. Develops digital design skills using industry-standard software, from print (Adobe InDesign, Photoshop, Illustrator) to motion (Adobe Premiere, AfterEffects) and interactive (HTML, CSS, WordPress). Assumes no prior knowledge.

ADV X39L. Brand Storytelling.

Examination of how classic elements of storytelling, semiotics, and symbolism can be used to create and manage a modern brand's story and 'meaning'. Create visual, verbal, and video examples of brand storytelling that go beyond traditional advertising and public relations.

ADV X41S. Research in Sports Communication and Media.

An introduction to advertising and public relations research and methodology for sports.

ADV X43K. Portfolio I.

Basic advertising art direction and copywriting skills, including indications for graphics, headlines, and body copy.

ADV X44K. Advertising and Public Relations Research.

Introduction to social science research methods as used in advertising and marketing; emphasis on survey research and secondary data.

ADV X45J. Advertising and Public Relations Media Planning.

An investigation of media-market measurements and strategies across the full spectrum of the industry; development of media communications plan.

ADV X47C. Art Direction.

Explore concepts, formats, and skills relevant to the work of art directors in the field of advertising, including color theory, typography, layout, and software expertise.

ADV X48S. The Business of Sports Media.

Examination of the business of sports-related media, including over-the-air television, cable, satellite television, print, radio, social media, and internet-based media, and the impact of such media on sports presentation and development, professional franchises, colleges, and conferences. Emphasis on how the business of sports media generates revenue and content, and the business models for each type of media, the challenges to such models, and the likely future changes to them.

ADV X50. Advertising Internship.

Practical work experiences in advertising sales, creative management, and research with advertisers, agencies, media, or auxiliary services.

ADV X50S. Internship in Sports Media.

Practical work experience in sports media. Internship to be arranged by student and approved by instructor.

ADV X51. Advertising Practicum.

ADV X53. Advertising and Public Relations Law and Ethics.

ADV X61. Creativity in Artificial Intelligence.

Explore the intersection of artificial intelligence (AI) and creative processes. Examine how AI can enhance and augment human creativity in various domains such as art, music, writing, and design. Analyze the ethical implications and societal impacts of AI-driven creativity. Learn the knowledge and skills used to harness the power of AI to push the boundaries of human creativity.

ADV X63. Immersive Media Lab.

Explore the space of immersive technology. Conduct experimental projects over short periods of time and learn through discovery and sharing findings with others.

ADV X64. Immersive Experiences.

Develop an understanding of an audience, the language of development, and awareness of the affordances of each medium to use them effectively in designing immersive user experiences. Work on a real-world client project, which will also be prepared for entry into an immersive storytelling competition.

ADV X65. Audience Development and Engagement.

Examine the latest methods used to better understand audiences and their motivations. Explore new approaches and tools for engaging audiences in different content strategies, and what metrics can be used to measure their engagement in ways that prove valuable to content creators, marketers, and audiences.

ADV X66. Special Topics in Advertising.

ADV X67. Experimental Storytelling.

Working with real-world clients, examine design thinking and human-computer interaction techniques while ideating, synthesizing concepts, creating user experiences, and developing a proof of concept (PoC) exemplary towards becoming an experience designer.

ADV X68C. Topics in Advertising Senior Seminar.

ADV X68K. Portfolio II.

Designed for aspiring art directors and copywriters in the context of building a creative advertising portfolio. Focus on learning how to pitch creative ideas. Receive evaluations on portfolios by industry professionals.

ADV X68L. Portfolio III.

Designed for aspiring art directors and copywriters in the context of building a creative advertising portfolio. Focus on the development of a personal brand, networking with professional contacts, and submission of creative work to industry competitions. Receive evaluations on portfolios by industry professionals.

ADV X69. Social Media.

Introduction to social networking platforms and their application in relation to media plans, brand building, and insights.

ADV X70J. Integrated Communications Management.

Cases and problems dealing with the management of advertising and promotional programs; media and creative strategies; consumer, retail, industrial, and public service applications.

ADV X73. Integrated Communications Campaigns.

Concept of media mix; matching product, consumer, media profiles; conception, research, planning, and execution of advertising campaigns; special emphasis on advanced copywriting, layout, and production for print and broadcast media.

ADV X75. Portfolio IV.

Focus on more sophisticated execution, integrated campaign development, and submission of creative work to industry competitions. Receive evaluations on portfolios by industry professionals.

ADV X77. Advertising Media Topics.

ADV X77.1. Advanced Media Strategies.

An in-depth dive into independent and group work with insights and strategies.

ADV X77M. Topics in Media Studies.

Topics in media and its effects on advertising and public relations strategies.

ADV X77M.1. Advanced Media Research.

Development of data analysis skills using various analytical techniques.

ADV X77M.10. Media Showcase.

Research and project-based, designed to help remove the traditional and new barriers faced in the fields of media.

ADV X77M.3. Digital Metrics.

An exploration of the evolving scope of digital metrics and analytics by looking at the three dimensions colliding in interactive media: business, communications, and technology.

ADV X77M.5. Media Metrics.

ADV X77M.7. Media Negotiations.

ADV X77M.8. Digital Insights.

Exploration of the terminology, measurement methods, and tools necessary for developing actionable management insights for digital content creation, promotion, and public relations.

ADV X77M.9. Media Investments.
An examination of media investments and negotiations, from both a buying and selling perspective. Investigates the activation role from all sides; the agency, vendor, and client.

ADV X78. Advanced Topics in Advertising.

ADV X78.15. Creative Project: Writing.

ADV X78.21. Semester in Los Angeles: Entertainment Promotion, Press, and Public Relations.
Consider the core disciplines of research, creative, distribution, advertising, publicity, and promotion as they apply to entertainment.

ADV X78.26. Consumer Psychology and New Media.

ADV X78.27. Advanced Media Research, Insights, and Analysis.

ADV X78.37. Social Enterprise Branding.
Focus on the development of strategic branding and communication for businesses focused on balancing purpose and profit. Explore components of brand identity and implementation as they relate to the success or failure of companies enacting social impact across a number of industries.

ADV X78.38. Influencer Marketing.
Identify, analyze, approach, manage, and measure business goals. Differentiate between attention and influence.

ADV X78.39. Pop Star Activism.
Engage with issues of diversity, political activism, public relations, and marketing communication through the lens of popular music.

ADV X78.4. Direct Marketing.

ADV X78.41. Advertising Intelligence.
Analyze how insights enhance decision making in advertising and public relations in areas such as campaign development, segmentation, positioning, product development, and promotion. Review advertising and public relations problems and processes in ways that will benefit from informed decision making.

ADV X78.42. Issues in Black American Advertising and Public Relations.
Explore cultural critiques of the advertising and public relationship industry related to historical and contemporary challenges involving representation, systemic injustice, stereotypes, and social responsibility involving the Black American experience.

ADV X78.43. Digital Social Media Analytics.
Explore cutting edge technologies that enable public relations and advertising professionals to better understand online conversations and audience behaviors. Examine how to recommend creative solutions for engaging key stakeholders. Determine how data, creative, and strategy intersect.

ADV X78.44. Digital Social Media Production.
Explore the required skills to plan, capture, edit, and produce digital social media content.

ADV X78.45. 360 Video Production.
Examine the required skills to plan, capture, edit, and produce 360 videos.

ADV X78.46. Television and Film Publicity.
Examine the different roles within the entertainment business. Explore key industry terms, events, companies, and other entities. Survey vital entertainment news sources and publications, engaging press, and full campaign execution.

ADV X78.47. Social Issues.
Explore a brief history and a contemporary look at social issues in advertising and public relations in New York. Discuss corporate and social responsibility, social issues in personal and influencer branding, strategic communication for advancing social change, and crisis communication spanning the contexts of organizational and global crises. Examine how social issues come to bear on advertising and PR in specific industries that are an integral part of the New York market, including healthcare, fashion, non-profits, and finance.

ADV X78.48. Sustainability Communication Research.
Examine the core principles of designing, implementing, and reporting an applied research project. Discuss conceptual development, literature review, research design, ethical considerations, and fieldwork skills.

ADV X78S. Special Topics in Sports Media.
Topics in sports media related to issues in traditional and new media as they effect sports and entertainment advertising and public relations.

ADV X78S.1. Advertising and Public Relations for Sports.

ADV X78S.10. Leadership and Administration in Sports Organizations.
Designed to develop marketing skills related to events, programs, products, and facilities in the sports management field.

ADV X78S.11. Sports and Social Media.
Designed to provide an understanding of and experience with the components and best practices of social media, marketing, and communications as they relate to sports entities and the sports field as a whole.

ADV X78S.12. Sports Audiences.
An exploration of marketing innovations in sports to attract audiences, and the use of sports media by advertisers, sponsors, and other entities to target various customer groups.

ADV X78S.13. Business of Sports Television.

ADV X78S.2. Legal Aspects of Sports and Media.

ADV X78S.3. Return on Investment of Sports Media.

ADV X78S.4. Analysis of Sports and Entertainment Audiences.

ADV X78S.5. Ethics and Social Issues in Sports Branding.

ADV X78S.6. Sports Audiences and Nontraditional Media.

ADV X78S.7. Contributions of Sports and Entertainment to Education and Health.

ADV X78S.8. College Sports Media.
An examination of the history of college sports media, with an emphasis on the evolution of sports coverage from NCAA-controlled limited broadcasting of football and basketball,to present day intercollegiate athletics coverage available via multiple outlets.

ADV X78S.9. Sports Contract Negotiation Techniques.
Strategies and techniques for successfully negotiating contracts, with a special emphasis on the negotiation of sports contracts.

ADV X79. Integrated Communication for Sports and Entertainment.

ADV X79H. Honors Tutorial Course.
Conference course of intensive study, planned by the Advertising Honors Committee; research and the writing of a substantial paper on a special advertising topic.

ADV X79J. Topics in Advertising Problems.

ADV X79J.1. Supervised Individual Special Studies.
Supervised individual special studies for which separate courses are not available.

ADV X79J.2. Supervised Individual Creative Studies.
Supervised individual creative studies for which separate courses are not available.

ADV X79J.3. Supervised Individual Media Studies.
Supervised individual media studies for which separate courses are not available.

Graduate Courses

ADV X81. Consumer Behavior.
An interdisciplinary study using behavioral science concepts to explain consumer motivation, information processing, and consumption behavior; sociological and psychological factors affecting the consumption process and the marketing/advertising of goods and services.

ADV X82. Quantitative and Qualitative Research.
An introduction to advertising research designs and procedures.

ADV X82J. Topics in Theories of Persuasive Communication and Consumer Decision Making.
Communication and behavioral science theories as they relate to contemporary advertising practices.
ADV X83. Topics in Supervised Individual Creative Studies.
ADV X83.1. Art Directors' Seminar.
Explore concepts, formats, and skills relevant to the work of art directors in the field of advertising, including color theory, typography, layout, and software expertise.
ADV X83.2. Portfolio I.
Introduction to conceptual thinking and art direction/copywriting skills in the context of building a creative advertising portfolio. Receive evaluations on portfolios by industry professionals.
ADV X83.3. Portfolio II.
Designed for aspiring art directors and copywriters in the context of building a creative advertising portfolio. Focus on learning how to pitch creative ideas. Receive evaluations on portfolios by industry professionals.
ADV X83.4. Portfolio III.
Designed for aspiring art directors and copywriters in the context of building a creative advertising portfolio. Focus on the development of a personal brand, networking with professional contacts, and submission of creative work to industry competitions. Receive evaluations on portfolios by industry professionals.
ADV X83.5. Portfolio IV.
Focus on more sophisticated execution, integrated campaign development and submission of creative work to industry competitions. Receive evaluations on portfolios by industry professionals.
ADV X85. Topics in International Advertising.
Study of the managerial, economic, legal, and cultural aspects of multinational advertising.
ADV X85.1. Strategic Advertising Principles.
ADV X85.2. Account Planning.
ADV X85.3. Media Management.
ADV X85.4. Strategic Advertising Management.
ADV X85.5. Multicultural Advertising: Theory and Research.
ADV X86. Experimental Storytelling.
Working with real-world clients, examine design thinking and human-computer interaction techniques while ideating, synthesizing concepts, creating user experiences, and developing a proof of concept (PoC) exemplary towards becoming an experience designer.
ADV X87. Creative Strategies.
The process of developing creative concepts and their effective execution.
ADV X88C. Research Problems: Doctoral Examination Preparation.
Research and reading in preparation for doctoral examinations.
ADV X88J. Principles of Advertising Management.
The study of planning, organization, and control of the advertising functions.
ADV X88K. Integrated Communications Management.
The application of management principles to the solution of integrated communications management problems.
ADV X89. Topics in Problems in Specialized Fields of Advertising.
Research project chosen from the area of the student's major interest; a written report or creative project is required.
ADV X89.1. Computer Graphics--Creative Sequence.
ADV X91K. Topics in Seminar in Advertising.
Survey and analysis of current advertising issues and practices.
ADV X91K.1. Interactive Advertising.
ADV X91K.10. Business to Business Integrated Communication Management.
Cases and problems dealing with the management of business to business integrated communication, advertising and promotional programs; media and creative strategies; consumer, retail, industrial, and public service applications.
ADV X91K.2. Advanced Account Planning.
ADV X91K.4. Audiences for Nonprofit Organizations.
ADV X91K.5. Integrated Communication for Sports.
ADV X91K.6. Media Research.
ADV X91K.7. Public Relations Theory.
ADV X91K.8. Quantitative Models in Advertising.
ADV X91L. Invisible Global Market.
ADV X92. Topics in Advertising Theory and Research.
Examination of important current areas in advertising research and theory.
ADV X92.2. Advanced Advertising Theories I.
ADV X92.3. Advertising Research I.
ADV X92.4. Advanced Advertising Theories II.
ADV X92.5. Advertising Research II.
ADV X95. Advertising Internship.
Practical work experience in advertising sales, creative management, and research with advertisers, agencies, media, or auxiliary services.
ADV X98. Thesis.
ADV X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
ADV X98T. Student Teaching in Advertising.
ADV X99W. Dissertation.

Professional Courses

AED - Art Education

Art Education: AED

Lower-Division Courses

AED X19S. Topics in Art Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

AED X20. Exploring Objects, Spaces, and Meaning.
Explore a broad range of historical and contemporary works, artifacts, and environments, and their implications for understanding imagery and objects in visual and material culture.
AED X21C. Children's Artistic Development.
Examine how arts-based learning strategies can be used to promote inquiry into the world.
AED X29S. Topics in Art Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
AED X30. Introduction to Art Education.
Introduction to art education. Examine philosophy, current trends, instructional methods, evaluation, and advocacy. Explore careers in art education, museum education, and cultural or social educational settings.
AED X41C. Learners and Instructional Sites.
Explore instructional procedures, observations, and evaluation of early childhood through grade twelve classroom- and community-based art instruction.

AED X51C. Art Materials, Techniques, and Processes.
Explore and apply basic materials, techniques, and processes in art production used in early childhood through grade twelve classroom- and community-based art instruction.

AED X61C. Criticism and Conversation about Art.
Explore individual and professional evaluations of visual imagery, artifacts, and artistic production in a variety of settings.

AED X71C. Topics in Art Education.

AED X72. Art, Resilience, and Trauma.
Examine the connection between art, resilience and trauma, with emphasis on the impact of psychological trauma on academic and social emotional well-being. Explore strength-based approaches for fostering resilience through hands-on engagement in the creative arts.

AED X73. Public Art, Civic Engagement, and Responsive Communities.
Explore historic and global perspectives of art in the public realm, with a focus on art in the local community, cultural production, and its relationship to civic education and engagement as well as concepts of site-specificity, interactivity, and intervention.

AED X76C. Independent Study.
Complete individual projects under faculty supervision.

AED X79S. Advanced Topics in Art Education.

Graduate Courses

AED X81G. Foundations of Art Education.
Explores foundational writings and beliefs, past and present literature, and perspectives within art education.

AED X81K. Contemporary Issues in Art Education.
The role of art education in education and society, including technology, multiculturalism, gender studies, contemporary art, visual and material culture, interdisciplinary connections, media studies, and community-based art education.

AED X82G. Introduction to Research in Art Education.
Explores diverse approaches and methodologies for conducting research in art education.

AED X82H. Thesis Proposal and Preparation.
Focuses on the preparation of a graduate thesis proposal, with emphasis on the student's identification of a central research question.

AED X82L. Applied Project in Art Education.
Research based applied project in Art Education.

AED X83J. Museum Education: History and Theory.
Historical and philosophical development of American art museum education.

AED X83K. Museum Education: Practice and Application.
The practice and application of museum education within the context of art museums.

AED X83L. Issues in Museum Studies.
Survey major issues in the field of museum studies.

AED X84. Special Topics in Art Education.
Readings, discussion, and research relevant to major current trends in art education.

AED X85. Independent Study in Art Education.
Student-initiated study with an art education faculty member covering the topic of student's research focus.

AED X86. Internship and Field Study.
Supervised observation and research in art education related to the candidate's area of emphasis.

AED X87C. Case Studies in Community-Based Art Education.
Students review examples of community-based art programs to understand their histories, philosophies, purposes, organization, funding, operation, evaluation, and redevelopment; and discuss issues affecting the successful creation, preservation, and development of such programs.

AED X87D. Program Development in Community-Based Art Education.
Students examine the process of establishing an exemplary community-based art program; conduct ethnographic research and write grant proposals toward the creation of an ideal community-based art program or the improvement of an existing program; and develop operational activities and explore various approaches to art production to prepare for implementing a program.

AED X88C. Art Instruction through Arts-Based Research.
Students observe teaching and learning styles in early childhood through grade twelve art classrooms and review and evaluate their observations using class discussions, journals, creative reports, and other arts-based research techniques.

AED X88D. Art and the Creation of Meaning.
Discussion, analysis, and hands-on use of the materials, techniques, and processes used to create artwork in early childhood through grade twelve classrooms.

AED X88E. Art and Critical Discourse.
Focuses on personal and professional critiques of artifacts and artistic products. Students explore and justify their responses to artwork in written and verbal discussion.

AED X88F. Curriculum Development in Art Education.
Examine major movements in art education/general education curriculum theory and development in order to understand current trends in curricular design and implementation. Apply these understandings to museums, schools, and community settings in art education.

AED X88G. Art in Public Places.
Explore historic and global perspectives of art in the public realm, with a focus on art in the local community, its social, cultural and economic significance, and its relationship to civic education and community engagement.

AED X88H. Objects, Spaces, and Meanings.
Investigate meanings of objects and spaces that surround us, focusing attention on a range of objects residing both inside and outside the museum, and structures and constructed environments that make up our lives.

AED X88I. Art, Resilience, and Trauma.
Examine the connection between art, resilience and trauma, with emphasis on the impact of psychological trauma on academic and social emotional well-being. Explore strength-based approaches for fostering resilience through hands-on engagement in the creative arts.

AED X98. Thesis.

AED X98T. Supervised Teaching in Art Education.
Teaching under the close supervision of the course instructor for one semester; weekly group meetings with the instructor, individual consultations, and reports throughout the teaching period.

Professional Courses

AET - Arts and Entertainment Technologies

Arts and Entertainment Technologies: AET Lower-Division Courses

AET X04. Foundations of Arts and Entertainment Technologies.
Explore the industries, practices, and concepts defining arts and entertainment technologies in the twenty-first century.

AET X10. Foundations of Creative Coding.
Explore applied computational thinking and logical processes for solving creative problems with technical solutions using the graphics language Processing.

AET X10T. Topics in Innovative Design.
Exploration of innovative topics in design.

AET X11. Media and Motion.
Introduction to effective visual storytelling with 2D and 3D digital content.

AET X12. Games and Interactivity.
Introduction to user-centered design process, interactivity, and game design.

AET X13. Code and Fabrication.
Introduction to building interactive physical projects with hands-on code, microcontrollers, and cardboard.

AET X14. Sound and Space.
Introduction to dynamic sound, lighting, and video projection for screens and spaces.

AET X19. Topics in Arts and Entertainment Technologies.

AET X19S. Topics in Arts and Entertainment Technologies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Design and Creative Technologies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

AET X20F. Immersive Audio.
Use spatial audio systems to create public sound installations and immersive experiences. Explore designing novel multichannel audio systems, binaural audio mixing, and combining spatial audio and visual tech to design immersive installations.

AET X20L. Generative Music.
Explores algorithmic music systems including procedural techniques, genetic algorithms and cellular automata.

AET X20M. Live Music Coding.
An exploration of techniques for live, real-time music programming and sound production in performance settings.

AET X20P. Sound Design.
Explore the techniques and tools used in the creation of sound for film, television, and video games. Learn about the history of sound design, the role of the sound designer, and the process of creating a soundtrack from concept to final mix.

AET X21C. Audio Processing.
Explores the use of sound-shaping tools, convolution reverb, noise reduction, pitch and time editing to make precise corrections to audio files.

AET X21J. Introduction To Game Audio.
Explore the sound design, foley, and audio implementation in video games.

AET X21K. Advanced Game Audio.
Examine audio practices used in the video game industry.

AET X22K. Introduction To Audio Coding.
Explore programming methods for MIDI and audio signal processing in the visual interface language Max/MSP. Examine how to manage audio signal flow and communications with external devices such as keyboard controllers, pedals and other sensors. Discuss the creation of systems for musical interactivity in live performance and immersive sound installation applications and integration with Ableton Live.

AET X22L. Advanced Audio Coding.
Explore complex connections in audio signal flow and communication with external devices using signal processing and Max/MSP.

AET X23D. Interactive Music.
Create real-time interactive music using Ableton Live and Musical Instrument Digital Interface (MIDI) controllers.

AET X23G. Generative Audio Programming.
Use real-time, generative audio coding tools.

AET X24. Themed Entertainment Design.
Explore best practices behind the design of themed entertainment experiences through a variety of lectures, group projects, and individual study.

AET X24D. Principles of Animation.
An introduction to the principles of animation for 2D and 3D systems. Use various techniques to convey a sense of weight, emotion, and story for simple and complex objects in both 2D and 3D.

AET X24J. Visual Storytelling.
Explore graphic communication, visual storytelling, and digital visualization of objects, spaces, environments, information, and data. Utilize pre-rendered realme, and procedural systems to explore 2D and 3D previsualization techniques, infographic design, data processing, and rendering systems.

AET X24P. Advanced Production Laboratory.

AET X26E. 3D Animation and Rigging.
An introduction to 3D animation techniques and rigging systems.

AET X26G. Realtime VFX.
An introduction to creating visual effects for games and realtime engines.

AET X29J. Digital Fabrication.
Explores common and emerging digital fabrication technologies for artists and designers.

AET X29S. Topics in Arts and Entertainment Technologies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Design and Creative Technologies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AET X30C. Business of Entertainment.
Explore the fundamentals of producing entertainment from inspiration to execution as well as all aspects involved in producing live stage and on screen commercial productions.

AET X30T. Topics in Innovative Design.
Exploration of innovative topics in design.

AET X33. Topics in Video Game Development.
Topics in video game development.

AET X33D. Video Game Production.
Explores the creation and execution of plans and roadmaps to strategize how game development is executed, organized, scheduled, budgeted, and managed.

AET X34. Video Game Character Animation.
Examine the process of creating 3D gameplay animations, techniques to improve animation workflow, and how to implement animations into the Unreal Engine.

AET X34C. Level Design.
Design and build interactive 2D or 3D game levels (game maps) using an industry standard tool such as Unity or Unreal. Explore the design pipeline for creating levels from concept and layout, to whiteboxing, creating and integrating environment art and sound, worldbuilding, and adding simple scripted interactions, animations, sound effects, and VFX. Examine the different design process for small indie games compared to big AAA games.

AET X34E. Video Game Art Pipeline.
An introduction to creating and working with game ready assets in 2D and 3D.

AET X34F. Video Game Scripting I.
Introduction to scripting interactive content for games using an industry-standard scripting language and game engine.

AET X34J. Multiplayer Video Game Design.
Examination of the design and technical requirements for developing multiplayer games in different genres.

AET X34K. Video Game Prototyping.
Explore rapid prototyping techniques for video game art and design using ideation, storyboarding, pitching, prototyping, testing, and documentation.

AET X34L. User Interface/User Experience for Video Games.
An introduction to user interface (UI) and user experience (UX) design for video games.

AET X34M. Video Game Systems Design.
Create and apply play systems which establish the framework for user experience (UX) and level design.

AET X34N. Interactive Storytelling.
Apply cross-disciplinary methods to create immersive narratives for interactive experiences.

AET X34P. User Interfaces.
Explore a synthesis of data visualization and user interface design for games, simulation, and digital environments. Discuss infographics, accessibility, and user centered design.

AET X34R. Technical Art I.
Examine technical aspects of game content creation including shaders, automation, tool creation, and special effects.

AET X34S. Technical Art II.
Explore advanced technical art projects for games.

AET X35D. Realtime Visualization.
An introduction to using game engines and realtime graphics systems for architectural, automotive, and other types of product visualization.

AET X35F. Video Game Scripting II.
Advanced scripting of interactive content for video games using an industry-standard scripting language and game engine.

AET X35J. Live Video Game Design.
An introduction to design methods for video games as a service and persistent multiplayer video game worlds.

AET X35K. Virtual Reality for Video Games.
Explores design and creation of virtual reality (VR) content for games, and deploying and testing on VR hardware.

AET X35M. 2D Animation For Games.
Learn the tools and comprehensive knowledge to create beautiful, functional, and dynamic art for video games.

AET X35V. Introduction to Mixed Reality.
Introduction to mixed reality platforms and hands-on development of XR experiences. Explore creative AR interactions with 3D models, animated characters, sound assets, and visual effects, to promote learning opportunities and branded marketing.

AET X36C. Video Game History and Culture.
Analyze the history of video games from their origins in computer labs, to their surge in popularity that has significantly impacted modern society. Examine the evolution of video games, their influences on culture and laws, controversies in gender politics and minority representation, and how the medium developed both commercially and as a form of artistic expression.

AET X37. Writing for Interactive Games.
Exploration of game creation as a multi-threaded narrative story. Students create, write, edit, and refine game stories and game dialogue and build small game scenarios using a variety of game design software platforms.

AET X37D. Narrative Design.
Explore establishing, communicating, and assimilating a cohesive narrative into all aspects of interactive and immersive media experiences through a cross-disciplinary lens.

AET X37N. Introduction To Narrative.
Explore the origins, formal elements, and best practices of good storytelling across multiple mediums through study, analysis, and writing practice.

AET X39. Advanced Topics in Arts and Entertainment Technologies.
Advanced topics in arts and entertainment technologies.

AET X40D. Interactive Installation Design.
Explore the skillsets and collaborative processes involved in creating interactive installations. Learn interactive technology, physical computing, and user engagement to create immersive and participatory experiences.

AET X41D. Digital Musicianship.
Explore harmony, chord progressions, and song structure in the MIDI grid.

AET X42C. 3D Modeling and Texturing.
Utilize hard surface and organic modeling workflows, modern texturing techniques, and physically-based shaders to create efficient assets based on clear content goals.

AET X42D. 3D Materials And Lighting.
Explore 3D game models using state of the art workflows and tools.

AET X44D. 3D Previsualization for Live Entertainment.
Instructs students on how to bring an idea from concept to fully rendered pitch-ready environment by utilizing 2D and 3D technical drafting tools in Vectorworks, and a lighting visualizer.

AET X44F. Design Skills: Projection.
Introduction to the creative and technical design process in the field of projection design for live performances.

AET X46C. Video Game Modding.
Focus on modifying existing video games to experiment with gameplay ideas and create unique play experiences.

AET X46F. Video Game Design Challenges.
Focuses on the creation of unique play experiences under extreme constraints.

AET X48. Concert and Event Lighting.
Explore methodologies utilized in live event lighting.

AET X48G. Media Design and Technology.
Investigate design challenges in-depth, in the field of Media and Projection Design.

AET X48K. 3D Projection Mapping.
Explore common 3D mapping techniques and applications that include architectural mapping, dome projection and Cave automatic virtual environments (CAVE) projection.

AET X48L. Advanced System Engineering.
Study common signals (digital and analogue), data communication protocols, synchronization, show control as well as layout and contingency considerations for professional entertainment systems.

AET X50C. Advanced Creative Coding.
Explore advanced computational concepts and their application to more diverse creative media domains including; audio, video, music, and the web.

AET X51C. Audio Production Lab.
Individual or team projects in audio production for live performance.

AET X51E. Do It Yourself Synthesizer Lab.
Projects to design and build microprocessor-based synthesizers and special effects (SFX) components and systems.

AET X53. Advanced Topics in Video Game Development.
Advanced topics in game development.

AET X54C. Cross Platform Storytelling.
Focus on the future of storytelling and experience design across multiple platforms and services.

AET X55D. Mobile Game Design.
Design and develop games specifically for mobile devices. Learn about the best practices for production and deployment.

AET X57. Solo Studio.
Build creative confidence through a range of methodologies including iterative design and prototyping, exploring research strategies, and exercising critical reflection.

AET X58. Topics in Collaborative Studio.
Focus on team based projects that culminate in large events, presentations, or performances.

AET X58.1. Next Level Arcade.
Produce a custom arcade game; create game designs, art, sound, and the physical enclosure and controls.
AET X58.2. Collaborative Music Project.
Produce collaborative projects in advanced sound processing and synthesis and audio-visual systems.
AET X58.3. Engineering for Live Events.
Examine advanced concepts, methods, and systems utilized in the fields of live entertainment and immersive artistic practices. Explore core technologies and illuminate how each area of work within projection, lighting, sound and interactivity relates and is connected to others.
AET X58.4. Indie Game Studio.
Learn how to navigate the indie game industry from a business perspective, including marketing strategies, community engagement, publishing on digital platforms, and exploring funding options.
AET X58.5. Event Management and Production.
Develop and deploy skillsets to plan and execute the operational and management details related to live events and conference type events.
AET X58.6. Immersive Environments.
Capture real time motion data and build immersive experiences with light, sound, and projection in the Lab for Immersive Media (LIM).
AET X58.7. Games for Good.
Utilize game design skills to create experiences that improve lives. Learn about transformational game development that will support therapy, advance scientific research, bolster mental health, and revolutionize education.
AET X61C. Physical Computing.
Introduces concepts and methods of physical computing, including the creation, building, and programming of small devices and the integration of external devices and objects.
AET X70. Research Methods Proseminar.
Explore research methods and the preparation of a thesis topic and senior thesis proposal.
AET X74. Independent Study.
Independent study or research in arts and entertainment technologies.
AET X75. Portfolio.
Focus on portfolio development, showcasing professional skills, and preparation for the demands of industry.
AET X76. Game Capstone: 2-D.
Work in small teams from different disciplines to develop 2D games.
AET X77. Game Capstone: 3-D.
Work in small teams from different disciplines to develop 3D games.
AET X78H. Honors Senior Thesis.
Participate in a large scale senior project.

Graduate Courses

Professional Courses

AFR - African and African Diaspora Studies

African and African Diaspora Studies: AFR

Lower-Division Courses

AFR X01. African American Culture.
Survey of African American culture in the United States from the 1600s to the present. Subjects include the circumstances and responses of blacks during North American enslavement, the Civil War, Reconstruction, the Great Migration, the Harlem Renaissance, the civil rights movement, and contemporary contexts.
AFR X02D. Analyzing Social Data.
Subjects include conceptualization and operationalization in quantitative measurement, the calculation and interpretation of descriptive statistics and statistical relationships, the application of statistical techniques to understand social phenomenon, and techniques for presenting results from quantitative analysis.
AFR X03. Introduction to Black Studies.
Introduction to canonical black studies literature, themes, and theories.
AFR X04. Introduction to the Study of Africa.
Examines the complex histories, intellectual entanglements, and enduring hierarchies of Africa and African studies. Explores the evolution of African studies (both intellectually and institutionally), particularly in regards to the emergence of black studies.
AFR X05. Public Policy and Black Communities.
Examine how public policy has both advanced and hindered opportunities for Black people and communities from the Constitutional era to the present, addressing such areas as education, health, housing, and policing.
AFR X10. Introductory Topics in African and African Diaspora Studies.
AFR X10K. Introduction to Modern Africa.
Introduction to modern Africa, with focus on colonial and postcolonial development in political organization, economics, sociolinguistics, and literature.
AFR X10L. Introduction to Traditional Africa.
Introductory, interdisciplinary course on the peoples and cultures of Africa.
AFR X10S. Introduction to Yoruba Religions.
Introduction to the cosmological world of the Yoruba of southwestern Nigeria, covering history, societal organization, myths, legends, customs, and cultural traditions.
AFR X11C. Performance, Feminism, and Social Change.
Exploration of the ways that engaged performance and feminist practice generate space for social change, including the basic principle that social transformation requires individual awareness, and that awareness necessitates a rigorous examination of race, gender, class, and sexuality.
AFR X14C. Art and Architecture of Ancient Egypt.
Introduction to the complex and intriguing culture of ancient Egypt and to its legacy in society through the examination of its art and archaeology.
AFR X15. Afro-Brazilian Diaspora.
AFR X15E. The Revolution Will Be Dramatized.
AFR X15F. Toni Morrison and August Wilson.
AFR X15G. The United States and Africa.
History of political, economic, and cultural relations between the United States and Africa from the early origins of the slave trade to the present.
AFR X15I. Introduction to African American Women's History.
AFR X15K. Introduction to African American History.
AFR X15L. Anthropology of Race and Ethnicity: An Introduction.
Examines the social importance of race and ethnicity both in America and around the world.
AFR X15N. The Black Power Movement.
Examines the major organizations, key figures, and ideologies of the Black Power movement from the late 1960s and early 1970s.
AFR X15O. The Politics of Black Identity.
Explore the idea that black progress is undermined by the activities and practices of certain black celebrities, leaders, and intellectuals whose attitudes, behavior, and politics differ from the black majority. Examine the history of labels that make reference to black identity, including "Uncle Tom," "Negro," "sellout," and various other denigrating names.
AFR X15P. Introduction to Black Women's Studies.
Interdisciplinary examination of the complexities of black womanhood in America through an investigation of history, identity, popular culture, and black feminism/womanism, as well as social and political activism.
AFR X15Q. Black Queer Art Worlds.
Exploration of over two decades of work produced by and about black queer subjects throughout the circum-Atlantic world. Provides an introduction to various artists and intellectuals of the black queer

diaspora, as well as an examination of the viability of black queer aesthetic practice as a form of theorizing.

AFR X15R. Diaspora: Race, Nation, and Resistance.
Subjects include makings and meanings of diaspora, the differences and similarities between diaspora and related concepts such as race, nation, and cultural identity. Focuses on the making of the black Atlantic world, and comparative analysis between black diasporic life and that of other global dispersals, particularly among Asian and indigenous populations, and how resistance serves as a key link.

AFR X15S. Liberation in the African Diaspora.
Examination of liberation and freedom struggles in the African diaspora, focusing on common intellectual, political, and social currents among the diaspora's various groups. Course focuses on three major themes: abolitionism, Pan-Africanism and national liberation, and hip hop. Particular emphasis will be on the ideas associated with these movements, and the major organizations and intellectual currents in all three.

AFR X15T. African American Literature and Culture.
Explores texts, drawn from a variety of genres and periods, that indicate the range of African American experiences and how those experiences are influenced by issues such as class, ethnicity, gender, sexuality, and race.

AFR X15U. Music of African Americans.
Introduction to the variety of modes of expression of African American culture in music and other related genres.

AFR X15V. African Diaspora Archaeology.

AFR X15W. Race, Sex, and Tourism.

AFR X16C. Rights in Modern America.

AFR X16E. Blackness and Comics.
Examine the relationship between race and the sequential aesthetics of comic books and comic strips. Explore comics strips, underground comics, and superhero comics from the colonial period to the present day.

AFR X16F. Black and Latinx Intersections.
Examine the complex relationships between and among Black and Latinx communities and the political and structural forces and contexts that shape their interactions. Explore Black identity within the Latinx population, racial politics, coalitions of Black American and Latinx groups, race among Latinxs, racial inequality, and the politics of immigration.

AFR X16G. Police, Prisons, and Inequality.
Explore the ethical issues related to inequality and the United States criminal legal system. Examine the experiences of the poor, Indigenous people, immigrants, racial minorities, women, sexual minorities, and gender-nonconforming people.

AFR X16K. Introduction to Religions of Latin America.
Examine a survey of religious practice across Latin America and the Caribbean.

AFR X19S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFR X29S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

AFR X19S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFR X20C. Power and Place: Making Texas History.

AFR X20T. Texas History's History.
Explore evolving ideas and meanings concerning the most significant events, personages, and social processes in Texas' history.

AFR X21. The African Diaspora in the Americas.
Black cultures and societies in the New World, and their African heritage.

AFR X21L. Sociology of Education.
Education as a societal institution, with emphasis on the United States educational system: how the system works; the effects of the system; recent changes.

AFR X22. Introduction to African Prehistory.

AFR X22D. Race and the Digital.
Review of theoretical developments in the sociological study of "race, including an examination of processes of racialization and cultural texts, in order to better understand the ways in which identities are socially produced. Attention will be placed on forms of popular culture, black cultural production, and political action to question how such practices are shaped by migrations within the African diaspora.

AFR X23N. Critical Race Theory and the Novel.

AFR X24E. Racism and Antiracism.
Examines the theories and definitions of racism across several fields: anthropology, sociology, psychology, cultural studies, postcolonial studies, and gender/sexuality studies. Also includes a section that focuses on anti-racist activism, particularly within people of color and immigrant communities.

AFR X25C. Latinx Sexualities.
Examine Latinx sexualities from a historical perspective to comprehend the social, cultural, political, and economic factors, which have shaped these experiences.

AFR X25D. Gender and Translation in the Arab World.
Examine complex politics and poetics behind the translation and marketing of Arab women's writing in the West.

AFR X25S. Statistical Analysis of Social Disparities.
Analysis of racial inequality through social statistics.

AFR X29S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFR X30. Beyonce Feminism and Rihanna Womanism.

AFR X30C. Fashion And Desire.

AFR X30D. Literature of the Harlem Renaissance.

AFR X30E. Gwendolyn Brooks.

AFR X30F. Writing for Black Performance.

AFR X30I. The Arts of Hip Hop.

AFR X30J. Toni Morrison.
An examination of select novels by the Nobel Laureate and Pulitzer Prize-winning novelist focuses on the positional uniqueness that womanism shares with a predominant feminism, which surfaces in historicized familial relationships.

AFR X30K. African American Literature through the Harlem Renaissance.
A survey of African American writing, including autobiography, poetry, fiction, and drama. Authors may include Douglass, Jacobs, Frances E. W. Harper, Chestnutt, Du Bois, Hurston, and Hughes.

AFR X30L. African American Literature since the Harlem Renaissance.
The development of African American poetry, drama, fiction, and nonfiction since the Harlem Renaissance. Authors may include Wright, Ellison, Baldwin, Malcolm X, Baraka, Morrison, Shange, and Charles Johnson.

AFR X30M. Contemporary African American Women's Fiction.

AFR X30N. Self-Revelation in Women's Writing.

AFR X30O. Black Film at the Oscars.

AFR X30P. Writing Slavery.
Explores the controversial rewriting of slavery in a presentist context by contemporary authors. Addresses challenges that archival limitations and revisionist writings about slavery pose for academic disciplines, literary instruction, and/or pedagogy.

AFR X30Q. Caribbean Literature.

AFR X30R. Literature of Black Politics.
Examines the novels, plays, and critical essays of Ralph Ellison, James Baldwin, and Toni Morrison as works of democratic political theorizing and political engagement.

AFR X30S. Danticat and Diaz.

AFR X30T. Diasporic Magic: Literature and Performance.

AFR X30V. Greek Tragedies and Postcolonial Dramas.
Study the adaptation of great dramatic literature of the Greek civilizations to their phenomenal evolution into popular African performances. Putting classical writings from Ancient Greek in dialogue with texts that formed the background of African anti-colonial revolutions, analyze how Africans have used these works to re-shape literary canon and given their world and their histories universal purchase.

AFR X30W. Black Queer Literature and Film.
Analyzes written works, films, and videos by and about lesbians, bisexual, transgender, and gay black people, with an emphasis on understanding the historical and theoretical construction of sexual and gender identities and sexual/cultural practices in black communities.

AFR X31. Early Black Atlantic.

AFR X31C. Expressive Arts of Global Africa.
Explore music, dance, and other artistic forms as modes of political expression and community building.

AFR X31D. Drugs in African American Popular Culture.
Examine the legal, political, and philosophical intersection of blackness, whiteness, and drugs in the late twentieth century through film, music, and literature.

AFR X31E. Black Cops in African American Popular Culture.
Explore the history of black policing in America and representations of black police officers in popular literature and film of late Twentieth Century America.

AFR X31F. Black Horror and Psychoanalysis.
Explore the intersection of race, horror aesthetics, and psychoanalytic theory.

AFR X31G. Contemporary African Writing in English.

AFR X35C. Africana Women's Art.
Analysis of the diverse modes of presentation, mediums, definitions, and influences of Africana women artists in the diaspora. Designed to use critical theory and art history found in oral and written literatures, music, films, and other formal and informal documents.

AFR X35D. Visual Cultures of Africa.
Painting, textiles, ceramics, sculpture, performance, mixed media, photography, films, and the aesthetic ideas behind the production of African visual cultures from the perspectives of rituals, rites of passage, celebrations, initiations, documentations, and expressions.

AFR X35E. Introduction to African Art.
Investigates the lives and works of several artists who have made substantial contributions to the definition, history, and interpretation of the visual arts.

AFR X35F. Visual Arts of the Caribbean.
A look at a wide range of artists from the countries of the Caribbean, including examples of cinema and reggae music packaging.

AFR X35G. Diaspora Visions.
An exploration of border crossing by cultures and groups including Yorubas, Jews, Armenians, Tibetans, Hamish, Pakistanis, and Indians and the production of images by immigrants, exiles, and nomads in alien lands.

AFR X35I. Contemporary British Artists of the African Diaspora.
A look at a wide range of artists, practicing in Britain, who are part of the African diaspora via such factors as the Atlantic slave trade and various patterns of international migration.

AFR X35J. Contemporary Artists of the African Diaspora.
Examines a wide range of artists, practicing in different parts of the world, who are part of the African diaspora via such factors as the Atlantic slave trade and various patterns of international migration.

AFR X35K. Twentieth-Century African American Art.
A survey of visual art produced by people of African descent in the United States with an emphasis on the twentieth century and its sociohistorical framework. Changes in modes of expression, formal concerns, pictorial themes, and the impact of the Black Arts movement, feminism, and Afrocentrism on art are explored, as well as the relationship of the work of black artists to art from West and Central Africa and the visual traditions of European and Euro-American artists.

AFR X35L. The Black Figure in American Art and Popular Culture.
Examine how popular culture and artistic practices facilitate or challenge social constructions of "Blackness" in the United States.

AFR X35M. Art of the Harlem Renaissance.
Examine the factors which gave rise to the Harlem Renaissance, with a particular emphasis on art and artists.

AFR X35N. Black Art, Brown Art.

AFR X35Q. Blackness in the Contemporary Art Museum.
Explore issues related to the acquisition, stewardship, and repatriation of the art of the African Diaspora in the face of an increasingly virtual and market-driven art world.

AFR X35T. Photographs and Blackness in the United States.
Examine issues raised at the intersection of Blackness and photography in contemporary art of the United States.

AFR X38C. Black Perspectives in Jazz.
Explores the social, cultural, political, and artistic relationships between jazz and the black experience, both within the African American context and throughout the diaspora.

AFR X38D. Music of Latin America.
Consider Latin American music within a broad cultural and historical framework. Latin American musical practices are explored illustrating the many ways that aesthetics and society are embodied in and negotiated through performance. Concepts include diaspora, colonialism, mestizaje, hybridity, migration and globalization.

AFR X38E. The Music of the African Diaspora.
The musical legacy of the African slave trade in the Americas, the social contexts in which black musical forms have developed, and their varied forms. Subjects include the shifting meanings of "black music" in various contexts; the notion of hybridity; the uses of African influenced music as a political or oppositional tool; and African ethnic groups represented prominently in the New World, the traditions they brought with them, and the ways they have been adapted to new ends.

AFR X38F. Music of Mexico and the Caribbean.
Introduction to the history of Mexican and Caribbean traditional and commercial music, with some discussion of classical music as well. Attention will be given to music of indigenous, African, European, and mixed origin. Mexico and the Spanish-speaking Caribbean receive special attention. Class meetings will be divided into lecture/discussion segments, videos, listening, and performance instruction/demonstration.

AFR X40. Contemporary African Popular Culture.

AFR X40D. Apartheid: South African History.
A study of the social, political, economic, and cultural history of South Africa to contextualize the rise of apartheid. Primarily focuses on the period since 1948 from the perspectives of women, children, and men of all racial backgrounds who lived through that particular period.

AFR X40E. African Women's History.
Major themes include politics, economics, religion, the family, culture, technology, feminism, colonialism, nationalism, and development in relation to the lives of African women.

AFR X40F. African History in Films and Photographs.
Explore the social, economic, and political challenges of the past fifty years of Africa's history through an examination of several popular films.

AFR X40G. Ancient Egypt.
Discussion of Egypt's culture, language, and history from the prehistorical period (13,000 BC) to the New Kingdom (1069 BC).

AFR X40I. Modern Egypt in Film and Fiction.
Explore the history and culture of modern Egypt through selected readings in twentieth-century film and fiction.

AFR X40J. African Travel Narratives.
Examines histories of Africa and travel through eyewitness accounts. Studies journeys Africans have made within and from the continent alongside accounts of travelers visiting Africa from elsewhere.

AFR X40K. Medicine in African History.
An exploration of how communities have confronted disease throughout Africa's history.

AFR X40L. Historical Imagining of Africa in Films.

AFR X40M. Geographies of International Development in Africa.
Critically examines the major approaches to "Development" in colonial and postcolonial eras, with a focus on a range of African resources: from water to wildlife, forests to farms, airways to rangelands, and including a consideration of African bodies themselves as sites of development and resistance.

AFR X40N. African Queer Studies.
Examines the development of African queer studies as the interdisciplinary study of sexuality on the African continent, and its impact on the academic and activist realm. Focus on intersectional feminist and queer theory and how this field offers tools that can be used to rethink issues of oppression and domination in relationship to race, nation, sex, gender, and sexuality on the African continent. Of particular interest will be LGBTQ activism and the ways in which queer Africans engage and shape their sexuality, and create forms of belonging in their countries and their communities.

AFR X40P. Egyptian Hieroglyphics in Cultural Context.
The vocabulary and grammar of ancient Egypt as a guide to understanding artifacts and monuments from the different periods of Egyptian history, whether in museums, exhibitions, or on site overseas.

AFR X40Q. Daily Life in Ancient Egypt.
Delve into all areas of Egyptian daily life from the dawn of the dynasties to the age of Cleopatra.

AFR X40R. Archaeology of African Thought.
Archaeological, historical, and ethnographic data as they relate to the foundations of contemporary African and African American societies.

AFR X40S. Gender in North and West Africa.
Examines gender discourses through North African and West African literary works by looking at the role(s) played by Islam and Christianity in the creation of the identities of African men and women. Includes discussion of the question of what gender is, and whether it is socially constructed.

AFR X40T. African Religious Culture and Creativity.
Examine religion as an aesthetic practice and explore the inventiveness of the imagination that underlines African religious practices. Study religious practices spanning from the pre-colonial and post-colonial eras to the contemporary period particularly in urban centers.

AFR X40U. Africa and Rome.
Explore the history of Roman Africa with emphasis on what is now Tunisia and northern Algeria.

AFR X40V. Sociology of Africa.
An introduction to the sociological study of sub-Saharan Africa. Major themes include: sources of knowledge about Africa; characteristics of African states and societies, from origin to internal social boundaries (religion, ethnicity, class); kinship and family; and development and change.

AFR X40W. Coloniality in West Africa.
Study the changes and continuities of socio-political categories in African contexts from the period of formal colonial rule to the present day.

AFR X41. African Cities Since 1500.
Explore Africa's past through the story of urbanization beginning with an overview of African cities around 1500--a time of increasing human migration and global trade. Assess African cities in the modern period, focusing on the advent of European colonialism in the 1800s and its aftermath.

AFR X41C. Fashion in Africa.
Examine fashion history through readings, videos, social media, and textile making to provide an immersive experience in African design history. Address the ways in which textiles are tied to class distinctions and politics, wrapped up in the history of trade (including human trafficking and slavery), mixed into revolutionary struggles and post-independent governance, and inspire haute couture and global fashion trends.

AFR X45. History of East Africa.
A survey of the history of Kenya, Tanzania, and Uganda from prehistoric times to the postindependence era.

AFR X45C. History of West Africa.
A history of the West Africa region: the rise and fall of kingdoms, relations with Europe and Asia, the great revolutions of the nineteenth century, colonial administration, decolonization, and the search for economic development and political stability since independence.

AFR X45D. Afro-Luso-Brazilian Worlds.
Examine the myths and realities in the Afro-Luso-Brazilian worlds and the connections and contrasts between them.

AFR X45E. Afro-Latin America.
Examines the historical experiences of people of African descent in Latin America and the Caribbean beginning in the slavery era, and focuses on the histories of Afro-Latin Americans after emancipation.

AFR X45F. Sex and Power in the African Diaspora.
Exploration of various experiences and theories of sex, intimacy, and desire alongside intellectual and artistic engagements with power hierarchies and spirituality across transnational black communities. Subjects include the concept of "erotic subjectivity" from various theoretical and methodological angles, principally within African diasporic contexts.

AFR X45G. Religions of the Caribbean.
Examine the histories and politics of religious practices in the Greater Caribbean, encompassing the islands and Central American coasts as well as the continental diasporas, from Vodou and Rastafari to popular Hinduism.

AFR X45I. Nationalisms in the Caribbean.
AFR X45J. Race, Rebellion and Revolution in the Caribbean.
AFR X45K. Race Against Empire: Americas.
AFR X45M. Reimagining Cuba, 1868-Present.
Explores Cuban-United States relations from the nineteenth century to the present, including issues of empire and transnationalism, and social change engagements between Cuba and the United States before and after the Cuban Revolution.
AFR X45N. Afro-Caribbean Diasporas.
Analysis of the socio-cultural contexts of the African diaspora in the Americas, with a specific focus on the African diaspora in the islands of the Caribbean. Designed to analyze the cultural, social, and philosophical contributions of these diasporic populations and the ways they build social and cultural agency in their specific national or diasporic contexts.
AFR X45O. Debt and Colonialism in the Caribbean.
Examine the role that debt has played in the formation of colonial and neocolonial practices in the Caribbean region. Take a broad approach to the concept of debt in order to explore the financial and monetary dynamics of debt, but also the political and cultural implications of debt. Focus in particular on debt as justification in the furtherance of colonialism throughout the Caribbean. Engage in a historical examination of the United States' colonial projects and military interventions in the region throughout the 20th and into the 21st centuries.
AFR X45P. African Religion in the New World.
Explore the contributions of scholars and artists who engage African diaspora religions in their work through multiple conceptual approaches.
AFR X45Q. Mediascapes: Literature and Media in the Caribbean.
Analyzes the relationship between literature and media technologies in contemporary Caribbean cultures.
AFR X45S. Afro-Latinos: Memory, Literature, Culture.
Discuss the lives and works of Afro-Latinos in the United States from the nineteenth century to the present.
AFR X45T. Afro-Latinidades in the United States and Latin America.
AFR X45U. Race Politics and Caribbeans.
Examine racial and political themes among Spanish-speaking Caribbeans on the islands and in the United States. Explore racial politics in the three countries and compares notions of identity, experiences with racism and anti-racist protest with the United States
AFR X45V. Literature of AIDS in Africa.
Examine the emerging cultural representations of AIDS in sub-Saharan Africa through journalistic, social science, and historical accounts. Explore the difficulty of representing the various aspects of a public-health crisis.
AFR X45W. Global Black Feminisms.
Examine Black feminist theories and practices around the world from a transnational and comparative perspective.
AFR X46C. Cuba in Question.
Explore Cuba's peoples, cultures, ethnicities, and the social and historical processes that go far beyond the common media stereotypes.
AFR X50C. Black Middle Class.
AFR X50D. Politics of Black Life.
AFR X50F. Black Women on Trial.
Using press coverage of historical and contemporary court cases and trials of women ranging from Angela Davis to Marissa Alexander, explores how media shapes public and popular perceptions of race, class, gender, sexuality, and the law.
AFR X50J. HIV and AIDS Activism and the Healing Arts.
AFR X50K. Puerto Rico In Crisis.
AFR X50L. Race And Place.
AFR X50N. Barack Obama and American Democracy.
Focuses on the impact of Barack Obama's watershed presidency on American democracy.
AFR X50P. Urban Slavery in the Americas.
Examines urban slavery in the Americas.
AFR X50Q. African-American Politics.
Explore the evolution, nature, and role of African-American politics within the American political system.
AFR X50R. Global History of Disease.
Introduction to major themes in the history of medicine through the lens of disease. To be considered are the roles governments, medical practitioners, and patients play in the social construction of disease and health.
AFR X50S. The Black Church in African American Politics.
Explore the political role of the Black church in the African American experience.
AFR X50T. Domestic Slave Trade.
Explores the inner workings of the domestic slave trade from the perspectives of slaveholders, speculators, and the enslaved. Analysis of maps, letters, diaries, newspaper advertisements, and legislation relating to the domestic slave trade.
AFR X50U. The Civil Rights Movement from a Comparative Perspective.
Focuses on African American and Mexican American struggles for civil rights. Asian American and Native American movements will also be addressed. Using a comparative approach the student will consider the distinctiveness of each of these struggles while also viewing them in relation to each other.
AFR X50V. Gender and Slavery in the United States.
Examines the gendered experience of chattel slavery in the United States. Includes critical analysis of classic and contemporary texts, films, and songs that focus on slave labor, family, community, sexuality, and the economy.
AFR X51. The Global City.
AFR X51C. Women and Social Movements in the Twentieth-Century United States.
Examines women's participation in well-known and lesser-known social movements during the twentieth century.
AFR X51G. Black Women in America.
Uses primary sources, historical monographs, and essays to provide a chronological and thematic overview of the experiences of black women in America from their African roots to the circumstances they face in the present era.
AFR X51J. Texas Black History.
Surveys the history of blacks in Texas from before American settlement to the present.
AFR X51K. Antebellum Slavery.
Examination of slavery at its maturity during the nineteenth century.
AFR X51L. The United States in the Civil Rights Era.
Examines United States history in the post-World War II era, including how civil rights and other racial issues helped shape the politics, popular culture, and social life of this period.
AFR X51M. African American Social and Political Thought.
Examines the speeches and writings by major theorists and critics of the prophetic tradition of black political thought.
AFR X51N. Black Political Thought.
Exploration of black social and political thinkers, writers, and reformers, and how their works influence the legacies of slavery, empire, and patriarchy within the United States.
AFR X51O. Slavery across Genres.
Uses nonfictional and fictional narrative accounts of slavery in the United States to examine the political, social, cultural, economic, and psychological aspects of the institution of slavery at different historical moments. Sources may include authors such as Frederick Douglass, Toni Morrison, William Faulkner, Harriet Beecher Stowe, and Edward P. Jones; graphic novels; conceptual art; court records; and bills of sale.

AFR X51P. Atlantic Slavery: History and Memory.
Charts a history of Atlantic slavery by focusing on primary sources detailing crucial events and contexts such as the Zong Massacre, the Haitian Revolution, and Dred Scott vs. Sandford, among others. Considers how historians, memoirists, fiction writers, visual and performance artists and filmmakers have come to terms with that history and its implications.

AFR X51Q. Slavery and Its Legacies.
Explore how slavery has evolved in the United States since the end of the Civil War.

AFR X51R. African American Family in Historical and Contemporary Contexts.
Examine how African Americans managed to maintain a sense of family from the time of slavery to the present trend of mass incarceration.

AFR X51S. Science, Magic, and Religion.
Historical and cross-cultural overview of the constructed concepts of magic, science, and religion through comparative examinations of cultural contexts from the Islamic world, western Europe, the Caribbean, the U.S., and Mozambique.

AFR X51T. Anthropology for Liberation.
Takes a critical look at anthropologists' quests to shifting the legacy of anthropology from the colonial toward freedom and liberation. Explores anthropology's relationship to human rights, violence, questions of race, gender, and sexuality, imperialism and neoliberalism, and the ways that some anthropologists have chosen to use their field work in new and different ways.

AFR X51U. Race, Capitalism, and the Environment.

AFR X51V. Black Slavery in the Atlantic.
Examine the history of slavery in the Atlantic from 1450 to 1865.

AFR X52C. Psychology of Race and Racism.
Review of the history and evolution of the construct of race as a psychological and social phenomenon. Multidisciplinary but primarily social-psychological approach: in addition to readings from psychology, ideas in the areas of anthropology, sociology, and biology will be discussed. Emphasis on theoretical and conceptual approaches toward understanding the psychology of racial thinking.

AFR X52D. Psychology of the African American Experience.
Examination of the psychology of people of African descent using an African-centered liberatory model.

AFR X52E. African Americans in Sports.
Theoretical and practical complexities in issues surrounding African Americans in sports, including the relationship between athletics and higher education. Focuses on racial stereotyping, identity theory, and how practical knowledge of these theories can aid in understanding the current state of athletics.

AFR X52F. Sociocultural Influences on Learning.
Examine human learning in multisocial, multilingual, and multicultural contexts; realities of society and their impact on learning; social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, parent and community involvement.

AFR X52G. African American Religions.
Survey the history and variety of religion as practiced by Americans of African descent. Examine the social construction of African religion, black religion, and the black church, within the cultural context of the United States.

AFR X52J. Black Lives in the Archives.

AFR X52K. African-American Women's Political Activism.
Explore Black feminism and African-American women's political participation.

AFR X52L. Africa and Indian Ocean World.
Explore the connected histories of the geographical regions and economic communities that share the littoral space of the Indian Ocean.

AFR X52M. Race, Gender, Sex, and Religion.
Use an intersectional feminist framework to examine the construction and maintenance of normative categories of race, gender, sex, and sexuality within United States religious discourse.

AFR X52N. Technologies of United States Empire.
Investigate the various technologies that the United States has used to maintain imperial geographies at "home" and abroad. Focus on imperial entanglements of global capital, liberalism, and technological systems.

AFR X52O. Queering Black Religions.
Explore the ways Africana religion practitioners disrupt and reframe dominant western discourses of gender and sexuality. Examine concepts of temporality, spirit manifestation, subjectivity, corporeality, and Africana religious epistemologies.

AFR X52P. Food in the Racialized City.
Explore a variety of issues related to producing, accessing, and consuming food in city spaces in the context of racial inequities. Investigate and question constructs such as "food" and "city" as means of exploring different points of view and approaches to studying not only food and cities but also various approaches to food justice.

AFR X52Q. Black Geographies.
Explore the relationship between Blackness and the production of space and place. Examine the tensions and possibilities that emerge when Black people are rendered un-geographic as a fundamental component of racial capitalism while they are simultaneously creating spaces of freedom under constant threats to Black life.

AFR X52R. Rhetoric of Ethnic Studies.
Study the histories of ethnic (and gender) studies in both higher education and K-12 institutions, and the rhetoric of attacks on, and defenses of, ethnic and gender studies through an examination of primary and secondary source materials.

AFR X53C. Mapping Urban Destruction.
Investigates how demolitions have shaped the material and social lives of two compelling, rapidly-changing global cities: Sao Paulo and Austin. Develop technical skills in digital mapping in a supportive environment.

AFR X56D. African American Theatre History: 1950 to Present.
Chronological examination of the history of African American theatre since 1950, through the study of productions, performance theory, play texts, essays, reviews, and manifestos within their sociopolitical contexts, with an emphasis on strategies of resistance that are embedded in aesthetics.

AFR X57C. African American History to 1860.
Review of West African origins; New World settlement patterns, social life, and culture; discussion of the Atlantic slave trade, the development of capitalism and plantation slavery, and the origins of racism.

AFR X57D. African American History since 1860.
Survey of the history of African Americans in the United States from 1860 to the present: Emancipation, Reconstruction politics, migration and urbanization, and the evolution of African American culture; kinds of sources and methods valuable for analyzing African American life and culture.

AFR X58F. Race and Policing: History, Policy, and Practice.
Examine the origins and evolution of policing in the United States, with a focus on the development and impact of policing policies. Analyze how policies have supported or oppressed Black, working-class, and ethnic communities.

AFR X58K. Power and Money in U.S. Education Policy.
Examine how power dynamics and financial forces shape education opportunity, who controls what gets taught, how resources are allocated, the political influences behind educational decisions, and the impact of the decisions upon different groups of students.

AFR X58M. Black Education Policy.
Examine key educational policy moments that have impacted Black communities--including anti-literacy laws, segregation, contemporary funding, and curriculum debates. Explore how Black communities have

responded through institution-building, legal advocacy, and alternative educational practices.

AFR X59N. History of Africa since 1800.
Development of sub-Saharan Africa from the end of the slave trade to independence.

AFR X60. Race, Law, and United States Society.
Examines the intersection of racial ideology and legal culture in the United States.

AFR X60C. Social Media for Social Impact.
Explore the social media universe through the lens of black studies. Discuss traditional black studies issues as they play out in the social media context. Engage in professional development activities and service learning. Interpret black participation in the social media landscape, and examine the possibilities for social media participation as a community benefit.

AFR X60D. Race, Gender, and Surveillance.
Overview of theories in the sociology of social control, with a focus on risk, power, ethics, and surveillance. Examines historical transformations in social control and the distributions of power in the United States and global contexts, with attention to race, gender, and class. Subjects include: the transatlantic slave trade; prisons and punishment; the gaze, voyeurism, and reality television watching; the Internet; travel and state borders; privacy; and biometrics and the body.

AFR X60E. Black Women and the State.
Surveys black women's experiences living with and confronting state oppression around the world. Takes an historical, social, and theoretical look at the roots of this oppression and inequality, and how black women have chosen to respond to it locally and globally.

AFR X60F. Urban Unrest.
Analysis of the roots of urban unrest, exploring a range of origins: joblessness, state violence, white flight, backlash against civil rights gains, new immigration, and interracial strife. Beyond race and class, subjects include exploring unrest as a mode of pushing the normative boundaries of gender and sexuality in public space. Course material will draw from film, literature, history, geography, and anthropology.

AFR X60G. Blacks and Asians: Race and Social Movements.
Examines the relations between Asians and Blacks in the United States.

AFR X60I. Black Freedom Movement.

AFR X60J. Migration Crisis.

AFR X60K. Race and Ethnicity Politics.
Explore racial and ethnic politics throughout the United States with a focus on Black and Latino politics. Examine group identity, racial inequality, policy making, activism, criminal justice system, and immigration.

AFR X60L. Race and United States Social Policy.
Examine the relationship between race and the development of United States social policy. Explore how specific social policies affect racial and ethnic inequality.

AFR X60M. Abolition Medicine.
Examine race-based diagnostics tools and treatment guidelines that reinforce antiquated and scientifically inaccurate notions of biological race. Discuss the upstream structures that enable downstream violence, such as police brutality. Analyze, through an abolitionist lens, various systems of power in medicine, culture, and society to trace the colonial logics, practices, and institutions in the afterlife of slavery pertaining to health, illness and disease, healthcare, and public health in the United States and globally.

AFR X60N. Displacement and Resistance.
Explore technologies of displacement, as well as tactics, digital media work, mapping projects, and activism that communities engage with to resist dispossession. Examine, locally and globally, the displacement and resistance effects of various events including infrastructure projects and gentrification.

AFR X60P. Race and Migration: The Mediterranean.
Examine the history of migration within and from the Mediterranean area.

AFR X60Q. Black Women and Mass Incarceration.
Examine the history of Black women and mass incarceration in America. Explore how race, class, and gender have historically influenced the production of crime and unfair criminal justice policies. Investigate why mass incarceration matters, what its historical legacy is, and how it impacts Black women today.

AFR X60R. Crime and Capitalism in African American Popular Culture.
Examine the intersection of crime and capitalism in black literature, motion pictures and music of late twentieth and early twenty-first Centuries.

AFR X61K. Performing Race: African American Literary Performance.
Study of the criticism and performance of modern African American drama.

AFR X64O. Central Americans in the United States.
Examine the extensive and diverse histories, cultures, social and political movements of Central Americans in the United States, particularly through a Black, Indigenous, and Ethnic Studies framework.

AFR X65C. African American Language.
Introduction to the history and contemporary form of African American Language (AAL). Through readings, examine the linguistic description of essential features, the use of AAL in the creation of culturally and historically influential texts, and AAL as a subject of public discussion.

AFR X70. Topics in African and African Diaspora Studies.

AFR X73. Independent Research.
Supervised individual research on a problem in African and African diaspora studies.

AFR X75. Community Internship.
Internship in a community organization that facilitates the economic, political, and social development of Austin's African American community. Students participate in research projects under the supervision of a faculty member.

AFR X76. Senior Seminar.
A capstone course focusing on black intellectual traditions.

AFR X79H. Honors Tutorial Course.
Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis.

Graduate Courses

AFR X19S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFR X29S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFR X80. Introduction to Policy Research .
Introduction to the tools needed to understand policy issues and analysis with respect to contemporary case examples.

AFR X80C. Marginalized Communities and Policy Development.
An exploration of how different racial groups in the United States have been historically and are presently marginalized through larger political

and social systems, and how these systems have allowed groups to attain and maintain power and privilege in the United States.

AFR X80D. Race, Ethnicity, and Gender Policies.
An exploration of the development of race, ethnicity, and gender theories and their application to social issues, policy development, and policy implementation.

AFR X82. Race and the Urban Crisis.
Examines the roots of the urban crisis, or the decline of U.S. and global cities in the post-World War II era, and begins with the premise that the story of the urban crisis is simultaneously the story of racial crisis. Explores how the origins of themes such as urban unrest, concentrated poverty, the housing crisis, the drug epidemic, and welfare dependency are rooted in race, class, and spatial inequities.

AFR X85C. Topics in Black Studies Humanities.

AFR X85C.1. Reading the Maghreb.
Examine Maghrebi literature and film of both French and Arabic expression, along with works of psychoanalytic and postcolonial theory.

AFR X86C. Topics in Black Studies Social Sciences.

AFR X86C.1. Violence, Sovereignty, and Religion.
Explore the relationships among violence, sovereignty, and religion.

AFR X87C. Topics in Black Studies Fine Arts and Expressive Culture.

AFR X89. Academic Writing for Graduates.
Produce clear, accurate, and well-argued scholarly work, covering a range of commonly used writing styles, including essays, research papers, literature reviews, grant writing, thesis proposals, master's reports, qualifying examinations, and dissertations.

AFR X90. Black Studies Theory I.
An exploration of the innovative, complex, and distinctive African diaspora social structures and cultural traditions, as well as the historical, cultural, political, economic, and social development of people of African descent.

AFR X91. Black Studies Methods.
A survey of seminal black studies texts and methods that have transformed the social sciences, humanities, and fine arts in producing a distinct black studies epistemology. Explores what black studies scholars have done to transform traditional methods and disciplines in pursuit of a distinct black studies methodology.

AFR X95P. Special Subjects in Professionalization in African and African Diaspora Studies.
Advanced seminar designed to introduce students to African and African diaspora studies and the skills needed in this field; including writing and revision, competitive and successful applications for grants and fellowships, and development and preparation of a dissertation proposal.

AFR X95Q. Qualifying Examination Preparation.

AFR X96. Conference Course in Black Studies.
Individual instruction in specialized problems of advanced research in black studies.

AFR X97R. Literature Review.
Preparation of a report to be counted toward the requirement for the master's degree under the report option.

AFR X98. Thesis.

AFR X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

AFR X98T. Supervised Teaching in African and African Diaspora Studies.

AFR X99W. Dissertation.

Professional Courses

AFR X19S. Topics in African and African Diaspora Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFS - Air Force Science

Air Force Science: AFS

Lower-Division Courses

AFS X00. Leadership Laboratory.
Various leadership techniques, including drill and ceremonies, customs and courtesies, and uniform standards.

AFS X03K. Heritage and Values I.
Introduction to the Department of the Air Force (DAF), including the United States Air Force (USAF) and United States Space Force (USSF). Examine general aspects of the DAF, leadership fundamentals, service benefits, and professional opportunities for officers. Explore military heritage, core values, customs and courtesies, dress and appearance, communication skills, and teamwork, laying the foundation for becoming an Airman or Guardian. Gain a knowledge-level understanding of United States military operations, principles of war, and the employment of airpower and spacepower from an institutional, doctrinal, and historical perspective. Introduction to the military way of life and gain insight into the roles and missions of the USAF and USSF.

AFS X03L. Heritage and Values II.
Continuation of Air Force Science 103K.

AFS X12K. Team and Leadership Fundamentals I.
Examine leadership and team fundamentals within the Department of the Air Force (DAF), building upon the professionalism, core values, and self-development foundations. Emphasize the responsibilities of leaders of character within the profession of arms by shifting focus from individual development to leading and developing others. Explore essential leadership concepts such as listening, followership, problem solving, and interpersonal communication, and apply these principles through team-building activities. Reinforce an understanding of leadership in a military context while developing basic verbal and written communication skills applicable to academic, professional, and personal environments. Gain insight into how effective leaders operate and how cohesive teams contribute to mission success, through discussion and practical application.

AFS X12L. Team and Leadership Fundamentals II.
Continuation of Air Force Science 112K.

AFS X19S. Topics in Air Force Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Air Force Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFS X20L. Leadership Laboratory.
Leadership laboratory course for upper-division students. Further development of leadership skills through leadership positions within the cadet corps. Includes training of freshman and sophomore students as well as a practicum in Air Force unit operation.

Upper-Division Courses

AFS X23. Leading People and Effective Communication I.
Build upon the leadership and team fundamentals, prepare to assume increased leadership responsibilities within the Air Force ROTC

detachment and the Department of the Air Force (DAF). Emphasize practical leadership application, focusing on effective people management, ethical decision-making, and professional conduct expected of commissioned officers. Develop the tools necessary to lead others, foster organizational effectiveness, and navigate leadership challenges in a military environment. Emphasize written and oral communication, including professional writing and briefing skills, to build confidence and competence in public speaking. Examine leadership and ethics from both institutional and personal perspectives, encouraging self-reflection and continued leadership growth through guided discussion, case studies, and experiential learning.

AFS X24. Leading People and Effective Communication II.
Continuation of Air Force Science 323.

AFS X29S. Topics in Air Force Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Air Force Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AFS X34. National Security, Leadership Responsibilities and Commissioning Preparation I.
Examine national security policy and decision-making processes within the Department of the Air Force (DAF), emphasizing the role of the military in society and the execution of military power in support of national objectives. Study foundational elements of DAF operations, selected domestic and international security issues, and the responsibilities, authority, and functions of Air Force and Space Force commanders. Explore officership, advanced leadership ethics, civilian control of the military, and key provisions of the military justice system. Prepare for active duty service, focusing on the transition from civilian and cadet life to that of a commissioned second lieutenant. Emphasize professional communication skills, critical thinking, and the responsibilities inherent in military professionalism.

AFS X36. National Security, Leadership Responsibilities and Commissioning Preparation II.
Continuation of AFS 334.

Graduate Courses

Professional Courses

AHC - Ancient History and Classical Civilization

Ancient History and Classical Civilization: AHC

Lower-Division Courses

AHC X10. Topics in Introductory Surveys in Premodern History.
Introductory survey of premodern history with emphasis on regions outside of the ancient Mediterranean world.

AHC X10.1. Introduction to the History and Culture of Spain.
The history of Spain from its beginnings in the stone age through the great social and economic upheavals of the twentieth century.

AHC X10.3. The Ancient Middle East.
Survey the history of the Middle East from the beginning of the Neolithic period (9000 BCE) through the invasion of the region by Alexander the Great in 332 BCE and into the pre-Islamic era.

AHC X10.4. The Premodern World.
Survey of world history from human origins to the sixteenth century.

AHC X10.5. The Medieval Millennium in Europe.
Explore new conceptions of medieval Europe by examining how the social practices, ideas, and institutions of the middle ages developed through interactions with Europe's neighbors.

AHC X10.6. Medieval Material Culture.
Explore the history of medieval Europe primarily through the lens of material culture.

AHC X10.7. Gods and Goddesses of India.
Explore a variety of gods and goddesses who have dominated the sacred landscapes of India and beyond, especially North America, from the past until now. Examine various issues relating to patriarchy, power, gender, sexuality, social hierarchy, and devotion.

AHC X19D. The Ancient Mediterranean World.
Survey of the ancient Mediterranean from ca. 3000 BC to AD 476. Focus on the development of ideas and institutions in the Greek and Roman worlds and on the active cultural exchange among the diverse civilizations of the broader region that shaped Greek and Roman history and cultural identity.

Upper-Division Courses

AHC X25. Topics in Ancient History.
Topics in the history of the Greek and Roman empires and the surrounding area.

AHC X25.1. The History of Rome: The Republic.
A survey of Roman history from the founding of Rome to the death of Julius Caesar.

AHC X25.10. Ancient Slavery.
Examine the practices of slavery in the ancient Mediterranean world, focusing on the case of Rome.

AHC X25.13. The Ancient Historians.
Examines the main works of ancient historiography, and provides grounding in the central issues with which these works engage.

AHC X25.15. Civil War in Rome.
Examines the sequence of civil conflict in Rome from the struggle of the orders through the rise of Constantine the Great.

AHC X25.16. Romans in Court.
Examine how Roman law operated at three levels of granularity, focusing mainly on attested disputes that made it to court for resolution.

AHC X25.17. Ruling the Roman Republic.
Examine the core question about the way the Late Roman Republic was governed: To what extent and in what ways was the Republic "democratic or not?

AHC X25.2. The History of Rome: The Empire.
A survey of the Roman world from Augustus to Constantine the Great.

AHC X25.6. Alexander the Great and the Hellenistic World.
History of Asia, Egypt, and the Mediterranean world from Alexander's expedition to Asia to Rome's defeat of the last of the Hellenistic monarchs at Actium (ca. 334 to 31 BC).

AHC X25.7. Archaic and Classical Greece.
Survey of Greek history from the emergence of the city-states to the rise of Macedonia.

AHC X25.8. Archaeology of Greek Prehistory.
Explore the development of complex societies in ancient Greece by studying its prehistory through archaeology.

AHC X25.9. Roots of Democracy.
Examine the historical development and ideological underpinnings of Athenian democracy, the first known democracy, from the sixth to fourth centuries BCE. Explore a broad range of primary sources and some secondary scholarships and gain a familiarity with the key principles and practices of this unique participatory government in its political, historical, and intellectual context.

AHC X30. Topics in Premodern History.
Topics in premodern history with emphasis on regions outside of the ancient Mediterranean world.

AHC X30.1. The Dead Sea Scrolls.

AHC X30.2. Epics and Heroes of India.
Focus on India's classical epics, the Mahabharata and the Ramayana, with emphasis placed on understanding the epic characters in relation to the heroic traditions of premodern India, as well as on the role of the epics in contemporary Indian political and religious culture.

AHC X30.4. Lost Languages and Decipherment.
AHC X30.5. The Crusades.
An exploration of the religious encounters between eastern and western Christians, Christian heretics, Jews, Muslims, and polytheists; political, military, and cultural changes of the high middle ages; and the ways that crusading ideas and symbols have been reused in contemporary politics and popular culture.
AHC X30.6. Machiavelli: Politics and Culture.
Through Niccolo Machiavelli's chief writings, consider the local, regional, Mediterranean, European, and global aspects of his work.
AHC X30.7. Great Works In Medicine.
Examine signature works in the history of medicine.
AHC X30.8. Twelfth-Century Renaissance: 1050-1200.
An examination of social, cultural, and intellectual developments in eleventh- and twelfth-century Europe.
AHC X30C. Death and the Afterlife in Ancient China.
Investigate ancient Chinese beliefs and practices surrounding death and the afterlife from the Neolithic era to the arrival of Buddhism. Explore tombs, burial objects, and funeral rites; philosophical essays and historical accounts; medical practices; religious relics, tokens, and talismans; ghost stories; poetry; and paintings.
AHC X78. Topics in Undergraduate Seminar in Ancient History.
Lectures, discussion, reading, and research on selected topics in Greek and Roman history.
AHC X78.1. Roman Law.
Introduction to Roman law with close study of primary sources.
AHC X78.10. Roman Social History.
Examine Roman social history: family structure and demography, gender systems, official social hierarchies, urban/rural interactions and labor. Consideration both of primary evidence and the historiography of the field.
AHC X78.2. Aegean Prehistory.
Traces political, social, economic, and general cultural developments on Crete and the Greek mainland between roughly 2200 and 1100 BCE.
AHC X78.3. Writing Ancient History Today.
Questions that engage ancient historians today and the methods that they use. Some background in ancient Greek history is recommended.
AHC X78.4. The Athenian Empire.
Explores Athenian society, democracy, and empire from the development of Athenian hegemony in the 470s BCE through the break up of the Athenian Empire in 404 BCE.
AHC X78.5. Space and Place.
Multidisciplinary approach to the cultural concepts of space and place using Greek and Roman literary, historical, and archaeological sources.
AHC X78.6. Ancient Sparta.
Examines topics and problems in the social, political and economic history of the ancient city-state of Sparta.
AHC X78.7. Cognitive History of the Ancient World.
Examines aspects of the organization of thought in the ancient world.
AHC X78.8. Herodotus, Ethnography, and Archaeology.
Explore the ethnographic component of the Histories of Herodotus.
AHC X78.9. Literacy, Numeracy, and Visuality.
Analyze literacy, numeracy, and visuality, that is "reading" and writing" by means of visual representations, largely by tracing the history of how modern scholars have analyzed those practices.

Graduate Courses

Professional Courses

AMS - American Studies

American Studies: AMS

Lower-Division Courses

AMS X10. Introduction to American Studies.
An interdisciplinary introduction to the historical exploration of American culture.
AMS X10C. Jewish American Literature and Culture.
Examine Jewish American literature in its cultural contexts with an emphasis on skills and methods. Explore texts, drawn from a variety of genres and periods, that indicate the range of Jewish American experiences and how those experiences are influenced by issues such as citizenship, class, ethnicity, gender, and sexuality.
AMS X10D. North American Borderlands.
Explore the formation of political borders in nineteenth- and twentieth-century North America, their contestation, and the multiple meanings attached to them.
AMS X11C. Latinx Material Culture.
Discuss utilizing material culture as a method of analysis to highlight histories of oppression, struggles towards liberation, and the politics of everyday Latinx life in the U.S..
AMS X11S. Topics in Introductory Seminar in American Studies.
Writing, reading, and discussion on an American studies topic, with emphasis on the evaluation of information, analytical reading, and critical writing.
AMS X12C. Blackness and Comics.
Examine the relationship between race and the sequential aesthetics of comic books and comic strips. Explore comics strips, underground comics, and superhero comics from the colonial period to the present day.
AMS X15. Topics in American Life.
Interdisciplinary exploration of American cultural and intellectual life.
AMS X15.1. Introduction to Asian American Studies.
Introduces the interdisciplinary study of Asian immigrants and Asian Americans in the United States. Explores key concepts, including immigration history, identity and community formation, cultural representation, and the intersections of race, class, gender, and sexuality.
AMS X15.2. Mixed Race Identities.
Analyzes the historical and contemporary significance of issues of race" and "mixing" in a North American context. Subjects include the situation of "mixed race" people throughout United States history; historical policies that have shaped racial formation in the United States; comparative conceptions of "mixed" people transnationally; and racial, ethnic, and cultural identity.
AMS X15.3. Race, Immigration, and Family.
Introduction to family systems in the United States in a post-WWII framework with a central focus on Asian Americans. Students will investigate how gender, race, and ethnicity intersect and inform our understanding of the institution of the family.
AMS X15.5. History of Religion in the United States.
Explores instances of religious dominance and religious diversity in United States history. Moving from the pre-colonial period to the present, it examines the changing circumstances of several religious communities, including American Indians and Puritans, Protestant evangelicals, Mormons, Roman Catholics, Jews, Muslims, and Hindus.
AMS X15.6. American Jews: The Yiddish Experience.
Focuses on over a century of Yiddish-based contributions to American literature, music, and film, including works by Isaac Bashevis Singer, Michael Chabon, Woody Allen, and the Marx Brothers.

AMS X15.7. Asian American Film History.
AMS X15.8. Germany and Globalization.
AMS X15C. Movies Go To War.
A comparison of films from various nations about major twentieth century wars to the historical facts of the conflicts as practicums in critical comparative analysis of histories as representations.
AMS X15D. Anthropology of Race and Ethnicity: An Introduction.
Examines the social importance of race and ethnicity both in America and around the world.
AMS X15F. Native American Literature and Culture.
Studies Native American literature from different regions and cultures and considers this literary tradition in tribal national and United States national contexts.
AMS X15J. Rights in Modern America.
AMS X15K. The Revolution Will Be Dramatized.
AMS X15L. Toni Morrison and August Wilson.
AMS X15N. Latina and Latino Media and Popular Culture.
Explore Latina/o media and popular culture from 1950 to the present.
AMS X15O. Introduction to Native American Histories.
Examine the history of Native American societies in North America from the earliest records to the present.
AMS X15P. Building America: Engineering, Society, and Culture, 1868-1980.
Examines building in American society from the late 1860s to 1980.
AMS X15Q. American Jewish History.
Examine the history of Jews in the United States from the seventeenth century to the present. Explore the formation of a distinct American Judaism and the involvement of Jews in American cultural and political affairs.
AMS X19. Latinx Digital Worlds.
Explore how Latinx communities (traditionally figured as on the wrong side of the "digital divide") have embraced, mobilized, and sometimes usurped emerging digital tools and spaces to forge community and create new forms of culture, memory, and activism.
AMS X19S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
AMS X29S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

AMS X19S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
AMS X20C. Jews of the United States, Canada, and Latin America.
Explore the cultural history of Jews in the United States, Latin America, and Canada through a representative sample of short literary texts, film clips, and musical recordings.
AMS X21. Topics in American Societies.
A study of America through its geography, language, government, or cultures.
AMS X21.10. Women and Social Movements in the Twentieth-Century United States.
Examines women's participation in well-known and lesser-known social movements during the twentieth century.
AMS X21.11. The Vietnam Wars.
Introduction to the complex and controversial history of the wars fought in Vietnam from 1941 to the 1980s.
AMS X21.12. Race, Internet, and Social Media.
Explores the critical, theoretical and practical analysis of race and new media.
AMS X21.3. Native American Cultures North of Mexico.
AMS X21.4. America and the Holocaust.
AMS X21.6. Race, Gender, and Surveillance.
Overview of theories in the sociology of social control, with a focus on risk, power, ethics, and surveillance. Examines historical transformations in social control and the distributions of power in the United States and global contexts, with attention to race, gender, and class. Subjects include: the transatlantic slave trade; prisons and punishment; the gaze, voyeurism, and reality television watching; the Internet; travel and state borders; privacy; and biometrics and the body.
AMS X21.7. Social Movements.
Characteristics of crowds, publics, and social movements; their role in social organization and social change.
AMS X21.8. Urban Unrest.
Analysis of the roots of urban unrest, exploring a range of origins: joblessness, state violence, white flight, backlash against civil rights gains, new immigration, and interracial strife. Beyond race and class, subjects include exploring unrest as a mode of pushing the normative boundaries of gender and sexuality in public space. Course material will draw from film, literature, history, geography, and anthropology.
AMS X21.9. The United States in the Civil Rights Era.
Examines United States history in the post-World War II era, including how civil rights and other racial issues helped shape the politics, popular culture, and social life of this period.
AMS X21E. African American History to 1860.
Review of West African origins; New World settlement patterns, social life, and culture; discussion of the Atlantic slave trade, the development of capitalism and plantation slavery, and the origins of racism.
AMS X21F. African American History since 1860.
Survey of the history of African Americans in the United States from 1860 to the present: Emancipation, Reconstruction politics, migration and urbanization, and the evolution of African American culture; kinds of sources and methods valuable for analyzing African American life and culture.
AMS X21G. Native Americans in Texas.
Studies the history of Native Americans in Texas using concepts and evidence from anthropology, history, archaeology, historical geography, and Native American studies.
AMS X21I. Central Europe Goes to Hollywood.
Survey research tools and methods used to study the history of Hollywood film industries and the roles that films and film professionals play; based on films and industry careers connected to Central Europe.
AMS X21J. African American Social and Political Thought.
Examines the speeches and writings by major theorists and critics of the prophetic tradition of black political thought.
AMS X21K. European Immigration to Texas in the Nineteenth Century.
AMS X21L. German Scholars: US Exile.
Examine the migration of established European intellectuals into the US, due to the Second World War. Explore how they worked against their persecutors for their own cultural heritage and to influence US

intellectual life. Investigate the ethical dilemmas faced in transplanting their lives and projects into new contexts.

AMS X21M. Radical Chic: Revolutions from Europe.
Explore innovative European ideas that reshaped United States history and society: Freud and settlement houses, models for education (from Switzerland to Dewey at the University of Chicago), and the labor movement (Marx to Eugene V. Debs and Mother Jones)

AMS X21O. Debt and Colonialism in the Caribbean.
Examine the role that debt has played in the formation of colonial and neocolonial practices in the Caribbean region. Take a broad approach to the concept of debt in order to explore the financial and monetary dynamics of debt, but also the political and cultural implications of debt. Focus in particular on debt as justification in the furtherance of colonialism throughout the Caribbean. Engage in a historical examination of the United States' colonial projects and military interventions in the region throughout the 20th and into the 21st centuries.

AMS X21P. Race And Place.

AMS X21Q. Writing for Black Performance.

AMS X21R. Politics of Memory: Germany and the United States.
Examine the role that narratives of the past play in politics and policies in both Germany and the United States, by engaging with key theoretical and empirical debates. Focus on the role of memory in German and US immigration politics.

AMS X21S. Cultural Heritage on Display.
Explore the public construction and display of traditional American folk culture by studying popular folklife-oriented tourist sites.

AMS X21T. Asian American Jurisprudence.
Examine the historical development of United States law and its relationship to Asian Americans, and of Asian American jurisprudence as an independent field of legal scholarship.

AMS X21U. Native American Cultures of the Southwest.
Explore the diverse Native cultures of the Southwest, focusing on the philosophical underpinnings and the frameworks of meaning and moral responsibility of indigenous peoples of the American Southwest.

AMS X21V. Religion and Film.
Survey of representations of religious beliefs, practices, persons, and institutions in popular film. Examination of film as a vehicle to reflect how a shared religious imagination shaped the way Americans understand themselves.

AMS X21W. Memories of War.
Consider the ways the wars of the twentieth and twenty-first century are being remembered in Germany and the United States - from poems, novels and films to monuments and the controversial debates about military conflicts that the two countries have been involved in. Utilize theories of social memory, and concepts of individual and social mourning, to analyze how war affects individual lives, how societies mourn, and how remembering war impacts national identity and politics.

AMS X22C. Amending the United States Constitution.
Examine the evolution of the United States Constitution from the founding to the present, with a focus on the major forces and fault lines that have made the Constitution today one of the world's most difficult to amend.

AMS X22D. Mexican American Studies at UT.
Trace the origins and development of Mexican American Studies at the national, regional, and local levels. Collaborate to help preserve and recognize the significance of Mexican American Studies at the University in historical and contemporary contexts.

AMS X22N. American Cultural History of Alcohol and Drugs.
Study of the American use and perception of drugs, including alcohol, and how they have changed over time. Examines significant shifts in American attitudes toward individualism and social control.

AMS X23C. American Dante.
Examine the influence of the Italian poet Dante on American culture from the nineteenth century to the present.

AMS X23O. American Popular Culture, 1682-Present.
Explores the evolution of American popular culture and its relationship to national consolidation, and at times, disunion, over the last 330 years.

AMS X24C. Black Middle Class.

AMS X24D. Black Freedom Movement.

AMS X24E. The Global City.

AMS X24F. Asian Americans in the South.

AMS X24G. Policing Latinidad.

AMS X24I. Chicana Feminisms.

AMS X24J. Austin Jews in the Civil Rights Era.

AMS X24L. Mapping Indigenous Austin.
Explore the histories and presence of indigenous Austin.

AMS X24P. Twentieth-Century United States Lesbian and Gay History.
Examines classic texts and recent and varied writings on LGBT history, focused on experiences, ideas, and conflicts that have shaped modern LGBT identities.

AMS X25C. Popular Music in the United States.
Traces the history of popular music in the United States and its influence on American politics, economics, and culture from the 1880s to present day.

AMS X25E. Music and Religious Identities in the US.
Examine religious music in Christianity and Judaism in relation to communities in religious context of Europe and the United States.

AMS X25F. Painting in America to 1860.
Painting in British colonial North America and the United States prior to the Civil War.

AMS X25G. Painting in the United States, 1860-1913.
Painting in the United States from the Civil War to the Armory Show.

AMS X25I. The Arts of Hip Hop.

AMS X25M. Russia Through American Eyes.
Examine a wide array of American attitudes towards Russia and Russians. Using a variety of political, social, and cultural events and encounters, analyze the ways in which nationalism, imperialism, and geopolitics informed American narratives about Russia and Russians, assessments that range from enthusiasm and curiosity to condemnation and outright hostility.

AMS X25P. Thomas Paine, Liberalism, and the Enlightenment.
Analyze the purpose and philosophy of Thomas Paine's writings in their relation to the political thought and politics of his time.

AMS X26C. Crime and Capitalism in African American Popular Culture.
Examine the intersection of crime and capitalism in black literature, motion pictures and music of late twentieth and early twenty-first Centuries.

AMS X27C. Native American Religions.
Examination of religious developments in Native American communities from the precolonial period through the present day. Focus on the changing forms of ritual practice and the relationship between religion and community life.

AMS X27D. United States Catholic History.
Examine how Catholicism and national identity work for Catholics in the United States, with an emphasis on Catholic women and Latino/as.

AMS X27E. Evangelical Christianity.
An introduction to the intellectual and social sources of evangelical Protestant traditions in the United States, their varieties of belief and practice, and their role in the wider Christian community and American society.

AMS X27F. Religion in the American South.
Examines the social construction and cultural meaning of southern religion using fictional characterizations, philosophical reflections, historical accounts, and theoretical comparisons.

AMS X27G. Religion in the American West.

AMS X27I. Religion and Social Justice in United States.

AMS X27J. Debating the Bible in the Twenty-First Century.
Examine the ways in which individuals, primarily in the United States, have regarded the Bible as relevant or irrelevant to contemporary life. Discuss contemporary controversial issues in which the Bible has played a role and how these relate to earlier controversies, such as the position of the Bible on slavery.

AMS X27K. Science, Magic, and Religion.
Historical and cross-cultural overview of the constructed concepts of magic, science, and religion through comparative examinations of cultural contexts from the Islamic world, western Europe, the Caribbean, the U.S., and Mozambique.

AMS X28C. Latinx Austin.
Explore the city of Austin, the city's importance for Latino communities, and the importance of Latinos for the city.

AMS X28E. Land in America.
Explore how the history of land helps explain the society we live in today and ideas about the human-nature relationship.

AMS X29. Environmental History of North America.
The history of humanity's influence on the plants, animals, microlife, soils, water, and air of North America, and vice versa, from the arrival of the proto-Indians to the contemporary environmental crisis.

AMS X29S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AMS X30. Modernism in American Design and Architecture.
A historical survey of artifacts, buildings, and urban environments, focusing on responses to machine-age civilization.

AMS X30C. Race, Law, and United States Society.
Examines the intersection of racial ideology and legal culture in the United States.

AMS X31C. Jewish Stereotypes in American Literature and Culture.
Examine stereotypes that have come to define Jewishness in American culture by focusing both on the antisemitic tropes perpetuated by non-Jewish representations of 'the Jew' in literary classics and on the archetypes employed as coping mechanisms in cultural representations created by Jews themselves. Analyze how stereotypes become enmeshed in cultural consciousness and investigate ways in which representations of ethnic, religious, and racial minorities are governed by these kinds of one-dimensional archetypes.

AMS X31D. Native American Women's History.
Investigate the histories of Native American women to reaffirm and reclaim their place and role in the histories of Native Americans, indigenous peoples, women, Chican@/xs, Greater Mexico, and the United States. Contemplate how many understandings that center colonization, settler colonialism, genocide, race, and environmentalism are essential to examining Native American women's history. Explore the stories, struggles, and ideas of community-building, sovereignty, and liberation as integral to their genders and sexualities as Native American, Indian, First Nations, indigenous, and red and brown women.

AMS X31E. Black Cops in African American Popular Culture.
Explore the history of black policing in America and representations of black police officers in popular literature and film of late Twentieth Century America.

AMS X33. Blackness in the Contemporary Art Museum.
Explore issues related to the acquisition, stewardship, and repatriation of the art of the African Diaspora in the face of an increasingly virtual and market-driven art world.

AMS X34. Drugs in African American Popular Culture.
Examine the legal, political, and philosophical intersection of blackness, whiteness, and drugs in the late twentieth century through film, music, and literature.

AMS X34C. Hegel and His Heirs: Philosophy That Remade the West.
Explore how Hegel's philosophy contributed to the founding of the modern social sciences and led to innovations in the study of religion, psychology, education, social organizations, and social reform.

AMS X35. Queering Black Religions.
Explore the ways Africana religion practitioners disrupt and reframe dominant western discourses of gender and sexuality. Examine concepts of temporality, spirit manifestation, subjectivity, corporeality, and Africana religious epistemologies.

AMS X36C. Coastal Communities in Early America.

AMS X36D. Women in Postwar America.

AMS X36E. The History of Islam in the United States.
A brief introduction to Islam. Defines the role of Islam and views of Muslims in the early history of the United States, and introduces students to major issues concerning contemporary American Muslims.

AMS X36F. Arts and Artifacts in the Americas.
Surveys the changing material culture of the western hemisphere from pre-Columbian times to the beginning of the industrial revolution.

AMS X36G. The Civil Rights Movement from a Comparative Perspective.
Focuses on African American and Mexican American struggles for civil rights. Asian American and Native American movements will also be addressed. Using a comparative approach the student will consider the distinctiveness of each of these struggles while also viewing them in relation to each other.

AMS X37J. Latinx Sexualities.
Examine Latinx sexualities from a historical perspective to comprehend the social, cultural, political, and economic factors, which have shaped these experiences.

AMS X39M. American Art, 1958-1985.
Survey of major movements from 1958 to 1985, from pop art to graffiti art and new expressionism.

AMS X41C. Americans in Paris.
Examine major social and political trends, events, and debates that have informed the works of artists living and working both at the margins of Parisian society as well as in its most celebrated salons. Interpret texts as artifacts that reflect the historical, social, and cultural circumstances of the environment that inspired their creation and reflect upon their role in the cultural symbiosis between America and France.

AMS X44F. Black Slavery in the Atlantic.
Examine the history of slavery in the Atlantic from 1450 to 1865.

AMS X45C. Eastern Europe on American TV.
Focus on ways Eastern Europe is depicted on American television screen. Use anthropological framework to study multiple types of television shows, including reality tv, network dramas, and miniseries. Analyze ethnic, racial, national, and gender representation and what these constructions tell us about the ways that Eastern Europe is imagined.

AMS X45F. Latinx Legend Tripping.
Explore narrative folklore from diverse traditions across the United States based Latinx diaspora. Focus on supernatural legends and the creation of the female "monster".

AMS X46O. Religion and Food.
Examine the material relationships between religion and food, by comparing the ritual functions of food in religious traditions and the collective constructions of religious identities in traditional foodways.

AMS X47R. Race and Migration: The Mediterranean.
Examine the history of migration within and from the Mediterranean area.

AMS X52R. Rhetoric of Ethnic Studies.
Study the histories of ethnic (and gender) studies in both higher education and K-12 institutions, and the rhetoric of attacks on, and defenses of, ethnic and gender studies through an examination of primary and secondary source materials.

AMS X55. Main Currents of American Culture to 1865.
Traces the development of American culture and society from the colonial era until the end of the Civil War. Major themes include racial conflict, religion, slavery, the development of democracy, and cultural reform.

AMS X56. Main Currents of American Culture since 1865.
Traces the development of American culture and society from the end of the Civil War to the present. Major themes include racial conflict, pluralism, religion, urban development and reform, modernism, government centralization, cultural radicalism, and the rebirth of conservatism.

AMS X58. The United States, 1920-1941.
A history of political, economic, diplomatic, military, social, and cultural developments in the United States between the two world wars.

AMS X60D. German-American Immigration and Ethnicity.
Explore German immigration to the United States from the colonial era to the present. Examine the motivations for migration; settlement patterns; construction of identity through traditions and festivals; German American's economic, social, and cultural contributions to the United States; and challenges to assimilation.

AMS X62N. Memory and Place After the Holocaust.
Examine the literature of Eastern European Jewish Holocaust survivors and their artistic successors. Engage novels, short stories, memoirs, essays, and even song lyrics with questions of memory and of place.

AMS X62P. Transatlantic Memory Cultures.
Explore and compare German and American memory cultures, analyzing the Holocaust, slavery, and colonialism. Analyze the diversity and complexity of (inter)national, local, and indigenous memory cultures while also discussing how Germany and the United States might "learn from each other.

AMS X65G. Black Women and Mass Incarceration.
Examine the history of Black women and mass incarceration in America. Explore how race, class, and gender have historically influenced the production of crime and unfair criminal justice policies. Investigate why mass incarceration matters, what its historical legacy is, and how it impacts Black women today.

AMS X66G. Slavery and Its Legacies.
Explore how slavery has evolved in the United States since the end of the Civil War.

AMS X70. Topics in Seminar in American Culture.
Interdisciplinary seminar on themes in American life.

AMS X70.13. The Culture of Cities.
Examines the social, geographical, and cultural evolution of the United States from a rural and small-town society to an urban and suburban nation. Subjects may include the segregation of public and private space; the formation of urban subcultures organized by gender, work, race, religion, and sexuality; social and spatial divisions between rich and poor and native-born and immigrant; and the increasing importance of cultural capital" in reshaping urban politics and in conflicts over revitalization and gentrification.

AMS X70.17. Postmodern America.
Postmodernity considered as a means of understanding major cultural transformations since 1945 in areas such as architecture, art, criticism, film, journalism, literature, music, philosophy, photography, and political thought.

AMS X70.18. The Beats and American Culture, 1945 to 1990.
Examines writers such as Kerouac, Ginsberg, and Burroughs during the immediate post-World War II era. Considers their historical origins, their representations of society and culture, and their influence from the 1960s through the 1980s on writers and artists in a variety of fields.

AMS X70.19. The Cold War and American Childhood.
Uses childhood as a focus for studying the cultural and political climate of the post-World War II era.

AMS X70.20. Children's Literature and American Culture.
Examines changes in American childhood using children's literature that covers several different time periods.

AMS X70.21. Society, Culture, and Politics in the 1960s.
Various social and cultural movements of the 1960s, including civil rights, the New Left, black power and other ethnic nationalisms, the peace movement, the black arts movement, guerrilla theater, psychedelic arts and the counterculture, women's liberation, gay liberation, the environmental movement, and the conservative movement.

AMS X70.23. Memory and Place.
Explores how cultural memory is produced in its various forms, from memorials, public art, and commodities to popular culture, rituals, and museums, and how public remembering is inevitably anchored in specific geographic places.

AMS X70.26. American Food.
Studies diverse American food cultures from a humanities perspective, exploring connections between global, national, and local communities. Uses scholarship in the field of food studies as well as cookbooks, novels, poetry, photographs, songs, documentaries, and oral histories to investigate the past and present of American food communities.

AMS X70.27. Nature and Gender in America.
Study of the connections between nature and gender in American national narratives. Explores how Americans of differing classes, races, genders, sexual orientations, and ages have shaped and experienced changing ideas of America, wilderness, domestication, and society over time and in different regions of the country.

AMS X70.28. Animals and American Culture.
Explores the role of animals in American history, culture, and society.

AMS X70.29. Women Radicals and Reformers.
Traces traditions of women's radical activism and reform beginning with the Enlightenment and the American Revolution and continuing to the present, with concentration on the twentieth century.

AMS X70.32. Slavery across Genres.
Uses nonfictional and fictional narrative accounts of slavery in the United States to examine the political, social, cultural, economic, and psychological aspects of the institution of slavery at different historical moments. Sources may include authors such as Frederick Douglass, Toni Morrison, William Faulkner, Harriet Beecher Stowe, and Edward P. Jones; graphic novels; conceptual art; court records; and bills of sale.

AMS X70.33. Atlantic Slavery: History and Memory.
Charts a history of Atlantic slavery by focusing on primary sources detailing crucial events and contexts such as the Zong Massacre, the Haitian Revolution, and Dred Scott vs. Sandford, among others. Considers how historians, memoirists, fiction writers, visual and performance artists and filmmakers have come to terms with that history and its implications.

AMS X70.34. American Disasters.
Examines natural and human-made disasters as key turning points in American history. Engages with the politics of disasters, analyzing environmental contexts, grassroots activism, legislative policies, and approaches toward commemoration.

AMS X70.36. Exiles, Expatriates, and Political Pilgrims.
Explores the ways in which foreign experiences formed and re-formed individuals' perspectives on the United States, the nature of their social critiques of the U.S., and Americans' experiences of other nations.

AMS X70.37. The Politics of Creativity.
Interdisciplinary investigation of artists in American society and of the intersection of art and politics.

AMS X70.39. Radical Latinos.
Examines the social positioning and history of Latinas/os in the United States. Analyzes the histories of Latinas/os who have gone against mainstream expectations, or who have challenged or critiqued the status quo in provocative and unexpected ways.

AMS X70.40. Southern Cultures.
Investigation of multiple, fluid, and diverse southern cultures through topics such as NASCAR, biscuits and cornbread, mega-churches, beauty pageants, jazz, country music, southern hip hop, migrant farm cultures, matzo ball soup with collards, the Trail of Tears, Gullah, Tara, Graceland, and more. Includes discussion of stereotypes and the individual truths about women, men, and southern in the context of this discussion.

AMS X70.41. Vienna: Memory and the City.
Examines the ways in which cultural memory has shaped, and continues to shape, urban life in Vienna, Austria.

AMS X70.42. Black Political Thought.
Exploration of black social and political thinkers, writers, and reformers, and how their works influence the legacies of slavery, empire, and patriarchy within the United States.

AMS X70.43. Literature of Black Politics.
Examines the novels, plays, and critical essays of Ralph Ellison, James Baldwin, and Toni Morrison as works of democratic political theorizing and political engagement.

AMS X70.45. Feminist Interventions in Borderlands History.
Provides an in-depth understanding of the social, economic, and spatial transformations of the United States/Mexico borderlands in the nineteenth and early twentieth centuries.

AMS X70.47. Language, Culture, and the Texas German Experience.
The evolution of the culture and language of German immigrants to Texas from the 1840s through the present and how they have influenced other ethnic groups in Texas.

AMS X70.50. Sexual Deviance in the Twentieth-Century United States.
Examines the ways that Americans have created and maintained hierarchies of power by casting certain people and sexual behaviors as unnatural and immoral since the turn of the twentieth century.

AMS X70.51. Queer Study in Low Culture.
Examines representations of sexual and gender non-conformity in popular culture since the mid-twentieth century in the United States.

AMS X70.52. Movements for Sexual and Reproductive Justice.
Charts the historical development of various struggles for sexual and reproductive justice in the United States since the nineteenth century.

AMS X70.53. Key Works in American Popular Music.
Examines individual songs as a means to understand larger trends in U.S. cultural history (including various Civil Rights movements, de-industrialization and economic dislocation, cultural polarization, anti-war movements and the backlash, etc.) with an emphasis on rock, pop, punk, rap, disco, and country music in the U.S. since 1945. Explores popular song through the lens of cultural studies, sociology, and history.

AMS X70.54. Rethinking the 1950s: Rebels and Rejects.
Examines how the context of the Cold War influenced American culture and politics, particularly with regard to race, gender, and sexuality. Focuses on the first two decades after the end of World War II.

AMS X70.55. Urban Slavery in the Americas.
Examines urban slavery in the Americas.

AMS X70.56. Puerto Rico In Crisis.

AMS X70.57. Politics of Black Life.

AMS X70.63. Wealth and Poverty in the United States.
Analyze the categories of "wealth" and "poverty." Investigate both how wealth has historically been created, and also how wealth and poverty have been depicted in American history.

AMS X70.64. Global Cities in the United States.
Engage with the history of the global city at various levels, using text from disciplines including history, geography, anthropology, and sociology, as well as primary sources, images, readings, and films. Define the global city in the past and present and explore questions of race, class, gender, the politics of space, the culture of empire, and the changing shape of U.S. capitalism.

AMS X70.65. Energy and United States Capitalism.
Explore the intersecting histories of capitalism and energy in the U.S. in the twentieth century. Examine scholarly secondary literature as well as primary documents, literature, film, and photographs.

AMS X70.66. Art and Data in the Digital Age.
Investigate what shapes data and bodies take in digital environments. Ask how computing cultures and networks have been shaped by data and bodies.

AMS X70.67. Tejana Cultural Studies.
Investigate the history of Tejanas to reaffirm and reclaim their place and role in the histories of Native Americans, women, Chican@/Chicanxs, Greater Mexico, and the United States. Explore how transborderism and transregionalism complicate this history. Contemplate how Tejanas' stories are fundamental to illuminating the struggles, resistance, and liberation of Chicanas, mestizas, and afromexicanas from precontact to decolonization.

AMS X70.68. United States Masculinities.

AMS X70.69. Preserving Austin's Queer History.
Explore Austin's queer history since World War II and write on the practice of oral history and LGBTQ oral history in particular. Build the foundation for an ongoing Austin LGBTQ Oral History Project to be housed at the Briscoe Center for American History.

AMS X70.70. Theorizing the Human.
Trace the continuities and transformations in constructions of populations as more or less human, from settler-colonial conquest to the post-Trump era. Examine what logics mark racialized populations as disposable during the colonization of the Americas, and which systematically condition racialized subjects to a state of enduring siege.

AMS X70.71. Latinidades: Art and Performance.
Contextualize and analyze diverse forms of Latina/o/x artistic expression, including visual art, music, dance, theatre, and film, or Latinidades".

AMS X70.72. Technologies of United States Empire.
Investigate the various technologies that the United States has used to maintain imperial geographies at "home" and abroad. Focus on imperial entanglements of global capital, liberalism, and technological systems.

AMS X70.74. Latina and Latino Spirituality.

AMS X70.76. Black Horror and Psychoanalysis.
Explore the intersection of race, horror aesthetics, and psychoanalytic theory.

AMS X70.77. Photographs and Blackness in the United States.
Examine issues raised at the intersection of Blackness and photography in contemporary art of the United States.

AMS X70.78. The Black Figure in American Art and Popular Culture.
Examine how popular culture and artistic practices facilitate or challenge social constructions of "Blackness" in the United States.

AMS X70.79. Urban Imaginaries.
Use science fiction literature, film, and other cultural artifacts as a platform to launch an examination into the central concept of urban imaginaries. Discuss the politics (and potential) of urban representation

as well as understand how urban imaginaries influence everyday urban life and the ongoing production of urban space and place.

AMS X70.80. Displacement and Resistance.
Explore technologies of displacement, as well as tactics, digital media work, mapping projects, and activism that communities engage with to resist dispossession. Examine, locally and globally, the displacement and resistance effects of various events including infrastructure projects and gentrification.

AMS X71C. Food in the Racialized City.
Explore a variety of issues related to producing, accessing, and consuming food in city spaces in the context of racial inequities. Investigate and question constructs such as "food" and "city" as means of exploring different points of view and approaches to studying not only food and cities but also various approaches to food justice.

AMS X71D. Black Geographies.
Explore the relationship between Blackness and the production of space and place. Examine the tensions and possibilities that emerge when Black people are rendered un-geographic as a fundamental component of racial capitalism while they are simultaneously creating spaces of freedom under constant threats to Black life.

AMS X72. Conference Course.
Supervised individual study of selected subjects in American studies.

AMS X73I. Race, Gender, Sex, and Religion.
Use an intersectional feminist framework to examine the construction and maintenance of normative categories of race, gender, sex, and sexuality within United States religious discourse.

AMS X74C. Contemporary Latinx Visual and Performance Art.
Explore contemporary visual and performance art by Latinx artists working since the 1970's to the present. Examine artists who began to engage with and in civil rights discourse to intervene through their art-making practices; and to align with contemporary trends in the art world that began to expand in the 1970's, such as performance art, installation art, video art, and, later, digital art.

AMS X79H. Honors Tutorial Course.
Individual readings and conferences in connection with an original research paper.

Graduate Courses

AMS X19S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AMS X29S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AMS X85. Cultural History of the United States to 1865.
An interdisciplinary cultural history survey of the United States.

AMS X86. Cultural History of the United States since 1865.
An interdisciplinary cultural history survey of the United States.

AMS X90. Topics in Research Seminar in American Studies.
Research on selected topics in American studies.

AMS X91. Topics in Reading or Research Seminar in American Studies.
Reading or research seminar on topics relevant to American studies.

AMS X92. Conference Course in American Studies.
Individual directed readings and conferences on selected problems or topics in American studies.

AMS X93. Introductory Readings in American Studies.
Seminar designed to acquaint the graduate student with the nature and extent of materials for interdisciplinary research on American culture.

AMS X94. Sources and Methods in American Studies.
Seminar designed to acquaint the graduate student with key sources and methodologies for interdisciplinary research on American culture.

AMS X96. Internship in American Studies.
Practical working involvement with participating nonprofit and research agencies.

AMS X98. Thesis.

AMS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

AMS X98T. Supervised Teaching in American Studies.
Seminar in the methods of interdisciplinary teaching and professional work in American studies.

AMS X99W. Dissertation.

Professional Courses

AMS X19S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AMS X29S. Topics in American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS - Asian Studies

Asian Studies: ANS

Lower-Division Courses

ANS X01M. Introductory Topics in Asian Studies.
Discussion of various problems involving language, history, and culture in Asia.

ANS X01M.11. Introduction to Buddhism.
A structural and historical overview of Buddhism through the examination of various schools, doctrines, biographical narratives, and contemporary ethical issues.

ANS X01M.13. Forbidden Romance in Modern Chinese Literature.
Introduction to modern Chinese literature from the late Qing Dynasty (latter half of the nineteenth century) to the present.

ANS X01M.14. East Asian Martial Arts Films.
Explores the concept of "East Asian" from the cinematic perspective, focusing on the martial arts film genre.

ANS X01M.15. Introduction to Islam.
The beliefs, theology, history, and main social and legal institutions of Islam, including the concept of God and society, the role of women, and Islamic government and movements.

ANS X01M.16. Introduction to Japanese Film.
Broad survey of Japanese cinema, including silent films, feature films, documentaries, and anime, that covers the basic history of Japanese cinema. Background in Japanese not required, all films are subtitled in English.

ANS X01M.17. Introduction to Politics in East Asia.
Introduction to politics and political systems of Japan, China, Taiwan, North Korea, and South Korea.

ANS X01M.3. History of East Asia to 1800.
A survey of the traditional history and culture of China, Japan, Korea, and Vietnam.

ANS X01M.4. History of East Asia since 1800.
A survey of the modern history of China, Japan, Korea, and Vietnam.

ANS X01M.6. Asia's Futures.
Current issues, visible trends, and projections for Asia's future.

ANS X01R. History of the Religions of Asia.
Eastern religions: an introduction to the basic forms and the historical development of the religious traditions of India, China, and Japan.

ANS X02C. Introduction to China.
Introduction to Chinese civilization, past and present, including religion, literature, arts, philosophy, and history.

ANS X02D. Introduction to Korean Culture and History.
Introduction to Korea's history, culture, and civilization from antiquity to the present.

ANS X02E. Female Voices in China.
Introduction (in translation) to the most important texts and other sources by, for, and about women in Chinese intellectual, political, social, and cultural history.

ANS X02J. Introduction to Japan.
Introduction to Japanese civilization, past and present, including religion, literature, arts, philosophy, and history.

ANS X02K. Introduction to South Asia.
Introduction to Indian and south Asian civilization, past and present, including religion, literature, arts, philosophy, and history.

ANS X03D. Introduction to the Asian Diaspora.
Examine the global dispersal of Asian populations from the mid-1800s to the present.

ANS X04C. Popular Culture in Modern Japan.
Introduction to the history of popular culture in modern Japan focusing on works of literature, film, and visual culture.

ANS X05C. Korean Literature and Film.
Explore the literature and film of Korea from earliest times to the present.

ANS X07C. Introduction to the History of India.
Survey of the history of the Indian subcontinent from prehistoric times to the present.

ANS X07D. Yoga Past and Present.
Survey yogic practices in South Asian civilization and trace the development of yogic thought and embodied practices in Hindu, Buddhist, and tantric traditions from early history to the modern-day's social and legal complexities and controversies.

ANS X07E. Bangladesh: History, Culture and Politics.
Explore the general aspects of history, culture, and politics in Bangladesh. Examine late colonial and post-colonial history to evaluate the dynamics of national identity formation.

ANS X07F. Gods and Goddesses of India.
Explore a variety of gods and goddesses who have dominated the sacred landscapes of India and beyond, especially North America, from the past until now. Examine various issues relating to patriarchy, power, gender, sexuality, social hierarchy, and devotion.

ANS X19S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS X29S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ANS X19S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS X20C. Genji to Godzilla: Adaptations of the Japanese Classics.
Examine how premodern, modern, and contemporary classics of Japanese literature, film, and theater get adapted over the centuries, and how culture, politics, gender, genre, and medium influence the adaptation process.

ANS X20D. Classical Indian Literature in Translation.
Explore narrative literature and poetry composed in the three classical languages of India (Old Tamil, Sanskrit, and Prakrit).

ANS X20E. Myth, Legend, and Folklore in China.
Introduction (in translation) to a selection of the most important myths, legends, and folktales in China's various storytelling traditions.

ANS X20F. Classical Chinese Philosophy.
Introduction (in translation) to thinkers, texts, and ideas from the golden age of Classical Chinese philosophy (circa sixth-second centuries BCE), including how to apply their teachings to current sociopolitical issues.

ANS X20G. Chinese Language Cinemas from People's Republic of China and Taiwan.
Survey contemporary Chinese language cinemas from Taiwan and the People's Republic of China.

ANS X20J. The Bhagavad Gita: Interpretation and Ethics.
Explore one of the most influential books in Indian and global contexts, the Bhagavad Gita, through interpretations, commentaries, and scholarly materials. Navigate ethical dilemmas in the Bhagavad Gita and real-life situations.

ANS X20K. Korean Cinema.
Explore Korean cinema, film history, and theory from the early twentieth century to the present.

ANS X20L. Indian Cinemas: Bollywood and Beyond.
Focus on Indian cinema, primarily Hindi popular cinema--many times known as Bollywood. Examine major works of Hindi cinema and explore independent film making and regional cinema.

ANS X21C. Representing Disaster in Japan.
Explore a range of human-made conflicts and natural disasters in Japan from earliest times to the present through literature, film, and new media to consider questions of history, representation, and mourning and memorialization.

ANS X21D. The Environment and East Asia.
Examine the relationship between humans and the environment through the literature, film, and media of East Asia.

ANS X21E. Arts of the Avant-Garde in Modern Japan.
Explore avant-garde works of modern Japanese literature, film, and visual culture. Focus on how these works advanced global trends in avant-garde theory and practice by rebelling against tradition and searching for radically new ways of imagining the purpose and practice of modern art.

ANS X21M. Politics in Japan.
Survey of postwar Japanese politics; the occupation, governmental institutions, interest groups, protest movements, industrial policy, the government-business relationship, and political and economic reform.

ANS X22M. Politics in China.
Survey of twentieth-century China: historical trends; 1911 revolution; Warlord-Nationalist period; Communist revolution; post-1949 issues; new social and political institutions.

ANS X23C. Biomedicine, Ethics, and Culture.
Examines ethical questions such as the allocation of medical resources, stem cell research and cloning, organ transplantation, abortion, human experimentation, prolonging life and the right to die, suicide, euthanasia, and diagnosis and treatment of illnesses, explored from a global perspective.

ANS X24C. Musics of India.
Explore the musical traditions of India, with emphasis on Hindustani and Carnatic musical styles, but including examination of other traditions.

ANS X25C. The Chinese in Diaspora.
Explores narratives of migration, race, ethnicity, and a wide range of experiences of acculturation and assimilation from the perspective of a sending society--China--which has one of the longest and most diverse histories of sending people overseas. Over the last millennia, Chinese have migrated around the world and made homes under a great range of adversity and opportunity, producing many stories of human differences and commonalities.

ANS X25D. Greater China and United States Economic Relations.
Explore contemporary interconnections between the United States and Greater China. Examine economic frameworks (for example, state-led, market-led, mixed, etc.); the economies of the PRC including Hong Kong as well as Taiwan and the Chinese diaspora; and linkages such as investments, supply chains, tech transfer, non-profit cooperation, and the globalized workforce.

ANS X25E. Global Economies: Asia and the United States.
Examines key trends in the economies of the United States and Asia, with emphasis on the links between these two major trading blocs.

ANS X26C. Cultures of Southeast Asia.
Comparative study of the peoples of Indonesia, Burma, Thailand, Malaysia, and other countries.

ANS X29S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS X30C. Anthropology of Travel and Tourism.
Use the tools of cultural anthropology to understand the touristic encounter and the increasing (and decreasing) accessibility of travel and mobility.

ANS X30D. Global Markets and Local Cultures.
Examine contemporary theories of globalization, including materials exploring global governance, international monetary policy, migration regulation, offshoring, and cultural hybridity. Focus on case studies in Asia and elsewhere that reveal how these practices impact particular communities.

ANS X30E. Tourism and Place in the Global South.
Debunk the myth that tourism is inherently desirable by unpacking the mechanisms of violence and inequalities of power embedded in tourism and tourism development.

ANS X30F. Development And Its Critics.
Discuss aspects of the contemporary international aid and development in Asia and beyond. Examine the decision-making within the development industry and the scope of aid as a economic and social force in the contemporary world.

ANS X30G. Food and Religion in Asia.
Use the lens of food to approach study of religious communities, values, and identity formation in Asia's past and present, covering South Asia, China, Japan, Taiwan, South Korea, and Southeast Asia. Explore questions involving what is eaten and what is not, taboo, hunger, anomaly, gender, food security, and recent ethical problems regarding bio-engineered foods (GMOs).

ANS X30J. Asian Mobilities.
Explore alternative research methods and spatialities, in an attempt to produce new understandings of how people live in an increasingly mobile world.

ANS X30K. Culture, Medicine, and Society in Asia.
Analyze health and illness as a lens for exploring Asian cultures and societies. Discuss themes, concepts, and approaches in anthropology to interrogate the interaction between culture, medicine, and society.

ANS X35. Animals in Asia.
Focus on how historical and modern-day philosophy, religious texts, and legal systems in South and East Asia provide the framework for probing the human-animal encounter and the tensions that arise due to human-animal interdependence.

ANS X36C. Central Asian Politics and Economies.
Relate major political and economic issues of post-Soviet Central Asia from Soviet legacy and regime types to state-business relations and investment environment. Learn about the characteristics that unite and distinguish the Central Asian region.

ANS X38L. East Asian International Relations.
Survey of Russian/Soviet, Japanese, Chinese, and American foreign policies of the twentieth century, emphasizing Pacific-region interests; historical policies; intermittent conflicts, such as China versus Japan, Korean War, Indochina Wars; China's emergence as a nuclear power.

ANS X40C. Japanese Religion and Western Imagination.
Examines Japanese religious traditions, with a focus on Zen, through the perspective of people living in non-Japanese societies since the end of World War II. Explores different ways in which non-Japanese have imagined Japanese religious and ethical ideas and both explained Japanese behavior and adopted ideas about Japan into their writings about philosophy and life.

ANS X40D. History of Hindu Religious Traditions.
History of major doctrines, practices, and institutions that shaped the development of Hinduism; how religions adapt to social and cultural change and often provide the catalyst for change.

ANS X40E. History of Indian Buddhism.
The institutional, social, economic, and doctrinal history of Buddhism in India.

ANS X40F. Goddesses in World Religions and Cultures.
Historical and cross-cultural overview of the relationship between feminine and religious cultural expressions through comparative examinations and analyses of various goddess figures in world religions.

ANS X40G. Ritual and Religion in Korea.
Examine major religious traditions of Korea; focus on the recent history and contemporary practice, and the relation between religion and politics during Korea's colonial (1910-1945) and postcolonial eras.

ANS X40I. Saints and Shrines in Islam.

ANS X40J. Jainism: Religion of Non-Violence.
Survey of the history, doctrines, institutions, and practices of Jainism from its origins to the present.

ANS X40L. Post-Mao China: Change and Transformation.
Examines in a historical context the Chinese economy, society, politics, and culture during the reform era that began in the late 1970s. Explores the transformation of rural and urban economies and related social consequences; government systems, political ideologies, and popular values; and China's integration into the global system and its impact on China's role in world politics.

ANS X40M. Modern China.
History of China from the intrusion of the West circa 1500 to the Communist revolution.

ANS X40P. European Expansion in Asia.
European exploration, the commerce of the East India Companies, and the beginnings of empire in South and Southeast Asia from the fifteenth to the early nineteenth century.

ANS X40Q. Sufism: Islamic Thought and Spirituality.
Explore Sufism and other Islamic mystical traditions that color cultural milieus spanning four continents and fourteen centuries. Focus on the historical developments in the Islamic theosophical tradition, as well as the relationship between Sufism and poetics, colonialism, and post-colonial resistance movements.

ANS X40R. European Empires in Asia.
The British in India and Malaya, the Dutch in Indonesia, and the French in Indochina since 1800.

ANS X40S. The Chinese in the United States.
History of the Chinese in the United States from their first arrival in significant numbers during the California Gold Rush of the mid-nineteenth century to the present.

ANS X40T. Taiwan: Colonization, Migration, and Identity.
Explores issues of ethnicity, empire, and modernization in East Asia from the sixteenth century to the present, as seen through encounters between Taiwan and aborigines, Han Chinese, Dutch, Portuguese, the imperial Qing, Japanese, mainland Chinese Nationalist Party (KMT), and the United States.

ANS X40U. Devotional Literature of India.
Discuss the songs of major saints. Examine how holy men and women expressed their religiosity through the medium of songs and poetry over the centuries and consider the role these songs had in shaping the religious communities of India. All works will be studied in translation.

ANS X40V. Religions in Contact.
Critically examine the theories (religious othering, conversion, reinterpretation, appropriation, etc.) of how one religion responds to contact with another. Explore the ways in which religious actors grapple with religious plurality, draw or ignore boundaries, and form religious identities.

ANS X40W. Shia Islam.
Examine how the first century of Islamic history inaugurated debates concerning authority, piety, and justice and how these debates have continued to the present. Explore the social forces and ideologies that shaped Shiism.

ANS X41C. Piracy in East Asia.
Examine how pirates helped bind East Asia together into an integrated zone of economic and cultural exchange. Explore how they formed the leading edge of early modern globalization and linking diverse economies and societies together.

ANS X41K. Origins of Modern Japan.
Japan to the beginnings of the Industrial Revolution, with a focus on the culminating age of samurai rule, the Tokugawa period (1600-1867).

ANS X41M. Imperial Japan.
Japan from the Meiji transformation through war, defeat, and occupation.

ANS X41N. Postwar Japan.
Japan since the war and occupation.

ANS X41P. Shamanism and the Primitive.

ANS X41R. Religion and Family in Japanese Society.
Explores the structures of family, kinship, and religion in Japan since 1868 and their roles in the creation and expression of national and individual identities.

ANS X42D. Political Economy of Japan.
Historical development of the Japanese economy since early modern times.

ANS X42F. Buddhist Thought and Practice.
Explore important themes in Buddhist thought, various ways in which Buddhists practice their religion, and the relationships between religious concepts and practices.

ANS X43C. Gender and Translation in the Arab World.
Examine complex politics and poetics behind the translation and marketing of Arab women's writing in the West.

ANS X43D. Muslim Travelers and Traders.
Introduction to modern Middle Eastern and Islamic history in the broader context of globalization, with a primary focus on the nineteenth century to the present.

ANS X43E. Cultures of Revolution in the Middle East.
Examine the cultural production that surrounds key moments of political and social change in the Middle East.

ANS X43F. Food History of Asia and the Middle East.
Explore the history of food and beverages in the Middle East and Asia, including Palestine/Israel, Egypt, Iran, India, China, and Japan. Investigate themes of identity, capitalism, and globalization to reflect on the role of food consumers in an interconnected world.

ANS X46C. Ancient India.
History and culture of South Asia from its protohistoric beginnings in the Indus Valley through the period of the early empires of the Mauryas and Guptas.

ANS X46D. Medieval India.
History and culture of South Asia from approximately 500 to 1500, with emphasis on religious and political institutions and the emergence of regional cultures.

ANS X46E. Partition of India in History and Memory.
Discover the experiences and memories of many different groups affected by the Partition of British India in 1947 while tracing the effects of the Partition until the present.

ANS X46F. Gandhi and Gandhism.
Explore Gandhi's life, work, philosophy, and influence, as well as his historical and cultural context.

ANS X46G. Gender and Modern India.
Examine gender and the shifting nature of modernity between precolonial and colonial periods in the Indian subcontinent.

ANS X46J. Mughal India in History and Memory.
Focuses on South Asia during the era of the Mughal empire (1550-1750), continuing through the symbolic relevance of the Mughal dynasty in British India and in India today.

ANS X46K. Slavery and South Asian History.
Examine the presence of slavery in the subcontinent in the third century BCE to the twentieth century.

ANS X46M. Early Modern India.
The history and culture of South Asia from approximately 1500 to 1750.

ANS X46N. The Indian Subcontinent, 1750-1950.
Examines the cultural and political movements and events that led to formation of the two nation-states India and Pakistan.

ANS X46P. Indian Philosophies.
Investigate the theories and arguments of major Indian philosophers, considering both their historical positioning and contemporary relevance.

ANS X47C. Business and Society in South Asia.
Examine the long history of commerce and enterprise in the Indian sub-continent up to the present.

ANS X47K. Governments and Politics of South Asia.
A survey of political developments, governmental organization, and economic and social problems in South Asia.

ANS X48D. Anthropology of the Himalayas.
Examine the history and culture of the Himalayan region, including Northeast India, sections of Pakistan and Afghanistan, Tibet, and especially Nepal.

ANS X48E. A Linguistic History of India.
Explore the richly documented linguistic and literary history of languages in the Indian subcontinent, paying attention to linguistic phenomena, contact effects, and language-based movements.

ANS X48F. Formation of Indian Art.
Examine the artistic traditions of South Asia up to the fifth century C.E., with an emphasis on social and religious factors shaping its development.

ANS X48G. Cinematic Cities: Mumbai.
Explore political, social, and artistic transformations of the global city of Mumbai from the early 20th into the 21st century using cinema as the primary text complemented by theoretical, creative, and historical readings.

ANS X48I. Offbeat Asian Cinema.
Explore South Asian cinema, focusing on innovative and boundary-pushing films. Draw from a diverse range of countries including India, Afghanistan, Sri Lanka and Pakistan, and languages like Hindi, Urdu, Marathi, Tamil, Malayalam, and Dari.

ANS X50C. Why Chinese Has No Alphabet.
Introduction to the history and evolution of the Chinese writing system and language. No background in Chinese language, culture, or linguistics is required.

ANS X50E. The History of Chinese Language and Translation.
Explore the Chinese language and culture, focusing on the cultural, social, historical, and political background against which the Chinese language has evolved and continues to evolve.

ANS X51C. Banned in Japan: Censored Art.
Focus on banned works of literature, painting, photography, film, and manga that encountered censorship in Japan from the early eighteenth century to today. Explore the censored texts in-depth alongside the sociopolitical contexts of their banning in order to understand how censorship worked historically and to help us consider how it works in our own time and place.

ANS X55C. Japanese Foreign Policy.
Examine the foreign and domestic determinants of Japanese foreign policy.

ANS X55D. International Relations of East and Southeast Asia.
Examine the international relations of East and Southeast Asia, with particular attention to postwar economic and security issues, the changing political landscape of the post-Cold War period, and the development and functions of regional institutions.

ANS X55E. Political Economy of Asia.
Explore the political economies of East Asia with an emphasis on Japan, China, South Korea, and Taiwan.

ANS X55F. Asian Regionalism and Multilateral Cooperation.
Explore the nature, functional principles, leadership, and policy-making process of contemporary Asian regionalism in comparison to the experiences of European integration.

ANS X55G. Monarchies and Mini-States.
Examine the remarkable variety among the political systems of the 28 remaining monarchies and the survival and thriving of mini-states around the world.

ANS X55I. War and Peace: China, Japan, and Taiwan.
Use the modern theory of war and cutting edge political science research to understand the evolution of war and peace over the past two centuries in East Asia.

ANS X56C. Modernization in East Asia.
Examines the different historical experiences of mainland China and Taiwan in the context of the East Asian model of development.

ANS X58F. The Two Koreas and the United States.
The political, social, and cultural relationship between North and South Korea, and between the Koreas and the United States, since 1945.

ANS X58G. Capitalism, Consumption, and Civil Society in Korea.
Explore contemporary social and political life in urban South Korea, including corporations, factory work, consumption, activism, popular culture, and changing gender systems and roles.

ANS X61. Topics in Asian Studies.
Selected topics in south and east Asian anthropology, economics, history, geography, government, and sociology.

ANS X61.39. Anthropology of Globalization.

ANS X61C. Political Economy of Development in Postwar Korea.
Explore the political economy of South Korean development during the postwar period. Examine the history, society, and culture of South Korea. Discuss compressed modernity, developmental state, social movements, gender politics, financial crisis, urbanization, migration, and recent globalization of Korean popular culture.

ANS X61D. History of Food and Healing in China and Taiwan.
Explore the cultural, historical, philosophical, social, and scientific background against which the connection between food and healing has evolved through Chinese history.

ANS X61E. Urban Experiences In East Asia.
Explores the process of urbanization in East and Southeast Asia focusing on the politics of capital accumulation and distribution.

ANS X61F. Ethnic Politics in Taiwan and Asia.
Explore ethnic politics in Taiwan including some comparison with ethnic politics in neighboring countries.

ANS X61G. State Building in China and Taiwan.
Compare and contrast the state building process in mainland China and Taiwan.

ANS X61J. Development and Social Movement in East and Southeast Asia.
Examine the notions of development and the ways in which development is associated with state building, moral economy, political performance, and accumulation regimes. Explore the development of civil society and social movement in East Asia, and explanations of the mechanisms and drivers of displacement. Conceptualize the "Right to the City", and alternative right-based approaches to land, housing, infrastructure, commons and public resources.

ANS X61K. The Indian Republic Since 1947.
An overview of Contemporary India, a republic that emerged from the British Empire.

ANS X61L. Global Commodities: Asia and the World.
Explore the vital role of commodities in Asian history with a particular focus on East and Southeast Asia.

ANS X61M. Big Asian Histories.
Examines ways in which Asia and other areas of the globe have had connected intellectual, artistic, and social developments with focus on world histories centrally involving Asia from the medieval period to the present.

ANS X61N. Self and Culture in North Korea.
Aims to understand North Korea's historical development and its current workings as a social, cultural, and political/ideological system.

ANS X61P. Africa and Indian Ocean World.
Explore the connected histories of the geographical regions and economic communities that share the littoral space of the Indian Ocean.

ANS X61Q. The Age of the Samurai.
Explore the history of Japan via an examination of the complex and ever-changing figure of the samurai.

ANS X61R. Transnational Asia: From the Middle East to the Far East.
Examine how various groups of people understood, experienced, and imagined concepts such as "the East" and "Asia" with a primary focus on the nineteenth and twentieth centuries.

ANS X62. Research in Asian Studies.
Individual instruction for Asian studies majors and nonmajors. Discussion, research, and the writing of papers about various general and specialized Asian subjects.

ANS X72D. A Tale of Five Chinese Cities.
Explore themes of modernization, migration, international relations, gender, and labor through literary and cinematic texts about Beijing,

Hong Kong, Nanjing, Shanghai, and Taipei. Consider certain historical moments and the notion of Chineseness in an increasingly and culturally deterritorialized world.

ANS X72E. Globalizing East Asian Popular Culture.
Takes the globalization of popular culture as an analytical lens through which to reflect modernity, (trans)nationalism, gender politics, and identity formations in East Asia.

ANS X72F. Veiling in the Muslim World.

ANS X72G. Precolonial India, 1200-1750.
Surveys the history of South Asia during the era prior to British colonial rule.

ANS X72K. Gender, Sexuality, and the Family in Indian Religions and Cultures.
A comprehensive historical overview of gender issues as they are represented in the textual traditions of South Asia.

ANS X72L. Confucianism.
Explore the philosophical and historical context of Confucianism, from its origins in ancient China through the early empire and beyond.

ANS X72M. Taiwan: From Coloniality to Postcoloniality.
Examine how Taiwan has transformed itself since the end of Japanese colonialism in 1945 through literature, films, and other cultural products, such as popular music and arts, in postcolonial Taiwan.

ANS X72N. Japanese Concepts of Body and Self.
Exploration of anthropological literature describing Japanese conceptions of self and body, and analysis of the intersection of these conceptions of self with Japanese ideas about religion, morality, aging, and medicine.

ANS X72P. South Asian Migration to the United States.
Examine the South Asian diaspora in the United States.

ANS X72R. Japanese Popular Culture: Anime, Manga, and the Otaku.
Examine a wide variety of Japanese popular media within the historical context during which these unique cultural forms developed. Focus on the popular manga and anime Japan has exported since becoming an economic superpower in the 1980s, the utopian/dystopian expression in Japanese sci-fi narratives of this era, and the complex interplay of gender and technology in the new post-human societies these narratives envision.

ANS X73C. Decoding Classical Chinese Poetry.
Introduction to the classical Chinese poetic tradition from the seventh century B.C.E. through the ninth century C.E., focusing on the literary, cultural, historical, social, political, philosophical, and religious background against which representative works arose. Conducted in English and all readings will be in English translation. Knowledge of the Chinese language is not required.

ANS X73D. Popular Literature and Culture in Modern China.
Examine modern Chinese literature and culture in the People's Republic of China, Taiwan, and Hong Kong from the popular culture perspective.

ANS X73E. Modern Japanese Literature in Translation.
Conducted in English. Analyze literature written by Japanese authors in the twentieth and twenty-first centuries with attention to a work's content, style, and form, as well as the socio-historical context of its production and reception.

ANS X73F. Suicide in Japanese Fiction.
Conducted in English. Examine Japanese literary and visual culture, including poetry, novels, plays, film, and manga, to analyze how artists grapple with themes of suicide in their works and lives in response to personal and national tragedies.

ANS X73G. Epics and Heroes of India.
Focus on India's classical epics, the Mahabharata and the Ramayana, with emphasis placed on understanding the epic characters in relation to the heroic traditions of premodern India, as well as on the role of the epics in contemporary Indian political and religious culture.

ANS X73J. Chinese Film and Literature.
Analyze selected literary and cinematic texts from China in the last century. Explore how the Chinese people encounter modernity and cope with its consequences.

ANS X74C. Buddhist Art.
Explores the development of Buddhist art in South Asia, the land of its origin as well as its spread elsewhere. Focus on the question of "what is" Buddhist art.

ANS X74D. Gender and Art in the Muslim World.

ANS X74E. Chinese Literati Art.

ANS X75D. Chinese Ethics and Political Philosophy.
Examine Chinese ethical and political philosophy, with an emphasis on the Confucian tradition, through close reading of major works. Analyze ideas from the course both philosophically and historically.

ANS X78H. Honors Tutorial Course.

ANS X79. Topics in Capstone Seminars in Asian Studies.

ANS X79.1. Writing and Authority in Early China.

ANS X79.10. Comparing Religions.
A discussion of major comparative approaches in the study of religion.

ANS X79.11. The Cultural Outsider: Memoirs of East Asia.
Focus is on the cultural outsider's perceptions of East Asia in greater travel" dating from as early as Marco Polo up to works published in contemporary America. Selected memoirs and travelogues are presented from the perspective of the cultural outsider, written by missionaries, colonizers, journalists, POW's, scholars, students, and tourists.

ANS X79.12. Gender and Labor in Global Asia.

ANS X79.13. Cultural Memory and the Classic Chinese Novel.
Examine the metaphors and mythology from Chinese cultural memory that are present in classic novels, within literary and socio-historical contexts. Explore a cross-section of influential works from classical literature and the major founding schools of Chinese thought.

ANS X79.14. Translating Asia.
Explore various ways to define translation in the Asian context through translation theory and translated texts and how translation impacts and represents different Asian identities.

ANS X79.16. Culture and Crisis in Contemporary Japan.
Explore the cultural history of Japan from the 1980s to the present, with particular attention paid to economic and ecological issues represented in literature, film, and visual culture.

ANS X79.17. History and Memory in Japan and Korea.
Explore the fraught and entangled histories of modern Japan and Korea as depicted in literature and film to consider experiences of imperialism, rapid modernization, war, decolonization, and trauma.

ANS X79.18. Death and the Afterlife in Ancient China.
Investigate ancient Chinese beliefs and practices surrounding death and the afterlife from the Neolithic era to the arrival of Buddhism. Explore tombs, burial objects, and funeral rites; philosophical essays and historical accounts; medical practices; religious relics, tokens, and talismans; ghost stories; poetry; and paintings.

ANS X79.3. The Art of the Body in India.

ANS X79.4. Indian Poetry and Religions.
Explores the intersections of religion and poetry in the history of Indian literature as expressed in multiple settings and variations including hymns, chants, bhajans, poetic narratives, and new poetic conventions that deal with caste and gender identities.

ANS X79.5. Science, Technology, and Society in Contemporary Asia.
Introduction to how social forces and interests impact scientific practice, and vice versa, including scientific incommensurability, cultural difference, colonialism, postcoloniality, and methodological issues.

ANS X79.6. Transnational Korea.
Recent and contemporary manifestations of the Koreas in the world and the world in the Koreas. Subjects include labor and marriage migration, educational sojourning, transnational adoption, tourism, international sport, corporate expatriation, and media flows.

ANS X79.8. Radical Religion: Ascetics and Holy Persons.
Explores asceticism and the concepts, practices, and goals associated with this radical way of life through case studies from various religions. Subjects include theories of the body and of culture, as well as issues of social status, gender, devotion, and violence.

ANS X79.9. Art of Autobiography in Japan.
Examines autobiographies written by prominent artists and intellectuals in Japan from the tenth century to the present. Subjects include the authors' lives and legacies, and how these works are informed by both the historical and cultural contexts in which they were written and by the genre itself. All reading, writing, and discussion will be in English.

Graduate Courses

ANS X19S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS X29S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS X80C. Conference Course in Asian Studies.
Supervised individual study of selected problems in Asian studies.

ANS X81. Topics in Chinese Culture and Society.
Study of various aspects and periods of Chinese culture and society.

ANS X81.1. Advanced Readings in Chinese Politics.

ANS X82K. Topics in Korean Culture and Society.
Studies of various aspects and periods of Korean culture and society.

ANS X83. Topics in Japanese Culture and Society.
Study of various aspects and periods of Japanese culture and society.

ANS X83.4. Japanese Politics.

ANS X83.5. Japanese Religion.

ANS X84. Topics in South Asian Culture and Society.
Study of various aspects and periods of South Asian culture and society.

ANS X84.2. Communalism in Colonial India.

ANS X84.3. Ethnicity, Religion, and Politics in South Asia.

ANS X84.5. Social and Religious Reform in Modern India.

ANS X84.6. South Asian Diaspora.

ANS X84.7. Middle Indic Languages and Literature.
Survey of the Middle Indic languages of South Asia, the communities that used these languages, and the literature composed in them.

ANS X84.8. The Body in Indian Medicine and Myth.
Examines issues of embodiment in South Asia in various life stages, including conception, infancy, childhood, adulthood, and death drawn from various historical periods, medical traditions, religious narratives, and sociological and anthropological studies.

ANS X84C. Core Studies in South Asia.
An introduction to research methods used in South Asian studies.

ANS X84E. Asceticism.
Examines ascetic contexts of various religious traditions, definitions of asceticism, the relationship between ascetic beliefs and ascetic practices, and the benefits and risks of using a comparative approach to study asceticism.

ANS X84F. Folklore and Oral Performance in South Asia.

ANS X84G. Gender and the Body in South Asian Text and Practice.
An introduction to how gender is used as a category of analysis across the humanities and social science disciplines; and how the body is used as an object for analysis.

ANS X84P. Theatre, Gender, and Performance in South Asia.

ANS X85. Topics in Chinese Language and Literature.
Study of various aspects and periods of Chinese language and literature.

ANS X85.1. Chinese Film and Literature.

ANS X85.3. Modern Chinese Literature.

ANS X85D. Development of the Literary Field in Modern China.
Applies French theorist Pierre Bourdieu's work on cultural production to the study of the development of modern and contemporary literature in China and Taiwan.

ANS X85H. High and Popular Culture in Modern Chinese Societies.
Explores the production and consumption of elitist (high) and popular cultures in modern Chinese societies.

ANS X85M. Modern and Postmodern Chinese Literary Culture.
Examines the complex phenomena of modernism and postmodernism in literature and the arts in China, Taiwan, and Hong Kong.

ANS X85S. Critical Scholarship on Modern Chinese Literature.
Survey of English-language critical scholarship on modern Chinese literature.

ANS X86. Topics in Japanese Language and Literature.
Study of various aspects and periods of Japanese language and literature.

ANS X86.2. Modern Japanese Literature.

ANS X87K. Topics in Korean Language and Literature.
Studies in various aspects and periods of Korean language and literature.

ANS X88. Topics in South Asian Language and Literature.
Study of various aspects and periods of South Asian language and literature.

ANS X88C. Critical Approaches to the Study of South Asian Texts.
Introduction to analyzing South Asian literature through the exploration of Indian "classics" on connoisseurship, reader response, style, and suggestion, as well as modern and contemporary works on literary theory from the West.

ANS X88M. Translating India.
Introduction to literary translation from a wide range of Euro-American and South Asian stances and viewpoints, focusing on the political nature of the act and the art of translation in colonial and post-colonial contexts.

ANS X89C. Topics in Asian History.
Studies in various historical periods of different Asian countries or regions. Topics may be comparative or single-area.

ANS X89C.1. Japan Since 1945.

ANS X89C.2. War and Defeat in Japanese History and Memory.
Interdisciplinary exploration of the Japanese experience and memory of the Pacific War, including topics such as Hiroshima, comfort women, the US occupation, and contemporary controversies surrounding textbooks and the Yasukuni Shrine.

ANS X90. Topics in Asian Studies.
Study of various Asian studies-related topics that do not focus on any single geographic region.

ANS X90.10. Anthropology of East Asia.
Explore contemporary anthropological research on East Asia, with a focus on a set of broad subjects (money, mobilities, cosmologies, media,

etc.), and a consideration of what constitutes "the anthropological approach" to these subjects.

ANS X90.2. Authoritarian Political Systems.
Comparative study of authoritarian and totalitarian patterns of government, past and present, Western and non-Western; special emphasis on Communist and Fascist systems.

ANS X90.6. Intellectual History of Indo-Iranian Islam.

ANS X90.7. Feminist Theory.

ANS X90.8. Asian Modernities.
Theory and criticism in the study of Asia, with particular attention to the origins and rise of modern comparative literary and cultural studies.

ANS X90.9. Space and Place-Making In East Asia.
Examines developmentalism, postcolonialism, neoliberalism, and compressed modernity in East and Southeast Asia.

ANS X90C. Core Readings in Modern East Asia.
Various aspects of East Asian history, culture, and society. Designed for new graduate students in the Department of Asian Studies.

ANS X90D. The Arabic Humanities.
Explore the traditions formed in pre-modern Islamic humanities.

ANS X90E. Middle Eastern Modernities.
Explore how Arabic literature and thought changed over the course of the nineteenth and twentieth centuries through extended studies of poetry and prose written in Arabic. Examine the relationship of modernity to modernist literature in order to define what modernism means in an Arab/ic context.

ANS X90M. Aesthetic Modernism in East Asia.
Examines modernist trends in literature and the arts since the early twentieth century in places such as China, Japan, Taiwan, South Korea, Hong Kong, and Vietnam.

ANS X91. Topics in Asia and the World.
Study of various subjects with Asian studies-related content.

ANS X91.1. Comparative Ethnic Conflict.

ANS X91.3. European Imperialism: British Empire.
Study of the British empire in the Middle East, Asia and Africa.

ANS X91.4. Gender, Ethnicity, and Nationalism.

ANS X91.6. International Business Fellows Seminar.
Multidisciplinary seminar for students in area studies, business administration, law, and public policy. The faculty includes both academics and business leaders.

ANS X91.7. Women in Islamic Societies.

ANS X91.8. Sovereignty in Islam: Theory Practice.
A historical and comparative survey of the concepts and rituals of sovereignty in Muslim societies across the Middle East, Central Asia, and South Asia, with an emphasis on the pre-modern era.

ANS X91C. The Ideas of the East.
Examine the significance of the transnational movement of people, ideas, and goods in the process of constructing geocultural categories such as the West, the East, and Asia; and their subcategories such as the Middle East, Southeast Asia, and East Asia.

ANS X91H. Ethnographies of Global Asia.
Methods and ethnographic study of transnational Asia and the Asian diaspora.

ANS X92. Topics in the Social Science of Asia.
Examination of topics relating to the anthropology, sociology, politics, or economics of one or more Asian countries.

ANS X94. Topics in Tools and Methods in Asian Research.
Study of the major research tools and methods used in current Asian scholarship.

ANS X95. Proseminar: Core Readings and Methods in Asian Studies.
Various theories and methods used in the field of Asian studies, including disciplinary history, controversies, and the diversity of approaches within the field. Designed for new graduate students in the Department of Asian Studies.

ANS X97C. Comprehensive Examination Preparation.

ANS X98. Thesis.

ANS X98L. Pedagogy for Language Instruction.
Individual instruction in language pedagogy.

ANS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

ANS X98T. Supervised Teaching in Asian Studies.
Teaching under the close supervision of a faculty member. Includes weekly group meetings with the instructor, individual consultation, and reports throughout the teaching period.

ANS X99W. Dissertation.

Professional Courses

ANS X19S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANS X29S. Topics in Asian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT - Anthropology

Anthropology: ANT

Lower-Division Courses

ANT X01. Biological Anthropology.
Introduction to the principles and the methods of biological (physical) anthropology. Overview of the study of human beings in an evolutionary context, our relationship to other primates, and to the rest of the natural world. Examines anatomical, behavioral, and genetic similarities and differences among living primates and basic mechanisms of the evolutionary process.

ANT X02. Cultural Anthropology.
The concept of culture; social and political organization; language; the supernatural; elementary cultural theory.

ANT X02H. Cultural Anthropology: Honors.
Explore the concept of culture, social and political organization, language, the supernatural, and elementary cultural theory.

ANT X04. Introduction to Archaeological Studies: Prehistoric Archaeology.
Anthropological study of prehistory, from human beginnings to the appearance of written records.

ANT X04T. Introduction to Texas Archaeology.
Introduces students to Texas archaeology through lectures, interactive virtual labs, and hands-on laboratory sections that emphasize experimentation.

ANT X05. Expressive Culture.
How cultural assumptions affect how we tell and respond to different kinds of stories, including fairy tales, movies, and televised news.

ANT X07. Culture and Communication.
An introduction to the study of culture through communication and the theory of signs.

ANT X10C. Primate Cognition.
Introduction to non-human primate knowledge of the physical world, as well as primate social knowledge. Examines non- human primate cognition within an evolutionary and comparative framework, with

emphasis placed on comparing and contrasting non-human primate cognition with that of humans and other taxonomic groups.

ANT X10D. Introduction to Black Studies.

Introduction to canonical black studies literature, themes, and theories.

ANT X10F. African Diaspora Archaeology.

ANT X10G. Ethics of Space Exploration.

Examine cultural and ethical questions related to the exploration of space and the emerging field of astrobiology.

ANT X10I. Early Mesoamerican Religions.

Introduction to the study of indigenous religions in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, from approximately 250 BC - AD 1700. Examine the role of religion and ritual in daily life, as well as the lines of evidence available today for understanding them.

ANT X10J. The New Latinas/os/xs.

Explore the trajectories of various communities many have called the new Latinas/os/xs by identifying how race, gender, sexuality, class, indigeneity, language, migration, and geography influence the lives, identities, and sociopolitical incorporation of new Latinas/os/xs.

ANT X10L. Introductory Topics in Anthropology.

ANT X10L.2. Anthropology of Race and Ethnicity: An Introduction.

Examines the social importance of race and ethnicity both in America and around the world.

ANT X10L.3. Anthropology of Latin America.

Provides a framework for understanding contemporary concerns in Latin America.

ANT X10L.5. Introduction to South Asia.

Introduction to Indian and south Asian civilization, past and present, including religion, literature, arts, philosophy, and history.

ANT X10L.6. Black Queer Art Worlds.

Exploration of over two decades of work produced by and about black queer subjects throughout the circum-Atlantic world. Provides an introduction to various artists and intellectuals of the black queer diaspora, as well as an examination of the viability of black queer aesthetic practice as a form of theorizing.

ANT X10L.7. Diaspora: Race, Nation, and Resistance.

Subjects include makings and meanings of diaspora, the differences and similarities between diaspora and related concepts such as race, nation, and cultural identity. Focuses on the making of the black Atlantic world, and comparative analysis between black diasporic life and that of other global dispersals, particularly among Asian and indigenous populations, and how resistance serves as a key link.

ANT X10M. Mexican American and Latina/o Folkore Across the United States.

ANT X10R. Race, Sex, and Tourism.

ANT X11D. Introduction to Jewish Studies.

ANT X11E. Introduction to Jewish Latin America.

Historical and cultural analysis of how Jews constructed lives and communities in predominantly Hispanic, Catholic countries of Latin America.

ANT X14C. Introduction to Mesoamerican Archaeology.

Introduction to ancient Mesoamerica from the time of emerging social inequality in the formative period until the Spanish conquest of Mexico-Tenochtitlan in the sixteenth century.

ANT X18L. Mexican American Culture.

Mexican American cultural distinctiveness in the areas of social organization, child rearing, food culture, folklore, language, and religion.

ANT X19S. Topics in Anthropology.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X29S. Topics in Anthropology.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X76P. Research Internship.

Supervised fieldwork in a business or community setting related to the student's career and research interests. Students conduct research and apply anthropological skills to real-world problems.

Upper-Division Courses

ANT X19S. Topics in Anthropology.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X20C. American Indian Languages and Cultures.

Explore the myriad of indigenous languages of North America and how they are intertwined with culture.

ANT X20D. Speech Play and Verbal Art.

Examine speech play and verbal art (from puns to lies to songs to stories to poetry) from ethnographic and linguistic perspectives in a host of contexts and languages.

ANT X20E. Invented Languages.

Examine invented languages from pidgin and creole languages to Esperanto or Basic English, and contemporary "conlangs" associated with various science fiction and fantasy series.

ANT X20F. Politics, Polity, and the Power of Words.

Examine the place of language in a variety of different political settings--from oblique oratory in small-scale egalitarian communities to ritual "poetry" in cosmic polities to procedural prose in mass bureaucratic states--to illustrate the power of words. Identify the varied ways language sustains and transforms power relations in different political contexts, and thereby takes on a power of its own. Explore a variety of political situations, different modes of political communication, as well as different theories of the "performative" power of words.

ANT X20G. Endangered Languages.

Examine language rights as a tool for defending small-scale and minority language communities against the spread of national and global languages.

ANT X20I. Talk, Text, and God.

Introduction to the anthropological study of Christianity, particularly in colonial and post-colonial settings.

ANT X20O. New Media and Communication.

Explore anthropological and media studies analyses of technological changes in communications from the nineteenth through the twenty-first centuries.

ANT X20P. Classical Archaeology: Practice and Ethics.

Explore an overview of the history, methods, approaches, and ethics of classical archaeology focusing on case studies of major sites and their excavations.

ANT X21C. Communicating with Non-Humans.

Examine the continuities and transformations in how people have tried to talk to nonhumans in different cultural contexts, whether those be gods, animals, the dead, or machines.

ANT X21P. The Politics of Insult.

Examine how linguistic practices of (im)politeness and verbal aggression shape--and are shaped by--social hierarchies, cultural contexts, and

political dynamics across different contexts, from liberal to anti-liberal. Analyze how seemingly neutral concepts of "civility" and appropriate speech" often mask power relations while exploring how taboo language, conflict talk, and transgressive communication can both challenge and reinforce existing social orders.

ANT X22C. Contemporary African Popular Culture.

ANT X22D. Multicultural Israel.

Examines the complex social fabric that comprises contemporary Israeli society, and that shapes Israeli identity, practice and politics.

ANT X22E. Self and Culture in North Korea.

Aims to understand North Korea's historical development and its current workings as a social, cultural, and political/ideological system.

ANT X22F. Big Asian Histories.

Examines ways in which Asia and other areas of the globe have had connected intellectual, artistic, and social developments with focus on world histories centrally involving Asia from the medieval period to the present.

ANT X22G. Cultural Geographies of Israel.

Examines critical spatial theory, landscape phenomenology, histories of Zionist architecture and urban planning as applied to Israel from the Yishuv period to the present.

ANT X22I. Native American Cultures of the Southwest.

Explore the diverse Native cultures of the Southwest, focusing on the philosophical underpinnings and the frameworks of meaning and moral responsibility of indigenous peoples of the American Southwest.

ANT X22J. Goddesses in World Religions and Cultures.

Historical and cross-cultural overview of the relationship between feminine and religious cultural expressions through comparative examinations and analyses of various goddess figures in world religions.

ANT X22N. History of Hindu Religious Traditions.

History of major doctrines, practices, and institutions that shaped the development of Hinduism; how religions adapt to social and cultural change and often provide the catalyst for change.

ANT X22O. Gender, Sexuality, and the Family in Indian Religions and Cultures.

A comprehensive historical overview of gender issues as they are represented in the textual traditions of South Asia.

ANT X22P. Mexican Immigration Cultural History.

Examines the history of Mexican immigration to the United States, and provides an overview of migratory patterns dating back to the late prehistoric period through contemporary times.

ANT X22Q. Mexican American Indigenous Heritage.

The prehistory, history, and contemporary racial understanding of Mexican Americans.

ANT X22T. Russian Myths and Folktales.

Examination of the Russian folktale, its roots in ancient, pre-Christian Slavic religious tradition, its connections with other forms of folklore such as myth and legend, and its transformation in modern Russian literature. Subjects include the continuing influence of folklore explored through various aspects of Russian culture, including literature, music, ballet, film, and popular culture.

ANT X22U. Anthropology of Travel and Tourism.

Use the tools of cultural anthropology to understand the touristic encounter and the increasing (and decreasing) accessibility of travel and mobility.

ANT X22V. Architecture and Sculpture in the Maya World.

Explore the ancient world of the Maya through the lens of architecture and sculpture.

ANT X22W. Power and Resistance in Putin's Russia.

Introduction to Russian political and protest cultures--beyond the headlines and outside the Kremlin walls.

ANT X23C. Sport, Religion, and Society.

Explore sport as it relates to ritual and religious practice and examine the meaning and nature of sport in cross-cultural perspectives.

ANT X23D. Religions of the Caribbean.

Examine the histories and politics of religious practices in the Greater Caribbean, encompassing the islands and Central American coasts as well as the continental diasporas, from Vodou and Rastafari to popular Hinduism.

ANT X23E. Politics and Performance.

Consider the power struggles of the democratic process by closely attending to language, rhetoric and performance.

ANT X23I. Comparative White Nationalisms.

Consider critical questions about the constructions of whiteness and nationalism across the globe. Examine, through an anthropological lens, how the boundaries of whiteness changed throughout history, and its relationship to far-right political groups, to trace the history of white nationalism and its present-day global resurgence.

ANT X23N. Biomedicine, Ethics, and Culture.

Examines ethical questions such as the allocation of medical resources, stem cell research and cloning, organ transplantation, abortion, human experimentation, prolonging life and the right to die, suicide, euthanasia, and diagnosis and treatment of illnesses, explored from a global perspective.

ANT X23O. Black Geographies.

Explore the relationship between Blackness and the production of space and place. Examine the tensions and possibilities that emerge when Black people are rendered un-geographic as a fundamental component of racial capitalism while they are simultaneously creating spaces of freedom under constant threats to Black life.

ANT X23P. Anthropology of the Himalayas.

Examine the history and culture of the Himalayan region, including Northeast India, sections of Pakistan and Afghanistan, Tibet, and especially Nepal.

ANT X23Q. Contemporary Jerusalem.

Explore what life is like in today's contested, rapidly growing, and increasingly diverse Jerusalem.

ANT X23R. Anthropology of Infrastructure.

Explore how infrastructure creates relationships between resources, energy, built form, information, and people.

ANT X23S. Anthropology of Food.

Explore the cultural dimensions of growing, cooking, and eating food by engaging themes of gender, race, indigeneity, embodiment, hunger, and power.

ANT X23T. Colonial Encounters in Mesoamerica.

Study European-indigenous encounters in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, between approximately 1450-1750. Examine strategies of contact, accommodation, and resistance that indigenous communities and European colonizers used to communicate with each other and negotiate the conduct of daily life in colonial society.

ANT X23U. Sensing: Elemental Media.

Explore a sensory ethnographic investigation of urban ecology, organized around air, water, earth, and fire as themes for engaging with the city through media and the senses.

ANT X23V. Maya Art and Architecture.

Introduction to the artistic traditions of the ancient Maya, tracing their development up to the time of European contact. Students will examine various important themes of Maya culture including history, ritual, and cosmology as revealed in sculpture, hieroglyphs, painting, and architectural design.

ANT X23W. Race and Indigeneity in the Pacific.

Examine a multidisciplinary study of sovereignty, settler colonialism, diaspora, and migration in the Pacific.

ANT X24C. Science, Magic, and Religion.

Historical and cross-cultural overview of the constructed concepts of magic, science, and religion through comparative examinations of cultural contexts from the Islamic world, western Europe, the Caribbean, the U.S., and Mozambique.

ANT X24D. Japanese Religion and Western Imagination.
Examines Japanese religious traditions, with a focus on Zen, through the perspective of people living in non-Japanese societies since the end of World War II. Explores different ways in which non-Japanese have imagined Japanese religious and ethical ideas and both explained Japanese behavior and adopted ideas about Japan into their writings about philosophy and life.

ANT X24E. Culture and Health.
Examine the social and cultural foundations of western medicine as well as an introduction to indigenous and alternative health systems.

ANT X24F. Anthropology Of Religion.
Examine a genealogy of the anthropology of religion around the globe from the nineteenth century to the present.

ANT X24G. Environmental Anthropology.
Examine the environment, environmental inequality, and the relationship between culture and ecology.

ANT X24I. Sounding the City.
Explore the significance of sound for urban social life.

ANT X24J. HIV and AIDS Activism and the Healing Arts.

ANT X24L. Topics in Anthropology.

ANT X24L.13. Musics of India.
Explore the musical traditions of India, with emphasis on Hindustani and Carnatic musical styles, but including examination of other traditions.

ANT X24L.17. Nature, Society, and Adaptation.
Long term trajectories of change in human environment relationships, including issues of human evolution and human nature, violence, population, food, agriculture, urbanization, globalizing modernization, and environmental impacts; issues of sustainability, cultural survival, human rights, and environmental protection.

ANT X24L.24. Archaeology of African Thought.
Archaeological, historical, and ethnographic data as they relate to the foundations of contemporary African and African American societies.

ANT X24L.3. Primitive Technology.

ANT X24L.31. Development And Its Critics.
Discuss aspects of the contemporary international aid and development in Asia and beyond. Examine the decision-making within the development industry and the scope of aid as a economic and social force in the contemporary world.

ANT X24L.33. Geographical Information Systems and Remote Sensing for Archaeology and Paleontology.
Designed to give students interested in the fields of archaeology, physical anthropology, and paleontology a foundation in the use of geographical information systems (GIS) and the analysis of remotely sensed data from satellites and aerial photographs.

ANT X24L.39. Theories of Archaeology.
The history of archaeological thought, including the major theoretical trends that have shaped the discipline over time.

ANT X24L.41. Science, Technology, and Race.
Examines the intersections and linkages between race, science, and technology. Review of the array of current anthropological and sociological studies of science, which regard science as an institutionalized set of cultural practices charged with generating objective knowledge of the world.

ANT X24L.42. United States Latino and Latina Ethnographies.
Explores past and present anthropological representations of Latinos and Latinas in the United States.

ANT X24L.43. Creative Nonfiction and Ethnography.
Explores the convergences and divergences between ethnographic and narrative journalistic writing, and their potential for producing powerful, richly textured accounts that capture the depth of human experience and the complexity of social life.

ANT X24L.44. Ethnographic Theory and Practice.
An exploration of the complex relationship between anthropological ideas and ethnographic practice. Introduces a broad spectrum of concepts, issues, and theories of culture, and critically examines how these theories and ideas shape anthropological methods and writings.

ANT X24L.45. Queer Ethnographies.
Anthropological analysis of gender and sexuality that critically evaluates formative concepts and theories that have been subject to recent debates within anthropology, gender studies, and queer theory.

ANT X24L.46. Urban Unrest.
Analysis of the roots of urban unrest, exploring a range of origins: joblessness, state violence, white flight, backlash against civil rights gains, new immigration, and interracial strife. Beyond race and class, subjects include exploring unrest as a mode of pushing the normative boundaries of gender and sexuality in public space. Course material will draw from film, literature, history, geography, and anthropology.

ANT X24L.48. Sex and Power in the African Diaspora.
Exploration of various experiences and theories of sex, intimacy, and desire alongside intellectual and artistic engagements with power hierarchies and spirituality across transnational black communities. Subjects include the concept of "erotic subjectivity" from various theoretical and methodological angles, principally within African diasporic contexts.

ANT X24L.49. Global Markets and Local Cultures.
Examine contemporary theories of globalization, including materials exploring global governance, international monetary policy, migration regulation, offshoring, and cultural hybridity. Focus on case studies in Asia and elsewhere that reveal how these practices impact particular communities.

ANT X24L.51. The Cities of the Middle East.
Anthropological and sociological analysis of space, with a special emphasis on urban theory and culture in the Middle East.

ANT X24L.53. Global Indigenous Issues.
Explores contemporary issues of indigenous peoples around the world through films, literature, and social science readings and focuses on how indigenous peoples are actively working to oppose their oppression and create sustainable futures.

ANT X24L.54. Black Native American Relations in the United States.
Explores the entwined histories, cultures, and identities of African American and Native American people in North America. Subjects include experiences of racial formation, including how race, power, and indigeneity work in different ways for people in contemporary United States society.

ANT X24L.56. Ethnographic Writing.
Writing workshop consisting of a series of exercises to add density and texture to ethnographic description by including attention to scene, character, event, situation, and dialogue.

ANT X24L.57. Archaeology of Climate Change.
Examines why climate changes, the methods for recording climate change, and includes case studies of the varied responses of past human societies to climate change in different geographic regions and time periods with varying socio-political and economic systems.

ANT X24L.58. Digital Data Systems in Archaeology.
Designed to help students understand the basic knowledge and skills needed to operate digital equipment (e.g. GPS and Total Data Stations) commonly used for collecting location data on archaeological sites. Instruction on mapping and grid systems translates into "hands-on instrument operation in simulated archaeological field conditions. Provides an introduction to GIS software and its applications in archaeology as well as an overview of near-surface sensing techniques.

ANT X24L.59. Graffiti and Poster Art in the Islamic World.

ANT X24L.63. Food and Culture.
Examines cultural and linguistic views on eating and how we talk about what we eat in the contemporary era. Combines scholarly literature, videos, and readings about food subjects that circulate in popular culture, and considers how flows of dietary images and discourses shape race/ethnicity, gender, social class, and other identifications.

ANT X24L.64. The Bronze Age and the Iron Age in Atlantic Europe.
Introduction to the archaeology of Atlantic Europe with particular emphasis on the Bronze Age and Iron Age periods. Examines the diversity and commonalities of European adaptations, investigates how geography influenced trade of goods and ideas, as well as the profound changes brought about by a new conceptualization of the world and the innovations of the Bronze and Iron Ages.

ANT X24L.65. Anthropology for Liberation.
Takes a critical look at anthropologists' quests to shifting the legacy of anthropology from the colonial toward freedom and liberation. Explores anthropology's relationship to human rights, violence, questions of race, gender, and sexuality, imperialism and neoliberalism, and the ways that some anthropologists have chosen to use their field work in new and different ways.

ANT X24L.66. Indigenizing Queer Theory.
Introduction to emerging work by indigenous queer theorists, largely from the United States. Examines cultural conflicts between the west and indigenous world views and practices surrounding monogamy and marriage, same-sex marriage, enforced gender binaries, sexual identities and practices, their regulation by the colonial state, and implications for indigenous people.

ANT X24L.68. Creation and Evolution: Human Origins in Scientific and Religious Discourses.
Examines evolutionary theory, intelligent design, and creationism, and how they interact.

ANT X24L.69. Japanese Concepts of Body and Self.
Exploration of anthropological literature describing Japanese conceptions of self and body, and analysis of the intersection of these conceptions of self with Japanese ideas about religion, morality, aging, and medicine.

ANT X24L.7. Introduction to African Prehistory.

ANT X24L.71. Extraterrestrial Intelligence: Culture, Religion, and Imagination.
Focusing primarily on the 20th and 21st Centuries, explores the search for extraterrestrial intelligence (SETI) and considers how these ideas have intersected with other aspects of society, particularly religion, including recent arguments that SETI itself has developed into a religion. Examines meanings and motivations behind issues such as Percival Lowell's quest to prove the existence of canals on Mars and the development of Scientology.

ANT X24L.72. Development, Security, and Society.
Explores the linkages between development, security, and, society. Examines a series of recent transformations that have drawn the relationship between international development and various forms of security together. Through an exploration of recent anthropological work, examines subjects such as: human security, the relationship between development and humanitarian intervention, strategies for planning in the face of climate change, disaster management, and new technologies of warfare and security.

ANT X24L.73. Political Ecology.
Introduction to core tenets of political ecology. Focuses on ethnographic approaches and introduces key debates in the field–such as the relationship between environment and violence, the critique of Malthusian and neo-Malthusian notions of scarcity and limits, the links between conservation and dispossession, and more. Explores the uses of political ecology in key contemporary debates over social and environmental change, from climate change to waste management.

ANT X24L.74. Inca World.
Explores how Inca civilization developed, how the Incas grew from a small highland state into a mighty empire, and how a small number of Spaniards and their allies were able to bring the Inca dynasty to an end. Read accounts of the Incas written in the first years of Spanish colonial rule, and review the latest archaeological discoveries.

ANT X24L.75. Arab Latin Americas.
Examine the ways in which Arab immigrant identities have been negotiated and co-opted socially, but also institutionally, in various countries in the Western Hemisphere.

ANT X24L.76. Indigenous Peoples of Russia and the USSR.
Examine an introduction to theories of colonial critique and visual culture studies. Explore the history of the Indigenous peoples of the Eurasian north.

ANT X24L.77. Blacks and Asians: Race and Social Movements.
Examines the relations between Asians and Blacks in the United States.

ANT X24L.78. Black Women and the State.
Surveys black women's experiences living with and confronting state oppression around the world. Takes an historical, social, and theoretical look at the roots of this oppression and inequality, and how black women have chosen to respond to it locally and globally.

ANT X24L.8. Cultures of Southeast Asia.
Comparative study of the peoples of Indonesia, Burma, Thailand, Malaysia, and other countries.

ANT X24L.9. The African Diaspora in the Americas.
Black cultures and societies in the New World, and their African heritage.

ANT X24N. Muslim Women in Politics.

ANT X24O. Globalization in Latin America.
Critically examine the globalization phenomenon in Latin America, focusing on history and ethnography.

ANT X24P. Gender and Labor in Global Asia.

ANT X24Q. Global Perspectives of Health, Illness, and Inequality.
Use an anthropological framework to think critically and analytically about global past and contemporary issues in health. Examine the root causes of health, illness, and inequality.

ANT X24R. Daily Life in Mesoamerica.
Examine the daily life of people in Mesoamerica, from the earliest inhabitants in the region to the myriad ways that Precolumbian life and archaeology affect the lives of people today.

ANT X24S. The Global City.

ANT X24U. Socialism's Past and Futures.
Examine ordinary people's experience of socialism in the Soviet Union and the plural interpretations of this experience after the USSR's collapse.

ANT X24V. Sexuality in Global Perspective.
Explore the ways in which sexuality intersects with money, intimacy, power, and labor in the context of global economic processes.

ANT X24W. Mapping Indigenous Austin.
Explore the histories and presence of indigenous Austin.

ANT X25C. Cultures of Sustainability.
Examine how ecological concerns are articulated and perceived in different cultural contexts.

ANT X25D. Representation of Jews in the American Public Sphere.
Examines how Jews have been represented and constituted in American public culture as a race, religion, and/or nation through distinct institutions and display practices.

ANT X25E. Ethnographies of Emotion.
Examine concepts such as place, character, objects, subjects, cultural forms, everyday life, and feeling states or structures such as trauma, love, hope, depression, the even keel, and melodrama through a writing workshop. Explore how to articulate structures of feeling with models of culture and the self. Analyze and experiment with modes of ethnographic attention, the importance of telling detail, and methods of participant observation.

ANT X25F. Cultural Heritage on Display.
Explore the public construction and display of traditional American folk culture by studying popular folklife-oriented tourist sites.

ANT X25G. Technoculture.
Analyze social groups using digital methods and a process of self-reflection focused on technological mediations of experience.

ANT X25I. Sonic Ethnography.
Examine sound, themes of listening, noise, silence, audio technology, vibration, and voice.

ANT X25J. The Photographic Image.
Applies concepts and practices from visual ethnography to the study of memory, place, and everyday life. Subjects include developing counterintuitive and subversive approaches to practices of looking and techniques of representation.

ANT X25O. American Jewish Material Culture.
Examines the interplay between material culture and Jewish identity and thought in contemporary America.

ANT X25P. Abolition Medicine.
Examine race-based diagnostics tools and treatment guidelines that reinforce antiquated and scientifically inaccurate notions of biological race. Discuss the upstream structures that enable downstream violence, such as police brutality. Analyze, through an abolitionist lens, various systems of power in medicine, culture, and society to trace the colonial logics, practices, and institutions in the afterlife of slavery pertaining to health, illness and disease, healthcare, and public health in the United States and globally.

ANT X25Q. Practices of Looking.
Explore the development of methodological and analytic tools for the examination of visual culture.

ANT X25R. Cultures and Ecologies.
Examines the anthropology of "nature" and "natural resources," with particular attention to the communities in the arctic and subarctic regions. Use ethnographies to learn about the cultures of peoples who inhabit northern latitudes, especially their cosmological modes of belief and their ecological ways of life.

ANT X25S. Global Black Feminisms.
Examine Black feminist theories and practices around the world from a transnational and comparative perspective.

ANT X25T. Jewish Folklore.

ANT X25U. Austin Jews in the Civil Rights Era.

ANT X25V. Jewish Cuba.

ANT X25W. Shamanism and the Primitive.

ANT X26C. Native Americans in Texas.
Studies the history of Native Americans in Texas using concepts and evidence from anthropology, history, archaeology, historical geography, and Native American studies.

ANT X26D. Native Americans in the Plains.
The ethnohistory of some of the most influential Native American groups on the plains, from the arrival of the Spanish through the reservation period.

ANT X26E. Plains Archaeology: Prehistory and History.
Explores the evidence of human activities on the central and southern plains from prehistoric to historical times (ca. 11,000 BC to ca. AD 1850).

ANT X26F. Great Discoveries in Archaeology.
The stories, myths, and people behind some of the great archaeological discoveries.

ANT X26G. Europe Via Ethnography.
Develop a geographical and historical orientation to Europe and examine the cultural complexity of Europe via ethnography.

ANT X26I. Traveling Culture.
Examine mobility as a point of inquiry into questions of identity, community, belonging, place and landscape, art, representation, cultural difference, experience, and history.

ANT X26J. Historic Artifacts.
Explore the archaeological process of identification and classification of historic artifacts.

ANT X26L. Cultures in Contact.
History of the interactions of the indigenous peoples of the Americas with Africans, Asians, and Europeans over the past five hundred years.

ANT X26M. Sustainable Maya Geographies - Past to Future.
Explore landscapes, conservation, and human-environment dynamics in the Maya region of Central America from more than 10,000 years ago to modern times. Compare sustainable practices from the past with those of indigenous Maya communities today to guide the future.

ANT X26N. Cultural Resource Management.
Explore a thorough overview of Cultural Resource Management (CRM). Designed for students who are interested in pursuing a career in archaeology.

ANT X26O. Empires: Aztec and Spanish.
Examine the daily life of people in the Mexica (commonly known as Aztec) empire after the Spanish conquest.

ANT X26P. Historical Archaeology.
Explore recent theoretical, methodological, and thematic developments in historical archaeology with particular focus in North America and the Caribbean.

ANT X26Q. Archaeological Field and Lab Methods.
Introduction to field and laboratory work in archaeology including survey, excavation, artifact processing and cataloging, and initial artifact or sample analysis.

ANT X26R. Latina/o/x Citizenship.
Explore the concepts of membership, belonging, immigration and citizenship in the Latina/o/x experience. Examine how historically, politically, socially and culturally, Latinas/os/xs have been construed as belonging or not belonging members of the United States society.

ANT X26S. Mesoamerican History and Oral Tradition.
Study Mesoamerican indigenous documents and oral traditions to reconstruct different aspects of the life and culture of the past and present populations of Mesoamerica. Apply a methodological approach to the study of indigenous primary sources from Mesoamerica, written during the Late Postclassic (c. 1200-1524 CE) and the beginning of the Colonial period, including oral tradition. Explore religion, socio-political organization, territory and territoriality, economy, gender roles, and the norms and values of everyday life.

ANT X26T. Displacement and Resistance.
Explore technologies of displacement, as well as tactics, digital media work, mapping projects, and activism that communities engage with to resist dispossession. Examine, locally and globally, the displacement and resistance effects of various events including infrastructure projects and gentrification.

ANT X27D. Colonial Latin American Archaeology.
Focuses on the Spanish colonies in Latin America.

ANT X27E. Ethics in Anthropology.
Explore the complex ethical challenges which arise when studying people, their communities, their languages, and their past. Engage with real-world case studies, ethical frameworks, and debates, flipping the anthropological gaze to focus on the anthropologist's behaviors and decisions.

ANT X27F. Making Florida.
Explore Florida archaeology from the earliest inhabitants to the present day. Focus on the experiences of Indigenous Floridians, the role played by Florida in the Atlantic Slave Trade, and the continuous but highly varied nature of immigration to and from the Sunshine State.

ANT X27M. Animal Studies.
Examine the broad spectrum of animal worlds, particularly as they intersect with human social activities. Analyze various interactions between humans and nonhumans in a variety of social settings.

ANT X27R. Human Remains.
Study samples of what people do with human remains to help understand belief systems, conceptions of death, rituals, and many other aspects of societies, past and present. Examine how anthropologists study human remains to learn about past societies, religion, politics,

economics, diet, health, and other subjects. Learn ethical aspects of handling human remains.

ANT X27S. Science and Society.
Examine the ethical and social implications of scientific discoveries and technological advancements, especially as they have affected disenfranchised populations in the United States and internationally. Use civil discourse to mindfully explore difficult topics and develop intellectual, scientific, and ethical literacy.

ANT X28C. Contemporary Issues in Native American and Indigenous Studies.
Examine structures of settler colonialism and how indigenous peoples resist those structures.

ANT X28D. Popular Culture and Indigenous Futurities.
Examine indigenous creative practices within and in response to mainstream popular culture.

ANT X28E. Decolonial Intersectionality.
Examine the concept of intersectionality within feminist thinking to analyze gender, race, and indigeneity in the context of ongoing colonial formations.

ANT X28F. Religion and Family in Japanese Society.
Explores the structures of family, kinship, and religion in Japan since 1868 and their roles in the creation and expression of national and individual identities.

ANT X28G. Coloniality in West Africa.
Study the changes and continuities of socio-political categories in African contexts from the period of formal colonial rule to the present day.

ANT X28I. Expressive Arts of Global Africa.
Explore music, dance, and other artistic forms as modes of political expression and community building.

ANT X28J. Native Food Sovereignty.
Explore a comparative approach to understanding how and why food is a central component of contemporary sovereignty discourse.

ANT X28N. Culture, Medicine, and Society in Asia.
Analyze health and illness as a lens for exploring Asian cultures and societies. Discuss themes, concepts, and approaches in anthropology to interrogate the interaction between culture, medicine, and society.

ANT X29K. Transnational Korea.
Recent and contemporary manifestations of the Koreas in the world and the world in the Koreas. Subjects include labor and marriage migration, educational sojourning, transnational adoption, tourism, international sport, corporate expatriation, and media flows.

ANT X29S. Topics in Anthropology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X29V. Native American Verbal Art.
Examine the verbal artistic traditions such as jokes, story-telling, song, chant, poetry, etc., of Native American peoples.

ANT X30C. Theories of Culture and Society.
Examination of the theoretical approaches that have established the intellectual foundations of contemporary sociocultural anthropology.

ANT X31C. Archaeological Curation: Theory and Practice.
Introduction to to curation and ethics in archaeology largely through hands-on training with various collections and archives housed at the Texas Archeological Research Laboratory (TARL).

ANT X32L. Primate Anatomy.
Comparative and functional anatomy of primates, including humans; emphasis on adaptations and evolution of the various taxa.

ANT X36L. Native American Cultures North of Mexico.

ANT X40C. Ethnographic Research Methods.
Introduction to methods used in conducting ethnographic research; emphasis on research design, analysis, writing, and ethical considerations.

ANT X44K. Films: An Anthropological Perspective.
Films viewed and discussed. How is cultural meaning communicated? What systems of signification are involved? What are possibilities and limitations of ethnographic films?

ANT X45C. Urban Cultures.
The culture of cities, including the distinctive forms of expressive culture, ethnic and racial conflict, and political or economic activity that cities generate.

ANT X45D. The Anthropology of Disinformation and Conspiracy Theories.
Develop an anthropological perspective on disinformation and conspiracy theories and examine how these phenomena are embedded in cultural, social, and political contexts. Explore the ways in which disinformation is constructed, disseminated, and maintained within different media ecologies.

ANT X45E. Eastern Europe on American TV.
Focus on ways Eastern Europe is depicted on American television screen. Use anthropological framework to study multiple types of television shows, including reality tv, network dramas, and miniseries. Analyze ethnic, racial, national, and gender representation and what these constructions tell us about the ways that Eastern Europe is imagined.

ANT X46L. Primate Social Behavior.
Studies primate behavior and why primates do what they do, including basic theoretical principles and the models used to explain primate behavior.

ANT X46M. Comparative Primate Ecology.
The basics of how organisms interact with their environment, focusing on a wide range of primates from a comparative perspective. Discusses how various aspects of ecology are used to conserve primate populations.

ANT X47C. Methods in Primate Biology.
The study of primate behavior and the methods by which animal behavior is observed and documented. Students conduct a research project and write a report.

ANT X48. Human Origins and Evolution.
Detailed examination and analysis of morphological trends evident in the hominid fossil record.

ANT X48C. Sex Violence Power.
Explore the diversity of power relationships and structures across primates, the methods used to document and analyze them, and the theories for why they arise.

ANT X48E. Environmental Epigenetics.
Explore major subjects in anthropology, toxicology, and public health pertaining to the study of environmental exposures and disease/illness in the context of the current understanding of epigenetic processes. Analyze epigenetic mechanisms, gene transcription, the relationship between the environment and the epigenome, and epigenetics, health. Assess the main findings in the field and discuss their relevance to anthropology, public health, medicine, and in general.

ANT X48I. Comparative Primate Development.
Explore "life history theory" and how it pertains to the traits related to growth and reproduction, life, and death in primates.

ANT X48J. Sex and Human Nature.
Provides an introduction to the scientific study of sexual behavior, mate choice, and reproduction in humans from the perspective of evolutionary biology; examines a wide range of genetic, ecological, social, physiological, and behavioral aspects of human sexuality.

ANT X48K. Current Topics in Biological Anthropology.
An in-depth study of current topics, controversies, and literature on the evolution, morphology, genetics, and behavioral ecology of primates, including humans.

ANT X48K.10. Primate Conservation.
The theory and practices of conservation biology as applied to primates. Explores species and community characteristics influencing extinction risk, current threats to primates, and potential conservation strategies.

ANT X48K.11. Early Hominid Evolution.
Examines the early stages of human evolution in Africa starting from the last common great ape ancestor through the origin of the genus Homo, looking at the behavioral and morphological adaptations that characterize the earliest stages of human evolution.

ANT X48K.8. Evolutionary Anatomy of the Head and Neck.
The comparative and functional anatomy of the head and neck in primates and other mammals.

ANT X48M. Molecular Anthropology.
Explore background information and gain hands-on experience with the molecular (DNA extraction, PCR, SNP genotyping) and bioinformatic (principal component analysis, admixture analysis) techniques commonly used in molecular anthropology.

ANT X48P. Primates, Parasites, and Pathogens.
Explore an overview of the major types of parasites and pathogens of primates and other mammals, their natural history, ecology, and population dynamics, and their role as selective agents on aspects of primate physiology, behavior, and sociality.

ANT X48R. Race, Science, and Human Variation.
Explore the patterns of biological variation within and between human populations, including variation in phenotypic, genetic, and behavioral traits. Consider both the microevolutionary and cultural processes that influence that variation. Examine how studies of human variation have impacted society in the past and present. Discuss human biological variation; the history of the concept of race and of eugenics/race science; fundamental principles of genetics and evolution; human genetic and biocultural adaptation; and contemporary issues in human genetics, health, and disease.

ANT X48S. Social and Biological Networks.
Introduction to thinking about, characterizing, and working with relational data in network formats (such as fundamentals of network science, social network analysis, and graph theory) and their applications in the study of social and biological systems.

ANT X49D. Anthropological Genetics.
Basic principles of molecular genetics and population genetics as they relate to the study of humans and other primates.

ANT X50C. Primate Sensory Ecology.
An integrated perspective on the comparative anatomy, physiology, and ecological significance of sensory adaptations in primates.

ANT X51E. Primate Evolution.
Examination of the fossil record for nonhuman primate evolution, including basic concepts of the anatomy, ecology, and systematics of living primates.

ANT X51G. Language, Culture, and the Texas German Experience.
The evolution of the culture and language of German immigrants to Texas from the 1840s through the present and how they have influenced other ethnic groups in Texas.

ANT X53. Archaeological Analysis.
Derivation of chronology and cultural information from archaeological data; the role of archaeology in modern life.

ANT X53E. Archaeological Laboratory Analysis.
The analysis of artifacts, features, architecture, and other remains recovered in the field.

ANT X58F. The Two Koreas and the United States.
The political, social, and cultural relationship between North and South Korea, and between the Koreas and the United States, since 1945.

ANT X58Q. Supervised Research.

ANT X60K. The Civilization of the Maya.
Maya prehistory and history: the archaeological record, codices and inscriptions, and Spanish conquest writings.

ANT X61L. Maya Studies: Past, Present, and Future.
Explore the long history and cultural development of Maya peoples from Mexico and Central America, ranging from the earliest occupation of the Maya territory to the present. Explore several fields of the Maya population, including sociopolitical organization, technology, economy, religion, spirituality, genocides, cultural revitalization, and artistic expressions.

ANT X61M. Maya Collapse.
Explore different aspects of Classic Maya daily life, their relationship with the environment, and the factors that influenced the transformation of the Maya civilization at the end of the Classic period.

ANT X62. Field Archaeology.

ANT X62K. Archaeology of Texas and Vicinity.
Cultural history of Texas and neighboring areas, from early prehistoric times to Anglo-American settlements.

ANT X62M. Archaeological Techniques.
Problems in planning, organizing, and carrying out archaeological surveys and excavations.

ANT X66. Anatomy and Biology of the Human Skeleton.
Comprehensive study of the human skeleton, with special attention to methods of identification.

ANT X66D. Bones: Advanced Identification and Analysis of the Mammalian Skeleton.
Focus on the applied study of the skeleton in humans and other mammals and the methods of analysis used in biological anthropology, forensic anthropology, bioarchaeology, and zooarchaeology.

ANT X73F. Historical Perspectives on the German Language.

ANT X74M. Sociolinguistics.
Explore current interests in sociolinguistic research literature. Examine language and gender; social, regional, and ethnic dialects of American English; language use in African American communities; language and identity in a pluralistic society; and language, literacy, and education.

ANT X76P. Research Internship.
Supervised fieldwork in a business or community setting related to the student's career and research interests. Students conduct research and apply anthropological skills to real-world problems.

ANT X79. Problems in Anthropology.
Supervised individual research on selected problems in anthropology.

ANT X79H. Honors Tutorial Course.
Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis.

Graduate Courses

ANT X19S. Topics in Anthropology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X29S. Topics in Anthropology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X76P. Research Internship.
Supervised fieldwork in a business or community setting related to the student's career and research interests. Students conduct research and apply anthropological skills to real-world problems.

ANT X80I. Professional Internship in Archaeology.
Conduct research and apply archaeological skills to field research, artifact analysis, or management of archaeological records and collections.

ANT X80J. Conference Course in Archaeology.
Individual instruction in specialized problems of advanced research in archaeology.

ANT X80K. Topics in Archaeological Method and Theory.
A major category of archaeological topics in which the emphasis is on anthropological theory pertinent to archaeological data and its interpretation.

ANT X80K.6. Ethnohistory and Archaeology.

ANT X80P. Professional Practices in Archaeology.
Explore a rotating series of themes of central importance to the professional practice of archaeology. Examine the legal and ethical dimensions of fieldwork, laboratory analysis, and other workplace interactions. Learn about professional practices specific to the state of Texas, as well as formal and informal strategies for engaging with property owners, descendant communities, and other public stakeholders.

ANT X82N. Geo-Archaeology and Environmental History.
Long-term ecology as reconstructed from settlement and land-use histories. Empirical case studies in environmental history from the Mediterranean region, the Near East, and Mesoamerica. Applications to degradation, desertification, sustainability, and global change.

ANT X83M. Topics in Archaeological Techniques and Procedures.
A major category of archaeological topics in which the emphasis is on techniques and procedures pertinent to the analysis of prehistoric data.

ANT X83M.1. Conference Course.

ANT X83M.2. Technological Analysis: Lithics.

ANT X83M.4. Technological Analysis: Ceramics.

ANT X83M.6. Field Projects.

ANT X83N. Field Archaeology.

ANT X84M. Topics in Regional Archaeology.
Prehistoric cultural developments of a major geographical area; comparative cultural developments in ecologically similar areas.

ANT X84M.1. Conference Course.

ANT X86J. Conference Course in Social Anthropology.
Individual instruction in specialized problems of advanced research in social anthropology.

ANT X88. Topics in Biological Anthropology.
Constitutes one of two principal categories of courses in biological anthropology covering substantive studies in primate behavior, primate anatomy and evolution, human evolution, and growth and development.

ANT X88.11. Hominid Paleoecology.

ANT X88.13. Primate Ecology.
An introduction to the biology and ecology of living primates--prosimians, monkeys, apes, and humans.

ANT X88.5. Primate Evolution.

ANT X88.7. Human Evolution.

ANT X88.8. Primate Anatomy.

ANT X88.9. Primate Behavior.

ANT X88C. Applied Data Analysis.
A hands-on, practical overview of methods and tools for applied data science for graduate students and senior undergraduates in the natural and social science disciplines.

ANT X88D. Violence, Sovereignty, and Religion.
Explore the relationships among violence, sovereignty, and religion.

ANT X88J. Conference Course in Biological (Physical) Anthropology.
Individual instruction in specialized problems of advanced research in biological anthropology.

ANT X88K. Topics in General Anthropology.

ANT X88K.2. Anthropology of Education.
A study of social life in contemporary American schools from an anthropological perspective.

ANT X88K.5. Ethnographic and Qualitative Research Methods.

ANT X89. Topics in Unwritten Languages.
Intensive instruction in selected unwritten, usually aboriginal, languages.

ANT X89D. Research and Grant Proposal Writing for Social Sciences and Humanities.
Draft and revise proposals for dissertation research or write-up grants with peer review, learn about research design, methods, data collection, and analysis, as well as strategies for presenting one's project within the genre of grant proposal within the scope of social science and humanities research areas.

ANT X89J. Conference Course in Unwritten Languages.
Individual instruction in specialized problems in selected unwritten, usually aboriginal, languages.

ANT X89K. Topics in Regional Ethnography.
Anthropological surveys and analyses of societies and cultures of distinctive world areas.

ANT X89K.1. Conference Course.

ANT X89K.10. Indo-European Culture and Religion.

ANT X89K.17. Mexican America.

ANT X89K.19. Race and Ethnicity in American Society.

ANT X89K.20. South Asia: History and Ethnography.
Issues in the history and ethnography of the Indian subcontinent. Topics may include class, caste, and ethnicity; communalism and secularism; colonialism and postcolonialism; the state and ethnic violence; anthropology, Indology, and history.

ANT X91. Topics in Social Anthropology.

ANT X91.15. History and Anthropology.

ANT X91.22. Representation and Signification.

ANT X91.27. Consciousness and Resistance.

ANT X91.32. Gender, Ethnicity, and Nationalism.

ANT X91.34. Ethnographies of Global Asia.
Methods and ethnographic study of transnational Asia and the Asian diaspora.

ANT X91.35. Ethnographic Methods for the Study of Religion.
Explore the use of ethnographic research methods for the study of religion.

ANT X91.36. The New Middle East: A Critical Approach.
Examine new analytical approaches to understanding the Middle East, including its social and political dynamics, utilizing an interdisciplinary approach.

ANT X91.37. Gender, Islam and Representation in the Modern Middle East.
Examine representations of women across majority Muslim countries and explore how women producers and consumers navigate within the framework of regulations set by religious and governmental bodies.

ANT X91.4. Cultural Construction of Masculinity.

ANT X91.7. Researching Women in Institutions.

ANT X91C. Anthropology of East Asia.
Explore contemporary anthropological research on East Asia, with a focus on a set of broad subjects (money, mobilities, cosmologies, media, etc.), and a consideration of what constitutes "the anthropological approach" to these subjects.

ANT X91L. Topics in Research Methods in Physical Anthropology.
In this second major category of courses in physical anthropology are listed those that have research techniques as their principal focus.

ANT X91L.6. Analysis of Primate Anatomy.
ANT X91L.8. Primate Sensory Ecology.
An integrated perspective on the comparative anatomy, physiology, and ecological significance of sensory adaptations in primates.
ANT X92C. Core Topics in Anthropology.
ANT X92G. AnthroLab.
ANT X92J. Introduction to Biological Anthropology: Behavior, Genetics, and Variation.
ANT X92K. Introduction to Graduate Archaeology.
Core course.
ANT X92L. Introduction to Biological Anthropology: Primate Morphology and Evolution.
ANT X92M. Introduction to Graduate Social Anthropology.
Core course.
ANT X92N. Introduction to Graduate Linguistic Anthropology.
Core course.
ANT X92P. Introduction to Cultural Forms.
Core course.
ANT X92R. African Diaspora Anthropology.
ANT X92S. Introduction to Graduate Feminist Anthropology.
Core course.
ANT X92T. Mesoamerica and Borderlands.
ANT X93. Topics in Linguistic Anthropology.
Training and individual research in subjects concerning the relations between language and culture.
ANT X93.14. Language and Power.
ANT X93.3. Speech Play and Verbal Art.
ANT X93.7. Discourse Analysis.
ANT X93.8. Ethnography of Speaking.
ANT X93J. Conference Course in Linguistic Anthropology.
Individual instruction in specialized problems of advanced research in linguistic anthropology.
ANT X94J. Conference Course in Cultural Forms.
Individual instruction in specialized problems of advanced research in cultural forms.
ANT X94M. Topics in Folklore, Public Culture, and Cultural Studies.
ANT X94M.13. Cultural Poetics.
ANT X94M.19. Foundations of Ethnomusicology.
ANT X94M.20. Field Methods in Ethnomusicology.
ANT X94M.26. Marxism and Expressive Culture.
ANT X94M.29. Object, Matter, and Desire.
Examines various questions regarding matter and meaning.
ANT X94M.30. Affect.
A survey of theories of affect, including those of Freud, Foucault, and Deleuze, feminist theory, phenomenology, globalization theory, and ethnography.
ANT X94M.31. Public Culture.
Introduction to the theory and ethnography of public culture.
ANT X94M.32. Deleuze.
The major works of Gilles Deleuze, including the study of the ontology of differences and flow, resonance, affect, vitality, lines of flight, and assemblage.
ANT X94M.33. Cultural Critique.
Various forms of cultural critique, including culture jamming, speed theory, experimental ethnographic writing, posthumanism, postpositivism, and the memoir.
ANT X94M.34. New Ethnographic Writing.
Reading and writing new forms of ethnography, including experimental writing, performative writing, new journalism, and the memoir.
ANT X94M.35. Indigenous Cultural Politics.
The worldwide significance of indigenous movements, identities, and cultural forms.
ANT X94M.36. Representational Practices.
Theories of representation and representational practices, including the representation of collective selves and others in colonial and ethnographic narratives, collections, and displays.
ANT X94M.37. Cultural Analysis: The Case of Class.
The development of class analysis in history, sociology, and anthropology, including innovative approaches to the reproduction and performance of class identities.
ANT X94M.38. Cultural Analysis: The Case of Race.
Current uses of cultural analysis across a range of disciplines, focusing on how race is accounted for in a variety of invocations of culture.
ANT X94M.39. Cities in Time and Space.
The difficulties associated with making cities intelligible in terms of their distinctive historical and cultural dynamics.
ANT X94M.4. Anthropology of the Performing Arts.
ANT X94M.40. Anthropology and Mass Media.
Anthropology and mass media both inside and outside the West. Includes television, film, and popular music.
ANT X94M.41. Anthropology of Science.
Anthropological perspective on the position of scientific disciplines within their broader social contexts and the transformations of social orders based on developments of scientific knowledge.
ANT X94M.42. Foucault and Cultural Studies.
Examination of Foucault's major works, including an assessment of his theoretical and methodological contributions to scholarly research and political activism.
ANT X94M.43. Black Queer Studies.
ANT X94M.44. Advanced Topics in Black Feminisms.
Theory and practice of black and Third-World feminisms, including as political space, activist methodology, artistic inspiration, and scholarly choice.
ANT X94M.45. Contemporary Cuban Public Culture(s).
The major preoccupations and tensions of public culture in the state of Cuba and the nation of individual Cubans.
ANT X94M.46. Black Public Culture: Diasporic Texts and Contexts.
Survey of cultural expressions and political moments of African-descended people since the social, cultural, and political upheavals of the 1970s.
ANT X95K. Cultural Adaptation and Change.
A graduate-level introduction to cultural behavior, adaptation, evolution and transformation, with emphasis on demography, diffusion, migration, ethnicity, and institutions.
ANT X97. Conference Course in Anthropology.
Individual instruction for graduate students on specialized problems of advanced research.
ANT X97F. Doctoral Forum.
Development of skills in writing, revision, and presentation of papers and grant proposals, and in job hunting.
ANT X98. Thesis.
ANT X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
ANT X98T. Supervised Teaching in Anthropology.
ANT X99W. Dissertation.

Professional Courses

ANT X19S. Topics in Anthropology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X29S. Topics in Anthropology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ANT X76P. Research Internship.
Supervised fieldwork in a business or community setting related to the student's career and research interests. Students conduct research and apply anthropological skills to real-world problems.

ARA - Arabic

Arabic: ARA

Lower-Division Courses

ARA X01C. Intensive Arabic I.
First semester of intensive Arabic language instruction.

ARA X05. Arabic Tutorial.
The basics of the Arabic language.

ARA X06. First-Year Arabic I.
First semester of Arabic language instruction.

ARA X07. First-Year Arabic II.
Continuation of Arabic 506.

ARA X08. Modern Standard Arabic I.
Designed to provide students with basic competence in Modern Standard Arabic, targeting the skills of speaking, reading, writing, and listening.

ARA X09. Modern Standard Arabic II.
Continuation of Arabic 508.

ARA X11C. Intensive Arabic II.

ARA X12K. Second-Year Arabic I.

ARA X12L. Second-Year Arabic II.
Continuation of Arabic 512K.

ARA X19S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework counted in residence. Transfer credit is awarded for work in an affiliated studies program.

ARA X29S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ARA X19S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework counted in residence. Transfer credit is awarded for work in an affiliated studies program.

ARA X21. Introduction to Arabic Dialects.
Introduction to Arabic as spoken throughout the Arab world.

ARA X21K. Intensive Arabic III.

ARA X21L. Intensive Arabic IV.

ARA X22K. Levantine Arabic.

ARA X25K. Egyptian Arabic.
Introduction to the Egyptian dialect of Arabic.

ARA X27K. Advanced Spoken Media Arabic I.
Development of the specialized vocabulary and skills needed in the media or public policy sectors of the Arab-speaking world.

ARA X27L. Advanced Spoken Media Arabic II.
Development of the specialized vocabulary and skills needed in the media or public policy sectors of the Arab-speaking world.

ARA X29S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ARA X30D. Arabic across Disciplines.
Students read and discuss Arabic language materials related to the subject matter of another designated course.

ARA X31K. Intensive Arabic V.

ARA X31L. Intensive Arabic VI.
Sixth semester of intensive Arabic language instruction.

ARA X60C. Arabic Readings in Classical Islamic Texts.

ARA X60D. Quranic Arabic.

ARA X60E. Contemporary World Challenges.

ARA X60F. Modern Arab Cultures.
Explore the challenges of Arab youth, most notably in the economy, nationalism, and environmental issues. Taught in Arabic.

ARA X60L. Topics in Arabic Language, Literature, and Culture.
Close textual study of prose or poetry in Arabic. Some topics may focus on the cultural impact of literature and language.

ARA X60L.10. Palestine and the Palestinians: A Journey Through Time.

ARA X60L.11. Arabic Voices from Poetry to Rap.
Focuses on contemporary poetry, specifically examining popular poetry, graphic poetry, rap, slam, hip-hop, and Twitter as a poetic genre. Investigates crossings between contemporary and classical forms, as well as Arabic and non-Arabic genres. Analyzes new poetic forms expressed in a variety of dialectics and cultural contexts, addressing the role of music, digital technology, and political developments in shaping new poetry. Explores various texts in Modern Standard Arabic and dialects from across the Arab world.

ARA X60L.2. Arab Women Poets.

ARA X60L.4. Translating Arabic Texts.

ARA X60L.5. Egyptian Culture and Society.

ARA X60L.6. Arab Political Speeches in War and Peace.

ARA X60L.7. The Arab Spring.

ARA X60L.8. Readings in Arabic Literature.

ARA X60M. Arabs and Modernity.
Examine how Arabs have contributed to the global scientific movement in the past and in the present.

ARA X60S. Arts and Literature in Arab Societies.
Explore the role of arts and literature and how it influences Arab societies and politics.

ARA X69. Conference Course in Arabic Language and Literature.
Supervised individual study of selected problems in Arabic language or literature.

Graduate Courses

ARA X19S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework counted in residence. Transfer credit is awarded for work in an affiliated studies program.

ARA X29S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ARA X80C. Topics in Arabic Language.

ARA X80C.8. Translating Arabic Texts.

ARA X80C.9. Secrets of Arabic Eloquence.
Examine writings on the aesthetics of the Arabic language.

ARA X81H. Intensive Graduate Language Instruction I.
Intensive cultural and literacy-focused training in Arabic at the beginning level in preparation for research in the Arab world or with Arabic sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

ARA X81J. Intensive Graduate Language Instruction II.
Intensive cultural and literacy-focused training in Arabic at the low-intermediate level in preparation for research in the Arab world or with Arabic sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

ARA X81K. Intensive Graduate Language Instruction III.
Intensive cultural and literacy-focused training in Arabic at the intermediate level in preparation for research in the Arab world or with Arabic sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

ARA X81L. Intensive Graduate Language Instruction IV.
Intensive cultural and literacy-focused training in Arabic at the high-intermediate level in preparation for research in the Arab world or with Arabic sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

ARA X81M. Intensive Graduate Language Instruction V.
Intensive cultural and literacy-focused training in Arabic at the advanced level in preparation for research in the Arab world or with Arabic sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

ARA X81N. Intensive Graduate Language Instruction VI.
Intensive cultural and literacy-focused training in Arabic at the advanced level in preparation for research in the Arab world or with Arabic sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

ARA X82C. Topics in Arabic Linguistics and Philology.

ARA X82C.2. Grammar of the Arabic Language.

ARA X82C.3. Arab Grammarians.

ARA X82C.4. History of the Arabic Language.

ARA X82C.5. The Qur'an: A Linguistic Analysis.

ARA X82C.6. Varieties and Registers of Arabic.
The historical and linguistic development of Arabic varieties and registers, past and present.

ARA X82C.7. Comparative Arabic Dialects.

ARA X82C.8. Introduction to Arabic Linguistics.
Introduction to the major areas of research in Arabic linguistics. Includes formal linguistics and sociolinguistics, and code-switching and dialectology.

ARA X82C.9. The Structure of Palestinian Arabic.
A detailed examination of the syntax of Palestinian Arabic.

ARA X83C. Topics in Arabic Language Teaching, Pedagogy, and Applied Linguistics.

ARA X83C.1. Teaching Arabic as a Foreign Language.
Theory and practice of foreign or second language acquisition, applied to Arabic instruction.

ARA X83C.3. Curriculum Design in Arabic.
Examines three curricular models that are widely used in teaching foreign languages: proficiency-based instruction, task-based instruction, and content-based instruction.

ARA X84C. Topics in Arabic Literature.

ARA X84C.10. Encountering the West in Modern Arabic Literature.
Investigates the representation of the West in Arabic literature from the nineteenth century onward by examining travel narratives, novels, essays, and visual texts.

ARA X84C.11. Survey of Classical Arabic Literature.

ARA X84C.12. Survey of Modern Arabic Literature.

ARA X84C.5. Arab Women Poets.

ARA X84C.6. Classical Arabic Akhbar.
Examines classical Arabic prose from the perspective of the individual khabar or story, which was the basic unit for all humanities works, and works in history, geography, zoology, cosmology, and anthropology.

ARA X84C.9. New Arabic Writings.

ARA X86K. Advanced Spoken Media Arabic I.
Development of the specialized vocabulary and skills needed in the media and public policy sectors of the Arab-speaking world.

ARA X86L. Advanced Spoken Media Arabic II.
Development of the specialized vocabulary and skills needed in the media and public policy sectors of the Arab-speaking world.

ARA X87. Topics in Arab Culture.

ARA X87.1. Contemporary Arabic Cinema.

ARA X88. Research Methods and Bibliography in Arabic Studies.
Arabic classical and modern sources on a variety of subjects, as well as modern scholarship in Arabic studies both in the West and in the Arab world.

ARA X89. Conference Course in Arabic Studies.
Supervised individual study of selected problems in Arabic studies.

ARA X97. Arabic in Focus: Areas and Skills.
Apply language skills to particular areas of focus.

ARA X98. Thesis.

ARA X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

ARA X99W. Dissertation.

Professional Courses

ARA X19S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework counted in residence. Transfer credit is awarded for work in an affiliated studies program.

ARA X29S. Topics in Arabic.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ARC - Architecture

Architecture: ARC

Lower-Division Courses

ARC X01F. First-Year Interest Group Seminar.
Basic issues in various School of Architecture disciplines.

ARC X01Q. Topics in Architecture.

ARC X08. Architecture and Society.
Introduction to the social contexts, potential, and consequences of architecture and interior design.

ARC X10K. Design I.
An introduction to the forms and methods of design for architects and interior designers, with an emphasis on inhabitation including body, light, and movement. Taught in a studio format by faculty members under the direction of a faculty coordinator.

ARC X10L. Design II.
An introduction to the forms and methods of design for architects and interior designers, with an emphasis on environment, including color, material, and texture. Taught in a studio format by faculty members under the direction of a faculty coordinator.

ARC X11K. Visual Communication I.
Study and application of drawing and other communication skills for designers, including formal and spatial studies, life drawing, and perspective.

ARC X11L. Visual Communication II.
Study and application of drawing and other communication skills for designers, including color, light and shadow, and projections. Employs manual and digital techniques.

ARC X12C. Appropriate Materials.
Examine the underlying material framework of the built environment through the study of buildings, products, and artworks that span time and place. Emphasis is placed on works of architecture.

ARC X12R. Topics in Introductory Design Studies.

ARC X15K. Construction I.
Introduction to building construction, materials, and structures.

ARC X15L. Construction II.
Analysis of building assemblies, envelope design, and structures.

ARC X18K. World Architecture: Origins to 1750.
Comparative study of the architecture of the ancient world, including Asia, Africa, the Americas, and Europe.

ARC X18L. World Architecture: The Industrial Revolution to the Present.

ARC X19S. Topics in Architecture.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the academic advising coordinator in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ARC X19T. Topics in International Learning Seminars.
Discuss various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

ARC X82. Professional Practice.
Ethical, legal, economic, and administrative processes and responsibilities of the practitioner in architecture and allied fields. Topics may include preservation law, community development, participatory design, and other aspects of organizations; methods and roles in design, planning, and preservation of the built environment.

ARC X89. Research in Architecture.
Investigation of problems in architecture, urban design, and development selected by the student with approval of the Graduate Studies Committee.

Upper-Division Courses

ARC X21G. Design VI Intermediate.
Intermediate-level studio emphasizing theory, raison-d'etre, program, and overlaps with other disciplines.

ARC X21K. Visual Communication III.
Introduction to digital modeling as well as principles of digital fabrication. Includes various modes of output such as drawings, renderings, and physical models.

ARC X23D. Design III Intermediate Studio.
Explore tectonic expression through structural systems, construction methods and materiality, and spatial and formal composition at the scale of a building.

ARC X23E. Design IV Intermediate Studio.
Examine the relationship of city and nature, urban issues, housing, landscape, and spatial and formal composition at the scale of the city in a studio setting.

ARC X23F. Design V Intermediate Studio.
Examine theory, raison-d'etre, program, spatial and formal composition, and overlaps with other disciplines in a studio setting.

ARC X26R. Topics in Design and Practice.

ARC X26R.1. Twenty-Second-Century Materials.

ARC X27C. Urban Design History, Theory, and Criticism.
Study of critical theories and practices that affect the built environment.

ARC X27E. Alternative Real Estate Action.
Intersects theory and practice by performing design-build, community service/community engagement as a form of alternative real estate development.

ARC X27F. American Dream: Status Quo and Alternatives.

ARC X27G. Regenerative Architecture.

ARC X27J. Theory of Architecture I.

ARC X27P. Productions.
Designed to explore the relationships between the generation of form, space, experience, and atmosphere in the spatial practices of interior design, architecture, and art.

ARC X27R. Topics in Architectural Theory.
Advanced topics in architecture and associated disciplines to encourage critical and theoretical thinking.

ARC X27R.1. Architectural Criticism.

ARC X27R.10. Energy Modeling and The Design Process.

ARC X27R.11. Global Housing Challenge.

ARC X27R.12. Light and Sustainable Design.

ARC X27R.13. Managing the Design Project.

ARC X27R.14. Place and Historical Imagination.

ARC X27R.15. Poetics of Building.

ARC X27R.16. Smart, Green, and Just.

ARC X27R.17. Solar Geometry/Energy Flow in Building.

ARC X27R.18. Timber Technologies.

ARC X27R.19. Urban Land Institute Workshop.

ARC X27R.2. Architectural Photography.

ARC X27R.20. Introduction to Urban Ecology.

ARC X27R.21. Urban Agricultural Systems.

ARC X27R.23. Computational Design.
Explore the theory and application of computational design. Use of software programs to develop experimental projects that uncover new tactics for the design of buildings and objects. Projects will be evaluated on their spatial and experiential potential and attention to digital craft.

ARC X27R.24. Race and Gender by Design.
Examine the relationship of design relative to the narratives of race, gender, and diversity.

ARC X27R.25. Architecture Computation.
ARC X27R.26. Composition and Architecture.
ARC X27R.27. Sustainable Architectural Design.
ARC X27R.28. Sustainability: Why This Way.
ARC X27R.29. Architectural Interrogations.
ARC X27R.3. City as Form and Idea.
ARC X27R.30. Building Matters.
ARC X27R.31. Spatial Stories.
ARC X27R.4. Community Design Engagement.
ARC X27R.5. Design Firm Leadership.
ARC X27R.6. Design of New Communities.
ARC X27R.7. Design Process.
ARC X27R.8. Designing the Way We Build.
ARC X27R.9. Eileen Gray and E. 1027.
ARC X27U. Technology/Technique Sustainable Design.
ARC X28D. Advanced Drawing.
Focus on personal design methodology by exploring multiple drawing methods, skills and approaches including manual, digital, and hybrid techniques. Refines design communication skills by pairing clearly articulated design intention with compelling drawings, and expressing them via effective verbal presentations.
ARC X28F. Digital Drawing and Fabrication.
Focus on advanced visual communication methodologies necessary for architectural generation, translation, and output.
ARC X28P. Prototype.
Focus on digital fabrication as a link between architecture and product design.
ARC X28Q. Rendering and Animation for the Built Environment.
Digital visualization techniques used to model three dimensional environments and motion with digital media. Includes lectures, software demonstrations, and projects that focus on the digital translation of spatial experience, as well as the visualization techniques associated with rendering texture, character, and environment.
ARC X28R. Topics in Visualization and Fabrication.
Advanced topics in various methods of visual communication.
ARC X28R.1. Building Information Modeling and Representation.
ARC X28S. Global Visual Communication.
ARC X28W. Wood Design.
Practice on basic woodworking skills: tool sharpening, layout, millwork, joinery, gluing, sanding, and finishing.
ARC X29S. Topics in Architecture.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the academic advising coordinator in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ARC X33. Site Design.
History, theory, and technique of landscape design, with emphasis on the relationship of a building to its landscape.
ARC X34K. Environmental Controls I.
A survey of acoustics, color, light, illumination, and electrical and information systems in architectural interiors. Includes techniques of documentation.
ARC X34L. Environmental Controls II.
Examine heating, ventilating, air conditioning, vertical transportation, and wiring and plumbing systems in buildings, including techniques of documentation.
ARC X35R. Structures I.
Examine theories of building construction and materials. Explore the analysis and design of structural components.
ARC X35S. Structures II.
Continue to examine theories of building behavior and materials. Explore the analysis and design of structural systems.
ARC X35T. Architectural Details and Materials.
Analyze building envelope, assemblies, detailing, and specifications.
ARC X42C. Mexican Architecture and Urbanism: From Pre-Columbian to Contemporary.
A survey of Mexican architecture and urbanism from its origins in pre-Columbian times to the twenty-first century. Evaluation of architecture as a cultural production intricately connected to its artistic and historical context and the landscape that supports it.
ARC X42E. History and Theories of Landscape Architecture I.
Overview and chronological series of in-depth studies in the history of major garden cultures and designed landscapes of the Western and Eastern worlds. Introduction to methodological approaches to the formal, social, and cultural history of gardens and landscapes, as well as to relevant theoretical frameworks for interpreting these designed landscapes and for use in conceptualizing landscapes, architecture, and urban projects in studio design.
ARC X42F. History and Theories of Landscape Architecture II.
Continuation of Landscape Architecture 342K (and Architecture 342D) through the modern period to contemporary times. Formal and cultural history of gardens, parks, and public landscapes from 1700 to about 1990. Includes comparative material from the contemporary period, 1980 to 2010.
ARC X42R. Topics in the History of Architecture.
Seminars and lecture/seminars on advanced topics in the history of architecture.
ARC X42R.1. Twentieth-Century Latin American Architecture.
ARC X42R.10. Modern American Design.
ARC X42R.11. Modern Landscape Architecture 1900-1970.
ARC X42R.12. Romes Gardens and Landscapes.
ARC X42R.13. History of Architectural Theory.
ARC X42R.14. Professional Design Practice: Baroque Rome.
Explore an overview of the synthetic act of design and a strong interdisciplinary grounding in one of the key historical periods of design and in advanced research methods.
ARC X42R.15. African American Experience in Architecture.
ARC X42R.16. History of American City Building.
ARC X42R.17. Representing Landscape and Architecture, 1500-Present.
Explore the roles of visual representation in design and professional practice from Leonardo da Vinci to the digital age. Review the history of techniques, media, and conventions of representation in architecture and landscape architecture and in their intersections.
ARC X42R.18. Design Logics: Projection and Proportion in Architecture.
ARC X42R.2. American Architecture.
ARC X42R.3. Brazilian Urban.
ARC X42R.4. Central European Architecture, 1648-Present.
ARC X42R.5. German Modernism.
ARC X42R.6. History of Architecture Since 1985.
ARC X42R.7. History of Building Technology.
ARC X42R.8. Hybridity in Landscape/Architecture.
ARC X42R.9. Loos and Mies.
ARC X42S. Modern European Architecture.
ARC X42T. Advanced Architecture History.
ARC X42U. Modern History of Sustainable Architecture.
ARC X50R. Topics in Design Theory.
Advanced topics in architecture and associated disciplines to encourage critical and theoretical thinking.

ARC X50R.1. The Modern American City.
Issues facing residents of United States cities, such as transportation and housing, poverty and crime, metropolitan finance, environmental and architectural design; historical/comparative urban evolution.

ARC X50R.3. Urban Design Practice.

ARC X50R.4. Economy/Value/Quality of Life.

ARC X51R. Topics in Visual Communication.
Advanced topics in various methods of visual communication.

ARC X51R.1. Computer Applications in Design.

ARC X51R.10. Visual Communication Exercises.

ARC X51R.2. Introduction to Computer Applications.

ARC X51R.4. Composition, Presentation, and Portfolio.

ARC X51R.5. Descriptive Geometry.

ARC X51R.6. Drawing Clinic.

ARC X51R.7. Introduction to Computer Imaging.

ARC X51R.8. Seeing Things: General Drawing.

ARC X51R.9. Solid Geometry Drawing.

ARC X57Q. Topics in Architecture.

ARC X61C. Comprehensive Studio.
Comprehensive studio to develop the ability to combine the elements of a thorough building design.

ARC X61E. Advanced Design Studio.
Study advanced problems in architectural design.

ARC X61S. Professional Residency Program Internship.

ARC X61T. Technical Communication.
Produce construction documents.

ARC X61U. Professional Residency Program Internship Technical Communication.
Produce construction documents.

ARC X62. Professional Practice.
Ethical, legal, and administrative responsibilities of the architect; organizations, processes, and roles in architecture.

ARC X62E. Advanced Design Professional Residency Program Internship.

ARC X68R. Topics in the History of Architecture.
Seminars and lecture/seminars on advanced topics in the history of architecture.

ARC X69J. City Architecture.
Introduction to city architecture, urban design, and planning.

ARC X70V. Topics in Digital Technology and Fabrication.

ARC X70W. Topics in Disaster Recovery.

ARC X78R. Bachelor Design Study, Part I.
Independent research, planning, and prep course that must be followed by Architecture 578S.

ARC X78S. Bachelor Design Study, Part II.
An independent studio that follows Architecture 378R.

ARC X79. Architectural Research.
Investigation of problems selected by the student.

ARC X82. Professional Practice.
Ethical, legal, economic, and administrative processes and responsibilities of the practitioner in architecture and allied fields. Topics may include preservation law, community development, participatory design, and other aspects of organizations; methods and roles in design, planning, and preservation of the built environment.

ARC X89. Research in Architecture.
Investigation of problems in architecture, urban design, and development selected by the student with approval of the Graduate Studies Committee.

Graduate Courses

ARC X80. Topics in Architecture.

ARC X80C. Topics in Visualization and Fabrication.
Advanced topics in visualization and fabrication in such media as freehand drawing, modeling, photography, computer graphics, photogrammetry, and measured drawings.

ARC X80C.1. Living Wall: Design and Fabrication.

ARC X80C.2. Reality Capture for Architecture.

ARC X80C.3. Material Info: Design through Fabrication.

ARC X80C.4. Building Information Modeling and Representation.

ARC X80D. Topics in Design and Practice.

ARC X80D.1. Twenty-Second-Century Materials.

ARC X80R. Proseminar in Architecture.
Study of theories related to design, livability, and sustainability in the built environment. Includes collaboration with other students and research.

ARC X80V. Topics in Digital Technology and Fabrication.

ARC X80V.1. Creative Robotics.

ARC X80W. Topics in Disaster Recovery.

ARC X81D. Architectural Drawing.
Visual communication in media, such as freehand drawing, modeling, photography, and measured drawings.

ARC X81E. Introductory Studio.

ARC X81F. Digital Drawing and Fabrication.
Focus on advanced visual communication methodologies necessary for architectural generation, translation, and output.

ARC X81T. Technical Communication.
Studio to provide skills in producing construction documents as they relate to the design and building process.

ARC X81W. Visual Communication Workshop.
Introductory workshop with a focus on developing graphic and basic design skills for the purpose of describing and communicating architectural ideas and form. Exposure to a diverse range of approaches involving freehand drawing, architectural graphic conventions, three-dimensional modeling of ideas, and an introduction to the design process.

ARC X82. Professional Practice.
Ethical, legal, economic, and administrative processes and responsibilities of the practitioner in architecture and allied fields. Topics may include preservation law, community development, participatory design, and other aspects of organizations; methods and roles in design, planning, and preservation of the built environment.

ARC X82P. Professional Residency Program Internship Portfolio.
Under the supervision of a faculty member, students produce a portfolio based on the Professional Residency Program experience.

ARC X82R. Professional Residency Program Internship Paper.
Under the supervision of a faculty member, students produce a research paper based on the Professional Residency Program experience.

ARC X83S. Site Design.
Fundamentals of building and landscape relationships.

ARC X83T. Topics in Site, Landscape, and Urban Studies.
Topics in the history, design, and preservation of building sites, landscapes, and rural and urban communities.

ARC X84F. Environmental Control: Heat, Air, and Water.
Examine thermal comfort, heating, cooling, ventilation, plumbing systems, fire protection, and conveying equipment in buildings.

ARC X84G. Environmental Control: Light, Sound, and Electricity.
Examine light and color fundamentals, daylighting, artificial illumination, acoustics, and electrical and information systems for buildings.

ARC X84T. Topics in Building and Environment Studies.
Topics include daylighting and the history of building technology.

ARC X85Q. Construction.
Introduction to building construction, materials, and structures. Analyze building assemblies and envelope design.

ARC X85R. Structures I.
Examine theories of building construction and materials. Explore the analysis and design of structural components.

ARC X85S. Structures II.
Continue to examine theories of building behavior and materials. Explore the analysis and design of structural systems.
ARC X85T. Topics in Building Construction and Conservation.
ARC X85T.1. Architectural Conservation: Field Methods.
ARC X85T.2. Architectural Conservation: Lab Methods.
ARC X85T.3. Adaptive Reuse and Recycling Buildings.
ARC X86C. Architectural Theory: Contemporary Issues.
Examine how architectural theory has shaped, and been shaped by, architectural practice in the 20th and 21st centuries, with an emphasis on architecture of the after-Modern.
ARC X86D. Architectural Theory: Historical Overview.
Survey architectural theories since the Renaissance.
ARC X86M. Topics in Architectural Theory.
Study of critical theories and practices that affect the built environment.
ARC X86M.10. Eileen Gray and E.1027.
ARC X86M.11. Energy Modeling and the Design Process.
ARC X86M.12. Global Housing Challenge.
ARC X86M.13. Light and Sustainable Design.
ARC X86M.14. Managing the Design Project.
ARC X86M.15. Place and Historical Imagination.
ARC X86M.16. Poetics of Building.
ARC X86M.17. Advanced Theories of Architecture.
ARC X86M.18. Smart, Green and Just.
ARC X86M.19. Solar Geometry and Energy Flow.
ARC X86M.2. Architectural Criticism.
ARC X86M.20. Technology/Techniques Sustainable Design.
ARC X86M.21. Timber Technologies.
ARC X86M.22. Urban Land Institute Workshop.
ARC X86M.25. Preservation Law.
ARC X86M.26. Computational Design.
Explore the theory and application of computational design. Use of software programs to develop experimental projects that uncover new tactics for the design of buildings and objects.
ARC X86M.27. Research Design.
ARC X86M.29. Futures and Cities.
ARC X86M.3. Architectural Photography.
ARC X86M.30. Race and Gender by Design.
Examine the relationship of design relative to the narratives of race, gender, and diversity.
ARC X86M.31. Architecture Computation.
ARC X86M.32. Composition and Architecture.
ARC X86M.33. Regenerative Architecture.
ARC X86M.34. Sustainable Architectural Design.
ARC X86M.35. Sustainability: Why This Way.
ARC X86M.36. Introduction to Urban Ecology.
ARC X86M.37. Graphic Documentation.
ARC X86M.38. National Register of Historic Places.
ARC X86M.39. Architectural Interrogations.
ARC X86M.4. City as Form and Idea.
ARC X86M.40. Inside Utopia.
ARC X86M.41. Designing for Human Behavior.
ARC X86M.42. Building Matters.
ARC X86M.43. Spatial Stories.
ARC X86M.44. Biogenic Materials.
ARC X86M.5. Community Design Engagement.
ARC X86M.6. Design Firm Leadership.
ARC X86M.7. Design of New Communities.
ARC X86M.8. Design Process.
ARC X86M.9. Designing the Way We Build.
ARC X87F. World Architecture: Origins to 1750.
Introduction to architectural types, principles, and building technologies from prehistory to the mid-eighteenth century.
ARC X87G. World Architecture: The Industrial Revolution to the Present.
Examination of architecture types, principles, and building technologies with special attention to cultural transfers.
ARC X88R. Topics in the History of Architecture and Historic Preservation.
Seminars and lecture/seminars on advanced topics in architectural history, historic preservation, and the history of building technology.
ARC X88R.1. 20th Century Latin American Architecture.
ARC X88R.10. Modern American Design.
ARC X88R.11. History of Architectural Theory.
ARC X88R.12. Romes Gardens and Landscapes.
ARC X88R.13. Modern History of Sustainable Architecture.
ARC X88R.14. Modern European Architecture.
ARC X88R.15. Methodologies in Architectural History.
ARC X88R.16. Advanced Architectural History.
ARC X88R.17. Preservation History and Theory.
ARC X88R.18. Preservation Planning and Practice.
ARC X88R.19. Design Logics: Projection and Proportion in Architecture.
ARC X88R.2. American Architecture.
ARC X88R.20. Migratory Urbanism.
ARC X88R.21. Professional Design Practice: Baroque Rome.
ARC X88R.22. Cultural Landscape and Ethnographic Methods.
ARC X88R.23. Borderlands and Mexican Built Environment History.
ARC X88R.24. African American Experience in Architecture.
ARC X88R.25. History of the Profession: Architecture and Capitalism.
ARC X88R.26. Theorizing Space in the Americas.
ARC X88R.27. History of American City Building.
ARC X88R.28. Representing Landscape and Architecture, 1500-Present.
Explore the roles of visual representation in design and professional practice from Leonardo da Vinci to the digital age. Review the history of techniques, media, and conventions of representation in architecture and landscape architecture and in their intersections.
ARC X88R.3. Brazilian Urban Theory.
ARC X88R.4. History of Central European Architecture, 1648-Present.
ARC X88R.5. German Modernism.
ARC X88R.6. History of Architecture Since 1985.
ARC X88R.7. History of Building Technology.
ARC X88R.8. Hybridity in Landscape/Architecture.
ARC X88R.9. Loos and Mies.
ARC X89. Research in Architecture.
Investigation of problems in architecture, urban design, and development selected by the student with approval of the Graduate Studies Committee.
ARC X89R. Architectural Research.
Investigation of problems selected by the student with approval of the supervising faculty member.
ARC X90C. Architecture Practicum.
ARC X90H. Master's Design Studio--Dual Degree.
Advanced study in architecture, addressing complex design problems and issues related to various architectural topics.
ARC X91C. Urban Design History, Theory, and Criticism.
Study of critical theories and practices that affect the built environment.
ARC X91P. Productions.
Designed to explore the relationships between the generation of form, space, experience, and atmosphere in the spatial practices of interior design, architecture, and art.

ARC X92D. Advanced Drawing.
Focus on personal design methodology by exploring multiple drawing methods, skills, and approaches including manual, digital, and hybrid techniques. Refines design communication skills by pairing clearly articulated design intention with compelling drawings, and expressing them via effective verbal presentations.

ARC X92K. Historic Preservation Studio.
Interdisciplinary studio integrating design and other preservation issues at scales from interiors to landscapes and urban districts.

ARC X92P. Prototype.
Focus on digital fabrication as a link between architecture and product design.

ARC X92V. Digital Visualization and the Built Environment.
Digital visualization techniques used to model three dimensional environments and motion with digital media. Includes lectures, software demonstrations, and projects that focus on the digital translation of spatial experience, including the visualization techniques associated with rendering texture, character, and environment.

ARC X92W. Wood Design.
Practice on basic woodworking skills: tool sharpening, layout, millwork, joinery, gluing, sanding, and finishing.

ARC X94. Architectural Design: Vertical Studio.
Design problems dealing with subjective and objective decision making, study and application of drawing and other communication skills for architects, investigation of physical and social contexts, and the practical requirements of sound building.

ARC X94S. Horizontal Studio.

ARC X95C. Mexican Architecture and Urbanism: From Pre-Columbian to Contemporary.
A survey of Mexican architecture and urbanism from its origins in pre-Columbian times to the twenty-first century. Evaluation of architecture as a cultural production intricately connected to its artistic and historical context and the landscape that supports it.

ARC X95D. Frank Lloyd Wright: Design, Method, Theory.
Comprehensive study of Frank Lloyd Wright's life and work with emphasis on the analyses of his concepts of organic architecture, design methods, and theories.

ARC X95E. History and Theories of Landscape Architecture I.
Overview and chronological series of in-depth studies in the history of major garden cultures and designed landscapes of the Western and Eastern worlds. Introduction to methodological approaches to the formal, social, and cultural history of gardens and landscapes, as well as to relevant theoretical frameworks for interpreting these designed landscapes and for use in conceptualizing landscapes, architecture, and urban projects in studio design.

ARC X95F. History and Theories of Landscape Architecture II.
Continuation of Architecture 395E through the modern period and contemporary times. Formal and cultural history of gardens, parks, and public landscapes from 1700 to about 1990. Includes comparative material from the contemporary period, 1980 to 2010.

ARC X95G. The American Home: Identity, Process, and Marketing.
An examination of how American housing is conceived, developed, and marketed, as well as relationships between home buyers and builders.

ARC X95J. Originality Tradition in Baroque Rome: Borromini.
Explores the synthetic act of design and notions of originality and tradition in the arts of Baroque Rome by studying Francesco Borromini and his work through the lenses of professional design practice, the arts, contemporary Galilean science, and papal society.

ARC X95S. Advanced Architectural Design: Integrative Studio.
Advanced studio to develop skills in assimilating concepts into a feasible building design.

ARC X96. Topics in Advanced Architectural Design.
Advanced problems in architectural design to help develop skills in areas of students' and faculty member's choice, including interior architecture and preservation, as well as landscape, urban, and sustainable design.

ARC X96E. Advanced Design Studio.
Study advanced problems in architectural design to help develop skills in chosen areas, including interior architecture and preservation, as well as landscape, urban, and sustainable design.

ARC X97C. Master's Design Studio.
Participate in a forum for advanced study in architecture, addressing complex design problems and issues related to various architectural subjects.

ARC X97K. Topics in Doctoral Research in Architecture.
Conference course for students preparing for the dissertation colloquium.

ARC X98. Thesis.

ARC X98D. Departmental Report.
Preparation of a degree project to fulfill the requirement for the Master of Science in Historic Preservation or other School of Architecture degree program under the departmental report option. May be taken for a single semester (similar to the Professional Report), or two semesters (similar to the Thesis).

ARC X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

ARC X98T. Supervised Teaching in Architecture.
Designed to orient the beginning teacher in effective methods of teaching architecture and related topics.

ARC X99W. Dissertation.

Professional Courses

ARC X82. Professional Practice.
Ethical, legal, economic, and administrative processes and responsibilities of the practitioner in architecture and allied fields. Topics may include preservation law, community development, participatory design, and other aspects of organizations; methods and roles in design, planning, and preservation of the built environment.

ARC X89. Research in Architecture.
Investigation of problems in architecture, urban design, and development selected by the student with approval of the Graduate Studies Committee.

ARE - Architectural Engineering

Architectural Engineering: ARE

Lower-Division Courses

ARE X02. Introduction to Architectural Engineering.
Introduction to architectural engineering as a career by use of case studies.

ARE X07K. Topics in Architectural Engineering.

ARE X17. Computer-Aided Design and Graphics.
Introduction to procedures in computer-aided design and computer graphics used in producing plans and three-dimensional electronic models associated with building design and construction.

ARE X19S. Topics in Architectural Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ARE X20K. Introduction to Design I.
Introduction to design principles, concepts, and problem-solving approaches. Issues addressed by a series of two- and three-dimensional studies.

ARE X20L. Introduction to Design II.
Continuation of Architectural Engineering 320K. Focus on building design.

ARE X23K. Project Management and Economics.
Solving economic problems related to construction and engineering; construction project management techniques; characteristics of construction organizations, equipment, and methods.

ARE X29S. Topics in Architectural Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Fariborz Maseeh Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ARE X35. Materials and Methods of Building Construction.
Elements and properties of construction materials and components; fabrication and construction technologies, methods, and processes; engineering systems characteristic of commercial buildings such as foundation, structural, and building envelope systems.

ARE X45K. Masonry Engineering.
Behavior and design of masonry with respect to architectural, economic, and structural criteria.

ARE X46N. Building Environmental Systems.
Analysis and design of building air conditioning systems; heating and cooling load calculations, air side systems analysis, air distribution, building electrical requirements, electrical and lighting systems.

ARE X46P. HVAC Design.
Design and analysis of heating, ventilation, and cooling systems for buildings. Focus on application of fundamental energy and mass transfer principles to HVAC components.

ARE X58. Cost Estimating in Building Construction.
Building construction estimating from plans and specifications, unit prices, lump sum estimates, job sites, overhead, general overhead, and bidding procedures. Estimating methods throughout the design process.

ARE X62L. Structural Design in Wood.
Engineering properties of wood; design of glued-laminated and lumber structural members, connections, and simple systems; introduction to shear walls and diaphragms.

ARE X65. Integrated Design Project.
Design of low-rise buildings, including structural and environmental systems; preparation of contract documents.

ARE X66. Contracts, Liability, and Ethics.
Legal aspects of engineering and construction contracts; contract formation, interpretation, rights and duties, and changes; legal liabilities and professional ethics of architects, engineers, and contractors.

ARE X70. Design of Energy Efficient and Healthy Buildings.
Design and analysis of sustainable buildings, envelopes and facades, and energy and resource use in energy efficient and healthy buildings. Applies building science principles used to avoid moisture problems, minimize sick-building syndrome symptoms, and reduce energy use.

ARE X71. Energy Simulation in Building Design.
Fundamentals of building energy simulations, analytical models for heat transfer in buildings, general numerical methods for solving equations from the analytical models, use of energy simulation tools in building design analysis, and parametric analyses used to study various operational parameters that affect energy use in buildings.

ARE X72. Modeling of Air and Pollutant Flows in Buildings.
Fundamentals of indoor airflow modeling; use of computational fluid dynamics (CFD) for air quality and thermal comfort analyses; application of CFD for analysis of air velocity, temperature, humidity, and contaminant distributions with different ventilation systems.

ARE X76. Building Information Modeling for Capital Projects.
Focuses on the skills and information needed to effectively use an existing Building Information Model for a building construction project. In this project-based course, students gain knowledge on the implementation of BIM concepts throughout the life cycle of a building from planning and design to construction and operations.

ARE X77K. Topics in Architectural Engineering.
Various specified topics or conference course.

ARE X77K.7. Independent Study.
Conduct independent research with a tenure track faculty member in the Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering. Prepare a project proposal and a final report, each of which is evaluated by the faculty supervisor.

ARE X77R. Internship.

ARE X77S. Emerging Technology: Survey.
Survey of building design technologies in engineering, architectural, and construction firms.

ARE X77T. Emerging Technologies: Technical Elective.
Technical design within engineering, architecture, and construction.

ARE X79H. Undergraduate Honors Thesis.
Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis.

Graduate Courses

ARE X81E. Design of Energy Efficient and Healthy Buildings.
Design of buildings for low energy use and optimal indoor air quality. Includes ventilation, energy efficiency, moisture problems, and prevention by design.

ARE X82. Independent Topics in Architectural Engineering.
Investigation of problems in building construction, selected by the student with approval of the graduate adviser.

ARE X82.1. Construction and Project Management.

ARE X82.2. Structures.

ARE X82.3. Materials and Methods.

ARE X82.4. Environmental Engineering.

ARE X82.5. Design Principles and Procedures.

ARE X83. Research Topics in Architectural Engineering.

ARE X83.1. Construction and Project Management.

ARE X83.2. Structures.

ARE X83.3. Materials and Methods.

ARE X83.4. Forensic Engineering: Materials and Structures.
Methods of forensic analysis; role of the expert witness; methods of dispute resolution; case studies; term project.

ARE X83.5. Advanced Masonry Engineering.
Properties of masonry, differential movement, construction operations, bearing wall systems, and case histories of failures.

ARE X89H. HVAC Design.
Design of heating, ventilation, and air-conditioning systems.

ARE X89T. Indoor Air Quality: Transport and Control.
Transport and control of indoor pollutants. Includes particulate removal and pollutant transport into and within indoor environments.

ARE X89U. Energy Simulation in Building Design.
Fundamentals of building energy simulations including basic analytical models for heat transfer in building elements and general numerical methods for solving system of equations. Use of energy simulation tools for building design analyses including parametric studies.

ARE X89V. Modeling of Air and Pollutant Flows in Buildings.
Fundamentals of indoor airflow modeling, use of computational fluid dynamics (CFD) for air quality and thermal comfort analyses, application of CFD for analysis of air velocity, temperature, humidity, and contaminant distributions with different ventilation systems.

ARE X95P. Topics in Project Automation.
ARE X95P.1. Advanced CAD Procedures.
Introduction to advanced CAD procedures and CAD systems, and their influence on building design and construction.
ARE X95P.2. Introduction to Construction Automation and Integration.
Construction automation and integration activities, methods for opportunity identification and financial analysis of systems, and tools from several disciplines that are used in construction automation and integration; students prepare a project that synthesizes this information.
ARE X95Q. Topics in Project Controls.
ARE X95R. Topics in Project Information Systems.
ARE X95R.5. Data Mining.
Fundamentals of data mining. Techniques for data classification, prediction, clustering, and association rules mining. Data mining as an advanced data analysis method in engineering and construction. Implementation issues.
ARE X95S. Topics in Project Organization.
ARE X95S.4. Project Management.
Overall aspects of project and portfolio management from inception to successful operation: project selection and feasibility, contracting methods, project scheduling, cost control systems, project communications, project scope and quality management, human resource management, partner selection and management, project leadership, project closeout, and global project management.
ARE X95T. Topics in Project Technology.
ARE X95U. General Topics in Construction Engineering and Project Management.
ARE X95U.3. Advanced Legal Concepts.
Contracts, documentation requirements, claims avoidance, and settlement of claims by alternative dispute resolution. Students conduct and present in-depth studies of the most frequent causes of claims (delay, disruption, acceleration, soil conditions, and changes) and consider the way the court establishes causation and determines damages.
ARE X98. Thesis.
ARE X98D. Departmental Report.
Preparation of a report to fulfill the requirement for the Master of Science in Engineering degree under the departmental report option.
ARE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the Graduate School report option.

Professional Courses

ARH - Art History

Art History: ARH

Lower-Division Courses

ARH X01. Introduction to the Visual Arts.
A broad survey of selected traditions of art with an emphasis upon understanding their visual elements and cultural significance.
ARH X02. Survey of Ancient through Medieval Art.
A study of selected visual works throughout the world from prehistoric time to 1400 CE.
ARH X03. Survey of Renaissance through Modern Art.
A study of selected visual works throughout the world from 1400 CE to the present.
ARH X04. Issues in Visual Culture.
Examines the modern and contemporary history of art and visual culture in relation to a broader set of problems fundamental to visual representation throughout the history of art.
ARH X09D. Special Topics in the History of Art.
ARH X14. Mexico City: Aztec to Modern.
Explores the building of Mexico City, sited in a lake bed surrounded by active volcanoes and tectonic activity, from the time of the Aztecs to the present. Addresses art, architecture, science, and engineering, as well as the role that art and archaeological museums have played in the capital's modern, urban identity.
ARH X19S. Topics in Art History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ARH X21. Problems in Art Historical Research.
Focus on developing research skills. Introduction to critical analysis in the context of using various resources and primary materials.
ARH X22. Issues in Exhibitions and Collections of Visual Arts.
Examines the histories and practices of collections and exhibitions in the visual arts.
ARH X22C. Textile Arts of the Indigenous Americas.
Explore the textile holdings of the Art and Art History Collection (AAHC) at UT Austin, analyzing ethnographic and historical collections from the Indigenous Americas. Learn about manufacture from weaving and dyeing technologies, social and ritual meaning from symbolism and iconography, and gender, power, and the economic value of hand-crafted cloth in ancient societies, while working with objects from UT's collections. Examine readings on archaeological, anthropological, and iconographic studies of ancient textile traditions, both in the Americas and in comparative global perspective. Develop a critical assessment of the ethical issues concerning exhibitions and collections of Indigenous American textiles.
ARH X22D. Collecting Latin America.
Introduction to the history of collecting Latin America, from pre-Columbian objects to modern art.
ARH X22E. Collecting Contemporary Art.
Examine the histories and practices of collections and exhibitions of contemporary visual art.
ARH X25. Art and Archaeology of the Ancient Near East.
Examines various aspects of material culture, including the rise of monumentality and urbanism; media such as writing and figurative arts; and the history and politics of archaeological research in the area of the Fertile Crescent, Turkey, and Iran.
ARH X26J. The Parthenon Through the Ages.
Examines why the Parthenon is of relevance today for a global audience. Subjects include the postantique lives of this unique monument as a Christian cathedral and pilgrimage site, a mosque, a ruin, and an archaeological icon; the various debates about its restoration and preservation; and the problem of cultural ownership.
ARH X26K. Myth and Images in the Greek and Roman Mediterranean.
Examines various methods of interpretation, such as archaeological and art historical analysis of mythical Greek and Roman narratives as they appear in visual arts of antiquity.
ARH X26L. Visual Cultures of the Mediterranean Islands.
Analysis of material and visual culture and the divergent histories of archaeology and art history in Cyprus, Crete, and Sicily.
ARH X26M. Art and Archaeology of Greek Sanctuaries.
Examines the archaeology of Olympia, Delphi, Dodona, Delos, and Samos, their global relevance today, and the history of archaeological research.
ARH X27N. Art and Politics in Imperial Rome.
Public art of the Roman Empire from Augustus to late antiquity, ca. 31 BC to AD 350.
ARH X27R. Art in the Lives of Ordinary Romans.
Art and architecture from the archaeological sites of Pompeii, Herculaneum, and Ostia as indices of Roman culture, 100 BC to AD 250.

ARH X27S. Art and Politics in Republican Rome.
The art and architecture of republican Rome, ca. 500-44 BCE, when the city established dominance in the Mediterranean and developed an artistic tradition that would flourish into the Empire.

ARH X27T. Art in the Age of Hadrian.
Examines art in Rome under the reign of emperor Hadrian (117-138), who inherited the empire at its greatest geographical extent.

ARH X27U. Love, Beauty, and Protection.
Examine selected works of Greek and Roman art (sixth century B.C. to fourth century A.D.) to explore how ancients thought about themselves with regard to love, sexuality, divine and human beauty, and protection from demonic forces. Focus on social and cultural contexts, gender, and practices of daily life.

ARH X28C. Mosques of the Islamic Worlds.
Examine mosque architecture beyond well-known examples from the Middle East, reaching less researched regions where Muslims have built and used mosques, including Africa, South and Southeast Asia, East Asia, Europe, and the Americas.

ARH X28D. Material Cultures of Coexistence.
Dicuss Muslims living in regions where non-Islamic socio-political systems and infrastructures predominate, exploring the material cultures produced in places where Islam did not originate as, or is not, the dominant authority.

ARH X28J. Arts of Islam, 650-1500.
Early Islamic art and architecture, with an emphasis on interconnections between the Islamic world and Europe. Examines unique ways Islamic visual culture developed out of the classical and late antique world. Artworks will be contextualized within early Islamic history, religion, and culture.

ARH X28K. Arts of Islam 1500-Present.
Later Islamic art and architecture, beginning with the world empires of the Ottomans, Safavids, and Mughals, and extending into the modern and contemporary periods. Subjects include the social and historical context of Islamic art in these periods and its unique visual culture.

ARH X28L. Medieval Middle East History in One Hundred Objects.
Survey the history of the medieval Middle East, from the period of Late Antiquity (in the seventh century) to the rise of early modern empires of the Safavids, Ottomans, and Mughals (in the seventeenth century), through close examination of the meaning and significance of 100 objects.

ARH X28M. Modern Middle East History in One Hundred Objects.
Survey the history of the medieval Middle East, from 1500 to the present, through close examination of the meaning and significance of 100 objects.

ARH X28N. Arabs and Vikings: Art and Culture.
Explore the art and culture of the global Middle Ages through close examination of recent films, popular and academic publications, and works of art and architecture that reveal the interconnection between the European and the Islamic worlds.

ARH X29J. Byzantine Art.
Examination of the medieval art and architecture of the eastern Roman empire, including related traditions (Coptic, Armenian, Georgian, Crusader, Norman).

ARH X29N. Art and Architecture of Late Antiquity.
Examination of early Christian and late Roman art and architecture, including related traditions, such as Jewish, Coptic, Armenian, Georgian, Persian,and Syriac.

ARH X29R. Romanesque Art and Architecture.
Form and function of religious art in twelfth-century Europe.

ARH X29S. Topics in Art History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ARH X29T. Art in the Age of Dante and Giotto.
Examine the art of the later Middle Ages in Italy (1200-1400), including work by Giotto, Duccio, Nicola and Giovanni Pisano, and Arnolfo de Cambio.

ARH X30G. Art at Court: The Gothic Period.
Changing manifestations of Gothic art and architecture at selected court centers, 1140 to 1400.

ARH X30J. Gothic Cathedral: Amiens.
An examination of the cathedral at Amiens, its meaning, structure, political and financial contexts, and sculptural programs, as well as its influence on other buildings in France and Germany.

ARH X31J. Art and Experience in Central Italy.
Art and architecture of central Italy.

ARH X31K. Early Italian Renaissance Art to 1470.
Traces the beginnings of the "rebirth" (renaissance) of the visual arts, from the end of the Middle Ages to the heyday of the Medici. Works of art are analyzed both in formal terms and in relation to contemporary society, religion, philosophy, economics, statecraft, gender, and other significant issues.

ARH X31N. Later Quattrocento Art, 1470-1500.
Explores the visual arts created in the Italian peninsula during the final decades of the fifteenth century, or Quattrocento. Emphasis will be on common themes such as the revival of antiquity, the exaltation of the prince, and specific local characteristics.

ARH X31P. Art and the City in Renaissance Italy.
Art, architecture, and emerging civic identity in Florence, Siena, Venice, and other Italian Renaissance city-states.

ARH X31Q. Art in Medici Florence.
Explores the social and cultural fabric of Florence before and after the rise to power of the Medici family beginning in the early fifteenth century.

ARH X31R. Michelangelo and His World.
Examine the work of artist Michelangelo Buonarroti (1475-1564).

ARH X31S. Art, Geology, and Place in Italy.
Examine the intersection of art, geology, and the geographic notion of 'place' in Italy, using a thematic rather than geographic approach.

ARH X32K. Northern Renaissance Art, 1350-1500.
Northern European art from the International Style to van Eyck and Hieronymus Bosch.

ARH X32L. Northern Renaissance Art, 1500-1600.
Art and cultural development in the sixteenth century; artists include Duerer, Gruenewald, Holbein, and Brueghel.

ARH X33K. Italian Baroque Art.
The art of Italy in the seventeenth and eighteenth centuries; includes the sixteenth-century sources from which Roman baroque developed.

ARH X33L. The Age of Rembrandt and Rubens: Northern Baroque Art.
Northern European art in the seventeenth century, stressing the Netherlands and Flanders.

ARH X33M. Rembrandt and Vermeer.
Examine the lives and work of Rembrandt (1606-1669) and Jan Vermeer (1632-1675) from diverse methodological perceptions.

ARH X35F. Art and the Moral Law.
Examines the revolutionary energy of 'Art for Art's Sake' in nineteenth century Europe and various artists' challenge to the moral law, especially in Britain and France.

ARH X35G. Art and Landscape 1778-1908.
In Europe, the arts of landscape (painting, gardening, poetry and the novel) flourished more creatively than ever in the period covered. Exploration of these arts, their intersections with each other, and across national boundaries.

ARH X35H. Buddhist Traditions and Nineteenth-Century Art.
Examines the extent to which Buddhism and Buddhist art influenced artists and Western culture in the nineteenth century, especially in the development of modernism.

ARH X35J. Nineteenth-Century Art.
Examines European art and themes in art during the nineteenth century.

ARH X35N. European Art, 1789-1848.
European painting and sculpture as social and political events from the French Revolution to the revolutionary crises of midcentury.

ARH X35R. Burne-Jones and Friends.
Explore the work of British symbolist painter Edward Burne-Jones (1833-1898) and its place within 19th-century European culture.

ARH X35T. Goya in Context.
Explore the works of Francisco Goya (1746-1828).

ARH X36D. Derek Jarman: Art and Film.
The place of Derek Jarman (1942-1994) in the history of film is assured, but he was also a painter, wrote memoirs, and created a famous garden. Discussion of all his works in the context of his life, British culture, and his HIV/AIDS status.

ARH X37K. Twentieth-Century European Art to 1940.
Major movements in the development of modern European painting and sculpture.

ARH X38J. Performing Art History.
Uses the work of one seminal performance, film, video, and installation artist as a case study for considering the history of minimalism, video, and performance in the United States and Europe from the 1960s to the present and for developing ways of writing about time-based media in general.

ARH X38L. Art since 1930: Modernism and Mass Modernity.
Avant-garde activity, primarily painting, photography, and film, in the United States and Europe from 1930 to 1970.

ARH X38M. Art and Culture: 1968 and After.
Artistic and critical activity in the United States and Europe from 1968 to the present.

ARH X38N. Sculpture as Model in the Twentieth Century.
Examines the inherent problems in making and interpreting sculpture in the twentieth century in the United States and Europe.

ARH X38V. Magazine as Archive: View Magazine 1940-1947.
Considers the fate of avant-garde culture globally during World War II and its immediate aftermath through the lens of View Magazine and primary research conducted in the Harry Ransom Center.

ARH X39J. American Art: Colonial Era to the Civil War.
Painting, sculpture, and architecture from the early seventeenth century to 1860.

ARH X39K. American Art: Civil War to the Armory Show.
Painting, sculpture, and architecture from 1860 to 1913.

ARH X39L. Twentieth-Century American Art to the 1950s.
Art in the United States from the Armory Show through abstract expressionism.

ARH X39M. American Art, 1958-1985.
Survey of major movements from 1958 to 1985, from pop art to graffiti art and new expressionism.

ARH X39N. Painting in America to 1860.
Painting in British colonial North America and the United States prior to the Civil War.

ARH X39P. Painting in the United States, 1860-1913.
Painting in the United States from the Civil War to the Armory Show.

ARH X39Q. Modernism in American Design and Architecture.
A historical survey of artifacts, buildings, and urban environments, focusing on responses to machine-age civilization.

ARH X39R. Art, Art History, and Medicine.
Examines similarities and differences between the discipline of art history and the types of visual training offered by medical schools in conjunction with museums. Builds observational skills necessary for both medicine and art history while remaining grounded in the methodologies and purposes of art history. Sharpens critical thinking skills about images and texts. Cultivates interdisciplinary collaboration in consideration of select examples of European and U.S. art, including-but not limited to--medical or anatomical subjects.

ARH X40L. History of Photography.
The history of photography, including major historic processes, influential photographers, critical debates, and the significant social, political, and economic circumstances that shaped the development of the medium and the diverse works that were created since its origins in the nineteenth century.

ARH X41D. Contemporary Latinx Visual and Performance Art.
Explore contemporary visual and performance art by Latinx artists working since the 1970's to the present. Examine artists who began to engage with and in civil rights discourse to intervene through their art-making practices; and to align with contemporary trends in the art world that began to expand in the 1970's, such as performance art, installation art, video art, and, later, digital art.

ARH X41J. Nineteenth-Century Latin American Art.
Art of the nineteenth century in Latin America, including Argentina, Brazil, Colombia, Chile, Mexico, Paraguay, Peru, Uruguay, Venezuela, and the Caribbean.

ARH X41K. Modern Art of Mexico.
Mexican visual culture from the late nineteenth century through 1968. Emphasis on the emergence of modernist avant-gardes and popular entertainment, and their ambivalent relationship to state, church, and market. Also explores how self-consciously negotiating the tension between native and international influences, artists, critics, and curators contributes to notions of Lo Mexicano, or "Mexicanness.

ARH X41L. Chicano Art Histories and Futures.
Mexican American art since the 1960s, with an emphasis on the visual production and exhibition of identity inside and outside the Chicano civil rights movement and the politics of U.S. multiculturalism. An introduction to a broad range of art history written to date--including recent feminist and queer interventions--as a means of envisioning a supposed "post-Chicano" or "post-racial" moment.

ARH X41M. Contemporary Mexican Art.
Survey of visual culture beginning in the 1950s and 1960s, with a focus on key artists, exhibition spaces, and critical debates from the last thirty years in Mexico in light of international aesthetic currents and shifting political and economic conditions.

ARH X41N. Other Modernities: Latin American Art.
Development and sources of twentieth-century art in the Caribbean and Central and South America.

ARH X41P. Contemporary Latin American Art.
Development and sources of art in the Caribbean and Central and South America from the 1960s to the present.

ARH X41Q. Women in Latin American Art.
Development and sources of Latin American Women Artists considering feminist, gender and queer theories

ARH X41R. Apertures: Film and Photography Through Greater Mexico.
Exploration of the historical and aesthetic linkages and affinities between filmmakers and photographers working in greater Mexico, including prominent visitors and Americans of Mexican descent. Considers how Mexican culture is represented but also how borders between Mexico and the wider world--as well as among media--were blurred or brought into sharper focus by these exchanges.

ARH X41S. Art Cinemas of the Americas.
Examine art cinemas from the Spanish-speaking Americas from the 1950s to the present.

ARH X41T. Pop Art Americas.
Examine the history of Pop Art in Latin America and by Latinx artists in the US from the 1960s to the present.

ARH X41U. Chicana/o/x Film and Media.
Examine a history of Chicana/o/x production and representation in film and media from early 20th century to the present.

ARH X42J. Introduction to Women's and Gender Studies in the Fine Arts.
An introduction to women's studies and gender studies in relation to visual, theatrical, and musical culture in the United States and Europe.

ARH X44J. Twentieth-Century African American Art.
A survey of visual art produced by people of African descent in the United States with an emphasis on the twentieth century and its sociohistorical framework. Changes in modes of expression, formal concerns, pictorial themes, and the impact of the Black Arts movement, feminism, and Afrocentrism on art are explored, as well as the relationship of the work of black artists to art from West and Central Africa and the visual traditions of European and Euro-American artists.

ARH X44L. Art of the Harlem Renaissance.
Examine the factors which gave rise to the Harlem Renaissance, with a particular emphasis on art and artists.

ARH X44M. Photographs and Blackness in the United States.
Examine issues raised at the intersection of Blackness and photography in contemporary art of the United States.

ARH X45J. Contemporary Artists of the African Diaspora.
Examines a wide range of artists, practicing in different parts of the world, who are part of the African diaspora via such factors as the Atlantic slave trade and various patterns of international migration.

ARH X45K. Contemporary British Artists of the African Diaspora.
A look at a wide range of artists, practicing in Britain, who are part of the African diaspora via such factors as the Atlantic slave trade and various patterns of international migration.

ARH X45L. Diaspora Visions.
An exploration of border crossing by cultures and groups including Yorubas, Jews, Armenians, Tibetans, Hamish, Pakistanis, and Indians and the production of images by immigrants, exiles, and nomads in alien lands.

ARH X45M. Visual Arts of the Caribbean.
A look at a wide range of artists from the countries of the Caribbean, including examples of cinema and reggae music packaging.

ARH X45N. Cinema of the African Diaspora.
Examine work made in the past several decades by independent film-makers from different parts of the world, including the United States, which speaks to the history, challenges, and multiple identities of people in the African Diaspora.

ARH X46K. Introduction to African Art.
Investigates the lives and works of several artists who have made substantial contributions to the definition, history, and interpretation of the visual arts.

ARH X46L. Africana Women's Art.
Analysis of the diverse modes of presentation, mediums, definitions, and influences of Africana women artists in the diaspora. Designed to use critical theory and art history found in oral and written literatures, music, films, and other formal and informal documents.

ARH X46M. Visual Cultures of Africa.
Painting, textiles, ceramics, sculpture, performance, mixed media, photography, films, and the aesthetic ideas behind the production of African visual cultures from the perspectives of rituals, rites of passage, celebrations, initiations, documentations, and expressions.

ARH X47J. Preclassic Mesoamerican Art and Civilization.
Introduction to the origins and earliest developments in Mesoamerican art, architecture, and civilization, with emphasis on the social context of art and visual culture in preclassic Mesoamerica.

ARH X47K. Art and Archaeology of Ancient Peru.
The growth of civilization in South America from the earliest decorated textiles, pottery, and ceremonial buildings to the imperial Inca style.

ARH X47L. Mesoamerican Art and Culture.
Mesoamerican art, architecture, and its archaeological context, with emphasis on the social function of art and visual culture in ancient Mesoamerica up to the time of European contact.

ARH X47M. Maya Art and Architecture.
Introduction to the artistic traditions of the ancient Maya, tracing their development up to the time of European contact. Students will examine various important themes of Maya culture including history, ritual, and cosmology as revealed in sculpture, hieroglyphs, painting, and architectural design.

ARH X47N. Aztec Art and Civilization.
An introduction to the art, symbolism, and visual culture of the ancient Aztecs. Subjects include the representations of history and mythology in architecture, stone monuments, and pictorial manuscripts.

ARH X47P. Mesoamerican Writing Systems.
Examines the scripts of ancient Mesoamerica, focusing mostly on Maya and Aztec hieroglyphic writing. Subjects include methods of decipherment, the visual encoding of language in art and script, and the cultures of literacy in precolumbian Mesoamerica.

ARH X47R. Architecture and Sculpture in the Maya World.
Explore the ancient world of the Maya through the lens of architecture and sculpture.

ARH X48K. Formation of Indian Art.
Examine the artistic traditions of South Asia up to the fifth century C.E., with an emphasis on social and religious factors shaping its development.

ARH X48L. Later Indian Art.
Examines the development of artistic and architectural traditions in South Asia from the fifth through fourteenth centuries with an emphasis on their social and religious significance.

ARH X48M. The Taj Mahal and the Diversity of Indian Art.
Examination of the period when Islamic dynasties controlled much of the subcontinent and how a unique mix of forms and cultural practices shaped the development of monuments such as the Taj Mahal.

ARH X48N. Buddhist Art.
Explores the development of Buddhist art in South Asia, the land of its origin as well as its spread elsewhere. Focus on the question of "what is" Buddhist art.

ARH X48P. Art in the Himalayas.
Examines developments in various Himalayan regions, such as Tibet and Nepal, by focusing on certain subjects and styles in order to comprehend the roles of art in shaping culture and society.

ARH X49L. Contemporary Chinese Art.
Examines Chinese art and visual culture from the early twentieth century to the present. Analyzes complex issues involving modern and contemporary art scenes in China through artworks, artists' lives, and sociopolitical changes in China during this period.

ARH X49M. Art at the Crossroads: A View from South China.
Explore the southern Chinese coast as an integral part of the Indian Ocean world, whose multi-directional networks connect this East Asian region to South and Southeast Asia, the Persian Gulf, the Red Sea, and the East African coast.

ARH X59. Topics in Feminism and Gender.
An introduction to feminist and gender theories in relation to issues concerning visual representation.

ARH X60L. Topics in the History of Photography.
ARH X61. Topics in Latin American and Latinx Art.
ARH X61L. Topics in Ancient Near Eastern Art.
ARH X62. Topics in Greek and Roman Art.
ARH X62R. Topics in the Art of Late Antiquity.
ARH X63. Topics in Medieval Art.
ARH X64. Topics in Renaissance Art.
ARH X65. Topics in Baroque Art.
ARH X66J. Topics in Nineteenth-Century Art.
ARH X66N. Topics in Twentieth-Century Art.
ARH X66P. Topics in Modernism.
ARH X67. Topics in the Art of North America.
ARH X70. Topics in Pre-Columbian Art.
ARH X70J. Topics in Study in Guatemala.
Art and architecture of Guatemala.
ARH X70J.1. Ancient Maya Writing and History.
ARH X70J.2. Sacred Landscapes of the Precolumbian World.
ARH X70J.3. Baroque Art and Architecture in Spanish America.
ARH X72. Topics in the Art of Asia.
ARH X72.1. Chinese Literati Art.
ARH X73C. Topics in Africana Art.
ARH X73D. Topics in Diaspora Art.
ARH X73E. Topics in African American Art.
ARH X73E.1. Black Art, Brown Art.
ARH X74. Special Topics in the History of Art.
ARH X74.3. Colonial Encounter.
ARH X74.4. Blackness in the Contemporary Art Museum.
Explore issues related to the acquisition, stewardship, and repatriation of the art of the African Diaspora in the face of an increasingly virtual and market-driven art world.
ARH X75. Theories and Methods in the History of Art.
Examination of the theories and methods used by art historians and the changing nature of art historical inquiry.
ARH X76. Reading Tutorial in Art History Problems.
Individual projects to be completed under faculty supervision.
ARH X79H. Thesis Course for Departmental Honors.
Individual conference course in which student researches and writes a thesis.

Graduate Courses

ARH X80. Water Histories.
ARH X81. Topics in Latin American and Latinx Art.
ARH X81.1. Contemporary Brazilian Art.
Examine art and activism in contemporary Brazil to explore how artists are relating to, reflecting on, and resisting the democratic erosion in the country.
ARH X81L. Topics in Ancient Near Eastern Art.
ARH X81L.1. Visual Cultures in the Ancient Near East.
Examine scholarly methodologies for understanding how imagery encoded messages and how viewers developed strategies for making sense of them.
ARH X82. Topics in Greek and Roman Art.
ARH X82.1. Parthenon Throughout the Ages.
Examine the products of ongoing preservation and restoration of the Parthenon, its history and contemporary relevance.
ARH X82.2. Seeing Gods.
Examine textual and theoretical accounts of the religious phenomenon of epiphany across various belief systems.
ARH X82.3. Pompeii and Ostia: Visual Representation and Acculturation.
Examine how scholars in the past and the present have used evidence of visual representation and material culture to understand human beings living in Pompeii and Ostia.
ARH X82.4. Art and Politics in Republican Rome.
Explore the art and architecture of Republican Rome circa 500-44 B.C. and its relationship with visual culture and politics of the time.
ARH X82.5. Construction, Deconstruction, Reconstruction in Ancient Rome.
Study Roman architecture from Republic to Empire periods. Explore evidence for different phases of ancient buildings' lives - from construction to restoration to demolition - with a view to determining their political significances.
ARH X82.6. Art of the Roman Dictatorship.
Examine public art and architecture created in Rome during the last decades of the Republic (circa 100-44 BCE).
ARH X82R. Topics in the Art of Late Antiquity.
ARH X82R.1. Art, Gender, and Religion in Late Antiquity.
Examine the gendered experience of religion in Late Antiquity using the evidence of artistic record, with a primary focus on the Mediterranean world.
ARH X83. Topics in Medieval Art.
ARH X83.1. The Islamic City.
Explore the morphology, sociology, and historiography of cities in the Islamic world over time, from the medieval period to the present.
ARH X84. Topics in Renaissance Art.
ARH X84.1. Michelangelo and His World.
Examine the work of Michelangelo Buonarroti (1475-1564) in the context of his patrons and the history of the period in which he worked.
ARH X85. Topics in Baroque Art.
ARH X86G. Topics in Eighteenth-Century Art.
ARH X86J. Topics in Nineteenth-Century Art.
ARH X86N. Topics in Twentieth-Century Art.
ARH X86P. Topics in Modernism.
ARH X86P.1. Art Criticism, Theory, and Contemporary Art.
Explore the language of art criticism and to investigate the historical origin of some of the terms that have become central to the discourse of contemporary art.
ARH X86P.2. Writing About Contemporary Art.
Study the special problems facing those who write about contemporary art, which does not already have an established historical record or a generally accepted canonical interpretation.
ARH X86P.3. Film Cultures of the 1960s.
Examine the formal, theoretical, and social circumstances of the integration of various film cultures and surrealism in Europe and the United States during the post-war period.
ARH X86P.4. Archives and the History of Everyday Life.
Examine an overview of the work of a variety of individuals who consider history, biography, and the study of archives through the lens of the ephemeral and lived experience. Explore the relationship between writing biography and autobiography, archives and archival research and the production of knowledge, and the impact these choices have on the writing of history.
ARH X86P.5. Magazine as Archive.
Examine the magazine as archive and whether its temporal and material limit-terms constitute a viable frame for the writing of history.
ARH X87. Topics in the Art of North America.
ARH X90. Topics in Pre-Columbian Art.
ARH X92. Topics in the Art of East Asia.
ARH X93C. Topics in Africana Art.
ARH X93D. Topics in Diaspora Art.
ARH X93D.1. Visualizing Slavery.
Examine the work of modern and contemporary artists that touches on or explores the issue of slavery.

ARH X93E. Topics in African American Art.
ARH X94. Special Topics in the History of Art.
ARH X94.2. Administration and Development of Visual Resources Collections.
ARH X94.3. Poststructuralist Methods in Art History.
Examine an overview of influential examples of poststructuralist theory and how such theory can be applied to interpretive issues in the visual arts. Explore the writings of Barthes, Derrida, Lacan, Benjamin, and others.
ARH X94.4. When Practice Encounters Theory.
Study situations in which the theoretical position that guides an interpretation comes into conflict with the nature of the technical practices of the artist whose work is being interpreted.
ARH X94.5. Visual Cultures in Cyberspace.
Examine transatlantic computational art systems as expressive practices for computing aesthetics and interconnectivity of gendered, racial, and sexualized bodies.
ARH X94.6. Issues in Museum Studies.
Survey major issues in the field of museum studies.
ARH X95. Topics in Art Historical Methods.
ARH X96. Advanced Reading Tutorial.
ARH X96C. Reading Tutorial.
ARH X96K. Advanced Lecture Tutorial.
ARH X96L. Topics in the History of Latin American Art: Reading Tutorial.
ARH X96P. Qualifying Examination Preparation.
ARH X97. Doctoral Colloquium.
Conference course for students preparing for dissertation colloquium.
ARH X98. Thesis.
ARH X98T. Supervised Teaching in Art History.
Teaching under the close supervision of the course instructor for one semester; weekly group meetings with the instructor, individual consultations, and reports throughout the teaching period.
ARH X99W. Dissertation.

Professional Courses

ARI - Architectural Interior Design

Architectural Interior Design: ARI

Lower-Division Courses

ARI X01Q. Topics in Architectural Interior Design.
ARI X10K. Design I.
An introduction to the forms and methods of design for architects and interior designers, with an emphasis on inhabitation including body, light, and movement. Taught in a studio format by faculty members under the direction of a faculty coordinator.
ARI X10L. Design II.
An introduction to the forms and methods of design for architects and interior designers, with an emphasis on environment, including color, material, and texture. Taught in a studio format by faculty members under the direction of a faculty coordinator.
ARI X11K. Visual Communication I.
Study and application of drawing and other communication skills for designers, including formal and spatial studies, life drawing, and perspective.
ARI X11L. Visual Communication II.
Study and application of drawing and other communication skills for designers, including color, light and shadow, and projections. Employs manual and digital techniques.
ARI X18K. Interiors and Society.
Concepts, principles, and elements of interior design, presented in artistic, philosophical, and professional contexts. Includes a basic historical overview of the development of interior design.
ARI X18M. Interior Design History.
Survey of interior design from antiquity through the eighteenth century, including theoretical, social, technical, and environmental forces.
ARI X19S. Topics in Architectural Interior Design.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ARI X89. Research in Interior Design.
Investigation of problems selected by the student and approved by the graduate adviser.

Upper-Division Courses

ARI X20K. Design III--Interiors.
Focus on the physical and psychological needs of the inhabitants of interior space, with an emphasis on conceptual process and diagrammatic techniques. Projects deal with real building situations and introduce implications of fenestration, structure, and materials.
ARI X20L. Design IV--Interiors.
Explores linkages between multiple interior spaces and the study of spatial thresholds. Investigates individual spaces in relation to the body and the surrounding environment, utilizing a clearly defined program.
ARI X20Q. Topics in Architectural Interior Design.
ARI X21K. Visual Communication III.
Introduction to digital modeling as well as principles of digital fabrication. Includes various modes of output such as drawings, renderings, and physical models.
ARI X24K. Environmental Controls I.
A survey of acoustics, color, light, illumination, and electrical and information systems in architectural interiors. Includes techniques of documentation.
ARI X27P. Productions.
Designed to explore the relationships between the generation of form, space, experience, and atmosphere in the spatial practices of interior design, architecture, and art.
ARI X28P. Prototype.
Focus on digital fabrication as a link between architecture and product design.
ARI X29S. Topics in Architectural Interior Design.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ARI X30. Interior Design Internship.
Practical application of design procedures in a professional design office.
ARI X30K. Design V--Interiors.
Examination of the elements of interior space and scale, including specific human factors. Particular emphasis on the design, documentation, production, and placement of objects in interiors.
ARI X30T. Design VI--Interiors.
Capstone studio with specific design projects from current markets. Application of code issues, regulatory restraints, fire safety, and regulations for accessibility in interiors.
ARI X33L. Environmental Controls II.
Examine heating, ventilating, air conditioning, vertical transportation, and wiring and plumbing systems in buildings, including techniques of documentation.
ARI X34J. Construction I.
Introduction to building construction, materials, and structures.

ARI X34K. Construction II--Interior Materials and Assemblies.
Core concepts in interior materials, assemblies, and systems. Includes material properties, environmental and sustainable issues, attachment, detailing, and product specifications. Projects encourage manipulation and assembly of various material systems. Case studies using material samples, and field trips to sites of fabrication.

ARI X38. Designing for Human Behavior.
Issues of mood, privacy, perception, proxemics, and preferences applied to the design of interiors.

ARI X50R. Topics in Interior Design Theory.
Seminar in a variety of topics. Designed to broaden the student's knowledge of interior design and to encourage critical and theoretical thinking in the discipline.

ARI X50R.1. Design Firm Leadership.

ARI X50R.2. Managing the Design Project.

ARI X60E. Advanced Design Studio.
Synthesize components such as human aspects, place-making, the interior envelope, transitional spaces, and conceptual processes.

ARI X62. Interior Design Practice.
Business procedures, professional practice, design project control and management, and professional ethics. Documents procedures for interior design.

ARI X68R. Interior Design History II.
Study of function and aesthetics, and decoration and use, emphasizing interiors from the nineteenth century to the present.

ARI X68S. Topics in the History of Architecture and Architectural Interior Design.
Seminars and lecture/seminars on advanced topics in the history of architectural interior design.

ARI X89. Research in Interior Design.
Investigation of problems selected by the student and approved by the graduate adviser.

Graduate Courses

ARI X80Q. Topics in Architectural Interior Design.

ARI X81. Visual Communications.
Introduction to using digital tools for communicating design, with an emphasis on integrating digital image, CAD, and 3-D software processes with hand drawing and modeling techniques. Subjects may include the manipulation of digital images, the combination of text and image, rendered perspectives, measured drawings, an introduction to 3-D modeling, and the use of advanced visual language. Some projects are based on work done in the student's design studios.

ARI X81D. Architectural Drawing.
Visual communication in such media as freehand drawing, modeling, photography, and measured drawings.

ARI X81R. Topics in Representation.
Topics in the fundamental components of interior design and visual communication.

ARI X81R.1. Advanced Drawing.
Focus on personal design methodology by exploring multiple drawing methods, skills, and approaches including manual, digital, and hybrid techniques. Refines design communication skills by pairing clearly articulated design intention with compelling drawings, and expressing them via effective verbal presentations.

ARI X81T. Topics in Emerging Technologies.
Examines tools, techniques, and methods used in simulating, constructing, and experiencing interior space. Studies how various emerging technologies affect interior design, from initial design to fabrication to completion.

ARI X82. Interior Design Practice.
Business procedures, professional practice, design project control and management, and professional ethics as they relate to interior design.

ARI X82D. Mediating Interiors.
Explore methods of media-based processes such as drawing, modeling, imaging, and coding in design, with particular emphasis on explorations which make interior space perceptually, physically, and conceptually tangible.

ARI X84F. Environmental Control: Heat, Air and Water.
Examine thermal comfort, heating, cooling, ventilation, plumbing systems, fire protection, and conveying equipment in buildings.

ARI X84G. Environmental Control: Light, Sound and Electricity.
Survey light and color fundamentals, daylighting, artificial illumination, acoustics, and electrical and information systems for buildings.

ARI X85K. Construction I.
Introduction to building construction, materials, and structures.

ARI X85L. Construction II: Interior Materials and Assemblies.
Core concepts in interior materials, assemblies, and systems. Includes material properties, environmental and sustainable issues, attachment, detailing, and product specifications. Projects encourage manipulation and assembly of various material systems. Also includes case studies using material samples, and field trips to sites of fabrication.

ARI X85T. Topics in Materials and Tectonics.
Investigates traditional interior design materials and materials emerging from new technologies.

ARI X86K. Seminar in Interior Design.
Introductory subjects in interior design.

ARI X86M. Topics in Interior Design Theory and Criticism.

ARI X86M.1. Interiors and Society.

ARI X86M.2. Inside Utopia.

ARI X86M.3. Reimagining Design Precedent.

ARI X86M.4. Design Firm Leadership.

ARI X86M.5. Managing the Design Project.

ARI X86M.6. Theorizing Interiors.

ARI X88. Designing for Human Behavior.

ARI X88K. Interior Design History I.
Survey of interior design from antiquity through the eighteenth century, including theoretical, social, technical, and environmental issues.

ARI X88L. Interior Design History II.
Study of function and aesthetics, and decoration and use, emphasizing interiors from the nineteenth century to the present.

ARI X88R. Topics in Interior Design History.

ARI X89. Research in Interior Design.
Investigation of problems selected by the student and approved by the graduate adviser.

ARI X91P. Productions.
Designed to explore the relationships between the generation of form, space, experience, and atmosphere in the spatial practices of interior design, architecture, and art.

ARI X92F. Digital Drawing and Fabrication.
Focus on advanced visual communication methodologies necessary for architectural generation, translation, and output.

ARI X92P. Prototype.
Focus on digital fabrication as a link between architecture and product design.

ARI X93K. Interior Design Core Studio I.
Explores interior spaces and their sequence and adjacencies. Studies individual rooms, their locations, and their uses in such fields as hospitality, health care, and entertainment. Special emphasis on the design of transitions from public spaces to personal spaces.

ARI X93L. Interior Design Core Studio II.
Examination of the elements of interior space and scale, including specific human factors. Particular emphasis on the design, documentation, production, and placement of objects in interiors.

ARI X93M. Interior Design Core Studio III.
Examination of interior spaces and elements.

ARI X95. Interior Design: Technical Studio.
Comprehensive studio that focuses on combining the elements that create a thorough interior design.

ARI X95D. Frank Lloyd Wright: Design, Method, Theory.
Comprehensive study of Frank Lloyd Wright's life and work with emphasis on the analyses of his concepts of organic architecture, design methods, and theories.

ARI X95G. The American Home: Identity, Process, and Marketing.
An examination of how American housing is conceived, developed, and marketed, as well as relationships between home buyers and builders.

ARI X96E. Advanced Design Studio.
Study advanced problems in interior design and examine design strategies and different phases of design. Focus on interior design as it relates to retail, education, sustainability, and health care.

ARI X97. Interior Design Internship.
Practical application of design procedures in a professional design office.

ARI X97C. Master's Design Studio.
Study architectural interior design, addressing complex design problems and issues related to various architectural subjects.

ARI X98. Thesis.
For students seeking the Master of Interior Design degree.

Professional Courses

ARI X89. Research in Interior Design.
Investigation of problems selected by the student and approved by the graduate adviser.

ART - Studio Art

Studio Art: ART

Lower-Division Courses

ART X09D. Topics In Studio Art Lecture.

ART X10P. Introduction to Print.
Introduction to the concepts, methods, and materials of print including a combination of intaglio, relief, lithography, serigraphy, and/or book arts.

ART X11C. Core Studio: Drawing.
Explore techniques of drawing in a contemporary context. Focus on line, line weight, continuous line, contour line, sighting, figure, gesture, perspective (two point, three point, and isometric/orthogonal drawing), value, color, and texture.

ART X11K. Painting I.
Introduction to painting techniques, composition, and exploration of personal expression.

ART X12C. Core Studio: 2D.
Create planar works and explore formal principles and conceptual concerns in a contemporary context.

ART X13C. Core Studio: 3D.
Create spatial works and explore formal principles and conceptual concerns in a contemporary context.

ART X13K. Beginning Sculpture.
Introduction to the processes involved in the production of object-oriented sculpture using direct methods of hot and cold construction.

ART X14C. Core Studio: Time and Technology.
Explore time-based media and digital technology in a contemporary context.

ART X15K. Beginning Drawing.
Exploration of various methods, subjects, and expressive possibilities in drawing.

ART X16K. Beginning Life Drawing.
Problems in drawing and construction of the human figure in selected media.

ART X16V. Transmedia: Expanded Media I.
Introduction to video, digital, net.art, and multiple media art forms with an emphasis on experimentation and a DIY approach to production. Focuses on the history, theory, and evolution of media art practices and their relation to the Internet and social media networks.

ART X17C. Transmedia: Performance Art I.
An introduction to the practice, history, and theory of performance art in a variety of contexts and spaces, including theatrical, the white cube, and the workaday world.

ART X17K. Beginning Photography.
An introduction to still photography, including basic technical skills and concepts.

ART X18C. Transmedia: Digital Time-Art I.
Study in digital video, sound, and animation, with emphasis on the exploration of movement, image, and montage. Guided inquiry into pertinent conceptual, perceptual, and practical skills.

ART X19T. Topics in Studio Art: Laboratory.
Intensive study of various disciplines of studio art.

Upper-Division Courses

ART X20F. Digital Fabrication I.
Study of the artistic culture and techniques associated with digital visualization, three dimensional data acquisition, and various forms of digital fabrication including 3D Printing, computer numerical controlled milling, and Laser Cutting.

ART X20K. Topics in Studio Art.

ART X20L. Topics in Studio Art.
Continuation of Studio Art 320K.

ART X21K. Painting II.
Problems in composition and exploration of personal expression.

ART X22K. Intermediate Drawing.
Continuation of Studio Art 315K.

ART X23K. Intermediate Sculpture.
Exploration of the concepts and processes involved in the production of object-oriented sculpture, with emphasis on indirect methods of mold-making and casting. Encourages individual direction.

ART X23S. Installation Sculpture.
Exploration of the theories and methods involved in the production of installation sculpture through the investigation of form and space and of their function in transforming environmental, architectural, or invented sites.

ART X24C. Publication Studio.
Studio course. Advanced publishing projects in print and/or digital media.

ART X25G. Intermediate Print: Serigraphy.
Practice in the theories and techniques of multicolor serigraphy and photoserigraphy.

ART X25J. Intermediate Print: Relief.
Instruction in relief print processes in conjunction with digital technologies. Utilization of laser cutters, CNC routers, and large-format photo printers as well as traditional techniques to generate dynamic projects in woodcut, linocut, and more. Emphasis on contemporary print practice in the expanded field.

ART X25K. Intermediate Print: Intaglio.
Instruction in the theories and techniques of intaglio printmaking, color, assemblage, stencil, viscosity, collography, photo process, and relief.

ART X25M. Intermediate Print: Lithography.
Instruction in the theories and techniques of metal plate, multicolor, and stone lithography and photolithography.

ART X25T. Intermediate Print: Monotype.
Explore the concepts, methods, and materials of monotype.

ART X26K. Fiber Art and Soft Sculpture.
Explore various fiber and soft materials.

ART X29S. Topics in Studio Art.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ART X30P. Advanced Print Workshop.
Focuses on the concepts and practice of print.
ART X35K. Intermediate Photography.
Practice in still photography, including materials and processes.
ART X36C. Art and Ecology.
Explore eco art through creative inquiry into how natural, social and technological systems co-shape life, relationships, and possible futures.
ART X36D. Living Systems.
Engage in creative inquiry and develop work with and in relation to living systems, drawing from conceptual, bio, eco, performance, socially engaged, and technology-based art practices.
ART X36V. Transmedia: Expanded Media II.
Advanced practice of media art exploring time, space, and reality through multidimensional forms. An investigation of media technologies and networks: aesthetically, formally, theoretically or conceptually using traditional media, new media, and immaterial approaches.
ART X37C. Transmedia: Performance Art II.
Advanced workshop in performance art that focuses on the development of researched solo and collaborative projects.
ART X38C. Transmedia: Digital Time-Art II.
Study in digital video, sound, and animation, with emphasis on the exploration of cinematic time and its time-based installation. Guided inquiry into the relationship between video and video projections, and technics and technology.
ART X40F. Digital Fabrication II.
Advanced study of the artistic culture and techniques associated with digital visualization, three dimensional data acquisition, and various forms of digital fabrication including 3D Printing, computer numerical controlled milling, and Laser Cutting.
ART X41K. Painting III.
Continuation of Studio Art 321K.
ART X46K. Intermediate Life Drawing.
Advanced problems in drawing and construction of the human figure.
ART X50. Philosophy, Theory, and Criticism.
Advanced exploration of philosophy, theory, and criticism from a studio art perspective.
ART X50D. Alternative Photographic Processes: Photography and Printmaking.
Explore a process-based journey through the history of photography and photographic printmaking. Discuss, innovate and create while engaging with the history of photography.
ART X50E. Aesthetics of Health.
Explore the intersection of art and healthcare.
ART X50M. Topics in Studio Art Practice.
ART X50N. Topics in Studio Art Lecture.
ART X50P. Professional Practices.
Exploration of professional practices as they relate to the field of visual arts. Focus on writing an artist statement and resume, as well as learning about writing and applying for exhibition, grant, and residency opportunities.
ART X52C. Painting for Nonmajors.
Exploration of various methods, subjects, and expressive possibilities in painting.
ART X52D. Drawing for Nonmajors.
Exploration of various methods, subjects, and expressive possibilities in drawing.
ART X52E. Figure Drawing for Nonmajors.
Exploration of the human figure in selected media.
ART X52F. Print for Nonmajors.
Exploration of the concepts, methods, and materials of print.
ART X52G. Sculpture for Nonmajors.
Exploration of the processes involved in the production of object-oriented sculpture.
ART X52J. Photography for Nonmajors.
Exploration of still photography.
ART X52K. Transmedia for Nonmajors.
Exploration of time-based media.
ART X55. Topics in Studio Projects.
Study of specific techniques or problems.
ART X55.2. Installation of Film Art.
ART X56V. Transmedia: Expanded Media III.
Student-initiated research and development of complex media art and hybrid media art projects.
ART X57C. Transmedia: Performance Art III.
Advanced independent inquiry into the development of performance art projects requiring focused research and time.
ART X58C. Transmedia: Digital Time-Art III.
Advanced study in video, sound, and animation with an emphasis on individual research reflecting students' artistic goals.
ART X61K. Painting IV.
Continuation of Studio Art 341K.
ART X63K. Advanced Sculpture.
Advanced research in the theory, technology, and methods involved in the production of sculpture, with emphasis on individual direction.
ART X66K. Advanced Life Drawing.
Problems in drawing and construction of the human figure.
ART X68N. Advanced Drawing.
Continuation of Studio Art 322K.
ART X72K. Advanced Photography.
Practice in photography with an emphasis on long-term photography-based projects, more advanced technical knowledge, and a deeper familiarity with uses of the medium.
ART X76. Independent Study: Studio Art.
Individual projects to be completed under faculty supervision.
ART X76K. Contemporary Issues in Photography.
Inquiry of specific themes in photography which can include: photographic intervention, photography since 1945, photo book making, abstraction in photography, appropriation in photography, and lighting for photography.
ART X76P. Contemporary Issues in Print.
Explore advanced issues, subjects, and processes in contemporary print and the expanded field.
ART X79S. Advanced Topics in Studio Art: Lecture.
Intensive advanced study of various disciplines of studio art.
ART X79T. Advanced Topics in Studio Art: Laboratory.
Intensive advanced study of various disciplines of studio art.

Graduate Courses

ART X80. Group Critique in Studio Art.
Group critiques of student artwork organized under the leadership of the instructor, in addition to regular individual studio visits between the instructor and each student.
ART X81. Graduate Committee Study.
ART X82. Seminar in Studio Art.
Addresses topics and issues in contemporary art. Uses lectures, readings, guest presentations, discussions, and writings to articulate and define contemporary art practices.
ART X82T. Topics Seminar in Studio Art.
Topics and issues in contemporary art. Lectures, readings, guest presentations, discussions, and writings provide an opportunity for students to discuss the production and reception of culture.
ART X83. Graduate Independent Study Outside Student's Concentration.
ART X84F. Master of Fine Arts First-Year Seminar.
Introduction to the extensive research assets of the University. Focus on critical assessment skills and developing effective and consistent habits for working in the studio.
ART X84S. Master of Fine Arts Assembly.
Continuation of Studio Art 384F. Focuses on critiquing skills, talking and writing about artwork, and defining effective studio practices. Students work with peers and faculty from across the studio disciplines.

ART X90. Advanced Topics in Studio Art.
Intensive advanced study of various disciplines of studio art.
ART X90.1. Model, 3D Scan, and Digital Fabrication.
Explore computer modeling, 3D data acquisition, and digital fabrication.
ART X90T. Advanced Topics in Studio Art.
Intensive advanced study of various disciplines of studio art.
ART X98P. Professional Practices for Fine Artists.
Study of effective strategies for entering various aspects of the art world. Experiences may include lectures, guest specialists, field trips, and readings.
ART X98R. Master's Portfolio Report.
Written interpretation of the artwork created in the graduate program, addressing influences on and concepts of the work, and including a digital portfolio of major works and influences.
ART X98S. Master's Exhibition Seminar.
Preparation for the presentation of a professional exhibition in which significant work from each student is displayed. The exhibition is curated by the instructor with all students collaborating in its execution. The students' final sixty-hour review takes place during the exhibition and is individually conducted by faculty committee. At a later date during the exhibition, students publicly discuss and present their work in a colloquium open to the public.
ART X98T. Teaching Methodologies in Studio Art.
Training in teaching methods and procedures for studio art classes, including weekly group meetings with the instructor and individual consultations.

Professional Courses

ASE - Aerospace Engineering

Aerospace Engineering: ASE

Lower-Division Courses

ASE X02. Introduction to Aerospace Engineering.
Introduction to aerospace engineering, including problem solving and study skills. Examines opportunities and responsibilities of careers in aerospace engineering.
ASE X19. Topics in Aerospace Engineering.
ASE X19S. Topics in Aerospace Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs.
ASE X24L. Aerospace Materials Laboratory.
Study of the deformation and fracture behavior of materials used in aerospace vehicles. Structure-property relations, methods of characterizing material behavior, use of properties in the design process. Case histories. Written reports.

Upper-Division Courses

ASE X20. Low-Speed Aerodynamics.
Fundamental concepts, fluid statics; integral and differential analysis; detailed analysis of inviscid, incompressible flows; aerodynamics of airfoils and wings.
ASE X20K. Low-Speed Aerodynamics Laboratory.
Wind tunnel and water channel experiments at subsonic speeds; use of instrumentation and written reports.
ASE X24L. Aerospace Materials Laboratory.
Study of the deformation and fracture behavior of materials used in aerospace vehicles. Structure-property relations, methods of characterizing material behavior, use of properties in the design process. Case histories. Written reports.
ASE X28. Aerospace Engineering Projects Laboratory.
Directed work on an organized student project in aerospace engineering or engineering mechanics.
ASE X30M. Linear System Analysis.
Explore the fundamentals of signals and systems; mathematical modeling of mechanical systems; transfer function; impulse response; Laplace transforms; response of linear, time-invariant systems; frequency response methods; time-domain analysis; introductory concepts for feedback control systems; multivariate linear dynamical systems; eigenvalues and eigenvectors; matrix exponentials. An introduction to fundamental elements of the theory of systems and signals and exposure to necessary concepts and tools required to perform modeling and analysis of linear dynamical systems. Demonstrate the theory through several simulation examples using MATLAB and Simulink relevant to applications of modern aerospace engineering systems.
ASE X39. Advanced Strength of Materials.
Curved beams, shear deformation, beam columns, beams on elastic foundations; inelastic behavior of members; elementary plate bending.
ASE X46. Viscous Fluid Flow.
Navier-Stokes equations, laminar and turbulent boundary layers, transition, effects of pressure gradients, heat transfer, and compressibility.
ASE X55. Aeroelasticity.
Static aeroelastic phenomena; wing torsional divergence, control reversal, effect of wing sweep, flexibility effects on aircraft stability and control, and design implications; dynamic aeroelasticity; and galloping of transmission lines, flutter, and unsteady aerodynamics. Includes an introduction to experimental aeroelasticity.
ASE X57. Mechanics of Composite Materials.
Anisotropic constitutive relationships, lamination theory, failure theories, micromechanical behavior of laminates; laminated composite plates–bending, vibration, and buckling; composite fabrication, sandwich and other composite lightweight structures.
ASE X61K. Aircraft Design I.
Introduction to systems engineering including the systems engineering process, requirements, design fundamentals, trade studies, cost and risk analyses, integration, technical reviews, case studies, and ethics.
ASE X61L. Aircraft Design II.
Examine aerospace systems characteristics, mission requirements, sensors, and consumables analyses; and mission phases, request for proposal, problem definition, ideation, proposal preparation, conceptual design review, preliminary design development and review, and design report preparation. Produce written reports.
ASE X62K. Compressible Flow.
Shock and expansion waves, quasi-one-dimensional flow, converging-diverging nozzles, diffusers, linearized flow, and compressibility effects on aerodynamics of airfoils and bodies.
ASE X62M. High-Speed Aerodynamics Laboratory.
Experiments using a variable-Mach number supersonic wind tunnel and shock tube. Aerodynamics of wedges, cones, spheres and diamond-shaped airfoils in supersonic flow. One-dimensional unsteady shock motion. High-speed flow measurement techniques.
ASE X64. Applied Aerodynamics.
Detailed analysis of aerodynamics of compressible and incompressible flows about wings and airfoils; wing and airfoil parameters and force and moment coefficients; and thin-airfoil theory, lifting-line theory, panel methods, high-lift devices, delta wings, transonic flows, and supersonic flows over wings.
ASE X65. Structural Dynamics.
Analysis of discrete and continuous vibrating systems; deriving equations of motion; determining response; and natural frequencies and modes of vibration.
ASE X66K. Spacecraft Dynamics.
Examine Newton's gravity law, Kepler's laws, basic orbit propagation, orbit properties, orbital elements, coordinate systems and transformations, radar observations, ground tracks, orbit maneuvers, and trajectory design principles.
ASE X66L. Applied Orbital Mechanics.
Selected subjects in satellite motion and satellite applications, including communication and navigation satellites, orbit selection/design for

satellite applications, orbital coordinate systems, time, major perturbing forces, rendezvous and intercept, and interplanetary trajectories.

ASE X66M. Spacecraft Systems Laboratory.
Overview of spacecraft subsystems, mission design program library, numerical techniques, mission planning references, mission constraints, and mission design projects. Includes written reports.

ASE X67K. Flight Dynamics.
Equations of motion for rigid aircraft; aircraft performance, weight and balance, static stability and control, and dynamic stability; design implications.

ASE X70C. Feedback Control Systems.
Fundamentals of linear control analysis and design for single-input, single-output systems; stability and performance measures; Routh Hurwitz analysis; root locus methods; frequency response (Bode and Nyquist); introduction to full-state feedback.

ASE X72K. Attitude Dynamics.
Examine attitude representations, rotational kinematics, rigid-body dynamics, and torque-free motion. Explore satellite's sensors and actuators, attitude determination algorithms, and passive and active attitude control systems.

ASE X72N. Satellite-Based Navigation.
Satellite-based navigation systems, with focus on the Global Positioning System (GPS), ground and space segments, receiver location estimation, astrodynamics, satellite signal coordinate/time systems, differential techniques, GPS data analysis.

ASE X74D. Aerospace Systems Senior Design I.
Introduction to systems engineering including the systems engineering process, requirements, design fundamentals, trade studies, cost and risk analyses, integration, technical reviews, case studies, and ethics.

ASE X74E. Aerospace Systems Senior Design II.
Examine aerospace systems characteristics, mission requirements, sensors, and consumables analyses; and mission phases, request for proposal, problem definition, ideation, proposal preparation, conceptual design review, preliminary design development and review, and design report preparation. Produce written reports.

ASE X74K. Space Systems Engineering Design.
Introduction to systems engineering: the systems engineering process, requirements, design fundamentals, trade studies, cost and risk analyses, integration, technical reviews, case studies, and ethics. Includes written reports.

ASE X74L. Spacecraft/Mission Design.
Examine aerospace systems characteristics, mission requirements, sensors, and consumables analyses; and mission phases, request for proposal, problem definition, ideation, proposal preparation, conceptual design review, preliminary design development and review, and design report preparation.

ASE X75. Electromechanical Systems.
Subjects include basic electronic circuits, operational amplifiers, concepts of impedance and feedback, sensors to measure temperature, displacement, strain, force and acceleration, impulse testing, shake testing, and triggered data acquisition. These concepts will be implemented via experiments that illustrate interesting phenomena in solids and structures.

ASE X76C. Rocket Engineering Practicum I.
An introduction to rocket engineering. Explore a high-level overview of the principles, systems, and design methodologies required to design a vehicle capable of going to space. Participate in project-based work embedded within actual systems of the Texas Rocket Engineering Laboratory.

ASE X76D. Rocket Engineering Practicum II.
Explore the industry-relevant design and production environment encountered when working on a rocket subsystem in depth. Participate in project work embedded within systems of the Texas Rocket Engineering Laboratory.

ASE X76F. Rocket Fluid System Design.
Discuss analysis and design of rocket fluid systems, including component selection and design; sensors; propellant loading, usage, and measurement; tank pressurization. Examine control theory.

ASE X76G. Rocket Guidance, Navigation, and Control.
Explore rocket trajectory design, statistics, signal processing, and various control strategies. Discuss classic GNC design problems and in-depth control software projects.

ASE X76K. Propulsion.
Review of control volume analysis and quasi-one-dimensional compressible flow. Simple propeller theory. Analysis and design of rocket nozzles and air-breathing engines, including performance and cycle analysis; flow in nozzles, diffusers, compressor, and turbine stages; combustion chamber processes and propellants. Includes an introduction to chemical rocket propulsion.

ASE X79H. Undergraduate Honors Thesis.
Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis.

ASE X79K. Research in Aerospace Engineering.
Directed study or research in a selected area of aerospace engineering.

ASE X79L. Topics in Aerospace Engineering.
Current topics in aerospace engineering.

ASE X79L.1. Selected Topics in Fluid Mechanics.

ASE X79L.2. Selected Topics in Structural Mechanics.

ASE X79L.3. Selected Topics in Flight Mechanics.

ASE X79L.4. Selected Topics in Orbital Mechanics.

ASE X79L.5. Rocket Science.
Review rocket thrust equation and non-ideal nozzle analysis for quasi one-dimensional perfect gas flow. Discuss thermochemistry; chemical equilibrium; kinetics; liquid, solid, and hybrid chemical rocket systems; and electric rocket propulsion.

ASE X79L.6. Low Earth Orbit for Earth Observation.
Explore orbital geometry, approximate representation, and design of orbits in the secularly precessing ellipse model. Examine the motion of satellites, the sun, the moon and the Earth. Discuss the view of space from the ground, the view of ground from space, and the design and utilization of constellations.

ASE X79L.9. Selected Topics in Controls.

ASE X79S. Topics in Aerospace Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs.

ASE X79W. Aerial Robotics.
Comprehensive introduction to robotic aircraft. Examine rotorcraft dynamics modeling, feedback control, sensing, state estimation, path planning, machine vision, and decision-making under uncertainty. Design an automation protocol, written in C++, that commands a squad of quadcopters competing in a game.

Graduate Courses

ASE X24L. Aerospace Materials Laboratory.
Study of the deformation and fracture behavior of materials used in aerospace vehicles. Structure-property relations, methods of characterizing material behavior, use of properties in the design process. Case histories. Written reports.

ASE X80P. Topics in Mathematical Analysis for Aerospace Engineers.

ASE X80P.1. Analytical Methods I.
Introduction to modern mathematics, real analysis of functions of one variable, linear algebra, elements of real analysis of functions of many variables, calculus of variations.

ASE X80P.2. Analytical Methods II.
Elements of complex analysis, Fourier and Laplace transforms, ordinary and partial differential equations, perturbation methods.

ASE X81P. Topics in System Theory.

ASE X81P.1. Linear Systems Analysis.
Linear dynamical systems; controllability and observability; stability; realization theory; state-feedback and observers.

ASE X81P.10. Learning for Dynamics and Controls.

ASE X81P.11. Nonlinear Dynamics and Control.
Analysis and synthesis of nonlinear control systems. Stability theory, Center manifold analysis, feedback linearization, backstepping, time-scale separations, nonlinear observers, Aeromechanical system applications.

ASE X81P.14. System ID and Adaptive Control.
System identification, persistence of excitation, model reference adaptive control, projection operators, immersion and invariance techniques, applications to aeromechanical systems.

ASE X81P.15. Formal Methods for Robotics.

ASE X81P.16. Networked Control Systems.

ASE X81P.17. Introduction to Optimization.
Introduction to convex optimization (linear, quadratic, second order cone, and semi-definite programming). Review linear and matrix algebra, singular value decomposition, least squares optimization. Discuss engineering applications of optimization.

ASE X81P.18. Modeling Multi-Agent Systems.
Introduction to the mathematics of dynamic game theory, and the use of self-driving vehicles as an ongoing case study. Discuss static games and complementarity programming, dynamic game theory, and game theory and multi-agent control.

ASE X81P.19. Architecting and Design of Autonomous Aerospace Systems.
Introduction to the technical, operational, economic, market, environmental, regulatory, legal, manufacturing, and societal factors that must be considered; as well as the optimization problems and underlying mathematical solution approaches inherent to the architecting and design of systems with high levels of automation and autonomy. Discuss the framework and tools required to develop an appropriate architecture for a large, complex, multi-vehicle aerospace system.

ASE X81P.2. Multivariable Control Systems.
Multivariable feedback systems; factorizations and controller parameterization; limitations and trade-offs of feedback; robust stability and performance; robust H2 and H-infinity control methods.

ASE X81P.3. Optimal Control Theory.
Unconstrained and constrained finite-dimensional optimization, introduction to calculus of variations and optimal control, necessary and sufficient conditions for optimality, Pontryagin's Maximum Principle, minimum-time control, linear quadratic optimal control theory, introduction to dynamic programming, Hamilton-Jacobi-Bellman equation.

ASE X81P.4. Numerical Methods in Optimization.
Numerical methods for solving parameter optimization, suboptimal control, and optimal control problems.

ASE X81P.6. Statistical Estimation Theory.
Modeling static and dynamic systems, linear and nonlinear estimation, Bayesian estimation, batch least squares, Kalman filtering, square-root and information filtering, introduction to advanced estimation methods.

ASE X81P.7. Advanced Topics in Estimation Theory.
Estimation in the presence of unmodeled accelerations; nonlinear estimators; continuous estimation methods.

ASE X81P.9. Human Centered Robotics.

ASE X82Q. Topics in Fluid Mechanics.

ASE X82Q.1. Foundations of Fluid Mechanics.
Fundamental equations; constitutive equations for Newtonian fluids; inviscid, incompressible potential flow; viscous flow including exact solutions and boundary layer theory; compressible flow.

ASE X82Q.10. Plasmas and Reactive Flows.
Fundamental description of plasmas and reactive flows. Includes derivation of common governing transport equations for a broad class of electrically conducting and nonconducting reactive gases, and electromagnetic field interactions with gases, gas-phase and surface kinetics, transport properties, and applications.

ASE X82Q.11. Foundations of Computational Fluid Dynamics.
Higher-order numerical methods for solving partial differential equations and ordinary differential equations. Focus on the numerical computation of fluid flows, with a variety of scientific applications.

ASE X82Q.12. Partially Ionized Plasmas and Gas Discharges.

ASE X82Q.13. Viscous Fluid Flow.
Discuss transport phenomena, conservation equations, Navier-Stokes equations, analytical solutions to Navier-Stokes equations, laminar and turbulent boundary layers, transition, and effects of pressure gradients, with a brief introduction to RANS, LES, DNS.

ASE X82Q.7. Advanced Problems in Compressible Flow.
Physics and modeling of compressible fluids; types and structure of shock waves; heat conduction and secondary viscosity effects; exact nonlinear flow models.

ASE X82Q.8. Lagrangian Methods in Computational Fluid Dynamics.
Particle-based methods of computational fluid dynamics: molecular dynamics, direct simulation Monte Carlo, cellular automata, lattice Boltzmann, particle in cell, point vortex, immersed boundary.

ASE X82Q.9. Turbulent Mixing.
Fundamentals of turbulent scalar mixing relevant to turbulent combustion. Includes governing equations, mass diffusion, scalar transport, kinematics, chaotic advection, vortex dynamics, small-scale structure of vorticity and dissipative fields, scalar dissipation rate, scaling laws for canonical flows, heat release effects, and turbulent jet flame structure.

ASE X82R. Topics in Aerodynamics.

ASE X82R.3. Hypersonic Aerodynamics.
Characteristics and assumptions of hypersonic flow; hypersonic similitude; Newtonian theory; constant density solutions.

ASE X82R.5. Advanced Computational Methods.
Development and implementation of numerical methods for solution of transport equations; computational grid generation; applications to fluid flows, including shock waves.

ASE X82R.6. Molecular Gas Dynamics.
Kinetic theory, chemical thermodynamics, statistical mechanics. Applications: equilibrium gas properties, chemical kinetics, interaction of matter with radiation, rarefied gas dynamics.

ASE X82R.7. Optical Diagnostics for Gas Flows.
Fundamentals of nonintrusive flowfield diagnostics for aerodynamics and combustion. Basics of lasers and optical detectors; interferometric methods; Rayleigh, Raman, and Mie scattering; absorption spectroscopy; laser-induced fluorescence.

ASE X84P. Topics in Structural and Solid Mechanics.

ASE X84P.1. Solid Mechanics I.
Mathematical description of stress, deformation, and constitutive equations of solid mechanics; boundary value problems of elasticity.

ASE X84P.11. Mechanics of Composite Materials.
Constitutive equations; micromechanical and macromechanical behavior of lamina; strength and stiffness in tension and compression, theory of laminated plates; strength of laminates; delamination.

ASE X84P.13. Rotary Wing Aircraft.
Discuss the aerodynamics of rotors; typical helicopter rotor hubs and their operation; rotor forces and aircraft trim; rotary-wing aircraft performance; and rotating blade dynamics.

ASE X84P.2. Solid Mechanics II.
Continuation of Engineering Mechanics 388. Additional topics in elasticity, plasticity, viscoelasticity, variational methods, and other areas of solid mechanics.

ASE X84P.3. Structural Dynamics.
Free and forced vibration of single-degree-of-freedom, multiple-degree-of-freedom, and continuous systems. Lagrange's equations and Hamilton's principle; discretization of continuous systems; numerical methods for response and algebraic eigenvalue problems.

ASE X84P.4. Finite Element Methods.
Derivation and implementation of the finite element method; basic coding techniques; application to problems of stress and diffusion.

ASE X84P.6. Advanced Structural Dynamics.
Analysis of complex flexible systems; discretization of complex structures by the finite element method; advanced computational methods for large finite element models.

ASE X84P.8. Selected Topics in Aeroelasticity.
Classical and contemporary topics in aeroelasticity; general introduction to aeroelastic phenomena, including flutter, divergence, control reversal, and flexibility effects on stability and control; aeroelastic tailoring; active control concepts; unsteady aerodynamic theories for lifting surfaces and bodies; aeroelastic system identification, including nonlinear systems (theory and laboratory applications).

ASE X87P. Topics in Flight Mechanics, Guidance, Navigation, and Control.

ASE X87P.2. Mission Analysis and Design.
Mission design and mission constraints, launch windows; rendezvous analysis; orbital design interactions with thermal and structural analysis; design of a typical mission.

ASE X87P.6. Optimal Spacecraft Trajectories.
Optimal control of spacecraft; primer vector theory; impulsive maneuvers; finite burn high/low thrust maneuvers; solar sails; numerical methods; applications to contemporary trajectory problems using single or multiple spacecraft.

ASE X87P.7. Sensors and Actuators.
Students use LabVIEW to study aerospace devices such as inertial navigation systems, control-moment gyroscopes, optical navigation systems, torque coils and magnetometers, robots, and integrated satellites.

ASE X87P.8. Aerial Robotics.
Comprehensive introduction to robotic aircraft. Examine rotorcraft dynamics modeling, feedback control, sensing, state estimation, path planning, machine vision, and decision-making under uncertainty. Design an automation protocol, written in C++, that commands a squad of quadcopters competing in a game.

ASE X88P. Topics in Celestial Mechanics.

ASE X88P.2. Celestial Mechanics I.
N-body problem; three-body problem; restricted three-body problem; Jacobian integral; zero-velocity curves; equilibrium points; stability; linearized solutions; variational equations; periodic orbits; the two-body problem; variation of parameters; Lagrange's planetary equations; applications to near-earth and deep-space trajectories; numerical methods.

ASE X88P.3. Celestial Mechanics II.
Hamiltonian mechanics; dynamical systems; canonical transformations; invariant manifolds; Poincare surfaces of section; applications to restricted n-body problems; applications to sun-earth-moon or sun-planet-moon particle trajectory problems.

ASE X89. Topics in Aerospace Engineering.

ASE X89P. Topics in Satellite Applications.

ASE X89P.1. Determination of Time.
Concepts of time; fundamental reference system; polar motion; practical methods in time determination and dissemination; historical and present-day time scales; atomic clocks; time transfer via satellite.

ASE X89P.10. Fundamentals and Geophysical Application of Imaging Radar Systems.
Exploration of how radar images are formed and manipulated, as well as applications of the systems to problems such as measurement of the Earth crustal deformation. Focus on radar as a signal processing problem, radar image formation, polarimetric radars, and radar interferometry. Subjects include system design, scattering from natural surfaces, range and azimuth processing algorithms, and processor design.

ASE X89P.11. Advanced Satellite Geodesy.
Examine kinematics and dynamics of displacement and Earth orientation. Investigate the determination of time and reference frames. Explore deformations of the Earth due to tides and mass loading. Study modern space geodetic applications.

ASE X89P.12. Orbital Debris.
Discuss the orbital debris environment, space situational awareness, and space traffic management. Explore orbit determination, multiple-target tracking, uncertainty propagation, risk assessment, and evolution of the existing debris field.

ASE X89P.13. 3D Remote Sensing Analytics and Applications.

ASE X89P.14. Low Earth Orbit for Earth Observation.
Explore orbital geometry, approximate representation, and design of orbits in the secularly precessing ellipse model. Examine the motion of satellites, the sun, the moon and the Earth. Discuss the view of space from the ground, the view of ground from space, and the design and utilization of constellations.

ASE X89P.15. Satellite System Signal Processing.
Discuss fundamental theory and algorithms related to acquiring and processing radio signals from constellations of satellites for navigation and communication. Examine software-defined radio fundamentals, carrier and code tracking loops, and the effects of the space-to-earth communications channel.

ASE X89P.16. Computational Methods.
Examine basics of vectors and matrices, linear equations, regression and classification, similarity measures, the Discrete Fourier Transform (DFT), linear filters, and power spectrum estimates. Focus on applying matrix methods to practical applications, such as tomography, image processing, data fitting, time series prediction, optimal control, finance, and machine learning. Utilize MATLAB or Python to do computations with vectors and matrices and run numerical experiments with real-world data sets.

ASE X89P.2. Satellite Geodesy.
Explore theory of the gravitational potential, including its time-variations; spherical harmonics and other representations; space-based remote sensing of the geopotential and its gradients; mass flux variability and its applications.

ASE X89P.4. Methods in Orbit Determination.
Variational methods of the orbit determination, Orbit parameter estimation, satellite tracking techniques and observables, modern precision orbit determination.

ASE X89P.8. Satellite Control Systems.
Spacecraft equations of motion; linearization and stability, classical control methods; digital and sampled data systems; multivariable control; attitude determination and control; momentum management; coupled modes; and case studies in satellite control.

ASE X89P.9. Synthetic Aperture Radar: Principles and Applications.
Synthetic Aperture Radar (SAR) imaging for Earth remote sensing, including image formation concepts and interpretation, radar interferometry processing and strategies, surface deformation, topographic mapping, and polarimetric applications.

ASE X97. Graduate Seminar.
Student, faculty, and visitor presentations of current research topics.

ASE X97R. Research in Aerospace Engineering.
ASE X98. Thesis.
ASE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
ASE X98T. Supervised Teaching in Aerospace Engineering.
Teaching methods and objectives, criteria for evaluating teaching effectiveness, procedural rules and regulations, laboratory teaching.
ASE X99W. Dissertation.

Professional Courses

ASE X24L. Aerospace Materials Laboratory.
Study of the deformation and fracture behavior of materials used in aerospace vehicles. Structure-property relations, methods of characterizing material behavior, use of properties in the design process. Case histories. Written reports.

ASL - American Sign Language

American Sign Language: ASL

Lower-Division Courses

ASL X01C. Accelerated First-Year American Sign Language.
Introduction to American Sign Language and its vocabulary and sentence structure. A six-hour course comparable to American Sign Language 506 and 507.
ASL X01D. American Sign Language I: Beginning.
This course focuses on the development of beginner-level comprehension and production skills in American Sign Language. Students learn how to attend to visual language and use their hands and body for producing ASL constructions. Elementary vocabulary and grammar is covered, along with information about Deaf culture.
ASL X10D. American Sign Language II: Beginning.
Focuses on the development of intermediate-level proficiency in ASL. An introduction to more complex grammatical constructions with the goal of engaging in conversations in ASL on a variety of topics. Examines the historical aspects of the Deaf community and related themes.
ASL X11D. American Sign Language III: Intermediate.
Focuses on maintaining and building upon a student's intermediate ASL skills. Grammar coverage includes complex constructions that involve the signing space, and vocabulary building includes comparisons between English words and ASL signs in order for the learner to make appropriate vocabulary choices in their ASL production. Complex questions facing the contemporary Deaf community are discussed.
ASL X19S. Topics in American Sign Language.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ASL X20. Advanced American Sign Language Conversation.
Advanced development of conversational skills in American Sign Language, with a focus on sophisticated linguistic structures and important issues in Deaf studies.
ASL X26. Sign Languages and Signing Communities.
Examine the grammar of signed languages, their use in signing communities, and the acquisition of signed languages as first languages. No knowledge of American Sign Language is required. Conducted in English.
ASL X29S. Topics in American Sign Language.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ASL X36. Introduction to Sign Interpreting.
Introduction to sign interpreting from American Sign Language into English and from English into American Sign Language. Topics include the ethics of interpreting and the problems that arise in interpreting in different social and professional situations.
ASL X50. Topics in American Sign Language, Deaf Studies, and Interpreting.
ASL X50.1. American Sign Language Literature.
Examines American Sign Language literature; includes narratives, language games, and poetry.
ASL X52. Deaf Culture.
Introduction to aspects of the culture of Deaf people, including their history, language, and contributions to the United States and/or to other countries. Themes explored include the role of educational institutions within Deaf networks and linguistic, ethnic, and cultural diversity throughout the community.
ASL X54. Exploring the History of American and French Sign Languages.
Conducted in American Sign Language. Explore the historical development of American Sign Language (ASL) and its roots in French Sign Language (LSF). Examine the linguistic, cultural, and historical connections between ASL and LSF.
ASL X56. Perspectives on Deaf Peoples and Communities.
Conducted in English. Examine deaf peoples and communities from a number of perspectives: social and psychological meanings of deaf, the deaf community, education of deaf children, sign languages, and historical trends.
ASL X57. Undergraduate Research.
Supervised research experience.

Graduate Courses

ASL X95. Conference Course in American Sign Language.
Supervised research.
ASL X95C. American Sign Language for Graduate Students I.
Beginning language instruction in American Sign Language for graduate students.
ASL X95D. American Sign Language for Graduate Students II.
Intermediate language instruction in American Sign Language for graduate students.
ASL X95E. American Sign Language for Graduate Students III.
Advanced language instruction in American Sign Language for graduate students.

Professional Courses

AST - Astronomy

Astronomy: AST

Lower-Division Courses

AST X01. Introduction to Astronomy.
General introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology.
AST X01L. Astronomy Discovery Laboratory.
Hands-on projects in observational astronomy and related laboratory disciplines. Students work in small groups.
AST X02. Self-Paced Introduction to Astronomy.
General, self-paced introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology.

AST X03. Introduction to Astronomy with Celestial Observations.
General introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Introduces students to the night sky and includes some observational activities.

AST X03L. Astronomical Observations.
Observations of the night sky with the naked eye and small telescopes; indoor laboratory activities.

AST X04. Undergraduate Astronomy Seminar.
Discussions about current astronomical research, with different topics emphasized each semester.

AST X07. Introductory Astronomy.
Introduction to astronomy for science and engineering students. The solar system, stars, galaxies, and cosmology.

AST X09. Topics in Astronomy for Nonscience Students.
Selected topics in modern astronomy: solar system, galaxies, peculiar stars, cosmology, and others.

AST X09.1. Popular Astronomy.
Survey of topics of greatest interest to the public and the media, including new planets, black holes, dark matter, dark energy, and the origin of the Universe.

AST X09C. Birth of Stars and Planets.
Study of how stars and planets form, including discussions on the implications for the formation of our own solar system. Designed for non-College of Natural Sciences majors.

AST X09G. Popular Astronomy for Nonscience Students.
Subjects include new planets, neutron stars, supernovae, gamma-ray bursts, black holes, dark matter, dark energy, and the origin of the universe. Designed for non-College of Natural Sciences majors.

AST X09L. Search for Extraterrestrial Life.
Origin of life in the solar system, existence of other planetary systems, possibilities and techniques for detection of and communication with other intelligences. Designed for non-College of Natural Sciences majors.

AST X09N. Lives and Deaths of Stars.
How stars live and die; extremes of stars and their life cycles. Exotic objects such as white dwarfs, supernovae, neutron stars, pulsars, and black holes. Specific subjects may vary with instructor. Designed for non-College of Natural Sciences majors.

AST X09P. Astronomy in Science Fiction.
The use of astronomy and other sciences in science fiction literature. Critical analysis of selected novels as to the validity of the astronomy used. Designed for non-College of Natural Sciences majors.

AST X09Q. Time and the Cosmos.
From the beginning of time in the Big Bang to the end of time in the black hole. Includes the early universe, the formation and evolution of single and double stars, and the supercompact objects they eventually become: white dwarfs, pulsars, and black holes. Designed for non-College of Natural Sciences majors.

AST X09R. Galaxies, Quasars, and the Universe.
Galaxies, quasars, giant black holes; cosmic evolution; the origin and future of the universe. Designed for non-College of Natural Sciences majors.

AST X09S. The Solar System.
The nature, origin, and evolution of our solar system, including planets, moons, and other bodies. Designed for non-College of Natural Sciences majors.

AST X09T. The Milky Way Galaxy.
Our spiral system of stars, gas, and dust; star formation. Designed for non-College of Natural Sciences majors.

AST X10C. Conference Course in Astronomy.
Independent research course with supervision by astronomy faculty member or research scientist.

AST X10K. Topics in Astronomy Research.

AST X11G. Galaxy Evolution - Vertically Integrated Projects I.
Improve Python programming skills and learn application to galaxy evolution research in astronomy. Develop research skills through a group project and discussions. Report on progress each week, produce a research notebook, and conduct presentations.

AST X12G. Galaxy Evolution - Vertically Integrated Projects II.
Collaborate with senior mentoring team to define and develop capstone research project. Complete original project initiated in Astronomy 211G, and present results at the CNS Undergraduate Research Fair. Analyze and discuss current scientific papers related to astronomy.

AST X19S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AST X29S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

AST X19S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AST X21. Topics in Current Problems in Astronomy.

AST X22G. Galaxy Evolution - Vertically Integrated Projects Capstone.
Continue capstone research project developed in Astronomy 212G. Discuss and pursue publication possibilities. Present poster of research results at the CNS Undergraduate Research Fair and in an oral presentation.

AST X24. Origins: The Universe, Stars, Planets, and Life.
Cosmic origins from the Big Bang to life, and the connections among the origins of stars, planets, and life.

AST X29S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AST X50L. History and Philosophy of Astronomy.
Historical influence of astronomical concepts on social, economic, literary, and scientific life; the place of astronomy in society.

AST X51. Astronomical Instrumentation.
A hands-on course in computer-controlled optical instrumentation. Intended for natural science and engineering students interested in the practical aspects of instrument design and construction. Includes optics and optical design, electronics, machining and mechanical design, and computer interfacing. Students work in groups and as teams to design a computer-controlled optical instrument.

AST X52K. Stellar Astronomy.
Properties of stars and starlight: principles of radiation; interpretation of stellar spectra. Observational techniques such as photometry, spectroscopy, and telescopes and detectors; variable stars; binary stars.

AST X52L. Positional, Dynamical, and Kinematical Astronomy.
Coordinate systems and time; stellar positions and motions; the kinematics and dynamics of star clusters and galaxies.

AST X52M. Stellar Astronomy Laboratory.
An introduction to practical observational techniques in astronomy, designed for astronomy majors or advanced students in a physical science. Exercises on the spectroscopy, photometry, and positions of stars using a sixteen-inch telescope on campus.

AST X53. Astrophysics.
Survey of the physics of stellar and nonstellar radiation laws, stellar atmospheres and interiors; high-energy astrophysics. Designed for science and engineering majors.

AST X58. Galaxies and the Universe.
Our galaxy and its constituents; stars and interstellar matter. Properties of other galaxies; galaxy interactions and mergers; expansion and evolution of the universe. Designed for science and engineering majors.

AST X64P. Planetary Systems.
Modern studies of the solar system, including properties of the planets and smaller bodies, and the origin of planetary systems.

AST X67M. Physical Science: Methods of Astronomy.
An introductory, self-paced course in the methods of astronomy that emphasizes learning astronomical principles through observations.

AST X75. Topics in Astronomy Research.

AST X75C. Conference Course in Astronomy.
Independent research course with astronomy faculty member or research scientist.

AST X76. Special Topics in Advanced Astronomy.

AST X76.1. Observational Methods in Astronomy.
A hands-on course in astronomical observations and data analysis. Explores astronomical observing techniques, data reduction and analysis, and interpretation of results. The coursework will include regular exercises in obtaining and analyzing data to solve currently relevant astronomical problems.

AST X76C. Cosmology.
The laws of physics applied to the Universe at large: its featureless beginning in the Big Bang, its fundamental constituents including radiation, atoms, and dark matter; the discoveries of universal expansion and dark energy, and a structure reflected in the web of galaxies. Designed for science and engineering majors.

AST X76R. A Practical Introduction to Research Methods.
Practical exercises including analysis of imaging data, visualization, programming exercises with Python, IDL or other languages, statistical analyses, and training for papers and oral presentations.

AST X79H. Honors Tutorial Course.
Research project and thesis for students electing to take the honors program in astronomy.

Graduate Courses

AST X19S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AST X29S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AST X80E. Radiative Processes and Radiative Transfer.
Classical and quantum radiative processes relevant to astrophysics; basic radiative transfer.

AST X81. Topics in Theoretical Astrophysics.

AST X81C. Gravitational Dynamics.
Orbital, collective, and tidal effects of astronomical objects, such as planets, stars, galaxies, and interstellar medium, under the influence of a gravitational field.

AST X81S. Seminar in Theoretical Astrophysics.
Topics to be announced.

AST X82C. Astrophysical Gas Dynamics.
The basic principles of compressible gas dynamics and magnetohydrodynamics, developed and applied in an astrophysical context to a wide range of astronomical phenomena.

AST X82D. Astronomical Data Analysis.
Apply statistical analysis techniques to astronomical data. Examine probability theory, parameter estimation, Bayesian statistics, Markov Chain Monte Carlo methods, and model fitting.

AST X83. Topics in Stellar Astronomy.

AST X83C. Stellar Atmospheres.
Observational properties of stellar atmospheres; theoretical calculations of stellar atmospheres and stellar spectra.

AST X83D. Stellar Structure and Evolution.
Theoretical calculations of the structure and evolution of stars.

AST X83E. Order of Magnitude Astrophysics.
Apply rapid estimation strategies employing astrophysical knowledge to answer a broad range of problems. Develop skills in posing and answering questions about research.

AST X83L. Seminar in Planets and Life.
Discussions concerning the solar system; the detection, formation, and evolution of planets; planetary atmospheres, climates, and meteorology; and various aspects of life in the universe.

AST X83T. Seminar in Stellar Astronomy.

AST X84C. Computational Astrophysics.
Investigate, compare, and implement computational techniques for numerical modeling of astrophysical systems.

AST X84T. Current Studies in Astronomy for Teachers.
Lectures and laboratory work in astronomy for elementary and secondary school teachers of earth science, physical science, or astronomy.

AST X85. Topics in Conference Course.

AST X85C. Conference on Modern Astronomy.
A broad introduction to the research being conducted by the faculty and research staff in astronomy.

AST X86. Topics in Extragalactic Astronomy.
Topics include classification of galaxies, distance indicators, luminosities, dimensions, colors, spectra, polarization, radio emission, rotation, masses; formation and evolution; pairs, groups, clusters, superclusters, large-scale distribution, redshifts, cosmology.

AST X86C. Properties of Galaxies.
Observational properties of galaxies and their interpretation; includes a discussion of the Milky Way galaxy.

AST X86S. Seminar in Extragalactic Astronomy.
Topics to be announced.

AST X89. Topics in Dynamical Astronomy.
Topics include planetary and stellar motions, asymptotic representations of quasi integrals, galactic dynamics.

AST X90F. Stars, Planets, and Interstellar Matter Seminar.
Present and discuss current research broadly related to stars, planets in the Solar System, extrasolar planets, and interstellar matter.

AST X90G. Galaxies and Cosmology Seminar.
Present and discuss current research on properties of galaxies, galaxy evolution, cosmology, and related subjects.
AST X91. Graduate Research in Astronomy.
AST X92D. Mathematical Methods of Astrophysics.
Statistics, error theory, least squares and curve fitting, numerical methods, approximation theory, Fourier transforms, sampling theory, time-series analysis.
AST X92E. Topics in Optical Techniques in Astronomy.
Topics include photometry, spectroscopy, direct imaging, interferometry and polarimetry at ultraviolet, visual, and infrared wavelengths.
AST X92G. Observing Techniques in Astronomy.
Survey of techniques used at the McDonald Observatory. Includes workshop at the observatory.
AST X92J. Astronomical Instrumentation.
A hands-on course in instrument development, including mechanical design and machining, electronics design, optical design and optics, computer interfacing, and project planning. Students use CAD programs in each area and design and build a computer-controlled instrument. Learning activities are carried out in groups and teams.
AST X93F. Survey of the Interstellar Medium.
A broad introduction to the processes and properties of the interstellar medium. Topics include H I regions, H II regions, molecular clouds, interstellar dust, and the distribution of the interstellar medium in our galaxy.
AST X93S. Seminar in Interstellar Matter.
Topics to be announced.
AST X94F. Formation of Galaxies and Large-Scale Structure.
Investigate formation and evolution of galaxies and larger structures in their cosmological context, including dark matter, dark energy, and the intergalactic medium.
AST X94P. Planetary Astrophysics.
Discuss exoplanet detection methods; demographics, architecture, formation and evolution of planetary systems; planetary interiors, atmospheres and habitability.
AST X95H. High Redshift Galaxies.
Examine galaxy evolution, emphasizing first galaxies to the cosmic star formation peak at redshift z=2. Interpret relevant observations and simulations.
AST X96C. Elements of Cosmology.
A theoretical discussion of the origin and evolution of the universe; includes a brief review of general relativity.
AST X97. Graduate Research Project.
Two-semester graduate research project in astronomy.
AST X98. Thesis.
AST X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
AST X98T. Supervised Teaching in Astronomy.
Effective astronomy teaching: course design, instructional materials, test design, other methods. In-class practice teaching. Projects in astronomy education.
AST X99W. Dissertation.

Professional Courses

AST X19S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
AST X29S. Topics in Astronomy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

AUD - Audiology

Audiology: AUD

Lower-Division Courses

Upper-Division Courses

Graduate Courses

Professional Courses

AUD X81P. Auditory Processing Disorders.
Examine the assessment and treatment of disorders of the central auditory nervous system in children and adults.
AUD X83P. Surgically Implanted Auditory Prostheses.
Explore the theory behind implantable auditory technology and application. Learn to determine implant candidacy and outcomes of implantable devices.
AUD X83S. Applications of Surgically Implanted Auditory Prostheses.
Learn clinically applied skills in implantable auditory devices such as programming and assessing patient outcomes.
AUD X88P. Basic Clinical Practicum in Audiology.
Examine the basic foundations of practice in clinical audiology.
AUD X89P. Intermediate Clinical Practicum in Audiology.
Examine the intermediate methods and experiential learning in an immersive clinical audiology setting.
AUD X90Q. Business Applications.
Examine issues associated with the development, operation, and management of businesses devoted to service delivery in audiology and speech-language pathology.
AUD X91P. Anatomy and Physiology of the Auditory System.
Explore the structure and function of the auditory system, including hearing and balance mechanisms.
AUD X92C. Counseling.
Examine both speech-language pathology and audiology counseling roles when implementing patient-centered and family-centered care in a variety of settings.
AUD X94E. Auditory Electrophysiology.
Review the auditory nervous system and evaluate electrodermal, electroencephalographic, and electrocardiographic audiometry in depth.
AUD X94J. Auditory Perception.
Examine an overview of theories and research findings related to human auditory perception and recognition including acoustic characteristics of speech categorical perception, sound localization, and pitch and loudness perception.
AUD X94K. Aural Habilitation.
Examine both the pediatric and educational audiologist's roles when working with hard of hearing or deaf children and their families.
AUD X94P. Amplifying Systems in Aural Rehabilitation.
Examine principles of hearing aid circuitry and looped systems; ear molds and acoustic properties thereof; electroacoustic properties of hearing aids and selection procedures.
AUD X94S. Medical Audiology.
Explore audiologic implications of pathology and medical and/or surgical treatment of the ear; otologic diagnoses.
AUD X94T. Topics in Audiology.
Apply advanced clinical skills in Audiology for challenging disorders such as tinnitus, decreased sound tolerance, and auditory dysfunction in normal hearing.

AUD X95Q. Pediatric Audiology.
Explore current methods of testing the hearing of young children, including identification, electrophysiological and operant audiometry, and medical aspects of hearing loss in children.
AUD X96H. Vestibular Sciences I.
Explore vestibular anatomy and physiology, including vestibular dysfunction in congenital and adult disorders.
AUD X96J. Vestibular Sciences II.
Learn and apply vestibular diagnostic techniques designed to assess peripheral through central vestibular function.
AUD X96P. Signals and Systems in Hearing and Speech.
Explore electrophysiological and electroacoustic procedures in the study of communication behaviors.
AUD X96Q. Advanced Amplifying Systems.
Explore the fitting of amplification systems in various clinical populations, with a main focus on pediatric amplification followed by complex amplification cases across the lifespan.
AUD X97. Clinical Externship in Audiology.
Engage in an intensive clinical experience in a professional setting.
AUD X98. Audiology Research Practicum.
Conduct research under the mentorship of an Audiology Faculty member. Present a prospectus at the end of the second year to faculty and peers. Present findings to faculty/peers and present at conference and/or submission for publication at the end of the third year.
AUD X98Q. Research Project in Audiology.
Learn about conducting a research study and how to design a study. Read and integrate relevant literature and develop hypotheses and research plan. Identify a mentor for the Audiology Research Practicum.

B A - Business Administration

Business Administration: B A

Lower-Division Courses

B A X01F. First-Year Interest Group Seminar.
Basic issues in various McCombs School of Business disciplines.
B A X01H. Professional Development and Career Planning: Honors.
Professional development issues including self-assessment, identification of personal life goals, identification of business majors and exploration of potential career fields for each major, and analysis and discussion of the academic planning process and how it relates to professional development and career planning.
B A X01S. Professional Development and Career Planning.
Discussion of issues surrounding career planning, implementation, and evaluation in order to establish career goals. Strategies for executing a successful job search, including interviewing techniques, resumes, networking, and job search ethics. Focus on career management as a lifelong process.
B A X01T. Professional Development and Career Planning.
Discussion of issues surrounding career planning, implementation, and evaluation.
B A X02F. Career Planning.
Practice career exploration, planning, and networking techniques. Focus on exploring interests, job search, and alignment of personal and professional goals. Explore experiential learning and peer-to-peer assessment to optimize resume, storytelling, and interviewing techniques.
B A X05. Topics in Business Administration Leadership.
Explores current theory and research related to peer mentoring and leadership with higher education and business.
B A X10G. Topics in Professional Growth I.
B A X11F. Career Planning: The Business of Your Career.
Practice career exploration, planning, and networking techniques. Focus on exploring interests, job search, and alignment of personal and professional goals. Explore experiential learning and peer-to-peer assessment to optimize resume, storytelling, and interviewing techniques.
B A X11G. Topics in Professional Growth II.
B A X18H. Business Honors Program Seminar.
Basic issues in various interdisciplinary and business fields of study.
B A X19. Topics in International Learning Seminar.
Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.
B A X19S. Topics in Business Administration.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the Bachelor of Business Administration's study abroad director in the McCombs School of Business. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
B A X87T. Legal and Regulatory Environment of Business.
Examination of relationships between public and private institutions, with emphasis on the legal constraints on managerial decision making.

Upper-Division Courses

B A X20F. Foundations of Entrepreneurship.
Introduction to the mechanics and strategies for starting a business.
B A X20G. Topics in Professional Growth III.
B A X21L. Contemporary Leadership Issues.
Focuses on leadership topics such as ethics, diversity, and sustainability.
B A X24. Business Communication: Oral and Written.
Theory and practice of effective communication, using models from business situations. Students practice what they learn with a variety of in-class activities, written assignments, and oral presentations. Teamwork and use of interpersonal skills are included.
B A X24H. Business Communication: Oral and Written: Honors.
Theory and practice of effective communication, using models from business situations. Students practice what they learn with a variety of in-class activities, written assignments, and oral presentations. Teamwork and use of interpersonal skills are included.
B A X30G. Topics in Professional Growth IV.
B A X32F. Topics in Foundations of Business.
B A X40G. Topics in Professional Growth V.
B A X40S. Topics in Business Administration.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the Bachelor of Business Administration's study abroad director in the McCombs School of Business. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
B A X49. Topics in International Learning Seminar.
Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.
B A X52F. Internship in Foundations of Business Administration.
Focuses on students' career goals through academic discussion and evaluations, while students are working in professional internships with public and private enterprises. Internship to be arranged by the student and approved by the director of the Business Foundations Program.
B A X53. Internship in Business Administration.
Provides a format for reflection during a professional internship, resulting in improved ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

B A X66F. Foundations of Business Administration Practicum.
Students apply skills related to the Business Foundations certificate program curriculum and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

B A X66P. Business Administration Practicum.
Apply business skills through group projects conducted in a professional setting. Work with a private or a public enterprise.

B A X76C. Advanced Topics in Finance and Accounting.
Rigorous introduction into the topics and processes of accounting and finance in business. Focus on how to apply analytical skills to make better business decisions. Taught by faculty from the McCombs School of Business.

B A X76D. Advanced Topics in Marketing.
Explores marketing strategies and practices that are applicable to multiple departments across organizations. Discussion of marketing tactics and the impact of marketing on business operations.

B A X76E. Advanced Topics in Leadership and Management.
Discussion of strategies to foster highly effective communication and collaboration in order to become more successful and valuable as a leader.

B A X76F. Advanced Topics in Business Analytics.
Introduction to the leading edge of big data and data analytics.

B A X76G. Advanced Topics in Supply Chain.
Explores the tools and ideas that help shape and define the various components of value creation. Dive into the process and strategies behind acquiring, producing and delivering goods and services, whether domestically or globally.

B A X76J. Advanced Topics in Energy.
Focus on the economics, strategy, business valuation and finance specific to the energy industry.

B A X76K. Advanced Topics in Strategy.
Focus on developing the knowledge and thought processes necessary to make high-impact decisions within an organization.

B A X76L. Advanced Topics in Strategic Decision Making and Risk Management.
Explores techniques to recognize risks from stakeholders' perspectives. Discussion of how to frame strategic choices, generate alternatives, and create models that answer executives' questions, produce compelling analyses, and ultimately gain commitment.

B A X76N. Advanced Topics in Business.
Explores the skill set needed to move from a functional area to a cross functional management role.

B A X78F. Independent Research in Foundations of Business Administration.

B A X87T. Legal and Regulatory Environment of Business.
Examination of relationships between public and private institutions, with emphasis on the legal constraints on managerial decision making.

Graduate Courses

B A X80C. Information Technology Management.
A discussion of technical architecture, including hardware/software platforms, operating systems, networking and the Internet; development strategies; and management issues for the introduction of new technology.

B A X80F. Accounting Information for Managerial Decision Making.
Financial information regarding revenue, cost, and assets, with an emphasis on the interpretation of numbers to derive well-informed management decisions. Covers the role of taxes in business strategy.

B A X80G. Executive Seminar.
Examine the integration of business executive and real-world problem solving, career preparation, and professional growth.

B A X80M. Management Science.
Introduction to the structure and use of mathematical models and methods for analyzing managerial decision problems. Development and application of modeling concepts and skills underlying the analytical techniques used to solve such problems. Introduction to a range of computers, and use of the latest in computer-based decision support systems.

B A X80N. Operations Management.
An introduction to the issues and decisions involved in the production of goods and services. Focuses on designing, operating, controlling, and improving the systems that accomplish production.

B A X80P. Project Management.
An introduction to the techniques used in managing complex projects, with a central theme of managing risk and variability. Examine the progressive elaboration of cost and schedule estimates in the presence of significant uncertainty.

B A X80S. Managerial Economics.
Microeconomic and macroeconomic forces that influence an organization's decisions: interest rates, business cycles, financial systems, input demand and supply, industry factors, market structure, and externalities.

B A X81C. Strategic Career Planning.
Issues surrounding career planning, including exploration and implementation. Professional development issues, including self-assessment.

B A X81M. Marketing Management for Executives.
Study the marketing function in modern organizations, focusing on understanding consumer behavior, development of an organization's value proposition, competitive positioning, and the major tactical decisions regarding product planning, marketing communications, pricing, and distribution.

B A X81T. Marketing Management.
An introduction to the marketing perspective on strategy development and to the elements of marketing analysis. Includes the functional decision areas of the marketing manager, such as products and product lines, pricing policies, branding, promotion and advertising, and channels of distribution, and how organizations use these components to create, capture, and sustain value for the firm.

B A X82C. Strategies for Career Planning.
Examine the McCombs Career Management Framework (Discover, Connect, Strategize, Engage). Assess strengths and values, develop professional networks, research target industries and companies, create comprehensive career portfolios including tailored resumes and LinkedIn profiles, and build behavioral interviewing skills using STAR methodology. Explore practical application through informational interviews, mock interviews, networking events, and personalized career strategy development to effectively translate academic training into meaningful career opportunities.

B A X82T. Managerial Accounting.
An investigation of the conceptual and operational relationship of planning and control with management and accounting information systems. Topics include data collection and analysis for short-range and long-range organizational decisions.

B A X84F. Financial Reporting for Executives.
Examine the strengths and weaknesses of the information produced in financial reports, the pressures faced by management and auditors as they prepare financial statements, the difficulties involved in evaluating decisions after outcomes are known, and the impact of accounting information on strategic decisions.

B A X84S. Topics in Economics for Business.
Microeconomic and macroeconomic forces that influence an organization's decisions, such as interest rates, business cycles, financial systems, input demand and supply, industry factors, market structure, and externalities.

B A X84S.1. Managerial Microeconomics.
Microeconomic forces that influence an organization's decisions, including input supply and demand, industry factors, market structure, and externalities.

B A X84S.2. Managerial Macroeconomics.
Macroeconomic forces that influence an organization's decisions, including interest rates, business cycles, and financial systems.

B A X84S.3. Global Economics for Executives.
Explore both microeconomics and macroeconomics, with a special emphasis on global macro phenomena.

B A X84T. Financial Accounting.
An examination of the information needs of capital market participants in a dynamic and complex socioeconomic system; emphasis on interpretation, measurement, and disclosure of economic events.

B A X85F. Financial Management Concepts and Applications for Executives.
Examine the core concepts underlying financial management. Explore organizational forms of business, the time value of money, debt and equity markets, agency theory, risk and return, value creation, capital budgeting, firm valuation, and the fundamentals of risk-management.

B A X85G. Strategies for Digital Transformation.
Examine concepts and principles from different disciplines in strategy, marketing, economics and operations.

B A X85T. Financial Management.
An exploration of concepts and techniques employed in investment decision making, working capital management, and financing the activities of a business.

B A X86S. Statistics for Executives.
Explore regression as a universal model for linking data to outcomes. Discuss how to set up and run a regression model, evaluate when the model is correct, and interpret the results. Examine illustrative case studies that use regression models to forecast a firm's future sales, determine if apartments and homes are overpriced, evaluate the relative riskiness of owning shares of a stock, develop an optimal bidding strategy, estimate the value of a physical asset, and value a contingent contract offer in a negotiation.

B A X86T. Statistics.
A unified approach to basic concepts in collection, analysis, and interpretation of data, emphasizing capabilities of different statistical methods and business applications. Students use statistical software packages.

B A X87T. Legal and Regulatory Environment of Business.
Examination of relationships between public and private institutions, with emphasis on the legal constraints on managerial decision making.

B A X88F. Foundations of Strategy for Executives.
Explore the foundations of strategy at the top management level, specifically, the antecedents, formulations, and effects of firm strategies.

B A X88T. Strategic Management.
Designed to help students develop a general management orientation. Subjects include the role of the general manager, formulating business and corporate-level strategy, managing strategic change, strategy implementation, and developing general managers.

B A X89T. Managing People and Organizations.
Development of the general areas of theory most central to dealing with the varieties of social/psychological behavior of direct import to the administrator and manager.

B A X90C. Hardware, Software, and Telecommunications.
Provides a broad familiarity with the latest advances in the fundamental concepts and terminology of computer architecture and software.

B A X90D. Management Information Systems.
The use of decision support systems and database management concepts in an organization for information management and processing by mainframe and personal computer.

B A X90F. Information Systems Design and Implementation.
Specification, design, implementation, and testing of information systems.

B A X90H. Managing Information.
Management and use of information in organizations, including database management, analytical approaches for effective information management, and organizational issues.

B A X90J. Data Communications, Networks, and Distributed Processing.
Functional aspects of data communications, computer networks, and distributed information systems, using campus computers and the network systems available in the classroom.

B A X91. Special Topics in Business Administration.

B A X91.1. Finance.

B A X91.2. Management.

B A X91.3. Real Estate.

B A X91.4. Risk Management.

B A X91.5. Accounting.

B A X91.6. Marketing.

B A X91.8. Business, Government, and Society.

B A X92C. Special Studies in Business, Government, and Society.

B A X92D. Special Studies in Business, Government, and Society.

B A X92E. Special Studies in Finance.

B A X92F. Special Studies in Finance.

B A X92G. Special Studies in International Business.

B A X92H. Special Studies in International Business.

B A X92J. Special Studies in Legal Environment of Business.

B A X92K. Special Studies in Legal Environment of Business.

B A X92L. Special Studies in Management.

B A X92M. Special Studies in Management.

B A X92N. Special Studies in Management Information Systems.

B A X92P. Special Studies in Management Information Systems.

B A X92Q. Special Studies in Marketing.

B A X92R. Special Studies in Marketing.

B A X92S. Special Studies in Operations.

B A X92T. Special Studies in Operations.

B A X92U. Special Studies in Risk Management.

B A X92V. Special Studies in Risk Management.

B A X98L. Written and Oral Communication for International Students.
Designed to provide students at the high-intermediate level of English proficiency with communication skills beyond pronunciation and grammatical accuracy.

B A X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

B A X98T. Supervised Teaching in Business Administration.
Teaching in the McCombs School of Business for two semesters under the close direction of the course instructor or supervisor; weekly group meetings with the instructor, individual consultations, and reports throughout the teaching period.

Professional Courses

B A X87T. Legal and Regulatory Environment of Business.
Examination of relationships between public and private institutions, with emphasis on the legal constraints on managerial decision making.

BAH - Business Administration Honors

Business Administration Honors: BAH

Lower-Division Courses

BAH X10G. Topics in Professional Growth I.

BAH X11G. Topics in Professional Growth II.

BAH X19S. Topics in Business Administration Honors.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Business. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BAH X29S. Topics in Business Administration Honors.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Business. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BAH X51H. Lyceum.

Observe professionals from various fields of business.

BAH X79. Independent Research.

Graduate Courses

Professional Courses

BAX - Business Analytics

Business Analytics: BAX

Lower-Division Courses

BAX X04. Introduction to Problem Solving and Programming.

Programming skills for creating easy-to-maintain systems for business applications. Object-oriented and structured methodologies with Python.

BAX X05. Programming for Data Analytics.

Examine general principles of computer languages and basic object-oriented programming principles. Translate business problems from English into programs written using the Python language. Explore automatic function optimization needed for decision-making. Utilize Python for hands-on work.

BAX X19S. Topics in Business Analytics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BAX X20F. Foundations of Business Analytics.

BAX X25. Database Management.

Beginning and intermediate topics in data modeling for relational database management systems.

BAX X27. Data Management.

Explore how to tailor data strategy to business strategy and the technical skills related to understanding data sources, acquiring data, storing data efficiently, and processing the data in preparation for analysis. Learn how to engineer and manage data pipelines, create data stores for analytics, and use data management specific APIs (application programming interfaces). Examine the importance of implementing data governance, understanding data limitations, and assessing the fairness of data collection and usage.

BAX X29S. Topics in Business Analytics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BAX X32F. Topics in Foundations of Business Analytics.

BAX X38. Supply Chain Modeling and Optimization.

Framing, formulating, and applying quantitative optimization and descriptive models to support supply chain and operations management decisions, using spreadsheets and other software. Requires familiarity with spreadsheets.

BAX X57. Predictive Analytics.

Introduction to machine learning and artificial intelligence techniques with a focus on business applications and decision-making. Examine predictive frameworks, including tree-based techniques and artificial neural networks and their applications in business contexts. Explore solid foundations for evaluating models to understand their impact in a given business context, discuss issues related to algorithmic decision-making, and algorithmic bias and fairness.

BAX X58. Optimization Methods and Decision Making.

Examine decision-making in deterministic settings. Discuss optimization and planning in various contexts including portfolio selection, production planning, marketing allocations, revenue management and pricing. Explore linear, quadratic, nonlinear, and integer programming. Utilize Python for hands-on work.

BAX X60. Information and Analysis.

The development and analysis of information for marketing management sources.

BAX X62. Auditing and Control.

Professional practice standards and procedures of auditing: ethics, legal liability, sampling methods, control systems, control design, and control evaluation.

BAX X65. Ethics of Business Analytics.

Analyze the ethical questions and implications of applying data science to business problems. Examine ethical, policy, and legal terminology used to conceptualize challenges. Explore technical approaches to characterize ethical problems, and historical cases and recent controversies involving data science ethics. Discuss data as abstraction and representations, data collection, consent and privacy, bias in predictive modeling, and algorithms as actors and feedback loops.

BAX X66. Advanced Programming for Data Analytics.

Study exploratory data analysis in-depth. Examine machine learning approaches such as classification and clustering, with a focus on practical implementation of machine learning projects. Explore tools for extraction of structured data and methods for analyzing data networks. Utilize Python for hands-on work.

BAX X66P. Business Analytics Practicum.

Apply skills in a major area and focus on additional business analytics skills through group projects conducted in a professional setting. Work with a private or a public enterprise.

BAX X67. Advanced Predictive Analytics.

Explore problem formulation, data understanding and preparation, and class imbalance and biases in observed and unobserved information. Examine predictive frameworks such as network and graph data analysis, unstructured data analysis, and subjects related to deep neural network architectures and their business applications.

BAX X68. Advanced Optimization Methods and Decision Making.

Examine decision-making under uncertainty. Discuss optimization and planning in various contexts including queueing, resource allocation, pricing, inventory management, and artificial intelligence. Explore stochastic optimization, sample average approximations, simulation, and sequential decision making. Utilize Python for hands-on work.

BAX X71T. Topics in Business Analytics.
BAX X72T. Topics in Business Analytics.
BAX X72T.11. Advanced Analytics Programming.
Focus on data analysis using the Python programming language. Explore machine learning tasks such as classification and clustering.
BAX X72T.13. Data Driven Marketing.
Explore marketing research analytics using various types of data analytics and statistical learning modes.
BAX X72T.14. Quantitative Investment Management.
Examine the economic, statistical, and computing frameworks behind quantitative approaches to evaluating and implementing investment strategies, as well as the empirical evidence on their performance in multiple asset classes. Apply the quantitative big-data approach by developing, pitching, and backtesting an original trading strategy.
BAX X72T.15. Financial Technology.
Explore an overview of the most recent technological advances that are changing the financial services industry and how these technological breakthroughs offer new ways for people to save, invest, borrow, and transact. Analyze how new technologies create value in the financial industry, from reducing unit cost, increasing transparency, increasing competition, creating network effects, leveraging economies of scales, and lowering asymmetric information. Examine the competitive landscape and the market opportunities and threats for incumbents and new entrants.
BAX X72T.16. Optimization Method in Finance.
Explore quantitative methods and techniques in optimization and simulation, and their use in financial decision making. Discuss theory and application in portfolio selection, options and other derivative pricing, index tracking, risk measures, volatility estimating. Examine linear, quadratic, nonlinear, and integer programming; dynamic programming; robust optimization; Monte Carlo methods and variance reduction techniques. Emphasis will be placed on problem solving with advanced computational programming languages.
BAX X72T.17. Health Care Analytics.
Explore key management challenges and how data may be leveraged to guide decisions and improve operations, with the unifying theme of providing health care services in a manner that leads to lower cost and higher quality.
BAX X72T.18. People Analytics.
Explore the use of analytics in the creation and management of human capital. Examine recruiting, selecting, deploying, developing, and managing performance of employees.
BAX X72T.19. Pricing and Channels.
Explore the concept, theory, and latest thinking that bares on key issues in pricing and channels; taking the perspective of the marketing manager. Apply concepts and theory, through extensive case analyses, to solve pricing and channel problems in realistic business settings.
BAX X72T.20. Supply Chain Analytics.
Study dynamic demand forecasting models based on both data aggregation as well as hierarchical aggregation of point-of-sale predictive analytics. Explore the use of developed predictive dynamic models for operations planning and operations decision maing.
BAX X72T.21. Time Series Forecasting.
Examine statistical forecasting methods used in business. Discuss Box-Jenkins models; exponential smoothing models; ARCH/GARCH models for varying volatility in financial returns; seasonal adjustment of time series; tests for nonstationary of time series; and modeling multiple time series.
BAX X72T.22. Predictive Analytics and Data Mining.
Introduction to data mining problems and tools to enhance managerial decision making at all levels of the organization. Discuss scenarios, including the use of data mining to support customer relationship management (CRM) decisions, decisions in the entertainment industry, financial trading, and even professional sports teams.
BAX X72T.23. Social Media Analytics.
Introduction to social network analysis for business value using statistical optimization and decision theory. Analyze online search and conversation data for market sensing, sentiments, product quality, reputation, recommendations, and brand awareness.
BAX X72T.24. Data-Driven Revenue Management.
Use data-driven tactics and strategies to predict consumer demand and optimize price and capacity/inventory availability to maximize revenue or profit. Explore demand analytics and revenue management techniques, produce rigorous and practical insights, and develop data analysis and optimization skills, based on business cases, datasets, and exercises. Examine diverse contexts and industries, such as conventional retailing, e-commerce, airline/hotel, and contemporary platform and cloud services (e.g., Uber, Dropbox, Netflix, AWS), by utilizing software (Excel, R, or Python) to build models, conduct optimization, and develop insights for a variety of revenue management examples.
BAX X72T.25. User Generated Content Analytics.
Focus on a gamut of questions ranging from strategic to operational matters pertaining to a firm's social media initiatives, metrics to capture relevant outcomes, and predictive analysis to link social media chatter to business performance.
BAX X72T.26. Data Analytics for Marketing.
Introduction to making more effective marketing decisions through the use of data. Examine sources, collecting and cleansing methods, conducting analyses, and presenting of data. Use real-world data and applications from a variety of industries.
BAX X75. Business Analytics in Practice.
Examine the role of business analytics in the context of the broader operations of a firm. Explore the use of business analytics in firms, the impact on business performance, and the ways that it can enhance firm value, through a series of case studies.

Graduate Courses
Professional Courses

BCH - Biochemistry

Biochemistry: BCH
Lower-Division Courses
BCH X06K. Undergraduate Research.
Introduction to research practices; supervised individual undergraduate research in biochemistry.
BCH X15L. Introduction to Biotechnology Laboratory Skills.
Explore skills, concepts, and careers in biotechnology, biochemistry and the molecular biosciences.
BCH X15T. Special Topics in Biotechnology.
Explore recent development and research methods in biotechnology and biomanufacturing.
BCH X19L. Introduction to Biochemical Laboratory Practices and Skills.
Explore basic skills used by biochemists and an introduction to future career options. Examine basic biochemical concepts and laboratory, computational, and professional skills.
BCH X19S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BCH X29S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University

credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BCH X19S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCH X29S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCH X30M. Medical Biochemistry.
Apply the principles of biochemistry to medicine and physiology to gain an understanding of organ function and regulating metabolite homeostasis.

BCH X39F. Foundations of Biochemistry.
Metabolism of carbohydrates, lipids, amino acids, and nucleotides; structure and function of proteins.

BCH X39J. Chemical and Synthetic Biology.
Topics include enzymatic reaction mechanisms and how they can be manipulated using tools from both chemistry and molecular biology. Designed for students pursuing pharmaceutical and biotechnology careers.

BCH X39M. Structure and Function of Molecular Machines.
Function of proteins and protein complexes as machines in the cell, including the interaction of proteins with nucleic acids, synthesis of proteins, and degradation of proteins.

BCH X39N. Systems Biology and Bioinformatics.
Understanding how the cell works as a system with emphasis on the methods used to gather and analyze data and develop/test models of systems level data.

BCH X39P. Biochemistry in Physiology and Medicine.
Explore the fundamentals of physiology and medicine to understand how the body functions and maintains homeostasis through the principles of biochemistry.

BCH X47. Topics in Biochemistry.
Explore recent developments and research methods in biochemistry.

BCH X64C. Bioinformatics.
Examine typical data, data analysis, and algorithms encountered in computational biology. Includes introductory probability and statistics, basics of programming, protein and nucleic acid sequence analysis, genome sequencing and assembly, synthetic biology, analysis of large-scale gene expression data, data clustering, biological pattern recognition, and biological networks.

BCH X64D. Macromolecular Structure Determination.
Theory of physical methods used in biochemistry and molecular biology, with a strong emphasis on macromolecular structure determination by X-ray crystallography and cryo-electron microscopy. Includes surface plasmon resonance, isothermal titration calorimetry, and biolayer interferometry.

BCH X64E. Systems Biology.
Survey of current high-throughput technologies and computational methods for generating data and integrating information at all levels of biological organization. Emphasis on how hypotheses can be generated and tested with these techniques to better understand how model organisms function and evolve.

BCH X64F. Astrobiology.
An overview of the science used in the search for extraterrestrial life, life origins, earth history, evolution, metabolism of extremophiles, biochemistry, and astronomy.

BCH X65D. Structure and Function of Proteins and Nucleic Acids.
Exploration of the structures and functions of proteins and nucleic acids, utilizing quantitative methods to evaluate the roles of structural features in function, and developing new ways of thinking about the dynamics of macromolecules.

BCH X68C. Topics in Biochemistry.
Supervised study of selected topics in Biochemistry by individual arrangement with the instructor.

BCH X68H. Capstone Honors Research.
Conduct a laboratory research project in a specific field of biochemistry under the supervision of one or more faculty members.

BCH X68L. Capstone Course-Based Research Experience.
Explore experimental design, data collection, data analysis and fundamental principles of biochemistry research.

BCH X68M. Capstone Experience in Biochemistry.
Explore approved capstone experiences such as Biochemistry Research Experience Abroad, Biochemistry/Biotechnology Internships or other external, intensive biochemistry-related research experiences.

BCH X68R. Supervised Capstone Research.
Perform supervised independent research and write a capstone thesis on a selected subject in Biochemistry by individual arrangement with the instructor.

BCH X68T. Biotechnology Capstone.

BCH X68W. Supervised Literature Review.
Perform a supervised literature review and write a capstone thesis on a selected subject in Biochemistry by individual arrangement with the instructor.

BCH X69. Fundamentals of Biochemistry.
The basics of protein structure and function, carbon and nitrogen metabolism, and molecular biology of macromolecules.

BCH X69K. Techniques of Research.
Advanced laboratory practice and introduction to research.

BCH X69L. Biochemistry Laboratory.
An introduction to modern fundamental techniques of biochemistry.

BCH X69T. Biotechnology Laboratory.
Advanced techniques in biotechnology.

BCH X70. Physical Methods of Biochemistry.
Theory of electrophoresis, ultracentrifugation, spectroscopy, electron microscopy, and diffraction as applied to biological macromolecules.

BCH X75C. Biochemistry Capstone Seminar.
Receive guidance during capstone experience. Document and reflect on the experience, present capstone work in a professional venue, and discuss plans for transitioning to post-graduation careers.

BCH X79H. Biochemistry Honors Tutorial Course.
Laboratory research project in a specific field of biochemistry under the supervision of one or more faculty members.

Graduate Courses

BCH X19S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCH X29S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University

credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCH X80M. Dual MD/PhD Program with UT Medical Branch.
Preclinical medical study at the University of Texas Medical Branch at Galveston.

BCH X86. Topics in Problems and Methods in the Life Sciences.
Examine the questions addressed in modern life sciences research and the experimental methods used. Focus on experimental reasoning and on the application of different techniques to solve problems.

BCH X87D. Physical Methods in Biochemistry and Molecular Biology.
Theory of physical methods used in biochemistry and molecular biology.

BCH X90C. Topics in Biochemistry.
Discuss current topics in biochemistry.

BCH X94. Structure and Function of Proteins and Nucleic Acids.
Explores the structures and functions of proteins and nucleic acids. Emphasis is placed on quantitative methods used to evaluate the roles of structural features in function and in developing new ways of thinking about the dynamics of macromolecules.

BCH X94P. Bioinformatics.
Examine typical data, data analysis, and algorithms encountered in computational biology. Includes introductory probability and statistics, basics of programming, protein and nucleic acid sequence analysis, genome sequencing and assembly, synthetic biology, analysis of large-scale gene expression data, data clustering, biological pattern recognition, and biological networks.

BCH X95F. Advanced Biochemistry.
Explore advanced biochemistry concepts and the scientific process. Consider the structure and function of proteins, carbohydrates, lipids and nucleic acids, and discuss enzyme mechanisms and kinetics.

BCH X95G. Structure and Function of Proteins and Membranes.
Explore advanced biochemistry concepts and the scientific process. Examine a detailed consideration of the structure and function of proteins, carbohydrates, lipids and nucleic acids, as well as discussion of enzyme mechanisms and kinetics.

BCH X95J. Genes, Genomes, and Gene Expression.
Detailed consideration of prokaryotic and eukaryotic mechanisms of DNA replication and transcription; posttranscriptional processing of transcription products; and mechanism and regulation of the translation of messenger RNAs.

BCH X96S. Synthetic Biology.
Survey of current high-throughput technologies and computational methods for generating data and integrating information at all levels of biological organization. Emphasis on how hypotheses can be generated and tested with these techniques to better understand how model organisms function and evolve.

BCH X97C. Advanced Study and Research in Biochemistry.

BCH X98. Thesis.

BCH X98T. Professional Development for Graduate Students in Biochemistry.
Provides professional development skills to graduate students in biochemistry. Subjects include excellence in teaching, scientific communication, grantsmanship, ethics, and career planning.

BCH X99W. Dissertation.

Professional Courses

BCH X19S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCH X29S. Topics in Biochemistry.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCM - Bosnian, Croatian, Montenegrin, Serbian

Bosnian, Croatian, Montenegrin, Serbian: BCM

Lower-Division Courses

BCM X06. Bosnian, Croatian, Montenegrin, Serbian I.
Examine Bosnian, Croatian, Montenegrin, and Serbian languages with an emphasis on proficiency in four skills: listening, speaking, reading, and writing.

BCM X07. Bosnian, Croatian, Montenegrin, Serbian II.
Examine Bosnian, Croatian, Montenegrin, and Serbian languages with an emphasis on proficiency in four skills: listening, speaking, reading, and writing.

BCM X12K. Bosnian, Croatian, Montenegrin, Serbian III.
Explore Bosnian, Croatian, Montenegrin, Serbian languages through listening, speaking, reading, and writing at the second-year level.

BCM X12L. Bosnian, Croatian, Montenegrin, Serbian IV.
Explore Bosnian, Croatian, Montenegrin, Serbian languages through listening, speaking, reading, and writing at the second-year level.

BCM X19S. Topics in Bosnian, Croatian, Montenegrin, and Serbian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BCM X24. Bosnian, Croatian, Montenegrin, Serbian V.
Explore Bosnian, Croatian, Montenegrin, Serbian languages through oral expression, reading, and composition.

BCM X25. Bosnian, Croatian, Montenegrin, Serbian VI.
Explore Bosnian, Croatian, Montenegrin, Serbian languages through oral expression, reading, and composition.

BCM X26. Topics in Bosnian, Croatian, Montenegrin, Serbian.
Examine selected aspects of Bosnian, Croatian, Montenegrin, and Serbian history and culture.

BCM X29S. Topics in Bosnian, Croatian, Montenegrin, and Serbian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BCM X79. Conference Course in Bosnian, Croatian, Montenegrin, Serbian.
Conference course.

Graduate Courses

Professional Courses

BDP - Bridging Disciplines

Bridging Disciplines: BDP

Lower-Division Courses

BDP X01. Topics in Forum Seminar Series.

BDP X01.1. Children and Society.
Discuss various contemporary issues in children and society, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.10. Introduction to Smart Cities.
Discuss various contemporary issues relevant to smart cities, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.11. Patients, Practitioners, and Cultures of Care.
Discuss various contemporary issues relevant to patients, practitioners, and cultures of care, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.12. Professional Ethics in Law, Business, and Medicine.
Discuss various contemporary issues in professional ethics, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.13. Social Inequality, Health, and Policy.
Discuss various contemporary issues in social inequality, health, and policy, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.14. Narrative Leadership.
Discuss various contemporary issues in leadership and ethics, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.15. Introduction to the Entrepreneurial Mindset.
Discuss various contemporary issues relevant to what it means to be entrepreneurial, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.16. Criminal Law, Justice and Inequality.
Discuss various contemporary issues in criminal law, justice, and inequality, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.17. Non-profits and Social Entrepreneurship.
Discuss various contemporary issues in non-profits and social entrepreneurship, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.18. Conflict Prevention, Management, and Resolution.
Discuss various contemporary issues in conflict prevention, management, and resolution, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.2. Environmental Change and Sustainability.
Discuss various contemporary issues in environmental change and sustainability, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.3. Exploring Digital Arts and Media.
Discuss various contemporary issues in digital arts and media, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.4. Health Inequality in Childhood and Adolescence.
Discuss various contemporary issues in health inequality in childhood and adolescence, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.5. Human Rights and Social Justice.
Discuss various contemporary issues in human rights and social justice, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.8. Introduction to Museum Studies.
Discuss various contemporary issues in museum studies, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X01.9. Introduction to Public Policy.
Discuss various contemporary issues in public policy, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X06. Fundamentals of Ethical Leadership.
Discussion of various contemporary issues related to ethical leadership, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X06C. Principles of Business.
Interdisciplinary examination of how businesses function in the Western world. Discusses the development of the corporation in the United States, ethical issues, and the primary areas of business.

BDP X19. Topics in Specialized Forum Seminar Series.

BDP X19.1. Human Rights: Theories and Practice.
Discuss various contemporary issues in human rights, with an emphasis on multidisciplinary perspectives and critical discourse.

BDP X19.2. Museum Studies.
Discuss various contemporary issues in museum studies, with an emphasis on multidisciplinary perspectives and critical discourse.

BDP X19.3. Smart Cities.
Discuss various contemporary issues relevant to smart cities, with an emphasis on multidisciplinary perspectives and critical discourse.

BDP X19D. Introduction to Digital Media Production.
Introduction to digital media production, including the fundamentals of software programs used for digital design, web production, animation, and other functions.

BDP X19S. Topics in Bridging Disciplines.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Undergraduate College. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BDP X20K. Connecting Research Experience.

BDP X20L. Connecting Research Experience.
Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program. Research may consist of an individual project and must meet the criteria for the independent inquiry flag.

BDP X20M. Connecting Research Experience: Service Learning.
Supervised research with a faculty member, related to the interdisciplinary themes of a Bridging Disciplines Program and including an academic service-learning component. Research may consist of an individual project involving service to the community or assisting a faculty research project with a community service component.

BDP X21M. Connecting Internship Experience: Service Learning.
Supervised internship experience related to the interdisciplinary themes of a Bridging Disciplines Program and including an academic service-learning component. Internships must be unpaid and may include work with nonprofit organizations or other organized community service entities.

BDP X22K. Topics in Team-Based Research Experience.
Collaborative or team-based research or creative project, under the supervision of a faculty member. Topics are related to the interdisciplinary themes of the Bridging Disciplines Programs.

BDP X25K. Connecting Internship Experience.
Supervised internship experience related to the interdisciplinary themes of a Bridging Disciplines Program.

BDP X26. Topics in Advanced Forum Seminar Series.
Discussion of contemporary issues related to the topics of a Bridging Disciplines Program, with an emphasis on interdisciplinary perspectives and critical discourse.

BDP X29. Topics in Specialized Advanced Forum Seminar Series.
Discussion of contemporary issues related to the topics of a Bridging Disciplines Program, with an emphasis on interdisciplinary perspectives, research, and critical discourse.
BDP X29.1. Race and Medicine in American Life.
Discuss contemporary issues related to race and medicine in American life, with an emphasis on interdisciplinary perspectives, research, and critical discourse.
BDP X29S. Topics in Bridging Disciplines.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Undergraduate College. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

Professional Courses

BEN - Bengali

Bengali: BEN

Lower-Division Courses

BEN X06. First-Year Bengali I.
BEN X07. First-Year Bengali II.
Continuation of Bengali 506.
BEN X12K. Second-Year Bengali I.
BEN X12L. Second-Year Bengali II.
Continuation of Bengali 312K.
BEN X19S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BEN X29S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BEN X19S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BEN X20K. Advanced Bengali I.
BEN X20L. Advanced Bengali II.
Continuation of Bengali 320K.
BEN X29S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BEN X60. Conference Course in Bengali Language and Literature.
Supervised individual study of selected problems in Bengali language and literature.

Graduate Courses

BEN X19S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BEN X29S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BEN X81. Conference Course in Bengali Language and Culture.
Supervised individual study in Bengali language or culture.

Professional Courses

BEN X19S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BEN X29S. Topics in Bengali.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BGS - Business, Government, and Society

Business, Government, and Society: BGS

Lower-Division Courses

BGS X19S. Topics in Business, Government, and Society.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
BGS X80. Topics in Business, Government, and Society.

Upper-Division Courses

BGS X25. Social and Ethical Responsibility of Business.
Examine ethical aspects of the decision-making processes of managers and employees. Explore the responsibility of firms to society and other constituencies.
BGS X29S. Topics in Business, Government, and Society.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BGS X37. Strategy Beyond Markets.

BGS X40S. Topics in Business, Government, and Society.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office, or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

BGS X70S. Social and Cultural Entrepreneurship.
Create a business to address social problems, using social and creative means to design market-based approaches to aid a specific cultural group.

BGS X71. Corporate Political Strategy.
Study how the political and regulatory environment enables and constrains business activity and how individual firms and groups of firms can ethically yet effectively lobby legislatures, negotiate with regulators, create industry associations, make campaign contributions, and engage in other political activity to gain competitive advantage.

BGS X71T. Topics in Business, Government, and Society.

BGS X72. Strategic Corporate Social Responsibility.
A study of how corporations can engage in corporate social responsibility and sustainable activities to improve the world with strategic considerations kept in mind.

BGS X72T. Topics in Business, Government, and Society.

BGS X72T.1. Energy Technology and Policy.
Develop an understanding of the broad context of energy production and consumption in the United States and the world. Discuss past energy trends and fundamentals of energy and power, including fossil fuels and renewable energy sources and technologies. Explore different energy resources, environmental impacts, and societal uses of energy. Evaluate future energy technology options.

BGS X72T.10. Nontechnical Exploration and Production.
Introduction to the oil and gas exploration and production business for nontechnical personnel. Explore prospect generation and leasing, drilling, production, processing, transportation, and closing out a project.

BGS X72T.12. Global Business Sustainability.
Explore the role of sustainability in the corporate sector. Examine how businesses partner with others for sustainability goals, how to value sustainable business practices, and how to report on corporate sustainability.

BGS X72T.14. Global Net Zero Strategy.
Discuss the actions that firms around the world are taking regarding global warming, and whether these actions and innovations will keep the growth of global greenhouse gas emissions to zero.

BGS X72T.2. Ethics, Corporate Social Responsibility, and Service Learning.
Examine reasons that seemingly good people sometimes make unethical choices. Explore real-life ethical dilemmas, decision-making processes, and ideal behavior for the future.

BGS X72T.3. Business Ethics and Social Responsibility.
Focus on the development of ethical leadership and responsibility. Explore basic concepts relevant to business ethics. Develop ethical principles in a variety of business domains, and practice discussing ethical issues with people from a variety of viewpoints and backgrounds.

BGS X72T.4. International Business and Politics.

BGS X72T.5. Health Care Innovation and Entrepreneurship.
Focus on healthcare entrepreneurship in the United States, addressing the complexities of building companies in this sector while also examining the incentives of health care financing and spending that risk, ignoring the needs of the most vulnerable. Explore how to ensure that innovation decreases disparities in access and outcomes for the underserved.

BGS X73. Strategic Corporate Communication.
Studies corporate efforts to inform, motivate, and persuade various constituencies, including investors, employees, communities, and regulators. Subjects include public relations, investor relations, and government relations.

BGS X74. Global Political Economy.
Explore how firms can successfully integrate their traditional strategies with non-market strategy in the global arena, including how to successfully engage with international non-market actors, such as foreign governments, regulators, political parties, NGOs, and the media. Examine the necessary tools to craft successful, integrated firm strategies in diverse institutional and political environments.

BGS X75. Business and Policy in the Age of Inequality.
Examine inequality and its implications as managers and as citizens, and explore how to deal proactively with the consequences of this pervasive phenomenon.

BGS X79. Independent Research in Business, Government, and Society.

BGS X80. Topics in Business, Government, and Society.

Graduate Courses

BGS X80. Topics in Business, Government, and Society.

BGS X80C. Strategic Corporate Communication.
Studies corporate efforts to inform, motivate, and persuade various constituencies, including investors, employees, communities, and regulators. Includes public relations, investor relations, and government relations.

BGS X80D. Strategic Corporate Social Responsibility.
Overview of corporate social responsibility (CSR) given the constraints of the business environment, with an emphasis on the conditions under which CSR can provide strategic value to firms through class discussions and group projects.

BGS X80E. Global Political Economy.
Exploration of how firms can successfully integrate their traditional strategies with non-market strategy in the global arena, including how to successfully engage with international non-market actors such as foreign governments, regulators, political parties, NGOs, and the media. Examines the necessary tools to craft successful, integrated firm strategies in diverse institutional and political environments.

BGS X80G. Business and Policy in the Age of Inequality.
Examine inequality and its implications as managers and as citizens, and explore how to deal proactively with the consequences of this pervasive phenomenon.

BGS X81. Law, Ethics, and Corporate Social Responsibility.
Examines corporate responsibility issues and the tools necessary to manage relationships with external stakeholders such as governments, nongovernmental organizations, and communities in legal, political, and cultural contexts.

BGS X81E. Topics in Law, Ethics and Corporate Social Responsibility: Energy.
Examines the external relations challenges facing the energy industry. Focuses on the theory and practice of corporate social responsibility and government relations for the oil, natural gas, and electricity industries in the United States and the larger world. Explores the resource curse and its implications for oil and gas companies doing business overseas, the management of environmental health and safety risk in both the developed and developing world, energy facility siting, and NIMBY challenges in the United States. Some familiarity with energy law is helpful.

BGS X81M. Social and Ethical Responsibility of Business.
Examines ethical aspects of the managerial decision-making process and the application of fundamental ethical principles to business, legal, and social problems. Includes ethical implications of financial

markets, race and gender discrimination, employee privacy, multinational business, and health, safety, environmental, and consumer issues.

BGS X81N. Social and Ethical Responsibilities of Accountants.

Examines ethical aspects of the managerial decision-making process and the application of fundamental ethical principles to business, legal, and social problems. Includes ethical implications of financial markets, race and gender discrimination, employee privacy, multinational business, and health, safety, environmental, and consumer issues.

BGS X82. Corporate Political Strategy.

A study of how the political and regulatory environment enables and constrains business activity and how individual firms and groups of firms can ethically, yet effectively, lobby legislatures, negotiate with regulators, create industry associations, make campaign contributions, and engage in other political activity to gain competitive advantage.

BGS X82D. Economics of Health Care.

Explores the production and provision of health care in the United States. Includes the study of basic economic concepts, differences between health care and other goods, impact of regulatory policies, and the importance of health for economic development. May include international and ethical aspects of health care.

BGS X82E. Energy Economics.

Studies domestic and international policy issues of energy and the environment, with a focus on market solutions to various problems and market limitations in the allocation of environmental resources. Also examines the economics of fossil fuel alternatives.

BGS X82L. Labor Economics.

Studies the functioning of the labor market and examines determinants of wage and employment levels in perfect and imperfect labor markets.

BGS X82R. Economic Analysis of Law.

Uses economic analysis to study law and its impact on business activity. Includes the economics of contract law, tort law, property law, securities regulation, antitrust law, intellectual property, and environmental law.

BGS X82S. Economics of Sustainable Business.

Examines the policy and practical implications of sustainability. Topics covered may include property rights, air and water pollution, solid-waste disposal, hazardous substances, and wilderness preservation and the protection of endangered species.

BGS X83. Business Ethics in the Global Market.

Moral theory and its application to business issues in diverse cultures.

BGS X84. Global Macroeconomic Policy.

Practical study of global macroeconomic policy, including monetary policy, financial market regulation, and economic growth and development policies.

BGS X85. Business, Government, and Public Policy.

Studies the relationship between business and government throughout the policy process and examines the constitutional constraints that affect businesses across different political and legal systems. Explores ethical issues of the role of business in the policy process.

BGS X85W. Business, Government, and Public Policy: Washington Campus.

Studies the relationship between business and government throughout the formation and implementation of public policy; includes examination from economic, political, legal, and behavioral perspectives. Focuses primarily on the political, regulatory, and legal system of the United States and addresses issues covered further in the Washington Campus event, a week-long seminar with policy makers in Washington DC that precedes the course.

BGS X86. Market Structure and Performance.

Studies industrial organization economics using game-theory to model strategic market behavior. Examines econometric methods used to test hypotheses regarding firm conduct and market performance. Explores profit-maximizing business strategies of firms with market power and strategic interactions among firms in imperfectly competitive markets.

BGS X86E. Topics in Business, Government, and Society.

BGS X87. Business Integrity.

Examines how to make ethical decisions, take ethical actions, lead an ethical life, run ethical organizations, and fulfill corporate social responsibilities.

BGS X88. Behavioral Economics.

Explores and applies existing behavioral economics findings to all areas of business, and also instructs how to run studies to learn how to nudge" people toward or away from particular behaviors.

BGS X89. Environmental Regulation of Business.

Examines federal and state regulation of business activities that affect the environment and the potential liability of business for environmental damage.

BGS X90. Behavioral and Institutional Economics.

Uses aspects of the social sciences, including economics, psychology, and sociology to explore the evolution of economic organizations, the need for business regulation, bubbles and speculation, and economic herd behavior.

BGS X90E. Business in the Global Political Environment.

Examines global business from a political science perspective. Includes the politics of international trade and investment and the regulatory expectations of national regulators and of international organizations such as the World Trade Organization and the World Bank.

BGS X90F. Federal Regulatory Policy.

Studies the federal regulatory framework in the United States, including the processes through which regulations are promulgated and the stakeholders involved. Particular emphasis on cost-benefit analysis.

BGS X90J. Modern Political Economy.

Studies economic theory from Adam Smith to the modern day, with a focus on the interrelationship between economic models and political behavior. Explores the development of American capitalism; includes works from Marx, Hayek, Polanyi, and Williamson.

BGS X91. Topics in Conference Course in Business, Government, and Society.

BGS X91S. Independent Study.

Professional Courses

BGS X80. Topics in Business, Government, and Society.

BHD - Behavioral and Humanities Data Science

Behavioral and Humanities Data Science: BHD

Lower-Division Courses

BHD X01. Introduction to Humanities Data Science.

Introduction to core concepts, methods, and tools in data science from a liberal arts perspective with an emphasis on both technical skill-building and critical reflection. Discuss data ethics, machine learning, archival processing, and the cultural contexts of computational research.

BHD X15. Programming for Humanities Data Science.

Introduction to computer programming for the humanities and to digital humanities as a research area. Examine basic programming concepts, data types, functions, and Application Programming Interfaces (API). Learn the first steps in building data pipelines and explore introductory natural language processing (NLP) techniques through humanities-centered applications.

BHD X19. Gateway to Humanities Data Science.

Introduction to digital humanities research. Examine how data, algorithms, Machine Learning/Artificial Intelligence, and interpretation shape cultural inquiry in the humanities through hands-on experimentation and critical tinkering using computer programming. Utilize exercises in artifact, text, image, and metadata analysis.

BHD X19S. Topics in Behavioral and Humanities Data Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

BHD X21. Research Methods for Humanities Data Science.
Explore approaches to research design in humanities data science with an emphasis on mixed methods, critical and theoretical connections between data science and humanities research programs, ethical frameworks, and the formulation of research questions within specific cultural, disciplinary, and cross-sectoral professional contexts.

BHD X29S. Topics in Behavioral and Humanities Data Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BHD X40. Advanced Programming for Humanities Data Science.
Focus on building and refining custom data pipelines and applications in a self-guided research project. Discuss research and data flow planning, critical evaluation, Natural Language Processing (NLP) and computational cultural artifact analysis, including archive processing. Explore modular programming, adapting tools for humanities-specific use cases, and interface design.

BHD X45. Topics in Behavioral and Humanities Data Science.

BHD X50. Project Management for Humanities Data Science.
Introduction to strategies for managing digital humanities projects from research design and planning to deployment. Discuss team collaboration, corpus and artifact curation, Institutional Review Board (IRB) protocols and legal questions, documentation practices, and navigating the institutional, ethical, and technical dimensions of humanities data science research.

BHD X60. Conference Course.

Graduate Courses

Professional Courses

BIO - Biology

Biology: BIO

Lower-Division Courses

BIO X01C. Topics in Biology.
Topics in biology that are especially relevant to current issues and problems in modern society.

BIO X01C.1. The Biology of Being Human.
Introductory biology course that covers human evolution, genetics and genomics, behavior, population growth and environmental issues.

BIO X01E. Problems in Modern Biology.
An introduction to major concepts in biology, with emphasis on topics, such as genetics, that are relevant to current issues in the field.

BIO X02C. Conference Course.
Supervised study of selected subjects in biology, by individual arrangement with the instructor.

BIO X02D. Science Literacy and Numeracy: Ecology and Evolution.
Explore science literacy and numeracy skills through methods of inquiry; dealing with quantitative data; and correcting common misconceptions regarding rational and quantitative thought. Examine these skills in the context of news events that include reference to some or all of the following: Mendelian genetics; microevolution; macroevolution; population ecology; community ecology; ecosystem ecology.

BIO X02E. Science Literacy and Numeracy: Genetics and Genomics.
Explore science literacy and numeracy skills through methods of inquiry, dealing with quantitative data and correcting common misconceptions regarding rational and quantitative thought. Examine these skills in the context of news events that include reference to some or all of the following: human genetics; analysis and manipulation of DNA; genetic testing; assisted reproductive technology; human ancestry; personalized medicine; forensic genetics.

BIO X02F. Science Literacy and Numeracy: Human Health and Disease.
Explore science literacy and numeracy skills through methods of inquiry, dealing with quantitative data and correcting common misconceptions regarding rational and quantitative thought. Examine these skills in the context of news events that include reference to some or all of the following: metabolic diseases, infectious diseases, genetic diseases - causes, prevention, and treatments.

BIO X02G. Science Literacy and Numeracy: Biotechnology and the Future.
Explore science literacy and numeracy skills through methods of inquiry, dealing with quantitative data and correcting common misconceptions regarding rational and quantitative thought. Examine these skills in the context of news events that include reference to some or all of the following: climate change; genetically modified organisms; biomedical technology.

BIO X06L. Introductory Laboratory Experiments in Biology.
The organizing principles of biology (such as molecular and cellular functions, reproduction, development, homeostatic mechanisms, and organismal physiology and behavior) are used within a comparative and evolutionary framework to train students in modern laboratory techniques, bioinformatics, experimental design, and interpretation of results.

BIO X06M. Introduction to Lab Experiments in Biology.
Explore the organizing principles of biology (such as, molecular and cellular functions, reproduction, development, homeostatic mechanisms, and organismal physiology and behavior) and how they are used within a comparative and evolutionary framework in modern laboratory techniques, bioinformatics, experimental design, and interpretation of results.

BIO X06N. Introduction to Lab Experiments in Biology II.

BIO X11C. Introductory Biology I.
Introduction to biological energy transformation, cell structure and physiology, and gene expression.

BIO X11D. Introductory Biology II.
Introduction to mechanisms of inheritance, evolution, physiology, and species interactions.

BIO X15H. Advanced Introduction to Genetics: Honors.
Basic principles of genetics and cell biology. Emphasis on gene structure and regulation; transmission of heritable traits; structure and function of cells; bacterial and viral genetics; and recombinant DNA technology.

BIO X19S. Topics in Biology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Biology Instructional Office. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. .

Upper-Division Courses

BIO X25. Genetics.
Basic principles of Mendelism, molecular genetics, structure and function of genes and chromosomes, populations and evolution.

BIO X25H. Genetics: Honors.
Basic principles of genetics and evolution. Emphasis on population genetics and natural selection; structure and function of organ systems; behavioral ecology; and mutational analysis of organismal development.

BIO X25L. Laboratory Experience in Genetics.
Experimentation and direct observation in fundamental aspects of transmission genetics.

BIO X29S. Topics in Biology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Biology Instructional Office. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BIO X37. Selected Topics in Biology.
Recent developments and research methods in the biological sciences.

BIO X37.2. Research Methods: UTeach.
Students perform independent inquiries and use skills from mathematics and science to solve research problems.

BIO X37J. Computational Biology Laboratory.
Overview of computational biology, with emphasis on nucleic acid sequence analysis and databases. Class projects and self-learning exercises.

BIO X56L. Limnology and Oceanography.
An introduction to the study of the interactions between aquatic organisms and their environments.

BIO X68. Peer Assistant.

BIO X70C. Topics in Conference Course.
Supervised study of selected topics in biology, by individual arrangement with the instructor.

BIO X72C. Biology Peer Mentors in Research/Teaching.
Students work as peer mentors and assistants in the teaching of biology, with emphasis on developing instructional materials that teach fundamental biology with real world data.

BIO X77. Undergraduate Research.
Laboratory or field research in the various fields of biological science under the supervision of one or more faculty members.

BIO X79H. Honors Tutorial Course.
Original laboratory or field research project under the direction of a faculty mentor, leading to a thesis or research presentation for students in the honors program in biology.

Graduate Courses

BIO X80M. Topics in Biology (Cooperative Programs).
Formal, organized courses taught at institutions other than the University of Texas at Austin.

BIO X81. Advanced Plant Physiology.
Concepts in the broad field of plant physiology. Includes aspects of plant growth, development, cell signaling, and stress responses that are very similar to these processes in animals, but will also illustrate unique aspects of plants that exemplify the diversity of life strategies on earth. Explores the critical skills needed to evaluate the current literature, data interpretation, and methods for solving key questions in the field.

BIO X81K. Topics in Ecology, Evolution, and Behavior: Physiology and Biophysics.

BIO X81K.11. Current Concepts in Neurophysiology.

BIO X81K.3. Sensory Physiology.
Physiology and biophysics of the transduction and peripheral processes of the major sensory systems.

BIO X81K.4. Current Concepts in Neurobiology.
A series of seminars designed to give students a broad background in neurobiology.

BIO X81K.5. Laboratory in Neurophysiology.
Training in research techniques useful for the neurophysiological study of vertebrate and invertebrate nervous systems.

BIO X81K.6. Insect Physiology.
An in-depth study of the physiology of insect organ systems, development, and behavior.

BIO X81K.7. Developmental Neurobiology.
Neuronal cell lineage and differentiation, neuronal migration, axon guidance, neural cell death, synapse formation and maintenance.

BIO X81K.8. Addiction Biology.

BIO X81N. Basic Processes of Nerve Cells.
Degeneration and regeneration in nervous systems following traumatic injury; invertebrate versus vertebrate, peripheral nervous system versus central nervous system, axonal versus cell body, role of glia versus neurons.

BIO X83K. Topics in Ecology, Evolution, and Behavior: Development and Reproduction.

BIO X83K.1. Hormonal Control of Development and Reproduction.

BIO X83K.2. Techniques in the Study of Development and Reproduction.

BIO X83K.3. Comparative Endocrinology.
Structure, function, and interrelationships of endocrine glands, with emphasis on the control of hormone synthesis and secretion and mechanisms of hormone action.

BIO X83K.4. Recent Advances in Development and Reproduction.
Discussion of recent scientific papers and their contribution to modern work in development and reproduction.

BIO X83K.5. Molecular Analysis of Development.
Lectures and discussion concerning the principles of animal development at the molecular level.

BIO X83K.8. Development and Evolution.

BIO X84K. Topics in Ecology, Evolution, and Behavior.
Basic concepts and methods of laboratory and field analysis in various fields of biology; systematics and ecology of natural populations.

BIO X84K.30. Recent Advances in Community Ecology.
Seminar course. Faculty- and student-led lectures and discussions of current topics in community ecology. Some written assignments required.

BIO X84K.32. Recent Advances in Macroecology.
Examines recent ideas and new findings in the fields of Macroecology, Biogeography, and Ecosystem Science.

BIO X84K.33. Recent Advances in Conservation Biology.
Seminar course. Faculty- and student-led discussions of current topics in population ecology. Some written assignments may be required.

BIO X84K.34. Recent Advances in Microbial Ecology.
Explores current subjects and controversies in microbial ecology, including community and ecosystem perspectives. Includes faculty- and student-led discussions of primary literature. Some written assignments required.

BIO X84K.35. Global Environmental Change.
Explores the knowledge of current environmental change and biological responses, efforts to understand and predict changes in the future through both experimental manipulations and models. Discussion of the scientific philosophy behind this work.

BIO X84K.41. Recent Advances in Molecular and Genomic Evolution.

BIO X84K.42. Human and Primate Evolutionary Genetics.

BIO X86. Topics in Plant Science: Ecology and Evolution.

BIO X86.10. Recent Advances in Plant Systematics.
Basic concepts and methods of laboratory and field analysis in various fields of biology; systematics and ecology of natural populations.

BIO X86.11. Advanced Subjects in Plant Ecology.
BIO X86.12. Advanced Subjects in Plant Evolution.
BIO X86.13. Advanced Subjects in Plant Molecular Biology.
BIO X87G. Taxonomic Plant Anatomy.
An advanced course that emphasizes those aspects of plant anatomy that are most reliable and useful for systematic purposes.
BIO X89C. Chemistry and Biology of Membranes.
Consideration of the origin and structure of biological membranes at the microscopic and molecular levels; describes membrane function, especially with regard to transport properties.
BIO X89K. Advanced Cell Biology.
BIO X90. Topics in Microbiology.
Discuss current topics in microbiology.
BIO X90G. Applied Public Health and Medical Microbiology.
One semester of full-time training in the Texas Department of Health Laboratories, with rotation in the divisions of medical microbiology, mycology, parasitology, virology, sanitary bacteriology, and biologics. Assigned reading and regular meetings with the Department of Health Laboratories staff and the molecular genetics and microbiology faculty.
BIO X90K. Scanning Electron Microscopy, Theory and Practice.
Theory of scanning electron microscopy and basic principles of instrument design; basic procedures in specimen preparation; hands-on experience.
BIO X90M. Electron Microscopy I: Theory and Practice.
An introduction to electron optics; emphasis on basic operation and maintenance of the transmission microscope; theory and practice of basic preparative techniques.
BIO X90P. Techniques in Molecular Genetics.
Laboratory training in modern molecular genetics, with emphasis on the manipulation of bacterial plasmid DNA as a model system. DNA purification, gene mapping and cloning, site-directed mutagenesis, polymerase chain reaction, and DNA sequencing.
BIO X91K. Cellular Immunology.
Cell-associated immune responses, with emphasis on transplantation, immunity, tumor immunology, delayed hypersensitivity, and acquired cellular resistance.
BIO X91R. Advanced Metabolism and Biochemistry of Microorganisms.
Study of the metabolic processes of microorganisms, using a biochemical approach.
BIO X91S. Microbial Genetics.
Molecular biology of nucleic acids; biosynthesis of macromolecules, transfer of genetic material from cell to cell, recombination, mutagenesis, and regulatory mechanisms.
BIO X92. Topics in Problems in Host-Parasite Biology.
BIO X92.1. Current Topics in Virology and Immunology.
BIO X92.2. Current Topics in Pathogenic Mechanisms.
BIO X92D. DNA Repair.
Broad overview of the repair of DNA in archae, prokaryotes, eukaryotes, and viruses, focusing on the primary research literature, and developing critical thinking and presentation skills.
BIO X93. Topics in Problems in Molecular Genetics.
BIO X93.1. Current Topics in DNA Transactions.
BIO X93.2. Current Topics in Fungal and Cell Molecular Biology.
BIO X93.3. Current Topics in Gene Regulation.
BIO X94. Topics in Problems in Microbial Physiology.
BIO X94.1. Current Topics in Cell Envelope Structure and Functions.
BIO X94.2. Current Topics in Microbial Signal Transduction.
BIO X94T. Tumor Biology.
Explore core aspects of cancer pathology, treatment, epidemiology, the discovery of oncogenes and tumor suppressors, and the molecular genetics underlying the characteristic features of malignant tumors (including metastatic behavior, genomic instability, angiogenesis, cell cycle regulation, and apoptosis). Emphasize the biochemical functions of cancer-related proteins and enzymes and therapeutic approaches based on understanding of these proteins. Examine important experimental approaches that have influenced the current understanding of cancer.
BIO X95F. Genetics.
Basic principles of Mendelian and molecular genetics, and an exploration of the genetic toolbox using examples of analytic methods and modern genetic manipulations. Focus on the genetic analysis of model organisms. Use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems.
BIO X95I. Advanced Biochemistry.
Explore advanced biochemistry concepts and the scientific process. Consider the structure and function of proteins, carbohydrates, lipids and nucleic acids, and discuss enzyme mechanisms and kinetics.
BIO X96. Membranes and Walls of Bacteria.
Structure, biosynthesis, and function of bacterial envelopes and walls, including associated optional components.
BIO X96R. Microbiology Research Seminar.
Students present their research findings and receive feedback from faculty and peers. Designed to help students refine their presentation techniques, practice giving critical feedback, and gain familiarity with a wide variety of research topics.
BIO X97. Seminar in Microbiology.
BIO X97J. Advanced Genetics.
Selected related topics of current interest with an emphasis on molecular developmental genetics, and any needed review of classical genetics. Designed to help the student to read the literature critically, deliver a good seminar, and participate in thoughtful discussion.
BIO X98T. Supervised Teaching in Biological Sciences.
Teaching under the close supervision of course instructors; weekly group meetings with the instructor, individual consultations, and reports throughout the teaching period.

Professional Courses

BME - Biomedical Engineering

Biomedical Engineering: BME

Lower-Division Courses

BME X03. Introduction to Computing.
Introduction to computing and programming, focusing on high-level programming languages. Emphasis on programming skills using C++ and Python as well as data acquisition using open-source computer hardware. Emphasis is on biomedical engineering applications for computing.
BME X03L. Introduction to Biomedical Engineering Design.
Biomedical engineering design concepts with hands-on learning applications.
BME X06. Fundamentals of Computing.
Introduction to computing including bits and operations on bits, number formats, arithmetic and logic operations, digital logic. Explore the Von Neumann model of processing including memory, arithmetic logic unit, registers, and instruction decoding and execution. Examine structured programming and debugging, machine and assembly language programming, the structure of an assembler, physical input/output through device registers, subroutine call/return; trap instruction, stacks and applications of stacks.
BME X11. Network Analysis in Biomedical Engineering.
Basic concepts in circuit analysis and design of systems for biomedical engineering; Ohm's law, Kirchhoff's laws, and nodal and loop analysis; Theyenin's and Norton's theorem; operational amplifiers; high-order circuit and basic AC circuit analysis using Fourier and Laplace transforms.

BME X13L. Introduction to Numerical Methods in Biomedical Engineering.
Introduces principles and techniques of numerical analysis of biomedical engineering problems. Examines numerical methods of integration, differentiation, interpolation, curve fitting, data analysis, sampling and estimation, error analysis, analysis of ordinary differential equations, numerical modeling of biomedical engineering systems, symbolic computation, and scientific visualization.

BME X14L. Computational Fundamentals of Biomedical Engineering Design.
Overview of computational methods used to model biomedical systems, analyze data, and assist in the engineering design process. Subjects and hands-on learning applications include 3D modeling tools and computer aided manufacturing, flow simulation, instrumentation, biomedical imaging modalities, and biomedical informatics.

BME X17T. Introductory Topics in Biomedical Engineering.

BME X97. Research Problems.
Problems selected by the student with approval of the faculty adviser.

BME X97S. Graduate Seminar in Biomedical Engineering.

Upper-Division Courses

BME X20. International Perspectives on Biomedical Engineering Design.
Activities to consider sociotechnical factors in designing clinically translatable solutions with a focus on international perspectives.

BME X21D. Introduction to Medical Image Processing.
Introduction to theories, methods, and applications related to medical image processing through project-based learning. Discuss the principles and approaches for image segmentation, image registration, and deep learning classification, in addition to the global reach of clinical applications based on these methods, such as radiology and radiation oncology.

BME X22. Health Equity in Engineering Design.
Discuss healthcare disparities and causal mechanisms that lead to differential patient outcomes of medical devices and therapeutics. Assess how engineers can improve the design process of healthcare technologies to remove bias and improve equity. Explore current research in the field from health disparity specialists.

BME X29S. Topics in Biomedical Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Biomedical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

BME X35. Engineering Probability and Statistics.
Fundamentals of probability, random processes, and statistics with emphasis on biomedical engineering applications. Includes hypothesis testing, regression, and sample size calculations.

BME X36. Cancer Bioengineering.
Comprehensive overview of the biology and pathology of cancer. Emphasis on the fundamental nature of cancer, the roles of genetics and the environment, and the contributions of heterotypic tissues in the tumor microenvironment. Exploration of current challenges in the field and ways that various engineering tools are transforming the future of cancer research.

BME X37. Nanomedicine.
Explore the fundamental properties, synthesis, and characterization of nanomaterials, including their applications in nanomedicine. Discuss micro- and nano-particles for drug delivery and imaging, microfluidics for in vitro diagnostics and biological systems modeling, and nanomaterials and platforms for biological applications. Examine biomedical applications such as cancer, cardiovascular disease, and infectious diseases.

BME X38. Thin Film Mechanics.
Examine mechanical testing, design, and failure analysis of thin film structures and devices, with an emphasis on mechanics-related subjects including stress, fracture, delamination, and instability. Explore important technological applications of film materials, including integrated circuits, micro- and nano-electromechanical systems, flexible and stretchable electronics, bioelectronics, and surface coatings.

BME X39. Biochemical Engineering.
Principles of fermentation and cell culture technologies; introduction to recombinant DNA technology and protein expression; the development of therapeutics, vaccines, and diagnostics using genetic engineering.

BME X40. Soft Tissue Biomechanics.
Explore soft tissues and soft tissue mechanics. Examine fundamentals of continuum mechanics (kinematics, stress, balance of linear momentum, hyperelasticity), experimental and nonlinear finite element analysis of soft tissue mechanics, and relevant imaging modalities and facilities available on campus.

BME X42. Biomechanics of Human Movement.
Modeling and simulation of human movement; neuromuscular control; computer applications; introduction to experimental techniques.

BME X43. Biomedical Engineering Signal and Systems Analysis.
Signals and systems representation; sampling and quantization; time and frequency domains; Laplace and z-transforms, transfer functions, and frequency response; two-port networks; Bode plots; convolution; stability; Fourier series; Fourier transform; AM/FM modulation; filter design; and applications in biomedical engineering.

BME X44. Biomechanics.
Examine the principles of engineering mechanics and their applications to basic problems in biomechanics and biomedical engineering. Explore internal forces and deformations in solids, including stress, strain, tension, compression, torsion, bending, internal pressure, and failure analysis under combined mechanical loading.

BME X44C. Introduction to Therapeutics.
Introduction to the biological and engineering underpinnings of therapeutics discovery, development and manufacturing. Focus on the quantitative and engineering principles relevant to growing cells and producing molecules for commercial purposes, including basic growth kinetics and stoichiometry, simple bioreactor design and oxygen transfer.

BME X45. Graphics and Visualization Laboratory.
Introduction to techniques for graphical display of biological data. Subjects include transformations, geometric modeling, and two- and three-dimensional display algorithms. Includes computational projects with biomedical applications.

BME X45L. Experimental Principles of Biomedical Engineering Design.
Exploration of biomedical engineering design principles through open-ended, hands-on research applications involving mechanical testing, cell culture, and biomaterials. Analysis and interpretation of experimental data, including written reporting of outcomes in scientific journal format.

BME X46. Computational Biomolecular Engineering.
Introduction to computational structural biology and molecular modeling, including the fundamentals of biomolecular structure and molecular thermodynamics. The principles and applications of biomolecular modeling used to explore the critical relationship between structure, function, and thermodynamic driving forces in molecular biology.

BME X47. Fundamentals of Biomedical Optics.
Introduction to the field of biophotonics. Subjects include light scattering theory, tissue optical properties, analytical and numerical techniques for determining light propagation in tissue, light-tissue interactions, and bioheat transfer including solution methods.

BME X48. Modeling of Biomedical Engineering Systems.
Lumped and distributed models of physiological system function from molecular through organismal levels. Linear system steady-state and transient behaviors. Interactions among multiple energy domains,

including electrical, chemical, diffusional, mechanical, fluid, and thermal. Introduction to feedback control.

BME X48P. Introduction to Computational and Systems Biology.
Introduction to big data technology platforms, data science analytical algorithms and artificial intelligence in computational biology and medicine and network science. Examine DNA sequence alignment and search, high-throughput big data platforms and analysis, network science, multi-omics profiling, statistics, motif finding, molecular structure prediction, genome-wide association studies, artificial intelligence, and personalized precision medicine. Explore computational algorithms including hidden Markov model, clustering, classification methods, and others.

BME X49. Biomedical Instrumentation.
Introduction to biomedical instrumentation, design, and applications. Emphasis on the complete instrumentation development cycle, design for bio-compatibility, safety and efficacy, and design considerations specific to various medical specialties.

BME X50. Computational Methods for Biomedical Engineers.
Study of and hands-on experiences with computational methods commonly employed in biomedical engineering research.

BME X52. Engineering Biomaterials.
Overview of properties of metallic, ceramic, polymeric, and composite biomaterials used in biomedical applications. Material synthesis and processing. Analysis of mechanical and chemical properties, including stress-strain. Material interactions with the body and blood. Soft and hard biomaterials applications.

BME X53. Transport Phenomena in Living Systems.
Introduction to the principles of heat, mass and momentum transfer and their application to solve problems in living systems.

BME X54. Molecular Sensors and Nanodevices for Biomedical Engineering Applications.
Introduction to major types of molecular sensor systems, device miniaturization, and detection mechanisms, including molecular capture mechanisms; electrical, optical, and mechanical transducers; micro-array analysis of biomolecules; semiconductor and metal nanosensors; microfluidic systems; and microelectromechanical systems (MEMS, BioMEMS) fabrication and applications for biomedical engineering.

BME X55. Molecular Engineering.
Working principles of biomolecules such as proteins and nucleic acids. Physical and chemical basis for biomolecular structure, energetics, and function.

BME X56. Polymer and Bioconjugate Chemistry.
Introduction to synthetic principles of polymeric biomaterials and bioconjugate chemistry with an emphasis on synthetic strategies to achieve specific properties. Explores characterization methods of polymers and bioconjugates as a function of chemical composition, as well as tissue engineering and drug delivery applications as case studies of the biomaterial design process.

BME X57. Biomedical Imaging Modalities.
Introduction to major biomedical imaging modalities, including X-ray radiography, computed tomography (CT), nuclear medicine (SPECT and PET), magnetic resonance imaging (MRI), and ultrasound. Emphasis on principles, approaches, and applications of each imaging modality. Basic physics and imaging equations of the imaging system; hardware and software; sources of noise and primary artifacts; safety and patient risk.

BME X58. Medical Decision Making.
Understanding of the nature of expertise and related subjects of cognitive psychology and human-made interaction to be able to design more effective systems for supporting medical decision making.

BME X58M. Imaging Clinical Immersion.
Identify current unmet clinical needs via close interaction with healthcare professionals and patients. Explore biomedical imaging across the healthcare enterprise.

BME X59. Cellular and Molecular Biomechanics.
Introduction to the concepts needed to understand and work in the emerging field of cellular and molecular biomechanics. Examination of dynamic interplay between chemical, thermal, and physical forces in determining the mechanics of cells/tissues and their molecular components.

BME X61L. Development and Analysis in Biomedical Engineering Design.
The design and development of a working biomedical engineering device prototype. Focus on the full engineering design process, including reviews and documentation, and general project management strategies. Also considers the impact of markets, budgets, and the FDA on device requirements and design.

BME X62. Introduction to Nonlinear Dynamics in Biological Systems.
Introduction to various concepts from nonlinear mathematics and their application to biological systems, ranging from sub-cellular to whole ecosystems levels of investigation.

BME X62C. Advanced Engineering Biomaterials.
Analyze biomaterials as components of biomedical implants and delivery vehicles. Discuss basic principles of biocompatibility and implant performance as well as material selection and structure-function relationships.

BME X62E. Medical Device Innovation.
Money, markets, and entrepreneurship with particular focus on medical and health markets.

BME X63. Bioelectronics and Biointerfaces.
Examine critical concepts and strategies in materials development, electronics fabrication and genetic innovations that interface with biological systems. Explore neural interfacing technology, flexible electronics, wearable technology, bio-nanotechnology, and genetic engineering. Focus on the recently developed technology for recording and manipulating neural systems.

BME X63E. Medical Device Design and Manufacturing.
Application of engineering principles in the conception, design and prototyping of medical devices. Development of team projects with emphasis on clinical and market needs analysis, creative and useful concept generation, engineering requirements and specifications, and written and oral reporting of intermediate and final prototype outcomes.

BME X64. Biological Responses to Medical Devices.
Explore common biological responses elicited by biomaterials and the impact of these responses on material performance. Emphasis on key challenges in the development and assessment of biomaterials used in medical devices. Includes material surface properties, modification, and characterization; protein/cell interactions with materials; biocompatibility, inflammation and wound healing, cell-mediated biodegradation of materials; thrombosis, infection and calcification of medical devices.

BME X65. Tissue Microenvironments.
Introduction to, and hands-on applications for, fabrication/bioprinting of tissues on a chip and characterization of mechanical, thermal, transport, and cellular/tissue responses to varying properties of associated microenvironments.

BME X65R. Quantitative Engineering Physiology I.
A quantitative, model-oriented approach to human physiology, including basic cellular physiology, electrophysiology of nerve and muscle, the motor system, the central nervous system, and the cardiovascular system.

BME X65S. Quantitative Engineering Physiology II.
Biological control systems: sensory, renal, respiratory, and immune systems. Focuses on a quantitative, model-oriented approach to physiological systems.

BME X66. Immune Engineering.
Introduction to various aspects and applications of immune engineering. Subjects include vaccine design, cancer immunotherapy, genomics, infection, auto-immune diseases and emerging tools and methodologies.

BME X67. Design of Artificial Organs.
Analysis of the design process for blood-contacting medical devices with an emphasis on ventricular assist devices. Application of computational fluid dynamics and blood rheology to computer-aided design and testing of devices using specific software programs and 3D printing of functioning prototypes.

BME X67D. Point-of-Care Molecular Diagnostics.
Introduction to the principles, tools, and technologies required to develop and implement nucleic acid-based molecular diagnostics. Discuss amplification methods, primer design, sample prep, and detection. Focus on global and rural health, accessibility, and real-world applications.

BME X68. Introduction to Mathematical and Physical Biology.
Introduction to common mathematical and physical techniques used in modeling various aspects of biology at multiple spatial and temporal scales. Analyze critical techniques with words and pictures, and then equations including the computational implementation and simulation of those equations.

BME X69. Biomimetic Design and Engineering.
Overview of the core concepts of biomimetic microengineering with particular focus on engineered microphysiological models of human organs, tissues and disease pathophysiology.

BME X69C. Matrices, Organoids, and Microphysiological Systems.
Explore current technologies and scientific literature seeking to construct human-relevant, in vitro systems representing tissues, organs, and disease physiologies as platforms for development of new therapies. Focus on how concepts in biomaterials, stem cell biology, microfluidics, additive manufacturing, and biosensing are integrated to create such platforms.

BME X70. Biomedical Engineering Capstone Design I.
Structured methodologies for designing systems or to interface with living systems. Creative design, analysis, selection, development, and fabrication of biomedical components and systems.

BME X71. Biomedical Engineering Capstone Design II.
Development of team projects in biomedical engineering with emphasis on prototype development and quantitative analysis, and written and oral reporting of the outcome.

BME X72. Computational Modeling of the Cardiovascular System.
Analyze mathematical models and simulations of the cardiovascular system. Examine biomechanical simulations including the biomechanical function of the heart, heart valves, and the vasculature.

BME X72C. Delivery of Therapeutic Agents.
Explore molecular, biological, chemical, and mathematical fundamentals of the use of macromolecular carriers for the release of small and high molecular weight therapeutic agents in vitro and in vivo. Examine design and advanced techniques of protein, peptide, antibodies, and gene therapy. Discuss targeted delivery, mucoadhesive therapy, and theranostics, as well as advanced biomedical devices for treatment of diseases.

BME X72P. Mathematical Physiology.
Explore mathematical modeling in human physiology. Focus on how physiological problems can be formulated and modeled, and how such models give rise to interesting and challenging functional features. Examine several exemplar physiological systems and discuss the mathematical aspects of growth and remodeling in living systems, an area unique to living systems.

BME X73. Tissue, Scaffold, and Cell Biomechanics Applications.
Fundamentals of biosolid mechanics via the mechanical behavior of scaffolds and living tissues and cells. Emphasis on biomechanical applications to contemporary problems in biomedical research and medical devices.

BME X74. Optical Design.
Explore the principles of optical design for imaging and laser delivery systems. Examine the development and testing of designs using optical design software.

BME X74D. Biomedical Engineering Microscopy Foundations Laboratory.
Explore finite and infinite imagery; conjugate planes, back focal plan manipulation, Abbe theory image formation, point spread functions, camera principles, fluorescence, and advanced fluorescence techniques, and build an optical microscope.

BME X74K. Biomedical Instrument Design.
Application of electrical engineering principles in the design of electronic instrumentation at the circuit-board level for the measurement of pressure, temperature, flow, and impedance. Also includes the study of light intensity, bioelectric potentials, and stimulation devices such as pacemakers and defibrillators. Focus on design considerations specific to electro-medical environments, safety and efficacy, and public policy issues.

BME X74L. Applications of Biomedical Instrumentation Lab.
An in-depth examination of selected subjects in biomedical engineering, including optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; and noninvasive cardiovascular measurements. Students have the opportunity to design analog and digital measurements and acquire and process meaningful biomedical signals.

BME X75. Stem Cells in Cell and Tissue Engineering.
Analysis of recent cell and tissue engineering applications of human embryonic stem cells (hESC) and induced pluripotent stem cells (iPSC). Focus on case studies of each organ in the human body and how it can be engineered using stem cells.

BME X76. Cell Engineering.
Introduction to principles that govern the structure, organization, and processes at cellular and subcellular levels. Special focus on engineering and quantitative aspects of cellular machinery. Employs engineering approaches to study receptors, macromolecular complexes, and cellular signaling; clinical and pharmaceutical approaches to perturb cellular structure and function for disease prevention and drug design. State-of-the-art experimental and computational techniques to study cellular engineering.

BME X77. Undergraduate Research Project.
Initiate opportunity individually and select project in conjunction with a faculty member on the Department of Biomedical Engineering's Graduate Studies Committee (GSC) or in another approved University department. A final written report or the equivalent is required. Recommended for students considering graduate study or medical school.

BME X77M. Medical Internship.
Initiate opportunity individually, which may include participation in a variety of medical and clinical activities which apply engineering principles to solve problems in healthcare. A substantial final report or the equivalent is required. Designed for students considering medical school.

BME X77R. Off-Campus Research.
Initiate opportunity individually and select project in conjunction with a faculty member at an approved institution. A final written report or the equivalent is required.

BME X77S. Industrial Internship.
Practical work experience in industry or a government agency under the supervision of an engineer, scientist or business professional. A substantial final report or the equivalent is required.

BME X77T. Topics in Biomedical Engineering.

BME X78. Undergraduate Thesis in Biomedical Engineering.

Research performed during two consecutive semesters under the supervision of a biomedical engineering faculty member or other approved faculty member; topics are selected jointly by the student and faculty member. The student provides a progress report at the end of the first semester and writes a thesis and gives an oral presentation at the end of the second semester.

BME X79. Tissue Engineering.

Introduction to biomedical research in tissue engineering. Includes case studies of tissues and organs of the body, physiology and biology of tissue, pathologies of tissue, current clinical treatments, the role of engineers in development of new technologies to diagnose and treat pathologies, quantitative cellular and molecular techniques, and applications of synthetic and natural biomaterials.

BME X79H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis.

BME X97. Research Problems.

Problems selected by the student with approval of the faculty adviser.

BME X97S. Graduate Seminar in Biomedical Engineering.

Graduate Courses

BME X80J. Topics in the Fundamentals of Biomedical Engineering.

BME X80J.1. Mathematical Modeling in Biomedical Engineering.

Conservation of mass, momentum, energy, and charge; first and second laws of thermodynamics; first- and second-order differential equations; nonlinear differential equations; partial differential equations as applied to biomedical engineering problems.

BME X80J.2. Quantitative Systems Physiology and Pathophysiology.

Modeling of physiological systems from the molecular and cellular levels to the systems level; focus on the neuromuscular and cardiovascular systems.

BME X80J.3. Principles of Biomeasurement.

Principles of signal measurement in the biomedical field; survey of transducers used for chemical, mechanical, electrical, and thermal biomedical measurements; analysis of how signals are converted into digital form; analysis of noise; aliasing; data storage.

BME X80J.4. Fields, Forces, and Flows.

Introduction to mathematical models that integrate different energy domains and length scales, with an emphasis on the coupling between them.

BME X80J.5. Biostatistics, Study Design, and Research Methodology.

Principles for hypothesis testing; confidence limits; regression analysis; correlation; analysis of variance; experimental design and factorial analysis; discriminate analysis; applications of statistics.

BME X80J.6. Analysis of Biomedical Engineering Systems I.

Quantitative examination of the cardiovascular and respiratory systems from the cell to system levels. Presents the cardiovascular and respiratory systems in three phases: (1) anatomy and physiology; (2) energetics (thermodynamics), cellular processes, and engineering analysis; and (3) engineered devices, instrumentation, and imaging for therapeutics and diagnosis.

BME X80J.7. Analysis of Biomedical Engineering Systems II.

Computational techniques used in biomedical engineering. Students propose and conduct an engineering design study relevant to a selected medical problem.

BME X80J.8. Mathematical Methods for Biomedical Engineering.

Analyze common mathematical techniques useful for biomedical engineering. Utilize vector calculus, linear algebra, Fourier and Laplace Transforms, and ordinary and partial differential equations. Explore common MATLAB (or Python) functions and manipulations for computationally implementing these mathematical techniques in biomedical engineering applications.

BME X80M. Dual MD/PhD Program with UT Medical Branch.

Preclinical medical study at the University of Texas Medical Branch at Galveston.

BME X81J. Topics in Cell and Molecular Imaging.

BME X81J.1. Laser-Tissue Interaction: Thermal.

The thermal response of random media in interaction with laser irradiation. Calculation of the rate of heat production caused by direct absorption of the laser light, thermal damage, and ablation.

BME X81J.10. Optics and Lasers.

Fundamentals of geometric and physical optics, interaction of light with matter, spectroscopy, and laser and electro-optics applications.

BME X81J.11. Medical Imaging.

BME X81J.12. Optical Design.

The principles of optical design for imaging and laser delivery systems are given. Students develop and test designs using a commercial optical design software package.

BME X81J.13. Fluorescence Micro- and Spectroscopy.

Fundamentals of fluorescence microscopy, spectroscopy, and techniques; single-molecule detection; advanced microscopy, including multi-photon microscopy, super-resolution imaging, and molecular tracking. Other subjects include metal-enhanced fluorescence, optogenetics, nanomedicine and microfluidics.

BME X81J.14. Digital Video.

Examine video sampling and transform; video (retinal and cortical) filters; motion detection and estimation; statistical models of videos; neuroscience of video perception; natural video statistics; modern video compression standards; video quality prediction; video denoising; active contour models; and video saliency.

BME X81J.15. Imaging Clinical Immersion.

Identify current unmet clinical needs via close interaction with healthcare professionals and patients. Explore biomedical imaging across the healthcare enterprise.

BME X81J.2. Laser-Tissue Interaction: Optical.

The optical behavior of random media such as tissue in interaction with laser irradiation. Approximate transport equation methods to predict the absorption and scattering parameters of laser light inside tissue. Port-wine stain treatment; cancer treatment by photochemotherapy; and cardiovascular applications.

BME X81J.3. Imaging Signals and Systems.

Physical principles and signal processing techniques used in thermographic, ultrasonic, and radiographic imaging, including image reconstruction from projections such as CT scanning, MRI, and millimeter wave determination of temperature profiles.

BME X81J.4. Optical Spectroscopy.

Measurement and interpretation of spectra: steady-state and time-resolved absorption, fluorescence, phosphorescence, and Raman spectroscopy in the ultraviolet, visible, and infrared portions of the spectrum.

BME X81J.5. Therapeutic Heating.

Engineering aspects of electromagnetic fields that have therapeutic applications: diathermy (short wave, microwave, and ultrasound), electrosurgery (thermal damage processes), stimulation of excitable tissue, and electrical safety.

BME X81J.6. Noninvasive Optical Tomography.

Basic principles of optical tomographic imaging of biological materials for diagnostic or therapeutic applications. Optical-based tomographic

imaging techniques including photothermal, photoacoustic, and coherent methodologies.

BME X81J.7. Digital Image and Video Processing.
Digital image acquisition, processing, and analysis; algebraic and geometric image transformations; two-dimensional Fourier analysis; image filtering and coding.

BME X81J.8. Functional Imaging Laboratory.
Explores in vivo functional imaging, including aspects of imaging hardware and instrumentation, contrast agents, image processing, management of large imaging data sets, and applications of physiological modeling.

BME X81J.9. Fundamentals of Biomedical Optical Imaging.
Fundamentals of the interaction of light with tissue for the purpose of imaging and treatment of disease. Focuses on quantitative modeling of tissue optical properties, light propagation in the tissue, heat transfer of laser irradiated tissue, and thermal damage models. Includes discussion of applications in laser surgery, pulse oximetry, and disease diagnosis using spectroscopy.

BME X81M. Normal Body Structure and Function.
Exploration of the structure and function of the human body at all levels of organization, from molecular and cellular to the integrated function of multiple organ systems attempting to maintain homeostasis. Emphasis on wellness and normal structure/function, in addition to the mechanistic disruptions that cause illness as well as the scientific rationale for methods to diagnose and treat selected diseases.

BME X82J. Topics in Cellular and Biomolecular Engineering.

BME X82J.1. Cell and Tissue Engineering.
Use of case studies to explore pathologies of tissue, current clinical treatment, and the role of engineers in developing new technologies to diagnose and treat these pathologies. Emphasis on the use of quantitative cellular and molecular techniques. Applications of synthetic and natural biomaterials.

BME X82J.10. Immune Engineering.
Introduction to the concept of immune engineering. Discussion of vaccine design, cancer immunotherapy, genomics, infection, auto-immune diseases and emerging tools and methodologies.

BME X82J.11. Polymer and Bioconjugate Chemistry.
Examine principles of polymeric biomaterials and bioconjugate chemistry with an emphasis on synthetic strategies to achieve specific properties. Includes characterization methods of polymers and bioconjugates as a function of chemical composition, as well as tissue engineering and drug delivery applications as case studies of the biomaterial design process.

BME X82J.12. Biological Responses to Medical Devices.
Examine key challenges in the development and assessment of biomaterials used in medical devices, including common biological responses elicited by biomaterials and the impact of these responses on material performance. Includes material surface properties, modification, and characterization; protein/cell interactions with materials; biocompatibility, inflammation and wound healing, cell-mediated biodegradation of materials; thrombosis, infection and calcification of medical devices.

BME X82J.13. Delivery of Therapeutic Agents.
Explore molecular, biological, chemical, and mathematical fundamentals of the use of macromolecular carriers for the release of small and high molecular weight therapeutic agents in vitro and in vivo. Examine design and advanced techniques of protein, peptide, antibodies, and gene therapy. Discuss targeted delivery, mucoadhesive therapy, and theranostics, as well as advanced biomedical devices for treatment of diseases.

BME X82J.14. Nanomedicine.
Explore the fundamental properties, synthesis and characterization of nanomaterials, including their applications in nanomedicine. Discuss micro- and nano-particles for drug delivery and imaging, microfluidics for in vitro diagnostics and biological systems modeling, and nanomaterials and platforms for biological applications. Examine biomedical applications such as cancer, cardiovascular disease, and infectious diseases.

BME X82J.15. Matrices, Organoids, and Microphysiological Systems.
Explore current technologies and scientific literature seeking to construct human-relevant, in vitro systems representing tissues, organs, and disease physiologies as platforms for development of new therapies. Focus on how concepts in biomaterials, stem cell biology, microfluidics, additive manufacturing, and biosensing are integrated to create such platforms.

BME X82J.2. Introduction to Biochemical Engineering.
Microorganisms in chemical and biochemical synthesis; genetic manipulation of cells by classical and recombinant DNA techniques; enzyme technology; design of bioreactors and microbial fermentations; and separations of biological products.

BME X82J.3. Molecular Sensors and Nanodevices for Biomedical Engineering Applications.
Introduction to a variety of methods used to detect biological molecules with optical and electrical transduction mechanisms. Covers the classical approaches to biosensors for the detection of specific molecules in biological systems.

BME X82J.4. Advanced Engineering Biomaterials.
Overview of biomaterials, including prosthetics, ceramics, metal implants, and polymers, with specific emphasis on properties and applications. The immunology of material-tissue interactions and the issues of biocompatibility.

BME X82J.5. Structured Surfaces, Fabrication, Characterization, and Application.
Introduction to fabrication and characterization techniques used to create and analyze microstructured and nanostructured surfaces for biomedical and biotechnology applications. Focuses on the use of self-assembly processes for the fabrication of biological functionality in surface structures.

BME X82J.6. Biopolymers and Drug/Gene Delivery.
Biomedical polymers and their applications in drug delivery and gene therapy. Emphasis on parenteral, mucosal, and topical delivery of biomolecules, and the role of polymers in genetic therapy and DNA vaccination.

BME X82J.7. Cellular and Molecular Biomechanics.
Introduction to the concepts needed to understand and work in the emerging field of cellular and molecular biomechanics. Examination of dynamic interplay between chemical, thermal, and physical forces in determining the mechanics of cells/tissues and their molecular components.

BME X82J.8. Molecular Biophysics: Measurements and Methods.
In-depth study and development of intuition for thermodynamics and mechanics and application of understanding to molecular-scale problems in cell biology and biomedical engineering. Focus on increasing students' familiarity with modern methods of biophysical measurement, their strengths and limitations, and how they are being applied to address current research problems.

BME X82J.9. Biomimetic Design and Engineering.
Introduction to biomimetic reverse engineering, including the weaknesses of animal models to predict human physiology, microphysiological systems, the potential of human organs on chips to accelerate drug development processes, pharmaceutical preclinical testing requirements, human microbiome, disease models to study pathophysiology, and related subjects.

BME X82M. Biodesign: Needs Identification.
Identify concrete clinical needs via clinical immersion experience with healthcare professionals and patients. Apply engineering design methodologies to identify clinical needs based upon the most meaningful problems observed.

BME X83J. Topics in Computational Biomedical Engineering and Bioinformatics.

BME X83J.1. Network Thermodynamics in Biophysics.
Modeling and simulation methods for nonlinear biological processes, including coupling across multienergy domains; practical implementation by bond graph techniques.

BME X83J.10. Computational Biomolecular Engineering.
Provides an introduction to the principles and applications of biomolecular modeling and simulation, including the theoretical background of molecular thermodynamics and molecular mechanics, major simulation/computational techniques and commonly used software tools.

BME X83J.11. Dynamical Modeling of Biological Signaling and Regulatory Systems.
Introduction to various approaches currently used for modeling and simulating cellular signal transduction, metabolic, and gene regulatory networks.

BME X83J.12. Computational Modeling in Bioengineering and Medicine.
Comprehensive introduction to methods used in simulation of biological systems and processes. Emphasis on selected applications from single channels, cells, and tissues up to whole organs.

BME X83J.13. Introduction to Mathematical and Physical Biology.
Introduction to common mathematical and physical techniques used in modeling various aspects of biology at multiple spatial and temporal scales. Explore the integration of theory and experiment while identifying the current barriers preventing computational modeling from having a broader impact in biology.

BME X83J.14. Mathematical Physiology.
Explore mathematical modeling in physiology, how physiological problems can be formulated and modeled, and how such models give rise to interesting and challenging functional features. Examine several exemplar physiological systems. Discuss the mathematical aspects of growth and remodeling in living systems, an area unique to living systems.

BME X83J.2. Musculoskeletal Biomechanics.
Synthesis of properties of the musculotendon and skeletal systems to construct detailed computer models that quantify human performance and muscular coordination.

BME X83J.3. Introduction to Computational Oncology.
Computational techniques commonly used in modeling various aspects of cancer at multiple spatial and temporal scales. Exploration of how computational modeling offers unique and complementary information to traditional methods of cancer research. Emphasis on the integration of theory and experiment while identifying the current barriers preventing computational modeling from having a broader impact on both cancer biology and clinical oncology.

BME X83J.4. Biomechanics of Human Movement.

BME X83J.5. Introduction to Nonlinear Dynamics in Biological Systems.
Basic concepts of nonlinear mathematics and their application to biological systems.

BME X83J.7. Data Mining.
Analyzing large data sets for interesting and useful information; online analytical processing, finding association rules, clustering, classification, and function approximation; scalability of algorithms and real-life applications.

BME X83J.8. Systems Biology.
The biological function of genetic and biochemical networks from a quantitative perspective. Students use mathematical tools to model network modules, such as biological switches, oscillators, and amplifiers. Discusses recent papers on a variety of biological problems that can be addressed with a systems biology approach.

BME X83J.9. Computational Methods for Biomedical Engineers.
Study of and hands-on experiences with computational methods commonly employed in biomedical engineering research.

BME X83M. Biodesign: Entrepreneurship.
Develop a team project in biomedical engineering with emphasis on detailed design and prototyping. Prepare a business plan designed to bring product to market or use in clinical practice.

BME X84J. Topics in Instrumentation.

BME X84J.1. Biomedical Instrumentation I.
Application of electrical engineering techniques to analysis and instrumentation in biological sciences: pressure, flow, temperature measurement; bioelectrical signals; pacemakers; ultrasonics; electrical safety; electrotherapeutics.

BME X84J.2. Biomedical Instrumentation II: Real-Time Computer-Based Systems.
Design, testing, patient safety, electrical noise, biomedical measurement transducers, therapeutics, instrumentation electronics, microcomputer interfaces, and embedded systems. Participate in an individual laboratory.

BME X84J.3. Biosignal Analysis.
Theory and classification of biological signals such as EEG, EKG, and EMG. Data acquisition and analysis procedures for biological signals, including computer applications.

BME X84J.4. Bioelectric Phenomena.
Examines the physiological bases of bioelectricity and the techniques required to record bioelectric phenomena both intracellularly and extracellularly; the representation of bioelectric activity by equivalent dipoles and the volume conductor fields produced.

BME X84J.5. Projects in Biomedical Engineering.
An in-depth examination of selected topics, such as optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; noninvasive cardiovascular measurements.

BME X84J.6. Neurophysiology/Prosthesis Design.
The structure and function of the human brain. Discussion of selected neurological diseases in conjunction with normal neurophysiology. Study of neuroprosthesis treatments and design philosophy, functional neural stimulation, and functional muscular stimulation.

BME X84J.7. Introduction to Neural Engineering.
Survey of important concepts, applications, and challenges in neural engineering. Subjects include basic neurophysiology and electrophysiological signals, major neural interface modalities and various optical microscopy techniques, and design aspects of neural engineering devices. Emphasis on recent trends and frontiers in neural engineering.

BME X84J.8. Rehabilitation Engineering.
Explores use of robotic devices in physical therapy for neuromuscular injury. Clinicians lecture each week on a specific malady, followed by critical review of the literature of that malady from the perspective of rehabilitation engineering. Shadows therapists and develops a prototype of a device for therapy, assistance or diagnosis of patients, or conducts an experiment to test a hypothesis in the field using a device.

BME X84J.9. Bioelectronics and Biointerfaces.
Examine critical concepts and strategies in materials development, electronics fabrication and genetic innovations that interface with biological systems. Explore neural interfacing technology, flexible electronics, wearable technology, bio-nanotechnology, and genetic engineering. Focus on the recently developed technology for recording and manipulating neural systems.

BME X84T. Topics in Biomechanics.

BME X84T.1. Bioheat Transfer.
Explore the application of the principles of heat transfer to the solution of a series of advanced, open-ended problems in medicine and biology.

Identify and pursue solution strategies for a range of cutting-edge problems in bioheat transfer.

BME X84T.2. Cellular, Tissue, and Scaffold Biomechanics.
Explore an analysis of biosolid mechanics via the mechanical behavior of scaffolds and living tissues and cells. Examine biomechanical application areas, including cell mechanics, engineered materials, hard and soft tissues, and organs.

BME X84T.3. Soft Tissue Biomechanics.
Explore the fundamentals and critical applications of soft tissue mechanics. Examine continuum mechanics (kinematics, stress, balance of linear momentum, hyperelasticity), experimental and nonlinear finite element analyses of soft tissue mechanics, and relevant imaging modalities and related facilities available on campus.

BME X84T.4. Thin Film Mechanics.
Explore a comprehensive introduction to, and important applications of, thin film structures and devices. Discuss stress, fracture, delamination, instability, and other mechanics-related subjects involving thin films. Examine technological applications including integrated circuits, micro- and nano-electromechanical systems, flexible and stretchable electronics, bioelectronics, and surface coatings.

BME X84T.5. Tissue Microenvironments.
Explore varying native and bio-fabricated tissue microenvironments and hands-on opportunities for fabrication and bioprinting of tissues on a chip. Examine characterization of mechanical, thermal, transport, and cellular tissue response to microenvironments; imaging and computational approaches that enable prediction of cell and tissue behavior within physiological and pathological native or bio-fabricated tissues; and clinical perspectives which drive design of physiologically representative tissues on a chip and their use for diagnostic screening and therapeutic planning.

BME X85J. Topics in Biomedical Engineering.

BME X85J.39. Medical Decision Making.
Selected subjects from cognitive psychology and human-machine interaction for engineering students to design more effective systems for supporting medical decision making.

BME X85J.40. Cancer Bioengineering.
Analysis of the biology and pathology of cancer, including the fundamental nature of cancer, cellular oncogenes, growth factor signaling, tumor suppressor genes, apoptosis, multi-step tumorigenesis, angiogenesis, metastasis, and tumor immunology and immunotherapy. Also explores ways in which the tools of engineering are transforming the future of cancer research.

BME X85J.41. Medical Device Design and Manufacturing.
Apply engineering principles in the conception, design and prototyping of medical devices. Develop team projects with emphasis on clinical and market needs analysis, creative and useful concept generation, engineering requirements and specifications, and written and oral reporting of intermediate and final prototype outcomes.

BME X85J.42. Inquiry Based Instructional Design.
Examine principles of inquiry-based learning methods and their applications to an engineering pedagogical context. Use multiple, open-ended engineering problems as case studies and develop an independent course integrating inquiry-based learning content.

BME X85J.6. Analysis of Biological Systems.

BME X85M. Mechanisms of Disease.
Overview of the disease-specific concepts required to participate in patient care by integrating clinical medicine, microbiology, pathology, and pharmacology into organ system modules, and the pathophysiology of diseases, the differential diagnosis of cardinal symptoms, and treatment modalities. Includes other concepts such as radiology and diagnostics.

BME X86J. Biomedical Engineering Microscopy Foundations Laboratory.
Explore finite and infinite imagery; conjugate planes, back focal plan manipulation, Abbe theory image formation, point spread functions, camera principles, fluorescence, and advanced fluorescence techniques. Build an optical microscope.

BME X96. Research Internship.
Students participate in research in an industry, clinic, or academic laboratory setting selected with the approval of the faculty adviser.

BME X97. Research Problems.
Problems selected by the student with approval of the faculty adviser.

BME X97D. Deep Reading in Science and Engineering.
Analyze primary research articles with the goal of improving understanding of experimental design/methods, writing scientific articles and critiquing current research.

BME X97E. Professional Responsibilities in Imaging.

BME X97M. Mentoring Undergraduates in Research.
Designed to support and develop students' skills in mentoring undergraduates engaged in science, technology, engineering and mathematics (STEM) research.

BME X97N. Integrated Biomedical Engineering Seminar.
Designed to support students' professional development as well as their broad understanding of the biomedical engineering research enterprise.

BME X97P. Graduate Professional Development Seminar.
Explores professional development goals of biomedical engineers. Subjects include an individual development plan, careers in academia, entrepreneurship, careers in industry, and more.

BME X97S. Graduate Seminar in Biomedical Engineering.

BME X98. Thesis.

BME X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

BME X99W. Dissertation.

Professional Courses

BME X97. Research Problems.
Problems selected by the student with approval of the faculty adviser.

BME X97S. Graduate Seminar in Biomedical Engineering.

C C - Classical Civilization

Classical Civilization: C C

Lower-Division Courses

C C X01. Introduction to Ancient Greece.
Greatness of Greece as reflected in Greek history, literature, philosophy, art, religion, and politics. No knowledge of Greek is required.

C C X02. Introduction to Ancient Rome.
Survey of the highlights and the influence of Roman civilization. No knowledge of Latin is required.

C C X03. Introduction to Classical Mythology.
Survey of major Greek and Roman myths and their influence on literature, art, and music.

C C X04C. Topics in the Ancient World.
An introductory survey of the highlights of Greek and Roman civilization and early Christianity. No knowledge of Greek or Latin is required.

C C X04C.2. Paganism to Christianity: An Introduction.

C C X04C.6. Ancient Philosophy.
An introduction to the philosophical achievements of the ancient world, concentrating on Plato and Aristotle.

C C X04D. Classical Mythology and the Occult.
Explore the background for the mythologies of Egypt, Greece, and Rome, and areas of occult practice.

C C X04E. Introduction to the New Testament.
Examines representative examples of the texts found in the Christian New Testament and selected noncanonical writings. Focuses on historical setting and systematic methods of interpretation.

C C X04F. Introduction to Classical Literature.
Explore the literature of ancient Greece and Rome, its relationship to other literatures and arts, and the main current approaches to research in the field.

C C X04G. Jews, Pagans, and Christians.
Investigate, using a range of primary and secondary readings, how religious identity was imagined and expressed in the 4th-6th centuries CE. Examine the complex interactions of, in particular, Jews, Christians, and Pagans.

C C X04J. Art and Architecture of Ancient Egypt.
Introduction to the complex and intriguing culture of ancient Egypt and to its legacy in society through the examination of its art and archaeology.

C C X04L. Greece and Rome: Film and Reality.
Explore key events and personalities of ancient Greece and Rome and their treatment in major European and American films.

C C X04M. Ancient Cities.
Introduction to the urban centers of the ancient Mediterranean world.

C C X06. Introduction to the Latin and Greek Element in English.
The systematic study of the Latin and Greek elements in the English vocabulary with a view to increasing the student's facility and authority in English. No knowledge of Greek or Latin is required.

C C X06M. Introduction to Medical and Scientific Terminology.
A systematic study of medical and scientific terminology based on Greek and Latin roots. No knowledge of Greek or Latin is required.

C C X07C. Introduction to Greek Archaeology.
A survey of the artifacts, monuments, and sites of ancient Greece, and their value for documenting Greek religious, social, and cultural history. No knowledge of Greek is required.

C C X07D. Introduction to Roman Archaeology.
A survey of the artifacts, monuments, and sites of ancient Rome, and their value for documenting Roman religious, social, and cultural history. No knowledge of Latin is required.

C C X08D. Greek Tragedy.
Explore Greek tragedy through reading, class discussion, and performance.

C C X18. The Rise of Christianity.
Introduction to the origins and development of Christianity.

C C X19D. The Ancient Mediterranean World.
Survey of the ancient Mediterranean from ca. 3000 BC to AD 476. Focus on the development of ideas and institutions in the Greek and Roman worlds and on the active cultural exchange among the diverse civilizations of the broader region that shaped Greek and Roman history and cultural identity.

C C X19S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C C X29S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

C C X19S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C C X20P. Classical Archaeology: Practice and Ethics.
Explore an overview of the history, methods, approaches, and ethics of classical archaeology focusing on case studies of major sites and their excavations.

C C X22C. Ancient Epic.
Explore epic poems of Greece and Rome in translation.

C C X22D. The Ancient Historians.
Examines the main works of ancient historiography, and provides grounding in the central issues with which these works engage.

C C X26M. Latin Scientific Terminology.
Study the mechanics of translating biological and anatomical Latin terms, such as Macropus rufus and M. abductor pollicis longus, by learning the grammar and vocabulary commonly used in scientific Latin.

C C X27. Parageography.
Survey of the classical and medieval roots of speculative literature, especially those fantasies that involve the creation and presentation of imaginary places, lands, and worlds. No knowledge of Greek or Latin is required.

C C X29S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C C X40. Advanced Topics in Classical Archaeology.
Detailed study of topics such as architecture, sculpture, or topography of sites. No knowledge of Greek or Latin is required.

C C X40.1. Greek Archaeology.
Study of the artifacts, monuments, and sites of classical Greece; and their value for documenting ancient Greek religious, social, and cultural history.

C C X40.10. Archaeology, Art, and Analysis of Greco-Roman and Aegean Pottery.
Various approaches to pottery and analytical techniques. Combines lectures with hands-on analysis of sherds, as well as the experimental manufacture of pottery in bonfires.

C C X40.11. Water and the Roman City.
Examine Roman urban development, design, and adaption from the perspective of hydrology, hydraulics, and cult and culture.

C C X40.12. The Bronze Age: Kings and Heroes.
Examine the ancient civilizations of the Bronze Age Aegean (3000-1100 BCE): Crete, the Cyclades, Mainland Greece, and Western Anatolia.

C C X40.13. Shrines and Sanctuaries.
Survey Greek and Roman religious architecture and sacred space from the Bronze Age to the Hellenistic and Roman Empires.

C C X40.14. Sicily: Cultures and Conquest.
Examine Sicily from the earliest prehistoric settlements to its first Norman king, with a focus on questions of change, recurrence, and continuity as viewed within the dual frames of archaeology and history.

C C X40.2. Art and Politics in Imperial Rome.
Public art of the Roman Empire from Augustus to late antiquity, ca. 31 BC to AD 350.

C C X40.3. Greek Architecture.
The architecture of mainland Greece, Asia Minor, and Sicily from the Dark Ages to the end of the Hellenistic period (ca. 1000 to 30 BC), with emphasis on public buildings, both religious and secular.

C C X40.4. Roman Architecture.

C C X40.5. Hellenistic Art and Architecture.
Art of the Hellenistic period from the reign of Alexander the Great to the beginning of the Roman Empire, ca. 336 to 31 BC.

C C X40.6. Food, Health, and Culture in the Ancient Mediterranean.
Values and social practices in the ancient Mediterranean as expressed by foodways and nutritional choices.

C C X40.7. Pompeii.
Uses ancient literary texts and various analytical approaches to examine the ancient remains of Pompeii and Herculaneum in context.

C C X40.8. Archaeology of Greek Prehistory.
Explores the development of complex societies in ancient Greece by studying its prehistory through archaeology.

C C X40.9. Topography and Monuments of Ancient Rome.
Examines the architecture and urban development of Rome from its beginnings until late antiquity.

C C X48. Topics in Ancient Civilization.
The development and progress of ancient civilization, including history, philosophy, literature, and culture. No knowledge of Greek or Latin is required.

C C X48.10. Jesus in History and Tradition.
Critical issues, scholarly debates, and historical methods in studying the development of the Christian tradition regarding the figure of Jesus.

C C X48.11. Ancient Egypt.
Discussion of Egypt's culture, language, and history from the prehistorical period (13,000 BC) to the New Kingdom (1069 BC).

C C X48.14. Ancient Greek Medicine.
Examines ancient Greek medicine in light of the modern fields of pathology, surgery, pharmacology, therapy, obstetrics, psychology, anatomy, medical science, ethics, and education.

C C X48.15. Civil War in Rome.
Examines the sequence of civil conflict in Rome from the struggle of the orders through the rise of Constantine the Great.

C C X48.16. Moral Agency In Greek Tragedy.
Subjects include the masterpieces of Greek tragedy, the social and cultural background of the texts, and questions posed by the texts.

C C X48.17. Egyptian Hieroglyphics in Cultural Context.
The vocabulary and grammar of ancient Egypt as a guide to understanding artifacts and monuments from the different periods of Egyptian history, whether in museums, exhibitions, or on site overseas.

C C X48.19. Nero.
Nero's life in its larger social and historical context, as well as his reception in the medieval period and beyond.

C C X48.20. Roman Philosophy and Science.
Examines the aims, methods, and achievements of philosophy and science in the ancient Roman world.

C C X48.21. Lost Languages and Decipherment.

C C X48.23. Values and Leadership in Ancient World.

C C X48.24. Daily Life in Ancient Egypt.
Delve into all areas of Egyptian daily life from the dawn of the dynasties to the age of Cleopatra.

C C X48.3. Greek Private Life.

C C X48.4. History of Ancient Philosophy.
Development of Western philosophy from the pre-Socratics to the early Christian era; emphasis on Plato and Aristotle.

C C X48.5. Homosexuality in Antiquity.

C C X48C. Hermits, Monks, and Saints in Early Christianity.
Examine individual and communal forms of Christian monasticism from the first through fifth centuries CE. Explore the social, economic and religious factors that may have made a life of self-denial attractive to many early Christians and the role of authority in these movements.

C C X48D. Interpretation of Jesus' Death and Resurrection.
Examine the narratives of Jesus' death and resurrection and their subsequent interpretation over the last two thousand years. Analyze historical Christian and Islamic texts, contemporary debates and cultural context.

C C X48E. Plato and His Philosophy.
Intensive study of selected works by Plato.

C C X48F. Beyond the New Testament.
Study of early Christian writings that were not included in the Christian Bible. Examines issues such as the effect of narrative, religion and violence, gendered expectations for women and men, the uses of fantasy literature, and religious authority. Emphasis on systematic methods for disciplined interpretation.

C C X48G. Death and the Afterlife in Graeco-Roman Antiquity.
Explore the afterlife from Near Eastern myths and Homer through Greek and Roman antiquity to the early Church Fathers.

C C X48I. Revelation and Apocalyptic Literature.
Examine the Book of Revelation in the context of early Christian and Jewish literature. Study other apocalyptic texts, methods of textual analysis, and the ongoing effects of Revelation in modern American culture.

C C X48J. Paul and His Social World.
Examine the life and letters of the first-century Jewish missionary Paul by interpreting his writings within the context of diaspora Judaism and the broader Greco-Roman world. Explore his legacy within the context of early church history.

C C X48K. Archaic Greece: Society and Culture.

C C X48L. Horror in Classics and Film.
Examine themes of modern horror films as they appear across genres and periods of ancient texts.

C C X48M. Ritual and Belief in Ancient Greece.
Investigate the practices, premises, and cultural contexts of ancient Greek religion through direct study of ancient sources informed by modern critical approaches.

C C X48N. Myths and Legends of the Ancient Near East.
Explore myths and legends contained in a variety of ancient sources, including texts from Israel, Greece, Egypt, and Mesopotamia.

C C X48O. Aristotle.
Study the philosophy of Aristotle through the examination of key texts.

C C X48P. Africa and Rome.
Explore the history of Roman Africa with emphasis on what is now Tunisia and northern Algeria.

C C X48Q. Slavery and the New Testament.
Examine slavery in the New Testament.

C C X48R. Ancient Mediterranean Religion and Astrology.
Explore the role of astrology in ancient Mediterranean religious life.

C C X48S. Sex and Power: The Cleopatras.
Explore the social, economic, and political roles of women in the Hellenistic age through the lens of the royal women sharing the dynastic name 'Cleopatra.'

C C X48T. Archaeology of Jesus's World.
Explore archaeological methods in examining texts and artifacts from first century CE.

C C X48U. Romans in Court.
Examine how Roman law operated at three levels of granularity, focusing mainly on attested disputes that made it to court for resolution.

C C X48V. Ruling the Roman Republic.
Examine the core question about the way the Late Roman Republic was governed: To what extent and in what ways was the Republic "democratic or not?

C C X63. Conference Course in Classical Civilization.
Supervised work in various specialized aspects of classical civilization. No knowledge of Greek or Latin is required.

C C X70. Quantitative Criticism.
Introduction to collaborative research and cross-disciplinary methods in the study of language and culture. Explore the literature of Ancient Greece and Rome which provides a convenient model for longue duree cultural analysis, but examples discussed come from diverse fields.

C C X75. Topics in Seminar in Classical Studies.
Study of selected topics in classical studies. Some knowledge of Greek or Latin is expected.

C C X75.1. Roman Law.
Introduction to Roman law with close study of primary sources.

C C X75.10. Roman Social History.
Examine Roman social history: family structure and demography, gender systems, official social hierarchies, urban/rural interactions and labor. Consideration both of primary evidence and the historiography of the field.

C C X75.2. Aegean Prehistory.
Traces political, social, economic, and general cultural developments on Crete and the Greek mainland between roughly 2200 and 1100 BCE.

C C X75.3. Writing Ancient History Today.
Questions that engage ancient historians today and the methods that they use. Some background in ancient Greek history is recommended.

C C X75.4. The Athenian Empire.
Explores Athenian society, democracy, and empire from the development of Athenian hegemony in the 470s BCE through the break up of the Athenian Empire in 404 BCE.

C C X75.5. Space and Place.
Multidisciplinary approach to the cultural concepts of space and place using Greek and Roman literary, historical, and archaeological sources.

C C X75.6. Ancient Sparta.
Examines topics and problems in the social, political and economic history of the ancient city-state of Sparta.

C C X75.7. Cognitive History of the Ancient World.
Examines aspects of the organization of thought in the ancient world.

C C X75.8. Herodotus, Ethnography, and Archaeology.
Explore the ethnographic component of the Histories of Herodotus.

C C X75.9. Literacy, Numeracy, and Visuality.
Analyze literacy, numeracy, and visuality, that is "reading" and writing" by means of visual representations, largely by tracing the history of how modern scholars have analyzed those practices.

C C X79H. Honors Tutorial Course.
Supervised conference course for honors candidates in classics.

Graduate Courses

C C X19S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C C X29S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C C X80. Topics in Seminar in Classical Archaeology.
Topics given in recent years include methods and theory, Greek and Roman Naples, landscape archaeology, and Hellenistic and Roman Egypt.

C C X80J. Proseminar in Classical Literature.
Brief survey of the history of classical literature; orientation to the major periods and genres.

C C X81. Conference Course in Classical Civilization.
Studies in classical antiquity. A knowledge of the ancient languages is not required.

C C X82. Topics in Field Archaeology.
Involves the participation of the student in an archaeological excavation; the study of field techniques includes excavation procedure, documentation, conservation, and interpretation.

C C X83. Topics in Classical Civilization.
Studies in various aspects of Greek and Roman literature, history, and culture.

C C X83.1. Roman Imperial Funerary Monuments.

C C X83.2. Introduction to Diachronic Linguistics: Germanic.

C C X83K. Current Concepts and Research in Classics.
Overview of important theories, issues, and research in classics.

C C X87. Writing in Research Contexts.
Introduction to long form writing for researchers. Focus on planning larger-scale research projects, integrating data and theory, writing a literature review, and planning a long-for piece of writing based on research.

C C X97. Dissertation Prospectus Workshop.
Write the first draft of a dissertation prospectus and prepare to write a dissertation. Focus on refining the research area, identifying an archive, developing research protocols, connecting the research area with current and past work in the field, and establishing broader relevance for the area.

Professional Courses

C C X19S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C C X29S. Topics in Classical Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C E - Civil Engineering

Civil Engineering: C E

Lower-Division Courses

C E X01. Civil Engineering Systems.
Introduction to civil engineering as a career; engineering problem solving; use of computers for text, graphics, and data analysis; introduction to civil engineering measurements; breadth of disciplines within civil engineering; engineering ethics, sustainability.

C E X07K. Topics in Civil Engineering.

C E X11K. Introduction to Computer Methods.
Organization and programming of civil engineering problems for computer solutions.

C E X11S. Probability and Statistics for Civil Engineers.
Basic theory of probability and statistics with practical applications to civil engineering problems, including statistical inference and sampling. Additional subjects may include reliability and risk analyses, estimation and regression analyses, and experimental design.

C E X19F. Elementary Mechanics of Fluids.
Fluid properties, hydrostatics, elements of fluid dynamics, energy and momentum, boundary layers, similitude, pipe flow, metering instruments, drag forces.

C E X19S. Topics in Civil Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C E X96M. Advanced Topics in Atmospheric Science.

C E X96M.1. General Topics.

C E X96M.2. Air Pollution Meteorology.

Basic meteorology applied to air pollution; diffusion of conservative and nonconservative pollutants; plume rise; air pollution models.

Upper-Division Courses

C E X21. Transportation Systems.

Planning, economics, location, construction, operation, maintenance, and design of transportation systems; concepts of various modes of transportation.

C E X24P. Properties and Behavior of Engineering Materials.

Structure, properties, and behavior of engineering materials, including concrete and metals. Laboratory exercises illustrate mechanical behavior of typical materials and demonstrate selected principles of mechanics.

C E X29. Structural Analysis.

Classical methods of analysis for determinate and indeterminate structures under stationary and moving loads.

C E X29S. Topics in Civil Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C E X31. Reinforced Concrete Design.

Design of reinforced concrete beams and columns.

C E X33T. Engineering Communication.

Technical communication skills for engineers, especially researching and writing technical documents for many kinds of readers, managing and documenting sources of information, using and explaining graphics, delivering oral presentations, working collaboratively, and eliciting information from experts and stakeholders.

C E X35. Elements of Steel Design.

Analysis and design of tension members, beams, columns, and bolted and welded connections.

C E X41. Introduction to Environmental Engineering.

Quantitative evaluation of the environmental, economic, and technical problems involved in control of pollutants of the air, water, and land.

C E X42. Water and Wastewater Treatment Engineering.

Application of chemical, biological, and physical principles to the analysis and design of treatment processes for drinking water, industrial process water, municipal wastewater, and water reuse applications.

C E X46. Solid Waste Engineering and Management.

Characteristics of municipal and industrial solid wastes, generation rates, collection systems, recycling, processing, and disposal.

C E X51. Concrete Materials.

Portland cement, aggregates, supplementary cementing materials, properties of fresh and hardened concrete, concrete durability, mixture proportioning, concrete construction, and special concretes.

C E X56. Elements of Hydraulic Engineering.

Flow in closed conduits, hydraulic machinery; open-channel flow; flow measurement; design of storm sewers.

C E X57. Geotechnical Engineering.

Engineering properties of soils; hydraulic conductivity and shear strength of soils; soil compaction and consolidation; stresses with the soil mass; settlement of foundations of structures; laboratory measurements.

C E X58. Introductory Ocean Engineering.

Wave theory and its applications to coastal engineering, wave energy conversion, and offshore structure technology. Includes fundamentals of inviscid and viscous flow of incompressible fluids, and applications of computational fluid dynamics (CFD) in design.

C E X60K. Foundation Engineering.

Effect of geotechnical conditions on the behavior, proportioning, and choice of foundation type; design of shallow and deep foundations; study of foundation case histories.

C E X62M. Advanced Reinforced Concrete Design.

Design of reinforced concrete buildings, including floor systems and structural walls.

C E X62N. Advanced Steel Design.

Design of steel buildings, beam columns, composite beams, plate girders, and connections.

C E X63. Advanced Structural Analysis.

Structural analysis for forces and deflections using stiffness and flexibility approaches; application of energy methods in structural analysis; stiffness methods for computer-based structural analysis.

C E X64. Design of Wastewater and Water Treatment Facilities.

Explore analysis, synthesis, and integrated design of municipal water and wastewater treatment plants.

C E X66K. Design of Bituminous Mixtures.

Fundamental properties of asphalt and aggregates, design and construction of asphalt mixtures, special mixtures, and superpave design method.

C E X67G. Design and Evaluation of Ground-Based Transportation Systems.

Methods for design and evaluation of transportation systems, emphasizing roadway and non-motorized travel, in light of traveler safety, system operations, construction and maintenance costs, environmental impacts, and other considerations.

C E X67P. Pavement Design and Performance.

Basic principles of design of pavements for highways, airfields, and railroads; pavement construction, maintenance, and rehabilitation.

C E X67R. Optimization Techniques for Transportation Engineers.

Overview of optimization techniques, including linear programming, nonlinear optimization, and network flow algorithms including shortest path, maximum flow, and minimum spanning tree. Examples and applications primarily drawn from transportation engineering, with connections to other areas.

C E X67T. Traffic Engineering.

Driver and vehicle characteristics, traffic studies, traffic laws and ordinances, intersection capacity, signs, markings, signals, bus transit, parking, design of street systems, and operational controls.

C E X69L. Air Pollution Engineering.

Characterization of sources, emissions, transport, transformation, effects, and control of outdoor and indoor air pollutants. Applications of chemistry, thermodynamics, and fluid mechanics in the selection and design of air pollution control equipment.

C E X69R. Indoor Air Quality.

Sources, properties, transport and fate, human exposure, and adverse responses to indoor air pollutants. Control strategies and engineered technologies to mitigate impacts of gaseous and particle phase air pollutants in indoor environments.

C E X70K. Environmental Sampling and Analysis.

Principles of environmental chemistry; measurement of contaminants in air, water, and land environments; applications to municipal, industrial, and ambient samples.

C E X70L. Climate Change Mitigation.

Explore the large-scale solutions to climate change systematically. Examine the fundamentals of climate science, mitigation of climate change through transformation of energy supply and end-use, geoengineering, and industrial carbon management. Discuss the social and economic context for engineered solutions.

C E X70P. Engineering Professionalism.

Examines professional engineering licensure, ethics, leadership, public service, and public policy, with an emphasis on multidisciplinary

perspectives, legal and business considerations, and the importance of lifelong learning. Includes participation in a culminating major design project in public service, reflecting knowledge from technical electives and base level coursework.

C E X71P. Engineering Professionalism.

Examines professional engineering licensure, ethics, leadership, public service, and public policy, with an emphasis on multidisciplinary perspectives, legal and business considerations, and the importance of lifelong learning. Includes participation in a culminating major design project in public service, reflecting knowledge from technical electives and base level coursework.

C E X74K. Hydrology.

Phases of the hydrologic cycle and associated transport processes; land surface-atmosphere interaction; soil infiltration; rainfall runoff; unit hydrograph; flow routing; hydrologic statistics; and extreme events, including design storms and flows.

C E X74N. Topics in Natural Water Systems Engineering.

C E X74N.1. River Mechanics.

Explore the application of engineering hydraulics to analysis of river behavior and sediment transport through complex natural topography. Examine basin-scale and reach-scale river dynamics as well as river restoration design and analyses.

C E X74N.2. Ecohydraulics.

Explore the application of engineering hydraulics to analysis of river and stream behavior at small scales that interact with ecology. Examine sustainable design with vegetation to mitigate sediment impacts as well as hydraulic effects on invasive species.

C E X74U. Topics in Urban Water Systems Engineering.

C E X74U.1. Urban Stormwater.

Explore the application of engineering hydraulics to design and analyses of urban stormwater infrastructure. Examine engineering hydrology for design storms; an introduction to hydraulic and hydrologic modeling tools; and design requirements for controlling urban water quality and enhancing sustainability.

C E X74U.2. Smart Water Infrastructure.

Explore the application of engineering hydraulics to design and analyses of urban water distribution systems. Examine computational modeling and control of pipe networks as well as considerations of variable user demand, fireflow, and contaminant transport.

C E X75. Earth Slopes and Retaining Structures.

Earth fills, excavations, and dams; soil compaction and ground improvement, seepage and dewatering; stability of natural slopes and embankments; earth-pressure theories; design of earth retaining structures.

C E X77K. Topics in Civil Engineering.

Various specified topics or conference course.

C E X77K.7. Independent Study.

Conduct independent research with a tenure track faculty member in the Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering. Prepare a project proposal and a final report, each of which is evaluated by the faculty supervisor.

C E X77R. Internship.

C E X79H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis.

C E X96M. Advanced Topics in Atmospheric Science.

C E X96M.1. General Topics.

C E X96M.2. Air Pollution Meteorology.

Basic meteorology applied to air pollution; diffusion of conservative and nonconservative pollutants; plume rise; air pollution models.

Graduate Courses

C E X80D. Experimental Methods in Fluid Dynamics.

Explore experimental techniques and instrumentation for studying common turbulent flows. Examine fundamentals of signal processing, data pre- and post-processing techniques for optical and acoustic instrumentation, turbulent flow analysis, and experimental design. Utilize particle image velocimetry, laser induced fluorescence, and acoustic Doppler velocimetry.

C E X80P. Topics in Ocean Engineering Principles: Theory and Applications.

C E X80P.4. Boundary Element Methods.

Formulation and numerical implementation of boundary element methods; applications to problems in fluid mechanics, structural analysis, and solid mechanics.

C E X80P.5. Hydrodynamics of Marine Propulsors and Turbines.

Hydrofoil and lifting surface theory, actuator disk and lifting line theory, modeling via vortex lattice, panel methods, and Reynolds-Averaged Navier-Stokes solvers, optimum loading and blade design techniques for propellers and turbines, unsteady blade and shaft forces, and modeling of sheet cavitation.

C E X80S. Environmental Fluid Mechanics.

Fundamentals of fluid mechanics applied in natural systems; analysis of energy; momentum, diffusion, turbulence, and stratification in lakes, rivers, and estuaries.

C E X80T. Computational Environmental Fluid Mechanics.

Basics of numerical methods as applied to the solution of the steady and unsteady fluid flow equations, such as the Euler and the Navier-Stokes equations and the advection-diffusion equation. Emphasis on finite volume methods as applied to fluid mechanics problems in civil and environmental engineering.

C E X80W. Water Resources Engineering Research Seminar.

Presentations and discussions on various topics in water resources engineering.

C E X81D. Linear Regression and Discrete Choice Methods.

Examine econometric model estimation methods and use of behavioral models in service design, marketing, and prediction. Discuss practical problems in the context of transportation planning to gain familiarity with models used and experience in data handling and estimation.

C E X81E. Design of Energy Efficient and Healthy Buildings.

Design of buildings for low energy use and optimal indoor air quality. Includes ventilation, energy efficiency, moisture problems, and prevention by design.

C E X81P. Computer Methods in Structural Analysis.

Linear and nonlinear analysis of trusses and frames; introduction to structural stability; and computational aspects of linear and nonlinear structural analysis.

C E X81R. The Finite Element Method.

Introductory concepts; weighted residual methods; strong and weak forms; boundary conditions; global v. local basis functions; error estimates; smooth and nonsmooth problems; one-dimensional second- and fourth-order problems; two-dimensional potential and plate problems; two-dimensional and three-dimensional elasticity; dynamic and eigenvalue problems; numerical, computational, and meshing issues; applications using commercial software.

C E X81T. Numerical Modeling of Physical Systems.

Survey of numerical methods; weighted residuals, finite differences, finite elements, boundary elements; applications to equilibrium, eigenvalue, and propagation problems.

C E X81W. Introduction to Wave Physics.

An introductory course in the theory and modeling of propagating waves. Subjects may include scalar waves in 1-D and 2-D, traveling and standing waves, flexural waves in beams, dispersion, phase and group velocity, vector waves in 2-D and 3-D, waves in infinite media and semi-infinite media, P waves, SH waves, SV waves, Rayleigh and Love surface waves,

Stoneley waves, reflection and transmission at interfaces, numerical modeling, radiation conditions, scattering and radiation from obstacles, and fluid-solid interaction.

C E X82H. Structural Health Monitoring and Nondestructive Evaluation.
Explore the principal methods used for non-destructive evaluation (NDE) and structural health monitoring (SHM) of structural components. Examine relevant physical principles of continuum mechanics, electrical engineering, acoustics, and elastic wave propagation underlying the experimental methods. Examine sensor data acquisition and interrogation and ultrasonic digital signal processing. Utilize laboratory demonstrations on selected subjects.

C E X82L. Plastic Design in Metals.
Principles and methods of plastic analyses and design, and their applications to continuous beams, frames, plates, connections, and multistory buildings.

C E X82N. Structural Systems.
Application of systems engineering principles to planning, design, and construction of building and bridge structures with emphasis on performance requirements and economic factors.

C E X83C. Experimental Methods in Structural Engineering.
Survey of experimental methods used in structural engineering, including loading and measurement techniques and systems used in structural research.

C E X83D. Steel Bridge Design.
Design of steel highway bridges, including the analysis and design of composite girder, box girder, and cable-stayed bridges.

C E X83F. Structural Fire Engineering.
Behavior and design of structures subjected to fire; heat transfer fundamentals and modeling of fires; material properties at elevated temperature; structural fire resistance and protection; calculating structure-fire response.

C E X83L. Advanced Reinforced Concrete Members.
Behavior of reinforced concrete members; critical review of specifications; limit states; anchorage and development of reinforcement; shear; torsion.

C E X83N. Advanced Reinforced Concrete Structures.
Behavior of reinforced concrete structures, with emphasis on ductility and detailing of frames, slabs, and braced (shearwall) structures. Detailing for seismic loads.

C E X83P. Prestressed Concrete.
Theory, advantages, and limitations; various systems of prestressing; composite construction; continuous span theory.

C E X83R. Repair and Strengthening of Reinforced Concrete Structures.
Evaluation of condition, strength, serviceability, and ductility of existing structures; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces.

C E X83S. Structural Concrete Bridges.
Planning, design, and construction of reinforced concrete and prestressed concrete bridges, including arch, frame, girder, and cable stay systems; aesthetics, economy, and durability.

C E X83T. Plasticity in Structural Concrete.
Application of plasticity theory to structural concrete columns, girders, frames, and joints. Development and application of transparent detailing methods such as truss models, strut-and-tie models, and both strip and yield line methods for slabs.

C E X84P. Dynamic Response of Structures.
Single and multidegree-of-freedom systems; dynamic load factors, response to harmonic excitation; damping; modal analysis; direct integration of equations of motion; analysis in time and frequency domains; application to earthquake, wind, wave, and traffic loadings.

C E X84R. Earthquake Engineering.
Earthquake characteristics; seismic loads; elastic and inelastic response; analysis and design of buildings for earthquakes.

C E X84S. Structural Reliability.
Load and resistance factors in reliability-based design; first- and second-order reliability methods; Monte Carlo simulation techniques with variance reduction and importance sampling refinements; reliability of systems; fault-tree and event-tree models; inverse reliability procedures; and random fields and stochastic finite element analysis for reliability analysis.

C E X84T. Blast-Resistant Structural Design.
Physics of explosions and basic blast phenomenology; structural loading due to blast effects; nonlinear dynamic response of blast-loaded structures; protective design; progressive collapse.

C E X85D. Water Resources Planning and Management.
Application of engineering economics and operations research to the planning and management of water systems. Major subjects include water supply, water resources management, multi-objective planning, and optimization techniques. Focus on programming skills and implementation of the models using a programming language.

C E X85G. Transboundary Water Resources.
Introduction to planning, policy, and development of water resources in the international setting, with emphasis on transboundary situations. Basic concepts of water rights and international law pertaining to transboundary water use and protection; economic analysis and applications to transboundary water resources problems; international development goals and how these relate to water supply and use.

C E X85J. Hazardous Waste Management.
Legal and technological approaches to effective and sustainable control of hazardous wastes and contaminated sites, studied through problem evaluation and solution.

C E X85K. Topics in Water Quality.
Analysis of water quality in natural systems and of effects of wastewater discharges.

C E X85K.1. Stream, Impoundment, and Estuarine Analysis I.
Basic physical, chemical, and biological properties of streams, impoundments, estuaries, and coastal waters; methods for analysis of water quality problems.

C E X85K.2. Stream, Impoundment, and Estuarine Analysis II.
Application of methods of analysis to development of a water quality management plan for a water body in Texas.

C E X85K.3. Water Quality Modeling.
Mathematical modeling of water quality, including dissolved oxygen, nutrients, and toxic substances in lakes, reservoirs, rivers, and estuaries.

C E X85K.4. Water Pollution Ecology.
Advanced topics in the application of engineering solutions to ecological problems in freshwater and marine environments.

C E X85L. Topics in Water and Wastewater Treatment.
Principles of sustainable treatment of domestic and industrial water, wastewater, and sludges.

C E X85L.1. Physical and Chemical Treatment.

C E X85L.2. Biological Wastewater Treatment and Sludge Processing.

C E X85L.3. Advanced Treatment Processes.
Project-based course addressing advanced topics in treatment process design: alternative designs, computer models, laboratory testing, economics, and least-cost designs.

C E X85M. Unit Operations in Water and Wastewater Treatment.
Physical, chemical, and biological unit operations for sustainable water and wastewater treatment.

C E X85N. Industrial Wastewater Treatment.
Industrial wastewater characteristics; methods of in-plant control; application of various biological, chemical, and physical processes in practical water pollution control systems.

C E X85R. Land Treatment of Wastes.
Principles of the use of land in management of municipal and industrial wastewaters, sludges, and solids; includes problem evaluations.

C E X85S. Stochastic Hydrology.
Probability and statistics applied to the solution of hydrological problems; extreme event frequency analysis, time series analysis of hydrologic data, autocorrelation and spectral analysis, theory of regionalized variables and applications.

C E X85W. Drinking Water: Treatment and Public Health Issues.
Fundamentals and applications of drinking water treatment processes, interactions among treatment processes, source water quality, and public health issues.

C E X86M. Water Treatment and Wastewater Treatment Plant Design.
Design of water and wastewater treatment facilities; pumps and hydraulic considerations; design of wastewater collection systems; design of systems for handling and disposal of residuals. Specific facilities may be selected to meet individual interests.

C E X86P. Engineering Fracture Mechanics.
Application of fracture mechanics to fracture-safe design of metal structures; material behavior and analysis of components containing cracks.

C E X86R. Inelastic Behavior of Materials.
Introduction to theories of inelastic behavior; theory of plasticity; applications to materials such as steel, concrete, and soils; implementation of constitutive equations in structural analysis.

C E X87C. Geoenvironmental Engineering.
Hydraulic conductivity of soils; clay behavior; compacted clay barriers; unsaturated soil behavior and barriers; geosynthetics and geosynthetic barriers; contaminants and solid waste; liquid drainage layers; stability of landfills; contaminant transport through barriers.

C E X87G. Engineering Geology.
Fundamental concepts of geology, including geologic time and plate tectonics. Interactions among earth materials, landforms, and geologic processes across a range of spatial and temporal scales. Emphasizes common interests shared by engineers and geologists, as well as gaps between the disciplines, such as those posed by the geologic vocabulary.

C E X87L. Topics in Soil Mechanics I.

C E X87L.1. Consolidation and Shearing Properties of Soils.
Theoretical and experimental studies of the consolidation and shearing properties of both saturated and unsaturated soils.

C E X87L.2. Foundation Engineering.
Bearing capacity, design of piers and pile foundations.

C E X87M. Topics in Soil Mechanics II.

C E X87M.1. Stability of Earth Slopes.
Development and application of limit equilibrium procedures, including effects of seepage, rapid drawdown, and seismic loading and reinforcement for stability analysis of natural and constructed slopes.

C E X87M.3. Underground Openings.
Explore the engineering of underground openings in both soil and rock. Examine rock mechanics and rock mass characterization, tunnel design and construction methodologies, and pre- and post-excavation ground improvement with regards to design and construction of safe and economical tunnels.

C E X87R. Topics in Soil Mechanics III.

C E X87R.2. Soil and Rock Dynamics.
Wave propagation in soil and rock, foundation vibration and isolation, dynamic behavior of soil.

C E X87R.4. Earth Retaining Structures.
Types of earth retaining systems, earth pressure theory; gravity, semi-gravity, and modular walls; reinforcing elements; mechanically stabilized earth walls and reinforced soil slopes; soil nail walls; sheet pile walls, drilled shaft walls and anchored walls; advances in soil reinforcement.

C E X87R.5. Geotechnical Earthquake Engineering.
Application of soil dynamics to earthquake engineering; influence of soil conditions on ground motion characteristics; evaluation of site response using wave propagation techniques; liquefaction of soils; liquefaction mitigation; seismic response of earth structures; seismic slope stability.

C E X87T. Decision, Risk, and Reliability.
Principles and theory for modeling uncertainty in civil engineering, analyzing how uncertainties affect performance, and developing rational bases for design and decision making under uncertain conditions.

C E X88H. Climate Change Mitigation.
Explore the large-scale solutions to climate change systematically. Examine the fundamentals of climate science, mitigation of climate change through transformation of energy supply and end-use, geoengineering, and industrial carbon management. Discuss the social and economic context for engineered solutions.

C E X88N. Engineering and Management of Municipal and Industrial Residuals.
Characterization and collection of solid wastes; biological, chemical, and physical principles and integrated systems applicable to the treatment and disposal of municipal and industrial residuals.

C E X88Q. Air Quality, Aerosols and Health.
Explore physicochemical processes governing indoor and outdoor air quality, human exposure to gas-phase and particle-phase pollutants, and factors affecting human health. Examine the connection between air quality, regulatory perspectives, engineering solutions and acute and chronic environmental issues impacting human exposure. Discuss research questions through efficient data retrieval and run simple dispersion models.

C E X88R. Novel Air Quality Measurement Techniques.
Explore technological advancements in measurements of indoor and outdoor air quality. Discuss operation principles of novel real-time trace-gas sensors and mass spectrometers. Examine air quality measurements at different spatiotemporal scales, utilizing analytical instrumentation, data acquisition, and data processing. Explore research questions in air quality through hands-on laboratory and field measurements.

C E X89C. Advanced Technical Communication for Engineers.
Advanced work in theory and practice of communicating research and design results to a variety of audiences, in print, orally, and through multimedia. Students use their own work and writing projects as the material to communicate.

C E X89D. Sustainable Building Design.
Explore the physical basics of sustainable building design for reducing energy demand and providing on-site renewable energy.

C E X89H. HVAC Design.
Design of heating, ventilation, and air-conditioning systems.

C E X89S. Smart Buildings and Cities.
Explore applied machine learning for analyzing data in the domain of buildings (nexus of cities, water and energy).

C E X89T. Indoor Air Quality: Transport and Control.
Transport and control of indoor pollutants. Includes particulate removal and pollutant transport into and within indoor environments.

C E X89V. Modeling of Air and Pollutant Flows in Buildings.
Fundamentals of indoor airflow modeling, use of computational fluid dynamics (CFD) for air quality and thermal comfort analyses, application of CFD for analysis of air velocity, temperature, humidity, and contaminant distributions with different ventilation systems.

C E X90J. Engineering Microbiology.
Fundamentals of microbiology and biochemistry as applied to environmental pollution and sustainable treatment processes, energetics and kinetics of microbial growth, and biological fate of pollutants; introduction to laboratory techniques.

C E X90L. Environmental Analysis.
Advanced analytical procedures for the sampling, monitoring, and analyses of air, liquid, and other wastes.

C E X90N. Water Pollution Chemistry.
Advanced topics in the application of engineering solutions to chemical problems in freshwater and marine environments.

C E X90P. Environmental Organic Chemistry.
Advanced subjects in the environmental chemistry of organic contaminants in groundwater, soil, and air systems; includes sustainable chemistry.

C E X90Q. Chemical Dynamics in the Environment.
Environmental chemodynamics: interphase equilibrium, reactions, transport processes, and related models for anthropogenic substances across natural interfaces (air-water-sediment-soil) and associated boundary regions.

C E X90R. Engineering Microbiology Applications.
Application of microbiology and molecular biology tools for monitoring environmental systems and biological treatment processes.

C E X91C. Analysis and Design of Transportation Systems I.
Introduction to conceptual, methodological, and mathematical foundations of analysis and design of transportation services; review of probabilistic modeling; application of discrete choice models to demand analysis.

C E X91D. Analysis and Design of Transportation Systems II.
Operations research techniques for modeling system performance and design of transportation services; routing and scheduling problems, network equilibration, and spatially distributed queueing systems.

C E X91E. Advances in Transportation Demand Analysis.
Developments in the econometric and behavioral aspects of demand analysis and forecasting; supply-demand integration; dynamic models. Applications to passenger and freight transportation and other infrastructure services.

C E X91F. Advanced Theory of Traffic Flow.
Relations among traffic variables; distribution functions; single lane and multilane traffic flow; characterization of traffic in cities; kinematic waves; yellow signal dilemma; merging; fuel consumption; emissions; and special topics. Emphasis on the interplay among theory, experimentation, and observation.

C E X91J. Transportation Planning: Methodology and Techniques.
Analysis of a wide range of planning studies to establish the logic and foundation for the transportation planning process. Emphasis on techniques of estimation and forecasting population, economic activity, land use, and mobility patterns; determination of goals and objectives; decision making; economic analysis; and alternative evaluation.

C E X91L. Advanced Traffic Engineering.
Characterization and analysis of arterial street and freeway traffic operations using theoretical and experimental techniques, especially computer simulation. Introduction to the most current analysis and optimization tools for control device design and implementation.

C E X91M. Advanced Geometric Design.
Geometric design of highways and guideways, including topics on levels of service, alignment, vehicle operations, intersection and interchange design, roadside design, lighting, and economics.

C E X91N. Engineering System Evaluation and Decision Making.
Advanced methods for selection of transportation and other infrastructure systems in the presence of multiple criteria, multiple decision makers, and uncertainty.

C E X91P. Topics in Highway and Airport Pavement Systems.

C E X91P.1. Theory and Behavior of Pavements.
Theories of pavement behavior and concepts of pavement design.

C E X91P.2. Design and Performance of Pavements.
Pavement performance evaluation and the application of theory to the design of pavements.

C E X91P.3. Pavement Management Systems.
Defines the interrelationships among all aspects of pavement technology. Application of computer-based management methodology.

C E X91Q. Bituminous Materials.
Design and use of asphalt mixtures; chemical, physical, and rheological properties of asphalt; and practical applications in highways, airports, and other construction.

C E X91R. Airport Design and Operation.
Aircraft characteristics, site selection, airport configuration, capacity, terminal design, traffic control, and interfacing with other transportation modes.

C E X91T. Topics in Contemporary Transportation Issues.
Consideration, analysis, and evaluation of recent transportation-related innovations and developments.

C E X91W. Transportation Systems Operations and Control.
Concepts and advanced methods for the design of control strategies for transportation systems operations, including highway traffic systems (signalized street networks and freeways), transit systems, and private carrier operations, including airlines.

C E X92C. Transportation Network Analysis.
Transportation network analysis focusing on planning and optimization using static traffic assignment models. Subjects include deterministic and stochastic equilibrium, traditional and modern solution methods, shortest path algorithms, combined models, and basic nonlinear programming skills.

C E X92D. Dynamic Traffic Assignment.
Theory and practice of dynamic traffic assignment as an evolving field. Subjects include basic flow models (point queues, cell transmission model, and link transmission model), time-dependent shortest path algorithms, equilibrium algorithms (convex combinations, simplicial decomposition, and gradient methods), and case studies from practice.

C E X92E. Acquisition and Analysis of Transportation Data.
Methods and technologies for the acquisition and analysis of data on various aspects of transportation systems, including properties of different data sources and types; stated versus revealed preferences; traffic sensing; survey design; sampling strategies; probabilistic methods of data analysis; overview of statistical methods and various regression models, including random-utility, ordered-choice, simultaneous-equations, time-series, and spatial econometric models.

C E X92F. Sensors and Signal Interpretation.
Explore the physics concepts related with sensors, basic circuits, and wireless communications. Examine properties and specifications of sensors, and their importance in practical use cases. Discuss sensor noise properties and explore the use of signal processing in time and frequency domains to reduce noise. Explore data and model fusion using classical estimation methods (linear observers and Kalman filters).

C E X92H. Regional Transportation Planning: Applications and Tools.
Explore various aspects of regional transportation system performance forecasting, including methods for anticipating Americans' evolving travel choices. Examine key data sources and model specifications for planning activities; forecasting and validation of predictions, for personal vs. commercial travel; and system-wide applications for traffic and travel pattern forecasts.

C E X92L. Experimental Measurements of Soil Properties.
Theoretical and practical knowledge of transducers, sensors, and data acquisition systems for soil and general laboratory testing. Experimental techniques used to characterize properties of geomaterials.

C E X92M. Public Transportation Engineering.
Introduction to public transportation systems, including demand forecasting, operations, and design. Includes statistical methods, driver and vehicle scheduling, algorithms, and survey sampling techniques.

C E X92N. Topics in Infrastructure Systems.
Management principles, modeling techniques, computer applications, and emerging technologies for the analysis, engineering, and management of infrastructure systems.

C E X92N.1. Infrastructure Systems Management.
Concepts, principles, theories, and models for infrastructure management, with emphasis on civil infrastructure systems.

C E X92N.2. Reliability and Maintainability of Infrastructure Systems.
Theory of reliability, maintainability, and availability and its application for the analysis of infrastructure systems.

C E X92N.3. Intelligent Infrastructure Systems.
Concepts, frameworks, and models of intelligent infrastructure systems, with emphasis on the application of emerging technologies and advanced modeling techniques.

C E X92P. Sustainable Pavement Engineering.
Pavement design; back calculation; use of locally available materials for pavement construction; recycled asphalt pavements and shingles; warm mix and cold mix asphalt; industrial by-products and waste incorporated in pavement materials; emerging technologies for sustainable pavement design and pavement management.

C E X92R. Discrete Choice Theory and Modeling.
Methods and statistics of model estimation, with emphasis on maximum-likelihood; individual choice theory; binary choice models; unordered multinomial and multidimensional choice models; sampling theory and sample design; ordered models and aggregate prediction with choice models; introduction to advanced concepts, such as unobserved population heterogeneity, joint slated preference and revealed preference modeling, and longitudinal choice analysis.

C E X92S. Intermodal Transportation Systems.
Strategic planning of intermodal freight transportation systems (infrastructure and rolling stock). Freight logistics, intermodal technology, and intermodal terminal operations. Intermodal freight transportation policy, planning, and operational systems and programs.

C E X92T. Transport Economics.
Application of economic theory and principles to transportation systems analysis and evaluation. Subjects include individual demand decisions, optimal private and public transport supply (including pricing strategies and input demands), market imperfections and externalities, and welfare-based transport policy.

C E X92U. Transportation Systems Management.
Evolving concepts of transportation agency organization, management, and delivery of transportation programs, products, and services. Separation versus integration of transport policymaking and service delivery functions; emerging models for delivering programs and services, such as outsourcing, privatization, and state-owned enterprises; review of national and international experiences with innovative approaches and the benefits and costs associated with change.

C E X92V. Methods to Characterize Bituminous Materials.
Introduction to the design and performance prediction of asphalt mixtures. Experimental and computational methods used to characterize the chemical and mechanical properties and performance of bituminous materials at several different length scales. Includes computational models.

C E X92W. Characterization of Viscoelastic Materials.
Test methods and physical models used to characterize the mechanical response of linear and nonlinear viscoelastic materials. Use of correspondence principles to solve simple boundary value problems for linear viscoelastic materials. Introductory topics on modeling damage and nonlinear response of viscoelastic materials.

C E X93. Advanced Concrete Materials.
Comprehensive coverage of Portland cement concrete materials. Topics include cement and aggregate properties, chemical and mineral admixtures, concrete microstructure and the effects of chemical and mechanical properties, durability issues, concrete construction, and special concretes.

C E X93C. Experimental Methods in Cement Chemistry.
Cement chemistry, hydration, and microstructural formation; analytical techniques used in the investigation of cement and concrete.

C E X93D. Concrete Durability.
Examine comprehensive coverage of durability issues affecting portland cement concrete. Includes transport properties (e.g., diffusion, osmosis, sorption, etc.), alkali-silica reaction, external sulfate attack, delayed ettringite formation, corrosion of reinforcing steel, freezing and thawing, and salt scaling. Explore, for each durability issue, the underlying mechanism are presented, along with methods for preventing such distress in new concrete construction.

C E X93M. Topics in Environmental Engineering Research Seminar.
Presentation and discussion of environmental topics in surface water, groundwater, air resources, and land resources.

C E X93N. Novel Structural Materials.
Material selection criteria, including mechanical and environmental factors; selected case studies of emerging materials, including derivation of properties and potential applications.

C E X93S. Structural Engineering Research Seminar.

C E X94. Topics in Interaction of Soils and Structures.
Beams on foundation, laterally loaded piles, applications of the finite-element method, beam-columns with nonlinear soil support, and behavior of pile groups.

C E X94.1. Dynamic Soil-Structure Interaction.
Fundamentals of wave propagation; determination of foundation stiffnesses; mat foundations on the surface of a layered soil; embedded foundations; pile foundations; effect of foundation conditions on dynamic response of structures to applied loads (machine foundations) and to seismic excitation.

C E X94K. Topics in Engineering Hydrology.

C E X94K.1. Groundwater Pollution and Transport.
Groundwater flow and hydrogeologic modeling, sources of contamination, multiphase partitioning, advection-dispersion transport and modeling.

C E X94K.2. Surface Water.
Rainfall runoff processes, hydrograph theory, linear and nonlinear hydrologic system models, hydrologic and hydraulic streamflow routing, rainfall and flood flow frequency analysis, watershed models.

C E X94K.3. Geographic Information Systems in Water Resources.
Principles of geographic information systems, hydrology, and database management systems applied to water resources problems.

C E X94M. Advanced Analyses in Geotechnical Engineering.
Development and application of linear and nonlinear finite element procedures for solution of geotechnical engineering problems related to embankments, excavations, static soil-structure interaction, and seepage.

C E X95N. Industrialized Production of the Built Environment.
Explore the integration of mass manufacturing, digital technologies, and automated processes for the production of the built environment. Learn how such approaches can improve productivity, safety, quality, and sustainability. Discuss key concepts behind industrialization and examine key technologies spanning design, offsite manufacturing, and onsite assembly.

C E X95P. Topics in Project Automation.

C E X95P.1. Advanced CAD Procedures.
Introduction to advanced CAD procedures and CAD systems, and their influence on building design and construction.

C E X95P.2. Introduction to Construction Automation and Integration.
Construction automation and integration activities, methods for opportunity identification and financial analysis of systems, and tools from several disciplines that are used in construction automation and integration; students prepare a project that synthesizes this information.

C E X95P.3. Design of Automated Construction Systems.
The elements of construction systems, including mechanisms, sensors, and control; systems design methods and concerns. Students develop an individual design project.

C E X95P.4. Sensing in Civil Engineering.
Sensor types and properties, data acquisition, sensor data analysis, sensor fusion, and classes of civil engineering applications. Students are encouraged to work on projects related to their research areas.

C E X95Q. Topics in Project Controls.

C E X95Q.1. Project Controls.
Fundamentals of planning, scheduling, and cost management on projects. Topics include network scheduling, activity and resource management, cost loading and cost control, and computer tools used for project controls, such as schedule simulation and three-dimensional and four-dimensional CAD.

C E X95Q.2. Project Production Systems.
Advanced topics in project controls, including supply chain management, procurement, interorganizational controls and incentives, process modeling, and simulation.

C E X95Q.5. Financial Management for Engineering and Construction Firms.
Introduction to financial, managerial, and tax accounting concepts, as well as corporate finance and strategy as they relate to engineering and construction firms. Emphasis is on content, interpretation, and uses of various accounting reports and financial statements in general, as well as those specific to engineering and construction industries. Topics include determination and reporting of net income methods and financial position unique to engineering and construction firms, and theories underlying business financial statements, as well as the consideration of managerial accounting and financial management topics that cover the planning and controlling of business operations and how financial management impacts a company's overall business success.

C E X95R. Topics in Project Information Systems.

C E X95R.2. Project Information Management Systems.
Information systems design and management concepts and their implementation in construction projects. Data acquisition, transmission, and storage; database management systems and information systems design.

C E X95R.3. Decision and Risk Analysis.
Fundamentals of decision analysis and risk assessment; construction engineering/project management applications in decision analysis; methods of risk management; overview of project insurance.

C E X95R.4. Metrics.
Measurement systems and benchmarking approaches for many aspects of construction projects. Included are measurement systems for design effectiveness, construction productivity, safety, cost and schedule controls, and overall industry statistics.

C E X95R.5. Data Mining.
Fundamentals of data mining. Techniques for data classification, prediction, clustering, and association rules mining. Data mining as an advanced data analysis method in engineering and construction. Implementation issues.

C E X95R.6. Quantitative Methods for Project Analysis.
Practical methods of data analysis for evaluating project performance metrics. Includes quantitative methods for solving everyday problems such as bid selection, capital budgeting, assignment of resources, equipment replacement analysis, and the optimization of capital structure. Techniques for developing models under conditions of risk using Microsoft Excel and add-ins such as At Risk.

C E X95R.7. Building Information Modeling for Capital Projects.
Building information models in plan execution for a building construction project. Focus on implementation of building information modeling concepts throughout the lifecycle of a building, from planning and design to construction and operations.

C E X95R.8. Urban Systems Engineering.
Explore system thinking concepts and sociotechnical system modeling of civil infrastructure systems. Examine defining system boundaries, abstracting interdependencies and system structure, and implementing mathematical models for the analyses of systems.

C E X95S. Topics in Project Organization.

C E X95S.1. Human Resources Project Management.
Evaluation of individual, group, and organizational behavior in construction work. In-depth study of communication, decision making, and the relationship between controls and behavior.

C E X95S.2. Construction Productivity.
Construction productivity improvement by group field studies. In-depth study of the way overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment and human and material resources.

C E X95S.4. Project Management.
Overall aspects of project and portfolio management from inception to successful operation: project selection and feasibility, contracting methods, project scheduling, cost control systems, project communications, project scope and quality management, human resource management, partner selection and management, project leadership, project closeout, and global project management.

C E X95T. Topics in Project Technology.

C E X95T.3. Heavy Civil Construction.
Methods and materials in heavy civil construction; earthwork, concrete, structural steel, and deep foundations; equipment selection, configuration, productivity, and safety issues; site and craft planning, environmental issues, and optimization modeling; and field studies.

C E X95T.6. Value Management Processes I.
Industry value management processes, including value engineering and life cycle costing, process simplification, function analysis concept development, design to capacity, constructability, modularization and preassembly, and design effectiveness.

C E X95T.7. Value Management Processes II.
Industry value management processes, including mechanical reliability modeling, predictive maintenance, design for maintainability, waste minimization and pollution prevention, sustainable design and construction, planning for startup, lean construction, postoccupancy evaluation, and knowledge management and lessons learned systems.

C E X95T.8. Industrial Construction.
Methods and materials in industrial construction; heavy lifts, mechanical equipment, process piping, electrical, and instrumentation work; equipment selection, configuration, productivity, and safety issues; preassembly, modularization, and work planning in the industrial environment; and field studies.

C E X95U. General Topics in Construction Engineering and Project Management.

C E X95U.1. Front-End and Contractor Planning.
Principles and applications of advanced project planning techniques for capital facility owners and contractors. Effective owner front-end planning of capital facilities, including team alignment, and preproject planning processes and tools. Contractor preconstruction planning, including team selection, scope and budget review, procurement, strategic sequencing, and planning assessment tools.

C E X95U.3. Advanced Legal Concepts.
Contracts, documentation requirements, claims avoidance, and settlement of claims by alternative dispute resolution. Students conduct and present in-depth studies of the most frequent causes of claims (delay, disruption, acceleration, soil conditions, and changes) and consider the way the court establishes causation and determines damages.

C E X95U.4. Construction Safety.
Causes and effects of construction safety incidents, proactive preventative strategies, and tactics.

C E X95V. Topics in Construction Engineering and Projects: Seminar/Conference.

C E X95V.1. Doctoral Research Methods Seminar.

Construction research methods seminar, including concepts and practice of research in construction engineering and management. Research methodologies and steps in the research process, including review and framing research questions. Students develop and critique a research proposal.

C E X95V.2. Conference Course.

C E X95V.3. Construction Industry Seminar.

Construction industry issues and best practices, such as front-end planning and zero accident techniques, developed by the Construction Industry Institute (CII). Guest lecturers include CII management staff and visiting industry leaders. Emphasis on implementation of proven practices on projects.

C E X96L. Topics in Air Resources Engineering.

Sources, transport, fate, impacts, characteristics, and control of air contaminants; source control and prevention; urban air quality; occupational and residential indoor air quality.

C E X96L.1. Air Pollution Chemistry.

Classification, transport, transformation, deposition, sampling, and analysis of particulate and gaseous air pollutants in urban, regional, and global-scale systems. Emphasis on sustainable engineering.

C E X96L.3. Air Pollution Control.

Design of air pollution control systems for stationary sources. Technical, regulatory, and economic fundamentals related to the control of gaseous and particulate emissions.

C E X96L.4. Indoor Air Quality: Physics and Chemistry.

Sources, transport, and fate of indoor air pollutants. Interactions between indoor pollutants and indoor materials. Indoor air chemistry. Human exposure to pollutants in indoor environments.

C E X96L.5. Atmospheric Transport and Dispersion Modeling.

Mathematical models of contaminant transport in the atmosphere; atmospheric turbulence and air pollution meteorology; Gaussian plume, gradient transport, and higher-order closure models; theoretical development and practical applications to engineering problems.

C E X96L.6. Human Exposure to Indoor Air Pollution.

Human exposure to air pollution in the built environment, including the effects of sustainable building design on human exposure to toxic air pollutants. Subjects may include inhalation intake fractions for risk calculations and comparisons of sources of air pollution, transmission of airborne infectious disease, pharmacokinetic modeling, and case studies involving several important air pollutants.

C E X96M. Advanced Topics in Atmospheric Science.

C E X96M.1. General Topics.

C E X96M.2. Air Pollution Meteorology.

Basic meteorology applied to air pollution; diffusion of conservative and nonconservative pollutants; plume rise; air pollution models.

C E X97. Special Topics in Civil Engineering.

C E X97.14. Design of Wood Members and Systems.

Design and behavior of solid wood and glued-laminated wood structural members; light-frame and heavy timber systems, including trusses and arches.

C E X97.16. Evaluation, Materials, and Techniques for Concrete Repair.

Causes of distress, evaluation methods, repair materials, repair techniques, and quality control methods for repair of concrete.

C E X97.17. Air Sampling and Analysis.

Collection and analysis of air samples for gaseous and particulate contaminants. Gas flow rate and calibration techniques, stationary source sampling and analysis, indoor air sampling, ozone and NOx ambient air monitoring.

C E X97.20. Computer Methods for Civil Engineers.

Essential methods for computer-aided problem solving in transportation and other civil engineering areas. Topics may include computer operating systems concepts; the Internet and World Wide Web site design; advanced programming with C programming language; data structures; file manipulation and management; Monte Carlo simulation techniques; interfacing with spreadsheets, SQL databases, and computer-aided design packages; introduction to Geographic Information Systems. Team programming is emphasized.

C E X97.22. Intelligent Transportation Systems Seminar.

Introduction to Intelligent Transportation Systems (ITS) concepts, evolution, and current initiatives. Program evolution from Mobility 2000, through IVHS and strategic planning activities by the Department of Transportation and ITS America, to current operational tests and deployment projects.

C E X97.32. Hydrodynamics of Propulsors and Dynamic Positioning Systems.

Hydrofoil and lifting surface theory, actuator disk and lifting line theory, vortex-lattice and panel methods, blade design techniques, propulsor-inflow and propulsor-hull interaction, unsteady blade and shaft forces, and modeling of sheet cavitation.

C E X97.35. Introduction to Structural Mechanics.

Discussion of force and stress, vectors and tensors; equilibrium; displacement and deformation; compatibility; constitutive equations, with examples from linear elasticity, linear viscoelasticity, and plasticity; principle of virtual work; elastic structures, principle of minimum potential energy, reciprocity theorem; critical equilibrium, stability; linear theories of beams, plates, and shells.

C E X97.4. Freight Transportation.

Topics include review of transport systems analysis; shipper objectives; demand and supply modeling; freight flow data; network analysis; truck size and weight policies; finance.

C E X97.50. Water Resources Development and Policies.

Analysis of water resources projects, particularly international water projects, with emphasis on engineering and planning considerations and their relation to governmental policies.

C E X97.54. Water Pollution Control.

The application and evaluation of new concepts in water pollution abatement and advanced water and wastewater treatment.

C E X97.56. Air Pollution Control.

Evaluation of new theoretical approaches to air pollution control.

C E X97.6. Traffic Science Seminar.

Topics range from fundamentals of vehicular traffic science to relevant methodologies in physics, applied mathematics, and operational science.

C E X97.78. Design of Offshore Structures.

Selection of design storm; wave forces on structures; preliminary analysis of steel jacket platforms; joint design; fatigue considerations; foundation design; dynamic effects and responses.

C E X97C. Master's Research.

C E X97D. Dissertation Research.

C E X97F. Forensic Engineering: Materials and Structures.

Methods of forensic analysis; role of the expert witness; methods of dispute resolution; case studies; term project.

C E X97K. Stability of Structures.

Stability as it relates to actual behavior and design; elastic and inelastic theories; evaluation of specifications; columns, beams, and frames.

C E X97L. Advanced Structural Metals.

Elastic and inelastic design methods for steel members, connections, and structures; torsion of open and closed sections, welding, plate buckling, and column stability; bracing design.

C E X97N. Nondestructive Testing Techniques.

Basic signal processing knowledge; introduction to wave propagation theory; nondestructive testing (NDT) principles and applications to steel structures; evaluation of concrete structures and foundations; NDT methods selection; emerging technologies.

C E X97Q. Special Independent Studies in Civil Engineering.
C E X98. Thesis.
C E X98D. Departmental Report.
Preparation of a report to fulfill the requirement for the master's degree under the departmental report option.
C E X98R. Master's Report.
Preparation of a report to fulfill the requirement for the Master of Science in Engineering degree under the Graduate School report option.
C E X98T. Supervised Teaching in Civil Engineering.
Special training in teaching methods and procedures for civil engineering courses, including laboratory courses; the development of new material and methods to update present courses.
C E X99W. Dissertation.

Professional Courses

C E X96M. Advanced Topics in Atmospheric Science.
C E X96M.1. General Topics.
C E X96M.2. Air Pollution Meteorology.
Basic meteorology applied to air pollution; diffusion of conservative and nonconservative pollutants; plume rise; air pollution models.

C L - Comparative Literature

Comparative Literature: C L

Lower-Division Courses

C L X01. Introduction to Comparative Literature.
Reading and interpretation of literary texts in translation drawn from cultures around the world, focusing on methods of criticism and analysis.
C L X05. Topics in Comparative Literature.
Study of masterpieces of world literature; of different literary genres; and the relationship between literature and other disciplines such as psychology, philosophy, and film.
C L X05.1. Forbidden Romance in Modern Chinese Literature.
Introduction to modern Chinese literature from the late Qing Dynasty (latter half of the nineteenth century) to the present.
C L X05.2. The Vampire in Slavic Cultures.
Examines the vampire in the cultures of Russia and Eastern Europe, including manifestations in literature, religion, art, film, and common practices from its origins to present.
C L X05.3. Movies Go To War.
A comparison of films from various nations about major twentieth century wars to the historical facts of the conflicts as practicums in critical comparative analysis of histories as representations.
C L X05.4. Grimms' Fairy Tales.
Reading and discussion of tales from the Grimms' collection, as well as some of the relevant secondary literature.
C L X05.5. Korean Literature and Film.
Explore the literature and film of Korea from earliest times to the present.
C L X05C. Dissent in Twentieth-Century Ukraine.
Survey Ukrainian authors from the 1920s to the present, examining writings from "Executed Renaissance," underground literature, and postmodernism. Focus specifically on works that challenge the paradigm of socialist realism by discussing forbidden subjects (famine, religion, Gulag) or accentuating themes that are not considered "major" (personal life).
C L X05D. Afro-Brazilian Diaspora.
C L X05E. Gods and Goddesses of India.
Explore a variety of gods and goddesses who have dominated the sacred landscapes of India and beyond, especially North America, from the past until now. Examine various issues relating to patriarchy, power, gender, sexuality, social hierarchy, and devotion.
C L X05S. The Soviet Hero in Literature and Culture.
Consider Soviet Culture by examining "heroes" from both real life and works of literature, cinema, and folklore. Explore the period from the Russian 19th century throughout the Soviet Era.
C L X15. World Literature.
Introduction to masterpieces of world literature, emphasizing historical, generic, and thematic connections.
C L X18Q. Supervised Research.

Upper-Division Courses

C L X20. Conference Course in Comparative Literature.
Independent study of literary projects under supervision of professors in comparative literature.
C L X23. Topics in Comparative Literature.
Study of masterpieces of world literature; of different literary genres; of the relationship between literature and other disciplines, such as psychology, philosophy, and film; and of special topics of a comparative nature.
C L X23.13. Introduction to Arabic Literature.
General survey of major themes, genres, and artists in the Arabic literary tradition from the sixth century to the modern era.
C L X23.15. Israel Through Its Literature.
C L X23.16. The Scandinavian Contribution to World Literature.
Close readings of the most influential Scandinavian texts, including works by Nobel Prize-winning authors such as Knut Hamsun and Selma Lagerlof, as well as the playwrights August Strindberg and Henrik Ibsen while addressing important themes caused by the revolutionary transition to modernity in Scandinavia around 1900, including emancipation of women and sexuality.
C L X23.20. Rebels and Revolutionaries in Russian History and Literature.
Study of fictional and real rebels and revolutionaries across almost a century of Russian literature.
C L X23.27. The Major Works of Tolstoy.
Explores Russian writer Lev Nikolaevich Tolstoy, particularly his progression from idealizing family life and the Russian state to renouncing sexual love and national allegiances.
C L X23.29. The Russian Novel.
A survey of classic Russian authors as well as experimental works from the nineteenth through the twenty-first century.
C L X23.3. Autobiography: A Modern Literary Species.
C L X23.30. The Major Works of Dostoevsky.
Explores the dilemmas of homicide, suicide, patricide, and redemption in the novels of Fyodor Dostoevsky.
C L X23.31. War and Revolution in Russian Literature and Culture.
Examines Russian narratives of war and revolution as represented in fiction, cinema, and journalism.
C L X23.33. Feminism and Film: Women Filmmakers in Northern and Central Europe.
An introduction to the work of women filmmakers from Scandinavia, Germany, as well as to the viewing and interpretation of films in general.
C L X23.34. Russian Myths and Folktales.
Examination of the Russian folktale, its roots in ancient, pre-Christian Slavic religious tradition, its connections with other forms of folklore such as myth and legend, and its transformation in modern Russian literature. Subjects include the continuing influence of folklore explored through various aspects of Russian culture, including literature, music, ballet, film, and popular culture.
C L X23.36. Love in the East and West.
C L X23.37. The Qur'an.
Explore the history, language, style, and themes of the Qur'an.
C L X23.4. Self-Revelation in Women's Writing.
C L X23.40. Holocaust Aftereffects.
Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.

C L X23.41. Decoding Classical Chinese Poetry.
Introduction to the classical Chinese poetic tradition from the seventh century B.C.E. through the ninth century C.E., focusing on the literary, cultural, historical, social, political, philosophical, and religious background against which representative works arose. Conducted in English and all readings will be in English translation. Knowledge of the Chinese language is not required.

C L X23.42. Anti-Semitism in History and Literature.

C L X23.44. Berlin.

C L X23.49. Northern European Comics.
A study of graphic novels from Scandinavia, Germany, and Holland to understand the art form of comics and the influence of the cultures in which they were produced. Readings, all in English, cover various genres and time periods.

C L X23.51. Viking Language: Runes and Sagas.

C L X23.52. Bad Language: Race, Class, and Gender.

C L X23.54. Russian Cinema From Potemkin to Putin.

C L X23.55. Russian Fairytales.

C L X23.58. Russian and Mexican Men in Popular Culture.
Study representations of masculinity in products of Mexican and Russian popular culture at the end of the twentieth and the beginning of the twenty-first centuries.

C L X23.59. The Ancient Historians.
Examines the main works of ancient historiography, and provides grounding in the central issues with which these works engage.

C L X23.6. Caribbean Literature.

C L X23.60. Danticat and Diaz.

C L X23.61. Classic Lyric Poems.

C L X23.62. Forugh Farrokhzad and Her Poetry.

C L X23.63. Iranian and Iranian-American Identity.

C L X23.64. Israel and Palestine: A Cultural Perspective.

C L X23.65. Youth and Violence in the Middle East and Eurasia.

C L X23.66. Twentieth-Century Persian Literature.

C L X23.69. The Arts of Hip Hop.

C L X23.71. Russia Through American Eyes.
Examine a wide array of American attitudes towards Russia and Russians. Using a variety of political, social, and cultural events and encounters, analyze the ways in which nationalism, imperialism, and geopolitics informed American narratives about Russia and Russians, assessments that range from enthusiasm and curiosity to condemnation and outright hostility.

C L X23.72. Performing LGBTQ+.

C L X23.73. Greek Tragedies and Postcolonial Dramas.
Study the adaptation of great dramatic literature of the Greek civilizations to their phenomenal evolution into popular African performances. Putting classical writings from Ancient Greek in dialogue with texts that formed the background of African anti-colonial revolutions, analyze how Africans have used these works to re-shape literary canon and given their world and their histories universal purchase.

C L X23.74. Queer Eastern Europe.
Explore LGBTQI stories and political struggles in Eastern Europe with a focus on the region's queer culture: literature, cinema, and the arts.

C L X23.75. Identity, Codes, and Culture.
Explore how to read identities as patterns in literary texts, linguistic and cultural corpora with digital methods, and come to a deeper understanding of individual texts and textual phenomena. Examine digital research methods, tools, and use cases. Work hands-on with literary and linguistic sources.

C L X23.76. Humor and Hardship in Arabic Literature.
Examine Arabic literary works (ninth through twentieth centuries) that display humor and its unspoken counterpart, hardship. Consult modern theories of humor and premodern Arabic-Islamic ideas of the jocular.

C L X23.77. Cultural Translation.
Examine theoretical readings and concrete examples of how translation politics, translation-induced reconstruction of literary systems, censorship, manipulation, and market dynamics affect the production, distribution, and reception of translated products in the realm of arts and entertainment, news media and politics, and various academic disciplines in the Middle East, United States, and beyond.

C L X23.78. Geography in Eastern Europe and Eurasia.
Explore alternatives to nation-state imaginaries across Eastern Europe and Eurasia. Examine spatial thinking, utopia, dystopia, the history of geosciences, counter-mapping, and the decolonial geopoetics of space.

C L X23.79. Russia's Soul: Spiritual Traditions.
Explore complex history of Orthodox Christianity, Judaism, Islam, and Buddhism in Russia. Examine important worship sites, including monasteries and pilgrimage destinations. Have discussions with Russian scholars of religion and practitioners of different faiths.

C L X23.8. Bulgakov's Master and Margarita.
Explores the novel in the context of other literary works by Bulgakov and its varied sources in world literature, music, and the visual arts.

C L X23C. Soviet Romance in Film.
Examine the construction of the ideology of love, intimate relations, and gender roles, deemed appropriate for a Soviet citizen, as it is demonstrated in a selection of films.

C L X23D. Representing Disaster in Japan.
Explore a range of human-made conflicts and natural disasters in Japan from earliest times to the present through literature, film, and new media to consider questions of history, representation, and mourning and memorialization.

C L X23E. The Environment and East Asia.
Examine the relationship between humans and the environment through the literature, film, and media of East Asia.

C L X23F. Animals in Asia.
Focus on how historical and modern-day philosophy, religious texts, and legal systems in South and East Asia provide the framework for probing the human-animal encounter and the tensions that arise due to human-animal interdependence.

C L X23G. History and Memory in Japan and Korea.
Explore the fraught and entangled histories of modern Japan and Korea as depicted in literature and film to consider experiences of imperialism, rapid modernization, war, decolonization, and trauma.

C L X23I. Translating Asia.
Explore various ways to define translation in the Asian context through translation theory and translated texts and how translation impacts and represents different Asian identities.

C L X23J. Germanic Novels: History, Culture, and Interpretation.
Explore several representative novels by German, Scandinavian, or Dutch writers, along with representative texts and essays on the novel as a genre and interpretative strategies. Examine these works in their literary and cultural contexts via lectures and discussions.

C L X23K. Literature, Culture, and Ecology in Northern and Central Europe.
Explore a variety of texts, films, and artifacts from Northern and Central Europe for the insights they provide about the interrelationships between nature and culture and strategies for developing a sustainable relationship to the world around us.

C L X23L. Nordic Noir.
Uncover the dark side of the Nordic countries, from gritty streets to icy fjords, and explore the history, culture, literature, and movies these societies produce.

C L X23M. Silent Film in Germany and Scandinavia.
Explore silent film and filmmaking in Germany and Scandinavia.

C L X23N. Germanic and Scandinavian Modernisms, 1870-1925.
Explore the cultural renaissance between 1880 and 1925 in Northern and Central Europe, covering the period often called the Modern Breakthrough in Scandinavia, but also known as la belle epoque in France and "the gilded age" in the United States.

C L X23O. The Bhagavad Gita: Interpretation and Ethics.
Explore one of the most influential books in Indian and global contexts, the Bhagavad Gita, through interpretations, commentaries, and scholarly materials. Navigate ethical dilemmas in the Bhagavad Gita and real-life situations.

C L X23P. Korean Cinema.
Explore Korean cinema, film history, and theory from the early twentieth century to the present.

C L X23Q. Elena Ferrante: Politics and Passion.

C L X23R. Diasporic Magic: Literature and Performance.

C L X23S. Cultural Memory and the Classic Chinese Novel.
Examine the metaphors and mythology from Chinese cultural memory that are present in classic novels, within literary and socio-historical contexts. Explore a cross-section of influential works from classical literature and the major founding schools of Chinese thought.

C L X23T. Scandinavian Cinema Since 1980.

C L X23U. Films of Ingmar Bergman.
An introduction to the films of Ingmar Bergman.

C L X23V. Arendt and de Beauvoir.

C L X23W. Contemporary Scandinavian Stories.
An analysis of contemporary Scandinavian literature and films, how they reflect Scandinavian reality, and how Scandinavian identity is created through sports, food, and politics.

C L X24C. Hans Christian Andersen.
Introduction to such Hans Christian Andersen tales as "The Little Mermaid," "The Ugly Duckling," and "The Emperor's New Clothes. Examination of their author and the romantic period in which they were written, as well as their historical, philosophical, and literary context.

C L X24D. Isak Dinesen/Karen Blixen.
An introduction to the twentieth-century Danish author Karen Blixen, focusing on her major themes such as gender and destiny, and examining her role as a literary figure.

C L X24E. Nobel Prizes: Literature and Politics.
An introduction to Nobel Prize winning authors from northern Europe in the context of literary prizes and the politics of literary reputation. Analyze and compare literary works, set novels into historical context, investigate what popular and scholarly reviews do, and research in both popular and scholarly sources.

C L X24F. Social Dramas of Henrik Ibsen.
A detailed introduction to Ibsen's social dramas (1877-1899), emphasizing their unity as a prolonged commentary on the society of his era and the variety of its human problems. Special emphasis on subjects such as: the family and the home; the public world of reputation, work, and citizenship; the predicaments of men and women in a male-dominated society; and the motives of our interventions into the lives of others.

C L X24G. Vikings and Their Literature.

C L X24I. Women and the Holocaust.
Introduction to both the history of Jewish and German women during World War II and the Holocaust, and to women's narratives and self-representations of this period. Historical sources, memoirs, films, and interviews will be used as source material.

C L X24J. Exhibitions and Public Spectacle.
Investigate exhibits, world's fairs, museum, monuments, theme parks, and historical reconstructions from Europe and the US, with attention to images of how their sponsoring nations or other entities want to be seen. Examine evidence for both the good and bad sides of national pride and identity. Explore examples of how large-scale culture projects and the public interact. Consider the lasting marks left on the cities and countries sponsoring them.

C L X24K. Squaring the Vienna Circle.
Traces the origin of the Vienna Circle of Logical Empiricism in nineteenth-century Europe, and introduces central texts and problems of intellectual history and historical epistemology at the roots of today's analytic philosophy.

C L X58Q. Supervised Research.

Graduate Courses

C L X80F. Foundations of Literary Theory and Criticism.
Explore a comparative study of theories of literary criticism in a broad historical perspective, including representative classic texts in critical theory.

C L X80K. Introduction to Comparative Literature.
One-credit-hour proseminar in methods of study and research in comparative literature.

C L X80M. Topics in Problems in Translation.
Detailed study of literary translations and of the translation process, and completion of one substantial translation.

C L X80P. Literary and Cultural Theory since 1900.
Explore a comparative study of major modern critical schools and figures in literary and cultural theory and criticism.

C L X81. Topics in The Comparative Study of Literary Periods and Movements.
The study of literary periods, aspects of periods, or movements from a comparative point of view; topics include mystical literature of the Middle Ages and Renaissance humanism.

C L X81.1. Modernisms and Modernity.

C L X82. Topics in Comparative Literature.
Study of genres, literary forms, the relationships of literature and other disciplines from a comparative point of view; topics include comedy, sensibility, and the East and the West.

C L X82.1. World Literature and Globalism: Theory and Practice.

C L X82.2. Women Writers and Intellectuals.

C L X86. Topics in Literature in a Comparative Context.
A study of topics with a single primary language focus, using a strongly comparative approach.

C L X91L. Conference Course in Comparative Literature.
Tutorial courses on individually designed basis available through the home departments of members of the comparative literature faculty.

C L X98. Thesis.

C L X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

C L X99W. Dissertation.

Professional Courses

C S - Computer Science

Computer Science: C S

Lower-Division Courses

C S X01K. Foundations of Logical Thought.
Introductory logic in the context of computing; introduction to formal notations; basic proof techniques; sets, relations, and functions.

C S X02. Computer Fluency.
An introduction to the fundamental concepts of computing: how computers work, what they can do, and how they can be used effectively. Some programming is required.

C S X03E. Elements of Computers and Programming.
Problem solving and fundamental algorithms for various applications in science, business, and on the World Wide Web, and introductory programming in a modern object-oriented programming language.

C S X03F. Ethical Foundations of Computer Science.
An introduction to reasoning about the effects of the technology created by computer scientists and understanding the ethical and real-world consequences of that technology. Emphasizes direct participation and discussion using case studies to illustrate ethical topics.

C S X04C. Competitive Programming.
Explores the algorithms needed to solve a given problem, reason about corner cases, and write correct implementations under time pressure. Focuses on skills useful for international programming competitions, whiteboard job interviews, and programming tasks that require quickly solving challenging problems with creative use of algorithms.

C S X04I. Essentials of AI for Life and Society.
Examine fundamental concepts for AI literacy, as well as the ethical and societal implications of AI technologies.

C S X05C. Computer Programming: C++.
Explores the syntax and concepts needed to program in C++.

C S X05P. Topics In Computer Programming Languages.
An introduction to programming in a particular computer language. Includes designing and implementing programs.

C S X08. Topics in Software Systems.
Introduction to the use of a particular software system. Students build applications that exploit the system being studied.

C S X09. Topics in Computer Science.

C S X09.1. Quantum Computing I.
Introduction to quantum information and communication.

C S X11. Discrete Mathematics for Computer Science.
A focus on discrete mathematical tools of fundamental importance to the working computer scientist. An emphasis is placed on using logical notation to express rigorous mathematical arguments. Subjects include proof by induction, introduction to graph theory, recurrences, sets, functions, and an introduction to program correctness.

C S X11H. Discrete Mathematics for Computer Science: Honors.
A focus on discrete mathematical tools of fundamental importance to the working computer scientist. An emphasis is placed on using logical notation to express rigorous mathematical arguments. Subjects include proof by induction, graph theory, number theory, combinatorics, recurrences, sets, functions, an introduction to program correctness, and discrete probability.

C S X12. Introduction to Programming.
First part of a two-part sequence in programming. Fundamental concepts of structured programming; procedures and data structures with a focus on problem solving strategies and implementation; introduction to concepts of informal specification, informal reasoning about program behavior, debugging, and ad hoc testing.

C S X12H. Introduction to Programming: Honors.
First part of a two-part sequence in programming. Fundamental concepts of structured programming; procedures and data structures with a focus on problem solving strategies and implementation; introduction to concepts of informal specification, informal reasoning about program behavior, debugging, and ad hoc testing.

C S X13E. Elements of Software Design.
Object-oriented design of software using Python, a modern high-level language. Introduction to abstract data types, fundamental algorithms, and basics of complexity analysis.

C S X14. Data Structures.
Second part of a two-part sequence in programming. Introduction to specifications, simple unit testing, and debugging; building and using canonical data structures; algorithm analysis and reasoning techniques such as assertions and invariants.

C S X14H. Data Structures: Honors.
Second part of a two-part sequence in programming. Introduction to specifications, simple unit testing, and debugging; building and using canonical data structures; algorithm analysis and reasoning techniques such as assertions and invariants.

C S X18H. Introduction to Computer Science Research: Honors.
Introduction to computer science research. Discuss various aspects of undergraduate research, including the benefits of undergraduate research, ways to get started in undergraduate research, the mechanics and expectations of an undergraduate honors thesis, and tips to help have a successful undergraduate research experience.

C S X19S. Topics in Computer Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C S X29S. Topics in Computer Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

C S X19S. Topics in Computer Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C S X20N. Topics in Computer Science for Nonmajors.

C S X23E. Elements of Scientific Computing.
Explore the fundamentals of software issues related to scientific computing. Discuss subjects including floating-point computations, numerical computation errors, interpolation, integration, solution of linear systems of equations, optimization, and initial value problems of ordinary differential equations. Examine implementation of algorithms that are investigated using Python for all scientific computations.

C S X23H. Elements of Scientific Computing: Honors.
Fundamentals of software issues related to scientific computing. Subjects include floating-point computations, numerical computation errors, interpolation, integration, solution of linear systems of equations, optimization, and initial value problems of ordinary differential equations. Implementation of algorithms are investigated using MATLAB for matrix and vector computations. Examples are drawn from a variety of science and mathematics areas.

C S X24E. Elements of Graphics and Visualization.
Basics of two- and three-dimensional computer graphics systems, modeling and rendering, and selected graphics software APIs. Other topics may include interactive graphics, animation, graphical user interfaces, and the graphical presentation of information.

C S X26E. Elements of Networking.
Introduction to the principles and basic concepts of the Internet, networking applications and protocols, and simple client/server applications. Other topics may include network technologies and topologies, packet and circuit switching, LANS and WANS, Internet security, and network management.

C S X27E. Elements of Databases.
A practical introduction to database management systems, with discussion of database administration and management. Survey of logical modeling, database design with a focus on relational databases, SQL query language, and current applications. Subjects may include data

integrity, performance, concurrency, transaction processing, recovery, security, and Web applications.

C S X28E. Topics in Elements of Computing.

C S X29. Computer Organization and Architecture.

An introduction to low-level computer design ranging from the basics of digital design to the hardware/software interface for application programs. Includes basic systems principles of pipelining and caching, and requires writing and understanding programs at multiple levels.

C S X29E. Advanced Topics in Elements of Computing.

C S X29H. Computer Organization and Architecture: Honors.

An introduction to low-level computer design ranging from the basics of digital design to the hardware/software interface for application programs. Includes basic systems principles of pipelining and caching, and requires writing and understanding programs at multiple levels.

C S X29S. Topics in Computer Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C S X29W. Cooperative Computer Science.

This course covers the work period of computer science students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor.

C S X30E. Elements of Software Engineering I.

Explore software engineering using various programming languages. Use tools to improve the quality of software development.

C S X30F. F1/10 Autonomous Driving.

Introduction to algorithms required for autonomous driving, and more generally, autonomous mobile robots. Discuss motion control (model-predictive control, time-optimal control), sensing (filtering, clustering), planning (local obstacle avoidance, heuristic search, RRTs), and state estimation (particle filters).

C S X30H. F1/10 Autonomous Driving: Honors.

Introduction to algorithms required for autonomous driving, and more generally, autonomous mobile robots. Discuss motion control (model-predictive control, time-optimal control), sensing (filtering, clustering), planning (local obstacle avoidance, heuristic search, RRTs), and state estimation (particle filters).

C S X31. Algorithms and Complexity.

An investigation of algorithmic paradigms: divide and conquer, dynamic programming, greedy algorithms, graph algorithms, randomized algorithms, undecidability, NP-completeness, and approximation algorithms.

C S X31E. Elements of Software Engineering II.

Explore advanced aspects of software engineering using various programming languages. Use tools to improve the quality of software development.

C S X31H. Algorithms and Complexity: Honors.

An investigation of algorithmic paradigms: divide and conquer, dynamic programming, greedy algorithms, graph algorithms, randomized algorithms, undecidability; NP-completeness, approximation algorithm, sorting lower bound, selected topics from amortized analysis, network flow, and linear programming.

C S X33E. Elements of Data Integration.

Investigate data architectures and approaches for integrating siloed data with an emphasis on tooling and implementation of end-to-end solutions. Explore data sourcing, storage, ingestion, modeling, transformations, enrichment, aggregation, lineage, metadata, quality, and knowledge graphs.

C S X33P. Science of High-Performance Computing.

Explore aspects that impact high performance computing. Discuss goal-oriented programming" that derives programs hand-in-hand with their proof of correctness. Examine techniques for mapping the appropriate algorithms to computer architectures so that they can attain high performance.

C S X34. Technical Writing.

Application of techniques and strategies of effective technical writing, and of conventions used in documents such as letters, memos, proposals, abstracts, and reports.

C S X37. Theory in Programming Practice.

Application of program-analysis theory to program design. Methodologies for large-scale program design. Designed to help students bring together theoretical and programming skills.

C S X37H. Theory in Programming Practice: Honors.

Application of program-analysis theory to program design. Methodologies for large-scale program design. Designed to help students bring together theoretical and programming skills.

C S X39. Principles of Computer Systems.

An introduction to computer systems software abstractions with an emphasis on the connection of these abstractions to underlying computer hardware. Key abstractions include threads, virtual memory, protection, and I/O. Requires writing of synchronized multithreaded programs and pieces of an operating system.

C S X39H. Principles of Computer Systems: Honors.

An introduction to computer systems software abstractions with an emphasis on the connection of these abstractions to underlying computer hardware. Key abstractions include threads, virtual memory, protection, and I/O. Requires writing of synchronized multithreaded programs and pieces of an operating system.

C S X40D. Debugging Verifying Programs.

Basic concepts of formal methods with emphasis on using and applying mathematical logic plus finite state systems theory to program verification and debugging.

C S X41. Automata Theory.

An introduction to the formal study of automata and of related formal languages with applications in computer science.

C S X41H. Automata Theory: Honors.

An introduction to the formal study of automata and of related formal languages with applications in computer science.

C S X42. Neural Networks.

An introduction to deep learning covering basic building blocks and intuitions behind designing, training, and tuning of deep networks. Explore application areas including computer vision, sequence modeling in natural language processing, deep reinforcement learning, generative modeling, and adversarial learning.

C S X42C. Computational Brain.

An examination of the brain as a computational system composed of different layers of abstraction. Focus on scientific writing, with weekly reviews of relevant scientific papers.

C S X42S. Introduction to Speech and Audio Processing.

Explore the theory and practice that underlies modern automatic speech recognition (ASR) systems and related technologies. Analyze the acoustic theory of speech production, digital signal processing for speech signals, Hidden Markov Models, Gaussian Mixture Models, language models, finite state transducers, decoding algorithms, and deep neural networks.

C S X43. Artificial Intelligence.

An introduction to the field of artificial intelligence (AI), starting from foundations in search and knowledge representation, and then sampling from major AI topics such as probabilistic reasoning, intelligent agents (including for games), machine learning, planning, natural language processing, robotics, computer vision, and philosophical foundations. Programming projects are required.

C S X43H. Artificial Intelligence: Honors.
An introduction to the field of artificial intelligence (AI), starting from foundations in search and knowledge representation, and then sampling from major AI topics such as probabilistic reasoning, intelligent agents (including for games), machine learning, planning, natural language processing, robotics, computer vision, and philosophical foundations. Programming projects are required.

C S X44M. Autonomous Multiagent Systems.
An introduction to autonomous agents, with an emphasis on multiagent systems. Students use a robotics simulator. Emphasis on computer science research activities, including speaking, writing, programming, and working in groups.

C S X44R. Robotics.
A survey of methods and techniques important for intelligent robotics. Students work in teams, applying these methods to get intelligent behavior from physical robots.

C S X45. Programming Languages.
Survey of significant concepts underlying modern programming languages, including syntax, functions, expressions, types, polymorphism, assignment, procedures, pointers, encapsulation, classes, and inheritance, with some discussion of implementation issues. Prominent programming paradigms, such as sequential, concurrent, object-oriented, functional, and logic programming. Illustrative examples drawn from a variety of current languages.

C S X45H. Programming Languages: Honors.
A survey of significant concepts underlying modern programming languages, including syntax, functions, expressions, types, polymorphism, assignment, procedures, pointers, encapsulation, classes, and inheritance, with some discussion of implementation issues. Prominent programming paradigms, such as sequential, concurrent, object-oriented, functional, and logic programming. Illustrative examples drawn from a variety of current languages.

C S X46. Cryptography.
A theoretical introduction to cryptography. Subjects include private key cryptosystems, public key cryptosystems, digital signatures, secret sharing schemes, and the necessary mathematical background.

C S X47. Data Management.
Concepts of database design and database system implementation. Data models, query processing, database design theory, crash recovery, concurrent control, and distributed databases.

C S X49. Contemporary Issues in Computer Science.
An examination of social, professional, and ethical issues involved in the use of computer technology. Subjects may include software engineering ethics, computer safety and reliability, constitutional issues, intellectual property, computer crime, societal impact, emerging technologies, and philosophical issues.

C S X50C. Advanced Computer Architecture.
Relationships between programming and hardware design, high performance and low power microarchitectures, memory system design, technology and workload constraints on design, special techniques for coding, addressing, and control, and evaluation of design alternatives will be explored.

C S X50F. Operating Systems.
Advanced coverage of core operating systems (virtual memory, file systems, scheduling), and intermediate and advanced operating systems concepts: multiprocessing, multi-core computing, linking, kernel design, virtual machines, and security.

C S X50M. Energy-Efficient Computing.
Explore the technical aspects related to energy efficiency. Focus on hardware techniques for managing energy, operating system interfaces, cloud computing, high-performance computing, and Blockchain technology.

C S X53. Theory of Computation.
An introduction to computability theory and computational complexity, focusing on the limits of computation. Subjects include undecidability, NP-completeness, time and space complexity, circuit complexity, and randomized complexity.

C S X54. Computer Graphics.
Introduction to techniques for human-machine communication through imagery. Subjects include display hardware, transformations, interactive techniques, geometric modeling, two- and three-dimensional display algorithms, graphics software systems architecture, and hidden-line and surface elimination. Projects are assigned and in-depth exploration is encouraged.

C S X54H. Computer Graphics: Honors.
Introduction to techniques for human-machine communication through imagery. Explore display hardware, transformations, interactive techniques, geometric modeling, two- and three-dimensional display algorithms, graphics software systems architecture, and hidden-line and surface elimination.

C S X54P. Game Programming Paradigms.
Explore game programming paradigms in C++ using the Unreal Engine. Examine event-driven, component-oriented and object-oriented programming, as well as collaborative software development using source control, bug-tracking, and code documentation. Develop and apply skills towards building a game on the Unreal Engine.

C S X54R. Game Technology.
Examine major technological components of computer games and their integration, modeling and animation, physics simulation, networking for games, interface and interaction techniques, and special effects.

C S X54S. Game Development Capstone: Two-Dimensional Games.
Participation in an interdisciplinary team to gain a thorough understanding of the two-dimensional game development process, through modeling of the environment and practices that are used in game studios.

C S X54T. Game Development Capstone: Three-Dimensional Games.
Participation in interdisciplinary teams to gain a thorough understanding of the three-dimensional game development process, through modeling of the environment and practices that are used in game studios.

C S X56. Computer Networks.
Introduction to computer networks with emphasis on the Internet.

C S X56R. Introduction to Wireless Networks.
An introduction to basic knowledge in wireless networks ranging from the physical layer to the application layer, and across different types of wireless networks such as WiFi, cellular, and multihop networks.

C S X58H. Introduction to Quantum Information Science: Honors.
Introduction to the theory of quantum computing and information. Explore the rules of quantum mechanics (qubits, unitary transformations, measurements, density matrices); quantum gates and circuits; entanglement; the Bell inequality; protocols for teleportation, quantum key distribution, and other tasks; basic quantum algorithms such as Shor's and Grover's; basic quantum complexity theory; basic quantum error correction; decoherence and the measurement problem; and the challenges of building scalable quantum computers. Previous exposure to quantum mechanics is not required.

C S X60V. Virtualization.
Examine the latest in virtualization technologies such as virtual machines, containers and serverless computing.

C S X61. Introduction to Computer Security.
An introduction to computer security, both in the abstract and in the context of real systems, including recognizing potential threats to confidentiality, integrity and availability, and developing familiarity with current security-related issues in computer science.

C S X61C. Information Assurance and Security.
Selected subjects from the broad area of information assurance, including computer security, communications security, operations security, and risk assessment.

C S X61S. Network Security and Privacy.
An examination of common computer security threats; fundamental techniques for implementing secure software systems and networks; practical experience in attacking and defending networked systems.

C S X63G. Geometric Foundations of Machine Learning.
Explore geometric foundations of modern deep and reinforcement learning. Examine the mathematical, statistical, and computational optimization fundamentals that are the basis of computational, data driven machine learning models and Markov decision making processes. Discuss how data efficient and continuous action spaces are harnessed to learn the free energy Hamiltonian underlying dynamical systems, and multi-player games.

C S X63H. Principles of Machine Learning I: Honors.
Introduction to machine learning: data processing, regression, classification, clustering, dimensionality reduction, and neural networks.

C S X63M. Principles of Machine Learning I.
Introduction to machine learning: data processing, regression, classification, clustering, dimensionality reduction, and neural networks.

C S X64M. Principles of Machine Learning II.
Introduction to advanced machine learning: optimization methods, statistical inference and probabilistic modeling, generalization, and uncertainty quantification.

C S X65T. Trustworthy Machine Learning.
Explore ways in which contemporary machine learning (ML) algorithms can be untrustworthy, along with algorithmic approaches to mitigate these trust issues. Discuss algorithmic fairness, privacy in ML, ML security, and interpretability/explicability in ML. Examine fairness, security, and privacy issues in ML.

C S X67. Numerical Methods.
Subjects include systems of linear equations, numerical integration, ordinary differential equations, and nonlinear equations. Construction and use of large numerical systems. Influence of data representation and computer architecture on algorithm choice and development.

C S X69. Systems Modeling.
Introduction to performance modeling, with emphasis on computer systems. Modeling methodology, queueing network models, simulation, analysis of results.

C S X70. Undergraduate Reading and Research.
Supervised study of selected problems in computer science, by individual arrangement with supervising instructor.

C S X70F. Undergraduate Reading and Research: Writing.
Supervised study of selected problems in computer science, by individual arrangement with supervising instructor.

C S X71D. Distributed Computing.
Investigation of models, principles, and fundamental protocols, including event ordering and global predicate detection, atomic commit, state-machine replication, rollback recovery, primary backup, consensus for synchronous and asynchronous systems, and byzantine fault-tolerance.

C S X71G. Generic Programming and the STL.

C S X71L. iOS Mobile Computing.
Overview of mobile computing with an emphasis on developing applications for the iOS operating system.

C S X71M. Mobile Computing.
Overview of mobile computing. Emphasis on mobile application development. Use of mobile capabilities: sensors, location, telephony, and multimedia.

C S X71N. Natural Language Processing.
Explore modern natural language processing using machine learning and deep learning approaches. Examine linguistics fundamentals (syntax, semantics, distributional properties of language), machine learning models (classifiers, sequence taggers, deep neural networks), key algorithms for inference, and a range of applications. Build systems to do tasks including sentiment classification, text generation, and more.

C S X71P. Object-Oriented Programming.
Programming using class derivation, inheritance, and dynamic polymorphism. Application of a simple object-oriented design methodology to several software development problems.

C S X71R. Information Retrieval and Web Search.
Introduction to traditional and recent methodologies for indexing, processing, querying, and classifying unstructured and semi-structured textual data, including hypertext and World Wide Web documents.

C S X71S. Object-Oriented Software Engineering.
Object-oriented formulations of software systems as executable specifications, object-oriented analysis, design of software architectures, translation of high-level specification systems.

C S X73. Software Engineering.
Introduction to current knowledge, techniques, and theories in large software system design and development.

C S X73G. Social Impact Capstone.
Supervised study of social-impact related problems in computer science.

C S X73S. Software Design.
Model-driven engineering, UML metamodels and constraints, model transformatons, object-oriented refactorings, design patterns, object-oriented frameworks and plug-ins, layered and dataflow architectural styles, map-reduce parallel software architectures, and service-oriented architectures.

C S X74H. Advanced Undergraduate Supervised Research: Honors.
Engage in directed research in areas of computer science, under supervision of a faculty member, leading to a presentation.

C S X74L. Longhorn Startup.
Focus on skill development and mentoring in startup formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Emphasis on written and oral presentation of startup activities.

C S X74S. Longhorn Startup Seminar.
An introduction to the world of startups through the experiences of people who have built successes and learned from failures.

C S X75. Compilers.
An examination of formal description of languages, lexical analysis, syntax analysis, syntax-directed translation, run-time system management, code generation, code optimization, compiler-building tools.

C S X76. Computer Vision.
Explores computer vision, a discipline that develops methods that enable machines to interpret or analyze images and videos. Includes the study of image formation, feature detection, segmentation, multiple-view geometry, recognition and learning, and motion and tracking.

C S X77. Principles and Applications of Parallel Programming.
Models of parallel computation, fundamental concepts for representation of parallel computation structures, study of representative parallel programming systems, and programming of parallel algorithms and computations.

C S X77P. Programming for Performance.
Investigation on the performance-critical features of modern computer architectures and how applications can take advantage of them to obtain high performance.

C S X78. Undergraduate Topics in Computer Science.

C S X78.1. Quantum Computing II.
Introduction to quantum algorithms and programming.

C S X78H. Undergraduate Topics in Computer Science: Honors.

C S X79C. History and Computer Science Capstone.
Investigate questions at the intersection of history and computer science through collaborative projects. Develop computational tools and methods to study history. Explore how ideas in history and computer science can inform each other.

C S X79H. Computer Science Honors Thesis.
Conduct directed research in areas of computer science leading to an honors thesis.

C S X79N. Neuroscience and Computer Science Capstone.
Investigate questions at the intersection of neuroscience and computer science through collaborative projects. Develop computational tools and methods to study the brain and behavior. Explore how ideas from neuroscience and computer science can inform each other.

Graduate Courses

C S X19S. Topics in Computer Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C S X29S. Topics in Computer Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C S X80C. Compilers.
Basics of static analysis and transformation techniques; exploration in depth of one aspect of compilation and optimization.

C S X80D. Distributed Computing I.
Models of distributed systems; language issues, proving properties of distributed systems; time, clocks, partial ordering of events; deadlock and termination detection; diffusing computations; computing in hostile environments; distributed resource management.

C S X80I. Structure and Implementation of Modern Programming Languages.
Explore the breadth of these technologies for translating high-level program text to binary machine code within a unified cost-benefit-risk analysis framework. Illustrate system integration by building a series of compilers for LiveOak, a pedagogical, object-oriented language. Discuss lexical analysis, syntactic analysis, code generation, register allocation, language-level virtual machines, dynamic memory management, linking, and interoperability.

C S X80J. Operating Systems Implementation.
Seminar about how operating systems work. Readings and discussion about classic and recent research papers. Intensive programming assignments in the construction of a prototype operating system.

C S X80L. Advanced Operating Systems.
Study of the formal structure, design principles, organization, implementation, and performance analysis of multiprogramming and/or multiprocessor computer systems.

C S X80N. Systems Modeling.
Theory and applications of Markovian models: birth-death models, queueing models, and networks of queues. Numerical methods: computational algorithms, approximation techniques, discrete-event simulation. Performance of scheduling disciplines: priority, time-sharing, multiple access.

C S X80P. Parallel Systems.
Explores parallel systems, from languages to hardware, from large-scale parallel computers to multicore chips, and from traditional parallel scientific computing to modern uses of parallelism. Includes discussion of and research methods in graphics, languages, compilers, architecture, and scientific computing.

C S X80S. Theory and Practice of Secure Systems.
Survey of modern security, designed to introduce the basic techniques used in the design and analysis of secure systems.

C S X80V. Virtualization.
Discuss the latest in virtualization technologies, such as virtual machines, containers, serverless, etc. Explore CPU virtualization, memory virtualization, networking virtualization, storage virtualization, paravirtualization, containers, unikernels, and serverless computing.

C S X81K. Artificial Intelligence.
Use of computers in problem solving, game playing, theorem proving, natural language understanding, and related tasks; methods of search, knowledge representation, learning, and other topics.

C S X81S. Spoken Language Technologies.
Explore the theory and practice that underlies modern automatic speech recognition (ASR) systems and related spoken language technologies. Discuss the acoustic theory of speech production, digital signal processing for speech signals, Hidden Markov Models, Gaussian Mixture Models, language models, finite state transducers, decoding algorithms, and deep neural networks.

C S X81V. Visual Recognition.
Subjects include fundamental representations, learning approaches, matching-based algorithms, human activity models for video, and large-scale recognition.

C S X82M. Advanced Computer Architecture.
Algorithms and their realizations, special techniques for coding, addressing, and control; integration of computer units; relations between programming and design considerations.

C S X83C. Numerical Analysis: Linear Algebra.
Survey of numerical methods in linear algebra: floating-point computation, solution of linear equations, least squares problems, algebraic eigenvalue problems.

C S X83D. Numerical Analysis: Interpolation, Approximation, Quadrature, and Differential Equations.
Survey of numerical methods for interpolation, functional approximation, integration, and solution of differential equations.

C S X84G. Computer Graphics.
Advanced material in computer graphics, including in-depth treatments of techniques for realistic image synthesis, advanced geometric modeling methods, animation and dynamic simulation, scientific visualization, and high-performance graphics architectures.

C S X84M. Multimedia Systems.
Theoretical and practical issues in advanced systems, including multimedia systems, digital audio and video compression techniques, operating system and network support for digital audio and video, and multimedia conferencing systems.

C S X84P. Physical Simulation of Computer Graphics.
Explore the key concepts and algorithms for simulating physical systems; starting from the ground up with particle systems and mass-spring networks, rigid and elastic bodies, collisions, cloth, and fluids.

C S X84R. Geometric Modeling and Visualization.
Computational image processing, computational geometry and geometric modeling algorithms with an emphasis on spatial realism, and the programmatic use of physiological simulation and visualization to quantitatively depict how things work at the molecular, cellular, tissue, organ, and system levels.

C S X84V. Introduction to VLSI Design.
Basic techniques required to design custom negative metal oxide semiconductor digital integrated circuits.

C S X86C. Dependable Computing Systems.
System models from synchronous to asynchronous, with emphasis on in-between models such as the timed asynchronous model. Control structures such as timed state-transition systems, and constraints in temporal and real-time logics. Analysis techniques such as model checking of timed systems, and extended Presburger arithmetic. Basic building blocks such as clock synchronization, synchronous atomic broadcast, time-bounded membership protocols, real-time scheduling theory, and state recovery methods. Practical implementation issues

such as special operating system data structures and algorithms, open system design, and security concerns.

C S X86D. Database Systems.
Introduction to the principles of database systems, including fundamental ideas and algorithms used in the construction of centralized database management systems, distributed database management systems, and database machines and their roles in Internet infrastructure. Topics include data storage and indexing algorithms, query processing and optimization, concurrency control, recovery, XML and object-oriented databases, database evaluation and tuning, and recent directions in database research.

C S X86K. Numerical Treatment of Differential Equations.
The analysis of numerical methods for solving ordinary and partial differential equations.

C S X86L. Programming Languages.
Topics include formal syntax representations, program correctness, typing, and data abstraction. Features and problems in languages that allow parallelism. Exploration of different programming styles, such as imperative, functional, logic, data flow, and object-oriented programming.

C S X86M. Communication Networks.
Switching techniques, network and protocol architectures, communication protocols, resource allocation problems, internetworking, design and analysis methods.

C S X86P. Android Programming.
Study Android APIs and learn to build significant Android applications. Explore general principles of software engineering and mobile app development.

C S X86S. Network Protocol Security.
Techniques and research in Internet and network security.

C S X86W. Wireless Networking.
Fundamental concepts and principles of wireless network technologies and protocol design, ranging from physical layer to application layer, and in-depth studies of current wireless research.

C S X88. Natural Language Processing.
Computational methods for syntactic and semantic analysis of structures representing meanings of natural language; study of current natural language processing systems; methods for computing outlines and discourse structures of descriptive text.

C S X88C. Combinatorics and Graph Theory.
Counting, matching theory, extremal set theory, Ramsey theory, probabilistic method, linear algebra method, coding theory. Applications to computer science, including randomized algorithms.

C S X88D. Data-Driven Algorithm Design.
Analyze recent developments on the role of machine learning in designing algorithms from the dual viewpoints of tailoring algorithm design to exploit the availability of data as well as tailoring learning to optimize for algorithm performance.

C S X88E. Approximation Algorithms and Complexity.
Explore approximation algorithms for NP-hard problems, online algorithms, approximation in P, and other subjects related to approximation algorithms and their limitations. Examine combinatorial algorithms, as well as algorithms based on linear programming and semidefinite programming. Identify the Probabilistically Checkable Proofs (PCP) Theorem, discuss its applications, and prove a weak version of it.

C S X88F. Automata and Formal Languages.
Formal grammars, languages and related classes of automata, language hierarchies, operations on languages, decidability, related complexity issues, closure properties, other classes of automata.

C S X88G. Algorithms: Techniques and Theory.
Explore advanced subjects in algorithm design and analysis including algorithmic paradigms, data structures, maximum flow, randomized algorithms, NP-completeness, and approximation algorithms.

C S X88H. Cryptography.
Surveys the foundations of cryptography from formal notions of security to fundamental protocols, including one-way functions, encryption, pseudorandom generators, signature schemes, and zero-knowledge.

C S X88J. Optimization.
Explore the background on convex sets and functions, linear programming, convex programming, and iterative first-order and second-order methods.

C S X88K. Online Learning and Optimization.
Explore algorithms for convex optimization and algorithms for online learning. Focus on algorithms for large scale convex optimization. Discuss problems in machine learning. Apply these ideas to online learning.

C S X88L. Introduction to Mathematical Logic.
Introduction to some of the principal topics of mathematical logic: propositional and predicate calculus; Goedel's completeness theorem; first-order theories; formalizing mathematical reasoning; first-order arithmetic; recursive functions; Goedel's incompleteness theorems; axiomatic set theory.

C S X88M. Communication Complexity.
Covers the most important models of communication complexity and their applications, including recent research results and various open problems.

C S X88P. Parallel Algorithms.
Theory of parallel computation: Parallel algorithm design and analysis on shared memory machines; parallel complexity; other models of parallel computation; lower bounds.

C S X88Q. Quantum Information Science.
Introduction to the theory of quantum computing and information. Examine the rules of quantum mechanics (qubits, unitary transformations, density matrices); quantum gates and circuits; entanglement; the Bell inequality; protocols for teleportation, quantum key distribution, quantum money and other tasks; basic quantum algorithms such as Shor's and Grover's; basic quantum complexity theory; and the challenges of building scalable quantum computers.

C S X88R. Randomized Algorithms.
The design and analysis of efficient randomized algorithms.

C S X88S. Formal Semantics and Verification.
Sequential execution: partial and total correctness; deductive, operational, and denotational semantics; formal derivation of programs; parallel execution: partial correctness, deadlock, and starvation; methodology, parallel versus distributed execution.

C S X88T. Theory of Computation.
Examine polynomial hierarchy, circuit lower bounds, randomized computation, approximability, communication complexity, pseudorandom generators, and probabilistically checkable proofs.

C S X88U. Planning, Search, and Reasoning Under Uncertainty.
Introduction to three key foundational problems in AI: planning, search, and reasoning under uncertainty. Investigate how to define planning domains, including representations for world states and actions, covering both symbolic and path planning. Study algorithms to efficiently find valid plans with or without optimality, and partially ordered, or fully specified solutions.

C S X89C. Continuous Algorithms.
Explore the design and analysis of algorithms for continuous spaces, focusing on optimization, numerical linear algebra, sampling, and applications to machine learning.

C S X89L. Automated Logical Reasoning.
Subjects include automated reasoning techniques for propositional logic, first-order logic, linear arithmetic over reals and integers, theory of uninterpreted functions, and combinations of these theories. Examines automated logical reasoning both from a theoretical and practical perspective, giving a hands-on experience building useful tools, such as SAT and SMT solvers.

C S X89M. Principles of Object-Oriented Software Technology.
Fundamental principles of object-oriented software engineering, including design and implementation of object-oriented analysis methods, software architectures, translators of high-level programming language representations, translations to multiple-software architectures.

C S X89R. Recursion and Induction I.
The development of a formal theory for reasoning about computer programs, with emphasis on recursively defined functions in the LISP style and proof by mathematical induction. Heavy emphasis on student discovery and presentation of proofs.

C S X90D. Distributed Computing II.
Synchronous and asynchronous algorithms, with particular emphasis on notations for expressing the algorithms and logics for reasoning about them. Algorithms from a variety of application areas and for a variety of architectures.

C S X90S. Sublinear Algorithms.
Study algorithms that can process very large data sets, with a focus on streaming algorithms, compressed sensing, and property testing.

C S X91D. Data Mining: A Mathematical Perspective.
Mathematical and statistical aspects of data mining. Topics include supervised learning (regression, classification, support vector machines) and unsupervised learning (clustering, principal components analysis, dimensionality reduction). Uses technical tools that draw from linear algebra, multivariate statistics, and optimization.

C S X91K. Artificial Intelligence II.
Advanced course in artificial intelligence. Topics include planning, probabilistic reasoning, truth maintenance, abduction, model-based diagnosis, and speech recognition.

C S X91L. Machine Learning.
Computing systems that automatically improve their performance with experience, including various approaches to inductive classification such as version space, decision tree, rule-based, neural network, Bayesian, and instance-based methods; as well as computational learning theory, explanation-based learning, and knowledge refinement.

C S X91M. Case Studies in Machine Learning.
Explore major concepts, techniques, algorithms, and applications in machine learning. Evaluate machine learning methods and discuss practical case studies to produce solutions for real-world data analysis problems.

C S X91R. Robot Learning.
Survey a wide range of modern techniques in robotics that learn from data, largely focusing on robot perception and decision making. Explore 3D vision, representation learning, active perception, reinforcement learning, imitation learning, and applications in robot manipulation.

C S X92C. Methods and Techniques for Parallel Programming.
Models of parallel fundamental concepts for representation of parallel computation structures, study of representative parallel programming languages, formulation of languages and translation methods, translation of parallel programs to multiple targets, laboratory exercises in parallel programming.

C S X92F. Automated Software Design.
Model-driven engineering; UML metamodels and constraints, model transformations, software product lines, feature models, feature modularity, feature algebras, feature interactions, multi-dimensional separation of concerns, design-by-transformation, parallel software architectures, correct-by-construction, architecture refinement, optimization, and extension, program refactorings, design patterns, refactoring scripts, category theory, functors, commuting diagrams.

C S X93C. Agent-Based Electronic Commerce.
Focuses on the intersection of computer science (including multiagent systems and machine learning), economics, and game theory. Explores economic mechanisms of exchange suitable for use by automated intelligent agents, including auctions and auction theory, game theory and mechanism design, and autonomous bidding agents. Students demonstrate programming proficiency in a trading agent competition.

C S X93D. Topics in Numerical Analysis.
Recent topics have included numerical methods in ordinary differential equations, numerical methods in partial differential equations, computational problems in linear algebra, numerical solution of systems of equations, numerical methods in functional approximation, numerical integration.

C S X93N. Numerical Solution of Elliptic Partial Differential Equations.
The numerical solution of large systems of linear algebraic equations arising in the solution of elliptic partial differential equations by discretization methods.

C S X93P. Program Synthesis.
Study the methods for automatically discovering programs that implement given high-level specifications, which can take many forms, including formal constraints, input-output examples, demonstrations, and natural language. Examine contemporary algorithms for program synthesis to bring together symbolic techniques for pruning and search, numerical techniques for finding optimal parameters, and statistical techniques for interpreting ambiguous specifications and learning to search.

C S X93R. Autonomous Robots.
Explore an advanced overview of autonomous mobile robotics, including control, perception, and planning. Examine algorithms and data structures related to these, cover widely adopted and state of the art techniques. Implement and extend such algorithms on real robots.

C S X94C. Algorithms for Computational Biology.
Algorithm design in computational molecular biology, with a focus on multiple sequence alignment and phylogeny (evolutionary history) reconstruction. Topics include the design and analysis of algorithms under probabilistic models of evolution, heuristics, and exact solutions for NP-hard optimization problems.

C S X94D. Deep Learning.
Explore the basic building blocks and intuitions behind designing, training, tuning, and monitoring of deep networks. Examine both the theory of deep learning, as well as hands-on implementation sessions in pytorch. Explore a series of application areas of deep networks in: computer vision, sequence modeling in natural language processing, deep reinforcement learning, generative modeling, and adversarial learning.

C S X94F. Knowledge Representation and Reasoning.
Surveys the research and practice of building knowledge systems, including knowledge representation, automated reasoning, knowledge acquisition, and explanation generation.

C S X94N. Neural Networks.
Biological information processing; architectures and algorithms for supervised learning, self-organization, reinforcement learning, and neuro-evolution; theoretical analysis; hardware implementations and simulators; applications in engineering, artificial intelligence, and cognitive science.

C S X94P. Automatic Programming.
Automatic generation of computer programs from high-level specifications. Program analysis, optimization, and transformation; partial evaluation; object-oriented programming; transformation of formal specifications; specialization of generic procedures; views.

C S X94R. Reinforcement Learning: Theory and Practice.
Introduces the theory and practice of modern reinforcement learning, with emphasis on temporal difference learning algorithms.

C S X95. Topics in Conference Course.

C S X95L. Topics in Conference Course.

C S X95T. Topics in Computer Science.
From eight to fifteen topics are offered each semester.

C S X95T.1. Parallel Computations.

C S X95T.10. Foundational Techniques of Machine Learning and Data Sciences.

Introduction to computational and mathematical tools of data science. Cover statistical estimation and optimization algorithms, neural networks, geometry of high dimensional spaces, randomized methods, sparse approximation, and dimension reduction techniques.

C S X95T.9. Introduction to Ethical AI and Robotics.

Introduction to ethical issues and challenges that could and do arise when creating AI-based systems. Explore case studies anchored by readings illustrating the current and future possible uses of robots as well as the broad themes of ethical and responsible AI. Address how things have gone wrong in the past and open debates regarding how best to design, deploy, and regulate AI systems.

C S X96. Research Practice and Experience.

Designed to provide an early research experience for new doctoral students in computer science. Students conduct an independent research project and present the results.

C S X96M. Advanced Networking Protocols.

Topics include routing, multiple access, internetworking, security, performance models, and verification methods.

C S X98. Thesis.

C S X98T. Supervised Teaching in Computer Science.

Supervised teaching experience, and seminar focused on curriculum construction and teaching methods.

C S X99W. Dissertation.

Professional Courses

C S X19S. Topics in Computer Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C S X29S. Topics in Computer Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

C T - Civic Thought

Civic Thought: C T

Lower-Division Courses

Upper-Division Courses

Graduate Courses

C T X81. Problems in the Study of Civic Thought.

C T X82. Topics in Seminar in Civic Thought.

C T X84. Topics in Problems in Constitutionalism.

C T X86. Topics in Problems in Statecraft.

C T X87. Topics in Seminar in Economy and Civics.

C T X88. Topics in Studies in Strategy.

Professional Courses

CDI - Critical Disability Studies

Critical Disability Studies: CDI

Lower-Division Courses

CDI X17C. Topics in Critical Disability Studies.

CDI X19S. Topics in Critical Disability Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Social Work. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CDI X29S. Topics in Critical Disability Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Social Work. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CDI X55. Topics in Critical Disability Studies.

CDI X55.1. Social Construction of Disability.

Focus on the social and cultural context of disability, with an emphasis on how disability is defined and understood at the micro and macro levels. Examine the longstanding social oppression of the disability community, as well as ways to initiate social change.

CDI X55.2. Making Systems Work for People with Disabilities.

Explore an overview of disability policy. Examine the history of the disability rights movement, relevant federal and state legislation, legal and ethical issues, services and supports through federal and state programs, the political economy of disability, and disability culture, advocacy, and leadership issues.

CDI X55.3. Aging and Disability.

Introduction to individuals who are either chronologically older or who may be experiencing functional changes typical of older persons. Identify strategies for support for families, friends, service providers, organizations, and members of the community to improve the lives of older persons.

CDI X55.4. Family Support, Self-Determination, and Disability.

Examine strategies for working with and supporting families who have a member with a disability. Explore the use of these strategies by teachers, professionals in the disability field, self-advocates, and families.

CDI X55.5. Developmental Disabilities and Self Advocacy.

Explore lifespan issues for individuals with developmental disabilities. Examine the impact of social and cultural values, including attitudes toward children and adults with developmental disabilities, institutionalization, service options, sexuality, forced sterilization, self-advocacy movements, and aging.

CDI X55.6. Women and Disability.

Examine the meaning and experience of being female and disabled. Explore the intersection of sex-roles stereotypes, disability stereotypes, and cultural stereotypes.

CDI X55.7. Sexuality and Disability.

Discuss the intersection of sexuality and disability and the complex historical influences that impact discussions of sexuality in relationship to disability. Explore the social justice issues surrounding disability and sexuality using the perspective of social work values and ethics to guide learning. Examine the concepts of diversity and inclusion in relation to disability and sexuality.

CDI X55.8. Leadership Training: Autism.

Explore interdisciplinary leadership training on Autism Spectrum Disorders (ASD) and other related disabilities in social work and other health professions. Advance knowledge and skills in improving health

care delivery for all children with developmental disabilities. Examine the importance of understanding the integration of services, developing community partnerships, and promoting innovative practices to enhance cultural competency, family-centered care, and interdisciplinary partnerships.

CDI X55.9. Incarceration and Disability.

Graduate Courses

Professional Courses

CED - Classical Education

Classical Education: CED

Lower-Division Courses

CED X13. Classical Pedagogy.

CED X15. Topics in Classical Education.

CED X19S. Topics in Classical Education.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

CED X29S. Topics in Classical Education.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

CED X34. Foundations in Classical Education.

CED X35. Advanced Topics in Classical Education.

CED X75. Practicum in Classical Teaching.

Graduate Courses

Professional Courses

CGS - Cognitive Science

Cognitive Science: CGS

Lower-Division Courses

Upper-Division Courses

CGS X60. Topics in Cognitive Science: The Study of Mind.

An introduction to the study of mind known as cognitive science, focusing on key areas such as vision and language, cognition and problem solving, artificial intelligence.

CGS X60.1. Introduction to Cognitive Science.

CGS X65. Bias.

An interdisciplinary introduction to bias from the perspectives of psychology, political science, business, philosophy, and linguistics.

Graduate Courses

CGS X80. Advanced Topics in Cognitive Science.

CGS X80.1. Introduction to Cognitive Science.

Professional Courses

CH - Chemistry

Chemistry: CH

Lower-Division Courses

CH X01. Principles of Chemistry I.

CH X01C. Foundations of Chemistry I.

An introduction to chemistry for chemistry majors. Includes gases, atomic theory, bonding, and thermodynamics.

CH X01N. Chemistry in Our World I.

Designed for non-science and Textiles and Apparel majors. Examine the nature of matter, energy, chemical reactions, and chemical thermodynamics. Discuss how these fundamentals of chemistry relate to real-world applications. Not intended as preparation for Chemistry 301.

CH X02. Principles of Chemistry II.

Development and application of concepts, theories, and laws underlying chemistry.

CH X02C. Foundations of Chemistry II.

An introduction to chemistry for chemistry majors. Includes equilibria, kinetics, nuclear chemistry, inorganic chemistry, and electrochemistry.

CH X02N. Chemistry in Our World II.

Designed for non-science and Textiles and Apparel majors. Survey organic chemistry including the nature of chemical bonding, molecular structure, nomenclature, and reaction types. Examine polymers and nutrition. Discuss how these fundamentals of chemistry relate to real-world applications.

CH X04. Introduction to Chemical Practice.

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science.

CH X04M. Introduction to Chemical Practice I.

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science.

CH X04N. Introduction to Chemical Practice II.

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science.

CH X06K. Undergraduate Research.

Introduction to research practices; supervised individual undergraduate research in chemistry.

CH X07. Topics in Conference Course.

Supervised study in chemistry.

CH X07K. Introduction to Science Outreach in Elementary Schools.

Developing and presenting level-appropriate science laboratories to students in local elementary schools. A hands-on, discovery learning approach to science is emphasized.

CH X07L. Peer Teaching.

Students act as peer teaching assistants in other University chemistry courses, mainly large general chemistry lecture sections.

CH X08. Topics in Chemistry.

CH X10K. Organic Chemistry Laboratory.

Primarily for premedical, predental, life sciences, and pharmacy majors.

CH X10L. Organic Chemistry Laboratory.

Primarily for premedical, predental, life sciences, and pharmacy majors.

CH X17. Descriptive Inorganic Chemistry.

Synthesis and properties of inorganic, bioinorganic, and organometallic compounds.

CH X19C. Professional Development for Chemists.

Explore professional development in chemistry, excellence in research, scientific communication, ethics, and career planning.

CH X19S. Topics in Chemistry.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CH X82T. Advanced Study and Research: UTeach.

Designed for beginning graduate students seeking review of modern chemical concepts.

CH X97P. Problems in Chemistry.

Upper-Division Courses

CH X20C. Organic Chemistry Laboratory.

CH X20K. Health Professions Organic Chemistry Laboratory.

CH X20M. Organic Chemistry I.

Primarily for premedical, predental, life sciences, and pharmacy majors. Development of organic chemical structure, nomenclature, and reactivity.

CH X20N. Organic Chemistry II.

Primarily for premedical, predental, life sciences, and pharmacy majors. The development of organic chemical functional group reactivity, reaction mechanics, with analogous aqueous transformations in biochemical settings.

CH X28C. Structure and Reactivity of Organic Molecules I.

Explore the development of organic chemical structure, nomenclature, and reactivity.

CH X28K. Organic Chemistry Laboratory.

CH X28L. Organic Chemistry Laboratory.

CH X28M. Organic Chemistry I.

Primarily for chemistry and chemical engineering majors. The development of organic chemical structure, nomenclature, and reactivity.

CH X28N. Organic Chemistry II.

Primarily for chemistry and chemical engineering majors. The development of organic chemical reactivity, with an emphasis on synthesis and polymers.

CH X29C. Structure and Reactivity of Organic Molecules II.

Explore the development of organic chemical reactivity, with an emphasis on synthesis and polymers.

CH X29S. Topics in Chemistry.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CH X31. Inorganic Chemistry.

Survey of the chemistry of the elements, incorporating both descriptive and theoretical aspects. Open-ended experiments designed to illustrate a variety of synthetic techniques.

CH X41. Special Topics in Laboratory Chemistry.

Examples of topics are physical measurements techniques; electronics for scientists; advanced synthetic chemistry (organic or inorganic); separation techniques.

CH X44. Chemical Education: Secondary School.

Issues and techniques in secondary school teaching of chemical sciences.

CH X44K. Chemical Education Laboratory I.

Development of classroom demonstrations, laboratory experiments, and teaching aids for secondary school teaching of the chemical sciences.

CH X44L. Chemical Education Laboratory II.

Development of classroom demonstrations, laboratory experiments, and teaching aids for secondary school teaching of the chemical sciences.

CH X53. Physical Chemistry I.

Equations of state, laws of thermodynamics, ideal and nonideal solutions, phase equilibria, thermodynamics of chemical reactions.

CH X53K. Physical Chemistry Laboratory.

CH X53M. Physical Chemistry I for Life Sciences.

Thermochemistry and kinetics of reactions in cells, enzyme catalysis, electrical and transport properties of membranes.

CH X54. Quantum Chemistry and Spectroscopy.

Fundamental principles of quantum mechanics, exactly soluble model problems, electronic structure of atoms and molecules, spectroscopy.

CH X54C. Statistical Mechanics.

An introduction to statistical mechanics.

CH X54K. Physical Chemistry Laboratory.

CH X54L. Physical Chemistry II.

Molecular energy levels, statistical thermodynamics (macroscopic thermodynamic functions from molecular input), and physical and chemical kinetics, with emphasis on the molecular viewpoint.

CH X54M. Introduction to Computational Methods in Chemistry.

Construction and implementation of numerical algorithms for solving differential equations which are common in chemistry. Subjects include chemical reaction rates, quantum mechanics, molecular dynamics, normal modes of vibration, and Monte Carlo methods.

CH X54P. Advanced Chemistry: Molecular Biophysics.

Examine organizing principles of biological systems on a molecular level using mathematical models rooted in physics and chemistry. Develop skills to create quantitative models of biophysical processes, scientific writing, presentation, and data analysis.

CH X54S. Elements of Spectroscopy.

Fundamentals of spectroscopy, with knowledge of elementary quantum mechanics. Separation of electronic, vibrational, rotational and spin quantum states; interaction of radiation and matter; theory and application of different types of spectroscopy including photoelectron, electronic absorption and emission, vibrational (infrared and Raman), rotational and magnetic resonance.

CH X55. Fundamentals of Analytical Chemistry.

Chemical and instrumental methods in analytical chemistry.

CH X56. Analytical Chemistry.

CH X65N. Structures and Function of DNA Materials.

Explore DNA's role in molecular and materials engineering, utilizing its predictable hybridization to build programmable structures.

CH X66C. Advanced Inorganic Chemistry: Organometallics Catalysis.

An in-depth and mostly chronological study of the evolution of organometallic and inorganic coordination chemistry, and its continued critical importance in a range of industrial processes. Covers a range of topical catalytic processes, paying particular attention to how chemical bonding and kinetics can be exploited to affect the relative rates of reaction.

CH X66D. Bio-inorganic Chemistry and Spectroscopy.

Covers the roles of transition metals in biology, mostly with respect to protein structure, function, and catalysis. Also covers methods of spectroscopy that are used to probe the geometrical and electronic structure of metal ions in proteins. Exposure to modern areas of study in bio-inorganic chemistry. Explores the principles of transition metal chemistry in the context of biological systems.

CH X66E. Chemistry of the s-, p-, d-, and f-Block Elements.

Focuses on the electronic structure of molecules and complexes, and how such information can predict important properties such as chemical reactivity, spectroscopy, and magnetism. Intended for upper-division chemistry majors with a basic understanding of concepts in inorganic chemistry.

CH X67C. Materials Chemistry.

Introduction to structural and physical properties of materials and synthetic strategies for making new materials in the nanoscale and mesoscale regimes, in addition to covering instrumental methods used to probe materials properties. Some aspects of applications (semiconductor devices, solar and fuel cells, smart and responsive materials) will be covered to illustrate the kinds of material properties that need to be considered in designing novel materials of specific function.

CH X67P. Introduction to Polymer Science.

Explore an overview of macromolecular soft materials including the fundamentals of polymer chemistry, physics, and engineering.

CH X68. Advanced Topics in Chemistry.

CH X68.1. Research Methods: UTeach.

Students use mathematics and science skills to solve research problems.

CH X68.2. Advanced Topic in Analytical Chemistry.

CH X68.3. Advanced Topic in Inorganic Chemistry.

CH X68.4. Advanced Topic in Organic Chemistry.

CH X68.5. Advanced Topic in Physical Chemistry.

CH X69K. Techniques of Research.

Advanced laboratory practice and introduction to research.

CH X71K. Science Outreach in Elementary Schools.

Students develop and present level-appropriate science laboratories to students in local elementary schools. Students also plan and create the infrastructure needed to administer the science program in concert with the science curriculum at a specific elementary school. A hands-on, discovery learning approach to science is emphasized.

CH X72S. Study and Research Abroad: Austin International Framework.

Designed specifically for students participating in the AIF program. Facilitates student-led mini-seminars and video conference call discussions. Explores student research and wider learning and cultural experiences in Austin and abroad.

CH X75C. Physical Organic Chemistry.

Explore reaction mechanisms and reactivity of organic chemicals and high-energy intermediates. Develop skills to design experiments and explain observed phenomena.

CH X75K. Individual Study in Chemistry.

Supervised reading or individual tutorial sessions on advanced topics in chemistry.

CH X75P. Advanced Topics in Polymer Science.

CH X75P.1. Advanced Polymer Synthesis.

Explore a comprehensive overview of how to design and synthesize polymers found in everyday life. Discuss the everyday utility of synthetic polymers to put their significance into context.

CH X75P.2. Polymer Physical Chemistry.

Examine the statistical, mechanical, and thermodynamic basis of polymer properties in melts, gels, and solutions. Explore the conformations and sizes of polymer molecules; the properties and structure of glassy, crystalline, and elastic (rubbery) polymers; the thermodynamics of polymer solutions, blends, and semi-crystalline materials; and the self-assembly of block polymers.

CH X75P.3. Advanced Polymer Engineering.

Examine a multi-length scale (molecular, mesoscopic, and macroscopic) picture of mechanical and transport properties in polymeric materials, essential for rationally engineering polymers while addressing challenges in recycling, energy, healthcare, and sustainability.

CH X76K. Advanced Analytical Chemistry.

CH X78L. Capstone Research and Thesis.

Develop a capstone project with a faculty adviser, with a focus on advanced laboratory techniques and experimental design.

CH X79H. Chemistry Honors Tutorial Course.

Laboratory research project in a specific field of chemistry under the supervision of one or more faculty members.

CH X82T. Advanced Study and Research: UTeach.

Designed for beginning graduate students seeking review of modern chemical concepts.

CH X97P. Problems in Chemistry.

Graduate Courses

CH X80L. Inorganic Reactions and Structures.

CH X80M. Topics in Advanced Chemistry.

CH X80N. Advanced Inorganic Chemistry: Spectroscopy and Structure.

Advanced inorganic chemistry, with emphasis on structure, spectroscopy, and ligand field theory.

CH X80R. Dual MD/PhD Program with UT Medical Branch.

Preclinical medical study at the University of Texas Medical Branch at Galveston.

CH X80T. Current Concepts in Chemistry and Biochemistry: UTeach.

Designed for beginning graduate students seeking a review of modern chemical concepts.

CH X81M. Advanced Analytical Chemistry.

Theory and application of special methods and recent advances.

CH X82J. Survey of Physical Chemistry.

Surface chemistry and catalysis, transport properties, macromolecules, electrochemistry and electrolyte solutions, molecular thermodynamics, solution kinetics, and photochemistry.

CH X82K. Advanced Physical Chemistry: Introduction to Quantum Mechanics.

CH X82L. Advanced Physical Chemistry: Statistical Mechanics.

CH X82M. Advanced Physical Chemistry.

Quantum chemistry.

CH X82T. Advanced Study and Research: UTeach.

Designed for beginning graduate students seeking review of modern chemical concepts.

CH X86J. Advanced Organic Chemistry.

Advanced organic chemistry, with emphasis on theory and reaction mechanisms.

CH X86K. Advanced Organic Chemistry.

Advanced organic chemistry, with emphasis on synthetic methods.

CH X87K. Biochemical Techniques.

Discussion of procedures and equipment used in modern biochemical investigation, with laboratory work to provide experience in techniques of general importance.

CH X90. Topics in Chemistry: Seminar.

CH X90.1. Analytical-Physical Chemistry.

CH X90.2. Organic Chemistry.

CH X90.4. Inorganic Chemistry.

CH X90K. Advanced Topics in Inorganic Chemistry.

Topics include magnetic resonance; organometallic, main-group, and transition metal chemistry; nonaqueous solvents; high-temperature superconductors; new developments in synthetic chemistry; and aspects of inorganic chemistry relevant to material science.

CH X90K.1. Advanced Inorganic Chemistry: Organometallics Catalysis.

Explores the evolution of organometallic and inorganic coordination chemistry, and its importance in a range of industrial processes; and covers a range of topical catalytic processes.

CH X90K.2. Advanced Inorganic Chemistry: Bio-Inorganic Chemistry.

Explores the roles of transition metals in biology, mostly with respect to protein structure, function and catalysis. Examines established and developing methods of spectroscopy used to probe the geometrical and electronic structure of metal ions in proteins. Analyzes modern areas of study in bio-inorganic chemistry, especially relating to the roles of metals in metalloenzymes, but also including emerging topics such as metallodrugs, metal-based imaging agents, and molecular sensors. The principles of transition metal chemistry will be explored, expanded and demonstrated in the context of biological systems.

CH X90L. Advanced Topics in Analytical Chemistry.

Topics include electrochemistry, electronics, mathematical methods, mass spectrometry, and optical methods.

CH X90L.1. Advanced Analytical Chemistry: Electrochemistry.

Designed to introduce the fundamental principles of electrochemistry. An overview of the structure and properties of the electrode/solution interface is presented, and followed by a more detailed discussion of how thermodynamics, kinetics, and mass transfer affect electrochemical

processes. Includes specific electrochemical methods, including potential step and sweep techniques, pulse voltammetry, impedance spectroscopy, and hydrodynamic methods. Focuses on specialized electrochemical phenomena, including: photoelectrochemistry, coupled electrochemical and homogeneous reactions, and bulk electrolysis. Introduces the use of digital simulations to solve electrochemical problems.

CH X90L.2. Advanced Analytical Chemistry: Mass Spectrometry.

Overview of the instrumentation, methods, and theory of mass spectrometry and gas-phase ion chemistry. Subjects include ionization methods, mass analyzers, vacuum components and pressure measurement, ion activation methods, analytical figures of merit, and integration of mass spectrometry with separation methods. Other subjects include gas-phase thermochemistry, kinetic theory of ion fragmentation, interpretation of mass spectra, and special subjects that may include ion mobility, proteomics, imaging, and elemental analysis, among others.

CH X91. Advanced Topics in Organic Chemistry.

Topics include organic photochemistry; molecular orbital theory; free radical chemistry; organometallic compounds; nuclear magnetic resonance and mass spectrometry; organic synthesis.

CH X91P. Introduction to Polymer Science.

Explore an overview of macromolecular soft materials including the fundamentals of polymer chemistry, physics, and engineering.

CH X92H. Biomolecular Structure by Nuclear Magnetic Resonance Spectroscopy.

Theory and application of modern nuclear magnetic resonance spectroscopy methods. Emphasis on applications to biological macromolecules, including protein and nucleic acid structure determination.

CH X92J. Molecular Biology of the Yeast Saccharomyces.

The use of yeast as a tool for the study of important areas of eukaryotic biology; the use of classical and molecular genetic techniques in the study of gene expression, DNA replication and repair, development and growth control, protein targeting, and metabolism.

CH X92N. Physical Chemistry of Macromolecular Systems.

Theory of macromolecular solutions and methods for characterization of macromolecular systems.

CH X92T. Biotransformations of Drugs and Other Nonnutritive Compounds.

Absorption and metabolism of naturally occurring and synthetic nonnutritive compounds.

CH X92U. Comparative Biochemistry.

Comparative aspects of protein structure, metabolism, respiration, and cellular regulation.

CH X92W. Analytical Student Seminar.

Student seminar presentations covering current research topics.

CH X93L. Advanced Topics in Physical Chemistry.

CH X93P. Advanced Topics in Polymer Science.

CH X93P.1. Advanced Polymer Synthesis.

Explore a comprehensive overview of how to design and synthesize polymers found in everyday life. Discuss the everyday utility of synthetic polymers to put their significance into context.

CH X93P.2. Polymer Physical Chemistry.

Examine the statistical, mechanical, and thermodynamic basis of polymer properties in melts, gels, and solutions. Explore the conformations and sizes of polymer molecules; the properties and structure of glassy, crystalline, and elastic (rubbery) polymers; the thermodynamics of polymer solutions, blends, and semi-crystalline materials; and the self-assembly of block polymers.

CH X93P.3. Advanced Polymer Engineering.

Examine a multi-length scale (molecular, mesoscopic, and macroscopic) picture of mechanical and transport properties in polymeric materials, essential for rationally engineering polymers while addressing challenges in recycling, energy, healthcare, and sustainability.

CH X95F. Genetics.

Basic principles of Mendelian and molecular genetics, and an exploration of the genetic toolbox using examples of analytic methods and modern genetic manipulations. Focus on the genetic analysis of model organisms. Use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems.

CH X95H. Cell Biology.

Detailed consideration of mechanisms of growth control, cell cycle regulation, mitosis, cell signaling, protein targeting, and the integration of these processes.

CH X95K. Topics in Advanced Individual Study in Chemistry.

Supervised reading or individual tutorial sessions on advanced topics in chemistry.

CH X97C. Problems in Chemistry.

CH X97P. Problems in Chemistry.

CH X97S. Advanced Topics in Chemistry.

CH X98. Thesis.

CH X98T. Professional Development for Graduate Students in Chemistry.

Provides professional development skills to graduate students in chemistry. Subjects include excellence in teaching, scientific communication, grantsmanship, ethics, and career planning.

CH X99W. Dissertation.

Professional Courses

CH X82T. Advanced Study and Research: UTeach.

Designed for beginning graduate students seeking review of modern chemical concepts.

CH X97P. Problems in Chemistry.

CHE - Chemical Engineering

Chemical Engineering: CHE

Lower-Division Courses

CHE X02. Introduction to Chemical Engineering.

Introduction to chemical engineering, including problem solving and study skills. Opportunities and responsibilities of a career in chemical engineering.

CHE X03. Introduction to Undergraduate Research.

Introduction to undergraduate research including the structure of academic research, how to access research resources on campus, and foundational skills to succeed in a research environment

CHE X10. Introduction to Computing.

Computer programming focusing on basics of computing, high-level programming environments, and spreadsheets, with application to chemical engineering.

CHE X11. Engineering Sustainable Technologies.

Flows of materials and energy in engineering environments at local, regional, and global scales, and the interaction of those anthropogenic flows with natural cycles of materials and energy. Discusses biogeochemical flows (grand cycles) and anthropogenic material flows at the national level, in industrial sectors, and for consumer products.

CHE X17. Introduction to Chemical Engineering Analysis.

Principles and applications of material and energy balances in process analysis.

CHE X18C. Peer Mentorship.

Best practices for delivery of tutoring and/or grading for undergraduate chemical engineering majors.

CHE X19. Transport Phenomena.

Basic study of momentum, energy, and mass transport. Includes viscous and turbulent flow, heat transfer, and mass diffusion.

CHE X19S. Topics in Chemical Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad

Office. Credit is recorded as assigned by the study abroad adviser in the McKetta Department of Chemical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CHE X73K. Process Design and Operations.
Process design, economics, and safety; design projects representing a variety of industries and products.

Upper-Division Courses

CHE X22. Thermodynamics.
Introductory course in thermodynamics with special reference to chemical process applications: basic laws, thermodynamic properties of single component systems, expansion and compression of fluids, heat engines, multicomponent systems, physical equilibrium, chemical equilibrium.

CHE X22M. Molecular Thermodynamics.
Statistical and molecular concepts, especially the role of the microscopic chemical potential.

CHE X23. Chemical Engineering for Micro- and Nanofabrication.
Definition and description of the terminology and processes of microelectronics, including semiconductor facilities and chemical processes for integrated circuit manufacture, with an emphasis on unit processes; the major unit process, including thin-film metals and dielectrics deposition and etching, silicon oxidation and etching, ion implantation, diffusion, lithography, planarization, and process control; and an overview of promising nanopatterning and nanofabrication techniques, such as particle-beam imaging, nanoimprint, and near-field probe imaging, implantation, diffusion, lithography, planarization, and process control.

CHE X29S. Topics in Chemical Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the McKetta Department of Chemical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CHE X33T. Engineering Communication.
Advanced technical communication skills, with emphasis on writing strategies for technical documents, oral presentations, and visual aids.

CHE X37. Quantitative Analysis of Cellular and Molecular Biology.
Analyzes biological systems from stoichiometric, thermodynamic, and kinetic perspectives. Case studies will illustrate how these principles are used to understand disease, control cellular behavior, and design protein-based therapeutics.

CHE X38. Biochemical Engineering.
Introduction to basic biological processes including transcription, translation, protein/enzyme function, cellular energetics, protein secretion and modifications. Application of quantitative engineering principles to the analysis of biological processes, including thermodynamics, kinetics and stoichiometry.

CHE X39. Introduction to Biochemical Engineering.
Microorganisms in chemical and biochemical syntheses; genetic manipulation of cells by classical and recombinant DNA techniques. Enzyme technology; design of bioreactors and microbial fermentations; separations of biological products.

CHE X39P. Introduction to Biological Physics.
Diffusion, dissipation, and driving forces in cellular processes. Locomotion of bacteria, basic modeling of biomolecular folding and binding events, osmotic flows, and self-assembly in cells.

CHE X39T. Cell and Tissue Engineering.
Introduction to biomedical research in tissue engineering. Includes case studies of tissues and organs of the body, physiology and biology of tissue, pathologies of tissue, current clinical treatments, the role of engineers in development of new technologies to diagnose and treat pathologies, quantitative cellular and molecular techniques, and applications of synthetic and natural biomaterials.

CHE X41. Design for Environment.
Overview of environmental assessment tools for chemical processes and products, including life cycle and risk assessments. Overview of design tools for improving environmental performance of chemical processes, including unit operations and flowsheet analysis methods.

CHE X42. Chemical Engineering Economics and Business Analysis.
Study of the economic decisions faced by chemical engineers. Discounted cash flow techniques. Personal finance, managerial economics, and other special topics.

CHE X43. Molecular Simulation of Materials.
Introduction to basic molecular simulation techniques including molecular mechanics, molecular dynamics, and Monte Carlo method. Understanding of principles underlying these techniques, and how these techniques can be used to study the physical and chemical properties and behavior of materials at the molecular level. More advanced topics include molecular simulations in various ensembles (NVE, NVT, NPT, grand canonical), free energy computations, controlling dynamics, and association-bias Monte Carlo method. Elementary knowledge of physical chemistry, classical mechanics, and statistical thermodynamics is assumed.

CHE X44. Introduction to Therapeutics.

CHE X46F. Atmospheric Chemistry and Physics.
Examine the sources of air pollutants and the chemical reactions and physical processes that affect them. Explore tropospheric chemistry and the microphysics, chemistry, and thermodynamics of atmospheric nanoparticles. Discuss aerosol transmission of viruses and mitigation of that transmission, as well as recent advances in understanding air pollution and its health effects.

CHE X48. Numerical Methods in Chemical Engineering and Problem Solving.
Numerical solutions to algebraic and differential equations; numerical methods to integration, interpolation, and regression analysis, with application to chemical engineering.

CHE X49D. Dynamics in Ecology and the Environment.
Examine the Earth's natural processes, populations, and systems. Explore the Earth's dynamic systems and how they change with time in response to a variety of disturbances. Use mathematical models to aid in understanding these dynamic systems and to estimate the impact of manmade disturbances. Discuss current environmental and ecological problems.

CHE X50. Chemical Engineering Materials.
Metallic, ceramic, polymeric, and composite materials. Crystal structures, phase diagrams, diffusion, and mechanical properties. Emphasis on structure-property-processing relationships.

CHE X53K. Applied Statistics.
Statistical methods such as data exploration and summary, least-squares fitting, probability and probability distributions, statistical inference and hypothesis testing, analysis of variance, design of experiments, statistical quality control, and use of professional statistical software.

CHE X53M. Measurement, Control, and Data Analysis Laboratory.
Laboratory safety; measurement and statistical analysis of transport process variables like temperature, pressure, and flow rate; computer data acquisition; feedback control; statistical process control and design of experiments; and production of professional-level lab reports.

CHE X54. Transport Processes.
Design and analysis of heat exchangers, fluid-flow systems and equipment, and interphase-contact devices.

CHE X55. Introduction to Polymers.
Synthesis, structural characterization, physical properties, and applications of polymers.

CHE X56. Optimization: Theory and Practice.
Techniques of optimization, including formulation of optimization problems, one-dimensional search techniques, analytical methods, and n-dimensional search techniques; application of methods to process-industry problems.

CHE X57. Technology and Its Impact on the Environment.
Study of sources and fates of environmental pollutants; environmental quality standards--their measurement and regulation; and pollution control design procedures.

CHE X59. Energy Technology and Policy.
Technology and policy related to energy supply and demand, oil and gas production, coal utilization, hydrogen production, fuel cells, transportation, nuclear power, solar and wind energy, biomass utilization, energy conservation, and climate change.

CHE X60. Process Control.
Analysis of process dynamics and methods for the design of automatic control systems for chemical process plants.

CHE X63. Separation Processes and Mass Transfer.
Design and analysis of equilibrium and mass transfer based on separations such as absorption, chromatography, crystallization, distillation, extraction, and membrane-based processes.

CHE X64. Chemical Engineering Process and Projects Laboratory.
Experimental studies of unit operations. Laboratory safety. Statistical data analysis. Written and oral reports.

CHE X64S. Chemical Process Safety.
Emphasizes quantitative engineering analysis based on the application of mass and energy balances, fluid mechanics of incompressible, compressible and two-phase fluids, heat transfer and conservation of energy, diffusion and dispersion under highly variable conditions, reaction kinetics, and process control. Subjects include various probabilistic and statistical methods to characterize accident and loss performance, techniques for process hazard analysis, risk assessment, and accident investigations.

CHE X72. Chemical Reactor Analysis and Design.
Planning and design of commercial chemical and biochemical reaction systems for producing fuels, polymers, specialty and consumer products, pharmaceuticals, solid-state devices, and other products.

CHE X73K. Process Design and Operations.
Process design, economics, and safety; design projects representing a variety of industries and products.

CHE X76K. Process Evaluation and Quality Control.
Use of statistical techniques to evaluate, compare, and optimize processes. Design of experiments for improved product quality control.

CHE X77C. Undergraduate Research Practicum.
Discuss best practices for participation in research for undergraduate chemical engineering majors.

CHE X77D. Undergraduate Research Practicum.
Discuss best practices for participation in research for undergraduate chemical engineering majors.

CHE X77K. Undergraduate Research Project.
Recommended for students considering graduate study. Topic to be selected in conjunction with individual chemical engineering faculty member, with approval by the department chair. A final written report is required.

CHE X77L. Undergraduate Research Project.
Subject matter to be selected in conjunction with individual chemical engineering faculty member, with approval by the department chair. A final written report is required.

CHE X79. Topics in Chemical Engineering.
Special topics of current interest.

CHE X79.2. Nanomaterials Chemistry and Engineering.

CHE X79.3. Greenhouse Gas Control Technology.

CHE X79.43. Entrepreneurship.

CHE X79.6. Materials Physics.

CHE X79.64. From Data to Decisions.

CHE X79.8. Advanced Nanotechnology and Innovation for Beginners.

CHE X79H. Undergraduate Honors Thesis.
Research performed during two consecutive semesters under the supervision of a chemical engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the department chair. The student makes two oral presentations and writes a thesis.

CHE X79I. Undergraduate Research Internship.
Participate in an internship or career experience program.

Graduate Courses

CHE X73K. Process Design and Operations.
Process design, economics, and safety; design projects representing a variety of industries and products.

CHE X80C. Laboratory Safety.
Safe laboratory practice. Training in use of fire extinguishers and first aid. Case studies of laboratory accidents.

CHE X80D. Research and Achievements Seminar.
Seminar series covering recent research and technical achievements in Chemical Engineering.

CHE X81N. Fluid Flow and Heat Transfer.
Advanced treatment of fluid flow and heat transfer problems in chemical engineering.

CHE X81P. Advanced Analysis for Chemical Engineers.
Applications of mathematical methods to chemical engineering problems, with emphasis on differential equations, linear analysis and matrices, and real analysis and complex variables.

CHE X81Q. Quantitative Analysis of Cellular and Molecular Biology.
Analyzes biological systems from stoichiometric, thermodynamic, and kinetic perspectives. Case studies illustrate how these principles are used to understand disease, control cellular behavior, and design protein-based therapeutics.

CHE X84E. Electrochemistry and Electrochemical Engineering.
Fundamental principles of electrochemistry combined with mass transfer including applications in analytical chemistry as well as industrial electrochemistry.

CHE X84K. Chemical Kinetics and Surface Chemistry.
Application of chemical reaction kinetics to the prediction and determination of reaction rates and reaction selectivity.

CHE X84S. Current and Emerging Trends in Chemical Engineering Research.
Overview of current and emerging trends in chemical engineering research with frequent guest presentations by leading scholarly and industrial researchers in the discipline.

CHE X84T. Topics in Chemical Engineering.

CHE X85. Research.

CHE X85C. Research.

CHE X85M. Surface Phenomena.
Liquid/fluid interfaces including equilibrium and nonequilibrium phenomena. Topics covered include capillarity, thermodynamics, surface rheology, and streaming potentials.

CHE X85P. Optimization: Theory and Practice.
Techniques of optimization, including formulation of optimization problems, one-dimensional search techniques, analytical methods, and n-dimensional search techniques; application of methods to process-industry problems.

CHE X86K. Theory of X-Ray Diffraction.
Application of basic diffraction theory to polycrystalline and single crystal materials.
CHE X86L. Laboratory Experiments in X-Ray Diffraction.
Application of X-ray diffraction techniques to the examination of polycrystalline and single crystal materials.
CHE X87K. Advanced Thermodynamics.
Applications of thermodynamics to chemical engineering processes.
CHE X87M. Mass Transfer.
Advanced treatment of diffusional mass transfer operations in chemical engineering.
CHE X88K. Separations Processes.
Advanced treatment of modern chemical engineering separations processes.
CHE X91. Elements of Modern Control Theory.
Introduction to fundamentals of dynamic optimization and system theory; applications to engineering processes.
CHE X91J. Reaction Kinetics.
CHE X91M. Mathematical Modeling of Engineered Systems.
Introduction to fundamentals of dynamic system modeling and associated numerical solution methods with applications to engineering systems.
CHE X91S. Molecular Simulation of Materials.
Introduction to basic molecular simulation techniques including molecular mechanics, molecular dynamics, and Monte Carlo method. Understanding of principles underlying these techniques, and how these techniques can be used to study the physical and chemical properties and behavior of materials at the molecular level. More advanced subjects include molecular simulations in various ensembles (NVE, NVT, NPT, grand canonical), free energy computations, controlling dynamics, and association-bias Monte Carlo method. Elementary knowledge of physical chemistry, classical mechanics, and statistical thermodynamics is assumed.
CHE X92. Polymer Science.
Details of polymerization mechanisms; structure-property relationships, fundamentals of processing, and characterization of high polymers.
CHE X92P. Introduction to Polymer Materials Science.
Synthesis, structural characterization, physical properties, and applications of polymers.
CHE X95C. Chemical Processes for Microelectronics.
Introduction to the chemical processes and the manufacturing operations used in microelectronics device fabrication.
CHE X95E. Polymer Science and Engineering Laboratory.
Training in the preparation and instrumental characterization of polymers, blends, and compounds.
CHE X95G. Chemical Engineering Economics and Business Analysis.
Study of the economic decisions faced by chemical engineers. Discounted cash flow techniques. Personal finance, managerial economics, and other special topics.
CHE X95J. Product and Process Development.
Product and process innovation in the process industries; screening criteria; needs-requirements research; evaluation.
CHE X95K. Design for Environment.
Overview of environmental assessment tools for chemical processes and products, including life cycle and risk assessments. Overview of design tools for improving environmental performance of chemical processes, including unit operations and flow sheet analysis methods.
CHE X97M. Graduate Research Internship.
Research associated with enrollment in the Graduate Research Internship Program (GRIP).
CHE X98. Thesis.
CHE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
CHE X98T. Supervised Teaching in Chemical Engineering.
Teaching under the close supervision of the instructor for one to four semesters; weekly group meetings; individual consultation; reports.
CHE X99W. Dissertation.

Professional Courses

CHE X73K. Process Design and Operations.
Process design, economics, and safety; design projects representing a variety of industries and products.

CHI - Chinese

Chinese: CHI

Lower-Division Courses

CHI X04. Accelerated First-Year Chinese.
Learn Modern Standard Chinese (Mandarin).
CHI X06. First-Year Chinese I.
Modern Standard Chinese (Mandarin). Intended for students who do not understand or speak Mandarin Chinese.
CHI X07. First-Year Chinese II.
Continuation of Chinese 506, 606. Intended for non-native speakers of Chinese.
CHI X12. Accelerated Second-Year Chinese.
Continuation of Chinese 604.
CHI X12K. Second-Year Chinese I.
Modern Standard Chinese (Mandarin). Intended for non-native speakers of Chinese.
CHI X12L. Second-Year Chinese II.
Intended for non-native speakers of Chinese. Continuation of Chinese 312K, 412K.
CHI X19S. Topics in Chinese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CHI X29S. Topics in Chinese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CHI X19S. Topics in Chinese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CHI X20K. Readings in Modern Chinese I.
Readings in expository prose: selections from journals, newspapers, and other sources.
CHI X20L. Readings in Modern Chinese II.
Readings in modern fiction, poetry, and drama.
CHI X22. Introduction to Classical Chinese.
Beginning study of wen yen, the particles, and syntax of the Chinese classics.
CHI X25K. Advanced Conversation I.
Drill in conversation on general topics.

CHI X25L. Advanced Conversation II.
Practice in speaking Modern Standard Chinese.
CHI X26. Business Chinese.
Advanced Chinese conversation, with emphasis on business vocabulary.
CHI X29S. Topics in Chinese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CHI X30. Topics in Advanced Chinese.
Fourth-year Chinese readings on special topics.
CHI X30D. Chinese across Disciplines.
Reading and discussion of Chinese language materials related to the subject matter of another designated course in Asian studies. Meetings with the instructor will be devoted to the discussion of linguistic problems, literary features, and crucial passages.
CHI X40. Topics in Chinese Literature.
Study of Chinese literary texts in the original.
CHI X40.1. Contemporary Chinese Literature.
Selected literary works from contemporary China (post 1949), in their original language. Focuses on translation and linguistic analysis, as well as discussion of the texts as works of literature.
CHI X40.2. Prose Writings by Lu Xun.
CHI X40.3. Modern Chinese Literature.
Selected literary works from modern China (pre 1949), focusing on translation, linguistic analysis, and discussion of these works as cultural and literary products within their socio-historical contexts.
CHI X40.4. Chinese Fiction from Taiwan.
Readings of works of fiction produced in contemporary Taiwan (1949 to present day) in Chinese. Readings include mainstream literature, stories written by writers of the Modernist and Nativist schools, and urban fiction since the late twentieth century.
CHI X41. Classical Chinese Poetry.
Study of Chinese poetry in the original.
CHI X60. Conference Course in Chinese Language and Literature.
Supervised individual study of selected problems in Chinese language or literature.

Graduate Courses

CHI X19S. Topics in Chinese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CHI X29S. Topics in Chinese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CHI X81. Conference Course in Chinese Language and Culture.
Supervised individual study in Chinese language or culture.
CHI X84. Topics in Chinese Language and Culture.
Study of various aspects and periods of Chinese language or culture.
CHI X84.1. Chinese Film and Literature.
Chinese literature and film from the early twentieth century to the present within the sociohistorical context of modern China.
CHI X84.3. Contemporary Chinese Literature.
CHI X84.5. Modern Chinese Literature.
CHI X84.7. Readings in Chinese Journals.

CIV - Civics

Civics: CIV

Lower-Division Courses

CIV X01. Perennial Problems in Civic Thought.
Examine civic conflicts and controversies, with a view to understanding their root causes. Explore readings from classic and contemporary texts on political theory, ethics, and practice.
CIV X01C. Being Human.
Examine classic texts that explore what it means to be human and consider their implications for politics, economics, society, morality, and religion.
CIV X01D. Pursuing Happiness.
Survey social science research on the key determinants of human happiness and considers the implications of this research for civic life.
CIV X01J. First Year Foundations I.
Discuss foundations for success in life, college, and career. Develop skills for civic leadership, well-being, and academic scholarship.
CIV X01K. First Year Foundations II.
Discuss career discernment, explore career opportunities, and develop skills for civic leadership, internship, and career success.
CIV X02. Truth and Persuasion.
Examine what humans can know, how they reason, what thinking is, and how humans communicate to persuade others. Discuss readings in logic, epistemology, and rhetoric including classical writers such as Plato, Aristotle, Cicero, and Quintilian as well as modern and contemporary thinkers and leaders, with emphasis on case studies of effective persuasion.
CIV X02C. Classics of Social and Political Thought.
Explores the origins of social scientific thought in the history of political philosophy and traces the development of one or more of the social sciences in modern times. Focuses on fundamental ideas about human nature, civil society, and politics, explored through reading such authors as Aristotle, Aquinas, Locke, Rousseau, Marx, Weber, Durkheim, and Freud.
CIV X03C. Foundations of American Civics.
Examine debates about constitutionalism and citizenship in American and Texas political experience. Investigate the philosophical and historic foundations of American institutions from the founding period through the contemporary era. Discuss the rights and responsibilities of citizenship.

CIV X03J. Origins of American Institutions.
Examine the roots of American institutions and practices from ancient times (Greek city-states, the Mosaic law, Roman politics), medieval practices and institutions, English constitutional history (Magna Carta, Glorious Revolution), and the Enlightenment (Locke, Montesquieu, Sydney). Discuss the American colonial experiment in self-government. Explore the Revolution, the Articles of Confederation, and the Constitutional convention. Address the early republic and significant constitutional moments in American experience.

CIV X03K. Democracy and Capitalism.
Examine classical liberal thought as it relates to political and economic liberty. Investigate how classical liberal ideas about political and economic liberty influence the modern development of democracy and capitalism. Explore potential tensions between democracy and capitalism. Study empirical evidence and classic writings on relationship between democracy, capitalism, and human flourishing.

CIV X04. Foundations of Research Methods for Civics.
Introduction to statistical methods used in civics with emphasis on concepts and applications. Utilize a variety of real data to discuss key concepts, such as sampling distributions and basic data analyses.

CIV X05. Excellence of Character: The Virtues.
Investigate the nature, grounds, and consequences of moral excellence in political communities. Discuss close reading of classical texts (such as Aristotle, Marcus Aurelius, Cicero, Aquinas), contemporary philosophical analysis (such as Foot, Anscombe, MacIntyre), results of scientific research, and reflections on history, biography, and literature (such as Shakespeare, Austen). Focus on application to contemporary problems.

CIV X09. Topics in Civics.

CIV X10K. Ethics and Leadership in Ancient Greek Drama.
Study selected plays of Sophocles, Euripides, Aeschylus, Aristophanes, and others with a focus on themes of virtue, justice, and leadership qualities.

CIV X10L. Ethics and Leadership in Shakespeare's Drama.
Study selected plays of Shakespeare, focusing on themes virtue, justice, and leadership qualities.

CIV X12P. Constitutional Principles: Core Texts.
Close readings from primary texts that have shaped or that reflect deeply upon American democracy, including the Declaration of Independence, The Federalist Papers, and Tocqueville's Democracy in America.

CIV X13. Civic Leadership: Global Perspectives.
Discuss classic and contemporary texts on civic leadership from a range of cultures and periods, including different ways of understanding, organizing, and leading in civic life.

CIV X19S. Topics in Civics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

CIV X20. Constitutionalism: Ancient and Modern.
Examine the ancient and medieval origins of modern constitutionalism. Explore the works of authors such as Plato, Aristotle, Cicero, Augustine, Machiavelli, Montaigne, Hobbes, Locke, Montesquieu, Rousseau, Gibbon, Hamilton, Madison, Tocqueville, Thoreau, Marx, Mill, Arendt, Berlin, Rawls, and Nozick.

CIV X21. Topics in Constitutional History and Principles Research.

CIV X21.1. Constitutional History and Principles Research.

CIV X21J. Economics and Constitutionalism.
Investigate economic growth as a function of constitutions that protect the rule of law and well-defined property rights. Examine social and economic outcomes under different rules. Explore constitutional disputes over economic issues such as taxation, eminent domain, labor law, and regulation. Consider how different constitutional arrangements affect economic well-being.

CIV X22. Topics in Western Civilization Research.

CIV X22.1. Western Civilization Research.

CIV X22J. The Quest for Community.
Examine how human communities are structured, and how this structure can foster or distort moral character and promote or obstruct happiness. Explore socialization; social capital; the role of rituals, symbols, hierarchy, historical memory, arts and literature, and religion. Discuss readings from classical texts and from contemporary sociology, social psychology, political theory, history, and literature.

CIV X22K. Politics and the Transcendent.
Examine the relationship between theology (both revealed and natural) and political theory in the Western world. Discuss the political significance of theological ideas such as the proposition that all human beings are created equal; that all human beings are created in the image of God; beliefs in divine providence and judgment; metaphysical foundations of natural law and free will.

CIV X23. Topics in Ethics and Leadership Research.

CIV X23.1. Ethics and Leadership Research.

CIV X23J. Ethical Analysis for Civic Leaders.
Analyze the ethical challenges civic leaders face. Explore different ethical frameworks for approaching the responsibility of civic leadership. Discuss case studies of leaders and difficult leadership decisions through biographies, historical studies, and films.

CIV X24. Topics in Rights, Freedoms, and the Rule of Law Research.

CIV X24.1. Rights, Freedoms, and the Rule of Law Research.

CIV X25. Topics in Civic Thought and Culture Research.

CIV X25.1. Civic Thought and Culture Research.

CIV X25K. Economic Analysis for Civic Leaders.
Discuss a practical application of the studies of strategic behavior to leadership. Examine games leaders must play and strategies they can use to orient a team toward a common goal.

CIV X26. Topics in Strategy and Statecraft Research.

CIV X26.1. Strategy and Statecraft Research.

CIV X29S. Topics in Civics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

CIV X31F. American Political Economy.
Survey the ideas that have structured the American economic system and the implications of these ideas for civic life and citizenship. Explore the philosophical and theoretical questions of political economy, as well as the policy challenges of the modern welfare state and globalization. Discuss readings that may include Adam Smith, Alexander Hamilton, Franklin Delano Roosevelt, as well as modern economists and social scientists.

CIV X37. Policy Research Lab.
Introduction to statistics, econometrics, and data science as tools necessary for policy and social science research. Discuss policy questions as well as policy and social science tools to evaluate those questions. Apply these tools to real-world data to answer crucial policy questions. Investigate appropriate data usage, employ cutting-edge statistical tools, and evaluate how to use these tools to understand the world.

CIV X57L. Amending the United States Constitution.
Examine the evolution of the United States Constitution from the founding to the present, with a focus on the major forces and fault lines

that have made the Constitution today one of the world's most difficult to amend.

CIV X60. Advanced Topics in Constitutional History and Principles.
Analyze the history of the writing, approval, development, and interpretation of the United States Constitution.

CIV X60.1. Advanced Constitutional History and Principles.

CIV X61. Advanced Topics in Western Civilization.
Discuss one or more great works influencing the development of the Western intellectual tradition by such authors as Sophocles, Herodotus, Thucydides, Plato, Aristotle, Tacitus, Augustine, Aquinas, and Dante.

CIV X61.1. Advanced Western Civilization.

CIV X62. Advanced Topics in Ethics and Leadership.
Discuss an advanced study of ethical considerations in leadership and ethical resources for leadership.

CIV X62.1. Advanced Ethics and Leadership.

CIV X63. Advanced Topics in Rights, Freedoms, and the Rule of Law.
Discuss an advanced study of topics in rights, freedoms, and the rule of law.

CIV X63.1. Advanced Rights, Freedom, and the Rule of Law.

CIV X64. Advanced Topics in Civic Thought and Culture.
Discuss an advanced study of topics in civic thought and culture.

CIV X64.1. Advanced Civic Thought and Culture.

CIV X65. Advanced Topics in Strategy and Statecraft.
Discuss an advanced study of topics in strategy and statecraft.

CIV X65.1. Advanced Strategy and Statecraft.

CIV X66. Advanced Topics in Civics.

CIV X67. Advanced Topics in Readings in Civic Thought.
Discuss advanced topics that examine a single major work in civics, significant theme in civics, or select works of a significant author in civics.

CIV X67.1. Readings in Civic Thought.

CIV X72. Topics in Independent Research in Constitutionalism.

CIV X73. Topics in Independent Research in Western Civilization.

CIV X74. Topics in Independent Research in Civic Leadership.

CIV X75. Internship.
Develop resume, cover letters, job search profiles, networking, and interviewing techniques. Build skills for internship, including how to think, how to lead, and how to follow. Study ethical and strategic exemplars in leadership. Analyze ethical and strategic lessons of internship.

CIV X75J. Internship: Career Planning.
Address issues related to career planning to establish an internship search. Develop resume, cover letters, job search profiles, networking, and interviewing techniques. Conduct informational interviews. Apply for internships.

CIV X75K. Internship: Leadership Development.
Build skills for internship, including how to think, how to lead, and how to follow. Understand workplace cultures. Study ethical and strategic exemplars in leadership.

CIV X75L. Internship: Reflection and Analysis.
Write substantial reflection that connects internship experience with themes in civics coursework. Analyze ethical and strategic lessons of internship.

CIV X77I. Internship in Civic Leadership.
Participate in a professional internship in civic leadership. Reflect on internship to improve ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

CIV X78I. Internship in Civic Leadership.
Participate in a professional internship in civic leadership. Reflect on internship to improve ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

CIV X79. Internship in Civic Leadership.
Perform fieldwork in research and analysis related to civic leadership.

CIV X79J. Thesis I.
Capstone of the civics honor degree. Develop and defend a coherent and persuasive argument on a significant question.

CIV X79K. Thesis II.
Capstone of the civics honors degree. Develop and defend a coherent and persuasive argument on a significant question.

CIV X79L. Capstone in Civics.

Graduate Courses

Professional Courses

CLD - Communication and Leadership

Communication and Leadership: CLD

Lower-Division Courses

CLD X01. Introduction to Communication and Leadership.
Introduces the study of leadership with an emphasis on communication dimensions and interdisciplinary understanding of social problems. Serves as a foundation for subsequent coursework in the areas of communication and leadership.

CLD X02. Topics in Communication and Leadership.
Contemporary issues and practices in communication and leadership.

CLD X03. Leadership Presence and Presentation.
Discuss the theory and application of the fundamentals of professional speaking, leader presence, persuasive arguments, and presentations for the modern workforce.

CLD X04. Introduction to Philanthropy.
Offers an introduction to philanthropy, focusing on the process of private giving as well as the work of private foundations.

CLD X14. Fundamentals of Philanthropy.
Builds on Introduction to Philanthropy, considering the process of creating and evaluating philanthropic initiatives.

CLD X19S. Topics in Communication and Leadership.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Communication. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CLD X20. Topics in Communication and Leadership.
Contemporary issues and practices in communication and leadership.

CLD X21. Seminar on Communication and Leadership.
Builds on the foundation introduced in Communication and Leadership 301 advancing student work in theories, processes, and practices of leadership and communication.

CLD X22. Independent Study.
Pursue special supervised individual research studies.

CLD X24. Communication and Leadership in Higher Education.
Investigate the ways in which leadership and communication intersect with a range of audiences from students and faculty to parents and legislators.

CLD X25. Leadership in Non-Profit Organizations.
Discuss the change-makers in the nonprofit sector, and discover the knowledge, skills, and strategies needed to excel in the art of communication within non-profit leadership.

CLD X29S. Topics in Communication and Leadership.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Communication and Leadership degree. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CLD X30. Philanthropy Capstone.
Analyze the effectiveness of nonprofit organizations and how to think about and apply the ethics, strategy, and practice of philanthropic giving.

CLD X32. Facilitative Leadership.
Explore facilitation and consensus-building into leadership in the private, nonprofit, and public sectors; how to engage stakeholders in powerful, productive, and prudent ways; and how to collaborate with team members to advance a leader's vision.

CLD X40. Communication for Civic Engagement.
Examine theories and applied practices for impactful and effective civic education.

CLD X45. Topics in Fundamentals and Skills.
Examine contemporary issues and practices in communication and leadership fundamentals and skills.

CLD X51. Internship in Communication and Leadership.
Practical work experience related to the practice of ethical leadership and communication.

CLD X60. Communication for Executive Leadership.
Explore the theories, strategies, and skills required for organizational leaders to be effective and lead strong teams.

CLD X65. Topics in Social Issues.
Study communication and leadership in social issues.

CLD X71. Capstone Course in Communication and Leadership.
Engagement in experiential learning. Development and presentation of ideas and plans for addressing a leadership challenge given by a partner organization.

CLD X79. Undergraduate Thesis.
Write and research two consecutive semesters under the supervision of a College of Communication faculty member; subjects are selected by the student with approval from the faculty member.

Graduate Courses

Professional Courses

CMS - Communication Studies

Communication Studies: CMS

Lower-Division Courses

CMS X01. Topics in Communication Studies.

CMS X06M. Professional Communication Skills.
Designed to help students develop skills in one-on-one interactions, small group communication, and presentation skills. Basic communication theories as they relate to skill development are explored.

CMS X07K. Internship.
Internship to be arranged by student and approved by instructor. Focuses on career goals of students in communication positions with public and private organizations.

CMS X09T. Introduction to Sports Communication.
Introduction to the study of sports as a communication phenomenon. Discuss sports across communication contexts, methods, and theories.

CMS X10. Forensics Workshop.
Training for participation in extracurricular speech activities, including intercollegiate debate.

CMS X10K. Team-Based Communication.
Analysis of small-group communication: cohesiveness, social climate, role structure, leadership, conformity, dynamics of interaction; participation in small-group communication situations.

CMS X13M. Organizational Communication.
Communication processes within government, private, and volunteer organizations.

CMS X14L. Language, Communication, and Culture.
The role of language in communication. Analysis of the complexity of human languages, languages in contact, language modality, and communication interaction.

CMS X15M. Interpersonal Communication Theory.
Introduction to the study of communication in relationships; topics include self-disclosure, conflict, long-distance relationships, stereotyping, and persuasion.

CMS X16L. Interviewing Principles and Practices.
Introduction to interviewing theory, emphasizing the acquisition and application of interviewing skills.

CMS X17C. Speech in American Culture.
The impact of public discourse on the ideas and issues of culture and history in the United States.

CMS X18L. Strategic and Risk Communication.
Introduction to the closely related areas of strategic communication, being purposeful and goal driven in messaging across various contexts, and risk communication, exchanging/assessing risk information to manage decisions across various contexts.

CMS X19S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X29S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X77K. Faculty-Initiated Research.
Supervised research on a project designed by a faculty member.

Upper-Division Courses

CMS X19S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X20. Advanced Presentation Skills.
Designed to help students develop skills in delivering informative and persuasive presentations and speeches. Study of major theories related to oral presentations. Focus on audience analysis and adaptation, building strong arguments, speech organization, and use of new technologies.

CMS X21D. Communicating for Development and Philanthropy.
An exploration of the special communicative dimensions of the development and philanthropy fields, including how to apply theories of building relationships and persuasion to the context of development and philanthropy for nonprofit organizations.

CMS X22E. Communication Ethics.
Examination of the ethical issues involved in communication. Subjects addressed include our role in interactions we are party to; media

coverage of issues of a sensitive or potentially harmful nature; and how our interactions with others reflect and shape who we are.

CMS X23R. Rhetoric: East and West.

Examination of the ways people from different cultures communicate and argue, and how cultures use logic, stories, myth, images, and the spoken word to make their points.

CMS X27. Urban Communication.

Examines communication between and within cultures in urban communities, especially immigrants and marginalized groups. Special focus on understanding the role cross-cultural relations play in shaping the identity of community members.

CMS X29S. Topics in Communication Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X30. Interpersonal Health Communication.

The fundamental interpersonal communication processes that are involved in managing physical and mental health. Includes stigma and illness identity, social support, patient-provider communication, end-of-life care, and health education.

CMS X30D. Health Decision Making.

Explore the connection between evidence-based health communication practices and evidence-based health decision making. Practice making sense of complicated and ambiguous health information, and examine theoretical concepts that describe and explain how people interact with such health information.

CMS X30P. Communicating with Patients.

Analyze the communicative work done by healthcare providers. Examine the provider-patient encounter and the ecology of related communication processes.

CMS X31K. Speech Writing and Criticism.

Composition and analysis of oral messages; emphasis on creating and arranging ideas, style, delivery, critical method.

CMS X32. Argumentation and Advocacy.

Nature of argumentative controversy; variables of form, method, and ethics; analysis of argumentative rhetorical works.

CMS X32D. Digital Ethics.

Explores the ethical issues inherent in the use of digital and online media. Discusses a range of current issues and subjects through the application of important moral theories, attending to how new technologies often challenge knowledge of morality, virtue, and the good life. Analyze case studies to encourage reflection and discussion over contemporary issues in digital ethics. Subjects include the ethics of hacking, Anonymous operations, online privacy, blogging ethics, online shaming and activism, revenge pornography, online free speech, social media and virtue, as well as other contemporary topics.

CMS X32K. Theories of Persuasion.

A study of motivational factors involved in persuasive speaking to secure belief and action.

CMS X33. Case Studies in Argumentation.

Study of argumentation theories. Includes analysis of case studies taken from areas of law, public policy, popular culture, and history.

CMS X34F. Fake News.

Examine the interplay of journalism, satire, and propaganda in their current and historic forms - from comedians on late-night television to active measures in international espionage. Consider the social and political forces that draw us to this type of information, how to deal with it when we encounter it, and what its implications are for geopolitics in the twenty-first century and within our own participatory democracy.

CMS X34K. Nonverbal Communication.

Survey of the effects of space, physical appearance, movement, eye behavior, and vocal behavior on interpersonal communication.

CMS X35. Strategic Sales and Event Planning.

Theory and practice related to the preparation of large-scale sales events and conferences. Designed to develop communication skills and planning techniques. May include client research, investigation of potential venues, telephone-based information interviews, individual or group sales presentations, and event overviews.

CMS X37. Building Sales Relationships.

Explores the theoretical and practical role of communication in the development of long-term client relationships. Explores the consultative sales process, including prospecting, assessing needs, handling objections, presenting, closing, and following up with clients. Focuses on how technology can help or hinder communication.

CMS X37C. Selling in Healthcare Industries.

Examine opportunities related to professional sales and business development in the healthcare industry. Explore the theoretical and practical role of communication in the development of long-term client relationships. Investigate the consultative sales process, including prospecting, assessing needs, handling objections, presenting, closing, and following up with clients.

CMS X38. Leadership Stories.

Uses fictional and nonfictional stories, as well as examples taken from virtual reality, to explore the meaning of leadership. Designed to help students develop a conceptual, practical, and personal understanding of the meaning of leadership.

CMS X38L. Leadership and Public Memory.

Examines how public memory is created, shaped, and shared through processes and forms like commemorations, museum exhibits, historic sites, and monuments.

CMS X39K. Working Virtually.

Explore the dynamics of new work arrangements and the factors that shape communication when working in dispersed work arrangements. Examine important skills for navigating these new ways of working.

CMS X39L. Social Interaction in Virtual Environments.

Examines fundamental principles connected to the uses and effects of new technologies. Covers social networking sites, online dating, and virtual group collaboration.

CMS X40D. Expertise and Power in the Digital Commons.

Explore what it means to produce and/or possess knowledge in the digital era. Examine how the World Wide Web functions as an archive of information; how science enters public conversations in digital forums; how networked infrastructure facilitates the production of digital information; and how big data may be the future of expertise. Approach digital culture through the idea of the commons, assuming an interdisciplinary perspective, drawing insight from various literatures and methodologies.

CMS X40K. Communication and Social Change.

Analysis of how persuasion is used in mass movements: civil rights, consumerism, feminism, pacifism, religious sects.

CMS X40M. Social Media and Social Movement: Then and Now.

Explores the role media plays in documenting and shaping the successes and failures of contemporary causes. Considers how these movements use social media to their advantage and the responses from government and other institutions.

CMS X41. Digital Communications.

Uses communication and interdisciplinary perspectives to explore interactions involving technology. May include the study of impression formation, identity, surveillance, privacy, distributed teams, trust and deception, online gaming, social support, and uses and impacts of new information and communication technology.

CMS X42C. Communication and Civic Participation.
An exploration of the status of American democracy, particularly as it pertains to those born between 1960 and 1990. Subjects include the meaning of citizenship and democratic participation, and the strengths and limitations of marketing efforts targeted at getting youth involved in the democratic system.

CMS X42K. Political Communication.
A study of the role of symbols in political communication and the techniques and strategies employed by politicians; special attention is given to recent election campaigns.

CMS X44K. Lying and Deception.
Examines lying and deception as civil, strategic, and manipulative behavior. Secrets, privacy, disclosures, and confidentiality are examined in a variety of familiar contexts.

CMS X45. Media Effects and Politics.
The theoretical models and research methods used to study media effects. Emphasis on the political implications of media-effects research and on how media-effects theories can help clarify political issues. May include television violence, the political impact of the news, and the use of media for educational purposes.

CMS X45G. Communicating to Government.
Analyze confident, effective, and ethical communication in regards to policy makers, elected officials, legislative and governmental agencies. Discussion of legal and ethical considerations introduced by governmental communications, as well as strategies and materials for effective communication. Includes guest speakers, and interactive opportunities around the Texas legislature and/or local governmental bodies.

CMS X45K. Perspectives on Rhetoric.
Four different meanings of rhetoric; how these meanings contribute to the current understanding of communication studies.

CMS X45N. Political Narratives.
Examines stories and how they are told during political rituals, under campaign pressures, on the nightly news, and in the daily newspaper: visually, verbally, online, and in person.

CMS X45P. Communication and Public Opinion.
An investigation of the definition and measurement of public opinion. Explores the relationship between communication and public opinion, how changes to public opinion are affected, and the influence of perception of public opinion on personal opinion.

CMS X45V. American Voices.
Examines what is most distinctive about American speech, American film, American advertising, American politics, the American press.

CMS X46. Using Communication Technology at Work.
Examines how communication technologies affect workplace communication. Considers case studies involving the use of social networking, handheld devices, and e-mail by for-profit and nonprofit organizations.

CMS X46C. The Cutural Impact of Innovation.
Examine the fundamentals of humanistic thought for both critiquing and creating innovation.

CMS X47E. Arguing the End of the World.
Discussion of apocalyptic, millenarian, or millenialism way of thinking and how it affects religious, social, and other personal beliefs.

CMS X47K. Rhetoric of Popular Culture.
The ways that film, television, music, fashion, the Internet, and other discourses of popular culture influence public attitudes, perceptions, and social relations.

CMS X47S. Communicating with Stuff.
Examine how we use material objects and actions as a means of communication, especially objects found in popular culture.

CMS X48. Communication Research Methods.
A practical introduction to research methods, focusing on designing a study, conducting research, analyzing data, and presenting results. Studies survey design, interviews, focus groups, and experiments.

CMS X48K. Visual Media and Interaction.
The role of visual resources and symbols in social interaction and public life; the representation of interaction and human relationships in visual media (photography, advertising, fine arts, and film).

CMS X49M. Advanced Analysis of Popular Culture.
Advanced critique and analysis of rhetorical dimensions in texts of popular culture. Readings in theory and methods for understanding persuasive influence in television, film, music videos, and the Internet.

CMS X50C. Crowds, Clouds, and Community.
Explores the use of social network theory and analysis to understand the connectivity and complexity of teams, families, organizations, and communities. Consider examples of network analytic approaches to theorize, visualize, analyze, and understand, for example, criminal networks, professional service firms, government contracting, social media platforms, virtual worlds, interorganizational dynamics, post disaster recovery, and ad hoc organizational forms.

CMS X50M. Field Study in Organizational Communication.
Students acquire information through interviews and observation, devise appropriate coding schemes, and compose synoptic reports of their findings and recommendations.

CMS X51. Communication for Cooperation and Competition.
Theoretical perspectives and experiential learning on the ways people reconcile the need to be individualistic (competitive) with the need to be community members (cooperative). Individual aggression and submission; the rewards of competition and cooperation; and organizational structures that lead to cooperation and competition.

CMS X52. Organizational Leadership.
Theories, styles, and components of organizational leadership; communication behaviors of leaders in organizations. History of the study of leadership; new theories and concepts related to leaders as managers of organizational culture and change.

CMS X52D. The Dark Side of Organizational Communication.
Examine key organizational processes that often operate in the shadows through a communication-based approach. Assess how individuals and organizations respond ethically to these processes. Survey hidden organizations and the ethical response to dark collectives in society.

CMS X53C. Communication for Innovation.
Examines the critical role that communication and communicative processes play in developing innovative ideas, products, and ways of approaching problems. Analyze behavioral theories and empirical studies to understand the challenges associated with facilitating innovation in organizations and learn strategies for improving work effectiveness. Subjects include motivation, decision making, organizational culture, information sharing, and idea generation.

CMS X53S. Social Media and Organizations.
Explores the relationship between social media use and organizational communication. Subjects include how organizations use social media for communication with external stakeholders and to facilitate internal communications processes.

CMS X54. Conflict Resolution.
Systematic analysis of conflict and communication to examine some of the effects of communication on conflict and of conflict on communication. Readings, analysis of conflicts, and practice with and evaluation of communication behaviors thought to be effective in conflict talk.

CMS X55K. Intercultural Communication.
Theories of speech and language that concern interaction between persons from different cultures who speak different languages or dialects.

CMS X55S. Communicating with Animals.
Introduction to research and writing about communication among animals and between animals and their human caretakers.

CMS X55T. Communication and Thought.
Integrates the emergence of collaborative thought from human communication. Analysis of language and communicative development,

conversational pragmatics, perspective-taking, and social network analysis.

CMS X56C. Collective Action.
Examine how globalization and technology have impacted how people organize and communicate to achieve better collective outcomes about public good.

CMS X56T. Organizational Transparency.
Examine fundamental dynamics of transparency as a form of communication. Explore a range of problems related to organizational transparency and critically assess organizational transparency as an ethical practice.

CMS X57. Family Communication.
Some of the common issues that face those who live in, counsel, and conduct research with families. The development of traditional families in the United States, different family structures that make up modern society, current issues that affect families, and the impact of communication on family experiences.

CMS X58. Communication and Personal Relationships.
The nature of human interaction in various types of relationships (friends, dates, spouses, roommates), the nature of communication at different stages in a relationship, and the nature of communication at different life stages.

CMS X58C. Identity In Relationships.
Examine the influence of the unique combination of gender, ethnicity, age, sexual orientation, education, income, ability, and more as they relate to relationships with friends, families, partners, and selves.

CMS X59. Language, Culture, and Communication of Hip-Hop.
Uses hip-hop music as a model for understanding a speech community. Focuses on language innovation and the creation of new social networks, forms of communication, and cultural meaning and values.

CMS X59C. Inside the American Conversation.
A look at a handful of conversations in America, from phone calls between family members and dating couples in the 1980s, contemporary 'hybrid' face-to-face/cell-phone conversations to interviews with Donald Trump and 'The Wire'. Explores what these conversations tell us about social life and how it changes, about people's concerns, cultural difference, and the diversity of ways of using language that is a hallmark of American society.

CMS X59H. Honors Tutorial Course: Reading.
Intensive reading and research as planned by the departmental honors committee.

CMS X59T. How People Talk.
Explore how people creatively use, manipulate, and re-invent language when they talk to each other. Examine qualitative research methods, including conversation and discourse analysis, interactional sociolinguistics, ethnography of speaking, and microethnography.

CMS X60. Analyzing Social Interaction.
Introduction to concepts and research methods related to the study of how verbal and nonverbal communication is used in everyday situations. Includes collecting and analyzing sound and video data. Designed to help students develop skills in interpreting human social interactions.

CMS X60P. Expertise and Public Culture.
Introduction to the various functions that scientists and other experts serve in public discourse. Explore how scientists and experts influence public opinion, policy, and cultural attitudes. Examine how new media habits and digital networks offer platforms for experts and laypersons to communicate.

CMS X60R. Virtual Rhetoric.
Examine how the universal presence of visual imagery makes it difficult to critically evaluate the images we see. Practice evaluating visual arguments to become a more critical consumer of visual communication.

CMS X62D. Decolonizing Communication Studies.
Examine the intersections of race, ethnicity, nationality, language, gender, and other aspects of identity marginalization related to communication theories and practices. Survey theories of decolonization and how to apply those in communication studies.

CMS X62E. Environmental Communication.
Explore various environmental philosophies as they relate to communication contexts. Assess how communication plays a role in environmental issues such as journalism and news reporting, sustainability, consumerism, politics, environmental organizations, and ecotourism. Examine how environmental theories and communication contexts play out in local, national, and international debates and contexts.

CMS X63C. Communication and Sports.
Explore interpersonal, mediated, organizational, and public communication in sports. Examine foundational myths and metaphors that demonstrate the various ways in which sport is used to communicate in public life.

CMS X63P. Politics and Protest in Sports.
Examine history to understand how and why sports can be powerful for contemporary political communication and symbolism.

CMS X64K. Gender and Communication.
Focuses on how communication influences ideas about sex, gender, and identity, from interpersonal relationships to the mass media, and from legislative debates to social movements.

CMS X64M. Pre-Graduate School Mentorship.
Introduction for undergraduates to graduate study in a discipline of their choosing.

CMS X65K. Male-Female Communication.
Studies of speech patterns related to the concepts of male and female, including sexism in speaking, patterns of male and female speaking, patterns of listening to males and females, speech in courtship and family, speech and sexual discrimination in careers.

CMS X65L. Communication, Controversy, and Citizenship.
Designed to help students develop the listening, speaking, and argumentation skills used to deliberate over controversial and sensitive subjects. Deliberations focus primarily on the meaning of citizenship.

CMS X66. Rhetoric, Love, and Democracy.
Covers ideas about human symbolism and discourse; focuses on the effects of rhetorical perspectives on how people make meaning of the world.

CMS X66C. Celebrity Culture.
Examines the importance of fame and celebrity throughout the nineteenth, twentieth, and twenty-first centuries, in relation to education, entertainment, and politics.

CMS X66D. Rhetoric of Horror.
A survey of horror studies keyed specifically to rhetorical issues, or the ways in which horror literature, cinema, and television influence people by rehearsing social problems in disguise.

CMS X66F. Rhetoric of Film.
Film theory and history taught from a rhetorical perspective. Covers the film industry, technology, and the elements of narrative, image, and sound. Emphasis on theory about film and film criticism.

CMS X66M. Rhetoric and Popular Music.
Explores music and its relation to identity; how gender, race, and sexual identity are constructed with and within musical texts; meanings and importance of authenticity; and the effectiveness of music as a political tool.

CMS X66R. Religious Communication and Paranormalism.
Explores secular and religious instances of ambivalence, and its uses and effects.

CMS X66S. Science Fiction and Communication.
Examine major concepts in science fiction, with an emphasis on science fiction film adaptation (from novel to screen). Explore theories of communication implied by science fiction.

CMS X67. Topics in Communication Studies.
CMS X67.1. Applied Interpersonal Communication.
CMS X67.10. Global Communication.
Explore a broad history of global connections, global policies, and legal frameworks. Develop global communication strategies and tactics. Examine intercultural communication, cultural humility, and cultural competence.
CMS X67.2. Campaign Communication.
CMS X67.3. Communication and Thought.
Investigates the emergence of collaborative thought from human communication.
CMS X67.5. Ethnography of Live Music in Austin.
Explores music and musicians in Austin, with a focus on ethnographic research through observation, interviews, analysis, and writing.
CMS X67.6. Pragmatism and Group Dynamics.
Explores how individual beliefs and expectations determine the quality of group communication.
CMS X67C. Topics in Corporate Communication.
CMS X67C.1. Corporate Identity, Image, and Reputation.
Examine the fundamental role that communication plays in corporate identity development, image creation, and reputation management, and how those interrelated constructs relate to various other organizational processes.
CMS X67C.2. Crafting Corporate Communication Messages.
Practice crafting a variety of professional messages that are clear, concise, audience-specific, and that effectively achieve their goal.
CMS X67C.3. Disaster and Crisis Communication.
Demonstrate how communicating and using appropriate technology make the difference in how people prepare, respond, and recover from disasters as well as how organizations manage crises.
CMS X67C.4. The Art of Meetings.
Discover how to participate in, plan, execute, and follow up to virtual and in-person meetings as a leader.
CMS X67G. Topics in Global Communication.
CMS X67I. Topics in Interpersonal Communication.
CMS X67I.1. Immigration and Communication.
Explore a range of immigration subjects and analyze literature from a social ecological framework to uncover the theoretical and practical implications of research on communication and immigration.
CMS X67I.2. Risk Communication.
Analyze areas such as risk assessment, risk perception, message design, media options, and barriers to effective risk communication. Consider how access to risk information, perceptions of risk, and reactions to risk messages vary depending on the audience.
CMS X67I.3. Dark Side of Interpersonal Communication.
Examine recent and noteworthy scholarship in the social scientific literature regarding the often-stigmatized processes of interpersonal/relational communication. Distinguish aspects of communication that are typically seen as dysfunctional, problematic, and destructive; aspects of communication that appear to be negative but also serve a function or produce desirable outcomes; and aspects of communication that are poorly understood or hidden in the shadows of other scholarly work.
CMS X67P. Topics in Political Communication.
CMS X67P.1. Social Media and Politics.
Explore how ordinary citizens, politicians, and activists engage with politics on social media platforms. Trace the effects such political engagement has on both the political landscape and the platforms themselves. Analyze how communication theories around self presentation, imagined audience, affordances, and identity shape political communication on social media.
CMS X67P.2. Social Media Analysis.
Analyze content on social media platforms using computational methods. Use the Python programming language to understand how individuals, companies, political campaigns, and social movements communicate using social media to advance their goals. Combine data collection, analysis, and visualization to develop insights using social media data.
CMS X67P.3. Dark Side of Political Rhetoric.
Survey the ways in which the figure of the devil has been invoked in cultural politics, beginning with Milton's Paradise Lost (1667) and concluding with the influence of QAnon conspiracy theory in present-day electoral politics.
CMS X67S. Topics in Strategic and Risk Communication.
CMS X67S.1. AI in Strategic Contexts.
Analyze the dynamic synergy between artificial intelligence (AI) and strategic communication; learn to harness AI technologies for more effective, forward-thinking messaging and story-telling initiatives.
CMS X67S.2. Sales Leadership and Technology.
Explore the core principles of sales leadership strategies and the vital role technology plays in driving sales success.
CMS X67S.3. Communicating Brands.
Introduce, advocate for, and build personal and professional brands.
CMS X67T. Topics in Sports Communication.
Examine sports communication through a focus on a specific athlete, case, era, issue, or problem.
CMS X70K. Internship in Communication Studies.
Internships to be arranged by student and approved by instructor. Focuses on career goals of students in communication positions with public and private organizations.
CMS X71D. Difficult Conversations.
Explores the interpersonal, social, and language factors that impact difficult conversations.
CMS X71K. Practicum in Conflict Mediation.
Provides hand on training and practice in conflict intervention techniques, including various forms of mediation, facilitation and dialogue.
CMS X71M. Communication Studies Internship.
CMS X72D. The Politics of National Memory.
Explores issues of power in our nation's capital. Students study Washington, DC via visits to sites around the city.
CMS X72K. Advanced Organizational Communication.
In-depth discussion and treatment of advanced organizational communication topics, including socialization and role development, workplace attachments, organizational culture, ethics, structure, conflict, power, decision making and empowerment, technology, and various forms of external communication with relevant organizational stakeholders.
CMS X72T. Time Matters.
An exploration of twentieth and twenty-first century time management issues resulting from the development of communication technologies. Subjects include the concept of twenty-four-hour, seven-day-a-week availability; information overload; increased work hours; sleep deprivation; hurry sickness; multitasking; the human experience of time across diverse social, cultural, and historical contexts; and other time-related issues that shape, and are shaped by, communication behaviors.
CMS X73D. Advocacy and Politics.
An introduction to the issues faced when advocating for an issue, idea, or one's self. The course aims to have students grasp concepts they will see and experience during their internship in Washington, DC.
CMS X77K. Faculty-Initiated Research.
Supervised research on a project designed by a faculty member.
CMS X78K. Student-Initiated Research.
Supervised independent research on a project initiated, designed, and implemented by the student. Student secures consent of a faculty member willing to supervise the project prior to registering.
CMS X79H. Honors Tutorial Course: Special Project.
The writing of a thesis or the presentation of a creative project; final comprehensive examination.

Graduate Courses

CMS X19S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X29S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X77K. Faculty-Initiated Research.
Supervised research on a project designed by a faculty member.

CMS X80E. Conference Course in Communication Studies.
Readings in the literature of communication studies designed to expand the graduate student's opportunity for individual consultation both in research and in informational aspects of the work.

CMS X83K. Communication Theory.
Survey of philosophical and language-based approaches to communication; theory construction, research practices, scholarly writing.

CMS X84K. Topics in Communication and Ethnography.

CMS X84K.3. Microethnography of Interaction.
Introduction to the study of details of human interaction: the moment-by-moment organization of speech and embodied communication; the roles of different media of communication, such as language, gesture, and space; the construction of context; uses of the material environment; and the distribution of information in collaborative work settings.

CMS X84K.4. Communication and Ethnography.
Studies the use of language and communication in ethnographic methods, data collected, and in final reports in a broad range of approaches such as observation and participant-observation, field notes, surveys, interviews of various kinds, textual analysis, and experimental interventions.

CMS X86H. Topics in Seminar in Health Communication.
Theory and research in health communication.

CMS X86H.1. Managing Health Information.
Introduction to research and theories that examine why and how people exchange, conceal, and otherwise interact with health-related information. Explores the antecedents, processes, and outcomes of communicating about matters of health and illness, with a focus on implications for personal well-being, relational quality, and public health.

CMS X86H.2. Interdisciplinary Seminar in Health Communication.
Exploration of the interdisciplinary nature of health communication from an ecological perspective, ranging from intra-personal and interpersonal factors through the roles of populations and policies. Examination of the contributions to health communication from diverse disciplines including healthcare, public health, communication, and psychology. Explores issues related to research, practice, leadership, and partnerships.

CMS X86H.3. Communicating with Patients.
Examine communication research, theory, and skill development relevant to health provider and patient encounters of all kinds.

CMS X86K. Topics in Theories of Interpersonal Communication.

CMS X86K.1. Interpersonal Communication Theory.
Exploration of theoretical perspectives such as general systems theory; symbolic interactionism; rules theory; theories of language and nonverbal coding; theories of meaning; theories of information processing; and theories of persuasion. Theories pertinent to interpersonal, group, and mass interaction.

CMS X86K.4. Discourse Analysis.
Examines similarities and differences in the main kinds of discourse analysis and their basic assumptions and typical questions. Designed to develop skills at examining a piece of text or lecture to produce persuasive scholarly analysis.

CMS X86L. Topics in Group Communication.

CMS X86L.1. Group Communication Processes.
Study of theory and research in the dynamics of small groups, with emphasis on the interaction of message variables with other variables such as leadership, affiliation, cohesiveness, and social power.

CMS X86L.3. Communicating in Groups and Teams.
Focuses on the concepts and theories of communicative processes in task-oriented groups and work teams. Readings cover theory and research related to communication problems, dynamics, and practices in group and team settings. May also include the study of team development, decision making, and trends in group communication research.

CMS X86N. Topics in Research in Communication Studies.

CMS X86N.1. Quantitative Research Methods.
Broad coverage of social scientific techniques for collecting and analyzing communication data; includes measurement, design, and other areas. Some sections focus on organizational research.

CMS X86N.2. Qualitative Research Methods.
The use of observational and interviewing research techniques for studying human communication.

CMS X86P. Topics in Issues in Interpersonal Communication.

CMS X86P.1. Nonverbal Communication.
Current theory and research in such areas as involvement and intimacy, gender, touch, space, environment, nonverbal behavior in children, appearance, and lying. Various methods and measurement techniques for assessing eye gaze, body motion, facial actions, vocal signals, and multichannel events.

CMS X86P.10. Stress and Coping.
Exploration of how people interact with each other and with their environments during times of change and stress, including the emotions, cognitions, and behaviors that occur when people talk about upsetting or traumatic events and circumstances.

CMS X86P.11. Advocacy.

CMS X86P.12. Language, Persuasion, and Social Influence.
Examine how people employ and exploit linguistic precision, flexibility, and creativity in the service of influencing the beliefs and attitudes of others.

CMS X86P.5. Negative Interpersonal Communication.
An overview of negative features of communication in interpersonal relationships. Examines avoidance, secrets, conflict, relational transgressions, negative emotions, and aggression and abuse.

CMS X86P.6. Dark Side of Interpersonal Communication.
Provides an overview of issues related to the "dark side" of communication in interpersonal relationships. Subjects include undesired features of interpersonal relationships, seemingly productive communication patterns that are dysfunctional, as well as seemingly destructive patterns that are functional.

CMS X86P.7. Stereotyping and Prejudice in Interpersonal Communication.
Examines problems posed by stereotyping and prejudice in interpersonal communication, and the research and theory aimed at reducing their impact. Designed to provide opportunities to seek constructive ways of defining and addressing stereotyping and prejudice; emphasis on recent research in the formation, maintenance, and application of stereotypes.

CMS X86P.8. Metaphor in Communication.
Examines the conceptual structure and expressive forms of the metaphor. Includes the study of classical and contemporary treatment of metaphor in linguistics, philosophy, and rhetoric. Also includes

recent social scientific research on the use of figurative devices, such as metaphor, analogy, idiom, hyperbole, and euphemism, in strategic communication, specifically in managerial communication, political speeches, and religious discourse.

CMS X86P.9. Perspective Taking.

Examines social scientific research and theories that illuminate human ability to understand or adopt the perspective of others.

CMS X86R. Topics in Issues in Relational Communication.

CMS X86R.1. Communication in Relationships.

Theories of development and change; research methods; relationship types; gender and roles; emotion; self-disclosure; secrets; lying; compliments; conflict; complaints; persuasion; dissolution processes; rejuvenating, repairing, and maintaining relationships.

CMS X86R.2. Family Communication.

Communication and attraction, courtship, marriage, the role of children in the marital relationship, sibling relationships, the effect of spouses' occupations on the family, and dysfunctional families.

CMS X86S. Communication, Cognition, and Emotion.

The cognitive elements involved in social interaction, such as memory, comprehension, plans, decision making, and schemas.

CMS X88C. Doctoral Comprehensive Examination Preparation.

Research and reading in preparation for doctoral comprehensive examinations in communication studies.

CMS X89C. Topics in Seminar in Peace and Conflict.

A survey of the literature and research in the communication of peace and conflict.

CMS X89C.1. Conflict and Communication.

Focus on the relationships between social structures and communication as they relate to conflict. Explores research on interpersonal conflict, theory and research on intercultural/-social communication, identity, and language. Analyze how gender, race, culture, region, age, class & sexual orientation, national identities, and so on are developed & reflected in communication.

CMS X90M. Topics in Seminar in Language, Culture, and Interaction.

CMS X90M.2. Intercultural Communication.

A selective and critical overview of current approaches to intercultural communication in disciplines such as communication studies, sociology, sociolinguistics, conversation analysis, and anthropology.

CMS X90M.3. The Body in Communication.

Exploration of embodied interaction as 'intercorporeality' and provides students with a methodology for research on bodily practices of communication and social action.

CMS X90M.4. Conversation Analysis.

The foundations of an interaction-based understanding of language. Texts reflect the evolution of the conversation-analytic paradigm of interaction and language study, and students explore the core organizations that conversation analysts have investigated: turn-taking, repair, turn-construction/action-design, recipient-design, and others.

CMS X90M.5. Language.

Introduction to the evolution, structure, and cultural foundations of human language, grounded in advanced contemporary work in anthropology, communication studies, and linguistics.

CMS X90M.6. Analyzing Embodied Communication.

Exploration of embodied interaction as 'intercorporeality' and provides students with a methodology for research on bodily practices of communication and social action.

CMS X90N. Topics in Political Discourse.

CMS X90N.2. Rhetoric of Social Movements.

Philosophies, strategies, and effects of modern sociopolitical and religious movements designed to produce change.

CMS X90N.3. Campaign Communication.

An introduction to research surrounding the actors and texts of political campaigns. Covers voters, candidates, consultants, new constituencies, advertisements, debates, speeches, news coverage, party conventions, and new media environments. Focuses on how political discourse affects political life in the United States.

CMS X90N.4. Politics, Media, and Society.

Examines political life in the United States in relation to television and new media.

CMS X90N.5. Politics, Media, and the Individual.

Current research and theory in the area of media and politics with particular emphasis on individual-level effects.

CMS X90N.6. Communication and Public Opinion.

Explores questions concerning communication, the media, and public opinion. Theoretical and empirical research from sociology, political science, social psychology, and mass communication may be discussed.

CMS X90N.7. Political Language.

Explore an overview of political language, including questions such as: What makes political language "political?" Has such language changed in character over time? Do political styles differ from culture to culture? Do the mass media change how politicians talk? How are social media affecting citizens' patterns of political engagement?

CMS X90N.8. Social Media Effects.

Examine the effects of social media on society, with a particular emphasis on social media's political effects, the empirical evidence, newer methodologies, and what we know and do not know.

CMS X90P. Topics in Rhetorical Theory.

CMS X90P.1. Contemporary Rhetorical Theory.

Investigation of recent definitions, issues, and trends in rhetorical theory, with emphasis on the philosophical bases of rhetoric and the relationship of rhetoric to other disciplines.

CMS X90P.10. History of Communicative Inquiry.

Explore the conceptual and disciplinary history of "the object" of a given academic field and the various ways in which subjects have conceived of the object, from the "reason" of philosophers to what counts as knowledge in the humanities and social sciences.

CMS X90P.11. Decolonizing Communication.

Explore advanced readings in rhetorical theories on decoloniality, postcolonial theory, globalization, modernity, race, ethnicity, gender, class, and sexuality.

CMS X90P.4. Burke and Symbolic Form.

Covers a selection of books by rhetorical theorist Kenneth Burke, as well as books and articles by recent scholars that use his ideas.

CMS X90P.5. Foundations of Rhetorical Theory.

Examines historical writings about rhetoric in the Western tradition, up through the Enlightenment. Covers various important figures in the history of rhetoric, including Plato, the sophists, Aristotle, Cicero, Quintilian, Augustine, Christine de Pizan, Vico, and Ramus.

CMS X90P.6. Rhetoric of Style.

A consideration of social style, including dress, entertainment, vehicles, and living arrangements as a system of communication. Special emphasis on the expressive and practical functions of such symbolic displays.

CMS X90P.7. Rhetoric and Ideology.

Explores Marxist contributions to rhetorical theory and criticism, with emphasis on ideology and hegemony.

CMS X90P.8. Rhetoric of Publics and Counterpublics.

Investigation of the role of rhetoric in public life in capitalism in history and today. Covers the roles of rhetoric and rhetorical criticism in the production and maintenance of publics, and discusses the formation and activities of social movements.

CMS X90P.9. Narrative, Myth, and Rhetoric.

Engages two important and interrelated areas of study in rhetoric: narrative and myth. Explores the psychological foundations of myths, how mythic criticism might proceed, as well as critiques of mythic criticism from a variety of disciplines.

CMS X90R. Topics in Seminar in Rhetorical Criticism.

CMS X90R.1. Basic Rhetorical Criticism.

Elementary methods of analyzing public discourse, including the ways and the reasons that rhetorical analysis is attempted.

CMS X90R.10. Theories of Subjectivity.

Survey of contemporary theory with attention to subjectivity. Authors may include Alain Badiou, Judith Butler, Jodi Dean, Gilles Deleuze, Rene Descartes, Michel Foucault, Immanuel Levinas, Karl Marx, Friedrich Nietzsche, and Slavoj Zizek.

CMS X90R.2. Advanced Rhetorical Criticism.

Survey of six popular schools of thought, including dramatism, Marxism, and structuralism, and their implications for textual analysis.

CMS X90R.3. Feminist Theory and Rhetorical Criticism.

In-depth consideration of the premises underlying American and European feminism and the effects of such premises on critical experience. Special attention to the ways contemporary texts become gendered.

CMS X90R.4. Rhetoric and Popular Culture.

Survey of the ways film, television, popular literature, and consumer culture influence our attitudes and values. Consideration of a wide variety of contemporary theorists as well as experience in analyzing contemporary textual artifacts.

CMS X90R.6. The Object.

Investigation of conceptual and disciplinary anxieties about the object of speech in relation to the history of communication studies, and the deliberate jettisoning of the object in relationship to the history of cultural studies.

CMS X90R.7. The Subject.

Survey of contemporary theory with attention to subjectivity. Authors may include Alain Badiou, Judith Butler, Jodi Dean, Gilles Deleuze, Rene Descartes, Michel Foucault, Immanuel Levinas, Karl Marx, Friedrich Nietzsche, and Slavoj Zizek.

CMS X90R.8. Idiom of Haunting.

Examines haunting as a central experience of modern subjectivity rooted in the ontotheological concept of communication. Explores, through the idiom of haunting and ghosts, how the arrival of postmodernity (particularly in respect to mass media technology) has altered how we think about communication and subjectivity in both popular and scholarly ways.

CMS X90R.9. Rhetoric and Psychoanalysis.

A survey of the various schools of psychoanalysis, and the ways scholars have related psychoanalysis to the object of rhetoric.

CMS X90S. Topics in Seminar in Organizational Communication.

CMS X90S.1. Narrative Communication in Organizations.

Current theories of narrative and their applications to organizations. Topics include gossip, day-to-day news, and dramatic enactments of organizational communication.

CMS X90S.10. Survey of Organizational Communication.

Explores contemporary issues and processes in organizational communication. Graduate students summarize research and conduct original research in an organization.

CMS X90S.11. Measurement Workshop: Scale Development and Instrument Design.

Provides in-depth instruction on issues related to scale development and questionnaire design, ranging from establishing validity to increasing response rate.

CMS X90S.12. Engaged Communication Scholarship.

Explore the theories and methods helpful during engaged research projects. Includes practical theory (e.g., action research, communication design, grounded practical theory) and research methods common to consulting and engaged scholarship (e.g., ethnographic interviewing, survey design, organizational shadowing, and natural experiments).

CMS X90S.13. Disaster Communication and the Future.

Examine foundational interdisciplinary theories and meaningful community involvement to reveal the pivotal role communication, organizing, and technologies play in disasters, crises, and emergencies.

CMS X90S.2. Power and Politics in Organizational Communication.

The communication implications of sociological and managerial approaches to the study of power and politics, with emphasis on ideas about structure, culture, ideology, information, conformity, voice, and dissent.

CMS X90S.6. Social Network Analysis.

Focus on quantitatively and qualitatively mapping and measuring the connections, relationships, and flows between entities, such as individuals, teams, groups, organizations, and other information sources.

CMS X90S.7. On Time.

Introduction to the field of chronemics, the study of time as it is bound with communication, via a broad survey of literature across several disciplines. A range of contemporary communication challenges, as well as opportunities for positive communication and organizational scholarship will be interrogated.

CMS X90S.8. Communicating Knowledge.

A broad range of theoretical approaches and empirical research related to the communication of knowledge, including the study of both organizations and processes of organizing among workers. Subjects include: communities of practice, boundary objects, innovation, knowledge management, transactive memory, expertise, and ICT use.

CMS X90S.9. Health, Safety, and Technology in Organizations.

Examination of the theoretical and empirical research that bridges between organizational, health, and emergency communication with a focus on the role technology plays in these contexts.

CMS X90T. Topics in Organizational Communication Theory.

CMS X90T.2. Organizational Communication: Macro.

An introduction to selected macro-level or systemic variables in organizations, such as structure, technology, and environments, and to the ways these variables relate to organizational communication processes.

CMS X90T.3. Postmodern Organizational Communication Theory.

An attempt to integrate the concern in cultural studies for structure with the stream of organizational theory that focuses on chaos. Readings include Clifford and Markus, Clifford, Deleuze and Guattari, March and Olsen, Weick.

CMS X90T.4. Foundations of Organizational Communication Theory.

Introduction to the major approaches of understanding organizational communication. Examines the theoretical background and analytic skills to navigate tensions among varied approaches at micro-and-macro-levels; explores contemporary scholarship in organizational communication research in a historical context.

CMS X90T.5. Careers: Theory and Practice.

Examination of the current interdisciplinary definitions, theories, and practices regarding careers and work in contemporary society. Addresses subjects such as employability and/or entrepreneurship, the effect of contemporary technologies, internal/subjective v external/objective success, and work/life balance.

CMS X90U. Consultation in Organizations.

A review of social science literature and its application to problem solving and organizational development in field settings.

CMS X92P. Topics in Seminar in Communication Technology.

CMS X92P.3. Communication in Virtual Groups.

Examines how people think, feel, and communicate in geographically distributed groups using new technologies. Covers impression formation, impression management, anonymity and social identity, group norms,

liking, conformity, trust, conflict, building common ground, and social influence processes.

CMS X92P.4. Communication Technology Use in Organizations.
Examines the theoretical and empirical work on the communicative functions of technology in the workplace.

CMS X92P.5. Computer-Mediated Communication Models and Methods.
Examines the theoretical and methodological assumptions of computer-mediated communication research. Topics include online impression formation and impression management, online romantic relationships, digital deception, online identity shift effects, and the effects of perceived anonymity when using new communication technologies.

CMS X92P.6. Grant Writing in Communication.
Discussion of the grant writing process, including reviewing actual grant proposals for analysis and critique.

CMS X95C. Topics in Strategic Communication.
Analyze strategic communication issues.

CMS X95C.1. Persuasion, Advocacy, and Social Influence.
Examine research and theory on interpersonal influence--what it takes to successfully persuade others in personal and organizational environments.

CMS X95C.10. Crisis Communication.
Examine frameworks through which crises may be addressed by leaders and members of groups, organizations, and communities by using past crises as case studies.

CMS X95C.11. Conflict and Negotiation.
Explore conflict, negotiation, and mediation with respect to interpersonal, group, organizational, and community contexts, with a focus on political conflict, its systemic causes, and possible solutions.

CMS X95C.12. Leadership in the Social World.
Examine how to lead in the social media age. Explore creating compelling content, developing a distribution strategy, using social media to guide decision making, driving social media use, and enabling a supportive infrastructure.

CMS X95C.13. Media, Messaging, and Perceptions.
Explore how communication and media contribute to representations and assumptions about social groups. Analyze messaging, power dynamics, and identity to develop more accurate and responsible communication practices.

CMS X95C.2. The Art and Science of Social Media.
Examine how to effectively engage with social media as both a consumer and an individual producer or creator. Explore personal brand identity, theories of human behavior and media consumption, and the rapidly changing media environment.

CMS X95C.3. Communicating for Careers.
Examine the current theories and practices regarding careers in communication. Create content for a portfolio in areas of interest as a resource for future employment.

CMS X95C.4. Team Building.
Explore how to foster effective teams through communication interventions.

CMS X95C.5. Resisting Stereotyping and Prejudice.
Examine problems posed by stereotyping and prejudice in communication and evidence-based research aimed at reducing their impact. Explore opportunities to seek constructive ways of identifying, defining, and addressing stereotyping and prejudice while engaging in communities.

CMS X95C.6. Personal Identity Branding.
Examine the skills and content involved in positioning individuals as experts or leaders in their field, increasing their credibility, distinguishing them from others, and expanding their circle of influence.

CMS X95C.7. Social Media Strategies.
Examine content creation, management of followers, and critical consumption of messages on social networks.

CMS X95C.8. Managing Change through Communication.
Explore strategies for creating, controlling, and adapting to change in organizations and groups. Examine how to deal with transformations in an organization's or group's goals, processes, or members.

CMS X95C.9. Communication and Leadership.
Examine leadership styles, predictors of effective leadership, and outcomes related to leadership in different contexts. Explore how to generate clear, persuasive messages and connect with audiences.

CMS X95M. Capstone in Strategic Communication.
Pursue the research interests and skills developed in other communication classes in-depth.

CMS X95S. Topics in Sport Communication.
Analyze issues in sports communication.

CMS X95S.1. Sports Audio and Video Storytelling.
Examine the skills needed to produce audio and video packages used on radio, long-form podcasting, and broadcast and digital sports journalism. Explore techniques used to tell a story with an audio or video narrative.

CMS X95S.2. Political and Crisis Communication in Sports Media.
Examine frameworks through which crises may be addressed by athletes, coaches, teams, and leagues by using past crises as case studies. Explore the role of athlete activism.

CMS X95S.3. Negotiation in Sports.
Explore negotiating philosophies, strategies, and tactics while developing negotiating skills during role-playing negotiations.

CMS X98. Thesis.

CMS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

CMS X98T. Supervised Teaching in Communication Studies.
Teaching communication studies under supervision.

CMS X99W. Dissertation.

Professional Courses

CMS X19S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X29S. Topics in Communication Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CMS X77K. Faculty-Initiated Research.
Supervised research on a project designed by a faculty member.

COE - Computational Engineering

Computational Engineering: COE

Lower-Division Courses

COE X01. Introduction to Computer Programming.
Basic computer programming concepts applied to engineering computations. Development of structured solutions to engineering and mathematical problems and an understanding of coding practices. Programming in MATLAB and C++.

COE X11K. Engineering Computation.
Fundamental numerical methods and software tools used in engineering computation. Subjects include linear systems of equations, matrix computations, nonlinear equations, least squares approximations,

interpolation, numerical integration and numerical solution of differential equations.

COE X19. Topics in Computational Engineering.

COE X19S. Topics in Computational Engineering.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Aerospace Engineering and Engineering Mechanics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

COE X21K. Computational Methods for Structural Analysis.

Matrix structural analysis of systems that can be idealized as being comprised of axial bar elements, beam elements, and frame elements. Notion of element-by-element assembly of the governing system of algebraic equations. A systematic introduction to (and use of) the fundamental idea of a weak statement of a boundary value problem, particularly as concerns the numerical treatment/approximation of such problems. Interpretation of the weak-statement in terms of the principle of virtual work. Galerkin's method as applied to structural analysis. An introduction to the classical Galerkin finite element method with application to structures and plane elasticity. Energy principles and their utility in solving problems in solid mechanics, as well as their connection to the finite element method.

COE X22. Scientific Computation.

Explores the basic tools needed for developing scientific computing software. These include advanced programming languages (e.g. C, C++, python), object oriented programming and data structures. Subjects may include abstract data types; creation, initialization, and destruction of objects; class hierarchies; polymorphism, inheritance and dynamic binding; generic programming using templates, linked lists, queues, stacks, trees and algorithms such as searching, sorting, and hashing.

COE X29S. Topics in Computational Engineering.

Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Aerospace Engineering and Engineering Mechanics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

COE X32. Software Engineering and Design.

Covers methods and tools for planning, designing, implementing, validating and maintaining large software systems. May include project work to build a software system as a team, using appropriate software engineering tools and techniques.

COE X47. Introduction to Computational Fluid Dynamics.

Development and implementation of finite-difference schemes for numerical solution of subsonic, transonic, and supersonic flows. Emphasis on convection and diffusion equations of fluid dynamics. Evaluation of accuracy, stability, and efficiency.

COE X52. Topics in Advanced Scientific Computations.

Topics in advanced numerical methods and scientific computation. Subject matter may vary.

COE X62. Engineering Probability and Statistics.

Introduction to mathematical representations and computations to qualitatively and quantitatively describe data, compare data, ascribe distributions to apparent patterns and structure in data via inference methods. Describe and model discrete and continuous random variables.

COE X71. Applied Mathematics I.

Subjects include real analysis of functions of one variable, linear operator theory, and ordinary differential equations.

COE X72. Applied Mathematics II.

Subjects include elements of complex analysis, Fourier and Laplace transforms, partial differential equations, perturbation methods, analysis of functions of several variables.

COE X74. Senior Design Project.

Design projects from multiple engineering disciplines done with teams of students, using computational methods for analysis and experimental data for validation; ethics of design for safety and reliability; emphasis on written and oral reporting of engineering projects.

COE X74D. Computational Systems Senior Design I.

Introduction to computational systems engineering: the systems engineering process, requirements, design fundamentals, trade studies, cost and risk analyses, integration, technical reviews, case studies, and ethics. Produce written reports and oral presentations.

COE X74E. Computational Systems Senior Design II.

Produce design projects from multiple engineering disciplines done in teams, using computational methods for analysis and experimental data for validation; ethics of design for safety and reliability; and with emphasis on written and oral reporting of engineering projects.

COE X79H. Undergraduate Honors Thesis.

Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. Entails an oral presentation and a written thesis.

COE X79K. Research in Computational Engineering.

Directed study or research in a selected area of computational engineering.

COE X79L. Topics in Computational Engineering.

Current topics in computational engineering.

COE X79L.1. Introduction to Machine Learning and Data Sciences.

Focus on algorithms, mathematics, implementations (on Scikit-learn), and real-life applications of machine learning and data sciences including machine learning algorithms such as supervised learnings (linear models, support vector machines, kernel methods, tree-based algorithms), unsupervised learnings (Density estimation, clustering, dimensionality reduction, PCA), and deep neural networks. Explore the foundations of machine learning including optimization, probability, advanced linear algebra, statistics, and methods to evaluate machine learning methods.

COE X79L.2. Simulation-based Aerodynamic Design and Analysis.

COE X79L.3. Computational Methods.

Examine basics of vectors and matrices, linear equations, regression and classification, similarity measures, the Discrete Fourier Transform (DFT), linear filters, and power spectrum estimates. Focus on applying matrix methods to practical applications, such as tomography, image processing, data fitting, time series prediction, optimal control, finance, and machine learning. Utilize MATLAB or Python to do computations with vectors and matrices and run numerical experiments with real-world data sets.

COE X79L.4. Fundamentals and Geophysical Applications of Imaging Radar Systems.

Explore how radar images are formed and manipulated, as well as applications of the systems to problems such as measurement of the Earth crustal deformation. Focus on radar as a signal processing problem, radar image formation and radar interferometry. Discuss system design, scattering from natural surfaces, range and azimuth processing algorithms, and processor design.

COE X79L.5. Biomechanics of Tissues, Scaffolds, and Cells.

COE X79L.6. Software Design for Responsible Intelligent Systems.

Discuss the design, implementation, operation, and assurance of intelligent software systems based on data intensive computing

and machine learning techniques. Utilize real-world datasets from engineering disciplines.

COE X79L.7. Parallel Computing for Science and Engineering.

Explore fundamentals of parallel programming for scientific and engineering applications. Examine the study of general parallel computing principles, including asymptotics; current computer architectures and how parallelism manifests itself in them.

Graduate Courses

Professional Courses

COM - Communication

Communication: COM

Lower-Division Courses

COM X01C. Freshman Seminar.

Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors.

COM X01E. Introduction to Communication Foundations.

Introduction to the various communication fields and their key concepts and axioms. Includes multicultural communication, global communication, media literacy, and social media.

COM X01L. Introduction to Communication and Leadership.

Introduces the study of leadership with an emphasis on communication dimensions and interdisciplinary understanding of social problems. Serves as a foundation for subsequent coursework in the areas of communication and leadership.

COM X02. Introduction to Health Communication.

Covers contemporary issues in health communication theory and practice with an emphasis on interdisciplinary perspectives.

COM X02E. Interdisciplinary Communication Foundations.

Explore in greater depth the concepts that connect and unite diverse areas of communication theory and practice.

COM X03. Introduction to Contemporary Media Literacy.

Offers an introduction to media literacy, which enables us to create and critique contemporary media, and explores the expanding nature of literacy in a digital world with particular focus on its role in social and political contexts.

COM X04. Global Communication.

Introduces the subject of global media and communication as significant industries, texts, and technologies that contribute to our cultural identities, social worlds, political practices, and economic consequences.

COM X05. Beyond the Bridge.

Provides an overview of the concepts involved in career decision-making and the career planning process.

COM X06. Introduction to Communication Research Methods.

An introduction to quantitative and qualitative designs, sampling, measurement, data collection, and analytic procedures in communication research.

COM X07. Overview of Social Justice and Media.

An introduction to the communication of social justice, especially through the lens of nonfictional and fictional media.

COM X07H. Life of the Mind: Honors.

A guided experience in critical thinking and discussion based on consideration of cross-disciplinary modes of inquiry to probe big questions about knowledge, meaning, and communication throughout history.

COM X08. Creative Communication of Scientific Research.

Learn to communicate about science, technology, and medicine to broad audiences in order to increase understanding of the impact these fields have on human lives.

COM X08H. Life of Community: Honors.

Considers the social responsibilities of intellectual leadership and the role of communication in a world characterized by political divisions, varieties of inequality, and global challenges to health and sustainability.

COM X10. Topics in Texas Sports and Media.

Introduction to various contemporary and historical issues, emphasizing interdisciplinary perspectives and critical discourse.

COM X10.1. Soccer: The Culture and Politics of the World Cup.

As the world's most popular sports event prepares to dominate television screens, social media timelines, and town squares around the globe, examine the cultural footprint of the quadrennial gathering and its impact on the sporting world and society as a whole. Review the cultural and political history of the World Cup and will follow the tournament toward its conclusion.

COM X10H. Honors Pathway.

Complete program criterion, including capstone or thesis information session attendance, required form submissions, and other criteria as assigned.

COM X12. First-year Seminar.

Introduction to campus an college resources for first-year students. Supports the Moody foundations courses.

COM X13. Success Scholars Seminar.

Introduction to Moody resources and exploration of skills such as managing finances, navigating the scholarship application and preparing for a career. Build community among Moody Success Scholars.

COM X14. Special Topics in Communication.

Contemporary issues and practices in communication.

COM X15. Topics in Leadership and Communication.

Contemporary issues, practices, and skills related to leadership and communication.

COM X16. Photographic Communication.

Introduction to photographic technique and recent trends, evaluation, visual design, and use of images in the media. Students must provide their own digital 35-mm format camera.

COM X17. Special Topics in Communication.

Contemporary issues and practices in communication.

COM X18. Special Topics in Communication.

Contemporary issues and practices in communication.

COM X18C. Topics in Forum Seminar Series.

Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse.

COM X19. Topics in International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

COM X19S. Topics in Communication.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

COM X29S. Topics in Communication.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

COM X15. Topics in Leadership and Communication.
Contemporary issues, practices, and skills related to leadership and communication.

COM X19S. Topics in Communication.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

COM X20. Advanced Topics in Texas Sports and Media.
Critical assessment of various contemporary and historical issues, emphasizing interdisciplinary perspectives.

COM X20L. Seminar on Communication and Leadership.
Builds on the foundation introduced in Communication 301L, advancing student work in theories, processes, and practices of leadership and communication.

COM X21. Communicating Social Justice Capstone.
Produce content incorporating practical and theoretical understandings of media's role in promoting and/or obstructing social justice.

COM X23. Topics in Communication Internship.
Practical work experience, arranged by the student and approved by instructor.

COM X23.1. Sports Media Internship.

COM X23.2. Social Change Internship.

COM X23.3. Global Experience Internship.

COM X23.4. Science Communication Internship.

COM X24. Topics and Skills in Communication.
Contemporary issues, practices, and skills related to communication and the entertainment industries, including studies in the business of entertainment, the creative process, and contemporary Hollywood cinema.

COM X24.1. Semester in Los Angeles: How Hollywood Works.
Explores the commercial challenges that face producers and network and studio executives, and addresses the continual struggle between creativity and the bottom line. Taught in Los Angeles, California.

COM X24.2. Semester in Los Angeles: Development Process of Film and Television.
Examines the development process in both film and television; preparing pitches, coverage, and development notes; identifying strengths and weaknesses of literary material typical of that submitted to studios, networks, and production companies. Taught in Los Angeles, California.

COM X24.3. Semester in Los Angeles: Inside the Music Industry.
Examine how the music industry really works, how it relates to other divisions of the entertainment industry, and the effects that changing technologies have on it.

COM X24.4. Semester in Los Angeles: New Media and Emerging Entertainment.
Explores burgeoning areas of digital entertainment including broadband, video-on-demand, interactive television, mobile entertainment, and interactive digital gaming. Taught in Los Angeles, California.

COM X24.5. Careers in Entertainment-Los Angeles.
Explores specific career interests with a focus on skills, experience, training, and contacts that are required in Los Angeles. Taught in Los Angeles, California.

COM X24C. Fundamentals of Business Communication.
Explore strategic business communications skills, including effective oral, written, and digital communication, across diverse audiences, presentations, and document types. Examine audience analysis, basic communication theory, interpersonal communication, and teamwork.

COM X24H. Introduction to Business Communication: Honors.
Explore strategic business communications skills, including effective oral, written, and digital communication, across diverse audiences, presentations, and document types. Examine audience analysis, basic communication theory, interpersonal communication, and teamwork.

COM X24M. Introduction to Business Communication.
Explore strategic business communications skills, including effective oral, written, and digital communication, across diverse audiences, presentations, and document types. Examine audience analysis, basic communication theory, interpersonal communication, and teamwork.

COM X25. Topics in Leadership and Communication.
Contemporary issues, practices, and skills related to leadership and communication.

COM X25S. Topics in Sports Media.
Special topics in the role and convergence of sports and the media.

COM X25S.1. Sports, Media, and the Integration of American Society.
Role and convergence of sports, entertainment, and the media in American society and culture from Reconstruction through the present, including the role of institutions in these categories and their relationship to the integration of American society.

COM X26. Independent Study.
Pursue special supervised individual research studies.

COM X27. Independent Study in Social Justice.
Pursue special supervised individual research studies in social justice.

COM X29. Topics in International Learning Seminars.
Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

COM X29S. Topics in Communication.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

COM X30. Research in Texas Sports and Media.
Supervised research with a faculty member; research may consist of an individual project or assisting a faculty research project.

COM X30H. Honors Capstone.
Independent project agreed upon by the student and instructor, includes a variety of approaches in a variety of media, from creative work, to campaign planning and implementation, research papers, long-form journalism, community engagement, and service learning initiatives.

COM X31. Health Communication: Theory, Practice, and Innovation.
Explore contemporary issues in health communication theory and practice with an emphasis on interdisciplinary perspectives.

COM X33T. Communication and Engineering Careers.
Study foundational communication skills associated with a successful engineering career, aiding in preparation for career fairs and interviews, communicating with non-technical audiences, diversity and inclusion, and teamwork.

COM X34. Special Topics in Communication.
Contemporary issues and practices in communication.

COM X35. Special Topics in Communication.
Contemporary issues and practices in communication.

COM X36. Special Topics in Communication.
Contemporary issues and practices in communication.

COM X40. Leadership and Urban Engagement.
Explore leadership skills and goals in the urban context. Read and discuss leadership challenges that arise when stakeholders come

together to plan, make decisions, and take action in organizational and community settings.

COM X40H. Honors Reflection.
Reflect on the honors experience.

COM X50. Communication Internship.
Internships to be arranged by student and approved by instructor.

COM X50L. Semester in Los Angeles Internship.
Practical work experience in the entertainment industry in Los Angeles. Students must make their own arrangements to secure relevant internships.

COM X51L. Internship in Communication and Leadership.
Practical work experience related to the practice of ethical leadership and communication with a non-profit community, or philanthropic organization.

COM X60H. Independent Study: Honors.
Pursue special supervised individual research studies.

COM X61. Advanced Communication Research Design.
Advanced studies in quantitative and qualitative designs, sampling, measurement, data collection, and analytic procedures in communication research.

COM X70. Advanced Topics in Communication.

COM X70H. Topics in Advanced Communication Studies: Honors.
Special topics for students in the Moody College of Communication Honors Program.

COM X70L. Capstone Course in Communication and Leadership.
Engagement in experiential learning. Development and presentation of ideas and plans for addressing a leadership challenge given by a partner organization.

COM X79. Advanced Communication Internship.
Practical work experience related to the student's area of interest in the communication field.

COM X79C. Undergraduate Thesis.
Write and research two consecutive semesters under the supervision of a College of Communication faculty member; subjects are selected by the student with approval from the faculty member.

COM X79H. Honors Thesis.
Write and research two consecutive semesters under the supervision of a College of Communication faculty member; subjects are selected jointly by the student and the faculty member with approval by the director of the Honors Program.

Graduate Courses

COM X15. Topics in Leadership and Communication.
Contemporary issues, practices, and skills related to leadership and communication.

COM X19S. Topics in Communication.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

COM X29S. Topics in Communication.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

COM X81. Topics in Seminar in Communication.
Communication in a pluralistic society; nature of theory development; state of communication theory; conceptual models; sources of communication theory: semantic, linguistic, perceptual, sociological; information theory.

COM X85. Topics and Skills in Communication.
Contemporary issues, practices, and skills related to communication.

COM X88C. Science Communications Seminar.
Professional development supplemental to primary studies. Designed to develop skills in the effective communication of scientific concepts.

COM X88D. Science Communications Practicum.
Professional development supplemental to primary studies. May be taking concurrently with the Science Communication Seminar. Opportunities to focus on skill development while receiving constructive assessment and evaluation.

COM X98T. Supervised Teaching in Communication.

Professional Courses

COM X15. Topics in Leadership and Communication.
Contemporary issues, practices, and skills related to leadership and communication.

COM X19S. Topics in Communication.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Communication Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

COM X29S. Topics in Communication.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the appropriate College of Communication department. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CRP - Community and Regional Planning

Community and Regional Planning: CRP

Lower-Division Courses

CRP X01Q. Topics in Community and Regional Planning.

CRP X19S. Topics in Community and Regional Planning.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Architecture. University credit is awarded for work in an

exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CRP X20Q. Topics in Community and Regional Planning.

CRP X29S. Topics in Community and Regional Planning.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CRP X69K. Principles of Physical Planning.

Introductory course in the physical dimension of urban planning.

Graduate Courses

CRP X80F. Topics in Foundations of Planning.

Conceptional foundations of community and regional planning.

CRP X80F.1. Planning History, Theory, and Ethics.

CRP X80F.2. Foundations of Planning Law.

CRP X80F.3. Public Economics and Finance.

CRP X80Q. Topics in Community and Regional Planning.

CRP X80W. Topics in Disaster Recovery.

CRP X81M. Topics in Foundational Methods in Planning.

CRP X81M.2. Qualitative and Participatory Methods.

CRP X81Q. Quantitative Methods.

CRP X82C. Topics in Physical Planning and Design.

Subjects may include place-making, landscape and urban design, and physical planning and design at the national, regional, or local level.

CRP X82C.1. Urban Design Practice.

CRP X82C.10. Principles of Physical Planning.

CRP X82C.11. The Future: Views in Planning.

CRP X82C.12. Geodesign.

CRP X82C.2. Design for Planners I.

CRP X82C.3. Design for Planners II.

CRP X82C.4. Urban Land Institute Workshop.

CRP X82C.5. Garden City to New Community.

CRP X82C.6. Urban Landscapes and Place-Making.

CRP X82C.7. Spatial Analysis and Design.

CRP X82C.9. Social Life of Public Places.

CRP X83. Topics in Environment and Natural Resources.

Seminars and workshops on subjects including environmental and ecological analysis and planning topics. Workshops are based on active research or cooperation with public or private clients.

CRP X83.1. Techniques in Environmental Analysis.

CRP X83.12. Environmental Law and Public Health.

CRP X83.13. Land Use and Environmental Dispute Resolution.

CRP X83.14. Bioregional Planning.

CRP X83.15. Brownfields.

CRP X83.16. Green and Gray Infrastructure.

CRP X83.2. Coastal Zone Planning.

CRP X83.3. Environmental Impact Assessment.

CRP X83.4. Disasters and Resilience: Planning and Response.

CRP X83.6. Urban Environmental Analysis.

CRP X83.7. Introduction to Urban Ecology.

CRP X84. Topics in Transportation.

Neighborhood, city, and regional transportation policy and practice.

CRP X84.1. Urban Transportation Planning.

CRP X84.10. Bicycle and Pedestrian Transit Planning.

CRP X84.11. Megaregional Planning.

CRP X84.12. Transportation Equity Analysis.

CRP X84.13. Women and Transportation.

CRP X84.3. Planning for Accessibility.

CRP X84.4. Land Use and Transportation Planning.

CRP X84.5. International Transportation Issues.

CRP X84.6. Metropolitan Transportation Studies with Geographic Information Systems.

CRP X84.7. Transit-Oriented Development.

CRP X84.9. Transportation Planning and Policy.

CRP X85C. Topics in Economic and Community Development.

Seminars and workshops on subjects including theory and analysis of social and economic sustainability of communities and regions and community led responses and initiatives.

CRP X85C.1. Urban and Regional Theory.

CRP X85C.10. Right to the City.

CRP X85C.11. City and Regional Planning in Texas.

CRP X85C.12. Building a Sustainable Region.

CRP X85C.15. Migratory Urbanism.

CRP X85C.2. Urban Economic Development Policy.

CRP X85C.3. Sustainable Urban Economic Development Planning.

CRP X85C.4. Community Development.

CRP X85C.5. Development and Planning in Latin America.

CRP X85C.6. International Sustainable Social Development.

CRP X85C.7. Social, Spatial, and Environmental Justice.

CRP X85C.8. Built Environment and Public Health.

CRP X85C.9. Sustainable Cities.

CRP X85D. Planning Studio.

An integrative and comprehensive planning studio project course, involving application of theory, research, fieldwork, and oral, graphic, and written communication.

CRP X86. Topics in Applied Planning Techniques.

Quantitative and qualitative methods of planning analysis, spatial analysis and mapping, and visual communication techniques.

CRP X86.11. Geographic Information Systems in Planning.

CRP X86.12. Financing Real Estate Projects: Non-Profit and For-Profit.

CRP X86.13. Art of Community Engagement.

CRP X86.14. Smart City.

CRP X86.2. Applied Methods.

CRP X86.4. Qualitative Research Methods.

CRP X86.5. Urban Geographic Information Systems.

CRP X86.8. Research Design.

CRP X86.9. Sustainable Land Use Planning.

CRP X86K. Introduction to Visual Communications and Geographic Information Systems for Planners.

CRP X87C. Topics in Infrastructure Planning.

Policy and techniques for providing soft and hard urban infrastructure; infrastructure planning and analysis.

CRP X87C.1. Infrastructure Planning and Development.

CRP X87C.2. Water Resources Planning.

CRP X87C.3. Urban Parks and Open Space Planning.

CRP X87C.5. Urban Agricultural Systems.

CRP X87C.6. Resource Management and Recycling.

CRP X87C.7. Race and the Built Environment.

CRP X88. Topics in Housing.

Planning and housing policies and programs related to production and access to housing; community strategies for meeting housing needs.

CRP X88.1. Housing Demand and Production.
CRP X88.2. Housing and Culture.
CRP X88.3. Affordable Housing Planning and Policy.
CRP X88.4. Affordable Housing Development and Design.
CRP X88.5. Housing Practice and Public Policy in Latin America.
CRP X89C. Topics in Land Use and Land Development.
Analysis of land use patterns, planning principles, and strategies for achieving sustainability goals, and private land development principles and practices.
CRP X89C.1. Planning for Land Development.
CRP X89C.2. Research in Land Development.
CRP X89C.3. Landscape and Culture.
CRP X89C.4. Images of the City.
CRP X90. Topics in Conference Course in Community and Regional Planning.
Readings and case studies in current topical issues in planning and planning education.
CRP X90.1. Readings in International Planning.
CRP X91D. Topics in Doctoral Seminar.
Advanced theory and research methodology.
CRP X91D.1. Colloquium on Planning Issues.
CRP X91D.2. Planning Theory Seminar.
CRP X91D.3. Research Methodology Seminar.
CRP X92C. Topics in Historic Preservation.
Includes topics in architectural history, with a focus on the twentieth century and Modernism; architectural conservation; preservation planning and cultural resource management; and design.
CRP X92C.1. History of American City Building.
CRP X92C.2. Preservation History and Theory.
CRP X92C.3. National Registry of Historic Places Documentation.
CRP X92C.4. Research Seminar in Sustainable Preservation.
CRP X92C.5. Historic Preservation: Planning and Practice.
CRP X92C.6. Historic Preservation: Preservation Law.
CRP X95C. Planning Studio.
An integrative and comprehensive planning studio project course, involving application of theory, research, fieldwork, and oral, graphic, and written communication.
CRP X95D. Planning Studio.
Continuation of Community and Regional Planning 395C.
CRP X96. Independent Research in Community and Regional Planning.
CRP X97. Planning Internship.
Includes placement with a public or private planning agency, faculty supervision, and presentation of report.
CRP X98. Thesis.
CRP X98R. Master's Professional Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
CRP X99W. Dissertation.

Professional Courses

CRW - Creative Writing

Creative Writing: CRW

Lower-Division Courses

CRW X15D. Playwriting I.
The study and practice of writing plays.
CRW X15F. Introducton to Writing Fiction.
Intended for students with minimal prior experience in creative writing.
CRW X15P. Introduction to Writing Poetry.
Intended for students with minimal prior experience in creative writing.
CRW X19S. Topics in Creative Writing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CRW X25. Topics in Creative Writing.
Detailed study and practice of the techniques of biography, creative nonfiction, or other special topics of creative writing; includes reading and analysis of contemporary models.
CRW X25.1. Writing Border Narratives.
Examines the United States and Mexico border through the use of the personal essay in its various forms. Students write personal essays that focus on their relationships to the border.
CRW X25C. Writing Climate Fiction.
Study and practice the techniques of writing climate fiction. Read and analyze contemporary models.
CRW X25E. Personal Essay.
CRW X25F. Fiction Writing.
Detailed study and practice of the techniques of fiction writing; includes reading and analysis of contemporary models.
CRW X25G. Green Poetry.
CRW X25M. Creative Writing.
Detailed study and practice of the techniques of fiction, poetry, and other genres of creative writing; includes reading and analysis of contemporary models.
CRW X25P. Poetry Writing.
Detailed study and practice of the techniques of poetry writing; includes reading and analysis of contemporary models.
CRW X25S. Screenwriting.
Study and practice the techniques of screenwriting. Read and analyze contemporary models.
CRW X25T. Writing for Black Performance.
CRW X29S. Topics in Creative Writing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CRW X30. Literature for Writers.
Readings in fiction, poetry, drama, literary criticism, biography, and autobiography from the point of view of a creative writer.
CRW X35. Business of Writing.
Study the book publishing landscape including traditional and non-traditional career paths available to writers and those interested in the publishing industry. Analyze the publishing process, from concept to finished book: the acquisition, editorial, publicity, marketing, and sales stages of a book's life.
CRW X40D. Playwriting II.
Emphasis on the form and writing of the full-length play or equivalent.
CRW X40F. Short Story Workshop.
Practice in writing the short story, with study of contemporary models.
CRW X40P. Poetry Workshop.
Practice in writing poetry, with study of contemporary models.
CRW X55D. Playwriting III.
Focus on experiments in revising dramatic text in order to create a common vocabulary around narrative structure. Revision often includes the creation of multiple new drafts, digging through past drafts for abandoned themes, lost focus, and new inspiration as well as exploring character, narrative, and/or language.

CRW X55F. Advanced Fiction Workshop.
A third semester seminar-style workshop in fiction for experienced creative writers.

CRW X55P. Advanced Poetry Workshop.
A third semester seminar-style workshop in poetry for experienced creative writers.

CRW X60. Intensive Creative Writing.
An accelerated seminar-style workshop for highly motivated students. Designed to be taken over two consecutive summer terms; offered only during the summer semester.

CRW X70H. Honors Creative Writing Project.
For advanced students already proficient in writing who wish to work under supervision on specific and substantial projects.

CRW X75. Conference Course in Creative Writing.
Continue independent work in a creative project with a faculty advisor.

Graduate Courses

Professional Courses

CSE - Computational Science, Engineering, and Mathematics

Computational Science, Engineering, and Mathematics: CSE

Lower-Division Courses

Upper-Division Courses

CSE X70. Individual Reading and Research.
Supervised study or research in a selected area of computational science, engineering, and mathematics by individual arrangement with a supervising instructor.

Graduate Courses

CSE X80. Tools and Techniques of Computational Science.
Advanced introduction to the practical use of high performance computing hardware and software engineering principles for scientific technical computing. Topics include computer architectures, operating systems, programming languages, data structures, interoperability, and software development, management, and performance.

CSE X82G. Computer Graphics.
Advanced material in computer graphics, including in-depth treatments of techniques for realistic image synthesis, advanced geometric modeling methods, animation and dynamic simulation, scientific visualization, and high-performance graphics architectures.

CSE X82M. Foundational Techniques of Machine Learning and Data Sciences.
Introduction to computational and mathematical tools of data science. Cover statistical estimation and optimization algorithms, neural networks, geometry of high dimensional spaces, randomized methods, sparse approximation, and dimension reduction techniques.

CSE X83C. Numerical Analysis: Linear Algebra.
Survey of numerical methods in linear algebra: floating-point computation, solution of linear equations, least squares problems, algebraic eigenvalue problems.

CSE X83D. Numerical Analysis: Interpolation, Approximation, Quadrature, and Differential Equations.
Survey of numerical methods for interpolation, functional approximation, integration, and solution of differential equations.

CSE X83K. Numerical Analysis: Algebra and Approximation.
Advanced introduction to scientific computing, theory and application of numerical linear algebra, solution of nonlinear equations, and numerical approximation of functions.

CSE X83L. Numerical Analysis: Differential Equations.
Advanced introduction to the theory and practice of commonly used numerical algorithms for the solution of ordinary differential equations, and elliptic, parabolic, and hyperbolic partial differential equations.

CSE X84K. Theory of Probability.

CSE X84L. Theory of Probability.
Continuation of Computational Science, Engineering, and Mathematics 384K and Mathematics 385C.

CSE X84R. Mathematical Statistics I.
The general theory of mathematical statistics. Includes distributions of functions of random variables, properties of a random sample, principles of data reduction, an overview of hierarchical models, decision theory, Bayesian statistics, and theoretical results relevant to point estimation, interval estimation, and hypothesis testing.

CSE X84S. Mathematical Statistics II.
Continuation of Computational Science, Engineering, and Mathematics 384R and Mathematics 384C.

CSE X84T. Regression Analysis.
Simple and multiple linear regression, inference in regression, prediction of new observations, diagnosis and remedial measures, transformations, and model building. Emphasis on both understanding the theory and applying theory to analyze data.

CSE X84U. Design and Analysis of Experiments.
Design and analysis of experiments, including one-way and two-way layouts; components of variance; factorial experiments; balanced incomplete block designs; crossed and nested classifications; fixed, random, and mixed models; and split plot designs.

CSE X85M. Methods of Mathematical Physics I.
Theory of analytic functions; linear algebra and vector spaces; orthogonal functions; ordinary differential equations; partial differential equations; Green's functions; complex variables.

CSE X85N. Methods of Mathematical Physics II.
Continuation of Computational Science, Engineering, and Mathematics 385M and Physics 381M. Topology, functional analysis, approximation methods, group theory, differential manifolds.

CSE X85R. Real Analysis.
Measure and integration over abstract spaces; Lebesgue's theory of integration and differentiation on the real line.

CSE X85S. Complex Analysis.
Introduction to complex analysis.

CSE X86C. Methods of Applied Mathematics.
Topics include basic normed linear space theory; fixed-point theorems and applications to differential and integral equations; Hilbert spaces and the spectral theorem; applications to Sturm-Liouville problems; approximation and computational methods such as the Galerkin, Rayleigh-Ritz, and Newton procedures.

CSE X86D. Methods of Applied Mathematics.
Topics include distributions, fundamental solutions of partial differential equations, the Schwartz space and tempered distributions, Fourier transform, Plancherel theorem, Green's functions, Sobolev spaces, weak solutions, differential calculus in normed spaces, implicit function theorems, applications to nonlinear equations, smooth variational problems, applications to classical mechanics, constrained variational problems.

CSE X86L. Mathematical Methods in Science and Engineering.
Explore mathematical frameworks for understanding and solving practical problems. Examine basic concepts in multidimensional real analysis, ordinary differential equations and dynamical systems, elementary calculus of variations, Hilbert space theory and duality, Sturm-Liouville theory, Lax-Milgram and Babuska-Necas Theorems, and applications to partial differential equations.

CSE X86M. Functional Analysis in Theoretical Mechanics.
An introduction to modern concepts in functional analysis and linear operator theory, with emphasis on their application to problems in theoretical mechanics; topological and metric spaces, norm linear spaces, theory of linear operators on Hilbert spaces, applications to boundary value problems in elasticity and dynamical systems.

CSE X89C. Introduction to Mathematical Modeling in Science and Engineering I.
First part of a two-part introduction to the elements of classical mechanics, physics, chemistry, and biology needed to begin work in computational engineering and sciences. Develops from first principles the classical mathematical theories underlying many of the models of physical phenomena important in modern applications.

CSE X89D. Introduction to Mathematical Modeling in Science and Engineering II.
Second part of a two-part introduction to elements of classical mechanics, physics, chemistry, and biology needed to work in computational engineering and sciences. Develops from first principles the classical mathematical theories underlying many of the models of physical phenomena important in modern applications.

CSE X90. Individual Research.
Individual study or research in computational science, engineering, and mathematics arranged by mutual agreement between student and supervising faculty member.

CSE X90T. Training in the Teaching of Computational Science, Engineering, and Mathematics.

CSE X92. Topics in Computer Science.
Advanced topics in the theory and application of computer science. Recent topics include geometric modeling and visualization, and high-performance and parallel computing.

CSE X92.1. Parallel Algorithms in Scientific Computing.
Explore the application of parallel algorithms in machine learning, graph analytics, and modeling and simulation. Examine high-performance computing, parallel non-numerical and numerical algorithms for shared and distributed memory architectures. Discuss examples including sorting, merging, searching, linear algebra, graph algorithms, KD-trees, and fast transforms. Explore theory, programming, and performance optimization and analysis.

CSE X93. Topics in Numerical Analysis.
Advanced topics in the theory and application of numerical analysis. Recent topics include numerical methods for partial differential equations, computational problems in linear algebra, iterative methods and fast algorithms, numerical methods in functional approximation, and computational and variational methods for inverse problems.

CSE X93.1. The Finite Element Method.
Examine introductory concepts such as weighted residual methods; strong and weak forms; boundary conditions; global v. local basis functions; error estimates; smooth and nonsmooth problems; one-dimensional second- and fourth-order problems; two-dimensional potential and plate problems; two-dimensional and three-dimensional elasticity; dynamic and eigenvalue problems; numerical, computational, and meshing issues; applications using commercial software.

CSE X93F. Finite Element Methods.
Derivation and implementation of the finite element method; basic coding techniques; application to problems of stress and diffusion.

CSE X93H. Advanced Theory of Finite Element Methods.
Contemporary topics in the theory and application of finite element methods.

CSE X93N. Numerical Methods for Flow and Transport Problems.
Approximate solution methods for flow and transport problems in engineering and applied science. Finite element, finite difference, and residual methods for linear and nonlinear problems.

CSE X93P. Computational and Variational Methods for Inverse Problems.
Examine computational and variational methods for inverse problems governed by partial differential equations, including variational formulations, ill-posedness, regularization, adjoint methods for sensitivity analysis, variational discretization, and efficient large-scale optimization algorithms. Explore a brief introduction to the Bayesian formulation and relationship to the deterministic setting. Discuss examples drawn from different areas of science and engineering, including continuum fluid and solid mechanics, geophysics, and image processing.

CSE X94. Topics in Probability and Statistics.
Advanced topics in the theory and application of probability and statistics. Recent topics include nonparametric statistics and advanced probability.

CSE X94.1. Stochastic Processes I.
Study Ito-diffusion processes, stochastic calculus, and stochastic integration. Explore stochastic differential equations and their connection to classical analysis. Discuss an introduction to optimal stochastic control of diffusion processes, the Hamilton-Jacobi-Bellman equation (classical and viscosity solutions), singular stochastic control, and linear filtering. Present applications, mainly from mathematical finance, inventory theory, decision analysis, and insurance. Examine brief overview of multi-scale problems in stochastic analysis.

CSE X96. Topics in Applied Mathematics.
Advanced topics in the theory and application of applied mathematics. Recent topics have included partial differential equations, dynamical systems, kinetic theory, quantum mechanics, ergodic theory, statistical mechanics, Hamiltonian dynamics, nonlinear functional analysis, Euler and Navier-Stokes equations, microlocal calculus and spectral asymptotics, calculus of variations, and nonlinear partial differential equations.

CSE X96.1. Partial Differential Equations I.
Analyze nonlinear partial differential equations, emphasizing elliptic and parabolic equations.

CSE X97. Topics in Computational Science and Engineering.
Advanced topics in the theory and application of computational science and engineering.

CSE X97.1. Multiscale Methods in Computational Fluid Dynamics.
Explore stabilized and variational multiscale methods in computational fluid dynamics with a focus on advective-diffusive equations, the Boltzmann equation, and the compressible and incompressible Navier-Stokes equations.

CSE X97.2. Nonlinear Static and Dynamic Finite Element Analysis.
Explore code architecture and fundamental analytical technologies used in the nonlinear finite element and isogeometric analysis of solids and structures.

CSE X97.3. Validation and Uncertainty Quantification in Computational Models.
Assess reliability of computational models of physical systems through validation and uncertainty quantification. Develop uncertainty analysis in terms of Bayesian probability and inference, and techniques for probabilistic model validation.

CSE X97.4. Computational Modeling of the Cardiovascular System.
Explore mathematical models and simulation of the cardiovascular system, with an emphasis on the biomechanical function of the heart, heart valves, and the vasculature. Analyze mathematical models at the level of single cells, tissues, and whole organs. Discuss image-to-model software basics to allow creation of a model of choice from any available imaging data for a project of interest.

CSE X97.5. Biomechanics of Tissues, Scaffolds, and Cells.
Discuss biosolid mechanics, covering the complex mechanical behaviors of living tissues and related biomaterials, with a focus on modeling how they respond under loading. Examine major application areas to provide context to the theory and applications. Explore necessary mathematical, mechanics, and biological fundamentals in the context of applications and problems in biomedical research and medical devices.

CSE X97.6. Introduction to Computational Oncology.
Develop a familiarity with the common computational techniques used in modeling various aspects of cancer at multiple spatial and temporal scales. Investigate how computational modeling offers unique and

complementary information to traditional methods of cancer research. Examine the integration of theory and experiment while identifying the current barriers preventing computational modeling from having a broader impact on both cancer biology and clinical oncology.

CSE X97.7. Introduction to Mathematical and Physical Biology.
Discuss the common mathematical and physical techniques used in modeling various aspects of biology at multiple spatial and temporal scales. With emphasis placed on the integration of theory and experiment, identify the current barriers preventing computational modeling from having a broader impact in biology.

CSE X97.8. Biomedical Imaging: Signals and Systems.
Explore the physical principles and signal processing techniques used in thermographic, ultrasonic, and radiographic imaging, including image reconstruction from projections such as CT scanning, MRI, and millimeter wave determination of temperature profiles.

CSE X97.9. Mathematical Physiology.
Explore mathematical modeling in physiology, how physiological problems can be formulated and modeled, and how such models give rise to interesting and challenging functional features. Examine several exemplar physiological systems. Discuss the mathematical aspects of growth and remodeling in living systems, an area unique to living systems.

CSE X97H. Graduate Research Internship.
Practical work experience in a research/industrial setting. Internship to be arranged by student and approved by instructor.

CSE X98. Thesis.

CSE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

CSE X99W. Dissertation.

Professional Courses

CTI - Core Texts and Ideas

Core Texts and Ideas: CTI

Lower-Division Courses

CTI X01G. Introduction to Ancient Greece.
Greatness of Greece as reflected in Greek history, literature, philosophy, art, religion, and politics. No knowledge of Greek is required.

CTI X02. Classics of Social and Political Thought.
Explores the origins of social scientific thought in the history of political philosophy and traces the development of one or more of the social sciences in modern times. Focuses on fundamental ideas about human nature, civil society, and politics, explored through reading such authors as Aristotle, Aquinas, Locke, Rousseau, Marx, Weber, Durkheim, and Freud.

CTI X03. Competing Visions of the Good Life.
Introduces the great rival conceptions of the moral basis and goals of political life as elaborated by revolutionary thinkers throughout the history of political philosophy, including Aristotle, Aquinas, Locke, late modern critics of the Enlightenment, and others.

CTI X04. Topics in World Religions: Traditions and Texts.
A study of basic religious texts, including both the Hebrew Bible and New Testament, examined from various perspectives (including comparative, historical, philosophical, and literary), with emphasis on the fundamental questions and ideas raised in those texts.

CTI X05G. Introduction to the Old Testament.
Introduction to the many interpretations of the Hebrew Bible (the Old Testament) and its meaning in the context of its historical and cultural setting in the ancient Near East.

CTI X05N. Introduction to the New Testament.
Examines representative examples of the texts found in the Christian New Testament and selected noncanonical writings. Focuses on historical setting and systematic methods of interpretation.

CTI X06D. History of the Religions of Asia.
Eastern religions: an introduction to the basic forms and the historical development of the religious traditions of India, China, and Japan.

CTI X10. Topics in Core Texts and Ideas.
Introduction to fundamental texts and questions that have helped shape the world.

CTI X10.3. Introduction to the Philosophy of Religion.
A critical examination of various conceptions of God and of the relationship of the human and the divine.

CTI X15C. The Bible and Its Interpreters.
Seeks to develop a wide-ranging familiarity with the Jewish and Christian Bibles and with the dominant modes of ancient, medieval, and early modern biblical interpretation. Readings include an extensive range of primary sources, including both the Scriptures themselves and some of their most influential exegetes.

CTI X19S. Topics in Core Texts and Ideas.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CTI X20. The Classical Quest for Justice.
Introduces students to classical political thought through a study of seminal works of antiquity, focusing on those of Plato and Aristotle.

CTI X21. The Theoretical Foundations of Modern Politics.
Examines competing foundations of the ongoing development of political and social modernity. Examines a selection of major authors from Machiavelli to Nietzsche.

CTI X21F. Spinoza and Modernity.
Introduction to the core of Spinoza's writings and the diverse reactions they have elicited. Examines Spinoza's refusal of mind-body dualism, as well as a transcendent god or ideal as a way of understanding Spinoza's concepts and ideas.

CTI X22. Critics of Modern Liberalism.
Selected critics of the philosophy of the Enlightenment from both the Left and the Right, and from the time of Rousseau to the present.

CTI X23. Might and Right among Nations.
Major alternative approaches to the question of the moral character of international relations, as elaborated by some of the greatest political thinkers.

CTI X24. Politics and Literature.
Explores the "old battle between the poets and philosophers," in which the two sides battle for recognition as the deepest source of wisdom about politics and ethics. Includes readings from great works of political philosophy and literature.

CTI X25. Morality and Politics.
Interdisciplinary readings from major works exploring issues of ethics and leadership.

CTI X25C. Citizenship and Patriotism.
Examine the idea of patriotism and citizenship over history, from classical antiquity to contemporary times. Analyze the moral and political value of patriotism, nationalism and cosmopolitanism.

CTI X25D. Chinese Ethics and Political Philosophy.
Examine Chinese ethical and political philosophy, with an emphasis on the Confucian tradition, through close reading of major works. Analyze ideas from the course both philosophically and historically.

CTI X25M. Liberty and Empire: Machiavelli.
Explore Machiavelli's reputations through the examination of his works and analyze how those reputations relate to Machiavelli's own positioning and self-understanding.

CTI X25P. Thomas Paine, Liberalism, and the Enlightenment.
Analyze the purpose and philosophy of Thomas Paine's writings in their relation to the political thought and politics of his time.

CTI X26C. Constitutional Interpretation.
Designed to improve reasoning and communication skills through constitutional interpretation. Determining what the Constitution means, how to determine what it means, and who should determine what it means.

CTI X26J. African American Social and Political Thought.
Examines the speeches and writings by major theorists and critics of the prophetic tradition of black political thought.

CTI X26L. Civil Liberties.
Explore the United States constitution and Supreme Court with a focus on civil rights and liberties.

CTI X26R. Regime Perspectives on American Politics.
Explore American politics and culture and examine how the parts of America fit together as a whole.

CTI X26S. Structure of Individual Liberties.
Explore the ways in which the Constitution protects individual rights while accommodating the often competing claims of state, groups, and communities.

CTI X27C. Archaic Greece: Society and Culture.

CTI X27D. The History of Rome: The Republic.
A survey of Roman history from the founding of Rome to the death of Julius Caesar.

CTI X27E. Roots of Democracy.
Examine the historical development and ideological underpinnings of Athenian democracy, the first known democracy, from the sixth to fourth centuries BCE. Explore a broad range of primary sources and some secondary scholarships and gain a familiarity with the key principles and practices of this unique participatory government in its political, historical, and intellectual context.

CTI X28D. Death and the Afterlife in Graeco-Roman Antiquity.
Explore the afterlife from Near Eastern myths and Homer through Greek and Roman antiquity to the early Church Fathers.

CTI X29. The Ancient Historians.
Examines the main works of ancient historiography, and provides grounding in the central issues with which these works engage.

CTI X29S. Topics in Core Texts and Ideas.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

CTI X30J. Jerusalem and Athens.
Examine the age-old confrontation between the teaching of the Bible and the politics and philosophy of the ancient Greeks.

CTI X30M. Machiavelli: Politics and Culture.
Through Niccolo Machiavelli's chief writings, consider the local, regional, Mediterranean, European, and global aspects of his work.

CTI X30R. The Political Thought of the Reformation.
Examine the thought of the Reformation, especially of Martin Luther and John Calvin, including both their chief theological ideas and the implications of these ideas for politics and ethics. Explore the themes of justification; free will and predestination; original sin; the doctrine of the two kingdoms; the roots and nature of political authority; the question of toleration; the relationship between divine, natural, and civil law; and the status of the papacy.

CTI X31. Origins of Liberalism.
Examine the theory of liberal democracy through a study of its development in historical, religious, and political contexts.

CTI X32. The Sacred and the Secular in Modern European Thought.
Introduces key themes and methodologies of intellectual history and social theory by exploring the dueling approaches to secularization and sacralization in modern European thought.

CTI X33. Rousseau and His Legacy.
Examine Rousseau's complex legacy through the reading of his essential political texts and reading contemporary responses to his thought.

CTI X35C. History of Christian Philosophy.
Examines the history of Christian philosophy through classic Christian thought, concerning what can be known and how people should live.

CTI X35E. Hegel and the Formation of Modern European Identity.
An in-depth study of how Hegel identifies the social conditions necessary for personal self-realization but also for freedom by means of political community.

CTI X35M. Marx and Marxist Theory.
Introduction to the writings of Karl Marx as well as to those of his intellectual successors in Europe and around the globe in the nineteenth and twentieth centuries.

CTI X38. The Question of Relativism.
Examine the idea of relativism: what relativism is, what the fact and value distinction is, how the idea of moral relativism has shaped modern political thought, and what the arguments for and against relativism are. Explore the philosophic roots of the position in authors like Max Weber and Friedrich Nietzsche, as well as critics of relativism like Leo Strauss.

CTI X39. The Pursuit of Happiness.
Investigate happiness and how it is attained. Examine contrasting perspectives on happiness or human flourishing offered by major thinkers, both religious and secular, representing different epochs, cultures, and theoretical approaches.

CTI X39M. The Meaning of Life.
Investigate the meaning of life, exploring pre-modern perspectives, modern views including those of the nineteenth through twenty-first centuries, and contemporary problems such as whether AI poses new threats to meaning in life.

CTI X40. Ancient Epic.
Explore epic poems of Greece and Rome in translation.

CTI X41. Moral Agency In Greek Tragedy.
Subjects include the masterpieces of Greek tragedy, the social and cultural background of the texts, and questions posed by the texts.

CTI X42. Satan and the Idea of Evil.
Explore the history and breadth of Satan's role as a character (or background presence) in literature while developing close-reading techniques for literary analysis that can be applied across diverse eras, forms, and genres.

CTI X43. Love in the East and West.

CTI X44. Epics and Heroes of India.
Focus on India's classical epics, the Mahabharata and the Ramayana, with emphasis placed on understanding the epic characters in relation to the heroic traditions of premodern India, as well as on the role of the epics in contemporary Indian political and religious culture.

CTI X44D. Dante.

CTI X44E. War and Epic Literature.
Examine the genre of epic literature through its evolving representation of war and conflict, with specific attention paid to political, social, historical, and artistic contexts, as well as to its historical reception in art, literature, film, and music.

CTI X44M. Italian Masterpieces.
Study of representative texts in visual arts, film, literature, and opera, from the Renaissance to the present, in their historical context.

CTI X45L. Leadership: King Arthur to Queen Elizabeth.
Explores major works of English literature, poetry, and drama from the 14th-16th century and European philosophy, with special attention to the universal question: what makes a good leader? Historical and current analysis of how authors model the duties of good citizens in idealized and critical depictions of fictional leaders--like King Arthur and his knights--and real leaders--like Richard II, Henry V, and Elizabeth I, as well as works written to advise rulers on good governance.

CTI X45M. John Milton and the Enlightenment.
Examine the impact of Milton's political and social writings by pairing Milton's political prose with eighteenth-century Enlightenment texts from both sides of the Atlantic. Discover the role Milton's ideas played in shaping the foundations of liberty in both Britain at the Glorious Revolution and in North America at the American Revolution.

CTI X46. The Major Works of Dostoevsky.
Explores the dilemmas of homicide, suicide, patricide, and redemption in the novels of Fyodor Dostoevsky.

CTI X47. The Russian Novel.
A survey of classic Russian authors as well as experimental works from the nineteenth through the twenty-first century.

CTI X48. War and Revolution in Russian Literature and Culture.
Examines Russian narratives of war and revolution as represented in fiction, cinema, and journalism.

CTI X50. Masterworks of World Drama.
Studies major tragedies, comedies, and historical plays from various epochs, including at least one of Shakespeare's plays. Explores themes related to ethics, politics, and human nature, as well as the craft of the playwright. Students attend and discuss at least one play performance.

CTI X51. The Idea of the Beautiful.
Classical philosophical discussions of the idea of the beautiful (or noble or sublime), illustrated through selected works of art, drama, and literature. Explores the human perception of and response to beauty and its relation to such ideas as happiness and the promise of happiness, moral nobility or selflessness, and the divine. Philosophical works are studied in connection with examples drawn from the arts and are considered in their historical contexts.

CTI X52D. Early Italian Renaissance Art to 1470.
Traces the beginnings of the "rebirth" (renaissance) of the visual arts, from the end of the Middle Ages to the heyday of the Medici. Works of art are analyzed both in formal terms and in relation to contemporary society, religion, philosophy, economics, statecraft, gender, and other significant issues.

CTI X54. Abraham and Abrahamic Religions.
Examines the figure of Abraham as portrayed in the Bible and the reception of that portrayal in Judaism, Christianity, and Islam.

CTI X54F. The Five Books of Moses.
Study the socio-historical circumstances that gave shape to the first five books of the Bible: Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. Examine how these five books achieved the status of sacred literature.

CTI X54J. The Book of Job.

CTI X54L. Law and Justice in the Bible.
Examine the legal traditions of the Torah (Pentateuch) and what they reveal about the practice of law and justice in ancient Israel and the wider biblical world.

CTI X54P. Biblical Prophecy.
An introduction to the diversity of prophetic literature in the Old Testament, its historical development, social context, and Near Eastern parallels.

CTI X55. The Bible in the Colonial Americas.
Varied perspectives on the central role played by the Old Testament in the construction of colonial cultures in the Americas.

CTI X55C. Law, Liberty, and Faith.
Consider medieval ideas about the proper relation between law, liberty, and faith, and the arguments against them made by modern philosophers and theologians.

CTI X55R. The Age of Reformation.
Examines late medieval religion, the rise of Protestant movements, and the Catholic response in their cultural, political, and social contexts.

CTI X55S. Origin of the Idea of Religious Liberty.
Explore the origin of the idea of religious liberty in the history of political philosophy, focusing on its early modern development in core texts.

CTI X55T. Debating the Bible in the Twenty-First Century.
Examine the ways in which individuals, primarily in the United States, have regarded the Bible as relevant or irrelevant to contemporary life. Discuss contemporary controversial issues in which the Bible has played a role and how these relate to earlier controversies, such as the position of the Bible on slavery.

CTI X57. Islamic Theology.

CTI X63. The French Revolution and Napoleon.
Analysis of the social, political, and economic origins and outcomes of the French Revolution and Napoleon's empire.

CTI X65. Classics of Social Scientific Thought.
Studies a selection of foundational modern classics in economics, psychology, sociology, political science, and anthropology, drawn mainly from the nineteenth and twentieth centuries.

CTI X71. Einstein in the Age of Conflict.
Following the life and work of Albert Einstein, course examines the rise of the theories of relativity and quantum mechanics upon the stage of international political upheaval.

CTI X71D. Darwin on Origin of Species.
Explore Darwin's argument for evolution in its original context.

CTI X71M. History of Mathematics.
Survey major mathematical developments beginning with the ancient Greeks and tracing those developments through Hindu-Indian mathematics, Arabic mathematics, and European mathematics up to the nineteenth century.

CTI X71N. Newton's Principia.
Examine key sections of Newton's Principia Mathematica Philosophiae Naturalis.

CTI X71S. Science and Religion to Newton.
Explore the complex relationship between science and religious faith in medieval and early modern Europe beginning with Galileo Galilei's trial before the Roman Inquisition. Examine themes including the understanding of God and nature, authority (classical and scriptural) versus observation, the wide range of knowledge-making practices, the persistence of magic, and the influence of power and patronage.

CTI X71T. Science and Religion from Newton to the Present.
Explore historical views regarding the relationship between science and religion since the time of Isaac Newton. Analyze controversies about mechanical philosophy, natural theology, evolution, the Big Bang, free will, selfish genes, and miracles through primary source readings. Explore the societal impacts of these controversies.

CTI X72. Darwin and the Politics of Evolution.
A careful reading of Darwin's influential Origin of the Species by Means of Natural Selection, together with an examination of the religious, political, and scientific controversies the book has inspired from its first publication to the present day.

CTI X72M. Great Works in Biology.
Explore the history of biology through a close study of several major texts. Analyze controversies about authority, classification, extinction, evolution, and genetics. Emphasize primary source readings from influential figures who addressed these and other relevant questions.

CTI X73. Great Works In Medicine.
Examine signature works in the history of medicine.

CTI X74. Biology, Behavior, and Injustice.
Explores questions about human behavior related to biological factors as compared with personal experiences and societal standards.

CTI X75. Topics in Core Texts and Ideas.
Study of classic texts, connected historically or thematically.

CTI X75.1. The Qur'an.
Explore the history, language, style, and themes of the Qur'an.

CTI X75.4. Art and the City in Renaissance Italy.
Art, architecture, and emerging civic identity in Florence, Siena, Venice, and other Italian Renaissance city-states.

CTI X75.5. Science and Religion: Newton-Present.
Examine classic texts, connected historically or thematically.

CTI X75.7. Archaic and Classical Greece.
Survey of Greek history from the emergence of the city-states to the rise of Macedonia.
CTI X75.8. Values and Leadership in Ancient World.
CTI X79. Conference Course.
Intensive tutorial study of selected major texts.

Graduate Courses
Professional Courses

CZ - Czech

Czech: CZ

Lower-Division Courses

CZ X01C. Intensive Czech I.
Emphasis on developing oral proficiency in Czech using intensive methods of instruction.
CZ X06. First-Year Czech I.
Emphasis on four-skills proficiency: listening, speaking, reading, and writing.
CZ X07. First-Year Czech II.
Emphasis on four-skills proficiency: listening, speaking, reading, and writing.
CZ X11C. Intensive Czech II.
Continuing intensive development of proficiency in Czech, with a focus on speaking and the reading of authentic texts.
CZ X12K. Second-Year Czech I.
Listening, speaking, reading, and writing at the second-year level.
CZ X12L. Second-Year Czech II.
Listening, speaking, reading, and writing at the advanced, second-year level.
CZ X19S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CZ X29S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

CZ X19S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CZ X25. Third-Year Czech I.
Oral expression, reading, and composition.
CZ X26. Third-Year Czech II.
Continuation of Czech 325: Oral expression, reading, and composition.
CZ X28. Topics in Advanced Czech.
CZ X29S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CZ X79. Conference Course in Czech Language or Literature.
CZ X79H. Honors Tutorial Course.
Supervised individual research on a literary honors paper of some length.

Graduate Courses

CZ X19S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CZ X29S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CZ X92. Topics in Czech Language.
Topics may include Czech linguistics, pedagogy, and comparative language study.
CZ X95. Conference Course.
Survey of Czech literature, language, culture, linguistics, history, and politics.

Professional Courses

CZ X19S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
CZ X29S. Topics in Czech.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

D S - Decision Science

Decision Science: D S

Lower-Division Courses

D S X19S. Topics in Decision Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

D S X29S. Topics in Decision Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an

exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

D S X35. Introduction to Decision Science.

Examine modeling of business problems using methods from decision analysis, simulation and optimization.

D S X35H. Introduction to Decision Science: Honors.

Examine modeling of business problems using methods from decision analysis, simulation and optimization.

D S X72T. Topics in Decision Science.

D S X72T.11. Computational Finance.

Introduction to the analysis and implementation of numerical methods used in finance. Explore numerical techniques in derivative pricing and optimal asset allocation, such as Monte Carlo and quasi-Monte Carlo simulation, methods for solving partial differential equations, and dynamic programming.

D S X72T.16. Optimization Method in Finance.

Explore quantitative methods and techniques in optimization and simulation, and their use in financial decision making. Discuss theory and application in portfolio selection, options and other derivative pricing, index tracking, risk measures, volatility estimating. Examine linear, quadratic, nonlinear, and integer programming; dynamic programming; robust optimization; Monte Carlo methods and variance reduction techniques. Emphasis will be placed on problem solving with advanced computational programming languages.

DAN - Danish

Danish: DAN

Lower-Division Courses

DAN X04. Accelerated First-Year Danish.

DAN X12. Accelerated Second-Year Danish.

DAN X19S. Topics in Danish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded in an affiliated studies program.

DAN X29S. Topics in Danish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

DAN X19S. Topics in Danish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded in an affiliated studies program.

DAN X27. Advanced Danish I.

DAN X28. Advanced Danish II.

DAN X29S. Topics in Danish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

DAN X30D. Danish across Disciplines.

Read and discuss Danish language materials related to the subject matter of another designated course.

DAN X79. Conference Course in Danish Language or Literature.

Supervised individual study of selected problems in Danish language or literature.

Graduate Courses

DAN X19S. Topics in Danish.

DES - Design

Design: DES

Lower-Division Courses

DES X01. Introduction to Design Thinking.
Introduces design thinking and design methods, with a focus on design process.

DES X02. Topics in Technologies in Design Practice.
Introduces a variety of technology and software used by design professionals.

DES X02C. Introduction to 2D Design.
Explore the fundamental principles and methods of 2D design making, including an introduction to software.

DES X02D. Introduction to 3D Design.
Introduction to theories, principles, methods, techniques, tools, and software for 3D design.

DES X02E. Introduction to Interaction Design.
Introduction to theories, methods, and techniques for designing time-based and interactive experiences, including video, motion graphics, and web and mobile applications.

DES X03. Introduction to Graphic Design.
Lecture/seminar/studio course. Introduces the fundamental principles, conventions,and techniques of graphic design.

DES X04. Design Studio I.
Explore the vocabulary, principles and techniques of design across disciplines through project work in a studio setting.

DES X05. Design Studio II.
Build upon vocabulary, principles and techniques of design across disciplines through project work in a studio setting.

DES X06. Design Studio III.
Refine and apply vocabulary, principles and techniques of design across disciplines through project work in a studio setting.

DES X07. Design and Culture.
Explore the broad social, economic, technological, and political forces that shape design, and how design influences the human experience in today's world. Examine the critical discourse surrounding the creation, production, consumption, and interpretation of design.

DES X07C. Everyday Design.
Explore the influence of design in daily life, its impact on society, and how design disciplines shape the world through purposeful choices and creative practices.

DES X08. Introduction to Design Theory and Criticism.
Lecture/seminar course. Introduces design theory and criticism, examining how people's beliefs and values inform the way they make, understand, and evaluate works of design.

DES X09. Introduction to Design.
