Studio course. Introduction to the design process, including research, ideation, prototyping, critique, and iteration. Projects also introduce the vocabulary, principles, strategies, techniques, and conventions of drawing and rendering used by design professionals.

DES X10C. Introduction to Design Research.
Examine the role of research in the design process, and explore a variety of research methods.

DES X10T. Topics in Innovative Design.

DES X11C. Portfolio Critique.
Develop a portfolio of work to present for feedback.

DES X11J. Design Technologies I.
Studio course. Projects introduce the vocabulary, principles, strategies, techniques, and conventions of color, composition, rendering, photography, and typography used by design professionals.

DES X11K. Design Technologies II.
Studio course. Projects introduce techniques and theories for designing time-based and interactive experiences, including video, motion graphics, and web/mobile applications.

DES X12. Visual Syntax in Communication.
Introduction to fundamental typographic elements: visual composition and form-making, sequence and narrative, and contrast and hierarchy. Final project is a portfolio to be submitted for sophomore performance review.

DES X12G. Typography in Communication.
Studio course. Introduction to fundamental typographic elements: visual composition and form-making; sequence and narrative; and contrast and hierarchy.

DES X13. Introduction to Design History.
Introduction to the history of design, with a focus on key themes and ideas.

DES X14. Introduction to Industrial Design.
Introduction to theories, principles, methods, and techniques for industrial design in a studio format.

DES X15C. Sketching.
Introduction to elements, techniques, processes, and tools for sketching in design practice. Explore sketching as a way to convey ideas.

DES X19S. Topics in Design.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad office. Credit is recorded as assigned by the Design Assistant Chair of the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

DES X20. Design Theories and Methods.
Lecture/seminar/studio course. Introduces cultural and aesthetic theories pertinent to design, as well as research methods for generating and prototyping ideas.

DES X21. Images in Communication.
Studio course. Explores the selection and creation of images appropriate to specific communication goals and contexts, such as promotional images, infographics, logos, instructions, and/or narratives.

DES X21C. Portfolio Critique.
Develop a portfolio of work to present for feedback.

DES X22. Design and the Social Environment.
Studio course. Involves researching a contemporary social issue; define an area of opportunity; and design graphics, objects, services, and/or systems that respond ethically to the issue.

DES X23. Color in Theory and Practice.
Explore contemporary color notation systems and color management techniques. Survey economic, health and safety, environmental, cultural, legal, political, and other ethical considerations pertinent to using color.

DES X24. Design Research and Methods.
Lecture/studio course. Lectures and projects introduce problem-framing and problem-solving techniques and a variety of design research, ideation, prototyping, and iterative methods.

DES X25. Typography I.
Studio course. Projects introduce the fundamental principles, conventions, and techniques of typography.

DES X26. Objects and Spaces.
Studio course. Projects introduce rendering and prototyping techniques used for solving problems in three-dimensional media such as product design, packaging design, environmental graphics, and/or architectural/landscape design.

DES X27. Prototyping Physical Space.
Studio-based exploration of the iterative development of low-resolution immersive environments.

DES X28. Print and Packaging.
Studio-based exploration of the print environment, and build technical skills and process management skills.

DES X29S. Topics in Design.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad office. Credit is recorded as assigned by the Design Assistant Chair of the Department of Art and Art History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

DES X30T. Topics in Innovative Design.
Exploration of innovative topics in design.

DES X31. Portfolio and Performance Review.
Develop and review a portfolio of work, guided by feedback from the instructor, group critiques, and reviews with visiting critics.

DES X34. Introduction to Interaction Design.
Studio course. Projects introduce theories, methods, and techniques for designing time-based and interactive experiences, including video, motion graphics, and web/mobile applications.

DES X34C. Interaction Design I.
Explore theories, methods, and techniques for designing time-based and interactive experiences, including video, motion graphics, and web and mobile applications.

DES X35. Typography II.
Studio course. Students use typographic principles to design complex print and on-screen publications.

DES X36. History of Design.
Lecture/seminar course. Surveys the history of graphic and/or industrial design from c.1450 to the present, with an emphasis on the last 150 years.

DES X37. Topics in Design History.
Lectures and discussions focusing on specialized or advanced topics in the history of design.

DES X37.1. History of Graphic Design.
Survey the history of graphic design from c.3000 BCE to the present, with an emphasis on the last 200 years.

DES X37.2. History of Industrial Design.
Surveys the history of industrial design from 1750 to the present, with an emphasis on the last 150 years.

DES X37.3. Research Methods in Design History.
Introduces a variety of research methods in design history.

DES X37C. Graphic Design History.
Survey the history of graphic design from c.3000 BCE to the present, with an emphasis on the last 200 years.

DES X38. Topics in Design.
Examine specialized or advanced topics in design.

DES X39T. Topics In Design Theory.
Examine advanced topics in the study of cultural, aesthetic, and practice-based theories pertinent to design.

DES X40. Design Systems.
Development of flexible, integrated design systems such as identities, wayfinding, and service design.

DES X40C. Identity Systems.
Examine the relationship between business and graphic design to simplify, unify, and amplify a brand's identity in a studio format.

DES X40D. Brand Storytelling.
Examine the relationships between research, strategy, identity, human-centered design, and storytelling to articulate and communicate a brand's purpose in a studio format.

DES X40G. Branding and Visual Identity Systems.
Studio course. Explores the purposes and constraints of branding and visual identity design, and creative systems that can be applied consistently across media and materials.

DES X41. Advanced Issues in Visual Syntax.
Exploration of advanced issues in typography.

DES X41G. Typography III.
Studio course. Advanced projects in typography; introduction to type design, material explorations, environmental type design, and expressive distortion

DES X42. Design and Persuasion.
Development and presentation of coherent informational and persuasive visual statements.

DES X42G. Information and Persuasion.
Studio course. Explores ways to communicate information accurately, clearly, and persuasively through informational graphics and data visualization.

DES X43. Design Research and Methods II.
Studio course. Students use insights gleaned from comparison research, user testing, and/or product reviews to refine existing prototypes or products.

DES X44. Objects and Spaces II.
Studio course. Advanced practice in problem-solving, rendering, and prototyping in three-dimensional media, such as product design, packaging design, environmental graphics, and architectural/landscape design.

DES X45. Design Writing.
Lecture/seminar course. Students propose and carry out original research and writing projects with the aim of submitting their writing for publication.

DES X46. Project Studio.
Studio course. Professional experience solving real-world problems, including commissioned projects, student-initiated projects, and/or pro bono projects.

DES X47. Publication Studio.
Studio course. Advanced publishing projects in print and/or digital media.

DES X48. Information Visualization.
Studio course. Students devise ways to communicate information accurately, clearly, and memorably.

DES X49. Interaction Design II.
Lecture/studio course. Students design visually pleasing, responsive, user-centered web and mobile interfaces.

DES X50. Special Topics in Design.
Studio course. Projects focusing on contemporary design practice, featuring approaches and subfields not represented elsewhere in the curriculum.

DES X51. Design Perspectives.
Studio course. Workshops and projects led by industry professionals, visiting lecturers, and/or University faculty and graduate students, featuring design approaches, subfields, practices, and media.

DES X52. Service and Systems Design.
Studio course. Students design effective user-centered systems and services.

DES X53. Advanced Topics in Interaction Design.
Studio Course. Students undertake advanced projects in interaction design. Topics may include user research, user interface design, service design, usability, and accessibility.

DES X54. Design Issues.
Lecture/seminar course. Students engage with contemporary issues in design through reading, discussion, and writing.

DES X55. Interaction Design III.
Studio course. Advanced projects in visually pleasing, responsive, user-centered web and mobile interfaces.

DES X56. Topics in Graphic Design.
Topics in graphic design.

DES X56.1. Spatial Graphic Design.
Examine the relationship between the built environment and typography, image, symbol, material, and visual storytelling in the context of artistic, social, and cultural movements in a studio format.

DES X57C. Interaction Design III: Experiential and Spaces.
Examine communication through physical material and space. Explore topics such as experiential design, branded environments, and exhibition design in a studio format.

DES X57D. Interaction Design IV: Objects and Media.
Studio-based exploration of the practical, theoretical, and speculative ability for products, objects, digital space, and media to communicate in context of the Internet of Things.

DES X58C. Industrial Design I.
Explore methods and techniques for industrial design.

DES X58D. Industrial Design II.
Build upon methods and techniques for industrial design.

DES X58E. Industrial Design III.
Refine and apply methods and techniques for industrial design.

DES X58G. Advanced Topics in Industrial Design.
Examine advanced theories, principles, methods, and techniques for industrial design in a studio format.

DES X59. Professional Practices in Design.
Lecture/studio course. Lectures introduce professional practices in design, intellectual property issues, contracts, pricing, accounting, tax preparation, business plans, promotion, etc.

DES X60. Design Internship.
Introduces students to ethical standards and professional practices in design; allows completion of an approved professional internship.

DES X60I. Internship in Design.
Participate in a professional design internship in a field of interest.

DES X70. Senior Project in Design.
Studio course. Students define their own research problem and propose appropriate design solutions, guided by feedback from desk critiques with the instructor, group critiques, and reviews with a visiting critic.

DES X70C. Individual Projects in Design.
Define research problem and propose appropriate design solutions, guided by feedback from desk critiques with the instructor, group critiques, and reviews with a visiting critic.

DES X71. Design Practicum Internship.
Lecture/internship course. Resume and portfolio preparation; discussion of professional ethics and responsibilities; professional internship.

DES X74. Capstone Design Project.
Studio course. Students define their own research problem and propose appropriate design solutions, guided by feedback from desk critiques with the instructor, group critiques, and reviews with a visiting critic.

DES X74P. Senior Portfolio.
Develop, curate, review, and present a portfolio of original design work.

DES X75. Capstone Design Exhibition.
Studio course. Students collaboratively curate, design, and install a senior BFA exhibition, and publish collateral materials that publicly showcase their capstone projects.

DES X75S. Senior Showcase.
Curate, design, and install a showcase of design projects.

DES X76. Independent Study: Design.
Student-defined projects completed under faculty supervision.

Graduate Courses

DES X80. Topics in Core Course in Design.
Introduction to design process, research, and methodologies.

DES X81. Core Laboratory 1.
Practice laboratory for a variety of design methodologies.

DES X82. Critique Studio.
Context and structured dialogue regarding areas of, and the student's own direction in, graduate research.

DES X83. Graduate Projects.

DES X84. Design Documentation and Storytelling.
Covers portfolio creation and other tools related to documenting and communicating design work.

DES X84C. Design Criticism.
Thinking, writing and talking about design.

DES X84D. Design Perspectives.
Explore design approaches, subfields, practices, and media through workshops, projects or lectures led by industry professionals, visiting instructors, and/or University faculty and graduate students.

DES X84E. The Art of Critique.
Explore methods, frameworks, and practice in giving and receiving feedback in a design studio setting.

DES X84F. Materials Exploration.
Consider materials in design applications.

DES X84G. User Research.
Explore generative and evaluative methods for design research, research synthesis techniques, and the design of research field studies for design applications.

DES X84H. Design Theory and Method.
Examine theory and methods in design.

DES X84J. Design in Context.
Explore the social, political, historical, legal and economic contexts of design.

DES X84K. Introduction to Campus Resources for Designers.
Introduction to design-related resources on campus including the Library, materials lab, fabrication lab, and publication studio.

DES X85C. Studio I.
Explore principles and techniques of design across disciplines through project work in a studio setting.

DES X85D. Studio II.
Build upon principles and techniques of design across disciplines through project work in a studio setting.

DES X85E. Studio III.
Refine and apply advanced principles and techniques of design across disciplines through project work in a studio setting.

DES X85F. Studio IV.
Culminate previous knowledge of principles and techniques of design across disciplines through project work in a studio setting.

DES X85G. Foundation Studio I.
Introduction to vocabulary, principles, strategies, techniques and conventions foundational to design in a studio format.

DES X85H. Foundation Studio II.
Build upon vocabulary, principles, strategies, techniques and conventions foundational to design in a studio format.

DES X85J. Foundation Studio III.
Refine vocabulary, principles, strategies, techniques and conventions foundational to design in a studio format.

DES X85K. Topics in Visual Design Studio.
Studio-based exploration of techniques and concepts specific to visual design.

DES X85L. Topics in Interaction Design Studio.
Studio-based exploration of techniques and concepts specific to interaction design.

DES X85M. Topics in Industrial Design Studio.
Studio-based examination of techniques and concepts specific to industrial design.

DES X85N. Topics in Service Design Studio.
Studio-based exploration of techniques and concepts specific to service design.

DES X85T. Topics in Design Studio.
Develop studio projects focusing on specialized or advanced topics or methods.

DES X85V. Topics in Visiting Designer Studio.
Projects developed by visiting designer on technique and concepts related to their practice in a studio format.

DES X86. Design History.

DES X87. Graduate Internship in Design.
Professional design internship in a field of the student's interest.

DES X87H. Internship in Healthcare Design.

DES X88. Introduction to Design Thinking.
A preliminary foundation in the emerging practice of human-centered design, the methodology driving design thinking as a way of achieving innovation across sectors.

DES X88C. Topics in Design Seminar.
Examine specialized or advanced topics in design.

DES X88D. Topics in Service Design Seminar.
Examine specialized or advanced topics in service design.

DES X88E. Topics in Industrial Design Seminar.
Examine specialized or advanced topics in industrial design.

DES X88F. Topics in Interaction Design Seminar.
Examine specialized or advanced topics in interaction design.

DES X88G. Topics in Visual Design Seminar.
Examine specialized or advanced topics in visual design.

DES X90. Topics in Advanced Design Skills.

DES X90.1. Design in Health Studio.
Collaborate with clients in teams, and apply design skills to immediate challenges in the health space.

DES X90.2. Storytelling for Presentation.
Explore the frameworks for good storytelling as applied to professional presentation and written work.

DES X90.3. Graphic Design Tools.
Explore 2D Visualizations tools for print and screen.

DES X90.4. Eliciting and Inspiring Participant Data.
Explore tactics and techniques of several common primary research methodologies including contextual inquiry, intercept interviews, personal inventories, empathy modeling, and others.

DES X90.5. Sketching for Communication.
Examine the elements of sketching to visualize concepts.

DES X90.6. 3D Prototyping.
Use rapid prototyping methods to test ideas iteratively with an emphasis on products and the built environment.

DES X91. Core Laboratory 2.
Designed to provide students with the opportunity to test and expand their design research through writing and various methods of dissemination.

DES X92. Professional Communication of Research.
Seminar addressing strategies for communicating design research processes and results to a variety of audiences through vehicles such as exhibitions, scholarly reports, and video recordings.

DES X93. Topics in Design Theory and Research.
Investigates current discourse within design studies.

DES X94. Topics in Advanced Design.
Examine design practices in all areas, and their relationship to research.

DES X94.1. Health Systems Design.
Explore aspects of complex health ecosystems. Examine the principles and methods of interconnection. Design future systems that elicit new behaviors.

DES X94.2. Anthropology and Design.
Explore anthropological and ethnographic tools that can attune practitioners to social and cultural differences and their implications.

DES X94.4. Design in Health: Introduction To Collaboration.
Examine nuanced and complex considerations for designing in the health space. Explore design practice and challenging legacy health notions.

DES X94.5. Final Project In Design.
Design and lead a project with the guidance of a faculty member.

DES X94.6. Health Care Law/Policy.
Examine current health law and policy.

DES X95. Topics in Fieldwork in Design.
Students conduct fieldwork as part of a collaborative research team and/or under the direction of a project supervisor.

DES X96. Business of Design.
Explore the integration of design into business and business into design.

DES X97. Service Design.
Apply design thinking to service-based sectors such as hospitality, healthcare, food service and others.
DES X97C. Design Pedagogy and Instruction.
Covers theory and research related to the pedagogy of design. Explores creation of design learning experiences.
DES X97P. Teaching Practicum.
Applied teaching in design subjects.
DES X98P. Capstone Project.
Utilize design methodologies and techniques on an applied project.
DES X98R. Master's Report.
DES X98S. Master's Exhibition.
DES X98T. Supervised Teaching in Design.
Training and teaching under the close supervision of the course instructor for one semester; group meetings with the instructor, individual consultations, and reports throughout the teaching period.

Professional Courses

DEV - Developmental Studies

Developmental Studies: DEV

Lower-Division Courses

DEV X00M. Basic Mathematics and Algebra Skills.
Developmental mathematics instruction paired with a core math course. Emphasis is on mathematical concepts that support success in the core math course.
DEV X00R. Basic Reading Skills.
Developmental reading and writing instruction paired with a credit reading intensive course. Emphasis is on strategies for improving reading comprehension across the disciplines, reading study skills, and elements of composition.
DEV X00W. Basic Writing Skills.
Developmental reading and writing instruction paired with a credit writing intensive course. Emphasis is on strategies for improving reading comprehension across the disciplines, reading study skills, and elements of composition.
DEV X01M. Developmental Mathematics I.
Developmental mathematics instruction paired with a core math course. Emphasis is on mathematical concepts that support success in the core math course.
DEV X02M. Developmental Mathematics II.
Continuation of Developmental Studies 301M. Includes linear equations, systems of equations, integers, exponents and scientific notation, factoring polynomials, rational expressions and equations, radical expressions, and geometric problems.
DEV X03M. Basic Mathematics and Algebra Skills Review.
DEV X03S. Analytical Reading and Writing.
Examination of fundamental concepts in analytical reading from different disciplinary perspectives, with an emphasis on sociocultural influences on comprehension and writing styles.

Upper-Division Courses

Graduate Courses

Professional Courses

DGI - Digital Game Industries

Digital Game Industries: DGI

Lower-Division Courses

DGI X01. Video Games: Concept to Console.
Introduction to the foundational aspects of the digital game industry and the essential communication skills required to be successful in the field.
DGI X02. Digital Game Industries.
Explore the foundational aspects of digital game industries and production with an emphasis on communication skills.
DGI X05. Topics in Digital Game Industries.
Discuss contemporary issues and practices in digital game industries.
DGI X19S. Topics in Digital Games.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Texas Global Office. Credit is recorded as assigned by the study abroad adviser in the DGI minor. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

DGI X20. Topics in Digital Game Industries.
Examine contemporary issues and practices in digital game industries.
DGI X21. Independent Study.
Pursue special supervised individual research studies.
DGI X22. Game Usability Analysis.
Explore usability in digital games.
DGI X29S. Topics in Digital Game Industries.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Texas Global Office. Credit is recorded as assigned by the study abroad adviser in the DGI minor. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
DGI X50. Digital Game Industry Internship.
Arrange and work in an internship.
DGI X70. Advanced Topics in Digital Game Industries.
Study advanced skills and practice in digital games across a range of media integrations.

Graduate Courses

Professional Courses

DSC - Data Science

Data Science: DSC

Lower-Division Courses

Upper-Division Courses

Graduate Courses

DSC X81. Probability and Simulation-Based Inference for Data Science.
Introduction to inference, through the simulation process. Explore probability, exponential families, conditional probabilities and Bayes theorem, inference and Maximum Likelihood estimation, confidence intervals, and hypothesis testing (emphasis on simulation).
DSC X82. Foundations of Regression and Predictive Modeling.
Introduction to the basics of regression-based modeling. Explore simple and multiple regression, interpretation of models and coefficients, prediction and estimates, regularization processes, and generalized linear models.
DSC X83. Advanced Predictive Models for Complex Data.
Explore advanced techniques used in practice for regression-based models. Examine time series and longitudinal data, repeated and mixed models, spatially correlated data, and Random Forest models.
DSC X84. Design Principles and Causal Inference.
Explore the field of "big data" and the rigors of determining applicable design structures from that data. Examine classic design structures, non-typical data structures and novel design processes, and causal inference, and explore data-based decision making.
DSC X85. Data Exploration, Visualization, and Foundations of Unsupervised Learning.
Examine visualization techniques used in practice to discover insights about data. Explore data quality and relevance, data ethics and providence, clustering, dimension reduction, and reproducibility.

DSC X87. Topics in Statistics for Data Sciences.
Explore topics in data science with a general overview of statistics theory and application.
DSC X88. Natural Language Processing.
Explore computational methods for syntactic and semantic analysis of structures representing meanings of natural language, the study of current natural language processing systems, and methods for computing outlines and discourse structures of descriptive text.
DSC X88G. Algorithms: Techniques and Theory.
Explore algorithm design and analysis including algorithmic paradigms, maximum flow, randomized algorithms, data structures, NP-completeness and approximation algorithms.
DSC X88J. Optimization.
Explore a background on convex sets and functions, linear programming, convex programming, and iterative first-order and second-order methods.
DSC X89. Data Structures.
Examine programming skills, including testing, debugging, and the basics of programming methodology. Explore fundamental concepts in data structures and algorithms.
DSC X91L. Principles of Machine Learning.
Examine computing systems that automatically improve their performance with experience, including various approaches to inductive classification such as version space, decision tree, rule-based, neural network, Bayesian, and instance-based methods; as well as computational learning theory, explanation-based learning, and knowledge refinement.
DSC X94D. Deep Learning.
Explore the basic building blocks and intuitions behind designing, training, tuning, and monitoring of deep networks. Examine both the theory of deep learning, as well as hands-on implementation sessions in pytorch. Explore a series of application areas of deep networks in: computer vision, sequence modeling in natural language processing, deep reinforcement learning, generative modeling, and adversarial learning.
DSC X94R. Reinforcement Learning.
Introduction to the theory and practice of modern reinforcement learning, with emphasis on temporal difference learning algorithms.
DSC X95T. Topics in Computer Science for Data Sciences.
Explore topics in data science with a general overview of computer science application.

Professional Courses

E - English

English: E

Lower-Division Courses

E X03C. Plan II World Literature Part I.
Reading of masterpieces of world literature and intensive training in writing and in critical analysis of literature.
E X03D. Plan II World Literature Part II.
Reading of masterpieces of world literature and intensive training in writing and in critical analysis of literature.
E X10C. Literature and Community Engagement.
E X10D. Introduction to Digital Studies.
Explore the critical application of exploratory techniques in digital scholarship in the humanities, including principles of exploratory data analysis programming language to perform both analysis and visualization. Critique how text, images, and audio are analyzed and represented from a humanistic perspective that considers intersectional power dynamics surrounding ability, class, gender, and race in culture.
E X10F. Literature, Film, and Other Arts.
Survey of preeminent films of the twentieth century alongside a consideration of the literary works that most influenced them. Explores different modes of close reading and skills to critically analyze texts in a variety of literary and media formats. Focus on connections between different modes of modern expression and critical analysis.
E X10G. Introduction to Comics Studies.
E X10S. The Films of Alfred Hitchcock.
Survey the films of Alfred Hitchcock. Examine the question of film as a visual medium and Hitchcock as a visual artist, with close attention to his techniques of storytelling through moving pictures and the performances of the actors.
E X10T. The Taylor Swift Songbook.
E X14J. Topics in Literature Across the Curriculum.
Readings selected to highlight the connections between literary study and other fields of inquiry.
E X14J.1. Literature and Film.
E X14J.3. Literature and Theatre.
E X14J.4. Harry Potter's Secret Language.
E X14L. Topics in Introduction to Literary Studies.
Emphasis on skills and methods used in upper-division English courses; intensive practice in writing; and an introduction to field-specific research.
E X14L.10. GoodReads.
An introduction to literary analysis, focusing on building a literary community.
E X14L.3. Banned Books and Novel Ideas.
E X14L.4. Texts and Contexts.
E X14L.5. Reading Poetry.
E X14L.8. The Pulitzer Prize.
An introduction to literary analysis focusing on works that have been awarded the Pulitzer Prize for fiction, drama, and/or poetry.
E X14L.9. Cult Classics.
An introduction to literary analysis focusing on works that have become cult classics.
E X14T. Advanced Placement Credit in English.
Used to record coursework credit based upon an appropriate Advanced Placement Literature and Composition examination score.
E X14V. Topics in Introduction to Literature and Culture.
Readings focus on minority and ethnic American literatures in their cultural contexts with an emphasis on skills and methods. Intensive practice in writing and an introduction to field-specific research.
E X14V.1. African American Literature and Culture.
Explores texts, drawn from a variety of genres and periods, that indicate the range of African American experiences and how those experiences are influenced by issues such as class, ethnicity, gender, sexuality, and race.
E X14V.2. Asian American Literature and Culture.
Explores how authors and artists over the course of the past century have imagined what it means to be Asian American. Covers a diverse range of Asian immigrant histories and the formation of Asian American identities according to ethnicity, gender, sexuality, class, and citizenship.
E X14V.3. Mexican American Literature and Culture.
Representative Chicano writers and genres, such as poetry, prose fiction, and theatre.
E X14V.4. Gay and Lesbian Literature and Culture.
American writing by gay, lesbian, bisexual, transgender, or queer authors and/or with gay, lesbian, bisexual, transgender, or queer themes.
E X14V.5. Native American Literature and Culture.
Studies Native American literature from different regions and cultures and considers this literary tradition in tribal national and United States national contexts.
E X14V.6. Women, Gender, Literature, and Culture.
An introduction to literary analysis focusing on women's and gender studies.
E X14V.7. Jewish American Literature and Culture.
Examine Jewish American literature in its cultural contexts with an emphasis on skills and methods. Explore texts, drawn from a variety of genres and periods, that indicate the range of Jewish American

experiences and how those experiences are influenced by issues such as citizenship, class, ethnicity, gender, and sexuality.

E X16L. British Literature.
Introduction to masterpieces of the British literary tradition, emphasizing historical, generic, and thematic connections.

E X16M. American Literature.
Introduction to masterpieces of the American literary tradition, emphasizing historical, generic, and thematic connections.

E X16N. World Literature.
Introduction to masterpieces of world literature, emphasizing historical, generic, and thematic connections.

E X16P. Masterworks of Literature.
Introduction to masterpieces of literature, emphasizing historical, generic, and thematic connections.

E X18M. Introduction to the English Language.
Basic linguistic concepts; phonology, syntax, and vocabulary of English; historical, regional, and social variation; applications of linguistics in educational and social action.

E X18Q. Supervised Research.
Student-initiated research conducted with instructor supervision.

E X19D. Blackness and Comics.
Examine the relationship between race and the sequential aesthetics of comic books and comic strips. Explore comics strips, underground comics, and superhero comics from the colonial period to the present day.

E X19L. Latinx Digital Worlds.
Explore how Latinx communities (traditionally figured as on the wrong side of the "digital divide") have embraced, mobilized, and sometimes usurped emerging digital tools and spaces to forge community and create new forms of culture, memory, and activism.

E X19S. Topics in English.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E X29S. Topics in English.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E X91L. Conference Course on Special Topics.

Upper-Division Courses

E X19S. Topics in English.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E X20L. Major Writers of the Restoration and Eighteenth Century.
A study of the principal writers: Dryden, Pope, Swift, Johnson, Boswell, Burns, and others.

E X21. Shakespeare.
A selection from the works of William Shakespeare.

E X21K. Introduction to Criticism.
Introduction to major terms, issues, and approaches in literary criticism, and their application to the reasoned discussion of poetry, fiction, and drama.

E X21L. American English.
An overview of the historical development of English in the Americas. Attention to regional, social, and ethnic differences, and their implications for public education.

E X21P. Shakespeare through Performance.
An intensive study of the plays of William Shakespeare, with emphasis on performance as a means of interpretation and an aid to comprehension.

E X23D. Topics in Diverse Perspectives.
Study literature and other forms within cultural and historical contexts, focusing on any one or more of the following: gender, race, ethnicity, culture, language, and/or globalization.

E X23E. Writing Slavery.
Explores the controversial rewriting of slavery in a presentist context by contemporary authors. Addresses challenges that archival limitations and revisionist writings about slavery pose for academic disciplines, literary instruction, and/or pedagogy.

E X23F. African American Writers in France.

E X23G. American Literary Masculinities.
Explores constructions of masculinity in American literature from a generally, but not exclusively, feminist perspective. Subjects include what masculinity has meant at different times in United States history, and how it has varied in meaning and significance according to broad categories of identity such as social class, race, region, and queerness.

E X23J. Jewish Stereotypes in American Literature and Culture.
Examine stereotypes that have come to define Jewishness in American culture by focusing both on the antisemitic tropes perpetuated by non-Jewish representations of 'the Jew' in literary classics and on the archetypes employed as coping mechanisms in cultural representations created by Jews themselves. Analyze how stereotypes become enmeshed in cultural consciousness and investigate ways in which representations of ethnic, religious, and racial minorities are governed by these kinds of one-dimensional archetypes.

E X23L. English as a World Language.
An account of the spread of English around the world; national, social, and regional varieties.

E X23N. Critical Race Theory and the Novel.

E X23P. Physicians and Their Fictions.

E X23Q. Queer of Color Critique.

E X23R. Migration Literature.

E X23S. The Global Short Story.

E X23T. Envisioning Muslims: The Middle Ages and Today.
Examine representations of Muslims in the dominant cultural media of the European Middle Ages, and in cultural media of the twentieth- and twenty-first centuries. Explore how Europeans envisioned Muslims, and how Muslims envisioned themselves.

E X23U. Race, Gender, and Political Economy in United States Literature.
Explore the intersection of race, class, and gender relations, gender expression, and gender norms as constitutive of real and imagined political economies in literature and films by black, indigenous, and Latine authors and producers in the United States.

E X23V. Multiethnic Popular Culture.
Examine a selection of popular genres through the lens of contemporary multiethnic and world literature and culture.

E X23W. Women's Autobiographical Writing.
Examines the autobiographical impulse in women's writing by exploring the concept of the individualistic self versus the sense of self as a part of community and duty, and the way in which that communal self can both partake of humankind and participate in self-actualization.

E X24C. The Graphic Novel.
An analysis of the graphic novel. Representative authors include Lynd Ward, Jaime and Gilbert Hernandez, Art Spiegelman, Alan Moore, Neil Gaiman, Chris Ware, Marjane Satrapi, and Alison Bechdel.

E X24F. The Faustus Legend in Theatre, Fiction, and Film.

E X24L. Literature, Health, and Medicine.

Examine literature about illness, healing, health, and health care. Explore the overlapping fields of literature and medicine and the health or medical humanities, with some attention also paid to disability studies. Consider the role that literature and the humanities can play in the education of health professionals.

E X24M. Troubled Literary Marriages.

Examine how the personal lives of authors may be expressed in their works. Use biographies, memoirs, letters, and the words of the authors, both in their creative and private lives, to explicate some of the major texts of the twentieth century.

E X24O. Fiction and Medievalism.

Through selected works of fiction, literary criticism, poetry, visual arts, and film, explore how the category of 'the medieval' has been constructed, and its imagery activated, in post-medieval settings from the eighteenth century onwards.

E X24R. Film Adaptations and Complexity.

E X24S. Folklore and Literature.

Introduction to folklore methods as they relate to the study of literature.

E X25S. Perversity and Self-interest.

E X25T. Media Theory and Literary Criticism.

E X26K. The Literature of the Middle Ages in Translation.

Romances, chronicles, legends, tales, and plays by English, Celtic, and Continental writers.

E X26L. Survey of Middle English Language and Literature.

Language and literature from 1100 to 1500.

E X27. The British Novel in the Eighteenth Century.

Representative novels and novelists from 1700 to 1832, including typical works of Defoe, Richardson, Fielding, Sterne, Austen, and Scott.

E X28. The British Novel in the Nineteenth Century.

Representative works by such writers as Dickens, Thackeray, the Brontes, Eliot, Meredith, and Hardy.

E X29R. The Romantic Period.

The prose and poetry of writers such as Blake, Wordsworth, Coleridge, Byron, Keats, Shelley, and others.

E X29S. Topics in English.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E X33P. Contemporary African Writing in English.

E X35P. Business of Writing.

Study the book publishing landscape including traditional and non-traditional career paths available to writers and those interested in the publishing industry. Analyze the publishing process, from concept to finished book: the acquisition, editorial, publicity, marketing, and sales stages of a book's life.

E X36E. British Literature: Beginnings through the Renaissance.

A survey of major writers, poetry, and prose.

E X37. American Literature: From the Beginnings to 1865.

A survey of major writers, poetry, and prose.

E X37E. British Literature: The Restoration through the Romantic Era.

A survey of major writers, poetry, and prose.

E X38. American Literature: From 1865 to the Present.

A survey of major writers, poetry, and prose.

E X38E. British Literature: The Victorian Era through World War II.

A survey of major writers, poetry, and prose.

E X40. The American Novel before 1920.

Representative novels by such writers as Brown, Melville, Fern, Hawthorne, Twain, Crane, James, Wharton, and Dreiser.

E X40G. Contemporary Gothic.

E X40S. Literature and Culture of the 1960s.

E X41I. Irish Literature and Politics in the 20th Century.

E X41T. Digital Theatres.

E X42C. Black Cops in African American Popular Culture.

Explore the history of black policing in America and representations of black police officers in popular literature and film of late Twentieth Century America.

E X42D. 21st Century Latinx Literature.

Explore Latinx literature from the past two decades including both literary form and political engagement, with an emphasis on Latina, queer, and nonbinary writers.

E X42F. Life and Literature of the Southwest.

Examine literature reflecting the social inheritance of the Southwest through verse, fiction, travels, and memoirs.

E X42J. Latinx Young Adult Literatures.

E X42L. Latinx Legend Tripping.

Explore narrative folklore from diverse traditions across the United States based Latinx diaspora. Focus on supernatural legends and the creation of the female "monster".

E X42M. Life and Literature of the US-Mexico Borderlands.

Examine the literature of the US-Mexico borderlands experience, with an emphasis on the historical and social conditions that characterize this unique region. Explore this in the context of prose fiction, as well as drama, film, and poetry.

E X42P. Black Horror and Psychoanalysis.

Explore the intersection of race, horror aesthetics, and psychoanalytic theory.

E X42S. Southern Literature.

Introduction to and survey of the literature of the United States South. Explores methods of literary and cultural interpretation with focus on critical thinking, reading, and writing skills.

E X42T. Life and Literature of Texas.

Examines how Texas authors describe and explore the diversity and complexity of a state often seen in terms of myth and caricature. Works include literature from across the state by writers such as Katherine Anne Porter, Larry McMurtry, Cormac McCarthy, among others.

E X43C. Caribbean Literature.

E X43D. Disability, Race, and Sexuality in Literature and Culture.

E X43E. Latinx Short Story.

E X43F. Black Film at the Oscars.

E X43G. Global Environmental Literature and Film.

E X43I. Immigration Literature.

E X43J. Literature and Social Justice.

E X43L. Modernism and Literature.

Strands of thought and literature that form the network of modernist writing.

E X43M. Black Queer Literature and Film.

Analyzes written works, films, and videos by and about lesbians, bisexual, transgender, and gay black people, with an emphasis on understanding the historical and theoretical construction of sexual and gender identities and sexual/cultural practices in black communities.

E X43N. The Nobel Prize.

E X43O. Contemporary United States Latina/o Literature and Culture.

E X43P. Postmodern Literature.

Survey of postmodern writing. As a period, the postmodern extends roughly from the era after World War II, and follows the modern, a term often applied to literature produced since the start of World War I.

E X43Q. Lesbian, Gay, Bisexual, Transgender, and Queer Literature and Culture.
E X43R. Contemporary Native American Literature.
E X43S. Sustainability and Representation.
E X43T. Contemporary Asian American Novels.
E X43U. Literature, Health, and Disease.
E X43V. Literature of AIDS in Africa.
Examine the emerging cultural representations of AIDS in sub-Saharan Africa through journalistic, social science, and historical accounts. Explore the difficulty of representing the various aspects of a public-health crisis.
E X43W. Contemporary African American Women's Fiction.
E X44C. Young Adult: Fiction and Film.
See the works as embedded in specific historical, artistic, and cultural contexts that must be engaged in order to understand their expressed values and concerns about youth culture, specifically and comparatively. Discussions and analyses focus on aesthetics, form, and genre, framed by critical approaches and reading strategies rooted in film, genre, feminist, cultural, ethnic, and gender studies.
E X44D. Australian Literature and Film.
E X44E. New York School Poets and Artists.
E X44F. Film Theory.
E X44G. Gossip and Poetry.
E X44I. Twenty-First Century Poetry.
E X44J. Binge-Watching: A Cultural History.
E X44M. Major Film Movements.
E X44N. Film Noir.
E X44O. Popular Music and Youth Subcultures.
E X44P. Hollywood Babylon.
Explore Hollywood's symbolic role in American culture, and the genre of the Hollywood story, as seen in an array of representations of Hollywood (primarily in films and novels, but also in essays, poems, paintings, photographs, songs, fan magazines, and notorious counter-historical accounts such as Kenneth Anger's Hollywood Babylon).
E X44Q. Crime and Capitalism in African American Popular Culture.
Examine the intersection of crime and capitalism in black literature, motion pictures and music of late twentieth and early twenty-first Centuries.
E X44R. Childhood and Adolescence in Literature and Film.
Examine historical to contemporary representations of childhood and adolescence in literature, film, culture, and society.
E X44S. Film Auteurs.
E X44T. The Animated Film as Text.
E X44V. Music Videos: History and Theory.
E X44W. Citizen Kane and Company: The Essential Films.
Examine a select body of films, ranging from the early sound era to the present, that changed the vernacular of filmmaking, opened up new generic or stylistic directions, or epitomized the work of a widely influential director. Explore film history and theory, an introduction to the study of film genres and movements, the major tactics and techniques of film analysis, and the rigorous study of filmic texts.
E X45D. Drugs in African American Popular Culture.
Examine the legal, political, and philosophical intersection of blackness, whiteness, and drugs in the late twentieth century through film, music, and literature.
E X45F. Food Writing, Culture, and Environment.
Trace the origins of food writing and explore the ways the genre engages with contemporary issues of cultural definition, political action, and global sustainability while activating various definitions of taste and judgment ascribed to aesthetic and philosophical pursuits.
E X45S. Gender and Speculative Fiction.
Examine how writers have used speculative fiction--including science fiction, utopia, and dystopia--as a tool to explore gender, race, sexuality, humanity, ethics, disability, and the environment.
E X45T. The Theater in Austin.
E X45W. English Syntax for Writing.
E X46C. Contemporary Poetry (1945 to the present).
Survey poetry written in English from 1945 to the present. Examine how it has responded to and helped to shape the cultural and aesthetic questions of its times. Consider poetic movements and developments such as the so-called "middle generation," the Black Mountain School, the Beats, the San Francisco Renaissance, the New York School, Confessional poetry, Deep Image poetry, the Black Arts Movement, the Movement, Language writing, post-confessional lyric, hybrid poetics, and conceptual poetry, among others.
E X46V. Hitchcock's Vertigo in Context.
E X48. The Short Story.
Extensive readings and analyses of stories by major modern writers such as Faulkner, Hemingway, Joyce, Chekhov, and Kafka, as well as contemporary writers.
E X48C. Julia Alvarez and Sandra Cisneros.
E X48J. J. M. Coetzee.
E X48M. Cormac McCarthy.
Explore the work of Cormac McCarthy (1933-2023) and its representation of the United States South, Southwest, and Mexico.
E X48P. Plath and Sexton.
Explore the works of Sylvia Plath and Anne Sexton.
E X48S. Zadie Smith.
E X48T. J.R.R. Tolkien.
E X48U. Bruce Springsteen.
E X48W. Wes Anderson.
E X49D. Danticat and Diaz.
E X49S. Topics on Major Authors.
Intensive study of the works of a single major author or two major authors.
E X49S.1. Jane Austen.
E X49S.10. Graham Greene.
E X49S.11. Nathaniel Hawthorne.
E X49S.12. Alice Munro.
E X49S.13. Charles Dickens.
E X49S.14. David Foster Wallace.
E X49S.15. Edgar Allan Poe.
E X49S.16. Ernest Hemingway.
E X49S.17. George Eliot.
E X49S.18. Chaucer and Shakespeare.
E X49S.19. Shakespeare and Marlowe.
E X49S.2. The Brontes.
E X49S.20. Greta Gerwig.
Examine the works of a single major author or two major authors.
E X49S.3. James and Wharton.
E X49S.4. James Joyce.
E X49S.5. Toni Morrison.
An examination of select novels by the Nobel Laureate and Pulitzer Prize-winning novelist focuses on the positional uniqueness that womanism shares with a predominant feminism, which surfaces in historicized familial relationships.
E X49S.6. Walt Whitman.
E X49S.7. Oscar Wilde.
E X49S.8. Virginia Woolf.
Examines critical and fictional works of Virginia Woolf and the author's continuing legacy and influence. Explores the value and limitations of high modernism; English literary heritage and tradition; feminism; creative and critical definitions of gender and sexuality; intellectual activism, including Woolf's critiques of patriarchy, war, and fascism; and Woolf and imperialism and colonialism.

E X49S.9. William Faulkner.
E X49W. Bob Dylan.
E X50E. Topics in Language and Literature: Beginnings to 1630.
E X50E.3. Literature and the Visual Arts.
Examines the relationship between words and images across a broad historical sweep.
E X50M. Topics in Language and Literature: 1630 to 1830.
E X50R. Topics in Language and Literature: 1830 to 1940.
E X50R.1. Law, Society, and the Novel in Nineteenth-Century Britain.
E X50R.3. Literature, Cultural Memory, and the American Civil War.
Examines the American Civil War not in terms of its military or political history but in relation to the ways literary and cultural texts have remembered and rewritten it.
E X50R.4. The Paperback.
Introduction to basic bibliography terminology and book history by tracking the evolution of the modern paperback, from 1850 to now, by means of author case studies.
E X50V. Topics in Language and Literature: 1940-Present.
E X50W. American Women Writers.
E X51D. Angels and Devils in Victorian Fiction.
E X51E. Victorian Oxford.
Consider and discuss Oxford University and the city of Oxford through the lens of nineteenth-century texts set in and around the region.
E X51F. Literature and Business in Nineteenth-Century Britain.
E X51L. London: One Hundred Years Ago.
E X51O. Literature of Oxford.
E X51P. Paradise Lost: Reception History.
E X51V. Nineteenth Century Novels and Their Adaptations.
Analyze how late twentieth- and twenty-first century adaptations change nineteenth-century novels to appeal to modern audiences.
E X52C. Classical Backgrounds of Literature.
E X52D. American Dante.
Examine the influence of the Italian poet Dante on American culture from the nineteenth century to the present.
E X52I. Interwar United States Literature.
E X52K. Arthurian Literature and Film.
A survey of the major Arthurian narratives from their origins in the Middle Ages to the present in various textual (prose, poetry, drama) and visual (illustration, film, graphic) forms.
E X52V. Viking Literature.
A survey of early Norse and Anglo-Scandinavian prose and verse--saga; chronicle, heroic epic, and mythological (eddic and skaldic) verse--with attention to the image of the viking in contemporary popular culture.
E X53R. Literature of the Harlem Renaissance.
E X53W. Women in the Nineteenth-Century British Novel.
E X54C. Crime Fiction.
E X54D. Post-Darwin Novel.
E X54M. From Middlemarch to Modernism.
E X54P. Modern Poetry (1900-1945).
Survey poetry written in English from 1900 to 1945, including consideration of significant nineteenth-century precursors. Examine modern poetry's characteristic formal techniques, its preoccupations, and its key poets. Consider poetic movements and developments such as the "new" poetry, Georgian poetry, Regionalism, the poetry of World War I, Imagism, High Modernisms, so-called "Sentimental" Modernism, the New Criticism, the Harlem Renaissance, Documentary Poetry, and Objectivism, among others.
E X55V. Vampires and Dandies.
E X56. The European Novel.
Selected masterpieces of continental fiction in English translation; representative novelists of the nineteenth and twentieth centuries.
E X58D. Dickinson and Whitman.
Explore the works of Emily Dickinson and Walt Whitman.
E X58E. Eliot and Hardy.
Explore the works of George Eliot and Thomas Hardy.
E X58F. Faulkner and O'Connor.
Explore the works of William Faulkner and Flannery O'Connor.
E X58J. The Bible as Literature.
In-depth literary study of the Bible, with emphasis on the formal features of narrative, hymn, prophecy, apocalypse, gospel, and epistle.
E X58K. The Bible in British and American Literature.
The reading of biblical masterpieces as literature; consideration of different versions of the Bible and their influence on British and American literature.
E X58P. Robert Frost.
E X58Q. Supervised Research.
Student-initiated research conducted with instructor supervision.
E X58R. Research Apprenticeship.
Supervised research on a faculty-initiated project.
E X59. British Drama from 1660 to 1900.
Representative drama texts from the Restoration to the beginnings of modern theatre, including Behn, Sheridan, Wilde, and Shaw.
E X60C. Postcolonial Literature.
Examine the struggles of the migrant and exile with questions of identity, belonging, home, citizenship, and culture.
E X60K. English Grammar.
The study of traditional and transformational grammar. Attention to social differences in language relevant to the teaching of English.
E X60R. Literary Studies for High School Teachers of English.
Intended for students seeking a secondary school teaching certificate. The principles and practices of teaching literature in secondary schools.
E X61K. British Drama to 1642.
A survey of early British drama, usually including works by Marlowe, Kyd, Shakespeare, Jonson, Webster, and Middleton.
E X61S. The Scriblerians.
Explore selected works of members of The Scriblerus Club, formed as a counter-culture response to the elite British literary scene from which they were excluded in the early- to mid-1700s, which include works by Alexander Pope, Jonathan Swift, and John Gay.
E X62L. The Contemporary British Novel.
Representative novels, including those of Joyce, Lawrence, and Woolf.
E X63. Milton.
All the poetry of Milton, with particular attention to Comus, Samson Agonistes, and Paradise Lost.
E X63K. Classic to Romantic.
The theory and practice of Classicism in literature and other arts; the rise of the Romanticists in the eighteenth century.
E X63S. Early Black Atlantic.
E X64E. African American Language.
Introduction to the history and contemporary form of African American Language (AAL). Through readings, examine the linguistic description of essential features, the use of AAL in the creation of culturally and historically influential texts, and AAL as a subject of public discussion.
E X64M. History of the English Language.
Development of sounds, forms, and vocabulary of the English language from its origins to the present.
E X64P. Old English.
An introduction to Old English with sufficient grammar for a reading knowledge of Old English texts. A course in language, not in linguistics.
E X64T. The English Language and Its Social Context.
English language history, theory, and research for students of literature and rhetoric. May include such topics as language diversity and variation, linguistic attitudes, language variety and education, and language and public policy.

E X64V. Sailors, Explorers, and the British Novel.

E X66D. Dante.

E X66K. Shakespeare: Selected Tragedies.

Explore and analyze six selected Shakespeare tragedies to differentiate these plays from those in other genres (comedy, history, romance); examine the elements of Shakespeare's language and stagecraft that contribute to the lasting cultural prominence of his work.

E X67C. Conference Course in Literature and Language.

For students who wish to work under supervision on specific projects in literature or language.

E X67E. English Internship.

Research and staff experience working in an appropriate agency or private business.

E X68D. Bradstreet and Wheatley.

Explore the works of Anne Bradstreet and Phillis Wheatley.

E X68H. Honors Tutorial Course I.

Research into and development of a thesis topic and proposal.

E X68S. Scott and Wordsworth.

Explore the works of Walter Scott and William Wordsworth.

E X69. Twentieth-Century Drama.

Ibsen and other major dramatists; tradition and innovation in the substance and form of selected modern plays.

E X69H. Honors Tutorial Course II.

Writing and defense of an Honors thesis. Individual instruction.

E X70. Victorian Prose: Essays and Ideas.

The prose writer as artist and sage in the cultural, political, religious, and scientific controversies that influence the modern tradition. Representative writers: Carlyle, Mill, Newman, Arnold, Darwin.

E X70H. Honors Tutorial Course for Teachers.

Research into and development of a thesis topic and proposal followed by the writing and defense of a thesis.

E X71C. Early Celebrity Culture.

E X71S. Shakespearean Afterlives.

E X71T. Love and Betrayal in Troy.

E X72L. The American Renaissance.

Selected writers of the pre-Civil War Romantic movement, including Emerson, Douglass, Fuller, Hawthorne, Melville, Thoreau, Whitman, and others.

E X72M. American Realism.

Selected writers of the post-Civil War realistic movement: Howells, Twain, James, Jewett, Freeman, Crane, and others.

E X73M. Early Globalisms, 500-1500 CE.

Examine, through global literature, the interconnected worlds, humans, activities, and cultures in the approximate time frame of a thousand years to discover what they reveal of early globalisms.

E X73R. Race in the Middle Ages.

E X74C. Medieval Romance.

E X74G. Beowulf.

An extended reading of the work in its cultural and literary context.

E X74K. Elizabethan Poetry and Prose.

Renaissance thought and culture as revealed in the lyric and narrative poetry and in the prose masterpieces.

E X74L. The Earlier Seventeenth Century: Donne, Jonson, and Their Contemporaries.

Poetry and prose, 1600 to 1660: the metaphysical and other leading traditions in poetry; the early poems of Milton; the essay, the character, and other prose forms.

E X75D. Narratives of Discovery and Conquest.

E X75J. Drama of Jamestown.

E X75L. Victorian Literature.

Poetry and prose, 1832 to 1901; parallel reading in the novel and drama, and attention to the social and intellectual background of the period.

E X75R. The Image of the Cannibal in the Renaissance.

E X76. Chaucer.

Introduction to Chaucer's narrative and poetic art, as shown in a selection from the dream poems, Troilus and Criseyde, and the Canterbury Tales.

E X76F. Gender, Class, and Ethnicity in American Literature and Film.

E X76R. African American Literature through the Harlem Renaissance.

A survey of African American writing, including autobiography, poetry, fiction, and drama. Authors may include Douglass, Jacobs, Frances E. W. Harper, Chestnutt, Du Bois, Hurston, and Hughes.

E X76S. African American Literature since the Harlem Renaissance.

The development of African American poetry, drama, fiction, and nonfiction since the Harlem Renaissance. Authors may include Wright, Ellison, Baldwin, Malcolm X, Baraka, Morrison, Shange, and Charles Johnson.

E X77K. The American Novel after 1920.

Representative works by such writers as Faulkner, Hemingway, Fitzgerald, Larsen, Hurston, Morrison, Bellow, Erdrich, and Tan.

E X77M. The American Novel after 1960.

Examines American novels and short stories from the 1960s to the present. Considers the aesthetic and narrative innovations of the period in light of social, historical, technological, and political developments. Representative authors include Pynchon, Roth, Morrison, DeLillo, Silko, Robinson, Egan, and Diaz.

E X78E. Edmund Spenser.

E X78S. Shakespeare at Winedale.

Study and readings of selected works and criticism, culminating in public performance of the plays. For English 678SB, students are required to be in residence at Winedale near Round Top, Texas.

E X79. American Literature and Thought: 1600-1840.

Early American literature as an embodiment of American thought and experience. Such topics as European ideas in the New World; the political ideas of Hamilton, Jefferson, and Jackson; nationalism; industrialism.

E X79D. Digital Research Lab.

Participate in original faculty research in the Digital Humanities in a project-based, hands-on setting.

E X79K. American Literature and Thought: 1840-1920.

Such topics as transcendentalism, manifest destiny, Utopian thought, and the impact of the theory of organic evolution.

E X79L. Contemporary Drama.

Major playwrights since 1950, such as Williams, Shepard, Beckett, Stoppard, Churchill, Fugard, and Pinter.

E X79P. Drama in Performance.

Intensive study of drama through active performance as a means of interpretation and an aid to comprehension.

E X91L. Conference Course on Special Topics.

Graduate Courses

E X19S. Topics in English.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E X29S. Topics in English.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E X81E. Practicum in Editing.
Practice editing a literary journal.
E X81F. Literature for Writers.
Analyze readings in fiction, poetry, drama, literary criticism, biography, and autobiography from the point of view of a creative writer rather than that of a scholar.
E X82J. Studies in Linguistic Analysis.
Lectures, textual analysis, outside readings.
E X82L. Topics in Linguistics and Literature.
Intensive study of specialized subjects.
E X83L. Topics in The Teaching of English Composition and Literature.
A study of the major components of the English program in secondary school or college.
E X83L.1. World Literature and Globalism: Theory and Practice.
E X84K. Topics in Methods of Literary Research.
Issues addressed include methods of literary and cultural interpretation, archival research, academic publishing, and professional development.
E X84K.2. Disciplinary Inquiries.
E X84L. Scholarly Publication.
E X84M. Professional Outcomes.
E X85F. Workshop in Fiction.
E X85W. Creative Writing: Workshop in Fiction and Poetry.
Intended for graduate students who are not in a master of fine arts program.
E X86P. Workshop in Poetry.
E X87M. Topics in Rhetoric.
Advanced study of topics in rhetorical theory and in ancillary disciplines.
E X87N. Topics in Methods of Research in Rhetoric and Composition.
A study of the theory, practice, and history of research in rhetoric and composition.
E X87P. Topics in Productions in Rhetoric.
Applications of rhetoric to professional writing.
E X87R. Topics in Rhetorical History.
Topics include classical rhetoric, medieval and Renaissance rhetoric, eighteenth- and nineteenth-century rhetoric, and twentieth-century rhetoric.
E X88D. Topics in Digital Humanities.
Explore language and digital technology.
E X89M. Topics in British and American Literature.
Selected British and American writers and issues.
E X89P. Topics in Women, Gender, and Literature.
E X90M. Topics in European Literature.
A study of the impact of European writers on British or American literature.
E X91F. Field and Prospectus Examination.
Prepare for required Field and Prospectus examinations under the supervision of a faculty member.
E X91L. Conference Course on Special Topics.
E X92M. Topics in English Literature.
E X93C. Topics in Criticism and Theory.
Explore topics in literary and cultural criticism and theory.
E X95M. Topics in American Literature.
E X95N. Topics in the History of Language.
E X95N.1. Old English.
E X96E. Topics in Language and Media.
Discuss and interpret visual, audio, or digital media.
E X96E.1. Introduction to Film Analysis.
E X96E.2. Film Analysis for Literary Scholars.
E X96L. Topics in the English Language.
E X97M. Topics in the Literatures and Cultures of the English Speaking World.
E X97N. Topics in Ethnic and Third World Literatures.
E X98. Thesis.
Research and writing of a thesis under the supervision of the chair of the supervising committee and subject to the approval of the committee and the graduate dean.
E X98D. Digital Studies Practicum.
Practical work on a faculty-led digital studies research project, planned and carried out in consultation with the supervising instructor.
E X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
E X98T. Supervised Teaching in English.
E X99W. Dissertation.

Professional Courses

E X19S. Topics in English.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of English. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

E M - Engineering Mechanics

Engineering Mechanics: E M

Lower-Division Courses

E M X06. Statics.
Vector algebra, force systems, free-body diagrams; engineering applications of equilibrium, including frames, friction, distributed loads; centroids, moments of inertia.
E M X11M. Dynamics.
Kinematics, dynamics, and energy and momentum methods for points as well as 2D/3D rigid bodies. Describe and predict the motion of different types of rigid bodies in space and time. Vibrations of simple systems.
E M X19. Mechanics of Solids.
Internal forces and deformations in solids; stress and strain in elastic and plastic solids; application to simple engineering problems.
E M X19S. Topics in Engineering Mechanics.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education programs.
E M X19T. Topics in Engineering Mechanics.

Upper-Division Courses

E M X39. Advanced Strength of Materials.
Curved beams, shear deformation, beam columns, beams on elastic foundations; inelastic behavior of members; elementary plate bending.
E M X60. Topics in Engineering Mechanics.
Advanced work in the various areas of engineering mechanics, based on recent developments.

E M X79S. Topics in Engineering Mechanics.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's International Engineering Education Programs.

Graduate Courses

E M X80. Theory of Plasticity.
Physical basis of plastic deformation; mathematical theory of incremental plasticity; total theories; numerical implementation; slip and physical theories of plastic deformation; rate dependent (viscoplastic) models; applications to several engineering problems.

E M X81. Advanced Dynamics.
Dynamics of systems of particles and rigid bodies; vibration theory; analytical dynamics, including Lagrangian and Hamiltonian formulations; dynamic stability; continuous systems.

E M X82. Nonlinear Analysis.
Methods for analyzing various types of nonlinear differential equations of dynamical systems; exact methods, perturbation and averaging techniques, direct method of Liapunov.

E M X84K. Continuum Mechanics.
Foundations of the general nonlinear theories of continuum mechanics; general treatment of motion and deformation of continua, balance laws, constitutive theory; particular application to elastic solids and simple materials.

E M X84L. Structural Dynamics.
Free and forced vibration of single-degree-of-freedom, multiple-degree-of-freedom, and continuous systems. Lagrange's equations and Hamilton's principle; discretization of continuous systems; numerical methods for response and algebraic eigenvalue problems.

E M X86K. Analytical Methods I.
Basic topics in real and complex analysis, ordinary and partial differential equations, and other areas of applied mathematics with application to applied mechanics.

E M X86L. Analytical Methods II.
Continuation of Engineering Mechanics 386K.

E M X86M. Functional Analysis in Theoretical Mechanics.
An introduction to modern concepts in functional analysis and linear operator theory, with emphasis on their application to problems in theoretical mechanics; topological and metric spaces, norm linear spaces, theory of linear operators on Hilbert spaces, applications to boundary value problems in elasticity and dynamical systems.

E M X86N. Qualitative Methods in Nonlinear Mechanics.
A study of methods for assessing the qualitative behavior of solutions to equations governing nonlinear continuum mechanics.

E M X87. Foundations of Fluid Mechanics.
Governing equations in differential and integral forms; applications to both inviscid and viscous flow problems.

E M X88. Solid Mechanics I.
Mathematical description of stress, deformation, and constitutive equations of solid mechanics; boundary value problems of elasticity.

E M X88F. Fracture Mechanics.
Griffith theory of brittle crack propagation, other theories, crack toughness testing concepts.

E M X88L. Solid Mechanics II.
Continuation of Engineering Mechanics 388. Additional topics in elasticity, plasticity, viscoelasticity, variational methods, and other areas of solid mechanics.

E M X88M. Micromechanics.
Constitutive characterization of materials based on their microstructure. Relationships between internal structure and mechanical properties for composites, polycrystals, and polymers on the basis of linear elasticity, plasticity, and theories that account for rate-dependence.

E M X88N. Mechanics of Soft Materials.
Introduction to soft tissues and soft tissue mechanics; continuum mechanics (kinematics, stress, balance laws and hyperelasticity); and nonlinear finite element analysis in soft tissue mechanics.

E M X88S. Soft Tissue Biomechanics.
Introduction to soft tissues and soft tissue mechanics; continuum mechanics (kinematics, stress, balance laws and hyperelasticity); and nonlinear finite element analysis in soft tissue mechanics.

E M X88T. Thin Film Mechanics.
Discuss an extensive overview of mechanics-related subjects including stress, strain, fracture, delamination, instability, characterization, and important applications of thin films.

E M X88V. Theory of Viscoelasticity.
Introduction to linear viscoelasticity; methods of characterizing viscoelastic material behavior; analytical and approximate solution techniques for engineering problems, including contact, wave propagation, and thermoviscoelastic problems.

E M X89J. Experimental Mechanics.
Principles and techniques of measurement in mechanics; includes discussion of strain gauges, optical interference methods, photoelasticity, and dynamic measurements.

E M X91. Behavior and Mechanics of Active/Smart Materials.
Continuum physics and thermodynamics including thermal, mechanical, electrical and magnetic behaviors of active/smart materials. Linear and non-linear behavior of ferroelectrics, ferromagnetic materials, and shape memory alloys. Crystal symmetry, domain structure, phenomenological constitutive models, phase-field modeling, and dielectric elastomers.

E M X92R. Random Vibrations.
Introduction to probability theory and its application to random excitation of linear and nonlinear systems; a probabilistic discussion of failure and fatigue in structures.

E M X93N. Numerical Methods for Flow and Transport Problems.
Approximate solution methods for flow and transport problems in engineering and applied science. Finite element, finite difference, and residual methods for linear and nonlinear problems.

E M X94. Structural Stability.
Fundamental theory of buckling of elastic structural elements such as bars, frames, rings, plates, and shells; also special stability topics including inelastic buckling, creep buckling, and buckling under dynamic loading.

E M X94F. Finite Element Methods.
Derivation and implementation of the finite element method; basic coding techniques; application to problems of stress and diffusion.

E M X94G. Computational Techniques in Finite Elements.
Organization and data management in finite element codes; element models and calculations; equation solving; preprocessing and postprocessing.

E M X94H. Advanced Theory of Finite Element Methods.
Contemporary topics in the theory and application of finite element methods.

E M X94V. Wave Propagation I.
Solutions of linear wave equations; waves in elastic media, including plates and cylinders; transient waves, transform methods, asymptotic approximation.

E M X97. Topics in Advanced Engineering Mechanics.

E M X97.1. Advanced Topics in Viscoelasticity.

E M X97.2. Individual Research.

E M X97.3. Advanced Computational Flows and Transport.

E M X97.4. Grid Generation and Adaptive Grids.

E M X97.5. Adaptive Boundary/Finite Element Methods.

E M X97.6. Introduction to Machine Learning and Data Sciences.
Discuss machine learning algorithms, including linear models, kernel machines, tree-based algorithms, density estimation, clustering, dimensionality reduction and deep neural networks; foundations of machine learning, including optimization theory, probability theory, advanced linear algebra, statistics; evaluation of machine learning methods; and convolutational neural networks.

E M X97R. Individual Research.
Must be arranged by mutual agreement between student and faculty member.
E M X97S. Mechanics Seminar.
Current topics in mechanics.
E M X97T. Computational Mechanics Seminar.
Current topics in computational mechanics.
E M X98. Thesis.
E M X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
E M X98T. Supervised Teaching in Engineering Mechanics.
Teaching methods and objectives, criteria for evaluating teaching effectiveness, procedures and regulations, laboratory teaching.
E M X99W. Dissertation.

Professional Courses

E S - Engineering Studies

Engineering Studies: E S

Lower-Division Courses

E S X01. Engineering Design and Problem Solving.
Intended for non-Cockrell School of Engineering students. Introduction to the scope of engineering, foundations of engineering science, and engineering design.
E S X02. Spatial Visualization.
Instruction in the learned ability to mentally manipulate two- and three-dimensional structures.
E S X19. Topics in Engineering.
E S X19S. Topics in Engineering Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
E S X60. Service Learning for Engineers.
Supervised participation in a service-learning project that helps meet a community need.

Upper-Division Courses

E S X21G. GLUE Undergraduate Research.
Research experience and seminar for undergraduate engineers. Seminar involves workshops, discussion, and oral reports. Semester long research project required.
E S X22. Topics in Professional Development.
Small-group seminar involving reading, discussion, and oral reports.
E S X22.1. EOE Career Development Seminar.
Introduction to skills and professional practices in engineering.
E S X22.2. EOE Leadership Development Seminar.
Introduction to professional practices that focus on self-awareness and in-depth discussion of leadership styles and skill development.
E S X22.3. WEP Leadership Seminar.
Practical applications to assess leadership and communication styles.
E S X25C. Humanitarian Product Design.
Design a product that addresses the needs of people in marginalized communities such as those living in refugee camps or in other severely resource-limited environments. Examine and apply design tools, project management methods, and other principles of product development. Present project to an advisory board.
E S X25D. Humanitarian Product Prototyping.
Build and test prototype. Examine and apply design tools, project management methods, and other principles of product development. Present project to an advisory board.
E S X25K. Cooperative Engineering.
Covers the work period of engineering students in the Cooperative Engineering Program.
E S X25L. Cooperative Engineering.
Covers the work period of engineering students in the Cooperative Engineering Program.
E S X25N. Cooperative Engineering.
Covers the work period of engineering students in the Cooperative Engineering Program.
E S X29S. Topics in Engineering Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
E S X33T. Engineering Communication.
Explore technical communication skills for engineers, especially researching and writing technical documents for many kinds of readers, managing and documenting sources of information, using and explaining graphics, delivering oral presentations, working collaboratively, and eliciting information from experts and stakeholders.
E S X58C. Industrial Design I.
Explore methods and techniques for industrial design.
E S X60. Service Learning for Engineers.
Supervised participation in a service-learning project that helps meet a community need.
E S X60M. Experiments in Materials Science and Engineering.
Hands-on lab-based course designed to teach practical techniques in the synthesis and characterization of materials and their properties, and to use experiments to explore fundamental and potentially abstract materials concepts.
E S X69N. Sustainability Issues in Energy.
Introduction to sustainable energy in the context of sustainable development goals and the technologies that can help achieve them. Discuss carbon capture and sequestration; geothermal energy; hydrogen storage and distribution; solar, wind, and biomass power generation; and batteries and distribution networks.
E S X70H. Engineering Entrepreneurship.
Principles of engineering entrepreneurship, including legal aspects and the ethics of practice.
E S X70L. Nanofabrication and Nanomaterials.
Covers the basic tools and materials involved in the fabrication processes needed to create nano-scale structures and functional nanomaterials.
E S X70M. Nanodevices.
Covers the basic theory behind nano-scale devices used in the electronics, display, and energy industries.
E S X70N. Nanotechnology Innovation.
Provides a framework for innovation with a specific focus on applications of nanotechnology.
E S X70O. Nanometrology and Big Data.
Explore key concepts of metrology and data analytics in nanomanufacturing systems. Discuss the key steps in big data analytics which enable transformation of metrology and sensing data into optimal decisions. Examine key enabling methodologies and examples for statistical and dynamic modeling of big data in nanomanufacturing systems, as well as how those models are used for system-wide optimal decisions in terms of process control and system operations.
E S X77. Topics in Engineering.
E S X77.1. Longhorn Startup Seminar.
Overview of entrepreneurship using real-world examples.

E S X77.2. 21st Century Grand Challenges.
Explore the five components of the NAE Grand Challenges Scholars Program: grand challenges research and design, interdisciplinary curriculum, entrepreneurship, global perspectives, and service learning.

E S X77E. Interdisciplinary Entrepreneurship: Elective.
Projects must differ significantly from those developed for Electrical Engineering 364D and 364E. Focus on skill development and mentoring in start-up formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Includes discussion of intellectual property, social issues in design, as well as ethical and safety considerations. Emphasis on written and oral presentation of start-up activities.

E S X77K. Project Development with Underserved Communities.
Focus on skills to initiate, evaluate, and plan an international engineering service project with an underserved community.

E S X77L. Project Design with Underserved Communities.
Focuses on design of basic infrastructure systems in developing countries.

E S X77M. Project Implementation with Underserved Communities.
Taught on location in international locations such as India, Tanzania, and Guatemala. Entails implementation of project, collecting information for future projects, and checking on previously completed PUC projects if applicable.

E S X79K. Undergraduate Research Experience.
Directed study or research in a selected area of engineering.

E S X79L. Women in Engineering Leadership Seminar.
Lectures, discussions, and exercises related to various leadership issues.

E S X79M. Undergraduate Research Experience.

Graduate Courses

E S X60. Service Learning for Engineers.
Supervised participation in a service-learning project that helps meet a community need.

E S X80L. Nanofabrication and Nanomaterials.
Provides an understanding of the basic tools and materials involved in the fabrication processes needed to create nano-scale structures and functional nanomaterials.

E S X80M. Nanodevices.
Provides an understanding of the basic theory behind important nano-scale devices used in the electronics, display, and energy industries.

E S X80N. Nanotechnology Innovation.
Provides a framework for innovation with a specific focus on applications of nanotechnology.

E S X80O. Nanometrology and Big Data.
Explore key concepts of metrology and data analytics in nanomanufacturing systems. Discuss the key steps in big data analytics which enable transformation of metrology and sensing data into optimal decisions. Examine key enabling methodologies and examples for statistical and dynamic modeling of big data in nanomanufacturing systems, as well as how those models are used for system-wide optimal decisions in terms of process control and system operations.

E S X97. Special Subjects in Engineering.

Professional Courses

E S X60. Service Learning for Engineers.
Supervised participation in a service-learning project that helps meet a community need.

ECE - Electrical and Computer Engineering

Electrical and Computer Engineering: ECE

Lower-Division Courses

ECE X02. Introduction to Electrical Engineering.
Examine the scope and nature of professional activities of electrical engineers, including problem-solving techniques; analysis and design methods; engineering professional ethics; analysis of analog resistive circuits, including Thevenin/Norton equivalents, mesh analysis, and nodal analysis; and operational amplifiers (DC response).

ECE X02H. Introduction to Electrical Engineering: Honors.
Examine the scope and nature of professional activities of electrical engineers, including problem-solving techniques; analysis and design methods; engineering professional ethics; analysis of linear and non-linear analog circuits, including Thevenin/Norton equivalents, two-port networks, frequency domain analysis, mesh analysis, and nodal analysis; and operational amplifiers (DC response).

ECE X06. Introduction to Computing.
Introduction to computing including bits and operations on bits, number formats, arithmetic and logic operations, and digital logic. Explore the Von Neumann model of processing including memory, arithmetic logic unit, registers, and instruction decoding and execution. Examine structured programming and debugging, machine and assembly language programming, the structure of an assembler, physical input/output through device registers, subroutine call/return; trap instruction, stacks and applications of stacks.

ECE X06H. Introduction to Computing: Honors.
Introduction to computing including bits and operations on bits, number formats, arithmetic and logic operations, and digital logic. Explore the Von Neumann model of processing including memory, arithmetic logic unit, registers, and instruction decoding and execution. Examine structured programming and debugging, machine and assembly language programming, the structure of an assembler, physical input/output through device registers, subroutine call/return; trap instruction, stacks and applications of stacks.

ECE X07E. Elements of Electrical and Computer Engineering.
Introduction to electrical engineering: direct current circuit analysis, resistors, LEDs, switches, current and voltage measurements. Introduction to computer engineering: number systems, digital logic, storage, finite state machines, programming basics, microcontrollers.

ECE X07H. Engineering Leadership: Honors.
Explore different research areas in electrical and computer engineering and participate in community service projects within the discipline.

ECE X08S. Topics in Technical Skills.
Explore the development of a specific technical skill.

ECE X09K. Topics in Electrical Engineering.

ECE X09P. Introduction to Professional Engineering.
Explore professional skills including academic success, career development, and engineering ethics.

ECE X09S. Development of a Solar-Powered Vehicle.
Analyze, design, and construct a solar-powered car for national competitions involving other universities. Study electrical, mechanical, and aerodynamic systems.

ECE X11. Circuit Theory.
Examine capacitance and inductance; first- and second-order transient circuit response, including operational amplifier circuits; sinusoidal steady state analysis; Bode plots; complex power in single and balanced three-phase systems; transformers; two-port networks (Z-parameters and Y-parameters); and computer-aided analysis and design.

ECE X11H. Circuit Theory: Honors.
Examine capacitance and inductance; first- and second-order transient circuit response, including operational amplifier circuits; sinusoidal

steady state analysis; Bode plots; complex power in single and balanced three-phase systems; transformers; two-port networks (Z-parameters and Y-parameters); and computer-aided analysis and design.

ECE X11S. Tools to Enhance Academic Success.
Explore the components necessary to enhance academic success in engineering coursework including academic self-regulation, time management, self-discipline, goal-setting, weekly and semester planning, growth mindset, self-motivation, management of anxiety and stress, learning and memory, learning strategies, retrieval practices, and exam preparation.

ECE X12. Software Design and Implementation I.
Explore basic problem solving, design and implementation techniques for imperative programming; structured programming in the C/C++ language; programming idioms. Examine software design principles, including modularity, coupling and cohesion; software engineering tools; elementary data structures; and asymptotic analysis.

ECE X12H. Software Design and Implementation I: Honors.
Explore basic problem solving, design and implementation techniques for imperative programming; structured programming in the C/C++ language; programming idioms. Examine software design principles, including modularity, coupling and cohesion; software engineering tools; elementary data structures; and asymptotic analysis.

ECE X13. Linear Systems and Signals.
Examine representation of signals and systems; system properties; sampling; Laplace and z-transforms; transfer functions and frequency response; convolution; stability; Fourier transform; feedback; and control applications. Explore computer analysis using MATLAB or Python.

ECE X13H. Linear Systems and Signals: Honors.
Examine representation of signals and systems; system properties; sampling; Laplace and z-transforms; transfer functions and frequency response; convolution; stability; Fourier transform; feedback; and control applications. Explore computer analysis using MATLAB or Python.

ECE X16. Digital Logic Design.
Explore boolean algebra; analysis and design of combinational and sequential logic circuits; state machine design and state tables and graphs; simulation of combinational and sequential circuits; applications to computer design; and hardware description languages (HDLs) and field-programmable gate arrays (FPGAs).

ECE X19H. Introduction to Embedded Systems: Honors.
Examine embedded systems; machine language execution; assembly and C language programming; local variables and subroutines; input/output synchronization; analog to digital conversion and digital to analog conversion; debugging; and interrupts.

ECE X19K. Introduction to Embedded Systems.
Explore embedded systems; machine language execution; assembly and C language programming; local variables and subroutines; input/output synchronization; analog to digital conversion and digital to analog conversion; debugging; and interrupts.

ECE X19S. Topics in Electrical and Computer Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the Department of Electrical and Computer Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ECE X21K. Mixed Signal and Circuits Laboratory.
Explore digital and analog parametric testing of mixed-signal circuits and systems, including frequency response, harmonic and intermodulation, and noise behavior; use of system-level test equipment, including network analyzers, spectrum analyzers, and probe stations; coherent versus noncoherent measurements; and design for testability.

ECE X22C. Software Design and Implementation II.
Explore methods for engineering software with a focus on abstraction; specification, design, implementation, and testing of object-oriented code using a modern development tool-set for complex systems; design and implementation of object-oriented programs in Java; abstract data types; inheritance; polymorphism; parameterized types and generic programming; the operation and application of commonly used data structures; exception handling and fault tolerance; algorithm analysis; and teamwork models.

ECE X25. Electromagnetic Engineering.
Examine electrostatics and magnetostatics; properties of conductive, dielectric, and magnetic materials; solutions of Maxwell's equations; uniform plane wave applications; and frequency- and time-domain analyses of transmission lines.

ECE X25K. Antennas and Wireless Propagation.
Explore solutions of time-varying Maxwell's equations with applications to antennas and wireless propagation; antenna theory and design, array synthesis; electromagnetic wave propagation, scattering, and diffraction; and numerical methods for solving Maxwell's equations.

ECE X25S. Internship in Electrical and Computer Engineering.
Practical work experience in industry or a research lab under the supervision of an engineer or scientist. Requires a substantial final report.

ECE X29S. Topics in Electrical and Computer Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Electrical and Computer Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ECE X31. Electrical Circuits, Electronics, and Machinery.
Explore brief theory of direct and alternating current circuits; single-phase and three-phase power transmission; electronic devices and instrumentation; and electromechanics.

ECE X33T. Engineering Communication.
Explore advanced engineering communication skills, with emphasis on technical documents, oral reports, and graphics. Participate in collaborative work involving online communication and research.

ECE X34K. Quantum Theory of Electronic Materials.
Introduction to quantum mechanics; atoms and molecules; electron statistics; quantum theory of solids; electronic phenomena in semiconductors; and device applications based on these phenomena.

ECE X34M. Magnetic Materials and Devices.
Explore the fundamentals and applications of magnetic materials, in particular to nano-devices; examine the origin of magnetism in oxides and metals; magnetic switching mechanisms, and how spin structures arise such as domain walls and topologically-protected spin states; discuss applications to future computing nano-devices.

ECE X38. Fundamentals of Electronic Circuits I Laboratory.
Explore the analysis and design of electronic circuits using semiconductor devices. Examine basic device physics and small-signal modeling for diodes, bipolar junction transistors, and metal-oxide-semiconductor transistors; operation region and biasing; basic switching circuits; single-stage and multi-stage amplifier design and analysis; input and output impedance characteristics of amplifiers; frequency response; AC and DC coupling techniques; and differential amplifiers and output stages.

ECE X38K. Analog Electronics.
Explore the analysis and design of analog electronic circuits; transistor models; single-ended amplifiers; differential amplifiers; operational amplifiers; frequency response; feedback theory; stability analysis; circuit nonidealities; op-amp-based circuits; output stages; power amplifiers; passive and active analog filters; and relaxation oscillators

ECE X38L. Analog Integrated Circuit Design.
Explore the analysis and design of analog integrated circuits; transistor models; simple and advanced current mirrors; single-ended amplifiers; differential amplifiers; operational amplifiers; frequency response; feedback theory; stability analysis; circuit nonidealities and noise; output stages; and analog filters. Examine computer-aided design (CAD) tools for circuit analysis and design.

ECE X39. Solid-State Electronic Devices.
Examine semiconductor materials; atomic orbitals to energy band structure of semiconductors; charge carrier transport, electron-hole generation and recombination; p-n junctions and Schottky barriers; bipolar and field-effect transistors; and optoelectronic devices.

ECE X39S. Solar Energy Conversion Devices.
Investigate basic principles of photovoltaic devices which convert light into charge carriers (electrons and holes). Examine electrons and holes in semiconductors, generation and recombination, junctions, analysis of the p-n junction, silicon and III-V semiconductor solar cell design and optimization, thin film solar cell technologies, managing light, strategies for higher efficiency, and a brief overview of non-photovoltaic approaches to solar energy conversion.

ECE X40. Integrated Circuit Nanomanufacturing Techniques.
Examine integrated circuit processing; crystal growth and wafer preparation; epitaxial growth; oxidation, diffusion, and ion implantation; thin-film deposition techniques; and lithography and etching.

ECE X40P. High-Throughput Nanopatterning.
Explore sub-50nm fabrication using mechanical patterning techniques; overview of photolithography, mechanical nanopatterning processes, hot embossing, and UV imprint lithography; wafer-scale and roll-to-roll nanopatterning with applications in electronics, photonics, and nanomedicine; physics of nanoreplication, process limits, template (mold) fabrication, defect mechanisms, and factors affecting throughput.

ECE X41. Electric Drives and Machines.
Explore fundamentals of electric machines. Examine electromechanical energy conversion; magnetic circuits, transformers, and energy conversion devices; and power electronics. Discuss motor drive fundamentals and applications.

ECE X45L. Embedded Systems Design Laboratory.
Explore the design of microcontroller-based embedded systems; interfacing from both a hardware and software perspective; and applications, including audio, data acquisition, and communication systems.

ECE X45M. Embedded and Real-Time Systems Laboratory.
Explore real-time operating systems; implementation of context switching, threads, multitasking, real-time scheduling, synchronization, communication, storage, file systems, memory management, process linking and loading, hardware interfacing, and networking; debugging and testing; operating system performance, including latency, jitter, deadlines, deadlocks, and starvation; real-time systems, including data acquisition, sensing, actuating, digital control, signal processing, and robotics.

ECE X45S. Real-Time Digital Signal Processing Laboratory.
Explore digital signal processing algorithms; simulation and real-time implementation of audio and communication systems; filters; pulse shaping and matched filters; modulation and demodulation; adaptive filters; carrier recovery; symbol synchronization; equalization; quantization; and data conversion.

ECE X47. Modern Optics.
Explore modern optical wave phenomena with applications to imaging, holography, fiber optics, lasers, and optical information processing.

ECE X48. Laser and Optical Engineering.
Explore principles of operation and applications of lasers, optical modulators, and optical detectors.

ECE X51H. Probability and Random Processes: Honors.
Examine probability, random variables, statistics, and random processes, including counting, independence, conditioning, expectation, density functions, distributions, law of large numbers, central limit theorem, confidence intervals, hypothesis testing, statistical estimation, stationary processes, Markov chains, and ergodicity.

ECE X51K. Probability and Random Processes.
Examine probability, random variables, statistics, and random processes, including counting, independence, conditioning, expectation, density functions, distributions, law of large numbers, central limit theorem, confidence intervals, hypothesis testing, statistical estimation, stationary processes, Markov chains, and ergodicity.

ECE X51M. Digital Signal Processing.
Explore sampling, aliasing, truncation effects; discrete and fast Fourier transform methods; convolution and deconvolution; finite and infinite impulse response filter design methods; Wiener, Kalman, noncausal, linear phase, median, and prediction filters; and spectral estimation.

ECE X55. Electrical and Computer Engineering Seminar.
Hear presentations by speakers from industry, government, academia, and professional private practice. Explore environmental and other ethical concerns, safety awareness, quality management, technical career descriptions, and professionalism with a focus on engineering communication.

ECE X55L. Engineering Leadership Seminar.
Hear presentations by speakers from industry, government, academia, and professional private practice. Explore environmental and other ethical concerns, safety awareness, quality management, technical career descriptions, and professionalism.

ECE X55R. Undergraduate Research Seminar.
Explore areas of research in electrical and computer engineering.

ECE X60. Special Problems in Electrical and Computer Engineering.
Investigate special problems as approved by the electrical and computer engineering department.

ECE X60C. Algorithms.
Explore advanced problem-solving methods; algorithm design principles; complexity analysis; the study of the nature, impact, and handling of intractability; and the study of common algorithmic classes and their applications.

ECE X60F. Introduction to Software Engineering.
Introduction to the discipline of software engineering. Explore software system creation and evolution; fundamental concepts and principles of software product and software process systems, including requirements, architecture and design, construction, deployment, and maintenance; and documentation and document management, measurement and evaluation, software evolution, teamwork, and project management.

ECE X60G. Programming Paradigms.
Study programming language constructs, scripting languages, object-oriented languages, functional languages, language semantics, software engineering design, and design patterns.

ECE X60J. Data Science Laboratory.
Explore predictive modeling, regression and classification, data cleaning and preprocessing, feature engineering, unsupervised methods, principal component analysis, data clustering, model selection and feature selection, entropy and information theory, neural networks, deep learning, and machine learning for signals and time-series data.

ECE X60K. Introduction to Digital Communications.
Examine characterization of baseband and passband communication signals and channels, digital modulation, and pulse shaping; optimum receivers in additive white Gaussian noise including matched-filtering, machine learning (ML), and mean average precision (mAP) detection and their bit error probability for M-ary modulation; inter-symbol interference channels, finite impulse response (FIR) and infinite impulse response (IIR) equalization, multicarrier modulation, orthogonal frequency-division multiplexing (OFDM) and frequency domain equalization. Introduction to information theory, channel capacity, error control codes, and ML sequence detection (Viterbi decoding). Explore applications to stationary wireless and wireline channels.

ECE X60M. Digital Systems Design Using Hardware Description Languages.
Explore organization, design, simulation, synthesis, and testing of digital systems; hardware description languages (HDLs); field programmable gate arrays (FPGAs); hardware implementation of arithmetic and other algorithmic processes; state machine charts; microprogramming; and microprocessor design.

ECE X60N. Computer Architecture.
Examine characteristics of instruction set architecture and microarchitecture; physical and virtual memory; caches and cache design; interrupts and exceptions; integer and floating-point arithmetic; I/O processing; buses; pipelining, out-of-order execution, branch prediction, and other performance enhancements; design trade-offs; and case studies of commercial microprocessors. Explore behavioral-level design of a microarchitecture in a laboratory setting.

ECE X60P. Concurrent and Distributed Systems.
Investigate concurrency, lock-based and lock-free synchronization, resource allocation, multi-threaded programming, distributed systems programming, mutual exclusion, global snapshots, global property evaluation, message ordering, consensus, Byzantine agreement, and commit protocols.

ECE X60R. Introduction to VLSI Design.
Explore theory and practice of very-large-scale integration (VLSI) circuit design. Examine metal-oxide-semiconductor (MOS) transistors; static and dynamic complementary metal-oxide-semiconductor (CMOS) combinational and sequential circuits; design of adders, multipliers, and shifters; performance, power consumption and testing. Use computer-aided design (CAD) tools for layout, timing analysis, synthesis, physical design, and verification.

ECE X60S. Digital Integrated Circuit Design.
Examine circuit-level aspects of metal oxide silicon (MOS) and bipolar integrated circuit technologies. Explore logic gates and latches; propagation delays; and circuit simulation models.

ECE X60T. Software Testing.
Explore basic concepts and techniques used in testing software and finding bugs. Examine process, unit, integration, and system testing; manual and automatic techniques for generation of test inputs and validation of test outputs; and coverage criteria. Focus on functional testing.

ECE X61C. Multicore Computing.
Explore theoretical and practical aspects of designing multicore software systems; programming constructs for concurrent computation; openMP; sequential consistency; linearizability; lock-based synchronization; lock-free synchronization; wait-free synchronization; consensus number; software transactional memory; testing and debugging parallel programs; race detection; concurrent data structures such as stacks, queues, linked lists, hash tables, and skiplists; formal models; temporal logic; reachability analysis; and parallel graph algorithms.

ECE X61D. System Design Metrics.
Examine engineering design, manufacturing, and lifetime support issues; implications of customer perceptions of quality on design; economics of design; and legal implications of design decisions.

ECE X61E. Machine Learning and Data Analytics for Edge Artificial Intelligence.
Examine edge computing; Internet-of-Things (IoT); cyber-physical systems; energy-aware machine learning (ML); deep learning; model compression; knowledge distillation; federated learning; ML security; system optimization; model-architecture co-design; object detection; and social sensing.

ECE X61G. Engineering Program Analysis.
Explore program analysis; compilers; interpreters; code instrumentation; control-flow analysis; data-flow analysis; static single assignment form; dependency analysis; incremental analysis; autotuning; and just-in-time compilation.

ECE X61L. Software Engineering and Design Laboratory.
Examine generation of concrete software engineering artifacts at all stages of the software life-cycle processes; stakeholder needs to system requirements mapping; object-oriented design and analysis; and test driven development. Study design principles and methods; design and modeling tools; collaborative development environment; design patterns and refactoring; integration and testing tools. Examine emerging concepts in cloud native devops, including microservices, containers, and application programming interfaces (APIs). Explore design and development of at-scale software system using modern software development techniques, including re-usable front-end and back-end components, and cloud deployment.

ECE X61M. Software Architectures.
Explore the definitions, motivations, and utility of software system architectures from a technical and business perspective; derivation, specification, and analysis of architectural views in support of different phases in the system engineering lifecycle; methods to judge architectural quality; and communication of architectural views to a wide range of system stakeholders.

ECE X61N. Information Security and Privacy.
Explore information valuation; information classification; information confidentiality, integrity and availability; access control models; trusted identity, trust frameworks. Examine cryptology, designing information system security and privacy, threats and vulnerabilities. Introduction to network, software, and web security; risk assessments; data breach incident response; privacy laws and regulations.

ECE X61P. Data Science Principles.
Examine principles of unsupervised and supervised learning; exploratory data analysis; feature engineering; predictive modeling for regression and classification; clustering algorithms; neural networks and stochastic gradient descent methods; scalable models for Big Data sets; case studies; and programming predictive models in Python and R.

ECE X61Q. Requirements Engineering.
Explore the methods and technology for acquiring, representing, documenting, verifying, validating, and maintaining requirements; text-based, graphic-based, and computational requirements model representations; requirements analysis to synthesize and resolve conflicts among disparate stakeholder viewpoints; requirements traceability and evolution; and change management.

ECE X61R. Radio-Frequency Electronics.
Examine modeling of active and passive devices and transmission line structures at high frequencies. Explore analysis and design of radio-frequency electronic circuits including amplifiers, mixers, multipliers, detectors, and oscillators; transistor-, circuit-, and system-level design methods, challenges, and topologies; noise and distortion analysis; and evaluation of modern radio systems.

ECE X61S. Operating Systems.
Introduction to operating system design and implementation; the shell; process management and system calls; memory management; thread management, scheduling, synchronization and concurrency; file systems; input/output systems; virtual machines; and networking and security.

ECE X61T. Compilers.
Explore program compilation and translation from high-level into machine languages; compiler structure; syntax analysis; semantic analysis; type systems; code generation; intermediate language and representation; control and data flow analysis; and optimization techniques.

ECE X62G. Smart Grids.
Explore the fundamentals of smart electric power grids; smart grid architecture, communications, measurement, sensing, design, performance, standards and cyber security; distributed energy, renewable sources, and energy storage; and interoperability.

ECE X62K. Introduction to Automatic Control.
Explore analysis of linear automatic control systems in time and frequency domains; stability analysis; state variable analysis of continuous-time and discrete-time systems; root locus; Nyquist diagrams; Bode plots; sensitivity; and lead and lag compensation.

ECE X62L. Power Electronics Laboratory.
Explore the analysis, design, and operation of power electronic circuits; power conversion from AC to DC, DC to DC, and DC to AC; rectifiers, inverters, and pulse width modulated motor drives. Examine the use of energy from renewable sources such as photovoltaics and wind in a laboratory setting.

ECE X62M. Power Electronics II.
Examine pulse-width-modulated power converters, rigorous physical design and device selection, gate driving, thermal design, magnetics design, small-signal modeling and control, and EMI filtering. Explore design and prototyping.

ECE X62Q. Power Quality and Harmonics.
Examine and analyze power quality and harmonic phenomena in electric power systems, including characteristics and definitions, voltage sags, electrical transients, harmonics, mitigation techniques, and standards of power quality and harmonics.

ECE X62R. Renewable Energy and Power Systems.
Examine renewable energy sources and their integration into power systems. Explore wind energy: resources, turbines, blades, rotor power characteristics, generators, active and reactive power, variability, and voltage regulation; solar energy: resources, solar radiation measurements, photovoltaic materials and properties, photovoltaic electrical characteristics, and system integration; and demonstrations with commercial-grade solar panels and laboratory-scale wind turbines.

ECE X62S. Development of a Solar-Powered Vehicle.
Analyze, design, and construct a solar-powered car for national competitions involving other universities. Study electrical, mechanical, and aerodynamic systems.

ECE X63M. Microwave and Radio Frequency Engineering.
Examine design principles in microwave and radio frequency systems; transmission lines and waveguides; S-parameter representation; impedance matching; microwave network analysis; microwave devices and components; and electromagnetic effects in high-speed and high-frequency applications.

ECE X63N. Engineering Acoustics.
Principles of acoustics, with applications drawn from audio engineering, biomedical ultrasound, industrial acoustics, noise control, room acoustics, and underwater sound.

ECE X64C. Corporate Senior Design Project.
Undertake design and experimental projects in the laboratories of local companies. Examine the ethics of design for safety and reliability. Designed for electrical engineering students working full-time in the industry.

ECE X64D. Introduction to Engineering Design.
Introduction to the engineering design process. Explore the assessment and documentation of engineering problems and customer needs, such as acquiring, documenting, and verifying requirements; high-level system design principles; effects of economic, environmental, ethical, safety, and social issues in design; writing and presenting design specifications; and effective teamwork.

ECE X64E. Interdisciplinary Entrepreneurship.
Start a company with a team. Explore skill development and mentoring in start-up formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Discuss the role of intellectual property and the social issues in design, as well as ethical and safety considerations.

ECE X64G. Multidisciplinary Senior Design Project.
Undertake design and experimental projects with teams from multiple engineering disciplines. Examine the ethics of design for safety and reliability.

ECE X64H. Honors Senior Design Project.
Implement the previously developed engineering system design, including design review, prototyping, project testing and any subsequent design modifications; addressing economic, environmental, ethical, safety, and social issues; documentation of each of the preceding and publicly presenting design results; and working effectively in teams.

ECE X64K. Senior Design Project.
Implement the previously developed engineering system design, including design review, prototyping, project testing and any subsequent design modifications; addressing economic, environmental, ethical, safety, and social issues; documentation of each of the preceding and publicly presenting design results; and working effectively in teams.

ECE X64R. Research Senior Design Project.
Implement the previously developed engineering system design, including design review, prototyping, project testing and any subsequent design modifications; addressing economic, environmental, ethical, safety, and social issues; documentation of each of the preceding and publicly presenting design results; and working effectively in teams.

ECE X64S. Start-Up Senior Design Project.
Complete a practical engineering product design; validate the design through prototype construction and testing, modeling and simulation, and manufacturability analysis. Develop a completed company prospectus and seek venture funding for the project.

ECE X66. Engineering Economics I.
Explore business organization; discounted cash flow calculations, including present-worth and rate-of-return calculations; replacement analyses; financial analyses; accounting and depreciation; income taxes; inflation; risk analysis, utility theory, decision models, sequential decision making; and value of information.

ECE X66K. Engineering Economics II.
Explore the fundamentals of risk management, including portfolio theory, capital asset pricing theory, and optimal project mix; hedging financial risk; advanced economic analysis of alternative energy systems; and advanced mathematical modeling techniques for economic analysis.

ECE X66L. Statistics for Manufacturing.
Explore statistical analysis applied to the development and control of manufacturing operations. Examine quality control, statistical process control, and design of experiments.

ECE X68L. Power Systems Apparatus and Laboratory.
Explore fundamentals of power systems emphasized through laboratory experiments; complex power, three-phase circuits, per-unit system, transformers, synchronous machines, transmission line models, steady-state analysis, induction machines, capacitor banks, protective relaying, surge arrestors, and instrumentation.

ECE X69. Power Systems Engineering.
Examine power systems engineering. Explore complex power, phasors, balanced three phase power systems, transformers and per-unit systems, transmission line parameters, steady state operation of transmission lines, the power flow problem, symmetrical faults, power system controls, economic operation of power systems, optimal power flow, and deregulation and restructuring of electricity markets.

ECE X69L. Relay Protection of Power Systems.
Examine the theory, principles, and practices for protecting medium-voltage industrial power systems and high-voltage transmission grids, including symmetrical components; fault calculations and grounding; protection of motors, generators, cables, and transmission lines; and relay settings, fusing, and coordination of multiple protection devices.

ECE X70. Automatic Control II.
Introduction to modern control theory, nonlinear and optimal control systems; controllability, observability, stability; state feedback, observers, eigenvalue assignment.

ECE X70K. Computer Control Systems.
Explore the analysis and design of linear discrete time control systems; z-transform theory; modified z-transforms; stability; multirate systems;

digital simulation of discrete time systems; and synthesis of algorithms for computer controllers.

ECE X70L. Introduction to Manufacturing Systems Automation.
Explore applications of automation techniques to manufacturing systems, robotics, and computer vision.

ECE X70N. Introduction to Robotics and Mechatronics.
Examine structures for industrial robots; geometry and transformation; direct and inverse kinematics; differential kinematics; dynamics; trajectory planning; actuators and sensors; adaptive control and learning compliance; vision and pattern recognition; and expert systems.

ECE X71C. Wireless Communications Laboratory.
Examine the fundamentals of wireless communication from a digital signal processing perspective; linear modulation, demodulation, and orthogonal frequency division multiplexing; synchronization, channel estimation, and equalization; communication in fading channels; and wireless standards.

ECE X71D. Introduction to Neural Networks.
Explore characteristics of artificial neural networks, feedforward networks, and recurrent networks; learning algorithms; self-organization; biological links; and data mining and other applications.

ECE X71M. Communication Systems.
Explore analog and digital modulation; noise in communication systems; signal-to-noise ratio; coding; optimal receiver design; phase-locked loops; and performance analysis.

ECE X71P. Introduction to Computer Vision.
Examine image representation (by both human brain and digital); image filtering and edge detection; keypoint detection and matching; camera model and geometric calibration; stereo vision and essential/fundamental matrices; triangulation and epipolar geometry; depth estimation; video and optical flow; classical machine learning concepts; image classification; object detection and segmentation; deep learning for computer vision (basics).

ECE X71Q. Digital Image Processing.
Examine digital image acquisition, processing, and analysis; two dimensional Fourier analysis; 2D wavelets; image filtering; image denoising; image compression; machine learning for image processing and analysis; deep learning of images; picture quality prediction; image analysis; 3D stereoscopic ranging.

ECE X72L. Network Engineering Laboratory.
Explore local, metropolitan, and wide-area operations; telecommunication common carrier organizations and services; administrative and political considerations; premise distribution systems; name resolution, address assignment, and mail; datagra,s, packets, frames, and cells; addressing and network-level interconnection; internetwork architecture; TCP/IP protocol suite (v. 4 and 6); Ethernet and IEEE 802.3 standards; IEEE 802.11 standards and wireless access points; repeaters, hubs, bridges, routers; local area network emulation; public switched network access through POTS and ISDN; intradomain and interdomain routing; routing protocols, including RIP, OSPF, and BGP; multicast; media testing; and local- and wide-area diagnostic tools.

ECE X72N. Telecommunication Networks.
Examine the operation of modern communication networks. Discuss the concept of layered network architecture to gain practical insights on the principal functions and services required for achieving reliable end-to-end communications. Explore networking application design and programming; service interfaces and peer-to-peer protocols; the reference model for TCP/IP; IEEE LAN (Local Area Network) architectures; network-layer and transport-layer issues; link layer with focus on contention-based access; wireless networks that cover WiFi; and basics of cellular networks.

ECE X72S. Cryptography and Network Security.
Explore distributed information system security, cryptographic tools, authentication, message security, and system management.

ECE X74K. Biomedical Electronic Instrument Design.
Explore the application of electrical engineering principles in the design of electronic instrumentation at the circuit-board level for the measurement of pressure, temperature, flow, and impedance. Examine the study of light intensity, bioelectric potentials, and stimulation devices such as pacemakers and defibrillators. Focus on design considerations specific to electro-medical environments, safety and efficacy, and public policy issues.

ECE X74L. Applications of Biomedical Engineering.
Examine areas of biomedical engineering, such as optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; and noninvasive cardiovascular measurements.

ECE X74N. Neural Engineering.
Examine a variety of clinical conditions and their associated neurological basis, and then analyze the engineering solutions to cope with the neurological deficits, with an emphasis on electrical and computer engineering components. Study approaches to design motor neuroprosthetics and sensory neuroprosthetics that restore lost functions. Learn principles of deep brain stimulation, neuromodulation, and brain plasticity. Explore the concepts behind technological approaches for neurorehabilitation, in particular robotics and brain-computer interfaces.

ECE X79H. Undergraduate Honors Thesis.
Undertake research across two consecutive semesters under the supervision of an engineering faculty member. Investigate a research area, selected with a faculty member with approval by the director of the Honors Program. Deliver an oral presentation and write a thesis.

ECE X79K. Topics in Electrical Engineering.

Graduate Courses

ECE X80C. Introduction to Optimization.

ECE X80K. Introduction to System Theory.
Introduction to linear dynamical systems and differential equations, state space analysis and applications to feedback control, functional analytic methods, realization theory, stability theory, and elements of optimal control.

ECE X80L. Topics in Computer Systems in Engineering.

ECE X80L.11. Mining the Web.
Analyze data and information available from the World Wide Web. Explore the exploitation of the hyperlink structure of the Web for developing better search engines. Examine content analysis; information retrieval, clustering, and hierarchical categorization of Web documents; web usage mining; and collaborative filtering and personalizing the Web.

ECE X80L.12. Real-Time Operating Systems Laboratory.
Explore real-time operating systems; implementation of context switching, threads, multitasking, real-time scheduling, synchronization, communication, storage, file systems, memory management, process linking and loading, hardware interfacing, and networking; debugging and testing; operating system performance, including latency, jitter, deadlines, deadlocks, and starvation; real-time systems, including data acquisition, sensing, actuating, digital control, signal processing, and robotics.

ECE X80L.5. Engineering Programming Languages.
Explore higher-level languages for engineering design and problem solving; object-oriented programming in C++ and Unix systems programming.

ECE X80L.7. Introduction to Pattern Recognition and Computer Vision.
Explore pattern recognition, including Bayesian decision theory, maximum likelihood and estimation, nonparametric techniques, and linear discriminant functions. Examine computer vision, including geometric camera models and calibration, geometry of multiple views and stereopsis, structure from motion, and tracking.

ECE X80L.8. Computer Vision Systems.
Discuss current research results and explore new directions in computer vision systems, including linear discriminant functions, nonmetric methods, unsupervised learning and clustering, model-based vision, segmentation using probabilistic methods, and content-based image and video analysis. Apply the techniques to real-world vision systems.

ECE X80L.9. Artificial Neural Systems.
Examine feed-forward networks, distributed associative memory, recurrent networks, self-organization, parallel implementation, and applications.

ECE X80N. Topics in System Theory.

ECE X80N.1. Nonlinear Systems: Input-Output Properties.

ECE X80N.10. Robotics II.

ECE X80N.11. Optimization in Engineering Systems.
Formulation and solution of continuous optimization problems in engineering design and operations.

ECE X80N.2. Nonlinear Systems: Geometric Theory.

ECE X80N.3. Adaptive Control Systems.

ECE X80N.4. Learning Systems and Cybernetic Machines.

ECE X80N.5. Stochastic Control Theory.
Examine dynamic programming in finite and infinite horizon, models with imperfect state information, ergodic control problems, and adaptive and risk-sensitive control.

ECE X80N.7. Design of Computer-Controlled Systems.

ECE X80N.8. Algorithms for Parallel and Distributed Computation.

ECE X80N.9. Fundamentals of Robotics and Mechatronics.
Explore the theory of robotics and mechatronics, with emphasis on control, sensing, actuation, low- and high-level vision. Examine manipulator geometry, kinematics, dynamics, and planning of trajectories.

ECE X81C. Verification and Validation.

ECE X81J. Probability and Stochastic Processes I.
Examine probability spaces, random variables, expectation, conditional expectation, stochastic convergence, characteristic functions, and limit theorems. Explore Markov and Gaussian processes, stationary processes, spectral representation, ergodicity, renewal processes, martingales, and applications to estimation, prediction, and queueing theory.

ECE X81K. Topics in Decision, Information, and Communications Engineering.

ECE X81K.1. Detection Theory.

ECE X81K.11. Wireless Communications.
Introduction to fundamental aspects of wireless communication systems including channel modeling, diversity, multiple antenna transmission and reception, beamforming, adaptive modulation. Explore multiuser communication concepts including OFDMA and SC-FDMA, spread spectrum and CDMA, and broadcast and MAC channels. Examine system-level modeling including network information theory, stochastic geometry, and network interference models.

ECE X81K.13. Analysis and Design of Communication Networks.
Examine stochastic and deterministic traffic and queueing models. Explore techniques for call admission, routing, flow control, network optimization, estimation, and decision making in uncertain environments.

ECE X81K.14. Multidimensional Digital Signal Processing.
Explore multidimensional signals and systems, multidimensional discrete Fourier analysis, discrete cosine transform, two-dimensional filters, beamforming, seismic processing, tomography, multidimensional multirate systems, image halftoning, and video processing.

ECE X81K.15. Communication Networks: Technology, Architectures, and Protocols.
Explore network services and techniques, layered architectures, circuit and packet-switching networks, internetworking, switch architectures, control mechanisms, and economic issues.

ECE X81K.16. Digital Video.
Examine video sampling and transform; video (retinal and cortical) filters; motion detection and estimation; statistical models of videos; neuroscience of video perception; natural video statistics; modern video compression standards; video quality prediction; video denoising; active contour models; and video saliency.

ECE X81K.17. Wireless Communications Laboratory.
Explore the fundamentals of wireless communication from a digital signal processing perspective; linear modulation, demodulation, and orthogonal frequency division multiplexing; synchronization, channel estimation, and equalization; communication in fading channels; principles of multiple-input, multiple-output (MIMO) communication; and wireless standards.

ECE X81K.18. Convex Optimization.
The fundamentals of convex optimization with a focus on modeling, computation and scale: convex sets and functions, unconstrained optimization via first and second-order methods, duality, constrained optimization, SDPs, stochastic and sub-gradient descent methods, ADMMs, and applications.

ECE X81K.19. Wireless Network Modeling and Performance Evaluation.
Explore modeling of large wireless networks, random graphs, stochastic geometry, point processes, space and time averages, connectivity, stability, capacity, and network design optimization, with applications for cellular network, mobile ad hoc networks, device to device networks, and vehicular networks.

ECE X81K.2. Digital Communications.
Explore characterization of baseband and passband communication signals and channels, digital modulation, and pulse shaping; optimum receivers in additive white Gaussian noise including matched-filtering, ML, and MAP detection and their bit error probability for M-ary modulation; inter-symbol interference channels, FIR and IIR equalization, multicarrier modulation, OFDM and frequency domain equalization. Introduction to information theory, channel capacity, error control codes, and ML sequence detection (Viterbi decoding). Examine applications to stationary wireless and wireline channels.

ECE X81K.20. Machine Learning on Real World Networks.
Explore networks in natural and socio-technological systems. Examine network structure and dynamics, machine learning on real networks, clustering; network models, small worlds, scale free networks, preferential attachment, community structure, network-on-chip optimization and control, epidemics and rumors, human mobility, network embedding, deep learning on graphs, graph neural networks, and other networks.

ECE X81K.21. Computational Magnetic Resonance Imaging.
Introduction to Magnetic Resonance Imaging (MRI), particularly focusing on computational co-design of the signal acquisition and post-processing algorithms. Discuss principles of MRI, including basic system hardware, spin physics, signal formation, contrast mechanisms, pulse sequence design, image detection, and image reconstruction. Examine advanced image reconstruction including parallel imaging, compressed sensing, and machine learning; and exploration of concepts using real and synthetic data.

ECE X81K.3. Applied Machine Learning.
Examine approaches to extracting valid and useful insights from data using statistically oriented approaches, with emphasis on predictive models learned from large-scale data sets. Code machine learning algorithms in Python and use various data visualization techniques.

ECE X81K.4. Statistical Machine Learning.
Introduction to the theoretical underpinnings of machine learning and the derivations that transform those foundations into practical algorithms. Discuss empirical risk minimization and the probably approximately correct (PAC) learning framework; the bias-complexity tradeoff; the Vapnik-Chervonenkis dimension; Rademacher complexities; linear predictors; boosting; model selection and validation; convex learning problems; support vector machines and kernel methods; decision trees; clustering; dimensionality reduction; generative models; and variational Bayesian methods.

ECE X81K.5. Advanced Telecommunication Networks.
Explore methods and research issues in the performance evaluation and management of high-speed and mobile communication networks.

ECE X81K.6. Estimation Theory.

ECE X81K.7. Information Theory.
Explore source and channel coding theorems, Kolmogorov complexity, network information theory, and connections with large deviations.

ECE X81K.8. Digital Signal Processing.
Examine signals and systems; generalized functions; z-transforms; Fourier series and transforms; fast Fourier transform; sampling, quantization, and aliasing; digital filter design; discrete-time random processes; multirate processing; filter banks and subband decomposition; nonlinear digital filters.

ECE X81K.9. Advanced Signal Processing.
Explore signal modeling; optimum filtering; spectral estimation; fast algorithms; and applications in array signal processing, speech coding, and digital communication.

ECE X81L. Digital Time Series Analysis and Applications.
Examine digital implementation of higher-order spectra and other techniques useful in analyzing, interpreting, and modeling random time series data from linear and nonlinear physical systems.

ECE X81M. Probability and Stochastic Processes II.
Examine random walk and Brownian motion; renewal and regenerative processes; Markov processes; ergodic theory; continuous parameter martingales; stochastic differential equations; diffusions; stochastic control; and multidimensional stochastic models.

ECE X81S. Space-Time Communication.
Explore multiple-input multiple-output (MIMO) wireless communication, including discrete-time signal models, equalization, and channel estimation; channel models; channel capacity; average probability of error in fading channels; channel coding; transmit and receive diversity; space-time codes; spatial multiplexing; precoding and limited feedback; space-time adaptation; multiuser communication; multiuser information theory; practical multiuser algorithms; and applications in recent standards.

ECE X81V. Topics in Communications, Networks, and Systems.

ECE X82C. Topics in Software Engineering and Systems.

ECE X82C.1. Engineering Design of Software and Software Systems.
Explore the software development process; selection and application of software design methods; and evaluation of software designs.

ECE X82C.10. Unconventional Computation.
Explore a variety of perspectives on computation, focusing on provable mathematical properties of the various models, and on how to use the models to achieve desired computational behavior. Discuss mechanical and electronic analog computation; linear threshold units (neural networks); cellular automata, Turing machines, and uncomputability; reversible computing and thermodynamics of computation; and quantum computing.

ECE X82C.11. Requirements Engineering.

ECE X82C.12. Multicore Computing.
Examine theoretical and practical aspects of designing multicore software systems; programming constructs for concurrent computation, openMP, sequential consistency, linearizability, lock-based synchronization, lock-free synchronization, wait-free synchronization, consensus number, software transactional memory, testing and debugging parallel programs, race detection, concurrent data structures such as stacks, queues, linked lists, hash tables and skiplists, formal models, temporal logic, reachability analysis, and parallel graph algorithms.

ECE X82C.13. Mobile Computing.
Explore an overview of emerging research areas in mobile computing with a specific focus on the software engineering ramifications of mobile and pervasive computing technologies. Develop a solid foundation to support future discourse and research in the areas of mobile and pervasive computing, and skills to critically read research papers, assimilate information, find additional resources, and draw connections.

ECE X82C.14. Software Evolution Principles.
Review program analysis techniques for evolving software; incremental testing, debugging, and verification; static and dynamic dependency analysis; program transformations; and software visualization.

ECE X82C.15. Middleware Architecture and Design.
Introduction to the design of distributed computing middleware, with a focus on architectural principles. Explore an overview of required functions of emerging middleware and how middleware is designed to support these functions. Examine particular domains such as middleware for mobile computing, middleware for embedded systems, and middleware for sensor networks.

ECE X82C.16. Software Testing.
Examine basic concepts and techniques for testing software and finding bugs. Explore the testing process; unit, integration and system testing; manual and automatic techniques for generation of test inputs and validation of test outputs; and coverage criteria. Focus on functional testing.

ECE X82C.17. Algorithmic Foundations for Software Systems.
Examine complex data structures and algorithms, graph algorithms, performance analysis, correctness analysis, engineering effective techniques, and domain-specific methods, such as systematic or heuristic search.

ECE X82C.18. Computer Graphics.
Examine computer graphics, including in-depth treatments of techniques for realistic image synthesis, advanced geometric modeling methods, animation and dynamic simulation, scientific visualization, and high-performance graphics architectures.

ECE X82C.2. Creation and Maintenance of Distributed Software Systems.
Examine the creation of large distributed software applications, with emphasis on specification, failure models, correctness, and security.

ECE X82C.3. Verification and Validation of Software.
Evaluate software for correctness, efficiency, performance, and reliability.

ECE X82C.4. Software and Hardware Engineering Project Management.
Examine the requirements for a project management plan; role of the manager of the software development life cycle; economic and customer-driven factors.

ECE X82C.5. Large Software, Hardware, and Communications Systems Engineering.
Explore the techniques used to specify and design systems of software, hardware, and communications components. Create a requirements document and system specification.

ECE X82C.6. Software for Highly-Available Distributed Applications.

ECE X82C.7. Software Architectures.
Explore the definitions, motivations, and utility of software system architectures from a technical and business perspective; derivation, specification, and analysis of architectural views in support of different phases in the system engineering lifecycle; methods to judge

architectural quality; and communication of architectural views to a wide range of system stakeholders.

ECE X82C.8. Theory Blockchains and Smart Contracts.
Explore blockchains and smart contracts, including but not limited to distributed consensus; layer 1 protocol architecture; associated cryptosystems; decentralized peer to peer networks; properties of blockchains; design of blockchain protocols and associated cryptosystems; security and privacy; scalability; liveness of such networks; proof of work; stake and other consensus mechanisms; and incentive design for participation in decentralized systems. Examine decentralized finance and decentralized applications.

ECE X82C.9. Embedded Software Systems.
Examine dataflow models, uniprocessor and multiprocessor scheduling, hardware/software codesign, hierarchical finite state machines, synchronous languages, reactive systems, synchronous reactive languages, and heterogeneous systems.

ECE X82L. Topics in Theory of Digital Systems.

ECE X82L.1. Switching Theory.
Explore general theory and realization algorithms for combinational, sequential, and array logic.

ECE X82L.2. Graph Theory and Applications.
Examine elementary graph theory concepts; graph theory algorithms and applications in multicomputer architecture, switching and coding theory, data structures, computer networks, programming, algorithm analysis, diagnosis and fault tolerance.

ECE X82M. Topics in Integrated Circuits and Systems.

ECE X82M.1. VLSI Testing.
Examine hardware and software reliability analysis of digital systems; testing, design for testability, self-diagnosis, fault-tolerant logic design, error-detecting and error-correcting codes.

ECE X82M.10. Synthesis of Digital Systems.
Explore automatic generation of gate-level implementations from hardware description language (HDL) specifications; optimization of two-level, multilevel, and sequential circuits for area, speed, and testability.

ECE X82M.11. Verification of Digital Systems.
Examine automatic verification of digital systems; formal models and specifications, equivalence checking, design verification, temporal logic, binary decision diagrams (BDDs), logical foundations, automata theory, recent developments.

ECE X82M.12. Semiconductor Memory Design.
Examine semiconductor memory design in depth. Explore volatile memory circuit designs with static random access memory (SRAM), dynamic RAMs (DRAM), multi-ported RAMs, and content addressable memories (CAMs). Explore non-volatile semiconductor memory designs such as read-only-memories, resistive RAM, magnetic RAM, FLASH, and 3D memories. Discuss in-memory and near-memory computing circuit techniques for machine learning and artificial intelligence applications.

ECE X82M.13. Analysis and Design of Digital Integrated Circuits.
Examine device and circuit-level aspects of metal oxide semiconductors (MOS) digital integrated circuit design.

ECE X82M.14. Analog Integrated Circuit Design.
Explore the analysis and design of analog integrated circuits; transistor models and integrated circuit technologies; layout techniques; noise; mismatches; current mirrors; differential amplifiers; frequency response and compensation; feedback and stability; nonlinear circuits; voltage references; and operational amplifiers using state-of-the-art computer-aided design (CAD) tools for design, simulation, and layout.

ECE X82M.16. Application-Specific Processing.
Examine techniques for the design and analysis of application-specific processors, including special purpose systems, embedded processors, and systems-on-chip.

ECE X82M.17. High-Level Synthesis of Digital Systems.
Examine the synthesis from high-level languages (C) to RTL; allocation, scheduling and binding algorithms, and optimizations under area and performance objectives and constraints.

ECE X82M.19. Mixed-Signal System Design and Modeling.
Explore architecture development for mixed-signal integrated circuits. Model analog and digital filters, data converters, and digital data receivers.

ECE X82M.2. Dependable Computing.
Examine design techniques for reliable, fault-tolerant, fail-safe and fail-soft systems; fault diagnosis and fault avoidance methods at program and system levels; experimental and commercial fault-tolerant computer systems.

ECE X82M.20. System-on-Chip Design.
Examine the methodologies and tools for System-on-Chip (SoC) design, hardware/software co-design and co-verification; partitioning; real-time scheduling; hardware acceleration; high-level C-to-RTL synthesis; allocation, scheduling and binding algorithms for hardware synthesis; SoC integration, communication architectures and hardware/software interfacing; virtual prototyping and hardware/software co-simulation; FPGA prototyping of hardware/software systems.

ECE X82M.22. VLSI Physical Design Automation.
Examine algorithms and methodologies in circuit partitioning, floorplanning, global placement, detailed placement, global routing, detailed routing, clock tree routing, and power and ground routing. Explore new trends in physical design.

ECE X82M.23. Low-Power and Robustness Design.
Examine nanometer transistors and models; design-time and runtime techniques for dynamic and standby power minimization; power minimization at circuit and architecture levels; power minimization for logic, memory, and interconnect; sources of variability; statistical data collection and analysis of variance; statistical circuit simulation and timing analysis; manufacturability and resolution enhancement techniques.

ECE X82M.24. Analog-Digital Data Conversion Circuits.
Explore the analysis and design of analog-digital data conversion circuits including both architectural-level and transistor-level design considerations; design trade-offs among power, noise, linearity, and speed; sample-and-hold circuits and voltage comparators; noise analysis for mixed-signal circuits; flash, pipelined, successive approximation, and delta-sigma oversampling analog-to-digital-converters (ADCs); resistor-string, R-2R, current-steering, and delta-sigma oversampling digital-to-analog-converters (DACs); and the use of state-of-the-art computer-aided design (CAD) tools for analysis, design, and validation.

ECE X82M.25. Radio Frequency Integrated Circuit Design.
Examine noise and distortion in devices and circuits; amplifier design techniques for low noise, variable gain, high output power, and high dynamic range; analysis and design of integrated mixers and other frequency converters; voltage and current mode mixers; rectifiers; integrated oscillators for generating fixed and variable frequencies; relevant performance metrics and trade-offs; noise in linear and non-linear time varying circuits; circuit techniques for linearity enhancement; design optimization in bipolar and complementary metal-oxide-semiconductor (CMOS) technologies. Explore transceiver architectures.

ECE X82M.26. VLSI CAD and Optimization.
Explore interconnect and gate modeling; timing analysis; interconnect topology optimization; gate sizing; buffer insertion and sizing; wire sizing and planning; crosstalk analysis and mitigation; clock network synthesis; interconnect planning; modern placement techniques; congestion mitigation; low power optimization; design for manufacturability and reliability; design and computer-aided design (CAD) for emerging technologies.

ECE X82M.7. VLSI I.
Examine very-large scale integration (VLSI) circuit design. Explore complementary metal oxide semiconductor (CMOS) technology; static

and dynamic CMOS combinational and sequential circuits; design of datapath elements; performance, power consumption, and testing. Use computer-aided design (CAD) tools for layout, timing analysis, synthesis, physical design, and verification.

ECE X82M.8. VLSI II.

Examine microelectronic systems architecture; VLSI circuit testing methods; integration of heterogeneous computer-aided design tools; wafer scale integration; advanced high-speed circuit design and integration.

ECE X82M.9. Simulation Methods in CAD and VLSI.

Examine techniques and algorithms for simulating large-scale digital and analog circuits.

ECE X82N. Topics in Architecture, Computer Systems, and Embedded Systems.

ECE X82N.1. Computer Architecture.

Examine characteristics of instruction set architecture and microarchitecture; physical and virtual memory; caches and cache design; interrupts and exceptions; integer and floating-point arithmetic; I/O processing; buses; pipelining, out-of-order execution, branch prediction, and other performance enhancements; design trade-offs; and case studies of commercial microprocessors. Participate in an individual laboratory.

ECE X82N.10. Parallel Computer Architecture.

Study parallel computing, including models, algorithms, languages, compilers, interconnection networks, and architectures.

ECE X82N.11. Distributed Systems.

Examine tracking dependency, mutex algorithms, snapshot algorithms, leader election, spanning tree, distributed algorithms, Map-Reduce, slicer, termination detection, message order, synchronizers, self-stabilization, knowledge, consensus, Byzantine agreement, fault-tolerance.

ECE X82N.14. High-Speed Computer Arithmetic I.

Explore the design of computer arithmetic units: fast adders, fast multipliers, dividers, and floating-point arithmetic units.

ECE X82N.15. High-Speed Computer Arithmetic II.

Explore advanced computer arithmetic, including error correcting coding, residue number systems, CORDIC arithmetic, and VLSI implementation.

ECE X82N.16. Distributed Information System Security.

ECE X82N.17. Superscalar Microprocessor Architectures.

Examine superscalar processor architectures; instruction level parallelism; machine level parallelism; superscalar organization; instruction windows; reservation station; register data flow; register renaming; reorder buffers; memory disambiguation; branch prediction; value prediction; instruction reuse techniques; comparison with very long instruction word (VLIW), single instruction-multiple data (SIMD), and multiple instruction-multiple data (MIMD) approaches; memory systems for superscalar processors; design for performance and power efficiency; performance evaluation of superscalar processors; and case studies.

ECE X82N.18. Distributed Systems II.

ECE X82N.19. Microarchitecture.

Explore concepts in architecture and microarchitecture. Examine critical path, bread-and-butter design, partitioning, timing, and pipelining; data path, state machine, microsequencer, microinstruction, microcode, microprogramming, and CAD tools; pipelining, branch prediction, and out-of-order execution; trace cache, block-structured ISA, simultaneous multithreading, and clustering; single instruction-multiple data (SIMD), very long instruction word (VLIW), decoupled access/execute (DAE), high performance switch (HPS), and data flow. survey the impact of compiler technology, reduced instruction set computing (RISC), and predicated execution; multiprocessor issues, cache coherency, memory consistency, and graphics processing units (GPUs); IEEE Floating Point, and example state-of-the-art microarchitectures.

ECE X82N.20. Computer Architecture: Parallelism and Locality.

Examine hardware and software parallelism and locality mechanisms, and their impact on processor performance, bandwidth, and power requirements; architectures and microarchitectures of throughput-oriented processors that rely on parallelism, locality, and hierarchical control; parallel memory systems; and streaming and bulk execution and programming models. Explore programming and measuring performance on massively parallel processors.

ECE X82N.21. Computer Performance Evaluation and Benchmarking.

Examine performance analysis of microprocessors and computer architectures; impact of performance analysis on microprocessor design; techniques for analysis of architectural trade-offs; performance and power modeling; performance metrics; benchmarks, measurement tools, and techniques; simulation, challenges in full-system simulation; instruction profiling; trace generation; sampling; simulation points; analytical modeling; calibration of microprocessor performance models; workload characterization; benchmarks for emerging programming paradigms; synthetic benchmarks; statistical methods to compare alternatives; linear regression; and design of experiments.

ECE X82N.22. Computer Architecture: User System Interplay.

Explore fundamental principles in computer architecture focusing on the hardware and the compiler, as well as developing an understanding of their interplay with each other and with usage and programming models. Examine the development of several system families and follow common threads of identifying the intended users, system properties, and evaluation methodology. Review case studies including PCs and workstations with general-purpose processors, large parallel systems, graphics processors, and more experimental architectures such as stream processing and transactional memory.

ECE X82N.23. Embedded System Design and Modeling.

Examine the methods and techniques for formal specification, modeling, and system-level design of embedded systems; models of computation (MoCs), concurrency and time including finite state machines (FSMs), process networks and dataflow; system-level design languages (SLDLs) and methodologies; system-level synthesis algorithms for partitioning, scheduling and design space exploration; system refinement and implementation models; virtual platform prototyping, system simulation and transaction-level modeling (TLM); hardware and software synthesis; system-level design tools and case studies.

ECE X82N.24. Code Generation and Optimization.

Generate executable machine code understood by machines from program source code understood by programmers. Explore program optimization for performance, energy efficiency and reliability; code generation and optimization for different types of hardware; and runtime systems and just-in-time compilation.

ECE X82N.25. Runtime Systems.

Examine fundamentals of runtime systems; design, implementation, and optimization of emulation engines; interpreters; binary translators; dynamic binary optimization; high-level language virtual machines; co-designed virtual machines; system-level virtual machines; and processor virtualization.

ECE X82N.26. Machine Learning Hardware-Algorithm Codesign.

Explore co-design of machine learning (ML) algorithms and hardware; foundations of ML, compute-intensive ML architectures, high-performance matrix multiplication, spatial computing, roofline modeling, and scheduling and dataflows; ML-specific numerics, compression, quantization, and architectures for edge and mobile; codesign for scaling and system considerations; and circuit-level techniques for ultra-low-power ML, analog, and processing-in-memory techniques.

ECE X82N.3. Interconnection Networks.

Explore topologies, routing algorithms, permutations, resource allocations, performance evaluation, fault tolerance, VLSI design, parallel and distributed algorithms, languages for specifying protocols, and distributed operating systems.

ECE X82N.4. Advanced Embedded Microcontroller Systems.
Examine hardware and software design of advanced microcontroller systems; embedded applications, Linux drivers, handlers, and kernel modules, file systems, debugging; hardware acceleration, intelligent sensors and I/O subsystems, embedded field-programmable gate array (FPGAs), and networking-on-chip.

ECE X82V. Topics in Computer Engineering.

ECE X83L. Electromagnetic Field Theory.
Examine vector space, Green's function; equivalence theorem; vector potentials; plane, cylindrical, and spherical waves; and radiation and scattering.

ECE X83M. Microwave Field Theory.
Examine guided waves in cylindrical waveguides, microstrip lines, dielectric and optical waveguides; integrated circuits; and periodic structures.

ECE X83N. Theory of Electromagnetic Fields: Electrodynamics.
Explore intermediate electromagnetic field theory, with emphasis on the interaction of fields and material media, including anisotropic media.

ECE X83P. Topics in Optical Processing and Laser Communications.

ECE X83P.1. Fourier Optics.
Examine Fourier transforming properties of lenses, frequency analysis of optical imaging systems, and spatial filtering. Explore optical information processing and holography.

ECE X83P.3. Techniques of Laser Communications.
Examine optical propagation in crystalline media, harmonic generation, frequency conversion, and modulation systems.

ECE X83P.4. Fiber and Integrated Optics I.
Examine waveguiding in slabs, cylinders, and fibers; optical fiber communications principles; mode coupling; guided-wave optical sources, modulators, and detectors.

ECE X83P.5. Fiber and Integrated Optics II.
Examine principles and practices of guided-wave optical sensor technology. Explore nonlinear optical effects in fibers, including amplification and fiber lasers.

ECE X83P.6. Semiconductor Optoelectronic Devices.
Examine semiconductor materials and nanomaterials growth. Review light-matter interaction in bulk and nanostructures, including both band-to-band and intersubband transitions. Discuss band structure in real-space and k-space. Explore photonic devices and their design: light-emitting diodes (LEDs), photodetectors, modulators, solar cells, and semiconductor lasers (diode and quantum cascade).

ECE X83P.8. Optical Communications.
Explore the concepts behind research and development in optical communications and optical interconnects. Examine device physics and system applications. Discuss advanced technology solutions and innovative manufacturing processes to deliver optical passive and active micro- and nanodevices that enable the deployment of short-haul and metropolitan area all-optical networks for communications and for sensing networks.

ECE X83V. Topics in Electromagnetics.

ECE X84N. Topics in Acoustics.

ECE X84N.1. Acoustics I.
Plane waves in fluids; transient and steady-state reflection and transmission; lumped elements; refraction; strings, membranes, and rooms; horns; ray acoustics; absorption and dispersion.

ECE X84N.2. Acoustics II.
Spherical and cylindrical waves, radiation and scattering, multipole expansions, Green's functions, waveguides, sound beams, Fourier acoustics, Kirchhoff theory of diffraction, and arrays.

ECE X84N.3. Electromechanical Transducers.
Modeling, analysis, and design of transducers for reception and transmission of acoustic and vibration signals; dynamics of coupled electrical, mechanical, and acoustical systems; and the effects of transducer characteristics on fidelity and efficiency of transduction.

ECE X84N.4. Nonlinear Acoustics.
Waveform distortion and shock formation, harmonic generation and spectral interactions, effects of absorption and dispersion, parametric arrays, Rankine-Hugoniot relations, weak shock theory, numerical modeling, radiation pressure, and acoustic streaming.

ECE X84N.5. Underwater Acoustics.
Acoustic properties of the ocean; acoustic propagation, reflection, reverberation, scattering and target strength; ocean noise; introduction to array and signal processing; basics of sonar design.

ECE X84N.6. Architectural Acoustics.
Human perception of sound, principles of room acoustics, sound-absorptive materials, transmission between rooms, and acoustical design of enclosed spaces.

ECE X84N.7. Ultrasonics.
Acoustic wave propagation in fluids, elastic solids, and tissue; transducers, arrays, and beamforming; nondestructive evaluation; and acoustical imaging.

ECE X84N.8. Wave Phenomena.
Fourier acoustics and angular spectra; nearfield acoustical holography; Fraunhofer, Fresnel, and parabolic approximations; sound beams; Green's functions; Born approximation; propagation and scattering in moving, periodic, and random media.

ECE X84N.9. Acoustic Metamaterials.
Examine wave propagation in heterogeneous media displaying nonclassical effective properties. Introduction to effective medium theories including fundamental limits on effective properties, transmission and scattering matrices, waves in periodic media, localized resonance, and transformation acoustics.

ECE X85J. Topics in Biomedical Engineering.

ECE X85J.1. Neural Engineering.
Examine a variety of clinical conditions and their associated neurological basis, and then analyze the engineering solutions to cope with the neurological deficits, with an emphasis on electrical and computer engineering components. Study approaches to design motor neuroprosthetics and sensory neuroprosthetics that restore lost functions. Learn principles of deep brain stimulation, neuromodulation, and brain plasticity. Explore the concepts behind technological approaches for neurorehabilitation, in particular robotics and brain-computer interfaces.

ECE X85J.15. Biosignal Analysis.
Theory and classification of biological signals such as EEG, EKG, and EMG. Data acquisition and analysis procedures for biological signals, including computer applications.

ECE X85J.16. Laser-Tissue Interaction: Optical.
The optical behavior of random media such as tissue in interaction with laser irradiation. Approximate transport equation methods to predict the absorption and scattering parameters of laser light inside tissue. Port-wine stain treatment; cancer treatment by photochemotherapy; and cardiovascular applications.

ECE X85J.17. Biomedical Instrumentation II: Real-Time Computer-Based Systems.
Design, testing, patient safety, electrical noise, biomedical measurement transducers, therapeutics, instrumentation electronics, microcomputer interfaces, and embedded systems. Participate in an individual laboratory.

ECE X85J.18. Imaging Signals and Systems.
Physical principles and signal processing techniques used in thermographic, ultrasonic, and radiographic imaging, including image reconstruction from projections such as CT scanning, MRI, and millimeter wave determination of temperature profiles.

ECE X85J.23. Optical Spectroscopy.
Measurement and interpretation of spectra: steady-state and time-resolved absorption, fluorescence, phosphorescence, and Raman

spectroscopy in the ultraviolet, visible, and infrared portions of the spectrum.

ECE X85J.26. Therapeutic Heating.
Engineering aspects of electromagnetic fields that have therapeutic applications: diathermy (short wave, microwave, and ultrasound), electrosurgery (thermal damage processes), stimulation of excitable tissue, and electrical safety.

ECE X85J.28. Noninvasive Optical Tomography.
Basic principles of optical tomographic imaging of biological materials for diagnostic or therapeutic applications. Optical-based tomographic imaging techniques including photothermal, photoacoustic, and coherent methodologies.

ECE X85J.3. Bioelectric Phenomena.
Examines the physiological bases of bioelectricity and the techniques required to record bioelectric phenomena both intracellularly and extracellularly; the representation of bioelectric activity by equivalent dipoles and the volume conductor fields produced.

ECE X85J.31. Biomedical Instrumentation I.
Application of electrical engineering techniques to analysis and instrumentation in biological sciences: pressure, flow, temperature measurement; bioelectrical signals; pacemakers; ultrasonics; electrical safety; electrotherapeutics.

ECE X85J.32. Projects in Biomedical Engineering.
An in-depth examination of selected topics, such as optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; noninvasive cardiovascular measurements.

ECE X85J.33. Neurophysiology/Prosthesis Design.
The structure and function of the human brain. Discussion of selected neurological diseases in conjunction with normal neurophysiology. Study of neuroprosthesis treatments and design philosophy, functional neural stimulation, and functional muscular stimulation.

ECE X85J.35. Brain-Computer Interaction.
Examine the architecture of a brain-computer interface (BCI), the brain signals that can be recorded as input to a BCI, and the interaction paradigms where these signals can be decoded and exploited. Study the design principles of complex brain-controlled devices, with an emphasis on electroencephalogram (EEG) signals, the most common signal for BCI. Explore how to enhance EEG signal-to-noise ratio, and techniques to decode subjects' intents and cognitive states. Apply those techniques EEG signals acquired during closed-loop BCI experiments.

ECE X85J.9. Laser-Tissue Interaction: Thermal.
The thermal response of random media in interaction with laser irradiation. Calculation of the rate of heat production caused by direct absorption of the laser light, thermal damage, and ablation.

ECE X86C. Software Architecture.

ECE X90C. Statistical Methods in Engineering and Quality Assurance.
Examine the interpretation of data from designed experiments and production processes. Explore subjects including probability distributions, confidence intervals, analysis of variance, hypothesis testing, factorial designs, and quality control data.

ECE X90V. Topics in Manufacturing Systems Engineering.

ECE X91C. Technical Entrepreneurship.
Examine the technology-based company: entrepreneurship, intrapreneurship, strategic planning, finance, marketing, sales, operations, research and development, manufacturing, and management. Form hypothetical companies in a team and simulate their ventures over an extended period.

ECE X92C. Software Testing.

ECE X92K. Antenna Theory and Practice.
Explore modern antenna systems for receiving and transmitting, including driven and parasitic arrays, horns, parabolic and other antennas.

ECE X92L. Computational Electromagnetics.
Explore fundamental computational modeling and analysis techniques for applications in antennas, microwave circuits, biomedical engineering, and geophysics. Focus on boundary-value problem formulation, numerical methods, computer implementation, and error quantification. Examine differential and integral equation-based methods for solving Maxwell's equations in frequency and time domains.

ECE X92N. Principles of Radar.
Explore the fundamentals of radar, with an emphasis on electromagnetics and signal processing. Examine radar range equation, antennas, propagation and target scattering, matched filter, ambiguity function, waveform design, pulse compression, microwave imaging, synthetic aperture radar, and inverse synthetic aperture radar (ISAR).

ECE X93C. Topics in Plasma Dynamics.

ECE X93C.1. Introduction to Plasma Dynamics.
Examine plasma properties, including collective effects, Debye shielding, quasineutrality, the plasma frequency, and collisions. Explore single particle motions in electric and magnetic fields. Study particle drifts, adiabatic invariants, and cyclotron resonance.

ECE X94. Topics in Power System Engineering.

ECE X94.14. Electrical Transients in Power Systems.
Explore analysis and modeling of electrical transient phenomena in power systems, traveling wave, insulation coordination, and overvoltage protection.

ECE X94.15. Power System Operations and Control.

ECE X94.16. Restructured Electricity Markets: Locational Marginal Pricing.
Examine locational marginal pricing (LMP) model of electricity markets. Explore market dispatch formulated as an optimization problem, unit commitment issues, and pricing rules and incentives in markets; energy-price and transmission-price risk hedging and energy network models; and revenue adequacy of financial transmission rights, a mixed-integer programming approach to unit commitment, the representation of voltage constraints into market models, and the design of electricity markets to mitigate market power.

ECE X94.17. Restructured Electricity Markets: Market Power.
Explore the definition and analysis of market power, especially as an issue in the design and functioning of electricity markets. Focus on transmission constraints and offer-based markets that involve locational marginal pricing.

ECE X94.18. Electric Machinery and Drive Systems.
Explore electric drives and machines used in commercial and industrial applications. Examine magnetic circuits and magnetic materials; electromechanical energy conversion principles; rotating and linear machine concepts, including synchronous, induction, DC, and variable reluctance; and control strategies.

ECE X94.7. Power Electronic Devices and Systems.
Explore power electronic components and circuits; high-voltage, direct current (HVDC) converters; electronic drives for machines; AC/DC converters.

ECE X94.9. Power Quality.
Examine electrical transients, switching surges, lightning, and other phenomena that cause deviations in 60-hertz sinusoidal voltages and currents.

ECE X94J. Topics in Energy Systems.

ECE X94J.1. Power System Engineering I.
Examine physical features, operational characteristics, and analytical models for major electric power systems and components.

ECE X94J.10. Distributed Generation Technologies.
Examine distributed generation and microgrids elements; microsources; energy storage; power electronics interfaces; DC and AC architectures; economics, operation, stabilization, and control; reliability and availability aspects; interaction between microgrids and bulk power grids; and smart grids.

ECE X94J.11. Advanced Power Electronics.
Explore resonant converters, switched-capacitor converters, the dual active bridge converter, high-frequency magnetics, high-frequency inverters and rectifiers, power factor correction, and other areas of current interest. Undertake projects with intensive design, prototyping, and/or simulation components.

ECE X94J.12. Modeling and Simulation of Wind Power Plants.
Explore the analysis, modeling, and simulation of wind turbines and wind farms; fundamentals of wind turbines and technologies, reference-frame theory, dynamic models of induction and synchronous machines, fixed-speed direct-connect, wide-slip, doubly-fed, full-converter wind turbines, operation and control, and interconnection issues.

ECE X94J.2. Power System Engineering II.
Explore advanced techniques for solving large power networks; load flow, symmetrical components, and short circuit analysis.

ECE X94J.9. Wind Energy Systems.
Examine wind resource characteristics and assessments; wind turbine technologies (fixed and variable-speed turbines); wind power transmission; integration and interconnection issues; and reliability impacts.

ECE X94L. Power Systems Apparatus and Laboratory.
Examine the fundamentals of power systems emphasized through laboratory experiments. Explore complex power, three-phase circuits, per-unit system, transformers, synchronous machines, transmission line models, steady-state analysis, induction machines, capacitor banks, protective relaying, surge arrestors, and instrumentation.

ECE X96K. Topics in Solid-State Device Theory.
Explore the theory of electron, magnetic, and electro-optic devices.

ECE X96K.1. Metal Oxide Semiconductor Devices: Physics and Technology.

ECE X96K.10. Ionic Conductors.

ECE X96K.11. High-Temperature Superconductors.

ECE X96K.12. Catalytic Electrodes.

ECE X96K.13. Magnetic Materials.

ECE X96K.14. Optical Interconnects.

ECE X96K.15. Optoelectronics Integrated Circuits.

ECE X96K.16. Semiconductor Lasers.
Examine the principles of compound semiconductor lasers and LEDs; bulk and quantum-well laser structures; radiative and nonradiative recombination processes; optical, electrical, and thermal properties of lasers; dynamic rate equations and modulation characteristics; lasing spectra, chirp, modal noise and linewidth; and edge-emitting and surface-emitting lasers.

ECE X96K.17. Localized-Electron Phenomena.
Analysis of the variation in physical properties versus chemical composition of several groups of isostructural transition-metal compounds.

ECE X96K.19. Plasma Processing of Semiconductors I.
Explore plasma analysis using Boltzmann and fluid equations; plasma properties, including Debye length, quasineutrality, and sheaths; basic collisional properties, including Coulomb and polarization scattering; analysis of capacitive and wave-heated plasma processing reactors.

ECE X96K.2. Semiconductor Physics.
Introduction to the fundamental physics of charge carrier states in semiconductors, charge carrier interactions among themselves and with the environment, and charge transport in semiconductors and their heterostructures.

ECE X96K.20. Plasma Processing of Semiconductors II.
Explore plasma chemistry and equilibrium; analysis of molecular collisions; chemical kinetics and surface processes; plasma discharge particle and energy balance; analysis of inductive and DC plasma processing reactors; plasma etching, deposition, and implantation.

ECE X96K.21. Nanoscale Device Physics and Technologies.
Examine physical principles and operational characteristics of semiconductor devices. Explore the physics of metal-oxide-semiconductor field-effect transistors (MOSFET) and bipolar junction transistors (BJT). Discuss short-channel effects, ultra-thin oxide, and high-K gate dielectrics; semiconductor interface characterization; hot-electron effects; lightly-doped drain devices (LDD); subthreshold characteristics; complementary-symmetry metal-oxide- semiconductor (CMOS) latchup; gate-induced leakage current of MOSFETs; poly-depletion and quantum mechanical effects; silicon on insulator (SOI) devices; strained-Si; advanced 3-D devices and bandgap narrowing effect; Webster effect; Kirk effect; punchthrough and avalanche breakdown; base transit time for bipolar transistors; and scaling issues of both BJT and MOSFETs.

ECE X96K.22. Semiconductor Microlithography.

ECE X96K.23. Semiconductor Heterostructures.

ECE X96K.24. Microwave Devices.

ECE X96K.25. Organic and Polymer Semiconductor Devices.

ECE X96K.26. Microelectromechanical Systems.

ECE X96K.27. Charge Transport in Organic Semiconductors.

ECE X96K.28. Magnetic Materials and Devices.
Explore the fundamentals and applications of magnetic materials, in particular to nano-devices. Examine the origin of magnetism in oxides and metals, magnetic switching mechanisms, and how spin structures arise such as domain walls and topologically-protected spin states. Discuss applications to future computing nano-devices.

ECE X96K.29. Thin Film Transistors.
Explore device physics of thin-film and 2D transistors, charge transport phenomena, and materials aspects. Discuss organic polymer and amorphous inorganic semiconductors (oxides and silicon). Study organic polymer and amorphous inorganic semiconductors (oxides and silicon), and field effect transistors with 2D semiconductors such as transition metal dicalcogenides (TMDs). Review change of properties with layer thickness, device physics and transport, contacts, and performance characteristics and discuss unusual properties of thin film transistors (TFTs) such as light emission and ambipolar charge transport, lateral junctions, and ionic gating.

ECE X96K.30. Solar Energy Conversion Devices.
Study radiation from the Sun and the solar energy flux on Earth, and discuss the principles of semiconductors and semiconductor device physics relevant to diodes under various bias conditions. Examine the physics of pn junction under solar illumination and with various recombination mechanisms. Review the most important materials families of solar cells including single crystal silicon; polysilicon; amorphous silicon; solar cells based on CdTe and copper indium diselenide and related compounds; and III-V compound semiconductor heterojunction solar cells including tandem cells and space-grade solar cells. Discuss new materials technologies including organic and perovskite-based solar cells.

ECE X96K.4. Synthesis, Growth, and Analysis of Electronic Materials.

ECE X96K.5. Superconducting Electronic Devices.

ECE X96K.6. Magnetic Phenomena in Materials.

ECE X96K.7. Metal Oxide Semiconductor Integrated Circuit Process Integration.

ECE X96K.8. Ultra-Large-Scale Integration Techniques.
Examine integrated circuit processing; crystal growth and wafer preparation; epitaxial growth; oxidation, diffusion, and ion implantation; thin-film deposition techniques; and lithography and etching. Participate in an individual laboratory.

ECE X96K.9. Localized versus Itinerant Electrons in Solids.
Description of electrons, from free atoms to crystals; band theory contrasted with crystal-field theory; evolution of electronic properties on passing from magnetic insulators to normal metals, from ionic to

covalent solids, from single-valent compounds to mixed-valent systems; electron-lattice interactions and phase transitions; many examples.

ECE X96M. Topics in Quantum Electronics.

Examine quantum mechanical principles as applied to electron devices, lasers, and electro-optics; material properties and interaction of radiation and material.

ECE X96M.1. Introductory Quantum Electronics.

Examine basic quantum mechanics and applications to solid-state phenomena and lasers.

ECE X96M.2. Quantum Information Hardware.

Explore various hardware platforms used for quantum information processing from an applied physics perspective. Examine the physical requirements for a hardware platform to process quantum information. Review characteristics of current hardware platforms such as superconducting quantum circuits, atomic systems, solid-state spins and optical photons.

ECE X96N. Topics in Nanotechnology.

ECE X96N.1. Semiconductor Nanostructures.

Examine the theoretical framework for the understanding of electronic properties and electron transport in quantum confined devices; two-dimensional electron systems in semiconductor heterostructures; quantum wires; quantum dots; spintronic devices; and growth and fabrication techniques.

ECE X96N.2. Carbon and 2D Devices.

Introduction to the material properties and device physics of carbon nanotubes, graphene and related 2D materials; science and technology of carbon nanomaterials and their electronic, optical, and sensor properties; and a basic review of quantum mechanics and elementary theory of solids. Examine carbon synthesis, sensor devices, energy devices, interconnects, transistors, and circuit applications of carbon nanomaterials. Explore 2D materials beyond graphene including transitional metal dichalcogenides.

ECE X96V. Topics in Solid-State Electronics.

ECE X96V.5. Introduction to Solid-State Properties of Materials.

Introduction to the electronic, magnetic, and optical properties of materials. Solid-state properties of metals, semiconductors, and ceramics; fundamental concepts needed for the description of these properties, using an introductory-level description of the electronic structure of solids.

ECE X96V.6. Advanced Semiconductor Lasers.

Examine dynamic properties of semiconductor lasers; intensity, phase, and frequency noise; dynamic lasing spectra, chirp, and mode partition noise; injection locking and optical feedback; short pulse generation by mode-locking and gain switching; single-mode distributed feedback, distributed Bragg reflector (DBR), and coupled-cavity lasers; wavelength-tunable single-mode lasers; externally modulated lasers; coherent high-power laser arrays; quantum-dot lasers and amplifiers; vertical-cavity surface-emitting lasers; and integrated wavelength-division multiplexing (WDM) laser arrays and photonic integrated circuits.

ECE X96V.7. Optoelectronics for Optical Networking.

Examine advanced optical communication systems and optoelectronics technologies, including dense and coarse wavelength division multiplexing, soliton transmission, coherent detection, subcarrier multiplexing, nonregenerative erbium-doped fiber amplifier (EDFA) networks, and Raman amplification. Explore photonic switching system architectures and optical switching technologies, including both passive and active components.

ECE X97C. Research Problems.

Select and research a problem with approval of the department.

ECE X97G. Research Problems.

Problem selected by the student with approval of the department.

ECE X97K. Advanced Topics in Electrical Engineering.

ECE X97M. Graduate Research Internship.

Engage in research associated with enrollment in the Graduate Research Internship Program (GRIP).

ECE X97N. Conference Course.

ECE X97S. Graduate Seminar in Electrical Engineering.

ECE X98. Thesis.

ECE X98R. Master's Report.

Prepare a report to fulfill the requirement for the Master's degree under the report option.

ECE X98T. Supervised Teaching in Electrical Engineering.

Teach under close supervision for one semester. Attend group meetings or individual consultations, and submit reports as required.

ECE X99W. Dissertation.

Professional Courses

ECO - Economics

Economics: ECO

Lower-Division Courses

ECO X01. Introduction to Economics.

Introduction to the structure and functioning of the aggregate economy and specific markets, including the labor market, housing market, and financial markets. Basic concepts of market regulation and monetary and fiscal policy. Concepts used in the social and behavioral sciences for measuring and interpreting economic data.

ECO X01S. Professional Development and Career Planning.

Discuss issues surrounding career planning implementation and evaluation in order to establish a job search, including resumes, networking, and interviewing techniques. Focus on career management as a lifelong process.

ECO X04K. Introduction to Microeconomics.

Analysis of the economic behavior of individual consumers, firms, and workers. Demand, supply, and market equilibrium. Impact of taxes, externalities, and market power on equilibrium.

ECO X04L. Introduction to Macroeconomics.

Analysis of the economy as a whole. Measurement of output, the price level, and employment. Basic theories of the determination of Gross domestic product, investment and growth, and inflation. Introduction to fiscal policy and monetary policy.

ECO X18Q. Supervised Research.

ECO X19S. Topics in Economics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ECO X29S. Topics in Economics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ECO X19S. Topics in Economics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in

residence. Transfer credit is awarded for work in an affiliated studies program.

ECO X20K. Microeconomic Theory.
Economic theory of the behavior of individuals, households, firms, and markets. Roles of relative prices and information, with a focus on constrained optimization.

ECO X20L. Macroeconomic Theory.
Theories of the determination of output, employment, and the price level. Basic models of growth. Design of monetary and fiscal policies, and the mechanisms by which they affect the economy.

ECO X20S. Mathematical Microeconomic Theory with Advanced Applications.
Examine mathematical treatment of microeconomic theory with application to real world subjects. Explore mathematical methods used by economists and apply them to analyze consumer behavior, choice under uncertainty, theory of the firm, game theory and general equilibrium.

ECO X21. Public Economics.
Study of appropriate allocations of economic activity between government (federal, state, and local) and the private sector. The workings of social security, welfare, education, pollution control, deregulation, taxation; and proposals for reform.

ECO X22. Money and Banking.
Theories of financial intermediation and the role played by money. Financial policy and monetary policy in theory and practice.

ECO X22N. Economics of Money: from the Past to Bitcoin.
Analyze assets that function as money through time, including the pricing of money in terms of interest rates and exchange rates, the economics of financial innovations, and the evolution of money markets.

ECO X23L. Political Economy.
Economic issues in the political arena. Use of microeconomic tools to study issues associated with collective decision-making, including the role of government in a market economy, and the formulation and implementation of government policies.

ECO X24. Introduction to Labor Economics.
Labor markets in modern economies. Role of institutions and policies in shaping labor market outcomes for individuals and businesses.

ECO X25K. Health Economics.
Explores medical care as a commodity, demand for health and medical services, economic behavior of medical care providers, and the functioning of medical insurance markets. Government regulation and provision of health care and health insurance.

ECO X25L. Economics of Health.
Explore the application of basic microeconomics to the study of health and issues arising in the provision of medical care. Examine the demand for and the supply of medical care. Discuss the roles of the private sector and government in the provision of medical insurance. Analyze the regulation of health care and health insurance.

ECO X26L. Economics of Education.
Applications of economic principles and empirical methods to education, including the concept of human capital, economic returns to education, the determinants and measurement of teacher impact, the roles of school inputs and factors outside of school, and the market for higher education. Methodology for evaluating education policy.

ECO X27. Comparative Economic Systems.
Economic systems in theory and practice. Role of government and regulation.

ECO X28. Industrial Organization.
Organization of industries and markets; competition, monopoly, and oligopoly. Introduction to antitrust policy, regulatory policy, and other alternatives.

ECO X29. Economic Statistics.
Interpretation of economic data. Introduction to statistical models, estimation, and inference in economics.

ECO X29S. Topics in Economics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ECO X30T. Topics in Economics.
Topics cover aspects of economic theory, applications, and policy.

ECO X30T.2. Introduction to Law and Economics.

ECO X33K. Development Economics.
Introduction to theories of economic development. Economic analysis of leading issues.

ECO X33L. Development and Population.
Microeconomics of economic development, population growth and the age structure of the population, and their impact on the environment.

ECO X34K. Urban Economics.
Economic analysis of urban areas, emphasizing current problems, such as spatial concentration of poverty, lack of access to jobs and financial services, and transportation systems. Examines the role of policy in addressing these problems.

ECO X34L. Regional Economics.
Spatial aspects of economics, including concepts, theories, and policy applications.

ECO X34M. Migration Economics and Policy.
Immigration policy of the United States compared to that of other countries. Determinants of migration. Characteristics of migrants. Effects of migration on the country of origin and the receiving country. Unauthorized immigration to the United States.

ECO X35K. Energy Economics.
Economic analysis of the markets for resources that supply energy, including coal, oil, natural gas, and shale gas, and the market for electricity. Principles of valuation and optimal dynamic allocation of energy resources. Financial contracts and risk management in energy markets. Regulation of energy markets.

ECO X35L. Energy and Environmental Economics.
Apply the tools of economics to examine the energy sector and current energy policy issues. Learn about the environmental and public health impacts of energy production, energy consumption, industrial activity, and the role of government regulation.

ECO X36M. Economics of Auctions.
Explore auctions as a mechanism for allocating resources. Analyze bidders' strategic interactions using game theory. Investigate market rules designed to attain specific policy objectives. Utilize empirical methods to analyze auction data.

ECO X39K. International Trade and Investment.
Theories explaining the location of production facilities and patterns in international trade. Implications of international trade for per capita income, growth, and inequality.

ECO X39L. International Finance.
Exchange rates and foreign exchange markets; reasons for financial globalization; open-economy macroeconomics; exchange rate regimes (fixed and floating exchange rates, currency boards, and currency areas such as the euro zone); central bank accumulation of foreign exchange reserves; and sovereign debt crises and currency crashes. Reasons for different exchange rate arrangements and other policies are explored.

ECO X41K. Introduction to Econometrics.
Parameter estimation and inference in regression models.

ECO X42L. Advanced Econometrics.
Explore advanced methods of causal inference and prediction.

ECO X42M. Applied Econometrics and Data Analysis.
Explore advanced regression analysis, maximum likelihood, discrete choice models, nonparametric methods, causality, and regression

discontinuity design. Evaluate the use of these techniques in applied research and apply them in a variety of data sets.

ECO X42N. Time Series Econometrics.
Explore models and econometric considerations related to time series data. Apply time series methods in the fields of economics and finance.

ECO X43K. Causal Inference.
Introduction to how economists infer causality from data.

ECO X48K. Advanced Topics in Econometrics.
Topics in econometric modeling and estimation.

ECO X50K. Advanced Topics in Economics.
Explore advanced topics in economic theory, and the application of theory to empirical models.

ECO X50K.6. Advanced Microeconomic Theory.
Advanced theory of individual behavior and organizations. Subjects may include decision-making under uncertainty, insurance, optimal contracts, and institutions.

ECO X50L. Advanced Macroeconomics.
Investigate advanced macroeconomic theory. Examine dynamic general equilibrium models, real business cycle theory, and macroeconomic models with a financial intermediary sector, financial crises, and monetary and fiscal policy.

ECO X51K. Current Issues in Business Economics.
Economic analysis of government regulation and policy and business responses.

ECO X51M. Managerial Economics.
Use of economic analysis and optimization as tools for improving managerial decision-making in business.

ECO X51N. Economic Principles of Managerial Decisions.
Use of economic concepts and models to make strategic business decisions (adverse selection, game theory, price discrimination, strategic commitment, barriers to entry, network effects). Economics of strategic responses to the legal environment (regulations, antitrust policies, intellectual property, fiduciary duty, liability).

ECO X52K. Business Strategy.
Economic analysis of business strategy, including introducing new products, vertically integrating, bundling goods, pricing, distribution, mergers, and product differentiation. Relevant aspects of antitrust law. Case studies of specific firms.

ECO X52R. Economics of Entrepreneurship.
Explore the application of economics to the practice of starting or expanding a business. Examine evaluation of the market; strategic decisions, including pricing, advertising, location, and deterring competitors; raising capital; and employee compensation.

ECO X53K. Antitrust Law and Economics.
Economic analysis of antitrust law intended to deter firms from engaging in anti-competitive conduct that harms consumers, including mergers that impede competition, price-fixing, and anti-competitive practices by a dominant firm in an industry. Focus on various industries and select antitrust cases.

ECO X53L. Economic Analysis and the Law.
Examine how economic principles influence, and are influenced by legal rules and procedures, evidentiary standards, and legislative approaches to social issues.

ECO X53M. Empirical Public Economics.
Use of data to evaluate public policy issues. Issues considered include the effect of having health insurance on health outcomes; the relationship between earning power and the type of college attended; charter schools and educational outcomes; the effect of an increase in the minimum wage on employment; and the welfare effects of bank bailouts.

ECO X54K. Introductory Game Theory.
Introduction to the formal study of interdependent decision making. Applications of game theory include pricing and advertising strategies, labor-management bargaining, and tariff negotiations.

ECO X54M. Experimental Economics.
Examine what economic theory has to say about economic choices and strategic interactions and what people actually do when faced with strategic decisions. Conduct experiments to either identify systematic deviations or confirm theoretical predictions. Explore how economic experiments are useful in reshaping economic thinking.

ECO X55. Development Problems and Policies in Latin America.
Analysis of the economies of Latin America. Issues may include the structure and functioning of cities, rural-urban migration, the sectoral composition of GDP and employment, and determinants of growth.

ECO X58R. Supervised Research.

ECO X59M. Environmental and Natural Resource Economics.
Optimal use of exhaustible and renewable resources, including fuels, minerals, fisheries, forests, and water; resource scarcity and economic growth; valuation of nonmarketed environmental amenities; the economics of pollution control instruments, including taxes, permits, direct regulation, and negotiation; environmental quality and international trade; the economics of global climate change; pollution control policy in practice.

ECO X59N. Methods of Environmental Policy Analysis.
Examine current environmental policy questions and debates and learn how data can be used to answer these questions.

ECO X61S. Artificial Intelligence and Public Policy.
Analyze and apply tools from machine learning and artificial intelligence to policy problems. Explore the benefits and concerns that can arise in doing so.

ECO X63C. Computational Economics.

ECO X67R. Monetary Economics.
Theories explaining the role of money in the economy.

ECO X68. Survey of the History of Economic Thought.

ECO X68M. Evolution of Economic Thought.
Discuss the evolution of economic thought over the last several centuries and apply the idea's of history's greatest economists to contemporary economic problems.

ECO X69F. Financial Economics.
Economic analysis of the operation of financial markets, including arbitrage theory, asset pricing, and corporate finance.

ECO X70E. Economics of Gender, Race, and Ethnicity.
Study large and persistent differences in economic outcomes across genders and between major racial and ethnic groups in the United States. Examine empirical evidence for, and gaps in, economic models explaining these differences.

ECO X70M. Behavioral Economics.
Explaining how heuristics result in biases in individual decisions and anomalies in the market place. Applications to choice under uncertainty, intertemporal choice, choice in a strategic environment, and behavioral finance.

ECO X70N. Financial Literacy.
Study the personal financial planning process. Apply economic principles along with analytical tools and approaches as they pertain to financial literacy.

ECO X71M. Social Economics: Outside the Market.
Explore concepts of social welfare, fairness, and social choice procedures. Discuss economic analysis of social interactions that take place outside of markets.

ECO X76N. Personnel Economics.
Use of microeconomic theory to analyze how firms make decisions involving human resources, including recruiting and hiring strategies, training and investment in worker skills, evaluating and motivating worker performance, and job design.

ECO X78H. Honors Tutorial Course I.
Supervised individual reading, research, and writing of a substantial paper on a special topic in the field of economics.

ECO X79C. Individual Conference Course.
Supervised individual study of selected problems in economics.
ECO X79E. Internship in Economics.
Conduct research while working in an appropriate government agency or private business.
ECO X79H. Honors Tutorial Course II.
Supervised individual reading, research, and writing of a substantial paper on a special topic in the field of economics.

Graduate Courses

ECO X19S. Topics in Economics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ECO X29S. Topics in Economics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ECO X80. Research Course.
ECO X80D. Internship in Economics.
Practical working involvement with an appropriate business, government or research agency, or similar institution.
ECO X80M. Regional Economics.
Survey of theoretical and empirical literature related to location theory, regional development, regional disparities, growth and function of cities, and political economy of spatial planning.
ECO X80N. Urban Economics.
Provides an economic analysis of pressing urban problems such as poverty, housing, transportation, environment, and finance.
ECO X80P. Internship in Economics.
Practical working involvement with an appropriate business, government or research agency, or similar institution.
ECO X81K. Seminar in Money and Banking.
Topics include monetary policy and problems, theory of central banking, and money and banking history.
ECO X83K. Seminar in General Economic History.
A historical study of economic development and economic policy.
ECO X84G. Topics in Seminar in International Economics.
ECO X84G.1. International Trade.
ECO X84G.2. International Finance.
ECO X84H. Topics in Seminar in Public Finance.
Analysis of public expenditure and taxation.
ECO X84H.1. Seminar in Public Economics.
Introduction to public finance subjects and research methods. Cover recent research ranging from tax incidence to social insurance programs.
ECO X84J. Topics in Seminar in Development Economics.
Analysis includes theories of economic development and planning.
ECO X84K. Topics in Industrial Organization.
ECO X84K.1. Introduction to Industrial Organization.
ECO X84K.2. Industrial Organization and Regulation.
ECO X84N. Topics in Resource Economics.
Definition, measurement, production, and conservation of renewable and exhaustible resources; models of economic growth and resources; world distribution and consumption; United States resource policy.
ECO X84N.1. Natural Resource Economics.
ECO X84N.2. Environmental Economics.
ECO X85C. Probability and Statistics.
ECO X85D. Mathematics for Economists.
ECO X85K. Topics in Labor Economics.
Analysis of the empirical and theoretical factors that influence labor markets.
ECO X85K.1. Introduction to Labor Economics.
ECO X85K.3. Advanced Labor Economics.
ECO X86C. Microeconomics I.
ECO X86D. Microeconomics II.
ECO X86E. Topics in Seminar in Advanced Microeconomics.
ECO X86E.1. Introduction to Game Theory.
ECO X86E.2. Applications of Game Theory.
ECO X86E.3. Advanced Microeconomic Analysis.
ECO X86E.4. Mathematical Economics.
ECO X86E.5. Experimental Methods in Economics.
ECO X86E.6. Health Economics.
ECO X87C. Macroeconomics I.
ECO X87D. Macroeconomics II.
ECO X87E. Topics in Seminar in Advanced Macroeconomics.
ECO X87E.1. Advanced Macroeconomic Analysis I.
ECO X87E.2. Advanced Macroeconomic Analysis II.
ECO X87E.3. Advanced Macroeconomic Labor I.
ECO X87E.4. Advanced Macroeconomic Labor II.
ECO X87K. Monetary Theory.
Theories, based on microeconomic foundations, covering such topics as the usefulness of monetary exchange, optimal central bank policy, the interaction of monetary and fiscal policy, and the role of financial intermediation in the macroeconomy.
ECO X87M. Writing Seminar in Economics.
ECO X87N. Survey of Fields in Economics.
Introduction to the questions, methods, and scope of research in different fields in economics.
ECO X88C. Econometrics I.
ECO X88D. Econometrics II.
ECO X88E. Topics in Seminar in Advanced Econometrics.
ECO X88E.1. Advanced Econometric Theory I.
ECO X88E.2. Advanced Econometric Theory II.
ECO X88E.3. Applied Microeconometrics.
ECO X88E.4. Time-Series Analysis.
ECO X88E.5. Applied Macroeconometrics.
ECO X90L. Seminar in the History of Economic Thought.
Survey and analysis of principal contributions and historical influences in the evolution of contemporary economic thought from the late eighteenth through the early twentieth century.
ECO X92L. Quantitative Methods in Economics.
Topics include optimization methods, probability theory, and statistical inference.
ECO X93. Seminar in Industrial Organization.
ECO X94C. Mathematics for Economists.
Mathematical tools widely used for economic analysis, including advanced calculus, optimization methods, linear algebra, and dynamic systems.
ECO X94D. Probability and Statistics.
Probability theory and statistical methods used in economics and econometrics.
ECO X94K. Microeconomics.
Rigorous introduction to the methods of microeconomic theory, including consumer and producer theory, decision under uncertainty, markets and competition, and general equilibrium.
ECO X94L. Macroeconomics.
Dynamic optimization concepts and methods used in modern macroeconomics. General equilibrium applications in the areas of

economic growth, business cycles, and the role of monetary and fiscal policy.

ECO X94M. Econometrics.
Identification and estimation of linear and nonlinear regression models; inference and hypothesis testing.

ECO X95K. Topics and Applications in Microeconomics.

ECO X95K.1. Game Theory.
Introduction to game theoretic concepts and analyses and their application to study strategic interactions between individuals, firms, and other economic agents.

ECO X95K.2. Labor Economics.
Explore major theoretical and empirical models for understanding behavior and outcomes in the labor market.

ECO X95K.3. Industrial Organization.
Explore the organization of industries and markets, including competition, monopoly, and oligopoly. Examine the effect that strategic interactions have on production, pricing, investment, advertising, and other decisions. Discuss antitrust policy, regulatory policy, and other alternatives.

ECO X95K.4. Markets for Electricity.
Examine the design and performance of electricity markets and the challenges confronting these markets.

ECO X95K.5. Economics of Auctions.
Explore theoretical models of auctions as a mechanism for allocating resources and empirical methods to analyze auction data. Analyze bidders' strategic interactions using game theory and investigation of market rules designed to attain specific policy objectives.

ECO X95L. Topics and Applications in Macroeconomics.

ECO X95L.1. International Economics.
Explore theoretical models in international trade with applications to the current international economic environment.

ECO X95M. Topics and Applications in Quantitative Methods.

ECO X95M.1. Real Analysis.
Explore a rigorous, proof-based approach to mathematics, including properties of Euclidean spaces, metric spaces, compactness, continuity, single- variable differentiation and integration, and sequences and series of real-valued functions.

ECO X95M.2. Data Mining and Statistical Learning.
Examine modeling and prediction techniques using the tools of statistical learning and machine learning.

ECO X95M.3. Time Series Econometrics.
Examine time series models with applications in macroeconomics and finance.

ECO X95M.4. Causal Inference.
Examine research strategies and econometric estimators for inferring causal effects in observational data.

ECO X96. Studies in Economic History.

ECO X97. Seminar in International Economic Problems.

ECO X97K. Specialized Topics in Microeconomics.

ECO X97L. Specialized Topics in Macroeconomics.

ECO X97M. Specialized Topics in Quantitative Methods.

ECO X98. Thesis.

ECO X98K. Specialized Topics in Microeconomics.

ECO X98L. Specialized Topics in Macroeconomics.

ECO X98M. Specialized Topics in Quantitative Methods.

ECO X98T. Supervised Teaching in Economics.
Teaching under the close supervision of the course instructor; weekly group meetings, individual consultations, and reports.

ECO X99W. Dissertation.

Professional Courses

ECO X19S. Topics in Economics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ECO X29S. Topics in Economics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Economics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EDC - Curriculum and Instruction

Curriculum and Instruction: EDC

Lower-Division Courses

EDC X01E. Orientation to Teaching in the Elementary School.
Discussion sessions and assignments in public schools; designed to help students make teaching career decisions.

EDC X01S. Orientation to Teaching in the Secondary School.
Discussion sessions and assignments in public schools; designed to help students make teaching career decisions.

EDC X12. Foundations of United States Schooling.
Discuss the institution of schooling, and processes of school reform, from historical, philosophical, and political perspectives. Introduction to the origins and development of public schooling in the United States in the context of processes of settler colonialism, racial capitalism, and contests over the meaning of democracy. Explore past and present influential philosophical visions of schooling and de-schooling, with focus on debates over the notion of the common school, schooling as socialization, and education for uplift and emancipation. Examine the politics and policy of education, with special attention to the consequences for students of color, Indigenous students, LGBTQIA students, immigrant students, and students with disabilities.

EDC X14. Children's Movement.
Explore support positive, effective physical education and implement well-planned and stimulating physical activity for children. Focus on integrating academic content with physically active classrooms. Examine principles of movement and motor development in children, curriculum, legislation and policy, physiological principles, learning principles, coordinated school health (CSH), and comprehensive school physical activity programming (CSPAP).

EDC X18C. Topics in First-Generation Scholars.
Explore and utilize a variety of resources and opportunities for graduate studies and academic professionalization. Define, develop, produce and model an independent research project.

EDC X18C.1. Graduate School Literacy.

EDC X18C.2. Teaching Academy.

EDC X19. Qualitative Inquiry and Education for Social Change.
Examines the socio-historical contexts of education for minoritized groups in the U.S. through empirical approach of critical qualitative inquiry in education. Explores qualitative and historical studies in which students, teachers, administrators, and parents seek to change or reform their educational experiences. Entails research in schools and non-school settings.

EDC X19S. Topics in Curriculum and Instruction.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Curriculum and Instruction. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

EDC X24. Foundations of Language and Literacy Education.
Examine the foundations of language and literacy through a lens of sociocultural knowledge and practice. Consider cognitive theories of learning, as well as sociocultural theories of the processes of language, reading, and composing, and how they relate to each other. Discuss the five pillars of reading (phonemic awareness, phonics, fluency, vocabulary, and comprehension) along with other component areas including oral language development, print awareness and alphabet knowledge, syllabication, and morphemic analysis. Prepare for addressing disabilities and difficulties, which are expected and part of the variation of how people learn to be literate.

EDC X29S. Topics in Curriculum and Instruction.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Curriculum and Instruction. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EDC X31S. School Organization and Classroom Management in Secondary Schools.
Administrative structure of secondary schools; concepts, principles, and strategies for establishing an orderly classroom environment, preventing inappropriate behavior, and promoting student involvement in academic work.

EDC X32S. Designs for Instruction.
One of the beginning courses in the professional development sequence for approved programs in secondary education.

EDC X33W. Introduction to Teaching.
Overview of the objectives, organization, and operation of schools; the teaching process; teaching as a professional career.

EDC X39C. Community Literacy.

EDC X39D. Reading Assessment and Development.

EDC X39E. Secondary School Literacy across the Disciplines.
Designed for students in a University secondary teacher preparation program.

EDC X39F. Adolescent Literacy.
Designed for students in a University secondary teacher preparation program. Social, political, cultural, emotional, and personal perspectives on adolescent literacy. Subjects may include adolescent literacy practices in and out of school; literacy in relation to identity, peer communities, meaning, communication, and social engagement; curricula that emphasize the social and civic purposes of literacy; and motivation, fulfillment, and democratic participation as educational outcomes.

EDC X39G. Literacy Seminar.

EDC X39J. Foundations of Social Studies.
Learn to facilitate the exploration of culture; time, continuity, and change; people, places, and environments; individual development and identity; individuals, groups, and institutions; power, authority, and governance; production, distribution, and consumption; science, technology, and society; global connections; and civic ideals and practices. Discuss how to enact engaging and purposeful social studies curricula for varied grade levels. Consider history, sociology, anthropology, economics, geography, and civics.

EDC X39K. Designing a Classroom Community with Equity and Justice.
Explore methods of designing a classroom community with equity and justice.

EDC X39L. Young Children As Learners.

EDC X39M. Communities and Families as Assets in Education.
Discuss the social and cultural contexts that contribute to the development of children and families within their school and community.

EDC X40C. Spanish Language Methods for the Bilingual Classroom Teacher I.
Designed primarily to help prospective bilingual education teachers expand their oral Spanish proficiency for instructional purposes in the bilingual education classroom.

EDC X40D. Spanish Language Methods for the Bilingual Classroom Teacher II.
Intensive practice in the various aspects and conventions governing literacy within the elementary bilingual education curriculum.

EDC X40E. Latino Children's Literature for Bilingual Teachers.
Covers the use of oral and written literature for children in bilingual programs while examining the history and development of Spanish-language children's literature from social, cultural, and political perspectives. Subjects may include foundational books, authors, and illustrators of Latina/o children's literature; criteria for evaluating culturally authentic children's literature; multimedia and online resources related to bilingual children's literature; and the literary response process.

EDC X40F. Foundations of Bilingual Education.
An overview of theory, practice, programs, and policy related to bilingual education as implemented in the United States. Designed to give students an opportunity to learn about and discuss issues related to bilingual education, and the education of linguistically and culturally diverse populations.

EDC X40R. Spanish Language Communication in Bilingual Classrooms.
Practice in Spanish for the planning, implementation, and evaluation of learning in bilingual classrooms and their communities.

EDC X41C. Early Childhood Education.
Introduces socio-cultural understandings of key early childhood education approaches. Critically examines these approaches in relation to their constructions of the young child as a learner, images of the early childhood educator, the social purposes of early childhood education institutions, and implications for culturally sustaining pedagogy.

EDC X41D. Early Childhood Program Development.
Focuses on strategies for developing and supporting inquiry-based curriculum in early childhood education classrooms. Introduces pedagogical documentation as a tool to support curriculum development that is critically reflective, culturally sustaining and promotes a culture of inquiry in early childhood environments.

EDC X41R. Critical Differentiation Approaches For Bilingual Learners.
Explore basic principles and applications of differentiated instruction, multi-tier-systems of support and inclusive collaboration practices with special education in the general classroom.

EDC X43. Informal Science Education.

EDC X44. Digital Literacy for Teaching and Learning.
Use of digital tools to increase technical, pedagogical, and administrative proficiencies in a series of hands-on laboratory projects involving word-processing, handling of databases and spreadsheets, multimedia presentations, digital image and video editing, web page creation, and tools to create digital storytelling, e-portfolios, and electronic gradebooks. Experiential foundation creates a repertoire of possibilities for content-specific, technology-supported teaching and learning associated with learner-centered, collaborative classrooms. Emphasis on the development of critical perspectives (including pedagogical, social, technical, cultural, ethical, economic, legal, and political) to help youth fully participate in digital learning.

EDC X45. Curriculum Issues in Physical Education.
Study of personal teaching and physical education programs. Accompanies student teaching.

EDC X50. Topics in Educational Studies.
Analysis of selected topics and problems in education.

EDC X50.3. Teaching Secondary Social Studies.
Explore instructional approaches to teaching in the disciplines of social studies through advanced field-based practice.

EDC X50E. Elementary Grade Teaching Practicum.
Supervised practicum in early childhood through grade four classroom teaching, conducted in cooperating schools, as part of the teacher preparation program. Consists of teaching, analysis, and evaluation.

EDC X51S. Topics in Secondary School Teaching Practicum.
Supervised practicum in secondary classroom teaching, conducted in cooperating schools, as part of the teacher preparation program. Consists of teaching, analysis, and evaluation.

EDC X51S.1. Secondary School Teaching Practicum: English.

EDC X51S.2. Secondary School Teaching Practicum: Social Studies.

EDC X51S.3. Secondary School Teaching Practicum: Math.

EDC X51S.4. Secondary School Teaching Practicum: Science.

EDC X51S.5. Secondary School Teaching Practicum: Visual Art.

EDC X51W. Topics in All Level Teaching Practicum.
Supervised practicum in elementary, middle school, and secondary classroom teaching. Conducted in cooperating schools as part of the teacher preparation program. Consists of teaching, analysis, and evaluation.

EDC X51W.1. All Level Teaching Practicum: Theatre.

EDC X51W.2. All Level Teaching Practicum: Visual Art.

EDC X51W.3. All Level Teaching Practicum: Dance.

EDC X51W.4. All Level Teaching Practicum: Music.

EDC X51W.5. All Level Teaching Practicum: Kinesiology.

EDC X52S. Topics in Secondary Student Teaching Methods.
Focus on secondary teaching, and addressing instructional design and assessment.

EDC X63. Social Entrepreneurship in Youth and Community Studies.
Explore social entrepreneurship and responsibility. Apply entrepreneurship skills and project management skills through individual or group assignments focusing on business development.

EDC X64. Internship.
Supervised fieldwork or clinical work in the student's area of study.

EDC X64C. Fieldwork in Youth and Community Studies.
Explore experiential learning in professional environments related to a chosen concentration area.

EDC X65. Classroom Interactions and Project Based Instruction.
Students are assigned to a mentor teacher classroom where they might continue as apprentice teachers the next semester. Students will be observing or teaching in the classroom at least 3 hours a week, in addition to the 6 contact hours per week. Students prepare, implement and analyze results of inquiry- and project-based lessons, focusing on student thinking and participation, and meeting the needs of students with reading and writing difficulties, those learning in a second language, and those with behavioral and psychological issues.

EDC X65C. Knowing and Learning in Math and Science.
Psychological foundations of learning; problem solving in mathematics and science education utilizing technology; principles of expertise and novice understanding of subject matter; implications of high-stakes testing; and foundations of formative and summative assessment.

EDC X65D. Classroom Interactions.
Principles of delivering effective instruction in various formats (lecture, lab activity, collaborative settings); examination of gender, class, race, and culture in mathematics and science education; overview of policy related to mathematics and science education.

EDC X65E. Project-Based Instruction.
Foundations of project-based, case-based, and problem-based learning environments; principles of project-based curriculum development in mathematics and science education; classroom management and organization of project-based learning classrooms.

EDC X70E. Topics in Elementary School Subjects.
Curriculum content and organization, teaching procedures, materials, and research in elementary school subjects.

EDC X70E.10. Early and Elementary Mathematics Methods.

EDC X70E.11. Inquiry and Project-Based Learning Methods.

EDC X70E.15. Special Adaptations for the Deaf.

EDC X70E.19. Reading/Language Arts.

EDC X70E.20. Teaching English as a Second Language.
The methods, teaching strategies, and materials for developing and assessing English language proficiency in culturally and linguistically diverse populations within the context of the elementary school curriculum.

EDC X70E.21. Teaching Elementary Physical Education.

EDC X70E.6. Early and Elementary Reading Methods.

EDC X70E.7. Early and Elementary Writing Methods.

EDC X70E.8. Early and Elementary Science Methods.

EDC X70E.9. Early and Elementary Social Studies Methods.

EDC X70S. Topics in Secondary School Subjects.
Curriculum content and organization, teaching procedures, materials, and research in one secondary school subject.

EDC X70S.1. Advanced Methods in English, Language Arts, and Reading.

EDC X70S.10. Drama.

EDC X70S.11. Speech.

EDC X70S.12. Teaching Secondary Physical Education.

EDC X70S.15. Teaching Secondary School Theatre.

EDC X70S.16. Teaching Secondary School Visual Art.

EDC X70S.17. Teaching Secondary School Dance.

EDC X70S.18. Teaching Secondary School Music.

EDC X70S.3. Advanced Methods in Social Studies.

EDC X70S.5. Advanced Methods in Foreign Language.

EDC X70S.7. Art.

EDC X70S.8. Music (Vocal).

EDC X70S.9. Music (Instrumental).

EDC X70W. Topics in All-Level School Subjects.
Curriculum content and organization; teaching procedures, materials, and research in one school subject at all grade levels.

EDC X70W.1. English as a Second Language.

EDC X70W.2. Art.

EDC X70W.3. Music.

EDC X70W.4. Theatre.

EDC X70W.5. Foreign Language Education.

EDC X71P. Social Entrepreneurship.
Introduction to social entrepreneurship and responsibility. Apply entrepreneurship skills and project management skills through individual or group assignments focusing on business development.

EDC X71R. Reading Difficulties.
Reading theory, assessment, materials, and instruction with emphasis on struggling readers; field experiences in reading tutoring.

EDC X71S. Topics in Praxis for Student Teaching.
Explore the development of pedagogical practices that adheres to the principals of democratic education.

EDC X71S.1. Secondary English.
EDC X71S.4. Secondary Social Studies.
EDC X73. African Americans in Sports.
Theoretical and practical complexities in issues surrounding African Americans in sports, including the relationship between athletics and higher education. Focuses on racial stereotyping, identity theory, and how practical knowledge of these theories can aid in understanding the current state of athletics.
EDC X77. Conference Course in Curriculum and Instruction.
Independent studies in instructional methodology and curriculum.

Graduate Courses

EDC X80F. Sociocultural Foundations.
Problems and issues in the study of education from a sociocultural perspective. Examines research in different fields, including history, sociology, and anthropology of education; innovative education reform in the field of multicultural education; and issues of racial, class, and gender inequality. Includes a critical assessment of the American public school system, with an emphasis on social justice.
EDC X80G. Anthropology of Education.
A study of social life in contemporary American schools from an anthropological perspective.
EDC X80H. Current Issues.
Consider and address contemporary challenges observed in the various areas within curriculum and instruction including the humanities, literacy, world languages and cultures, physical education, and education technology in the contexts of EC-12 and beyond. Engage problem-solving to design solutions to advance equitable outcomes.
EDC X80R. Educational Research and Design.
An introduction to the methodology of social science research, with a focus on the field of education. Examines the fundamental assumptions, principles, and procedures of research; the meaning of knowledge and the ways in which knowledge may be acquired and communicated to others; preparation and utilization of effective questions; principles of data collection and data analysis; drawing conclusions from data; and evaluation of current research.
EDC X80T. Writing: Process and Pedagogy.
Explore processes and pedagogies of writing. Examine purposes, functions, consequences, and implications of writing in culturally and linguistically diverse communities. Examine theories and pedagogical approaches for teaching writing in a digital age.
EDC X80W. Teaching Composition.
Topics in the methodologies for the teaching of writing in American elementary, intermediate, and secondary classrooms. Topics may include writing assessment, connections between school and other settings, reading-writing connections, writing development, writing to think and learn, writing for a range of purposes and in a range of genres, and classroom structures for the teaching of writing.
EDC X81F. Introduction to Teaching and Teacher Education.
Examines research on teaching, research in teacher education, and modes of inquiry.
EDC X81J. Curriculum Organization.
An overview of theories, principles, and issues in curriculum construction for modern education.
EDC X81M. Topics in Designs for Instruction.
Examination of the instructional design process at one of the following levels: elementary school, secondary school, higher education, all-level. Emphasis on promising practices and current efforts toward improvement.
EDC X81R. Introduction to Systems of Human Inquiry.
Designed to provide students with the knowledge and competence in social science research methods required for careers in teaching or human services. Explores competing definitions of research; the idea of a research paradigm; characteristics of various forms of inquiry, including quantitative and qualitative research; and research methods in relation to issues of ethics and rigor.
EDC X82E. Topics in Teaching Elementary School Subjects.
Examination of the discipline of the subject-field selected, coupled with intensive study of research findings, publications of learned societies, and advanced experimentation with the improvement of instruction.
EDC X82E.1. Reading.
EDC X82E.10. Bilingual Education.
EDC X82E.2. Language Arts.
EDC X82E.3. Science.
EDC X82E.4. Social Studies.
Explore the history and theory of early childhood and elementary social studies, including the numerous debates over what constitutes "social studies", how social studies fits within early schooling curricula, and what the ultimate goal of social studies ought to be. Use foundational texts as well as current research in the social studies to examine the field and to consider how these debates impact school curriculum and pedagogy.
EDC X82E.5. Mathematics.
EDC X82E.6. Foreign Language.
EDC X82E.7. The Humanities.
An examination of personal values and such areas in the humanities as philosophy, music, art, drama, dance, and literature to provide richer educational experiences.
EDC X82E.8. English as a Second Language.
EDC X82E.9. Early Childhood Education.
EDC X82R. Fundamentals of Statistics.
Designed for students majoring in the social sciences.
EDC X82S. Topics in Teaching Secondary School Subjects.
Examination of the discipline of the subject-field selected, coupled with intensive study of research findings, publications of learned societies, and advanced experimentation with the improvement of instruction.
EDC X82S.1. Reading.
EDC X82S.2. English.
EDC X82S.3. Science.
EDC X82S.4. Mathematics.
EDC X82S.5. Social Studies.
EDC X82S.6. Foreign Language.
EDC X82S.7. English as a Second Language.
EDC X82S.8. Instructional Technology.
EDC X82T. Problems of College Teaching.
Methods and procedures for teaching in specific fields selected by participants; major emphasis on successful classroom practices.
EDC X83C. Bibliography in Teaching and Curriculum.
Survey of the scholarly literature in teaching and curriculum, with emphasis on bibliographic sources and techniques.
EDC X83F. Curriculum Theory.
An introduction to the central issues in curriculum theory. Includes historical and contemporary approaches to the philosophy and analysis of curriculum, and curriculum theory and practice. Emphasis on the issues of power, knowledge, and exclusion.
EDC X83T. Instructional Theory.
Identification and analysis of the major types of contemporary instructional theory.
EDC X85G. Topics in Program Development and Research: Seminar.
Advanced investigations of selected topics and problems in curriculum theory, program design, and research design at one of the following levels: elementary school, secondary school, higher education, all-level.
EDC X85G.11. Action Technologies.
EDC X85G.17. Culture, Gender, and Race in Organizations.
EDC X85G.19. Managing Human Resource Development.
EDC X85G.2. Parents and Education.
An exploration of the relationship between families and schooling in the United States through racial, class-based, linguistic, cultural, and global perspectives, using multiple theoretical frameworks to both understand

and challenge current approaches towards parental involvement in school.

EDC X85G.21. Training and Development.

EDC X85G.24. Qualitative Research: Mixed-Method Investigation.

EDC X85G.25. Life History Research.

EDC X85G.27. Qualitative Research: Naturalistic Inquiry.

EDC X85G.28. Multimedia Authoring.

EDC X85G.29. Interactive Multimedia Design and Production.
Engaging in the design and production process through work with a client on an interactive, web-based application through new media technology tools. Emphasis on industry standard technology: graphics, video, audio, animation, and web development.

EDC X85G.30. Advanced Qualitative Research: Discourse Analysis.

EDC X85G.31. Inquiry in Play.
An examination of play as a meaningful aspect of curriculum and child development; philosophical, psychological, and educational perspectives on play; and the grounding of educational play research in broader fields of inquiry.

EDC X85G.32. Advanced Science and Mathematics Education.

EDC X85G.33. Computer-Supported Collaborative Learning.
Explores current research, theories, and strategies of computer-supported collaborative learning. Includes web-based activities focused on collaborative inquiry and writing, and approaches to project-based and foreign language learning.

EDC X85G.34. Language, Culture, and Identity.

EDC X85G.35. Constructivism and Instructional Design.
Examines the philosophical, rhetorical, practical, and evaluative bases for constructivist approaches to instructional design. Students visit one constructivist classroom at the kindergarten through grade twelve level, and one at the college level.

EDC X85G.36. Content and Instruction of Reform Algebra.

EDC X85G.37. Critical Issues in Bilingual and Bicultural Education.

EDC X85G.4. Second Language Acquisition.

EDC X85G.40. Current Issues in Teaching Social Studies.

EDC X85G.41. Curriculum Development in School Systems.

EDC X85G.42. Curriculum History in Science, Technology, Engineering, and Mathematics Education.
The historical development of science, technology, engineering, and mathematics curricula in the United States from the mid-nineteenth century to the present. Discusses politics, equity, the development of technology, and theories of learning; and examines current curricular trends.

EDC X85G.43. Curriculum in Science and Mathematics Education.

EDC X85G.44. Curriculum Theories for Prekindergarten and Kindergarten.

EDC X85G.45. Designs and Strategies for New Media.
Explores human-computer interaction (HCI), emphasizing designs and strategies for new media through various evaluations and hands-on activities. Examining the use of new media from the perspectives of information design, interaction design, and interface design; and using industry standard new media tools to illustrate understanding.

EDC X85G.47. Educational Communication Networks: Theory and Practice.

EDC X85G.48. Educational Communication: Diffusion of Innovation.

EDC X85G.49. Teaching and Learning with the Internet.

EDC X85G.5. The Second Language Learner.

EDC X85G.51. Feminist Participatory Action Research.
An overview of feminist social-action theory and research. Studies social action within the local community setting and with community projects.

EDC X85G.52. Foundations of Instructional Technology.

EDC X85G.53. Curriculum and High-Stakes Testing.
Explores the provisions of state and federal legislation regarding high-stakes testing, including the implications for culturally and linguistically diverse student populations, the motivations for use, and the impact upon curricula, teaching, and student academic performance.

EDC X85G.55. Historical Perspectives on Curriculum.

EDC X85G.56. Service Learning as an Instructional Strategy.

EDC X85G.57. Learning Technology Planning and Management.
Current theories, research, and strategies related to the planning and management of learning technology projects. Exploration of funding proposals, strategic planning, and the use of planning tools such as surveys, inventory forms, project management aids, and decision-support systems.

EDC X85G.58. Multicultural Education in Austin.
Explores local educational and community resources for teaching from a multicultural and global perspective.

EDC X85G.59. Knowing and Learning in Science, Technology, Engineering, and Mathematics Education.
Explores various theories related to science, technology, engineering, and mathematics epistemology. Includes memory and the structure of knowledge, problem solving and reasoning, and the foundations of learning.

EDC X85G.6. Linguistics and Language Teaching.
Application of the findings of linguistics to the teaching of languages.

EDC X85G.60. Language Acquisition in Multicultural Special Education.

EDC X85G.61. International Perspectives on Literacy Development.

EDC X85G.62. Education in Contemporary Black America.
Examines the historical and contemporary philosophies, practices, and pedagogies for Black education. Includes culturally responsive pedagogy, African-centered pedagogy and curriculum, multicultural curriculum and critical race theory.

EDC X85G.63. Identity, Agency, and Education.
Considers the cultural production of identity and identity politics and agency within a cultural, political, racial, gender, and activist framework in relation to education.

EDC X85G.64. Cultural Theory in Education.
Investigation of theories of popular culture, cultural difference, and cultural politics, and their applications in educational research and practice. Focuses on the relation between culture and power, with attention to issues of identity as well as social structure.

EDC X85G.65. Critical Pedagogy.
Introduction to critical pedagogy, focusing on theoretical foundations and methodologies of teaching and curriculum. Explores approaches to education oriented toward the development of critical consciousness, empowerment, and social action.

EDC X85G.67. Cultural Knowledge of Teachers and Teaching.
Examines how scholars have utilized cultural theory and cultural knowledge to situate and respond to: the identity, role and responsibility of "being" a teacher; the pedagogic functioning of teaching; and teacher preparation. Particular emphasis is placed on how these factors concern the education of historically marginalized student population.

EDC X85G.68. Women and Education: Research, Theory, and Practice.
Explores the roles and experiences associated with women and girls in the broad field of education. Subjects related to women across a diverse social terrain are targeted including: historical scholarship, research, theoretical frameworks and policy issues.

EDC X85G.69. Chicana Feminist Theorists.
Explores current historical and theoretical writings of Chicana women feminist theorists. Themes include patriarchy, domination/resistance politics, epistemology, contestation, social reproduction, identity and

difference and how these connect to schooling practices, policies, and politics.

EDC X85G.7. Language and Politics in Language Planning.

EDC X85G.70. Chicana Participatory Action Research.

Investigates the history and philosophy of participatory action research, including that done by and for Chicanas. A research project benefiting Chicanas and other young, Latina females in a public educational setting will be required.

EDC X85G.71. Exploration in the Education of the Mexican American Child.

Provides a historical and contemporary overview of Mexican American children's schooling experiences that consider tracking, bilingual education, school finance, higher education access, and standardized testing.

EDC X85G.72. Race and Ethnic Relations in Schools.

Investigates the role of race and ethnicity as key organizing principles of society. Themes include individual and institutional racism, reproduction theory, cultural and structural assimilation, critical race theory, epistemology, anti-racist and culturally relevant pedagogy.

EDC X85G.73. Seminar in Advanced Educational Policy.

Investigates policy from a critical policy analysis perspective. Considers the importance of context, discourses, players, and policy articulations that influence policy development primarily in education and areas such as immigration and the economy.

EDC X85G.74. History of American Reading Instruction.

Focuses on shifts in reading pedagogy in relation to changing societal conditions in the United States from colonial times through the 1980s. Engages with instructional materials and investigate practices through readings and course lectures. Considers historical research methods including oral history.

EDC X85G.75. Reading and Writing in the Elementary School.

Offers an overview of methods, materials, and assessments used in the reading and writing instruction at the elementary level. Focuses primarily on classroom and school level processes with additional consideration of the instruction for special needs learners.

EDC X85G.76. Literacy and Culture.

Examines the relationship between culture and literacy from a variety of theoretical perspectives including New Literacy Studies, identity and agency, sociocritical literacy and critical race theory with a particular emphasis on discourse and social change.

EDC X85G.77. Classroom Discourse and Teacher Research.

Designed as a collaborative, critical examination of teacher/action research, particularly in relation to the exploration of classroom discourse. Focuses on the rationale, issues, and implications of the teacher research movement within education and on the research strategies and techniques that can be used by teachers in conducting research in their own classroom settings.

EDC X85G.78. The Teaching of Literacy.

Develops a stance of inquiry into teaching from a social practices framework. Emphasis will be on formulating thoughtful and theoretical questions to enhance the quality of interactions with children in classrooms; making ideologies that operate within the school literacy communities explicit; and looking through informed and critical lenses at each aspect of literacy instruction.

EDC X85G.79. Sociolinguistics in Research and Teaching.

Focuses on the sociocultural investigation of language, particularly as it pertains to educational settings. Traces the historical emergence of the related fields of sociolinguistics and linguistic anthropology, exploring how each of these scholarly traditions approaches the study of language, identifying key points of overlap and tension between the two fields, and discussing recent examples of inter-disciplinary scholarship. Issues to be addressed include linguistic variation, language and identity, bilingualism and multilingualism, language ideologies, and classroom discourse.

EDC X85G.80. Orality, Literacy, and Technology.

Explores the relationships among speech, writing, and technology across human history, in contemporary cultures, in individual lives, and in processes of education. Situates discussions of "new literacies" in the context of the history of literacy.

EDC X85G.81. Research on Adolescent Literacy In and Out of School.

Considers ways in which the literacy practices of youth in out-of-school settings and the literacy work of schools might productively inform each other, and examines the purposes, processes, and outcomes of this literacy work.

EDC X85G.82. Major Theorists in Early Childhood.

Studies a historical range of theorists who have tried to explain childhood and early learning in the fields of anthropology, psychology, philosophy, education, and child development.

EDC X85G.83. Research on Teacher Education in Physical Education.

Discusses philosophical orientations such as progressivism, post-modernism, humanism, and social reconstruction. Of particular value to those in the doctoral program in physical education teacher education.

EDC X85G.84. Contemporary Problems in Science, Technology, Engineering, and Mathematics Education.

Identifies and explores contemporary problems in science and mathematics education through collaboration with a practitioner in the field.

EDC X85G.85. Current Issues in Physical Education.

Explores and critically analyzes current issues, coalitions, and legislation related to physical education and develops the understanding and skills necessary to impact the future directions.

EDC X85G.86. Critical Perspectives in Early Childhood Education.

Critically analyzes scholars of early childhood education research, practice, and curricula. Questions assumptions about early childhood education; beliefs, theories, and ideas about working with young children, their families, and the communities in which they live and work.

EDC X85G.87. Technology, Teacher Learning, and School Change.

Examines the complexity of the change process, especially in relation to the introduction of digital technologies in the PK-12 school context.

EDC X85G.88. Research on Early Childhood Education.

An introduction to research practices in the field of early childhood education. Classic studies and research reviews in various facets of early childhood education will be reviewed. Subjects include: child development, early childhood program models and evaluation, curriculum (including concept development and play), parent involvement, and teacher education in early education.

EDC X85G.89. Social Construction of Thinking in Childhood.

An intensive exploration of social constructivism, particularly Vygotskian theory and research. Classroom interactions, teaching and learning, parent and family contributions to education, cultural influences, and other contextually applicable aspects of education will be explored.

EDC X85G.90. Social Contexts of Early Childhood Education.

With a sociological lens, an examination of the constructs of the child and childhood through a range of social, political, educational, and economic contexts.

EDC X85G.91. Early Childhood Education Programs.

An examination of specific approaches to early childhood education including as the Montessori approach; programs such as Head Start; and critical analysis of how these various models of early childhood education define their role within the education of the young child as well as define the role of the child, teacher, and family. Philosophical, theoretical, historical, and empirical approaches to the field will be investigated.

EDC X85G.92. Theories of Curriculum for Pre-kindergarten and Kindergarten.
An exploration of the central issues and theoretical orientations of curriculum theory and practice in early childhood and elementary public school programs in the United States.

EDC X85G.93. Evaluation in Language Education.
Explores the policy and classroom implications of language assessment and evaluation practices, including review and critique of the assessment of English language proficiency for language minority students, standardized language assessment tools, and informal classroom-based methods for assessing language.

EDC X85G.94. Immigration Theory in Education.
An investigation of sociological, psychological, and anthropological perspectives of immigration theory and immigration post-1965 as they apply to educational research and immigrant youth in United States schools.

EDC X85G.95. Language Policy in Education.
Explores the implications of the perception of language as alternately a right, a resource, and a problem. Emphasis is on the development of linguistic support movements (bilingual, ESL, AAVE/Ebonics, etc.) as well as implicit and explicit language policies in the United States and in other countries.

EDC X85G.96. Biliteracy and New Literacy Studies.
Focuses on the theoretical foundations of biliteracy theories and new literacy studies.

EDC X85G.97. Biliteracy and Culture.
Includes theories and research topics relevant to teaching and learning literacy in two languages, Spanish and English. Discussion of the ways in which sociocultural, linguistic, and academic factors influence biliteracy development.

EDC X85G.98. Social, Cultural, and Political Contexts of Language Learning.
An analysis of oral and written language learning from interdisciplinary perspectives and within a variety of contexts, both within and outside of school settings. Particular attention is paid to issues of pedagogy, non-standard" dialects of English, second-language learning, and multiliteracies.

EDC X85G.99. Curriculum in Physical Education.
An examination of current research regarding physical education curriculum paradigms, reform initiatives, and physical activity interventions as related to curriculum.

EDC X85H. Topics in Cultural Transmissions in America.
Analysis of contemporary social, political, and economic trends in national and international life from the standpoint of educational implications.

EDC X85K. General Foundations of Education.
General survey of basic concepts, topics, and policy issues in the foundations of education.

EDC X85R. Introduction to Quantitative Research.
Designed to help students develop skills in a variety of approaches and methodologies used in research design that requires quantitative methods. Focuses on multivariate methods; and includes research questions, purposes, methodologies, instruments, measures, participant selection, data collection and data analysis methods, results, and conclusions.

EDC X86R. Introduction to Qualitative Research.
An introduction to the theoretical and methodological issues central to conducting qualitative research studies. Designed to help students develop practical research skills, and includes opportunities to evaluate current research, analyze data, observe, and interview.

EDC X87R. Topics in Advanced Quantitative Research.

EDC X87R.1. Advanced Quantitative Analysis.

EDC X87R.2. Statistical Inference.

EDC X87R.3. Survey Research Methods.

EDC X88R. Topics in Advanced Qualitative Research.

EDC X88R.1. Narrative and Oral Tradition.

EDC X88R.10. Phenomenology Research.
Apply phenomenological approaches to study curriculum design, technology adoption, educational leadership, teacher development, and learner experience. Apply understanding of philosophy, qualitative research methods, and post-modern and post-structural views of research.

EDC X88R.2. Discourse Analysis.

EDC X88R.3. Educational Ethnography.

EDC X88R.4. Postmodern Analytical Methods.

EDC X88R.5. Life History.

EDC X88R.6. Naturalistic Inquiry.

EDC X88R.7. Feminist Participatory Action Research.

EDC X88R.9. Case Study.
An in-depth investigation into the methodology of case study research, including approaches and theories, development of goals, and current issues and challenges.

EDC X89R. Topics in Advanced Mixed Methods Research.
Instruction in design-based research, a methodology aimed to improve educational practices through interventions involving iterative analysis, design, and development, and implementation of interventions based on collaboration among researchers and practitioners in real-world settings.

EDC X90T. Topics in Institute in Instruction.
Various topics designed to help students analyze and improve instruction at one of the following levels: elementary school, secondary school, higher education, all-level.

EDC X90T.1. Reading.

EDC X90T.10. Analysis of Teaching in Physical Education.
An examination of the history and current practices involved in high and low inference methods of analyzing teaching. Commonly used evaluation systems such as the Professional Development and Appraisal System (PDAS) and National Board Certification will be reviewed.

EDC X90T.11. Archaeology Education for Social Studies.

EDC X90T.12. Childhood and Adolescent Literature.

EDC X90T.13. Design for Technology Innovation.

EDC X90T.15. Elementary School Curriculum.

EDC X90T.16. English as a Second Language: Oral.

EDC X90T.17. English as a Second Language: Literacy.

EDC X90T.18. English as a Second Language: Reading.

EDC X90T.19. Equity in Science, Technology, Engineering, and Mathematics Education.

EDC X90T.20. Systemic Reform and Science and Mathematics Education.

EDC X90T.21. Instructional Systems Design.
Provides an overview of the theoretical frameworks, current trends, and common concerns associated with the design and development of instructional materials. Investigates the theoretical, practical, and critical perspectives on instructional design as applicable in a variety of educational contexts (K-12 education, higher education, and corporate training) and modes (face-to-face, online, and hybrid environments). Includes readings, discussions, real-world design, practical applications, and interactions with instructional design experts.

EDC X90T.22. Improving Social Studies Education.

EDC X90T.23. Instructional Telecommunications.

EDC X90T.24. Introduction to Curriculum Studies.
Designed to familiarize doctoral students with the theoretical, philosophical, sociocultural, and practical areas within the field of curriculum study.

EDC X90T.25. Literature for Young Adults.
Examine the genre of young adult literature, particularly literature written by non-traditional authors. Explore curricular and pedagogical approaches to issues related to reading young adult literature with linguistically and culturally diverse secondary students.

EDC X90T.26. Multicultural Curriculum and Teaching.

EDC X90T.27. The Planning and Management of Instructional Programs.

EDC X90T.28. Practice in Reading Difficulties.
A practicum in assessing and teaching elementary school students who struggle with reading. Class meetings take place at a local elementary school and include one-on-one tutoring with coaching and modeling by the instructor, small group support sessions, and seminars on issues related to reading difficulties.

EDC X90T.3. Science.

EDC X90T.30. Research on Teaching.

EDC X90T.31. Research on Teaching in Science, Technology, Engineering, and Mathematics Education.

EDC X90T.32. Seminar in Elementary School Curriculum.

EDC X90T.33. Studies in Curriculum and Instruction.

EDC X90T.36. Humanities and Literacy in Social Education.

EDC X90T.37. Systemic Reform in Science, Technology, Engineering, and Mathematics Education.
Covers the major themes of systemic reform in science, technology, engineering, and mathematics (STEM) education and explores, develops, and investigates models of reform initiatives.

EDC X90T.38. Advanced Topics in Science, Technology, Engineering, and Mathematics Education.
Focuses on a critical issue in science, technology, engineering, and mathematics (STEM) education aligned with STEM education faculty research interests, culminating in a product (paper, presentation, proposal) that can be submitted to professional or funding agencies.

EDC X90T.39. Instructional Systems Design.
An overview of the theoretical frameworks, current trends, and common concerns associated with the design and development of instructional materials. The theoretical, practical, and critical perspectives on instructional design as it is applied in a variety of educational contexts will be reviewed for the purpose of designing effective and engaging learning experiences.

EDC X90T.4. Social Studies.

EDC X90T.40. Advanced Instructional Systems Design.
Includes advanced topics, theoretical frameworks, and strategies for the design of instructional systems. Students work in teams to design and develop an instructional product for an authentic client such as a state agency, school system, university, corporation, or museum that meets specified criteria for quality.

EDC X90T.41. Measurement and Assessment of Physical Activity.
An introduction to theoretical bases for evaluating and investigating physical education teaching effectiveness. Emphasis is placed on current technologies and issues of assessment for physical education instruction, basic statistics concepts, and current educational evaluation trends. Designed primarily for physical education teachers.

EDC X90T.42. Research on Teaching in Physical Education.
An examination of past and current research on teaching, teachers, and curriculum in physical education. Empirical and conceptual scholarship related to the physical education teaching process, the preparation of teachers and their experiences, and the development of curriculum in physical education settings will be explored.

EDC X90T.43. Foundations of Learning Technology.
Introduces students to the field of learning technology by learning its history, as well as the learning theories, paradigms, thought leaders, trends, and issues that have shaped the field. Primarily web-based and involves both individual and collaborative work. Online class meetings will be held every two to three weeks to facilitate real-time discussions on the readings, as well as opportunities for interaction with visiting experts in the field.

EDC X90T.5. Mathematics.

EDC X90T.6. Foreign and Second Language Materials Development.

EDC X90T.7. Advanced Instructional Systems Design.
Advanced topics, theoretical frameworks, and strategies for the design of instructional systems. Students work in teams to design and develop an instructional product for an authentic client such as a state agency, school system, university, corporation, or museum that meets specified criteria.

EDC X90T.8. English as a Second Language.

EDC X90T.9. Bilingual Education.

EDC X91C. Topics in Curriculum and Pedagogy.

EDC X91C.1. Teaching and Learning in Urban Contexts.
Examine historical and contemporary issues in urban education. Explore curriculum and pedagogical issues related to teaching linguistically and culturally diverse populations.

EDC X91C.2. Teaching Secondary English and Reading.
Examine issues related to teaching secondary English in urban contexts. Explore curriculum materials and teaching methods for secondary English language arts. Explore methods for teaching secondary reading.

EDC X91C.4. Foundations of Teaching Diverse Learners.
Focus on theory and its connection to practice in pedagogy and professional responsibilities. Discuss state standards for teacher preparation are covered in this course. Participate in field-based experience.

EDC X91C.5. Holistic Approaches to Elementary Teaching.
Focus on teaching methods and classroom environment and community. Discuss state standards for teacher preparation.

EDC X91C.6. Practice-Based Reflective Teaching of Diverse Learners.
Focus on teaching as a reflective practice. Discuss state standards for teacher preparation.

EDC X91G. Topics in Gender and Race in Education.

EDC X91P. Topics in Educational Policy.

EDC X91T. Topics in Educational Theory.

EDC X91V. Topics in Educational Evaluation.

EDC X92L. Philosophical Foundations of Education.
A systematic overview of the field of philosophy of education.

EDC X95C. Topics in Cultural Studies in Education.

EDC X95C.1. Black Education: Contexts, Dilemmas, and Possibilities.
Examine the philosophies, knowledge, contexts, and pedagogies related to Black education," historically and in the present. Explore the complexities of Black education, including key tensions, themes, and questions surrounding education for Black people in the U.S.

EDC X95C.2. Critical Issues in United States Latinx Education.

EDC X95H. Topics in Social Studies Education.

EDC X95H.2. Early Childhood and Elementary Methods of Social Inquiry.
Focus on teaching of social studies, writing, and the use of children's literature. Discuss state standards for teacher preparation.

EDC X95K. Topics in Early Childhood Education.

EDC X95K.1. Global Comparative Early Childhood Education.

EDC X95K.2. Black and Latino Boyhoods in Schools and Society.
Engage in critical analyses of historical and contemporary theoretical, pedagogical, and educational research that influence the views, perceptions, and educational outcomes of Black and Latino boys in and beyond K-12 schools. Focus on culturally and gender-relevant and sustaining theoretical, pedagogical, and research methodological approaches that center the voices, insights, and perspectives of Black and Latino boys. Critically reimagine Black and Latino boyhoods in and

beyond K-12 schools and overhaul essentialist perspectives of Black and Latino boys that proliferate in theories, teaching methods, and educational research.

EDC X95K.3. Gender Difference, Children, and Schooling.

EDC X95L. Topics in Language and Literacy Studies.

EDC X95L.1. Exploring Literacy Teaching Practices Using Action Research.

In the tradition of action research methods, content is framed around theoretical work in pragmatism, activity theory, and the "practice turn in teaching and teacher education through a combination of seminar and practicum elements. The major project is an action research study in a classroom/school. Faculty observe in classrooms where action research projects are underway.

EDC X95L.2. Literacy and Social Change.

Explore theories of using literacy as a tool for increasing social justice in the world. Understand and articulate theoretical and experience-based definitions of social justice and translate that knowledge into curriculum and instructional approaches that can educate students about how to use literacy to improve their worlds.

EDC X95L.3. Research in English and Language Arts.

Explore research in English Language Arts with an emphasis on composition. Understand processes and methods of analyzing scholarly works and research studies in subject matter.

EDC X95L.4. Research in Reading.

Explore research in the field of literacy with a focus on reading. Examine commonly-employed methodologies and current research published in peer-reviewed literacy journals and construct a literature review in an area of interest.

EDC X95L.5. Critical Perspectives on Literacy Challenges.

Examine historical and current views, policies, and school contexts related to literacy challenges from a sociocultural and contextual perspective.

EDC X95L.6. Literacy Leadership for Change.

EDC X95L.7. Literacy Assessment, Development, and Instruction.

Focus on teaching of literacy and language. Discuss state standards for teacher preparation.

EDC X95M. Topics in Bilingual Bicultural Education.

EDC X95P. Topics in Physical Education and Teacher Education.

EDC X95T. Topics in Learning Technologies.

EDC X95T.1. Introduction to Instructional Design.

Explore an overview of the theoretical frameworks, current trends, and common concerns associated with the design and development of instructional materials. Investigate the theoretical, practical, and critical perspectives on instructional design as it is applied in a variety of educational contexts (i.e. K-12, higher education, and corporate training) and modes (i.e. face-to-face, hybrid, and online).

EDC X95T.2. Humanizing Pedagogy and Technology Integration.

Explore theoretical and applied practices of teaching and learning in a twenty-first-century classroom, as informed by research and best practices. Examine the framing, applied knowledge and design thinking needed to transform curriculum using technology integration and connected learning strategies. Consider authentic learning problems and devise teaching and classroom solutions that promote student learning, humanize pedagogy, and work towards the elimination of digital inequity in schools.

EDC X95T.3. Humanizing Pedagogy and Online Teaching for K-12 Education.

Examine models that help design teaching and learning within online spaces, in ways that help to balance cognitive, teaching, and social presence throughout the online course student experience. Explore theoretical models that drive high impact online learning designs, research that informs K-12 practice and models for technology integration and student engagement that promote digital equity. Apply these theoretical frameworks to design online courses that are intended for use in authentic K-12 online educational settings.

EDC X95T.4. Technology Designs for Digital Justice.

Learn theoretical approaches to digital justice that promote culturally and community connected, digital learning designs within and beyond the walls of the classroom. Explore a critical frame using a design justice lens and interrogate instructional technology designs while evaluating and designing digital learning spaces. Examine how connected and design justice approaches can meet students at typical boundaries of where they live and learn, extend learning environments to cultivate learners' interests, and provide secure and inclusive learning experiences that span the formal and informal.

EDC X95T.5. Technology Innovation for Digital Justice.

Develop as "Connected Educators" by participating within Communities of Practice (CoP's) related to educators' digital equity interests. Apply design justice and design thinking strategies to create equity-focused educational technology innovations that empower student learning.

EDC X96. Topics in Doctoral Seminar.

Research projects and creative investigations in a selected subject-field and developments in instructional practices and in research findings and methodologies. Offered at the following levels: elementary school, secondary school, higher education, all-level.

EDC X96.1. Foreign Language.

EDC X96.10. Writing for Publication.

Hone the craft of academic writing, including composing research articles, peer reviews of drafts, and developing productivity habits. Author an article for submission to a journal.

EDC X96.11. Completing a PhD while Entering Academic Jobs.

EDC X96.2. Social Studies Education.

EDC X96.3. Learning Technologies.

EDC X96.4. Cultural Studies in Education.

EDC X96.5. Early Childhood Education.

EDC X96.6. Bilingual/Bicultural Education.

EDC X96.7. Language and Literacy Studies.

EDC X96.8. Science, Technology, Engineering, and Mathematics Education.

EDC X96.9. Physical Education Teacher Education.

Discuss and debate timely research subjects in the disciplines of physical education, public health, culture, and educational reform.

EDC X96T. Directed Research in Curriculum and Instruction.

Investigation of assigned problems under the direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; production of acceptably written reports of a technical character.

EDC X97V. Independent Study.

May involve syntheses of literature, field investigations on selected subjects, or other individual research subjects.

EDC X98. Thesis.

EDC X98P. Graduate Internship.

Supervised practice in a professional position.

EDC X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

EDC X98T. Supervised Teaching in Curriculum and Instruction.

Supervised college teaching experience.

EDC X99W. Dissertation.

Professional Courses

EDP - Educational Psychology

Educational Psychology: EDP

Lower-Division Courses

EDP X04. Strategic Learning for the Twenty-First Century.
Explores a wide range of subjects in educational psychology that impact student learning, including theories of cognition and motivation, and applies them to academic work. Covers strategies to improve student academic performance.

EDP X08. Statistical Reasoning and Literacy.
Introduction to statistical applications and their interpretation in daily life. Covers principles of gathering and analyzing data, and interpreting analysis results in order to critically evaluate findings reported in the media and social science research. Explores basic statistical analyses, and skills needed for informed research consumerism.

EDP X16. Intergroup Dialogue.
Group discussion of the definitions and implications of social identities. Topics may include gender, race, ethnicity, religion, sexual orientation, physical ability, and age.

EDP X18T. Selected Topics in Educational Psychology.
Issues, research, and topics of contemporary interest in various areas of educational psychology and the behavioral sciences that may vary from semester to semester.

EDP X18T.5. Introduction to Career Planning.
Introduction to social science models of career development and the social-historical dimensions of how work is structured. Apply learned concepts to career planning via activities and assessments.

EDP X18T.8. Introduction to School Psychology.
Introduction to the profession of school psychology. Explore the role and function of a school psychologist, current issues and trends for psychologists working in schools, clinical and scientific competencies of school psychologists, and the application of skills relevant to school psychology practice.

EDP X19S. Topics in Educational Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Educational Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

EDP X20. Cognition, Human Learning, and Motivation.
Explore current theories concerning learning and memory, retrieval, critical thinking, transfer, assessment, peer learning, and motivation; applying cognitive and socio-motivational psychological theories to educational and instructional practices

EDP X29S. Topics in Educational Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Educational Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EDP X40D. Deaf Cognition and Learning.
Explore current developmental and cognitive aspects of thinking and learning through the lens of deaf and hard of hearing people. Apply theories to understand research, learning design, community, and professional contexts.

EDP X50E. Introduction to Life Span Development.
Explores theories of personality, as well as research and literature on mental health and character development, applying principles and theories to the educative enterprise. Covers application of personality theory to the guidance of children and youth. Study of physical, social, and cognitive development in humans.

EDP X50G. Adolescent Development.
Addresses contemporary adolescent development in relation to major transitions, contextual influences, and psychosocial tasks. Covers adolescent identity development, with focus on the education of adolescents.

EDP X50L. Human Sexuality.
Taught from a psychological perspective with attention to the physiological, emotional, and relationship dimensions of sexuality. Presents factual information and promotes scholarly examination of social and personal factors in developing healthy relationships and sexual expression.

EDP X52D. Introduction to Individual Counseling and Psychotherapy.
Nature of the counseling process, dynamics of behavior change, client-counselor roles and relationships; an experiencing of the group process as a basis for studying dynamics of individual and group behavior.

EDP X52G. Multicultural Approach to Counseling and Psychotherapy.
An introduction to cultural diversity, cultural issues, cultural groups, and multiculturalism in counseling.

EDP X52K. Mindfulness, Compassion, and the Self.
Subjects include mindfulness, self-compassion, well-being, and self-concept.

EDP X52N. Addiction Counseling and Theories.
Studies in biological mechanisms of categories of commonly abused substances and behaviors, as well as prevention and treatment approaches to addiction. Includes discussion of other forms of addiction, including food, sex, and internet, and addiction in diverse populations.

EDP X54E. Psychology of Women.
Study of women's experiences, issues, and behavior in the context of psychological theory and research. Integrates several sub-disciplines of psychology, including physiological, personality, developmental, social, abnormal, and applied psychology. Explores a variety of topics relevant to psychology of women, including theories of women's personality, gender socialization, sex differences, victimization, oppression, and motherhood.

EDP X54G. Psychology of the African American Experience.
Examination of the psychology of people of African descent using an African-centered liberatory model.

EDP X54J. Psychology of Race and Racism.
Review of the history and evolution of the construct of race as a psychological and social phenomenon. Multidisciplinary but primarily social-psychological approach: in addition to readings from psychology, ideas in the areas of anthropology, sociology, and biology will be discussed. Emphasis on theoretical and conceptual approaches toward understanding the psychology of racial thinking.

EDP X58D. Emotional and Behavioral Disorders.
Covers theory and research on several mental disorders with a critical perspective on how social structures and assumptions influence the way they are conceptualized and treated.

EDP X71. Introduction to Statistics.
Examine descriptive and inferential statistics; measures of central tendency and variability; standardized scores; confidence intervals; correlation and regression; probability and statistical inference; analysis of variance; and nonparametric statistics.

EDP X76T. Topics in Educational Psychology.
Issues, research, and topics of contemporary interest in various areas of educational psychology and the behavioral sciences.

EDP X76T.12. Sport and Performance Psychology.
Examine the intersection of psychology and sport/performance. Discuss reinforcement and behavior modification, team management, mental health and athletics, and diversity and athletics.

EDP X76T.14. Teaching Sexual Health.
Examine effective teaching strategies related to sexual development, sexual health, and other subjects included in comprehensive sexuality education for children, adolescents, and adults. Designed for those interested in education, social work, nursing, criminal justice, public health, and other professional areas that intersect with providing information.

EDP X76T.3. Disability and Culture in Education.
Examination of the culture of disability in the educational context. Explores language and terminology around disability; history of ableism (discrimination/prejudice), the role of accommodations and access in defining disability and inclusion, perceptions of disability over time, identity development for individuals with a disability, diversity and difference of language within disability groups.

EDP X76T.9. Pediatric Psychology and Health Disparities.
Examine the biological, psychological, and social foundations of pediatric conditions, as well as lifespan health conditions related to development in childhood. Explore pediatric health disparities, the intersection of psychology and public health, research methods used in the field of pediatric psychology, and assessment and intervention with children and families.

EDP X78D. Practicum in Deaf Accessibility.
Study and practice theory and processes related to deaf and hard of hearing people in educational and community settings.

EDP X79L. Research in Educational Psychology.
Supervised research experience in educational psychology.

Graduate Courses

EDP X80C. Topics in Quantitative Methods.
Theory, models, methods, and applications of quantitative methods used in applied research.

EDP X80C.12. Survey of Multivariate Methods.
Examine fundamentals of vector and matrix algebra; multivariate analysis of variance; principal components analysis and exploratory factor analysis; discriminant analysis; logistic regression; multivariate mixed modeling; cluster analysis; multidimensional scaling; and missing data.

EDP X80C.14. Structural Equation Modeling.
Provides the basic theoretical background necessary for the application of structural equation modeling to research problems including model specification, identification, path analysis, estimation, testing fit, respecification, confirmatory factor analysis, and issues concerning the interpretation of structural equation models.

EDP X80C.16. Hierarchical Linear Modeling.
Introduction to the basic concepts and applications of hierarchical linear (i.e. multilevel) models. Learn strategies for analyzing various nested data structures, such as students within schools, and measurement occasions within subjects. Determine when and how to use hierarchical linear models, with an emphasis placed both on the statistical concepts of the modeling framework and the application of hierarchical linear modeling to data sets via software.

EDP X80C.18. Applied Bayesian Analysis.
Examine practical introduction to Bayesian statistical inference with an emphasis on applications in behavioral and measurement research. Explore conceptual differences between Bayesian and classical statistical inference and the differences between these approaches in the context of various statistical procedures. Use Bayesian software for analysis.

EDP X80C.2. Fundamental Statistics.
Introductory course designed for students in the fields of education and the social, behavioral, and health sciences who expect to take a second course in statistics. Subjects include descriptive and inferential statistics; sampling distributions; hypothesis testing; correlation; linear prediction; tests of mean differences; tests of frequencies and proportions; and one-way analysis of variance.

EDP X80C.22. Analysis of Categorical Data.
Introduces basic concepts, common statistical models, and analysis methods for categorical data. Provides theory and examples of applications using categorical techniques. Subjects include inference methods for contingency tables, generalized linear models for binary and count data, logistic regression models, multicategory logit models, loglinear models for contingency tables, and models for matched pairs.

EDP X80C.23. Missing Data Analysis.
Analyze data with missing values. Examine missing data theory, estimating statistical models with missing data, and other practical issues related to missing data, including the use of statistical software for handling missing data.

EDP X80C.26. Data Exploration and Visualization in R.
Explore R, an open-source statistical programming platform for data analysis and visualization. Examine the foundational facilities and skills in R programming and how to use the tools to accomplish real-world, reproducible data analysis and visualization.

EDP X80C.28. Statistical Modeling and Simulation in R.
Building on the foundational skills in R, examine how to design and program Monte Carlo simulation studies, which are a tool for evaluating the performance of statistical estimation and inference procedures. Explore translating mathematical equations to code and implementing statistical algorithms, building R packages, parallelizing, and integrating high-performance functions into R.

EDP X80C.30. Applied Research Design in Program Evaluation.
Discuss in depth the quantitative, qualitative, and mixed methods analyses used to conduct program evaluations. Practice communicating complex evaluative ideas, designs, and results to program leaders and participants. Develop a large scale evaluation proposal that focuses on the research design methods discussed.

EDP X80C.4. Correlation and Regression Methods.
Examines tests of association; multiple regression, including multiple predictors of a single interval-scaled outcome; and related subjects such as regression models for mediation and moderation.

EDP X80C.6. Statistical Analysis for Experimental Data.
Subjects include hypothesis tests and data analysis procedures for a variety of experimental designs, including one-way analysis of variance; factorial analysis of variance; analysis of covariance; and repeated measures designs. Instruction in the use of statistical software is provided.

EDP X80D. Topics in Psychometrics.
Theory, models, methods, and applications in psychometrics and program evaluation.

EDP X80D.10. Test and Scale Construction.
Design of effective instruments and cognitive tests; facet theory for scale construction; measurement of opinions and beliefs; tryout of experimental forms and item analysis; use of factor analysis and multidimensional scaling; norms and scaled scores; reliability and validity assessment; and test equating methods.

EDP X80D.11. Computer Adaptive Testing.
In-depth examination of computer adaptive testing (CAT) methodologies based on Item Response Theory (IRT) models. Subjects include optimal test design principles; estimation of person parameters; item banking techniques; components of fully-adaptive and multi-stage testing algorithms; and issues concerning reliability, validity, item exposure, and score reporting.

EDP X80D.14. Applied Psychometrics.
In-depth examination of applied psychometric techniques. Subjects include equating scores; setting standards; detecting differential item functioning and selection, placement, and classification.

EDP X80D.16. Advanced Psychometrics Seminar.
Discussion of emerging technical subjects in the areas of psychometrics, measurement, and educational statistics. Addresses advanced techniques for analyzing item response data, and studying

characteristics of tests/assessment instruments, using available computer software.

EDP X80D.18. Advanced Psychometrics Research.

EDP X80D.2. Measurement and Evaluation.

A basic background in measurement and evaluation is necessary to be appropriately critical of tests and instruments that are used in educational and psychological measurement situations. Subjects include general principles and basic concepts; types of reliability and validity; and the use of psychometric principles in various testing areas, such as intelligence testing; special aptitudes and abilities; educational achievement; and non-cognitive characteristics.

EDP X80D.4. Psychometric Theory and Methods.

Addresess major approaches to analyzing responses to test items for making inferences about characteristics of examinees and items. Subjects include mental test theory and methods (e.g., the classical true-score model, item response theory models, and test construction methods); an introduction to factor analysis; and psychological scaling theory and procedures.

EDP X80D.6. Program Evaluation Models and Techniques.

Examine the theoretical origins of Program Evaluation, as well as major sub-fields such as Responsive and Decision-Oriented evaluation. Conduct program decompositions in order to deeply understand the constraints, transactions and outcomes of a program, and create proposed evaluation of a program. Explore qualitative research methods that are useful for program evaluation and common quantitative methods and instrumentation, including survey design. Relate programmatic examples from other fields such as Nursing, Journalism, Pharmacy, and Educational Leadership.

EDP X80D.8. Item Response Theory.

Subjects include background and theory (including classical test theory, objectivity in mental measurement, dichotomous and polytomous models, conventional item analysis versus the item response theory approach, item parameter and ability estimation, and information functions), and applications (including relative efficiency of tests, flexilevel and two-stage tests, computerized adaptive tests and mastery tests, test equating, differential item functioning, and attitude and personality measurement).

EDP X80Q. Practicum in Psychometrics.

EDP X81C. Topics in Research Methodology.

Theories and models for educational and psychological research.

EDP X81C.10. Issues in Multicultural Research.

Designed to provide knowledge and tools to critique and evaluate theoretical, conceptual, and methodological issues related to the role and importance of culture, ethnicity, and race in multicultural research. Draws from social, developmental, counseling, and clinical psychology research, and emphasizes the challenges in conducting rigorous, culturally sound research.

EDP X81C.12. Meta-analysis.

Effect size calculation for different designs; quantitative methods and models for synthesizing and testing moderators of effect size; and related subject matter.

EDP X81C.14. Causal Inference.

Survey of quantitative methods for studying causal effect of interventions, with emphasis on data analysis and interpretation. Subjects include potential outcomes models, graphical models, randomized experiments, propensity scores, matching and weighting, instrumental variables, interrupted time series, regression discontinuities, and mediation models.

EDP X81C.16. Survey Research Design.

Overview of the survey research process; addresses various topics in survey research within the context of the development of a survey study. Covers sequence of a survey study, from conceptualization to measurement, administration, data management and analysis, and writing the research report. Issues in quasi-experimental design, sampling, questionnaire construction, administration, and the use of computers in survey research are covered within this framework. The relative advantages, disadvantages, and appropriateness of the different modes of survey administration (i.e., face-to-face interviews, telephone interviews, mail, internet surveys, and other self-administered questionnaires) for different research questions are also examined.

EDP X81C.2. Research Design and Methods for Psychology and Education.

Introduction to essential concepts and methods used in quantitative empirical research in psychology and education. Examine ideas from the philosophy of science, threats to validity, causal inference, and experimental and quasi-experimental techniques, with a focus on the logic and methods of designing and evaluating research.

EDP X81C.4. Research Methodology for Practitioners.

Designed to facilitate understanding of research methods and statistical analysis. Overviews development of needs assessment, program evaluation, and program modifications. Facilitates skills in critically evaluating research to select evidence-based approaches for practice settings.

EDP X81C.6. Literature and Research Synthesis.

Focuses on the creation of a literature review or systematic research synthesis. Subjects to be covered include: problem formation; how research is communicated and how the scientific communication system affects knowledge; methods for locating research; problems in retrieving data from secondary sources; judging the quality of research; estimating the impact of policies and practices and gauging the strength of relations; and assessing variance in impacts and relationships across studies.

EDP X81C.8. Qualitative Research Methods.

Examines research methods that are descriptive, field-based, interpretive, and discovery-focused. Subjects include the varieties of qualitative research; identifying questions and phenomena for research; planning and conducting qualitative research; coding and other analytic procedures; developing an interpretation; and trustworthiness issues in qualitative inquiry.

EDP X81D. Advanced Statistical Modeling.

Advanced course intended for doctoral students specializing in quantitative methods. Subject matter includes extensions of basic two- and three-level multilevel models and of structural equation models; simulation study design; and related subjects.

EDP X81E. Advanced Item Response Theory.

Advanced course intended for doctoral students specializing in quantitative methods. Subjects include extensions of Item Response Theory (IRT) models, including multidimensional IRT and Testlet Response Theory, explanatory item response modeling, IRT rater models, cognitive diagnostic IRT models, response time models, and related subjects.

EDP X81S. Practicum in Program Evaluation.

EDP X82C. Topics in Social Psychology and Behavioral Sciences in Education.

Examination of issues, theories, and research in selected areas of social psychology and other behavioral sciences that have implications for education. Social psychology is the study of how individuals are influenced by others. Behavioral sciences examines the interaction of cognitive processes and social environment, including social relationships.

EDP X82C.2. Social Psychology.

Explore basic theories and methods of social psychology including attitudes and social cognition, interpersonal relations and group processes, and personality processes and individual differences.

EDP X82C.6. Psychology of Race, Prejudice, and Stereotypes.

Studies the history and evolution of race, prejudice, and stereotyping from a social psychological perspective. Focuses on understanding the psychology of racial attitudes, prejudice, and stereotyping. Includes related ideas from the areas of anthropology, sociology, and biology.

EDP X82C.8. The Social Psychology of Siblings.
Survey multiple theories and research literature evaluating the influence of siblings, including the absence of siblings on social, psychological, and health outcomes across the lifespan. Utilize an empirical research study about sibling effects during childhood, adolescence, adulthood, and old age.

EDP X82D. Topics in Learning and Motivation.
History and systems of psychology applied to education; modern theories and current research in learning and human motivation, especially in relation to new educational media and to the educative process.

EDP X82D.16. Research on Discourse Practices.
Considers the current research and thinking about how individuals use language in human interaction, how writing and reading processes are multidimensional and socially situated, and how new forms of discourse arise in social interactions.

EDP X82D.2. History and Systems of Psychology.
Overview of the major theoretical frameworks in psychology and its antecedents as a scientific field. Includes discussion of influential ideas, the people behind them, and their historical contexts. Special focus is on particular psychology paradigm characteristics of certain periods in history. Additional emphasis is placed on the research methodologies that accompany each paradigm, and on building communication skills and co-constructing understanding through class discussions, oral presentations, and analytical writing.

EDP X82D.20. Current Issues in Motivation.
Discuss advanced issues and debates in motivation research: motivational interventions, methodological innovations, the roles of culture and context, and current theoretical debates in the field.

EDP X82D.4. Psychology of Learning.
Examination of the current literature on how people learn, the factors that influence the acquisition of knowledge, and on the philosophical frameworks that have characterized views of the learning process.

EDP X82D.6. Motivation and Emotion.
Explore human motivation and emotion from a psychological perspective. Examine classical and contemporary theories to understand the nature, predictors, functions, and consequences of motivation and emotion. Review basic theories of motivation and emotion in application to educational issues.

EDP X82E. Topics in Biological Basis of Behavior and Learning.
An investigation of how the biological processes influence behavior, as well as how biological, social, and psychological factors influence health, illness, and learning.

EDP X82E.10. Child and Adolescent Psychopharmacology, Health, and Learning.

EDP X82E.11. Pediatric Psychology and Health Disparities.
Focus on current research and practice in pediatric psychology, including the biological, psychological, and social foundations of pediatric conditions, as well as lifespan health conditions related to development in childhood. Explore general principles of pediatric psychology, pediatric health disparities, and disease-specific issues (e.g. cancer, asthma, diabetes, obesity), including developmental processes of risk and resilience and prevention and intervention for these conditions.

EDP X82E.2. Biological Basis of Behavior.
Provides an overview of brain structure and function and the brain bases of behavior and disorders of behavior. Focus is on the structure of the nervous system, with a primary emphasis on the functional organization of the brain, and the mechanisms underlying neural communication, followed by a review of various functional systems of the brain and clinical disorders known to be associated with dysfunction of these systems.

EDP X82F. Topics in Human Development.
Theories of development and the educative process.

EDP X82F.10. Mindfulness, Compassion, and the Self.
Research and theory related to the concept of the "self" from both Eastern and Western philosophical perspectives, and on the evidence for mental and physical health benefits of mindfulness, compassion for others, and self-compassion.

EDP X82F.12. Dysfunction in Human Behavior/Social Organizations.
Designed to provide an overview of the development of human dysfunction using both psychological and cultural perspectives. Includes a review of personality development as well as the societal dynamics associated with dysfunctional behavior.

EDP X82F.3. Life Span Development.
Examine human development from birth to death. Explore theories and empirical research across domains including social, emotional, identity, and cognitive. Discuss the roles of gender, socio-economic status, culture, race, ethnicity, and sexual orientation in human development and aging across multiple settings.

EDP X82F.6. Culture, Child Development, and Education.
Advanced graduate seminar that examines current theory and research from the psychology, anthropology, and sociology fields on the roles of culture, ethnicity, and race in the development and education of children around the world. In-depth discussion subjects include parenting and socialization; cognitive, social, and emotional development; the effects of socioeconomic status; culture change and acculturation; and racism and critical race theory.

EDP X82G. Topics in Cultural Diversity and Individual Differences.
Theory and research on cultural diversity and individual differences as factors in psychology and education.

EDP X82G.10. Disability and Culture in Education.
Examine the culture of disability in the educational context. Explore language and terminology around disability, the history of ableism (discrimination/prejudice), the role of accommodations and access in defining disability and inclusion, perceptions of disability over time, identity development for individuals with a disability, diversity and difference of language within disability groups.

EDP X82G.12. School Mental Health for Emerging Bilingual Students.
Explore the school mental health process for emerging bilingual students. Discuss the referral, assessment, and intervention pathway in the school-based setting. Examine cultural and linguistic considerations for student engagement, family participation/training, and school collaboration (e.g., working with teachers, administrators, school counselors, social workers, and outside agencies).

EDP X82G.2. Latino/a Psychology.
United States Latino/a experiences, issues, and behavior in the context of psychological theory and research; including, but not limited to, Mexican Americans, Puerto Ricans, Dominicans, Cubans, Central, and South Americans. Integrates sub-disciplines of psychology and explores a variety of subjects relevant to the psychology of Latinos/as, including: race; ethnicity; culture; immigration; acculturation; identity; language; sexuality and sexual orientation; racial and gender socialization; racism, colonization, and colorism; oppression; and health disparities.

EDP X82G.4. Psychology of Women and Gender.
Study of women's experiences, issues, and behavior in the context of psychological theory and research. Integrates many sub-disciplines of psychology and explores a variety of subjects relevant to the psychology of women, including sexuality, gender socialization, sex differences, victimization, oppression, and motherhood.

EDP X82Q. Research Practicum in Human Development, Culture, and Learning Sciences.

EDP X83C. Topics in Assessment and Diagnosis.
Advanced study of theory, issues, and application of methods of measurement and diagnostic systems. Topics include techniques to

estimate individual and group differences as these inform learning and behavior in educational and community settings.

EDP X83C.12. Assessment in Counseling.

Introduction to the fundamentals of objective assessment, with emphasis on cultural and ethical considerations. Review of assessment techniques includes diagnostic interviewing, intelligence testing, achievement testing, objective personality testing, interpretation of assessment data, writing integrated reports, providing feedback, and making appropriate referrals. First course of a two-part sequence in psychological assessment; the second course in the sequence is Educational Psychology 383C (Topic 14).

EDP X83C.2. Overview of Psychoeducational Assessment.

Reviews the principles and concepts underlying assessment and appraisal of aptitudes, achievement, personality, behavioral and emotional regulation. Reviews standardized testing procedures, as well as checklists, clinical interviewing and projective measures. Develops literacy skills for reviewing test reports and implementing recommendations from assessment reports.

EDP X83C.30. Developmental Psychopathology.

Explore the nature, structure, etiology and developmental course of psychopathology through the lifespan. Examine key issues including approaches to the classification of disorders, incidence and prevalence rates, developmental course of disorders, and risk and protective factors.

EDP X83C.4. Individual Testing.

Focuses on the selection, administration, scoring, and interpretation (oral and written) of commonly administered individual tests of intelligence for children and adolescents.

EDP X83C.6. Academic Assessment and Intervention.

Explore the application of theory and research along with psychometric knowledge to the assessment of academic skills, with the intent of using this and other (e.g., cognitive) data to recommend evidence-based interventions for children and youth in academic settings. Address the use of data to monitor response to academic services and interventions.

EDP X83C.7. Evidence-Based Interventions in Schools.

Examine knowledge, skills, and dispositions necessary to assist children experiencing academic difficulties. Discuss vocabulary, concepts, principles, and practices related to the delivery of high-quality academic instruction to all learners in schools. Evaluate interventions and match academic interventions to instructional needs.

EDP X83C.8. Social and Emotional Assessment with Children and Adolescents.

Focus on developing knowledge and skills in evidence-based social/emotional assessment, including conducting and interpreting evidence-based assessments of children's social, emotional, and behavioral functioning, and the diagnosis of mental health disorders in youth.

EDP X83D. Practicum: Level One.

EDP X83E. Practicum: Level Two.

EDP X83F. Practicum: Level Three.

EDP X84C. Topics in Prevention and Intervention.

Advanced study of theories, processes, and techniques of evidence-based prevention and intervention to enhance learning and behavior in educational and community settings.

EDP X84C.11. Family and Couples Interventions.

Review major family systems theories and practices.

EDP X84C.14. Addiction Counseling.

Studies biological mechanisms of categories of commonly abused substances and treatment approaches to addiction. Includes discussion of other forms of addiction, including food, sex, and internet, and addiction in diverse populations.

EDP X84C.18. Multicultural Counseling.

Introduction to cultural diversity and multiculturalism in counseling. Designed to help students understand important cultural issues and various cultural groups.

EDP X84C.2. Theories in Counseling.

Theories and research for developing counseling interventions in a pluralistic world.

EDP X84C.21. Fundamentals of Cognitive and Behavioral Interventions for Youth.

Explore an introduction to Behavior Therapy (BT) and Cognitive Behavioral Therapy (CBT) for children and adolescents. Examine the history and theoretical underpinnings (learning theory, social learning theory, cognitive theory), core transdiagnostic principles of behavior change, and a survey of CBT techniques commonly used in practice for common child and adolescent mental health concerns.

EDP X84C.24. Cognitive-Behavioral Therapy with Adults.

EDP X84C.30. Psychodynamic Psychotherapy.

EDP X84C.32. Integrated Behavioral Health.

Focus on integrated behavioral health care for underserved children and their families; develops knowledge and skills in integrated health care service delivery, cultural competence in health services, and family-centered health services.

EDP X84C.34. Prevention Science.

Examines risk and protective influences on development and evidence based interventions that promote well-being across academic, social-emotional, and health domains.

EDP X84C.38. Motivational Interviewing.

Explore the theoretical and empirical base for motivational interviewing, including training on the skills and spirit of motivational interviewing. Designed for students whose career goals include healthcare, therapy, or counseling.

EDP X84C.4. School Counseling.

Covers subjects related to the design, implementation, and evaluation of socio-emotional interventions in educational settings. Included is a review of American School Counseling Association Standards, standards of the Texas Education Agency for school counselors, and legislative rules related to school counseling.

EDP X84C.6. Career Development.

Introduction to the basic principles, models, and methods of career development used in educational settings.

EDP X84C.8. Helping and Counseling Skills.

Designed to provide a foundation for the professional practice of counseling and the skills necessary for professional training in counseling and related fields. Studies basic interpersonal helping skills, clinical interviewing, and intervention strategies.

EDP X84C.9. Approaches to Intervention.

Subjects include ecological prevention methods, psychoeducational prevention activities, and relapse prevention; clinical interventions include crisis intervention and early interventions. Proactive prevention efforts are emphasized.

EDP X84D. Group Counseling and Interventions.

Explore theory and research in group practice; group dynamics and membership; principles of group planning; and development of leadership skills through structured in-class experiences.

EDP X84Q. Practicum in Counseling.

EDP X84S. Practicum in Spanish for the Helping Professions.

EDP X84V. Advanced Practicum.

Advanced study and practice of theories, processes, and techniques of evidence based prevention and intervention to enhance learning and behavior in educational and community settings.

EDP X85C. Topics in Professional Issues, Leadership, and Development.

EDP X85C.12. Seminar in Academic and Student Affairs in Higher Education.

Explore topical issues in higher education and strategies for promoting mental health and well-being in post-secondary students.

EDP X85C.14. School Consultation Theory and Practice.

Explore theoretical, empirical, and applicable knowledge of indirect service models as practiced by school psychologists; specifically,

behavioral consultation, collaboration, and supervision. Examine the information and skills necessary to be able to thoughtfully enter a system and provide consultation services to organizations that serve children and adolescents.

EDP X85C.3. Advanced Supervision and Consultation: Practicum.

Examine research, theory, and practice of professional supervision and consultation. Explore supervisory and consultation issues and theory and the growing empirical literature on evidence-based practices in supervision and consultation; practice clinical supervision with students.

EDP X85C.5. Professional Orientation and Ethics in Counseling.

Explore an introduction to the ethical codes of the American Psychological Association and the American Counseling Association, as well as the Texas Administrative Codes for licensed psychologists and licensed professional counselors. Review ethical codes and issues in school counseling.

EDP X85C.6. Advanced Ethics and Professional Issues in Counseling.

Examines the professional roles and practices for counselors, including records management, an overview of business/family law and professional practice, and the study of current board rules.

EDP X85C.8. Law, Ethics, and History of School Psychology.

Provides information about the roles of school psychologists/psychologists and the legal and ethical issues that affect their roles.

EDP X86Q. Practicum in Post-Secondary Teaching.

Shadow instructor teaching at the college level, and discuss the various components and decisions made in organizing and teaching, towards a goal of developing a portfolio demonstrating teaching competency.

EDP X87T. Topics in Educational Psychology.

Explore issues, research, and topics of contemporary interest in various areas of educational psychology and the behavioral sciences.

EDP X90N. Topics in Applied Data Analytics.

Theory, models, methods, and applications of data analytics.

EDP X90N.1. Fundamentals of Probability and Statistics.

Examine the basics of probability theory and statistical methods. Explore data and statistics, probability fundamentals, statistical inference, and an introduction to parametric and non-parametric methods.

EDP X90N.11. Machine Learning for Applied Research.

Explore machine learning techniques for applied research in educational and social sciences and practice the techniques using empirical data in R. Discuss supervised learning methods such as regression, classification, and ensembles. Discuss unsupervised learning models for dimensionality reduction, and clustering.

EDP X90N.13. Applications in Data Mining.

Apply data mining techniques and tools to discover patterns and insights in large datasets. Use applications in classification techniques, regression techniques, clustering algorithms, association rule mining, and anomaly detection.

EDP X90N.15. Social Network Analysis in Applied Research.

Examine methods for analyzing social networks, understanding relationships and structures within data collected from social interactions. Explore key social network analysis (SNA) concepts, representation and construction, structure and topology, measures in SNA, visualization with SNA, SNA research applications, and how to communicate results effectively.

EDP X90N.17. Longitudinal Data Analytics.

Examine methods for analyzing data collected over time, including linear mixed-effects models, generalized linear models, autoregressive models, and survival analysis. Explore longitudinal data and data structures, data preprocessing, advanced subjects, model checking and selection, applications, and ethical considerations.

EDP X90N.19. Fundamentals of Text Analytics.

Practice techniques for working with and analyzing textual data to extract meaningful information. Explore text representation, exploratory analysis for text, sentiment analysis, text classification, topic modeling , named entity recognition, text analytics for information retrieval, and natural language processing (NLP).

EDP X90N.3. Data Analytics: Fundamentals and Ethics.

Discuss data analytic techniques and ethical considerations in data analytics. Explore data analytics, data collection and preparation, exploratory data analysis techniques, predictive analytics, communicating results, and ethical considerations in data analytics.

EDP X90N.5. Data Wrangling and Preprocessing in R.

Practice techniques for cleaning and preparing data for analysis in R. Explore R and Tidyverse, data import/export, data cleaning, data transformation, merging and joining datasets, data preprocessing, working with text and string variables, automating data processing, and visualization through the data wrangling process.

EDP X90N.7. Data Visualization in R.

Create informative and effective visual representations of data using R, emphasizing effective communication of data insights. Examine principles of data visualization, the use of libraries, customization and aesthetics of plots, interactive data visualizations, visualization of multivariate, categorical, and grouped data, exploratory data analysis with visualization, and effective data storytelling.

EDP X90N.9. Regression Methods.

Explore various regression methods used in applied data analytics, including linear regression, logistic regression, advanced regression techniques, generalized linear models, interactions, model evaluation and validation, and communicating results.

EDP X93E. School Psychology Specialist Internship.

EDP X93N. Internship in School Psychology.

EDP X94. Topics in Colloquium in Educational Psychology.

Presentation and discussion of issues related to graduate study in educational psychology, including research proposals and developments in the field, by advanced graduate students, members of the faculty, and visiting lecturers.

EDP X94E. Internship in Counseling.

EDP X94L. Internship in Counseling.

EDP X94N. Internship in Counseling Psychology.

EDP X94R. Research.

Individual research planned, carried out, and reported under the supervision of a Graduate Studies Committee member.

EDP X95R. Qualifying Process Research.

Investigation of assigned problems under the direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; and production of an acceptably written research report. Required of doctoral students with a major in educational psychology.

EDP X98. Thesis.

EDP X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

EDP X98T. College Teaching Methodology.

Supervised college teaching experience.

EDP X99W. Dissertation.

Professional Courses

EDU - Education

Education: EDU

Lower-Division Courses

EDU X01C. Connecting Research Experience.

Perform supervised research in the field of education.

EDU X18C. Topics in Student Success.

Discuss various contemporary issues with an emphasis on multidisciplinary perspectives and critical discourse.

EDU X19. Topics in International Learning Seminars.
Discuss various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

EDU X19S. Topics in Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

EDU X20C. Connecting Research Experience.
Perform supervised research in the field of education.

EDU X21. Play in Early Childhood Development.
Examine the theoretical and empirical bases for observing children in play; cognitive, social, and communicative stages related to developmental theory; children's adjustment related to social and emotional theories; and motivational value of play.

EDU X25. Second Language Acquisition.
Examine children or adults' acquisition of English as a second language. Discuss simultaneous acquisition of two languages, adding a second language, language processing, order of acquisition, and the role of the first language.

EDU X27. Sociocultural Influences on Learning.
Discuss human learning in multisocial, multilingual, and multicultural contexts; realities of society and their impact on learning; and social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, and parent and community involvement.

EDU X27G. Education, Culture and Diversity.
Explore a comparative analysis of human learning in multisocial, multilingual, and multicultural contexts in the United States and Latin America. Discuss social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, and parent and community involvement. Examine transnationalism and immigration in the United States from Central America and Mexico.

EDU X28. Applied Human Learning.
Explore development, cognition, language, and sociocultural influences in learning contexts, child assessment, identification of learning styles, and tests and measurements. Utilize fieldwork to provide a theoretical basis for professional assessment, referral, and placement.

EDU X29. Acquisition of Language and Literacies.
Discuss initial language and literacy acquisition theory; second language acquisition theory; relations among first and additional languages in literacy and language acquisition; home, school, and learners' perspectives; and current issues in literacy and multilingual classrooms.

EDU X29G. Acquisition of Language and Literacies in the United States and Latin America.
Explore the theory and practice of language acquisition in cross-cultural contexts in Latin America and the United States. Discuss the instruction of English as a second language, social justice for bilingual learners and speakers of minority languages, and connections to multilingual communities. Examine language and immigration issues in the United States and Latin America.

EDU X29R. Language and Literacies Acquisition in Bilingual Classrooms.
Discuss and examine foundations and linguistic features of second language development.

EDU X29S. Topics in Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EDU X30. Language in Education.
Explore theoretical and practical perspectives on the nature of language in education, with a focus on implications for English language learners in classroom settings; linguistic structures and functions; discourse, phonology, morphology, syntax, and semantics across languages and throughout development; and language varieties.

EDU X31. Restorative Practices.
Focus on community engagement and social justice issues related to schooling access and equity.

EDU X33. Children's Literature.
Introduction to ways of bringing literature to children, facilitated by extensive discussion. Discuss literature written for children from early childhood through age twelve. Explore genres, authors, themes, and forms.

EDU X77. Conference Course in Curriculum and Instruction.
Independent studies in instructional methodology and curriculum.

EDU X79. Topics in International Learning Seminars.
Discuss various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

Graduate Courses

Professional Courses

EEB - Ecology, Evolution and Behavior

Ecology, Evolution, and Behavior: EEB

Lower-Division Courses

Upper-Division Courses

Graduate Courses

EEB X80C. Advanced Conservation Biology.
Examine the application of principles and concepts of ecology to the preservation of wild plant and animal species and to the preservation, management, and restoration of natural and semi-natural ecosystems. Focus on biological aspects of issues such as endangered species protection, invasive species, preserve design, and forest management, via a set of case studies.

EEB X80E. Advanced Microbial Ecology.
Examine microbial population, community, and ecosystem ecology.

EEB X80F. Biology of Birds.
Discuss the anatomy, physiology, classification, and ecology of birds.

EEB X80G. Methods in Ecological Genomics.
Explore state-of-the-art methodologies for: genomics-based demographic and population structure analysis; detection of genomic signatures of natural selection; analyzing gene expression in the ecology, evolution, and behavior context; quantification of complex communities using metabarcoding.

EEB X80L. Advanced Systematics.
Explore biodiversity, phylogeny, species concepts, historical biogeography, phylogeography, molecular clocks, phylogenomics, comparative methods, fossils, morphometrics, taxonomy, ontogeny, homology, computational methods, and phylogenetic statistics.

EEB X80P. Population Genetics.
Introduction to population genetics. Develop a quantitative understanding of evolutionary change caused by selection, drift, mutation, and migration. Focus on phenotypic and molecular evolution.

EEB X80R. Advanced Readings in the Biological Sciences.

EEB X80T. Topics in Current Biology Concepts.
Designed for beginning graduate students seeking a review of modern biological concepts.

EEB X81E. Ecology Seminar.
Listen to and discuss presentations ranging from research progress reports to practice conference talks and well-versed presentations of long term research programs.

EEB X82. Advanced Study and Research.

EEB X82K. Topics in Computational and Statistical Biology.

EEB X82K.4. Numerical Ecology in R.

Explore basic concepts and methods of laboratory and field analysis in various fields of biology; systematics and ecology of natural populations.

EEB X82K.5. Meta Analysis.

Explore a quantitative approach for synthesizing results from diverse research studies that address a similar hypothesis.

EEB X82K.6. Programming for Biology.

Explore programming skills that are relevant to research in the biological sciences, including but not limited to programming in Python, R, Perl, C++.

EEB X82K.7. Ecological Theory and Modeling.

Explore concepts and methods of modeling ecological systems including populations, communities and ecosystems. Focus on the methodology and utility of ecological theory and modeling. Examine the basic techniques and classic insights derived from differential equation, statistical, and individual based models. Learn how to interpret and evaluate models in the literature.

EEB X82K.8. Introduction to Biology for Data Science.

Explore biological concepts and methods (including its assumptions and limitations), particularly in the areas of systems biology, medical and evolutionary genomics, and neuroscience. Focus on approaches that produce a lot of data but are analysis-challenged.

EEB X82K.9. Mathematical Modeling for Biology.

Translate between qualitative hypotheses regarding biological processes and their more exact expression in the form of mathematical models. Analyze these models to determine predicted biological behavior under those hypotheses.

EEB X84K. Topics in Ecology, Evolution, and Behavior.

Explore basic concepts and methods of laboratory and field analysis in various fields of biology; systematics and ecology of natural populations.

EEB X84K.1. Chemical Ecology.

Explore the breadth of chemical ecology, from its historical focus on pheromonal communication, plant-insect interactions, and coevolution to new frontiers, including novel methods in metabolomics and the community and ecosystem effects of chemically mediated species interactions.

EEB X84K.2. Quantitative and Population Genetics.

Discuss critical reading of primary quantitative literature on the drivers of genetic variation and its mapping to trait variation, focusing on humans. Analyze central ideas in mathematical modeling and statistical analysis of human genetic variation and explore areas from evolutionary genetics and medical genetics including mutation and recombination, genetic drift, natural selection, analyses of gene-expression variation, population structure, genotype-phenotype stratification, and study designs for mapping genotype to phenotype.

EEB X84K.3. Diversity, Equity, and Inclusion in STEM: The Science Behind Bias.

Discuss the historical context of bias and exclusion in science from the primary literature to understand the science of bias, why it is present, how it continues to persist across the Science, Technology, Engineering, and Mathematics (STEM) fields, and identify actionable items to address and overcome these issues.

EEB X84K.4. Recent Advances in Ecosystem Ecology.

Explore recent advances in ecosystem ecology through lectures and discussions.

EEB X84K.5. Recent Advances in Ecological and Evolutionary Genetics.

Discuss and analyze current and classic literature related to ecological and evolutionary genetics.

EEB X84K.6. Phylogenetic Perspectives in Ecology, Evolution, and Behavior.

Explore the theory, methods, and applications of phylogenetics in ecology, evolution, and behavior. Examine the development of phylogenetics; the various phylogenetic optimality criteria and their advantages and disadvantages (include non-parametric, semi-parametric, and parametric methods); models of evolution for molecular and morphological data; algorithms and heuristics for searching solution space. Discuss Bayesian Markov chain Monte Carlo approaches; phylogenetic simulation; statistical assessment of phylogenetic results; molecular clocks; and major applications of phylogenetics.

EEB X84K.7. Ancient and Environmental DNA.

Explore the prospects and challenges of ancient/environmental DNA research, and considers the applications in evolutionary biology, paleontology, and anthropology.

EEB X84K.8. Seminars in Brain Behavior and Evolution.

Explore how to give a seminar and/or writing a grant proposal. Prepare for job talks, paper presentations, or writing grants.

EEB X84K.9. Integrative Omics in the Evolution of Development and Behavior.

Discuss the conceptual foundations and historical roots of research programs in evo-devo and evolutionary neuroscience including recent discoveries and limitations in these fields. Explore how -omics approaches and comparative methods enable novel insights into the diversification, convergence, and constraint of complex traits.

EEB X84L. Issues in Population Biology.

Analyze at an advanced level currently active areas of research in population biology.

EEB X89D. Subjects and Skills for Graduate Students in Ecology, Evolution and Behavior.

Designed for first-year graduate students in ecology, evolution, and behavior. Introduction to the writing, presentation and appraisal skills needed to excel in all fields of biological research. Focus on training in many of the skills required of research scientists.

EEB X90C. Fundamentals of Evolution.

Introduction to major principles and questions in evolutionary biology. Explore population genetics, genetic diversity, adaptation, origin of species, phylogenetics, molecular evolution, and macroevolution. Focus on identifying open questions, analysis, and interpretation of data, and gaining familiarity with the primary scientific literature.

EEB X90D. Fundamentals of Integrative Animal Behavior.

Introduction to major principles and questions in animal behavior with emphasis on why animals behave the way they do. Examine both the proximate and ultimate issues of animal behavior, how it is acquired and regulated, and how it evolved. Focus on integration of proximate and ultimate analyses in the various domains in which animals behave.

EEB X90E. Fundamentals of Ecology.

Explore the fundamentals of ecology, ranging from organism physiology to population, species, community, and ecosystem-level processes across landscapes and biomes.

EEB X98. Thesis.

EEB X98R. Master's Report.

Prepare a report to fulfill the requirement for the master's degree under the report option.

EEB X99W. Dissertation.

Professional Courses

EEE - Earth Energy Engineering

Earth Energy Engineering: EEE

Lower-Division Courses

Upper-Division Courses

Graduate Courses

Professional Courses

EER - Energy and Earth Resources

Energy and Earth Resources: EER

Lower-Division Courses

Upper-Division Courses

Graduate Courses

EER X94. Topics in Directed Readings in Energy and Earth Resources.
Energy, water, and environmental issues related to the exploration, production, and consumption of energy in society.

EER X96. Topics in Energy and Earth Resources: Seminar.
Graduate seminar covering a wide range of issues in energy and earth resources.

EER X96.1. Energy and Earth Resource Economics.
Theoretical and applied topics in natural resource economics, including project analysis, production theory, industrial organization, markets and regulation, and environmental economics.

EER X96.2. Business, Finance, and Management.

EER X96.3. Policy and Law.

EER X96.4. Resource Economics and Econometrics.

EER X96.5. Geology of Earth Resources.
Study of geologic, economic, societal, and environmental issues related to the production and consumption of energy, metal, industrial mineral, and water resources. Emphasizes the descriptive geology and origin of earth resources within the context of their overall geologic settings.

EER X98. Thesis.

Professional Courses

ELP - Educational Leadership and Policy

Educational Leadership and Policy: ELP

Lower-Division Courses

ELP X05. Public Policy and Black Communities.
Examine how public policy has both advanced and hindered opportunities for Black people and communities from the Constitutional era to the present, addressing such areas as education, health, housing, and policing.

ELP X11S. Topics in Educational Leadership and Policy.
Explore a wide array of introductory issues in educational leadership and policy.

ELP X17. First-Year Connection Seminar: University Leadership Network.
Explore undergraduate education through lectures, discussion, and experiential learning focusing on various contemporary issues, with an emphasis on multidisciplinary perspectives and critical discourse.

ELP X19S. Topics in Educational Leadership and Policy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Educational Leadership and Policy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ELP X20F. Power and Money in U.S. Education Policy.
Examine how power dynamics and financial forces shape education opportunity, who controls what gets taught, how resources are allocated, the political influences behind educational decisions, and the impact of the decisions upon different groups of students.

ELP X21F. Black Education Policy.
Examine key educational policy moments that have impacted Black communities--including anti-literacy laws, segregation, contemporary funding, and curriculum debates. Explore how Black communities have responded through institution-building, legal advocacy, and alternative educational practices.

ELP X27M. First-Year Seminar: University Leadership Network Mentors.
Explore undergraduate education, as it pertains to student educators, through lectures, peer leadership best practices, discussion, and experiential learning.

ELP X27S. Academic Success Seminar.
Explore academic success strategies and complete a project related to each student's probationary status at the University.

ELP X29S. Topics in Educational Leadership and Policy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Educational Leadership and Policy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ELP X30K. Topics in Educational Leadership and Policy.
Explore a wide array of introductory issues in educational leadership and policy.

ELP X51L. Leadership for New Student Transition.
Explore peer leadership within the University community, with a focus on supporting the transition to college through the first-year experience.

ELP X51N. Sorority and Fraternity Leadership Issues.
Explore leadership within university sororities and fraternities. Discuss leadership skills in areas such as community building, risk management, social justice, and community service.

ELP X53N. Internship.
Supervised practice in a professional position.

ELP X54C. How Colleges Work.
Examine the ways in which colleges function, informed by history, bureaucracy, organization, administration, governance, and law and policy.

ELP X54D. Equity and Diversity Issues in Education.
Examine foundational and current issues related to research-based knowledge on equity and diversity issues in PK-12 and higher education.

ELP X54E. College Students and Their Environments.
Examine issues challenging the ability of colleges to support students, including campus history and legacy. Explore how students' environments affect the way they engage with colleges.

ELP X54F. Foundations of Educational Policy.
Introduction to the history of the American educational system. Consider historical, economic, social, and political trends when examining contemporary educational policy. Explore policies related to race, ethnicity, class, and gender, and the recurring nature of controversial issues related to language, segregation, funding, and accountability.

ELP X54K. Special Topics in Higher Education.

ELP X54L. Introduction to Educational Leadership Studies.
Examine the study and practice of educational leadership. Through a variety of experiences, explore large leadership questions in schools, higher education institutions, and other organizations.

ELP X54P. Introduction to Educational Policy.
Introduction to basic research, theory, and practice about educational policy and its influence on student outcomes. Discuss the ways in which educational inequalities from early-childhood through postsecondary education contribute to broad social and economic inequality.

ELP X54R. Introduction to Research in Higher Education.
Explore an overview of research methods and approaches, including basic terminologies and ways to deploy research in service to student affairs work.

ELP X54S. Social Awareness and Critical Consciousness in Student Affairs.
Engage in understanding personal cultural and social backgrounds and how positionality influences the way one thinks about students, colleges, and student affairs.

ELP X54T. Introduction to Student Affairs in Higher Education.
Explore an overview of student affairs functions, challenges, and goals both within and external to traditional student affairs units.

Graduate Courses

ELP X81C. Education Research I.
Explores educational research paradigms and epistemologies; introduction to basic educational research design decisions such as when to use qualitative, quantitative, or mixed-methods, the differences in these approaches and strengths each approach brings to the research endeavor.

ELP X81D. Education Research II.
A continuation of Education Research I, with an emphasis on the basics of statistical techniques and qualitative approaches; skills related to data collection and analysis; and conceptual and practical understanding of the research process and how to ensure quality while engaged in research.

ELP X83N. Graduate Internship.
Supervised practice in a professional position.

ELP X83P. Individual Projects.

ELP X84D. Administration of the Individual School.
Organization, direction, management, and leadership for the program of a single school.

ELP X84E. Public School Leadership.
A fused, multidisciplinary foundational core course covering major task areas,administrative theory and processes,and supporting knowledge from other disciplines.

ELP X84F. Foundations of Educational Policy.
Introduction to the history of the American educational system. Considers historical, economic, social, and political precedents when examining contemporary educational policy. Emphasis on policies related to race, ethnicity, class, and gender, and the recurring nature of controversial issues related to language, segregation, funding, and accountability.

ELP X84G. General, Elementary, and Secondary Programs.
To introduce principal responsibilities for general education programs regarding state/local budget, policies and practices for elementary and secondary schools. Executive leadership practices for general education with an emphasis on instruction, data triangulation, organizational design, fiscal management, strategic planning and site-based decision making for elementary and secondary schools.

ELP X84H. Policy Implementation.
Examine the challenges and implementation of systemic school reform in the context of American cities.

ELP X84J. Policy Analysis in Education.
Analyze policy in education, including traditional and critical approaches. Review methods and principles of policy analysis, the role of policy development, context, history, and micropolitical influences.

ELP X84L. Legal Issues in Schools.
Legal bases for organizing and administering public and private school systems; statutes and court decisions affecting educational functions; administrative legal issues pertaining to various functions of school.

ELP X84N. School Business Management.
Examines the organization of elementary and secondary schools and the expertise needed to manage their resources. Applied learning opportunities in the areas of school finance and accounting, property management, state reporting and other statutory requirements, policy interpretation, budget preparation and administration, cash management, personnel management, purchasing, risk management, and strategic planning.

ELP X84P. Principalship.
Group and individual studies of research literature; execution of investigative projects and reports of research.

ELP X84Q. Leading for Equity and Justice in K-12 Schools.
Explores development of leadership capacity to lead high-achieving, equitable, and socially just schools for all students in integrated ways, especially for students who have been traditionally underserved. Focus on research-based leadership practices for addressing inequities and ways to develop schools that give all students equitable opportunity for high academic achievement.

ELP X84R. School, Family and Community Engagement.
Introduction to concepts of school-family-community engagement with a focus on equity, social justice, and democratic participation. Explores the capacity to lead community engaged schools through equitably and authentically partnering with traditionally underserved families, communities, and community-based organizations.

ELP X84S. School Leadership: Micropolitics and Change.
The micropolitics of leadership, from control to empowerment, as they affect what principals can and should do about change within the school. Designed to assist prospective principals in analyzing and interpreting the dynamic process of initiation, implementation, and institutionalization of change in and around schools.

ELP X84T. School Improvement: Instructional Leadership and Development.
Designed to provide prospective school leaders with the conceptual, technical, and human-interaction skills necessary for school improvement. Focus on knowledge, principles, problems, and issues related to instructional leadership. Examines instructional supervision theory, goals, functions, supervisory models, and strategies that enhance teaching and learning.

ELP X84V. Poverty and Education Policy.
The social context of education, the development and expansion of concentrated poverty in central-city schools, and the relationship between poverty and educational performance as it affects schoolchildren and parents in closely related fields such as welfare, housing, employment and training, health care, food assistance, and day care.

ELP X84W. Systems for Observing and Analyzing Instruction.
Explores skills in systematic observation, organized ways of examining teacher/student behavior in the classroom. Incorporates Texas Teacher Assessment Seminar training.

ELP X85C. Contemporary Issues In Higher Education Management.
An examination of responsibilities, functions, challenges, and current issues that affect managers in institutions of higher education.

ELP X85E. The College Student.
Study of the student population in contemporary colleges and universities, with emphasis on student development theory and the impact of campus environments on student development.

ELP X85R. Organization and Administration of Higher Education.
Introduction to the study of higher education organizations. Analysis of all elements of higher education institutions, with particular attention to structure and governance.

ELP X85T. Student Affairs in Higher Education.
Examination of the rationale for student affairs professions and the various administrative units involved in carrying out their mission.

ELP X90C. Proseminar: Introduction to P20 Research and Careers.
Foundation for cohort interaction among incoming doctoral students. Establishes a learning community among students and faculty to explore issues related to P20 education with opportunities for team conferring, planning, academic research, relevant practical experiences and site

visits, professional presenting, writing and analysis, and other curricular and career enhancement opportunities

ELP X90D. Pro-Seminar and Systems of Higher Education.
Build the foundation for cohort interaction and provides opportunities to explore issues related to careers and research in higher education. An introduction to the systems of higher education in the United States.

ELP X90E. Economics and Finance.
Survey of the theoretical and empirical literature related to the economic context of and finance policy within K-12 or higher education institutions. Separate K-12 and higher education sections are taught. Covers a wide range of concepts, processes, and policies, such as patterns of financing educational institutions; federal, state, and local governmental roles; revenue sources; costs; benefits; equity; efficiency; budgeting; and finance policy implementation.

ELP X90F. School Finance and Ethics.
A study of public school finance, including budgeting and accounting, encompassing historical and current trends and legal issues. An in-depth examination of state school finance for educational leaders addressing legal and ethical issues and strategic planning that impact the operation of public schools will be addressed. The principal issues that are examined are why education is worthy of funding, who contributes to that funding, and in what proportions, and how the funding is raised in adequate amounts and equitably distributed. Current trends in Texas school finance and what the future holds for education finance will also be examined.

ELP X90G. Economics of Education.
Examine theoretical and empirical literature related to the economic context of schooling in both K-12 or higher education institutions. Discuss a wide range of concepts, processes, and policies related to funding educational institutions; federal, state, and local governmental roles; revenue sources; equity; efficiency; and finance-related policies.

ELP X90P. Educational Politics and Policy.
Survey of theoretical and empirical literature related to educational politics and policy concerning K-12 or higher education institutions, including political systems theory, intergovernmental relations, power and conflict, community relations and intergroup theory, and policies dealing with equity, quality, efficiency, and choice.

ELP X90R. Organizational Design and Behavior.
Theories of organization from structuralist, behaviorist, and critical traditions that are useful for diagnosing problems endemic to schools and colleges, and for developing skills necessary for administering complex educational systems. Study of concepts related to bureaucracy, organizational design, decision making, power and control, leadership, motivation, and organizational communication.

ELP X90S. Social and Cultural Contexts of Education.
Examines the relationship of contemporary educational institutions, both public school and higher education, to their social setting.

ELP X90V. Ethics and Values in Educational Leadership.
Examination, from the point of view of various ethical systems, of issues of equity, distributive justice, codes of ethics in educational professions, treatment of students, and other issues that face administrators of educational systems. Designed to sensitize prospective educational leaders to the ethical content of educational decisions.

ELP X91D. Systems of Human Inquiry.
Introduction to fundamental assumptions and procedures for conducting social science research, including the logic of science; the links between epistemology, theory, and methods; sampling; measurement; surveys; experiments; qualitative methods; and ethics.

ELP X91E. Epistemologies of Educational Research.
Introduction to the range of different epistemological perspectives that are used in the conduct of social science research, including the scientific method/positivism, postpositivism, interpretivism, postmodernism, critical theory, race-based and culture-based perspectives, and feminisms.

ELP X91P. Quantitative Research Design and Analysis.
Introduction to the knowledge base in measurement theory and quantitative research designs, including research designs appropriate to different research contexts; and analyzing, interpreting, and representing statistical data to scholarly and practitioner audiences.

ELP X91Q. Qualitative Research Design and Analysis.
Introduction to the utilization of theoretical frames; research questions or focus, and literature reviews; ethical issues; research design; research methods; data analysis; representations of data; interpretation of data; trustworthiness; implications; and strengths and limitations in the conduct of qualitative research.

ELP X92E. Program Evaluation Methods.
Covers designing and implementing educational program evaluations; collect, analyze, and interpret qualitative and quantitative evaluation data; create and use communications and reports to engage key stakeholders; The primary emphasis is on the theory, issues, topics, and applications of program evaluation in educational environments.

ELP X92P. Advanced Quantitative Design and Analysis.
Integrated coverage of advanced quantitative methods for education research. A conceptual approach with an emphasis on reading and writing research results sections. Subjects include missing data techniques and statistical procedures, such as linear regression, multiple regression, ANCOVA, logistic regression, and exploratory factor analysis, among other topics.

ELP X92Q. Advanced Qualitative Research Design and Analysis.
Examines in-depth exemplary qualitative studies and considers critical issues that have been raised in qualitative research.

ELP X92S. Survey Research Methods in Educational Research.
Focus on the knowledge, design, planning, implementation, and interpretations of survey research methods. Covers information on purposes of survey research, theoretical and/or empirical basis for survey research, and development of different types of questionnaire items. Methods of selecting a sample and instrument validity and reliability are included, along with statistical procedures to review and interpret survey results.

ELP X93D. Law and Disabilities.
Issues of law and policy associated with serving people with disabilities; with emphasis on federal legislation.

ELP X93N. Graduate Internship.
Supervised practice in a professional position.

ELP X93P. Individual Projects.

ELP X93R. Research Apprenticeship.
Group and individual projects in research design, research methodologies, and research execution.

ELP X93S. Superintendent Practicum.
Group and individual studies of research literature; execution of investigative projects and reports of research.

ELP X93T. Directed Research in Educational Leadership and Policy.
Investigation of assigned problems under direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; production of acceptably written reports of a technical character.

ELP X94C. School District Administrative Functions I.
Focus on school district governance and the in depth the relationship of the superintendent and board of trustees and their respective roles according to the Texas Education Code. Investigates school facility planning and plant management, including the financing of facilities and the most up to date designs that enhances learning. Explores the function of human resources with a focus on recruitment, selection, and professional development of school district staff as well as important legal implications affecting district personnel.

ELP X94D. School District Administrative Functions II.
Focus on three areas of the superintendents' job: first, external and internal communications; second, hands-on practice in the area school finance, including state and local funding strategies and budgeting; third, the use of technology in today's school setting. Includes the study of school district safety and security practices, student transportation planning and requirements, and school district child nutrition operations.

ELP X94E. Capstone: Policy Research Problems.
Advanced seminar designed to help students develop research plans specifically for either a research proposal or a long-range research agenda.

ELP X94F. Special Education Leadership and Policy.
Advanced study of special education policies and practices focused on school leadership and school improvement for inclusive and high-quality schools.

ELP X94G. Participatory Action Research.
Explore participatory action research (PAR), a scholar-activist research approach that brings together community members, practitioners, and scholars, to co-create knowledge and social change in tandem.

ELP X94J. School Board Superintendent Relationships.
Examine the critical partnership between superintendents and school boards. Explore legal frameworks, governance models, communication strategies, and conflict resolution approaches. Analyze how effective superintendent-school board relationships contribute to district stability, policy development, and ultimately, all students' access to high-quality educational opportunities.

ELP X94K. Topics in K-12 in Educational Leadership and Policy.

ELP X94K.1. Advanced Policy Seminar in Latinx Education Issues.
Policy issues experienced by Latinos in the United States. Issues include testing, English as a Second Language programs, and bilingual education.

ELP X94K.10. Advanced Seminar: Networks in Education.
Explore social networks, theoretically and empirically, and their relationship to P-20 educational systems.

ELP X94K.2. Market-Based Reforms in Education.
Introduction to research on school choice, charter schools, and voucher policies, including the history of school choice policies, political contexts, and theories about choice from multiple disciplines. Also explores research on school choice, such as how parents make choices and how schools respond to them; the impact school vouchers and charter schools can have on diversity and segregation; and the nature of teacher labor markets in choice settings.

ELP X94K.3. Place, Opportunity, and Education.
Explores the relationship between social context or "place"; opportunity structures (i.e. physical and social structures that mediate access to opportunities (i.e. services, institutions, labor markets, etc.)), and outcomes in education.

ELP X94K.4. Schools and Gentrification.
Examines research on school gentrification, neighborhood gentrification, and school closures.

ELP X94K.5. Law, Leadership, and Discipline Policy.
Analysis of policies and practices in elementary, middle, and high school that impact the success of youth, with an emphasis on children of color and children with behavioral health challenges in educational and disciplinary placements. Examines aspects of the juvenile and adult criminal justice systems that intersect with the educational system and the disproportionate impact of these policies on children of color and those with special education needs, and considers means to promote better outcomes.

ELP X94K.6. Language Policy in Education.
Advanced seminar in language policy across elementary, secondary, and higher education levels. Explores language ideologies as a right, resource or problem.

ELP X94K.7. Immigration Theory in Education.
Advanced, interdisciplnary investigations of selected topics and problems in program and research design regarding the integration and education of immigrant youth in U.S. educational systems.

ELP X94K.8. Urban Schools and Communities: Policies and Practices.
Advanced study of urban schools in America. Explore policies and practices that affect the performance of students, teachers, and leaders in urban contexts. Develop potential solutions to the challenges those schools currently face.

ELP X94K.9. Advanced Seminar: Race and Ethnic Relations.
Examine numerous historical factors and institutional processes as they relate to the historically poor achievement and attainment levels of minoritized youth in public schools. Explore the role of educational pedagogy, school-level policies and practices, as well as the role of ideology in mediating these outcomes.

ELP X94L. School Law.
Legal bases for organizing and administering public and private school systems; statutes and court decisions affecting educational functions; administrative legal issues pertaining to various functions of school districts.

ELP X94N. School District Instructional Leadership.
Connects educational leadership theories with teachers, teaching and student learning, understanding moral and ethical leadership, and building cultural competencies and practices across the school district. Explores common core standards, instructional frameworks, and content-specific instructional practices; differentiated instruction; and assessments of student learning.

ELP X94P. Personnel Administration: Managing Instructional Resources.
Functions of school personnel offices. Subjects include development of personnel administration; job descriptions; planning for personnel needs; recruitment, selection, and evaluation of personnel; and management of the personnel office.

ELP X94S. Superintendent Seminar.
Involves completion of a final portfolio that demonstrates knowledge, skills, and dispositions required of district level leaders. Students will draft a Professional Development Plan (PDP), considering their own progress in leadership development as determined by completing an Administrative Leadership Inventory and their unique practicum experiences. Students will address perceived program/personal professional gaps and address means to close them, and participate in further development experiences. Students will develop a working mentor relationship with a superintendent or district-level staff person to advance knowledge, skills, and practice emphasizing those areas of perceived need.

ELP X94T. Administrative Theory.
Covers leadership theory and models from multidisciplinary perspectives. Outlines the tasks associated with the role of the superintendent, along with processes, and relationships expected of the role.

ELP X95C. Capstone: Advanced Issues in Higher Education.
Develop research questions within an established area of study, prepare a problem statement and rationale for a proposed area of study, critically review the literature on a proposed area, and develop a proposed methodology for answering the research questions.

ELP X95D. Data Informed Leadership.
Examine school restructuring, renewal research, and systemic change processes since 1975. Study and evaluate school restructuring and renewal processes, and their underlying research bases, in conjunction with the influence patterns of teachers, principals, superintendents, school boards, parents, and state and national policy makers on the development and use of such concepts and processes.

ELP X95E. Research on College Students.
A study of both theoretical and practical issues related to research with, of, and on college students. Focus on applied research methods and strategies appropriate for most student affairs/services professionals

ELP X95H. History of Higher Education.
The development of higher education since the Middle Ages, with emphasis on the development of higher education in the United States.

ELP X95K. Topics in Higher Education in Educational Leadership and Policy.
Administrative organization, functions, and practices within colleges and universities; roles of the administrator and principles of effective administrative practice; intensive study in selected areas of college operation.

ELP X95K.1. Comparative Higher Education.
Examination of the higher education systems and institutions of selected countries.

ELP X95K.10. Problems of College Teaching and Learning.
Hands-on, project-based. Explores problems of college teaching and learning through a past, present, and future lens. Survey of the full ecosystem of the college campus as opposed to just the traditional classroom. Covers investigating and designing interventions for pedagogical and learning problems within various units on college or university campuses.

ELP X95K.11. Critical Consciousness in Higher Education.
Introduction to foundational historical and theoretical issues for the critical study of higher education diversity work. Examines the ways institutions of higher education and student affairs areas enact change around issues of difference, identity, oppression, and social justice. Integrates questions of identity with those of social justice, and explores understanding self and others.

ELP X95K.12. Higher Education Budgeting and Finance.
An overview of higher education finance, including the economics of higher education, the principles and practices of financing higher education, the costs of higher education, and higher education budgeting concepts as they apply to institutions and to states.

ELP X95K.13. Administrative Leadership in Higher Education.

ELP X95K.14. Institutional Research and Planning.
Study of the ways planning and governance are informed by data collection, analysis, and information-use strategies in order to improve institutions of higher education. Institutional research and planning functions in colleges and universities.

ELP X95K.15. The American Professorate.

ELP X95K.16. Policy Issues in Higher Education.

ELP X95K.17. Assessment in Higher Education.
Focus on the administrative and educational requirements for assessing student learning outcomes in higher education. Covers methodologies, basic approaches, politics, ethics and other concerns related to college student assessment. Analyzes the variety of learning outcomes for a diverse set of programs and services (i.e., counseling, health, judicial affairs, first-year student programs, career services) as well as understand the administrative components of an effective assessment program within a higher education setting.

ELP X95K.18. Ethical Leadership and Governance.
Examine levels of governance in higher education, issues of equity, codes of ethics in educational professions, treatment of students, and other issues that face administrators of educational systems from the point of view of various ethical systems. Prepare leaders for the ethical dimensions of educational decisions and governance, study foundational theories of ethics, and the strategies required for effective higher education leaders. Refine personal leadership values and qualities, and application of leadership theories to contemporary contexts.

ELP X95K.19. Leadership for Social Justice, Equity and Inclusion.
Build critical consciousness, capacity to lead for equity and excellence, social justice, and anti-racism within integrated settings. Explore foundational and current issues related to research-based knowledge on equity, social justice, and inclusion in higher education. Investigate the concept of equity from different theoretical perspectives and obtain an understanding of inequality from a structural, organizational, and individual level.

ELP X95K.2. Leadership in Higher Education.
Examination of foundational theories, leadership strategies in higher education, personal leadership values and qualities, and application of leadership theories to contemporary contexts.

ELP X95K.20. Research Design Theories and Literature Review.
An introduction to the design of educational research with a focus on literature reviews and research theories. Explore how to identify research sources; organize, summarize, and synthesize information in writing; and prepare and utilize effective research questions. Study theoretical perspectives of research design, principles of data collection, analysis and drawing conclusions from data.

ELP X95K.21. LGBTQ+ Histories, Identities, and Contexts in Higher Education.
Explore historical, institutional, and systemic relationships between lesbian, gay, bisexual, transgender, and queer(+) people and higher education. Examine scholarship and practice in both educational policy and student affairs.

ELP X95K.22. Educational Crises and Emergency Response.
Examine multiple perspectives on campus crises, including institutional and individual impact to administrator and community response and disaster relief. Explore social nuances of crisis, including campus racial incidents, student loss, mental health, and the impact of politics in and on education.

ELP X95K.23. College Student Governance and Involvement.
From organizations as involvement to governing in campus-level and elected leadership capacities, explore historical origins and current events and literature to build deeper context for higher education and student affairs scholars and practitioners.

ELP X95K.24. Synthesizing Research Literature.
Explore the nuances associated with writing an academic literature review, including understanding purpose and argument, and responding to topical questions with relevant scholarship and literature.

ELP X95K.25. Sociology of Education.
Explore the subfield of the sociology of education. Assess the current state of the field, emphasizing connections to formative theoretical perspectives and seminal empirical results. Examine the ways in which schools reproduce, reinforce, and challenge the prevailing social, economic, and political relationships in society. Discuss why people go to school (both K-12 and higher education), who has access, and the effects of educational institutions on individuals, communities, and society.

ELP X95K.3. Community Colleges.
History of the values, purpose, and mission of community colleges, with an overview of major functions such as transfer, workforce development, adult basic education, and continuing education. Explores various models of community college governance, funding sources, and alternative funding models.

ELP X95K.4. Gender in Higher Education.
Examination of gender within higher education contexts.

ELP X95K.5. Equity and Diversity in Higher Education.
Examines the legal, educational and public policy issues related to college access, educational equity, and racial/ethnic diversity in American higher education.

ELP X95K.6. Legislative Issues in Higher Education.
Focus on legislative and policy issues in Texas higher education, with an attendant focus on the national policy context. Provides an overview of the state-level policy making process and addresses various policy issues related to higher education access, equity, finance, governance, diversity, and more.

ELP X95K.7. Gender and Adult Development.
Utilizes historical, stage, sociocultural, narrative, and psychosocial approaches to examine adult development, primarily within a higher education context. Theories discussed include sexual identity, gender identity, racial/ethnic identity, cognitive development, psychological development, and moral development; plus the general development of women and men.

ELP X95K.8. Technology and Innovation in Higher Education.
Examines big ideas pertaining to technology and innovation in higher education with a particular focus on developing the ability to design strategic interventions aimed at educational improvement on American college and university campuses. Explores theories of innovation, the adoption of innovation, and process of designing and creating innovate solutions to contemporary problems in higher and post-secondary education.

ELP X95K.9. Multicultural Modes of Mentoring.
Examines literature of developmental relationships and concepts such as sponsorship, coaching, and role modeling with an emphasis on mentoring in higher educational settings. Participants will engage in self-reflective exercises pertaining to their own developmental relationships. Explores prominent mentoring programs on both on campus and in the larger Austin community.

ELP X95L. Higher Education Law.
Examine the most pressing legal issues that confront colleges and universities today and understand how administrators and lawyers can respond to advance the mission of higher education institutions, including priorities around equity and inclusion.

ELP X95S. Systems of Higher Education.
Introduction to the systems of American higher education. Overview of literature on historical and contemporary issues facing the system of American higher education.

ELP X96. Topics in P20 Education.

ELP X97. Educational Policy and Planning Seminar.
Provide professional development and advising tailored to PhD students in educational policy and planning. Build community, creating spaces for more interaction with faculty in the program area and with other students; socializes students into the culture of academia; and provides critical information to students regarding job opportunities, funding graduate education, and creating a professional identity.

ELP X99K. Treatise.

ELP X99L. Treatise.

ELP X99M. Treatise in Practice I.

ELP X99N. Treatise in Practice II.

ELP X99W. Dissertation.

Professional Courses

EMA - Energy Management

Energy Management: EMA

Lower-Division Courses

Upper-Division Courses

Graduate Courses

EMA X80. Seminar in Energy Management.
Meet with leading energy experts from industry and academia to discuss recent developments in technology, policy, law, and business.

EMA X82. Topics in Economics.

EMA X82.1. Environmental Economics.
Explore economic theory and public policy as they apply to environmental problems. Includes the role of market failure in explaining the existence of pollution, alternative strategies for pollution control and environmental management, and global environmental issues.

EMA X82.2. Managerial Economics.
Explore energy fundamentals through a detailed examination of the history, structure and functioning of the modern energy industry. Includes models of supply, demand, and transportation; market structure; game theoretic strategies and risk management; environmental issues; and policy and regulation.

EMA X82.9. Advanced Economics.

EMA X84. Topics in Finance.

EMA X84.1. Energy Markets and Risk Management.
Study how firms manage their financial risk exposures and how they use derivative securities.

EMA X84.2. Valuation.
Explore financial modeling, derivatives in corporate finance, business valuation, and value-based management.

EMA X84.3. Investments.
Analyze the investment decision-making process, including asset allocation, security analysis, risk and expected return measurement, asset-pricing models, and international investment.

EMA X84.4. Advanced Corporate Finance.
Investigate advanced corporate financial management in the global marketplace, including valuation concepts, optimal capital structure, risk management, corporate control and restructuring, and mergers and acquisitions.

EMA X84.5. Private Equity Mergers and Acquisitions.
Examine the application of advanced corporate finance concepts in the private equity markets and mergers and acquisitions.

EMA X84.6. Energy and Environmental Markets.
Explore the business and public policy issues that these changes have raised in energy markets, and in the environmental markets to which they are closely tied using tools from economics and finance. Includes the development the political economy of deregulation, the environmental impacts and policies related to energy production and use, market power and antitrust in energy and environmental markets, and the transportation and storage of energy commodities.

EMA X84.7. Environmental, Social, and Governance Investments.
Explore a conceptual and theoretical foundation for corporate ESG (Environmental, Social and Governance) policies and actions and investors' preferences regarding such policies and actions including how such policies and actions affect firm performance and investor reactions.

EMA X84.8. Corporate Finance.
Explore principles of finance, with application to all aspects of the energy firm; particular attention to cost of capital, investment decisions, management of assets, and procurement of funds.

EMA X84.9. Advanced Finance.

EMA X86. Topics in Accounting.

EMA X86.1. Financial Accounting.
Explore transaction analysis, financial statement preparation, and analysis of financial statements.

EMA X86.2. Cost Accounting.
Analyze manufacturing costs, and explore the development of cost estimates and preparation of relevant information for management decision making.

EMA X86.3. Tax Accounting.
Introduction to the role of taxes in contemporary society and their impact on individuals and business entities, with an emphasis on federal income taxation.

EMA X86.4. Environmental Accounting.
Explore the pursuit of the goal of sustainability. Investigate how corporate and government leaders must manage companies and economies in terms of balancing and optimizing the triple bottom line of social, environmental, and economic impacts.

EMA X86.5. Oil and Gas Accounting.
Introduction to oil and gas accounting for upstream operations related to exploration and development of oil and gas. Includes accounting principles and procedures for exploration, acquisition, drilling, development and production costs in different phases when searching for producing oil and gas.

EMA X86.6. Energy Accounting.
Introduction to accounting for the energy industry. Includes accounting principles and procedures for exploration, acquisition, construction, development and production costs in different phases for a producer of electricity or oil and gas.

EMA X86.7. Intermediate Accounting.

EMA X86.9. Advanced Accounting.

EMA X88. Topics in Management.

EMA X88.1. Negotiations.
Explore the theories, processes, and practical techniques of negotiation to successfully negotiate and resolve disputes in a variety of situations including interpersonal, group, and international settings. Examine influence and conflict resolution strategies; identify interests, issues, and positions of the parties involved; analyze co-negotiators, their negotiation styles, and the negotiation situations; and manage the dynamics associated with most negotiations.

EMA X88.2. Entrepreneurship.
Identify innovations and market opportunities. Explore how to write a business plan, obtain funding, and launch a new company.

EMA X88.3. Creating and Managing Human Capital.
Investigate issues related to making human resource decisions in a more effective manner. Explore a strategic perspective, with particular emphasis on the links between human resource decisions and a firm's competitive position.

EMA X88.4. Strategy.
Analyze business situations from the point of view of the practicing general manager. Address key tasks involved in general management, including strategic decisions that ensure the long-term health of the entire firm or a major division.

EMA X88.9. Advanced Strategy.

EMA X90. Topics in Quantitative Analysis.

EMA X90.1. Decision Analysis.
Study decision-making under risk and with multiple criteria. Focus on strategic decisions and operational decisions using decision trees, simulation and other quantitative tools.

EMA X90.2. Supply Chain.
Investigate the operations or production functions, and the skills required for analyzing and solving related problems.

EMA X90.3. Project Management.
Explore project management through a proven framework for leading and directing projects and teams to deliver project results within constraints such as schedule, budget, and available resources.

EMA X90.4. Getting Product to Market and Trading.
Provide students a basic understanding of the various aspects of the energy supply chain covering the crude oil, natural gas and electric power supply chains with a focus on how energy products are transported from where they are produced to their ultimate markets.

EMA X90.5. Optimization.
Frame, formulate, and apply quantitative optimization and descriptive models to management decisions, using spreadsheets and other software.

EMA X90.6. Information Technology.
Explore the in-depth treatment of business data processing concerns such as database management, telecommunications, and the development of commercial systems.

EMA X90.7. Analytics.
Investigate methods used to model and analyze data. Explore regression models and time-series models and their application in the area of energy.

EMA X90.8. Operations and Supply Chain.
Investigate the operations or production functions, and the skills required for analyzing and solving related problems. Explore the use of developed predictive dynamic models in operations planning and operations decision making.

EMA X90.9. Advanced Analytics.

EMA X92. Topics in Marketing.

EMA X92.1. Energy Consumer Behavior.
Examine the acquisition and consumption of goods, services, time, and ideas by individuals and groups in the energy industry, including normative and descriptive theories.

EMA X92.2. Consumer Analysis.
Introduction to the data and tools used to analyze the business environment and enable marketing decision making. Use real-world data and problems to evaluate strategic market opportunities and assess the impact of marketing decisions in the marketplace.

EMA X94. Topics in Law.

EMA X94.1. Law and Agreements.
Explore contracts and transfers by oil and gas lessees such as assignments, farmouts, operating agreements, purchase and sale agreements, and master service agreements. Consider the oil and gas development on federal, state, and American Indian lands as well as environmental regulation of the petroleum industry.

EMA X94.2. Real Estate Law and Contracts.
Explore the legal framework of commercial real estate finance and development, including basic real estate law concepts, legal aspects of financing techniques and instruments, subdivision land-use controls, and the environmental regulation of real estate development.

EMA X94.3. Domestic Petroleum Transactions.
Explore the practical aspects of the U.S. oil and gas legal regime, focusing on the relationship between energy companies and regulatory authorities. Investigate bankruptcy, energy finance, and land use control, as well as purchase of domestic oil and gas assets by foreigners.

EMA X94.4. International Petroleum Transactions.
Explore international petroleum transactions in the context of a single industry. Includes the various participants and transactions that take place at each stage of the industry, from acquisition of development rights through exploration and production to transportation and marketing.

EMA X94.5. Environmental Law.
Introduction to environmental thinking in the context of scarce publicly and privately owned natural resources. Explore the public trust doctrine, relevance of the Tenth Amendment to environmental protection, the National Endowment Policy Act, the Endangered Species Act, and the Fish and Wildlife Coordination Act.

EMA X94.6. Law and Policy.
An introduction to the legal and regulatory regimes governing the energy industry, as well as the important economic and political concerns that underlie the regulation of the production and sale of energy.

EMA X94.9. Advanced Law.

EMA X96. Topics in Engineering and Science.

EMA X96.1. Oil and Gas Capstone.
Reinforce the interdisciplinary nature of developing petroleum assets. Includes the key stages of project development, such as: acquisition, exploration, development, production, abandonment, and exit.

EMA X96.10. Technology and Policy.
Investigate the broad context of energy production and consumption in the U.S. and the world. Discuss past energy trends and fundamentals of energy and power, including fossil fuels and renewable energy sources and technologies. Explore different energy resources, environmental impacts, and societal uses of energy, and evaluate future energy technology options.

EMA X96.11. Financial Strategies for Energy Firms.
Perform an integrated analysis of the interaction between the investment and operating policies of a corporation and its financial strategies, with special emphasis on firms in the energy industry.

EMA X96.2. Electricity Capstone.
Reinforce the interdisciplinary nature of developing electricity generation assets. Explore the key stages of project development, including site selection, life-cycle analysis, due diligence, permitting, contracting, and financing.

EMA X96.3. Energy Technology and Policy.
Explore the understanding of the broad context of energy production and consumption in the U.S. and the world. Discuss past energy trends and fundamentals of energy and power, including fossil fuels and renewable energy sources and technologies. Explore different energy resources, environmental impacts, and societal uses of energy. Evaluate future energy technology options.

EMA X96.4. Electricity Systems.
Explore the locational marginal pricing (or nodal) model of organized or centralized day-ahead and real-time electricity markets. Investigate the solution of power flow, formulate optimal dispatch as an optimization problem, consider offer-based economic dispatch, transmission and unit commitment issues. Discuss pricing rules and incentives in markets, particularly in the context of transmission limits. Examine energy and transmission price risk hedging, network models, and capacity adequacy.

EMA X96.5. Petroleum Systems.
Introduction to the petroleum system, including source rocks and reservoirs, maturation and migration of hydrocarbons, traps and seals, rock properties, basin, play and prospect risking and assessment and tools for subsurface analysis (wells and seismic) for nontechnical personnel. Examine prospecting strategies and leasing.

EMA X96.6. Petroleum Engineering.
Introduction to drilling, reservoir engineering, surface facilities and processing, pipelines, and project abandonment for nontechnical personnel.

EMA X96.7. Energy Networks.
Introduction to analysis, design and management of complex integrated systems typically in midstream oil and gas processes and electric grids.

EMA X96.8. Advanced Electricity Systems.

EMA X96.9. Advanced Petroleum Systems.

EMA X97. Advanced Energy Management.
Focus on the economics, strategy, business valuation, technology, science, policy and finance specific to the energy industry.

Professional Courses

ENM - Engineering Management

Engineering Management: ENM

Lower-Division Courses

Upper-Division Courses

Graduate Courses

ENM X80E. Topics in Management of People, Processes, Projects, and Organizations.
Explore engineering management processes and how these processes are used by administrators and managers.

ENM X80E.1. Managing People and Organizations.
Introduction to frameworks from the social sciences that are useful for understanding what effective leaders do when working with others.

ENM X80E.2. Engineering Project Management.
Explore methods for organizing, coordinating, and controlling resources to minimize risk and conflict, and to maintain budgets and schedules. Discuss the evaluation of competing alternatives, organization of a project, scheduling of tasks and resources, and the role of management.

ENM X81E. Topics in Business Foundations.
Survey important topics and foundational ideas in business, as applied within an engineering environment.

ENM X81E.1. Marketing and Negotiation.
Explore major marketing concepts and variables, their interrelationships, and their implications for policy making, problem solving, and strategy formulation. Examine the development of sophisticated strategies and tactics to pursue mutually beneficial solutions.

ENM X81E.2. Legal Issues and Technology Management.
Examine legal considerations in the practice of engineering management. Explore management disciplines to create maximum value from technology.

ENM X81E.3. Finance and Accounting for Engineering Managers.
Introduction to fundamental concepts in finance and accounting with application. Explore how to evaluate investment and financing opportunities in a corporation.

ENM X82E. Topics in Decision Making.
Explore methods to make high-quality decisions in an engineering environment.

ENM X82E.1. Analytics for Engineering Managers.
Explore theory and tools that allow the engineering manager to draw correct inferences from data and include those inferences in the decision-making process. Examine descriptive, predictive, and prescriptive analytics and statistics.

ENM X82E.2. Strategic Decision and Risk Analysis.
Explore tools and methods for making high-quality decisions in the face of uncertainty, applied within an engineering context. Learn how to frame and analyze major decisions and how to overcome the biases that can degrade these decisions.

ENM X82E.3. Engineering Operations Management.
Examine methods to improve the efficiency of an organization's operations. Explore management of production systems, inventory management, logistics, and supply-chain management.

ENM X85C. Projects in Engineering Management I.
First course in a two-semester sequence that concludes with Engineering Management 385D. Independent project carried out under the supervision of an engineering management faculty member.

ENM X85D. Projects in Engineering Management II.
Continuation of Engineering Management 385C or 397P. Independent project carried out under the supervision of an engineering management faculty member.

ENM X85K. Special Topics in Engineering Management.
Explore special topics in engineering management.

ENM X86. Marketing in an Engineering Environment.
Explore major marketing concepts and variables, their interrelationships, and their implications for policy making, problem solving, and strategy formulation.

ENM X87. Art and Science of Negotiations.
Examine the development of sophisticated strategies and tactics to pursue mutually beneficial solutions.

ENM X88. Legal Issues for Engineering Managers.
Examine legal considerations in the practice of engineering management.

ENM X89. Management of Technology.
Explore management disciplines to create maximum value from technology.

ENM X90. Systems Engineering.
Utilize systems-thinking principles to organize how to design, integrate, and manage complex systems over their life cycles.

ENM X91. Lean Systems and Processes.

ENM X97K. Engineering Management Seminar.
Current topics in engineering management.

ENM X97P. Projects in Engineering Management.
Independent project carried out under the supervision of an engineering management faculty member.

Professional Courses

ENS - Ensemble

Ensemble: ENS

Lower-Division Courses

ENS X01L. Longhorn Singers.

ENS X01S. University Chorus: Sopranos and Altos.
Open to any University student who can qualify by audition.

ENS X01T. University Chorus: Tenors and Basses.
Open to any University student who can qualify by audition.

ENS X01U. University Chorus.

ENS X02S. Symphony Orchestra.

ENS X02U. University Orchestra.

ENS X03C. Symphony Band.

ENS X03P. Butler Opera Center Ensemble.
Instruction and performance in operatic acting, vocal coaching, and stage direction.

ENS X03S. Wind Symphony.

ENS X03W. Wind Ensemble.

ENS X05. Sight-Reading.
Designed to develop and improve sight-reading skills in piano performance.

ENS X05C. Jazz Combos.

ENS X05E. Jazz Ensemble.

ENS X05M. Alternate Improvisation Music Ensemble.

ENS X06C. Conjunto Ensemble.

ENS X06E. Early Music Ensemble.

ENS X06F. African American Vocal Ensemble.

ENS X06J. Javanese Gamelan Ensemble.

ENS X06K. Hispanic Caribbean Ensemble.

ENS X06L. Mariachi Laboratory Ensemble.
Prepare for mariachi ensemble. Open to any University student who can qualify by audition.

ENS X06M. Mariachi Ensemble.

ENS X06N. North Indian Music Ensemble.

ENS X06T. Middle Eastern Ensemble.

ENS X06U. Accompanying: Instrumental.
Designed for pianists to improve ensemble playing and to give training in the technique of instrumental accompanying.

ENS X06V. Beginning Accompanying: Vocal.
An introductory course for pianists designed to teach the basic skills involved in vocal accompanying. Students who want to continue study in vocal accompanying after completing Ensemble 106V should register for Ensemble 106W.

ENS X06W. Advanced Accompanying: Vocal.
An advanced skills for pianists designed to continue to train students in vocal accompanying through more difficult repertoire.

ENS X07E. Topics in Undergraduate Instrumental or Vocal Ensemble.
Open to any University student who can qualify by audition.

ENS X07J. Jazz Orchestra.
Advanced jazz ensemble.

ENS X07K. Large Instrumental Ensemble.
Offered under various topics according to instrumentation, including Symphony Band, Symphony Orchestra, and Wind Ensemble.

ENS X07L. Longhorn Band.
In the spring semester, this organization divides into multiple performing ensembles.

ENS X07N. New Music Ensemble.

ENS X07S. Small Instrumental Ensemble.
Offered under various topics according to instrumentation.

ENS X08C. Texas Concert Band.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08D. Tower Concert Band.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08E. Longhorn Concert Band.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08F. Orange Concert Band.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08J. Longhorn Band Jazz Ensemble.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08K. Longhorn Band Percussion Ensemble.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08M. Longhorn Band Color Guard Ensemble.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X08P. Longhorn Pep Band.

ENS X08S. University Saxophone Ensemble.
Open to any University student who can qualify by audition.

ENS X09D. Percussion Ensemble.

ENS X09F. Harp Ensemble.

ENS X09G. Guitar Ensemble.

ENS X09K. Chamber Singers.

ENS X09L. Concert Chorale.

ENS X09N. Saxophone Choir.

ENS X09Q. Non-Jazz Organ Improvisation.

ENS X09R. Popular Choral Ensemble: Recording Arts.
Performing and recording pop vocal ensemble.

ENS X09T. Trombone Choir.

ENS X09U. University of Texas Steel Pan Ensemble.

Upper-Division Courses

Graduate Courses

ENS X80E. Topics in Graduate Instrumental or Vocal Ensemble.

ENS X80S. University Chorus: Sopranos and Altos.

ENS X80T. University Chorus: Tenors and Basses.

ENS X80U. University Chorus.

ENS X81C. Concert Chorale.

ENS X81S. Chamber Singers.

ENS X82S. Symphony Orchestra.

ENS X82U. University Orchestra.

ENS X83C. Symphony Band.

ENS X83S. Wind Symphony.

ENS X83W. Wind Ensemble.

ENS X84C. Longhorn Concert Band.

ENS X84G. Color Guard Ensemble.

ENS X84J. Longhorn Band Jazz Ensemble.

ENS X84L. Longhorn Band.
In the spring semester, this organization divides into multiple performing ensembles.

ENS X84P. Longhorn Band Percussion Ensemble.

ENS X84R. Orange Concert Band.

ENS X84T. Texas Concert Band.
One of several Longhorn Band ensembles offered in spring semesters.

ENS X84W. Tower Concert Band.

ENS X85C. Jazz Combos.

ENS X85E. Jazz Ensemble.

ENS X85J. Jazz Orchestra.

ENS X85M. Alternate Improvisation Music Ensemble.

ENS X85R. Recording Arts Ensemble.
Performing and recording pop vocal ensemble.

ENS X86C. Conjunto Ensemble.

ENS X86E. Early Music Ensemble.

ENS X86J. Java Gamelan Ensemble.

ENS X86K. Hispanic Caribbean Ensemble.

ENS X86L. Mariachi Laboratory Ensemble.
Prepare for mariachi ensemble.

ENS X86M. Mariachi Ensemble.
ENS X86N. North Indian Music Ensemble.
ENS X86T. Middle Eastern Ensemble.
ENS X86V. African American Vocal Ensemble.
ENS X87N. New Music Ensemble.
ENS X88P. Butler Opera Productions.
ENS X88S. Opera Studio.
ENS X89G. Guitar Ensemble.
ENS X89H. Harp Ensemble.
ENS X89N. Saxophone Choir.
ENS X89P. Percussion Ensemble.
ENS X89T. Trombone Choir.
ENS X96C. Conjunto Ensemble.
ENS X96E. Early Music Ensemble.
ENS X96J. Java Gamelan Ensemble.
ENS X96K. Hispanic Caribbean Ensemble.
ENS X96L. Mariachi Laboratory Ensemble.
Prepare for mariachi ensemble.
ENS X96M. Mariachi Ensemble.
ENS X96N. North Indian Music Ensemble.
ENS X96T. Middle Eastern Ensemble.
ENS X96V. African American Vocal Ensemble.

Professional Courses

ESL - English as a Second Language

English as a Second Language: ESL

Lower-Division Courses

ESL X01G. English Language Grammar.
Focus on improving understanding and use of English grammar in speaking and writing, as well as an introduction to American idioms.
ESL X01R. English Language Reading.
Focus on improving reading skills with an emphasis on understanding and discussing a variety of texts, using effective reading strategies, developing vocabulary, and increasing reading speed.
ESL X01S. English Language Speaking.
Focus on improving listening and speaking through activities such as note-taking, conversation practice, and participating in discussions. Emphasis on speaking in a variety of contexts; developing appropriate pronunciation, pitch, rhythm, and stress; increasing fluency; and expanding spoken vocabulary.
ESL X01W. English Language Writing.
Focus on improving writing skills by increasing writing fluency and accuracy at the sentence, paragraph, and essay levels. Emphasis on structure, organization, and development of ideas.
ESL X02S. Academic Listening and Speaking.
Focuses on the English language skills necessary for understanding lectures, taking notes, participating in and leading discussions, and giving effective presentations.
ESL X02W. Academic Reading and Writing.
Focuses on the English language skills necessary for reading and discussing academic texts, using new vocabulary, composing short papers, and writing research projects.
ESL X19S. Topics in English as a Second Language.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Office of Executive Vice President and Provost. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ESL X29S. Topics in English as a Second Language.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Office of Executive Vice President and Provost. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

ESL X88S. Oral Communication.
Practicum in speaking skills. Focuses on pronunciation, fluency, grammatical accuracy, vocabulary development, formal presentations, and graduate-level discussions.
ESL X88T. Basic Speaking Skills.
Preparation for the International Teaching Assistant Oral English Proficiency Assessment. Practice focuses on the five tasks required in the assessment: summary, vocabulary list, reading, concept and graph explanations, and personal introduction.
ESL X88W. Academic Writing.
Practicum in writing skills. Focuses on basic syntax and sentence structure, paragraph and essay writing, and basic research writing.
ESL X89S. Advanced Oral Communication.
Focuses on accuracy and development of the speaking skills needed in academic contexts.
ESL X89T. Communication and Teaching Culture.
Focuses on pronunciation, presenting and summarizing information, and relevant topics in intercultural communication.
ESL X89W. Advanced Academic Writing.
Focuses on the writing skills needed for qualifying exams, research, and conference papers.

Professional Courses

EUS - European Studies

European Studies: EUS

Lower-Division Courses

EUS X02. Introductory Interdisciplinary Topics in European Studies.
Analysis of various aspects of European culture, science, and technology.
EUS X05. Introduction to European Studies.
The myths, ideas, and sociopolitical realities that underpin the intellectual and cultural construction of Europe.
EUS X06. Introductory Topics in European Anthropology, Geography, History, and Sociology.
EUS X06.1. Race and Gender Stereotypes in Germany.
Examination of pseudoscientific popular theories of "race" and gender that developed in Germany and elsewhere in Europe in the nineteenth century, and how these affected the lives of millions and shaped current thinking about "racial" and gender differences.
EUS X06.2. Introduction to the History and Culture of Spain.
The history of Spain from its beginnings in the stone age through the great social and economic upheavals of the twentieth century.
EUS X06.3. The Roots of Religious Toleration.
Examines how freedom of conscience and religion crystallized in western and central Europe, both as a pragmatic practice and as a matter of principle.
EUS X06.4. Jewish Civilization: 1492 to the Present.
Subjects may include trends toward secularization, the emancipation of European Jewry, the emergence of American Jewry, the Holocaust, the establishment of the State of Israel, and the Arab-Israeli conflict.

EUS X06.6. Luther's World.

EUS X07. Introductory Topics in European Culture, Literature, Art, Music, and Media.

EUS X07.1. The Vampire in Slavic Cultures.

Examines the vampire in the cultures of Russia and Eastern Europe, including manifestations in literature, religion, art, film, and common practices from its origins to present.

EUS X07.11. Sweden: Innovating for the World.

Using case studies, trace Sweden's long history with innovation, starting with classic innovations produced with direct governmental support in the eighteenth century and continuing into present day with innovations like Spotify and Swish leading the way.

EUS X07.2. Introduction To Czech History and Culture: Puppets, Pubs, And Polyglots.

Survey of Czech history and culture from the middle ages to the present day. Subjects include the culture of daily life, literature, history, philosophy, and the arts.

EUS X07.3. Introduction to the Study of Northern Europe.

Introduces significant moments in and monuments from the cultural histories of the German-speaking, Scandinavian, and Dutch nations from their beginnings to the present. Designed to discuss representative problems in research and analysis in cultural studies and the humanities.

EUS X07.4. Movies Go To War.

A comparison of films from various nations about major twentieth century wars to the historical facts of the conflicts as practicums in critical comparative analysis of histories as representations.

EUS X07.5. Grimms' Fairy Tales.

Reading and discussion of tales from the Grimms' collection, as well as some of the relevant secondary literature.

EUS X07.6. Cuisine and Culture of Central and Eastern Europe.

An in-depth survey of the culinary traditions, history, and practices of Central and Eastern Europe.

EUS X07.7. Children's Literature of Northern Europe.

Explore nineteenth- to twenty-first-century children's literature from Norway, Sweden, Denmark, Germany, Switzerland, Austria, Finland, Belgium and the Netherlands. Focus on the prominent place of children's literature in the popular culture of central and northern Europe, as well as the serious issues and themes which north Americans might otherwise consider "adult" that are often found in this genre-death, war, poverty, social justice, and family conflict-alongside whimsy, warmth and wonder.

EUS X07.9. War in Comics and Photography: Southeast Europe.

Examine different ways to show and tell stories of armed conflict and state-sponsored violence, drawing on a variety of modern media forms - such as comics, cinema, novels, and photography - as well as contemporary digital platforms including social media. Focus on the 1990s conflicts in the former Yugoslavia (Bosnia, Croatia, and Serbia).

EUS X07D. Dissent in Twentieth-Century Ukraine.

Survey Ukrainian authors from the 1920s to the present, examining writings from "Executed Renaissance," underground literature, and postmodernism. Focus specifically on works that challenge the paradigm of socialist realism by discussing forbidden subjects (famine, religion, Gulag) or accentuating themes that are not considered "major" (personal life).

EUS X07M. An Introduction to Western Music.

Introduction to musical styles in the Euro-American art music tradition between the Middle Ages and the present day. Designed to foster critical listening and thinking about music, and deepen understanding of the vital role that music has played and continues to play in society and in individual lives.

EUS X08. Introductory Topics in European Economics, Government, Business, and Policy.

EUS X08.1. Germany and Globalization.

EUS X13. Preparation for Study Abroad in Europe.

EUS X18Q. Supervised Research.

EUS X19S. Topics in European Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for European Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EUS X29S. Topics in European Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for European Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

EUS X37C. Art in the Lives of Ordinary Romans.

Art and architecture from the archaeological sites of Pompeii, Herculaneum, and Ostia as indices of Roman culture, 100 BC to AD 250.

EUS X37D. Northern Renaissance Art, 1350-1500.

Northern European art from the International Style to van Eyck and Hieronymus Bosch.

EUS X37E. Romanesque Art and Architecture.

Form and function of religious art in twelfth-century Europe.

EUS X37F. Early Italian Renaissance Art to 1470.

Traces the beginnings of the "rebirth" (renaissance) of the visual arts, from the end of the Middle Ages to the heyday of the Medici. Works of art are analyzed both in formal terms and in relation to contemporary society, religion, philosophy, economics, statecraft, gender, and other significant issues.

EUS X37G. Gothic Cathedral: Amiens.

An examination of the cathedral at Amiens, its meaning, structure, political and financial contexts, and sculptural programs, as well as its influence on other buildings in France and Germany.

EUS X37I. The Age of Rembrandt and Rubens: Northern Baroque Art.

Northern European art in the seventeenth century, stressing the Netherlands and Flanders.

EUS X37J. Northern Renaissance Art, 1500-1600.

Art and cultural development in the sixteenth century; artists include Duerer, Gruenewald, Holbein, and Brueghel.

EUS X37L. Art at Court: The Gothic Period.
Changing manifestations of Gothic art and architecture at selected court centers, 1140 to 1400.

EUS X37M. Twentieth-Century European Art to 1940.
Major movements in the development of modern European painting and sculpture.

EUS X37N. Art in the Age of Dante and Giotto.
Examine the art of the later Middle Ages in Italy (1200-1400), including work by Giotto, Duccio, Nicola and Giovanni Pisano, and Arnolfo de Cambio.

EUS X40M. Continuity and Change in Modern France.
Focuses on various social, political, and cultural crises in France from the revolution of 1789 to the present time.

EUS X46. Topics in European Anthropology, Geography, History, and Sociology.

EUS X46.1. History of Britain from 1783 through World War I.
Surveys the political, social, economic, and intellectual history of Great Britain from the years preceding the outbreak of the French Revolution to the conclusion of World War I.

EUS X46.11. The Spanish Inquisition.

EUS X46.12. World War II in Eastern Europe.
Examines the war in Eastern Europe with a particular emphasis on occupation, collaboration, and resistance; the Holocaust; and the connection between ethnic cleansing, population transfer, and the establishment of communism in postwar Eastern Europe.

EUS X46.15. Early Western Colonialism.
An examination of the phenomenon of colonialism, with an emphasis on the European expansion across the globe that began at the end of the western Middle Ages and continued throughout the early modern period.

EUS X46.16. Eastern Europe in the Twentieth Century.
Examines the major political, social, and cultural events that shaped Eastern European society in the twentieth century.

EUS X46.18. Southeast Europe in the Twentieth Century.
Explores the key events and developments of Southeastern Europe, the region commonly referred to as the Balkans, in the twentieth century.

EUS X46.19. Regions and Cultures of Europe.
Spatial patterns in Europe, with emphasis on cultural, historical, and political geography.

EUS X46.2. Great Discoveries in Archaeology.
The stories, myths, and people behind some of the great archaeological discoveries.

EUS X46.21. Spinoza and Modernity.
Introduction to the core of Spinoza's writings and the diverse reactions they have elicited. Examines Spinoza's refusal of mind-body dualism, as well as a transcendent god or ideal as a way of understanding Spinoza's concepts and ideas.

EUS X46.22. German Nationalisms.
History of diverse views and movements regarding German national identity within their respective contexts, 1800-present.

EUS X46.23. Holocaust Aftereffects.
Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.

EUS X46.24. Europe since 1919.
Survey course emphasizing the impact of the two world wars on European social, political, and cultural life in the twentieth century.

EUS X46.25. The French Revolution and Napoleon.
Analysis of the social, political, and economic origins and outcomes of the French Revolution and Napoleon's empire.

EUS X46.26. History of Britain from the Restoration to 1783.
Surveys the political, social, economic, and intellectual history of England and Great Britain from the restoration of the Stuart monarchy in 1660 to the conclusion of the War for American Independence in 1783.

EUS X46.27. Italian Renaissance, 1350-1550.
Survey of political, socioeconomic, religious, and intellectual trends during the Italian Renaissance.

EUS X46.28. The Church and the Jews.
Examination of the complex relationship between the Western Church and Jews over two millenia.

EUS X46.29. Anti-Semitism in History and Literature.

EUS X46.3. Witches, Workers, and Wives.
Explores the role of families and concepts of gender as expressed in key economic, social, political, and cultural patterns in early modern Europe.

EUS X46.32. The Sacred and the Secular in Modern European Thought.
Introduces key themes and methodologies of intellectual history and social theory by exploring the dueling approaches to secularization and sacralization in modern European thought.

EUS X46.33. European Immigration to Texas in the Nineteenth Century.

EUS X46.34. German Scholars: US Exile.
Examine the migration of established European intellectuals into the US, due to the Second World War. Explore how they worked against their persecutors for their own cultural heritage and to influence US intellectual life. Investigate the ethical dilemmas faced in transplanting their lives and projects into new contexts.

EUS X46.35. Restitution and Restorative Justice after the Holocaust.
Examine attempts to find a measure of justice after the Holocaust. Explore themes of human rights and international law.

EUS X46.36. Stuart England, 1603-1689.
Topical lecture course focusing on the most significant political, religious, social, economic, and cultural developments in seventeenth-century England.

EUS X46.37. Tudor England, 1485-1603.
Exploration of the most important political, religious, social, economic, and intellectual changes that occurred in England between the accession of Henry VII and the death of Elizabeth I.

EUS X46.38. The Crusades.
An exploration of the religious encounters between eastern and western Christians, Christian heretics, Jews, Muslims, and polytheists; political, military, and cultural changes of the high middle ages; and the ways that crusading ideas and symbols have been reused in contemporary politics and popular culture.

EUS X46.39. The World of the Victorians.
Introduction to the main contours of social and cultural British history, both in Britain and in its burgeoning empire.

EUS X46.4. Law and Society in Early Modern Europe.
Research seminar on how historians have explored the significance of law, criminal and civil, in the lives of early modern Europeans. Topics include infanticide, fornication, drunkenness, theft, debt, slander, and family disputes.

EUS X46.40. Twelfth-Century Renaissance: 1050-1200.
An examination of social, cultural, and intellectual developments in eleventh- and twelfth-century Europe.

EUS X46.41. Europe Via Ethnography.
Develop a geographical and historical orientation to Europe and examine the cultural complexity of Europe via ethnography.

EUS X46.42. Memories of War.
Consider the ways the wars of the twentieth and twenty-first century are being remembered in Germany and the United States - from poems, novels and films to monuments and the controversial debates about military conflicts that the two countries have been involved in. Utilize theories of social memory, and concepts of individual and social mourning, to analyze how war affects individual lives, how societies mourn, and how remembering war impacts national identity and politics.

EUS X46.43. Environmental History of Eastern Europe.
Explore and relate commodification of nature, the climate crisis, and preserving biodiversity from the past and present. Investigate how human societies have changed their environments and how the environment has influenced the courses of societies through case studies from the ecological impact of the Teutonic Crusades to nuclear waste management in Chernobyl.

EUS X46.44. Technology and Society in Modern Eastern Europe and Russia.
Learn how technologies and social changes shape each other. Use case studies from Eastern Europe and Russia from the Industrial Revolution to the Era of AI. Explore the industrialization of production and consumption, the professionalization of engineering, the emergence of multidivisional industrial enterprises, the relationship between humans and machines, the uses of "cheap nature", and technological utopianism.

EUS X46.45. Cold War Eastern Europe.
Discover the primary historical developments of the post-war period in Eastern Europe from the imposition of communism in 1945 until its collapse in 1989. Explore political, economic, and cultural transformations of the Cold War.

EUS X46.46. Russia and Ukraine in World History.
Focus on multicultural history, shared imperial and national spaces, and geopolitics of entangled Russian-Ukrainian relations.

EUS X46.47. Economic Development in Post-Communist States.
Relate broad issues of economic development across the post-communist space since the collapse of the Soviet Union. Question and explore concepts, assumptions, and tools we use to assess development.

EUS X46.49. Nature and Politics in Post-Communist States.
Explore the key issues related to the political economy of human-nature interactions in post-communist countries, including politics of point-source natural resources, diffuse resources, and the commons.

EUS X46.51. Relations Between East Germany and the United States.
Explore and (re)asses the diplomatic, strategic-military relations and socio-cultural entanglements between the United States and the German Democratic Republic, thus complicating our understanding of the West-East divide and Cold War culture.

EUS X46.52. Transatlantic Memory Cultures.
Explore and compare German and American memory cultures, analyzing the Holocaust, slavery, and colonialism. Analyze the diversity and complexity of (inter)national, local, and indigenous memory cultures while also discussing how Germany and the United States might "learn from each other.

EUS X46.53. France in the Dark Years.
Explore the Nazi occupation of France and Vichy's collaboration. Consider the devastating fall of the French Republic, the organization of Vichy France, Vichy's complicity in the Holocaust, the ethical complexities of collaboration and resistance, and the ramifications of World War II for the French empire.

EUS X46.54. History of Britain, 1500-1700.
Explore how the archipelago of islands that make up the nations of England, Scotland, Wales, and Ireland underwent a series of dramatic transformations in the sixteenth and seventeenth centuries. Focus on politics, religious upheaval, and the beginnings of "British empire," a phrase first coined in this period.

EUS X46.55. War and Genocide: The Holocaust.
Examine the Holocaust as part of Nazi Germany's quest to build a new racial order.

EUS X46.56. Spinoza's Philosophical System.
Examine the significance of Benedict de Spinoza's philosophical system.

EUS X46.57. Trash and Treasure in Europe, 1400 - 1800.
Examine Europe in the period that witnessed the "birth" of a consumer society, the transition to fossil fuel as an energy source during the Little Ice Age, the Protestant reformation that trashed formerly treasured relics, the rise of imperial networks of global trade, and much more. Trace the circulation, use, and consumption of things from the renaissance to the consumer revolution using material culture, environmental history, and economic history.

EUS X46.7. Globalization.
A sociological analysis of the interrelated economic, political, and cultural aspects of globalization. Examines the consequences of globalization for nations around the world and for groups within these nations.

EUS X46.8. Heretics and Freedom Fighters, 1350-1650.
Explores the theologies, politics, and personal identities that emerged and passed away in this era.

EUS X46.9. Northern Lands and Cultures.
Develops geographical understanding of the Circumpolar region of the North, an ancient human habitat, home to distinct millennia-old civilizations.

EUS X46C. Vienna: Memory and the City.
Examines the ways in which cultural memory has shaped, and continues to shape, urban life in Vienna, Austria.

EUS X46D. Women and the Holocaust.
Introduction to both the history of Jewish and German women during World War II and the Holocaust, and to women's narratives and self-representations of this period. Historical sources, memoirs, films, and interviews will be used as source material.

EUS X46F. Protest, Revolt, and Revolution in West Germany.
Explores pivotal political and cultural movements in post-1945 West Germany, including the student movement, terrorism, feminism, the Green movement, and the anti-nuclear movement. Students engage with a wide array of primary and secondary sources ranging from literature and films to essays, newspaper articles, and speeches in order to examine the roots and results of protest, revolt, and revolution during this period of German history.

EUS X46M. Marx and Marxist Theory.
Introduction to the writings of Karl Marx as well as to those of his intellectual successors in Europe and around the globe in the nineteenth and twentieth centuries.

EUS X47. Topics in European Culture, Literature, Art, Music, and Media.

EUS X47.17. The Scandinavian Contribution to World Literature.
Close readings of the most influential Scandinavian texts, including works by Nobel Prize-winning authors such as Knut Hamsun and Selma Lagerlof, as well as the playwrights August Strindberg and Henrik Ibsen while addressing important themes caused by the revolutionary transition to modernity in Scandinavia around 1900, including emancipation of women and sexuality.

EUS X47.18. Medieval Women Mystics.
The life and writings of Saint Birgitta of Sweden, fourteenth-century visionary, religious reformer, and pilgrim, examined and compared with her predecessor Hildegard of Bingen (Germany), her successor Margery Kempe (England), as well as Margery's mentor, Julian of Norwich. Social and historical contexts for all four of these women mystics will be explored in depth.

EUS X47.19. Tolerance in Dutch Culture.
The historical roots of Dutch "tolerance" and how it plays a role in current Dutch culture and attitudes towards religious, gender, and sexual differences, as well as drug use, prostitution, and euthanasia. Exploration of the stereotypes and the actuality of these Dutch attitudes and policies from an international comparative perspective.

EUS X47.23. Dante.

EUS X47.24. Feminism and Film: Women Filmmakers in Northern and Central Europe.

An introduction to the work of women filmmakers from Scandinavia, Germany, as well as to the viewing and interpretation of films in general.

EUS X47.3. Introduction to Germanic Religion and Myth.

Survey of the sources and main features of Germanic religion and of the transition from paganism to Christianity in northern Europe and the Germanic territories of western Europe. Subjects include cosmogonic myths; the origin of man and of society; the concept of the soul; gods and goddesses and their mythology; and the organization of worship.

EUS X47.33. Art and the City in Renaissance Italy.

Art, architecture, and emerging civic identity in Florence, Siena, Venice, and other Italian Renaissance city-states.

EUS X47.34. Berlin.

EUS X47.40. Northern European Comics.

A study of graphic novels from Scandinavia, Germany, and Holland to understand the art form of comics and the influence of the cultures in which they were produced. Readings, all in English, cover various genres and time periods.

EUS X47.42. Viking Language: Runes and Sagas.

EUS X47.44. Women and Resistance in Contemporary Eastern Europe.

EUS X47.47. Punks and Divas in Southeast Europe.

Examine popular music and its role in political struggle and collective identity formation in the Balkans. Analyze music genres in this region in the context of the historical changes it underwent in the twentieth and twenty-first centuries, including the fall of Communism and -- in the case of former Yugoslavia -- the formation of seven new nation-states through a series of bloody and brutal wars.

EUS X47.50. Vamps, Stars, and The Diva.

Examine French and Italian films through the lens of stardom.

EUS X47.51. Italian Television Advertising.

Analysis of Italian television commercials in order to identify changes that have taken place at the level of language, with some attention to socio-cultural dynamics.

EUS X47.52. Italian Masterpieces.

Study of representative texts in visual arts, film, literature, and opera, from the Renaissance to the present, in their historical context.

EUS X47.53. Cultural Translation.

Examine theoretical readings and concrete examples of how translation politics, translation-induced reconstruction of literary systems, censorship, manipulation, and market dynamics affect the production, distribution, and reception of translated products in the realm of arts and entertainment, news media and politics, and various academic disciplines in the Middle East, United States, and beyond.

EUS X47.54. Americans in Paris.

Examine major social and political trends, events, and debates that have informed the works of artists living and working both at the margins of Parisian society as well as in its most celebrated salons. Interpret texts as artifacts that reflect the historical, social, and cultural circumstances of the environment that inspired their creation and reflect upon their role in the cultural symbiosis between America and France.

EUS X47.55. Queer Eastern Europe.

Explore LGBTQI stories and political struggles in Eastern Europe with a focus on the region's queer culture: literature, cinema, and the arts.

EUS X47.56. Radical Chic: Revolutions from Europe.

Explore innovative European ideas that reshaped United States history and society: Freud and settlement houses, models for education (from Switzerland to Dewey at the University of Chicago), and the labor movement (Marx to Eugene V. Debs and Mother Jones)

EUS X47.57. Living a Catastrophe: Chernobyl.

Examine different ways of narrating the Chernobyl disaster and general disasters through history, environmental history, sociology, art, film, fiction, and science.

EUS X47.58. Germanic and Scandinavian Modernisms, 1870-1925.

Explore the cultural renaissance between 1880 and 1925 in Northern and Central Europe, covering the period often called the Modern Breakthrough in Scandinavia, but also known as la belle epoque in France and "the gilded age" in the United States.

EUS X47.59. Germanic Novels: History, Culture, and Interpretation.

Explore several representative novels by German, Scandinavian, or Dutch writers, along with representative texts and essays on the novel as a genre and interpretative strategies. Examine these works in their literary and cultural contexts via lectures and discussions.

EUS X47.61. Literature, Culture, and Ecology in Northern and Central Europe.

Explore a variety of texts, films, and artifacts from Northern and Central Europe for the insights they provide about the interrelationships between nature and culture and strategies for developing a sustainable relationship to the world around us.

EUS X47.63. Silent Film in Germany and Scandinavia.

Explore silent film and filmmaking in Germany and Scandinavia.

EUS X47.64. Italian Resistance Mediated.

Explore Italian modes of resistance and their representations in a variety of media.

EUS X47.7. The European Novel.

Selected masterpieces of continental fiction in English translation; representative novelists of the nineteenth and twentieth centuries.

EUS X47C. Social Dramas of Henrik Ibsen.

A detailed introduction to Ibsen's social dramas (1877-1899), emphasizing their unity as a prolonged commentary on the society of his era and the variety of its human problems. Special emphasis on subjects such as: the family and the home; the public world of reputation, work, and citizenship; the predicaments of men and women in a male-dominated society; and the motives of our interventions into the lives of others.

EUS X47D. Films of Ingmar Bergman.

An introduction to the films of Ingmar Bergman.

EUS X47E. Hans Christian Andersen.

Introduction to such Hans Christian Andersen tales as "The Little Mermaid," "The Ugly Duckling," and "The Emperor's New Clothes. Examination of their author and the romantic period in which they were written, as well as their historical, philosophical, and literary context.

EUS X47F. Isak Dinesen/Karen Blixen.

An introduction to the twentieth-century Danish author Karen Blixen, focusing on her major themes such as gender and destiny, and examining her role as a literary figure.

EUS X47G. Squaring the Vienna Circle.

Traces the origin of the Vienna Circle of Logical Empiricism in nineteenth-century Europe, and introduces central texts and problems of intellectual history and historical epistemology at the roots of today's analytic philosophy.

EUS X47J. Scandinavian Cinema Since 1980.

EUS X47K. Arendt and de Beauvoir.

EUS X47M. Exhibitions and Public Spectacle.

Investigate exhibits, world's fairs, museum, monuments, theme parks, and historical reconstructions from Europe and the US, with attention to images of how their sponsoring nations or other entities want to be seen. Examine evidence for both the good and bad sides of national pride and identity. Explore examples of how large-scale culture projects and the public interact. Consider the lasting marks left on the cities and countries sponsoring them.

EUS X47N. Nordic Noir.

Uncover the dark side of the Nordic countries, from gritty streets to icy fjords, and explore the history, culture, literature, and movies these societies produce.

EUS X47O. Contemporary Scandinavian Stories.
An analysis of contemporary Scandinavian literature and films, how they reflect Scandinavian reality, and how Scandinavian identity is created through sports, food, and politics.

EUS X47Q. Vikings and Their Literature.

EUS X47R. Nobel Prizes: Literature and Politics.
An introduction to Nobel Prize winning authors from northern Europe in the context of literary prizes and the politics of literary reputation. Analyze and compare literary works, set novels into historical context, investigate what popular and scholarly reviews do, and research in both popular and scholarly sources.

EUS X48. Topics in European Economics, Government, Business, and Policy.

EUS X48.1. Governments and Politics of Eastern Europe.

EUS X48.10. Nazi Culture and Politics.
Explore fundamental questions about the unique role of culture in modern democracies and dictatorships by taking an overview of culture and politics in the Third Reich. Examine questions about the relationship between political propaganda and modern entertainment, mass media and authoritarianism, political aesthetics and ideology, and the dynamics of oppression, resistance, and consent.

EUS X48.12. Populism in Central and Eastern Europe.
Survey the political nature, profile, and patterns of populism in selected post-communist democracies of Central and Eastern Europe. Examine populism in terms of impact on agenda setting, political process, and governance of the region in focus at specific national and European Union-wide levels.

EUS X48.13. Security and Policy in Eastern Europe and Russia.
Examine key contemporary security issues and policy dilemmas through the perspective of post-communist Eastern European countries in the context of European Union (EU) enlargement waves, and in the framework of their membership in supranational organizations. Consider the transformation of regional states' national security strategies, threat perception, and priorities transitioning from former Warsaw pact to full-fledged EU and NATO membership in shaping their respective national security priorities.

EUS X48.15. Switzerland and Globalization.
Investigate how the small European country of Switzerland positions itself in a globalized world and how it competes and thrives in it. Explore the questions of how globalization impacts a small, affluent country and how its economy copes with globalization. Consider Swiss history, and its development of direct democracy, to understand Swiss exceptionalism, its response to contemporary issues, and its influence abroad.

EUS X48.16. Political Ideologies and Manifestos.
Survey major political ideologies like socialism, capitalism, and fascism; as well as the more recent so-called "Fourth Political Theory of Russian ideologue Aleksandr Dugin, (variable) popular ideologies, and internet manifestos. Explore each ideology through original texts and utopian/dystopian representations in popular culture (e.g., literature, film, music, graphic art, architecture, design).

EUS X48.18. Globalization and the Coronavirus Pandemic.
Examine the modern globalization process that also incorporates a description of the current Coronavirus pandemic as a phenomenon that is inextricably linked with modern globalization.

EUS X48.19. Intelligence and Espionage in the Eastern Bloc.
Examine the specific national approaches to foreign and domestic intelligence and espionage of former Communist bloc countries from early twentieth century to the collapse of communism in Eastern Europe.

EUS X48.2. International Trade.
Study of the principles, policies, and problems of the international exchange of goods and investments.

EUS X48.20. Elena Ferrante: Politics and Passion.

EUS X48.21. Monarchies and Mini-States.
Examine the remarkable variety among the political systems of the 28 remaining monarchies and the survival and thriving of mini-states around the world.

EUS X48.22. Eastern Europe on American TV.
Focus on ways Eastern Europe is depicted on American television screen. Use anthropological framework to study multiple types of television shows, including reality tv, network dramas, and miniseries. Analyze ethnic, racial, national, and gender representation and what these constructions tell us about the ways that Eastern Europe is imagined.

EUS X48.3. European Environmental Politics.
The history of environmental politics in both the member states of the European Union and the EU itself, including conceptual treatment of general environmental politics and policies, history of European environmentalism, and institutional responses at important 'traditional' and new EU member states. Also examines EU environmental policies themselves, such as the EU Emissions Trading System, chemicals policy, and GMO policy.

EUS X48.4. Comprehensive Notions of European Security.
Examines the conceptual and practical aspects of European comprehensive security via the institutions charged with implementing it: the European Union (EU), the North Atlantic Treaty Organization (NATO), and the Organization for Security and Cooperation in Europe (OSCE).

EUS X48.5. The European Union and Regional Integration.
Designed to provide a detailed introduction to the European Union, one of America's major economic and political partners and one of the major actors in contemporary international relations.

EUS X48.6. Hegel and the Formation of Modern European Identity.
An in-depth study of how Hegel identifies the social conditions necessary for personal self-realization but also for freedom by means of political community.

EUS X48.7. Germany and Immigration.

EUS X48.8. Sports and Politics in Germany.
Explore how fascism, communism, liberal democracy, and the current nationalistic backlash against immigration have all used the popularity of sports to achieve their strategic goals, from the 1936 Nazi Olympics to Germany's 2014 World Cup victory and beyond.

EUS X48.9. Politics of Memory: Germany and the United States.
Examine the role that narratives of the past play in politics and policies in both Germany and the United States, by engaging with key theoretical and empirical debates. Focus on the role of memory in German and US immigration politics.

EUS X50. Governments and Politics of Western Europe.
Comparative study of peoples, institutions, parties, interest groups, and bureaucracy in the countries of Western Europe, concentrating on the major political systems of Britain, France, Germany, and Italy.

EUS X56. Germany and Europe since 1945.

EUS X58Q. Supervised Research.

EUS X62. Independent Research in European Studies.
Tutorially directed research on a modern European topic.

EUS X63. Interdisciplinary Topics in European Studies.
An analysis of various aspects of European culture, science, and technology.

EUS X75. Capstone Research in European Studies.
Supervised research on a modern European topic chosen in consultation with the student's adviser and culminating in a full-length thesis.

Graduate Courses

EUS X19S. Topics in European Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for European Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EUS X29S. Topics in European Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for European Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EUS X81. Advanced Topics in European Studies.

Examination of recent developments in Europe, with emphasis on the role of the European Union in political, cultural, economic, and security matters.

Professional Courses

EUS X19S. Topics in European Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for European Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EUS X29S. Topics in European Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for European Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EVE - Environmental Engineering

Environmental Engineering: EVE

Lower-Division Courses

EVE X02. Foundations of Environmental Engineering.

Foundational principles in environmental engineering, sources of contaminants, physics and chemistry of water, air, soil, concepts and tools for assessing sustainability.

EVE X03. First-Year Seminar.

Introduction to the field of environmental engineering. Explore future opportunities for careers and research in environmental engineering.

EVE X07K. Topics in Environmental Engineering.

EVE X10. Sustainable Systems Engineering.

Integration and optimization of engineering systems for water treatment, water reuse, and energy production processes given technical, economic, and environmental constraints.

EVE X12. Environmental Engineering and Science.

Quantitative evaluations of environmental processes including mass and energy balances, mass and heat transfer, chemical kinetics, water quality modeling, water treatment, indoor and outdoor air quality, and risk analyses.

EVE X19S. Topics in Environmental Engineering.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

EVE X29S. Topics in Environmental Engineering.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Civil, Architectural and Environmental Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EVE X50. Environmental Chemistry for a Sustainable World.

Application of chemical concepts to understand the fate of contaminants in natural and engineered systems. Focus on the use of analytical and graphical tools for solving chemical equilibrium and kinetic problems.

EVE X60. Design for Air Quality Improvement.

Analysis, synthesis, and integrated design of air pollution control systems for improvements in outdoor and indoor air quality. Design for reduction of high impact pollutants of local, regional and global significance with consideration of human inhalation exposure and climate impacts.

EVE X69N. Novel Air Quality Measurement Techniques.

Explore technological advancements in measurements of indoor and outdoor air quality. Discuss operation principles of novel real-time trace-gas sensors and mass spectrometers. Examine air quality measurements at different spatiotemporal scales, utilizing analytical instrumentation, data acquisition, and data processing. Explore research questions in air quality through hands-on laboratory and field measurements.

EVE X69Q. Air Quality, Aerosols, and Health.

Explore physicochemical processes governing indoor and outdoor air quality, human exposure to gas-phase and particle-phase pollutants, and factors affecting human health. Examine the connection between air quality, regulatory perspectives, engineering solutions and acute and chronic environmental issues impacting human exposure. Discuss research questions through efficient data retrieval and run simple dispersion models.

EVE X70. Design for Environmental Community Improvement.

Application of engineering to a project that addresses a local, national or international community or design challenge. Problem statement, project objectives, stakeholder input, technical problem solving, environmental, social and economic assessment is performed collaboratively within a multidisciplinary team to develop a final design for a comprehensive service-learning project.

EVE X77K. Topics in Environmental Engineering.

Various specified topics or conference course.

EVE X77K.7. Independent Study.

Conduct independent research with a tenure track faculty member in the Fariborz Maseeh Department of Civil, Architectural, and Environmental Engineering. Prepare a project proposal and a final report, each of which is evaluated by the faculty supervisor.

EVE X77R. Internship.

Graduate Courses

Professional Courses

EVS - Environmental Science

Environmental Science: EVS

Lower-Division Courses

EVS X01. Introduction to Environmental Science.

Introduction to the field of environmental science, with a focus on the contributions from the three disciplinary areas of the biology, geography, and geological sciences. Examine historical and current perspectives as well as problems in environmental science including climate and climate change, the science of sustainability, ecosystem stability and change,

pollution, water resources, and environmental ethics. Discuss what it means to be an environmental professional.

EVS X11. Field Seminar in Sustainability.
Introduction to field observation and analysis of environmental processes and sustainability issues. Discuss ecology, hydrogeology, climate science, energy, and sustainability.

EVS X19S. Topics in Environmental Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Earth and Planetary Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

EVS X21. Research Methods.
Overview of the methods involved in research projects designed to help prepare students in independent research projects or internships.

EVS X29S. Topics in Environmental Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Earth and Planetary Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

EVS X31. Research Methods for the Environmental Sciences.
Subjects include experimental design, statistical analysis and modeling, and ethics. Students develop and conduct an independent research project during the laboratory portion of the course.

EVS X41. Environmental Science Professionalism I.
Examines the fundamental, nontechnical aspects of environmental science and sustainability practices through the use of case studies and projects that use interdisciplinary approaches. Subjects may include the importance of interdisciplinary collaboration in addressing and assessing environmental science processes, the development of professional opportunities across disciplines, understanding professional responsibilities, applying ethical principles, the balance of multidisciplinary demands in professional practice, and the need for lifelong learning.

EVS X51. Environmental Science Professionalism II.
Examines the fundamental, nontechnical aspects of environmental science and sustainability practices. Focuses on the use of interdisciplinary communication for addressing and assessing environmental science processes, the challenges posed by communicating across disciplines, the development of professional communication and public speaking skills, effective presentation of research, the ethics and practices of peer research review, and effective communication of the effects of environmental science in a global society.

EVS X71. Topics in Research Experience.
Supervised study of selected topics in environmental science by individual arrangement with the instructor.

EVS X72C. Senior Research Proposal in Environmental Science.
Work towards an understanding of the broader literature on a topic, identify hypothesis of interest, design an experiment to test the hypothesis, develop a budget, and write a research proposal.

EVS X72D. Senior Research in Environmental Science.
Continuation of Environmental Science 172C, 272C, 373C, or 472C. Perform proposed experiment, collect and analyze data, present results, and write a final report.

Graduate Courses

Professional Courses

F A - Fine Arts

Fine Arts: F A

Lower-Division Courses

F A X01F. Steer Your Future in the Arts.
Use design thinking principles to explore personal values, interests, and professional paths.

F A X03. Introduction to Teaching Fine Arts.
Explores concepts in teaching art, dance, music, or theatre in Texas public schools.

F A X05. Fine Arts Success Seminar.
Designed for first-year College of Fine Arts undergraduates. Explore college success and personal and professional growth in a creative context.

F A X05C. Success Seminar.
Build community and get an in-depth student support experience via academic support, community building, professional development, and general student advocacy related subjects.

F A X06. Career Development in the Arts.
Examine career exploration, professional documents (resumes and cover letters), networking, job and internship search, and career attainment. Create a career plan and perform specific assignments exploring career possibilities that are congruent with personal values, interests, personality, and skills.

F A X06D. Career and Life Development in the Arts.
Create a career plan and perform specific assignments that explore career possibilities that are congruent with personal values, interests, personality, and skills.

F A X07. Creative Leaders Seminar I.
Designed for first-year College of Fine Arts undergraduates. Introduction to college success and personal and professional growth in a creative context.

F A X08. Arts Integrations for Multidisciplinary Connections.
Through readings, videos, in-class activities, discussion, field trips, micro-teaching, and written reflection, designed to develop a practical understanding of the techniques and skills associated with integrating the arts into various contexts. Provides experience in each art content area (dance, music, theatre arts, and visual arts) to develop an introductory understanding of each of these disciplines.

F A X09. Creative Leaders Seminar II.
Designed for first-year College of Fine Arts undergraduates. Explore college success and personal and professional growth in a creative context.

F A X10. Topics in the Fine Arts.
Interdisciplinary studies within the fine arts or including the fine arts and other areas.

F A X13C. Engaging with the Arts from the Audience.
An introduction to gaining more from engaging with live artistic performance through learning new tools and techniques, meeting artists and attending performances from Texas Performing Arts.

F A X15. Creative Entrepreneurship.
Explore the integration of entrepreneurship in industry and the creative process of starting new ventures.

F A X19. Topics in International Learning Seminars.
Discussion of various issues related to the academic, cultural, and personal aspects of completing work in international locations.

F A X19S. Topics in Fine Arts.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Fine Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

F A X75. Independent Studies: Art, Drama, or Music.
Independent study or research within the fine arts or between the fine arts and other disciplines.

Upper-Division Courses

F A X20. Exploring the Fine Arts.
An interdisciplinary introduction to the fine arts: their basic concepts, meaning, aesthetics, and role in society.

F A X25. Career Development in the Arts.
Examine career planning, professional documents (resumes and cover letters), networking, job and internship search, and career attainment.

F A X29. Topics in International Learning Seminars.
Discussion of various issues related to the academic, cultural, and personal aspects of completing work in international locations.

F A X29S. Topics in Fine Arts.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Fine Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

F A X40. Fine Arts Internship.
Designed to establish the academic foundations of an internship in the fine arts. Integrate knowledge derived from academic studies with the experience gained in an internship setting.

F A X45. Leadership and Urban Engagement.
Explore leadership skills and goals in the urban context. Read and discuss leadership challenges that arise when stakeholders come together to plan, make decisions, and take action in organizational and community settings.

F A X46. Inside the Arts of New York City.
Explore art practice and scholarship as defined and shaped by the city itself. Visit major art institutions - both historic and those considered more experimental. Learn from guest speakers, including practicing artists and art scholars.

F A X50. Special Topics in the Fine Arts.
Special interdisciplinary studies within the fine arts or including the fine arts and other areas.

F A X50.1. Managing Performing Arts Organizations.
Focuses on the business aspect of performing arts and, in particular, nonprofit, mission-based arts organizations with an emphasis on organizational structure; budget development and management; strategic planning; trustee development; trustee/staff relations; fundraising; marketing and publicity; audience development, development of outreach programming; box-office management; operations and human resources; and collective bargaining agreements/labor relations, and contract negotiation.

F A X55. Women in Entrepreneurship.
Explore the unique perspective of the female entrepreneur's journey in contemporary society with a parallel examination of gender dynamics and diversity in the entrepreneurial sphere. Examine the process of creating and launching a new venture with female mentors and speakers.

F A X60. Advanced Topics in the Fine Arts.
Advanced interdisciplinary studies within the fine arts or including the fine arts and other areas.

F A X62. Foundations of Arts Management.
Overview of issues in the management of contemporary arts organizations in both internal functions and relations with external constituencies. Explores organizational creation, leadership, mission development, funding, audience development, evaluation, community relations, and the policy environment.

F A X63. Arts Entrepreneurship and New Venture Creation.
Introduction to arts entrepreneurship with particular attention to the creation of new ventures. Focus on the process of generating and refining ideas for creating new enterprises, and key components and formulation of a business plan.

F A X64. Developing and Reaching Audiences.
Focus on central issues faced by arts and organizations with respect to audience development and engagement. Explores different models and techniques adopted by organizations with respect to audience and community engagement, and fundamentals of marketing for arts organizations.

F A X65. Fundraising in the Arts.
Survey of strategies involved in generating contributed income for arts organizations from private individuals, foundations, corporations, businesses and government agencies, and focus on how the process is related to marketing tickets to the same patrons.

F A X66. Managing Arts Organizations.
Focuses on the business aspect of managing arts with emphasis on non-profit, mission-based, performing, and visual arts organizations. Explores organizational structure and development, budget development and management, strategic planning, trustee development, trustee/staff relations, fundraising, marketing and publicity, audience development, development of community engagement programming, ticketing and admission management, operations, human resources, collective bargaining/labor relations, and contract negotiation.

F A X67. Philanthropy and Arts Organizations.
Examines sources, characteristics, and consequences of cultural philanthropy in the United States. Explores practical implications of how private philanthropy works for those engaged in seeking and awarding support. Focus on select exercises and cases to translate broad themes to practical issues related to formulating and implementing strategies for seeking resources and supporting arts and culture.

F A X68. Cultural Policy and Participation.
Examines governmental and private policies, and structures that impact cultural production and participation. Considers rationales for and against public support for culture, how policies have both promoted and impeded cultural producers and consumers, advocacy efforts by organizations in the cultural sector, and relations between governmental policy and private initiative.

F A X70. Longhorn Startup Seminar.
Focus on skill development and mentoring in start-up formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Includes discussion of intellectual property, social issues in design, as well as ethical and safety considerations. Emphasis on written and oral presentation of start-up activities.

F A X71. Special Topics in Arts Management and Administration.
Focused and in-depth study of selected topics in the management and administration of artistic ventures in the commercial, not-for-profit, and/or public sectors.

F A X71.1. Subjects in Arts Management.
Focused and in-depth study of selected subjects in the management of artistic ventures in the commercial, not-for-profit, and/or public sectors.

F A X71.2. Subjects in Arts Administration.
Focused and in-depth study of selected subjects in the administration of artistic ventures in the commercial, not-for-profit, and/or public sectors.

F A X71C. Offensive and Controversial Art.
Examine cases of offensive and controversial art to understand and categorize the motives behind and causes of offense.

F A X75. Independent Studies: Art, Drama, or Music.
Independent study or research within the fine arts or between the fine arts and other disciplines.

Graduate Courses

F A X75. Independent Studies: Art, Drama, or Music.
Independent study or research within the fine arts or between the fine arts and other disciplines.

F A X81. Topics in The Arts.
Topics within the fine arts, or including the fine arts and other areas.

F A X82. Independent Studies: Art, Drama, or Music.
Study or research in art, drama, or music, or among these areas, or between these areas and other disciplines.

F A X83. Foundations of Arts Management.
Overview of issues in the management of contemporary arts organizations in both internal functions and relations with external constituencies. Explores organizational creation, leadership, mission development, funding, audience development, evaluation, community relations, and the policy environment.

F A X84. Graduate Fine Arts Internship.
Designed to establish the academic foundations of an internship course in the fine arts. Integration of knowledge derived from academic studies will combine with the experiences gained in an internship setting. Requires completion of a minimum of fifty hours of satisfactory on-site work per credit hour earned.

F A X85. Fundraising in the Arts.
Survey of strategies involved in generating contributed income for arts organizations from private individuals, foundations, corporations, businesses and government agencies, and focus on how the process is related to marketing tickets to the same patrons.

F A X86. Managing Arts Organizations.
Focuses on the business aspect of managing arts with emphasis on non-profit, mission-based, performing, and visual arts organizations. Explores organizational structure and development, budget development and management, strategic planning, trustee development, trustee/staff relations, fundraising, marketing and publicity, audience development, development of community engagement programming, ticketing and admission management, operations, human resources, collective bargaining/labor relations, and contract negotiation.

F A X87. Philanthropy and Arts Organizations.
Examines sources, characteristics, and consequences of cultural philanthropy in the United States. Explores practical implications of how private philanthropy works for those engaged in seeking and awarding support. Focus on select exercises and cases to translate broad themes to practical issues related to formulating and implementing strategies for seeking resources and supporting arts and culture.

F A X88. Cultural Policy and Participation.
Examines governmental and private policies, and structures that impact cultural production and participation. Considers rationales for and against public support for culture, how policies have both promoted and impeded cultural producers and consumers, advocacy efforts by organizations in the cultural sector, and relations between governmental policy and private initiative.

Professional Courses

F A X75. Independent Studies: Art, Drama, or Music.
Independent study or research within the fine arts or between the fine arts and other disciplines.

F C - French Civilization

French Civilization: F C

Lower-Division Courses

F C X19S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated study program.

F C X29S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

F C X19S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated study program.

F C X20. The French Heritage.
Introduction to French civilization: architecture, painting, music, and social and political history. Given in English; requires no knowledge of French.

F C X29S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

F C X36. Vamps, Stars, and The Diva.
Examine French and Italian films through the lens of stardom.

F C X39. The Development of the French Film.
Films in French, with subtitles in English; lectures in English.

F C X40D. France in the Dark Years.
Explore the Nazi occupation of France and Vichy's collaboration. Consider the devastating fall of the French Republic, the organization of Vichy France, Vichy's complicity in the Holocaust, the ethical complexities of collaboration and resistance, and the ramifications of World War II for the French empire.

F C X40M. Continuity and Change in Modern France.
Focuses on various social, political, and cultural crises in France from the revolution of 1789 to the present time.

F C X41. Topics in French Studies.

F C X41F. Arab Francophonie.
Explore French-language cultural production by authors of Arab origin in France and across France's former colonial and mandate territories. Examine the fraught relationship many of these authors have with French language, literature, and culture, in dialogue with postcolonial theory.

F C X41P. Americans in Paris.
Examine major social and political trends, events, and debates that have informed the works of artists living and working both at the margins of Parisian society as well as in its most celebrated salons. Interpret texts as artifacts that reflect the historical, social, and cultural circumstances of the environment that inspired their creation and reflect upon their role in the cultural symbiosis between America and France.

F C X42. French Through Coding.

F C X44. Black Slavery in the Atlantic.
Examine the history of slavery in the Atlantic from 1450 to 1865.

Graduate Courses

F C X19S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated study program.

F C X29S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Professional Courses

F C X19S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated study program.

F C X29S. Topics in French Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FIN - Finance

Finance: FIN

Lower-Division Courses

FIN X19S. Topics in Finance.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

FIN X20F. Foundations of Finance.
Principles of effective financial management, including planning, organization, and control; financial intermediaries; securities markets; evaluating alternative assets, debt, and capital structures.

FIN X21K. Intermediate Microeconomics for Business.
Explore microeconomic analysis of consumer theory, producer theory, decision-making under uncertainty, and market equilibrium. Examine game theory, monopoly and oligopoly behavior, and the principal-agent problem. Consider the application of these ideas to decisions made by business leaders in real-world settings.

FIN X22F. Foundations of Personal Finance.
Explore an overview from the individual and family perspectives of financial planning tools, cash management, consumer credit, and basic tax preparation, insurance selection, investment and retirement planning. Includes application of knowledge to hypothetical situations and case studies.

FIN X29S. Topics in Finance.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FIN X32F. Topics in Foundations of Finance.

FIN X34M. Current Issues in Global Sustainability.
Through discussions and guest speakers, explore the most recent issues in the everchanging landscape of sustainability.

FIN X37P. Investment Banking Practicum.
Examine investment banking with emphasis on mergers and acquisitions. Work in cross-level, team-based roles that simulate industry structures to develop and present a comprehensive investment banking pitch book for a live client. Discuss company, market, and industry analysis; strategic assessment; valuation and leveraged buyout modeling; and M&A strategy development. Explore collaboration with alumni practitioners and cross-disciplinary partners to integrate industry-specific research into client recommendations.

FIN X37T. Special Topics in Finance.

FIN X37T.1. Valuing Natural Resources.
Apply economic analysis to sedimentary basin analysis to create exploration and development scenarios. Investigate first principles of sedimentation, stratigraphy, and basin formation as the drivers of economic accumulations of petroleum in many different types of environments of deposition and basins globally including conventional and unconventional petroleum resources. Examine mining, minerals, and other exhaustible resources.

FIN X37T.12. Global Business Sustainability.
Explore the role of sustainability in the corporate sector. Examine how businesses partner with others for sustainability goals, how to value sustainable business practices, and how to report on corporate sustainability.

FIN X37T.2. Energy Finance.
Apply economic and financial analysis to energy projects and firms. Examine discounted cashflow, multiples valuation, NAV analysis, decision and risk analysis, real options, energy economics and risk management.

FIN X37T.4. Electricity Systems and Markets.
Analyze energy and power systems in regulated and competitive environments and implications on business decisions for firms in these industries. Examine mechanisms of energy markets; comparative market systems; determination of prices under different market structures; gas, oil, coal, and electricity market architecture; electricity market design; dispatch and new build decisions; smart grid and renewable energy in electricity markets; risk and risk management in energy including demand and price volatility and use of financial derivatives; and the impact of financial market trends and current and proposed policies on the energy industry.

FIN X40S. Topics in Finance.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

FIN X57. Business Finance.
Principles of finance, with application to all aspects of the business firm; particular attention to cost of capital, investment decisions, management of assets, and procurement of funds.

FIN X57H. Business Finance: Honors.
An investigation of the principles of finance, with application to all aspects of the business firm; particular attention to cost of capital, investment decisions, management of assets, and procurement of funds.

FIN X64P. Global Sustainability Practicum.
Apply concepts and tools learned in other courses to practical projects solving sustainability challenges for companies or nonprofits.

FIN X65P. Energy Finance Practicum.
Students apply skills in the energy industry and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

FIN X66P. Finance Practicum.
Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

FIN X67. Investment Management.
Investment theory, alternatives, and decision making under differing uncertainties and constraints; formulation of objectives and strategies; development of conceptual managerial perspectives and philosophies for investment environments.

FIN X70. Integrative Finance.
Integrates financial decision making in functional areas of finance; utilizes various concepts to promulgate strategies, policies, and procedures in managing funds to achieve objectives.

FIN X70H. Integrative Finance: Honors.
Integrates financial decision making in functional areas of finance; utilizes various concepts to promulgate strategies, policies, and procedures in managing funds to achieve objectives.

FIN X71M. Money and Capital Markets.
Development of modern financial markets, with emphasis on the factors that determine interest rates; institutional characteristics and pricing mechanisms of various interest-sensitive securities.

FIN X71T. Topics in Finance.

FIN X72T. Topics in Finance.

FIN X72T.1. Sustainable Finance Investing.
Assess the actions of investors and corporations with regard to environmental, social, and governance policies, including the potential motivations and resulting consequences.

FIN X72T.10. Economic Principles of Managerial Decisions.
Use of economic concepts and models to make strategic business decisions (adverse selection, game theory, price discrimination, strategic commitment, barriers to entry, network effects). Economics of strategic responses to the legal environment (regulations, antitrust policies, intellectual property, fiduciary duty, liability).

FIN X72T.11. Financial Planning for Wealth Management.
Introduction to basic concepts of personal wealth management and financial planning, including insurance and risk management, investment management, tax planning, estate planning, and retirement planning. Designed for upper-level finance and accounting majors interested in a career in financial services or students pursuing master in professional accounting with interest in this area of the accounting profession.

FIN X72T.14. Quantitative Investment Management.
Examine the economic, statistical, and computing frameworks behind quantitative approaches to evaluating and implementing investment strategies, as well as the empirical evidence on their performance in multiple asset classes. Apply the quantitative big-data approach by developing, pitching, and backtesting an original trading strategy.

FIN X72T.15. Financial Technology.
Explore an overview of the most recent technological advances that are changing the financial services industry and how these technological breakthroughs offer new ways for people to save, invest, borrow, and transact. Analyze how new technologies create value in the financial industry, from reducing unit cost, increasing transparency, increasing competition, creating network effects, leveraging economies of scales, and lowering asymmetric information. Examine the competitive landscape and the market opportunities and threats for incumbents and new entrants.

FIN X72T.16. Optimization Method in Finance.
Explore quantitative methods and techniques in optimization and simulation, and their use in financial decision making. Discuss theory and application in portfolio selection, options and other derivative pricing, index tracking, risk measures, volatility estimating. Examine linear, quadratic, nonlinear, and integer programming; dynamic programming; robust optimization; Monte Carlo methods and variance reduction techniques. Emphasis will be placed on problem solving with advanced computational programming languages.

FIN X72T.2. Valuation of Energy Investment.
Explore the evaluation and financing of energy investments with a focus on upstream oil and gas projects. Develop financial modeling skills from detailed discounted cash flow models to advanced option pricing models using various computational approaches.

FIN X72T.3. Sustainable Finance.
Focuses on using a financial economics perspective to understand how sustainability issues are considered by corporate managers, investors, and other participants in financial markets. Examine how environmental, social, governance, strategy and other issues affect manager and investor decisions from financial perspectives, particularly the risk and return aspects, including how to measure sustainability risk exposures. Discuss how these issues are considered from a nonfinancial perspective such as sustainable and responsible investing, ethical investing and impact investing.

FIN X73. Research Topics in Finance.

FIN X73.1. Advanced Studies in International Finance.
Students work in small research groups to write academic papers on topics in international finance and business. Designed to develop critical thinking skills, writing skills, sophisticated use of technology, and experience working across different cultures.

FIN X74C. Valuation.
An in-depth study of theory and practice of corporate financial management in establishing major financial and investment policies; techniques for analysis, evaluation, and control.

FIN X74S. Entrepreneurial Finance.
Development, implementation, and control of financial plans, strategies, and policies by owner-managers of small and medium-sized firms; analysis of alternatives and decision making.

FIN X76. International Finance.
Explore the international financial environment, with emphasis on the factors affecting exchange rates and how exchange rate changes affect the firm.

FIN X77. Advanced Topics in Investment Analysis.
Second course in investments, with emphasis on quantitative applications and the underlying theory in the analysis and management of securities and portfolios.

FIN X77.1. Portfolio Analysis and Management.
Explore quantitative applications and the underlying theory in the analysis and management of securities and portfolios. Designed for students with career goals in investment.

FIN X77.2. Financial Risk Management.

FIN X77.3. Security Analysis.

FIN X77.4. Financial Analysis.
Application of fundamental analysis and valuation techniques.

FIN X77.5. Energy Financial Risk Management.

FIN X77.6. Fixed Income Analysis.
Explore the role of fixed income securities, and methods of economic and financial analysis relevant to their markets.

FIN X77.7. Security Market Policy.
Analyze current developments in financial market innovation and regulation to understand their effects on capital creation, investor welfare, market efficiency, and financial stability. Explore new financial products, securities fraud and misconduct, shadow banking, technological disruptions, market failures, systemic risk, and policy trade-offs in securities markets regulation.

FIN X79C. Independent Research in Finance.

Graduate Courses

FIN X81F. Financial Technology for Executives.
Analyze the effect technology has on the delivery of financial services and products in the areas of lending, clearing and trading.

FIN X84F. Advanced Corporate Finance and Investment Theory.
Explore valuation theory, corporate finance theory, asset management, applied valuation and capital markets, and empirical finance. Examine theory, practice, and institutional applications.

FIN X85F. Analytic Finance and Machine Learning.
Utilize traditional financial datasets (e.g., financial statements, ratio analysis, credit and fixed income information, stock returns) from a variety of data sources and platforms, including WRDS/Compustat/CRSP, Bloomberg, and Compustat. Explore more advanced techniques designed to yield insights from alternative and unstructured datasets (e.g., text and sentiment analysis of earnings conference calls; SEC filings like 10K's, 10Q's, and 8-Ks; message and discussion boards; marketing/customer feedback; and other big data sources).

FIN X86. Valuation I.
Study of subjects such as financial modeling, derivatives in corporate finance, business valuation, and value-based management.

FIN X86C. Valuation for Executives.
Explore debt and equity valuation, financial markets, firms' cost of capital, and capital structure decisions in greater detail.

FIN X90. Topics in Seminar: Money and Capital Markets.

FIN X90.1. Financial Markets and Institutions.
How financial markets are organized and function. Includes debt equity and foreign exchange markets, primary and secondary market operations, and investment banking.

FIN X90.2. Special Topics in Capital Markets and Financial Institutions.
Study of issues and topics in the capital markets and financial institutions that are not covered in other courses.

FIN X91S. Independent Study.

FIN X94. Topics in Seminar: Financial Management and Theory.

FIN X94.1. Advanced Corporate Finance.
Advanced corporate financial management in the global marketplace: valuation concepts, optimal capital structure, risk management, corporate control and restructuring, and mergers and acquisitions.

FIN X94.10. New Venture Finance.
Explore the process to building a new venture from idea to liquidation event from the perspectives of both the founders as well as sophisticated venture investors. Develop a common financial framework to parse financial instruments through which we can demonstrate the salient points of a new venture's value proposition to its stakeholders. Use this framework to scale the model to express managerial controls, confidence, and ultimately the core values such that the founding team could reasonably expect to raise sophisticated capital.

FIN X94.11. Private Equity.
An examination of the application of advanced corporate finance concepts in the private equity markets.

FIN X94.12. Energy Development and Corporate Strategies.
Introduction to the legal, engineering, business, and financial aspects of energy development and operations.

FIN X94.13. Valuation of Energy Investments.
Covers the theory and practice of the evaluation and financing of energy investments with a focus on application to upstream oil and gas projects. Develop financial modeling skills, from detailed discounted cash flow models to advanced option pricing models utilizing a variety of computational approaches.

FIN X94.14. Venture Capital Fellows Program.

FIN X94.15. Energy Finance Practicum.

FIN X94.16. Corporate Finance and Financial Markets.

FIN X94.17. Advanced Valuation and Financial Modeling.
Construction and use of financial models for valuation and decision-making.

FIN X94.18. Corporate Finance Fellows I.

FIN X94.19. Economic Principles of Managerial Decisions.
Study of how economic principles are used to think strategically about business decisions.

FIN X94.2. Financial Strategies.
An integrated analysis of the interaction between the investment and operating policies of a corporation and its financial strategies.

FIN X94.20. Corporate Finance Fellows II.

FIN X94.21. Advanced Valuation Techniques for Consulting.
Examine financial reporting, the application of various valuation techniques (to measure the fair value of intangible assets), contingent consideration, valuation of synergy, the impact of geography on value, and the effect of environmental, social, and governance (ESG) policies on company valuations.

FIN X94.22. Introduction to Financial Analytics.

FIN X94.23. Financial Modeling and Testing.

FIN X94.24. Valuation II.
Discuss financial modeling, derivatives in corporate finance, business valuation, and value-based management.

FIN X94.26. Mergers and Acquisitions.

FIN X94.27. Investment Banking Practicum.
Participate in the investment banking practicum. Develop a team-based pitch book and mergers and acquisitions idea through project and speaker series. Discuss discounted cash flow, comparable, and leveraged buyouts and mergers and acquisitions analyses.

FIN X94.3. Global Finance.

FIN X94.4. Financial Management of Small Business.

FIN X94.5. Financial Technology.
Analyzes the effect technology has on the delivery of financial services and products in the areas of lending, clearing and trading.

FIN X94.6. Special Topics in Corporate Finance.

FIN X94.7. Raising Capital.
An analysis of the decision to raise capital, including sources of debt and equity, financial distress, restructuring, and financing acquisitions.

FIN X94.8. Financial Strategies for Energy Firms.
An integrated analysis of the interaction between the investment and operating policies of a corporation and its financial strategies, with special emphasis on firms in the energy industry.

FIN X94.9. Advanced Valuation and Financial Modeling for Energy Firms.
Construction and use of financial models for valuation and decision-making, with applications to the energy industry.

FIN X94P. Private Equity for Executives.
Examine the application of advanced corporate finance concepts in the private equity markets.

FIN X95. Topics in Finance Doctoral Seminar.

FIN X95.1. Fundamentals of Financial Theory.
An overview of finance theory and empirical evidence.

FIN X95.10. Empirical Methods in Corporate Finance.
In-depth study of existing empirical work in corporate finance, including econometric and statistical methods.

FIN X95.11. Economics of Information.
Learn about static and dynamic problems with moral hazard and adverse selection using tools from game theory and contract theory.

FIN X95.2. Uncertainty in Economics and Finance.
The notions of risk, risk aversion, prudence, arbitrage, and equilibria in economies that include financial markets. The impact of adverse selection and moral hazard problems on the existence and properties of market equilibria.

FIN X95.3. Asset Pricing Theory.
Detailed introduction to asset pricing theory, focusing on absence of arbitrage, consumption-portfolio choice, and simple equilibrium models.

FIN X95.4. Empirical Methods in Asset Pricing.
In-depth study of existing empirical work in asset pricing, including econometric and statistical methods.

FIN X95.5. Corporate Finance.
Analysis of the theory of corporate finance and empirical evidence regarding corporate finance.
FIN X95.6. Current Research Topics in Finance.
FIN X95.7. Summer Research Topics.
Provides an opportunity for students to develop and conduct original research projects.
FIN X95.8. Special Topics in Finance Theory.
FIN X95.9. Applied Finance Research.
Provides an opportunity for students to develop and conduct original research.
FIN X97. Topics in Seminar: Investment Theory and Management.
FIN X97.1. Investment Theory and Practice.
Analysis of the investment decision-making process, asset allocation, security analysis, risk and expected return measurement, asset-pricing models, and international investment.
FIN X97.10. Environmental, Social, and Governance Investing.
A critical assessment of the actions of investors and corporations with regard to environmental, social, and governance policies, including the potential motivations and resulting consequences.
FIN X97.11. Quantitative Trading Strategies.
Examine statistical analyses that can be used in a variety of application areas, including energy trading, and provide a cutting edge perspective on technical trading and valuation.
FIN X97.12. Investment Management.
Explore investment principles, encompassing portfolio management, asset valuation, and performance evaluation. Learn critical financial skills to make investment-related decisions. Analyze equity, fixed-income securities, and derivatives within the global financial landscape using a combination of theory and practice.
FIN X97.13. Investments and Energy Finance.
Focus on energy-related derivatives and different derivative products and how to apply them. Explore energy markets and learn how to measure and manage the financial risks created by volatile energy prices. Examine and evaluate energy finance.
FIN X97.14. Sustainable Finance.
Focus on financial economics perspective to understand sustainability issues considered by managers, investors and participants in financial markets. Learn environmental, social, governance, strategy and other issues that affect manager and investor decisions from financial perspectives, particularly risk return aspects and measure sustainability risk exposures. Discuss how these issues are considered from a nonfinancial perspective such as sustainable and responsible investing, ethical investing and impact investing.
FIN X97.15. Artificial Intelligence-Powered Fund Management.
Learn to use Artificial Intelligence tools to analyze and visualize data, financial statements, portfolios, and trading strategies.
FIN X97.16. Titans of Investing.
Examine wisdom versus technical competence in leadership and decision making using readings from the most influential theorists and practitioners of 20th and 21st century investing, case studies and portfolio sector exercises in an institutional context, based on detailed assessment of global investment risks.
FIN X97.17. Behavior, Game Theory, and Team Management.
Explore how business leaders and managers can optimize the quality of decision-making and the cohesiveness of their organization. Analyze the problems through the lens of game theory, behavioral economics, and behavioral finance and find solutions to address them.
FIN X97.2. Portfolio Management and Security Analysis.
Modern practices in managing investment portfolios, portfolio optimization methods, asset management for individual and institutional investors, and valuation of equity securities.
FIN X97.4. Financial Risk Management.
Studies how firms manage their financial risk exposures and how they use derivative securities.
FIN X97.5. Fixed Income Analysis.
Comprehensive analysis of debt securities and the techniques used to value these instruments.
FIN X97.6. Special Topics in Investments.
Issues and topics in the investment area that are not covered in other courses.
FIN X97.7. Derivative Securities.
Analysis and pricing of derivative securities, including forwards, futures, and options.
FIN X97.8. Energy Derivatives.
Analysis and pricing of derivative securities, including forwards, futures, and options, with emphasis on derivatives related to the energy industry.
FIN X97.9. Alternative Investments.
Overview of alternative investments, including hedge funds, private equity, and real estate.
FIN X97P. Investments Practicum.
Project-based study with a focus on the application of finance principles to practical investment problems.
FIN X98. Thesis.
FIN X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
FIN X99W. Dissertation.

Professional Courses

FR - French

French: FR

Lower-Division Courses

FR X01. French for Graduate Students in Other Departments.
Intensive reading course for graduate students, emphasizing basic grammar and vocabulary with translation practice.
FR X01C. Beginning French.
An intensive beginning course with an emphasis on basic skills: listening, speaking, reading, and writing.
FR X04. Accelerated First-Year French.
Designed for students of high motivation. A six-hour course comparable to French 506 and 507.
FR X06. Introductory French I.
Emphasis on basic skills: listening, speaking, reading, and writing at the novice level of proficiency. Designed for students with no prior coursework in French.
FR X07. Introductory French II.
Emphasis on basic skills: listening, speaking, reading, and writing at the novice to intermediate levels of proficiency. Designed novice level proficiency and prior French coursework.
FR X08K. Alternate First-Year French II.
An accelerated review of material covered in French 506, followed by study of new material covered in French 507.
FR X11C. Intermediate French.
An intensive intermediate course with emphasis on basic skills: listening, speaking, reading, and writing. Does not meet the prerequisite requirements for French 320E or 324L.
FR X12. Accelerated Second-Year French: Four Skills.
Designed for students of high motivation. A six-hour course comparable to French 312K and 312L combined.
FR X12K. Intermediate French I.
Emphasis on basic skills: listening, speaking, reading, and writing at the Intermediate level of proficiency. Designed for students with Novice level proficiency and a prior beginning French course.

FR X12L. Second-Year French II: Four Skills.
Listening, speaking, reading, and writing at the advanced, second-year level.

FR X17C. Enhancing French Skills.
Listening, speaking, reading, and writing course designed to provide additional preparation for upper-division French courses.

FR X18L. Practice in Spoken French.
Designed to be taken concurrently with French 317C.

FR X19S. Topics in French.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FR X29S. Topics in French.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FR X80R. Reference Works and Research Methodologies.

Upper-Division Courses

FR X19S. Topics in French.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FR X20E. Advanced French I.
Designed to develop the listening, speaking, reading, and writing skills needed for the analysis of literary and cultural readings in the French-speaking world.

FR X20M. Advanced Practice in Spoken French I.

FR X20N. Advanced Practice in Spoken French II.

FR X22E. Advanced French II.
Continuation of French 320E. Designed to develop the listening, speaking, reading, and writing skills needed to analyze literary and cultural readings in the French-speaking world.

FR X24L. Practical Phonetics.
A thorough review of French phonetics, with emphasis on improving production and understanding of spoken French.

FR X25C. Crisis and Conflict.
Focus on reading and interpreting texts dealing with historical and social conflicts as manifested in moments of crisis in French or francophone history.

FR X25D. Self and Society.
Focus on reading and interpreting texts involving confrontations between the narrative "I" and representations of various social groups.

FR X25E. Representing Difference.
Focus on reading and interpreting texts involving representation of difference (gender, religious, cultural, political, economic, social).

FR X27C. French through Cuisine.
A refinement of reading, writing, speaking, and listening skills in French through the context of gastronomy.

FR X28C. French through Film.
A refinement of reading, writing, speaking, and listening skills in French through the context of French and francophone cinema.

FR X29C. French through Music.
A refinement of reading, writing, speaking, and listening skills in French through the context of French and francophone music.

FR X29S. Topics in French.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FR X30D. French across Disciplines.
Students read and discuss French language materials related to the subject matter of another designated course.

FR X30J. The Joy of French.
Engage with special features of the French language that make it fascinating and fun. Build upon this foundation of enjoyment to enhance French speaking, reading, writing, and cultural proficiencies, and utilize new techniques for analyzing French in film, music, and literary texts.

FR X30K. Topics in French Language and Cultures.
Topics with a focus on language or culture.

FR X30K.2. French Cuisine.
Study of the language of French gastronomy through readings, literature, and film. Explores French society, history, customs, and attitudes in the gourmet culture of French cuisine with particular emphasis on Lyon and its regional specialties.

FR X40C. The Arts in France.
A survey of the major artistic styles, modes, and currents in painting, architecture, sculpture, the decorative arts, and costume, from the medieval through the contemporary periods.

FR X40P. The Making and Identity of France.
The general political history of France, from the nation's inception to its current existence as part of the European Community.

FR X40T. France and the Francophone World Today.
An introduction to life in France and francophone regions through the study of contemporary society and culture.

FR X42C. French for Business.
Development of the ability to function in French in business-related situations, both orally and in writing.

FR X48. French Drama Workshop.
Intensive analysis of one or several plays or short literary texts, with emphasis on diction, delivery of lines, acting and staging; public performance of one play.

FR X49P. French Internship.
Provides the opportunity to apply language skills by using French in a professional setting such as a business or agency.

FR X50F. Francophone Literature and Culture.
Explore the francophone world through novels, poetry, theater, and film.

FR X51C. Topics in French Studies.

FR X51N. Narrating the Multilingual Self.
Explore the stories of multilingual francophones, including those of language learners, through mediums such as language memoir excerpts, poems, songs, interviews, podcasts, and films that narrate the experiences of multilinguals from many different French-speaking regions (e.g. Europe, North America, Africa, and Asia).

FR X57C. French New Wave in Context.

FR X58C. French Cinema and Memory.
Analyze French films through the lens of memory. Examine themes including the relationship between the cinematic medium and memory, the portrayals of personal memory versus historical memory, and the influence of film on our conception of memory.

FR X58D. Images of Women in French Cinema.
Examine the unique ways in which film portrays women and, more generally, questions of gender and gender identity.

FR X58Q. Supervised Research.

FR X63L. French Through the Media.

Focus on how the French language is used today to discuss current and cultural topics in the French media.

FR X64L. Introduction to French Linguistics.

Introduction to the syntactic, phonological, morphological, lexical, historical, and applied aspects of French linguistics.

FR X65K. Conference Course.

Supervised individual study of selected problems in French language and literature.

FR X71L. Advanced Written and Oral Composition.

Designed to guide students toward smooth and effective written and oral expression; weekly compositions on assigned subjects; periodic oral presentations.

FR X72. Comparative Stylistics.

Comparison of contemporary French and English syntax and style; study and practice in the technical difficulties of English-to-French and French-to-English translation.

FR X79H. Honors Tutorial Course.

Supervised individual research on a literary, linguistic, or cultural topic, and writing and defense of a thesis under the direction of a committee of two faculty members.

FR X80R. Reference Works and Research Methodologies.

Graduate Courses

FR X19S. Topics in French.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FR X29S. Topics in French.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

FR X80C. French for Graduate Students in Other Departments.

Intensive reading course, emphasizing basic grammar and vocabulary with translation practice.

FR X80L. History of the French Language.

An analysis of the evolution of the French language since its origin.

FR X80P. Introduction to Studies in Literature and Culture.

Proseminar in methods of study and research in French studies.

FR X80R. Reference Works and Research Methodologies.

FR X80W. Doctoral Writing Workshop.

Acquire the crucial skills for writing a cogent prospectus, dissertation, or article, and complete the prospectus, dissertation chapter, or article.

FR X81. Old French Language.

FR X81J. Topics in French Studies.

Designed for students in other departments; taught in English with optional reading in French.

FR X81M. Critical Approaches to Literature.

Introduction to various modern approaches to literary criticism, stressing both theory and practical application.

FR X81N. Topics in Language and Style.

FR X81N.1. Rhetoric, Composition, and Stylistics.

FR X81N.2. Translation.

FR X81N.3. Metaphor Across Cultures, Genres, and Time.

Explore how and why metaphors vary both across and within cultures, across different genres, and through time.

FR X81P. Old Provencal.

An introduction to Old Provencal through analysis of literary texts.

FR X82L. Topics in the Civilization of the French Speaking World.

Studies in various aspects of the cultures of France, Quebec, Francophone Africa, the French Caribbean, and other areas.

FR X83K. Structure of French: Phonology and Morphology.

FR X83M. Structure of French: Syntax and Semantics.

FR X83N. Introduction to French Linguistics.

An introductory survey of the main fields of French linguistics: phonology, syntax, sociolinguistics, historical linguistics, and applied linguistics.

FR X85L. Conference Course in French Language and Literature.

For students needing specialized courses not normally or not often included in the regular course offerings.

FR X85T. Graduate Teaching Practicum.

Engage in mentorship and pedagogical training by working one-on-one with a faculty member to develop and design an undergraduate, upper-division level course in an area of specialization.

FR X90K. Topics in French Literature Through the Renaissance.

Intensive study of particular writers or literary movements.

FR X90L. Topics in French Literature of the Seventeenth and Eighteenth Centuries.

Intensive study of particular writers or literary movements.

FR X90M. Topics in French Literature from the Nineteenth Century to the Present.

Intensive study of particular writers or literary movements.

FR X90N. Topics in Francophone Literature.

Studies in the literatures of Quebec, Francophone Africa, the French Caribbean, and other areas.

FR X90N.1. Reading the Maghreb.

Examine Maghrebi literature and film of both French and Arabic expression, along with works of psychoanalytic and postcolonial theory.

FR X91K. Topics in Criticism and Literary Genres.

Intensive study of critical theory or of the evolution of a genre. Topics: Le Voyage: themes, genres, structure; French short fiction since 1650; the theatre of the absurd; and others.

FR X91K.10. French-German Philosophy and Theory.

Explore core philosophical texts from the nineteenth and twentieth century that ground post-World War II French post-structuralism.

FR X92K. Topics in French Linguistics.

Examination of specific issues in theoretical, applied, descriptive, or historical linguistics.

FR X95L. Comprehensive Examination Preparation.

Supervised preparation for the comprehensive examination for the doctoral degree.

FR X96K. Topics in Comparative Romance Linguistics.

General survey of the development of spoken Latin in Italy, Spain, Portugal, and France; main traits of phonology, morphology, and syntax in each modern derivative language.

FR X96K.1. Introduction to Romance Linguistics.

FR X97T. Practicum in Teaching College French.

Designed to train first-year teaching assistants to observe, describe, and evaluate foreign language instruction and testing. Practical aspects of teaching to be studied include organization of class time; treatment of vocabulary and grammar; speaking and pronunciation; listening and reading comprehension; evaluating and creating tests; testing language content and language skills.

FR X98. Thesis.

FR X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

FR X98T. Supervised Teaching in French.
Teaching under the close supervision of the course instructor for two semesters; weekly group meetings with the instructor, individual consultations, and reports throughout the teaching period.

FR X99W. Dissertation.

Professional Courses

FR X19S. Topics in French.

G B - Great Books

Great Books: G B

Lower-Division Courses

G B X10H. Honors Lab: Ancient Worlds I.
Discuss readings and material covered in Great Books 313C.

G B X11H. Honors Lab: Ancient Worlds II.
Discuss readings and material covered in Great Books 313D.

G B X13C. Ancient Worlds I: Human and Divine.
Explore religious, literary, philosophic, and civic questions in the great texts, communal practices, and cosmological teachings from the Ancient Near East and Mediterranean. Investigate problems of the sacred and the profane, nobility and shame, holiness and justice. Study sources of wisdom in texts and authors such as Gilgamesh, Bible, Homer, Anaximander, and the tragedians.

G B X13D. Ancient Worlds II: Philosophy and the City.
Explore religious, literary, philosophic, and civic questions in the great dramatic, historical, and philosophic texts of the Ancient Mediterranean world. Investigate issues such as the unity and multiplicity of the virtues, the problem of knowledge, and the character of nature. Study sources of wisdom in such authors as Aristophanes, Thucydides, Plato, and Aristotle.

G B X15. Topics in Great Books.
Study one or more great works in the Great Books tradition.

G B X19S. Topics in Great Books.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

G B X25. Topics in Ancient and Medieval Great Books.
Study one or more ancient or medieval great works in the Great Books tradition.

G B X26. Topics in Renaissance and Modern Great Books.
Study one or more Renaissance or modern great works in the Great Books tradition.

G B X27. American Letters: Colonial Times to 1877.
Explore religious, literary, philosophic, scientific, and civic questions as they emerge in the arts and letters of America in the period up to and including Reconstruction. Focus on issues such as the nature of virtue and freedom, the character of the self and its relation to God and nature, and the relation between the individual and authority. Study sources of wisdom in such figures as the Puritans, James Fennimore Cooper, Herman Melville, Emily Dickinson, and Frederick Douglass.

G B X28. American Letters: 1877 through the 20th Century.
Explore religious, literary, philosophic, scientific, and civic questions as they emerge in the arts and letters of America in the period from 1872 to 2000. Examine questions such as the nature of reality and our knowledge of it, the relationship between tradition and science, loyalties to place, family, and country, and the possibilities and problems of progress. Study sources of wisdom in such figures as Mark Twain, Henry James, the Gershwins, William Faulkner, and important literary, political, and cultural writings from the period.

G B X29S. Topics in Great Books.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

G B X30H. Honors Lab: Classical and Medieval Worlds.
Discuss readings and material in Great Books 334C.

G B X31H. Honors Lab: Renaissance, Reformation, and the Age of Reason.
Discuss readings and material in Great Books 334D.

G B X34. Foundations in Classical Education.

G B X34C. Classical and Medieval Worlds.
Explore religious, literary, philosophic, and civic questions as they emerge in the great texts of the classical and medieval periods. Investigate issues such as the relation between philosophy and the political community, the sources of human excellence and civic consensus, and the relation between the human and the divine. Study sources of wisdom in such authors as Virgil, Augustine, Chaucer, Thomas Aquinas, and Dante.

G B X34D. Renaissance, Reformation, and the Age of Reason.
Explore religious, literary, philosophic, and civic questions in the great texts and art of the early modern period. Investigate issues such as the nature of the political community, the relation between the human and the divine, and the problem of human knowledge. Study sources of wisdom in such authors and texts as Petrarch, Calvin, Galileo, Shakespeare, and Francis Bacon.

G B X35. Great Books in Leadership.
Explore religious, poetic, and philosophic reflections on leadership as they emerge in the great books of the ancient and modern worlds. Focus on such themes as great ambition, servanthood, aspirations and obedience to divinity, grandeur, and the obligations of justice. Study sources of wisdom in such texts and authors as Xenophon, the books of Samuel, Cicero, Washington, and Churchill.

G B X37. Great Books in Law and Justice.
Explore religious, poetic, and philosophic reflections on questions of law and justice. Investigate questions concerning obligations to the community and the divine, the ordinances of the best regime, the status of nature, the character of the lawgiver, the development of common law, and the variation in law. Study such texts and authors as Exodus, Sophocles, Thomas Aquinas, Montesquieu, and Blackstone.

G B X38. Classics of Mathematics and Scientific Thought: Antiquity.
Introduction to history of mathematics and science through study of core texts from Greek and Roman antiquity. Approach science and

mathematics as liberal arts; examine fundamental questions raised by scientific inquiry. Consider questions regarding the nature of scientific knowledge, mathematical truth, physical reality, and causality.

G B X39. Classics of Mathematics and Scientific Thought: Modernity.

Examine core philosophical and scientific texts in the history of modern science and mathematics. Consider questions related to natural laws, empirical investigation, mathematical analysis, and technology and the human experience. Study sources of wisdom in such authors as Galileo, Descartes, Newton, Darwin, and Einstein.

G B X40H. Honors Lab: Modern Soul.

Discuss readings and material in Great Books 345C.

G B X41H. Honors Lab: Romanticism, Revolution, and Reaction.

Discuss readings and material in Great Books 345D.

G B X45C. The Modern Soul.

Explore religious, literary, philosophic, and civic questions in the literature, art, and philosophy of the modern period. Focus on issues such as the nature of freedom, the character of the self, the relation between the individual and politico-religious authority, and the ascendency of science. Study sources of wisdom in authors and artists such as Bach, Newton, Hume, Austen, Goethe, and Tolstoy.

G B X45D. Romanticism, Revolution, and Reaction.

Explore religious, literary, philosophic, and civic questions in the great texts of the later modern period. Focus on questions concerning the relationship between freedom and community, history and reason, the self and society, and rational inquiry and revelation. Study sources of wisdom in authors such as Rousseau, Flaubert, Marx, Dostoevsky, Darwin, Nietzsche, and Heisenberg.

G B X46. Advanced Topics in Great Books.

Discuss one or more great works in the great books tradition at an advanced level.

G B X46.1. Advanced Great Books.

Discuss great books at an advanced level.

G B X47. Fertility, Birth, Fragility, Dying.

Explore religious, poetic, scientific, and philosophic reflections on the phenomena of fertility, birth, injury, disability, aging, and dying. Consider authors and texts from the ancient world through modern times.

G B X48. Technology and the Human Experience.

Explore religious, literary, scientific, and philosophic reflections on the phenomena of technology, such as: the conquest of nature, industrial and digital revolutions, Artificial Intelligence, transhumanism, cryotherapy, and others. Consider authors and texts from the ancient world through modern times.

G B X56. Advanced Topics in Ancient and Medieval Great Books.

Discuss one or more ancient or medieval great works in the great books tradition at an advanced level.

G B X56.1. Advanced Ancient and Medieval Great Books.

Discuss ancient and medieval great books at an advanced level.

G B X66. Advanced Topics in Renaissance and Modern Great Books.

Discuss one or more Renaissance or modern great works in the great books tradition at an advanced level.

G B X66.1. Advanced Renaissance and Modern Great Books.

Discuss Renaissance and modern great books at an advanced level.

G B X67. Topics in Advanced Readings in Great Books.

Discuss advanced topics examining a single major topic or theme in great books or works of a significant author.

G B X71. Capstone in Great Books.

Participate in capstone of the great books degree. Develop and defend a persuasive argument on a significant question.

G B X72. Topics in Independent Research in Great Books.

Participate in supervised research.

G B X77I. Internship in Great Books.

Participate in a professional internship. Reflect on internship to improve ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

G B X78H. Great Books Honors Thesis I.

Participate in thesis writing in the great books degree. Develop and defend a persuasive argument on a significant question.

G B X78I. Internship in Great Books.

Participate in a professional internship. Reflect on internship to improve ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

G B X79H. Great Books Honors Thesis II.

Participate in thesis writing in the great books degree. Develop and defend a persuasive argument on a significant question.

Graduate Courses

Professional Courses

G E - General Engineering

General Engineering: G E

Lower-Division Courses

G E X02E. Supplemental Instruction for Electrical and Computer Engineering 302.

Development of problem-solving skills in the material covered in Electrical and Computer Engineering 302.

G E X04J. Supplemental Instruction for Mathematics 427J.

Development of problem-solving skills in the material covered in Mathematics 427J.

G E X05G. Supplemental Instruction for Mathematics 305G.

Development of problem-solving skills in the material covered in Mathematics 305G.

G E X06D. Supplemental Instruction for Chemistry 301.

Development of problem-solving skills in the material covered in Chemistry 301.

G E X06E. Supplemental Instruction for Chemistry 302.

Development of problem-solving skills in the material covered in Chemistry 302.

G E X07C. Supplemental Instruction for Mathematics 408C.

Development of problem-solving skills in the material covered in Mathematics 408C.

G E X07D. Supplemental Instruction for Mathematics 408D.

Development of problem-solving skills in the material covered in Mathematics 408D.

G E X07E. Supplemental Instruction for Mathematics 340L.

Development of problem-solving skills in the material covered in Mathematics 340L.

G E X07K. Supplemental Instruction for Mathematics 427K.

Development of problem-solving skills in the material covered in Mathematics 427K.

G E X07L. Supplemental Instruction for Mathematics 427L.

Development of problem-solving skills in the material covered in Mathematics 427L.

G E X07R. Supplemental Instruction for Mathematics 408K.

G E X07S. Supplemental Instruction for Mathematics 408L.

G E X07T. Supplemental Instruction for Mathematics 408M.

G E X08K. Supplemental Instruction for Physics 303K.

Development of problem-solving skills in the material covered in Physics 303K.

G E X08L. Supplemental Instruction for Physics 303L.

Development of problem-solving skills in the material covered in Physics 303L.

G E X09. Topics in Supplemental Instruction for Engineering Courses.

Development of problem-solving skills in the material covered in selected engineering courses.

G E X09C. Supplemental Instruction for Engineering Mechanics 306.
Development of problem-solving skills in the material covered in Engineering Mechanics 306.
G E X09D. Supplemental Instruction for Engineering Mechanics 319.
Development of problem-solving skills in the material covered in Engineering Mechanics 319.
G E X12. Supplemental Instruction for Electrical Engineering 312.
Development of problem-solving skills in the material covered in Electrical Engineering 312.
G E X19. Topics in Engineering.
Topics to supplement lower-division engineering curriculum.
G E X19S. Topics in General Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

G E X22. Topics in Professional Development.
Small-group seminar involving reading, discussion, and oral reports.
G E X29S. Topics in General Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

Professional Courses

GEO - Geological Sciences

Geological Sciences: GEO

Lower-Division Courses

GEO X01. Physical Geology.
Nature, properties, and distribution of crustal materials; surficial processes; internal processes; origin of continents, oceans, and ocean basins; mineral and fuel resources.
GEO X02C. Climate: Past, Present, and Future.
Explore the science of climate change. Examine the history of Earth's climate and the factors driving its changes. Discuss the Earth's climate history and the processes driving climate change; physical concepts governing heat and mass transfers in the atmosphere; the role of oceans in climate systems; temporal scales of climate change, from tectonic to millennial; anthropogenic global warming and human impacts on climate; health and ecosystem impacts of climate change; and methods for observing, modeling, and predicting climate change.
GEO X02D. Age of Dinosaurs.
Introduction to the study of life and why it matters. Explore the general principles of natural history, focusing on the natural history of dinosaurs. Discuss the basics of geology, anatomy, paleontology, and evolutionary theory, followed by the application of this knowledge, in tracing the evolutionary history of Dinosauria.
GEO X02E. Earth, Wind, and Fire.
Designed for non-geological sciences majors. Geologic phenomena that affect everyday life, including global warming, earthquakes, volcanism, desertification, river and coastline flooding and erosion, groundwater, mineral resources, and plate tectonics.
GEO X02G. Earth Science and Sustainability.
Explore grand challenges in earth science that affect sustainability and society, including climate change, energy production, water availability, and natural hazards. Examine authentic data, simple models, and maps used in geoscience gathering, analysis, and real-world applications.
GEO X02J. Crisis of Our Planet.
Designed for nonscience majors. Explores the interactions between humans and the Earth system by investigating the different time and spatial scales of the natural hazards that the planet presents, and exploring the societal and economic implications of civilizations co-existing with an evolving planet. Discussion of both long-term and punctuated catastrophic hazards, focusing on those from volcanoes, hurricanes, and earthquakes, using a combination of systems level exploration of the driving mechanisms as well as case histories. Discussion of issues related to risk, mitigation, and resilience for humans facing the vast array of natural hazards.
GEO X02K. Selected Topics in Geological Sciences.
The impact of geological processes on human activity; geologic topics of popular interest.
GEO X02M. The Age of Mammals.
Introduction to paleontology and natural history for nonscience majors. Explore basic geological processes, fossilization, and the fossil record. Examine the evolution and diversification of mammals, interactions between physical and biological processes, and the impact of climate change and human activities on mammalian communities. Focus on the mammalian skeleton, common Texas mammals, and geobiological processes that shaped mammalian evolution and diversification.
GEO X02N. Geology of National Parks.
Explore the geology of the US National Park System through a detailed examination of its rocks, landscapes, climate, hydrology, natural resources, and environmental impacts. Examine particular national parks which exhibit specific Earth processes. Includes threats posed to the park system: environmental tourism, encroaching development, water and air quality, air pollution, and natural hazards.
GEO X02P. Sustaining a Planet.
Explores the interactions between humans and the Earth system by investigating the different time and spatial scales of the natural hazards that the planet presents, and exploring the societal and economic implications of civilizations co-existing with an evolving planet. Discussion of both long-term and punctuated catastrophic hazards, focusing on those from volcanoes, hurricanes, and earthquakes, using a combination of systems level exploration of the driving mechanisms as well as case histories. Discussion of issues related to risk, mitigation, and resilience for humans facing the vast array of natural hazards.
GEO X02Q. Gems and Gem Minerals.
Utilize gemstones, gold, and fine minerals as inspiration to learn optics, geologic processes that control occurrence, and crystallography. Discuss economic factors and societal impacts associated with gem and mineral deposits, along with gemstone identification using the physical and optical properties of the minerals and faceting gemstones using lapidary equipment.
GEO X02T. Climate and the Energy Transition.
Explore how humankind's use of carbon-based fuels drives climate change and powers our civilization. Examine how to transition to a carbon-neutral energy future, have sustainable economic growth, and feed 9.8 billion people in 2050.
GEO X03. Introduction to Geology.
Mineral and rock composition of the earth; measurement of geologic time; origin and evolution of life; earth's interior; plate tectonics; depositional environments and processes; ancient climates; humans, earth resources, and the environment.
GEO X03C. Introduction to the Solar System.
Examines the origin and evolution of our solar system; how processes such as volcanism and impacts have shaped planet surfaces, as well as the workings of planetary interiors; the unique properties of Earth that allowed life to arise and evolve; the prospects for seeking life on other planets in our own solar system and beyond; and the history of planetary

exploration and the methods scientists use to explore fundamental questions regarding our place in the universe.

GEO X03E. Earth in 2100.

In a self-paced format, investigate Earth's physical climate system, how humans have contributed to climate change, what the Earth may look like in 2100, and how society can stop climate change.

GEO X05. Life through Time.

Examine the fundamentals of how life evolved, and the history of the development of Earth throughout geological time.

GEO X05E. Energy and the Environment.

A survey of all forms of current and potential sources of energy, and how these might impact the earth's environment.

GEO X06P. Geology and Sustainability.

Examines sustainability and environmental science from an interdisciplinary perspective.

GEO X10C. Topics in Conference Course.

Supervised study of selected topics in geological sciences, by individual arrangement with the instructor.

GEO X10T. Undergraduate Topics in Geological Sciences.

Selected undergraduate topics in geological sciences.

GEO X11. Emerging Scholars in Geological Sciences.

Introduction to research areas in the geological sciences, with emphasis on the skills needed for success in graduate school and the professional workplace.

GEO X11D. Geodata.

Examine a broad array of subjects related to data analysis and interpretation in the geosciences. Designed for lower division undergraduates to build a foundation in quantitative skills (spatial analysis, regressions, simple coding concepts) that have direct application to geoscience problems.

GEO X12N. JSG Geosciences Mentors Program - First-year.

Introduction to the various geosciences disciplines and corresponding degree programs and research areas. Emphasis on the skills needed for success in graduate school and the professional workplace, such as interactive sessions with the Jackson School of Geosciences Career Center to address internships, career planning, and job search skills.

GEO X14G. Geophysics Colloquium.

Introduction to geophysics to examine applications and discover career opportunities.

GEO X15L. Earth From Lab to Planet.

Explore the constitutive laws (e.g. elasticity, friction, viscosity) that explain the dynamical changes observed on the surface and interior of our planet, from tectonic to generational timescales. Examine different earth behaviors using hands-on experiments, in the lab and on the computer, to illuminate particular geodynamical processes. Build skills in data analysis and simulation through python-based coding. Discuss abstractions from these experiments to understand how those processes can be scaled up to understand Earth dynamics, from sedimentation to regional groundwater transport to global mantle convection.

GEO X16E. Solid Earth Processes.

Study the physical and chemical processes governing Earth and planetary evolution from the deep interior to lithosphere and surface. Explore the societal relevance of geological processes such as natural hazards and resources. Address why solid Earth dynamics is critical to sustain life and civilization at the surface.

GEO X16K. Earth Materials.

Introduction to minerals, mineral study techniques, igneous and metamorphic rocks and ore deposits, and formation processes.

GEO X16M. Sedimentary Rocks.

Description and interpretation of sedimentary rocks in hand specimen and thin section; characteristics of sedimentary rocks deposited in different environments.

GEO X16P. Sedimentary Rocks.

Examines the fundamentals of sedimentary rocks, including siliciclastic grain parameters and mineralogy, sediment transport and sedimentary structures; and carbonate mineralogy and geochemistry, grain and matrix constituents, modern facies, and classification. Reviews the principal siliciclastic and carbonate depositional systems, their process of formation and facies architecture and the role of process and architecture in petrophysical patterns, distribution of permeability and porosity, flow units, reservoir heterogeneities, and hydrocarbon recovery.

GEO X16S. Earth and Planetary Processes Through Time.

Explore modern physical, chemical, and biological processes through the prism of Texas's changing rivers and coastlines. Examine geologic times since the last Ice Age, deep geological time by looking at the Permian age, and the interpretation of planetary systems with an emphasis on underlying tenets of the history of life, geologic time, and surface processes.

GEO X16W. Climate, Water, and the Environment.

Introduction to climate system science through quantitative exploration of the processes that control Earth's water and carbon cycles. Discuss how the geosphere, atmosphere, ocean, cryosphere, and biosphere interact to govern the movement of water and the evolution of climate and weather conditions throughout Earth's history and in the present day. Explore current issues in climate change, water resources, and environmental sustainability.

GEO X19S. Topics in Geological Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad office. Credit is recorded as assigned by the study abroad adviser in the Department of Earth and Planetary Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

GEO X20F. Classic Geology in Scotland.

Introduction to the founding concepts of geology. Students use advanced field technologies while studying the geology of Scotland on all scales of size.

GEO X20H. Honors Introductory Geology.

An accelerated introductory course on the composition, structure, and history of the earth.

GEO X20K. Introduction to Field and Stratigraphic Methods.

Field observation of geological processes and study of the mineralogy, petrology, stratigraphy, paleontology, and structural geology of central Texas.

GEO X20L. Introductory Field Geology.

Designed for non-geological sciences majors. Study of geologic features and processes in the field; emphasizes regional geology of central Texas and techniques of geologic mapping.

GEO X20S. Introduction to Atmospheric Sciences.

Introduction to atmospheric science, including atmospheric radiation, circulation systems, thermodynamics, and cloud and precipitation processes. Discuss tornadoes, hurricanes, weather systems, and contemporary climate change to provide an opportunity to relate basic principles to real-world phenomena.

GEO X22E. Scientific Research Design.

Examine principles of experimental design including formulation of target questions and method choice in a unique, interdisciplinary, community context. Focus on honing principles of experimental design (including formulation of target questions and method choice), scientific writing, as well as introducing tool kits for data analysis, statistical approaches, and data visualization.

GEO X22J. Transitions in the History of Life.

Introduction to major perturbations in the history of life; specifically, mass extinctions and carbon-cycle perturbations (hyperthermal, anoxic, and acidification events). Discuss kill mechanisms (impacts, large

igneous provinces, glaciations) and the subsequent environmental perturbations and ecological ramifications. Examine biotic crises in the past, with an eye to future ecosystem collapse, as well as the environmental and paleobiological responses to these events.

GEO X22K. Paleobiology.
Systematics, biostratigraphy, paleoecology, and evolution of fossil organisms.

GEO X22M. Basin GeoMechanics.
Develop the technical foundation and physical insight to explore how stress and pressure drive geologic and human-induced processes. Examine applications including C02 sequestration, geothermal energy, hydraulic-fracturing, faulting, geopressure development, hydrocarbon entrapment, subsidence and compaction, slope stability, and borehole stability.

GEO X22S. Development and Evolution of the Vertebrate Skeleton.
Introduction to the organization and development of the vertebrate skeleton; survey of vertebrate history.

GEO X22T. JSG Geosciences Mentors Program - Transfer.
Introduction to the various geosciences disciplines and corresponding degree programs and research areas. Emphasis on the skills needed for success in graduate school and the professional workplace, such as interactive sessions with the Jackson School of Geosciences Career Center to address internships, career planning, and job search skills.

GEO X22V. Morphology of the Vertebrate Skeleton.
Explore the vertebrate skeleton. Access hundreds of specimens for hands-on learning of the vertebrate skeleton. Focus on identification of skeletal elements and their proper placement in major vertebrate groups.

GEO X25C. Continuum Mechanics.
Explore the foundation for the modeling of fluids and solids in geological and geophysical phenomena, such as mantle convection, glaciology, rock mechanics, and climate dynamics. Examine tensor analysis, the kinematics of motion, forces, and stresses. Discuss basic balance (conservation) laws for mass, momentum, and energy, and constitutive laws for fluids and solids. Develop governing equations to geodynamics, glaciology, seismology, and geophysical fluid dynamics.

GEO X25G. Computational Applications in the Geosciences.
An introduction to programming in MATLAB and applications to simulation of physical processes and data analysis in the geosciences.

GEO X25J. Programming in FORTRAN and MATLAB.
FORTRAN for students without knowledge of a computer programming language: survey of all variable types, loops, arrays, subroutines, and functions; overview of UNIX and MATLAB.

GEO X25K. Computational Methods.
Examine numerical methods for data analysis. Discuss digital data representation, convolution, the discrete Fourier transform, design of commonly used filters, and least-squares estimation.

GEO X25M. Numerical Modeling in the Geosciences.
Covers numerical solution of dynamical problems arising in the solid earth geosiences. Entails development of individual codes in Matlab and application of codes to understanding heat transfer, wave propagation, elastic, and viscous deformations. Requires familiarity with Matlab.

GEO X25P. Modeling Flow and Transport in Porous Media.
Introduction to the modeling of flow and transport in porous media with focus on basic dynamic phenomena that occur during single-phase flow and solute transport in heterogeneous porous media. Discussion of the numerical solution of both the elliptic equations governing the flow of groundwater and the hyperbolic equations governing solute transport. Includes a programming project which requires writing a functional numerical simulator.

GEO X26D. Earth in Deep Time.
Examine the causes and consequences of significant changes in Earth's surface environment and tectonic processes over the past 4.5 billion years. Discuss the initial Earth accretion, the Faint Young Sun problem, the rise of oxygen in Earth's atmosphere and general requirements for planetary habitability and how interactions between Earth's interior, the surface, and biosphere have shaped planetary evolution.

GEO X26P. Igneous and Metamorphic Petrology.
Examine the fundamental ways in which igneous and metamorphic rocks record processes occurring within our dynamic Earth, and how compositions and textures of minerals relate to the conditions from which they form. Learn how to identify igneous and metamorphic minerals in hand specimen and thin section, and how their textures record the pressures and temperatures of the Earth's interior.

GEO X27G. Geographic Information System and Global Positioning System Applications in Earth Sciences.
Develop Geographic Information Systems (GIS) skills using Esri's ArcGIS Pro software, working on real-world challenges relevant to geoscience, environmental science, and energy resources. Focus on GIS fundamentals, spatial reference systems, map projections, cartographic principles, remote sensing data (Landsat, LiDAR) and both vector and raster data analysis. Explore geospatial data resources and apply techniques in vector and raster-based analysis to generate maps and spatial models.

GEO X28. Structural Geology.
Study how and why rocks deform. Develop a practical toolset to quantify the mechanisms, magnitude, and timing of tectonic deformation by studying the rock record. Explore the physics underpinning how features such as faults, fractures, folds, and crystallographic fabrics initiate and evolve due to variation in tectonic forces, rock material properties, and pressure-temperature conditions.

GEO X28W. Vadose Zone Hydrology.
Introduction to hydrologic processes occurring in the vadose zone (unsaturated zone), the subsurface region between the ground surface and groundwater. Focus on the physical processes that govern the movement of water in variably saturated porous media, and the exchange of mass and energy at Earth's surface. Explore theoretical and applied aspects, measurement techniques and computational tools, and environmental challenges of the vadose zone.

GEO X29S. Topics in Geological Sciences.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Earth and Planetary Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GEO X29W. Hydrogeology Cooperative (Geological Sciences).
Covers the work period of geological sciences students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Required submission of a final report to the supervising instructor at the conclusion of the program.

GEO X30K. Energy Exploration.
Covers the fundamental elements of the petroleum system, including the origin of source rocks and reservoirs, rock properties, migration of hydrocarbons, and correlation methods for rock formations. During the final weeks of the course, students form exploration teams and work up real subsurface data from the Gulf of Mexico in order to participate in a simulated lease sale.

GEO X31K. Petrology and Plate Tectonics.
Sedimentation, metamorphism, igneous activity, and deformation patterns at rift zones, subduction zones, and transform margins.

GEO X35. Geology and Mineral Resources of Texas.
Geologic history of the region; local rocks, fossils, and mineral resources; influence of physiography, surface and subsurface water supplies, and energy and mineral resource production on the state economy.

GEO X35J. Jackson Scholars Seminar.
Discuss professional development skills, scholarship, research, and outreach.

GEO X36C. CO2 Storage in Geological Formations.
Explore how capturing and storing carbon dioxide (CO2) underground is an important means of mitigating climate change. Examine the geological and environmental aspects of CO2 injection, sequestration, and monitoring that control the success of real CO2 storage projects.

GEO X37T. Global Tectonics.
Examine tectonic processes within the dynamic Earth, with a focus on plate boundary processes. Discuss fundamentals of plate tectonics; plate motion, driving forces, and mantle convection; evolution of plate margins including convergent, transform, rifting, and mid-ocean ridge spreading centers, triple junctions and collisional orogenesis; plate reconstructions; earthquakes and focal mechanisms; structure and geochemistry of the Earth's interior. Explore challenging questions of onset of plate tectonics, subduction initiation, and tectonics on other planets.

GEO X38J. Marine Geology.
Impart an understanding of the fundamental way in which marine geologic processes affect the overall Earth System via a survey of the field of marine geology. Explore the structure and evolution of ocean basins, oceanic islands, and island arcs; the chemistry of the oceans; the sediments in the marine environments; the products and processes of the land-air-sea interface; and the history of the oceans over geologic time.

GEO X38T. Marine Tectonics.
Tectonic processes within the dynamic Earth, with a focus on oceanic structures. Subjects may include fundamentals of plate tectonics; plate motion, driving forces, and mantle convection; evolution of triple junction and plate margins; plate reconstructions; earthquakes and focal mechanisms; structure and geochemistry of the Earth's interior; mantle structure and tomography; rheology and deformation mechanisms in mantle and crust; heat flow, gravity, the geoid, and paleomagnetism; hotspots and mantle plumes; seafloor spreading and oceanic spreading ridges; oceanic transform faults and fracture zones; and subduction zones, volcanic island arcs, and marginal seas.

GEO X38W. Paleoclimate.
Introduction to paleoclimatology, the study of Earth's past climate. Examine a broad spectrum of geological archives of climate change including those from the oceans, the land, and the cryosphere.

GEO X39T. Continental Tectonics.
Tectonic processes, with a focus on continental lithospheric structures. Subjects may include convergent margins, subduction zones, magmatic arcs, and foreland structures; collisional orogenesis, arc-continent collisions, continent-continent collision, and mountain building; formation of supercontinents; uplift and exhumation; orogenic collapse and extensional tectonics; continental rifting and passive margins; transform margins; and the effect of tectonics on climate and oceanic circulation.

GEO X40T. Geoclimatology.
Examination of the climate records encoded in sedimentary archives through geologic time.

GEO X41. Mineral Resources, Society, and the Environment.
Nature and origin of mineral resources; their discovery, extraction, and uses; and their relationship to global history, economics, and the environment.

GEO X41F. Microstructures and Rock Rheology.
Focuses on processes of deformation operative in the crust and upper mantle, with an emphasis on distinguishing these processes using microstructural analysis and describing them using basic constitutive relationships from rock mechanics.

GEO X41G. Geomicrobiology.
Geologic and hydrologic controls on subsurface microbial growth, metabolism, and community structure; the geochemical consequences of microbial processes in subsurface settings; and the influence of geology on microbial ecology.

GEO X43Q. Fundamentals and Applications of Inductively Coupled Plasma Mass Spectrometry.
Explores inductively coupled plasma mass spectrometry (ICP-MS) for trace, minor and major element measurement, and applications in analytical fields. Discussion of fundamentals of technique, applications, and capabilities of ICP-MS through hands-on lab experience.

GEO X44K. Marine Mining and Minerals.
Overview of seafloor mineral deposits, their exploration, and mining.

GEO X44U. Quantitative Seismic Interpretation.
Seismic inversion, a tool for reservoir characterization, post- and pre-stack modeling, rock physics and fluid replacement modeling, wavelet estimation and post-stack inversion, AVO and pre-stack inversion, multiattribute regression and neural network, and net pay estimation. Extensive hands-on training with three-dimensional seismic and well-log data.

GEO X45E. Professional Ethics in Geosciences.
Explore supervised study devoted to the subject of professional ethics, personal integrity, scientific communication ethics and societal implications related to the geosciences. Discuss subject matter and ethical conundrums that will vary to maintain societal and scientific relevance.

GEO X46C. Introduction to Physical and Chemical Hydrogeology.
Basic concepts of fluid flow, surface and subsurface hydrology, aqueous geochemistry, and fluid-rock interaction. Additional subjects include isotope hydrogeology, evolution of seawater, and mineral-solution equilibrium.

GEO X47D. Global Warming.
Discussion of the fundamental sciences of global warming, including an active investigation of contemporary climate change issues.

GEO X47G. Climate System Modeling.
Study the basic theory of weather/climate system modeling using state-of-the-art regional climate models in a variety of applications. Discuss paleoclimate, contemporary, and/or future climate prediction due to changes in greenhouse gas concentrations.

GEO X47K. Gems and Gem Minerals.
Crystallography, occurrence, and identification of gem minerals and materials; artificial gems; simple cutting and polishing; history of gems and gemology.

GEO X47P. Climate System Physics.
Discussion of first-order principles and processes that govern the thermodynamical structure and energy distribution of the atmosphere, ocean, land, and cryosphere and their interaction with the dynamic aspect of the climate system.

GEO X48K. Marine Geology and Geophysics Field Course.
Hands-on, team-based instruction in the collection and processing of marine geological and geophysical data along the Gulf of Mexico coast.

GEO X48P. Field Methods in Planetary Geology.
Field studies combined with remote sensing to support studies of remote imagery from planetary missions.

GEO X49C. Introduction to the Cryosphere.
Explore how the cryosphere (ice sheets, glaciers, snow, and ice) interacts within the Earth system. Discuss ice physics, the geologic record of glaciation and glacial landscapes, and the relationship between glaciers and climate in the past, present, and future.

GEO X50D. Ice Dynamics.
Physics of ice motion, basal processes, glacial hydrology, and unstable flow.

GEO X50L. Topics in Lithosphere and Deep Earth.

GEO X50L.1. Tectonic Geodynamics.
Discuss the processes that determine the evolution of the solid Earth system, combining views from the fields of tectonics, structural geology, and geodynamics. Understand the why of earthquakes, plate motions,

subduction, orogeny, and lithospheric deformation including topography. Integrate geophysical and geological constraints from key regional settings to global scales to explore the links between theory and observations.

GEO X50L.2. Geophysics Seminar I.

GEO X50L.3. Geophysics Seminar II.

GEO X50S. Topics in Subsurface, Surface, and Life.

GEO X50T. Tectonic Geodynamics.

Discuss the processes that determine the evolution of the solid Earth system, combining views from the fields of tectonics, structural geology, and geodynamics. Understand the why of earthquakes, plate motions, subduction, orogeny, and lithospheric deformation including topography. Integrate geophysical and geological constraints from key regional settings to global scales to explore the links between theory and observations.

GEO X50W. Topics in Water, Climate, and Environment.

GEO X50W.1. Dynamics of Polar Systems.

Examine the fundamental physics that govern dynamics of ice sheets, oceans, and sea ice from a theoretical viewpoint that is supported with as many observations as possible.

GEO X50W.4. Statistical Data Analysis.

Examine the statistical, scientific, and computational approaches used to test hypotheses concerning the physics governing observed changes in the Earth System. Explore concepts in linear algebra and statistics such as regression, least-squares inversion, singular spectral analysis, Bayesian inference, Markov Chain Monte Carlo sampling, and test statistics to survey the existence of a discernable influence of humanity on the observational record of climate.

GEO X52P. Python for Geoscience Research.

Explore the Python 3 programming language and its application to scientific research. Examine basic Python and common scientific Python libraries such as numpy, pandas, matplotlib, datetime.

GEO X54. Physics of Earth.

Examines the kinematics and dynamics of the solid Earth as well as its evolution through time. Observations from multiple geophysical techniques are reviewed and applied towards understanding the planet.

GEO X55G. Geodynamics of the Lithosphere and Mantle.

Explores continuum dynamics problems that can serve to form a physical understanding of the tectonic and convective processes that shape our planet. Geared toward all undergraduate majors and graduate students from the Earth sciences and related fields in the natural sciences including physics, computer science, and engineering.

GEO X55S. Introduction to Remote Sensing for Geoscientists.

Examine the fundamentals of acquiring, processing, and interpreting remote sensing data. Explore the development of skills in the use and analysis of remote sensing data. Survey the physics of electromagnetic radiation and its interaction with geologic materials; common techniques for remote sensing; science goals and instruments onboard ongoing and planned remote sensing missions; and techniques for analysis of remote sensing data.

GEO X56S. Ins and Outs of Subduction Zones.

Discuss subduction zones, including the thermal and seismic structure of subduction zones, volatile and geochemical cycling, petrology of the subducting slab, seismicity, mantle wedge dynamics, volcanism, and the start of plate tectonics.

GEO X58K. Volcanology.

Discuss eruptive processes and products of volcanoes, using methods and concepts from mineralogy, petrology, fluid dynamics, depositional processes, geomorphology, stratigraphy, structural geology, field mapping, remote sensing, geochemical monitoring, and seismology. Examine the prediction and reduction of volcanic hazards; challenges faced by geologists in communicating with the public, decision-makers, and the media; and other impacts that volcanoes have on society, including the Earth's climate.

GEO X60. Field Geology.

Learn to identify sedimentary structures, measure and describe stratigraphy, interpret physical and environmental conditions in rock deposits, and develop foundational skills in geologic mapping and cross-section construction. Perform fieldwork including the use of UAV, LiDAR, and remote sensing data to enhance mapping and interpretation. Explore the geologic history and tectonic evolution of the Rocky Mountains and collect field and structural data to develop geologic maps, cross sections, and other geological products, interpreting the formation of folds, faults, rock fabrics, and associated features. Gain an understanding of crustal tectonics and the landform evolution of the region.

GEO X60G. Construction and Interpretations of 3-D Stratigraphy.

From Earth surface to subsurface, examines three-dimensional volumes of basin-filling stratigraphy to explore how depositional landscapes are preserved in the sedimentary record and how sedimentary deposits can be analyzed to produce quantitative reconstructions of past environmental states. Data includes both laboratory and industry-grade volumes of stratigraphy. Intended for Earth scientists requiring a quantitative understanding of how the structure of depositional landscapes is translated into subsurface stratigraphy.

GEO X61. Geophysics Field Camp.

Field studies for geophysics majors, including seismic, magnetic, electrical, gravity, and other techniques; related data processing and interpretation.

GEO X63S. Sedimentary Basin Analysis.

Quantitative and applied analysis of basin subsidence and sediment accumulation. Consider theoretical basin evolution due to flexural, thermal, dynamic, and fault-related subsidence. Analyze selected basin systems.

GEO X64P. Physical Oceanography.

Basic concepts for understanding and describing the large-scale circulation of the ocean. Covers measurement methods, properties of seawater, description of the global ocean's mean state and variability, introductory dynamics including balanced motions, wind-driven and abyssal circulation, wave motions, air-sea interactions, sea level science, and the ocean's role in climate.

GEO X65K. Seismic Exploration.

Seismic theory, including body and surface waves, attenuation, rays, reflection and transmission coefficients, principles of synthetic seismogram calculations, seismic imaging principles, reflection data processing methods, rock physics overview, seismic attributes overview, and seismic exploration field methods.

GEO X65N. Seismic Data Processing.

Reduction of seismic data from field records to final geologic images, using real data sets and open-source data analysis software.

GEO X65P. Potential Field Applications in Geophysics.

Introduction to the theory, measurement, and application of gravity and magnetic and electric fields to exploration and global-scale problems.

GEO X65Q. Geomorphology Process and Form.

Explores how Earth surface processes combine to shape landscapes through erosion and deposition. Includes discussion of open channel flow, sediment transport, fluvial and hillslope processes, and tectonic controls on landscape evolution.

GEO X66M. Mathematical Methods in Geophysics.

A survey of mathematics for geoscientists that includes infinite series, complex variables, linear algebra, integral transforms, ordinary and partial differential equations, tensor analysis, and probability and statistics.

GEO X66P. Planetary Geology and Geophysics.

Introduction to planetary geology, with an emphasis on geophysical observations of terrestrial planets in our solar system. Discuss missions, instruments, techniques, and incorporation of mission data in projects.

GEO X67M. Morphodynamics and Quantitative Stratigraphy.
Explores development of numerical tools to quantitatively understand sediment transport and stratigraphic development in sedimentary basins. Focus on applications of principles in fluid mechanics, sediment transport, and depositional mechanics to one-dimensional and quasi-two dimensional numerical modeling of sediment morphodynamics in depositional settings such as river deltas, carbonate platforms, and submarine fans. Requires development of geometrical and morphodynamic models as research tools to understand gathered data.

GEO X68K. Geophysics for Geological Sciences Majors.
A survey of seismic, magnetic, gravitational, and other geophysical tools and their application to exploration and global-scale problems.

GEO X69E. Evolution of Reef Ecosystems.
Introduction to the paleobiology, sedimentology, and oceanography of reef ecosystems throughout the geological record as well as the environmental and evolutionary factors that controlled the expansion and collapse of the carbonate ecosystems. Explore ocean chemistry, how organisms biomineralize a skeleton, symbiosis, ecology, mass extinctions, as well as current and future threats to reef health.

GEO X70E. Ecohydrology and Biometeorology.
Study the terrestrial biosphere and the ways ecosystems influence the water cycle. Investigate water, carbon, and energy fluxes within the Earth system from a hands-on experimental approach and through exposure to land-surface and climate models. Includes hydrology, Earth science, environmental engineering, ecology, biology, and climatology.

GEO X70K. Sedimentology.
Processes of sediment formation, transportation, and deposition; textures, structures, and facies of sedimentary rocks.

GEO X70Q. Morphodynamics and Quantitative Stratigraphy.
Explore numerical tools useful for quantitatively assessing sediment transport and stratigraphic development in sedimentary basins. Apply principles in fluid mechanics, sediment transport, and depositional mechanics to one-dimensional and quasi-two-dimensional numerical modeling of sediment morphodynamics in various depositional settings such as river deltas, carbonate platforms, and submarine fans. Develop geometrical and morphodynamic models as research tools to understand data collected from laboratory experiments and in the field.

GEO X71C. Topics in Conference Course.
Supervised study of selected topics in geological sciences, by individual arrangement with the department and instructor.

GEO X71H. Honors Research Methods I.
Preparation for independent research projects through exposure to current research programs, facilities, personnel, and projects in the Jackson School of Geosciences. Includes selecting research topics, mentors, and supervisors; preparing research proposals; conducting research activities; and presenting research results.

GEO X71S. Geological Sciences Research Methods.
Supervised research project completed in collaboration with faculty supervisor and related research group members either as a one-semester research activity in preparation for a senior thesis project.

GEO X71T. Topics in Geological Sciences: Undergraduate Seminar.

GEO X72H. Honors Research Methods II.
Preparation for independent research projects through exposure to current research programs, facilities, personnel, and projects in the Jackson School of Geosciences. Includes selecting research topics, mentors, and supervisors; preparing research proposals; conducting research activities; and presenting research results.

GEO X72S. Geochemical Problem Solving with Atoms and Ions.
Discussion of mass spectrometers, which are analytical balances that operate at molecular and atomic levels, used for gathering compositional data (both isotopic and elemental). Explores conversion of sample molecules into charged particles (ions), and measurement according to mass-to-charge ratio to assess chemical identity and abundance. Introduction to inorganic mass spectrometry methods and applications to the Earth sciences, surveying key modalities: TIMS, ICP-MS, LA-ICP-MS, MC-ICP-MS, and IRMS. Examines techniques in generating and critically evaluating high-quality data, and research.

GEO X73H. Honors Research Methods III.
Preparation for independent research projects through exposure to current research programs, facilities, personnel, and projects in the Jackson School of Geosciences. Includes selecting research topics, mentors, and supervisors; preparing research proposals; conducting research activities; and presenting research results.

GEO X76C. Isotope Geology.
Overview of the principles of stable and radiogenic isotope geochemistry. Subjects include mass spectrometry, geochronology and thermochronology, cosmogenic nuclides, radiogenic geochemistry, isotopic fractionation, traditional and non-traditional stable isotope geochemistry and its applications to the hydrologic cycle, low-temperature geochemistry, magmatic and metamorphic processes, thermometry, fluid-rock interactions, tectonics, crust-mantle evolution, and extraterrestrial materials.

GEO X76E. Environmental Isotope Geochemistry.
The application of the isotope and trace element geochemistry of natural waters and sediments to studies of the hydrologic cycle. Stable, radiogenic, and cosmogenic isotopes are used as tracers of the evolution of groundwater, surface water, and ocean water.

GEO X76K. Groundwater Hydrology.
Introduction to subsurface hydrology, emphasizing geological controls on groundwater flow; quantitative methods of analyzing aquifer systems; regional hydrology; water quality and pollution.

GEO X76L. Field Methods in Groundwater Hydrology.
Train in and experience hydrology field methods as well as data handling and analysis. Learn methods including drilling and well installation, well logging, hydraulic testing, stream gauging, near-surface geophysics, water sampling and analysis, soil sampling and analysis, hydrologic monitoring and mapping of water tables and flow paths, hydrometeorological measurements, and general mapping and surveying. Train on sampling and safe operation of instrumentation.

GEO X76M. Aqueous Geochemistry.
Explore aqueous geochemistry. Examine basic thermodynamics, kinetics, mineral solubility, acid-base chemistry, the carbonate system, surface chemistry, silicate mineral weathering, redox chemistry, and aqueous complexes. Learn the computer program PHREEQC.

GEO X76S. Physical Hydrology.
Modern conceptual and methodological approaches to hydrological science: qualitative assessment of hydrological processes, quantitative representation, approaches to measurement, and treatment of uncertainty. Major components of the hydrological cycle: precipitation, snow and snowmelt, infiltration, soil moisture, evapotranspiration, and runoff and their link to the coupled-earth system.

GEO X76T. High-Temperature Geochemistry.
Study of the composition, origin, and chemical and physical evolution of the earth and its interior. Examines the links between the fields of geochemistry and tectonics, igneous petrology, geophysics, and other areas of inquiry.

GEO X76W. Hydrogeophysics.
Application of geophysical methods in hydrogeology. Modules include method theory and hydrogeological applications; using instruments in the field; and analysis of data, interpretation, and hydrogeological insights. Class discussions; field exercises and written field exercise summaries; individual and group reports. Previous coursework and/or experience in hydrogeology and geophysics is recommended.

GEO X77K. Applied Karst Hydrogeology.
The study of karst landforms, processes, flow systems, and water resources. Geologic controls, natural resources, aquifer recharge and discharge, system evolution, geochemistry/water quality, tracing

methodologies, geophysical methods, and modeling are covered with an emphasis on collecting and interpreting field data.

GEO X77P. Physical Climatology.

Explore climate science through the lens of physical principles and Earth system science. Examine the key components of the Earth system--the atmosphere, hydrosphere, lithosphere, cryosphere, and biosphere--their interactions, and their responses to both natural and human-induced forcing. Discuss radiation, energy balance, and atmospheric/oceanic general circulation; the hydrological cycle, with a focus on surface hydrology and land-atmosphere interactions; climate feedbacks, sensitivity, and variability across temporal scales (past, present, and future). Focus on human impacts on the climate system, including urbanization, irrigation, industrialization, air pollution, and tropical deforestation.

GEO X78D. Introduction to Machine Learning and Geosciences.

Explore an overview of commonly used machine learning algorithms for Geosciences applications.

GEO X79G. Special Studies in Geophysics Research, Fieldwork, or Internship.

Special research projects, field studies, or geophysical/industrial internship. Assigned reading with written and oral report.

GEO X79H. Honors Thesis in Geological Sciences.

Supervised research project resulting in an honors thesis with an oral defense.

GEO X79J. Internship in Hydrogeology.

Special hydrogeological studies under the joint supervision of industry professionals and faculty members. Students present a written report.

GEO X79K. Special Topics in Advanced Geological Sciences.

Special emphasis on recent developments in geosciences.

GEO X79M. Mammalogy.

Surveys the biology and evolutionary history of mammals. Introduction to the diversity of living mammals through the study of mammalian ecology, behavior, morphology, and taxonomy. Laboratory work focuses on the characters diagnosing the major mammalian clades and identifying the common recent mammals of Texas using skins and recent osteological specimens. Fossils and the fossil record of mammals.

GEO X79N. Geosciences Internship.

Work experience in geological sciences under the joint supervision of industry professionals (the employer) and a supervising faculty member. Requires submission of a final report to the supervising faculty member at the end of the semester. Internship position must be on file with JSG Career Services.

GEO X79S. Geological Sciences Senior Thesis.

Second course in a two-course sequence focused on supervised student research and preparation of a final report on research activities.

Graduate Courses

GEO X80C. Advanced Structural Geology.

Origin of earth structures, solution of advanced structural problems, newest techniques, field techniques, and field problems.

GEO X80F. Seismology II.

Basic seismology theory and its application to the study of the interior of the Earth (crust, mantle, and core), earthquakes, and plate tectonics.

GEO X80G. Construction and Interpretation of 3-D Stratigraphy.

Uses three-dimensional volumes of basin-filling stratigraphy to explore how depositional landscapes are preserved in the sedimentary record and how sedimentary deposits can be analyzed to produce quantitative reconstructions of past environmental states.

GEO X80J. Mathematical Methods in Geophysics.

A survey of mathematics for geoscientists that includes infinite series, complex variables, linear algebra, integral transforms, ordinary and partial differential equations, tenor analysis, and probability and statistics.

GEO X80N. Sequence Stratigraphy.

Organization and interpretation of stratigraphic successions in time-bounded units of genetically related strata. Sequence stratigraphy, as a predictive branch of stratigraphic analysis, provides insight into the origin of the entire spectrum of siliciclastic, carbonate, and evaporite sediments from shallow to deep settings. Laboratory component involves the interpretation of sequences using outcrop measured sections, core data, wireline log sections, field trips, and 2D and 3D seismic data from modern and ancient settings.

GEO X80P. Advanced Reservoir Characterization: Carbonates.

Advanced instruction in the integration of geologic and engineering methods for building 3-D reservoir models of carbonate reservoirs.

GEO X80R. Dynamics of Sedimentary Systems I.

Explores the fundamental concepts of transport systems at the Earth's surface, focusing on principles and quantitative aspects of fluid flow, sediment transport, and bedforms, as well as atmospheric and oceanic circulation, complex systems, and the integration of small-scale processes in developing quantitative stratigraphic models.

GEO X80S. Dynamics of Sedimentary Systems II.

Explores the fundamental concepts of transport systems at the Earth's surface, focusing on principles and quantitative aspects of fluid flow, sediment transport, and bedforms, as well as atmospheric and oceanic circulation, complex systems, and the integration of small-scale processes in developing quantitative stratigraphic models.

GEO X80T. Geoclimatology.

Examines climate records encoded in sedimentary archives through geologic time.

GEO X81C. Structural Petrology.

Deformation processes from atomic to macroscopic level, resultant textures and fabrics, and conditions required to produce such deformation.

GEO X81E. Brittle Structure.

Quantitative analysis of folding, faulting, and fracturing at all scales in the upper crust, with emphasis on cross-section construction, subsurface mapping, and fracture analysis.

GEO X81F. Microstructures and Rock Rheology.

Focuses on processes of deformation operative in the crust and upper mantle, with an emphasis on distinguishing these processes using microstructural analysis and describing them using basic constitutive relationships from rock mechanics.

GEO X81G. Geomicrobiology.

Geologic and hydrologic controls on subsurface microbial growth, metabolism, and community structure; the geochemical consequences of microbial processes in subsurface settings; and the influence of geology on microbial ecology.

GEO X81J. Marine Geology.

Survey of the field of marine geology by exploring the structure and evolution of the ocean basins, oceanic islands, and island arcs, the chemistry of the oceans, the sediments in the marine environments, the products and processes of the land-air-sea interface, and the history of the oceans over geologic time.

GEO X81P. Plate Margins.

Study of the tectonics of the earth. Topics include history of early concepts, ocean spreading ridges and ophiolites, rifting, core complexes, passive margins, subduction zones, trenches, volcanic arcs, collisional orogenesis, and transform margins.

GEO X81R. Regional Studies in Mineral Resources Geology.

Geologic evolution of a region, with emphasis on factors that control the origin of selected mineral resources. Study area varies according to the interests of participants and other factors.

GEO X81S. Tectonic Problems.

Explore the origin of regional structural features, complex and controversial structures, and the tectonic control of ore deposits.

GEO X81T. Marine Tectonics.
Tectonic processes within the dynamic Earth, with a focus on oceanic structures. Subjects may include fundamentals of plate tectonics; plate motion, driving forces, and mantle convection; evolution of triple junction and plate margins; plate reconstructions; earthquakes and focal mechanisms; structure and geochemistry of the Earth's interior; mantle structure and tomography; rheology and deformation mechanisms in mantle and crust; heat flow, gravity, the geoid, and paleomagnetism; hotspots and mantle plumes; seafloor spreading and oceanic spreading ridges; oceanic transform faults and fracture zones; and subduction zones, volcanic island arcs, and marginal seas.

GEO X82C. Groundwater Field Methods.
Basic field methods used in evaluation of groundwater conditions, with emphasis on field interpretation and on hands-on experience with geophysical, geochemical, stream-gauging, and pump test methods.

GEO X82D. Crustal Geofluids.
Designed to provide a technical foundation for exploring how fluids drive fundamental geologic processes in sedimentary basins. Includes characterizing pressure and stress in sedimentary basins, exploring the origin of overpressure through theory and characterization, and examining how pressure and stress couple. Problems include how sedimentation generates overpressure, how hydrocarbons are trapped in the subsurface, how mud volcanoes form, how submarine landslides are generated, and the origin of methane hydrates.

GEO X82E. Scientific Research Design.
Explore the principles of experimental design including formulation of target questions and method choice in an interdisciplinary, community context.

GEO X82F. Fractured Rock Hydrology and Mechanics.
Introduction to the physics of flow in fractured rocks and soils, fracture mechanics, fracture skins, analysis of solute transport, and methods of characterizing and modeling fractured systems. Class field trips are an integral part of the class.

GEO X82G. Fluid Physics for Geologists.
Flow and transport phenomena within an earth science context. Includes extensive use of Maple, MATLAB, and COMSOL Multiphysics.

GEO X82M. Programming in FORTRAN and MATLAB.
FORTRAN for students without knowledge of a computer programming language: survey of all variable types, loops, arrays, subroutines, and functions; overview of UNIX and MATLAB.

GEO X82P. Physical Oceanography.
Basic concepts for understanding and describing the large-scale circulation of the ocean. Covers measurement methods, properties of seawater, description of the global ocean's mean state and variability, introductory dynamics including balanced motions, wind-driven and abyssal circulation, wave motions, air-sea interactions, sea level science, and the ocean's role in climate.

GEO X82S. Physical Hydrology.
Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Major components of the hydrological cycle.

GEO X82T. Continental Tectonics.
Tectonic processes, with a focus on continental lithospheric structures. Subjects may include convergent margins, subduction zones, magmatic arcs, and foreland structures; collisional orogenesis, arc-continent collisions, continent-continent collision, and mountain building; formation of supercontinents; uplift and exhumation; orogenic collapse and extensional tectonics; continental rifting and passive margins; transform margins; and the effect of tectonics on climate and oceanic circulation.

GEO X82W. Hydrogeophysics.
Application of geophysical methods in hydrogeology. Modules include method theory and hydrogeological applications; using instruments in the field; and analysis of data, interpretation, and hydrogeological insights. Class discussions; field exercises and written field exercise summaries; individual and group reports.

GEO X83. Clastic Depositional Systems.
Explore the processes and products of siliciclastic environments, including rivers, deltas, coastal systems, and deep-marine systems, with an emphasis on facies analysis, stratigraphic architecture, and sedimentary petrology. Develop the skills necessary to analyze sedimentary systems at multiple scales--from depositional environments to basin-wide correlations--emphasizing the integration of sedimentological, stratigraphical, and petrological data. Discuss the tectonic, climatic, and eustatic controls on facies transitions and provenance characterization.

GEO X83C. Topics in Geology and Hydrology.
Study of the interaction of fluids with the rock matrix, with emphasis on the role of hydrology in geologic processes and the role of geology in affecting hydrologic processes.

GEO X83D. Numerical Methods I: Computational Methods in Geological Sciences.
A survey of geophysical data analysis methods, with a focus on time series, including sampling and aliasing, convolution and correlation, statistics, linear digital filters, properties and applications of the discrete Fourier transform, and least squares. Instruction in MATLAB and Fortran and solution of data analysis problems using these two languages.

GEO X83E. Digital Methods in Hydrogeology.
Applications of mathematical software to earth science problems, with emphasis on hydrogeologic problems. Includes a brief introduction to numerical methods.

GEO X83F. Holocene-Pleistocene Sedimentology and Stratigraphic-Structural Evolution of the Caicos Platform.
Investigation of the broad range of depositional environments of the Caicos Platform through mapping exercises using state of the art digital imagery and lidar datasets, lab exercises, core workshops and a week-long field trip. Study of the evolution of the Caicos Platform carbonate system from modern sediments to complex stratigraphic records including grain types, sedimentary structures, and facies successions from the tidal flats, salinas, high-energy shoreline, and grainy back reef environments.

GEO X83G. Geochemistry of Sedimentary Rocks.
The hydrologic cycle, the early diagenesis, carbonate sediments, chemical sediments, and burial processes.

GEO X83K. Paleoecology.
Relationships of fossil animals and plants to their environments and to the sedimentary deposits in which they occur.

GEO X83L. Petrography of Sandstones.
Interpretation of microscale features of sandstones to decipher the paleogeographic, tectonic, and postdepositional controls on sandstone composition and texture. Examines the effects of chemical and mechanical processes in the subsurface on sandstone properties, including porosity.

GEO X83M. Petrology of Carbonates and Evaporites.
Description and interpretation of carbonate and evaporite rock deposition and paragenesis. Essentials of petrology; petrography, including identification of grain types, cement types, recrystallization, and dolomitization; and porosity evolution. Global geochemical signals in carbonate sediments, and geochemical processes of early and late diagenesis.

GEO X83N. Depositional Systems: Carbonates and Evaporites.
Analysis of carbonate and evaporite depositional systems from sedimentary structures, faunal and ichnofaunal associations, grain types, vertical and lateral facies successions within time-significant packages, and sediment body geometries.

GEO X83P. Potential Field Applications in Geophysics.
Introduction to the theory, measurement, and application of gravity and magnetic and electric fields to exploration and global-scale problems.

GEO X83R. Reservoir Geology and Advanced Recovery.
Analysis of geologic controls on composition and architecture of oil and gas reservoirs, with emphasis on reservoir heterogeneity resulting from depositional and diagenetic processes. Geological and petrophysical determinants of fluid flows and behavior.

GEO X83S. Sedimentary Basin Analysis.
Quantitative and applied study of basin subsidence and sediment accumulation. The first half of the course considers theoretical basin evolution due to flexural, thermal, dynamic, and fault-related subsidence. The second half of the course involves analysis of selected basin systems and includes student research projects and presentations on assigned topics.

GEO X83T. Tectonic and Climatic Interactions in Foreland Basins.
Integration of recent advances in foreland basins and adjacent orogenic belts, with emphasis on sedimentation, quantitative basin models, regional and global climate change, and the geometry and kinematics of fold-thrust belts.

GEO X83U. Dynamic Field Stratigraphy.
Field-based evaluation of the dynamics of the stratigraphic record, with implications for sedimentary, tectonic, and climatic processes.

GEO X84C. Seismology I.
Research seismic methods of exploration for petroleum and minerals and subsurface storage of fluids.

GEO X84D. Physics of Earth.
Geophysics of the whole Earth: seismic methods of inferring Earth structure, chemical makeup of Earth, tides and rotational variations, geomagnetism, heat flow, earthquakes, and seismicity.

GEO X84E. Seismic Migration and Inversion.
Use of the acoustic or elastic wave equation to construct subsurface images in seismic processing. Different methods of solution and data domains employed in routine applications. Investigates integral, implicit, and explicit finite differences and Fourier methods for the imaging and inversion of seismic reflection data.

GEO X84F. Finite Element Methods in Geophysics.
Numerical methods for solution of partial differential equations arising in continuum geophysics and geodynamics. Focuses on finite element methods and their application to heat conduction, viscous flow, wave propagation, and transport problems in geophysics.

GEO X84G. Subsurface Mapping and Petroleum Workstations.
Introduction to basin analysis, subsurface mapping, and petroleum exploration using a workstation. Subjects may include common tectonic settings of petroleum basins, seismic stratigraphy, structural styles, and petroleum systems. Workstation techniques include well log editing, lithology interpretation, correlation of tectonic events, integration of seismic and subsurface well data, interpretation of two- and three-dimensional seismic reflection data and structure, and isopach and seismic attribute mapping.

GEO X84H. Multidimensional Data Analysis in Geosciences.
Extracting multidimensional patterns from data, data reconstruction and registration, signal and noise separation. Elements of geostatistics, linear estimation, image analysis, and multidimensional sparsity-promoting transforms with applications to large-scale geoscientific data.

GEO X84M. Inverse Theory.
Vector spaces; model parameter estimation methods from inaccurate, insufficient, and inadequate measurements; linear, quasi-linear, and highly non-linear problems; local and global optimization methods. Emphasis on practical problem solving.

GEO X84N. Rock Physics.
Focuses on how rocks, pore fluids, and physical conditions of temperature, stress, diagenesis, and geological processes impact wave propagation, with an emphasis on how laboratory and theoretical results can be applied to field data. Presentation of case studies that outline strategies for seismic interpretation, site characterization, and recovery monitoring. Upscaling seismic and rock properties from the laboratory scale to borehole and reservoir scales. Multidisciplinary approaches to combination of geostatistical and stochastic methods, seismic-to-rock property transforms, and geologic information for reservoir characterization.

GEO X84R. Geophysical Time Series Analysis.
Surveys the following topics in time series analysis with geophysical applications: Fourier transforms, linear digital filters and their design, frequency domain analysis methods (power and coherence spectrum estimation), least squares and related methods with time series applications. MATLAB is used extensively.

GEO X84S. Seismic Data Processing.
Reduction of seismic data from field records to final geologic images, using real data sets and open-source data analysis software.

GEO X84T. Seismic Lithology.
How seismic waves propagating through earth materials respond to relevant rock, reservoir, and fluid properties in the subsurface, and how seismic data recorded on the surface are used to describe, discriminate, and estimate these rock, reservoir, and fluid properties in the subsurface.

GEO X84U. Quantitative Seismic Interpretation.
Seismic inversion, a tool for reservoir characterization, post- and pre-stack modeling, rock physics and fluid replacement modeling, wavelet estimation and post-stack inversion, AVO and pre-stack inversion, multiattribute regression and neural network, and net pay estimation. Extensive hands-on training with three-dimensional seismic and well-log data.

GEO X84W. Seismic Imaging.
Seismic reflection imaging for visualizing the interior of Earth's upper crust. Study of fundamental imaging concepts from a unified geometrical point of view. Hands-on practical experience with imaging seismic data in an open-source software environment.

GEO X85G. Geophysics Colloquium.
Exploration of a variety of problems in modern geophysics.

GEO X85Q. Geomorphology Process and Form.
Explores how Earth surface processes combine to shape landscapes through erosion and deposition. Emphasis on open channel flow, sediment transport, fluvial and hillslope processes, and tectonic controls on landscape evolution.

GEO X85S. Introduction to Remote Sensing for Geoscientists.
Examine the fundamentals of acquiring, processing, and interpreting remote sensing data. Explore the development of skills in the use and analysis of remote sensing data. Survey the physics of electromagnetic radiation and its interaction with geologic materials; common techniques for remote sensing; science goals and instruments onboard ongoing and planned remote sensing missions; and techniques for analysis of remote sensing data.

GEO X85T. Global Tectonics.
Examine tectonic processes within the dynamic Earth, with a focus on plate boundary processes. Discuss fundamentals of plate tectonics; plate motion, driving forces, and mantle convection; evolution of plate margins including convergent, transform, rifting, and mid-ocean ridge spreading centers, triple junctions and collisional orogenesis; plate reconstructions; earthquakes and focal mechanisms; structure and geochemistry of the Earth's interior. Explore challenging questions of onset of plate tectonics, subduction initiation, and tectonics on other planets.

GEO X86. Metamorphic Petrology.
Metamorphism as a record of processes in the Earth's deep crust; phase equilibria among minerals and fluids at elevated temperatures and pressures; tectonometamorphic regimes; petrographic interpretation of

metamorphic mineral assemblages and textures; and secular evolution of metamorphic patterns during Earth's history.

GEO X86D. Earth in Deep Time.

Examine the causes and consequences of significant changes in Earth's surface environment and tectonic processes over the past 4.5 billion years. Discuss the initial Earth accretion, the Faint Young Sun problem, the rise of oxygen in Earth's atmosphere and general requirements for planetary habitability and how interactions between Earth's interior, the surface, and biosphere have shaped planetary evolution.

GEO X86E. Economic Geology.

Origin of economic mineral concentrations within the context of their overall geologic settings; geologic aspects of economic evaluation, mining, and mineral processing; and mineral exploration.

GEO X86G. Geographic Information System and Global Positioning System Applications in Earth Sciences.

Examine the theory and application of Geographic Information System (GIS) and Global Positioning System (GPS) technologies in earth science. Implement data collection, mapping, and analysis through labs and practical exercises. Discuss map projections, cartographic principles, remote sensing, spatial analysis, and geospatial data resources in the context of earth science applications.

GEO X86K. Igneous Petrology.

Origin, differentiation, and crystallization of igneous rocks.

GEO X86R. Geology of Earth Resources.

Study of geologic, economic, societal, and environmental issues related to the production and consumption of energy, metal, industrial mineral, and water resources. Emphasizes the descriptive geology and origin of earth resources within the context of their overall geologic settings.

GEO X86S. Ins and Outs of Subduction Zones.

Explore an overview of subduction zones, including sites of lithospheric scale recycling, critical to understanding the chemical evolution of the Earth's crust and mantle, volcanism, earthquakes, and orogenesis. Includes the thermal and seismic structure of subduction zones, volatile and geochemical cycling, seismicity, mantle wedge dynamics, and volcanism.

GEO X86T. Topics in Volcanology.

Explores the physical and chemical processes involved in the eruption, transport, and deposition of volcanic material through the use and study of field measurements, fluid dynamics, petrology, and geophysical observations.

GEO X87C. Aqueous Geochemistry.

Introduction to the chemistry of water in the subsurface. Topics include basic thermodynamics and kinetics of rock-water interaction, acid-base theory, redox, and coordination chemistry.

GEO X87D. Climate Dynamics.

Studies features of the climate system and the basics of climate system dynamics. Subjects may include climate variability, radiation and heat budgets, atmospheric and ocean circulation systems, and the physics of climate change.

GEO X87E. Environmental Organic Geochemistry.

Environmental and organic chemistry of organic contaminants in groundwater and soils.

GEO X87G. Climate System Modeling.

Studies the basic theory of weather/climate system modeling using state-of-the-art regional climate models in a variety of applications. Includes instruction on how to run models on the TACC supercomputers for scientific applications. Subjects may include paleoclimate, contemporary, and/or future climate prediction based on changes in greenhouse gas concentrations.

GEO X87H. Physical Climatology.

Investigates the nature of Earth's climate and examines the physical processes that maintain the climate system. Topics include the energy balance, the hydrological cycle, general atmosphere circulation, and how they all interact and vary at various spatial and temporal scales. Discusses human-induced modifications to the climate system, such as urbanization, anthropogenic global warming, desertification, and tropical deforestation. Focuses on descriptive, analytical, programming, and modeling skills.

GEO X87P. Climate System Physics.

Discussion of first-order principles and processes that govern the thermodynamical structure and energy distribution of the atmosphere, ocean, land, and cryosphere and their interaction with the dynamic aspect of the climate system.

GEO X88C. Basin GeoMechanics.

Develop the technical foundation and physical insight to explore how stress and pressure drive geologic and human-induced processes. Examine applications including C02 sequestration, geothermal energy, hydraulic-fracturing, faulting, geopressure development, hydrocarbon entrapment, subsidence and compaction, slope stability, and borehole stability.

GEO X88G. Global Biogeochemical Cycles.

Examination of the major reservoirs, fluxes, and processes controlling the distribution of biologically active chemical constituents of the earth. The importance of these biogeochemical cycles in the geologic past and the effects of human perturbation of these cycles.

GEO X88H. Environmental Isotope Geochemistry.

The application of the isotope and trace element geochemistry of natural waters and sediments to studies of the hydrologic cycle. Stable, radiogenic, and cosmogenic isotopes are used as tracers of the evolution of groundwater, surface water, and ocean water.

GEO X88L. Isotope Geology.

Overview of the principles of stable and radiogenic isotope geochemistry. Covers mass spectrometry, geochronology and thermochronology, cosmogenic nuclides, radiogenic geochemistry, isotopic fractionation, traditional and non-traditional stable isotope geochemistry and its applications to the hydrologic cycle, low-temperature geochemistry, magmatic and metamorphic processes, thermometry, fluid-rock interactions, tectonics, crust-mantle evolution, and extraterrestrial materials.

GEO X88P. Paleontological Laboratory Techniques.

Overview and application of laboratory techniques used for in-depth investigation of the systematics of vertebrates.

GEO X88R. Radiogenic Isotopes and Tectonic Processes.

Application of radiogenic isotopes to tectonic problems. Particular attention is given to methods and tools in thermochronology and geochronology for understanding thermal histories, uplift rates, slip rates, timing relationships, landform development, and provenance.

GEO X88T. High-Temperature Geochemistry.

An introduction to the application of isotope and trace element geochemistry in the modern geological sciences, with emphasis on problems related to the origin and evolution of the Earth's interior.

GEO X89E. Evolution of Reef Ecosystems.

Introduction to the paleobiology, sedimentology, and oceanography of reef ecosystems throughout the geological record as well as the environmental and evolutionary factors that controlled the expansion and collapse of the carbonate ecosystems (and others). Explore ocean chemistry, how organisms biomineralize a skeleton, symbiosis, ecology, mass extinctions, and both current and future threats to reef health.

GEO X89J. Transitions in the History of Life.

Exploration of the transitions in the history of life, including mass extinctions, climactic perturbations, and environmental changes and their impact on the Earth's biota.

GEO X89K. Paleontologic Nomenclature and Techniques.

Rules of nomenclature: preparation, illustration, and description of Paleozoic invertebrate fossils.

GEO X89M. Vertebrate Paleontology: Mammals.

Comparative osteology and phylogenetic history of the living and extinct mammals.

GEO X89P. Digital Methods in Morphology.
The use of digital multimedia for analysis of paleontological problems, with emphasis on three-dimensional high-resolution CT data.

GEO X89R. Morphology of the Vertebrate Skeleton.
Identification of skeletal elements from the major vertebrate taxa, and aspects of skeletal functional morphology, with emphasis on extant taxa. Topics include the skeletal systems of fishes, amphibians, reptiles, birds, and mammals.

GEO X89S. Systematics and Paleontology.
Seminar course focusing on current issues in digital/instructional technologies. Provides students with an opportunity to explore, discuss, and demonstrate issues designing, acquiring, manipulating, authoring, and publishing digital content. Students work toward completing a specific project.

GEO X89V. Vertebrate Paleontology.
Comparative osteology and phylogenetic history of the living and extinct fishes, amphibians, and reptiles.

GEO X90D. Seismology III.
Advanced treatment of elastic wave propagation in heterogeneous anisotropic media, vectors and tensors, Christoffel equation, group and phase velocities, invariant embedding (reflectivity), finite difference, finite elements, and spectral elements.

GEO X90E. Ecohydrology and Biometeorology.
Study the terrestrial biosphere and the ways ecosystems influence the water cycle. Investigate water, carbon, and energy fluxes within the Earth system from a hands-on experimental approach and through exposure to land-surface and climate models. Includes hydrology, Earth science, environmental engineering, ecology, biology, and climatology.

GEO X90M. Thermodynamics of Geologic Processes.
Applications of physical chemistry to natural systems; interactions of minerals, solutions, and the atmosphere.

GEO X90Q. Morphodynamics and Quantitative Stratigraphy.
Explore numerical tools useful for quantitatively assessing sediment transport and stratigraphic development in sedimentary basins. Apply principles in fluid mechanics, sediment transport, and depositional mechanics to one-dimensional and quasi-two-dimensional numerical modeling of sediment morphodynamics in various depositional settings such as river deltas, carbonate platforms, and submarine fans. Develop geometrical and morphodynamic models as research tools to understand data collected from laboratory experiments and in the field.

GEO X90R. Analytical Methods: Electron-Microbeam Techniques.
An introduction to electron-microbeam instruments and their applications in the earth sciences. Lectures on relevant theory and concepts are supplemented by hands-on experience.

GEO X90T. Tectonic Problems.
Explore cutting-edge and debated concepts and processes governing plate tectonics, the unifying concept of solid Earth Sciences, in both the marine and continental realms. Investigate and test the validity of processes-oriented concepts in subduction, rift, and collision tectonics settings. Study regional and global tectonic problems through an interdisciplinary structural, petrological, geochemical, sedimentological, and geophysical approach.

GEO X91. Topics in Geological Sciences: Seminar.

GEO X91C. Physical Hydrogeology.
Geological controls on groundwater resources; evaluation of aquifers, geothermal systems, and contamination problems; natural hazards caused by human use of groundwater.

GEO X91D. Regional Tectonics.
Development of tectonic theory culminating in the new global tectonics, and application of theory to selected orogenic areas.

GEO X91K. Applied Karst Hydrogeology.
The study of karst landforms, processes, flow systems, and water resources. Geologic controls, natural resources, aquifer recharge and discharge, system evolution, geochemistry/water quality, tracing methodologies, geophysical methods, and modeling are covered with an emphasis on collecting and interpreting field data.

GEO X91Q. Topics in Quaternary Geology.
Interdisciplinary analysis of Quaternary chronology, environments, climatic changes, and erosional-depositional processes.

GEO X91S. Current Topics in Paleobiology.
Seminar reviewing recent publications on evolutionary and ecologic theories applied to the fossil record.

GEO X91W. Aquifer Testing.
Techniques of aquifer evaluation, including pumping tests, laboratory techniques, field mapping, and numerical analysis.

GEO X92F. Fundamentals and Applications of ICP-MS.
Explores inductively coupled plasma mass spectrometry (ICP-MS) for trace, minor and major element measurement, and applications in analytical fields. Covers fundamentals of technique, applications, and capabilities of ICP-MS through hands-on lab experience.

GEO X92M. Modern Geological Sciences.
General discussion of the entire spectrum of geological sciences.

GEO X92P. Python for Geoscience Research.
Explore Python 3 programming language for application to scientific research. Examine basic Python and common scientific Python libraries such as numpy, pandas, matplotlib, datetime.

GEO X92S. Geochemical Problem Solving with Ions Atoms.
Overview of mass spectrometers, which are analytical balances that operate at molecular and atomic levels, used for gathering compositional data (both isotopic and elemental). Explores conversion of sample molecules into charged particles (ions), and measurement according to mass-to-charge ratio to assess chemical identity and abundance. Introduction to inorganic mass spectrometry methods and applications to the Earth sciences, surveying key modalities: TIMS, ICP-MS, LA-ICP-MS, MC-ICP-MS, and IRMS. Examines techniques in generating and critically evaluating high-quality data, and research.

GEO X93. Technical Lecture Series.
Attendance required of all graduate students in geological sciences.

GEO X93D. 3D Analysis of Volumetric Data.
Explore the theory and practice of acquiring and utilizing volume image data, predominantly from X-ray computed tomography (CT). Examine CT data instrumentation and acquisition, as well as 3D data processing, visualization, and quantification using a range of methods, including machine learning approaches.

GEO X94. Topics in Research in Geological Sciences.

GEO X94P. Modeling Flow and Transport in Porous Media.
Introduction to the modeling of flow and transport in porous media with focus on basic dynamic phenomena that occur during single-phase flow and solute transport in heterogeneous porous media. Discuss the numerical solution of both the elliptic equations governing the flow of groundwater and the hyperbolic equations governing solute transport. Includes a programming project which requires writing a functional numerical simulator.

GEO X95D. Ice Dynamics.
Physics of ice motion, basal processes, glacial hydrology, and unstable flow.

GEO X95S. Seismic Structural Analysis.
Addresses interpretation of 2D and 3D seismic reflection data for unraveling the geometry and kinematic evolution of crustal structures, principally in sedimentary rocks. Foundational subjects include understanding how structures manifest themselves in seismic data, and approaches to effective interpretation and kinematic analysis. Covers structural systems including extensional, fold and thrust belts, salt tectonics, and inversion. Applied subjects include computer workstation interpretation and analysis approaches, determination of geologic and basin history, fault system analysis, fault permeability structure, and geomechanical evaluations such as in situ stress determination and application to induced seismicity risking.

GEO X96C. CO2 Storage in Geological Formations.
Explore how capturing and storing carbon dioxide (CO2) underground is an important means of mitigating climate change. Examine the geological and environmental aspects of CO2 injection, sequestration, and monitoring that control the success of real CO2 storage projects.

GEO X96D. Topics in Machine Learning Data Analytics.

GEO X96D.1. Introduction to Machine Learning and Geosciences.
Explore an overview of commonly used machine learning algorithms for Geosciences applications.

GEO X96D.2. Applications of Data Analysis, Visualization, and Machine Learning.
Examine computational approaches to take advantage of complex data. Explore addressing real-world geoscience challenges using the Python programming language and Jupyter computational notebooks. Discuss techniques in data analysis, modeling, and machine learning for subsurface characterization applicable to resource assessment and geomorphology and stratigraphy applicable to hazard assessment.

GEO X96D.3. Data Analytics and Geostatistics.
Explore data analytics and geostatistics for geosciences applications.

GEO X96D.4. Subsurface Machine Learning.
Explore problem formulation, feature engineering, and inferential and predictive machine learning algorithms for geosciences applications.

GEO X96D.5. Machine Learning Research.
Examine machine learning and its application to the geosciences. Study and discuss current literature and complete a capstone project applying machine learning to a research area of choice.

GEO X97F. Marine Geology and Geophysics Field Course.
Hands-on, team-based instruction in the collection and processing of marine geological and geophysical data along the Gulf of Mexico coast.

GEO X97L. Transitions in the History of Life.
Introduction to major perturbations in the history of life; specifically, mass extinctions and carbon-cycle perturbations (e.g. ocean anoxic events, hyperthermals, and acidification events). Examine kill mechanisms (e.g. glaciations, impacts, large igneous provinces) and the subsequent environmental perturbations and ecological ramifications. Explore biotic crises in the past, with an eye to future ecosystem collapse, as well as the environmental and paleobiological responses to these events.

GEO X97M. Morphodynamics and Quantitative Stratigraphy.
Covers development of numerical tools to quantitatively understand sediment transport and stratigraphic development in sedimentary basins. Focus on applications of the principles in fluid mechanics, sediment transport, and depositional mechanics to one-dimensional and quasi-two dimensional numerical modeling of sediment morphodynamics in various depositional settings such as river deltas, carbonate platforms, and submarine fans. Requires development of geometrical and morphodynamic models as research tools to understand gathered data.

GEO X97P. Field Methods in Planetary Geology.
Field studies combined with remote sensing to support studies of remote imagery from planetary missions.

GEO X97Q. Preparing Future Faculty.
Examine the academic and research career track, including a number of different career paths. Participate in a workshop covering all application materials for these kinds of jobs.

GEO X98. Thesis.

GEO X98C. Continuum Mechanics.
Explore the foundation for the modeling of fluids and solids in geological and geophysical phenomena, such as mantle convection, glaciology, rock mechanics, and climate dynamics. Examine tensor analysis, the kinematics of motion, forces, and stresses. Discuss basic balance (conservation) laws for mass, momentum, and energy, and constitutive laws for fluids and solids. Develop governing equations to geodynamics, glaciology, seismology, and geophysical fluid dynamics.

GEO X98G. Geodynamics of the Lithosphere and Mantle.
Explores continuum dynamics problems that can serve to form a physical understanding of the tectonic and convective processes that shape our planet. Geared toward graduate students from the Earth sciences and related fields in the natural sciences including physics, computer science, and engineering.

GEO X98L. Topics in Lithosphere and Deep Earth.

GEO X98L.1. Tectonic Geodynamics.
Examine dynamic processes that govern plate tectonics and lithospheric deformation, combining tectonics, structural geology, and geodynamics from the ground up.

GEO X98M. Numerical Modeling in the Geosciences.
Covers numerical solution of dynamical problems arising in the solid earth geosiences. Entails development of individual codes in Matlab and application of codes to understanding heat transfer, wave propagation, elastic, and viscous deformations. Requires familiarity with Matlab.

GEO X98P. Planetary Geology and Geophysics.
Introduction to planetary geology, with an emphasis on geophysical observations of terrestrial planets in our solar system. Discuss missions, instruments, techniques, and incorporation of mission data in projects.

GEO X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

GEO X98S. Topics in Subsurface, Surface, and Life.

GEO X98T. Supervised Teaching in Geological Sciences.
Open to graduate students engaged in laboratory instruction under close supervision of the course instructors.

GEO X98W. Topics in Water, Climate, and Environment.

GEO X98W.1. Vadose Zone Hydrology.
Introduction to hydrologic processes occurring in the vadose zone (unsaturated zone), the subsurface region between the ground surface and groundwater. Focus on the physical processes that govern the movement of water in variably saturated porous media, and the exchange of mass and energy at Earth's surface. Explore theoretical and applied aspects, measurement techniques and computational tools, and environmental challenges of the vadose zone.

GEO X98W.2. Paleoclimate.
Introduction to paleoclimatology, the study of Earth's past climate. Examine a broad spectrum of geological archives of climate change including those from the oceans, the land, and the cryosphere.

GEO X98W.3. Dynamics of Polar Systems.
Examine the fundamental physics that govern dynamics of ice sheets, oceans, and sea ice from a theoretical viewpoint that is supported with as many observations as possible.

GEO X98W.4. Statistical Data Analysis.
Examine the statistical, scientific, and computational approaches used to test hypotheses concerning the physics governing observed changes in the Earth System. Explore concepts in linear algebra and statistics such as regression, least-squares inversion, singular spectral analysis, Bayesian inference, Markov Chain Monte Carlo sampling, and test statistics to survey the existence of a discernable influence of humanity on the observational record of climate.

GEO X99W. Dissertation.

Professional Courses

GER - German

German: GER

Lower-Division Courses

GER X04. Accelerated First-Year German.

GER X06. First-Year German I.
Basic training in grammatical patterns and usage of modern German.

GER X07. First-Year German II.
Advanced training in grammatical patterns and usage of modern German.

GER X12. Accelerated Second-Year German: Readings in Modern German.
Grammar review, composition, readings and recitation, discussion of literary works, and German culture.

GER X12K. Second-Year German I: Readings in Humanities and Social Sciences.

GER X12L. Second-Year German II: Readings in Humanities and Social Sciences.

GER X12V. Second-Year German I: Business German.
German 312V covers the same material as 312K, but with readings, discussions, and exercises that focus on the business world. Emphasis on practical, career-oriented competence.

GER X12W. Second-Year German II: Business German.
German 312W covers the same material as 312L, but with readings, discussions, and exercises that focus on the business world. Emphasis on practical, career-oriented competence.

GER X19S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X29S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X79. Conference Course in Germanic Language or Literature.
Supervised individual instruction course in which students engage in special studies necessary to expand their acquaintance with any subject in Germanic languages or literature.

GER X85. Conference Course in Germanic Languages or Literature.

Upper-Division Courses

GER X06. First-Year German I.
Basic training in grammatical patterns and usage of modern German.

GER X07. First-Year German II.
Advanced training in grammatical patterns and usage of modern German.

GER X19S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X22D. Conversation and Composition: Individuals and Society.
Explore everyday lives and language use in German-speaking societies through readings and media texts discussing popular culture, university life, and work. Focus on developing practical German skills: comprehension (reading and listening), speaking (conversations and informational presentations), and writing.

GER X22E. Conversation and Composition: Contemporary Controversies.
Explore contemporary and often controversial issues confronting German-speaking populations (such as migration) through readings and diverse media texts. Produce oral and written work for specific audiences and purposes (recommendations, comparisons, evaluations), with a review of advanced grammar resources.

GER X28. Advanced German Grammar.
Description of German sounds, grammatical structures, pronunciation, word formation.

GER X29S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X30C. Advanced Conversation and Composition: Culture.
German cultural material from print and visual media provides the basis for advanced conversation and composition, with considerable practice in the writing of short essays in German.

GER X30D. German across Disciplines.
Students read and discuss German language materials related to the subject matter of another designated course.

GER X31L. Advanced Conversation and Composition: Literature.
German literary material from print and visual media provides the basis for advanced conversation and composition, with considerable practice in the writing of short essays in German.

GER X42K. Middle Ages-Early Modern Era Cultural History.
Explore German-language cultures between the Middle Ages and Early Modern Europe (ca. 1200 to 1750), from medieval kings through religious reforms, globalizing wars, and the rising middle class. Examine how texts reflect changing social, political, and religious values, tying stories and essays to important moments in emerging German-language cultures.

GER X43C. Contemporary German Civilization.
Cultural, social, and literary history of Germany between 1900 and reunification. Taught in German.

GER X43K. Enlightenment to 1900 Cultural History.
Explore cultural movements through literature, essays, and philosophy from German-speaking Europe between absolutism and its imperial eras (circa 1750-1900). Focus on how texts reflect common themes and concerns of the emerging nation-states.

GER X44K. Twentieth Century Cultural History.
Explore German-speaking Europe's century of global wars, modernization, and political transformations from World War I through World War II and the resonances of the Cold War. Focus on how cultural movements and landmark texts in literature, visual arts, film, and digital media reflect transformations in cultural history and social values.

GER X47L. Language and Society in the German-speaking Countries.
Uses language and linguistics to study the culture and society of the German-speaking countries. Taught in German.

GER X48D. German Play: Student Production.
Discussion, staging, and production of a German play.

GER X49T. Introduction to Teaching German.
Supervised individual instruction designed to offer students an introduction to principles of foreign language education and the opportunity to teach German in local elementary schools.

GER X63K. Topics in German Culture.
Study of selected aspects of Germanic civilization, such as science and philosophy, fine arts, film, history, social institutions. Conducted in German.

GER X63K.1. Classics of German Cinema.
An introduction to German cinema through its most innovative, influential, and important films and filmmakers.

GER X63K.2. Heimat: No Place Like Home.
Examine the cultural and political history of German-speaking countries, using the concept of Heimat as a common thread, by means of a variety of media. Investi-gate the roles Heimat played in the medical discovery of nostalgia" in the German Romantic period, the rise of German natio-n-alism, the post-war Ger-manies, and in the German environmentalist movement.

GER X63K.3. Popular Music and West Germany.
Explore West German culture and society through the lens of popular music from the 1950s to the present. Examine an array of sources, from literature, film, television, and music journalism to identify the national and transnational intersections and impacts of popular music on understanding Germany.

GER X63K.4. Perspectives in German Film and Literature.
Explore German literature and cinema throughout the 20th and 21st century.

GER X69. Topics in Germanic Languages.
Introduction to the phonology, morphology, syntax, dialectology, or lexicography of individual Germanic languages.

GER X69.1. The Structure of the German Language.

GER X69.4. The German Language: Historical Perspectives.

GER X69.7. Translation I.

GER X69.8. Translation II.

GER X73. Topics in Germanic Literature.

GER X73.3. Biography and Autobiography.

GER X73.4. German Science Fiction.

GER X73.5. German Travel Literature.

GER X73.6. Writing: A Media History.
Focus on how the act and process of writing literature involves the writer's thoughts and writing skills and techniques, as well as the media, tools, and technologies through which they write. Read the draft traces of how an author brought a work into being to reconstruct the writing and thought process, reveal the evolution of poetic concepts, and evaluate the role of writing strategies and techniques. Explore the literary manuscript and writing process through the history of writing technologies, media and their ecosystems, as product of the evolution of literary writing as a Kulturtechnik (culture technique / technology).

GER X73.7. Plagiarism and Forgery in German Literature 18th to 21st Century.
Look at the history of the discourse around originality, plagiarism, copyright, and remix culture in German literature from the 18th to the 21st century.

GER X79. Conference Course in Germanic Language or Literature.
Supervised individual instruction course in which students engage in special studies necessary to expand their acquaintance with any subject in Germanic languages or literature.

GER X79H. Honors Tutorial Course.
Supervised individual research on a literary or linguistic problem, culminating in an honors paper of some length.

GER X85. Conference Course in Germanic Languages or Literature.

Graduate Courses

GER X06. First-Year German I.
Basic training in grammatical patterns and usage of modern German.

GER X07. First-Year German II.
Advanced training in grammatical patterns and usage of modern German.

GER X19S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X29S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X79. Conference Course in Germanic Language or Literature.
Supervised individual instruction course in which students engage in special studies necessary to expand their acquaintance with any subject in Germanic languages or literature.

GER X80C. German for Graduate Students in Other Departments.
Intensive reading course, emphasizing basic grammar and vocabulary with translation practice.

GER X81. Topics in Germanic Linguistics and Philology.

GER X81.14. Introduction to the Sociolinguistics of German.

GER X81.15. Introduction to Germanic Linguistics.
Survey the problems, methods, and major projects of Germanic linguistics using both synchronic and diachronic perspectives.

GER X81.2. Introduction to Synchronic Linguistics: German.

GER X81.3. Introduction to Diachronic Linguistics: Germanic.

GER X82M. Topics in Cultural History.
Study of various political, intellectual, artistic, and social movements in the cultures of Germanic countries.

GER X82M.2. German Democratic Republic Culture.
Explore the cultural mechanisms and values associated with the arts (literature, architecture, film), ideologies, and practices of public life in the German Democratic Republic.

GER X82M.3. Canons and Classicisms.
Explore how and why national canons use ideologies of classicism, starting with Weimar Classicism.

GER X82M.4. Transatlantic Memory Cultures.
Explore and compare European and United States Memory Cultures since the nineteenth century.

GER X82N. Topics in Intellectual History.
An interdisciplinary investigation of the significance of ideological structures of thought in historical contexts.

GER X82N.1. French-German Philosophy and Theory.
Explore core philosophical texts from the nineteenth and twentieth century that ground post-World War II French post-structuralism.

GER X82N.2. Culture, Technology, and Techniques.
Explore the cultures of technology and how tech influences the production and reproduction of cultures.

GER X82N.3. German Origins of Modern Humanities Research.
Explore the history of and approaches to research projects and priorities in contemporary cultural and literary studies, including research design.

GER X82N.4. Memory and Trauma.
Examine and apply current theories in memory and trauma studies used in cultural studies.

GER X82N.5. German and European Models of Power and Governmentality.
Examine twentieth-century models of power, governmentality, and law from Germany and Europe.

GER X82N.6. Digital Mapping of Cultural Networks.
Examine how humanities has mapped cultural, literary, and inter/intratextual networks from the eighteenth century through current digital art and literature.

GER X85. Conference Course in Germanic Languages or Literature.

GER X86. Topics in Periods in Germanic Literature.

Thorough survey of the principal periods of Germanic literature.

GER X86.1. German Literature and Culture: Middle Ages through Humanism (800-1450).

GER X86.10. Dutch Literature and Culture.

GER X86.12. Scandinavian Literature and Culture.

GER X86.2. German Literature and Culture: Renaissance/ Reformation through Baroque (1450-1730).

GER X86.3. German Literature and Culture: Enlightenment through Realism (1730-1890).

GER X86.4. German Literature and Culture: Naturalism since 1890.

GER X86.5. Old Norse Literature and Culture.

GER X89K. Topics in Methods in the Study of Literature and Linguistics.

An introduction to the critical and technical procedures used in Germanic studies, especially bibliographical aids.

GER X89K.1. Fundamentals of Scholarship.

GER X89K.6. German Rhetoric and Stylistics.

GER X89K.7. Thinking Digital: Literature, Language, and Culture.

Explore a range of digital tools, methods, and approaches to research in the humanities.

GER X92. Topics in Seminar in Germanic Literature and Culture.

Study of problems, topics, writers, genres, and movements in Germanic literature and culture.

GER X92.2. Fascist Aesthetics.

Explore the aesthetic theories and practices used by fascist regimes to represent their ideologies in the public sphere.

GER X92.3. Travel and Literature.

Study masterworks of travel literature as genres and in historical and intertextual contexts.

GER X92.4. Space, Travel, and Discovery in Early Modern Narratives.

Study narratives about travel and discovery in Early Modern Europe, especially as implicating science and new experiences of space.

GER X92.5. Cultures of Nationalism.

Explore how literature can reflect, transmit, and naturalize nationalist ideologies and identities.

GER X93K. Topics in Seminar in Germanic Linguistics and Philology.

Study of linguistic topics in Germanic languages, such as grammar, morphology, phonology, dialectology, syntax, lexicology, sociolinguistics.

GER X93K.1. German Syntax.

GER X93K.10. Older Germanic Languages and Cultures: Old Norse.

GER X93K.11. Older Germanic Languages and Cultures: Gothic.

GER X93K.12. Older Germanic Languages and Cultures: Old High German.

GER X93K.13. Older Germanic Languages and Cultures: Middle High German.

GER X93K.14. Older Germanic Languages and Cultures: Old Saxon.

GER X93K.15. Frame Semantics.

Explore theories and applications frame semantics within linguistics.

GER X93K.16. Landmarks of Linguistic Thought.

Explore the development of linguistic thought through readings of historically important essays.

GER X93K.3. The Acquisition of German.

Special problems in the acquisition of German or another Germanic language as a first or second language.

GER X93K.4. Synchronic Linguistics: German Morphology.

GER X93K.6. Sociolinguistics: Language Contact and Death.

GER X93K.7. Sociolinguistics: Texas German Dialect.

GER X93K.8. Sociolinguistics: German Dialectology.

GER X93K.9. Synchronic Linguistics: Phonetics and Phonology.

GER X94C. Topics in Comparative, Cultural, or Theoretical Studies.

Topics with a substantial Germanic component or application that fall outside of national-language literary and linguistic studies. May include comparative national approaches to genre, culture, or society; interdisciplinary studies; and surveys or focused studies on approaches to theory or methodology that apply to Germanic studies.

GER X94C.1. Multimodality in Nineteenth-Century Print Culture.

Examine theories and examples of image and text relations in nineteenth-century print culture as multimodal book culture.

GER X94C.2. Intersectionality: Identity and Politics.

Examine current theories of identity and identity politics from the US and Europe, deriving from theories of economic and class-based origins of identity.

GER X94C.3. Cold War Cultures.

Examine Cold War political and threat narratives and cultures as represented in film, literature, and non-fiction.

GER X94C.4. Introduction to German Film.

Introduction to German films and approaches to them from film studies.

GER X94C.5. European Migration Cultures.

Study the issues around migration and cultural contact in Europe, through lenses from the social sciences, history, and cultural studies.

GER X94C.6. Power and Identities: Marginalization.

Examine theories of power and decolonization illuminating how individuals are marginalized by dominant cultures, supported by historical case studies.

GER X97P. Topics in Applied Linguistics and Pedagogy.

GER X97P.1. Second Language Comprehension and Processing.

Explore how second language (L2) learners process language and construct meaning during sentence comprehension. Consider theoretical constructs and research methods as well as the practical applications of sentence processing research.

GER X97P.2. Second Language Assessment and Testing.

Explore how various tools of assessment are designed and implemented in the field of applied linguistics, in language teaching, and for program direction.

GER X97P.3. Input Processing in Second Language Acquisition.

Study linguistic and social-psychological factors unique to second language acquisition situations.

GER X97P.4. Course and Curricular Design.

Examine how theories of teaching and learning influence how courses and series of courses are designed to foster certain learning outcomes.

GER X98. Thesis.

GER X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

GER X98T. Supervised Teaching in German.

Analysis of the major foreign language teaching methodologies; curriculum and curricular materials development.

GER X99W. Dissertation.

Professional Courses

GER X06. First-Year German I.

Basic training in grammatical patterns and usage of modern German.

GER X07. First-Year German II.

Advanced training in grammatical patterns and usage of modern German.

GER X19S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X29S. Topics in German.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GER X79. Conference Course in Germanic Language or Literature.
Supervised individual instruction course in which students engage in special studies necessary to expand their acquaintance with any subject in Germanic languages or literature.

GER X85. Conference Course in Germanic Languages or Literature.

GK - Greek

Greek: GK

Lower-Division Courses

GK X01C. Beginning Greek.
Studies the fundamentals of grammar and reading in ancient Greek.

GK X02. First-Year Modern Greek I.
Introduction to grammar and reading.

GK X02C. Beginning Modern Greek.

GK X03. First-Year Modern Greek II.
Continuation of Greek 502.

GK X04. Intensive Beginning Greek.
An accelerated course for highly motivated students that combines the material covered in Greek 506 with that covered in the first part of Greek 507.

GK X06. First-Year Greek I.
Studies the fundamentals of grammar and reading in ancient Greek.

GK X07. First-Year Greek II.
Continuation of Greek 506.

GK X10. Second-Year Modern Greek I.
Culture, language, and literature of present-day Greece.

GK X10C. Intermediate Modern Greek.
Continuation of Greek 602C.

GK X10K. Second-Year Modern Greek II.
Continuation of Greek 310.

GK X11. Intermediate Greek I.
Continuation of Greek 601C or 507. Introductory readings from classical authors such as Lysias, Plato, and Xenophon. Includes grammar review.

GK X12. Intensive Greek.
An accelerated course for highly motivated students. Completion of this course is equivalent to completion of Greek 506 and 507. Students who enroll in 412 must take Greek 804 in the same summer session. A grade of A may allow the student to advance to Greek 324 with consent of the Greek 324 instructor.

GK X12K. Intermediate Greek II.
Continuation of Greek 311. Selected readings from classical and biblical authors.

GK X12L. Intermediate Greek II: Biblical Greek.
Continuation of Greek 311. A parallel to Greek 312K with a focus on biblical Greek.

GK X19S. Topics in Greek.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GK X29S. Topics in Greek.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

GK X19S. Topics in Greek.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GK X24. Topics in Advanced Greek.
Reading and analysis of classical authors such as Homer, Herodotus, Euripides, and Plato.

GK X24.1. Euripides.

GK X24.10. Solon: Archaic Greek Poetry and Politics.
Explore Archaic Greek verse and classical prose concerning the Athenian poet and statesman, Solon.

GK X24.11. Daphnis and Chloe: Ancient Romance.

GK X24.2. Herodotus.

GK X24.3. Homer's Iliad.

GK X24.4. Plato.

GK X24.5. Sophocles.

GK X24.6. Life of Themistocles.

GK X24.7. Apollonius.

GK X24.8. Greek Love Poetry.

GK X24.9. Xenophon.

GK X26. Advanced Greek Grammar and Composition.
Study of syntax, style, and principles of written composition.

GK X28C. Pauline Epistles.

GK X28D. The Gospel of John.

GK X28E. Biblical Greek: Acts.

GK X29S. Topics in Greek.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken residence. Transfer credit is awarded for work in an affiliated studies program.

GK X65. Topics in Seminar in Greek.
Critical study of authors such as Thucydides, Demosthenes, and Aeschylus.

GK X65.1. Aeschylus.
GK X65.10. Homer's Iliad: Research and Writing.
GK X65.11. Homer's Odyssey.
GK X65.12. Classical Historiography.
GK X65.13. Wisdom Poetry.
GK X65.14. Plato's Symposium.
GK X65.15. Plato Phaedrus.
GK X65.2. Sophocles.
GK X65.3. Thucydides.
GK X65.4. Aristophanes.
GK X65.5. Plato and Greek Prose.
GK X65.6. Female Poets of Ancient Greece.
GK X65.7. Callimachus.
GK X65.8. Aristotle.
GK X65.9. Apollonius Argonautica.
GK X70. Advanced Conference Course.
Supervised reading.

Graduate Courses

GK X19S. Topics in Greek.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GK X29S. Topics in Greek.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken residence. Transfer credit is awarded for work in an affiliated studies program.

GK X80J. Proseminar in Classical Literature.
Brief survey of the history of classical literature; orientation to the major periods and genres.

GK X80K. Topics in Proseminar.
An introduction to the research methodology and the ancillary disciplines used in current classical studies, or to certain disciplines such as meter, textual criticism.

GK X80K.1. Research Methods in Classical Studies.
GK X83. Topics in Classical Greek Literature.
Topics given in recent years include Greek oratory, Aristophanes, and Homer.

GK X83.1. Aeschylus.
GK X83.2. Sophocles.
GK X83.3. Thucydides.
GK X83.4. Aristophanes.
GK X83K. Current Concepts and Research in Greek.
An overview of important theories, issues, and research in classics.

GK X85. Topics in Graduate Reading Course.
Topics given in recent years include Plato and Greek prose, Sophocles, and Sophists.

GK X85W. Topics in Graduate Reading Course: Biblical Greek.
Graduate level translation and analysis of topics such as the Pauline epistles or the Gospel of John.

GK X86L. Conference Course in Greek Language.
GK X90. Topics in Seminar in Classical Studies.
Selected topics in Greek studies. Topics given in recent years include Mycenaean documents, Aristotle's ethics, Archaic poetry, and Plato's Symposium.

GK X98R. Master's Report.
Preparation of a research report to fulfill the requirement for the master's degree.

GK X99W. Dissertation.

Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken residence. Transfer credit is awarded for work in an affiliated studies program.

GOV - Government

Government: GOV

Lower-Division Courses

GOV X03D. Introduction to the Middle East: Adjustment and Change in Modern Times.
The responses of the societies of the Middle East and North Africa (Turkey, Iran, Afghanistan, Israel, and the Arab world) to Western cultural and political challenges, primarily since about 1800.

GOV X05C. United States Politics and Government.
Examine the origin and development of the U.S. Constitution and the structure and powers of the national government, including the legislative, executive, and judicial branches, federalism, political participation, the national election process, public policy, civil liberties, and civil rights.

GOV X06C. Politics and Government in Contemporary Texas.
Develop an understanding of the Texas constitution, structure and powers of state and local government, federalism and inter-governmental relations, political participation, the election process, public policy, and the political culture of Texas.

GOV X07. Introduction to Holocaust and Genocide Studies.
Examine interdisciplinary perspectives (including historical, political, socio-psychological, and cultural methods and insights) on genocide as a global phenomenon.

GOV X10L. American and Texas Government.
A basic survey of American government, including fundamental political institutions, federal, state, and local; special attention to the United States and Texas Constitutions.

GOV X12L. Issues and Policies in American Government.
Analysis of underlying themes concerned with American political institutions and policies, including the United States Constitution.

GOV X12P. Constitutional Principles: Core Texts.
Close readings from primary texts that have shaped or that reflect deeply upon American democracy, including the Declaration of Independence, The Federalist Papers, and Tocqueville's Democracy in America.

GOV X14. Introductory Topics in Political Science.
Introduction to varying topics in government and politics.

GOV X14.11. Introduction to Politics in East Asia.
Introduction to politics and political systems of Japan, China, Taiwan, North Korea, and South Korea.

GOV X14.5. Asia's Futures.
Current issues, visible trends, and projections for Asia's future.

GOV X14.7. Race, Politics, and Identity in Asian America.
An introduction to Asian American politics. Subjects include the American political process, and the historic and contemporary role of Asian Americans within that process.

GOV X14C. Competing Visions of the Good Life.
Introduces the great rival conceptions of the moral basis and goals of political life as elaborated by revolutionary thinkers throughout the history of political philosophy, including Aristotle, Aquinas, Locke, late modern critics of the Enlightenment, and others.

GOV X14D. Human Rights Theories and Practices.
Competing viewpoints on issues of human rights from multidisciplinary perspectives.

GOV X14E. Classics of Social and Political Thought.
Explores the origins of social scientific thought in the history of political philosophy and traces the development of one or more of the social sciences in modern times. Focuses on fundamental ideas about human nature, civil society, and politics, explored through reading such authors as Aristotle, Aquinas, Locke, Rousseau, Marx, Weber, Durkheim, and Freud.

GOV X18P. Fighting for Latino Power.
Examine issues that affect Latino political representation in the United States, specifically three aspects that are critical to political power in this country: the decennial Census, voting rights and the legal system, and electoral politics and political campaigns.

GOV X18R. Public Policy and Black Communities.
Examine how public policy has both advanced and hindered opportunities for Black people and communities from the Constitutional era to the present, addressing such areas as education, health, housing, and policing.

GOV X19C. Black and Latinx Intersections.
Examine the complex relationships between and among Black and Latinx communities and the political and structural forces and contexts that shape their interactions. Explore Black identity within the Latinx population, racial politics, coalitions of Black American and Latinx groups, race among Latinxs, racial inequality, and the politics of immigration.

GOV X19D. The New Latinas/os/xs.
Explore the trajectories of various communities many have called the new Latinas/os/xs by identifying how race, gender, sexuality, class, indigeneity, language, migration, and geography influence the lives, identities, and sociopolitical incorporation of new Latinas/os/xs.

GOV X19S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GOV X29S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GOV X71N. Administrative Internship.
Students perform research and related activities in a national, state, or local administrative agency. Written reports required.

GOV X72N. Campaigns and Elections Internship.
Students perform research and related activities in political campaigns and polling. Written reports required.

GOV X73N. Legislative Internship.
Students perform research and related activities in a national, state, or local legislature. Written reports required.

Upper-Division Courses

GOV X19S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GOV X20K. United States Constitutional Development: Structures.
A survey of the origin and growth of the American constitutional system, with emphasis on political structures and processes.

GOV X20L. Arab-Israeli Politics.
In-depth study of domestic, regional, and international factors involved in politics in the Middle East, including simulation of diplomatic interaction in the Arab-Israeli conflict.

GOV X20N. United States Constitutional Development: Rights.
A survey of the origin and growth of the American constitutional system with an emphasis on the development of civil rights and civil liberties in America.

GOV X21M. Politics in Japan.
Survey of postwar Japanese politics; the occupation, governmental institutions, interest groups, protest movements, industrial policy, the government-business relationship, and political and economic reform.

GOV X22C. War and Peace: China, Japan, and Taiwan.
Use the modern theory of war and cutting edge political science research to understand the evolution of war and peace over the past two centuries in East Asia.

GOV X22M. Politics in China.
Survey of twentieth-century China: historical trends; 1911 revolution; Warlord-Nationalist period; Communist revolution; post-1949 issues; new social and political institutions.

GOV X24C. Political Ideologies and Manifestos.
Survey major political ideologies like socialism, capitalism, and fascism; as well as the more recent so-called "Fourth Political Theory of Russian ideologue Aleksandr Dugin, (variable) popular ideologies, and internet manifestos. Explore each ideology through original texts and utopian/dystopian representations in popular culture (e.g., literature, film, music, graphic art, architecture, design).

GOV X24D. Populism in Central and Eastern Europe.
Survey the political nature, profile, and patterns of populism in selected post-communist democracies of Central and Eastern Europe. Examine populism in terms of impact on agenda setting, political process, and governance of the region in focus at specific national and European Union-wide levels.

GOV X24E. Intelligence and Espionage in the Eastern Bloc.
Examine the specific national approaches to foreign and domestic intelligence and espionage of former Communist bloc countries from early twentieth century to the collapse of communism in Eastern Europe.

GOV X24F. Economic Development in Post-Communist States.
Relate broad issues of economic development across the post-communist space since the collapse of the Soviet Union. Question and explore concepts, assumptions, and tools we use to assess development.

GOV X24G. Central Asian Politics and Economies.
Relate major political and economic issues of post-Soviet Central Asia from Soviet legacy and regime types to state-business relations and investment environment. Learn about the characteristics that unite and distinguish the Central Asian region.

GOV X24I. Nature and Politics in Post-Communist States.
Explore the key issues related to the political economy of human-nature interactions in post-communist countries, including politics of point-source natural resources, diffuse resources, and the commons.

GOV X24J. Governments and Politics of Eastern Europe.

GOV X24L. Governments and Politics of Western Europe.
Comparative study of peoples, institutions, parties, interest groups, and bureaucracy in the countries of Western Europe, concentrating on the major political systems of Britain, France, Germany, and Italy.

GOV X24O. Constitutionalism in Divided Societies.
Analyze constitutional strategies for divided societies where social divisions like race, ethnicity, language, or religion are a driving force in politics and risk group exclusion or violence.

GOV X24P. Research in Democratic and Constitutional Development.
Analyze the structures of democratic and constitutional development, the drivers of democratic change, and the practice of actively promoting these factors through democracy assistance.

GOV X25. Political Parties.
Character of the American party system, organization and leadership; pressure politics; the nominating process, campaigns, suffrage, elections, and the expression of public opinion.

GOV X26D. Data Science for the Social World.
Introduction to data science for the political and economic world. Explore a variety of political and economic data and develop proficiency in R and Excel.

GOV X27L. Public Opinion and American Politics.
The nature of and major influences on public attitudes, the measurement of public opinion, and the role of public opinion in government.

GOV X28L. Introduction to Latin American Government and Politics.
An introductory survey of Latin American political systems: governmental organization, political processes, and current problems.

GOV X29S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GOV X30K. The American President.
Development of the power and influence of the president; nomination, election, and responsibility; case studies of presidential problems; comparison of president and other executives.

GOV X31L. Law and Society.
The role of law in the context of major social issues; legal research and oral argument.

GOV X34C. Thomas Paine, Liberalism, and the Enlightenment.
Analyze the purpose and philosophy of Thomas Paine's writings in their relation to the political thought and politics of his time.

GOV X34D. Roots of Democracy.
Examine the historical development and ideological underpinnings of Athenian democracy, the first known democracy, from the sixth to fourth centuries BCE. Explore a broad range of primary sources and some secondary scholarships and gain a familiarity with the key principles and practices of this unique participatory government in its political, historical, and intellectual context.

GOV X34E. Citizenship and Patriotism.
Examine the idea of patriotism and citizenship over history, from classical antiquity to contemporary times. Analyze the moral and political value of patriotism, nationalism and cosmopolitanism.

GOV X35C. Religion in American Political Thought.
Explore religion and politics in the United States through reading of mostly primary sources addressing religious arguments taking positions on historical and contemporary issues.

GOV X35D. Natural Law Theory.
Study of the fundamental moral principles that are built into the design of human nature and lie at the roots of conscience.

GOV X35E. Hegel and the Formation of Modern European Identity.
An in-depth study of how Hegel identifies the social conditions necessary for personal self-realization but also for freedom by means of political community.

GOV X35G. African American Social and Political Thought.
Examines the speeches and writings by major theorists and critics of the prophetic tradition of black political thought.

GOV X35I. Political Bioethics.
Analyze the decisional challenges facing political communities in deciding how to regulate future genetic manipulation of human embryos as therapy for diseases and as enhancement of normal capacities.

GOV X35M. Topics in Political Thought.
Intensive examination of selected issues in political thought.

GOV X35N. Topics in American State Government and Politics.
Analysis of varying topics in the study of American state government and politics.

GOV X35O. Politics and Literature.
Explores the "old battle between the poets and philosophers," in which the two sides battle for recognition as the deepest source of wisdom about politics and ethics. Includes readings from great works of political philosophy and literature.

GOV X35P. Classics of Social Scientific Thought.
Studies a selection of foundational modern classics in economics, psychology, sociology, political science, and anthropology, drawn mainly from the nineteenth and twentieth centuries.

GOV X35Q. Global Justice.
Overview of contemporary theories on core issues of justice across national borders.

GOV X35R. Intellectual World of the American Founders.
A study of readings about politics, history, economics, ethics, religion, and law and their intellectual influence on founders such as Thomas Jefferson, George Washington, James Madison, and Alexander Hamilton.

GOV X36M. Governments and Politics of Russia.
Issues of nationalism and state-building facing Russia and its neighbors. Evaluation of the post-Soviet experience from the perspectives of both domestic and foreign policy.

GOV X37C. The Politics of Mexico.
Explore Mexico's political and economic development.

GOV X37D. Law and Democracy in Latin America.
Explore many of the challenges to the rule of law across Latin America and how they affect the quality of democracy in the region.

GOV X37E. International Politics of Latin America.
Analyze Latin America's political and economic relations with respect to external actors.

GOV X37F. Politics, Economy, and Society of Contemporary Brazil.
Examine major economic, political, and sociological developments in Brazil.

GOV X37G. The Politics of Development in Latin America.
Examine the struggle for development in Latin America.

GOV X37J. Race Politics and Caribbeans.
Examine racial and political themes among Spanish-speaking Caribbeans on the islands and in the United States. Explore racial politics in the three countries and compares notions of identity, experiences with racism and anti-racist protest with the United States

GOV X37N. Race and Ethnicity Politics.
Explore racial and ethnic politics throughout the United States with a focus on Black and Latino politics. Examine group identity, racial inequality, policy making, activism, criminal justice system, and immigration.

GOV X37V. Mexican American Political Thought.
Critically explore the multiple complementary and contradictory intellectual expressions of Mexican American political thought. Pay particular attention to Texas from the mid-nineteenth century through the period of the Chicano Movement in the latter part of the twentieth century.

GOV X38L. East Asian International Relations.
Survey of Russian/Soviet, Japanese, Chinese, and American foreign policies of the twentieth century, emphasizing Pacific-region interests; historical policies; intermittent conflicts, such as China versus Japan, Korean War, Indochina Wars; China's emergence as a nuclear power.

GOV X39L. Research Methods in Government.
An introduction to research design, data collection and analysis, and the use of the computer and related equipment.

GOV X41M. Decision Theory.
An introduction to the basic concepts and models using decision theory in political science, with particular emphasis on utility analysis, game theory, coalition formation, and voting behavior.

GOV X42N. Public Choice.
The political-economic models that have developed in this area of social science.

GOV X44. American Foreign Relations.
The aims, methods, and accomplishments of United States foreign policy since World War II, by geographic areas and by special problems.

GOV X44L. Introduction to Comparative Politics.
Introductory survey of basic concepts, perspectives, approaches, and trends in comparative politics, with emphasis on the formal-legal, group, class, elite, political culture, structural-functional, and systems approaches.

GOV X45C. Gender and Politics in a Comparative Perspective.
Examine the patterns of women's representation over time, and in different regions of the world. Explore why gender equality in political institutions is important, tracing the evolution of feminism over time.

GOV X47K. Governments and Politics of South Asia.
A survey of political developments, governmental organization, and economic and social problems in South Asia.

GOV X47L. Introduction to Political Theory.
Study of political theory: what it is; its origins; tradition; political theory today.

GOV X47N. Governments and Politics of Southeast Asia.
A survey of past and present governments and politics of the entire Southeast Asia region.

GOV X47P. Politics of Protecting the Great Barrier Reef.
Examine the numerous environmental challenges Australia's Great Barrier Reef (GBR) faces. Explore the livelihoods of the people who depend on or impact the GBR, and the people who are trying to save it.

GOV X48C. The European Union and Regional Integration.
Designed to provide a detailed introduction to the European Union, one of America's major economic and political partners and one of the major actors in contemporary international relations.

GOV X50K. Statistical Analysis in Political Science.
Elementary statistical techniques and their applications to problems in political science.

GOV X51C. The Classical Quest for Justice.
Introduces students to classical political thought through a study of seminal works of antiquity, focusing on those of Plato and Aristotle.

GOV X51D. The Theoretical Foundations of Modern Politics.
Examines competing foundations of the ongoing development of political and social modernity. Examines a selection of major authors from Machiavelli to Nietzsche.

GOV X51E. Contemporary Political Theory.
Introduces ongoing debates about identity, power, justice, rights, and democracy that are central to the theories of contemporary thinkers from Arendt to Habermas.

GOV X51F. Visions of Emancipation.
Examine and discuss a selection of the most relevant theories of political, social, and moral emancipation that have marked modern history. Focus on the works of political theorists, political militants, historians, and writers who have advocated visions of liberation from political oppression, social exclusion and discrimination, moral emptiness, and totalitarian domination.

GOV X51G. Critics of Modern Liberalism.
Selected critics of the philosophy of the Enlightenment from both the Left and the Right, and from the time of Rousseau to the present.

GOV X51J. Might and Right among Nations.
Major alternative approaches to the question of the moral character of international relations, as elaborated by some of the greatest political thinkers.

GOV X51K. Origin of the Idea of Religious Liberty.
Explore the origin of the idea of religious liberty in the history of political philosophy, focusing on its early modern development in core texts.

GOV X51L. Morality and Politics.
Interdisciplinary readings from major works exploring issues of ethics and leadership.

GOV X51M. Liberty and Empire: Machiavelli.
Explore Machiavelli's reputations through the examination of his works and analyze how those reputations relate to Machiavelli's own positioning and self-understanding.

GOV X51N. Montesquieu and Rousseau.
Examine the political thought of Montesquieu and Rousseau, the premier thinkers of the French Enlightenment. Use the themes of conservatism and radicalism to consider the thinkers individually and as a pair.

GOV X51O. Forensic Files: Philosophy Crimes.
Explore political philosophies from the continental tradition (Heidegger/Arendt, Nietzsche, Adorno/Horkheimer, and Agamben/Schmitt) implicated in radical politics and answering to political turning points, with a focus on research and reading in historical contexts.

GOV X51P. Tyranny and Politics.
Explore what tyranny is and how it relates to political life.

GOV X51R. Kant and Our Modern Age.
Explore the philosophical principles in the works of Immanuel Kant (1724-1804) as one of the most important and still influential contributors to the European Enlightenment.

GOV X51S. Xenophon and Machiavelli.
Explore the themes of morality and leadership in the writings of two great political philosophers, the ancient Athenian Xenophon and the renaissance Florentine Machiavelli.

GOV X51T. Hegel and His Heirs: Philosophy That Remade the West.
Explore how Hegel's philosophy contributed to the founding of the modern social sciences and led to innovations in the study of religion, psychology, education, social organizations, and social reform.

GOV X53D. Darwin and the Politics of Evolution.
A careful reading of Darwin's influential Origin of the Species by Means of Natural Selection, together with an examination of the religious, political, and scientific controversies the book has inspired from its first publication to the present day.

GOV X55C. Applied Research Methods I.
Introduction to the research process in the social sciences. The primary emphasis is on engaging in research projects, writing research proposals, analyzing data, and presenting research.

GOV X55D. Applied Research Methods II.
Introduction to the research process in the social sciences. The primary emphasis is on engaging in research projects, writing research proposals, analyzing data, and presenting research.

GOV X55J. Human Behavior as Rational Action.
An economic approach in studying rational action.

GOV X55M. Topics in Political Science.
Emphasis on varying topics in government and politics of contemporary interest and concern.

GOV X55N. World War I in Real Time.
Follows the timeline of World War I events as they happened. Using the tools of political science, engages modern, cutting edge theories and evidence about the origins and conduct of war to address why "the seminal tragedy of modern times" occurred when it did, and what we can learn from it in the present.

GOV X55P. Political Sociology.
A survey of approaches to the study of the state as a social structure; political power and power systems; ideology; political parties and elites.

GOV X57C. Constitutional Interpretation.
Designed to improve reasoning and communication skills through constitutional interpretation. Determining what the Constitution means, how to determine what it means, and who should determine what it means.

GOV X57D. Civil Liberties.
Explore the United States constitution and Supreme Court with a focus on civil rights and liberties.

GOV X57E. Supreme Court and Public Policy.
Explore the effects of American politics and culture on the Supreme Court and vice versa.

GOV X57F. Constitutional Structure of Power.
Explore the structures of power in a constitutional democracy.

GOV X57G. Structure of Individual Liberties.
Explore the ways in which the Constitution protects individual rights while accommodating the often competing claims of state, groups, and communities.

GOV X57I. Constitutional Design.
Explore the design and implementation of national constitutions.

GOV X57J. Law of Politics.
Explore theoretical and philosophical issues at the intersection of law and politics.

GOV X57L. Judicial Process and Behavior.
Introduction to traditional and modern approaches to the study of the judicial process, with emphasis on the nature and origin of judicial decisions and the factors that affect judicial decision making.

GOV X57M. Topics in Public Law.
Intensive study of various aspects of law and the legal system.

GOV X57N. Amending the United States Constitution.
Examine the evolution of the United States Constitution from the founding to the present, with a focus on the major forces and fault lines that have made the Constitution today one of the world's most difficult to amend.

GOV X57V. Asian American Jurisprudence.
Examine the historical development of United States law and its relationship to Asian Americans, and of Asian American jurisprudence as an independent field of legal scholarship.

GOV X58. Introduction to Public Policy.
A survey of American public policy, with emphasis on modern problems and trends.

GOV X60C. Introduction to International Relations.

GOV X60D. International Security.
Explore the conditions and motivations behind the use of military force in world politics.

GOV X60E. International Political Economy.
Study of the changing relationship between political and economic power in international relations.

GOV X60F. Global Governance.
Explore the forces that shape global stability and instability with a focus on international agreements.

GOV X60G. Causes of War.

GOV X60I. The Politics of International Trade.
Examine the relationship between international trade, and domestic and international politics.

GOV X60J. Globalization and the Nation State.
Explore the evolution of the global economy.

GOV X60O. Business and Society.
Explore the relationship between firms and society, including the role of regulation and government policy in shaping economic outcomes. Examine how governments encourage economic activity.

GOV X60P. International Organization.
In-depth introduction to the theory and practice of international organizations.

GOV X60R. Civil Wars and Ethnic Violence.
Study of the ethnic conflicts and civil wars that pose the greatest threats to international peace and security today.

GOV X60S. Terrorism and Counterterrorism.
Examines the historical origins of terrorist violence, the primary causes of terrorist acts committed both by opposition and government forces, as well as counter terrorist measures taken by states and international organizations.

GOV X60T. Multinational Corporations and International Law.
Study the ways governments use international economic law to shape international business.

GOV X62C. Globalization and the Coronavirus Pandemic.
Examine the modern globalization process that also incorporates a description of the current Coronavirus pandemic as a phenomenon that is inextricably linked with modern globalization.

GOV X62L. Government Research Internship.
Fieldwork in research and analysis on governmental and political problems.

GOV X62N. Archer Center Washington Internship.
Fieldwork in research and analysis on governmental and political problems.

GOV X62S. Memories of War.
Consider the ways the wars of the twentieth and twenty-first century are being remembered in Germany and the United States - from poems, novels and films to monuments and the controversial debates about military conflicts that the two countries have been involved in. Utilize theories of social memory, and concepts of individual and social mourning, to analyze how war affects individual lives, how societies mourn, and how remembering war impacts national identity and politics.

GOV X62U. Security and Policy in Eastern Europe and Russia.
Examine key contemporary security issues and policy dilemmas through the perspective of post-communist Eastern European countries in the context of European Union (EU) enlargement waves, and in the framework of their membership in supranational organizations. Consider the transformation of regional states' national security strategies, threat perception, and priorities transitioning from former Warsaw pact to full-fledged EU and NATO membership in shaping their respective national security priorities.

GOV X63U. Switzerland and Globalization.
Investigate how the small European country of Switzerland positions itself in a globalized world and how it competes and thrives in it. Explore the questions of how globalization impacts a small, affluent country and how its economy copes with globalization. Consider Swiss history, and its development of direct democracy, to understand Swiss exceptionalism, its response to contemporary issues, and its influence abroad.

GOV X64C. Islam and Politics.
An introduction to Islamic political thought.

GOV X64D. Evolution of Special Operation Forces.
Explore the global evolution of Special Operations Forces from different theoretical perspectives, including historical institutionalism, complexity, and bureaucratic politics.

GOV X64E. Monarchies and Mini-States.
Examine the remarkable variety among the political systems of the 28 remaining monarchies and the survival and thriving of mini-states around the world.

GOV X64F. Soundtrack of Revolutions.
Examine the significance of music in the social and political uprisings of countries across the Middle East.

GOV X64G. Ottoman State and Society.
Explore the social and economic life, religion, law, government, ideology, arts, and sciences of the Ottomans. Examine the Ottoman political governance and the course of its development through a socio-historical lens.

GOV X64V. Political Warfare and Propaganda.
Examine the phenomenon of political warfare in a contemporary global context, focusing on Russia and Eastern Europe. Explore the evolution of techniques of political warfare, including psychological warfare and propaganda.

GOV X65C. Japanese Foreign Policy.
Examine the foreign and domestic determinants of Japanese foreign policy.

GOV X65D. International Relations of East and Southeast Asia.
Examine the international relations of East and Southeast Asia, with particular attention to postwar economic and security issues, the changing political landscape of the post-Cold War period, and the development and functions of regional institutions.

GOV X65E. Political Economy of Asia.
Explore the political economies of East Asia with an emphasis on Japan, China, South Korea, and Taiwan.

GOV X65F. Asian Regionalism and Multilateral Cooperation.
Explore the nature, functional principles, leadership, and policy-making process of contemporary Asian regionalism in comparison to the experiences of European integration.

GOV X65G. The Military in Politics.

GOV X65I. Authoritarianism.
Explore the history and political science explanations of authoritarian governments.

GOV X65J. Australian Society and Politics.

GOV X65O. State Building in China and Taiwan.
Compare and contrast the state building process in mainland China and Taiwan.

GOV X65Q. Comparative Political Parties.
Analysis of varying topics in the comparative study of political processes.

GOV X65R. Institutions and Comparative Political Economic Development.
Comparative study of political processes.

GOV X65S. Comparative Legal Systems.
Comparative study of the nature of courts and law, their position in political systems, and their potential impact on society.

GOV X65T. Suicide Terrorism.
Studies the causes of suicide terrorism at elite, community, and rank-and-file levels.

GOV X65U. European Environmental Politics.
The history of environmental politics in both the member states of the European Union and the EU itself, including conceptual treatment of general environmental politics and policies, history of European environmentalism, and institutional responses at important 'traditional' and new EU member states. Also examines EU environmental policies themselves, such as the EU Emissions Trading System, chemicals policy, and GMO policy.

GOV X65V. Comprehensive Notions of European Security.
Examines the conceptual and practical aspects of European comprehensive security via the institutions charged with implementing it: the European Union (EU), the North Atlantic Treaty Organization (NATO), and the Organization for Security and Cooperation in Europe (OSCE).

GOV X65W. Human Rights and World Politics.
Introduction to the political and policy dimensions of human rights.

GOV X66C. The Ethics of Foreign Intervention.
Explore questions related to an outside power intervening in another country, such as whether foreign military intervention is ever justified and whether outside powers have a responsibility to protect vulnerable populations.

GOV X66D. Capitalism, Socialism, and Democracy.
Explore tensions between capitalism, socialism, and democracy and investigate the interdependence of economics and politics.

GOV X66E. Immigration and Comparative Politics.
Explore key issues in the study of migration policy and immigration politics.

GOV X66F. Issues in Third World Development.
Explore important issues in the politics of developing countries.

GOV X66G. British Politics and Government.
Explore key aspects of British politics and government.

GOV X66I. Israel: Society and Politics.
Analysis of Israeli politics and society in a comparative perspective with a major focus on the social and political cleavages in Israel.

GOV X66J. Ethnic Politics in Taiwan and Asia.
Explore ethnic politics in Taiwan including some comparison with ethnic politics in neighboring countries.

GOV X66L. International Development and Global Justice.
Explore global development including patterns of development, variation in development, and the impact of development.

GOV X66M. International Political Economy of Lower-Income Countries.
Explore the ways that China, India, Brazil and other lower-income countries are transforming the patterns in global finance, trade, aid, women's empowerment, and the control or corruption.

GOV X66N. Contemporary Middle Eastern Cinema.
Introduction to some of the most pertinent social and political themes in celebrated films across Arab countries, Turkey, Iran, and Israel and Palestine.

GOV X66O. Rule of Law in the Middle East.

GOV X66P. The Shock of Modernity in the Middle East.
Explore cross cultural contacts between the East and the West during the modern period. Analyze Islamic civilization in the Middle East of the modern era by addressing the development of religion, law, government, and morality during and after the colonial period.

GOV X66R. Cultures of Revolution in the Middle East.
Examine the cultural production that surrounds key moments of political and social change in the Middle East.

GOV X66T. The Levant: From Colonialism to Coexistence.
Examine the history of the Levant, a region that includes Syria, Israel, Palestine, and Jordan.

GOV X66U. Middle East Outlaws and Lawmen.
Explore the evolution of crime and law enforcement in the modern Middle East.

GOV X67C. Partition of India in History and Memory.
Discover the experiences and memories of many different groups affected by the Partition of British India in 1947 while tracing the effects of the Partition until the present.

GOV X68T. German Nationalisms.
History of diverse views and movements regarding German national identity within their respective contexts, 1800-present.

GOV X68U. Politics of Memory: Germany and the United States.
Examine the role that narratives of the past play in politics and policies in both Germany and the United States, by engaging with key theoretical and empirical debates. Focus on the role of memory in German and US immigration politics.

GOV X68V. Nazi Culture and Politics.
Explore fundamental questions about the unique role of culture in modern democracies and dictatorships by taking an overview of culture and politics in the Third Reich. Examine questions about the relationship between political propaganda and modern entertainment, mass media and authoritarianism, political aesthetics and ideology, and the dynamics of oppression, resistance, and consent.

GOV X70C. Election Campaigns.
The study of contemporary American election campaigns.

GOV X70D. The Military and American Politics.
Study the United States armed forces and the implications of military service and international conflict for domestic politics and policy.

GOV X70E. Congressional Elections.
Examination of congressional campaigns and election outcomes from both historical and contemporary perspectives.

GOV X70F. Public Opinion and Representation.
Examine the relationship between the public and elected officials in representative democracy.

GOV X70I. The Politics of Food in America.
Examine politics and political history of food production and consumption in the United States.

GOV X70J. Campaigns and Elections.
Introduction to American political campaigns and elections with a focus on federal elections.

GOV X70K. Topics in Racial and Ethnic Politics.
An examination of the role of racial and ethnic minorities in politics and of the impact of politics on these minorities.

GOV X70L. Topics in American Government and Politics.
Analysis of varying topics in the study of American government and politics.

GOV X70M. Research on the United States Congress.
Independent research on lawmaking in the modern United States Congress.

GOV X70N. Research on the United States Congress II.
Continuation of independent research on lawmaking in the modern United States Congress.

GOV X70O. The Politics of Title IX.
Examine how the passage of Title IX has affected the educational and career opportunities of women in the United States, with a particular emphasis on collegiate athletics.

GOV X70P. Policy-Making Process.
Focus on the role of Congress and the President in the policy-making process.

GOV X70Q. Political Psychology.
Study of the role of psychological theories in understanding politics and forming political views.

GOV X70R. Money in United States Politics.
Study of the nature and consequences of campaign finance on American politics.

GOV X70S. Social Movements: Theory and Practice.

GOV X70T. The Presidency in the Constitutional Order.
Explores the thought that national politics has become more prone to institutional and partisan conflict, policy gridlock and that national institutions do not function as intended.

GOV X70U. Urban Politics.
Examine politics in American cities.

GOV X70V. The Politics of Health Care.
The role of political institutions and the public in the development of the American health care system.

GOV X70W. The United States as a Territorial Nation.
Explore the territorial or geographic dimension of US political development, examining how the United States became a continent-wide republic and, later, an overseas power.

GOV X71C. Problems in United States Politics.
Examine potential problems in United States politics, seeking to conceptualize and measure them, and explore their causes, effects, and possible solutions.

GOV X71D. Race, Policing, and Incarceration.
Explore inequalities between black Americans and white Americans considering origins of inequalities, and their social and political consequences.

GOV X71E. Policy Formulation and Implementation.
Examine the policy-making process in the United States. Focus on the actors and institutions involved in the formulation and implementation of public policy.

GOV X71F. The Black Church in African American Politics.
Explore the political role of the Black church in the African American experience.

GOV X71G. African-American Politics.
Explore the evolution, nature, and role of African-American politics within the American political system.

GOV X71I. The United States Congress.
Examine the modern Congress and analyze various factors influencing the legislative process.

GOV X71J. Politics of Voter Suppression.
Explore the politics of vote suppression and its policy remedies, including manipulation of the size and composition of elections. Examine how excluded citizens have addressed such measures via politics, policy reforms, and court appeals.

GOV X71L. Latino Politics.
Explore the political experiences of the United States Latino populations.

GOV X71M. African-American Women's Political Activism.
Explore Black feminism and African-American women's political participation.

GOV X71N. Administrative Internship.
Students perform research and related activities in a national, state, or local administrative agency. Written reports required.

GOV X71O. American Political Development.
Examine how American politics, institutions, and political culture evolved and changed from the founding to the present.

GOV X71P. Race and United States Social Policy.
Examine the relationship between race and the development of United States social policy. Explore how specific social policies affect racial and ethnic inequality.

GOV X71R. Politics and Religion in the United States.
Analysis of the key topics in religion and politics in the United States.

GOV X71S. News Media as a Political Institution.
Analyze the roles that the institutional and social media have in American politics and government.

GOV X71U. Politics and Film.
Explore the importance of political life as it has been captured on screen and examine the role of film in important political events.

GOV X71V. Latina/o/x Citizenship.
Explore the concepts of membership, belonging, immigration and citizenship in the Latina/o/x experience. Examine how historically, politically, socially and culturally, Latinas/os/xs have been construed as belonging or not belonging members of the United States society.

GOV X72C. United States Immigration Policy and Stories of Migration.
Explore the history of immigration policy to the United States with memoirs of migration, immigration policy, and incorporation to provide a fuller picture of how immigrants are affected by these policies in the United States.

GOV X72D. Politics of Latino Identity.
Explore the creation of the pan-ethnic Latino group identity, differences between national origin groups from Latin America, and how Latino group and national origin identities influence political participation.
GOV X72E. Power and Money in U.S. Education Policy.
Examine how power dynamics and financial forces shape education opportunity, who controls what gets taught, how resources are allocated, the political influences behind educational decisions, and the impact of the decisions upon different groups of students.
GOV X72F. Black Education Policy.
Examine key educational policy moments that have impacted Black communities–including anti-literacy laws, segregation, contemporary funding, and curriculum debates. Explore how Black communities have responded through institution-building, legal advocacy, and alternative educational practices.
GOV X72G. Race and Policing: History, Policy, and Practice.
Examine the origins and evolution of policing in the United States, with a focus on the development and impact of policing policies. Analyze how policies have supported or oppressed Black, working-class, and ethnic communities.
GOV X72N. Campaigns and Elections Internship.
Students perform research and related activities in political campaigns and polling. Written reports required.
GOV X73N. Legislative Internship.
Students perform research and related activities in a national, state, or local legislature. Written reports required.
GOV X74N. Political Internship.
Students perform research and related activities for an entity directly related to government and politics. Written reports required.
GOV X79C. Regime Perspectives on American Politics.
Explore American politics and culture and examine how the parts of America fit together as a whole.
GOV X79D. Citizenship in Democratic Politics.
Examine the role of ordinary citizens in democratic politics.
GOV X79E. Homer and Plato.
Examine the works of Homer and Plato. Explore the ideas of human nature, existence, leadership, courage, honor, ambition, justice, necessity, fate, divine power, human freedom, and moral responsibility.
GOV X79F. Politics in Fiction.
Examine perspectives on American politics and government through works of fiction.
GOV X79G. Jerusalem and Athens.
Examine the age-old confrontation between the teaching of the Bible and the politics and philosophy of the ancient Greeks.
GOV X79H. Honors Tutorial Course.
Lectures and supervised individual research and the writing of a substantial paper on a special topic in the field of government. No grade is awarded until the student has completed the two-semester sequence.
GOV X79S. Topics in Honors Seminar.
Substantive focus varies each semester. Topics include but are not limited to constitutional interpretation, political thought, the evolution of American politics, and comparative politics.

Graduate Courses

GOV X19S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
GOV X29S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
GOV X71N. Administrative Internship.
Students perform research and related activities in a national, state, or local administrative agency. Written reports required.
GOV X72N. Campaigns and Elections Internship.
Students perform research and related activities in political campaigns and polling. Written reports required.
GOV X73N. Legislative Internship.
Students perform research and related activities in a national, state, or local legislature. Written reports required.
GOV X80R. Mathematical Methods for Political Analysis.
An introduction to mathematical concepts essential for quantitative analysis, such as statistics and formal political theory.
GOV X81J. Political Institutions and Processes.
Local, state, and national political institutions and policy processes, and specific areas of public policy. Field core course.
GOV X81L. Topics in Seminar in American Government and Politics.
GOV X81L.10. American Political Development.
GOV X81L.11. Evolution of American Politics.
GOV X81L.3. Money in United States Politics.
Explores the role, nature, and consequences of money in American politics.
GOV X81L.6. Ethnic Politics.
An examination of the status and behavior of racial, ethnic, and religious minorities in the American political system.
GOV X81L.7. The American Presidency.
GOV X81L.8. Congress.
GOV X81L.9. Campaigns and Elections.
GOV X81R. Political Behavior.
Political socialization, political psychology, public opinion, and electoral behavior. Field core course.
GOV X81S. Topics in Seminar in Political Behavior.
GOV X81S.1. Public Opinion and Voting Behavior.
GOV X81S.2. Political Participation.
GOV X82K. Studies in Political Theory and Philosophy.
Intensive study of selected classical and contemporary theorists and source materials related to political theory and philosophy. Field core course.
GOV X82M. Topics in Seminar in Political Theory and Philosophy.
GOV X82M.1. Contemporary Political Theory.
Analysis of contemporary theoretical problems and detailed study of the works of contemporary Western theorists.
GOV X82M.2. American Political Thought.
Examination of the origins and development of political ideas that have influenced the evolution of the American political system.
GOV X82M.9. Rousseau.
GOV X83K. Problems in the Study of Politics.
Normative orientations in research, theory formation and empirical assessment, various conceptions of explanation, and historical development of the social sciences.
GOV X84L. Topics in Seminar: Latin American Politics.
Analysis of selected problems in politics and international relations of the countries of Latin America.
GOV X84L.1. Brazilian Public Policies.
GOV X84L.2. Latin American Urban Politics.
GOV X84M. Topics in Seminar in Public Policy and Administration.
GOV X84M.1. Policy Evaluation.
Quantitative assessment and analysis of the impact and consequences of public policies.

GOV X84M.2. Policy Analysis.
Study of the nature and operation of the national policymaking process.
GOV X84M.3. Organizational Theory.
Analysis of the structure and operation of complex public bureaucracies.
GOV X84M.4. Comparative Administration.
Study of administrative theory and practice in comparative perspective.
GOV X84M.5. Public Management.
Analysis of the executive function in the public sector.
GOV X84M.6. Development Policy.
GOV X84M.7. Comparative Public Policy.
GOV X84M.8. Public Policy Clinic.
GOV X84N. Topics in Seminar in Public Law.
GOV X84N.1. The Judicial Process.
An exploration of the nature of the judicial function, with emphasis on the roles of law and discretion in the decisional process.
GOV X84N.2. Core Readings in Public Law.
GOV X84N.3. Constitutional Interpretation.
GOV X84N.4. State Constitutions and Human Rights.
GOV X85K. Foundations of Public Policy.
Introduction to major institutions, values, processes, and problems that shape contemporary public policies. Review and appraisal of current international, national, state, and local policy debates. Sampling of theoretical literature in policy analysis, American politics, institutional and organizational theory, macroeconomic management, democratic theory, policy evaluation, and politics-governance conflicts. Field core course.
GOV X85L. Topics in Seminar in Methodology.
Intensive examination of selected issues in the methodology of political inquiry.
GOV X85L.1. Time-Series Analysis.
GOV X85L.2. Introduction to Political Methodology.
GOV X85L.3. Simultaneous Equation Models.
GOV X85L.5. Bayesian Statistics.
Bayesian statistics with a focus on social science (especially political science) examples and applications.
GOV X85M. Topics in Colloquium in Politics.
Field roundtables, reports of current research, and panel discussions of significant issues in the study of politics.
GOV X85N. Introduction to Formal Political Analysis.
Critical, comparative survey of important formal theories of political processes, stressing general approaches rather than mathematical results. Presupposes no technical background. Field core course.
GOV X85R. Topics in Seminar in Formal Theory.
GOV X86J. Social Science Research for Political Professionals.
A survey of research methods focused on applications for policy, legislative, and advocacy purposes. Covers quantitative and qualitative methods including basic statistical analysis as well as legal and public source research.
GOV X86L. Survey Methods for Campaigns and Advocacy.
An introduction to the use of statistical methods in political practice, including an overview of statistical concepts; special attention is paid to survey design, analysis, and use of common statistical applications.
GOV X88K. The Study of International Relations.
Comparison of various theories of international politics and analysis of basic forces that underlie national policies and condition the nature and concerns of contemporary international relations. Discussion, reading, and research. Field core course.
GOV X88L. Topics in Seminar in International Relations.
GOV X88L.1. Study of International Conflict.
Studies of the determinants of foreign policy in selected countries, with consideration of both domestic and international factors.
GOV X88L.2. American Foreign Policy.
Topics in the study of American foreign policy, including the problems and instruments of American diplomacy, and the process by which policy is made.
GOV X88L.3. International Security.
Study of the political determinants and the substantive issues of national security policy with particular emphasis upon the United States.
GOV X88L.4. Contemporary Issues in International Relations.
An analysis of major current developments and issues in international politics and military relations.
GOV X88L.5. International Law and Organization.
An analysis of the forms and functions of international law and organization, with particular emphasis on the case method as means of adjusting interstate relations.
GOV X88L.6. International Political Economy.
GOV X88L.7. Theory and International Relations.
GOV X88L.8. Competing Approaches to World Politics.
GOV X90K. Comparative Study of Political Systems.
Theory and method of comparative political study; varieties of governmental institutions in Western and non-Western countries; comparative examination of political institutions. Field core course.
GOV X90L. Topics in Seminar in Comparative Government and Politics.
GOV X90L.10. Elites.
GOV X90L.11. Seminar in Russian, East European, and Eurasian Civilizations and Cultures.
GOV X90L.14. Comparative Political Institutions.
GOV X90L.15. Politics and Society in the Third World.
GOV X90L.16. Politics of Mexico.
GOV X90L.17. Ethnicity, Religion, and Politics in South Asia.
GOV X90L.18. Comparative Politics: Latin America.
GOV X90L.19. Advanced Readings in Chinese Politics.
GOV X90L.2. Political Systems of Western Europe.
Analysis of Western European politics; may include both particular political systems and comparative study of political institutions, processes, and behavior.
GOV X90L.20. Japanese Politics.
GOV X90L.21. Comparative Ethnic Conflict.
GOV X90L.22. Analytical Issues in Latin American Politics.
Designed to provide theoretical and analytical tools to engage in cross-national study and research of political processes in Latin America.
GOV X90L.23. The New Middle East: A Critical Approach.
Examine new analytical approaches to understanding the Middle East, including its social and political dynamics, utilizing an interdisciplinary approach.
GOV X90L.4. Politics of the Middle East and North Africa.
Readings and research on the political systems of the Arab world, Israel, Turkey, Iran, and Afghanistan. Precise topics vary.
GOV X90L.7. Authoritarian Political Systems.
Comparative study of authoritarian and totalitarian patterns of government, past and present, Western and non-Western; special emphasis on Communist and Fascist systems.
GOV X90L.9. Political Sociology.
GOV X91J. Statistical Analysis in Political Science I.
An introductory course covering estimation theory and hypothesis testing for statistical models in political science and the basic probability theory needed for statistical theory.
GOV X91K. Topics in Seminar in Political Science.
GOV X91K.8. Writing and Publishing in Political Science.
Examine the craft of writing and data presentation in the social sciences.
GOV X91K.9. Writing Seminar in Political Theory.
Examine the craft of writing and publishing in political science. Designed for students specializing in political theory.

GOV X91L. Statistical Analysis in Political Science II.
Multivariate statistical techniques and their applications to problems in political science. Field core course.

GOV X91M. Scope and Methods of Political Science.
Examine the history, scope, and methods of political science as a discipline; major paradigms and current subfields; conceptions of explanation in the social sciences; concept formation, theory construction, and empirical assessment; problems of interpretation, comparison, measurement, and experimentation; designs for research; and normative orientations in research.

GOV X91R. Research Colloquium in Political Science.
Forum for development of research projects and dissertation proposals.

GOV X97K. Conference Course in Political Science.
Readings in the literature of political science in fields in which the student is preparing for the qualifying examinations for the Doctor of Philosophy.

GOV X98. Thesis.

GOV X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

GOV X98S. Careers in Academia Seminar.
Designed for fourth year GOV Ph.D. students interested in academia. Discuss the academic job market.

GOV X98T. Supervised Teaching in Government.
Teaching under the close supervision of the course instructor; group meetings with the instructor, individual consultations, and reports throughout the teaching period.

GOV X99W. Dissertation.

Professional Courses

GOV X19S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GOV X29S. Topics in Government.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GOV X71N. Administrative Internship.
Students perform research and related activities in a national, state, or local administrative agency. Written reports required.

GOV X72N. Campaigns and Elections Internship.
Students perform research and related activities in political campaigns and polling. Written reports required.

GOV X73N. Legislative Internship.
Students perform research and related activities in a national, state, or local legislature. Written reports required.

GPS - Global Policy Studies

Global Policy Studies: GPS

Lower-Division Courses

GPS X01. Introduction to International Development.
Explore the ideational landscape of international development, including the main "schools of thought" in development over time, as well as how the beliefs and assumptions within these schools inform particular policy solutions. Analyze the institutional landscape with respect to the actors, organizations, and transnational communities that shape how global development has been practiced at the local, national and international levels. Examine the indicator landscape concerning where data on development can be found, interpreted and used to pursue evidence-based analysis and decision-making in this space. Survey contemporary development policy issues.

GPS X11D. Empirical Methods for Global Development.
Survey the various qualitative methods and tools used in the design and evaluation of programs and policies in international development and humanitarian assistance work. Analyze how to design and conduct qualitative evaluations in theory and under real-world constraints. Examine some of the key challenges in managing evaluations at the project and organizational levels, along with associated ethical and analytical concerns.

GPS X19S. Topics in Global Policy Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Lyndon B. Johnson School of Public Affairs. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

GPS X25. Topics in Global Policy.
Survey various topics in global policy.

GPS X29S. Topics in Global Policy Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Lyndon B. Johnson School of Public Affairs. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

GPS X45. Advanced Topics in Global Policy.
Examine various advanced topics in global policy.

Graduate Courses

Professional Courses

GRG - Geography

Geography: GRG

Lower-Division Courses

GRG X01C. The Natural Environment.
An introduction to the study of the Earth from a holistic perspective including geologic, atmospheric, ecological, and water sciences and its relevance to present-day environmental problems.

GRG X01K. Weather and Climate.
A survey of meteorological phenomena and climatological processes of the earth.

GRG X02L. Landscapes and Cosmovision in Mesoamerica.
Explore the ancient civilizations of Mesoamerica, the ways in which they are studied, the landscapes they inhabited, their worldview, and the persistence of the past into the present. Discover how different societies manifested a core set of beliefs shared by all Mesoamerican civilizations while at the same time maintaining local cultural identities. Assess changes in Mesoamerica both spatially and temporally from the Archaic Period through the Spanish Conquest, colonialism, and into modern times.

GRG X02S. Special Topics in Geography.

GRG X04E. Environmental Science: A Changing World.
Surveys the major global environmental concerns affecting the Earth and its residents from the perspectives of the environmental sciences.

GRG X05. This Human World: An Introduction to Geography.
Introductory survey of human geography, including human-environment relations, cultural patterns and processes, and geography's relation to other fields of study.

GRG X06C. Conservation.
Introduction to environmental management, with emphasis on the major causes and consequences of environmental degradation. The course is organized around the premise that people cannot solve environmental problems unless they know how and why they occur; a major objective is to identify and understand the sociocultural forces that drive environmental degradation.

GRG X07C. Introduction to Urban Studies.
A multidisciplinary study of cities and complex urban environments; historical and contemporary issues from both national and international perspectives.

GRG X09C. Creating the Sustainable Society.
Overview of sustainability as something human beings must strive to create in an era of global warming and ever greater social inequalities, both between and within countries.

GRG X10C. Spatial Data and Analysis.
Fundamental concepts in spatial data acquisition, analysis, and presentation, with emphasis on the needs of professionals in cartography, geographic information systems (GIS), and remote sensing.

GRG X12E. Digital Earth.
Explore concepts in geospatial technologies that are becoming increasingly important tools in research, policy, and everyday life. Discuss geospatial data sources (ex. GPS, citizen science, satellite imagery), applications (ex. disaster relief, biodiversity conservation, disease spread), and broader implications of their use (ex. privacy, ethical, legal issues).

GRG X12K. North American Borderlands.
Explore the formation of political borders in nineteenth- and twentieth-century North America, their contestation, and the multiple meanings attached to them.

GRG X19. Geography of Latin America.
Adaptations to population growth and spatial integration in cultural landscapes of great natural and ethnic diversity; problems of frontiers and cities.

GRG X19S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRG X29S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

GRG X19S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRG X20J. Environmental Justice.
Examine the socio-political, economic, and racialized history of both environmental ruin and environmental justice via a critical geographic lens connecting feminist political ecology, antiracist and abolitionist ecologies, decolonial geographies, and critical physical geographies.

GRG X20K. Land and Life: The American Southwest.
Historical geography of the southwestern United States, emphasizing the ways of life of American Indian, Spanish, mestizo, and Anglo cultures.

GRG X20M. Geography of Media.
Explores communication media from a geographical perspective. Subjects include place images, changing attitudes about public and private spaces, social networking, and the geography of communications infrastructure.

GRG X20N. Exhibitions and Public Spectacle.
Investigate exhibits, world's fairs, museum, monuments, theme parks, and historical reconstructions from Europe and the US, with attention to images of how their sponsoring nations or other entities want to be seen. Examine evidence for both the good and bad sides of national pride and identity. Explore examples of how large-scale culture projects and the public interact. Consider the lasting marks left on the cities and countries sponsoring them.

GRG X20P. Political Geography.
Explores how social power relations play out across space, and how spatial patterns and processes underlie various forms of social power. Focus on borders, conflicts, peacemaking, migration, environmental politics, urban politics, embodiment, emotion and affect.

GRG X20U. Urban Imaginaries.
Use science fiction literature, film, and other cultural artifacts as a platform to launch an examination into the central concept of urban imaginaries. Discuss the politics (and potential) of urban representation as well as understand how urban imaginaries influence everyday urban life and the ongoing production of urban space and place.

GRG X21D. Development and Social Movement in East and Southeast Asia.
Examine the notions of development and the ways in which development is associated with state building, moral economy, political performance, and accumulation regimes. Explore the development of civil society and social movement in East Asia, and explanations of the mechanisms and drivers of displacement. Conceptualize the "Right to the City", and alternative right-based approaches to land, housing, infrastructure, commons and public resources.

GRG X21F. Food in the Racialized City.
Explore a variety of issues related to producing, accessing, and consuming food in city spaces in the context of racial inequities. Investigate and question constructs such as "food" and "city" as means of exploring different points of view and approaches to studying not only food and cities but also various approaches to food justice.

GRG X21L. Archaeology of Climate Change.
Examines why climate changes, the methods for recording climate change, and includes case studies of the varied responses of past human societies to climate change in different geographic regions and time periods with varying socio-political and economic systems.

GRG X21U. Race, Social Justice, and the City.
Examine the way that race and inequality are built into the structures and ideas surrounding urban life through the spatial and racial structures of capitalist development, racialized migration, and redevelopment and gentrification campaigns. Analyze how United States cities are racial geographies.

GRG X22D. Human Health and the Environment.
Introduction to environmental health concepts. Examine current events to explore the relationship between environment and health and whether an environmental condition is or is not an important threat to health. Discuss the complexity of determining "proof" in this field.

GRG X22G. Politics of Protecting the Great Barrier Reef.
Examine the numerous environmental challenges Australia's Great Barrier Reef (GBR) faces. Explore the livelihoods of the people who depend on or impact the GBR, and the people who are trying to save it.

GRG X22L. Geographies of Latin American to United States Migration.
Examine the contemporary complex multi-scalar origins, patterns, and processes of Latin American and Caribbean migration and settlement in the United States. Through a place-specific, spatially contextualized, and historically situated approach, explore the collective and individual experiences of migrants, asylum seekers, and refugees from select nations including: Mexico, Guatemala, Honduras, El Salvador, Puerto Rico, the Dominican Republic, Haiti, and Cuba. Analyze the multi-layered factors shaping diverse Latin American migratory patterns and processes.

GRG X22M. Maya Art and Architecture.
Introduction to the artistic traditions of the ancient Maya, tracing their development up to the time of European contact. Students will examine various important themes of Maya culture including history, ritual, and cosmology as revealed in sculpture, hieroglyphs, painting, and architectural design.

GRG X23K. South America: Nature, Society and Sustainability.
Field study of environmental and social change in selected landscapes in South America, such as protected areas; places of food production; transportation routes; migrant landscapes; urban areas; sites of cultural and historical importance; and issues of human rights.

GRG X23M. Literature, Culture, and Ecology in Northern and Central Europe.
Explore a variety of texts, films, and artifacts from Northern and Central Europe for the insights they provide about the interrelationships between nature and culture and strategies for developing a sustainable relationship to the world around us.

GRG X24E. Applications and Ethics of Digital Spatial Technologies.
Explore the applications and ethical considerations of remote sensing, the Global Positioning System (GPS), and Geographic Information System (GIS) technologies and practice.

GRG X24F. Race, Capitalism, and the Environment.

GRG X24M. Sustainable Maya Geographies - Past to Future.
Explore landscapes, conservation, and human-environment dynamics in the Maya region of Central America from more than 10,000 years ago to modern times. Compare sustainable practices from the past with those of indigenous Maya communities today to guide the future.

GRG X25. Geography of Texas.
Texas as an environmental and cultural borderland: as a transition zone between plains and mountains, humid and arid, South and West, Anglo-America and Latin America.

GRG X25E. The Healthy, Livable City.
Explore the design of the built environment and its potential for addressing and preventing many childhood and adult health concerns in the United States. Examine how to create healthy, walkable, vital communities for all.

GRG X26. Regions and Cultures of Europe.
Spatial patterns in Europe, with emphasis on cultural, historical, and political geography.

GRG X26C. Sensing: Elemental Media.
Explore a sensory ethnographic investigation of urban ecology, organized around air, water, earth, and fire as themes for engaging with the city through media and the senses.

GRG X26G. International Political Economy of Lower-Income Countries.
Explore the ways that China, India, Brazil and other lower-income countries are transforming the patterns in global finance, trade, aid, women's empowerment, and the control or corruption.

GRG X27. Geography of the Former Soviet Union.
A systematic introduction to cultural, physical, political, and economic geography of the former Soviet Union. Focus on the fundamental transformation that the former Socialist Union Republics, now sovereign states, have undergone since 1991.

GRG X27G. Introduction to Geospatial Artificial Intelligence.
Focus on artificial intelligence (AI) and machine learning (ML) methods and their applications on geospatial problems. Explore python programming and GIS data preparation for machine learning models, ML foundations, regression, clustering, decision tree and random forest, neural network, embedding, and location representation learning.

GRG X28E. Geography in Eastern Europe and Eurasia.
Explore alternatives to nation-state imaginaries across Eastern Europe and Eurasia. Examine spatial thinking, utopia, dystopia, the history of geosciences, counter-mapping, and the decolonial geopoetics of space.

GRG X28F. Black Geographies.
Explore the relationship between Blackness and the production of space and place. Examine the tensions and possibilities that emerge when Black people are rendered un-geographic as a fundamental component of racial capitalism while they are simultaneously creating spaces of freedom under constant threats to Black life.

GRG X28J. Land in America.
Explore how the history of land helps explain the society we live in today and ideas about the human-nature relationship.

GRG X28L. Asian Diaspora on Indigenous Lands.
Explore Indigenous and Asian entanglements and solidarities on Turtle Island (North America) and the Pacific. Examine settler colonialism, racial capitalism, war and militarism, racism and power, and environmental change.

GRG X29S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRG X30F. Geographies of International Development in Africa.
Critically examines the major approaches to "Development" in colonial and postcolonial eras, with a focus on a range of African resources: from water to wildlife, forests to farms, airways to rangelands, and including a consideration of African bodies themselves as sites of development and resistance.

GRG X30L. Lidar Analysis.
Discuss the fundamental concepts and applications of light detection and ranging (lidar). Assess aerial and ground-based lidar including the quality of the data, how to process the raw data, and analysis of data.

GRG X30W. Water and Watersheds.
Exposure to numerical analyses techniques developed by hydrologists and to fundamental equations controlling water transfer over and through earth materials. Learn how to administer hydrologic applications to practical problems in physical geography, geology, civil engineering, ecology, and environmental sciences.

GRG X31E. East European Transnational Worlds to 1914.
Examine an overview of major developments in the economic, political, social, cultural, and gender and sexuality fields of East European history before 1914. Explore diplomacy, institutional legacies of war and peace, urban and rural developments and inequalities, spaces of language and religion, race, labor migration, and the arts.

GRG X31K. Nature, Society, and Adaptation.
Long term trajectories of change in human environment relationships, including issues of human evolution and human nature, violence, population, food, agriculture, urbanization, globalizing modernization, and

environmental impacts; issues of sustainability, cultural survival, human rights, and environmental protection.

GRG X32L. Community and Citizen Science.
Examine the contributions of volunteered geographic information (VGI) to geographic knowledge alongside an analysis of alternative forms of community-based knowledge production. Explore an overview of citizen science, community science, and VGI datasets. Develop and carry out community-based participatory research projects informed by the growing literature on community and citizen science.

GRG X33C. Severe and Unusual Weather.
A continuation of Geography 301K, focuses on atmospheric hazards such as severe thunderstorms and their offspring (hail, lightning, tornadoes, damaging winds and flash floods) as well as tropical cyclones. Covers human risk perception in relation to atmospheric hazards.

GRG X33K. Climate Change.
Examines changes in climatic systems over both short and long time periods in relation to impacts on physical and ecological systems. Discusses past, present, and future changes in climatic conditions and the methods used to make those evaluations.

GRG X34. Conservation, Resources, and Technology.
Analysis of the relationship between the human population and its resource base, with particular emphasis on current problems in environmental resource management.

GRG X34E. Children's Environmental Health.
Discuss environmental health issues as they pertain to children's health. Focus on emerging scientific and public health issues such as water quality, air pollution, endocrine-disrupting chemicals, and the food environment.

GRG X34K. Soils.
Morphology, genesis, properties, and distribution of world soils. Factors of soil formation.

GRG X34L. Vulnerability to Natural Hazards.
An interdisciplinary approach, set right at the nexus of both physical and human geography, to studying the types of natural disasters that occur throughout Earth with a focus on tropical areas. Explore a region's susceptibility to natural disasters by studying the physical phenomena that incite specific hazards so that their spatial distribution can be outlined. Utilize theoretical frameworks that can expose the social causes of human vulnerability, the political repercussions of disasters, and how disaster response varies from country to country depending on varying political stances and economic conditions.

GRG X35C. Quaternary Landscapes.
Changing physical and biotic landscapes on the Ice Age earth during the last two million years. Reconstruction of Quaternary geomorphic landscapes based on principles and applications of geochronology and paleoclimatology.

GRG X35D. Anthropocene.
Evaluates the role of humans in changing Earth systems. Examines the evidence used to reconstruct past environments, to decipher the ecological and biogeographical consequences of land use, to measure altered surface processes, to distinguish the anthropogenic contribution to climate change, and to predict likely future scenarios. Explores the interaction of human history with altered biophysical patterns and processes. Assesses the recognition of the Anthropocene as a potential new epoch in Earth history, including the implications of that recognition for environmental stewardship.

GRG X35K. Mountain Geoecology.
Geological evolution of mountains. Physical geography of mountains: climates, soils, vegetation, landforms and geomorphic processes.

GRG X35N. Landscape Ecology.
Discuss spatial patterns in the Earth's biosphere found within landscapes, typically areas measured in square kilometers. Examine the processes that create those patterns, drawing from ecology, biogeography, and many other disciplines. Use Geographic Information Systems (GIS) to analyze and understand the spatial arrangements and configurations of natural and human-modified environments.

GRG X36. Contemporary Cultural Geography.
Recent theoretical developments in cultural geography, with a focus on landscapes and the everyday practices that imbue them with meaning; the ways those meanings are contested and are the foci of struggle; and how the relationship between culture and space plays a central role in the social construction of identity.

GRG X36C. National Parks and Protected Areas.
Introduces current conservation principles and management strategies; outlines the challenges, changes, and dilemmas associated with protected areas.

GRG X37. The Modern American City.
Issues facing residents of United States cities, such as transportation and housing, poverty and crime, metropolitan finance, environmental and architectural design; historical/comparative urban evolution.

GRG X38C. Rivers and Landscapes: Fluvial Geomorphology.
Drainage basin evolution and channel adjustment, variability of river systems in differing geomorphic regimes, relationships between fluvial systems and other components of physical geography, and the role of humans as geomorphic agents.

GRG X39. Process Geomorphology.
Analysis of geomorphic processes and their effects on landform development.

GRG X39K. Environment, Development, and Food Production.
Assessment of various types of agriculture with regard to environmental factors and management techniques.

GRG X40D. Political Ecology of Globalization and Environmental Degradation.
Study of current environmental problems from the perspective of political ecology, which critically examines political, economic, and social relations between humans and the natural world. Uses case studies from Africa, Latin America, Asia, and the Middle East to address climate change, deforestation, desertification, biodiversity, and environmental justice.

GRG X40L. Landuse/Landcover Change Practicum.
Focuses on best practices for classifying and mapping land use and land cover, as well as how they change over time in an experiential learning environment. Develop testable hypotheses answered by the original data analysis and interpretation.

GRG X40U. Internship and Service Learning.
Internship experience in an urban studies-related public or nonprofit agency. The opportunity to apply the knowledge, theory, and understanding gained from courses in areas of specialization to urban issues in a professional setting. Includes an academic service-learning component.

GRG X41K. Landscapes of Mexico and Caribbean America.
The natural regions and cultural landscapes of Mexico, Central America, and the West Indies.

GRG X42C. Sustainable Development.
Historical and contemporary analysis of international development with a focus on the prospects for environmental sustainability.

GRG X42N. Sustainable Landscapes and Seascapes.
Survey the ecological, economic, and social dimensions of sustainable uses of land-based and aquatic natural resources. Examine the sustainability of landscapes utilized for forestry, farming, agroforestry, and rangeland systems, as well as the riverscapes and seascapes utilized by people.

GRG X42S. Sustainability, Equity, and Health.

GRG X43E. Mapping Latin America.
Discuss the role of maps in the creation of Latin America as a specific sort of place. As such, allows familiarity with a broad overview of Latin American history from Pre-Columbian civilizations to the modern period.

GRG X44G. Environmental Law.
Examine environmental law and its impact on all life. Analyze key federal environmental statutes and leading cases in which these statutes have been interpreted by courts.

GRG X44K. Global Food, Farming, and Hunger.
Examination of contemporary transformations in global agro-food systems, with emphasis on the current paradox of epidemic obesity in some parts of the world and enduring hunger in others.

GRG X46. The Human Use of the Earth.
The state of the world from an ecological perspective. Case studies are drawn from a wide range of ecological settings and involve both traditional and modern societies.

GRG X48E. Tourism and Place in the Global South.
Debunk the myth that tourism is inherently desirable by unpacking the mechanisms of violence and inequalities of power embedded in tourism and tourism development.

GRG X49S. Global Sustainability and Soil.
Examine soil as a resource from the perspectives of natural and sustainability science, including soil ecology and biodiversity, formation, fertility for ecosystems and farming systems, soil health, distinguishing characteristics in nature, taxonomy, and soil spatial variability around the globe.

GRG X50E. Geoprocessing.
Computer programming and scripting applied to geospatial data.

GRG X50K. Geographies of Globalization.
Examines globalization in historical and contemporary contexts, with a focus on race, class and gendered power.

GRG X56C. Geo-Archaeology and Environmental History.
Long-term ecology as reconstructed from settlement and land-use histories. Empirical case studies in environmental history from the Mediterranean region, the Near East, and Mesoamerica. Applications to degradation, desertification, sustainability, and global change.

GRG X56D. Water Resources in Latin America and the Caribbean.
Examine the variability of landscapes, climatic regions, and anthropogenic activities found throughout Latin America and the insular Caribbean to explore the complex issues related to water resource accessibility.

GRG X56T. Topics in Geography.

GRG X56T.1. The Culture of Cities.
Examines the social, geographical, and cultural evolution of the United States from a rural and small-town society to an urban and suburban nation. Subjects may include the segregation of public and private space; the formation of urban subcultures organized by gender, work, race, religion, and sexuality; social and spatial divisions between rich and poor and native-born and immigrant; and the increasing importance of cultural capital" in reshaping urban politics and in conflicts over revitalization and gentrification.

GRG X56T.14. Geography of Religion in Eastern Europe and Russia.
A comprehensive overview of major religious culture regions in the former Eastern bloc countries.

GRG X56T.2. Memory and Place.
Explores how cultural memory is produced in its various forms, from memorials, public art, and commodities to popular culture, rituals, and museums, and how public remembering is inevitably anchored in specific geographic places.

GRG X56T.3. Geographical Information Systems and Remote Sensing for Archaeology and Paleontology.
Designed to give students interested in the fields of archaeology, physical anthropology, and paleontology a foundation in the use of geographical information systems (GIS) and the analysis of remotely sensed data from satellites and aerial photographs.

GRG X56T.4. Northern Lands and Cultures.
Develops geographical understanding of the Circumpolar region of the North, an ancient human habitat, home to distinct millennia-old civilizations.

GRG X56T.5. Urban Publics.
The concept of the public in the city and how it has shifted over time along the lines of gender, ethnicity, race, and class. Examines contemporary struggles over defining the urban public and how those struggles are linked to social, cultural, political, and economic forces. Subjects include uses of public space, the public sphere, eminent domain, urban politics, civic engagement, and political participation.

GRG X56T.6. The Environmental Change and Management of Large Rivers.
An interdisciplinary perspective on the physical processes of large rivers. Subjects include land degradation; deforestation; river engineering; flood processes; sedimentology; floodplains management; ecohydrology; Quaternary fluvial geomorphology; and paleohydrology.

GRG X56T.8. Global Societies.
The use of geographical perspectives to make sense of the global society. Subjects include globalization, war, economic crisis, and social movements.

GRG X57. Medical Geography.
The geographic distribution, expansion, and contraction of the infectious diseases that have the greatest influence in shaping human societies today: malaria, AIDS, and others.

GRG X58E. Geography and Religion.
Ideas about the relationships among the natural world, myth, and ritual; principal focus on Christianity, Islam, and Judaism and their offshoots and antagonists in the Western world.

GRG X60G. Environmental Geographic Information Systems.
An introduction to the creation and use of geographic information systems.

GRG X64K. Advanced Remote Sensing and Pattern Analysis.
Advanced classification techniques for satellite image processing and landscape pattern analysis.

GRG X66C. Comparative Ecosystems.
The important ecosystem processes that affect the distributions, characteristics, and management of natural environments at landscape, regional, and continental scales. Ecosystem functions, including nutrient cycling, water balance, and the role of natural disturbances in a wide range of ecosystems, from the tundra to the rain forests and grasslands of the tropics.

GRG X66K. Biogeography.
Contemporary patterns of plant and animal distribution, and the environmental and historical processes affecting them.

GRG X67D. Climate Change and Vegetation Response in the Kalahari.
Using the Kalahari as a basis for understanding, explore the ecological dynamics of savanna systems and their interactions with climatic variability over time and space. The focus on monitoring and assessment to inform rangeland management includes vegetation sampling and calculations of carrying capacity. Examine how savanna systems dynamics are comparable across regions, and thus are both globally and UT-locally relevant.

GRG X67K. Vegetation Ecology.
Plant autecology and synecology. Ecological factors and processes of plant communities. Vegetation geoecology, succession, and dynamics.

GRG X68C. Spatial Analysis and Geographic Information Systems.
Addresses spatial problem solving by focusing on both the theoretical/conceptual and practical aspects of geographic information systems modeling. Describes geographic information systems techniques and spatial statistics used to quantify and measure spatial patterns.

GRG X68D. Enviro-Cultural Dynamics in Botswana.
Examines the Kalahari case study of the San "First People" and their history of treatment in the Central Kalahari Game Reserve compared to other more recently arriving peoples. Explores how cultural groups are differentially treated and how that treatment and their ties to and uses of the landscape evolves over time.

GRG X69D. GIS Applications in Social and Environmental Science.
A hands-on approach to covering the appropriate use of geographical information systems (GIS) and spatial statistical analysis in different sub-disciplines.

GRG X70C. Advanced Geographic Information Systems.
Study of methods of spatial analysis, design and implementation of a geographic information system, vector and raster modeling, and advanced applications of geographic information systems.

GRG X70D. Spatial Reasoning with Geographic Information Systems.
Using Geographic Information Systems (GIS) and spatial analysis, examine different types of real-world problems. Read newspaper and journal articles about real issues or problems and explore how they can be addressed and potentially solved. Focus on specific problems and learn about the GIS tools and techniques that are appropriate for each scenario.

GRG X73F. Field Techniques.
Introduction to the collection and mapping of environmental and cultural data, involving both classroom lectures and outdoor exercises.

GRG X73K. Field Methods for Landscape Characterization.
The design of research questions and the acquisition of data for the characterization of landscapes. Utilizes geographical and ecological field-based methods.

GRG X74. Frontiers in Geography.
Current concerns and methodology in the field of geography; an introduction to theory and research in geography.

GRG X76T. Topics in Geography.

GRG X79H. Honors Tutorial Course.
Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis. Regular conferences with the faculty supervisor are also required.

GRG X79K. Conference Course.
Supervised individual study of selected problems in geography.

GRG X79L. Practicum: Internships in Applied Geography.
Research and staff experience working in an appropriate government agency or private business.

Graduate Courses

GRG X19S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRG X29S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRG X80. Field Course in Geography.
Collection of data, formulation of meaningful categories of regions, development of hypotheses of cause-and-effect relations through direct contact with the phenomena and processes in the area where a problem is located.

GRG X80C. Myth, Ritual, Place, and Environment.
Impact of local religious lore and practice on cultural landscapes, conservation, and sense of place; cultural and environmental consequences of the spatial expansion of world religions; other themes in the geography of religion, including civil religion and environmental theology.

GRG X80D. Environment and Health in Latin America.
Issues related to health, health care, and development in Latin America and the Caribbean, considered with the recognition that health depends on the interactions of social, economic, and political factors as well as on health care services.

GRG X80E. Geomorphology of the Southwest.
Geography of West Texas and New Mexico; late Cenozoic basalt flows, volcanic ashes, sand sheets, alluvium, paleolake deposits, glacial moraines, colluvium, and soils; integration of landforms and landscape ecology. Includes a ten-day field trip.

GRG X80F. Field Techniques in Sediments and Soils.
Designed to provide experience in field description of sediments and soils in Central Texas; second half of course focuses on field interpretation of geomorphology and landscape evolution using sedimentary deposits and soils.

GRG X81. Topics in Seminar in Historical Geography.
Topics include Latin America, Anglo-America, Texas, boundaries, settlement origins and patterns, origins of agriculture.

GRG X81C. Mapping the Middle East.
Ways in which the Middle East is and has been represented cartographically. Cartographic representations of the region during the fifteenth and sixteenth centuries; the nature and evolution of a distinctive Islamic cartographic tradition; the role and use of maps during the nineteenth and twentieth centuries both in the extension of colonialism and in the creation of modern states; and the contemporary use, applications, and implications of geographic information systems in organizing and representing data spatially.

GRG X81D. Soil Geomorphology.
Examine three aspects of soil geomorphology: soil formation as it relates to earth surface processes, soils and sustainability, and soil ecosystem interactions.

GRG X82K. Geo-Archaeology and Environmental History.
Long-term ecology as reconstructed from settlement and land-use histories. Empirical case studies in environmental history from the Mediterranean region, the Near East, and Mesoamerica. Applications to degradation, desertification, sustainability, and global change.

GRG X83C. Topics in Seminar in Environment and Development.
A third- and fourth-world perspective on the geographic implications of international development; emphasis on local and global environmental effects.

GRG X83C.2. Environment and Development in the Middle East.

GRG X83F. Long-Term Climate Change and History.
Climate and atmospheric science considered with long-term climate and historical and archaeological change over Earth history, focusing on the Quaternary to the future.

GRG X84C. Watershed Systems and Environmental Management.
The effect of landcover change on drainage basin processes, considered from a geomorphological perspective over varying temporal and spatial scales. Topics may include watershed management, stream channel restoration, fluvial geomorphic processes, and Geographic Information Systems applications to drainage basin processes.

GRG X85. Topics in Seminar in Regional Geography.

GRG X85.1. Regional Geography of Latin America.
Topics include land and life in Central America; culture, environment, and development in Latin America; recent trends in Latin American geography.

GRG X85.2. Europe.
Topics include various aspects of the economic and political geography of individual nations or regions, such as regional differences in Southeast Europe, agricultural developments in European Community countries, trade, viability of individual countries, the changing resources picture in Western and Eastern Europe.

GRG X85.3. Anglo-America.
Topics include agricultural patterns of the United States, comparative regional studies, measurement and delimitation of regions, analysis of population shifts.

GRG X85.4. Asia.
Topics include economic regionalization in Asia, spatial structure of Asian manufacturing, regional discrimination analysis for selected areas and variables in Asia, urban structure in South Asia, developmental activity and spatial change in India.

GRG X85.5. Regional Geography of the Middle East and North Africa.
Topics include developmental activity and spatial change in the Middle East, comparative regional studies.

GRG X85C. Quaternary Landscapes.
Changing physical and biotic landscapes on Ice Age earth during the past two million years. Reconstruction of Quaternary geomorphic landscapes based on principles and applications of geochronology and paleoclimatology.

GRG X85H. Wetlands: Earth System Science and History.
Biophysical, historical, and policy/restoration components of wetlands with global and regional case studies.

GRG X86C. Topics in Seminar in Quaternary Studies.
Issues and new developments in regional and global aspects of Quaternary climates, biota, prehistory, and landscape evolution.

GRG X87C. Political Ecology.
An introduction to the history of development theory, economic globalization, studies in the history of science, issues of social justice, and critical studies of environmental history.

GRG X87D. Globalization, Conflict, and Resistance.
Focuses on a theoretical and empirical understanding of the economic, cultural, political, and policy dimensions of globalization; study of the impact of globalization on people and places; understanding of class and identity conflicts using case studies from Latin America, the United States, Europe, Africa, the Middle East, and Asia; and exploration of theories of social movement with examples from the global North and South.

GRG X87K. Geoarchaeology of Mesoamerica.
Examine three areas of Mesoamerican geoarchaeology: regional environments, the lines of scientific evidence for current and past environments, and human-environmental interactions from the Pleistocene to the present.

GRG X88. Seminar in Resources and Conservation.
Development of the conservation movement, problems of resource misuse, conservation practices, state and national conservation policies, nature and distribution of natural resources.

GRG X88C. Indigenous Maps, Architecture, and Enculturation of Colonial Mexico.
The encounter of Spanish and indigenous cultures and ecologies; regional diversity of agricultural, urban, and economic development from 1521 to 1810; ethnic transformation and new socioeconomic configurations.

GRG X88R. Forest Hydrology.
Traces the history of forest hydrology as a science that describes the natural complexities of water movement through forested headwater landscapes and the changes imposed to these processes by disturbances associated with extreme weather events, deforestation, timber harvesting, wildfires, and climate change.

GRG X89P. Hydrogeomorphology.
Hydrologic and geomorphologic applications to practical problems in physical geography, geology, civil engineering, ecology, and environmental sciences.

GRG X90. Cultural and Humanistic Geography.
Analysis of human-environment interactions by employing the concepts of place, home, and dwelling. Discussion of humanistic and postmodern geographical research.

GRG X90C. Landscape, Meaning, and Society.
The creation, transformation, and meaning of landscapes within different societies through time. Iconographical analysis of the built environment; impress of belief and ideology on landscape; analysis of nationalistic and authoritarian landscapes; problems of defining and mapping ethnicity; civilizational process and behavior; institutional vandalism, place annihilation, and the destruction and effacement of landscape symbols; cultural and geographical foundations and unintended consequences of global economic integration.

GRG X90K. Issues in Geography.
Examines the history, philosophy, and ontology of geography, including its various subfields.

GRG X90L. Research in Geography.
Builds on topics explored in Geography 390K by focusing on epistemology and research in the field of geography. Students develop plans for research and write a research proposal.

GRG X90S. Environment, Development, and Food Production.
Assessment of various types of nonmechanized agriculture with regard to environmental factors and management techniques.

GRG X91C. Dynamics of Earth Systems.
An overview of climate, vegetation, soil, and landform processes. Principles and methodology of physical geography.

GRG X91M. Multivariate Techniques in Spatial Analysis.
The application of multivariate data analytic techniques including regression, factor, canonical, and discriminatory analysis of spatial problems.

GRG X92C. The Anthropocene in the Longue Duree.
Explore the "Anthropocene" (early to future) from the perspectives of multiple disciplines including geography, anthropology, archaeology, geology, and ecology. Discuss its drivers, its historical roots, and its chronologies.

GRG X92D. Grant Writing in Geography.
Designed to train students to write competitive and successful applications for extramural grants and fellowships.

GRG X92M. Seminar in Biodiversity Conservation.
Examines issues that involve the conservation and sustainable use of plants, animals, and ecosystems.

GRG X93C. Seminar in Digital Landscapes.
Explores the theoretical and applied issues associated with the acquisition, analysis, simulation, and visualization of digital geographic information, with an emphasis on current trends in landscape characterization, landscape ecology, biodiversity, global change, environmental remote sending, and socio-ecological systems.

GRG X93D. Geographical Information Systems and Ecological Modeling.
Covers the steps involved in conceptualizing and formulating predictive models in a raster geographical information systems environment. Although many of the topics covered are fairly generic and can be applied to any application area in which raster data are used, species distribution models will be used as the example application area.

GRG X93M. Advanced Remote Sensing and Quantitative Landscape Ecology.
Advanced digital image processing of optical satellite imagery for landscape composition and pattern analysis.

GRG X94. Seminar in Urban Analysis.
Research seminar in urban issues: demographic, environmental, and transportation modeling; metropolitan finance; and urban social pathologies.

GRG X94F. Feminist Geographies.
Uses a feminist geographic lens to interrogate a range of historical and contemporary geopolitical and geoeconomic issues including (re)productive labor struggles, migration, development, globalization, colonialism, nationalism, militarization and transnational resistance movements.

GRG X94K. Geographic Information Systems.
An introduction to the design and use of geographic information systems and to computer-based tools used to store, manage, analyze, and display spatially referenced data.

GRG X94L. Advanced Applications of Information Technology.
Advanced issues in computer cartography, geographic information systems, three-dimensional environmental reconstruction and rendering, terrain modeling, animation of environmental processes, and hypertext and multimedia authoring. Interdisciplinary subjects, such as the application of geographic information systems to archaeological research, historical demography, and habitat mapping and analysis.

GRG X95. Cultural Adaptation and Change.
A graduate-level introduction to cultural behavior, adaptation, evolution and transformation, with emphasis on demography, diffusion, migration, ethnicity, and institutions.

GRG X95D. Latin American Cultures, Environment, and Development.
Exploration through Latin American examples of issues of cultural identity and territory, adaptive strategies, environmental impact, conservation, cultural survival, parks and people, and sustainable development.

GRG X95K. Getting and Staying Funded.
Written, oral, and multi-media skills for improved success in academic and non-academic professional arenas including, but not limited to, grant and thesis proposal writing, CV and job application writing, audience-targeted formal and informal oral presentations, multimedia production (e.g., poster, video), and career timeline planning.

GRG X96. Techniques in Pollen Analysis.
Field sampling, laboratory processing, microscopy, pollen grain morphology, pollen counting, and data-handling techniques.

GRG X96C. Seminar in Current Geographic Research.
Review and discussion of recent research projects across the field of geography; includes analysis of theories and methodologies, and various methods for presenting results.

GRG X96K. Quaternary Palynology.
Methods, principles, and applications of pollen analysis to vegetational, paleoenvironmental, and ethnobotanical reconstructions.

GRG X96T. Topics in Geography.

GRG X97. Conference Course in Geography.
Supervised study and research.

GRG X98. Thesis.

GRG X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

GRG X98T. Supervised Teaching in Geography.
Teaching under the close supervision of the course instructor; group meetings with the instructor, individual consultations, and reports throughout the teaching period.

GRG X99W. Dissertation.

Professional Courses

GRG X19S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRG X29S. Topics in Geography.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GRS - Graduate School

Graduate School: GRS

Lower-Division Courses

Upper-Division Courses

Graduate Courses

GRS X82. Inside View of the Federal Policymaking Process.
On-the-ground and behind-the-scenes study of the federal policymaking process and the institutions and people that comprise the federal government. Sampling of literature on federal government dynamic and face-to-face interaction with individuals from the major institutions that participate in federal governance. Discussion and analysis of information gathered from meetings with officials from Congress, the White House, executive branch agencies, lobbying firms, nongovernmental organizations, think tanks, interest groups, and the media.

GRS X85. Archer Center Independent Study and Research.
Tailored to individual students' graduate programs of study. An Archer Center faculty member will work independently with each student to develop a research project that is designed to advance the student's academic and research goals. The project will align with the requirements of the student's graduate degree.

GRS X92. Archer Center Washington Internship.
Internship with a federal government-related agency or organization in Washington, DC, facilitated through the Archer Center's program in public policy. Students select their internships and are supervised by a UT Austin faculty member.

GRS X93. Topics in Graduate Education.

GRS X94. Designing Your Future.
Introduction to design thinking as a framework for exploring and shaping professional futures. Discuss self-reflection, career prototyping, and strategic decision-making. Engage in exercises such as information interviews, self-assessments, and iterative planning to identify meaningful career directions. Explore various pathways across academic, industry, business, nonprofit, and creative sectors.

GRS X96. Reimagining Career Possibilities for Humanities, Arts, and Social Sciences.
Explore the multitude of career options available to advanced degrees in humanities, arts, and social sciences. Includes career self-assessment, informational interviewing, and career preparation.

GRS X97. Teaching Assistant Fundamentals.
Skills, behavior, and strategies for effective college teaching.

Professional Courses

GSD - German, Scandinavian, and Dutch Studies

German, Scandinavian, and Dutch Studies: GSD

Lower-Division Courses

GSD X01. Introduction to the Study of Northern Europe.
Introduces significant moments in and monuments from the cultural histories of the German-speaking, Scandinavian, and Dutch nations from their beginnings to the present. Designed to discuss representative problems in research and analysis in cultural studies and the humanities.

GSD X10. Introductory Topics on Northern Europe.
Introduction to important topics in the history of Northern Europe's culture, including areas from history, the arts, film studies, language and linguistics, and literature.

GSD X10.1. American Jews: The Yiddish Experience.
Focuses on over a century of Yiddish-based contributions to American literature, music, and film, including works by Isaac Bashevis Singer, Michael Chabon, Woody Allen, and the Marx Brothers.

GSD X11C. Movies Go To War.
A comparison of films from various nations about major twentieth century wars to the historical facts of the conflicts as practicums in critical comparative analysis of histories as representations.

GSD X11D. Race and Gender Stereotypes in Germany.
Examination of pseudoscientific popular theories of "race" and gender that developed in Germany and elsewhere in Europe in the nineteenth century, and how these affected the lives of millions and shaped current thinking about "racial" and gender differences.

GSD X11E. Grimms' Fairy Tales.
Reading and discussion of tales from the Grimms' collection, as well as some of the relevant secondary literature.

GSD X11F. Germany and Globalization.

GSD X11G. Luther's World.

GSD X11I. Sweden: Innovating for the World.
Using case studies, trace Sweden's long history with innovation, starting with classic innovations produced with direct governmental support in the eighteenth century and continuing into present day with innovations like Spotify and Swish leading the way.

GSD X11J. Children's Literature of Northern Europe.
Explore nineteenth- to twenty-first-century children's literature from Norway, Sweden, Denmark, Germany, Switzerland, Austria, Finland, Belgium and the Netherlands. Focus on the prominent place of children's literature in the popular culture of central and northern Europe, as well as the serious issues and themes which north Americans might otherwise consider "adult" that are often found in this genre-death, war, poverty, social justice, and family conflict-alongside whimsy, warmth and wonder.

GSD X12C. The Conversion of Pagan Europe.
Examine the familiar and unfamiliar fragments of what remains from pre-Christian European culture--the limited written records, the artifacts, and the folklore--as well as the more plentiful anti-pagan writings of early Christian missionaries. Test many of the popular claims about how Europe's pre-Christian inhabitants lived, what they believed, and how Christianization impacted their lives against the limits of what we can actually know, using the tools from the study of history, cultural studies, and religious studies.

GSD X12E. The Faust Legend: From the Magus to Today.
Examine a broad selection of the (re)tellings of the Faust legend, i.e., the "bargain with the Devil," to reveal how this particular narrative forms a pillar of the cultural heritage of the European Christendom.

GSD X19S. Topics in the Study of Northern Europe.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

GSD X21W. German Cultural History.
Excursions, local research, and exposure to a German viewpoint on contemporary European affairs.

GSD X29S. Topics in the Study of Northern Europe.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

GSD X31C. Films of Ingmar Bergman.
An introduction to the films of Ingmar Bergman.

GSD X31D. Feminism and Film: Women Filmmakers in Northern and Central Europe.
An introduction to the work of women filmmakers from Scandinavia, Germany, as well as to the viewing and interpretation of films in general.

GSD X31E. Scandinavian Cinema Since 1980.

GSD X31F. Central Europe Goes to Hollywood.
Survey research tools and methods used to study the history of Hollywood film industries and the roles that films and film professionals play; based on films and industry careers connected to Central Europe.

GSD X31G. Silent Film in Germany and Scandinavia.
Explore silent film and filmmaking in Germany and Scandinavia.

GSD X31J. German Cinema 1918-1945.
Explore the history and aesthetics of German cinema from 1918 until 1945.

GSD X41D. Social Dramas of Henrik Ibsen.
A detailed introduction to Ibsen's social dramas (1877-1899), emphasizing their unity as a prolonged commentary on the society of his era and the variety of its human problems. Special emphasis on subjects such as: the family and the home; the public world of reputation, work, and citizenship; the predicaments of men and women in a male-dominated society; and the motives of our interventions into the lives of others.

GSD X41E. Hans Christian Andersen.
Introduction to such Hans Christian Andersen tales as "The Little Mermaid," "The Ugly Duckling," and "The Emperor's New Clothes. Examination of their author and the romantic period in which they were written, as well as their historical, philosophical, and literary context.

GSD X41F. Women and the Holocaust.
Introduction to both the history of Jewish and German women during World War II and the Holocaust, and to women's narratives and self-representations of this period. Historical sources, memoirs, films, and interviews will be used as source material.

GSD X41G. Isak Dinesen/Karen Blixen.
An introduction to the twentieth-century Danish author Karen Blixen, focusing on her major themes such as gender and destiny, and examining her role as a literary figure.

GSD X41J. Contemporary Scandinavian Stories.
An analysis of contemporary Scandinavian literature and films, how they reflect Scandinavian reality, and how Scandinavian identity is created through sports, food, and politics.

GSD X41K. The Scandinavian Contribution to World Literature.
Close readings of the most influential Scandinavian texts, including works by Nobel Prize-winning authors such as Knut Hamsun and Selma Lagerlof, as well as the playwrights August Strindberg and Henrik Ibsen while addressing important themes caused by the

revolutionary transition to modernity in Scandinavia around 1900, including emancipation of women and sexuality.

GSD X41L. Vikings and Their Literature.

GSD X41M. Arendt and de Beauvoir.

GSD X41N. Nobel Prizes: Literature and Politics.

An introduction to Nobel Prize winning authors from northern Europe in the context of literary prizes and the politics of literary reputation. Analyze and compare literary works, set novels into historical context, investigate what popular and scholarly reviews do, and research in both popular and scholarly sources.

GSD X41Q. Northern European Comics.

A study of graphic novels from Scandinavia, Germany, and Holland to understand the art form of comics and the influence of the cultures in which they were produced. Readings, all in English, cover various genres and time periods.

GSD X41S. German Media: Print to Television.

Examine the history of media technology and its cultural and political implication in the German (speaking) context.

GSD X41T. Germanic Novels: History, Culture, and Interpretation.

Explore several representative novels by German, Scandinavian, or Dutch writers, along with representative texts and essays on the novel as a genre and interpretative strategies. Examine these works in their literary and cultural contexts via lectures and discussions.

GSD X41U. Hegel and His Heirs: Philosophy That Remade the West.

Explore how Hegel's philosophy contributed to the founding of the modern social sciences and led to innovations in the study of religion, psychology, education, social organizations, and social reform.

GSD X51C. Language, Culture, and the Texas German Experience.

The evolution of the culture and language of German immigrants to Texas from the 1840s through the present and how they have influenced other ethnic groups in Texas.

GSD X51D. Identity, Codes, and Culture.

Explore how to read identities as patterns in literary texts, linguistic and cultural corpora with digital methods, and come to a deeper understanding of individual texts and textual phenomena. Examine digital research methods, tools, and use cases. Work hands-on with literary and linguistic sources.

GSD X60. Topics in Culture and Society.

In-depth explorations of contemporary and historical moments in the cultures, social relations, cultural histories, and intellectual histories of the nations in Northern Europe and its cultural networks.

GSD X60.1. Holocaust Aftereffects.

Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.

GSD X60.3. Heretics and Freedom Fighters, 1350-1650.

Explores the theologies, politics, and personal identities that emerged and passed away in this era.

GSD X60.5. Germany and Immigration.

GSD X61C. Introduction to Germanic Religion and Myth.

Survey of the sources and main features of Germanic religion and of the transition from paganism to Christianity in northern Europe and the Germanic territories of western Europe. Subjects include cosmogonic myths; the origin of man and of society; the concept of the soul; gods and goddesses and their mythology; and the organization of worship.

GSD X61D. Medieval Women Mystics.

The life and writings of Saint Birgitta of Sweden, fourteenth-century visionary, religious reformer, and pilgrim, examined and compared with her predecessor Hildegard of Bingen (Germany), her successor Margery Kempe (England), as well as Margery's mentor, Julian of Norwich. Social and historical contexts for all four of these women mystics will be explored in depth.

GSD X61E. Tolerance in Dutch Culture.

The historical roots of Dutch "tolerance" and how it plays a role in current Dutch culture and attitudes towards religious, gender, and sexual differences, as well as drug use, prostitution, and euthanasia. Exploration of the stereotypes and the actuality of these Dutch attitudes and policies from an international comparative perspective.

GSD X61F. Squaring the Vienna Circle.

Traces the origin of the Vienna Circle of Logical Empiricism in nineteenth-century Europe, and introduces central texts and problems of intellectual history and historical epistemology at the roots of today's analytic philosophy.

GSD X61G. Northern Gods, Northern Faiths: The Conversion of Scandinavians, Finns, Northern Slavs and Shamans.

An introduction to the basic source texts for several pre-Christian belief systems evolving in geographic proximity and their influence on one another including pre-Christian Slavic; pre-Christian Scandinavian; pre-Christian Sami and Finnish; and ancient and modern Siberian shamanism.

GSD X61J. Protest, Revolt, and Revolution in West Germany.

Explores pivotal political and cultural movements in post-1945 West Germany, including the student movement, terrorism, feminism, the Green movement, and the anti-nuclear movement. Students engage with a wide array of primary and secondary sources ranging from literature and films to essays, newspaper articles, and speeches in order to examine the roots and results of protest, revolt, and revolution during this period of German history.

GSD X61K. German Nationalisms.

History of diverse views and movements regarding German national identity within their respective contexts, 1800-present.

GSD X61L. Anti-Semitism in History and Literature.

GSD X61M. Berlin.

GSD X61N. Exhibitions and Public Spectacle.

Investigate exhibits, world's fairs, museum, monuments, theme parks, and historical reconstructions from Europe and the US, with attention to images of how their sponsoring nations or other entities want to be seen. Examine evidence for both the good and bad sides of national pride and identity. Explore examples of how large-scale culture projects and the public interact. Consider the lasting marks left on the cities and countries sponsoring them.

GSD X61P. Sports and Politics in Germany.

Explore how fascism, communism, liberal democracy, and the current nationalistic backlash against immigration have all used the popularity of sports to achieve their strategic goals, from the 1936 Nazi Olympics to Germany's 2014 World Cup victory and beyond.

GSD X61Q. German Scholars: US Exile.

Examine the migration of established European intellectuals into the US, due to the Second World War. Explore how they worked against their persecutors for their own cultural heritage and to influence US intellectual life. Investigate the ethical dilemmas faced in transplanting their lives and projects into new contexts.

GSD X61R. Viking Language: Runes and Sagas.

GSD X61S. European Immigration to Texas in the Nineteenth Century.

GSD X61T. Switzerland and Globalization.

Investigate how the small European country of Switzerland positions itself in a globalized world and how it competes and thrives in it. Explore the questions of how globalization impacts a small, affluent country and how its economy copes with globalization. Consider Swiss history, and its development of direct democracy, to understand Swiss exceptionalism, its response to contemporary issues, and its influence abroad.

GSD X61U. Politics of Memory: Germany and the United States.

Examine the role that narratives of the past play in politics and policies in both Germany and the United States, by engaging with key theoretical

and empirical debates. Focus on the role of memory in German and US immigration politics.

GSD X61V. Nazi Culture and Politics.
Explore fundamental questions about the unique role of culture in modern democracies and dictatorships by taking an overview of culture and politics in the Third Reich. Examine questions about the relationship between political propaganda and modern entertainment, mass media and authoritarianism, political aesthetics and ideology, and the dynamics of oppression, resistance, and consent.

GSD X61W. Jewish Folklore.

GSD X62C. Globalization and the Coronavirus Pandemic.
Examine the modern globalization process that also incorporates a description of the current Coronavirus pandemic as a phenomenon that is inextricably linked with modern globalization.

GSD X62D. Memories of War.
Consider the ways the wars of the twentieth and twenty-first century are being remembered in Germany and the United States - from poems, novels and films to monuments and the controversial debates about military conflicts that the two countries have been involved in. Utilize theories of social memory, and concepts of individual and social mourning, to analyze how war affects individual lives, how societies mourn, and how remembering war impacts national identity and politics.

GSD X62E. German-American Immigration and Ethnicity.
Explore German immigration to the United States from the colonial era to the present. Examine the motivations for migration; settlement patterns; construction of identity through traditions and festivals; German American's economic, social, and cultural contributions to the United States; and challenges to assimilation.

GSD X62F. Arabs and Vikings: Art and Culture.
Explore the art and culture of the global Middle Ages through close examination of recent films, popular and academic publications, and works of art and architecture that reveal the interconnection between the European and the Islamic worlds.

GSD X62G. Radical Chic: Revolutions from Europe.
Explore innovative European ideas that reshaped United States history and society: Freud and settlement houses, models for education (from Switzerland to Dewey at the University of Chicago), and the labor movement (Marx to Eugene V. Debs and Mother Jones)

GSD X62I. People of the Midnight Sun - Sami Culture and Civilization.
Examine the indigenous people of Scandinavia, the Sami, including their history, culture, and self-expression. Explore issues of indigeneity, decolonization, and religious repression.

GSD X62J. Nordic Noir.
Uncover the dark side of the Nordic countries, from gritty streets to icy fjords, and explore the history, culture, literature, and movies these societies produce.

GSD X62K. Germanic and Scandinavian Modernisms, 1870-1925.
Explore the cultural renaissance between 1880 and 1925 in Northern and Central Europe, covering the period often called the Modern Breakthrough in Scandinavia, but also known as la belle epoque in France and "the gilded age" in the United States.

GSD X62L. Relations Between East Germany and the United States.
Explore and (re)asses the diplomatic, strategic-military relations and socio-cultural entanglements between the United States and the German Democratic Republic, thus complicating our understanding of the West-East divide and Cold War culture.

GSD X62M. Literature, Culture, and Ecology in Northern and Central Europe.
Explore a variety of texts, films, and artifacts from Northern and Central Europe for the insights they provide about the interrelationships between nature and culture and strategies for developing a sustainable relationship to the world around us.

GSD X62N. Memory and Place After the Holocaust.
Examine the literature of Eastern European Jewish Holocaust survivors and their artistic successors. Engage novels, short stories, memoirs, essays, and even song lyrics with questions of memory and of place.

GSD X62P. Transatlantic Memory Cultures.
Explore and compare German and American memory cultures, analyzing the Holocaust, slavery, and colonialism. Analyze the diversity and complexity of (inter)national, local, and indigenous memory cultures while also discussing how Germany and the United States might "learn from each other.

GSD X62Q. Forensic Files: Philosophy Crimes.
Explore political philosophies from the continental tradition (Heidegger/Arendt, Nietzsche, Adorno/Horkheimer, and Agamben/Schmitt) implicated in radical politics and answering to political turning points, with a focus on research and reading in historical contexts.

GSD X62R. Northern Renaissance: Religion, Magic, and Humanism.
Explore Northern Europe's transition from medieval to Early Modern in and through the northern Renaissance. Examine humanist culture and its many tensions with the Church, technological breakthroughs and their social and economic consequences, the connections between the discovery of new lands and the recovery of ancient learning, and the formation of the early modern state.

GSD X62T. Legacies of World War II in Eastern Europe.
Examine the complex and dynamic legacies of World War II and questions of memory, identity, and politics from 1945 to the present.

GSD X73F. Historical Perspectives on the German Language.

GSD X73I. Building Blocks of Modern German.

GSD X77. Capstone Research in German, Scandinavian, and Dutch Studies.
Work leading to assembling a capstone portfolio in German, Scandinavian, and Dutch Studies, including tutorials on norms for presentation, writing, documentation, and research.

GSD X79. Conference Course in German, Scandinavian, and Dutch Studies.
Supervised individual study of selected problems in German, Scandinavian, and Dutch Studies.

GSD X79H. Honors Tutorial Course.
Supervised individual research on a literary or linguistic problem, culminating in an honors paper of some length.

Graduate Courses

Professional Courses

H E - Human Ecology

Human Ecology: H E

Lower-Division Courses

H E X01P. Professional Development I.
Explore common career paths, identify professional and personal goals, and develop entry-level career portfolios.

H E X02P. Ethics Across Life.
Examine applied ethics in the workplace and in adult life with a focus on working in teams and organizations effectively.

H E X03P. Professional Development II.
Explore a practical approach to professional self-presentation, leadership and decision-making, and career development.

H E X15H. Freshman Honors Seminar.
Research presentations by students, faculty, and invited scientists on current issues in human ecology, human development and family sciences, and nutrition.

Upper-Division Courses

H E X25H. Sophomore Honors Seminar.
Students plan, conduct, write, and present research on a current topic in human ecology.

H E X55. Topics in Problems Course.
Intensive study of selected problems of a transdisciplinary nature.
H E X55.1. Research in Family Economics.
H E X78H. Honors Tutorial Course.
Engage in supervised individual research on a special area in human development and family sciences; oral presentation and preparation of a scholarly paper covering the research.

Graduate Courses

H E X92. Topics in Research Problems.
Problems may be chosen from the areas of family and consumer economics or textiles and apparel.

Professional Courses

H S - Health and Society

Health and Society: H S

Lower-Division Courses

H S X01. Introduction to Health and Society.
A broad, multidisciplinary overview that introduces students to the study of health and society.
H S X02. Current Approaches to Health and Society.
Continue exploring how social forces shape health behaviors and outcomes. Examine varied current subjects related to health, paying particular attention to methodological approaches and research designs used in the interdisciplinary health sciences. Explore career possibilities.
H S X10P. Physical Activity and Society.
Explores the way in which people are physically active in a social context - primarily in the United States. Examines how social forces influence physical activity including cultural, economic, historical, and demographic considerations. Examines physical activity on both the individual and population levels to better understand benefits and barriers to activity through the social context.
H S X19S. Topics in Health and Society.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Health and Society major. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

H S X20C. Cancerland.
Explores the social and cultural terrain of cancer research, treatment, and public policy in the United States.
H S X29S. Topics in Health and Society.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Health and Society major. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
H S X30. Health Care Policy in the United States.
An overview of the health care system in the United States and analysis of health policy issues primarily from the perspective of health economics.
H S X30C. Climate Change and Health.
Explore the basic science of climate change, including historical changes and how they have led to health problems and wars. Focus on global warming and how it will cause health problems in the coming decades. Examine solutions and moral and ethical dimensions to both global warming and its effects on human health.
H S X31C. COVID-19 Social Impacts and Public Dilemmas.
Explore the COVID-19 pandemic through multiple social, cultural, and economic lenses. Consider how globalization has influenced transportation networks and economic relationships that shape infectious disease transmission in the twenty-first century. Examine the effectiveness of different public health efforts to curb the spread of this virus. Discuss how the public health efforts of different nations and international governing bodies reveal different cultural values, political realities, and healthcare systems.
H S X40. Topics in Health and Society.
Selected topics on health and society.
H S X40.11. Medical Sociology.
Explores the social context of health, illness, and the health care system in American society. Discussion of the processes of medicalization and demedicalization, social factors influencing health and health care, the organization of the health care delivery system and patient outcomes, and the social meaning and experiences of illness.
H S X40.5. Health Disparities.
Examine health disparities and outcomes in four areas: core medical sociological theories and models; the biology of stress; intersections of race, class, and gender for health; and introduction to genetics and health disparities.
H S X40.7. Contemporary Practice of Medicine.
Explores what it means to be a practicing physician in contemporary America. Structured as a series of guest lectures by doctors from different medical specialties and at different stages in their careers; physician scientists and academicians; hospital administrators and related professionals; providers of medical care from international settings; and ethicists.
H S X40.8. Economic Sociology of Health.
Provides a look at the economics of health and health care through a sociological lens. Examines how the multidimensional nature and distribution of health and healthcare are shaped by a variety of social and economic factors. Gain an understanding of the power of incentives, markets, and cost-benefit analysis, as well as the limits of these tools, in creating effective health care policy.
H S X40.9. Valuing Mental Health.
Explores the value of health in general and mental health specifically. Comparison of notions of health and illness, non-communicable disease and mental illness, and relative valuations in health and mental health. Development of sound, sensitive, and defensible opinions about mental health through the use of plays, poems, songs, videos, short stories, and personal accounts of illness and disability.
H S X41. Health and Justice.
Examines ethical, political, and legal issues surrounding medicine, society, and healthcare.
H S X41C. Comparative United States Health Systems.
Examine the social and economic distribution of health and health care and how underlying social values shape both the health of a population and its approach to health care. Analyze health care systems worldwide to see what the advantages and disadvantages of these models are for different segments of society compared to the US model.
H S X47E. Sustainability, Equity, and Health.
H S X50E. Foundations of Epidemiology.
Introduction to the basic tenets of epidemiology as well as the different types of epidemiological study designs.
H S X78. Seminar in Health and Society.
Focuses on a key topic or debate within the Health and Society area of study and develops students' abilities to use data and write a research or policy paper that informs that topic or debate.
H S X79H. Honors Tutorial Course.
A supervised conference course to provide training in research and writing.

Graduate Courses

Professional Courses

HDF - Human Development and Family Sciences

Human Development and Family Sciences: HDF

Lower-Division Courses

HDF X04. Family Relationships.
The process of family interaction over the life cycle. Application of research findings to the understanding of relationships.

HDF X04H. Family Relationships: Honors.
The process of family interaction over the life cycle. Application of research findings to the understanding of relationships.

HDF X05. Health and Development Across the Lifespan.
Investigate the experiences of health and well-being across the life span of both individuals and families. Apply research findings to explore how physical and mental health are influenced by societal contexts.

HDF X06. Introduction to Gender and Sexuality.
Explore social, emotional, cognitive, and physical aspects of gender and sexuality within the contexts of individual human development, families, and cultures.

HDF X12. Family Resource Management.
Management concepts and theory in resource allocation used to meet family and life demands.

HDF X13. Child Development.
Motor, language, cognitive, social, and emotional development in the family context.

HDF X13H. Child Development: Honors.
Motor, language, social, and emotional development of children in the family context, with an emphasis on research findings and evaluations.

HDF X13L. Child Development Laboratory.
Observe children at the University Child and Family Laboratory and relate observations to the issues discussed in related coursework.

HDF X14H. Child Development Laboratory: Honors.
Observe children at the University Child and Family Laboratory and relate observations to the issues discussed in related coursework.

HDF X15L. Research Methods in Human Development and Family Sciences.
Survey of research methods, including observational and experimental techniques.

HDF X19S. Topics in Human Development and Family Sciences.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

HDF X22. Personal and Family Finance.
Overview from the individual and family perspectives of financial planning tools, cash management, consumer credit, basic tax preparation, and insurance selection. Includes application of knowledge to hypothetical situations and case studies.

HDF X29S. Topics in Human Development and Family Sciences.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HDF X35. Adult Development.
Adulthood and the development, changes, and maturation that occurs, including the impact of relationships in adulthood.

HDF X37. Personal Relationships.
Studies intimate relationships, including dating, cohabitation, marriage, and gay and lesbian relationships, as well as situational factors that may influence basic relationship processes.

HDF X38. Developmentally Appropriate Practices with Young Children.
Developmentally appropriate practices, the importance of play, arranging environments, material selection, and a basic understanding about centers and activities for young children.

HDF X40. Ethical, Philosophical, and Professional Development Issues.
Explores ethical and philosophical issues; personal values and choices; professional development and leadership; and career goals, opportunities, and challenges as they relate to human development and family sciences.

HDF X42. Development of Psychopathology from Infancy through Adolescence.
A developmental approach to the study of emotional and behavioral disorders from infancy through adolescence, including attachment disorders, autism, attention deficit disorder, conduct disorder, phobias, obsessive-compulsive disorder, depression, eating disorders, and schizophrenia. Also includes contrasting theories of psychopathology, epidemiology and outcomes of childhood disorders, therapeutic approaches and their efficacy, and developmental resilience.

HDF X43. Human Development in Minority and Immigrant Families.
Examines the theories of human development and cultural psychology as they apply to the developmental issues of minority and immigrant children and families.

HDF X44. Growing up Latine.
Examine the multiple dimensions of Latine development across the lifespan. Discuss theoretical foundations, empirical findings, and methodological advances in the field.

HDF X45. Peer Relationships.
Children's peer relationships from toddlerhood to adolescence.

HDF X47. Socioeconomic Problems of Families.
An analysis of how socioeconomic factors, including income, education, employment, and their intersection with race and gender affect child development and family functioning.

HDF X51. Infant Development and Attachment Relationships.
The development of emerging social language and cognitive capacities during infancy and toddlerhood and the development and consequences in infant-caregiver attachment security.

HDF X52. Field Experience: Community.
Practicum in applied settings concerning human development and family sciences.

HDF X52F. Field Practicum: Community.
Practicum in settings concerning human development and family sciences.

HDF X52L. Field Experience: Early Childhood.
Study and implementation of skills necessary for planning, guiding, and interacting with young children and their families, and for the management of facilities that provide services for young children.

HDF X52P. Field Practicum: Early Childhood.
Study and implementation of skills necessary for planning, guiding, and interacting with young children and their families; and for the management of facilities that provide services for young children.

HDF X53. Longevity in the 21st Century.
Explores questions concerning the rapidly changing world in which people routinely live into old age. Focus on challenges adults face at the individual, familial, and societal level due to a prolonged adulthood.

HDF X55H. Problems Course: Honors.
Intensive study of selected research problems.
HDF X55R. Problems Course: Research Practicum.
Intensive study of selected problems of a transdisciplinary nature.
HDF X56. The Evolution of Relationships.
Reviews the scientific literature on the evolution and function of adult romantic relationships.
HDF X57. Applied Child Development.
Apply theoretical concepts in child development through fieldwork with children and families in a laboratory school setting. Observe children and practice professional interactions with children and families.
HDF X58. Parent-Child Relationships.
The determinants of parenting attitudes and behavior and the effects on children of variations in sensitivity, discipline, and other aspects of parenting.
HDF X59. Advanced Applied Research Experience.
Apply research experience in areas of a transdisciplinary nature.
HDF X60. Methods of Family Life Education.
An examination, integrating theory and applied knowledge, of the best practices for working with families.
HDF X62. Children and Public Policy.
The positive and negative effects of policy on children and the policy landscape in several major domains of child and family life in the United States and in other countries.
HDF X66C. Guidance in Adult-Child Relationships.
Explore the theory and implementation of positive child and adult interactions, communication, and guidance strategies.
HDF X66L. Guidance in Adult Child Relationships Lab.
Interact with children and families at the Priscilla Pond Flawn Child and Family Laboratory while under supervision, to explore the development of skills in positive child and adult interactions, communication, guidance strategies, and observational data collection.
HDF X71. Adolescent Development in Context.
The biological, cognitive, and social changes that occur during the second decade of life, including the developmental issues faced by adolescents.
HDF X72K. Families in Transition.
Analysis of interaction, transitions, and crises over the family life span.
HDF X78K. Topics in Advanced Child and Family Development.
Concepts, theories, and issues in human development and family sciences.
HDF X78K.10. Sexuality in Human Development and Family Sciences.
Introduction to contemporary understandings of sexuality in the context of human development and families, organized around major subjects in the field of sexuality studies.
HDF X78K.11. Italian Early Childhood Education.
Explore the long history of early childhood education in Italy emphasizing children's engagement in multi-sensory exploration and creative self-expression. Analyze how cultural differences affect how parents and professionals work together to foster optimal development in young children.
HDF X78K.5. Media and the Family.
HDF X78K.6. Introduction to Early Childhood Intervention.
HDF X78K.8. Advanced Early Childhood Intervention.
HDF X78K.9. Introduction to Child Life.
Introduction to the role of child life specialists in health care settings and the application of general human development principles to the care of hospitalized children and adolescents.
HDF X78L. Theories of Child and Family Development.
Study and analysis of major theories in human and family development.
HDF X79H. Honors Tutorial Course.
Supervised individual research on a special topic in human development and family sciences; oral presentation and preparation of a scholarly paper covering the research. May be based on laboratory, library, or field research.

Graduate Courses

HDF X80K. Topics in Research Methods.
HDF X80K.1. Research Methods in Human Development and Family Sciences.
HDF X80K.2. Foundational Statistics and Nested Models in Human Development and Family Sciences.
This course focuses on data organization and statistics used in the social behavioral sciences. It begins with a review of basic data management, inferential statistics, graphing, advanced regression, and ANOVA, then concludes with an introduction into the analysis of nested data.
HDF X80K.3. Analyzing Development and Change.
HDF X80K.4. Advanced Regression and Structural Models.
HDF X92. Topics in Research Problems.
Directed research in various topics in the area of human development and family sciences.
HDF X92.1. Child Development.
HDF X92.2. Family Relationships.
HDF X92.3. Marital Relationships.
HDF X92.4. Peer Relationships.
HDF X92.5. Parent-Child Relationships.
HDF X92.6. The Family and Public Policy.
HDF X92.7. The Family and the Mass Media.
HDF X94. Topics in Graduate Seminar.
Seminars in various topics in the area of human development and family sciences.
HDF X94.1. Parent-Child Interaction.
HDF X94.10. Adult Development.
HDF X94.11. Issues in Early Childhood Development.
HDF X94.12. Attachment and Development through the Life Span.
HDF X94.13. The Self in Relationships.
HDF X94.14. Adoptive Family Relationships.
HDF X94.16. Development of Close Relationships.
HDF X94.17. Prevention, Intervention, and Evaluation in Human Development and Family Sciences.
HDF X94.2. Family-Peer Relationships.
HDF X94.3. Marital Relationships.
HDF X94.4. Sex Roles in Family Relationships.
HDF X94.5. Immigration and the Family .
HDF X94.6. Intergenerational Parenting.
HDF X94.7. Divorce.
HDF X94.8. Family Systems Theory.
HDF X94.9. Children and Poverty.
HDF X95. Topics in Recent Advances in Human Development and Family Sciences.
Research and theory focused on the interplay between individual development, family relationships, and institutions and relationships outside the family.
HDF X95.1. Child and Adolescent Development.
HDF X95.2. Contextual Influences on Individual and Family Development.
HDF X95.3. Adult Development and Aging.
A multidisciplinary overview of adult development from young adulthood through old age. Examines major sociological, psychological, and biological theory and research in the field of adult development such as adult development and the aging process from cells to social security with an emphasis on social and emotional development, as well as psychological aspects of adult development.
HDF X95.4. The Formation and Development of Intimate Relationships.
Critical review of theory and research on dating and marital relationships, with an emphasis on how relationships change over time. Subjects

include attraction, relationship initiation and formation, relationship maintenance processes and relationship dissolution.

HDF X97P. Practicum in Human Development and Family Sciences.

HDF X98. Thesis.

HDF X98T. Supervised Teaching in Human Development and Family Sciences.

Teaching under close supervision, group meetings, individual conferences, and reports.

HDF X99W. Dissertation.

Professional Courses

HDO - Human Dimensions of Organizations

Human Dimensions of Organizations: HDO

Lower-Division Courses

HDO X01. Introduction to the Human Dimensions of Organizations.

Introduction to organizations and how the liberal arts can examine, analyze, and change them. Defines organizations from a liberal arts standpoint; survey of career opportunities related to the human dimensions of organizations.

HDO X10. Researching People-Centered Problems.

Introduction to mixed-methods research using active learning and project-based assignments. Explore the basics of qualitative and quantitative research methods, research ethics, teamwork, project management, and problem-solving.

HDO X19S. Topics in Human Dimensions of Organizations.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

HDO X22L. Law and Organizations.

Examine the intersection of law and organizational/workplace practices. Explore how law regulates the workplace (e.g., laws about sexual harassment), how organizations do or do not comply with the law, and the ways that organizational practices may affect legal standards.

HDO X25. Strategic Human Resources Management.

Overview of the personnel function, covering recruitment, compensation, equal employment, job analysis, training, benefits, employee discipline, collective bargaining, safety, and health.

HDO X25N. Organizational Ethics.

Examine the practical and theoretical aspects of ethical issues in organizations, including philosophical, psychological, anthropological, and strategic approaches.

HDO X29S. Topics in Human Dimensions of Organizations.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HDO X30. Topics in Human Dimensions of Organizations.

HDO X30C. Creativity and Innovation in Organizations.

Explore creative tools people use to solve problems.

HDO X30L. Organizational Learning.

Examine theory regarding organizations, learning, and change. Utilize theory to interact with and analyze real and hypothetical cases of passive and active organizational learning. Experiment with applied tools and techniques for analyzing and managing organizational learning.

HDO X50. Identities in Organizations.

Explore how intersecting identities shape both individuals' and groups' experiences of various organizations.

HDO X59H. Honors Research I.

HDO X60. Conference Course.

Study selected problems in the field of human dimensions of organizations, which can include independent study of a content area, research assistance, or other faculty-supervised independent activity.

HDO X65. Bias.

An interdisciplinary introduction to bias from the perspectives of psychology, political science, business, philosophy, and linguistics.

HDO X79. Applying the Human Dimensions of Organizations.

Explores multidisciplinary methods of the human dimensions of organizations with an external entity. Focus on the role of the liberal arts viewpoint in practical settings.

HDO X79H. Honors Research II.

Supervised conference course for honors candidates in Human Dimensions of Organizations.

Graduate Courses

HDO X80. Cultural Perspectives on the Human Dimensions of Organizations.

Examines broad aspects of the role of culture in organizations through a variety of disciplinary lenses. Culture includes both global cultures, as well as cultures created by organizations.

HDO X81. Individual Perspectives on the Human Dimensions of Organizations.

A general introduction to the roles of individuals in organizations from a multidisciplinary perspective.

HDO X82. Approaches to Leadership.

Examines broad aspects of organizational leadership through a variety of disciplinary lenses.

HDO X83. Society, Culture and Organizational Diversity.

Examines multidisciplinary frameworks for understanding society and culture in organizations. The effects of gender, race/ethnicity, sexual orientation, culture, and globalization on organizational change may be discussed.

HDO X84. Organizational Inertia, Decision Making and Change.

Reviews theories and methods for understanding how organizational environments support habits, and how individuals and groups make decisions.

HDO X85. Organizational Ethics.

Examines ethics as they pertain to organizational contexts.

HDO X86. Persuasion and Argumentation.

Focuses on how effective persuasion works within organizations and at the individual level.

HDO X87. The Structure of Organizations.

A multidisciplinary approach to understanding how money, information, and influence flow through organizations and between related organizations.

HDO X88. Conference Course in Human Dimensions of Organizations.

Individual directed study of selected topics in related human dimensions of organizations field.

HDO X89. Writing and Researching Organizations.

Exposure to various approaches to organizational writing and research. Explores the ways these approaches might inform student Capstone Projects. Examines strategies to plan, organize, and execute an organization-based research project.

HDO X90. Qualitative Research Methods.

Covers qualitative approaches to studying people in organizational settings. Approaches may include narrative, phenomenology, grounded theory, ethnography, case studies.

HDO X91. Quantitative Research Methods.
Quantitative approaches for studying the human dimensions of organizations. Examines the mechanics and assumptions of common methods in quantitative methods, including experimental design, survey research, and quantitative coding of archival data. Emphasizes students' ability to know and identify what types of research questions are best-suited to the different quantitative approaches. Reviews the types of data that various designs produce, and some basic statistical assessments of quantitative data.

HDO X92. Computational Methods.
Analyzing and interpreting data drawn from large-scale data sets. Approaches include social network analysis, web analytics, and linguistic corpus analysis.

HDO X95. Capstone Project.
Focuses on the completion of the capstone project, the culmination of work in the human dimensions of organization degree.

HDO X97. Practicum in Human Dimensions of Organizations.
Applied study in human dimensions of organizations.

Professional Courses

HEB - Hebrew

Hebrew: HEB

Lower-Division Courses

HEB X01C. Intensive Hebrew I.
First semester of intensive Hebrew language instruction.

HEB X02C. Intensive Biblical Hebrew I.
Introduction to the language and texts of the Hebrew Bible, taught in the interactive style of a modern language classroom.

HEB X03K. Biblical Hebrew I.
Introduction to biblical Hebrew, including basic lexicon and grammar. Focus on reading the Hebrew Bible; including texts such as the Creation, the Tower of Babel, the binding of Isaac, the Joseph story, and the David and Goliath story.

HEB X03L. Biblical Hebrew II.
Continue to explore a thorough study of biblical Hebrew grammar, with emphasis on the verb system and the rules of sentence structure. Examine texts including biblical chapters of poetic, legal, and prophetic nature, such as the Ten Commandments, chapters from the Book of Leviticus, Psalms 23, 27, and 121, Proverbs 8 and 10, Isaiah 53, and Jeremiah 31.

HEB X06. First-Year Hebrew I.
Modern Israeli Hebrew, including the writing system, basic sentence structure, vocabulary, and simple conversation.

HEB X07. First-Year Hebrew II.
Continuation of Hebrew 506.

HEB X11C. Intensive Hebrew II.
Second semester of intensive Hebrew language instruction.

HEB X12C. Intensive Biblical Hebrew II.
Continuing the study of the language and texts of the Hebrew Bible, taught in the interactive style of a modern language classroom.

HEB X12K. Second-Year Hebrew I.
Modern Israeli Hebrew. Continuation of Hebrew 507 with expanded grammar and conversation.

HEB X12L. Second-Year Hebrew II.
Continuation of Hebrew 412K, with emphasis on conversation and composition.

HEB X19S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HEB X29S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

HEB X06. First-Year Hebrew I.
Modern Israeli Hebrew, including the writing system, basic sentence structure, vocabulary, and simple conversation.

HEB X07. First-Year Hebrew II.
Continuation of Hebrew 506.

HEB X19S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HEB X20K. Hebrew via Popular Culture.

HEB X20L. Hebrew through the Media.

HEB X29S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HEB X30D. Hebrew across Disciplines.
Students read and discuss Hebrew language materials related to the subject matter of another designated course.

HEB X46. Topics in Hebrew Language, Literature, and Culture.

HEB X46.3. Home and Exile in Contemporary Hebrew Literature.

HEB X46.8. Jerusalem in Israeli Literature.

HEB X46.9. Mizrahi Writing in Israel.

HEB X46C. Innovation and Technology in Israel.

HEB X46D. Israeli Society and Culture.
Explore vignettes from the many facets of contemporary Israeli society through the prisms of journalism, media, film, and literature in the Hebrew language. Examine new aspects of Israeli society and learn about their history and their place in modern Israel.

HEB X69. Conference Course in Hebrew Language and Literature.
Supervised individual study of selected problems in Hebrew language or literature.

Graduate Courses

HEB X06. First-Year Hebrew I.
Modern Israeli Hebrew, including the writing system, basic sentence structure, vocabulary, and simple conversation.

HEB X07. First-Year Hebrew II.
Continuation of Hebrew 506.

HEB X19S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HEB X29S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HEB X80C. Topics in Hebrew Language.
Taught in English with readings in Hebrew.

HEB X80C.2. Advanced Readings in Modern Hebrew.

HEB X80C.21. The Bible in Hebrew: Genesis through Deuteronomy.
Read and analyze Genesis, Exodus, Leviticus, Numbers, and Deuteronomy in Hebrew.

HEB X80C.22. The Bible in Hebrew: Joshua through Chronicles.
Read and analyze the Books of Joshua, Judges, Samuel, Kings, and Chronicles in Hebrew.

HEB X80C.23. The Bible in Hebrew: Isaiah through Book of Twelve.
Read and analyze the Books of Isaiah, Jeremiah, Ezekiel, and the Book of the Twelve in Hebrew.

HEB X80C.24. The Bible in Hebrew: Psalms through Nehemiah.
Read and analyze the Books of Psalms, Proverbs, Job, Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra, and Nehemiah in Hebrew.

HEB X80C.5. Mishnaic Hebrew/Talmud Aramaic.

HEB X80C.8. Biblical Hebrew.

HEB X81H. Intensive Graduate Language Instruction I.
Intensive cultural and literacy-focused training in Hebrew at the beginning level in preparation for research with Hebrew sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

HEB X81J. Intensive Graduate Language Instruction II.
Intensive cultural and literacy-focused training in Hebrew at the intermediate level in preparation for research with Hebrew sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

HEB X81K. Intensive Biblical Language Instruction I.
Introduction to the language and texts of the Hebrew Bible, taught in the interactive style of a modern language classroom.

HEB X81L. Intensive Biblical Language Instruction II.
Continuing the study of the language and texts of the Hebrew Bible, taught in the interactive style of a modern language classroom.

HEB X81M. Hebrew Via Popular Culture.

HEB X81N. Hebrew Through the Media.

HEB X84C. Topics in Hebrew Literature.

HEB X84C.2. Contemporary Israeli Fiction.

HEB X84C.3. Mizrahi Writing in Israel.

HEB X85. Topics in Hebrew Literature in Translation and Israeli Media.
Study of selected works of Hebrew literature in English translation and Israeli film and television programs with English subtitles.

HEB X85.1. Post-Zionist Perspectives in Israeli Literature.
Israeli literature through the context of the historical, cultural, and artistic movement known as post-Zionism.

HEB X85.2. The Book of Job: Text and Language.

HEB X85.3. Dead Sea Scrolls: Language and Literature.

HEB X85.4. Ethnic and Social Israeli Cinema.

HEB X89. Conference Course in Hebrew Studies.
Supervised individual study of selected problems in Hebrew studies.

HEB X98. Thesis.

HEB X99W. Dissertation.

Professional Courses

HEB X06. First-Year Hebrew I.
Modern Israeli Hebrew, including the writing system, basic sentence structure, vocabulary, and simple conversation.

HEB X07. First-Year Hebrew II.
Continuation of Hebrew 506.

HEB X19S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HEB X29S. Topics in Hebrew.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HED - Health Education

Health Education: HED

Lower-Division Courses

HED X09S. Topics in Health Education.

HED X10. Freshman seminar.
Provides an overview of the life skills that are critical to success, such as academic, social, and health behaviors.

HED X11. Introduction to Health Promotion and Behavioral Science.
Provides an introduction to the concepts and core principles of health promotion and behavioral science.

HED X12. Foundations of Stress Management.
Examine stress, mindfulness, and multiple means of stress management. Explore the science of stress and how it impacts health, the history and benefits of mindfulness, and engage with different stress management practices each week; including learning the practices' history, scientific benefits, and varying experiences. Use healthy coping strategies on a consistent basis and tools to address stressors that will arise from being a college student.

HED X19S. Topics in Health Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Kinesiology and Health Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

HED X27L. Internship/Fieldwork in Health Promotion.
Applied experiences in development, delivery, or evaluation of professional health promotion programs.

HED X28. Internship in Health Promotion.
Applied experiences in development, delivery, or evaluation of professional health promotion programs.

HED X29K. Child and Adolescent Health.
The foundations of child and adolescent health; health education; and the biological, environmental, and behavioral health determinants of health. Includes the application of evidence-based child and adolescent health promotion concepts; prominent health risk behaviors established

during youth that increase the risk of morbidity and mortality; and the application of personal health and wellness information.

HED X29S. Topics in Health Education.
Credit is recorded while the student is enrolled at another institution in a program administered by the University's Study Abroad Office.

HED X35. Theories of Substance Use and Abuse.
An introduction to the psychological, social, pharmacological, and cultural aspects of substance use and abuse. Includes a study and critique of the theories of substance use and abuse.

HED X43. Foundations of Epidemiology.
Introduction to the basic tenets of epidemiology as well as the different types of epidemiological study designs.

HED X50. Theories of Health Promotion Behavioral Science.
Introduction to the field of health promotion, as applicable in the fields of health and education: theories, processes, activities, and settings for health promotion practice.

HED X51. Needs Assessment and Program Planning.
Introduction to the processes of planning, implementing, and evaluating health promotion programs.

HED X52K. Topics in Health Studies.
Analysis and synthesis of the literature and discussion of current and specific issues in health.

HED X52K.3. Psychosocial Issues in Adult Development and Health.
Examines psychosocial issues in adult physical and mental health within the context of adult psychological development, using a biopsychosocial approach. Examines psychosocial factors in the major health risks in adulthood and in preventative health behavior. Also considers psychosocial factors in stress and coping and their implications for health.

HED X60. Adolescent Health Risk Behavior.
Overview of the biological, psychological, social, and environmental determinants of adolescent risk-taking behavior. Focuses on selected behaviors that can result in adolescent mortality, morbidity and social problems including: violence, sexual behavior, obesity-related behaviors, depression, alcohol, tobacco, and other substance use.

HED X61. Psychosocial Issues in Women's Health.
Explores psychosocial issues in women's physical and mental health, including traditional reproductive issues, disorders that are more common in women than in men, and the leading causes of death in women. Covers gender influences on health risk behaviors, and societal influences on women's health through a consideration of social norms and roles.

HED X64. Strategic Health Communication.
Introduces essential components of effective communication strategies and persuasive messaging techniques to aid in the development of a strategic health campaign for a client in an allied health field.

HED X65. Social Determinants of Health and Health Disparities.
Explore social determinants of health and health disparities in the United States and globally, as well as strategies to address them.

HED X66. Human Sexuality.
Introduction to health and sexuality. Explore sexuality, health, and rights and how they relate to the past, present, future, emerging issues, controversial issues, and cutting-edge areas. Examine the evolution of sexual rights, global sexual health, how health and sexuality constructs positive and negative messages throughout communities, nationally, and globally, methods to improve sexual health, and advocacy.

HED X70K. Topics in Health Promotion: Seminar.
Identification, causes, incidence, prevention, control, and social implications of major problems in health.

HED X70K.1. Foundations of Health Promotion I.
Introduction to the field of health promotion, as applicable in the fields of health and education: theories, processes, activities, and settings for health promotion practice.

HED X70K.3. Environmental Health.
Provides an introduction to the key areas of environmental health in developed and developing countries. Using the perspectives of the population and community, the course will cover factors associated with the development of environmental health problems.

HED X70K.4. Public Health Challenges Along the United States-Mexico Border.
Explore border health issues and health promotion strategies to address them using a bi-national framework.

HED X71K. Foundations of Health Promotion II.
Introduction to the processes of planning, implementing, and evaluating health promotion programs.

HED X73. Evaluation and Research Design.
Develop knowledge and application of research methods and program evaluations in health promotion settings. Subjects include experimental and non-experimental research, validity, reliability, experimental and quasi-experimental research designs, data collection procedures, measurement of health knowledge, attitudes, behaviors, and data analysis.

HED X78C. Topics in Fieldwork in Health.
Undergraduate research and/or experience with a health agency in the field attempting to analyze or solve community health problems through education; students are supervised by the health agency and by the kinesiology and health education faculty.

HED X78D. Topics in Peer Health Leadership I.
Literature and discussion of current and specific issues in health.

HED X78D.3. Clinic Volunteer Program.
Analysis of literature and weekly discussion of current and specific issues relating to health. Focus on teamwork and leadership skills through a group capstone presentation at the end of the semester.

HED X78E. Topics in Peer Health Leadership II.
Literature and discussion of current and specific issues in health.

HED X78E.3. Clinic Volunteer Program.

HED X78E.4. Peer Support Practicum Seminar.

HED X78F. Topics in Peer Health Leadership III.
Literature and discussion of current and specific issues in health.

HED X78F.3. Clinic Volunteer Program.

HED X78G. Applied Peer Education.
Continue to examine concepts related to peer education, public health, and health promotion. Discuss campus resources and learn how to integrate that information in workshops, campus events, and public health initiatives. Work collaboratively in "pods" which aim to promote comprehensive health promotion strategies across campus. Explore group facilitation and peer-led discussion skills.

HED X78I. Foundations of Peer Health Leadership.
As incoming peer educators, explore content related to health promotion among college students and examine how to effectively use that information in their role. Deliver workshops, attend Longhorn Wellness Center (LWC) events, represent the LWC at campus functions, and develop public health initiatives and projects.

HED X78J. Fieldwork in Peer Education.
Continue to explore the skills necessary to be effective public health promotion peer educators. Deliver workshops, serve as mentors to the new class of peer educators, attend Longhorn Wellness Center (LWC) events, represent the LWC at campus functions, and develop initiatives and projects in committees. Examine how peer educator skills apply to professional development skills.

Graduate Courses

HED X95. Topics in Advanced Studies.
Group and individual studies of advanced topics; critique and synthesis of research findings and of literature.

HED X95.71. Cognition and Exercise Across the Lifespan.
Detailed study of the relationship between brain health and physical activity behaviors across the developmental life stages; focused on

the effects of physical activity programming on cognitive control and performance.

Professional Courses

HHM - Humanities, Health, and Medicine

Humanities, Health, and Medicine: HHM

Lower-Division Courses

Upper-Division Courses

Graduate Courses

HHM X80. Introduction to Humanities, Health, and Medicine.
Survey the history, aims, and challenges of the field of humanities, health, and medicine, as well as the field's current role in health-professional education and practice. Explore subfields within the health humanities such as the history of medicine, narrative medicine, literature and medicine, medical anthropology, disability studies, medicine and the arts, and bioethics.

HHM X83. Topics in Theories and Methods.

HHM X85. Topics in Humanities, Health, and Medicine.

HHM X86. Conference Course.
Independent study on a subject relevant to the field of humanities, health, and medicine.

HHM X87. Internship.

HHM X98. Thesis.

HHM X98R. Master's Report.

Professional Courses

HIN - Hindi

Hindi: HIN

Lower-Division Courses

HIN X04. Accelerated First-Year Hindi.
For speakers of Hindi who have not studied it formally.

HIN X06. First-Year Hindi I.
Modern Hindi of India.

HIN X07. First-Year Hindi II.
Continuation of Hindi 506.

HIN X12. Accelerated Second-Year Hindi.
Continuation of Hindi 604.

HIN X12K. Second-Year Hindi I.
Modern Hindi of India.

HIN X12L. Second-Year Hindi II.
Continuation of Hindi 312K.

HIN X18. Practice in Spoken Hindi.
Instruction and practice in conversation for intermediate-level students.

HIN X19S. Topics in Hindi.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser of the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIN X29S. Topics in Hindi.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in affiliated studies program.

Upper-Division Courses

HIN X06. First-Year Hindi I.
Modern Hindi of India.

HIN X07. First-Year Hindi II.
Continuation of Hindi 506.

HIN X19S. Topics in Hindi.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser of the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIN X25. Advanced Practice in Spoken Hindi.
Instruction and practice in conversation for advanced students.

HIN X29S. Topics in Hindi.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in affiliated studies program.

HIN X30. Topics in Hindi Language and Literature.
Study of specific subjects related to Hindi culture as reflected in its literary productions and other modes of expression.

HIN X30.1. Contemporary Hindi Narratives.
Designed to enhance all four language skills: reading, writing, speaking, and listening.

HIN X30.2. Hindi Drama and Film.
Contemporary Hindi plays and film scripts in Devanagari script.

HIN X30.3. Hindi Literature in the Nationalist Era.
Examines the poetry and prose of a diverse group of writers who shaped Hindi literature during the nationalist era. Also includes critical studies in English.

HIN X30.4. Language and Identity at the Margins of Hindi Fiction.
Focuses on the stories and novels of a diverse group of writers, including Muslims, women, Biharis, and Marwaris, who have broadened the landscape of Hindi writing.

HIN X30.5. Autobiography in Hindi.

HIN X30C. Discourses of Identity in Hindi Fiction.
Explore four prominent identity discourses in Hindi literature involving traditionally marginalized communities or identities in India. Consider writings from women as well as those from marginalized communities such as Dalit, Tribal, and Transgender (Hijra) groups. Focus on texts in the original Hindi, as well as interactive class discussion in Hindi, to develop advanced vocabulary and grammar.

HIN X30D. Hindi Across Disciplines.
Reading and discussion of Hindi language materials related to the subject matter of another designated course in Asian studies, with a focus on linguistic and literary features, and crucial passages.

HIN X30E. Realism and Urbanism in Hindi.
Focus on texts or films in Hindi to develop vocabulary and grammar, and explore Realism and Urbanism as two prominent themes in twentieth-century Hindi literature. Consider how authors addressed changes in life and family values in the Indian urban middle class, and how they transformed the literary taste of Hindi readership from marvelous tales to reading short stories with social critique.

HIN X30F. Brajbhasha Texts.
Explore the literary genres of Brajbhasha, its key poets and texts, grammatical constructions and metrical forms and learn to recite poetry in prevalent meters.

HIN X32. Style and Register in Hindi.
Practicing skills in reading, listening, writing, and speaking in everyday social situations and some formal situations. Relevant for students working toward the "Advanced" level on the American Council for the Teaching of Foreign Languages (ACTFL) proficiency scale, and equivalent to level two on the Interagency Language Roundtable (ILR) scale.

HIN X60. Conference Course in Hindi Language and Literature.
Supervised individual study of selected problems in Hindi language and literature.

Graduate Courses

HIN X06. First-Year Hindi I.
Modern Hindi of India.

HIN X07. First-Year Hindi II.
Continuation of Hindi 506.

HIN X19S. Topics in Hindi.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser of the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIN X81. Conference Course in Hindi Language and Culture.
Supervised individual study in Hindi language or culture.

HIN X84. Topics in Hindi Language and Culture.
Study of various aspects and periods of Hindi language and culture.

HIN X84.1. Advanced Reading, Composition, and Conversation I.

HIN X84.10. Realism and Urbanism in Hindi.
Focus on texts or films in Hindi to develop vocabulary and grammar, and explore Realism and Urbanism as two prominent themes in twentieth-century Hindi literature. Consider how authors addressed changes in life and family values in the Indian urban middle class, and how they transformed the literary taste of Hindi readership from marvelous tales to reading short stories with social critique.

HIN X84.11. Brajbhasha Texts.
Explore the literary genres of Brajbhasha, its key poets and texts, grammatical constructions and metrical forms and learn to recite poetry in prevalent meters.

HIN X84.2. Advanced Reading, Composition, and Conversation II.

HIN X84.3. Readings in Hindi.

HIN X84.4. Contemporary Hindi Narratives.

HIN X84.5. Hindi Drama and Film.

HIN X84.6. Hindi Literature in the Nationalist Era.

HIN X84.7. Language and Identity at the Margins of Hindi Fiction.

HIN X84.8. Style and Register in Hindi.
Practice and improve skills in reading, listening, writing, and speaking for everyday social situations and some formal situations. Relevant to students working toward the "Advanced" level on the American Council for the Teaching of Foreign Languages (ACTFL) proficiency scale, equivalent to level 2 on the Interagency Language Roundtable (ILR) scale.

HIN X84.9. Discourses of Identity in Hindi Fiction.
Explore four prominent identity discourses in Hindi literature involving traditionally marginalized communities or identities in India. Consider writings from women as well as those from marginalized communities such as Dalit, Tribal, and Transgender (Hijra) groups. Focus on texts in the original Hindi, as well as interactive class discussion in Hindi, to develop advanced vocabulary and grammar.

HIS - History

History: HIS

Lower-Division Courses

HIS X01F. The Premodern World.
Survey of world history from human origins to the sixteenth century.

HIS X01J. Globalization: A Modern History.
Survey of world history from the sixteenth century to the present.

HIS X01R. Introduction to Russian, East European, and Eurasian Studies.
An introduction to the former Soviet Union and Eastern Europe through each of the major disciplines represented in the program: language, literature, anthropology, geography, history, government, sociology, and economics.

HIS X02C. Introduction to China.
Introduction to Chinese civilization, past and present, including religion, literature, arts, philosophy, and history.

HIS X02F. Female Voices in China.
Introduction (in translation) to the most important texts and other sources by, for, and about women in Chinese intellectual, political, social, and cultural history.

HIS X02P. Popular Culture in Modern Japan.
Introduction to the history of popular culture in modern Japan focusing on works of literature, film, and visual culture.

HIS X04C. The Conversion of Pagan Europe.
Examine the familiar and unfamiliar fragments of what remains from pre-Christian European culture--the limited written records, the artifacts, and the folklore--as well as the more plentiful anti-pagan writings of early Christian missionaries. Test many of the popular claims about how Europe's pre-Christian inhabitants lived, what they believed, and how Christianization impacted their lives against the limits of what we can actually know, using the tools from the study of history, cultural studies, and religious studies.

HIS X04K. English Civilization before 1603.
Survey of English civilization from Roman times to the death of Queen Elizabeth I.

HIS X04L. English Civilization since 1603.
Survey of English history from the seventeenth century to the present.
HIS X04Q. Luther's World.
HIS X04R. Judaism, Christianity, and Islam: An Introduction.
Examines the intertwined historical developments of the religions of Judaism, Christianity, and Islam, and explores the principal beliefs and practices of Jews, Christians, and Muslims.
HIS X04S. Jews, Pagans, and Christians.
Investigate, using a range of primary and secondary readings, how religious identity was imagined and expressed in the 4th-6th centuries CE. Examine the complex interactions of, in particular, Jews, Christians, and Pagans.
HIS X05C. Korean Literature and Film.
Explore the literature and film of Korea from earliest times to the present.
HIS X05K. History of East Asia to 1800.
A survey of the traditional history and culture of China, Japan, Korea, and Vietnam.
HIS X05L. History of East Asia since 1800.
A survey of the modern history of China, Japan, Korea, and Vietnam.
HIS X06C. Cuisine and Culture of Central and Eastern Europe.
An in-depth survey of the culinary traditions, history, and practices of Central and Eastern Europe.
HIS X06J. Introduction to the Middle East: Adjustment and Change in Modern Times.
The responses of the societies of the Middle East and North Africa (Turkey, Iran, Afghanistan, Israel, and the Arab world) to Western cultural and political challenges, primarily since about 1800.
HIS X06K. Introduction to the Middle East: Religious, Cultural, and Historical Foundations.
A survey of the history and civilization of the Middle East from the sixth to the fourteenth century.
HIS X06N. Topics in History.
HIS X06N.10. Jewish Civilization: Beginnings to 1492.
Introduction to the history, culture, and religion of the Jewish people from around 1000 BC to the end of the medieval period. Subjects may include ancient Israel, late Second Temple sectarianism, the rise of Christianity, rabbinic Judaism, medieval Jewish philosophy, Jewish mysticism, and Hebrew poetry.
HIS X06N.11. Jewish Civilization: 1492 to the Present.
Subjects may include trends toward secularization, the emancipation of European Jewry, the emergence of American Jewry, the Holocaust, the establishment of the State of Israel, and the Arab-Israeli conflict.
HIS X06N.12. Introduction to Modern North Africa.
Introduction to the major themes of North African history from the sixteenth century to the present.
HIS X06N.13. Introduction to the History and Culture of Spain.
The history of Spain from its beginnings in the stone age through the great social and economic upheavals of the twentieth century.
HIS X06N.14. Prague, Magic, and the Struggle for Power.
Examines historical texts from four different magical traditions to find the truth behind the fiction and the historical events that sometimes permitted and sometimes persecuted the religions, philosophies, and sciences that some call magic.
HIS X06N.15. History of Human Sexuality.
The history of human sexuality is approached from four angles: sexual behaviors; sexual consequences; sexual regulation, and sexual science.
HIS X06N.3. Key Ideas and Issues in Latin America.
Broad introductory course to acquaint students with the main areas of interest in Latin American studies.
HIS X06N.7. Introduction to Islam.
The beliefs, theology, history, and main social and legal institutions of Islam, including the concept of God and society, the role of women, and Islamic government and movements.
HIS X06Q. The Ancient Middle East.
Survey the history of the Middle East from the beginning of the Neolithic period (9000 BCE) through the invasion of the region by Alexander the Great in 332 BCE and into the pre-Islamic era.
HIS X07C. Introduction to the History of India.
Survey of the history of the Indian subcontinent from prehistoric times to the present.
HIS X07P. A History of Violence from 1500 to Present.
Examine how violence acts as a force shaping history in the modern era. Historicize violence to understand how it has changed over time.
HIS X07Q. Introduction to Holocaust and Genocide Studies.
Examine interdisciplinary perspectives (including historical, political, socio-psychological, and cultural methods and insights) on genocide as a global phenomenon.
HIS X09C. Medieval Material Culture.
Explore the history of medieval Europe primarily through the lens of material culture.
HIS X09J. The Roots of Religious Toleration.
Examines how freedom of conscience and religion crystallized in western and central Europe, both as a pragmatic practice and as a matter of principle.
HIS X09M. The Medieval Millennium in Europe.
Explore new conceptions of medieval Europe by examining how the social practices, ideas, and institutions of the middle ages developed through interactions with Europe's neighbors.
HIS X10. Introduction to Modern Africa.
Introduction to modern Africa, with focus on colonial and postcolonial development in political organization, economics, sociolinguistics, and literature.
HIS X10E. Early Mesoamerican Religions.
Introduction to the study of indigenous religions in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, from approximately 250 BC - AD 1700. Examine the role of religion and ritual in daily life, as well as the lines of evidence available today for understanding them.
HIS X10K. Latin American Civilization: The Colonial Experience.
A broad survey of the political, economic, social, and cultural aspects of the Latin American past, stressing both that area's achievements and its enduring problems.
HIS X10L. Latin American Civilization: The National Experience.
A broad survey of the political, social, and cultural aspects of the Latin American past.
HIS X10M. Film and History in Latin America: Colonial Period.
Introduction to selected subjects in Latin American history and culture through film, readings, documentaries, class discussion, and lectures.
HIS X10N. Film and History in Latin America: Modern Period.
Introduction to selected subjects in Latin American history and culture through film, readings, documentaries, class discussion, and lectures.
HIS X10P. Revolution and Decolonization in North Africa.
Examine the history of anti-colonial struggles in North Africa and the victory over European colonial powers.
HIS X10R. Latin America and the United States.
An exploration of the different social, economic, political, and cultural structures and concerns that came to both divide and unite the western hemisphere (North, Central, and South America, as well as the Caribbean) following independence from Europe.
HIS X11J. The History of Israel.
An introduction to the history of Israel, from the emergence of the modern Zionist movement beginning in 1881 to the present.
HIS X11K. Introduction to Traditional Africa.
Introductory, interdisciplinary course on the peoples and cultures of Africa.

HIS X12D. North American Borderlands.
Explore the formation of political borders in nineteenth- and twentieth-century North America, their contestation, and the multiple meanings attached to them.

HIS X14K. History of Mexican Americans in the United States.
Examines the origin and growth of the Mexican American community in the United States.

HIS X15G. Introduction to American Studies.
An interdisciplinary introduction to the historical exploration of American culture.

HIS X15K. The United States, 1492-1865.
Survey of United States history from the colonial period through the Civil War.

HIS X15L. The United States since 1865.
Survey of United States history since the Civil War.

HIS X17L. Topics in United States History.

HIS X17L.1. Colonial America.

HIS X17L.10. Rights in Modern America.

HIS X17L.11. Latinx Histories.
Explore the cultures, politics, and policies that shape the many Latinx histories in the United States.

HIS X17L.12. Mexican American Women, 1910-Present.
Examines the history of Mexican and Mexican American women in the United States from the twentieth century to the present.

HIS X17L.13. Origins of American Revolution.
Focuses on the rise and fall of the British-American Atlantic Empire in the third quarter of the eighteenth century.

HIS X17L.14. Building America: Engineering, Society, and Culture, 1868-1980.
Examines building in American society from the late 1860s to 1980.

HIS X17L.15. Establishing America, 1565-1815.
Introduction to the foundations of American History.

HIS X17L.16. History of Religion in the United States.
Explores instances of religious dominance and religious diversity in United States history. Moving from the pre-colonial period to the present, it examines the changing circumstances of several religious communities, including American Indians and Puritans, Protestant evangelicals, Mormons, Roman Catholics, Jews, Muslims, and Hindus.

HIS X17L.17. Reading United States History Between the Lines.
Explores how historians read between the lines and where they look for clues, looking at the many methods historians use to discover and make sense of their evidence.

HIS X17L.18. Immigration and Ethnicity.
Examine the changing population of the United States from colonial times to present.

HIS X17L.2. The Era of the American Revolution.

HIS X17L.20. Introduction to African American Women's History.

HIS X17L.21. American Jewish History.
Examine the history of Jews in the United States from the seventeenth century to the present. Explore the formation of a distinct American Judaism and the involvement of Jews in American cultural and political affairs.

HIS X17L.22. Urban Economic Development in the United States and South Africa.
Examine economic development within the United States and South Africa.

HIS X17L.23. History of Social Entrepreneurship in the United States and China.
Examine the history of social entrepreneurship in the United States and China.

HIS X17L.24. The Places of Mexican American History.
Examine Mexican American history from the point of view of three distinct places: Los Angeles, the mountains of northern New Mexico, and the far southern tip of Texas.

HIS X17L.25. American History Through Sight and Sound.
Explore American history through visual and auditory media--films, paintings, photographs, plays, and songs--examining how these multimedia sources have shaped national identity, conveyed social movements, and captured historical moments.

HIS X17L.26. History of College Football.
Discuss the origins, growth, and development, of college football from its elite Ivy League school origins, to what is has become today: arguably one of the most popular sports in America. Examine college football within the broader history of American history and culture from the Gilded Age to the Age of Trump.

HIS X17L.27. Black Southerners in the Age of Jim Crow.
Explore the experiences of Black people during the age of segregation, more commonly referred to as Jim Crow. Discuss the timeframe of 1890-1954, while also talking about the legacy of slavery and the Juneteenth generation. Examine how Black southerners responded to segregation by creating a vibrant community culture rooted in self-help, entrepreneurship, family, and faith.

HIS X17L.3. Introduction to African American History.

HIS X17L.4. Introduction to Asian American History.
Introduces students to the national and transnational histories of Asian Americans in the United States. Explores a wide range of themes related to the Asian American experience.

HIS X17L.5. United States Women, Sexuality, and Gender to 1865.

HIS X17L.6. The United States in the 17th-Century Atlantic World.
The United States during a period marked by the spread of knowledge and experience of the world through conflict, economic exchange, cultural creativity, exploration, New World colonization, technological innovation, and religious reformation and counter-reformation.

HIS X17L.7. The United States and Africa.
History of political, economic, and cultural relations between the United States and Africa from the early origins of the slave trade to the present.

HIS X17L.8. Introduction to Native American Histories.
Examine the history of Native American societies in North America from the earliest records to the present.

HIS X17L.9. The Black Power Movement.
Examines the major organizations, key figures, and ideologies of the Black Power movement from the late 1960s and early 1970s.

HIS X18N. Discovery History.
Analyzes claims from popular books in the light of accurate historical sources. Introduction to the process of making discoveries in historical research.

HIS X18Q. Supervised Research.

HIS X19D. The Ancient Mediterranean World.
Survey of the ancient Mediterranean from ca. 3000 BC to AD 476. Focus on the development of ideas and institutions in the Greek and Roman worlds and on the active cultural exchange among the diverse civilizations of the broader region that shaped Greek and Roman history and cultural identity.

HIS X19S. Topics in History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIS X29S. Topics in History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

HIS X19S. Topics in History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. HIS X20C. Power and Place: Making Texas History.

HIS X20E. Texas before 1900.
Focus on the basic history of Texas from roughly 1450 to 1900. Investigate major events such as the Texas Revolution and Civil War with an emphasis on how and why Texas, its culture, and its groups of people changed or did not change over time.

HIS X20F. Texas, 1900 to the Present.
Examine the steady dissociation of Texas from its Old South status to a transitional state and a power in national politics.

HIS X20T. Topics in Texas History.
Explore selected topics in the field of Texas history.

HIS X20T.1. Mexican Americans in Texas History.
Introduction to the historical experience of Mexican-American persons in Texas.

HIS X20T.2. Texas Black History.
Surveys the history of blacks in Texas from before American settlement to the present.

HIS X20T.4. Texas History's History.
Explore evolving ideas and meanings concerning the most significant events, personages, and social processes in Texas' history.

HIS X20W. Thinking Like a Historian.
To understand history as an academic discipline in terms of research methods, evidence, and analysis.

HIS X21. The History of Rome: The Empire.
A survey of the Roman world from Augustus to Constantine the Great.

HIS X21C. Ancient Slavery.
Examine the practices of slavery in the ancient Mediterranean world, focusing on the case of Rome.

HIS X21D. Ruling the Roman Republic.
Examine the core question about the way the Late Roman Republic was governed: To what extent and in what ways was the Republic "democratic or not?

HIS X21E. Romans in Court.
Examine how Roman law operated at three levels of granularity, focusing mainly on attested disputes that made it to court for resolution.

HIS X21J. Africa and Rome.
Explore the history of Roman Africa with emphasis on what is now Tunisia and northern Algeria.

HIS X21M. The History of Rome: The Republic.
A survey of Roman history from the founding of Rome to the death of Julius Caesar.

HIS X22C. Cultural History of World Science to 1650.
Cultural history of science from ancient times to the seventeenth century.

HIS X22D. The Scientific Revolution of the Seventeenth Century.
The history of science and its place in society from the mid-sixteenth century to the time of Isaac Newton.

HIS X22G. History of the Modern Life Sciences.
History of the life sciences from the eighteenth century to the present.

HIS X22M. History of Modern Science.
The history of science and its place in society from the time of Newton to the present.

HIS X22R. Biology, Behavior, and Injustice.
Explores questions about human behavior related to biological factors as compared with personal experiences and societal standards.

HIS X22S. The History of Genetics and Eugenics.
The history of genetics and eugenic practices in the twentieth century.

HIS X23D. Trash and Treasure in Europe, 1400 - 1800.
Examine Europe in the period that witnessed the "birth" of a consumer society, the transition to fossil fuel as an energy source during the Little Ice Age, the Protestant reformation that trashed formerly treasured relics, the rise of imperial networks of global trade, and much more. Trace the circulation, use, and consumption of things from the renaissance to the consumer revolution using material culture, environmental history, and economic history.

HIS X23L. Europe since 1919.
Survey course emphasizing the impact of the two world wars on European social, political, and cultural life in the twentieth century.

HIS X24C. Mapping Urban Destruction.
Investigates how demolitions have shaped the material and social lives of two compelling, rapidly-changing global cities: Sao Paulo and Austin. Develop technical skills in digital mapping in a supportive environment.

HIS X25C. Global Catholicism, 1400-1800.
Explore the global reach of the Catholic Church before modernity. Examine the tension between the local and the "universal" church, that is, how encounter, religious devotion, and political power were shaped by local circumstances as well as global connections. Analyze recent scholarship, texts, artwork, and objects made by early modern people who shaped Catholicism in this period.

HIS X25F. Religions in the Ottoman Empire.
Examine Jewish, Christian, and Muslim communities in the Ottoman Empire (fourteenth to twentieth centuries), with a focus on dynamics both within and between the communities.

HIS X25J. South Asian Migration to the United States.
Examine the South Asian diaspora in the United States.

HIS X25Q. Russian Orthodox Religion and Culture.
Examine the role and force of the Orthodox Church in Russian history, from the Christianization of the pagan Slavs in the 10th century, through the Russian Revolution into the Soviet era, and up to the present, while considering the prescriptive tenets of the Orthodox faith (religion) alongside descriptive experiences of life within and under Russian Orthodoxy (religiosity).

HIS X25S. History of Jewish Thought.
Examine major thinkers and movements in both Jewish philosophy and Jewish mysticism since the Middle Ages, with a focus on the importance of modern Jewish thought in the twentieth and twenty-first centuries.

HIS X25T. History of Sephardi Jews.
Examine the early-modern networks established by the Sephardi Jews (Sephardim) across the Mediterranean and Atlantic, the rich Ladino Judeo-Spanish culture that thrived in the Ottoman Empire, and Sephardi encounters with the modern world.

HIS X26D. Russia Through American Eyes.
Examine a wide array of American attitudes towards Russia and Russians. Using a variety of political, social, and cultural events and encounters, analyze the ways in which nationalism, imperialism, and geopolitics informed American narratives about Russia and Russians, assessments that range from enthusiasm and curiosity to condemnation and outright hostility.

HIS X26E. Socialism's Past and Futures.
Examine ordinary people's experience of socialism in the Soviet Union and the plural interpretations of this experience after the USSR's collapse.

HIS X28M. Modern Brazil.
The social, economic, political, and cultural forces that have shaped modern Brazil.

HIS X29P. History of the Atomic Bomb.
The development, use, and influence of nuclear weapons from the 1930s to 1954.

HIS X29S. Topics in History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIS X29U. Perspectives on Science and Mathematics.
Explores the intellectual, social, and cultural history of science and mathematics, focusing on the 17th century to the present. Designed for students in the UTeach-Natural Sciences program.

HIS X30S. History of Modern Media and Culture.
Examine the history of modern media and media culture.

HIS X31C. History of the Ottoman Empire.
A survey of Ottoman society and culture and of the empire's place on the world scene.

HIS X31D. Arab Citizens of Israel.
Examine the historical, social, and political processes of change experienced by the Palestinian-Arab community in Israel, including the fundamental aspects pertaining to the founding of Israel as "a Jewish and democratic state" and the relations between the Arab minority and the Jewish majority.

HIS X31E. The Arab-Israeli Conflict.
Examine the elements of the Arab-Israeli conflict, including the main figures involved, events, and turning-points in its history.

HIS X31G. History of Iran to 1800.
A survey of the social, economic, and religious components unique to Iran from the pre-Islamic empire of the Achaemenids through the development of Iran as a medieval and premodern Islamic state.

HIS X31I. The Shock of Modernity in the Middle East.
Explore cross cultural contacts between the East and the West during the modern period. Analyze Islamic civilization in the Middle East of the modern era by addressing the development of religion, law, government, and morality during and after the colonial period.

HIS X31J. History of the Arab World.
A general survey of the origins and development of Arabic civilization.

HIS X31L. Modern Iran.
Explore the development of modern Iran; special attention is given to the impact of the West, the constitutional movement, nationalism, the oil crisis, and the Islamic Revolution of 1979.

HIS X31O. Twentieth-Century Arab World.
Introduction to 20th-century Arab world history, primarily focusing on the Eastern Mediterranean, including Lebanon, Syria, Iraq, Jordan, Palestine, and Egypt. Explore the transformation of this region from a single cultural and political entity under imperial Ottoman rule, through colonial rule to the age of the nation-state and its struggles. Discuss key themes including colonial rule and relation to Europe and the US, Arab nationalism, revolutionary modernism, the impact of Zionism and Israel, the Palestinian revolution, the emergence of political Islam, civil wars, and the oil revolution. Examine internal and external forces and pivotal processes that have shaped the region over the past century through political, social, intellectual, and economic factors.

HIS X31R. Re-forming the Arab East, 1914-Present.
Introduction to the history of the Middle East in the twentieth century. Examines forces that transformed the area from a relatively peaceful region to a radicalized environment. Explores colonialism, nationalism, secular modernism, impact of Zionism, rise of political Islam, status of women, and the oil revolution.

HIS X32G. European Intellectual History from the Enlightenment to Nietzsche.
Explores significant intellectual developments in Europe throughout the nineteenth century. Themes include romanticism, positivism, socialism, and nihilism.

HIS X32J. Twentieth-Century European Intellectual History.
Explores significant intellectual developments in Europe in the twentieth century. Topics include psychoanalysis, sociology, existentialism, and poststructuralism.

HIS X32Q. Forensic Files: Philosophy Crimes.
Explore political philosophies from the continental tradition (Heidegger/Arendt, Nietzsche, Adorno/Horkheimer, and Agamben/Schmitt) implicated in radical politics and answering to political turning points, with a focus on research and reading in historical contexts.

HIS X32R. Marx and Marxist Theory.
Introduction to the writings of Karl Marx as well as to those of his intellectual successors in Europe and around the globe in the nineteenth and twentieth centuries.

HIS X33L. United States Foreign Relations, 1776-1914.
The history of United States foreign policy and diplomacy from the founding of the United States to the outbreak of the First World War.

HIS X33M. United States Foreign Relations, 1914 to the Present.
The history of United States foreign policy and diplomacy from the First World War to the present.

HIS X34C. Music Cultures of the Middle East, Past and Present.
A historical and ethnomusicological survey of the Arab, Turkish, and Persian music cultures.

HIS X34D. Myths and Legends of the Ancient Near East.
Explore myths and legends contained in a variety of ancient sources, including texts from Israel, Greece, Egypt, and Mesopotamia.

HIS X34E. Modern Egypt: A History.
Critically examines the social, political, and intellectual dynamics that shaped the different forms of political community, economic organization, and public culture over the past century. Covers colonialism, liberalism, Arab socialism, authoritarian capitalism, and Islamic republicanism.

HIS X34F. Modern Egypt in Film and Fiction.
Explore the history and culture of modern Egypt through selected readings in twentieth-century film and fiction.

HIS X34G. Cultures of Revolution in the Middle East.
Examine the cultural production that surrounds key moments of political and social change in the Middle East.

HIS X34I. Culture in Turkey: Myths and Realities.
Explore how Turkish culture is neither static nor monolithic but is continuously contested and redefined. Investigate tensions between secularism and Islam, Orientalist and Occidentalist fantasies, and imperialist and nationalist desires to better understand the sociopolitical dynamics that define Turkish society today.

HIS X34J. History of Britain from the Restoration to 1783.
Surveys the political, social, economic, and intellectual history of England and Great Britain from the restoration of the Stuart monarchy in 1660 to the conclusion of the War for American Independence in 1783.

HIS X34L. The American Revolution and the Founding of the United States, 1763-1800.
The Revolutionary transformation of America between 1763 and 1800.

HIS X34O. The Levant: From Colonialism to Coexistence.
Examine the history of the Levant, a region that includes Syria, Israel, Palestine, and Jordan.

HIS X34P. Middle East Outlaws and Lawmen.
Explore the evolution of crime and law enforcement in the modern Middle East.

HIS X34Q. Multiculturalism in Jordan.
Explore how past, present, local, and regional events inform current Jordanian culture and identity.

HIS X37C. Relations Between East Germany and the United States.
Explore and (re)asses the diplomatic, strategic-military relations and socio-cultural entanglements between the United States and the German Democratic Republic, thus complicating our understanding of the West-East divide and Cold War culture.

HIS X37D. German Cinema 1918-1945.
Explore the history and aesthetics of German cinema from 1918 until 1945.

HIS X37E. Transatlantic Memory Cultures.
Explore and compare German and American memory cultures, analyzing the Holocaust, slavery, and colonialism. Analyze the diversity and complexity of (inter)national, local, and indigenous memory cultures while also discussing how Germany and the United States might "learn from each other.

HIS X37J. Nordic Noir.
Uncover the dark side of the Nordic countries, from gritty streets to icy fjords, and explore the history, culture, literature, and movies these societies produce.

HIS X37N. Germany in the Twentieth Century.
Survey of German political and military institutions, economic development, culture, and society.

HIS X39Q. Medieval Middle East History in One Hundred Objects.
Survey the history of the medieval Middle East, from the period of Late Antiquity (in the seventh century) to the rise of early modern empires of the Safavids, Ottomans, and Mughals (in the seventeenth century), through close examination of the meaning and significance of 100 objects.

HIS X39S. Sufism: Islamic Thought and Spirituality.
Explore Sufism and other Islamic mystical traditions that color cultural milieus spanning four continents and fourteen centuries. Focus on the historical developments in the Islamic theosophical tradition, as well as the relationship between Sufism and poetics, colonialism, and post-colonial resistance movements.

HIS X40C. The Chinese in Diaspora.
Explores narratives of migration, race, ethnicity, and a wide range of experiences of acculturation and assimilation from the perspective of a sending society--China--which has one of the longest and most diverse histories of sending people overseas. Over the last millennia, Chinese have migrated around the world and made homes under a great range of adversity and opportunity, producing many stories of human differences and commonalities.

HIS X40G. History of the Southeast Asian Diaspora in the United States.

HIS X40L. Post-Mao China: Change and Transformation.
Examines in a historical context the Chinese economy, society, politics, and culture during the reform era that began in the late 1970s. Explores the transformation of rural and urban economies and related social consequences; government systems, political ideologies, and popular values; and China's integration into the global system and its impact on China's role in world politics.

HIS X40M. Modern China.
History of China from the intrusion of the West circa 1500 to the Communist revolution.

HIS X40P. European Expansion in Asia.
European exploration, the commerce of the East India Companies, and the beginnings of empire in South and Southeast Asia from the fifteenth to the early nineteenth century.

HIS X40R. European Empires in Asia.
The British in India and Malaya, the Dutch in Indonesia, and the French in Indochina since 1800.

HIS X40S. The Chinese in the United States.
History of the Chinese in the United States from their first arrival in significant numbers during the California Gold Rush of the mid-nineteenth century to the present.

HIS X40T. Taiwan: Colonization, Migration, and Identity.
Explores issues of ethnicity, empire, and modernization in East Asia from the sixteenth century to the present, as seen through encounters between Taiwan and aborigines, Han Chinese, Dutch, Portuguese, the imperial Qing, Japanese, mainland Chinese Nationalist Party (KMT), and the United States.

HIS X40U. The Cultural Outsider: Memoirs of East Asia.
Focus is on the cultural outsider's perceptions of East Asia in greater travel" dating from as early as Marco Polo up to works published in contemporary America. Selected memoirs and travelogues are presented from the perspective of the cultural outsider, written by missionaries, colonizers, journalists, POW's, scholars, students, and tourists.

HIS X40V. Big Asian Histories.
Examines ways in which Asia and other areas of the globe have had connected intellectual, artistic, and social developments with focus on world histories centrally involving Asia from the medieval period to the present.

HIS X41F. The Two Koreas and the United States.
The political, social, and cultural relationship between North and South Korea, and between the Koreas and the United States, since 1945.

HIS X41J. History and Memory in Japan and Korea.
Explore the fraught and entangled histories of modern Japan and Korea as depicted in literature and film to consider experiences of imperialism, rapid modernization, war, decolonization, and trauma.

HIS X41K. Origins of Modern Japan.
Japan to the beginnings of the Industrial Revolution, with a focus on the culminating age of samurai rule, the Tokugawa period (1600-1867).

HIS X41M. Imperial Japan.
Japan from the Meiji transformation through war, defeat, and occupation.

HIS X42C. Postwar Japan.
Japan since the war and occupation.

HIS X42D. Political Economy of Japan.
Historical development of the Japanese economy since early modern times.

HIS X43. The Age of Reformation.
Examines late medieval religion, the rise of Protestant movements, and the Catholic response in their cultural, political, and social contexts.

HIS X43C. Transnational Asia: From the Middle East to the Far East.
Examine how various groups of people understood, experienced, and imagined concepts such as "the East" and "Asia" with a primary focus on the nineteenth and twentieth centuries.

HIS X43D. Muslim Travelers and Traders.
Introduction to modern Middle Eastern and Islamic history in the broader context of globalization, with a primary focus on the nineteenth century to the present.

HIS X43E. Modern Middle East History in One Hundred Objects.
Survey the history of the medieval Middle East, from 1500 to the present, through close examination of the meaning and significance of 100 objects.

HIS X43F. Food History of Asia and the Middle East.
Explore the history of food and beverages in the Middle East and Asia, including Palestine/Israel, Egypt, Iran, India, China, and Japan. Investigate themes of identity, capitalism, and globalization to reflect on the role of food consumers in an interconnected world.

HIS X43G. Italian Renaissance, 1350-1550.
Survey of political, socioeconomic, religious, and intellectual trends during the Italian Renaissance.

HIS X43L. History of Russia to 1917.
Survey of Russian history from seventeenth-century Muscovy to the fall of the Romanovs in 1917.

HIS X43M. History of Russia since 1917.
A survey of Russian history from the revolution of 1917 to the collapse of the Soviet Union.

HIS X43Q. Russian Food Ways.

HIS X43R. Revolutionary Russia.
An in depth examination of the political, social, economic, and cultural dynamics at work in early twentieth-century Russia.

HIS X43W. Witches, Workers, and Wives.
Explores the role of families and concepts of gender as expressed in key economic, social, political, and cultural patterns in early modern Europe.

HIS X44E. France in the Middle Ages.
Social, cultural, political, and economic history of France from the fall of the Roman Empire to the fifteenth century; emphasis on the development of feudalism and nationalism.

HIS X44F. Anglo-Saxon England.
The political, social, cultural, and legal history of England from about 410 to 1154. Lectures and discussion of primary sources.

HIS X44G. Twelfth-Century Renaissance: 1050-1200.
An examination of social, cultural, and intellectual developments in eleventh- and twelfth-century Europe.

HIS X44J. Norman and Angevin England.
Political, social, and legal history of England from the Norman conquest in 1066 to the end of the reign of Richard III in 1485.

HIS X44M. Everyday Life in Early Modern Europe.
Social history of early modern Europe (1400-1700), with emphasis on material conditions of social existence.

HIS X44N. Death and the Afterlife in Ancient China.
Investigate ancient Chinese beliefs and practices surrounding death and the afterlife from the Neolithic era to the arrival of Buddhism. Explore tombs, burial objects, and funeral rites; philosophical essays and historical accounts; medical practices; religious relics, tokens, and talismans; ghost stories; poetry; and paintings.

HIS X44Q. Northern Renaissance: Religion, Magic, and Humanism.
Explore Northern Europe's transition from medieval to Early Modern in and through the northern Renaissance. Examine humanist culture and its many tensions with the Church, technological breakthroughs and their social and economic consequences, the connections between the discovery of new lands and the recovery of ancient learning, and the formation of the early modern state.

HIS X44R. Machiavelli: Politics and Culture.
Through Niccolo Machiavelli's chief writings, consider the local, regional, Mediterranean, European, and global aspects of his work.

HIS X44S. The Crusades.
An exploration of the religious encounters between eastern and western Christians, Christian heretics, Jews, Muslims, and polytheists; political, military, and cultural changes of the high middle ages; and the ways that crusading ideas and symbols have been reused in contemporary politics and popular culture.

HIS X44T. Law and Society in Early Modern Europe.
Research seminar on how historians have explored the significance of law, criminal and civil, in the lives of early modern Europeans. Topics include infanticide, fornication, drunkenness, theft, debt, slander, and family disputes.

HIS X45J. The Coming of the Civil War, 1829-1861.
Lecture and discussion course dealing with the historical conditions that led to the American Civil War.

HIS X45L. The American Civil War and Reconstruction, 1861-1877.
Lecture and discussion course on the Civil War and Reconstruction period.

HIS X45O. Debt and Colonialism in the Caribbean.
Examine the role that debt has played in the formation of colonial and neocolonial practices in the Caribbean region. Take a broad approach to the concept of debt in order to explore the financial and monetary dynamics of debt, but also the political and cultural implications of debt. Focus in particular on debt as justification in the furtherance of colonialism throughout the Caribbean. Engage in a historical examination of the United States' colonial projects and military interventions in the region throughout the 20th and into the 21st centuries.

HIS X46C. Ancient India.
History and culture of South Asia from its protohistoric beginnings in the Indus Valley through the period of the early empires of the Mauryas and Guptas.

HIS X46D. Medieval India.
History and culture of South Asia from approximately 500 to 1500, with emphasis on religious and political institutions and the emergence of regional cultures.

HIS X46E. Colonial Encounters in Mesoamerica.
Study European-indigenous encounters in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, between approximately 1450-1750. Examine strategies of contact, accommodation, and resistance that indigenous communities and European colonizers used to communicate with each other and negotiate the conduct of daily life in colonial society.

HIS X46G. Precolonial India, 1200-1750.
Surveys the history of South Asia during the era prior to British colonial rule.

HIS X46J. Colonial Latin America through Objects.
Examines objects, such as paintings, reliquaries, monstrances, and churches from colonial Latin America in order to understand colonial culture. Includes critical reading of original texts.

HIS X46K. Colonial Latin America.
Basic survey course, designed as an introduction to Latin American history in the colonial period.

HIS X46L. Modern Latin America.
Continuation of History 346K and Latin American Studies 366 (Topic 2).

HIS X46M. Early Modern India.
The history and culture of South Asia from approximately 1500 to 1750.

HIS X46N. The Indian Subcontinent, 1750-1950.
Examines the cultural and political movements and events that led to formation of the two nation-states India and Pakistan.

HIS X46P. The Indian Republic Since 1947.
An overview of Contemporary India, a republic that emerged from the British Empire.

HIS X46R. Revolution in Modern Latin America.
Comparison of the Mexican and Cuban revolutions and of their challenges to inter-American relations.

HIS X46S. Revolution in Twentieth-Century Latin America.
An introduction to recent Latin American history, with emphasis on phenomena that explain the apparent social unrest and political instability of the region.

HIS X46T. The Cuban Revolution and the United States.
The special economic and political relationship between the United States and Cuba from 1898 to 1967; and how the 1959 revolution affected the Cold War relationships between East and West, North and South.

HIS X46V. Twentieth-Century Rural Latin America.
Examines causes of some of the unresolved conflicts affecting Latin America today, including the social-agrarian relationships linking landlords and campesinos; the role of the state and the impact of official ideologies involving indigenous people; religion and the Catholic Church; the history of rural institutions; and the success or failure of land reforms.

HIS X46W. Church and State in Latin America.
History of Church-state relations and religious politics in modern Latin America, with emphasis on the nineteenth to early twentieth-century periods.

HIS X47C. Reimagining Cuba, 1868-Present.
Explores Cuban-United States relations from the nineteenth century to the present, including issues of empire and transnationalism, and social change engagements between Cuba and the United States before and after the Cuban Revolution.

HIS X47D. Cuba in Question.
Explore Cuba's peoples, cultures, ethnicities, and the social and historical processes that go far beyond the common media stereotypes.

HIS X47J. Puerto Rico In Crisis.

HIS X47L. Seminar in Historiography.
Designed to familiarize students in the honors program with general problems of historiography, historical interpretation, and the philosophy of history.

HIS X47N. Urban Slavery in the Americas.
Examines urban slavery in the Americas.

HIS X47P. When Christ was King.
The history of Catholicism in twentieth-century Mexico, often seen as Latin America's most "Catholic" nation.

HIS X47R. Chile: From Revolution to Counterrevolution.
An examination of the key political, social, and economic events that underpin contemporary Chilean society.

HIS X49R. Military History to 1640.
A broad survey of world military systems from ancient times to about 1640.

HIS X49S. Survey of Military History, 1640 to 1900.
An investigation of world military systems and of the evolution of military technology from about the time of the Thirty Years' War to the end of the nineteenth century.

HIS X50L. Topics in Undergraduate Seminar in History.
Lectures, discussion, reading, and research on selected topics in the field of history.

HIS X50L.19. Resistance, Rebellion, and Revolution in Colonial Spanish America.

HIS X50L.33. Heresy and the Inquisition.

HIS X50L.35. Nigeria: A History of Nation-Building.

HIS X50L.41. Stalinist Russia.

HIS X50L.42. History of Modern Central America.

HIS X50L.44. Culture and Identity in Colonial Mexico.

HIS X50L.5. Gandhi and Gandhism.
Explore Gandhi's life, work, philosophy, and influence, as well as his historical and cultural context.

HIS X50L.54. Epics and Heroes of India.
Focus on India's classical epics, the Mahabharata and the Ramayana, with emphasis placed on understanding the epic characters in relation to the heroic traditions of premodern India, as well as on the role of the epics in contemporary Indian political and religious culture.

HIS X50L.59. Stalin's Russia at War.

HIS X50L.62. History of the Caribbean.
Overview of Caribbean history from 1492 to the present. Topics include contact between European and native cultures, piracy, slavery, colonialism and decolonization, and revolutions.

HIS X50L.64. Einstein in the Age of Conflict.
Following the life and work of Albert Einstein, course examines the rise of the theories of relativity and quantum mechanics upon the stage of international political upheaval.

HIS X50L.67. Mughal India in History and Memory.
Focuses on South Asia during the era of the Mughal empire (1550-1750), continuing through the symbolic relevance of the Mughal dynasty in British India and in India today.

HIS X50L.68. Afro-Latin America.
Examines the historical experiences of people of African descent in Latin America and the Caribbean beginning in the slavery era, and focuses on the histories of Afro-Latin Americans after emancipation.

HIS X50L.69. The Decolonization of the British Empire.
Explores the era of decolonization of the British empire after World War II.

HIS X50L.70. Historical Imagining of Africa in Films.

HIS X50L.71. Liberalism and the British Empire.
Explores the emergence of the political and economic ideas of liberalism in Britain and the evolution of British overseas expansion during the seventeenth-, eighteenth-, and early nineteenth- centuries.

HIS X50L.73. Race, Science, and Racism.
Explores important episodes in the history of biology regarding the classification of human races.

HIS X50L.75. Rethinking the Conquest of Mexico.
Explores the "conquest" of Mexico and the social, cultural, political, and economic processes which were set in motion by the Spanish invasion of Mexico.

HIS X50L.77. The Spanish Inquisition.

HIS X50L.84. African Travel Narratives.
Examines histories of Africa and travel through eyewitness accounts. Studies journeys Africans have made within and from the continent alongside accounts of travelers visiting Africa from elsewhere.

HIS X50L.85. The Cold War in Five Continents.
Examination of the Cold War and the ensuing conflicts around the world (1945-1990).

HIS X50L.86. Latin America in the Nineteenth Century.
Questions the geographical category of Latin America by examining the kinds of trends and forces of the nineteenth century that contributed to its conceptual emergence and to its growing political, economic, and cultural significance on the global stage.

HIS X50L.87. Global Environmental History.
Explore how human societies and natural environments have shaped each other in world history.

HIS X50L.88. Medicine in African History.
An exploration of how communities have confronted disease throughout Africa's history.

HIS X50L.91. History of Money and Corruption.
Investigate how financial crises have arisen in the past and to what extent they transpired because of wrongdoing.

HIS X50L.95. Radical Hope and Global Environmental History.
Explore the meaning of "radical hope" and how it is related to the environment, climate change, or the Anthropocene.

HIS X50L.96. Africa and Indian Ocean World.
Explore the connected histories of the geographical regions and economic communities that share the littoral space of the Indian Ocean.

HIS X50L.97. Global Commodities: Asia and the World.
Explore the vital role of commodities in Asian history with a particular focus on East and Southeast Asia.

HIS X50R. Topics in Undergraduate Seminar in United States History.
Lectures, discussion, reading, and research on selected topics in the field of United States history.

HIS X50R.1. Coastal Communities in Early America.

HIS X50R.10. Slavery in the United States.

HIS X50R.13. History of Sexuality in America.

HIS X50R.14. Gender and Slavery in the United States.
Examines the gendered experience of chattel slavery in the United States. Includes critical analysis of classic and contemporary texts, films, and songs that focus on slave labor, family, community, sexuality, and the economy.

HIS X50R.17. Black Women in America.
Uses primary sources, historical monographs, and essays to provide a chronological and thematic overview of the experiences of black women in America from their African roots to the circumstances they face in the present era.

HIS X50R.18. Women in Sickness and Health.
Explores medical and biological views throughout the nineteenth and twentieth centuries of women and women's health, the social context of those views, the development of medical practices, and the treatment of illness and debility.

HIS X50R.19. American Popular Culture, 1682-Present.
Explores the evolution of American popular culture and its relationship to national consolidation, and at times, disunion, over the last 330 years.

HIS X50R.2. Lyndon Johnson and His Times.

HIS X50R.20. History of American Feminism.

HIS X50R.21. Pluralism in Early America.

HIS X50R.22. The History of Islam in the United States.
A brief introduction to Islam. Defines the role of Islam and views of Muslims in the early history of the United States, and introduces students to major issues concerning contemporary American Muslims.

HIS X50R.23. Twentieth-Century Native American History.
Studies Native American life and culture from the late nineteenth- to the twentieth- century through the use of historical and anthropological texts, autobiographies, documentaries, and fiction.

HIS X50R.24. Domestic Slave Trade.
Explores the inner workings of the domestic slave trade from the perspectives of slaveholders, speculators, and the enslaved. Analysis of maps, letters, diaries, newspaper advertisements, and legislation relating to the domestic slave trade.

HIS X50R.27. Arts and Artifacts in the Americas.
Surveys the changing material culture of the western hemisphere from pre-Columbian times to the beginning of the industrial revolution.

HIS X50R.28. Debating the American Revolution.
Examination of the precipitant events and ideas leading up to the American Declaration of Independence through discussions, lectures, and an extended exercise in historical role playing.

HIS X50R.35. The Civil Rights Movement from a Comparative Perspective.
Focuses on African American and Mexican American struggles for civil rights. Asian American and Native American movements will also be addressed. Using a comparative approach the student will consider the distinctiveness of each of these struggles while also viewing them in relation to each other.

HIS X50R.37. Refugees in Twentieth-Century United States.
Explores the history of refugees in the twentieth century, with special attention to the United States and its engagement in the international arena of refugee politics.

HIS X50R.38. Barack Obama and American Democracy.
Focuses on the impact of Barack Obama's watershed presidency on American democracy.

HIS X50R.40. Black Women on Trial.
Using press coverage of historical and contemporary court cases and trials of women ranging from Angela Davis to Marissa Alexander, explores how media shapes public and popular perceptions of race, class, gender, sexuality, and the law.

HIS X50R.42. Terrorism and Insurgency in American History.
Investigate terrorism throughout American history through selective case studies and independent research.

HIS X50R.5. American Cultural History of Alcohol and Drugs.
Study of the American use and perception of drugs, including alcohol, and how they have changed over time. Examines significant shifts in American attitudes toward individualism and social control.

HIS X50R.7. Environmental History of North America.
The history of humanity's influence on the plants, animals, microlife, soils, water, and air of North America, and vice versa, from the arrival of the proto-Indians to the contemporary environmental crisis.

HIS X50R.8. Women in Postwar America.

HIS X51D. Alexander the Great and the Hellenistic World.
History of Asia, Egypt, and the Mediterranean world from Alexander's expedition to Asia to Rome's defeat of the last of the Hellenistic monarchs at Actium (ca. 334 to 31 BC).

HIS X51P. History of Religion in America since 1800.
Introduction to the history of religion in the United States of America from the nineteenth century to the present. Focuses on how diverse peoples imagined and transformed the landscape, interacted with one another at different sites, and moved within and across national borders.

HIS X51Q. Slavery and the New Testament.
Examine slavery in the New Testament.

HIS X52F. The Mexican Revolution, 1910-1940.
Explore the initial decade of the Mexican Revolution, the first of the twentieth-century nationalist social revolutions. Examine the historical antecedents and the political, economic, social, and intellectual elements of the upheaval.

HIS X52G. History of Modern Mexico, 1940-present.
Introduction to the history of modern Mexico from the close of the Mexican Revolution (1940) to the present.

HIS X52P. England in the Twentieth Century.
A survey of political, economic, social, and intellectual trends, with emphasis on class relationships.

HIS X53. The French Revolution and Napoleon.
Analysis of the social, political, and economic origins and outcomes of the French Revolution and Napoleon's empire.

HIS X54E. Archaic and Classical Greece.
Survey of Greek history from the emergence of the city-states to the rise of Macedonia.

HIS X54F. The Three French Wars of the Twentieth Century.
Focuses on 20th century France, with an emphasis on three critical conflicts: World War One, World War Two, and the Algerian war.

HIS X54G. France in the Dark Years.
Explore the Nazi occupation of France and Vichy's collaboration. Consider the devastating fall of the French Republic, the organization of Vichy France, Vichy's complicity in the Holocaust, the ethical complexities of collaboration and resistance, and the ramifications of World War II for the French empire.

HIS X54N. France in Modern Times.
The impact of revolution on French political, economic, and social development in the nineteenth and twentieth centuries.

HIS X55F. The United States, 1877-1920.
Examines the Gilded Age and Progressive Era to depict the rise of modern America.

HIS X55M. The United States, 1920-1941.
A history of political, economic, diplomatic, military, social, and cultural developments in the United States between the two world wars.

HIS X55N. Main Currents of American Culture to 1865.
Traces the development of American culture and society from the colonial era until the end of the Civil War. Major themes include racial conflict, religion, slavery, the development of democracy, and cultural reform.

HIS X55P. The United States since 1941.
A history of political, economic, diplomatic, social, and cultural developments in the United States since the nation's entry into World War II.

HIS X55S. United States Constitutional History.
A lecture and discussion course dealing with the history of the development of the American constitutional tradition from colonial times to the present.

HIS X56C. Land in America.
Explore how the history of land helps explain the society we live in today and ideas about the human-nature relationship.

HIS X56G. History of the United States West.
Examines the history of the trans-Mississippi West with a special focus on the concepts of conquest, resistance, and region from the nineteenth to the twentieth century.

HIS X56K. Main Currents of American Culture since 1865.
Traces the development of American culture and society from the end of the Civil War to the present. Major themes include racial conflict, pluralism, religion, urban development and reform, modernism, government centralization, cultural radicalism, and the rebirth of conservatism.

HIS X56P. The United States in the Civil Rights Era.
Examines United States history in the post-World War II era, including how civil rights and other racial issues helped shape the politics, popular culture, and social life of this period.

HIS X56R. America and the Holocaust.

HIS X56S. American Presidency: 1789 to the Present.
Examines the presidency and the individuals who have held it, with an eye toward discovering trends of historical and contemporary interest.

HIS X57C. African American History to 1860.
Review of West African origins; New World settlement patterns, social life, and culture; discussion of the Atlantic slave trade, the development of capitalism and plantation slavery, and the origins of racism.

HIS X57D. African American History since 1860.
Survey of the history of African Americans in the United States from 1860 to the present: Emancipation, Reconstruction politics, migration and urbanization, and the evolution of African American culture; kinds of sources and methods valuable for analyzing African American life and culture.

HIS X57Q. German-American Immigration and Ethnicity.
Explore German immigration to the United States from the colonial era to the present. Examine the motivations for migration; settlement patterns; construction of identity through traditions and festivals; German American's economic, social, and cultural contributions to the United States; and challenges to assimilation.

HIS X58C. History Internship.
Apply historical methods in office and organizational workplaces. Utilize research, analytical, writing, and information skills.

HIS X58M. History of Britain from 1783 through World War I.
Surveys the political, social, economic, and intellectual history of Great Britain from the years preceding the outbreak of the French Revolution to the conclusion of World War I.

HIS X58Q. Supervised Research.

HIS X59C. African Cities Since 1500.
Explore Africa's past through the story of urbanization beginning with an overview of African cities around 1500--a time of increasing human migration and global trade. Assess African cities in the modern period, focusing on the advent of European colonialism in the 1800s and its aftermath.

HIS X59D. Fashion in Africa.
Examine fashion history through readings, videos, social media, and textile making to provide an immersive experience in African design history. Address the ways in which textiles are tied to class distinctions and politics, wrapped up in the history of trade (including human trafficking and slavery), mixed into revolutionary struggles and post-independent governance, and inspire haute couture and global fashion trends.

HIS X59N. History of Africa since 1800.
Development of sub-Saharan Africa from the end of the slave trade to independence.

HIS X59P. History of East Africa.
A survey of the history of Kenya, Tanzania, and Uganda from prehistoric times to the postindependence era.

HIS X59R. History of West Africa.
A history of the West Africa region: the rise and fall of kingdoms, relations with Europe and Asia, the great revolutions of the nineteenth century, colonial administration, decolonization, and the search for economic development and political stability since independence.

HIS X61C. The World of the Victorians.
Introduction to the main contours of social and cultural British history, both in Britain and in its burgeoning empire.

HIS X61D. The Church and the Jews.
Examination of the complex relationship between the Western Church and Jews over two millenia.

HIS X61E. Rebels and Revolutionaries in Russian History and Literature.
Study of fictional and real rebels and revolutionaries across almost a century of Russian literature.

HIS X61F. Berlin.

HIS X61G. The Sacred and the Secular in Modern European Thought.
Introduces key themes and methodologies of intellectual history and social theory by exploring the dueling approaches to secularization and sacralization in modern European thought.

HIS X61I. World War II in Eastern Europe.
Examines the war in Eastern Europe with a particular emphasis on occupation, collaboration, and resistance; the Holocaust; and the connection between ethnic cleansing, population transfer, and the establishment of communism in postwar Eastern Europe.

HIS X61J. Medieval Warfare.
Examine the development of warfare between the late Roman Empire and the early modern world (c. 400-1500), including a brief retrospective on war in the ancient world.

HIS X61O. Russia's Soul: Spiritual Traditions.
Explore complex history of Orthodox Christianity, Judaism, Islam, and Buddhism in Russia. Examine important worship sites, including monasteries and pilgrimage destinations. Have discussions with Russian scholars of religion and practitioners of different faiths.

HIS X61Q. Cultural Citizenship in the United States and Latin America.
An introduction to the history of relations between the United States and Latin America. Designed to prepare each student for a potential experience in Latin America (or with Latino communities in the United States) such as study abroad, research, and/or community engagement.

HIS X61R. Nazi Culture and Politics.
Explore fundamental questions about the unique role of culture in modern democracies and dictatorships by taking an overview of culture and politics in the Third Reich. Examine questions about the relationship between political propaganda and modern entertainment, mass media and authoritarianism, political aesthetics and ideology, and the dynamics of oppression, resistance, and consent.

HIS X61S. European Espionage 1914-1989.
Examine the development and transformation of espionage, intelligence, and surveillance in Europe from the first World War to the end of the Cold War.

HIS X61T. East European Transnational Worlds to 1914.
Examine an overview of major developments in the economic, political, social, cultural, and gender and sexuality fields of East European history before 1914. Explore diplomacy, institutional legacies of war and peace, urban and rural developments and inequalities, spaces of language and religion, race, labor migration, and the arts.

HIS X61U. Geography in Eastern Europe and Eurasia.
Explore alternatives to nation-state imaginaries across Eastern Europe and Eurasia. Examine spatial thinking, utopia, dystopia, the history of geosciences, counter-mapping, and the decolonial geopoetics of space.

HIS X61V. Technology and Society in Modern Eastern Europe and Russia.
Learn how technologies and social changes shape each other. Use case studies from Eastern Europe and Russia from the Industrial Revolution to the Era of AI. Explore the industrialization of production and consumption, the professionalization of engineering, the emergence of multidivisional industrial enterprises, the relationship between humans and machines, the uses of "cheap nature", and technological utopianism.

HIS X61W. Russia and Ukraine in World History.
Focus on multicultural history, shared imperial and national spaces, and geopolitics of entangled Russian-Ukrainian relations.

HIS X62C. Vienna: Memory and the City.
Examines the ways in which cultural memory has shaped, and continues to shape, urban life in Vienna, Austria.

HIS X62E. Early Western Colonialism.
An examination of the phenomenon of colonialism, with an emphasis on the European expansion across the globe that began at the end of the western Middle Ages and continued throughout the early modern period.

HIS X62F. The First World War.
Examine the tensions and conflicts between 1914 and 1918 that set the stage for the violent twentieth century.

HIS X62I. Living a Catastrophe: Chernobyl.
Examine different ways of narrating the Chernobyl disaster and general disasters through history, environmental history, sociology, art, film, fiction, and science.

HIS X62J. Poland and the Second World War.
Examine the occupation of Poland by Germany and the Soviet Union and the ways in which this dual occupation impacted people and their communities.

HIS X62O. Cold War Eastern Europe.
Discover the primary historical developments of the post-war period in Eastern Europe from the imposition of communism in 1945 until its collapse in 1989. Explore political, economic, and cultural transformations of the Cold War.

HIS X62P. Spinoza and Modernity.
Introduction to the core of Spinoza's writings and the diverse reactions they have elicited. Examines Spinoza's refusal of mind-body dualism, as well as a transcendent god or ideal as a way of understanding Spinoza's concepts and ideas.

HIS X62Q. Eastern Europe in the Twentieth Century.
Examines the major political, social, and cultural events that shaped Eastern European society in the twentieth century.

HIS X62R. Jews of Eastern Europe.
Explores the history and culture of Jews in Eastern Europe.

HIS X62S. Southeast Europe in the Twentieth Century.
Explores the key events and developments of Southeastern Europe, the region commonly referred to as the Balkans, in the twentieth century.

HIS X62T. Heretics and Freedom Fighters, 1350-1650.
Explores the theologies, politics, and personal identities that emerged and passed away in this era.

HIS X62U. Environmental History of Eastern Europe.
Explore and relate commodification of nature, the climate crisis, and preserving biodiversity from the past and present. Investigate how human societies have changed their environments and how the environment has influenced the courses of societies through case studies from the ecological impact of the Teutonic Crusades to nuclear waste management in Chernobyl.

HIS X62V. War and Genocide: The Holocaust.
Examine the Holocaust as part of Nazi Germany's quest to build a new racial order.

HIS X62W. Legacies of World War II in Eastern Europe.
Examine the complex and dynamic legacies of World War II and questions of memory, identity, and politics from 1945 to the present.

HIS X63C. Argentina: Populism and Insurrection.
An overview of principal trends and issues in Argentine history from independence to the present.

HIS X63D. Religion, Conquest, and Conversion in Colonial Latin America.
Focuses on the histories of the Catholic Church and religious devotion in colonial Latin America between 1521 and 1821.

HIS X63E. Mapping Latin America.
Discuss the role of maps in the creation of Latin America as a specific sort of place. As such, allows familiarity with a broad overview of Latin American history from Pre-Columbian civilizations to the modern period.

HIS X63F. The Bible in the Colonial Americas.
Varied perspectives on the central role played by the Old Testament in the construction of colonial cultures in the Americas.

HIS X63J. Life and Politics in Contemporary Mexico.
Examine an overview of life and politics in contemporary Mexico.

HIS X63T. Latin America in the Sixties.
Explore the impact of the Cuban revolution in Latin American politics, gender roles, and women's participation in public life during the sixties.

HIS X64C. History of Hindu Religious Traditions.
History of major doctrines, practices, and institutions that shaped the development of Hinduism; how religions adapt to social and cultural change and often provide the catalyst for change.

HIS X64D. Prophet of Islam: His Life and Times.
A detailed study of the prophet Muhammad's life and message, and of the means by which his life was recorded and popularized.

HIS X64E. The Dead Sea Scrolls.

HIS X64F. African History in Films and Photographs.
Explore the social, economic, and political challenges of the past fifty years of Africa's history through an examination of several popular films.

HIS X64I. Major Islamic Texts.
Introduction to key religious, philosophical, and political ideas from part of the Islamicate world through sustained readings of core texts.

HIS X64J. African Women's History.
Major themes include politics, economics, religion, the family, culture, technology, feminism, colonialism, nationalism, and development in relation to the lives of African women.

HIS X64O. Culture and Crisis in Contemporary Japan.
Explore the cultural history of Japan from the 1980s to the present, with particular attention paid to economic and ecological issues represented in literature, film, and visual culture.

HIS X64P. Apartheid: South African History.
A study of the social, political, economic, and cultural history of South Africa to contextualize the rise of apartheid. Primarily focuses on the period since 1948 from the perspectives of women, children, and men of all racial backgrounds who lived through that particular period.

HIS X64Q. French Empire: The West and Islam.
The development of regions within the Mediterranean, variously called the West and East or Europe and Islam, with an emphasis on the role of modern France and France's Mediterranean empire.

HIS X64R. Modernization in East Asia.
Examines the different historical experiences of mainland China and Taiwan in the context of the East Asian model of development.

HIS X64S. Black Slavery in the Atlantic.
Examine the history of slavery in the Atlantic from 1450 to 1865.

HIS X65G. Topics in United States History.

HIS X65G.1. United States Catholic History.
Examine how Catholicism and national identity work for Catholics in the United States, with an emphasis on Catholic women and Latino/as.

HIS X65G.10. Twentieth-Century United States Lesbian and Gay History.
Examines classic texts and recent and varied writings on LGBT history, focused on experiences, ideas, and conflicts that have shaped modern LGBT identities.

HIS X65G.12. History of the United States-Mexico Borderland.
Introduction to the history of the United States and Mexico border region.

HIS X65G.13. Race, Law, and United States Society.
Examines the intersection of racial ideology and legal culture in the United States.

HIS X65G.15. United States Military History.
Explore the use of "authorized violence" and "unauthorized violence" by the U.S. military and examine how both types of violence have changed American history since initial colonization.

HIS X65G.16. Unbelief in America.
Examine the history of unbelief and the role that it has played in US history.

HIS X65G.17. Mexican American Studies at UT.
Trace the origins and development of Mexican American Studies at the national, regional, and local levels. Collaborate to help preserve and recognize the significance of Mexican American Studies at the University in historical and contemporary contexts.

HIS X65G.18. The History, Politics, and Future of American Higher Education.
Explore seventeenth-, eighteenth-, and early nineteenth-century American higher education.

HIS X65G.19. Museums: Past, Present, and Future.
Examine the history, varieties, and philosophies of museums.

HIS X65G.2. Popular Music in the United States.
Traces the history of popular music in the United States and its influence on American politics, economics, and culture from the 1880s to present day.

HIS X65G.20. Native American Women's History.
Investigate the histories of Native American women to reaffirm and reclaim their place and role in the histories of Native Americans, indigenous peoples, women, Chican@/xs, Greater Mexico, and the United States. Contemplate how many understandings that center colonization, settler colonialism, genocide, race, and environmentalism are essential to examining Native American women's history. Explore the stories, struggles, and ideas of community-building, sovereignty, and liberation as integral to their genders and sexualities as Native American, Indian, First Nations, indigenous, and red and brown women.

HIS X65G.23. La Causa, The Farmworker Movement.
Examine the twentieth-century expansion of commercial agriculture and concomitant labor organizing struggles waged by agricultural workers in the United States, including Arkansas, California, Hawai'i, Puerto Rico, and Texas. Explore the role of the United Farm Workers of America.

HIS X65G.24. The United States and the United Kingdom: The Transatlantic Alliance.
Explore the diplomatic and military history of the United States and Great Britain and how the two nations have interacted and shaped each other's national security policies and visions of a liberal international order.

HIS X65G.25. Black Women and Mass Incarceration.
Examine the history of Black women and mass incarceration in America. Explore how race, class, and gender have historically influenced the production of crime and unfair criminal justice policies. Investigate why mass incarceration matters, what its historical legacy is, and how it impacts Black women today.

HIS X65G.26. Slavery and Its Legacies.
Explore how slavery has evolved in the United States since the end of the Civil War.

HIS X65G.27. History of American Childhood.
Explore the history of American children and youth from the colonial era to the present.

HIS X65G.3. United States Economic History since 1880.
The history of American capitalism from 1865 to 2000; examines innovation, economic rights, and the role of the state.

HIS X65G.4. The Vietnam Wars.
Introduction to the complex and controversial history of the wars fought in Vietnam from 1941 to the 1980s.

HIS X65G.5. Science, Ethics, and Society.
Explores the ethics of scientific experimentation on humans in the nineteenth and twentieth centuries.

HIS X65G.6. Antebellum Slavery.
Examination of slavery at its maturity during the nineteenth century.

HIS X65G.8. Women and Social Movements in the Twentieth-Century United States.
Examines women's participation in well-known and lesser-known social movements during the twentieth century.

HIS X66D. Jews: Nation or People.

HIS X66E. Restitution and Restorative Justice after the Holocaust.
Examine attempts to find a measure of justice after the Holocaust. Explore themes of human rights and international law.

HIS X66F. Politics of Food in Latin America.
Examine food production, food consumption, and socio-cultural identities in Latin America through comparative and multidisciplinary research.

HIS X66N. Topics in History.

HIS X66N.15. Anti-Semitism.
Surveys trends in Judeophobia/anti-Semitism over 2,500 years in both Christian and non-Christian societies. Designed to use anti-Semitism as way to explore more general ideas in social theory such as boundary making; models of racial, ethnic, and cultural conflict; and the role of intellectual and scientific elites.

HIS X66N.17. British History, Literature, and Politics.
Reading course in history, literature, and politics, and as a class in professional writing. Examines not only the literature, history, and politics of England, Wales, Scotland, and Ireland, but also the interaction of British and other societies throughout the world.

HIS X66N.18. Global History of Disease.
Introduction to major themes in the history of medicine through the lens of disease. To be considered are the roles governments, medical practitioners, and patients play in the social construction of disease and health.

HIS X66P. Sexuality and Gender in Latin America.
Explore gender as a broad analytical tool to understand key problems concerning social organization, power relations, and inequality in contemporary Latin America.

HIS X66Q. Newton's Principia.
Examine key sections of Newton's Principia Mathematica Philosophiae Naturalis.

HIS X67C. Business and Society in South Asia.
Examine the long history of commerce and enterprise in the Indian sub-continent up to the present.

HIS X67D. Gender and Modern India.
Examine gender and the shifting nature of modernity between precolonial and colonial periods in the Indian subcontinent.

HIS X67E. History of the Pilgrimage to Mecca, Hajj.
Survey of the Hajj, Islam's major pilgrimage to Mecca and the nearby Holy Places. It will examine the Islamic pilgrimage from its beginnings in the seventh century C.E. through today.

HIS X67F. Slavery and South Asian History.
Examine the presence of slavery in the subcontinent in the third century BCE to the twentieth century.

HIS X67J. Partition of India in History and Memory.
Discover the experiences and memories of many different groups affected by the Partition of British India in 1947 while tracing the effects of the Partition until the present.

HIS X67Q. History of Food and Healing in China and Taiwan.
Explore the cultural, historical, philosophical, social, and scientific background against which the connection between food and healing has evolved through Chinese history.

HIS X67S. Islam in the Early Modern World: Religion and Culture.
Examine a history of the religious and cultural development across the Islamic world between the thirteenth and eighteenth centuries, stemming from the rise of the Mongols and the end of the caliphate. Explore the early modern Muslim empires of the Ottomans, Safavids, and the Mughals.

HIS X68C. Piracy in East Asia.
Examine how pirates helped bind East Asia together into an integrated zone of economic and cultural exchange. Explore how they formed the leading edge of early modern globalization and linking diverse economies and societies together.

HIS X68D. Banned in Japan: Censored Art.
Focus on banned works of literature, painting, photography, film, and manga that encountered censorship in Japan from the early eighteenth century to today. Explore the censored texts in-depth alongside the sociopolitical contexts of their banning in order to understand how censorship worked historically and to help us consider how it works in our own time and place.

HIS X68S. The Age of the Samurai.
Explore the history of Japan via an examination of the complex and ever-changing figure of the samurai.

HIS X69Q. Black Lives in the Archives.

HIS X71Q. Nationalisms in the Caribbean.

HIS X72L. Proseminar in Historical Source Readings.
Individual instruction in reading history and historiography.

HIS X72M. Proseminar in Historical Writing.
Individual instruction in historical research and writing.

HIS X72Q. Race, Rebellion and Revolution in the Caribbean.

HIS X74C. Race and Migration: The Mediterranean.
Examine the history of migration within and from the Mediterranean area.

HIS X74Q. Race Against Empire: Americas.

HIS X75D. Islamic Spain and North Africa to 1492.
An introduction to the impact of Islam on Spain and North Africa, with emphasis on social, economic, and cultural development.

HIS X75K. Tudor England, 1485-1603.
Exploration of the most important political, religious, social, economic, and intellectual changes that occurred in England between the accession of Henry VII and the death of Elizabeth I.

HIS X75L. Stuart England, 1603-1689.
Topical lecture course focusing on the most significant political, religious, social, economic, and cultural developments in seventeenth-century England.

HIS X75M. Modern Spain, 1800 to the Present.
Political, social, and economic changes in the nineteenth century: the Second Republic; the Spanish Civil War; the Franco Era and the transition to democracy after 1975.

HIS X75N. History of Britain, 1500-1700.
Explore how the archipelago of islands that make up the nations of England, Scotland, Wales, and Ireland underwent a series of dramatic transformations in the sixteenth and seventeenth centuries. Focus on politics, religious upheaval, and the beginnings of "British empire," a phrase first coined in this period.

HIS X76F. The United States and the Second World War.

HIS X76G. Hitler, Nazism, and World War II.

HIS X78W. Capstone in History.
Pursue in-depth the research interests and skills developed in other history classes.

HIS X79C. History and Computer Science Capstone.
Investigate questions at the intersection of history and computer science through collaborative projects. Develop computational tools and methods to study history. Explore how ideas in history and computer science can inform each other.

HIS X79H. Honors Tutorial Course.
An individual instruction course to provide training in the methods and teaching of historical research and writing.

Graduate Courses

HIS X19S. Topics in History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIS X29S. Topics in History.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIS X80K. Topics in History of Science.
Topics cover scientific development since ancient times, including the scientific revolution, 1500-1800; the development of specific scientific disciplines; and the relationship between science and social change.

HIS X80L. Topics in European Imperialism.

HIS X80L.1. European Imperialism: British Empire.
Study of the British empire in the Middle East, Asia and Africa.

HIS X81. Topics in World History.

HIS X81J. Topics in Research Seminar in World History.

HIS X82H. Topics in Research Seminar in the History of East and South Asia.

HIS X82J. Topics in Research Seminar in African History.

HIS X82L. Topics in African History.
Seminar on selected topics on precolonial African societies and African societies since 1875.

HIS X82N. Topics in the History of East and South Asia.

HIS X82N.1. Social and Religious Reform in Modern India.

HIS X82N.2. Women in Islamic Societies.

HIS X82N.4. Communalism in Colonial India.

HIS X82Q. Introductory Conference Course in African History.

HIS X82R. Introductory Conference Course in Asian History.

HIS X82S. Introductory Conference Course in Middle Eastern History.

HIS X82T. Introductory Conference Course in European History.

HIS X82U. Introductory Conference Course in American History.

HIS X82V. Introductory Conference Course in Latin American History.

HIS X83. Topics in Seminar in Modern European History.

HIS X83C. Topics in Literature of European History.

HIS X83C.1. Literature of European History: The Medieval Period.

HIS X83C.2. Literature of European History: The Early Modern Period.

HIS X83C.3. Literature of European History: The Modern Period.

HIS X83D. Communism in Eastern Europe.
Explore the complicated nature of communist rule in Eastern Europe in its many forms, from Poland in the North to Yugoslavia in the South. Examine the variety of lived experiences of citizens of Eastern Europe, from the imposition of communism in the region after World War II to the collapse of the system in 1989. Discuss the most recent scholarship on the region that ties regional developments to the broader Cold War context, and covers issues ranging from state-society dynamics, to religion, consumer culture, urban change, and collectivization.

HIS X83J. Topics in Research Seminar in Modern European History.

HIS X83L. Seminar in General Economic History.

A historical study of economic development and economic policy.

HIS X83M. Topics in the Atlantic Worlds.

HIS X84K. Topics in Seminar in British History.

HIS X84M. Topics in Seminar in Tudor-Stuart History.

Reading and research in the history of England under the Tudors and Stuarts, 1485-1689.

HIS X85P. Topics in Public and Digital History.

HIS X86K. Topics in Seminar in Latin American History.

HIS X86L. Topics in Research Seminar in Latin American History.

HIS X86S. Stalinism: Ideology and Culture.

Examine Stalinism as a complex historical, ideological, and cultural phenomenon that crucially shaped Russia's destiny from the twentieth century to the present moment. Consider this phenomenon beyond popular stereotypes (blood-thirsty tyrant; miserable and terrorized population; total propaganda; etc).

HIS X87J. Topics in Research Seminar in Early Modern Europe.

HIS X87M. Topics in Early Modern Europe.

HIS X88J. Topics in Research Seminar in Middle Eastern History.

HIS X88K. Topics in Seminar in Middle Eastern History.

Development of Middle Eastern history since the beginning of modern times.

HIS X88K.2. Intellectual History of Indo-Iranian Islam.

HIS X88M. Problems and Methods of Historical Demography.

HIS X89. Topics in Research Seminar in United States History.

HIS X91C. Conference Course.

Designed to expand the graduate student's opportunity for individual consultation.

HIS X92. Topics in Seminar in United States History.

HIS X93L. Qualifying Examination.

Preparation for qualifying examinations.

HIS X94H. Introduction to Historical Inquiry.

Introduction to a variety of theoretical, methodological, or historiographical approaches to the past.

HIS X95. Topics in Seminar in Bibliography and Methods.

A seminar to acquaint the advanced student with the nature and extent of materials for study and writing in United States history.

HIS X97K. Topics in Literature of United States History.

Survey of historical writing and historiography from colonial times to the present.

HIS X97K.1. Literature of United States History Before 1865.

Survey of historical writing and historiography to 1865. Designed to introduce students to the field of early American history.

HIS X97K.2. Literature of United States History Since 1865.

Examines trends in American historiography from 1865 to the present.

HIS X97L. Topics in Medieval History.

HIS X98. Thesis.

HIS X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

HIS X98T. Supervised Teaching in History.

Weekly group meetings with the instructor, individual consultations, and reports.

HIS X99W. Dissertation.

Professional Courses

HIS X19S. Topics in History.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HIS X29S. Topics in History.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of History. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

HMN - Humanities

Humanities: HMN

Lower-Division Courses

HMN X01. Community Service.

Tutorial course, in which the student submits a report based on a community service project and appropriate supplementary reading.

HMN X02T. Design A Path.

Design a humanities contract of courses and write a personal statement. Examine the research process and academic writing.

HMN X04. Introduction to Humanities Honors Research.

Explore research from an interdisciplinary perspective. Develop a thesis project proposal in groups.

HMN X16. Topics in the Humanities.

Intensive lecture or seminar course addressing topics in various disciplines in the humanities.

HMN X18Q. Supervised Research.

Upper-Division Courses

HMN X21. Humanism and Western Civilization: The Ancient World.

A history of humanism in ancient Greece and Rome. The contributions of humanism to the values we place on the individual and human potential, democratic government, the arts, religion, and the family.

HMN X22. Humanism and Western Civilization: The Renaissance.

A history of humanism during the European Renaissance, the thirteenth through the sixteenth century. The contributions of humanism to the values we place on the individual and human potential, democratic government, the arts, religion, and the family.

HMN X23. Humanism and Western Civilization: The Enlightenment.

A history of humanism during the Enlightenment. The contributions of humanism to the values we place on the individual and human potential, democratic government, the arts, religion, and the family.

HMN X25J. Junior Fellows Seminar.

Receive guidance on developing and producing an undergraduate research project.

HMN X25K. The Arts, Sciences, and Social Sciences.

Analysis of topics in the arts, sciences, and social sciences through reading, discussion, and lectures.

HMN X50. Topics in the Humanities.

Study of the values underlying humanistic disciplines.

HMN X50.10. Literature of World War I.

Selected readings from autobiographies, poetry, fiction, and memoirs, primarily about the Western Front, by German, British, and American authors; a short history of World War I; readings of a central book of literary analysis; exploration of the nature of war, the experience of combatants, and the legacy of the war itself and its unique literature.

HMN X50.2. Daily Life in Northern Europe.

HMN X50.3. Geography and Religion.

Ideas about the relationships among the natural world, myth, and ritual; principal focus on Christianity, Islam, and Judaism and their offshoots and antagonists in the Western world.

HMN X50.4. Reading Images: Icons and Beliefs.
The content (not the aesthetics or the technical, compositional features) of selected Renaissance paintings, sculptures, and prints.
HMN X50.5. Great Trials in Western History.
The intellectual and historical importance of a variety of significant trials in Western history.
HMN X50.6. In Search of Meaning.
Intensive lecture course exploring various disciplinary perspectives and values underlying humanistic disciplines. Concepts include: monotheism, the nature and personality of this god, the soul, chosen people, linear time, history as divine classroom, original sin, heaven, hell, salvation, etc. Establishes how and when these and a host of other features came into existence and created Judeo-Christian reality, and contrast the reality created therein with other realities, such as Hinduism, Buddhism, Confucianism, and Islam.
HMN X50.7. The Enlightenment.
HMN X50.8. Sites, Structures, and Images of Italy.
Examination of the historical factors of religion, politics, economics, and local culture that define the significance of selected late medieval and Renaissance (twelfth through fifteenth century) buildings and the visual art they formerly housed and displayed. Taught in Italy.
HMN X50T. Treasure Hunt Archival Research.
Discover, explore, and identify the boundless treasures that can be found on The University of Texas at Austin campus by hunting through the vast cultural and historical collections at the archives on campus including the Harry Ransom Center, the Dolph Briscoe Center for American History, and the LLILAS Benson Latin American Collection. Explore essential skills for pursuing original research projects in humanities disciplines and apply these skills to bring public attention to hidden histories and marginalized voices in American culture.
HMN X51C. The Johnson Years.
HMN X51D. Money In American Politics.
Explores the nature and consequences of money in American politics.
HMN X51N. Archival Advocacy: Experiential Learning.
Use digital archives and exhibits to amplify voices that actively promote social justice, cultural awareness, and service; and to test the ethical positions about impartiality and advocacy in archival and exhibit practices.
HMN X58Q. Supervised Research.
HMN X68H. Honors Tutorial Course I.
Read and research under direction. Write a report or create a project.
HMN X69H. Honors Tutorial Course II.
Read and research under direction. Write a report or create a project.
HMN X70. Senior Tutorial Course.
A tutorial program of supervised reading and writing, including an individual paper or papers in which the student draws together the central directions and discoveries of his or her studies in the humanities.
HMN X79. Conference Course.
Individual instruction in a topic approved by the instructor and the humanities adviser.

Graduate Courses
Professional Courses

I - Informatics

Informatics: I

Lower-Division Courses

I X01. Introduction to Informatics.
Introduction to the field of informatics, including cultural heritage informatics, health informatics, human-centered data science, social informatics, social justice informatics, and user experience design.
I X02. Academic Success in the Digital University.
Examine a wide variety of information and academic resources, tools, and skills; with a focus on the digital landscape of higher education. Explore the features of the primary learning management system; communication and organization tools; library resources; basic online research resources; and ethical and safety concerns.
I X03. Ethical Foundations for Informatics.
Survey the ethical foundations for informatics, incorporating non-Western and feminist perspectives. Apply these ethical foundations to contemporary problems in informatics. Examine the confrontation of ethical dilemmas in the workplace, including recognizing value trade-offs, affected stakeholders, and potential solutions.
I X04. Programming for Informatics.
Examine the fundamentals of computer programming and practice developing and documenting code.
I X05. Research Methods for Informatics.
Explore diverse research approaches to investigate informatics-related problems. Examine principles and hands-on practices of data collection and analysis with respect to qualitative, quantitative, and mixed research methods.
I X06. Statistics for Informatics.
Examine fundamental principles of probability and statistics. Cultivate an understanding of descriptive and inferential statistics. Conduct and interpret statistical analyses using statistical analysis software, and apply these analyses to common issues in informatics.
I X10. Topics in Introductory Informatics.
I X10C. Introduction to Cultural Heritage Informatics.
Examine the fundamentals of managing, describing, organizing, preserving, and providing access to data and information in a wide range of technological forms.
I X10D. Introduction to Human-Centered Data Science.
Examine the fundamentals of collecting, managing, and analyzing data; with consideration for the ethical responsibility of data science and the importance of critical thinking.
I X10J. Introduction to Social Justice Informatics.
Explore the leveraging of data, information, and technology for the greater benefit of society and to help ensure a level playing field for everyone in the information age.
I X10M. Introduction to Health Informatics.
Explore designing and implementing information technologies to improve healthcare delivery, healthcare management, and health outcomes.
I X10S. Introduction to Social Informatics.
Explore the leveraging of data, information, and technology to improve the efficiency and effectiveness of organizations while also providing a more ethical and humane environment for workers.
I X10U. Introduction to User Experience Design.
Introduction to user experience, human-computer interaction, and the human-centered design of interfaces and applications for mobile devices and the web.
I X19S. Topics in Informatics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

I X20. Topics in Informatics.
I X20.2. Children's Literature.
Explore the evaluation, selection, and proper and creative use of books and other media with children.
I X20.3. Comics, Graphic Novels, and Manga.
Examine the historical development and a contemporary survey of prominent visual narrative formats and genres such as graphic and visual novels, comics, and manga.

I X20C. Topics in Cultural Heritage Informatics.
I X20D. Topics in Human-Centered Data Science.
I X20J. Topics in Social Justice Informatics.
I X20M. Topics in Health Informatics.
I X20S. Topics in Social Informatics.
I X20U. Topics in User Experience Design.
I X29S. Topics in Informatics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

I X72. Career Success in the Digital Organization.
Examine the essential skills for obtaining a job and sustaining a successful career with an emphasis on integrity, teamwork, time management, responsiveness to feedback, and written and oral communication. Explore tools for computer-supported cooperative work that facilitate online collaboration.

I X78I. Independent Study.
I X78R. Research Experience.
I X78T. Internship.
I X79C. Capstone.
I X79H. Honors Thesis.
Research, read, and develop an honors thesis subject and proposal for one semester; followed in the second semester by the writing and defense of a final honors thesis.

Graduate Courses
Professional Courses

I B - International Business

International Business: I B
Lower-Division Courses

I B X19S. Topics in International Business.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

I B X20F. Foundations of International Business.
Fundamentals of international trade and the international economy; international dimensions of several functional areas of business, including management, marketing, finance, and human resource management; theoretical, institutional, and functional foundations of international business.

I B X29S. Topics in International Business.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

I B X32F. Topics in Foundations of International Business.
I B X40S. Topics in International Business.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted a coursework taken in residence.

I B X50. International Trade.
Study of the principles, policies, and problems of the international exchange of goods and investments.

I B X50S. International Commerce Analysis.
Study of the principles, policies, and problems of the international exchange of goods and investments. This course is used for classes taken on an approved study abroad program with the content equivalent of International Business 350 or 320F.

I B X51S. Independent International Analysis.
Country analysis by independent study. Designed for marketing majors who participate on a McCombs summer faculty led program.

I B X60D. International Security.
Explore the conditions and motivations behind the use of military force in world politics.

I B X62. Global Regulatory Strategy.
Examine management of a firm in a rapidly evolving regulatory environment across the world as new technology reshapes social norms, legal rules, and society itself.

I B X65. Finance and Global Business.
Examine investments across sectors and countries in the face of a rapidly evolving world. Explore micro-investing to build a framework for analyzing different sectors across countries and how it applies to different countries around the world. Investigate macro-investing to develop a broader understanding of how financial markets work in different countries.

I B X66. International Accounting and Transfer Pricing.
Discover how to price transactions between subsidiaries of multinational corporations buying and selling goods, services, intellectual property and other assets in light of tax obligations and other considerations.

I B X66P. International Business Practicum.
Apply skills learned in International Business courses through group projects conducted in a professional setting. Work with a private or public enterprise.

I B X67C. Intercultural Management.
Examine a conceptual framework and specific tools for interacting successfully in international teams, negotiations, and partnerships. Discuss cultural patterns characteristic of world regions and particular countries in terms of their implications for corporate management.

I B X67D. Global Entrepreneurship.
Explore how to start, manage, and exit a business in a global context. Examine aspects of global entrepreneurship including opportunity analysis, business planning, fundraising, competing in a global marketplace, and managing through crisis explored through practical experience and real-world examples.

I B X68. Global Value Chains.
Investigate problems that complicate the operation of supply chains on a global scale, such as political risk.

I B X71T. Topics in International Business.
I B X72T. Topics in International Business.
I B X72T.1. Global Political Economy.
Explore how firms can successfully integrate their traditional strategies with non-market strategy in the global arena, including how to successfully engage with international non-market actors, such as foreign governments, regulators, political parties, NGOs, and the media. Examine the necessary tools to craft successful, integrated firm strategies in diverse institutional and political environments.

I B X72T.14. Global Marketing.
I B X72T.2. Procurement and Supplier Management.
Explore strategic issues in procurement and supplier management; a review of competitive analysis and benchmarking; the purchasing role in fulfilling a firm's operational and competitive strategies; supplier evaluation, development, and relationship management; negotiating with suppliers for results; and commodity planning.

I B X72T.3. Introduction to Global Finance and Business.
Explore how international finance operates in theory, mechanics, and current events. Examine how firms react to risks posed by international developments.

I B X72T.4. Global Net Zero Strategy.
Discuss the actions that firms around the world are taking regarding global warming, and whether these actions and innovations will keep the growth of global greenhouse gas emissions to zero.

I B X72T.6. International Marketing and Consumer Behavior.

I B X72T.8. Global Trade and Principles of Import and Export.
Introduction to the world trading system and international trade policy. Examine the policies and realities of international economic relations for the United States and major U.S. trading partners, founding trade institutions and their impact on importing and exporting commerce, and a brief history of negotiating rounds, international negotiations, and the anatomy of a Free Trade Agreement. Learn the basics of importing and exporting in relation to the business world, how free trade policy (including institutions, free trade agreements, dispute resolution, etc.) affects normal commerce and trade flows, and key steps to export from the United States.

I B X73. Business in Emerging Markets.

I B X75C. Supply Chain and Operations Management Strategy.
Discuss the role of supply chain management to increase a firm's competitive performance and understand how that performance affects the economy and society as a whole. Examine supply chain and operations design as well as environmental, social, and governance (ESG) issues. Explore the impact of new business models including e-commerce and automation; contracting; outsourcing and vertical integration, resiliency; and new delivery modalities.

I B X76. International Finance.
Explore the international financial environment, with emphasis on the factors affecting exchange rates and how exchange rate changes affect the firm.

I B X78. International Business Operations.
Establishment and conduct of international business operations: trade, investments, branch and subsidiary management, intermediary functions; case studies in international enterprise.

I B X79C. Independent Research in International Business.

Graduate Courses

I B X85E. Directed Studies in Global Management and Business Practices.
Study global business practices through lectures on campus and trips to international partner schools.

I B X95. Topics in Seminar: International Trade.
Study of contemporary topics in international trade and investment theories, policies, and problems.

I B X95.1. Global Strategic Management.
The changing global business environment and the ways multinational corporations compete in this environment. Case studies and readings, followed by a global management computer simulation.

I B X95.2. International Trade and Investment.
The basis for international trade, foreign exchange determination, balance of payments, and international trade and investment policy. Macro-level aspects of the international economy, which provide the basis for the functioning of the global economy.

I B X95.3. Global Business Operations.
Overview of management in a multinational context, focusing on the multinational corporation; the economic, political, and social environments in which it operates; and its basic managerial concerns with finance, management, marketing, and personnel. Includes an international operations computer simulation.

I B X95.4. Business in Developing Countries.
The traditional challenges to business in developing countries and the new challenges of market liberalization. Similarities and differences among countries and regions.

I B X95.5. Business in Japan.
Comprehensive examination of macro-level and micro-level issues involved in conducting business in Japan and in competing with the Japanese in the global marketplace. Macro-level issues include government industrial policy, interfirm relationships, and United States-Japan trade relationships; micro-level issues include management style, foreign expansion strategy, research and development strategy, and distribution practices.

I B X95.6. International Marketing Management.
An overview of international marketing, with emphasis on the multinational corporation. Subjects include the changing international environment, researching and entering foreign markets, and the marketing mix in international marketing.

I B X95.7. International Operations and Management.

Professional Courses

ILA - Iberian and Latin American Languages and Cultures

Iberian and Latin American Languages and Cultures: ILA

Lower-Division Courses

Upper-Division Courses

Graduate Courses

ILA X80. Introduction to Theory and Research of Literature and Culture.
An introductory survey of theories, research methods, and issues of professionalization relevant to the study of Latin American and Iberian literatures and cultures. Designed to be taken in the first long semester of graduate study.

ILA X81. Introduction to Theory and Research of Linguistics.
An introduction to the prevalent theories, research methods, and issues of professionalization relevant to the study of the language forms and language practices of individuals and societies. Designed to be taken in the first long semester of graduate study.

ILA X83. Creative Writing in Spanish.
Explore the creative process of writing in different genres including non-fiction, fiction, and poetry.

ILA X83L. Conference Course.

ILA X84. Colloquium.
Share research between, and foster discussion with, faculty and students.

ILA X85T. Teaching Practicum.
Mentorship and pedagogical training by working one-on-one with a faculty member on the development and design of an undergraduate, upper-division level course in their area of specialization.

ILA X86. Topics in Iberian and Latin American Linguistics.
Topics in Iberian and Latin American linguistics, including diasporic and indigenous communities.

ILA X87. Topics in Iberian and Latin American Literatures and Cultures: Spanish.
Topics in the literatures and cultures of Spanish America, Spain, and related diasporas.

ILA X88. Topics in Iberian and Latin American Literatures and Cultures: Portuguese.
Topics in the literatures and cultures of Brazil, Portugal, and related diasporas.

ILA X88C. Brazilian Cultural Theory.
Explore some of the most influential subjects and theories that have informed contemporary scholarship on the politics of Brazilian literary and cultural production.

ILA X88D. Cultural Tropicalities.
Examine the centrality of Brazil, and the New World in general, in the context of global controversial meanings, symbology, memory, and knowledge of the inter-tropical cultural and geographic zone.

ILA X89. Topics in Iberian and Latin American Literatures and Cultures: Spanish and Portuguese.
Comparative topics in the literatures and cultures of Brazil, Spanish America, the Iberian Peninsula, and related diasporas.

ILA X94. Supervised Preparation of the Qualifying Paper.
Supervised preparation for the doctoral degree qualifying paper. Designed to be taken in the same semester the student submits the paper.

ILA X95. Supervised Preparation of the Dissertation Fields.
Preparation of field lists, and critical summaries of these lists, under faculty supervision. Prepares students for Iberian and Latin American Languages and Cultures 396.

ILA X96. Supervised Preparation of the Dissertation Proposal.
Supervised preparation for the dissertation proposal for the doctoral degree. Designed to be taken in the same semester the student submits the proposal, typically the sixth or seventh long semester of study.

ILA X98R. Master's Report.
Preparation of the report required to fulfill the requirement for the master's degree under the report option.

ILA X98T. Supervised Teaching in Spanish and Portuguese.
Required for teaching assistants during their first semester that they teach. Fundamentals of foreign language teaching methodology, with particular reference to the teaching of Spanish and Portuguese. Presentation of theoretical concepts on which classroom practice is based, in conjunction with teaching under close supervision of the course instructor, individual consultations, reading assignments, and reports.

ILA X99W. Dissertation.
Supervised writing of the dissertation for the doctoral degree.

Professional Courses

INB - Integrative Biology

Integrative Biology: INB

Lower-Division Courses

INB X08L. Field Biology.
Explore the principles and applications of ecology, and some of the experimental and descriptive methods of ecological investigations, using field projects, laboratory exercises, field trips, and computer simulation exercises.

INB X19S. Topics in Integrative Biology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the Biology Instructional Office. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

INB X21G. Principles of Computational Biology.
Introduction to computational methods for the analysis of nucleic acid and protein sequences, with applications towards biological problems.

INB X21L. Aquatic Entomology.
Examine the taxonomy of aquatic insects, including the use of aquatic insects in biomonitoring.

INB X22. Structure, Physiology, and Reproduction of Seed Plants.
Explore the principles of structure and functioning of higher plants with special attention to the dynamics of growth and development and reproduction.

INB X22L. Structure, Physiology, and Reproduction of Seed Plants Laboratory.
Observe the structure and reproduction in seed plants and employ experimental techniques that demonstrate physiological processes, especially processes of growth and development.

INB X23. Mathematical Modeling for Biology.
Translate between qualitative hypotheses regarding biological processes and their more exact expression in the form of mathematical models. Analyze these models to determine predicted biological behavior under those hypotheses.

INB X24. Survey of the Plant Kingdom.
Survey the groups of living and fossil plants, comparing organization and reproduction to understand major shifts in the evolution of plant life.

INB X24L. Survey of the Plant Kingdom Laboratory.
Explore major plant groups emphasizing organization, reproduction, and evolution. Examine cultures, prepared and living material. Local field trips.

INB X29S. Topics in Integrative Biology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the Biology Instructional Office. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

INB X37. Topics in Biology.
Examine recent developments and research methods in the biological sciences.

INB X37.1. Human Medical and Population Genomics.
Read and interpret the primary literature in human genomics. Learn and apply computational genomics tools, group projects, presentations, and the preparation of scientific manuscripts.

INB X37.2. Quantitative and Population Genetics.
Discuss critical reading of primary quantitative literature on the drivers of genetic variation and its mapping to trait variation, focusing on humans. Analyze central ideas in mathematical modeling and statistical analysis of human genetic variation and explore mutation and recombination, genetic drift, natural selection, analyses of gene-expression variation, population structure, genotype-phenotype stratification, and study designs for mapping genotype to phenotype.

INB X38L. Animal Communication.
Examine animal communication from a multidisciplinary perspective, with emphasis on quantitative analysis, sensory processing, and evolution of signals.

INB X40L. Biology of Birds.
Examine the anatomy, physiology, classification, and ecology of birds

INB X45E. Endocrinology.
Examine vertebrate endocrinology (primarily mammalian), with a focus on human pathophysiology.

INB X46. Human Biology.
Introduction to human evolution, genetics, sexuality, senescence, and population growth.

INB X46L. Human Microscopic and Gross Anatomy.
Designed for students preparing for biomedical research and the health professions. Explore microscopic and gross anatomy of human tissues and organs, with an emphasis on structure function relationships. Examine the effects of disease and aging in addition to normal human anatomy.

INB X48L. Invertebrate Biology.
Examine the diversity and evolution of multicellular invertebrate animals, with emphasis on common themes in animal body construction and function.

INB X49P. Pandemic Science.
Examine the history, spread, mitigation, and forecasting of pandemics.

INB X51. Economic Botany.
Analyze the origin of domesticated plant species, the role in nature of plant products, and the ways natural products have been altered through artificial selection.

INB X52. Reproductive Biology of Flowering Plants.
Examine pollination biology, breeding systems, reproductive strategies, and fruit and seed dispersal from evolutionary and ecological vantage points.

INB X53F. Field Entomology.
Discuss insects with emphasis on field study techniques, visual identification of species, collecting techniques, and curation in the field.

INB X53L. Entomology.
Examine the characteristics, importance, and biology of the major groups of insects.

INB X53S. Sleep Science.
Explore the basics of sleep science. Examine current research questions and novel approaches. Discuss the range of sleep disorders and their diagnoses.

INB X54L. Ichthyology.
Discuss an overview of the evolution, biology, and ecology of fishes, emphasizing freshwater fishes.

INB X55L. Vertebrate Natural History.
Examine phylogeny, taxonomy, life histories, habits, and distribution.

INB X56L. Limnology and Oceanography.
Introduction to the study of the interactions between aquatic organisms and their environments.

INB X59J. Behavioral Ecology.
Examine behavioral ecology, with detailed consideration of animal communication, altruism, sexual selection, and plant-animal interactions.

INB X59K. Principles of Animal Behavior.
Introduction to the study of animal behavior: descriptive analysis of behavior; physiological basis of behavior; development of behavior; adaptive significance and evolution of behavior; communication and social behavior.

INB X59L. Animal Behavior Laboratory.
Explore the evolution of animal behavior through hands-on modules that emphasize a range of analytical approaches commonly used in modern evolutionary biology.

INB X61T. Comparative Animal Physiology.
Examine the physiology of organ systems in animal phyla, with special emphasis on the neural and behavioral adaptations of organisms to their environment.

INB X63L. Plant Systematics.
Examine the principles of plant classification, phylogeny, and diversity as exemplified by families and species of flowering plants found seasonally in Texas with an emphasis on the local flora.

INB X64. Microbial Ecology.
Examine population, community, and ecosystem ecology of microbes and microbiomes.

INB X65S. Human Systems Physiology.
Explore an overview of human physiology, including the cardiovascular, respiratory, and renal systems, with an emphasis on critical thinking, integration, and application. Examine membrane movement, osmolarity and tonicity, endocrinology, and neurophysiology.

INB X65U. Human Systems Physiology Laboratory.
Examine human physiology through case studies and hands on experience. Explore the scientific method through the reading of scientific journal articles; writing protocols for basic physiological experiments; and collecting, analyzing, and presenting data.

INB X69F. Field Herpetology.
Explore species identification by sight and sound, and research techniques such as sampling populations, data collection, and analysis.

INB X69L. Herpetology.
Examine the biology of amphibians and reptiles, including evolution, ecology, behavior, physiology, life history, and identification.

INB X70. Evolution.
Introduction to modern evolutionary biology, focusing on the evolution of molecular, developmental, morphological, and behavioral traits. Examine the genetic and ecological bases of evolutionary changes within populations and of evolutionary divergence in animals and plants.

INB X70L. Evolution Laboratory.
Perform group lab and field experiments and observations, computer simulations and analyses, and independent research.

INB X71. Introduction to Systematics.
Study diversification of living and fossil organisms, including speciation, biogeography, taxonomy, and phylogeny of genes, species, and higher taxa.

INB X71G. Natural History Museum Science.
Introduction to curatorial practices in natural history museums.

INB X71L. Experimental Physiology.
Explore an experimental approach to physiological mechanisms by which animals adapt to their environment.

INB X73. Ecology.
Introduction to ecology, the study of relationships among organisms and between organisms and their environment; adaptations, population, communities, and ecosystems. Examine both plants and animals and both terrestrial and aquatic ecosystems.

INB X73L. Ecology Laboratory.
Explore intensive field ecology, including group field experimentation and observation, independent projects, and field trips to other vegetation zones.

INB X74. Plant Anatomy with Histological Techniques.
Examine tissue organization and cellular details of stems, roots, and leaves of seed plants, with emphasis on development and function.

INB X74L. Laboratory in Plant Anatomy and Histological Techniques.
Explore a demonstration of cellular details and tissue systems of plant organs. Discuss the preparation of plant materials for histological examination.

INB X75. Conservation Biology.
Apply the principles of ecology to the preservation of wild plant and animal species and to the preservation, management, and restoration of natural and seminatural ecosystems. Focus on scientific, biological aspects of issues such as endangered species protection, preserve design, and forest management.

INB X76G. Biodiversity in the Anthropocene.
Examine how global change is impacting biodiversity in what is now called the Anthropocene -- a new geological era where humans are the largest driver of changes in the earth system.

INB X77. Undergraduate Research.
Conduct laboratory or field research in the various fields of biological science under the supervision of one or more faculty members.

INB X78L. Comparative Vertebrate Anatomy.
Study vertebrate morphology from developmental anatomy to the function, biomechanics, and phylogenetic relationships of living and fossil taxa.

INB X79H. Honors Tutorial Course.
Perform original laboratory or field research project under the direction of a faculty mentor, leading to a thesis or research presentation for students in the honors program in biology.

Graduate Courses

INB X98. Thesis.

INB X98R. Master's Report.

Prepare a report to fulfill the requirement for the master's degree under the report option.

INB X99W. Dissertation.

Professional Courses

INF - Information Studies

Information Studies: INF

Lower-Division Courses

Upper-Division Courses

Graduate Courses

INF X80C. Information in Social and Cultural Context.

Examines the role of information in human activities, particularly in relation to particular social and cultural contexts. Examines how individuals, groups, organizations, institutions, and society at large create, find, use, understand, share, transform, and curate information.

INF X80D. Designing Dynamic Web Pages.

Principles and practices for designing, developing, and evaluating interactive desktop and mobile Web pages. Theories and models for color, styles, and interactive page elements, such as forms. Students create and evaluate Web pages using current technologies, such as XHTML/HTML5, CSS, JavaScript, AJAX, and Adobe Flash.

INF X80E. Perspectives on Information.

Multidisciplinary and historical examination of concepts of information. Contrasts key literature from information studies with perspectives from other fields.

INF X80K. Internet Applications.

Introduction to Internet concepts, protocols, applications, and services. Examines the impact of policy and management decisions on current and future developments, and studies the design and implementation of Internet applications, including HTML, CSS, and related tools.

INF X80P. Introduction to Programming.

Introduction to common concepts and constructs of modern computer programming such as classes and objects, methods, inheritance, data types, variables, operators, procedures, and code libraries. Development of programmatic solutions to specific computing problems and design applications for modern computing platforms such as desktop, tablet, mobile, and the World Wide Web. Intended for students with no significant prior programming experience.

INF X81. Individual Studies.

In-depth study of a problem or topic related to information studies, usually culminating in an examination or a scholarly written report.

INF X81E. Electronic Portfolio.

Creation of a Web site that displays the student's professional aims, interests, and pursuits, including resume and work samples. Designed to be taken during the final semester of the Master of Science in Information Studies degree program.

INF X81W. Advanced Problems in Information Studies.

Study of a problem or topic related to information studies. Offered as an online course.

INF X82C. Understanding and Serving Users.

Overview of human-computer interaction, understanding client groups, information filters, information literacy and information-seeking behavior, as well as user studies and usability testing.

INF X82D. Introduction to Information Resources and Services.

Major reference resources and strategies useful in providing information services in libraries and other information agencies.

INF X82G. Topics in Information Resources and Services for Children and Young Adults.

Examines the evaluation, selection, and use of books and other media for young adults of junior and senior high school age. Briefly surveys the reading experience, psychology of adolescence, and reading interests of young adults. Includes extensive reading and viewing.

INF X82G.3. Materials for Children and Young Adults.

Explore the evaluation, selection, and use of books and other media and materials to meet the needs of children and young adults.

INF X82H. Legal Information Resources.

Identification of relevant legal information resources, efficient retrieval of legal information, and the role of technology in legal information access.

INF X82K. Information Resources in the Health Sciences.

Evaluation of conventional and online health information resources used by consumers and health care professionals for health promotion and disease and disorder prevention, diagnosis, treatment, and management. Includes traditional and alternative approaches, genetic clinical information approaches, and evidence-based approaches to the use of resources.

INF X82L. Topics in Information Resources and Services.

Evaluation and use of printed online information resources and services in specialized areas, with emphasis on new information technologies. Information-seeking behavior of users, document delivery, new roles of the information specialist in user support, and information needs of a variety of clients.

INF X82L.3. Inquiry and Information Seeking in K-12.

Examine inquiry models and information-seeking theories relevant to K-12 teaching and learning. Explore tools and resources for student learning and strategies for teaching specific information literacy skills within the context of an inquiry process and varying K-12 subject areas. Designed for students pursuing the Information Studies: School Librarian stackable certificate.

INF X82N. Information Resources in Business.

Communication patterns, bibliographic organization, and information resources in business and industry.

INF X82P. Competitive Intelligence Resources and Strategies.

Resources and strategies for market and competitive analysis. Research and analysis of market trends and financial, technical, and cultural strengths and weaknesses of companies. Online, print, and primary research and analytical techniques. Ethics, process, and presentation are emphasized.

INF X82R. Introduction to Scientific Data Informatics.

Introduction to the characteristics of scientific data and the emerging practices applied toward their management and preservation.

INF X82S. Library Instruction and Information Literacy.

History of instruction in information service settings; learning theory, including learning styles; professional organizations involved in supporting instruction; instructional delivery modes and materials; and evaluation.

INF X82T. Information Services: Theory, Techniques, and Subject Areas.

Exploration of reference services; and evaluation and use of printed and online information resources and services, with emphasis on interpersonal communication and new information technologies. Information needs and information-seeking behavior of users; and new roles of the information specialist in user services. Includes information resources and services in the humanities and social sciences.

INF X82U. Digital Resources for Children and Youth Seminar.

Exploration of digital information resources available for children and youth, including the range of content and availability, how information resources are conceived and created, and the implications of these resources for school and public libraries.

INF X82V. Visual Resources for Youth Seminar.
The history and selection criteria of the Caldecott Award; the history of picture books and publishing; academic and professional literature about children's materials; and selection criteria for picture books, including evaluating children's literature and developing the tools to analyze picture books for narrative, artistic, and compositional elements. Illustrative techniques and their effectiveness in relation to particular texts.

INF X83D. Mathematical Foundations of Information Studies.
Introduction to traditional finite mathematical concepts, including probability distributions and models, linear equations, matrix algebra, linear statistical models, basic information theory, and the use of mathematical and statistical software for modeling and data analysis.

INF X83E. Interpreting Implicit Information on the Web.
Theories and methods of Internet language and image interpretation. Examines persuasion, group and individual identity projection, and group-value demonstration. Focuses on how discourse is shaped by ideology, social forces, and the knowledge and beliefs of its producers within several information contexts, such as online communities, education, science, and healthcare.

INF X83H. Introduction to Digital Humanities.
A hands-on introduction to guiding infrastructural and institutional developments involved in digital humanities. Explore areas of focus including archives, collection, data curation; funding, tool building, and scholarly publishing.

INF X83S. Library Information Science, Espionage, and Intelligence Gathering.
Examines the historical and conceptual linkages between the field of library information science and the practices of intelligence gathering and espionage. Explores the role and structure of the intelligence community, the similarities and contrasts between intelligence practitioners and other information professionals, and historical case studies that illuminate areas of overlap and cooperation between the disciplines.

INF X84C. Organizing Information.
Introduction to the concepts of information organization, representation, and classification. Consideration of different traditions of practice and user concerns.

INF X84D. Collection Management.
Philosophical and social context, objectives, and methodology of evaluating, selecting, and managing library materials.

INF X84F. Seminar in Information Organization.
Critical, in-depth examination of significant concepts in information organization.

INF X84H. Concepts of Information Retrieval.
The science and engineering of building automated search engines: foundations and emerging methods, key models and approaches, front-end usability and back-end algorithms, theories of relevance, annotation practices, and system evaluation/benchmarking.

INF X84M. Topics in Description and Metadata.
Principles and practices for describing information resources.

INF X84R. Digital Repositories.
Introduction to issues in selecting, managing, and using digital repositories in diverse institutional settings. Covers repository models, collections, metadata, interoperability, preservation, policies, work flows, interfaces, visualization, applications, and services. Includes working with different repository software. Examines the impact of repositories on institutional culture, work practices, and publication models.

INF X84W. Descriptive Cataloging and Metadata.
Standards, rules, and metadata formats for representing information entities in library catalogs and other bibliographic systems. Emphasis on the Anglo-American Cataloguing Rules and the MARC metadata format.

INF X85C. Human-Computer Interaction.
The history and importance of human-computer interaction (HCI), theories of HCI design, modeling of computer users and interfaces, empirical techniques for analyzing systems and interfaces, interface design, and styles of interaction. Emphasis on reviewing research papers, current works, and future directions in HCI research.

INF X85E. Information Architecture and Design.
The theory and design of information architecture: models that provide structure and context for information to shape meaning, purpose, and utility toward understanding. Students present theoretical reviews; map and design; and develop novel information architectures using a variety of methods and software applications.

INF X85G. Advanced Usability.
Designed to build upon the skills covered in Information Studies 385P. Individual project evaluating a Web site or other software user interface. Students devise a plan for testing, secure IRB approval to test human subjects, conduct study, analyze date, write a report, and present the results and conclusions.

INF X85H. Digital Media Design.
Design and production of graphic, audio, video, and multimedia materials, with emphasis on aesthetics and usability.

INF X85K. Projects in Human-Computer Interaction.
Projects based on theories of human-computer interaction design, modeling of computer users and interfaces, empirical techniques for analyzing systems and interfaces, interface design, and styles of interaction.

INF X85L. Information Networks.
History, design, and use of digital information networks. Emphasis on origins of the Internet in the United States, varied technical models for networked information services, and social analysis of networked communication from multiple disciplinary perspectives. Includes close review of classic papers in networked communication as well as current works.

INF X85M. Database Management.
Principles and practices of database management and database design. Discussion and implementation of a database. Application life cycle, data dictionaries, relational database design, SQL queries, reports and other interfaces to database data, and documentation. Students work on individual and group projects.

INF X85N. Topics in Informatics.
Investigation of informatics movements around the world and in various disciplines and professions, such as biomedicine, nursing, public health, education, business, law, and public affairs.

INF X85P. Usability.
The basics of user-centered design through the lifecycle of a software product. Includes perceptual, psychological, and other scientific underpinnings of usability and the justification for the application of usability engineering in software development.

INF X85Q. Knowledge Management Systems.
Survey of knowledge management systems that enable the access and coordination of knowledge assets, including intranets, groupware, Weblogs, instant messaging, content management systems, and e-mail in both individual and organizational contexts.

INF X85R. Survey of Digitization.
Introduction to the issues and trends in digital asset management and digitization initiatives, including planning and project management, asset delivery and management systems, interoperability and the importance of standards, copyright, metadata basics, digital preservation, and specific digitization processes for documents, images, video, and sound.

INF X85S. Digital Libraries.
Research, development, and evaluation issues related to digital collections of documents, data, and multimedia formats, including metadata and interoperability; access strategies and user interfaces; implications for policies and social issues; collection development with physical as well as digital materials

INF X85T. Special Topics in Information Science.

INF X85T.1. Presenting Information.

Visual, numerical, textual, and verbal presentation of information based on fundamental theories of human information perception and communication. Examples may include tables, graphs, dashboards, infographics, and reports.

INF X85T.10. Interaction Design.

Introduction to the design and production of useful and elegant interactive experiences, including iterative design, prototyping, and user testing.

INF X85T.11. Crowdsourcing for Computer Vision.

Examine the opportunities and challenges for using crowdsourcing to teach computers to "see".

INF X85T.12. Ethics of AI.

Identify and address a variety of ethical challenges related to AI and its applications. Apply a broad range of ethical theories, including non-Western and feminist theories, to contemporary issues in the design, development, and deployment of AI-based systems.

INF X85T.13. Human-AI Interaction.

Introduction to combining human and machine intelligence to benefit people and society. Explore cutting-edge research on a number of subjects related to human-AI interaction, including the psychological and societal impacts of AI as well as design guidelines and methods for human-centered AI.

INF X85T.2. Visualization.

Concepts, principles, strategies, techniques, and tools for the visual presentation of large, high-density, or complex information resources from a variety of disciplines such as the sciences, humanities, law, arts, and business.

INF X85T.3. Human Computation and Crowdsourcing.

Introduction to the theory, methods, and applications of human computation and crowdsourcing; covering a breadth of key concepts as well as more specialized depth in one or more key sub-areas.

INF X85T.4. Mobile Interaction Design.

Introduction to the design of mobile interactions with emphasis on research and analysis, conceptual design, mobile interface prototyping, and the basics of interface evaluation and usability testing.

INF X85T.5. Data Mining.

A hands-on introductory overview of the applications, methods, tools, and technologies that constitute data science and data mining. Fundamentals of Python and R programming languages and relevant libraries. A semester project applying the learned methods and technologies to a specific dataset.

INF X85T.6. Information Modeling.

An introduction to fundamental information modeling methods such as relational database design, conceptual modeling, markup systems, and ontologies.

INF X85T.7. Information Science in the Intelligence Community.

Introduction to the U.S. Intelligence Community (IC) and the world of espionage from a Library and Information Science perspective: how intelligence agencies collect, manage, and analyze data and information to produce actionable insights for policymakers.

INF X85T.8. Information Ethics.

Examination of contemporary information ethics issues applying a variety of ethical theories, including non-Western and feminist theories.

INF X85T.9. Data Wrangling.

An introduction to working with data - reading a variety of formats, designing a database schema, and introductory programming skills for inserting, querying, and transforming of data.

INF X85U. Digital Media Collections.

Collection design, resource selection, description and organization, development of user access mechanisms. May include collection considerations in regards to various media, workflow and project management, audience analysis, and notions of authorship in the collection context.

INF X85V. Health Informatics.

Introduction to health informatics; includes fundamentals of information in biomedicine, nursing, public health, bioinformatics and genomics, electronic records, and integrated systems.

INF X85W. Security Informatics.

Explores information, computer, and network security in several contexts. Examines business impacts of security, societal implications of the protection of information resources, and technical aspects of securing information technology systems and data.

INF X86. Topics in the History of Information and Society.

Topics on the histories of information; libraries; archives; information science, technology, and businesses; conservation; and museums.

INF X86C. Archives, Records, and Preservation in the Modern World.

Progress of archival enterprise, records management, and preservation administration from the Renaissance to the present.

INF X86E. Topics in Information and Culture.

Examines information as a cultural phenomenon; may include e-commerce, privacy and secrecy, censorship, information as a commodity, Internet culture, access to cultural heritage, and control of the cultural record.

INF X86G. Gender, Technology, and Information.

Definitions of and metaphors for technologies; in-depth analysis of feminism and science and technologies studies, masculinities and technologies, women's underrepresentation in technology, reproductive and sexual technologies, domestic technologies, design and architecture, book clubs and reading, and gender and (information) articulation work.

INF X86H. Theory and Methods of Oral History.

Theories of oral history; practical methods for producing, recording, annotating, and searching oral and video histories; archival issues related to documentation of oral histories; use of oral histories in various scholarly fields.

INF X87. Topics in Administration.

Theory and practice in the design, behavior, evaluation, and administration of libraries and other information agencies and systems. Marketing of information organizations and resources. Administrative applications of technology.

INF X87.5. School Library Management I.

Designed for students pursuing Texas Education Agency (TEA) certification in school librarianship. Examine the philosophy, objectives, and management of the school library with an emphasis on standards and competencies, and the roles of the school librarian as collection curator, literacy leader, and program administrator.

INF X87.6. School Library Management II.

Designed for students pursuing Texas Education Agency (TEA) certification in school librarianship. Examine the philosophy, objectives, and management of the school library with an emphasis on the roles of the school librarian as an instructional partner and information specialist.

INF X87C. Managing Information Organizations.

Management theory, concepts, processes, and practices as applied to information agencies and systems.

INF X87E. Evaluating Information Programs.

Use of evaluation in support of decision making, setting priorities, allocating scarce resources, and improving programs. Students study how to conceptualize, design, implement, and report on evaluation in the context of working with a local client.

INF X87M. Information Marketing.

Examines the marketing of information agencies, systems, services, publications, and software and hardware products to consumers. Includes marketing research, planning, user studies, product development, communication, pricing and distribution for profit and nonprofit organizations.

INF X87T. Information Technology and Work.
Examines the role information technology plays in modern work. Case studies of historical and modern examples of technology implementation and work transformation. Includes qualitative techniques, such as interviewing and observing, for data collection; data analysis; and presentation of data.

INF X88D. Planning and Management of Programs for Children and Young Adults.
Designing and planning effective services and programs for children and young adults: technologies, information need analysis, and trends.

INF X88E. Historical Museums: Context and Practice.
The process of exhibit creation in historical museums, from planning through development to opening and maintenance, as a negotiation among stakeholders for influence on the story that is told. Students visit local historical museums and examine how presentations are influenced by the institutional position of the museum, including its history and resources; the concerns of museum employees; the influence of the audience and of those who are directly affected or represented by an exhibit; and the role of contractual professionals.

INF X88K. Topics in Organizational Environments.
Mission, goals, and objectives of specific information settings.

INF X88K.1. Public Libraries.
History, missions, values, governance, funding, services, user communities, architecture, leadership, and issues in public librarianship.

INF X88K.2. Academic Libraries.
The relationship of academic library management to trends in postsecondary education, to the institution the library serves, and to the research community at large.

INF X88K.3. Special Libraries.
Development and management of special libraries and information centers.

INF X88K.5. Rare Book and Special Collections.
Administration of rare book and manuscript collections. Introduction to analytical bibliography.

INF X88K.6. Law Libraries.
Overview of law librarianship, the discipline of law, and the culture of the legal environment, including the context in which law librarians, legal publishers, and other legal information professionals work.

INF X88L. Professional Experience and Project.
Study of a practical problem, current phenomenon, or professional issue in an institutional setting.

INF X88R. Practicum in School Libraries.
Designed for students pursuing Texas Education Agency (TEA) certification in school librarianship. Fieldwork in varied school library settings under the supervision of qualified personnel.

INF X88T. Internship in Libraries and Other Information Agencies.
Supervised fieldwork.

INF X89C. Archival and Records Enterprise.
Theory and practice of archival administration and records management. Problems in acquiring, organizing, and providing for use of archives and office records; issues in deterioration and care of paper, books, photographic material, magnetic records, and other media through preservation programs for libraries and archives.

INF X89E. Introduction to Records Management.
Systems for controlling recorded information in an organizational setting.

INF X89G. Introduction to Electronic and Digital Records.
Examines personal recordkeeping and information management to explore the creation, management, and preservation of digital information. Includes current developments in digital technology that affect recordkeeping.

INF X89J. Appraisal and Selection of Records.
Investigates the history, theory, and practice of selecting and appraising records information for permanent or quasi-permanent retention in an archival environment. Explores influences of other stakeholders on the selection and appraising process.

INF X89K. Life Cycle Metadata for Digital Objects.
Constructing the "metadata continuum" in order to understand how metadata may function as an authenticating wrapper for an electronic record. Analysis of the elements of the continuum, including records surveys and inventories, creation metadata, active management metadata, records schedules, accession records, cataloging and description metadata, maintenance records, and usage records.

INF X89M. Introduction to Issues in Records Information.
Exploration of the fundamentals of records information and their role in society.

INF X89N. Topics in Archival Enterprise: Seminar.
Theory and practice of archival administration and records management. Problems in acquiring, organizing, preserving, and providing for use of administrative and collected archives.

INF X89R. Introduction to Archival Enterprise I.
Introduction to the records aspect of archival enterprise, from acquisition to use, with emphasis on arrangement and description.

INF X89S. Introduction to Archival Enterprise II.
Administrative and professional issues, including organizing the work of a repository, management issues, marketing, space, law, and ethics.

INF X90C. Copyright: Legal and Cultural Perspectives.
Digital and other important communication technologies; how copyright in the United States developed and has evolved; and copyright seen from a number of disciplinary points of view, such as legal studies, cultural history, and public policy. Other subjects may include the cultural commons; natural rights arguments for copyright versus social bargain and statutory arguments; identifying and protecting the public interest in information; the law of copyright and cultural categories such as the author, the work, intellectual property, and creation; and important federal court cases.

INF X90N. Topics in Information Policy.
Critical examination of conflicts and trends in information policy in private organizations and in federal, state, and international public-sector organizations.

INF X90N.1. Federal Information Policy.
Exploration of major information-policy conflicts around topics such as privacy, surveillance, and freedom of information; in-depth analysis of the implications of digital technologies in the post-9/11 United States. Designed to help students develop skill in policy analysis as a research method and familiarity with many kinds of sources of information about federal information policy.

INF X90N.2. Seminar in Information Policy.
Analysis of issues and trends in information policy in various environments.

INF X90P. Topics in Privacy.
Policy, value systems, and critical theory regarding privacy, studied from historical, sociological, feminist, or other perspectives.

INF X91D. Topics in Doctoral Inquiry in Information Studies.
Topics in the theoretical, methodological, and practical aspects of information studies.

INF X91D.10. Survey of Information Studies.
An overview of the major ideas, concepts, and theories of information studies.

INF X91D.11. The Research Enterprise.
An overview of the nature and purposes of research, and common methods and methodologies in information studies.

INF X91D.12. Disciplinary Foundations for Information Studies.
An overview of concepts, results, and perspectives from philosophical, social science, humanistic, design, and technological disciplines that provide important underpinnings for information studies.

INF X91D.8. Introduction to Doctoral Research and Theory I.
Foundations of inquiry in the humanities, social sciences, and natural sciences, and a review of theories and methods of inquiry in information studies in particular.

INF X91D.9. Doctoral Research and Theory II.
Epistemological concepts and processes of theory generation and testing in information studies, with special attention to research methods and specific problems of interest to the student.

INF X91E. Advanced Topics in Information Studies.

INF X91F. Advanced Topics in Research Methods, Methodologies, and Design.

INF X91G. Doctoral Writing Seminar.
Intensive writing, critique, and rewriting to assist senior doctoral students with refining their research writing in preparation for qualifying papers, dissertation proposals, and formal publications.

INF X91R. Directed Readings.

INF X91S. Directed Research.

INF X92C. Preservation Administration and Services.
Theory and practice of preservation administration and services. Problems in planning, organizing, and implementing preservation work in libraries, archives, and museums.

INF X92D. Preservation Basics.
Fundamental issues and problem solving in the preservation of cultural heritage collections in libraries and archives. Topics include the development and ethics of preservation and conservation, types and causes of deterioration, preventive care and stabilization, monitoring and controlling interior environments, reformatting, and performing preservation-needs assessments.

INF X92E. Materials in Libraries, Archives, and Museums.
Underlying factors in the physical nature of materials; concepts of permanence, durability, and deterioration; challenges of both traditional and modern collections; emphasis on print and photographic collections.

INF X92F. Risk Assessment and Collections Management.
Agents of deterioration, including physical forces, security, disaster, and environmental conditions; risk assessment, strategies to reduce risk, and personal safety.

INF X92G. Management of Preservation Programs.
Management of specific preservation strategies for cultural record; preservation policy; the selection process for preservation; minor mending and repair operations; library binding and conservation treatment; preservation assessments; emergency preparedness; contracting for services; and budgeting, grant writing, and fund- raising for preservation.

INF X92H. Creating Sustainable Digital Collections.
Hands-on activities that focus on building sustainable collections of digitized resources. Designed to help students gain curatorial understanding of the media to be digitized and knowledge of and experience with the technical and managerial aspects of the digitization process. Includes creation of metadata and digital preservation strategies for long-term access.

INF X92K. Digital Archiving and Preservation.
Examines the permanent archiving of digital information. Covers media refreshment, emulation, migration, and electronic records repository construction and administration. Case study projects involving campus repositories and off-campus institutions. Students use legacy hardware and software and digital forensics tools to preprocess digital collections for repository storage. Also explores issues in long-term electronic records preservation.

INF X92L. Introduction to Audio Preservation and Reformatting.
Study of audio recording through a chronological examination of the development of recording; basic care and preservation of recordings; economics of audio preservation; and stability concerns of modern media.

INF X92M. Advanced Audio Preservation and Reformatting.
Exploration of changing concepts in the nature of audio information in different formats, issues of access within the context of preservation, criteria for prioritization of materials to be reformatted, considerations in invasive versus minimal restoration, and study of rare formats.

INF X92P. The Politics of Preservation.
Introduction to the components of the media industries, using the available literature as well as the University's film and video resources. The course employs both a theoretical and a practical approach to the archival media product. Debate over defining historical media material as artifact complements discussion of the realities of digitization and physical deterioration.

INF X93C. Topics in Conservation Laboratory Techniques.
Analysis, housing, and treatment of physical objects.

INF X93C.10. Treatment Techniques for Flat Paper.
Basic techniques for care and handling of paper materials including but not limited to mending, dry cleaning, humidification and flattening, exhibit design and installation, enclosures, and documentation.

INF X93C.11. Treatment Techniques for Bound Materials.
Basic techniques for care and handling of bound materials including but not limited to sewing structure, minor mends, and enclosures.

INF X93C.8. Conservation Science I.
Introduction to the physical and chemical properties of materials used in fabrication; and identification and repair of books, photographs, manuscripts, and related objects.

INF X93C.9. Conservation Science II.
Advanced exploration of the physical and chemical properties of materials used in fabrication; and identification and repair of books, photographs, manuscripts, and related objects. Includes a research investigation of a typical conservation problem.

INF X97. Topics in Information Studies Research.
Methods and subjects of research in information studies.

INF X97.1. Bibliography and Methods in Historical Research.
Sources of information for, and techniques of conducting, investigations in history.

INF X97.2. Practicum in Research.

INF X97.3. Digital Libraries Research.
Exploration of theoretical and practical research on creating digital collections and making them available.

INF X97.4. Seeking Funding for Information Studies.
Designed to help students gain an understanding of and hands-on experience with the pursuit of funding for information studies. Students investigate possible funding sources, and develop at least one grant or contract application.

INF X97C. Understanding Research.
Survey of the goals, methods, processes, and products of systematic inquiry. Designed to prepare students to critically evaluate information studies research.

INF X97D. Bibliography and Methods in Historical Research.
Sources of information for and techniques of conducting investigations in history.

INF X98. Thesis.

INF X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

INF X98T. Supervised Teaching in Information Studies.
Teaching strategies for course design, syllabus creation, material development, classroom activities, student engagement, and grading. Additional subjects may include negotiation of course load and timing, course marketing, TA management, online teaching, and doctoral teaching/advising.

INF X99W. Dissertation.

Professional Courses

IRG - International Relations and Global Studies

International Relations and Global Studies: IRG

Lower-Division Courses

IRG X01. Introduction to International Relations and Global Studies.

IRG X19S. Topics in International Relations and Global Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

IRG X20F. Foundations of International Relations and Global Studies.

Survey of contemporary debates related to international relations and global studies.

IRG X29S. Topics in International Relations and Global Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

IRG X50M. Research Methods in International Relations and Global Studies.

Introduction to social research methods and how disciplines in the liberal arts use these methods to assess contemporary global challenges.

IRG X78. Capstone Research in International Relations and Global Studies.

IRG X78H. Honors Tutorial Course.

Supervised individual research on an international relations and global studies topic.

Graduate Courses

Professional Courses

ISP - Information Security and Privacy

Information Security and Privacy: ISP

Lower-Division Courses

Upper-Division Courses

Graduate Courses

ISP X80. Introduction to Information Security and Privacy.

Explore foundational concepts of information security and privacy, including information value, classifications, threats, liabilities and risk management, identity and access controls (IAM), trust frameworks, technology for network, web, software and cloud security; and privacy laws and regulations.

ISP X81. Information and Privacy in Society.

Examine how information is socially and culturally variable and fluid, changing throughout history and differing from place to place. Explore the anthropological study of information; societal norms; and individual, device, communal, and organizational information strategies.

ISP X82D. Data Governance for Information Security and Privacy.

Examine theory and practical applications of data and artificial intelligence governance related to information security, privacy, compliance, and ethics. Explore optimization of technical and human dimensions for information risk management. Explore pervasive and emerging risks, risk assessments of data architectures and analytics, and regulations, controls, and governance to protect and safeguard information assets.

ISP X82P. Public Policy and Law Governing Information Security and Privacy.

Examine established and emerging laws and public policy related to information security and privacy. Examine different classes of protected information and case studies documenting compliance and violation of legal and public policy protections. Explore legal requirements, corporate responsibilities and social responsibilities as they pertain to data protection and the prevention of different types of fraud and information crimes.

ISP X83. Business Governance and Controls for Information Security and Privacy.

Explore an organizational perspective on the management and governance of information. Examine business practices and governance mechanisms for minimizing risks and maximizing returns of information.

ISP X84. Strategic Communication for Information Security and Privacy.

Explore framing messages and the impact on people, organizations, risks and privacy; effective crisis management communications; communication and business continuity planning; time management; sense making processes in organizational crisis; and reputation management.

ISP X85. Information Risk and Benefit Analysis.

Explore and evaluate the risks and benefits related to information in multiple sectors including financial services, healthcare, consumer services, government, education, and energy.

ISP X85T. Topics in Information Security and Privacy.

Study the characteristics of information and the technologies, stakeholders, and questions involved in managing, protecting, and securing information.

ISP X86. Information Security.

Explore the enrollment and authentication for cyber and physical access and transactions, cryptography, biometrics, device identity security, and security culture.

ISP X87. Information Management and Repositories.

Explore knowledge and data management, storage, and mining. Examine information representation and algorithms. Discuss information security and privacy applications in all market sectors for enrollment, authentication, operational use, fraud detection, and fraud prevention.

ISP X88L. Professional Experience and Project.

Study practical problems, current phenomenon, or professional issues in an institutional setting.

ISP X89. Individual Studies.

In-depth study of a problem or subject related to information security and privacy.

ISP X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

ITC - Italian Civilization

Italian Civilization: ITC

Lower-Division Courses

ITC X19S. Topics in Italian Civilization.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ITC X29S. Topics in Italian Civilization.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ITC X19S. Topics in Italian Civilization.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ITC X29S. Topics in Italian Civilization.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ITC X30. Topics in Italian Studies.

ITC X35. Rome Sets the Stage.

ITC X35R. Italian Resistance Mediated.

Explore Italian modes of resistance and their representations in a variety of media.

ITC X36. Vamps, Stars, and The Diva.

Examine French and Italian films through the lens of stardom.

ITC X36E. Elena Ferrante: Politics and Passion.

ITC X37. Italian Masterpieces.

Study of representative texts in visual arts, film, literature, and opera, from the Renaissance to the present, in their historical context.

ITC X38. Italian Television Advertising.

Analysis of Italian television commercials in order to identify changes that have taken place at the level of language, with some attention to socio-cultural dynamics.

ITC X39. Italian Cinema.

ITC X40. Sicily: Cultures and Conquest.

Examine Sicily from the earliest prehistoric settlements to its first Norman king, with a focus on questions of change, recurrence, and continuity as viewed within the dual frames of archaeology and history.

ITC X47. American Dante.

Examine the influence of the Italian poet Dante on American culture from the nineteenth century to the present.

ITC X47R. Race and Migration: The Mediterranean.

Examine the history of migration within and from the Mediterranean area.

ITC X48. Dante.

Integrated Design: ITD

Lower-Division Courses

ITD X01. Introduction to Integrated Design.

Introduction to the concepts, mindsets, and methods of design thinking as a fundamental skill for all disciplines.

ITD X01D. Introduction to Design Thinking.

Introduces design thinking and design methods, with a focus on design process.

ITD X02. Sketching for Thinking and Communication.

Discussion of sketching as the fastest way to convey ideas, both in an ideation session or taking notes in a meeting. Explores the basic elements of sketching to visualize concepts and quickly bring alignment to any team.

ITD X04. Design in Business.

Introduction to the role that business plays in the design industry. Designed to help students learn business principles to enhance problem solving skills.

ITD X06. Presentation and Improvisational Skills in Design Thinking.

Focus on presentation skills and improvisational/impromptu speaking skills in meetings.

ITD X07C. Everyday Design.

Explore the influence of design in daily life, its impact on society, and how design disciplines shape the world through purposeful choices and creative practices.

ITD X10. Topics in Integrated Design.

Studies within integrated design.

ITD X10T. Topics in Innovative Design.

Exploration of topics in innovative design.

ITD X11. Intro to Design for Artificial Intelligence.

Introduction to exploring design as a problem-solving tool for real-world scenarios posed from artificial intelligence and robotics.

ITD X12. Introduction to Design for Health.

Introduction to how design is playing a role in the changing healthcare industry.

ITD X19G. Storytelling in Design.
Examine the role of storytelling in the user-centered design process and explore the principles that drive influential stories.
ITD X19S. Topics in Integrated Design.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Design. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ITD X20. Advanced Design for Artificial Intelligence.
Advanced exploration of real-world scenarios posed from artificial intelligence and robotics. In-depth study of designing and solving problems for artificial intelligence.
ITD X25. Topics in Artificial Intelligence Design.
Studies within design and artificial intelligence.
ITD X29S. Topics in Integrated Design.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Design. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ITD X30T. Topics in Innovative Design.
Explore innovative topics in design.
ITD X50. Advanced Topics in Integrated Design.
Advanced studies in integrated design.
ITD X50D. Business of Design.
Designed to help students form an advanced understanding of the role that business plays in the design industry and the operational components necessary to be successful in the design industry.
ITD X50T. Topics in Advanced Innovative Design.
Exploration of topics in advanced innovative design.
ITD X60. Perspectives in Design.
Explore unique perspectives in design.
ITD X65. Applied Ethnographic Research in Design.
Focus on how to create actionable insights using ethnographic research.
ITD X70. Topics in Off-Site Field Studios.
Project-based work with off-campus industry studio partners. Professional experience solving real-world problems including, but not limited to, commissioned projects, student-initiated projects, and pro bono projects.
ITD X75. Capstone in Integrated Design.
Multidisciplinary groups of students research an integrated design problem and propose and prototype an appropriate solution, guided by feedback from supervising instructor(s).

Graduate Courses

ITD X80. Design Thinking.
Explores the concepts of design thinking and human-centered design methods, with a focus on design process and problem solving.
ITD X85. Topics in Integrated Design.
Graduate studies within integrated design.
ITD X86. Topics in Integrated Design Studio.
Project-based studio graduate work within integrated design.
ITD X90. Design for Health.
Exploration of creative design-based approaches and problem-solving methods and their application to solving contemporary health care challenges.
ITD X91. Health Design Seminar.
Design techniques, case studies, and team critiques. Seminar component of Integrated Design 692.
ITD X92. Health Design Lab.
Team-based, project-focused application of the principles of design to real-world health and wellness challenges. Lab component of Integrated Design 291.
ITD X95. Topics in Health Design.
Graduate studies within health design.
ITD X96. Topics in Health Design Studio.

Professional Courses

ITL - Italian

Italian: ITL

Lower-Division Courses

ITL X01C. Beginning Italian.
An intensive beginning course with an emphasis on basic skills: listening, speaking, reading, and writing.
ITL X04. Accelerated First-Year Italian.
Designed for students of high motivation. A six-hour course comparable to Italian 506 and 507.
ITL X05. Introduction to Italian Language and Culture.
An introductory course in Italian language and culture taught in Castiglion-Fiorentino, Italy.
ITL X11C. Intermediate Italian.
An intensive intermediate course with an emphasis on basic skills: listening, speaking, reading, and writing. Does not meet the prerequisite requirements for Italian 328, 326K, or 326L.
ITL X12. Accelerated Second-Year Italian.
Comparable to Italian 312K and 312L combined. Intensive work in writing, reading, and speaking at the second-year level.
ITL X17C. Enhancing Italian Skills.
Listening, speaking, reading, and writing course designed to provide students who have credit for Italian 611C with additional preparation for upper-division Italian courses.
ITL X18K. Practice in Spoken Italian I.
Designed to be taken concurrently with Italian 312K.
ITL X18L. Practice in Spoken Italian II.
Designed to be taken concurrently with Italian 312L.
ITL X19S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ITL X29S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ITL X19S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ITL X20. Advanced Italian.
Designed to develop the listening, speaking, reading, and writing skills needed for the analysis of literary and cultural readings in Italian.

ITL X21. Introduction to Italian Literature.
Reading and analysis of literature, literary criticism, textual analysis.
ITL X22L. Tradition and Change in Contemporary Italy.
An analysis of Italy's trends and of conflicting values in its political, economic, and social development.
ITL X25C. Italian Through Cinema.
Designed to enrich knowledge of Italian language and culture through screening and discussion of Italian films.
ITL X26C. Italian through Creative Writing.
Develop knowledge of Italian lexicon and its grammar through creative writing practice.
ITL X27C. Italian through Cuisine.
Refine reading, writing, speaking, and listening skills in Italian through the context of gastronomy.
ITL X28. Composition and Conversation.
Focuses on idioms, grammar, syntax, and style.
ITL X29. Advanced Composition and Conversation.
Advanced work in writing and speech, based on current events and contemporary readings.
ITL X29S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ITL X30. Topics in Italian Studies.
Analysis of Italian culture. Texts include literature, film, popular culture, and other forms.
ITL X30C. The Language of Italian Crime Fiction.
Analyze Italian language and culture as reflected in the crime fiction genre studies through literature, film, popular culture, and other forms.
ITL X30D. Italian across Disciplines.
Students read and discuss Italian language materials related to the subject matter of another designated course.
ITL X30L. Introduction to Italian Linguistics.
Examine fundamental aspects of the Italian language including its structure as well as geographical, socio-cultural and communicative variation.
ITL X32. Italian Translation Workshop.
Focuses on the practical aspects of translation as a means to expand students' resources by practicing and improving grammar, style and lexicon.
ITL X46. Italian Politics.
Explore the Italian language, culture, and society through the examination of Italy's political system and the organization of the Italian government.
ITL X47. Italian Popular Cinema.
Analysis of Italian genre films (melodrama, comedy, horror, western, action), in their cultural and historical contexts.
ITL X48. Italian Drama Workshop.
Intensive analysis of one or several plays or short literary texts, with emphasis on diction, delivery of lines, and acting and staging.
ITL X49P. Italian Internship.
ITL X58Q. Supervised Research.
ITL X65. Conference Course in Italian Language and Literature.
Course content varies according to needs of students; designed to fill in gaps and give students a good overall picture of the development of Italian literature.
ITL X75C. The Antihero in the Twentieth-Century Italian Novel.
Explore the crisis of certainties at the turn of the last century and the end of the role of the hero, through the examination of major Italian novels.
ITL X75F. Writing Fascism: Writing the Resistance.
Examine major novels dealing with the Italian narrative on World War II and the resistance.
ITL X75N. Neorealism and its Legacy.
Analyze the legacy of neorealism in Italian literature and cinema from approximately the late 1940s to the early 1950s.
ITL X75S. Sicily in Literature and Film.
Examine Sicilian culture through novels and films.
ITL X79H. Honors Tutorial Course.
Supervised individual research on a literary, linguistic, or cultural topic, and writing and defense of a thesis under the direction of a committee of two faculty members.

Graduate Courses

ITL X19S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ITL X29S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ITL X80C. Italian for Graduate Students in Other Departments.
Intensive reading course, emphasizing basic grammar and vocabulary with translation practice.
ITL X80L. History of the Italian Language.
Survey of the development of Italian from spoken Latin to the present day.
ITL X80P. Introduction to Studies in Literature and Culture.
Proseminar in methods of study and research in Italian Studies.
ITL X80W. Doctoral Writing Workshop.
Acquire the crucial skills for writing a cogent prospectus, dissertation, or article, and complete the prospectus, dissertation chapter, or article.
ITL X81. Topics in Readings in Italian Literature.
Intensive study of a period or a major writer.
ITL X82. Topics in Italian Studies.
Study of various aspects and periods of Italian culture and society.
ITL X83K. Studies in Italian Language.
Synchronic approach to the modern Italian language: phonology, morphology, syntax, lexicology, stylistics.
ITL X85L. Conference Course in Italian Language and Literature.
For students needing specialized courses not normally or not often included in the regular course offerings.
ITL X85T. Graduate Teaching Practicum.
Engage in mentorship and pedagogical training by working one-on-one with a faculty member to develop and design an undergraduate, upper-division level course in an area of specialization.
ITL X90K. Topics in Italian Literature through the Renaissance.
Intensive study of a particular writer, school, or literary movement.
ITL X90L. Topics in Italian Literature since the Renaissance.
Intensive study of a particular writer, school, or literary movement.
ITL X95L. Comprehensive Examination Preparation.
Supervised preparation for the comprehensive examination for the doctoral degree.

ITL X96K. Topics in Comparative Romance Linguistics.
General survey of the development of spoken Latin in Italy, Spain, Portugal, and France; main traits of phonology, morphology, and syntax in each modern derivative language.

ITL X96K.1. Introduction to Romance Linguistics.

ITL X98. Thesis.

ITL X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

ITL X98T. Supervised Teaching in Italian.
Practical exercises in second-language instruction and closely supervised classroom teaching, supported by theoretical studies of second-language learning.

ITL X99W. Dissertation.

Professional Courses

ITL X19S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ITL X29S. Topics in Italian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of French and Italian. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J - Journalism

Journalism: J

Lower-Division Courses

J X01F. Fundamental Issues in Journalism.
Examination of major issues facing the news media in a democratic society and the exploration of digital technology on the future of news gathering, including ethics, institutions, effects, and standards of journalistic performance.

J X02F. Digital Storytelling Basics.
Explores the mindsets and skill sets of digital journalism. Covers subjects like: how technology helps journalists do their jobs; how traditional journalistic values and ethics relate to the digital world; how to explore new trends in journalism; how to report and tell stories in multiple ways; and how to be comfortable with analyzing and engaging online audiences.

J X04F. The Journalist Voice.
Introduction to best practices on writing with a clear, concise, and organized style for a variety of platforms while learning and following ethical standards.

J X05. Sustainability and the News.
Explore covering issues like sustainability and climate change when many people are not convinced by science and facts -- even within the media. Examine navigating news about saving the planet.

J X08C. Sports, Media, and Society.
An examination of historical and contemporary issues regarding the sporting world's interaction with media production, including journalism, talk radio and social media.

J X08D. Data, Privacy, and You.
Explores approaches to understanding what some have termed 'datafication'. Covers literacy of these types of data as well as the ways in which these data are transmitted, stored, compiled, aggregated, analyzed, and used in predictive analytics. Examines privacy aspects in terms of the increased blurring between the private and public in spaces such as social media and explores the implication of this on news production and consumption.

J X08F. Analyzing Media Bias.
Critical analysis of the ways news is presented, misrepresented and critiqued, with an emphasis on perceived bias in the news media.

J X08J. Becoming Citizen Journalists.
Covers the basics of journalism for students who are interested in sharing truthful stories to a public audience, but do not intend to pursue a career in the profession. Uses digital and social media tools. Explores three subjects: how to find and gather the best factual information, how to present it in clear and engaging ways, and how to make ethical decisions that serve the needs of the audience and democracy.

J X08L. Media and News Literacy.
Analyze the information, values, and underlying messages conveyed via media. Examine the accuracy of those messages and explore how media shapes views of politics, culture and society.

J X08M. Society, Media, and Identity.
An analysis of how U.S. media - especially the news industry, film, television and social media - influence culture, and vice versa. Uses readings and observation to recognize that the stories media tell influence identities such as race, ethnicity, gender, religion and sexual orientation.

J X08N. Computer Concepts and Internet Technologies.
An introduction to the scope, significance, history, and social implications of data processing on systems and networks. Examine programming languages, elements of a software system, databases, computer networks, and Internet security. Explore hardware concepts including number systems, data representation, central processor, storage, input/output, and system configurations.

J X08S. Introduction to Media Studies.
Examine the historical, cultural, political, economic, and international characteristics of journalism, film, television, digital media, and other media in society.

J X08T. Topics in Journalism.
Contemporary social, political, and intellectual concerns in the practice of journalism and media.

J X10F. Reporting: Words.
Reporting, writing, and editing skills for print, online, mobile, and broadcast.

J X10K. Visual Literacy.
Introduction to the visual concerns of message design and interpretation, including their bases in theories of visual perception, semiotics, and media practice.

J X11F. Reporting: Images.
Video and images for web and broadcast, including design principles, visual perception, typography, manipulation of images, and photographs.

J X13P. Multimedia News Reporting.
Skills-based introduction to journalistic forms of news gathering and writing. Gaining the tools for journalism storytelling.

J X13S. Topics in Texas Sports and Media.
Introduction to various contemporary and historical issues, emphasizing interdisciplinary perspectives and critical discourse.

J X15R. Contemporary Representation in Media.
An examination of how underrepresented and marginalized groups are portrayed in the news media.

J X17. Journalism Practices.
Introduction to writing skills for the media, including readability, clarity, verification, and style.

J X18P. Podcasting.
Examination and practice of writing and reporting news for audio broadcasts, including podcasts.

J X19I. Topics in International Learning Seminars.
Discuss various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

J X19S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J X29S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

J X19S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J X20F. Covering Law Enforcement and Courts.
Specialized reporting, research, and writing skills for investigating and covering incidents and issues occurring in law enforcement, public safety, and criminal justice.

J X20G. Internship Practices.
Internships to be arranged by student and approved by instructor.

J X21F. Reporting on City and County Government.
Basic beat reporting skills to navigate city and county governments, and conducting reporting, research, and writing on issues and people at the local level.

J X22E. Reporting on Elections.
Examine election reporting through instruction and supervised fieldwork. Explore candidate identification and monitoring, campaign coverage, misinformation verification, issues of social justice and election access, and communicating complex political issues to lay audiences.

J X22F. Navigating State Government.
Training and instruction in specialized reporting, research, and writing skills as applicable to covering state governments. Analysis of enduring issues and politics at the state level. Fieldwork at the Texas Capitol and state agencies.

J X22J. Reporting Social Justice.
Explore how to cover such social justice issues as poverty, inequality and disenfranchisement and the skills needed to research, report and write on people in underrepresented communities.

J X22P. Reporting Public Issues.
Specialized reporting, research and writing skills for covering government institutions and public policies.

J X23C. Reporting California and Texas.
Explore reporting from California and Texas to produce content that bridges both states.

J X23F. Education Reporting.
Covering school districts and higher education to produce stories that humanize the bureaucracy of public education and compellingly depict issues, structures, and policies.

J X23N. Reporting New York and Texas.
Explore reporting from New York and Texas to produce content that bridges both states.

J X23R. Regional Reporting.
Explore reporting from Texas and the southern region of Texas, in addition to Austin, to produce content connecting to a wider scope of communities.

J X24C. Reporting Consumer News.
Emphasizes writing and reporting for consumers, finding and honing stories that help people thrive. Practice in writing creative, relevant and vivid descriptions that tell an engaging story. Analysis of community perspective, public sourcing, what's possible, and interdependent dramatic arc. Uses journalistic skills to reward an audience, adapt to a community, and push the envelope.

J X24F. Business and Financial Reporting.
Instruction in how to conceptualize, source, and prepare news reports on global financial markets, commercial transactions, and company performance. The course is global, with the United States a subset of the material covered. Hands-on course during which students produce multiple news packages for publication.

J X25C. Reporting Health Care.
Explore production of multi-media stories to inform local, state, and national audiences about the health care system in the United States. Consider health care policy at all levels of government, and private and public systems of health care. Examine how to investigate, report and publish on this complex issue.

J X25F. Covering Politics.
Specialized research, reporting, and writing skills to cover politics, elections, and candidates.

J X25J. Community Journalism.
Explore reporting on communities and neighborhoods and the issues that affect them.

J X25S. Solutions Journalism.
Explore the production of news content focusing on solutions to public issues.

J X26C. Introduction to Coding for Journalists.
Learn basic coding skills and develop best practices used in digital newsrooms to create data-driven online presentations.

J X26F. Reporting Sports.
Contemporary professional skills and techniques in sports journalism.

J X26S. Advanced Topics in Texas Sports and Media.
Critical assessment of various contemporary and historical issues, emphasizing interdisciplinary perspectives.

J X27D. Reporting With Data.
An investigation of the basics of computer-assisted reporting. Subjects include finding compelling data sets; cleaning and analyzing the contents; using data visualization and simple statistical models to accurately report based on the data; and presenting results through stories, charts and maps.

J X28D. Advanced Reporting with Data.
Explore advanced data-assisted reporting techniques through use of databases, scripted analysis, and visualizations.

J X28L. Reporting Latino/a Communities.
Examine how Latino/a communities are represented in the media. Explore production of news stories about various aspects of the Latino/a experience at the national, state, and local levels.

J X28S. Reporting en Espanol.
Spanish-language news in the U.S. offers important possibilities for public service journalism. Production of multimedia news stories in Spanish for a local audience. Discusses issues facing the local Latino population from the international, to national, to state and local levels. Includes weekly pitch meetings, rewrites, photography and digital storytelling. Students must be fluent in Spanish.

J X29F. Interdisciplinary Business Reporting.
Explore an in-depth, interdisciplinary approach to covering budgets and funding, whether in the private or public sector, by integrating business expertise and journalistic reporting.

J X29S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an

exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J X29T. Topics in Public Affairs Reporting.
Contemporary social, professional, and intellectual concerns in the practice of public affairs reporting.

J X30C. Television Reporting.
Write, shoot, and edit for broadcast news as part of a weekly Reporting Texas TV newscast.

J X30G. Creative Nonfiction for Magazines and Books.
Report and write for narrative nonfiction projects, including producing magazine articles, documentary films, and podcasts.

J X30J. Advanced Photo Editing and Design.
Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of photo stories, photo essays, and feature stories, with editing and page layout.

J X30L. Community Life: Documented.
Explores video filmmaking in a multicultural, diverse city. Emphasis on learning the steps of producing a short documentary with a small group of students, then posting the final films on personal portfolio websites.

J X30M. True Crime Podcasts.
Analyze true crime podcasts, with an ear for ethical concerns, sensitivity, storytelling prowess, and more.

J X30P. Editing Techniques.
Edit professional writing, provide constructive feedback, and elevate content on digital platforms.

J X30S. International Solutions Journalism.
Examine how solutions journalism covers public and governmental issues outside the United States.

J X31. Web Publishing.
Focus on in-depth understanding of the web platform and its applicability to various types of content across multiple devices. Examination of web usage by individuals and organizations with the need for a digital presence. Experience the web publishing process, including planning, production, tracking, and marketing. Exposure to HTML coding, design, content management systems, web analytics, and digital advertising.

J X31D. Intermediate Photographic Communication.
Intermediate level photograph skills and techniques. Evaluation of recent trends, visual design, and use of images in the media. Students must provide their own digital 35-mm format camera.

J X31G. Audio Storytelling.
Focus on broadcast writing for the ear and includes the production of NPR-style radio stories and the creation of original podcasts.

J X31J. Studio Photography.
An investigation of the principles of studio lighting, theory and practice of contemporary color, location lighting, and production of portfolio-quality work, as applicable to advertising, photographic illustration, and photojournalism.

J X31M. Media Innovation and Entrepreneurship.
Learn how the digital revolution has disrupted the media industry, creating opportunities for entrepreneurial, innovative initiatives. Study cases of successful media startups, and develop a startup project, using digital technologies and human-centered design.

J X31N. Digital Production and Analytics.
Examine the digital publishing process, including planning, production, tracking, and marketing.

J X31W. Web Editing and Production.
Examine the skills needed to produce and maintain a website, including understanding of content management systems and search engine optimization.

J X32D. Web Production and Editing.
How to plan, edit, package and publish multimedia news. Includes ethical news curation; use of social media to drive audience growth; and leveraging web content into the print product.

J X32G. Explanatory Journalism: Storytelling in a Digital Age.
Examination of the evolution of long-form explanatory storytelling from print and film to new forms of Web-based and interactive storytelling.

J X32I. The Interview Process.
Explore the methodology of inquiry as a foundational but specialized form of reporting that requires advanced preparation, keen listening, and adaptability.

J X32J. Sports for Reporting Texas.
Students work as sports reporters for the School of Journalism's Reporting Texas Web site.

J X32P. Images in Culture.
Explore the production of images related to entertainment and pop culture.

J X32S. Sport Commentary.
Examine the skills needed to produce well-reported and artfully crafted columns, commentary, and analyses about sports on and off the field, no matter the platform.

J X33G. Advanced Visual Journalism: Photo.
Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of photo stories, photo essays, and feature stories, with editing and page layout.

J X33J. Photography for Reporting Texas.
Students work as photographers for the School of Journalism's Reporting Texas Web site.

J X33L. Video Production for Live Events.
Examine the basics of shooting and editing live events.

J X33P. Podcast Scripting.
Write descriptive scenes and push forward a journalistic narrative in the podcasting space.

J X33S. Video Production for News and Sports.
Examine the basics of shooting and editing events, including live sports, news, and entertainment.

J X34. Multimedia Journalism.
Review of online reporting techniques, advanced multimedia skills, and current issues in new media.

J X34F. Oral History as Journalism.
Instruction in the use of oral history to generate journalistic coverage. Modules include concepts and methods of gathering oral history; illustration of the techniques using the Vietnam War as a topic; and generating oral history-based coverage focusing on the Mexican American experience.

J X34G. Advanced Visual Journalism: Video.
Explores intensive video reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of video news and feature stories.

J X34I. Immersive Sound Design.
Create a soundscape through music, interviews, natural sounds for podcasts, and other audio stories.

J X34J. Web Publishing for Journalism.
Provides students with an up-to-date understanding of the Web publishing process, including conceptualization, production, and marketing.

J X34K. Interviewing For Historical Context.
Examine methods for recording interviews that become high-quality archival recordings for multiple platforms. Explore concepts and methods of power dynamics in an interview, asking evocative questions, preparation, and technical considerations.

J X34N. Oral History in Multimedia Storytelling.
Instruction in using oral history to generate archival material and short-term multimedia stories. Covers concepts and methods of gathering oral history with an emphasis on interviewing techniques. Centers on U.S. Latinos and ways to build a multimedia representation of the interview. Includes one major interview trip, generally out of town.

J X34P. Podcast Production.
Analyze current podcasts. Create and produce two segments of an original podcast.

J X34S. Place and Audio Storytelling.
Learning how to find the essence of a specific location and tell its story. Audio recording/editing, infographics, and photographs will be the tools used.

J X34V. Integrated Video Production.
Examine video storytelling that integrates practices found in different areas of communication and platforms.

J X35. Narrative Journalism.
Explore techniques for reporting non-fiction stories with the tools of fiction, including scene and dialogue. Analyze exemplary pieces of narrative, from written form to documentary film. Examine the reporting and writing of original non-fiction narratives.

J X35D. Making Magazines.
Includes simulated publication teams that craft a concept, develop a business plan, and create a prototype. Focus on market research, writing, team building, design and production skills.

J X35F. Magazine Writing and Production.
Explore magazine analysis with an emphasis on longform feature writing and reporting.

J X35G. Advanced Television Reporting and Producing.
Advanced writing and reporting skills for the collaborative production of television news programs on deadline. Students assist in producing a television news program.

J X35J. Mobile Programming for Journalists.
Coding and other skills in preparation for designing mobile news apps.

J X35K. News Documentary Production.
Produce original news documentaries with an emphasis on films covering current affairs, contemporary life, and historical subjects.

J X35N. News Application Development.
Explore the skills necessary to create interactive web applications for journalism and related fields.

J X35P. TV Reporting and Producing.
Explore the skills needed for the collaborative production of television news programs on deadline.

J X36D. Graphic Design for Print and Online.
Overview, design, and production of materials for online and print storytelling. Subjects include design principles, visual perception, typography, manipulation of images and photographs, and page design for media platforms.

J X36F. Social Media Journalism.
The role of journalism in using social media to engage a wide audience, building a marketable brand for journalists and media organizations, and engaging an audience with the news media. Practice in using tools and techniques to be an engaging and effective media practitioner.

J X36J. Lifestyle Journalism.
Specialized reporting and writing in lifestyle coverage, including food, fashion, entertainment and travel.

J X36M. Music Journalism.
Study the main areas of music journalism, utilizing the resources of Austin's live music scene.

J X37C. Culture Reporting and Criticism.
Cover and review cultural productions such as music, theatre, fine arts, film and food.

J X37D. Advanced Graphic Design for Print and Online.
Advanced exploration of graphic design tools, theory, industry trends, and history. Emphasis on design in journalism, infographics, long-form print design, and user interface (UI) and user experience (UX) design.

J X37F. Long-Form Feature Writing.
Advanced instruction in reporting and writing long-form narratives, including lessons in analyzing story-telling tools, strategies, and techniques. Examination of narrative strategies and techniques across different media platforms.

J X37G. Opinion Writing.
Examines opinion writing and commentary in traditional print and evolving online formats.

J X37J. Writing for Online News Audiences.
Students will learn how to write informatively and effectively for online audiences, and how to repurpose traditional print journalism for online publication.

J X37L. Food Journalism.
Explore the production of content centered on food and dining, including restaurants and recipes.

J X37M. Feature Writing.
Explore the production of profiles, enterprise pieces, and non-deadline stories.

J X37P. Writing and Producing for Online Publications.
Examine how to write informatively and effectively for online audiences and how to be a web producer at a major news organization, including social media, newsletters, mobile apps, content management systems, and more.

J X38F. Advanced Visual Design.
Advanced exploration of principles and processes of visual design, including design principles, visual perception, typography, image making, uses of color, printing techniques, and publication design.

J X38J. News for a Mobile Audience.
Examine the mobile landscape, including news and entertainment platforms, social media, and the practice and principles of journalism. Explore ideas for increasing mobile news engagement, especially by Generation Z and Millennials.

J X39D. News Documentaries and Public Affairs.
Study and practice of researching, writing, and producing short-form and magazine documentaries for television.

J X39F. Investigative Reporting.
Emphasis on determining what an investigative story is, finding investigative stories, and basic tactics in pursuing such stories.

J X39M. Mobile Media Apps Development.
Planning and building a mobile app, whether for Android, iOS, or web-based, and personal communication in the news business and in various other journalism-related topics.

J X39S. Research in Texas Sports and Media.
Supervised research with a faculty member; research may consist of an individual project or assisting a faculty research project.

J X39T. Topics in Specialized Journalistic Skills.
Contemporary social, professional, and intellectual concerns in the practice of specialized journalistic skills.

J X39T.1. Mapping in Storytelling.
Creating visual stories that combine text, charts and maps. Foundations of data analysis, spatial analysis, design, data visualization and cartography, including hands-on practice with GIS software and discussions of editorial and ethical concerns in visual storytelling. Assignments include combining new skills and reporting to produce visual stories.

J X39T.3. Producing Documentaries for Sports Journalism.
Applied skills in teams to produce one original documentary sports story. Emphasis placed on stories that transcend competition and explore larger social issues, such as race, sex, gender, class, opportunity, community, and identity.

J X39T.4. Tracking Online Audience Engagement.
Introduction to current practices in tracking and engaging online audiences such as web metrics, Google Analytics, search engine optimization, and keyword advertising.

J X40C. Topics in Journalism, Communication, and Culture.
Issues concerning minority or nondominant groups within the United States.

J X40C.4. Leadership, Management, and the Media.

J X40D. Reporting on Technology.

How to report on technology and its meaning for business and society using the Austin technology scene. Hands-on reporting, from robotics and mobile media to gaming and music production.

J X40F. Covering the Global Economy.

Examines the enduring financial, economic, and business issues journalists confront in covering the global economy.

J X40G. Reporting Asia: A Foreign Correspondent's Framework.

Explores dynamic ways of looking at, thinking about, and reporting the world, and establishes a framework for analyzing how the news media cover key events, issues, and processes that shape our lives in a global society.

J X40J. Documentary Tradition of Latin America.

Contemporary social, professional, and intellectual concerns with the practice of journalism. Study of still photographic and video documentary work by Latin Americans about Latin America. Production of photographic essays on Latin American culture.

J X40N. Journalism in the 1960s.

Through readings and critiques, examine "New Journalism," a bold style of journalistic reporting and writing in the 1960s and 1970s that was a sharp departure from previous newspaper and magazine storytelling.

J X41F. Understanding African Americans and the Media.

Documentaries, readings, discussions, projects, and theories facilitate the examination of the relationship between African American history and contemporary American society. Media representations of African Americans are evaluated and news coverage of African Americans is explored in depth.

J X41G. Reporting China: A Foreign Correspondent's Workshop.

Contemporary social, professional, and intellectual concerns with the practice of journalism.

J X41J. Minorities and the Media.

Issues concerning news media depiction of underrepresented groups in the United States.

J X41M. Representation in the News Media.

Examine issues concerning news media depiction of minority and nondominant groups in the United States.

J X42F. Women and the News.

Historical and contemporary exploration of women and the news. Examination of the role of women in producing news and the construction of women within news texts.

J X42G. Reporting the World: A Critical Examination of the United States News Media.

Dynamic ways of looking at, thinking about, and reporting the world, both abroad and at home. Establishes a framework for analyzing how the news media cover key events, issues, and processes that shape our lives in a global society.

J X42J. Visual Media and the News.

Explores the power of mediated images in culture and society. Examines the way images, language, and human activity shape visual messages and the historical relationship between technology and image-creation.

J X43F. Journalism and Religion.

Critical examination of how religion traditionally has been covered in the United States, and guidelines for developing individual thinking and reporting on religious issues.

J X43G. Exploring Digital Media and Society.

Examines the connection between new media and society through a variety of theoretical and practical perspectives to explore the implications of the use of technology and new media in influencing community, social relationships, and public and private spaces, as well as the profession of journalism.

J X44F. Reporting on Gender and Sexuality.

Instruction on how to cover controversial issues around gender and sexuality. Review of the sociology of gender and sexuality, with a focus on political, economic, and cultural implications.

J X44G. Urban Journalism.

Studies of basic city functions and how to detect urban dysfunctions before crises become news. Topics include infrastructure decay, traffic congestion, poverty and homelessness, digital divides, school dropouts, conflict and crime, riots and protests, obesity and disease, recreation, and pollution.

J X44J. Media Images and Society.

The power of mediated images in culture and society; exploration of the way images, language, and human activity shape visual messages; and the historical relationship between technology and image creation.

J X45F. Social Issues Reporting.

Coverage of social issues such as immigration, health care, and child welfare. Examination of stereotypes, how they affect reporting, and how they change as student reporters encounter new subjects.

J X45G. Human Rights Journalism.

Exploration of the role of journalists in exposing human rights abuses. Modules include case studies from El Salvador, South Africa, Zimbabwe, Rwanda, Bosnia, Sudan, Israel, and Russia, as well as the legal and moral obligations of journalists as witnesses to atrocities and genocide. Examination of the Bush Administration's global War on Terror and the legacy confronting the Obama Presidency.

J X45R. Film and Television Criticism.

Explore a theoretical and practical introduction to the ways critics review movies and narrative series. Examine the history of criticism, its evolution from print to TV to digital, and the narrative approaches used by critics in their analyses.

J X46F. Reporting on the Environment.

Instruction and supervised fieldwork in environmental coverage. Topics include interviewing, elements and structures of good environment writing, the concepts of scientific certainty and uncertainty, and communicating complex science to lay audiences. Issues covered include climate change, energy, air and water quality, and sustainability.

J X46G. Domestic Issues and Global Perspective.

Examining domestic issues (consumerism, food/heath, environmentalism, energy consumption) from global and intercultural perspectives. Proper positioning of the United States helps journalists and news consumers think outside the box.

J X47F. Reporting Latin America.

Foreign reporting and international news production processes, with special emphasis on Latin America.

J X47G. Cultural Survey of Photography.

Examine the development of photography focused on reportage, documentary, and social issue art photography, including historical processes, the evolution of stylistic trends, and critical issues in the field. Explore the Harry Ransom Center and other University of Texas photographic archives.

J X48D. Gender and the News.

Historical and contemporary exploration of gender and the news. Examination of the role of marginalized gender groups in producing news and the construction of gender within news texts.

J X48E. Ethics of Sports Media.

Analyze the role of journalistic ethics in the coverage and media production of sports.

J X48F. Covering the Latino Community in the United States.

Challenging and developing views of the contemporary Latino community and other underrepresented people in the United States. Topics include a history of ethnic groups in the United States and their politics, education, organization, immigration, culture, power, and media.

J X48G. The Business of Sports Media.

Examination of the business of sports-related media, including over-the-air television, cable, satellite television, print, radio, social media,

and internet-based media, and the impact of such media on sports presentation and development, professional franchises, colleges, and conferences. Emphasis on how the business of sports media generates revenue and content, and the business models for each type of media, the challenges to such models, and the likely future changes to them.

J X48J. Covering Criminal Justice.

Examine how criminal justice is covered in the news media.

J X48L. Making Sense of the News.

Gaining the critical thinking skills necessary to analyze what is news in our digital age. Examines accuracy, sources and verification, and bias behind information in the public sphere.

J X48M. Diversity in News Organizations.

J X48N. Leadership in News Organizations.

Examine concepts and frameworks related to skills integral to ethical, effective leadership and management in news organizations. Explore making ethical decisions, communicating supportively to others, gaining power and influence, managing conflict, building effective teams, and leading positive change.

J X48S. Media Management.

Print and broadcast management and planning in operations, personnel, content, marketing, finance, technology, and regulation.

J X49E. Elections, Voters, and News.

Explores U.S. election history, dimensions of and influencers in U.S. elections, news coverage of candidates and issues, and voters and their attitudes toward candidates and issues as well as their engagement with election news.

J X49F. Reporting Public Health and Science.

Specialty reporting to help news consumers understand complex health and medicine issues. Considers the lack of critical perspective, balanced reporting, and grasp of fundamental issues that afflict much health reporting. Focuses on the latest reporting techniques and narrative skills to illuminate an intellectually demanding field that also includes public health policy.

J X49L. News Literacy for a Digital Age.

Explores news, journalists, the practice and ethics of journalism, news platforms, history, and threats to the future of news, and the attitudes, demographics, and behavior of the news audience.

J X49N. News Media and Politics.

Examines central controversies and theories about the role the media in politics and the political systems.

J X49T. Topics in Understanding and Reporting Social Issues.

Contemporary social, professional, and intellectual concerns in the practice of journalism.

J X49T.1. Senior Seminar.

Capstone experience in analysis of current journalism issues. Students complete a major research project.

J X49T.11. Editorial Column Writing.

J X49T.14. Latino Policy Issues.

J X49T.20. Video Journalism for the Web.

J X49T.21. Writing for Magazines and Specialty Publications.

J X49T.22. Writing for Online Publications.

J X49T.5. Broadcast News Practices and Analysis.

J X49T.8. Alternative Media.

J X49T.9. Covering Technology and Innovation.

J X50F. Media Law.

Examination of legal rights and restrictions for online and print journalism, including Constitutional guarantees, libel, invasion of privacy, and contempt of court.

J X50M. Media Policy and Ethics.

Explore the contemporary ethical and policy issues facing the transforming media industries and the American public. Examine a range of issues that new media and the Internet have complicated, rooted in an understanding of the First Amendment as well as the development of communication industries.

J X50N. Ethnic Media.

Examine the history of media devoted to ethnic communities underrepresented by mainstream media, as well as news consumers whose primary languages are not English, in New York - including the country's first African-American newspaper in 1827 - and their continuing relevance in a global world.

J X50R. Covering Rural America.

Examine the coverage and the narratives the news media construct about rural America.

J X51C. Contemporary Media Systems.

Explore the contemporary role of media systems in the U.S. Examine the structure and reach of today's media systems, and the role of individuals and corporations in new digital systems.

J X51F. Journalism, Society, and the Citizen Journalist.

Examine journalism's principles, process, and role in society. Discuss distinctions between journalists and citizen journalists and explore the news audience in depth with special attention paid to Millennials and Generation Z and their engagement with different news platforms.

J X51G. Introduction to Global Media.

Examine the role of global media as a set of texts, technologies, and industries that shape our identities, our social worlds, and our political practices.

J X51J. Technology and the Internet in Journalism.

Examine the literacy of computer and Internet technologies in the context of journalism and communication. Focus on software, databases, computer/wireless networks, hardware, cybersecurity, and the Internet work. Explore case studies from science and technology journalism in order to reflect on the technical knowledge needed to effectively report and communicate in these areas.

J X51P. Social Media, Propaganda, and Elections.

Explore the spread of "computational propaganda," including misinformation, disinformation, and political trolling, with a special focus on U.S. politics, media, and reporting.

J X51S. Globalization and Social Media.

Examine the issues surrounding the hype, myth, paradox, and reality of social media in a global context.

J X51T. Technology and Culture.

Examine ideas about the relationship between technology and culture, how U.S. culture views technology, and the historically contingent design, development, and use of different media and communication technologies.

J X52. Topics in Journalism.

Contemporary social, professional, and intellectual concerns in the practice of journalism.

J X52.6. Presidents and the Press.

J X52F. Ethics in Journalism.

In-depth examination of the ethical choices individual journalists face and the ethical implications of how news media operate in a larger social and political framework.

J X53F. Historical Perspectives in Journalism.

Evolution of journalism and mass media, including the social, economic, and political factors that have contributed to changes in news gathering and distribution.

J X54F. Journalism and Press Freedom in Latin America.

Focus on journalism in Latin America with an emphasis on the struggle for democracy and press freedom in the region through country-by-country survey of historical, political, economic, cultural, ethnic and geographical aspects. Examination of the evolution of professional journalism in Latin America, including topics such as the legal framework for freedom of expression, ethical principles, concentration of media ownership and the emergence of digital media. Knowledge of Spanish language is recommended, but it is not a requirement.

J X54L. Mapping Latino Culture in East Austin.

Explore the cultural history of majority Anglo and minority (Latino, African-American, and Asian) Austin with a focus on how the sources

of information, culture, and media available to minority residents have evolved, and how those sources have been used by people and communities there.

J X54M. Journalism and Press Freedom in the Middle East and North Africa.

Explore journalism in the Middle East and North Africa with an emphasis on the period leading up to the Arab Spring and subsequent developments. Survey historical, political, economic, cultural, ethnic, and geographical aspects of the region. Examine the evolution of professional journalism in the Middle East and North Africa. Includes legal framework for freedom of expression, ethical principles, concentration of media ownership and the emergence of digital media. Knowledge of Arabic is not a requirement.

J X54N. Nonprofit Journalism.

Examine and analyze the growing field of nonprofit journalism, its business models, and its impact on news content.

J X54R. International Broadcasting.

Survey broadcast production and content outside of the United States.

J X54S. Contemporary Issues in Sports Journalism.

Examine the range of problems and opportunities prevalent in coverage of American sports. Includes discussion of class, equality, gender, labor, political expression and race. Examine timeless themes in sports coverage such as community, ego, identity, money, opportunity and tradition, as well as sports-specific journalistic ethics.

J X55F. Living in the Information Age.

Examine communication and information technologies with particular emphasis on the Internet and its components. Explore how digital and mobile technologies are used by Millennial and post-Millennial generations and with what effects.

J X55G. The Information Society.

Examine information technologies such as the Internet, telephones, and computers and their relation to existing media, including history, policy, economics, and social impact.

J X55M. Media Industries and Entrepreneurship.

Examine the social, political, and economic contexts in which media and culture are produced, distributed, and monetized. Explore these with an emphasis on new media and communication technologies.

J X55P. The Business of News.

Discusses trends and innovations shaping the business of news, from rapidly evolving content consumption patterns to emerging storytelling platforms like streaming, podcasting, and AR/VR. Examines the challenges and opportunities of the business of news, for-profit and non-profit alike, essential for those planning a career in media. Includes on-site, interactive conversations with news professionals and entrepreneurs, students will learn about

J X56C. Digital Mainland China and Taiwan.

Examine disruptive innovations and entrepreneurship such as social and mobile media, big data, and AI; and their media, cultural, and social implications in Chinese societies such as mainland China and Taiwan.

J X56G. Social Media: Growth, Uses, and Impacts.

Explore a range of issues related to the growth, uses, and impacts of social media, including the rapid rise and adoption of social media.

J X56M. Social Media and Society.

Explore social media's rise and influence in society.

J X56R. Race and Digital Media Cultures.

Examine a range of issues related to the adoption of various digital and social media platforms and experiences across the digital media landscape, with a focus on how digital media culture is influenced by systemic racism. Using a number of studies, recent data trends, and keen observations, analyze the interconnectedness of race, racism, and uses of digital media.

J X58C. Becoming Citizen Journalists.

Covers the basics of journalism for students who are interested in sharing truthful stories to a public audience, but do not intend to pursue a career in the profession. Uses digital and social media tools. Explores three topics: how to find and gather the best factual information, how to present it in clear and engaging ways, and how to make ethical decisions that serve the needs of the audience and democracy.

J X58N. Online Incivility.

Define and explore different types of incivility through the lens of online discussions. Critically assess why incivility exists online and what influence it has on politics, society, and journalism.

J X58P. Popular Culture and the Press.

Explores the relationship between American popular culture and the press, its role in our everyday lives, and how it helps shape our attitudes and identities. Explores popular culture in television, film, magazines, the Internet, social media, and advertising. Subjects include movies, music, film, fashion, food, travel, celebrity and society news, among others.

J X58S. Communicating Social Change.

Utilizing communication skills to tell truthful stories of underrepresentation and marginalization.

J X58T. Topics in Journalistic Practices.

J X59M. Topics in Journalism and Media Studies.

Examine contemporary issues in the fields of journalism and media studies.

J X59S. Topics in Current Journalistic Issues.

J X59S.1. Covering Marginalized Communities.

J X59T. Topics in Journalism, Skills, and Techniques.

Examine the contemporary professional decisions and techniques used in the practices of journalism.

J X60F. Internship.

Internships to be arranged by student and approved by instructor.

J X60G. Journalism Internship.

J X60S. Sports Media Internship.

Sports media internships to be arranged by student and approved by instructor.

J X61F. Reporting Texas.

Students work as online reporters, photographers, and editors for the School of Journalism's Reporting Texas website.

J X62F. Journalism Portfolio.

A synthesis experience to polish journalism skills, showcase reporting and production abilities across multiple journalistic platforms, and complete a professional online portfolio.

J X63. Theories of Mass Communication.

Comparative survey of perspectives, research, and theories on communication through the mass media; theories on media effects and the construction of social reality, especially regarding the news media.

J X63C. Broadcast Capstone.

Write, produce, and present a weekly television newscast, culminating in seven episodes of Reporting Texas TV. Includes on-air, digital, and social media skills.

J X63D. Digital Innovations Capstone.

Working in groups or individually; conceive, pitch, plan, design, and create cutting-edge media products.

J X63F. Capstone Projects in Journalism.

The design and execution of special projects showcasing the individual student's interests in one or more journalistic platforms.

J X63K. News Documentaries.

Use applied skills as individual filmmakers to produce one original news documentary under ten minutes. Emphasis placed on films covering current affairs, contemporary life and historical subjects, films that might be found on The New York Times or The New Yorker.

J X63L. Journalism Research Capstone.

Emphasizes proficiency in researching and writing.

J X63M. Capstone in Application Development.

Plan and build a mobile application, whether for Android, iOS, or web-based, and use journalistic multimedia skills to promote and explain the products.

J X63N. Newsroom Capstone.
Take part in a newsroom experience to refine journalism skills, and showcase reporting and production abilities across multiple journalistic platforms.

J X63P. Television Newsmagazine.
Explore the production of a television newsmagazine program, including on-air reporting, editing, and segment production.

J X63Q. Capstone in Podcasting.
Plan, research, report, record, and produce professional-quality podcasts. Analyze podcasting audiences, build revenue streams, and market podcasts to a regional or global audience.

J X63S. Sports Media Capstone.
Stresses proficiency in sports writing, reporting, and editing by emphasizing professional skills and habits.

J X63V. Visual Capstone.
Stresses proficiency in visual reporting by emphasizing professional skills and habits.

J X63W. Reporting Capstone.
Stresses proficiency in writing, reporting, and editing by emphasizing professional skills and habits.

J X65M. Experiential Learning.

J X65P. Specialized Practice in Journalism.
Specialized journalistic instruction by a professional from the field.

J X70K. Topics in Advanced Photojournalism.
Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation of photo stories, photo essays, and feature stories, with editing and page layout.

J X70K.2. Documentary Video.

J X70K.3. Picture Editing.

J X71K. Topics in Photographic Illustration.
Principles of studio lighting, theory and practice of contemporary color, location lighting, and the production of portfolio-quality work, as applied to advertising, photographic illustration, and photojournalism.

J X71K.1. Location Lighting.

J X71K.2. Studio Photography.

J X78P. Special Projects in Journalism.
Supervised projects in the field of journalism.

J X79. Journalism Independent Study.
Designed to give students the opportunity to pursue special studies for which separate courses have not been organized.

J X79H. Honors Tutorial Course.
Conference course of intensive study, planned by Journalism Honors Committee; research and the writing of a substantial paper on a special journalism topic.

J X79P. Photojournalism Research Projects.
Designed to give photojournalism students the opportunity to pursue special studies for which separate courses have not been organized.

Graduate Courses

J X19S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J X29S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J X80. Introduction to Research Methods.
Research methods and ethics, from design to data analysis and report writing.

J X80C. Introduction to Graduate Studies in Journalism and Media.
Discuss journalism and media research, theory, and professional development.

J X80M. Advanced Projects in Photography.
Advanced projects to demonstrate professional competence.

J X80N. Advanced Projects in Journalism.
Designed to prepare students to write the master's report. Students develop professional projects to demonstrate their competence in specialized skills; students present, discuss, and critique their own and other students' work.

J X80V. Visual Journalism.
Basics of aesthetics, visual design, photography, Web publishing, and videography.

J X80W. Writing and Reporting.

J X81. Topics in Research Methods Seminar.
Research techniques for investigating the control, content, audience, and effects of mass media.

J X81.1. Content Analysis.

J X81.2. Experimental Design.

J X81.4. Qualitative Methods.

J X81.6. Qualitative Textual Analysis Methods.
Explore a variety of qualitative methods for analyzing texts for communication research. Apply various methods for qualitative analysis such as: critical discourse analysis, multi-modal discourse analysis, narrative analysis, feminist/queer/racialized analyses, interview analysis and conversational analysis and grounded theory analysis, among others.

J X81F. Fundamentals of Statistics.
An introduction to descriptive and inferential statistical procedures commonly used in communication research. Explore basic underlying assumptions of common statistical procedures, how to test hypotheses using these statistical procedures and what inferences can be drawn from the results, how to critically evaluate statistical analyses of others, and how to conduct descriptive and basic inferential statistics using SPSS for analyses.

J X81M. Computational Media and Data Science.
Examine advanced computational social science research methods through practical, hands-on applied data science projects in the field of computational media using large scale datasets from social media platforms.

J X82. Topics in Seminar in Mass Communication.
Readings, research, analyses in mass communications; oral and written reports in an area approved by the instructor.

J X82.4. Agenda Setting.

J X82.5. Media Sociology.

J X82T. Theory Building.
Examine the process of theory building and explore the construction of social science theories. Analyze models of the theory building process by tracing the development of popular contemporary social science theories. Advance a personal social science theory by using theory-building techniques and following specific theory building steps.

J X83M. Frameworks of Media Innovation.
Survey of innovative practices in media.

J X83P. Advanced Visual Design.
Advanced exploration of principles and processes of visual design, including design principles, visual perception, typography, image making, uses of color, printing techniques, and publication design.

J X84. Mass Communication Theory.
Study of the processes and effects of mass communication.

J X84T. Mass Communication Theory II.
Explore critical and cultural perspectives for communication systems. Examine ways to explain communication content, processes, organizations, interactions and outcomes, and broader social systems.

J X85N. The Business of News.
Examine the challenges and opportunities of the business of news, for-profit and non-profit alike, with context provided by media professionals.

J X86. Topics in Public Relations Seminar.
Readings, research, and analyses in public relations. Examination of the role of public relations in social, economic, and political campaigns.

J X86.1. Research Analyses in Public Relations.

J X86.2. Public Relations and Management.

J X86.3. Specialized Application of Public Relations.

J X86.4. International Public Relations.

J X87M. Media Images: Theory and Methodology.
Explores theoretical and methodological approaches to the study of images in media. Examines the biology and psychology of vision and how images "work" in media. Explores contemporary research on images in news, visual persuasion, political campaigns and criminal investigation. Methods for the study of media images, include content analysis, multi-modal discourse analysis, semiotics and effects experiments.

J X87P. Cultural Survey of Photography.
Examine the development of photography focused on reportage, documentary, and social issue art photography, including historical processes, the evolution of stylistic trends, and critical issues in the field. Explore the Harry Ransom Center and other University of Texas photographic archives.

J X87S. Photographic Storytelling and Social Justice.
Explore the production of images related to social justice issues.

J X89. Topics in Problems in Specialized Fields.
Research project chosen from area of student's major interests; written report required.

J X89.1. Photojournalism.

J X89E. Professional Experience in Journalism Internship.
Supervised internship experience in a professional journalism setting.

J X90. Seminar in Journalism History.
Research projects in the history of communication media; examination of the social, economic, and political relationships of the media within historical environments.

J X90E. Photography in a Cross Cultural Context.
Examine tools and critical ideas that will enhance camera-led reporting and research in cross cultural contexts. Explore the development of a critical toolkit for visual documentation, evidence, and storytelling, as well as multi-modal ethnography. Practice photography and approaches to the ethics of visual representation and the critical frames for reflecting on and writing about one's work.

J X90P. Advanced Documentary Project.
Advanced exploration of documentary storytelling skills, with an emphasis on the skills required for the master's report.

J X92. Topics in Seminar in Media Law.
Research in selected areas of social and legal responsibilities of the media.

J X92.1. Constitutional Issues in Media Law.

J X92.2. Studies in Regulation of the Mass Media.

J X93S. Technology and Culture.
Analyze social and cultural issues related to communications technology systems.

J X95. Topics in Journalism.
Contemporary social, professional, and intellectual concerns with the practice of journalism.

J X95.10. Multimedia Journalism.
Review of online reporting techniques, advanced multimedia skills, and current issues in new media.

J X95.11. Advanced Writing and Public Affairs Reporting.

J X95.12. Advanced Social Science Methods.

J X95.13. Framing Public Issues.

J X95.14. Qualitative Communication Theory.

J X95.16. Proseminar in Journalism.
Introduces doctoral students to major areas of research and selected researchers in journalism. Designed to help students cultivate scholarly skills, ethical norms, awareness of funding possibilities, and teaching skills.

J X95.17. Reporting Asia: A Foreign Correspondent's Framework.
Dynamic ways of looking at, thinking about, and reporting the world. Establishment of a framework for analyzing how the news media cover key events, issues, and processes that shape our lives in a global society.

J X95.2. Advanced Photo Editing and Design.
Advanced training in photo editing and publication design. Taught abroad; location may vary by semester.

J X95.21. Historical Perspectives in Journalism.
Examines the development of the mass media through social, economic, and political factors that have contributed to changes in the press.

J X95.23. Ethics in Journalism.

J X95.24. Media Law.
Examination of legal rights and restrictions for online and print journalism, including Constitutional guarantees, libel, invasion of privacy, and contempt of court.

J X95.25. Business and Financial Reporting.
Conceptualizing, sourcing, and preparing news reports on global financial markets, commercial transactions, and company performance. Subject matter is global; the United States is a subset of material covered. Hands-on course during which students produce multiple news packages for publication.

J X95.26. Covering Politics.
Specialized research, reporting, and writing skills to cover issues, candidates, and campaigns.

J X95.27. Entrepreneurial Journalism.
For-profit and nonprofit journalistic enterprises in the news media ecosystem. Impact of digital technology on the news industry, with emphasis on changes to business and distribution models, and ways people consume and produce news and information. Emphasis on projects and prototypes that include business plans and content planning.

J X95.28. Computer-Assisted Reporting.
Study of computer-assisted journalism, including electronic document retrieval and manipulation, spreadsheet and database management, and Internet skills. Collaborative work on major investigative projects.

J X95.29. Oral History as Journalism.
Modules include concepts and methods of gathering oral history; illustration of the techniques using the Vietnam War as a topic; and generating oral history-based coverage focusing on the Mexican American experience.

J X95.30. Investigative Reporting.
Emphasis on determining what an investigative story is, finding investigative stories, and basic tactics in pursuing those stories.

J X95.31. Creative Nonfiction for Magazines and Books.
Reporting and writing skills for producing narrative nonfiction, including writing book proposals, magazine pitches, and sample chapters.

J X95.32. Audio Storytelling.
Examination and practice of writing news for audio platforms.

J X95.33. Explanatory Journalism: Storytelling in a Digital Age.
Examination of the evolution of long-form explanatory storytelling from print and film to new forms of Web-based and interactive storytelling.

J X95.34. Advanced Visual Journalism: Photo.
Explores intensive photographic reportage and documentation using the camera as a tool of investigation and interaction. Emphasis on creation

of photo stories, photo essays, and feature stories, with editing and page layout.

J X95.35. Producing Social Documentaries for Television News.

Instruction in the production of social documentaries for television, with emphasis on social issues often ignored by television news. Includes production of a twenty-minute long-form story.

J X95.36. Opinion Writing.

Examines opinion writing and commentary in traditional print and evolving online formats.

J X95.38. Reporting Latin America.

Foreign reporting skills and international news production processes, with special emphasis on Latin America.

J X95.39. Covering the Latino Community in the United States.

Development and challenging of views of the contemporary Latino community. Topics include a history of ethnic groups in the United States and their politics, education, organizations, immigration, culture, power, and media. Students will apply what they learn to other underrepresented people in the United States.

J X95.4. Documentary Tradition of Latin America.

Study of still photographic and video documentary work by Latin Americans about Latin America. Production of photographic essays on Latin American culture.

J X95.40. Reporting China: A Foreign Correspondent's Workshop.

Contemporary social, professional, and intellectual concerns with the practice of journalism.

J X95.41. Reporting the World: A Critical Examination of the United States News Media.

Examination of dynamic ways of looking at, thinking about, and reporting the world, both abroad and at home. Establishes a framework for analyzing how the news media cover key events, issues, and processes that shape our lives in a global society.

J X95.42. Human Rights Journalism.

Exploration of the role of journalists in exposing human rights abuses. Modules include case studies from El Salvador, South Africa, Zimbabwe, Rwanda, Bosnia, Sudan, Israel, and Russia, as well as the legal and moral obligations of journalists as witnesses to atrocities and genocide. Examination of the Bush Administration's global War on Terror and the legacy confronting the Obama Presidency.

J X95.43. Minorities and the Media.

Issues concerning minority or nondominant groups in the United States. Survey of minority communication problems, including alienation, fragmentation, and media and Internet access. Criticism and feedback for minority groups based on racial/ethnic background, age, sex, disability, social or economic class, and sexual orientation.

J X95.44. Reporting Texas.

Students work as online reporters, photographers, and editors for the School of Journalism's Reporting Texas Web site.

J X95.46. Gender and the News.

Explores how gender relates to news, both historically and currently, and the role of the news media in reinforcing and/or challenging prevailing stereotypes and attitudes about gender. Focuses on women both as producers of journalism and as subjects of media portrayals.

J X95.47. Living in the Information Age.

Examines communication and information technologies, and how individuals, media organizations and corporations employ the Internet for their benefit. Explores how the communication and information technologies evolve and the cultural, economic, political, and social implications of such technologies for society.

J X95.48. Mobile News Application Design.

Students will work toward building an iPhone application in one semester, with the goal of having an application accepted in the Apple App Store.

J X95.49. Media and Politics.

J X95.50. News for a Mobile Audience.

Examines the mobile world and how journalism and the news audience fit in it.

J X95.51. Quantitative Research Practicum.

Contemporary social, professional, and intellectual concerns with the practice of journalism.

J X95.52. Reporting on the Environment.

J X95.53. Studio Photography.

An investigation of the fundamentals of photography using principles of studio lighting, theory and practice of contemporary color, location lighting, and production of portfolio-quality work, as applicable to advertising, photographic illustration, and photojournalism.

J X95.54. Web Design for Journalists.

J X95.55. Economics of New Media.

Subjects include the structure, behavior, and performance of media operations; audience behaviors and preferences; competition; and social implications.

J X95.56. Covering the Global Economy.

J X95.57. Journalism and Religion.

Explores some of the world's belief systems, including Judaism, Christianity, Islam, Baha'i, Hinduism, Buddhism, and atheism.

J X95.58. Media Management.

Examines how and why media leaders behave and operate by assessing current and past research, theories, and practice to arrive at a better view of what it is like to direct and manage a media organization. Students will investigate issues such as market orientation, diversity, group culture, competition, ownership, structure, ethics, and leadership from a media organizational standpoint.

J X95.59. Long-form Feature Writing.

Explores long-form journalism for print, online and books. Students will study the use of narrative, immersion, profile/biography, plots, back stories, and voice.

J X95.60. Media, Culture, and Civic Engagement.

J X95.61. Sports for Reporting Texas.

Designed to serve reportingtexas.com, the School of Journalism's open-content news Web site. Students will produce original and high-quality journalism for and about Central Texas.

J X95.62. Reporting with Data.

Examine basics of computer-assisted reporting. Explore how to find compelling data sets; clean and analyze the contents; use data visualization and simple statistical models to accurately report based on the data; and present results through stories, charts, and maps.

J X95.63. Oral History in Multimedia Storytelling.

Instruction in the use of oral history to generate long-term archival material and short-term multimedia stories. Covers concepts and methods of gathering oral history; a topic (varies by semester) centering on U.S. Latinos; and ways to build a multimedia representation of the interview.

J X95.64. Online Incivility.

Explores online incivility - defined as nasty remarks intended to hurt that often contain profanity, capital letters to indicate yelling, and put-downs or name-calling - in news story comments and social media. Critically assess the impact of incivility on public discussions online and how that influences journalists and other media practitioners.

J X95.65. Introduction to Coding for Journalists.

Explore basic coding skills and develop best practices used in digital newsrooms to create data-driven online presentations.

J X95.66. Media Innovation and Entrepreneurship.

Learn how the digital revolution has disrupted the media industry, creating opportunities for entrepreneurial, innovative initiatives. Study cases of successful media startups, and develop a startup project, using digital technologies and human-centered design.

J X95.67. Digital Production and Analytics.
Examine the digital publishing process, including planning, production, tracking, and marketing.

J X95.68. Social Capital and Social Networks.
Explore theories, methods, and applications, drawing on literatures from sociology, communication, media studies, and management. Examine the relational and structural embeddedness of actors, communities, and organizations, and focus on how to collect network data and do network analysis.

J X95.69. Advanced Reporting with Data.
Explore advanced data-assisted reporting techniques through use of databases, scripted analysis, and visualizations.

J X95.70. Globalization and Social Media.
Perform a critical analysis of the causes, patterns, and consequences of social media production and usage in a global context. Examine cases from diverse cultures and nations, and engage with major debates on the role of communication and media technologies in network society, globalization, and transnationalism. Investigate how social media and other new technologies have facilitated changes in politics, organizations, and networks, as well as media and culture.

J X95.71. Social Media Research Methods.
Using a selection of empirical case studies from the social media literature, consider the historical formation of social media and the lines that can be drawn to contemporary consequences, particularly the blurring of public and private lives, shifts in power relations, and the spread of rumors and urban myths that is seen today. Explore basic social network analysis and relevant statistical methods.

J X95.72. Social Media Journalism.
Explore the role of journalism in using social media to engage a wide audience, building a marketable brand for journalists and media organizations, and engaging an audience with the news media. Practice using tools and techniques to be an engaging and effective media practitioner.

J X95.73. Photography for Reporting Texas.
Work as photographers for the School of Journalism and Media's Reporting Texas website.

J X95.74. Lifestyle Journalism.
Examine specialized reporting and writing in lifestyle coverage, including food, fashion, entertainment, and travel.

J X95.75. Domestic Issues and Global Perspective.
Examine domestic issues, such as consumerism, food and health, environmentalism, and energy consumption, from global and intercultural perspectives.

J X95.76. Social Media and Society.

J X95.9. International Reporting.
Designed to provide students with skills in foreign reporting and an understanding of international news production processes, with special emphasis on Latin America.

J X98. Thesis.

J X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

J X98T. Supervised Teaching in Journalism.
Teaching under the close supervision of the course instructor; weekly group meetings with the instructor, individual consultations, and reports required throughout the teaching period.

J X99W. Dissertation.

Professional Courses

J X19S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J X29S. Topics in Journalism.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Journalism. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J S - Jewish Studies

Jewish Studies: J S

Lower-Division Courses

J S X01. Introduction to Jewish Studies.

J S X04M. Jewish Civilization: Beginnings to 1492.
Introduction to the history, culture, and religion of the Jewish people from around 1000 BC to the end of the medieval period. Subjects may include ancient Israel, late Second Temple sectarianism, the rise of Christianity, rabbinic Judaism, medieval Jewish philosophy, Jewish mysticism, and Hebrew poetry.

J S X04N. Jewish Civilization: 1492 to the Present.
Subjects may include trends toward secularization, the emancipation of European Jewry, the emergence of American Jewry, the Holocaust, the establishment of the State of Israel, and the Arab-Israeli conflict.

J S X05D. Introduction to Jewish Latin America.
Historical and cultural analysis of how Jews constructed lives and communities in predominantly Hispanic, Catholic countries of Latin America.

J S X06E. The Rise of Christianity.
Introduction to the origins and development of Christianity.

J S X07. Introduction to Holocaust and Genocide Studies.
Examine interdisciplinary perspectives (including historical, political, socio-psychological, and cultural methods and insights) on genocide as a global phenomenon.

J S X10R. Introduction to Middle East Religions.
Introduction to the religious landscape of the Middle East including the various expressions of Eastern Christianity, Islam, and Judaism as well as Zoroastrianism.

J S X11. Topics in Jewish Studies.

J S X11.2. Judaism, Christianity, and Islam: An Introduction.
Examines the intertwined historical developments of the religions of Judaism, Christianity, and Islam, and explores the principal beliefs and practices of Jews, Christians, and Muslims.

J S X11.4. Introduction to the Old Testament.
Introduction to the many interpretations of the Hebrew Bible (the Old Testament) and its meaning in the context of its historical and cultural setting in the ancient Near East.

J S X11.7. The History of Israel.
An introduction to the history of Israel, from the emergence of the modern Zionist movement beginning in 1881 to the present.

J S X11.9. American Jews: The Yiddish Experience.
Focuses on over a century of Yiddish-based contributions to American literature, music, and film, including works by Isaac Bashevis Singer, Michael Chabon, Woody Allen, and the Marx Brothers.

J S X11C. The Roots of Religious Toleration.
Examines how freedom of conscience and religion crystallized in western and central Europe, both as a pragmatic practice and as a matter of principle.

J S X11E. Comparative Religious Ethics.

J S X14C. Jewish American Literature and Culture.
Examine Jewish American literature in its cultural contexts with an emphasis on skills and methods. Explore texts, drawn from a variety of genres and periods, that indicate the range of Jewish American experiences and how those experiences are influenced by issues such as citizenship, class, ethnicity, gender, and sexuality.

J S X17. American Jewish History.
Examine the history of Jews in the United States from the seventeenth century to the present. Explore the formation of a distinct American Judaism and the involvement of Jews in American cultural and political affairs.

J S X19S. Topics in Jewish Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Jewish Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

J S X29S. Topics in Jewish Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Jewish Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

J S X62. Independent Research in Jewish Studies.
Tutorially directed research in Jewish studies.

J S X63. Topics in the Humanities and Arts.

J S X63.10. The Sacred and the Secular in Contemporary Jewish Literature.

J S X63.17. Israel Through Its Literature.

J S X63.18. Jerusalem in Israeli Literature.

J S X63.19. Postmodernist Israeli Literature.
Study of the first decades of Israeli literature. Themes include the establishment of a new state in the aftermath of the Holocaust, conflict between Israel and Arab nations, and conflict between Israelis and Palestinians.

J S X63.21. Introduction to the Music of the Middle East.

J S X63.22. Comparative Jewish Literature: Israel, France, and the United States.

J S X63.23. Israel and Palestine: A Cultural Perspective.

J S X63.24. Divine Persuasion in Biblical Times and Place.
Explore the use of persuasive strategies in an ancient and non-Western culture, that of the Hebrew Bible. Using rhetorical techniques, analyze three types of texts: narratives of interactions between ordinary people and God; interactions between people, God, and authorized prophets; and prayers in prose and poetry.

J S X63.25. Jewish Folklore.

J S X63.26. Debating Genesis.

J S X63.27. Jewish Identities In the Americas.
Examine the work of Jewish creative intellectuals from the United States, Latin America, and Canada from a comparative perspective.

J S X63.28. Biblical Prophecy.
An introduction to the diversity of prophetic literature in the Old Testament, its historical development, social context, and Near Eastern parallels.

J S X63.29. The Book of Job.

J S X63.30. Law and Justice in the Bible.
Examine the legal traditions of the Torah (Pentateuch) and what they reveal about the practice of law and justice in ancient Israel and the wider biblical world.

J S X63.31. Jewish Stereotypes in American Literature and Culture.
Examine stereotypes that have come to define Jewishness in American culture by focusing both on the antisemitic tropes perpetuated by non-Jewish representations of 'the Jew' in literary classics and on the archetypes employed as coping mechanisms in cultural representations created by Jews themselves. Analyze how stereotypes become enmeshed in cultural consciousness and investigate ways in which representations of ethnic, religious, and racial minorities are governed by these kinds of one-dimensional archetypes.

J S X63.32. Childrearing in Israel.
Examine the coalescence of educational theories and national aspirations in the process of shaping child-rearing practices within the Jewish population of Palestine under the Ottoman Empire and the British Mandate and into the first two decades of the State of Israel.

J S X63.33. Jews of the United States, Canada, and Latin America.
Explore the cultural history of Jews in the United States, Latin America, and Canada through a representative sample of short literary texts, film clips, and musical recordings.

J S X63.34. Space, Time, and Religion.
Examine religions through the concepts of space and time.

J S X63.35. Memory and Place After the Holocaust.
Examine the literature of Eastern European Jewish Holocaust survivors and their artistic successors. Engage novels, short stories, memoirs, essays, and even song lyrics with questions of memory and of place.

J S X63.36. Sports and Politics in Germany.
Explore how fascism, communism, liberal democracy, and the current nationalistic backlash against immigration have all used the popularity of sports to achieve their strategic goals, from the 1936 Nazi Olympics to Germany's 2014 World Cup victory and beyond.

J S X63.37. Spinoza's Philosophical System.
Examine the significance of Benedict de Spinoza's philosophical system.

J S X63.7. Love and the State in Contemporary Israeli Literature.

J S X63.8. Mizrahi Writing in Israel.

J S X63D. Abraham and Abrahamic Religions.
Examines the figure of Abraham as portrayed in the Bible and the reception of that portrayal in Judaism, Christianity, and Islam.

J S X63E. Jewish Voices from Latin America.
Overview of popular Jewish writers from Brazil and Spanish America, with special emphasis on those who portray in their work the situation of the Jewish communities of their respective cities and countries. Conducted in Spanish.

J S X63F. Women and the Holocaust.
Introduction to both the history of Jewish and German women during World War II and the Holocaust, and to women's narratives and self-representations of this period. Historical sources, memoirs, films, and interviews will be used as source material.

J S X64. Topics in History.

J S X64.1. Anti-Semitism in History and Literature.

J S X64.10. The Church and the Jews.
Examination of the complex relationship between the Western Church and Jews over two millenia.

J S X64.11. World War II in Eastern Europe.
Examines the war in Eastern Europe with a particular emphasis on occupation, collaboration, and resistance; the Holocaust; and the connection between ethnic cleansing, population transfer, and the establishment of communism in postwar Eastern Europe.

J S X64.13. Origins of Monotheism.

J S X64.14. Austin Jews in the Civil Rights Era.

J S X64.15. The Five Books of Moses.
Study the socio-historical circumstances that gave shape to the first five books of the Bible: Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. Examine how these five books achieved the status of sacred literature.

J S X64.16. Jews: Nation or People.

J S X64.17. Restitution and Restorative Justice after the Holocaust.
Examine attempts to find a measure of justice after the Holocaust. Explore themes of human rights and international law.

J S X64.18. History of Jewish Thought.
Examine major thinkers and movements in both Jewish philosophy and Jewish mysticism since the Middle Ages, with a focus on the importance of modern Jewish thought in the twentieth and twenty-first centuries.
J S X64.24. Arab Citizens of Israel.
Examine the historical, social, and political processes of change experienced by the Palestinian-Arab community in Israel, including the fundamental aspects pertaining to the founding of Israel as "a Jewish and democratic state" and the relations between the Arab minority and the Jewish majority.
J S X64.25. The Arab-Israeli Conflict.
Examine the elements of the Arab-Israeli conflict, including the main figures involved, events, and turning-points in its history.
J S X64.26. The Levant: From Colonialism to Coexistence.
Examine the history of the Levant, a region that includes Syria, Israel, Palestine, and Jordan.
J S X64.27. War and Genocide: The Holocaust.
Examine the Holocaust as part of Nazi Germany's quest to build a new racial order.
J S X64.28. Legacies of World War II in Eastern Europe.
Examine the complex and dynamic legacies of World War II and questions of memory, identity, and politics from 1945 to the present.
J S X64.29. History of Sephardi Jews.
Examine the early-modern networks established by the Sephardi Jews (Sephardim) across the Mediterranean and Atlantic, the rich Ladino Judeo-Spanish culture that thrived in the Ottoman Empire, and Sephardi encounters with the modern world.
J S X64.3. The Bible and History.
The critical uses of biblical and extrabiblical data in the reconstruction of the history of the biblical period.
J S X64.30. Religions in the Ottoman Empire.
Examine Jewish, Christian, and Muslim communities in the Ottoman Empire (fourteenth to twentieth centuries), with a focus on dynamics both within and between the communities.
J S X64.4. The Dead Sea Scrolls.
J S X64.5. The Spanish Inquisition.
J S X64.7. Jews of Eastern Europe.
Explores the history and culture of Jews in Eastern Europe.
J S X64.8. Southeast Europe in the Twentieth Century.
Explores the key events and developments of Southeastern Europe, the region commonly referred to as the Balkans, in the twentieth century.
J S X64.9. Spinoza and Modernity.
Introduction to the core of Spinoza's writings and the diverse reactions they have elicited. Examines Spinoza's refusal of mind-body dualism, as well as a transcendent god or ideal as a way of understanding Spinoza's concepts and ideas.
J S X65. Topics in the Social Sciences.
J S X65.1. America and the Holocaust.
J S X65.10. Israel: Society and Politics.
Analysis of Israeli politics and society in a comparative perspective with a major focus on the social and political cleavages in Israel.
J S X65.11. Representation of Jews in the American Public Sphere.
Examines how Jews have been represented and constituted in American public culture as a race, religion, and/or nation through distinct institutions and display practices.
J S X65.12. American Jewish Material Culture.
Examines the interplay between material culture and Jewish identity and thought in contemporary America.
J S X65.13. Anti-Semitism.
Surveys trends in Judeophobia/anti-Semitism over 2,500 years in both Christian and non-Christian societies. Designed to use anti-Semitism as way to explore more general ideas in social theory such as boundary making; models of racial, ethnic, and cultural conflict; and the role of intellectual and scientific elites.
J S X65.14. Holocaust Aftereffects.
Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.
J S X65.16. Jewish Cuba.
J S X65.17. Spatializing Culture.
J S X65.18. Contemporary Jerusalem.
Explore what life is like in today's contested, rapidly growing, and increasingly diverse Jerusalem.
J S X65.19. Archaeology of Jesus's World.
Explore archaeological methods in examining texts and artifacts from first century CE.
J S X65.4. Jewish Immigrant Culture in America.
J S X65C. Multicultural Israel.
Examines the complex social fabric that comprises contemporary Israeli society, and that shapes Israeli identity, practice and politics.
J S X65D. Cultural Geographies of Israel.
Examines critical spatial theory, landscape phenomenology, histories of Zionist architecture and urban planning as applied to Israel from the Yishuv period to the present.
J S X75. Senior Seminar.
Intensive study and research on selected topics in Jewish studies, with on-going, in-class presentations for critique by fellow students and the instructor.
J S X79H. Honors Tutorial Course.
Supervised individual reading and research for one semester, followed by writing a substantial honors thesis during the second semester.

Graduate Courses
J S X83. Topics in Jewish Studies.

Professional Courses

JPN - Japanese

Japanese: JPN

Lower-Division Courses
JPN X01D. Japanese I.
Designed for students with no previous coursework in Japanese. Emphasis on basic skills in listening and speaking Japanese and in reading and writing hiragana, katakana, and kanji. Introduction to Japanese culture. Includes computer-assisted instruction.
JPN X06. First-Year Japanese I.
JPN X07. First-Year Japanese II.
JPN X10D. Japanese II.
Expand on skills in listening and speaking Japanese and in reading and writing hiragana, katakana, and kanji.
JPN X11D. Intermediate Japanese.
Intermediate level of competency in Japanese to enable students to function in a variety of real-life contexts.
JPN X12K. Second-Year Japanese I.
JPN X12L. Second-Year Japanese II.
JPN X17C. Japanese Grammar, Composition, and Conversation.
Designed to prepare students for specialized advanced Japanese language courses.
JPN X19S. Topics in Japanese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
JPN X29S. Topics in Japanese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

JPN X19S. Topics in Japanese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

JPN X20K. Readings in Modern Japanese I.
Exploration of different types of texts written in a variety of grammar structures with rich vocabulary. Examination of similarities and differences between various aspects of Japanese culture and the student's own culture.

JPN X20L. Readings in Modern Japanese II.
Continued development of Japanese reading and comprehension skills using authentic print and web-based resources.

JPN X22. Classical Japanese.
An introduction to the principal elements of premodern literary or classical" Japanese (bungo), the standard form of the written language. A survey of the principal linguistic features, close reading, and translation of a variety of prose and poetry texts.

JPN X25K. Advanced Conversation I.
Participate in conversations on more complex situations and subjects, including formal and informal contexts.

JPN X25L. Advanced Conversation II.
Continued development of conversation skills taught in Japanese 325K.

JPN X26. Business Japanese.
Development of basic business manners and business-related vocabulary and conversation skills appropriate in an office environment.

JPN X27. Advanced Reading and Writing of Kanji Characters.
Building more advanced vocabulary and kanji knowledge through systematic study (recognition, reading, and writing) of kanji.

JPN X29S. Topics in Japanese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

JPN X30. Topics in Advanced Japanese.
Fourth-year Japanese readings on special topics.

JPN X30.2. Advanced Readings in Newspaper Articles.
For students with an advanced level of proficiency in Japanese. Conducted in Japanese. Readings from newspaper articles and other authentic materials, including short stories and websites, selected to expand linguistic and social knowledge, vocabulary, and knowledge of kanji.

JPN X30.3. Practical Readings in Advanced Japanese.
For students with an advanced level of proficiency in Japanese. Conducted in Japanese. Readings selected to promote a wide variety of reading skills such as scanning, skimming, prediction, reading for details, and reading for meaning. Readings include essays, comic strips, short stories, websites, magazine and newspaper articles, and other authentic materials.

JPN X30.4. Reading Japanese Literature.

JPN X30.5. Murakami Haruki and the Art of Translation.
Explore the fiction of the novelist Murakami Haruki in relation to the act of translation. Engage with Murakami's Japanese-language literary style and experiment with ways of rendering it into literary English. Recommended for those with an advanced level of proficiency in Japanese.

JPN X30D. Japanese across Disciplines.
Reading and discussion of Japanese language materials related to the subject matter of another designated course in Asian studies. Meetings with the instructor will be devoted to the discussion of linguistic problems, literary features, and crucial passages.

JPN X60. Conference Course in Japanese Language and Literature.
Supervised individual study of selected problems in Japanese language or literature.

Graduate Courses

JPN X19S. Topics in Japanese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

JPN X29S. Topics in Japanese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

JPN X81. Conference Course in Japanese Language and Culture.
Supervised individual study in Japanese language or culture.

JPN X84. Topics in Japanese Language and Culture.
Study of various aspects and periods of Japanese language and culture.

JPN X84.3. Modern Japanese Literature.

JPN X84.4. Murakami Haruki and the Art of Translation.
Explore the fiction of the novelist Murakami Haruki in relation to the act of translation. Engage with Murakami's Japanese-language literary style and experiment with ways of rendering it into literary English.

Professional Courses

KIN - Kinesiology

Kinesiology: KIN

Lower-Division Courses

KIN X06C. Topics in Conditioning.

KIN X10. Physiological Basis of Conditioning.
Explore the current state of health and fitness, health-related components of fitness, and ways that the human body responds to

exercise and physical activity. Discuss the importance of exercise and physical activity for improving overall wellness, including physical and mental health, prevention, and treatment of chronic disease, and how to apply the principles of conditioning.

KIN X11. Water Safety Instruction and Lifeguard Training.
Principles and practical application of water safety instruction and lifeguard training, personal water safety skills sets, professional rescues, first aid, and CPR/AED programs. Successful completion of course sessions, activities, lectures, skill development and evaluation requirements will qualify the student to test for certifications from nationally recognized safety agencies.

KIN X11K. Sport Psychology.
Through the materials presented in this course, become familiar with the fundamental principles of sport and social psychology and their impact on sports performance and athlete well-being. Develop life-skills, such as, self-regulation, productive responses to adversity, stress-management, the setting of goals and achieving them, interpersonal communication, and leadership.

KIN X12. Topics in Kinesiology: Issues.
Analysis and discussion of current issues within the discipline of kinesiology.

KIN X12.2. Care and Prevention of Athletic Injuries.
Principles of athletic training, including mechanisms, signs and symptoms, treatments, and basic rehabilitation of athletic injuries and illnesses.

KIN X12.3. Fundamentals of Coaching.
An introduction to the principles and practices of coaching as they relate to the integration of sports science, practice structure and design, and the development of a coaching philosophy. Involves group work and field experience with youth athletic organizations.

KIN X12.4. Philosophy and Leadership in Sport Physical Activity.

KIN X12.5. Sport Industry in America.
Introduction to the history, growth, and diversity of the sport industry in school settings and the world of business.

KIN X12G. Golf Instruction.
Designed to train students to teach the game of golf.

KIN X12M. Management of Physical Activity and Sport Programs.
Designed for physical culture and sports, applied movement science, health education, and kinesiology majors. Introduction to the purpose and function of sport and sport management in society, including management, marketing, events, and other components of the field.

KIN X13. Topics in Safety Information and Procedures.
Factors affecting human safety; techniques and procedures to promote and ensure safe living.

KIN X13.1. First Aid.

KIN X13.2. Water Safety Instruction.
Trains instructor candidates to teach courses in swimming and water safety by developing their understanding of how to use the course materials, conduct training sessions and evaluate participants' progress. Students will be introduced to several swimming strokes, springboard diving, cardiovascular conditioning, exercise physiology, nutrition, personal safety. Elementary rescue skills and basic snorkeling techniques. Culminates in American Red Cross certification.

KIN X13.3. Lifeguarding.

KIN X13.4. Lifeguarding Instruction.

KIN X14. Children's Movement.
Covers skills to support positive, effective physical education and to implement well-planned and stimulating physical activity for children. Focus on integrating academic content with physically active classrooms. Subjects include principles of movement and motor development in children, curriculum, legislation and policy, physiological principles, learning principles, coordinated school health (CSH), and comprehensive school physical activity programming (CSPAP).

KIN X15. Motor Learning.
Psychological factors affecting performance and acquisition of motor skills.

KIN X16. Structure and Organization of Sport Programs.
Introduction to sport management and effective organizational behavior for sport programs. Analysis of the dynamic management process necessary for the improvement of organizational productivity.

KIN X17. Advanced Scuba Diving Leadership.
Designed to prepare experienced scuba divers to instruct, organize, and conduct safe, appropriate-level dives for certified divers. Also designed to prepare students to apply for certification as a National Association of Underwater Instructors (NAUI) Assistant Instructor or Divemaster.

KIN X19. Topics in Movement Competence.
Designed for applied movement science, health education, and kinesiology majors. Introduces a variety of movement and dance activities that can be used to teach rhythm to youth, with an emphasis on grades K-6.

KIN X19.1. Archery.

KIN X19.10. Conditioning.
Basic principles involved in designing a sound conditioning program emphasizing resistance training techniques.

KIN X19.11. Rhythmic Activities and Dance.
Designed for applied movement science majors, and kinesiology and health education majors. Introduces a variety of movement and dance activities that can be used to teach rhythm to youth, with an emphasis on grades K-6.

KIN X19.12. Gymnastics.

KIN X19.13. Manipulative Activities.

KIN X19.14. Tennis.
Introduction to methods, progressions, strategies, and teaching cues appropriate for playing, teaching, and coaching basic tennis.

KIN X19.15. Volleyball.
Introduction to methods, progressions, and teaching cues appropriate for playing, teaching, and coaching basic volleyball.

KIN X19.16. Social Dance: Leads.
Introduction to popular social dances, including swing, waltz, bachata, nightclub two-step, cross-step waltz, salsa, west coast swing, and tango. Emphasis on connecting with a dance partner and the art of leading and following. Must register for the role you want to learn: lead or follow.

KIN X19.17. Basketball.
Designed for applied movement science majors, and kinesiology and health education majors. Introduces methods, progressions, strategies and teaching cues appropriate for playing, teaching, and coaching basic basketball.

KIN X19.18. Adventure Activities.
Acquistion and knowledge of basic skills needed to participate in outdoor/adventure activities. Examines methods, progressions, drills, and performance cues appropriate for participating in and leading outdoor/adventure activities. Includes off-campus activities. Students will need to demonstrate basic swimming skills during the first week of class.

KIN X19.19. Kinesthetic Awareness and Core Body Development.
Introduction to basic movement skills from simple to more complex, and how they relate to more advanced sport skills through developmental gymnastics, yoga, Pilates, and martial arts.

KIN X19.2. Ballet.

KIN X19.20. Social Dance: Follows.
Introduction to popular social dances, including swing, waltz, bachata, nightclub two-step, cross-step waltz, salsa, west coast swing, and tango. Emphasis on connecting with a dance partner and the art of leading and following. Must register for the role you want to learn: lead or follow.

KIN X19.3. Bowling.
KIN X19.4. Diving.
KIN X19.5. Fencing.
KIN X19.6. Golf.
KIN X19.7. Scuba Diving.
KIN X19.8. Swimming.
Designed for kinesiology and health education majors. Development of swimming techniques including instruction in seven swimming strokes, springboard diving, cardiovascular conditioning, exercise physiology concepts, nutrition, personal safety, elementary rescue skills, CPR/AED and basic snorkeling techniques. Provides preparation for American Red Cross certification.

KIN X19C. Aiding for Social Dance.
Supervised aiding in social dance leads/follows courses.

KIN X19D. Movement Analysis: Dual Activities.
Designed for applied movement science, health education, and kinesiology majors. Application of biomechanical and motor learning principles to selected movement activities, with particular emphasis on dual sports. Includes physical activity.

KIN X19G. Advanced Golf.
Designed for the advanced golfer. Includes technical swing analysis and instruction, course management and course play, and tournament play.

KIN X19K. Topics in Athletics.
Knowledge and skills required for officials, coaches, and athletic trainers of interschool sports.

KIN X19K.1. Coaching.
KIN X19K.2. Officiating.
KIN X19K.3. Introduction to Athletic Training.
Designed for athletic training majors. An introduction to athletic training principles and theories, including the prevention, recognition, and management of athletic injuries and illnesses. Includes basic skill development in areas such as first aid, emergency care, and supportive taping, wrapping, and bracing. Requires completion of a one-day CPR and AED (BLS) course outside of class time.

KIN X19L. Teaching Social Dance.
Examine social dance and social dance pedagogy. Explore new dances, higher-level partnering, and skills for teaching social dance in one-on-one and group contexts.

KIN X19M. Advanced Running.
Explores various advanced aspects of running training regimens, with emphasis on interval training, fartlek, speed play, long slow distance used in competitive running. Includes functional assistive training movements: flexibility and stretching, plyometrics and bounding.

KIN X19N. Advanced Volleyball.
For those with high levels of skills and knowledge of multiple offenses and defenses. Explores various aspects of competitive volleyball with emphasis on strategic utilization of defenses used in interscholastic and intercollegiate competitive teams.

KIN X19P. Advanced Swimming.
Designed for the advanced swimmer. Includes technical stroke analysis on four power strokes and exposure training/conditioning programs used by interscholastic and intercollegiate competitive programs. Expanded emphasis is on body form, stroke efficiency, and conditioning in all strokes.

KIN X19R. Topics in Kinesiology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Kinesiology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KIN X19S. Movement Analysis: Individual Activities.
Application of movement skill analysis and biomechanical principles, physical laws of movement, fitness training principles and programs, exercise physiology, performance techniques, and skill progressions in individual activities and sport.

KIN X19T. Movement Analysis: Team Activities.
Application of scientific and psychosocial aspects of team sports, basic mechanical principles, and basic progressions relevant to performing and teaching selected team sport skills. Students also learn basic strategies and tasks related to coaching and organizing a team.

KIN X96T. Directed Research.
Investigation of assigned problems under direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; production of an acceptably written research report.

KIN X97P. Graduate Internship.
Supervised practice in a professional organization, business, or institution.

Upper-Division Courses

KIN X20. Applied Biomechanics of Human Movement.
Designed to provide students with an understanding of applied scientific analysis of movement. Examines the physiological, structural, and mechanical bases for human movement, with examples drawn from sport and rehabilitation. Lectures concentrate on a scientific approach to mechanisms underlying human movement and to strategies and practices of clinical and sport applications. Laboratory sessions focus on both theoretical and applied aspects of selected mechanical concepts.

KIN X21. Theory of Human Performance.
Designed for applied movement science, health education, and kinesiology majors. Examines foundational knowledge of theories of human performance and development and the concomitant changes that occur during an individuals lifespan. Explores interactive theories of the associated physiological, biomechanical, and cognitive disciplines that explain the control systems of the human body while in motion and subsequent development.

KIN X21M. Motor Development and Performance.
A review of movement skill progressions with emphasis on the processes that underlie changes in movement competence. Typical growth and maturation from birth to adulthood serves as the metric against which to identify atypical development. The principles underlying motor skill changes are applied to teaching, coaching, and clinical applications.

KIN X22. Diagnosis and Evaluation of Fitness.
Covers the science behind assessing physical fitness, and the role of physical activity and exercise in prevention and rehabilitation of cardio-respiratory and metabolic diseases.

KIN X24K. Applied Human Anatomy.
Combines the study of systematic and regional human anatomy. Includes applications of the skeletal system, and attachments and actions of muscles, with an emphasis on the mechanics of support and motion and their clinical applications.

KIN X25K. Physiology of Exercise.
Application of principles of physiology to muscular activities and an examination of physiological responses and adaptations to both acute and chronic exercise.

KIN X26. Advanced Weight Training.
Explores various advanced techniques of weight training, with emphasis on the lifts used in the competitive strength sports of weightlifting and powerlifting. Includes plyometrics and functional training movements for athletic enhancement.

KIN X26K. Biomechanical Analysis of Movement.
Study of the principles of equilibrium, force, and motion as applied to humans. Includes applications to human movement and to biological tissues and structures, with emphasis on practical applications (e.g., human performance, causes/prevention of injury etc.).

KIN X27D. Fieldwork: Aiding.
Supervised fieldwork in appropriate activity courses.

KIN X27E. Fieldwork: Applied Learning and Development Majors.
Supervised fieldwork or clinical work in appropriate activities.
KIN X27F. Topics in Internship.
Supervised fieldwork or clinical work in appropriate activities.
KIN X27F.1. Internship in Health Fitness.
KIN X27F.2. Internship in Medical Fitness.
KIN X27J. Internship/Fieldwork: Off Campus.
Supervised fieldwork or clinical work in appropriate activities off campus.
KIN X27K. Fieldwork: On Campus.
Supervised fieldwork or clinical work in appropriate activities on campus.
KIN X27M. Exploring Teaching and Physical Activity Leadership.
Supervised fieldwork or clinical work in appropriate activities.
KIN X27R. Fieldwork: Lab Research.
Supervised fieldwork or clinical work in appropriate activities.
KIN X27T. Topics in Internship.
Designed for health education and kinesiology majors or minors. Supervised fieldwork or clinical work in appropriate activities.
KIN X27T.1. Clinical Exercise Testing.
KIN X27T.2. Personal Training.
KIN X27T.3. Practicum in Disabilities.
Supervised academic service learning or clinical hours in instructor approved environments.
KIN X27T.4. Internship in Strength and Condition Coaching.
KIN X28. Internship/Fieldwork in Sport Management.
KIN X28C. Internship in Sport Management.
Supervised fieldwork or clinical work in appropriate activities.
KIN X29S. Topics in Kinesiology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Kinesiology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
KIN X30E. Sport Nutrition.
Explore the nutritional needs of people whose physical activity ranges from recreational to elite athletes. Develop practical dietary strategies based upon understanding how macronutrients, vitamins, minerals, water, and dietary supplements are digested and absorbed and how they effect metabolism.
KIN X31. Physical Aging in America.
KIN X32. Techniques of Fitness Leadership.
Practical application of theoretical content from exercise physiology, anatomy, and biomechanics. Emphasis on program design and development for healthy adults and special populations.
KIN X34. Children's Exercise and Physical Activity.
Focuses on the capacity for physical performance by children and adolescents from both physiological and psychosocial perspectives. Addresses children's readiness for physical training and competitive activities. Considers the active and inactive child with, and without, disabilities and secondary disabling conditions. Entails development of programs designed to keep children appropriately active for a lifetime of positive health outcomes.
KIN X35C. Motor Learning.
Psychological, behavioral, physiological, and environmental factors involved in performance and learning of motor skills; covers both theoretical and experimental evidence for the effects of these factors, with applications in physical activity, sport, and rehabilitation. Weekly laboratory sessions to collect and analyze data to assess motor performance and learning.
KIN X36. Neuromuscular Control.
Study of the brain and motor and sensory pathways involved in the control of movement. Covers nerve, muscle, and sensory cell function along with spinal cord reflexes. Application to research and clinical populations is emphasized.
KIN X38. Motor Development and Assessment.
Training in screening, diagnostic, and programmatic motor assessment instruments. Designed to give students practical experience in assessing physical and motoric development in children with and without disabilities.
KIN X40. Modern Olympic Movement in World Affairs.
Examination of the place of the modern Olympic movement in world affairs. The cultural, political, and economic dynamics of this relationship will receive special emphasis.
KIN X40C. Practicum in Athletic Training: Level 1A.
Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, and immediate care of injuries and illnesses suffered by athletic and physically active populations. Students use cognitive, psychomotor, and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor.
KIN X40D. Practicum in Athletic Training: Level 1B.
Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, and treatment of injuries and illnesses suffered by athletic and physically active populations. Emphasizes the application of therapeutic modalities and soft-tissue therapy techniques. Students use cognitive psychomotor and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of a clinical preceptor.
KIN X40E. Practicum in Athletic Training: Level 2A.
Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, and diagnosis of injuries and illnesses suffered by athletic and physically active populations. Emphasizes clinical evaluation and assessment techniques. Students use cognitive, psychomotor, and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor.
KIN X40F. Practicum in Athletic Training: Level 2B.
Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, diagnosis, rehabilitation, and reconditioning of injuries and illnesses suffered by athletic and physically active populations. Emphasizes therapeutic exercise and rehabilitation procedures. Students use cognitive, psychomotor, and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of a clinical preceptor.
KIN X40G. Practicum in Athletic Training: Level 3A.
Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, diagnosis, rehabilitation, and reconditioning of injuries and illnesses suffered by athletic and physically active populations. Emphasizes general medical conditions. Students use cognitive psychomotor and affective skills and knowledge to complete a prescribed set of educational competencies and clinical proficiencies under the direction of an approved clinical instructor.
KIN X40J. Practicum in Athletic Training: Level 3B.
Supervised clinical experiences in the application of concepts, theories, and techniques associated with the prevention, recognition, immediate care, treatment, evaluation, diagnosis, rehabilitation, and reconditioning of injuries and illnesses suffered by athletic and physically active populations. Emphasizes the administrative and professional aspects of managing these conditions. Students use cognitive psychomotor and affective skills and knowledge to complete a prescribed set of education

competencies and clinical proficiencies under the direction of a clinical preceptor.

KIN X40M. Advanced Manual Therapy.

Designed for athletic training majors. Examines the theory and application of manual therapy techniques in patient care. The athletics and physically active populations will be targeted and an aggressive treatment approach for the restoration of function as quickly and as safely as possible will be emphasized.

KIN X40S. Senior Seminar in Athletic Training.

Designed for athletic training majors. Explores the study and practice of reviewing and applying research findings and evidence based practice concepts to ask and answer clinically relevant questions affecting clinical practice for athletic trainers.

KIN X41. Therapeutic Modalities in Athletic Training.

Designed for athletic training majors. The study and practice of using therapeutic modalities, including soft tissue and manual therapy techniques, to treat athletic injuries. Covers physiological effects, indications, contraindications, protocols, injury pathology, and tissue healing.

KIN X42. Clinical Evaluation of Athletic Injuries in the Lower Body.

Designed for athletic training majors. The study and practice of techniques involved in the evaluation of athletic injuries affecting the lower body.

KIN X43. Clinical Evaluation of Athletic Injuries in the Upper Body.

Designed for athletic training majors. The study and practice of techniques involved in the evaluation of athletic injuries affecting the upper body.

KIN X44. Therapeutic Exercise and Rehabilitation Techniques: Lower Body.

Designed for athletic training majors. The study and practice of therapeutic exercise techniques and rehabilitation protocols in treating athletic injuries and illnesses.

KIN X44U. Therapeutic Exercise and Rehabilitation: Upper Body.

Designed for athletic training majors. Explores the theory and application of therapeutic exercise techniques and rehabilitation protocols. The athletics and physically active populations will be targeted and an aggressive treatment approach for the restoration of function as quickly and as safely as possible will be emphasized. The classroom and laboratory experiences will provide the student with opportunities to apply these techniques under the direct guidance of knowledgeable clinicians specializing in athletic training.

KIN X45. General Medical Conditions in Athletic Training.

Designed for athletic training majors. Presentations, including some by medical and allied medical specialists, covering topics in athletic training and sports medicine.

KIN X46. Athletic Training Program Administration.

Designed for athletic training majors. The study of organizational and administrative principles involved with athletic training programs. Includes legal issues, budgetary concerns, and policies and procedures. Also includes resume development and career planning.

KIN X47. Historical and Ethical Issues in Physical Culture and Sports.

Designed for kinesiology and health education majors. Explores the history of sport industry and sport science and how laboratory revelations lead to new fitness regimens. Covers ethical issues in the field of physical culture and sport, such as the use of ergogenic drugs, the social consequences of high performance sport, and professional ethics in the fields of kinesiology and health education.

KIN X48. Psychological Aspects of Exercise.

Designed for applied movement science, health education, and kinesiology majors. Examines both the psychological benefits that accrue from exercise, such as reduced depression and stress, as well as the psychological predictors of exercise adherence.

KIN X49. History of Sport and Physical Activity.

Significant developments in sport and physical activity since prehistoric time; emphasis on events influencing contemporary American programs and the International Olympic Games.

KIN X50. Sociological Aspects of Sport and Physical Activity.

KIN X51. Philosophy of Sport and Physical Activity.

Designed for kinesiology and health education majors. Introduction to the ideas and methodologies of the philosophic exploration of play, sport, athletics, exercise, and the body. Emphasis on the study of sport and ethics.

KIN X52K. Topics in Human Movement Studies.

Analysis and synthesis of the literature and discussion of current and specific issues in kinesiology.

KIN X52K.18. Physiology of Brain Injury.

Examines the physiology of healthy brain and neural function and the pathophysiology associated with brain injury and the subsequent detection, diagnosis, treatment, short and long term consequences, and strategies to protect from and prevent brain injury.

KIN X52K.28. Musculoskeletal Functional Anatomy.

Explore a hands-on application of human anatomy as it applies to injury and strength/conditioning.

KIN X52K.29. Research Methods in Exercise Science.

Engage in every part of the research process, from defining a specific research question, designing the experimental protocol and performing data collection to presenting results and conclusions in a poster presentation.

KIN X52K.30. Sport Pedagogy.

KIN X52K.31. Sport, Society, and the International Olympic Movement.

KIN X52K.33. Nutrition: Exercise, Health, and Sport.

Explore general nutrition concepts including basic definitions and how nutrition affects health. Examine the current nutrition recommendations at various ages.

KIN X52K.34. Exercise Physiology Cardiovascular Disease.

Explore cardiovascular diseases and the effect of exercise in patient populations. Examine current research in the field by reading peer-reviewed, published articles.

KIN X52K.35. Client Services and Venue Management.

Examine the Americans with Disability Act and how it designates accessibility and services in public spaces. Identify client/attendee escalation and the dispute resolution practices necessary for successful return to common interest. Explore different models and techniques adopted by entities with respect to fundamentals of marketing.

KIN X52K.36. Exercise Physiology in Cardiovascular Diseases.

Examine the physiology of cardiovascular diseases and their consequences on autonomic regulation during exercise in these patient populations. Analyze and synthesize the literature and discussion of current peer-reviewed research articles.

KIN X52K.37. Environmental Physiology.

Learn responses and adaptations of the cardiovascular and pulmonary systems to different extreme environments.

KIN X52K.38. Exercise and Sport for Health, Fitness, and Performance.

Discuss the impacts that sports and exercise have on health, fitness, and performance.

KIN X52K.6. Race and Sport in African American Life.

KIN X52L. Women and Sport.

Examine the role sport and exercise has played in the lives of women since ancient times with an emphasis on events influencing American women in sport, their fight for access to sport, and the International Olympic Games.

KIN X52M. Sport, Fitness, and Mass Media.
Examine the evolution of sport media related to competitive sports and physical culture in print, television, and online.

KIN X52N. History of Physical Culture.
Survey the history of major trends and movements in physical culture, including fitness and exercise, strength sports, body cultures, and alternative health.

KIN X53. Sport Law.
Designed for sport management majors. Introduction to the United States legal system and to the major cases, laws, and regulations that together make up "sports law.

KIN X54. Sport and Event Marketing.
Application of the fundamental principles used in the marketing of sport and events, with an emphasis on how sport marketing is distinct from traditional goods and services marketing. Focus on key consumption behaviors in sport and their implications for sport marketing practice.

KIN X55. Media and Public Relations in Sport.
Designed for sport management majors. Examination and application of the concepts of public and media relations to sport and leisure organizations. Subjects include effective interpersonal communication, persuasion, media relations, publicity tactics, social and new media, and writing and oral communications skills.

KIN X56. Revenue and Budgeting in Sport.
Introduction to financial analysis and budgeting techniques in the context of sport organizations; conventional and innovative methods for the acquisition of revenue available to sport organizations. Examine financial trends in various sectors of the sport industry, including: professional, college, government/public, and nonprofit sport.

KIN X57. Strategic Management of Sport Organizations.
Designed for sports management majors. Examines the strategic development of sport and health promotion programs. Focus on strategy development within organizations, which includes complementary course material deriving from various sub-disciplines related to strategic thinking and decision-making.

KIN X60. Programming for People with Disabilities.
Covers early detection of disabilities in children, assessment, recommendations for educational settings, and writing an Individualized Education Program. Reviews real-life scenarios featuring individuals with disabilities in active settings. Covers skills useful for a career in a school environment, public policy, and recreation.

KIN X61. Coaching Theory and Principles I.
Examines the philosophy, ethics, strategies, motivational techniques, performance analysis, program organization, contest administration, and facilities management related to coaching.

KIN X62. Coaching Theory and Principles II.
Examines the process of becoming a successful coach and developing a coaching protocol for a specific sport.

KIN X63. Theory and Practice in Strength Coaching.
Examine the physiology and biomechanics of strength and conditioning training, as well as popular assessment protocols and exercise prescription principles. Explore the management of a strength/conditioning facility, including organization and administration, staff utilization, integration of weight training with other training techniques, and standard strength coaching practices.

KIN X64. Aquatic Facility Operator: Management and Administration.
Designed to prepare the aquatic professional for leadership in the management of indoor and outdoor facilities. Includes aquatic facility operation, administration of programs, physical operations, policies and procedures, and staff development and training. Includes design, pool operation, water chemistry, facility management, safety procedures and risk management, budgeting, and marketing aquatic programs. Studies educational, sport, and recreational aspects of pools, lakes, camps, and beachfronts.

KIN X65. The Business of Golf.
Designed for students pursuing a career in the golf business. Includes clubhouse and links management, sales, agronomy, technology, and equipment.

KIN X66R. Adapted Fitness and Recreation.
Investigate fitness and recreation as integral components of optimal health and well-being for individuals with illnesses and disabling conditions. Explore the benefits of exercise for people with disabilities and the preparation necessary to clear the pathways for individuals to successfully pursue a lifetime of fitness and recreation.

KIN X67S. Sport and Disability.
Delve into a comprehensive look at the history of disability sport and current elite and Paralympic athletes. Explore disability sport in its historical context; organizations, competitions, and sport opportunities for athletes with disabilities; international perspectives; and coaching and training of athletes with disabilities, including sports medicine issues, activity modifications, equipment uses, and event management for both adult and young athletes.

KIN X68T. Perspectives in Assistive Devices, Products and Technology.
Participate in a multidisciplinary collaborative approach in the development of devices and products to assist people with disabilities in recreational and daily life pursuits. Join a team of medical and engineering students in prototyping technologies, and be guided through early insight marketing research, and development strategies. Engage with leaders in successful business ventures and learn from experts in technology, medicine and product development. Present concluding projects to a panel of mentors in the fields of research, marketing, development and patenting.

KIN X70K. Topics in Health Promotion: Seminar.
Identification, causes, incidence, prevention, control, and social implications of major problems in health.

KIN X70K.1. Emergency Medical Technology.

KIN X75. Issues and Trends in Developmental Movement Programs.
Introduction to issues related to the goals, organization, and success of developmental movement programs, such as school physical education, youth sports, YMCA, and other recreation programs and community activities. Issues include equity, competition, fitness, social development, safety and liability, and sportsmanship. Involves group work and observation and involvement in community programs.

KIN X76. Measurement in Kinesiology.
Measurement and assessment procedures; application of statistical procedures; standards for authentic assessment; measurement/assessment selection and evaluation; use of technology in tracking development of motor skills and fitness.

KIN X78. Topics in Fieldwork in Health.
Undergraduate research and/or experience with a health agency in the field attempting to analyze or solve community health problems through education; supervision by the health agency and by the kinesiology and health education faculty.

KIN X78.1. Substance Abuse Prevention I.

KIN X78.2. Substance Abuse Prevention II.

KIN X78.3. Sexual Health I.

KIN X78.4. Substance Abuse Prevention III.

KIN X79H. Honors Tutorial Course.
Readings or a research project, under the supervision of a faculty member, in specific areas of research within kinesiology.

KIN X96T. Directed Research.
Investigation of assigned problems under direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; production of an acceptably written research report.

KIN X97P. Graduate Internship.
Supervised practice in a professional organization, business, or institution.

Graduate Courses

KIN X82. Topics in Conference- Laboratory.
Laboratory or workshop-type instruction dealing with selected problems in specialization areas of kinesiology.

KIN X82.1. Laboratory Techniques in Exercise Physiology.
Study techniques to measure the cardiovascular and metabolic responses to exercise.

KIN X82.10. Pedagogical Technology.
Analysis and application of fundamental and advanced technologies in physical activity settings.

KIN X82.4. Biomechanics Laboratory.

KIN X82.6. Advanced Laboratory Techniques in Exercise Physiology.
Knowledge and skills needed to assess the metabolic characteristics of the rat, to evaluate the metabolic characteristics of skeletal muscle, and to perform essential biochemical assays and procedures that are typically used in biochemical and molecular biology experiments.

KIN X82.7. Clinical Exercise Physiology: Theory and Practice.
Designed for students interested in assessing physical fitness and well-being and designing exercise programs in corporate, community, clinical, occupational, and commercial settings. Students receive practical experience assessing physical fitness.

KIN X82.9. Motor Development: Assessment.
Review of screening, diagnostic, or programmatic motor assessment instruments. Includes test psychometrics, test content, appropriate population, and comparable or competing assessments.

KIN X86. Topics in Research Methodologies.
Disciplines of research methods, research design, data-producing techniques, treatment and interpretation of data, reporting on research.

KIN X86.1. Research Methods: Proposal Writing.

KIN X86.2. Research Methods: Applied Research Techniques.

KIN X86.3. Qualitative Research Methods PCSS.
Introduction to the theoretical and methodological aspects of qualitative research, as well as qualitative research approaches from a variety of disciplines and philosophical traditions with an emphasis on the application of research designs, data collection, and analysis techniques for researchers of sport, physical culture, exercise, and physical activity. Recommended for students specializing in sport management or interdisciplinary sport studies.

KIN X86.4. Research Methods: Grant Writing.
Disciplines of research methods, research design, data-producing techniques, treatment and interpretation of data, and reporting on research. Recommended for doctoral students interested in pursuing a post-doctoral experience.

KIN X86.5. Archival Research Methods in Physical Culture and Sport History.
Selected research methods and techniques used in archival research at the theoretical and pragmatic level. Familiarizes students with research methods for both paper-based and digital archives.

KIN X95. Topics in Advanced Studies.
Graduate seminar in topics related to specialization areas.

KIN X95.1. Ergogenic Aids for Exercise.

KIN X95.10. Neural Control of Posture and Locomotion.

KIN X95.11. Pulmonary Exercise Physiology.
Examine the interactions between the cardiovascular and pulmonary systems at rest and during exercise.

KIN X95.12. Muscle Physiology and Plasticity.

KIN X95.13. Aging Motor Systems.

KIN X95.15. Conditioning for Competitive Athletes.
The physiological factors that govern the adaptations derived from acute and chronic exercise training. Focus will be placed on training adaptation in competitive athletes as they represent the extreme.

KIN X95.16. Cardiovascular Response to Exercise.

KIN X95.18. Fitness Testing and Evaluation.

KIN X95.2. Cardiac Metabolism.

KIN X95.21. Children's Exercise and Activity.
Physiological bases for changes in exercise and sports performance and in exercise capacity throughout childhood and adolescence. Includes aspects of cardiovascular, respiratory, and metabolic changes and issues related to thermoregulation, training, gender, and health and fitness.

KIN X95.23. Critical Issues and Events in American Sport.
Introduction to historical research process through a reading and analysis of significant works in the field of sport history and the writing of a research paper.

KIN X95.25. Fat Metabolism during Exercise.

KIN X95.26. Legal Issues in Sport.

KIN X95.27. Athletics Administration.

KIN X95.28. Physical Dimensions of Aging.

KIN X95.29. Ethics in Sport.

KIN X95.3. Physiology of Aging.

KIN X95.32. Sport Marketing.
Apply the fundamental principles used in the marketing of sport and events.

KIN X95.33. Musculoskeletal Biomechanics.
Synthesis of properties of the musculotendon and skeletal systems to construct detailed computer models that quantify human performance and muscular coordination.

KIN X95.36. Biomechanics of Human Movement.

KIN X95.38. Muscle Metabolism during Exercise.

KIN X95.4. Biomechanics of Sport.

KIN X95.42. Facility and Event Management.
Management and operation of sport, recreation, convocation, convention, and other public assembly facilities.

KIN X95.43. Psychology of Exercise.
The benefits of exercise in moderating negative psychological states such as anxiety, stress reactivity, and depression.

KIN X95.44. Sport Finance.
Examine finance in sports organizations. Explore the knowledge and skills needed in the administration of both sport and non-sport organizations or firms.

KIN X95.45. Pediatric Motor Development.

KIN X95.46. Advanced Exercise Physiology I.
Designed to provide students with the essential graduate background for the application and practice of exercise physiology. The integration of the nervous, skeletal muscle, and cardiovascular systems from the subcellular level to the whole-organism level.

KIN X95.47. Advanced Exercise Physiology II.
The physiological and metabolic response to exercise, with emphasis on integrating the whole-body and cellular responses. In a variety of topics, students review basic physiology, focus on responses during exercise, and apply their findings to situations in the clinical and sporting environments.

KIN X95.48. Social Psychology of Sport and Physical Activity.
The theoretical structure that underlies social psychology as it has been applied to sport. Emphasis on the psychological concerns that confront coaches in their interactions with individual athletes and teams.

KIN X95.49. Sports Nutrition.
The nutritional needs of people whose physical activity ranges from recreational to elite competitive athletics. Development of practical

dietary strategies that recognize the unique nature of sport and the role of diet in promoting optimal physiological adaptation to training.

KIN X95.5. Exercise and Preventive Medicine.

KIN X95.50. Sport Psychology.

The general field of experimental sport psychology, with emphasis on the psychological components of individual performance. Designed to prepare students to discuss the important questions, methodology, and experimental literature in selected areas of sport psychology.

KIN X95.51. Adult Development, Aging, and Health.

KIN X95.52. Organizational Behavior in Sport.

Determinants and consequences of individual motivation and attitudes in organizations generally and in sport organizations specifically. Theory related to the individual often responsible for motivating people toward organizational goals, the leader.

KIN X95.53. Sport Public Relations and Sales.

Detailed study of the relationship between the media, corporate sponsorship, and sport. Focus on various media techniques utilized by sport managers and sport sponsorship basics.

KIN X95.54. The Biology of Aging.

KIN X95.55. Assessment of Physical Function in Older Adults.

Introduction to the goals, issues, and procedures that relate to the clinical assessment of physical function in the elderly (sixty-five and older).

KIN X95.56. Sport and Special Event Management.

Introduction to key considerations when planning, implementing, and evaluating an event. Considers the organization of the events industry worldwide and examines how events link to other sectors of the economy. Specialized skills for the management and marketing of events. Students have the opportunity for hands-on practice in the use of the necessary tools for planning, programming, administering, and evaluating an event.

KIN X95.57. Managing People and Organizations.

Graduate-level preparation in select subjects in organizational behavior and human resources management.

KIN X95.58. Sport Consumer Behavior.

An examination of contemporary theory and research on the subject of sport consumer behavior.

KIN X95.59. Biomechanics in Clinical Settings.

Designed to provide students with the basic biomechanical competence required to understand how normal human movements are generated, how movements are altered by injury or pathology, and how clinical intervention can improve performance.

KIN X95.60. Sport Policy.

The formulation and analysis of sport policies: the uses of policy analysis in sport settings; environmental, economic, and sociopolitical impacts of sport, including policy implications.

KIN X95.61. Central Questions in Biomechanics and Motor Control.

Designed to allow students to explore specific topics of current interest in biomechanics and/or motor control; to learn to evaluate the scientific literature in areas of current debate or controversy; and to develop scientifically sound, relevant, and experimentally testable research hypotheses.

KIN X95.62. Aging and Cardiovascular Function and Disease Risks.

Cardiovascular changes associated with aging; scientific issues and hypotheses in the area of aging and cardiovascular function and disease risks; and presenting critical analyses of these issues.

KIN X95.63. Introduction to Nonlinear Dynamics in Biological Systems.

Basic concepts of nonlinear mathematics and their application to biological systems.

KIN X95.64. Neuromuscular Aspects of Fatigue and Training.

The role of the central nervous system during muscular fatigue and exercise training.

KIN X95.65. Sport Development.

Examine contemporary theory and research on the subject of sport systems and athlete development.

KIN X95.66. Marketing Research for Sport.

KIN X95.67. Theories and Issues in Sport Management.

Examine legal, policy, financial, and marketing trends and how they affect the management of sport organizations and systems.

KIN X95.68. Human Resource Management in Sport Organizations.

KIN X95.69. Physical Activity Assessment in Individuals and Populations.

Provides an understanding of the various methods used to measure physical activity and related constructs (such as sedentary behavior, movement, and physiological attributes), and the mechanisms by which physical activity influences health outcomes. Covers all forms of physical activity measurement, assessment of built environment, and psychosocial correlates of physical activity, as well as validity, reliability, and related statistical strategies.

KIN X95.70. Human Cardiovascular and Autonomic Physiology.

Introduction to the regulation of the cardiovascular and autonomic nervous system in health and disease.

KIN X95.71. Cognition and Exercise Across the Lifespan.

Detailed study of the relationship between brain health and physical activity behaviors across the developmental life stages; focused on the effects of physical activity programming on cognitive control and performance.

KIN X95.72. History of Strength and Strength Training.

Explore the history of the physiological understanding of human strength, training methodologies to promote strength, the evolution of the profession of strength coaching, gendered-attitudes toward the possession of physical strength, and the rise of competitive strength sports. Using a cultural studies approach, consider ideas about strength (and muscularity) from Ancient Greece and Rome. Examine the rise of circus strongmen and strongwomen, the professional physical education community's shunning of "strength" as a desirable physiological goal, and the rise of non-professional entrepreneurs like Bob Hoffman, Joe Weider, and Arthur Jones who helped debunk the myth of muscle binding.

KIN X95.73. History of Sport and Business.

Survey of the development of modern sport industry from late nineteenth-century roots to twenty-first century global phenomenon. Examines connections between media and sport; the role of IMG and other sport agencies in event sponsorship and creation of celebrity athletes; growth of professionalism in the Olympic movement; the rise of megacorporations; and the commercialization of college and high school athletics.

KIN X95.74. History of Physical Culture and Alternative Medicine.

Examines the history of the various practices used to strengthen, enhance, and improve the health of the body through exercise, dietary manipulation, and other holistic practices.

KIN X95.75. Sport and International Relations.

Examines the relationship between sport and international relations.

KIN X95.76. History of Exercise Science and Sports Medicine.

Traces the evolution of exercise science and sports medicine from Classical Greece to the present.

KIN X95.77. Strategic Management in Sport.

Graduate level preparation in developing and analyzing organizational strategies. Preparation for consultancy work as well as composing and analyzing business plans.

KIN X95.78. History of Sports Nutrition.
Explore the many ways in which nutritional science, diet, and folk remedies came to be popularized among athletes, and what the ramifications of these developments were. Examine the relationship between exercise and diet in the early nineteenth century, with attention paid to British and American culture. Discuss the emergence of new dietary practices for athletes throughout time, ranging from vegetarian diets to high protein meals. Identify methods and theories found in histories of gender, sport, health, medicine, politics, and culture among other disciplines.

KIN X95.79. Race, History and the Quest for Body Perfection.
Explore issues of race, gender, and sexuality as applied to the human body through the lens of cultural history. Examine beliefs about what has been considered "beautiful," "fit," "obese," and "healthy" and bodies have been defined as "masculine," "feminine," or outside this traditional binary. Assess how the human body has been measured and critiqued by physical educators, scientists, and government agencies; how muscularity and the quest for ideal measurements has been celebrated and derided in different historical eras; how beauty and physique contests celebrate particular kinds of bodies; and how ideal bodies have been portrayed in art, photography and film.

KIN X95.8. Motor Control: Neuromuscular Bases.

KIN X95.80. Statistical Methods in Education and Health.

KIN X95.81. Leadership in Sport Organizations.

KIN X95.82. Human Anatomy Dissection.
Analyze human anatomy and train in human cadaver dissection. Perform detailed regional dissections on human cadavers to study the anatomy and anatomical relationships of the entire human body with an emphasis on clinically relevant anatomy.

KIN X95.83. Sports Economics.
Examine the economics of sports leagues, particularly those in North America. Use a managerial economics approach to cover three core areas of sports economics: industrial organization, labor, and public policy.

KIN X95.84. Endocrine Physiology of Exercise.
Examine the hormones involved in exercise physiology and maladaptation(s) in disease states.

KIN X95.85. Environmental Physiology.
Learn responses and adaptations of the cardiovascular and pulmonary systems to different extreme environments.

KIN X95.86. Sport Coaching History, Theory, and Ethics.
Investigate the historical, theoretical, and ethical considerations of coaching, including strategies, motivational techniques, and program organization for different age and skill levels. Develop a coaching philosophy and apply content to various coaching scenarios.

KIN X95.87. Sport Injury Management.
Provide the knowledge, skills, and abilities necessary to prevent, assess, recognize, and manage injuries and conditions that commonly occur during exercise, physical activity, and athletic participation.

KIN X95.88. Strategies and Techniques in Sport Coaching.
Examine principles and practices of sport coaching and development of athletes from youth through adolescence and into young adulthood. Discuss the integration of motor learning and development, sports science, practice structure and design, and performance analysis and feedback.

KIN X95.9. Motor Control: Performance and Learning.

KIN X95D. Neurological Rehabilitation.
Explore the scope, techniques, and research findings of the field of neuromuscular and biomechanical mechanisms in neurological rehabilitation. Review basic neuromuscular and biomechanical concepts and principles, and study recent efforts to apply them to selected clinical situations.

KIN X96. Doctoral Seminar.
Individual or shared project research with reports evaluated by seminar participants and the instructor.

KIN X96T. Directed Research.
Investigation of assigned problems under direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; production of an acceptably written research report.

KIN X97. Research Problems.
Individual or group research topics in a specialization area of kinesiology.

KIN X97C. Movement and Cognitive Rehabilitation Science Seminar.
Participate in facilitated research and professional development. Share work with peers and faculty and receive friendly and constructive feedback.

KIN X97P. Graduate Internship.
Supervised practice in a professional organization, business, or institution.

KIN X98. Thesis.

KIN X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

KIN X99W. Dissertation.

Professional Courses

KIN X96T. Directed Research.
Investigation of assigned problems under direction of a Graduate Studies Committee member; development and demonstration of competence in research design and execution; production of an acceptably written research report.

KIN X97P. Graduate Internship.
Supervised practice in a professional organization, business, or institution.

KOR - Korean

Korean: KOR

Lower-Division Courses

KOR X04. Accelerated First-Year Korean.

KOR X06. First-Year Korean I.
Intended for non-native speakers of Korean.

KOR X07. First-Year Korean II.
Continuation of Korean 506, 606. Intended for non-native speakers of Korean.

KOR X12. Accelerated Second-Year Korean.
Continuation of Korean 604.

KOR X12K. Second-Year Korean I.
Intended for non-native speakers of Korean.

KOR X12L. Second-Year Korean II.
Intended for non-native speakers of Korean.

KOR X19S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KOR X29S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

KOR X19S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KOR X20K. Third-Year Korean I.

KOR X20L. Third-Year Korean II.

KOR X29S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KOR X30. Topics in Advanced Korean.
Fourth-year Korean readings on special topics.

KOR X30.1. Advanced Conversation in Korean.
Emphasis on achieving an advanced level of proficiency in modern conversational Korean, with additional practice in advanced writing and listening skills.

KOR X30.2. Advanced Readings in Korean I.
Selected modern Korean poems, short stories, and essays to develop reading and writing skills in advanced Korean. Includes discussion of cultural and historical issues.

KOR X30C. Introduction to Modern Korean Literature.

KOR X30F. Korean Conversation through Media.
Develop conversational skills in Korean language through the analysis of authentic Korean media resources such as newspapers, the Internet, TV news, and audio files. Focus on the comprehension, analysis, translation, and critique of media texts, as well as some formal speaking.

KOR X60. Conference Course in Korean Language and Literature.
Supervised individual study of selected problems in Korean language or literature.

Graduate Courses

KOR X19S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KOR X29S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KOR X81. Conference Course in Korean Language and Culture.
Supervised individual study in Korean language or culture.

KOR X84. Topics in Korean Language and Culture.

Professional Courses

KOR X19S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

KOR X29S. Topics in Korean.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

L A - Liberal Arts

Liberal Arts: L A

Lower-Division Courses

L A X01E. Discovering the Liberal Arts and Humanities.
Introduction to the College of Liberal Arts (COLA) and its variety of research methodologies and scholarly opportunities.

L A X01L. Topics in Introduction to the Liberal Arts.
Topics related to exploring the various disciplines in the College of Liberal Arts.

L A X01M. Liberal Arts to Career.

L A X01N. Liberal Arts Career.
Explore professional development areas such as marketing your liberal arts degree to employers, exploring career industries, identifying strengths and skills, conducting job and internship searches, and preparing resumes and cover letters.

L A X01P. Creating Your Academic Pathway.
Focuses on opportunities within the College of Liberal Arts, academic success, extracurricular support, and professional development.

L A X01Q. First-Year Seminar.

L A X02. Critical Thinking Seminar.
An examination of fundamental concepts in critical thinking, including the role of intellectual virtues, an analysis of the elements of thought, Socratic thinking, and the application of universal intellectual standards.

L A X02F. Foundation Scholars Program Seminar.

L A X02P. Path to Admission through Co-Enrollment (PACE) Workshop.
Provides guidance to first-year students in the Path to Admission through Co-Enrollment (PACE) program.

L A X04R. Topics in Community Service.
Tutorial course, in which students submit reports based on service learning and appropriate supplementary reading.

L A X04R.1. Leadership, Ethics, and Society.

L A X04R.2. Civic Engagement and Civic Responsibility.

L A X11. Internship Experience.
Experience an internship and create SMART goals. Reflect on the internship experience and explore approaches in overcoming obstacles toward goals.

L A X12C. Topics in Community Engagement.

L A X13P. Topics in Peer Mentoring.

L A X17. Strategies in Critical Thinking for Success.
Introduction to strategies that enable well-informed decisions for success in college and beyond.

L A X19. Topics in International Learning Seminars.
Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

L A X19S. Topics in Liberal Arts.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser

in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

L A X20. Internship.
Designed to establish the academic foundations of an internship course in the liberal arts. Students integrate knowledge derived from their academic studies with the experiences gained in an internship setting.

L A X20D. Digital Humanities Internship.

L A X20J. Jewish Studies Internship.

L A X20L. Military Leadership Internship.
Field leadership training program.

L A X21. International Internship.

L A X21F. French Studies Internship.

L A X21J. Italian Studies Internship.

L A X21M. Health and Society Internship.

L A X21S. Security Studies Internship.

L A X25. Topics in the Liberal Arts.
Analysis of topics in the philosophy and real-life application of the liberal arts.

L A X25I. Intelligence and National Security.

L A X29. Topics in International Learning Seminars.
Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

L A X29S. Topics in Liberal Arts.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

L A X30G. Global Disinformation Research.
Focus on various aspects of global disinformation from security, social, and policy perspectives.

L A X31C. Research Internship.

L A X31R. Research Internship.

L A X40. Leadership and Urban Engagement.
Explore leadership skills and goals in the urban context. Read and discuss leadership challenges that arise when stakeholders come together to plan, make decisions, and take action in organizational and community settings.

L A X50. Research Conference Course.

Graduate Courses

L A X80L. Topics in Liberal Arts: Methods for the 21st Century.
Offer skills-based training for students at different stages of their programs.

L A X81. Topics in Liberal Arts: Advanced Methods.
Offers skills-based training for students at different stages of their program.

L A X87. Graduate Internship.

L A X98T. Supervised Teaching in Liberal Arts.

Professional Courses

LAH - Liberal Arts Honors

Liberal Arts Honors: LAH

Lower-Division Courses

LAH X01. The Idea of Reacting to the Past.
Develop skills in public speaking, debate, critical thinking, research and writing using historically-based perspectives through role play.

LAH X02H. The Idea of the Liberal Arts.
An overview of the liberal arts disciplines.

LAH X03H. The Ideas of Civic Engagement.
Introduces Liberal Arts Honors students to the resources of the University, their history, and how to make best use of them. Provides guidance on internships, scholarships, and career paths, encouraging students to prepare for a lifetime of civic engagement and public service.

LAH X04H. Professionalization and Career Development.
Introduction to the ideas, concepts, and best practices of career development, professionalization and professional online brand management. Provides guidance on internships and career paths working in conjunction with Liberal Arts Career Services.

LAH X05. Topics in Liberal Arts Freshman Honors Seminar.
Intensive small class lecture or seminar course addressing basic issues in various liberal arts disciplines. Lectures, readings, discussions, examinations.

LAH X05R. Reacting to the Past.
Introduction to major philosophical, political, and historical concepts. Re-create the contexts in which these ideas acquired significance through role-playing games.

LAH X12H. The Nature of Inquiry.
Introduction to the nature of research in liberal arts disciplines.

LAH X18Q. Supervised Research.

LAH X19S. Topics in Liberal Arts Honors.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

LAH X22L. Law and Organizations.
Examine the intersection of law and organizational/workplace practices. Explore how law regulates the workplace (e.g., laws about sexual harassment), how organizations do or do not comply with the law, and the ways that organizational practices may affect legal standards.

LAH X29S. Topics in Liberal Arts Honors.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAH X40L. Legal Internships.
Explore the role of lawyers and how the practice of law has shaped American society. Intern in law offices or legal settings. Gain practical experience and first-hand knowledge of different legal fields. Internships help shape classroom discussions. Examine the practice of law and how lawyers serve the public interest and larger society

LAH X40M. Business Consulting Internship.
In a classroom setting, explore and discuss the role of consultants in the business world and how both have shaped American society. Discuss hands-on experience from internships in the classroom.

LAH X40N. Nonprofit Management Internship.
In a classroom setting, explore the role of non-profit organizations and how they have shaped American society. Discuss hands-on experience from internships in the classroom.

LAH X40P. Public Health Internship.
In a classroom setting, explore the role of public health organizations and how they have shaped American society. Discuss hands-on experience from internships in the classroom.

LAH X40Q. Technical Writing and Social Media Internship.
In a classroom setting, explore the expanding role of social media and technical writing in society and how both have shaped American society. Discuss hands-on experience from internships in the classroom.

LAH X40R. Public Policy Internships and Advocacy.
Examine how public policy is made, functions, and can be changed through the use of case studies, policy reports, and articles on current issues. Participate in a public policy oriented internship.

LAH X40S. Foundations of Intercultural Competency.
Study the ability to accurately understand and adapt behavior to cultural differences and commonality. Examine self and other awareness, explore culture, practice cross-cultural communication, and develop intercultural competency.

LAH X41T. Creative Writing and Crisis.
Examine how writers are able to respond creatively to challenging conditions and circumstances through certain writing practices and aesthetics. Study various writers and how their work responds to various forms of crises, such as personal, social, environmental, and existential. Explore a wide range of literary texts that capture contemporary dialogue with crisis.

LAH X42U. Poetics and Performance.
Explore depth and range of various poetic forms of contemporary poetry. Study writing poetry as a way of expressing thought and feeling that is shared with others. Engage in a conversation between voices and texts to produce informed writing.

LAH X43V. American Literature and Culture of the Late 1960s.
Examine subjects that polarized Americans in the late 1960s, such as counterculture, the Vietnam War, youth protests, racism in the South, and the Black Power/Black Arts Movement. Explore the culture and social milieu of the late 1960s through the prism of American literature, film, and popular music of the era.

LAH X45C. Tell Your Stories: A Workshop.
Practice writing stories as a way of exploring oneself, relationships and the world. Study examples of written storytelling in various genres including poetry, literary nonfiction, and short fiction.

LAH X45D. Inequality in the United States Educational System.
Examine how inequality has developed and is maintained within the American public education system.

LAH X49. Scholars Honors Capstone.
Produce a paper that reflects upon the student's academic enrichment experiences and how it impacted their views and career goals.

LAH X50. Topics in the Liberal Arts.
Intensive lecture course treating topics from a variety of disciplinary perspectives, taught by instructors from various departments. Lectures, readings, discussions, examinations.

LAH X50.10. In Search of Meaning.
Concepts include monotheism, the nature and personality of this god, the soul, chosen people, linear time, history as divine classroom, original sin, heaven, hell, salvation, etc. Establishes how and when these and a host of other features came into existence and created Judeo-Christian reality, and contrast the reality created therein with other realities--Hinduism, Buddhism, Confucianism, Islam.

LAH X50.11. Rhetoric of Great Speeches.
Exploration of the nature and history of rhetoric and analysis of some of the great speeches of the Western tradition.

LAH X50.12. Technologies of the Book.
Examines the technologies that enabled the book and explores its impact on society, with particular attention paid to the printed book that has flourished since the mid-fifteenth century. Explores the technologies of production and manufacture, and those that enabled the creation of texts by authors and their distribution and reception, and considers the future of the book in today's society.

LAH X50.13. Writing Nonfiction.
The craft of writing profiles, narratives, and essays. Concentration on the fundamental components of nonfiction: beginnings, organization, character development, narrative flow, and conclusions.

LAH X50.14. Money In American Politics.
Explores the nature and consequences of money in American politics.

LAH X50.15. History at Play.
Explores the great religious, political, and cultural debates that occurred around two historic events: England's break with the Catholic Church in 1536 and India gaining independence from Britain in 1947.

LAH X50.16. Psychology and Religion in Modern American Culture.
Explores the historical, religious, and psychotherapeutic manifestations of the "search for meaning" in modern American culture. Examines theology, psychological theory, literature, music, politics, and art.

LAH X50.17. Race and Medicine in American Life.

LAH X50.18. The Johnson Years.

LAH X50.19. British History, Literature, and Politics.
Reading course in history, literature, and politics, and as a class in professional writing. Examines not only the literature, history, and politics of England, Wales, Scotland, and Ireland, but also the interaction of British and other societies throughout the world.

LAH X50.2. Our Lives In Fiction.
Examines the hypothesis that human beings have and continue to create and recreate themselves through the telling of stories. Explores the concept that stories help define what is significant, what is praiseworthy, and what it is we should value and why.

LAH X50.22. Leadership Strategy In Sports.

LAH X50.23. The Human Place in Nature.

LAH X50.27. Sicily: Myth, Reality, and Mafia.
Examine the artistic traces left in Sicily by Greek, Roman, Arab, Norman, and Spanish civilizations and how they contributed to create the present Sicilian reality.

LAH X50.29. David Foster Wallace.

LAH X50.3. Technical Change and Financial Crisis.
Explores the economics of the business firm, the management of technical change, and the interaction between technology and finance in the writings of major twentieth century economists. Emphasis on attempting to understand the social and income-distributional consequences of technical change, the potential for system instability, and the dilemmas of public policy in this area.

LAH X50.30. Paradise Lost: Reception History.

LAH X50.31. Immigration Literature.

LAH X50.32. Literature, Cultural Memory, and the American Civil War.
Examines the American Civil War not in terms of its military or political history but in relation to the ways literary and cultural texts have remembered and rewritten it.

LAH X50.4. Literature of World War I.
Selected readings from autobiographies, poetry, fiction, and memoirs, primarily about the Western Front, by German, British, and American authors; a short history of World War I; readings of a central book of literary analysis; exploration of the nature of war, the experience of combatants, and the legacy of the war itself and its unique literature.

LAH X50.5. Modern Masters of the Novel.
An examination of a range of subjects and styles that distinguish the capacity of the novel to reflect private lives and public moments. Focuses on nineteenth and twentieth century British and American novelists such as George Eliot, Philip Roth, Ford Maddox Ford, and Graham Greene.

LAH X50.6. Documentary Film and Inquiry.
Examines how narrative accounts such as documentary film, biography, or other non-fiction work impact the interpretation of significant events. A component of the class includes individual or collaborative research on a chosen topic and presentation of a life history project via a narrative description, video, photography, or other medium.

LAH X50.7. Power and Belief in Early Modern Europe.
The historical and cultural processes that lead people to change the way they look at the world, and also brought some early modern Europeans to

argue for religious toleration - first as a practical matter, and eventually as a matter of principle.

LAH X50.8. The Decolonization of the British Empire.
Explores the era of decolonization of the British empire after World War II.

LAH X50.9. Getting it in Writing.
An exploration of nonfiction writing and the process of translating facts, ideas, and experiences into words.

LAH X50G. Guns in America.
Examine firearms in the United States. Engage with literature drawn from the social sciences, law, medicine, and public policy to develop a holistic understanding of the historical and contemporary role of firearms in the cultural, social, and political landscape of the U.S.

LAH X50M. John Milton and the Enlightenment.
Examine the impact of Milton's political and social writings by pairing Milton's political prose with eighteenth-century Enlightenment texts from both sides of the Atlantic. Discover the role Milton's ideas played in shaping the foundations of liberty in both Britain at the Glorious Revolution and in North America at the American Revolution.

LAH X50P. The Paper Chase: Law School and the Life of the Law.
Explore the liberal arts through the lens of the first-year law school experience and the first-year law school experience through the lens of the liberal arts.

LAH X50T. Treasure Hunt Archival Research.
Discover, explore, and identify the boundless treasures that can be found on The University of Texas at Austin campus by hunting through the vast cultural and historical collections at the archives on campus including the Harry Ransom Center, the Dolph Briscoe Center for American History, and the LLILAS Benson Latin American Collection. Explore essential skills for pursuing original research projects in humanities disciplines and apply these skills to bring public attention to hidden histories and marginalized voices in American culture.

LAH X51C. African American Family in Historical and Contemporary Contexts.
Examine how African Americans managed to maintain a sense of family from the time of slavery to the present trend of mass incarceration.

LAH X51D. Ethical Issues in Medicine and Society.
Explore, analyze, and evaluate health and health care in the twenty-first century. Examine the social factors at play in relation to disease and illness, the rise of the medical-industrial complex, and how the issues of power underlie ethical dilemmas in both medicine and society.

LAH X51E. Gender Equality in World Development.
Examine the causes and consequences of gender equality and inequality in the world. Identify where the most and least progress has occurred for gender equality. Analyze the causal links between women's empowerment and development.

LAH X51F. Philanthropy and Nonprofit Organizations.
Examine the scope and diversity of the nonprofit sector, as well as individual patterns of giving and volunteering. Focus on the tools and skills needed to evaluate charitable programs for effectiveness using social scientific techniques.

LAH X51G. Reacting to Revolutionary Ideas.
Explore revolutionary themes in Western and non-Western countries during the nineteenth and twentieth centuries.

LAH X51I. Rejection Immunity.
Examine the neuroscience and psychology behind the brain's calculations of risk in various aspects of our lives. Explore and craft research based response systems to inform future reactions to receiving a rejection.

LAH X51J. Regime Perspectives on American Politics.
Explore American politics and culture and examine how the parts of America fit together as a whole.

LAH X51K. Citizenship in Democratic Politics.
Examine the role of ordinary citizens in democratic politics.

LAH X51L. Homer and Plato.
Examine the works of Homer and Plato. Explore the ideas of human nature, existence, leadership, courage, honor, ambition, justice, necessity, fate, divine power, human freedom, and moral responsibility.

LAH X51M. Jerusalem and Athens.
Examine the age-old confrontation between the teaching of the Bible and the politics and philosophy of the ancient Greeks.

LAH X51N. Archival Advocacy: Experiential Learning.
Use digital archives and exhibits to amplify voices that actively promote social justice, cultural awareness, and service; and to test the ethical positions about impartiality and advocacy in archival and exhibit practices.

LAH X51O. Data Analytics In Contemporary Society.
Investigate the influence of data analytics in contemporary society. Explore how data is generated and presented in popular, scholarly, and other forms of media.

LAH X51P. Machiavelli: Politics and Culture.
Through Niccolo Machiavelli's chief writings, consider the local, regional, Mediterranean, European, and global aspects of his work.

LAH X51Q. Holocaust Aftereffects.
Explore the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.

LAH X51R. Social Inequality and Health in the United States.
Examine how socioeconomic status and social inequality shape health and mortality across the United States. Consider various possible explanations including stress, health behaviors, violence, and other factors.

LAH X51S. Interpreting Black Rage.
Examine the residual effects of slavery and its impact on race relations in the United States. Explore Black rage in literature, music, and film.

LAH X51T. Jewish Identities in the Americas.
Examine the work of Jewish creative intellectuals from the United States, Latin America, and Canada from a comparative perspective.

LAH X51U. Neglected Middle Class.
Examine how a steady succession of laws and policies (including labor and employment, consumer lending, financial services, housing, and tax) have created enormous income and wealth inequality gaps between the country's richest households and everyone else.

LAH X51V. Health, Health Care, and Humanities.
Examine the intersections of the humanities with health, illness, and health care and shed new light on health and health care inequities, the role of narrative, and other representational forms in the illness experience. Explore the relationships between health, healing, and culture; the history of pandemics; and social constructions of ability and disability.

LAH X51W. Hitler, Nazism, and World War II.

LAH X52C. Germany in the Twentieth Century.
Survey of German political and military institutions, economic development, culture, and society.

LAH X52D. Dedman Scholars Seminar.
Travel abroad to study the history, culture and politics of different regions across the world under the direction of various academic departments of the University.

LAH X52E. Language Truths, Myths, and Mysteries.
Explore an introductory characterization of language and linguistics. Identify long-lasting controversial issues and common viewpoints about language and puzzling real-life language-related phenomena. Analyze these issues through a reasoned, rigorous confrontation of facts and fallacies with the objective of competently articulating defensible conclusions.

LAH X52I. Image of the Cannibal in the Renaissance.

LAH X52J. Global Sustainability and Soil.
Examine soil as a resource from the perspectives of natural and sustainability science, including soil ecology and biodiversity, formation,

fertility for ecosystems and farming systems, soil health, distinguishing characteristics in nature, taxonomy, and soil spatial variability around the globe.

LAH X58Q. Supervised Research.

LAH X64H. The Enlightenment.
Examination of the European Enlightenment, an intellectual movement centered in eighteenth-century France and England that cut across all disciplines and arts and that looked back to the Renaissance and forward to the modern world.

LAH X65P. Honors Seminar in Political Theory.
An in-depth study of selected texts, authors, or themes in the history of political thought from ancient times to the present.

LAH X68H. Literature of the Hispanic World.
An examination of the literature and culture of Spain and Spanish America, from the Middle Ages to the present.

LAH X68T. Honors Tutorial Course I.
Research, read, and write a substantial paper on an interdepartmental subject while supervised.

LAH X69H. Comparative Legal Systems.
A comparison of legal traditions from Europe, English common law, and Asia.

LAH X69T. Honors Tutorial Course II.
Research, read, and write a substantial paper on an interdepartmental subject while supervised.

LAH X70H. The Birth of the Modern World, 1400-1700.
An interdisciplinary course on European culture during the age of the Renaissance and Reformation.

LAH X71H. Classics of Greek Philosophy.
A close reading of major works in the philosophy of Plato and Aristotle, supported by background reading in the history and literature of ancient Greece.

LAH X73H. Literature of the Western World: Continuities.
Tradition and innovation of form and thought in literature from Homer to the twentieth century.

LAH X76H. The Rise of Modern America.
The end of Reconstruction (1877) to the end of the war in Vietnam (1975)--industrialization, urbanization, immigration, nuclear energy, and global reach.

LAH X77H. Ideas of the Twentieth Century.
Central philosophical controversies of the twentieth century: ethics, politics, comparative religions, science and human nature.

LAH X78H. The Natural Sciences in the Liberal Arts Context.
An attempt to understand contemporary developments in science by focusing on the history and philosophy of science.

LAH X79H. Classical Asian Civilizations.
An examination of the contributions of India and China to intellectual history.

Graduate Courses

Professional Courses

LAL - Indigenous Languages of Latin America

Indigenous Languages of Latin America: LAL

Lower-Division Courses

LAL X01C. Topics in Intensive Indigenous Language of Latin America I.
Introduction to an indigenous language of Latin America. Designed to provide students with the basics of grammar and vocabulary; the to ability to engage in simple, colloquial conversation; and basic writing skills as foundation for further study.

LAL X06. First-Year Ancient Mayan I.
Introduction to the grammar and hieroglyphic writing used to record Ancient Mayan as well as key elements of cultural and historical context that are crucial for interpreting texts, including calendrics and political history.

LAL X06K. First-Year K'iche' Maya I.
Introduction to K'iche' sounds, pronunciation, and language.

LAL X07. First-Year Ancient Mayan II.
Explore basic functions of the script and language, how hieroglyphic texts are structured, and how the rich Classic Maya iconographic tradition interacts with and complements the textual tradition.

LAL X07K. First-Year K'iche' Maya II.
Practice and further explore K'iche' sounds, pronunciation, and language.

LAL X11C. Topics in Intensive Indigenous Language of Latin America II.
Continuation in the study of an indigenous language of Latin America. Designed to introduce students to advanced subjects in grammar and vocabulary and develop advanced conversation, reading, and writing skills as a foundation for further study.

LAL X12K. Second-Year Ancient Mayan I.
Analyze problems in grammar and discourse in Ancient Mayan texts. Translate and interpret texts in detail to understand their structure, context, and broader meaning and purpose in their specific cultural and historical contexts. Examine the methods and tools of Maya epigraphy.

LAL X12L. Second-Year Ancient Mayan II.
Analyze calendrics, rhetorical structure, and variation in script and language from the earliest to the latest hieroglyphic inscriptions. Explore the latest advances and current debates in the research and humanistic study of Ancient Mayan language and hieroglyphic writing.

LAL X12M. Second-Year K'iche' Maya I.
Explore complex everyday interactions: questions about people and events, states, and changes of state.

LAL X12N. Second-Year K'iche' Maya II.
Introduction to syntactic parallelism, as a stylistic and poetic resource, and K'iche' dialectology. Explore normal and inherent possession constructions and their cultural meaning in K'iche' society.

LAL X19S. Topics in Indigenous Languages of Latin America.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Institute of Latin American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

LAL X21. Topics in Third-Year Indigenous Language of Latin America I.
Advanced study of an indigenous language of Latin America, with an emphasis on advanced conversation and reading skills. Particular attention is given to cultural issues and discussion in the target language.

LAL X22. Topics in Third-Year Indigenous Language II.

LAL X29S. Topics in Indigenous Languages of Latin America.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Institute of Latin American Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAL X30. Topics in Language, Culture, and Linguistics.

Graduate Courses

LAL X85K. Topics in Intensive Graduate Language Instruction I.
Intensive cultural and literacy-focused training in an indigenous language at the beginning level in preparation for research.

LAL X85L. Topics in Intensive Graduate Language Instruction II.
Intensive cultural and literacy-focused training in an indigenous language at the intermediate level in preparation for research.
LAL X85M. Topics in Intensive Graduate Language Instruction III.
Intensive cultural and literacy-focused training in an indigenous language at the intermediate/advanced level in preparation for research.

Professional Courses

LAR - Landscape Architecture

Landscape Architecture: LAR

Lower-Division Courses

LAR X01Q. Topics in Landscape Architecture.
LAR X12R. Topics in Introductory Landscape Studies.
LAR X19S. Topics in Landscape Architecture.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

LAR X20Q. Topics in Landscape Architecture.
LAR X29S. Topics in Landscape Architecture.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Architecture. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
LAR X41R. Topics in Visual Communication.
Explore advanced topics in media and interpretation, such as freehand drawing, measured drawings, aspects of computer graphics, geographic information systems, and photography.
LAR X41R.1. Rendering and Animation for the Built Environment.
Digital visualization techniques used to model three dimensional environments and motion with digital media. Includes lectures, software demonstrations, and projects that focus on the digital translation of spatial experience, as well as the visualization techniques associated with rendering texture, character, and environment.
LAR X42K. History and Theories of Landscape Architecture I.
Overview and chronological series of in-depth studies in the history of major garden cultures and designed landscapes of the Western and Eastern worlds. Introduction to methodological approaches to the formal, social, and cultural history of gardens and landscapes, as well as to relevant theoretical frameworks for interpreting these designed landscapes and for use in conceptualizing landscapes, architecture, and urban projects in studio design.
LAR X42L. History and Theories of Landscape Architecture II.
Continuation of Landscape Architecture 342K (and Architecture 342D) through the modern period to contemporary times. Formal and cultural history of gardens, parks, and public landscapes from 1700 to about 1990. Includes comparative material from the contemporary period, 1980 to 2010.
LAR X42R. Topics in Landscape Architectural History.
LAR X42R.1. Romes Gardens and Landscapes.
LAR X42R.2. Professional Design Practice: Baroque Rome.
Explore an overview of the synthetic act of design and a strong interdisciplinary grounding in one of the key historical periods of design and in advanced research methods.
LAR X42R.4. Hybridity in Landscape and Architecture.
LAR X42R.5. Representing Landscape and Architecture, 1500-Present.
Explore the roles of visual representation in design and professional practice from Leonardo da Vinci to the digital age. Review the history of techniques, media, and conventions of representation in architecture and landscape architecture and in their intersections.
LAR X45R. Topics in Landscape Technology and Site Engineering.
Explore current techniques and issues related to landscape technology and their influence and application in the built environment.
LAR X46R. Topics in Landscape Architectural Theory.
Explore advanced topics in landscape architecture and associated disciplines to encourage critical and theoretical thinking.
LAR X46R.1. Ethics of Care.
LAR X47K. Living Systems Design I.
Examine the interconnections between geological, biological, and social systems of the designed landscape. Explore subjects such as plant ecology, plant communities, soils, and plant identification.
LAR X47L. Living Systems Design II.
Examine the design of living systems for the urban environment including soils, paving, plants and best management practices. Explore subjects such as principles and processes of planting design, ecosystems service optimization, and landscapes on structure.
LAR X47M. Living Systems Design III.
Examine emerging issues and contemporary debates related to the design and construction of living systems in the urban environment, including technical, ecological, and aesthetic considerations.
LAR X47R. Topics in Natural Systems.
Explore aspects of environmental analysis, ecological and systemic methods, landscape resilience, and applied methods particular to design of the built environment.

Graduate Courses

LAR X80C. Foundation Design Studio.
An introduction to the fundamental components of landscape architecture and graphic communication.
LAR X80Q. Topics in Landscape Architecture.
LAR X80V. Topics in Digital Technology and Fabrication.
LAR X80W. Topics in Disaster Recovery.
LAR X81. Visual Communication I.
Explore methods of survey, recording, analysis, interpretation, and representation of landscape architecture.
LAR X81D. Architectural Drawing.
Visual communication in such media as freehand drawing, modeling, photography, and measured drawings.
LAR X81R. Topics in Visual Communication.
Topics in representation and analysis, such as freehand drawing , digital drawing, digital modeling, measured drawings, computer graphics, geographic information systems, and photography.
LAR X81R.1. Rendering and Animation for the Built Environment.
Examine digital visualization techniques for modeling built environment and dynamics. Explore techniques focused on the digital translation of spatial experience, including material, character, and texture through rendering and animation.
LAR X81S. Advanced Topics in Visual Communication.
Explore advanced topics in landscape architectural representation and analysis.
LAR X81S.1. Photography and the Urban Landscape.
LAR X82. Design and Visual Studies in Landscape Architecture I.
Explore initial studies in design thinking; an introduction to design materials and methods; spatial typologies; and investigations in shaping terrain.

LAR X82T. Landscape Architecture Design Studio II.
Design problems engaging principles of site planning combining site research analysis and composition to comprehend, critique, and respond to change of the physical, biological and social context.

LAR X83. Landscape Architecture Design Studio I.
Methods of survey, recording, interpretation, and representation of landscape. An introduction to design through examination of object, space, relationship, movement, the human condition, materiality, and ecology.

LAR X84. Topics in Horticulture and Plants in Design.
Study of habitat, site and technical conditions, and characteristics of plant typologies and their application to landscape practice.

LAR X85. Topics in Natural Systems.
Elective seminars in aspects of environmental analysis, ecological and systemic approaches, sustainable development, and applied methods of geographic information systems.

LAR X85.1. Introduction to Urban Ecology.

LAR X85.2. Environmental Impact Assessment.

LAR X85K. Technology Workshop I.
Introduces the principles, processes, and practices of site manipulation, description, and construction techniques. Includes systems of measurement, grading, earthwork, site circulation, and site drainage, and examines the representation, application, and integration of site-related operations.

LAR X85L. Technology Workshop II.
Materials and methods of landscape construction, advanced site work techniques, and theories for material selection and application within the design process. Examines the representation, application, and integration of detail and design intent.

LAR X85M. Design Methods.
Examines methods of analysis and composition for landscape architecture and urban design. Readings, lectures, and discussions are applied to on-site assignments. Subjects include spatial, social, and ecological factors and their interactions.

LAR X86. Professional Practice.
Ethical, legal, economic, and administrative processes and responsibilities of the landscape architect practitioner.

LAR X87. Landscape Ecology.
Introduction to foundational concepts in landscape ecology, with emphasis on structure, function, and change of ecological systems. Addresses design and planning in relation to biological and cultural resources.

LAR X87K. Living Systems Design I.
Examine the inter-connections between geological, biological, and social systems of the designed landscape. Cover subjects such as plant ecology, plant communities, soils, and plant identification.

LAR X87L. Living Systems Design II.
Examine the design of living systems for the urban environment including soils, paving, plants and best management practices. Explore subjects such as principles and processes of planting design, ecosystems service optimization, and landscapes on structure.

LAR X87M. Living Systems Design III.
Examine emerging issues and contemporary debates related to the design and construction of living systems in the urban environment, including technical, ecological, and aesthetic considerations.

LAR X88. Topics in Landscape Architecture History and Theory.
Seminars on advanced topics in history and theory, including analysis, readings, and critique of significant positions, practice, and discourse.

LAR X88.1. Design Logics: Projection and Proportion in Architecture.

LAR X88.10. Representing Landscape and Architecture, 1500-Present.
Explore the roles of visual representation in design and professional practice from Leonardo da Vinci to the digital age. Review the history of techniques, media, and conventions of representation in architecture and landscape architecture and in their intersections.

LAR X88.2. Futures and Cities.

LAR X88.3. Romes Gardens and Landscapes.

LAR X88.4. Professional Design Practice: Baroque Rome.

LAR X88.5. Ethics of Care.

LAR X88.6. Hybridity in Landscape and Architecture.

LAR X88.7. Building Information Modeling and Representation.

LAR X88.8. Spatial Stories.

LAR X88.9. Twenty-Second-Century Materials.

LAR X88K. History and Theories of Landscape Architecture I.
Landscape architecture in formal, social, and cultural terms in the Western and Eastern worlds. Covers the development of ideas and principles related to context, designer, and text.

LAR X88L. History and Theories of Landscape Architecture II.
Landscape architecture from 1700 to the present, with a focus on design language, theoretical frameworks, and the critical components of contemporary landscape design and thought.

LAR X89. Research in Landscape Architecture.
Investigation of subjects in landscape architecture selected by the student with approval of the Graduate Studies Committee.

LAR X94T. Landscape Architecture Design Studio III.
Design problems that engage issues, theories, and methods central to the planning and design of large landscape architectural projects, including the landscape's role in urban form and city-making.

LAR X95. Landscape Architecture Design Studio IV.
Explore comprehensive synthesis of the core professional courses emphasizing the resolution and implementation of multiple interrelated objectives resulting in the technical resolution of a landscape architectural project.

LAR X95D. Frank Lloyd Wright: Design, Method, Theory.
Comprehensive study of Frank Lloyd Wright's life and work with emphasis on the analyses of his concepts of organic architecture, design methods, and theories.

LAR X95G. The American Home: Identity, Process, and Marketing.
An examination of how American housing is conceived, developed, and marketed, as well as relationships between home buyers and builders.

LAR X95J. Originality Tradition in Baroque Rome: Borromini.
Explores the synthetic act of design and notions of originality and tradition in the arts of Baroque Rome by studying Francesco Borromini and his work through the lenses of professional design practice, the arts, contemporary Galilean science, and papal society.

LAR X96E. Advanced Design Studio.
Explore particular concepts in landscape, often in collaboration with the architecture and community and regional planning disciplines.

LAR X97. Master's Design Study in Landscape Architecture-Preparation.
Investigation of subjects in landscape architecture selected by the student in preparation for Landscape Architecture 697K.

LAR X97K. Master's Design Study in Landscape Architecture.
Produce an independent design project in which investigation, design process, and critical evaluation are formulated. Implement a theoretical and research base, provide a comprehensive exploration of a landscape design topic, and offer insight for advancing the discipline.

LAR X97L. Landscape Architecture Practicum.

Professional Courses

LAS - Latin American Studies

Latin American Studies: LAS

Lower-Division Courses

LAS X01. Key Ideas and Issues in Latin America.
Broad introductory course to acquaint students with the main areas of interest in Latin American studies.

LAS X10. General Topics in Latin American Studies.
Topics that serve as an introduction to Latin America within the framework of different disciplines.

LAS X10.1. Latin American Civilization: The Colonial Experience.
A broad survey of the political, economic, social, and cultural aspects of the Latin American past, stressing both that area's achievements and its enduring problems.

LAS X10.2. Latin American Civilization: The National Experience.
A broad survey of the political, social, and cultural aspects of the Latin American past.

LAS X10.5. Film and History in Latin America: Colonial Period.
Introduction to selected subjects in Latin American history and culture through film, readings, documentaries, class discussion, and lectures.

LAS X10.6. Film and History in Latin America: Modern Period.
Introduction to selected subjects in Latin American history and culture through film, readings, documentaries, class discussion, and lectures.

LAS X10.7. Liberation in the African Diaspora.
Examination of liberation and freedom struggles in the African diaspora, focusing on common intellectual, political, and social currents among the diaspora's various groups. Course focuses on three major themes: abolitionism, Pan-Africanism and national liberation, and hip hop. Particular emphasis will be on the ideas associated with these movements, and the major organizations and intellectual currents in all three.

LAS X10C. Afro-Brazilian Diaspora.

LAS X10D. Early Mesoamerican Religions.
Introduction to the study of indigenous religions in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, from approximately 250 BC - AD 1700. Examine the role of religion and ritual in daily life, as well as the lines of evidence available today for understanding them.

LAS X10I. Latinx Digital Worlds.
Explore how Latinx communities (traditionally figured as on the wrong side of the "digital divide") have embraced, mobilized, and sometimes usurped emerging digital tools and spaces to forge community and create new forms of culture, memory, and activism.

LAS X10R. Latin America and the United States.
An exploration of the different social, economic, political, and cultural structures and concerns that came to both divide and unite the western hemisphere (North, Central, and South America, as well as the Caribbean) following independence from Europe.

LAS X15. Introductory Topics in Latin American Social Sciences.

LAS X15.1. Anthropology of Latin America.
Provides a framework for understanding contemporary concerns in Latin America.

LAS X15.2. Introduction to Mesoamerican Archaeology.
Introduction to ancient Mesoamerica from the time of emerging social inequality in the formative period until the Spanish conquest of Mexico-Tenochtitlan in the sixteenth century.

LAS X15.3. Introduction to Jewish Latin America.
Historical and cultural analysis of how Jews constructed lives and communities in predominantly Hispanic, Catholic countries of Latin America.

LAS X16C. Latinx Material Culture.
Discuss utilizing material culture as a method of analysis to highlight histories of oppression, struggles towards liberation, and the politics of everyday Latinx life in the U.S..

LAS X16L. Introduction to Religions of Latin America.
Examine a survey of religious practice across Latin America and the Caribbean.

LAS X19. Geography of Latin America.
Adaptations to population growth and spatial integration in cultural landscapes of great natural and ethnic diversity; problems of frontiers and cities.

LAS X19S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAS X29S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAS X82. Conference Course in Latin American Studies.
Individual study to be arranged with a faculty member.

Upper-Division Courses

LAS X19S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAS X22. Topics in Latin American Studies.
Topics vary each semester to allow curriculum flexibility for faculty members and visiting scholars.

LAS X22.10. Minorities and the Media.
Issues concerning minority or nondominant groups within the United States. Survey of minority communication problems: alienation, fragmentation, media and Internet access; criticism and feedback for minority groups based on racial/ethnic background, age, sex, disability, social or economic class, and sexual orientation.

LAS X22.11. Narrative Journalism.

LAS X22.13. Latin American Theatre and Drama.

LAS X22.15. Indigenous Languages of the Americas.
Examines various aspects of languages in the Americas, including their linguistic structures, the cultural domains in which they exist, and their histories of language contact and change.

LAS X22.19. Afro-Caribbean Diasporas.
Analysis of the socio-cultural contexts of the African diaspora in the Americas, with a specific focus on the African diaspora in the islands of the Caribbean. Designed to analyze the cultural, social, and philosophical contributions of these diasporic populations and the ways they build social and cultural agency in their specific national or diasporic contexts.

LAS X22.20. Journalism and Press Freedom in Latin America.
Focus on journalism in Latin America with an emphasis on the struggle for democracy and press freedom in the region through country-by-country survey of historical, political, economic, cultural, ethnic and

geographical aspects. Examination of the evolution of professional journalism in Latin America, including topics such as the legal framework for freedom of expression, ethical principles, concentration of media ownership and the emergence of digital media. Knowledge of Spanish language is recommended, but it is not a requirement.

LAS X22D. Religions of the Caribbean.

Examine the histories and politics of religious practices in the Greater Caribbean, encompassing the islands and Central American coasts as well as the continental diasporas, from Vodou and Rastafari to popular Hinduism.

LAS X22E. Latino Migrations and Asylum.

LAS X22F. Latino Migration and Human Trafficking.

Critically examine the complexity and intersectionality of Latino migration and human trafficking from global, regional, and local perspectives.

LAS X22G. Black Freedom Movement.

LAS X22L. Empires: Aztec and Spanish.

Examine the daily life of people in the Mexica (commonly known as Aztec) empire after the Spanish conquest.

LAS X22M. Colonial Encounters in Mesoamerica.

Study European-indigenous encounters in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, between approximately 1450-1750. Examine strategies of contact, accommodation, and resistance that indigenous communities and European colonizers used to communicate with each other and negotiate the conduct of daily life in colonial society.

LAS X22N. African Religion in the New World.

Explore the contributions of scholars and artists who engage African diaspora religions in their work through multiple conceptual approaches.

LAS X22Q. Afro-Latinidades in the United States and Latin America.

LAS X24G. Sexuality in Global Perspective.

Explore the ways in which sexuality intersects with money, intimacy, power, and labor in the context of global economic processes.

LAS X24L. Topics in Latin American Anthropology.

Topics vary each semester to allow curriculum flexibility for faculty members and visiting scholars.

LAS X24L.10. The Civilization of the Maya.

Maya prehistory and history: the archaeological record, codices and inscriptions, and Spanish conquest writings.

LAS X24L.13. Colonial Latin American Archaeology.

Focuses on the Spanish colonies in Latin America.

LAS X24L.15. Global Indigenous Issues.

Explores contemporary issues of indigenous peoples around the world through films, literature, and social science readings and focuses on how indigenous peoples are actively working to oppose their oppression and create sustainable futures.

LAS X24L.16. Mexican Immigration Cultural History.

Examines the history of Mexican immigration to the United States, and provides an overview of migratory patterns dating back to the late prehistoric period through contemporary times.

LAS X24L.17. Black Women and the State.

Surveys black women's experiences living with and confronting state oppression around the world. Takes an historical, social, and theoretical look at the roots of this oppression and inequality, and how black women have chosen to respond to it locally and globally.

LAS X24L.18. Inca World.

Explores how Inca civilization developed, how the Incas grew from a small highland state into a mighty empire, and how a small number of Spaniards and their allies were able to bring the Inca dynasty to an end. Read accounts of the Incas written in the first years of Spanish colonial rule, and review the latest archaeological discoveries.

LAS X24L.19. Globalization in Latin America.

Critically examine the globalization phenomenon in Latin America, focusing on history and ethnography.

LAS X24L.20. Mexican American Indigenous Heritage.

The prehistory, history, and contemporary racial understanding of Mexican Americans.

LAS X24L.21. Cultures in Contact.

History of the interactions of the indigenous peoples of the Americas with Africans, Asians, and Europeans over the past five hundred years.

LAS X24L.22. Arab Latin Americas.

Examine the ways in which Arab immigrant identities have been negotiated and co-opted socially, but also institutionally, in various countries in the Western Hemisphere.

LAS X24L.23. Global Black Feminisms.

Examine Black feminist theories and practices around the world from a transnational and comparative perspective.

LAS X24L.24. Mesoamerican History and Oral Tradition.

Study Mesoamerican indigenous documents and oral traditions to reconstruct different aspects of the life and culture of the past and present populations of Mesoamerica. Apply a methodological approach to the study of indigenous primary sources from Mesoamerica, written during the Late Postclassic (c. 1200-1524 CE) and the beginning of the Colonial period, including oral tradition. Explore religion, socio-political organization, territory and territoriality, economy, gender roles, and the norms and values of everyday life.

LAS X24L.25. Maya Collapse.

Explore different aspects of Classic Maya daily life, their relationship with the environment, and the factors that influenced the transformation of the Maya civilization at the end of the Classic period.

LAS X24Q. Daily Life in Mesoamerica.

Examine the daily life of people in Mesoamerica, from the earliest inhabitants in the region to the myriad ways that Precolumbian life and archaeology affect the lives of people today.

LAS X24S. Jewish Cuba.

LAS X25. Topics in Latin American Sociology.

LAS X25.2. Social Change in Developing Nations.

Overview of changing social structure in the Third World.

LAS X25.4. Politics and Society in Latin America.

Introduction to present-day Latin American politics and society with a focus on drug-trafficking and urban destitution in Brazil; party politics, protest, and collective violence in Argentina; the current political situation in Venezuela; and migration from Central America and the Caribbean to the United States. Also includes a general overview of revolutions and revolutionary movements in Latin America, and the effects of United States intervention in the region during the twentieth century.

LAS X25.5. Consumption in Latin America.

Study of the role consumption plays in social, economic, and political relations in Latin America, as well as contesting ideas about this role.

LAS X25.6. Latinx Sociology.

Explore how institutions have shaped the gendered, racial, and class-based experiences of Latinxs from a sociological perspective, including historical patterns of Latinx migration to the United States, contestations over racial classifications, and problematic issues surrounding the term Latino. Review more recent studies that show how different institutions shape the Latinx experience and demonstrate how gendered, racial, and classed forces have shaped various Latinx communities. Examine Latinx agency and how Latinx communities have sought to reconfigure and push back on these social forces.

LAS X25E. Geographies of Latin American to United States Migration.

Examine the contemporary complex multi-scalar origins, patterns, and processes of Latin American and Caribbean migration and settlement in the United States. Through a place-specific, spatially contextualized, and historically situated approach, explore the collective and individual experiences of migrants, asylum seekers, and refugees from select nations including: Mexico, Guatemala, Honduras, El Salvador, Puerto Rico, the Dominican Republic, Haiti, and Cuba. Analyze the multi-

layered factors shaping diverse Latin American migratory patterns and processes.

LAS X25S. Statistical Analysis of Social Disparities.
Analysis of racial inequality through social statistics.

LAS X26. Topics in Latin American Music.

LAS X26.2. Music of Latin America.
Consider Latin American music within a broad cultural and historical framework. Latin American musical practices are explored illustrating the many ways that aesthetics and society are embodied in and negotiated through performance. Concepts include diaspora, colonialism, mestizaje, hybridity, migration and globalization.

LAS X26.4. Music of the Andean Countries.
Introduction to the music of Andean countries including Colombia, Ecuador, Peru, Bolivia, and Chile. Explores the role music plays in shaping historical and modern Andean societies, as well as how music comments upon national culture, society, and politics, with particular attention to the ways in which musicians and musical movements continue to influence Andean societies. Subjects include pre-Columbian and colonial music making; music representative of the tripartite indigenous, African, and Iberian heritage of Andean countries; aesthetics, identity, and musical expression; ritual, religion, and the politics of musical performance.

LAS X26C. Music of Brazil and Argentina.
An introduction to Brazilian and Argentine music from samba, capoeira, and forro to tango, cumbia villera, and chacarera; examines such music making within its various historical, social, and political contexts. Uses course readings, lectures, listening assignments, performance attendance, and movie screenings to analyze themes including nationalism and ethnicity, globalization and development, and democracy and social justice.

LAS X26D. The Music of the African Diaspora.
The musical legacy of the African slave trade in the Americas, the social contexts in which black musical forms have developed, and their varied forms. Subjects include the shifting meanings of "black music" in various contexts; the notion of hybridity; the uses of African influenced music as a political or oppositional tool; and African ethnic groups represented prominently in the New World, the traditions they brought with them, and the ways they have been adapted to new ends.

LAS X26M. Music of Mexico and the Caribbean.
Introduction to the history of Mexican and Caribbean traditional and commercial music, with some discussion of classical music as well. Attention will be given to music of indigenous, African, European, and mixed origin. Mexico and the Spanish-speaking Caribbean receive special attention. Class meetings will be divided into lecture/discussion segments, videos, listening, and performance instruction/demonstration.

LAS X27. Topics in Latin American Art History.

LAS X27.1. Chicano Art Histories and Futures.
Mexican American art since the 1960s, with an emphasis on the visual production and exhibition of identity inside and outside the Chicano civil rights movement and the politics of U.S. multiculturalism. An introduction to a broad range of art history written to date--including recent feminist and queer interventions--as a means of envisioning a supposed "post-Chicano" or "post-racial" moment.

LAS X27.10. Architecture and Sculpture in the Maya World.
Explore the ancient world of the Maya through the lens of architecture and sculpture.

LAS X27.11. Aztec Art and Civilization.
An introduction to the art, symbolism, and visual culture of the ancient Aztecs. Subjects include the representations of history and mythology in architecture, stone monuments, and pictorial manuscripts.

LAS X27.2. Modern Art of Mexico.
Mexican visual culture from the late nineteenth century through 1968. Emphasis on the emergence of modernist avant-gardes and popular entertainment, and their ambivalent relationship to state, church, and market. Also explores how self-consciously negotiating the tension between native and international influences, artists, critics, and curators contributes to notions of Lo Mexicano, or "Mexicanness.

LAS X27.3. Mesoamerican Art and Culture.
Mesoamerican art, architecture, and its archaeological context, with emphasis on the social function of art and visual culture in ancient Mesoamerica up to the time of European contact.

LAS X27.5. Maya Art and Architecture.
Introduction to the artistic traditions of the ancient Maya, tracing their development up to the time of European contact. Students will examine various important themes of Maya culture including history, ritual, and cosmology as revealed in sculpture, hieroglyphs, painting, and architectural design.

LAS X27.6. Art and Archaeology of Ancient Peru.
The growth of civilization in South America from the earliest decorated textiles, pottery, and ceremonial buildings to the imperial Inca style.

LAS X27.7. Art Cinemas of the Americas.
Examine art cinemas from the Spanish-speaking Americas from the 1950s to the present.

LAS X27.8. Apertures: Film and Photography Through Greater Mexico.
Exploration of the historical and aesthetic linkages and affinities between filmmakers and photographers working in greater Mexico, including prominent visitors and Americans of Mexican descent. Considers how Mexican culture is represented but also how borders between Mexico and the wider world--as well as among media--were blurred or brought into sharper focus by these exchanges.

LAS X27.9. Contemporary Latin American Art.
Development and sources of art in the Caribbean and Central and South America from the 1960s to the present.

LAS X28. Topics in Latin American Arts, Literature, Film, and Dance.

LAS X28.1. Samba to Hip Hop: Brazilian Popular Music.
Examines the role of popular music in relationships of power with subordination and the impact of music as a form of cultural expression.

LAS X28.10. The United States in Latin American Culture.
Explore how Latin American and Latinx writers and artists have used the United States and globalization tropes, not just to come to terms with politics, popular culture, crime, technology, gender, and race, but also to talk about themselves.

LAS X28.11. Modern Brazil.
Explore modern Brazilian urban culture and the processes and contexts that led to the modernization of Brazil.

LAS X28.12. Jews of the United States, Canada, and Latin America.
Explore the cultural history of Jews in the United States, Latin America, and Canada through a representative sample of short literary texts, film clips, and musical recordings.

LAS X28.13. Latinx Caribbeans: Culture and Diaspora in the United States.
Explore prominent Latinx poets, writers, performers, and media artists connected to several diaspora communities from the Hispano-, Franco-, and Anglophone Caribbean in the United States.

LAS X28.14. Music, Power, and Politics in Latin America.
Analyze how popular music and more sound-related media in Latin America have played central roles in the expression of global citizenship, national and transnational identities, social justice, race, gender, and sexuality.

LAS X28.15. Indigenous Relations.
Explore the multi-layered relations of Indigenous Peoples to the land in the context of late twentieth- and early-twenty-first century Latin America.

LAS X28.16. Cuba in Question.
Explore Cuba's peoples, cultures, ethnicities, and the social and historical processes that go far beyond the common media stereotypes.

LAS X28.17. Queer/Trans Performance.
Explore the ways performance serves as an alternative space of expression and worldmaking, a site of activism and resistance, and a creative outlet for queer and trans people in specific socio-cultural contexts.

LAS X28.2. Global Brazil: Immigration and Diaspora in Brazilian Culture.
Examination of twentieth-century literature, films, and other cultural artifacts that capture the multicultural reality of Brazilian society and challenge the image of Brazil as a unified, harmonious, racially-mixed nation. Subjects include contemporary textual and visual representations of the Brazilian diaspora in the United States and Europe.

LAS X28.3. Afro-Luso-Brazilian Worlds.
Examine the myths and realities in the Afro-Luso-Brazilian worlds and the connections and contrasts between them.

LAS X28.5. Mediascapes: Literature and Media in the Caribbean.
Analyzes the relationship between literature and media technologies in contemporary Caribbean cultures.

LAS X28.6. Race and Visual Culture in Latin America.
Examine race and visuality in several countries of Latin America.

LAS X28.8. Spanish Storytelling.
Explore the Spanish storytelling tradition, with a focus on famous Spanish language authors who have enjoyed a broad reception in the English-speaking world.

LAS X28.9. Spectacular Brazil.
Explore the global, historical, thematic, and performative aspects of Brazilian culture using cultural texts, film, popular music, art, and photography.

LAS X28C. Transnational Latinx Popular Culture.

LAS X29S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAS X30. Topics in Latin American Geography.

LAS X30.2. Landscapes of Mexico and Caribbean America.
The natural regions and cultural landscapes of Mexico, Central America, and the West Indies.

LAS X30.3. South America: Nature, Society and Sustainability.
Field study of environmental and social change in selected landscapes in South America, such as protected areas; places of food production; transportation routes; migrant landscapes; urban areas; sites of cultural and historical importance; and issues of human rights.

LAS X30.4. Mapping Latin America.
Discuss the role of maps in the creation of Latin America as a specific sort of place. As such, allows familiarity with a broad overview of Latin American history from Pre-Columbian civilizations to the modern period.

LAS X30.5. Vulnerability to Natural Hazards.
An interdisciplinary approach, set right at the nexus of both physical and human geography, to studying the types of natural disasters that occur throughout Earth with a focus on tropical areas. Explore a region's susceptibility to natural disasters by studying the physical phenomena that incite specific hazards so that their spatial distribution can be outlined. Utilize theoretical frameworks that can expose the social causes of human vulnerability, the political repercussions of disasters, and how disaster response varies from country to country depending on varying political stances and economic conditions.

LAS X30.6. Sustainable Maya Geographies - Past to Future.
Explore landscapes, conservation, and human-environment dynamics in the Maya region of Central America from more than 10,000 years ago to modern times. Compare sustainable practices from the past with those of indigenous Maya communities today to guide the future.

LAS X31. Water Resources in Latin America and the Caribbean.
Examine the variability of landscapes, climatic regions, and anthropogenic activities found throughout Latin America and the insular Caribbean to explore the complex issues related to water resource accessibility.

LAS X37L. Issues in Third World Development.
Explore important issues in the politics of developing countries.

LAS X37M. Topics in Latin American Politics.
Topics vary each semester to allow curriculum flexibility for faculty members and visiting scholars.

LAS X37M.5. Introduction to Latin American Government and Politics.
An introductory survey of Latin American political systems: governmental organization, political processes, and current problems.

LAS X37M.9. The Military in Politics.

LAS X37O. Law and Democracy in Latin America.
Explore many of the challenges to the rule of law across Latin America and how they affect the quality of democracy in the region.

LAS X37P. International Politics of Latin America.
Analyze Latin America's political and economic relations with respect to external actors.

LAS X37Q. Politics, Economy, and Society of Contemporary Brazil.
Examine major economic, political, and sociological developments in Brazil.

LAS X37R. The Politics of Development in Latin America.
Examine the struggle for development in Latin America.

LAS X37S. Latino Politics.
Explore the political experiences of the United States Latino populations.

LAS X37T. The Politics of Mexico.
Explore Mexico's political and economic development.

LAS X55. Topics in Latin American Economics.
Topics vary each semester to allow curriculum flexibility for faculty members and visiting scholars.

LAS X55.1. Development Problems and Policies in Latin America.
Analysis of the economies of Latin America. Issues may include the structure and functioning of cities, rural-urban migration, the sectoral composition of GDP and employment, and determinants of growth.

LAS X59H. Honors Seminar.
An interdisciplinary discussion and writing seminar. Lectures and supervised individual research and writing of a substantial paper on a special topic.

LAS X66. Topics in Latin American History.
Topics vary each semester to allow curriculum flexibility for faculty members and visiting scholars.

LAS X66.12. Modern Brazil.
The social, economic, political, and cultural forces that have shaped modern Brazil.

LAS X66.13. Revolution in Modern Latin America.
Comparison of the Mexican and Cuban revolutions and of their challenges to inter-American relations.

LAS X66.15. History of Modern Central America.

LAS X66.16. Culture and Identity in Colonial Mexico.

LAS X66.17. The Cuban Revolution and the United States.
The special economic and political relationship between the United States and Cuba from 1898 to 1967; and how the 1959 revolution affected the Cold War relationships between East and West, North and South.

LAS X66.18. History of the Caribbean.
Overview of Caribbean history from 1492 to the present. Topics include contact between European and native cultures, piracy, slavery, colonialism and decolonization, and revolutions.

LAS X66.19. Twentieth-Century Rural Latin America.
Examines causes of some of the unresolved conflicts affecting Latin America today, including the social-agrarian relationships linking landlords and campesinos; the role of the state and the impact of official ideologies involving indigenous people; religion and the Catholic Church; the history of rural institutions; and the success or failure of land reforms.

LAS X66.2. Colonial Latin America.
Basic survey course, designed as an introduction to Latin American history in the colonial period.

LAS X66.20. Colonial Latin America through Objects.
Examines objects, such as paintings, reliquaries, monstrances, and churches from colonial Latin America in order to understand colonial culture. Includes critical reading of original texts.

LAS X66.21. Church and State in Latin America.
History of Church-state relations and religious politics in modern Latin America, with emphasis on the nineteenth to early twentieth-century periods.

LAS X66.22. Reimagining Cuba, 1868-Present.
Explores Cuban-United States relations from the nineteenth century to the present, including issues of empire and transnationalism, and social change engagements between Cuba and the United States before and after the Cuban Revolution.

LAS X66.24. Rethinking the Conquest of Mexico.
Explores the "conquest" of Mexico and the social, cultural, political, and economic processes which were set in motion by the Spanish invasion of Mexico.

LAS X66.27. Cultural Citizenship in the United States and Latin America.
An introduction to the history of relations between the United States and Latin America. Designed to prepare each student for a potential experience in Latin America (or with Latino communities in the United States) such as study abroad, research, and/or community engagement.

LAS X66.28. Argentina: Populism and Insurrection.
An overview of principal trends and issues in Argentine history from independence to the present.

LAS X66.29. Religion, Conquest, and Conversion in Colonial Latin America.
Focuses on the histories of the Catholic Church and religious devotion in colonial Latin America between 1521 and 1821.

LAS X66.3. Modern Latin America.
Continuation of History 346K and Latin American Studies 366 (Topic 2).

LAS X66.31. Afro-Latin America.
Examines the historical experiences of people of African descent in Latin America and the Caribbean beginning in the slavery era, and focuses on the histories of Afro-Latin Americans after emancipation.

LAS X66.32. Latin America in the Nineteenth Century.
Questions the geographical category of Latin America by examining the kinds of trends and forces of the nineteenth century that contributed to its conceptual emergence and to its growing political, economic, and cultural significance on the global stage.

LAS X66.34. The Bible in the Colonial Americas.
Varied perspectives on the central role played by the Old Testament in the construction of colonial cultures in the Americas.

LAS X66.35. When Christ was King.
The history of Catholicism in twentieth-century Mexico, often seen as Latin America's most "Catholic" nation.

LAS X66.36. Urban Slavery in the Americas.
Examines urban slavery in the Americas.

LAS X66.37. Chile: From Revolution to Counterrevolution.
An examination of the key political, social, and economic events that underpin contemporary Chilean society.

LAS X66.38. Latin America in the Sixties.
Explore the impact of the Cuban revolution in Latin American politics, gender roles, and women's participation in public life during the sixties.

LAS X66.39. Life and Politics in Contemporary Mexico.
Examine an overview of life and politics in contemporary Mexico.

LAS X66.40. Politics of Food in Latin America.
Examine food production, food consumption, and socio-cultural identities in Latin America through comparative and multidisciplinary research.

LAS X66.41. Sexuality and Gender in Latin America.
Explore gender as a broad analytical tool to understand key problems concerning social organization, power relations, and inequality in contemporary Latin America.

LAS X66.43. Debt and Colonialism in the Caribbean.
Examine the role that debt has played in the formation of colonial and neocolonial practices in the Caribbean region. Take a broad approach to the concept of debt in order to explore the financial and monetary dynamics of debt, but also the political and cultural implications of debt. Focus in particular on debt as justification in the furtherance of colonialism throughout the Caribbean. Engage in a historical examination of the United States' colonial projects and military interventions in the region throughout the 20th and into the 21st centuries.

LAS X66.44. Race Against Empire: Americas.

LAS X66.45. History of Modern Mexico, 1940-present.
Introduction to the history of modern Mexico from the close of the Mexican Revolution (1940) to the present.

LAS X66.46. The Mexican Revolution, 1910-1940.
Explore the initial decade of the Mexican Revolution, the first of the twentieth-century nationalist social revolutions. Examine the historical antecedents and the political, economic, social, and intellectual elements of the upheaval.

LAS X66.47. Mexican Americans in Texas History.
Introduction to the historical experience of Mexican-American persons in Texas.

LAS X66.7. Resistance, Rebellion, and Revolution in Colonial Spanish America.

LAS X66.9. Revolution in Twentieth-Century Latin America.
An introduction to recent Latin American history, with emphasis on phenomena that explain the apparent social unrest and political instability of the region.

LAS X66C. Nationalisms in the Caribbean.

LAS X66D. Race, Rebellion and Revolution in the Caribbean.

LAS X70P. Topics in Luso-Brazilian Literature, Culture, Civilization, and Linguistics.
Taught in Portuguese.

LAS X70P.10. United States Latino Literatures and Cultures in Context.
Examines the United States Latino literary and cultural production from a multidisciplinary perspective, through literature, film, music, and performance. Analyzes the literatures and experiences of Brazilian American writers and artists in their historical and cultural specificities.

LAS X70P.11. Sociolinguistics.
Explores the interrelationship of language and society with reference to the Portuguese-speaking world. Examines how socio-economic , political, and anthropological factors like race, social class, gender, age, and identity influence linguistics forms.

LAS X70P.2. Introduction to Literatures and Cultures.
Overview of Luso-Brazilian literatures and cultures, including the arts and popular expressions from a multidisciplinary perspective. Among the regions studied are Brazil, Portugal, and related areas in Africa.

LAS X70S. Topics in Hispanic Literature, Culture, Civilization, and Linguistics.
Taught in Spanish.

LAS X70S.23. Violence in Contemporary Mexican Culture.
Studies the representation of violence in contemporary literary and cultural production in Mexico in order to understand social, political, and cultural implications of current violence there. Taught in Spanish.

LAS X70S.24. Gender Issues in Contemporary Latin American Cinema.
Studies Latin American cinema as a device of gender system formation and reinforcement, and as criticism of patriarchal hegemony; discusses questions related to sexuality depicted in Latin American films. Subjects covered include: maternity, prostitution, machismo, children's sexuality, homosexuality, heterosexuality, and gender violence in films from the 1930s to present. Conducted in Spanish.

LAS X70S.27. Introduction to Literatures and Cultures.
Overview of Iberian and/or Latin American literatures and cultures, including the arts and popular expressions, from a multidisciplinary perspective. Among the regions studied are Spain; North, Central, and South America; the Caribbean; and related areas in Africa.

LAS X70S.32. Jewish Voices from Latin America.
Overview of popular Jewish writers from Brazil and Spanish America, with special emphasis on those who portray in their work the situation of the Jewish communities of their respective cities and countries. Conducted in Spanish.

LAS X70S.35. Literature and Exile in the Spanish Caribbean.
Explore literary texts (e.g., poetry, chronicles, narratives, and short stories) that describe exile as a trope. Examine themes, such as literature, culture and colonialism, nationality and belonging (i.e., nation, transnation, and post-nation), nature, the sensorial and subjectivity, identity politics (i.e., race, gender, and sexuality), and the ethics of writing.

LAS X70S.39. Journalism and Human Rights in Latin America.
Explore the traditional definitions of Human Rights and the way those definitions have taken shape in the last two decades in Latin America.

LAS X70S.43. United States Latino Literatures and Cultures in Context.
Examines the United States Latino literary and cultural production from multidisciplinary perspectives, such as literature, film, music, and performance. Analysis of the literatures and experiences of United States Latino writers and artists in their historical and cultural specificities.

LAS X70S.45. Brevity in Spanish-Language Literature and Film.
Explore the work of Spanish and Spanish American filmmakers, prose writers, and poets who have accepted the challenge of expressing themselves in a brief span of time.

LAS X70S.46. Latin American Film and Culture.
Review Latin American cinema from the silent era to present, with an emphasis on the last forty years. Discuss the development of the film industry (particularly in Argentina and Mexico in the 1930s and 1940s), the "New Wave" of Latin American cinema in the 1960s, and contemporary trends.

LAS X70S.47. Latin American Literary and Artistic Environmental Activism.
Explore literary and artistic works that engage in questions of environmental care and justice in the context of twentieth- and twenty-first century Latin America.

LAS X70S.48. Migrations and Exiles in Latin American Literature and the Arts.
Explore how internal and international displacement and migration have been represented in Latin American arts.

LAS X70S.49. The Imagined Andes.
Examine the ways in which the cultural, social, and geographical space of the Andes has been "imagined" through literary texts, visual and audiovisual artworks by writers and artists from Bolivia, Ecuador, Chile and Peru.

LAS X78. Capstone Course in Latin American Studies.

LAS X79. Conference Course in Latin American Studies.
Supervised individual study of selected problems in Latin American studies.

LAS X79H. Honors Tutorial Course.
Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis.

LAS X82. Conference Course in Latin American Studies.
Individual study to be arranged with a faculty member.

Graduate Courses

LAS X19S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAS X29S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAS X81. Topics in Latin American Studies.
A varied selection of topics each semester, taught by different faculty members and visiting professors.

LAS X81.1. International Migration.

LAS X81.11. Information Resources on, and Services for, Hispanic Americans.
Information needs of Hispanic Americans; roles of academic, public, and school libraries in meeting those needs.

LAS X81.12. Information Resources on Latin America.
Historical survey of sources of information on Latin America: bibliographical literature from and about Latin America during the colonial, national, and contemporary periods; various types of book and nonbook sources of information available to contemporary scholars.

LAS X81.14. Introduction to the Sociology of Latin America.

LAS X81.15. Local Economic Development.

LAS X81.16. Maya Hieroglyphic Writing.

LAS X81.19. Political Economics of International Communication.

LAS X81.20. Regional Planning in Latin America.

LAS X81.22. Documentary Tradition of Latin America.
Study of still photographic and video documentary work by Latin Americans about Latin America. Production of photographic essays on Latin American culture.

LAS X81.23. Poverty and Marginality in the Americas.
Review of the past and present ethnographic analyses of the nature and experiences of poverty and marginality in Latin America and in the United States. Examines some of the most controversial issues and debates, and explores emerging research topics north and south of the border.

LAS X81.24. Contemporary Brazilian Art.
Examine art and activism in contemporary Brazil to explore how artists are relating to, reflecting on, and resisting the democratic erosion in the country.

LAS X81.25. Brazilian Cultural Theory.
Explore some of the most influential subjects and theories that have informed contemporary scholarship on the politics of Brazilian literary and cultural production.

LAS X81.26. Cultural Tropicalities.
Examine the centrality of Brazil, and the New World in general, in the context of global controversial meanings, symbology, memory, and knowledge of the inter-tropical cultural and geographic zone.
LAS X81.6. Housing Practices and Public Policy in Latin America.
LAS X81.8. International Business Fellows Seminar.
Multidisciplinary seminar for students in area studies, business administration, law, and public policy. The faculty includes both academics and business leaders.
LAS X81F. Methods for Social Science in Latin America.
LAS X82. Conference Course in Latin American Studies.
Individual study to be arranged with a faculty member.
LAS X83. Invisible Global Market.
LAS X84. Proseminar: Current Issues in Latin America.
LAS X84L. Topics in Latin American Politics.
A varied selection of topics each semester, taught by different faculty members and visiting professors.
LAS X84L.1. Brazilian Public Policies.
LAS X84L.2. Latin American Urban Politics.
LAS X84L.3. Development Policy.
LAS X84L.4. Policy Analysis.
Study of the nature and operation of the national policymaking process.
LAS X84L.5. Politics and Society in the Third World.
LAS X84L.6. Comparative Politics: Latin America.
LAS X86. Topics in Latin American History.
A varied selection of topics each semester, to allow curriculum flexibility for faculty members and visiting scholars.
LAS X88. Topics in Latin American Geography.
LAS X88.1. Regional Geography of Latin America.
Topics include land and life in Central America; culture, environment and development in Latin America; recent trends in Latin American geography.
LAS X88.2. Indigenous Maps, Architecture, and Enculturation of Colonial Mexico.
The encounter of Spanish and indigenous cultures and ecologies; regional diversity of agricultural, urban, and economic development from 1521 to 1810; ethnic transformation and new socioeconomic configurations.
LAS X88.3. Latin American Cultures, Environment, and Development.
Exploration through Latin American examples of issues of cultural identity and territory, adaptive strategies, environmental impact, conservation, cultural survival, parks and people, and sustainable development.
LAS X88.4. Environment and Health in Latin America.
Issues related to health, health care, and development in Latin America and the Caribbean, considered with the recognition that health depends on the interactions of social, economic, and political factors as well as on health care services.
LAS X90K. Proposal Preparation.
Prepare proposal for the doctoral dissertation.
LAS X91. Topics in Latin American Anthropology.
A varied selection of topics each semester, taught by different faculty members and visiting professors.
LAS X91.5. Race and Ethnicity in American Society.
LAS X91K. Topics in Latin American Economics.
A varied selection of topics each semester, taught by different faculty members and visiting professors.
LAS X91K.1. Seminar on the Mexican Economy.
LAS X91K.2. Current Issues in Latin American Economics.
LAS X91K.3. Latin American Economic Models.
LAS X91K.4. Entrepreneurship and Development in Latin America.
LAS X92P. Topics in Luso-Brazilian Literature, Culture, Civilization, and Linguistics.
LAS X92S. Topics in Hispanic Literature, Culture, Civilization, and Linguistics.
LAS X92S.1. Writing on the Edge: Literature and Incarceration.
Explore the critical potential of literature to interrogate mass incarceration and its relationship to systemic inequalities, including access to education, as well as the limits and possibilities of prison writing as a social and restorative endeavor to reimagine society.
LAS X93L. Qualifying Examination.
Prepare for qualifying examinations.
LAS X97R. Secondary Report.
Preparation of a report to be counted toward the requirement for the master's degree under the report option.
LAS X98. Thesis.
LAS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
LAS X99W. Dissertation.

Professional Courses

LAS X19S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
LAS X29S. Topics in Latin American Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in Latin American studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. LAS X82. Conference Course in Latin American Studies.
Individual study to be arranged with a faculty member.

LAT - Latin

Latin: LAT

Lower-Division Courses

LAT X01C. Beginning Latin.
Fundamentals of grammar and reading.
LAT X06. First-Year Latin I.
Fundamentals of grammar and reading.
LAT X07. First-Year Latin II.
Continuation of Latin 506.
LAT X09L. Reading Beginning Latin.
Continue exploring beginning-level Latin reading.
LAT X11. Intermediate Latin I.
Continuation of Latin 601C and 507. Introduction to reading classical authors in their cultural context. Includes grammar review.
LAT X11K. Accelerated Intermediate Latin.
LAT X12K. Intermediate Latin II.
Continuation of Latin 311. Selected readings from classical authors.
LAT X16. Intermediate Latin II: Poetry.
Continuation of Latin 311. Selected readings from classical and medieval poets.

LAT X19S. Topics in Latin.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAT X29S. Topics in Latin.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

LAT X19S. Topics in Latin.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAT X22. Advanced Latin I.
Reading and analysis of selected classical authors.

LAT X23. Topics in Advanced Latin II.
Reading and interpretation of prose and poetry texts at an early advanced level.

LAT X23.10. Sallust.

LAT X23.11. Battle Scenes in Roman Literature.

LAT X23.12. Vergil's Aeneid.

LAT X23.13. Ovid.

LAT X23.14. Exemplarity in Roman Literature.
Explore aspects of the Roman fascination with exemplarity, using examples from the past to teach lessons and offer role-models for the present.

LAT X23.15. Seneca and Stoicism.

LAT X23.16. Women in Augustan Literature.
Focus on reading, translating, and interpreting Latin literary portrayals of mythological women during the Augustan period.

LAT X23.5. Cicero and Catullus.

LAT X23.6. Elegy.

LAT X23.7. Images of Augustus.

LAT X23.8. Christian Martyrs in the Roman Empire.

LAT X23.9. Horace, Odes, and Satire.

LAT X24. Advanced Latin Grammar and Composition.
Study of syntax, style, and principles of written composition.

LAT X29S. Topics in Latin.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAT X65. Topics in Seminar in Latin.
Critical study of authors such as Horace, Livy, Lucretius, and Tacitus.

LAT X65.1. Horace.

LAT X65.10. Seneca.

LAT X65.11. Intertextuality.
Discusses the development, problems, and limitations of intertextuality in Roman Literature through a core group of texts, modern and ancient, which define our approach to and practice of intertextual reading.

LAT X65.12. Epyllion and Epos.
The development of Latin epic from Catullus to Lucan.

LAT X65.13. Vergil's Aeneid: Research and Writing.

LAT X65.14. Livy: Research and Writing.

LAT X65.15. Augustine's Confessions.

LAT X65.16. Portraits of Tyranny: Suetonius.
Examine two of Suetonius's most entertaining "Lives": Caligula and Nero.

LAT X65.17. Roman Historiography.

LAT X65.18. History and Epic.
Read and analyze parallel narratives in epic poetry and historiographical prose.

LAT X65.19. Ovid and Vergil in the Renaissance.

LAT X65.2. Lucretius.

LAT X65.20. Latin Canon in Context.

LAT X65.4. Tacitus.

LAT X65.8. Plautus and Early Latin.

LAT X65.9. Nero.
Introduction to our most important extant sources in Latin for Nero's life and reign: the biographer Suetonius, the historian Tacitus, and the philosopher Seneca.

LAT X70. Advanced Conference Course.
Supervised reading.

Graduate Courses

LAT X19S. Topics in Latin.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAT X29S. Topics in Latin.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Classics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LAT X80J. Proseminar in Classical Literature.
Brief survey of the history of classical literature; orientation to the major periods and genres.

LAT X80K. Topics in Proseminar.
An introduction to the research methodology and the ancillary disciplines used in current classical studies, or to certain disciplines such as meter, textual criticism.

LAT X80K.1. Research Methods in Classical Studies.

LAT X83. Topics in Graduate Reading.
Topics given in recent years include Latin literature survey, Latin prose, Seneca, and Augustine's Confessions.

LAT X83K. Current Concepts and Research in Latin.
An overview of important theories, issues, and research in classics.

LAT X85. Topics in Classical Latin Literature.

LAT X85.1. Caesar.

LAT X85.2. Lucretius.

LAT X85.3. Ovid's Metamorphoses.

LAT X85.4. Tacitus.

LAT X85.5. Vergil's Aeneid, Books VII-XII.

LAT X85.6. Catullus.

LAT X85.7. Vergil's Eclogues.

LAT X86L. Conference Course in Latin Language.
Directed reading.

LAT X90. Topics in Seminar in Classical Studies.
Selected topics in Roman studies. Topics given in recent years include Roman comedy, Pliny, and Roman fragmentary historians.

LAT X98R. Master's Report.
Preparation of a research report to fulfill the requirement for the master's degree.

LAT X98T. Supervised Teaching in Latin.
LAT X99W. Dissertation.

LEB - Legal Environment of Business

Legal Environment of Business: LEB

Lower-Division Courses

Upper-Division Courses

LEB X20F. Foundations of Business Law and Ethics.
Introduction to the legal problems confronting businesses in the global environment.

LEB X23. Business Law and Ethics.
An investigation of the role of law in society; introduction to legal reasoning, dispute resolution, judicial process, constitutional law, agency, torts, government regulations; business ethics; study of contracts.

LEB X23H. Business Law and Ethics: Honors.
An investigation of the role of law in society; introduction to legal reasoning, dispute resolution, judicial process, constitutional law, agency, torts, government regulations; business ethics; study of contracts.

LEB X34M. Healthcare Law and Policy.
Introduces the legal and political environment in which the U.S. health care system operates.

LEB X40S. Topics in the Legal Environment of Business.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or by the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Business, Government, and Society. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

LEB X61. Law of Business Organizations.
Study of basic legal principles of business organizations and operations, including practical comparison and assessment of advantages and disadvantages of different types of organization.

LEB X63. Real Estate Law.
An examination of law pertaining to estates and interests in land, conveyances and mortgages, brokers, easements, contracts, default and foreclosure.

LEB X66. Commercial Transactions.
Applied business transactions, with emphasis on the Uniform Commercial Code; emphasis on bailments, sales of goods, commercial paper, bank-customer relationships, creditor security devices, and bankruptcy.

LEB X72T. Topics in the Legal Environment of Business.
Selected topics on legal constraints affecting managerial decision making and business behavior.

LEB X72T.1. Social and Ethical Responsibility of Business.
Examine ethical aspects of the decision-making processes of managers and employees. Explore the responsibility of firms to society and other constituencies.

LEB X72T.2. Name, Image, and Likeness.

LEB X72T.3. Contracts and Real Property.
Focus on general real property interests, including land, mineral, and riparian interests. Discuss duty of landowners, nonpossessory interest in real property, fixtures, liens, co-ownership of real property, the real estate contract, the broker's listing agreements, deeds, and mortgages.

LEB X72T.4. Oil and Gas Law.
Explore ownership interests in the oil and gas mineral estate. Focus on conveyance and partition of the mineral estate, trespass and third party claims, and oil and gas lease provisions.

LEB X72T.6. Intergenerational Wealth Transfer.
Explore planning and management of wealth and estates through the use of wills, trusts, and gifts; intestacy, guardianships, marital property systems, and prenuptial agreements.

LEB X72T.7. Electricity Systems.

LEB X72T.8. Energy Law and Policy.

LEB X72T.9. Behavioral Economics, Energy, and Sustainability.

LEB X79. Independent Research in the Legal Environment of Business.

Graduate Courses

LEB X80. Topics in the Legal Environment of Business.
Selected topics on legal constraints affecting managerial decision making and business behavior.

LEB X80.10. Law of Wills, Trusts, and Estates.
Planning and management of estates through the use of wills, trusts, and gifts; intestacy, guardianships, marital property systems, and prenuptial agreements.

LEB X80.11. Environmental Dispute Resolution.
Theoretical and practical study of the prevention, management, and resolution of environmental disputes, such as those involving protection of endangered species, wetlands preservation, natural resource conservation, and liability for environmental damage and clean-up.

LEB X80.12. Legal Regulation of Unfair Competition.
Competitive actions that violate state or federal law, such as intentional interference with the contractual relations of others, defamation in business contexts, and misappropriation of trade secrets. Ethical and international dimensions are included where appropriate.

LEB X80.13. Commercial Transactions.
A comprehensive study of the legal framework for business transactions, including bailments, sales of goods, commercial paper, lender liability, bank-customer relationships, secured transactions, creditor rights, and bankruptcy.

LEB X80.14. Intellectual Property.
Legal aspects of protecting intellectual property, including patents, trade secrets, trademarks, and copyrights; the contractual licensing of these property rights and other legal aspects of technology.

LEB X80.16. Legal Aspects of Marketing.
State and federal laws on consumer protection, pricing (including price fixing and price discrimination), packaging, advertising, distribution, dealer control, and related topics. Ethical and international dimensions are included where appropriate.

LEB X80.17. Legal and Ethical Environment of Accounting.
State and federal regulations and tort and contract law principles that constrain accountants and create potential liability. Ethical and international dimensions are included where appropriate.

LEB X80.18. Products Liability.
Public policy, economics, and legal rules regarding liability for the manufacture or sale of defective products. Ethical and international dimensions are included where appropriate.

LEB X80.19. Employment Law.
State and federal laws on hiring, supervising, disciplining, and terminating employees: wrongful discharge law, discrimination law, workers' compensation and employee safety laws, and several related topics. Ethical and international dimensions are included where appropriate.

LEB X80.2. Antitrust Law and Economics.
Legal regulation of anticompetitive market structures and business practices, including political, economic, and historical factors. Monopolies, mergers, horizontal and vertical restraints of trade, and price discrimination.

LEB X80.20. Creating and Enforcing Contracts.
Legal rules and practical policies on creating, monitoring, and enforcing contractual rights in a wide variety of business settings. Ethical and international dimensions are included where appropriate.

LEB X80.21. Environmental Issues in Real Estate Transactions.
Federal and state environmental regulations affecting commercial real estate transactions, including the Comprehensive Environmental Response, Compensation, and Liability ("Superfund") Act, the Clean Water Act, the Endangered Species Act, wetlands regulation, and other related topics. Ethical and international dimensions are included where appropriate.

LEB X80.22. Law of Corporate Finance and Governance.
Legal rules and regulations applicable to a broad range of corporate financial issues, including agency theory, limited liability, valuation, bondholder rights, dividend policy, accountant and investment banker liability, and capital structure and leverage. Ethical and international dimensions are included where appropriate.

LEB X80.23. Law of Corporate Mergers and Takeovers.
Legal rules, policies, and economics of mergers, acquisitions, hostile takeovers, leveraged buyouts, and related topics. Ethical and international dimensions are included where appropriate.

LEB X80.24. Law of Real Estate Finance.
Federal and state regulation of real estate finance. Topics include creation, transfer, and discharge of mortgagor's and mortgagee's interests; mortgage substitutes; foreclosures; priority of liens; bankruptcy; and government intervention in the private mortgage market. Ethical and international dimensions are included where appropriate.

LEB X80.25. Bankruptcy Law and Debtor-Creditor Relations.
The legal framework governing the rights and duties of companies, and their owners, creditors, and other stakeholders, in times of severe financial distress. Includes liquidation and reorganization proceedings in bankruptcy as well as alternatives to bankruptcy. Ethical and international dimensions are included where appropriate.

LEB X80.26. Law for Entrepreneurs.
Legal issues and principles affecting the business entrepreneur, including those related to formation of the appropriate type of business organization, capitalization, protection of personal assets from business liabilities, protection of innovative ideas, hiring key personnel, and related topics. Ethical and international dimensions are included where appropriate.

LEB X80.27. Cyberlaw.
Highly focused coverage of intellectual property law (copyright, trade secret, patent, trademarks, and related topics) as it relates to computer hardware and software; substantial coverage of hardware and software licensing; Internet-related legal issues; antitrust issues in the computer industry; and other topics as time permits, such as encryption, privacy, and computer-system vendor liability.

LEB X80.29. Business and Public Policy.
Study of the nonmarket environment and its considerable effects on business organizations. Review of business strategies for influencing legislatures, the executive branch, court decisions, and the media.

LEB X80.3. Law of Commercial Real Estate Finance and Development.
The legal framework of commercial real estate finance and development, including basic real estate law concepts, legal aspects of financing techniques and instruments, subdivision land-use controls, environmental regulation of real estate development, and other topics.

LEB X80.30. Legal Environment of Business for MPA Students.
Introduction to the legal system, with particular emphasis on its applications to the accounting profession.

LEB X80.32. E-Commerce: Law, Policy, and Strategy.
The responsibilities of the strategist for choosing, developing, and managing an overall e-business firm strategy in uncertain legal, market, technology, and policy environments.

LEB X80.33. The Legal Life Cycle of a Technology Start-up.
Comprehensive coverage of the legal issues faced by a technology start-up firm, including choice of an organizational form, employee compensation issues, negotiating real estate leases, protecting intellectual property, raising capital, and taking the firm public.

LEB X80.37. Financial Crisis and Restructuring.
Studies the business and legal issues of corporate financial crises. Includes crisis simulation, moot court participation, and guest lectures by restructuring and insolvency professionals.

LEB X80.38. Energy Law: Regulating Energy Production.
Examination of the federal, state, and local regulatory regimes governing the production of energy in the United States, including the licensing regimes for electric generation (renewable, nuclear, and fossil-fueled) and the regulation of fossil fuel extraction. Discussion of the statutory regimes regulating coal mining, oil and gas production, fossil-fueled electricity generation, nuclear power plants, hydroelectric plants, and utility-scale wind and solar farms. Covers related issues, including policies aimed at hastening the decarbonization of the electricity sector in an increasing number of states and municipalities, and policy conflicts associated with the growth of hydraulic fracturing to produce oil and gas.

LEB X80.39. Energy Law: Regulating Energy Markets.
Examination of the regulatory regimes governing the sale and delivery of energy in American energy markets, with focus on the economic regulation of electricity, natural gas, and oil markets. Discussion of how federal and state regulatory commissions regulate price and competition in interstate markets under the Federal Power Act and the Natural Gas Act, respectively, and in intrastate markets under analogous state laws. Covers related issues, including the effects of the rapid growth in renewable generation, the move toward increasing competition and market pricing, legal rules governing the siting of natural gas and electric transmission lines, the pricing of transmission services, rules governing the development of LNG terminals, and disputes over the pricing and regulation of distributed energy resources (such as rooftop solar or demand response).

LEB X80.4. Legal and Ethical Environment of Finance.
Covers all aspects of securities regulation, including the legal responsibilities and liabilities of investment bankers, stock analysts, hedge fund managers, auditors, and other securities industry professionals; corporate disclosure requirements; public offering rules; insider trading; mergers and acquisitions; shareholder rights; and relevant ethical and global implications.

LEB X80.5. The Law and the Multinational Corporation.
Study of the legal environment in which the multinational enterprise operates, including negotiation and drafting of international contracts, international dispute resolution, expropriation, international investment regulation, letters of credit, tax havens, and cultural and ethical issues.

LEB X80.6. Intellectual Property and Antitrust.
Relationships and tensions between laws designed to encourage competitive markets (antitrust laws) and those that grant limited monopolies (patents, copyrights, and trademarks).

LEB X80.7. Corporation Law.
Legal framework for the formation and operation of partnerships and corporations, including limited liability partnerships and limited liability corporations; introduction to securities regulation concepts such as insider trading, mergers, and acquisitions.

LEB X80.8. Legal Environment of Business.

LEB X80.9. Law of the Entertainment Business.
Legal aspects of management in the entertainment industry, including contractual and financing arrangements, licensing, and copyright.

LEB X80C. Legal Environment of Business.

LEB X80D. Managing Social and Political Risk.
Examine the sources of social and political risks. Explore how individual firms and groups of firms can work alongside legislators, regulators, courts, social movements, and other stakeholders to gain competitive advantage.

LEB X81. Managing Legal and Regulatory Risk for Executives.
Examine how organizations manage legal and regulatory risks, as well as an organization's responsibilities to society.

LEB X86E. Topics in Legal Environment of Business.

Professional Courses

LIN - Linguistics

Linguistics: LIN

Lower-Division Courses

LIN X06. Introduction to the Study of Language.
Survey of major areas of linguistics: sound systems, grammatical structures, historical development of languages, language families and linguistic universals, dialect differences and their social significance.

LIN X12. Topics in Interdisciplinary Approaches to Language.
An interdisciplinary and multidisciplinary introduction to the manifold aspects of language.

LIN X12C. Culture and Communication.
An introduction to the study of culture through communication and the theory of signs.

LIN X12D. Languages around the World.
Explores the language families of the world. Considers such questions as: what does it mean for languages to be related, and how do we know that they are related in the first place; why are there only a handful of language families in Europe and Africa while there are scores in South America and New Guinea; What can we say about where a language or language family may have originated; and how much living history is being lost as languages become endangered or extinct when people stop speaking them?

LIN X12E. Language of Sign and Gesture.
Explores how language, a faculty that arises in the brain, is expressed by the body, both for spoken languages (via the vocal tract) and for signed languages (via the hands and face). Also includes an examination of how language, a special cognitive faculty unique to humans, intersects and overlaps with other communication systems, with a focus on gesture, the nonlinguistic communicative systems used by humans and some nonhuman species.

LIN X13. Language and Computers.
Examine a conceptual, non-programming overview of how computers learn, understand, and generate human language, including text encoding, machine learning, language modeling, and text generation. Study what makes human language difficult for computers, how these challenges are overcome, and implications for society. Engage in quantitative reasoning; technical background not required.

LIN X15. Speech Science.
Neurophysiological mechanisms underlying the encoding and decoding of speech.

LIN X19S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LIN X29S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

LIN X19S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LIN X21L. American English.
An overview of the historical development of English in the Americas. Attention to regional, social, and ethnic differences, and their implications for public education.

LIN X23L. English as a World Language.
An account of the spread of English around the world; national, social, and regional varieties.

LIN X29S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LIN X44K. Phonetics: The Production and Perception of Speech Sounds.
Articulation and transcription of speech sounds; distinctive feature systems; physiological and acoustical aspects of phonetics; common phonological processes.

LIN X45. Language Change and Language Variation.
Introduction to the study of how languages change and the principles developed by linguists to account for these changes. Investigation of the various domains in which change occurs, and the social and linguistic motivations for change. Examines the methods linguists use to determine the earlier profile of a language or its parent language, before identified changes occurred.

LIN X46. Exploring Accents.
Explores how different speakers of the same language differ in their pronunciation, according to regional and social groupings. Acoustic analysis of English speakers will provide the basis of an inquiry into how and why accents differ.

LIN X50. Special Topics in the Study of Language.
Nontechnical examination of social, educational, and political problems to which current linguistic knowledge is relevant.

LIN X50.10. How to Describe a Language.
Practical introduction to language documentation and preservation. Subjects include language diversity and practical methods for describing, documenting, and preserving languages, with an emphasis on the phonological and morphological analysis of restricted data sets, as

well as the role of linguists in conjunction with communities of speakers who wish to document or revitalize their languages.

LIN X50.11. Speech Intelligibility.

An overview of the main empirical findings on talker-, listener-, and signal-related factors that shape speech intelligibility, the degree to which spoken language can be comprehended. Explores how signal-related (physical), peripheral (auditory-perceptual), and system-related (mental) factors condition variation in both the production and perception of intelligible speech. Also examines how variation in intelligibility conditions different levels of spoken language processing and different tasks that the listener is performing during spoken language comprehension.

LIN X50.12. Analyzing Text Data: A Statistics Toolkit for Linguists.

Introduction to statistical concepts and analyses via language problems and linguistic data sets.

LIN X50.15. Computational Semantics.

Studies methods for automatically learning and analyzing word meanings and sentence meanings. Encompasses vector space models as well as logic-based semantics.

LIN X50.4. Language and People.

Areas in language and linguistics that most directly impact people, such as language and ethnicity, language and nation-building, and language politics.

LIN X50.6. Indigenous Languages of the Americas.

Examines various aspects of languages in the Americas, including their linguistic structures, the cultural domains in which they exist, and their histories of language contact and change.

LIN X50C. Language and the Brain.

Explore the neuroanatomical and functional operations of the major brain structures that underlie speech/language. Examine hemispheric dominance for language, neurological and language breakdowns in aphasia, and brain imaging methods and studies of language representation.

LIN X50E. Why Chinese Has No Alphabet.

Introduction to the history and evolution of the Chinese writing system and language. No background in Chinese language, culture, or linguistics is required.

LIN X50G. The Politics of Insult.

Examine how linguistic practices of (im)politeness and verbal aggression shape--and are shaped by--social hierarchies, cultural contexts, and political dynamics across different contexts, from liberal to anti-liberal. Analyze how seemingly neutral concepts of "civility" and appropriate speech" often mask power relations while exploring how taboo language, conflict talk, and transgressive communication can both challenge and reinforce existing social orders.

LIN X50S. Word Meaning.

LIN X51. Language and Identity.

Investigate the central importance of language to the formation of people's regional, social class, gender, ethnic, and age identities through psycholinguistics, cognitive psychology, sociophonetics, and popular media sources. Examine how socially driven spoken language variation is created and how it is perceived.

LIN X51C. A Linguistic History of India.

Explore the richly documented linguistic and literary history of languages in the Indian subcontinent, paying attention to linguistic phenomena, contact effects, and language-based movements.

LIN X51D. Language, Culture, and the Texas German Experience.

The evolution of the culture and language of German immigrants to Texas from the 1840s through the present and how they have influenced other ethnic groups in Texas.

LIN X51E. Language and Thought.

Study the relation between language and thought, using a cognitive science approach. Examine the words people use and how people think; whether language structure affects thought; and some cognitive aspects of language.

LIN X51F. Native American Verbal Art.

Examine the verbal artistic traditions such as jokes, story-telling, song, chant, poetry, etc., of Native American peoples.

LIN X51G. Bilingual Language Acquisition.

Examine various aspects of bilingual first language acquisition including phonology, morphology, and syntax, as well as the child's use of his/her languages.

LIN X51I. Linguistics of Writing.

Discuss how language relates to the written word and how linguistic analysis is intertwined with writing. Examine the typology and evolution of writing systems, the psycholinguistics of reading and writing, and the role of writing in contemporary language politics.

LIN X51P. Language, Cognition, and Rhythm.

Explore connections between language and various musical forms, and what the psychological basis for these connections might be.

LIN X53C. Introduction to Computational Linguistics.

Introduction to key representations and algorithms used in computational linguistics and key natural language processing applications.

LIN X53D. Computational Discourse and Natural Language Generation.

Introduction to machine learning models for discourse processing and text generation. Explore open issues in NLG, including evaluation, ethics, and factuality.

LIN X53N. Natural Language Processing.

Introduces theoretical and applied topics relating to natural language processing, including machine translation, search, automatic summarization, and dialog systems.

LIN X53S. English Syntax for Writing.

LIN X55. Sign Languages and Signing Communities.

Examine the grammar of signed languages, their use in signing communities, and the acquisition of signed languages as first languages. No knowledge of American Sign Language is required. Conducted in English.

LIN X57. Undergraduate Research.

Supervised research experience.

LIN X58Q. Supervised Research.

Supervised student-initiated research.

LIN X60K. Introduction to English Grammar.

Introduction to the study of the syntactic structure of modern English from the viewpoint of generative grammar.

LIN X64. Introduction to Psycholinguistics.

LIN X64M. History of the English Language.

Development of sounds, forms, and vocabulary of the English language from its origins to the present.

LIN X65. Bias.

An interdisciplinary introduction to bias from the perspectives of psychology, political science, business, philosophy, and linguistics.

LIN X71. Machine Learning for Text Analysis.

Examine basic machine learning methods, with an emphasis on building applications that intelligently analyze text. Explore supervised learning (e.g., logistic regression, neural networks), unsupervised learning (e.g., clustering), and natural language processing.

LIN X72J. Meaning and Message.

Explore theories of linguistic meaning using logical and mathematical tools. Introduction to key ideas from compositional and lexical semantics.

LIN X72K. Sound Patterns: From Sound to Word.

Methods and principles of analyzing the sound systems of languages.

LIN X72S. Syntax: From Word to Utterance.

Discuss the methods and principles of describing the syntactic systems of languages.

LIN X73C. Child Language.
Examine theory and research concerning the development of language in children.
LIN X73D. African American Language.
Introduction to the history and contemporary form of African American Language (AAL). Through readings, examine the linguistic description of essential features, the use of AAL in the creation of culturally and historically influential texts, and AAL as a subject of public discussion.
LIN X73E. Endangered Languages.
Examine language rights as a tool for defending small-scale and minority language communities against the spread of national and global languages.
LIN X73F. Historical Perspectives on the German Language.
LIN X73I. Building Blocks of Modern German.
LIN X73L. American Indian Languages and Cultures.
Explore the myriad of indigenous languages of North America and how they are intertwined with culture.
LIN X73P. Introduction to Cognitive Science.
LIN X73S. Speech Play and Verbal Art.
Examine speech play and verbal art (from puns to lies to songs to stories to poetry) from ethnographic and linguistic perspectives in a host of contexts and languages.
LIN X74M. Sociolinguistics.
Explore current interests in sociolinguistic research literature. Examine language and gender; social, regional, and ethnic dialects of American English; language use in African American communities; language and identity in a pluralistic society; and language, literacy, and education.
LIN X77. Syntactic Theory.
Introduction to formal syntax, which refers to the use of a mathematically precise formalism to model the syntax of human languages and test theories against the challenge of new data. Hands-on solving of syntax puzzles of increasing complexity.
LIN X79. Conference Course in Linguistics.
Supervised individual study of selected problems in linguistics.
LIN X79H. Honors Tutorial Course.
Supervised individual reading for one semester, followed by research and writing to produce a substantial paper.

Graduate Courses

LIN X19S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
LIN X29S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
LIN X80K. Phonology I.
The descriptive techniques of generative phonology.
LIN X80L. Syntax I.
An introduction to the description and analysis of syntax.
LIN X80M. Semantics I.
An introduction to formal semantics and pragmatics, and the logical techniques needed to analyze them.
LIN X80S. Sociolinguistics.
An introduction to sociolinguistic research, with attention to theoretical issues.
LIN X81K. Phonology II.
Readings and problems in current phonological theory.
LIN X81L. Syntax II.
Advanced description and analysis of syntax.
LIN X81M. Phonetics.
Speech production and perception; acoustic phonetics; phonetics and phonology; experimental techniques.
LIN X81S. Semantics II.
Continuation of Linguistics 380M. Descriptive methods and theoretical tools for investigating meaning in human languages; an introduction to propositional content and speech acts.
LIN X82. Historical Linguistics.
The principles of language change, reconstruction of earlier linguistic stages, language contact, and language relatedness.
LIN X83. Topics in Comparative and Diachronic Linguistics.
The comparative method; applications to particular linguistic families.
LIN X83.11. Comparative Semitic Linguistics.
Examine the Semitic languages and review the basic features of their phonology, morphology, and syntax.
LIN X83.3. Introduction to Romance Linguistics.
LIN X83.6. History of the Arabic Language.
LIN X83.8. Introduction to Diachronic Linguistics: Germanic.
LIN X84. Topics in Language Structures.
Languages studied have included Chatino, German, Mayan, Romance languages, and others.
LIN X84.4. German Syntax.
LIN X85. Field Methods in Linguistic Investigation.
Methods of research in phonological and grammatical description; work with speakers of under-described languages.
LIN X86M. Topics in Mathematical and Computational Linguistics.
LIN X86M.2. Computational Linguistics I.
LIN X86M.3. Computational Linguistics II.
LIN X86M.4. Computational Linguistics III: Advanced Parsing.
LIN X87. Linguistics and Language Teaching.
Application of the findings of linguistics to the teaching of languages.
LIN X89C. Research in Computational Linguistics.
LIN X89D. Research in Documentary and Descriptive Linguistics.
LIN X89P. Research in Phonetics and Phonology.
LIN X89S. Research in Syntax and Semantics.
LIN X89V. Research in Signed Languages.
LIN X91. Topics in Descriptive Linguistics.
LIN X91.2. Studies in English Grammar.
LIN X92. Topics in Current Linguistic Research.
A reading course in a selected area of linguistics.
LIN X92.1. Introduction to Cognitive Science.
LIN X92.2. Tools for Linguistic Description.
Basic tools for analyzing and describing a language through linguistic fieldwork, including phonetic transcription, the discovery and presentation of surface phonology, morphophonology, inflectional morphology, derivational morphology, grammatical categories, and syntax.
LIN X92.3. Linguistic Typology.
An introduction to the typological study of language: the investigation into the nature of human language, as informed by systematic cross-linguistic comparison.
LIN X93. Seminar in Linguistic Topics.
LIN X93.10. Metaphor Across Cultures, Genres, and Time.
Explore how and why metaphors vary both across and within cultures, across different genres, and through time.

LIN X93.4. Neurolinguistics.
LIN X93.6. Speech Play and Verbal Art.
LIN X93.8. Linguistics of Signed Languages.
LIN X93.9. Language Contact.
Examine the phenomenon of language contact from both structural and sociocultural angles. Investigate processes and patterns involved in lexical and structural borrowing, formation of new contact varieties such as creoles and mixed languages, role of contact in driving and shaping language change, and dynamics of specific contact zones. Explore the role of discourse strategies and norms, bilingualism, code-switching, and particular sociocultural practices in determining the nature of the contact that takes place and its effects on the languages involved.
LIN X93C. Language Acquisition.
LIN X93P. Topics in Phonology and Phonetics.
LIN X93S. Topics in Syntax and Semantics.
LIN X93S.3. Frame Semantics.
Explore theories and applications frame semantics within linguistics.
LIN X93S.4. Lexical Semantics.
Explore theories of word meaning, including what the basic elements of word meaning are, how those elements are composed into more complex meanings, and what kinds of grammatical processes augment and modify word meanings. Examine the nature of lexical categories, representations of events and individuals, and how a word's meaning is related to its syntactic and morphological properties.
LIN X93S.5. Lexical Semantic Typology.
Examine the way word meanings and their grammatical behavior vary across languages. Examine specific case studies to explore how the same types of word meanings can be represented differently across languages and how the principles that relate word meaning to grammar also vary, focusing on argument realization, morphological processes of word building, and lexical inventories.
LIN X93S.6. Minimalist Program.
Investigate work within the minimalist program, the current instantiation of the principles and parameters approach to the study of the human language faculty. Examine the development of the minimalist program, including a critical overview of its key concepts and the basic properties of its formal framework. Explore several case studies drawn from very recent work within this tradition that are illustrative of the nature of the approach.
LIN X93S.7. Word Meaning and Syntax.
Investigate the interface between word meaning and syntax beginning with an overview of polysemy, vagueness, prototypes, semantic change and the acquisition of word meaning. Explore the mapping from the lexicon to the syntax, focusing on predicate-argument mapping, argument alternations, and lexicalization patterns.
LIN X94K. Philosophy of Language.
LIN X95. Conference Course in Linguistics.
Supervised research.
LIN X96. Topics in Sociolinguistics.
Detailed investigation of an area of current interest in sociolinguistics. Most topics provide an opportunity for field research.
LIN X96.2. Introduction to Graduate Linguistic Anthropology.
LIN X96.3. Ethnography of Speaking.
LIN X96.4. Turkic Cultures and Languages in Central Asia.
LIN X96.7. Grammar of the Arabic Language.
LIN X97. Forum for Doctoral Candidates.
LIN X98. Thesis.
LIN X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
LIN X98T. Supervised Teaching in Linguistics.
Teaching under the close supervision of the course instructor; weekly group meetings with instructor, individual consultations, and reports throughout the teaching period.
LIN X99W. Dissertation.

Professional Courses

LIN X19S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
LIN X29S. Topics in Linguistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

LTC - Language Teaching and Coordination

Language Teaching and Coordination: LTC

Lower-Division Courses

Upper-Division Courses

Graduate Courses

LTC X84. Technology Applications in Language Teaching.
LTC X85. The Foreign Language Learner.
Reviews the theoretical and empirical research conducted in the field of foreign language acquisition, focusing on the learning process and specifically on the learners themselves.
LTC X86. Intensive Course Design and Instruction.
LTC X88. Topics in Language Teaching and Program Coordination.
LTC X88.1. Second Language Comprehension and Processing.
Explore how second language (L2) learners process language and construct meaning during sentence comprehension. Consider theoretical constructs and research methods as well as the practical applications of sentence processing research.
LTC X89. Language and Culture Instruction: Theory and Practice.
LTC X97P. Practicum in Language Teaching and Coordination.
LTC X98T. Supervised Teaching in Language Teaching and Coordination.

Professional Courses

M - Mathematics

Mathematics: M

Lower-Division Courses

M X01. College Algebra.
Subjects include a brief review of elementary algebra; linear, quadratic, exponential, and logarithmic functions; polynomials; systems of linear equations; applications.
M X02. Introduction to Mathematics.
Intended primarily for general liberal arts students seeking knowledge of the nature of mathematics as well as training in mathematical thinking and problem solving. Topics include number theory and probability; additional topics are chosen by the instructor.
M X03D. Applicable Mathematics.
An entry-level course for the nontechnical student, dealing with some of the techniques that allow mathematics to be applied to a variety

of problems. Topics include linear and quadratic equations, systems of linear equations, matrices, probability, statistics, exponential and logarithmic functions, and mathematics of finance.

M X03F. Mathematics of Investment.
Simple and compound interest, equivalent rates, equivalent values, annuities, amortization, sinking funds, bonds, depreciation.

M X03K. Calculus I for Business and Economics.
Differential and integral calculus of algebraic, logarithmic, and exponential functions with applications.

M X03L. Calculus II for Business and Economics.
Differential and integral calculus of functions of several variables with applications, infinite series, improper integrals; introductions to probability, differential equations, matrices, systems of linear equations, and linear programming.

M X05E. Analytic Geometry.
Combines development of methods (including adequate treatment of theory) and acquisition of skills with applications.

M X05G. Preparation for Calculus.
Study of advanced functions and their graphs and applications, including exponential, logarithmic, and trigonometric functions. Introduction to rates, slopes, and derivatives.

M X08C. Differential and Integral Calculus.
Introduction to the theory and applications of differential and integral calculus of functions of one variable; topics include limits, continuity, differentiation, the mean value theorem and its applications, integration, the fundamental theorem of calculus, and transcendental functions.

M X08D. Sequences, Series, and Multivariable Calculus.
This is the second semester of the accelerated calculus sequence. The theory and applications of sequences and infinite series, including those involving functions of one variable, and an introduction to the theory and applications of differential and integral calculus of functions of several variables; subjects include methods of integration, parametric equations, sequences, infinite series, power series, functions of several variables, partial derivatives, and multiple integrals.

M X08K. Differential Calculus.
Introduction to the theory and applications of differential calculus of functions of one variable; topics include limits, continuity, differentiation, and the mean value theorem and its applications.

M X08L. Integral Calculus.
Introduction to the theory and applications of integral calculus of functions of one variable; topics include integration, the fundamental theorem of calculus, transcendental functions, sequences, and infinite series.

M X08M. Multivariable Calculus.
Introduction to the theory and applications of differential and integral calculus of functions of several variables. Includes parametric equations, polar coordinates, vectors, vector calculus, functions of several variables, partial derivatives, gradients, and multiple integrals.

M X08N. Differential Calculus for Science.
Introduction to the theory of differential calculus of functions of one variable, and its application to the natural sciences. Subjects may include limits and differentiation, with applications to rates of change, extremes, graphing, and exponential growth and decay.

M X08Q. Differential and Integral Calculus for Business.
Focus on the key concepts of calculus. These include: using successive approximations to solve problems that cannot be solved directly (Euler's Method), tracking the rate at which quantities are changing (derivatives) using rates of change to find optimal solutions to real-world problems (max/min), computing bulk quantities by adding up the pieces (integration), and understanding functions of several variables by studying one variable at a time. Designed for business students.

M X08R. Differential and Integral Calculus for the Sciences.
A calculus course for students in the life sciences. Emphasizes representations and analysis of data. Subjects include functions, rates, and derivatives and their applications to problems in biology; differential equations; Riemann integrals; the Euler method; and fundamental theorems of calculus.

M X08S. Integral Calculus for Science.
Introduction to the theory of integral calculus of functions of one variable, and its applications to the natural sciences. Subjects may include integration and its application to area and volume, and transcendental functions, sequences, and series and their application to numerical methods.

M X10C. Conference Course.

M X10E. Emerging Scholars Seminar.
Supplemental problem-solving laboratory for precalculus, calculus, or advanced calculus courses for students in the Emerging Scholars Program.

M X10P. Modern Mathematics: Plan II.
Significant developments in modern mathematics. Topics may include fractals, the fourth dimension, statistics and society, and techniques for thinking about quantitative problems.

M X15C. Foundations, Functions, and Regression Models.
In-depth study of topics from secondary school mathematics. Emphasizes the development of the concept of function, exploring function patterns in data sets, and the connections between the main topics of mathematics associated with a secondary school curriculum. Use of appropriate technology is explored.

M X16K. Foundations of Arithmetic.
An analysis, from an advanced perspective, of the concepts and algorithms of arithmetic, including sets; numbers; numeration systems; definitions, properties, and algorithms of arithmetic operations; and percents, ratios, and proportions. Problem solving is stressed.

M X16L. Foundations of Geometry, Statistics, and Probability.
An analysis, from an advanced perspective, of the basic concepts and methods of geometry, statistics, and probability, including representation and analysis of data; discrete probability, random events, and conditional probability; measurement; and geometry as approached through similarity and congruence, through coordinates, and through transformations. Problem solving is stressed.

M X19S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X29S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X75. Conference Course.
Supervised study in mathematics, with hours to be arranged.

M X80D. Algebra.
Continuation of Mathematics 380C.

M X82C. Algebraic Topology.
Surfaces, covering spaces, fundamental group, and homology.

M X82D. Differential Topology.
Continuation of Mathematics 382C. Manifolds and maps, differential forms, transversality, and intersection theory.

Upper-Division Courses

M X19S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X21M. History of Mathematics.
Survey major mathematical developments beginning with the ancient Greeks and tracing those developments through Hindu-Indian mathematics, Arabic mathematics, and European mathematics up to the nineteenth century.

M X25K. Discrete Mathematics.
Provides a transition from the problem-solving approach of Mathematics 408C and 408D to the rigorous approach of advanced courses. Subjects include logic, set theory, relations and functions, combinatorics, and graph theory and graph algorithms.

M X26K. Foundations of Number Systems.
Study of number-related topics in middle-grade and secondary school mathematics. Topics include place value; meanings of arithmetic operations; analysis of computation methods; historical development of number concepts and notation; and rational, irrational, algebraic, transcendental, and complex numbers. Emphasis is on communicating mathematics, developing pedagogical understanding of concepts and notation, and using both informal reasoning and proof.

M X27J. Differential Equations with Linear Algebra.
Ordinary differential equations, introduction to vector spaces, linear operators and eigenvalues, systems of linear differential equations, introduction to partial differential equations and Fourier series.

M X27K. Advanced Calculus for Applications I.
Ordinary and partial differential equations and Fourier series.

M X27L. Advanced Calculus for Applications II.
Matrices, elements of vector analysis and calculus of functions of several variables, including gradient, divergence, and curl of a vector field, multiple integrals and chain rules, length and area, line and surface integrals, Green's theorems in the plane and space, and, if time permits, complex analysis.

M X28K. Introduction to Number Theory.
Provides a transition from the problem-solving approach of Mathematics 408C and 408D to the rigorous approach of advanced courses. Properties of the integers, divisibility, linear and quadratic forms, prime numbers, congruences and residues, quadratic reciprocity, number theoretic functions.

M X29F. Theory of Interest.
Measurement of interest, present and accumulated value, amortization, sinking funds, bonds, duration, and immunization. Covers the interest-theory portion of an exam of the Society of Actuaries and the Casualty Actuarial Society.

M X29S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X29W. Cooperative Mathematics.
This course covers the work period of mathematics students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor.

M X33L. Structure of Modern Geometry.
Axiom systems, transformational geometry, introduction to non-Euclidean geometries, and other topics in geometry; use of these ideas in teaching geometry.

M X39C. Actuarial Case Studies.
Introduces aspects of basic ratemaking, reserving, catastrophe modeling, and rate classification in a property & casualty actuarial context. Explores loss & premium trending, loss triangles, loss development, loss ratios, on-level premium, and accident year vs. calendar year vs. policy year data.

M X39D. Introduction to Financial Mathematics for Actuaries.
Covers the financial derivative subjects on the Society of Actuary FM/2 exam: general derivatives, options, hedging, investment strategies, forwards, futures, and swaps. Covers option pricing techniques in the MFE/3F exam: binomial option pricing, Monte Carlo Valuation using risk neutral probabilities, and Black-Scholes.

M X39G. Predictive Analytics.
Designed for students in mathematics and actuarial science. Explore an introduction to predictive modeling that starts with least squares as a foundation and takes a modern approach applicable to classification and prediction in the presence of large datasets.

M X39S. Seminar on Actuarial Practice.
Presentations by working actuaries on current issues in actuarial practice.

M X39U. Actuarial Contingent Payments I.
Intermediate actuarial models for life insurance, property insurance, and annuities.

M X39V. Actuarial Contingent Payments II.
Advanced actuarial models for life insurance, property insurance, and annuities.

M X40L. Matrices and Matrix Calculations.
Techniques of matrix calculations and applications of linear algebra.

M X41. Linear Algebra and Matrix Theory.
Vector spaces, linear transformations, matrices, linear equations, determinants. Some emphasis on rigor and proofs.

M X43K. Introduction to Algebraic Structures.
Elementary properties of groups and rings, including symmetric groups, properties of the integers, polynomial rings, elementary field theory.

M X43L. Applied Number Theory.
Basic properties of integers, including properties of prime numbers, congruences, and primitive roots. Introduction to finite fields and their vector spaces with applications to encryption systems and coding theory.

M X43M. Error-Correcting Codes.
Introduction to applications of algebra and number theory to error-correcting codes, including finite fields, error-correcting codes, vector spaces over finite fields, Hamming norm, coding, and decoding.

M X44K. Intermediate Symbolic Logic.
A second-semester course in symbolic logic: formal syntax and semantics, basic metatheory (soundness, completeness, compactness, and Loewenheim-Skolem theorems), and further topics in logic.

M X46. Applied Linear Algebra.
Emphasis on diagonalization of linear operators and applications to dynamical systems and ordinary differential equations. Other subjects include inner products and orthogonality, normal mode expansions, vibrating strings and the wave equation, and Fourier series.

M X48. Scientific Computation in Numerical Analysis.
Introduction to mathematical properties of numerical methods and their applications in computational science and engineering. Introduction to object-oriented programming in an advanced language. Study and use of numerical methods for solutions of linear systems of equations; nonlinear least-squares data fitting; numerical integration; and solutions of multidimensional nonlinear equations and systems of initial value ordinary differential equations.

M X49R. Applied Regression and Time Series.
Introduction to simple and multiple linear regression and to elementary time-series models, including auto-regressive and moving-average models. Emphasizes fitting models to data, evaluating models, and interpreting results.

M X49S. Actuarial Modeling and Simulation.
Apply Bayesian modeling and Markov-chain Monte Carlo simulations to Actuarial applications. Use R to carry out computations, simulations, and statistical analysis.

M X49T. Time Series and Survival-Model Estimation.
Introduction to the probabilistic and statistical properties of time series; parameter estimation and hypothesis testing for survival models. Covers 30 percent of the syllabus for exam #4 of the Society of Actuaries and the Casualty Actuarial Society.

M X58K. Applied Statistics.
Exploratory data analysis, correlation and regression, data collection, sampling distributions, confidence intervals, and hypothesis testing.

M X60M. Mathematics as Problem Solving.
Discussion of heuristics, strategies, and methods of evaluating problem solving, and extensive practice in both group and individual problem solving. Communicating mathematics, reasoning, and connections among topics in mathematics are emphasized.

M X61. Theory of Functions of a Complex Variable.
Elementary theory and applications of analytic functions, series, contour integration, and conformal mappings.

M X61K. Introduction to Real Analysis.
A rigorous treatment of the real number system, of real sequences, and of limits, continuity, derivatives, and integrals of real-valued functions of one real variable.

M X62K. Probability I.
An introduction to the mathematical theory of probability, fundamental to further work in probability and statistics, includes basic probability properties, conditional probability and independence, various discrete and continuous random variables, expectation and variance, central limit theorem, and joint probability distributions.

M X62M. Introduction to Stochastic Processes.
Introduction to Markov chains, birth and death processes, and other topics.

M X64K. Vector and Tensor Analysis I.
Invariance, vector algebra and calculus, integral theorems, general coordinates, introductory differential geometry and tensor analysis, applications.

M X64L. Vector and Tensor Analysis II.
Continuation of Mathematics 364K, with emphasis on tensor and extensor analysis. Riemannian geometry and invariance.

M X65C. Real Analysis I.
A rigorous treatment of the real number system, Euclidean spaces, metric spaces, continuity of functions in metric spaces, differentiation and Riemann integration of real-valued functions of one real variable, and uniform convergence of sequences and series of functions.

M X65D. Real Analysis II.
A rigorous treatment of selected topics in real analysis, such as Lebesgue integration, or multivariate integration and differential forms.

M X65G. Curves and Surfaces.
Calculus applied to curves and surfaces in three dimensions: curvature and torsion of space curves, Gauss map and curvature of surfaces, Gauss theorem, geodesics, and the Gauss-Bonnet theorem.

M X67K. Topology I.
An introduction to topology, including sets, functions, cardinal numbers, and the topology of metric spaces.

M X67L. Topology II.
Various topics in topology, primarily of a geometric nature.

M X68K. Numerical Methods for Applications.
Continuation of Mathematics 348. Topics include splines, orthogonal polynomials and smoothing of data, iterative solution of systems of linear equations, approximation of eigenvalues, two-point-boundary value problems, numerical approximation of partial differential equations, signal processing, optimization, and Monte Carlo methods.

M X71E. Learning Assistant Experience in Mathematics.
Students assist instructors and TAs in mathematics courses. This is a hands-on experience in what it is like to teach and support students in the learning of mathematics in undergraduate courses. Students must attend classroom training and discussions and work in Calculus discussion sections or undergraduate classrooms where mathematics is being taught.

M X72. Fourier Series and Boundary Value Problems.
Discussion of differential equations of mathematical physics and representation of solutions by Green's functions and eigenfunction expansions.

M X72K. Partial Differential Equations and Applications.
Partial differential equations as basic models of flows, diffusion, dispersion, and vibrations. Topics include first- and second-order partial differential equations and classification (particularly the wave, diffusion, and potential equations), and their origins in applications and properties of solutions. Includes the study of characteristics, maximum principles, Green's functions, eigenvalue problems, and Fourier expansion methods.

M X73K. Algebraic Structures I.
A study of groups, rings, and fields, including structure theory of finite groups, isomorphism theorems, polynomial rings, and principal ideal domains.

M X73L. Algebraic Structures II.
Topics from vector spaces and modules, including direct sum decompositions, dual spaces, canonical forms, and multilinear algebra.

M X74. Fourier and Laplace Transforms.
Operational properties and application of Laplace transforms; some properties of Fourier transforms.

M X74G. Linear Regression Analysis.
Fitting of linear models to data by the method of least squares, choosing best subsets of predictors, and related materials.

M X74K. Fourier and Laplace Transforms.
Continuation of Mathematics 374. Introduction to other integral transforms, such as Hankel, Laguerre, Mellin, Z.

M X74M. Mathematical Modeling in Science and Engineering.
Tools for studying differential equations and optimization problems that arise in the engineering and physical sciences. Includes dimensional analysis and scaling, regular and singular perturbation methods, optimization and calculus of variations, and stability.

M X75. Conference Course.
Supervised study in mathematics, with hours to be arranged.

M X75C. Topics in Conference Course: Computer-Assisted.
Supervised study in mathematics on material requiring use of computing resources, with hours to be arranged.

M X75D. Discovery: An Introduction to Advanced Study in Mathematics.
Capstone course designed primarily for UTeach pre-service mathematics majors considering discovery teaching methodology and/or graduate work in mathematics or mathematics education. Ties together foundational topics in the primary strands of mathematics present in a typical graduate mathematics program; included are selected topics from analysis, algebra, number theory, and topology.

M X75S. Seminar in Instruction of Mathematics.
An exploration of subjects in mathematics instruction as taught at the secondary educational level. Practice learning and teaching through use of proofs, explorations, and connections. Subjects include foundational mathematics concepts, numbers, constructibility, and development of key mathematics topics.

M X75T. Topics in Mathematics.

M X76C. Topics in Methods of Applied Mathematics.
Variational methods and related concepts from classical and modern applied mathematics. Models of conduction and vibration that lead to systems of linear equations and ordinary differential equations, eigenvalue problems, initial and boundary value problems for partial differential equations. Topics may include a selection

from diagonalization of matrices, eigenfunctions and minimization, asymptotics of eigenvalues, separation of variables, generalized solutions, and approximation methods.

M X78K. Introduction to Mathematical Statistics.
Sampling distributions of statistics, estimation of parameters (confidence intervals, method of moments, maximum likelihood, comparison of estimators using mean square error and efficiency, sufficient statistics), hypothesis tests (p-values, power, likelihood ratio tests), and other topics.

M X78N. Generalized Linear Models.
Extensions to ordinary least-squares regression, including Poisson regression, the lasso, mixed models, and ridge regression.

M X78P. Decision Analytics.
Examine decision theory with utility functions, including the use of probability, optimization, constrained optimization, and linear algebra.

M X79H. Honors Tutorial Course.
Directed reading, research, and/or projects, under the supervision of a faculty member, leading to an honors thesis.

M X80D. Algebra.
Continuation of Mathematics 380C.

M X82C. Algebraic Topology.
Surfaces, covering spaces, fundamental group, and homology.

M X82D. Differential Topology.
Continuation of Mathematics 382C. Manifolds and maps, differential forms, transversality, and intersection theory.

Graduate Courses

M X19S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X29S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X75. Conference Course.
Supervised study in mathematics, with hours to be arranged.

M X80C. Algebra.
A survey of algebraic structures, including groups, fields, rings, and modules.

M X80D. Algebra.
Continuation of Mathematics 380C.

M X81C. Real Analysis.
Measure and integration over abstract spaces; Lebesgue's theory of integration and differentiation on the real line.

M X81D. Complex Analysis.
Introduction to complex analysis.

M X81E. Functional Analysis.
Introduction to functional analysis.

M X82C. Algebraic Topology.
Surfaces, covering spaces, fundamental group, and homology.

M X82D. Differential Topology.
Continuation of Mathematics 382C. Manifolds and maps, differential forms, transversality, and intersection theory.

M X82E. Advanced Algebraic Topology.
Continuation of Mathematics 382C.

M X82F. Algebraic Topology.
Continuation of Mathematics 382E.

M X82G. Differential Geometry.
Continuation of Mathematics 382D.

M X83C. Methods of Applied Mathematics.
Topics include basic normed linear space theory; fixed-point theorems and applications to differential and integral equations; Hilbert spaces and the spectral theorem; applications to Sturm-Liouville problems; approximation and computational methods such as the Galerkin, Rayleigh-Ritz, and Newton procedures.

M X83D. Methods of Applied Mathematics.
Topics include distributions, fundamental solutions of partial differential equations, the Schwartz space and tempered distributions, Fourier transform, Plancherel theorem, Green's functions, Sobolev spaces, weak solutions, differential calculus in normed spaces, implicit function theorems, applications to nonlinear equations, smooth variational problems, applications to classical mechanics, constrained variational problems.

M X83E. Numerical Analysis: Linear Algebra.
Survey of numerical methods in linear algebra: floating-point computation, solution of linear equations, least squares problems, algebraic eigenvalue problems.

M X83F. Numerical Analysis: Interpolation, Approximation, Quadrature, and Differential Equations.
Survey of numerical methods for interpolation, functional approximation, integration, and solution of differential equations.

M X84C. Mathematical Statistics I.
The general theory of mathematical statistics. Includes distributions of functions of random variables, properties of a random sample, principles of data reduction, an overview of hierarchical models, decision theory, Bayesian statistics, and theoretical results relevant to point estimation, interval estimation, and hypothesis testing.

M X84D. Mathematical Statistics II.
Continuation of Computational Science, Engineering, and Mathematics 384R and Mathematics 384C.

M X84E. Design and Analysis of Experiments.
Design and analysis of experiments, including one-way and two-way layouts; components of variance; factorial experiments; balanced incomplete block designs; crossed and nested classifications; fixed, random, and mixed models; and split plot designs.

M X84F. Design of Experiments.
Design of experiments, including 2n and 3n factorial experiments, confounding, fractional factorials, sequential experimentation, orthogonal arrays, D-optimal experiments, and response surface methodology.

M X84G. Regression Analysis.
Simple and multiple linear regression, inference in regression, prediction of new observations, diagnosis and remedial measures, transformations, and model building. Emphasis on both understanding the theory and applying theory to analyze data.

M X84H. Multivariate Statistical Analysis.
Introduction to the general multivariate linear model; a selection of techniques, such as principle component, factor, and discriminant analysis.

M X85C. Theory of Probability.

M X85D. Theory of Probability.
Continuation of Computational Science, Engineering, and Mathematics 384K and Mathematics 385C.

M X87C. Numerical Analysis: Algebra and Approximation.
Advanced introduction to scientific computing, theory and application of numerical linear algebra, solution of nonlinear equations, and numerical approximation of functions.

M X87D. Numerical Analysis: Differential Equations.
Advanced introduction to the theory and practice of commonly used numerical algorithms for the solution of ordinary differential equations, and elliptic, parabolic, and hyperbolic partial differential equations.

M X89C. Actuarial Case Studies.
Explores aspects of basic ratemaking, reserving, catastrophe modeling, and rate classification in a property & casualty actuarial context. Covers loss & premium trending, loss triangles, loss development, loss ratios, on-level premium, accident year vs. calendar year vs. policy year data.

M X89D. Introduction to Financial Mathematics for Actuaries.
Covers the financial derivative topics on the Society of Actuary FM/2 exam: general derivatives, options, hedging, investment strategies, forwards, futures, and swaps. Covers option pricing techniques in the MFE/3F exam: binomial option pricing, Monte Carlo Valuation using risk neutral probabilities, and Black-Scholes.

M X89F. Theory of Interest.
Measurement of interest, present and accumulated value, amortization, sinking funds, bonds, duration, and immunization. Covers the interest theory portion of an exam of the Society of Actuaries and the Casualty Actuarial Society.

M X89G. Predictive Analytics.
Designed for students in mathematics and actuarial science. Explore an introduction to predictive modeling that starts with least squares as a foundation and takes a modern approach applicable to classification and prediction in the presence of large datasets.

M X89J. Probability Models with Actuarial Applications.
Introductory actuarial models for life insurance, property insurance, and annuities. With Mathematics 389P, covers the syllabus for the professional actuarial exam on model construction.

M X89P. Actuarial Statistical Estimates.
Statistical estimation procedures for random variables and related quantities in actuarial models. With Mathematics 389J, covers the syllabus for the professional actuarial exam on model construction.

M X89S. Seminar on Actuarial Practice.
Presentations by working actuaries on current issues in actuarial practice.

M X89T. Time Series and Survival-Model Estimation.
Introduction to the probabilistic and statistical properties of time series; parameter estimation and hypothesis testing for survival models. Covers 30 percent of the syllabus for exam #4 of the Society of Actuaries and the Casualty Actuarial Society.

M X89U. Actuarial Contingent Payments I.
Intermediate actuarial models for life insurance, property insurance, and annuities.

M X89V. Actuarial Contingent Payments II.
Advanced actuarial models for life insurance, property insurance, and annuities.

M X89W. Financial Mathematics for Actuarial Applications.
Subjects include pricing, stock price, and interest rate models for actuarial applications. Tools include lognormal distribution, Brownian motion, Black-Scholes, and delta hedging.

M X90C. Topics in Algebra.
Recent topics have included algebraic geometry, number theory, algebraic curves, algebraic number theory, algebraic functions, rational curves on varieties, homological algebra.

M X91C. Topics in Analysis.
Recent topics have included measure and integration, real variables, complex analysis, functional analysis, ordinary differential equations, partial differential equations, integral transforms, operator theory, approximation theory, abstract harmonic analysis.

M X92C. Topics in Topology.
Recent topics have included algebraic topology, differential topology, geometric topology, Lie groups.

M X93C. Topics in Applied Mathematics.
Recent topics have included quantum mechanics, statistical physics, ergodic theory, group representations, statistical mechanics, quantum field theory, introductory partial differential equations, monotone operators and partial differential equations, Hilbert space methods for partial differential equations, Hamiltonian dynamics, nonlinear functional analysis, Euler and Navier-Stokes equations, microlocal calculus and spectral asymptotics, calculus of variations.

M X93C.1. Neural Dynamics, Information Theory, and Machine Learning.

M X93N. Numerical Solution of Elliptic Partial Differential Equations.
The numerical solution of large systems of linear algebraic equations arising in the solution of elliptic partial differential equations by discretization methods.

M X94C. Topics in Probability and Statistics.
Recent topics have included nonparametric statistics, advanced probability.

M X95C. Topics in Logic and Foundations.
Recent topics have included set theory, model theory, proof theory, axiomatic theorem proving, automatic theorem proving, foundations of mathematics, recursion theory.

M X96C. Topics in Mathematics.
Recent topics have included set theory, history of mathematics.

M X96D. Conference Course.
Supervised study in mathematics.

M X97C. Topics in Numerical Analysis.
Recent developments and advanced topics in the field of numerical analysis.

M X97S. Topics in Mathematics: Seminar.

M X98. Thesis.

M X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

M X98T. Supervised Teaching in Mathematics.

M X99W. Dissertation.

Professional Courses

M X19S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X29S. Topics in Mathematics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mathematics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M X75. Conference Course.
Supervised study in mathematics, with hours to be arranged.

M X80D. Algebra.
Continuation of Mathematics 380C.

M X82C. Algebraic Topology.
Surfaces, covering spaces, fundamental group, and homology.

M X82D. Differential Topology.
Continuation of Mathematics 382C. Manifolds and maps, differential forms, transversality, and intersection theory.

M E - Mechanical Engineering

Mechanical Engineering: M E

Lower-Division Courses

M E X02. Introduction to Engineering Design and Graphics.
Introduction to mechanical engineering education and practice through lectures and laboratory experiences. Graphics and modeling fundamentals for engineering design: freehand sketching, computer

modeling of solid geometry, and generation of engineering drawings. Introduction to reverse engineering, computer-aided design, rapid prototyping, and manufacturing. Application of the design process and problem solving through individual and team projects.

M E X03. Studies in Engineering Design Graphics.
Computer laboratory work in engineering design graphics for students with transfer credit for Mechanical Engineering 210 who need additional work.

M E X05. Introduction to Computers and Programming.
Introduction to computer hardware and software systems; programming using a high-level language; mathematical software programming; and introduction to machine language. Includes significant hands-on programming opportunities.

M E X09M. Topics in Mechanical Engineering.

M E X10. Engineering Design Graphics.
Graphics and modeling fundamentals for engineering design: freehand sketching, computer modeling of solid geometry, and generation of engineering drawings. Introduction to reverse engineering, computer-aided design, rapid prototyping, and manufacturing. Application of the design process to problem solving. Individual and team design projects.

M E X10H. Engineering Design Graphics: Honors.
Graphics and modeling fundamentals for engineering design: freehand sketching, computer modeling of solid geometry, and generation of engineering drawings. Introduction to reverse engineering, computer-aided design, rapid prototyping, and manufacturing. Application of the design process to problem solving. Individual and team design projects.

M E X10T. Applied Thermodynamics.
First and second laws of thermodynamics; thermodynamics processes, cycles, and heat transfer.

M E X11. Materials Engineering.
An exploration of fundamental aspects of the structure, properties, and behavior of engineering materials.

M E X11L. Materials Engineering Laboratory.
Hands-on experiments in materials science and engineering topics and microstructure-property relationships discussed in Mechanical Engineering 311.

M E X14D. Dynamics.
Analysis of motions, forces, momenta, and energies in mechanical systems.

M E X16T. Thermodynamics.
Properties, heat and work, first and second laws, thermodynamic processes, introduction to ideal power cycles.

M E X18. Engineering Computational Methods.
Applied numerical analysis, programming of computational algorithms using mathematical software, and applications of computational methods to the solution of mechanical engineering problems.

M E X18M. Programming and Engineering Computational Methods.
An investigation of applied numerical analysis, programming of computational algorithms using mathematical software, and applications of computational methods to the solution of mechanical engineering problems.

M E X19S. Topics in Mechanical Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mechanical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M E X80M. Research.

M E X97P. Projects in Mechanical Engineering.
Independent project carried out under the supervision of a mechanical engineering faculty member.

Upper-Division Courses

M E X20. Applied Thermodynamics.
First and second laws of thermodynamics; thermodynamic processes, cycles, and heat transfer.

M E X20C. Humanitarian Engineering Seminar.

M E X24. Dynamics.
Analysis of motions, forces, momenta, and energies in mechanical systems.

M E X26. Thermodynamics.
Properties, heat and work, first and second laws, thermodynamic processes, introduction to ideal power cycles.

M E X26H. Thermodynamics: Honors.
Properties, heat and work, first and second laws, thermodynamic processes, introduction to ideal power cycles.

M E X29S. Topics in Mechanical Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mechanical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

M E X30. Fluid Mechanics.
Fluid properties, statics, conservation laws, inviscid and viscous incompressible flow, flow in confined streams and around objects.

M E X30L. Experimental Fluid Mechanics.
Experimental design concepts, uncertainty analysis, and systems analysis as applied to thermodynamics, fluid mechanics, and heat transfer systems.

M E X33H. Engineering Communication: Honors.
Professional communication skills for engineers, with emphasis on research, writing, editing, and oral presentation on topics of social and technical significance in engineering. Students collaborate to publish an online journal.

M E X33T. Engineering Communication.
Professional communication skills for engineers, with emphasis on research, writing, and oral presentation on topics of social and technical significance in engineering.

M E X34. Materials Engineering.
Fundamental aspects of the structure, properties, and behavior of engineering materials.

M E X34L. Materials Engineering Laboratory.
Hands-on experiments in materials science and engineering topics and microstructure-property relationships discussed in Mechanical Engineering 334.

M E X35. Engineering Statistics.
Fundamentals of probability, distribution theory, data analysis and statistics, interval estimation, hypothesis testing, and statistical quality control.

M E X36. Materials Processing.
Effects of processing on materials properties; materials selection.

M E X36L. Materials Processing Laboratory.
Hands-on study of selected materials processing procedures and processing-microstructure-property relationships discussed in Mechanical Engineering 336.

M E X36P. Concepts in Nuclear and Radiation Engineering.
Explore different aspects and applications of nuclear and radiation engineering/physics. Examine the history of nuclear development, basic concepts of radiation and radioactivity, radioactive waste management, global warming and the impact of nuclear power plants, industrial applications, health physics, nuclear medicine, job opportunities at power plants, non-proliferation, and nuclear security.

M E X37C. Introduction to Nuclear Power Systems.
Explore radioactivity, nuclear interactions: fission and fusion, fission reactors, nuclear power systems, nuclear power safety.

M E X37F. Nuclear Environmental Protection.
Explore ionizing radiation and its interactions with matter and living tissues; radioactive decay kinetics; external and internal dose measurement; transportation through the environment; managing radioactive waste streams; and safeguards.

M E X37G. Nuclear Safety and Security.
Explore policy and technical aspects related to nuclear safety and security. Evaluate the proliferation of risk from facilities within the nuclear fuel cycle. Examine the criticality conditions for a nuclear assembly and derive parent/daughter decay equations.

M E X38. Machine Elements.
Analysis for the design and manufacture of basic mechanical elements, and their role in the design of machines; application of finite element modeling.

M E X39. Heat Transfer.
Steady and transient heat conduction; forced and natural convection; radiation; introduction to heat exchangers and applications.

M E X39L. Experimental Heat Transfer.
Experimental design concepts, uncertainty analysis, and systems analysis as applied to thermodynamics, fluid mechanics, and heat transfer systems.

M E X40. Mechatronics.
Theory and application of electrical circuits, electronics, and electromechanical devices; concepts in electrical power transmission; instrumentation; feedback; integration of electronics and instrumentation with mechanical engineering systems (mechatronics).

M E X40L. Mechatronics Laboratory.
Hands-on laboratory using hand-held and bench-top electronic test and prototyping equipment for circuits and mechatronics applications; computer-aided instrumentation and data acquisition; laboratory study in design, prototyping, and testing with electrical and electronics components and electromechanical devices.

M E X43. Thermal-Fluid Systems.
Analysis and design of integrated systems involving simultaneous application of thermodynamics, heat transfer, and fluid mechanics. Applications to power generation, vehicle engineering, materials processing, environmental control, and manufacturing.

M E X44. Dynamic Systems and Controls.
Lumped physical system models; electrical, fluid, mechanical, and thermal system analysis; linear system transient, steady-state behavior; introduction to feedback control.

M E X44L. Dynamic Systems and Controls Laboratory.
Modeling of engineering systems, digital simulation, and assessment of results with experimental study; methods for analysis of first- and second-order systems, system identification, frequency response and feedback control principles; hands-on experimentation with mechanical, fluid, electrical, and magnetic systems; data acquisition and analysis using oscilloscopes and microcomputer-based analog-to-digital and digital-to-analog conversion; theoretical and practical principles governing the design and use of various sensors and transducers.

M E X47. Topics in Processing of Materials.
Analysis of forces in processing operations; effects of friction and their control; metalworking efficiencies.

M E X47.1. Powder Processing.
Powder particle characterization and size/shape/distribution, powder synthesis, compaction, sintering theory, sintering maps, full-density processing, powder-processed part microstructure and properties.

M E X47.2. Deformation Processing.
Analysis of forces in processing operations; effects of friction and their control; slab method; upper-bound force theory; slip-line field theory; metalworking efficiencies.

M E X48E. Advanced Mechatronics I.
Integrated use of mechanical, electrical, and computer systems for information processing and control of machines and devices. System modeling, electromechanics, sensors and actuators, basic electronics design, signal processing and conditioning, noise and its abatement, grounding and shielding, filters, and system interfacing techniques.

M E X48F. Advanced Mechatronics II.
Interfacing microcomputers with sensors and actuators; hybrid (analog/digital) design; digital logic and analog circuitry; data acquisition and control; microcomputer architecture, assembly language programming; signal conditioning, filters, analog-to-digital and digital-to-analog conversion.

M E X49. Corrosion Engineering.
Corrosion principles; electrochemical, environmental, and metallurgical effects; types of corrosion; corrosion testing and prevention; modern theories: principles and applications.

M E X50. Machine Tool Operations for Engineers.
Hands-on manual and computer-numerical-controlled machine tool operation. Part design and tool selection for production.

M E X50D. Design and Control of Robots for Rehabilitation.
Explore the roles of sensors, actuators, and neural circuits for biological movement control from an engineering perspective. Examine current approaches to robotic and mechatronic devices that support and enhance human movement in health and following neurologic injuries like stroke and spinal cord injury are discussed. Study the latest literature in neuromuscular controls, neuromotor recovery, and design and control of rehabilitation robots.

M E X50R. Robot Mechanism Design.
Studies the analysis and synthesis of motions of mechanisms in order to design robotic systems. Examines motion properties of mechanisms including degrees of freedom, velocity, and acceleration. Explores ideas and motion analysis for robotic systems for a wide range of applications including spatial, industrial and medical robotics.

M E X52K. Engineering Computer Graphics.
Introduction to interactive computer graphics as a tool in computer-aided design. Use of graphics software packages.

M E X53. Engineering Finance.
Evaluating the financial impact of engineering decisions. Comparing alternatives with cash flow analysis considering rate of return, inflation, and taxes, with emphasis on analyzing risk. Managing complex projects with activity scheduling and resource allocation considering cash flows. Methods include probabilistic analysis and simulation.

M E X54. Introduction to Biomechanical Engineering.
The application of mechanical engineering principles to problems in the life sciences; transport phenomena of physiological solids and fluids; biosignal analysis and instrumentation; biomaterials design and compatibility; principles of medical imaging, diagnostics, and therapeutics; rehabilitation engineering.

M E X54M. Biomechanics of Human Movement.
Modeling and simulation of human movement; neuromuscular control; computer applications; introduction to experimental techniques.

M E X55K. Engineering Vibrations.
Time-domain and frequency-domain analysis of vibrating systems; matrix methods, instrumentation, and vibration control; numerical methods.

M E X59. Materials Selection.
Description of commercial metals, polymers, ceramics, concrete, and wood for use in mechanical engineering applications. Applications include strength, toughness, stiffness, fatigue, creep, corrosion, casting, forming, machining, and welding.

M E X60. Vehicle System Dynamics and Controls.
Fundamentals of ground vehicle dynamics, tire-road mechanics, vehicle control systems, vehicle stability, and simulation of vehicle systems.

M E X60C. Cyber Vehicle Systems.
Study of the engineering principles of autonomous mobile robots. Subjects include understanding the dynamics of vehicle systems, and the principles and practical implementation of sensing, actuation, and control. Emphasis on providing practical laboratory study of these subjects using mobile robot platforms, and the use of the

commercial software package LabVIEW for programming of real-time data acquisition and control targets. Simulation studies may also be conducted in LabVIEW and/or the Matlab environment, so some proficiency in use of both of these software packages is expected.

M E X60D. Propulsion Systems and Controls.
Study principles, modeling, analysis, system integration, control, and diagnosis of diverse ground vehicle propulsion and driveline systems.

M E X60E. Advanced Vehicle Powertrain Systems and Control.
Explore the basic concept of vehicle powertrain systems and controller design, and discuss state of the art vehicle powertrain development. Examine modeling skills to capture the system dynamics and modern control strategies to achieve the desired system performance.

M E X60K. Metallurgy of Engineering Alloys.
Microstructure and property relationships of metals and alloys; steel alloys; aluminum alloys; titanium alloys; magnesium alloys; solidification and casting; thermomechanical processing; heat treating and solid-state phase transformations.

M E X60L. Turbomachinery and Compressible Flow.
Positive displacement and dynamic rotating machinery; pumps, compressors, and turbines; performance characteristics and scaling laws. One-dimensional compressible flow with area change, friction, or heat addition. Normal and oblique shock waves; Prandtl-Meyer expansion.

M E X60N. Intermediate Heat Transfer.
Multidimensional and transient diffusion; laminar and turbulent convection; radiation exchange; special topics.

M E X60S. Advanced Packaging and Thermal Management.

M E X61E. Nuclear Reactor Operations and Engineering.
Explore fission and chain reactions; neutron diffusion and moderation; reactor equations; Fermi Age theory; and multigroup and multiregional analysis.

M E X61F. Radiation and Radiation Protection Laboratory.
Introduction to the application of radiation and radiation protection instrumentation. Lecture and laboratory topics include personnel monitoring, radiation detection systems, gamma-ray spectroscopy, determination of environmental radiation, counting statistics, gamma and neutron shielding, and air sampling.

M E X61M. Materials Thermodynamics.
First and second laws; heat of combustion; heat engine cycles; chemical equilibria and/or phase equilibria; point defects in crystals.

M E X62K. Readings in Engineering.
A study of the interrelated problems of society, technology, and energy.

M E X62S. Development of a Solar-Powered Vehicle.
Analysis, design, and construction of a solar-powered car for national competitions involving other universities. Study of electrical, mechanical, and aerodynamic systems.

M E X63L. Energy Systems Laboratory.
Experimental analysis of thermal energy systems, including heat transfer equipment, engines, the University chilling station and the University power plant. Use of a variety of industrial instrumentation for assessment of system and component performance and of experimental uncertainty. Written and oral technical communication of experimental results.

M E X63M. Energy Technology and Policy.
An overview of energy technologies, fuels, environmental impacts and public policies. Subjects are interdisciplinary and include an introduction to quantitative concepts in energy, including the differences among fuels and energy technologies, energy policy levers, and the societal aspects of energy, such as culture, economics, war, and international affairs. Includes brief snippets of energy history, use of real-world examples, and looks forward into the future. Interactive and lecture-oriented around current events related to energy.

M E X64D. Intermediate Dynamics.
Focuses on efficient formulation and solution of equations of motion for complex 3D multi-body mechanical systems. Emphasizes the formulation of the dynamical equations of motion using Kane's method and will use symbolic and numerical simulation techniques (MATLAB(R) and MotionGenesis) to solve these equations. Preparation for advanced research and professional work analyzing the dynamics of complex multi-body mechanical systems.

M E X64L. Automatic Control System Design.
Feedback principles; control components; industrial compensators; Routh, Nyquist, Bode, and root locus methods; controller design; continuous and discrete time control.

M E X65D. Data Science for Engineers.
Learn data analysis and programming skills. Explore essential data science techniques, including regression, decision trees, classification, and neural networks.

M E X65E. Engineering Entrepreneurship.
Focus on developing a basic understanding for the assessment of emerging technologies including the analysis of the status and future development issues, establish a comprehension of what 'market' means in terms of potential technology applications, and of how that market is identified and characterized. Create new knowledge about the potential match of an emerging technology with a defined market as a member of a multidisciplinary team, establish a basic understanding of IP rights, assessment and strategy related to emerging technology, and assess the course and participate in discussions about how it can be evolved for future offerings. Exploration the innovation and technology commercialization process especially as it relates to individual expertise and career goals.

M E X65K. Finite Element Method.
Introduction and application of the finite element method in engineering analysis and design problems; demonstration of techniques using commercial codes.

M E X65L. Industrial Design for Production.
Current techniques for making transitions from theoretical concepts to cost effective designs suitable for manufacturing.

M E X66E. Mechanical Engineering Capstone Design.
Examine creative design, analysis, selection, development, and fabrication of engineering components and systems.

M E X66J. Mechanical Engineering Design Methodology.
An examination of structured methodologies for designing mechanical systems; reverse engineering/redesign projects and conceptual design projects.

M E X66L. Operations Research Models.
Formulation and solution-interpretation for operations research models requiring, for example, optimization, simulation, or analysis of Markov chains or queues. Applications include manufacturing design and control, routing and scheduling, plant location, inventory analysis, and management of queueing systems.

M E X66Q. Deterministic Methods for Operations Research.
Theory and algorithms for deterministic operations research methods. Algorithms for solving linear, integer, and nonlinear optimization models.

M E X66R. Stochastic Methods for Operations Research.
Theory and algorithms for stochastic operations research methods. Algorithms related to stochastic processes: Markov chain analysis; queueing theory; stochastic inventory theory and decision analysis.

M E X66T. Biomems and Bionems.
Micro/Nano technology has been used to create many new materials and devices with a vast range of applications in materials science, electronics and photonics, and biomedical applications. BioMEMS and BioNEMS is the application of micro/nano technology in the fields of biomedical and health sciences by offering advantages of small size (from submicron to a few mm), low cost, high throughput, and importantly requiring much less sample/reagent.

M E X67S. Simulation Modeling.
Basic concepts of discrete-event simulation. Statistical input and output analysis. Application of simulation software. Modeling of systems under uncertainty.

M E X68C. Additive Manufacturing.
Additive manufacturing (AM) is the use of layer-based processes for producing parts directly from computer (CAD) models, without part-specific tooling. Students learn about a variety of additive manufacturing (AM) AM technologies, their potential to support rapid prototyping and manufacturing, and some of of the important research challenges associated with AM.

M E X68J. Computer-Aided Design.
Application of computers to design problems and simulation of mechanical systems; creation of interactive special applications programs.

M E X69L. Introduction to Computational Fluid Dynamics.
Applied numerical analysis, including solution of linear algebraic equations and ordinary and partial differential equations; modeling of physical processes, including fluid flow and heat and mass transfer; use of general purpose computer codes, including commercial computational fluid dynamics software packages.

M E X69M. Computational Methods in Thermal/Fluid Systems.
Use of basic tools of computational mathematics to set up numerical simulations for a variety of problems in thermo fluids. Explicit versus implicit time-stepping schemes, the issues of numerical stability and numerical errors, the issue of computational costs, difficulties with boundary and initial conditions, basic decision paths in the choice of numerical methods depending on the target system, and design of diagnostic steps.

M E X69P. Application Programming for Engineers.
Designed for students who have some experience in programming and are interested in the sharing and development of open source software applications. Provides an introduction to the Python Programming language, an open source, flexible, and intuitive debug programming language, with an emphasis on system modeling, simulation, data analysis, and software/data management. Students will create mini projects in Python that demonstrate software design and organization, debugging, open source practices, and data visualization.

M E X71D. Medical Device Design and Manufacturing.
Explores how to solve medical device design problems using systematic design thinking and practices. Interpret clinical needs and define an open engineering medical device design problem, including formulating engineering requirements/specifications to address a marketable need, generate concepts in a way that promotes both creativity and usefulness, make well-informed, well-justified design decisions in the early and later stages of design, design and analyze experiments, follow statistical best practices in Design of Experiments(DoE), embody solutions with "Design for X" considerations, and communicate intermediate and final designs clearly and effectively in written and oral formats.

M E X71K. Legal Aspects of Engineering Practice.
Legal considerations in the practice of engineering; specifications and contracts for equipment and engineering services.

M E X72C. Theory and Design for Mechanical Sensing and Measurements.
Explore basic concepts of mechanical measurements: sensing, signal processing, experimental methods, uncertainty analysis, detection, and estimation.

M E X72J. Robotics and Automation.
Component technologies for precision machines based on dynamic modeling and motion programming: cams, linkages, planar robot manipulators and open architecture vehicles. Homework includes 15 simulations.

M E X72M. Mechanism Design.
Design of planar mechanisms for applications that require rigid body guidance, function generation, and path generation. Graphical and analytical techniques. Computer-aided design projects.

M E X72N. Design of Smart Mechanisms.
Design of reprogrammable multiple-degree-of-freedom architectures. The course addresses various mechanical configurations and stresses the integrated design approach to sensing/actuation/control architecture and control software.

M E X74C. Combustion Engine Processes.
Principles of internal combustion engines, fuels, carburetion, combustion, exhaust emissions, knock, fuel injection, and factors affecting performance.

M E X74D. Automotive Engineering Laboratory.
Engines and emissions. Students use commercial engine-modeling software to explore effects of valve timing and intake tuning and conduct experiments with vehicle emissions, ignition timing, engine mechanisms, engine controls, and emissions control.

M E X74E. Race Car Engineering and Project Management.
Explores designing a Formula SAE race car, a hot rod (UT's 1937 Chevy project), and a Formula SAE Electric race car. Divided into four major sections: Project Management, including tools for project organization and management, Powertrain, including engine basics, calibration, intake and exhaust design, cooling and oiling systems, fuel economy and emissions, transmission/differential, vehicle performance modeling, Brake systems, longitudinal weight transfer, longitudinal force requirements of the tires for both braking and acceleration, tires and tire models, and Vehicle dynamics (suspension systems, anti-roll bars, lateral weight transfer, tires and tire models).

M E X74F. Fire Science.
Analysis of the dynamics and consequences of fire in structures. Topics include combustion thermochemistry, premixed and diffusion flames, fluid mechanics of fire, human tenability in burning structures, and computer modeling of fires.

M E X74L. Design of Thermal Systems.
Methodology and approach to design of thermal energy systems; component and system modeling; optimization, including economic considerations.

M E X74R. Design of Air Conditioning Systems.
Load calculations, design of thermal distribution systems, component selection and control.

M E X74S. Solar Energy Systems Design.
Insolation characteristics and measurement, component design, solar energy system modeling, introduction to photovoltaic systems, cost analysis, and case studies.

M E X74T. Renewable Energy Technology.
Cultivates an enhanced level of theoretical and conceptual understanding of thermodynamics, fluid mechanics and heat transfer, and of how these disciplines apply to the design and analysis of complex thermal-fluid systems. Enhances skills in designing, programming and debugging software tools for systems analysis, working in teams, and communicating engineering results in a professional manner.

M E X76N. High Throughput Nanopatterning.
Introduction to the basic tools and materials involved in the patterning processes needed to create nano-scale structures and functional materials and discusses the relevance of these processes to applications in the electronics, display, and energy industries. Includes take-home portable nano-labs which allow hands-on experience in nano-scale fabrication processes and relevant nanometrology techniques. Explores industry and research roadmaps that provide relevant metrics and timelines for fabrication, materials, nano-enabled components and devices. Exposure to relevant computational modeling and simulation tools allows exploration of novel nano-enabled components and devices.

M E X77K. Projects in Mechanical Engineering.
Independent project carried out under the supervision of a faculty member in mechanical engineering. Student prepares a project proposal and a final report, each of which is evaluated by the faculty committee on individual projects.

M E X78C. Electroceramics.
Bonding; crystal structures; defects; phase diagrams; glass ceramics; electrical, dielectric, magnetic, and optical ceramics.

M E X78D. Failure Analysis.
Introduction to methodology of analyzing failures of engineering parts and devices. Explores a broad range of analysis, but the focus is on understanding fractography and relating this back to material and mechanics relevant to failure to determine the likely root cause(s). Lectures are primarily based on case studies and are supplemented by two hands-on class projects, one performed individually and the other larger project performed as a team project.

M E X78E. Nanotechnology for Sustainable Energy.
Demonstrates the role of nanoscale materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. An overview of emerging nanotechnology, and how people can critically impact many energy technologies (from energy harvesting, conversion, to storage). Explores various types of energy devices, including solar cell, solar fuel, piezoelectrics, thermoelectrics, battery, supercapacitor, and fuel cell as well as basic device principles, current technology status and new opportunities of nanotechnology for energy device applications. Content is at the intersection of nanoscale science and engineering, and energy science and technology.

M E X78F. Enhancing Sustainability Through Tribology.
Explore the principles of macro-scale tribology and discuss the potential impact of tribology in enhancing sustainable development. Discuss physical properties of lubricants; lubricants and their composition; contact mechanics; hydrodynamic lubrication; hydrostatic lubrication; elastohydrodynamic lubrication; boundary lubrication; solid lubrication and surface treatments; wear of materials; nanotribolgy; and green tribology.

M E X78K. Mechanical Behavior of Materials.
Elastic deformation; viscoelasticity; yielding, plastic flow, plastic instability, strengthening mechanisms; fracture, fatigue, creep; significance of mechanical properties tests.

M E X78P. Properties and Applications of Polymers.
Introduction to polymers as structural materials: polymerization, polymer structure, physical and mechanical properties, processing and fabrication.

M E X78Q. Polymer Nanocomposites.
Fundamentals, properties, and applications of polymer nanocomposites.

M E X78S. Structural Ceramics.
Powder processing, powder characterization, forming techniques, densification, and development of microstructure; emphasis on understanding materials, selection, and microstructure-mechanical property relationships.

M E X79H. Undergraduate Honors Thesis.
Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis.

M E X79M. Topics in Mechanical Engineering.

M E X79M.1. Design of Machines and Systems.
Introduction to techniques for analyzing and designing machine components (linkages, cams, springs, gears, etc.) within the context of reverse engineering and redesigning existing products. Covers the application of structure methods for engineering design and prototyping.

M E X79M.7. Technology Needs of Refugee Communities.
Examine the refugee crisis with an emphasis on refugee flows into Greece.

M E X79N. Engineering Acoustics.
Principles of acoustics, with applications drawn from audio engineering, biomedical ultrasound, industrial acoustics, noise control, room acoustics, and underwater sound.

M E X79Q. Musical Acoustics.
Designed to help students develop the intuition and vocabulary for understanding the basic physical principles relevant to musical instruments and sound (e.g., mechanics, vibrations, acoustics, harmonics, acoustic-electronic conversions, speakers, hearing, perception, room acoustics) in order to be able to read basic articles on the subject of musical acoustics. Material is kept relevant to musical principles (e.g., performance techniques, scales/harmony) throughout.

M E X80M. Research.

M E X97P. Projects in Mechanical Engineering.
Independent project carried out under the supervision of a mechanical engineering faculty member.

Graduate Courses

M E X80E. Special Topics in Mechanical Engineering.

M E X80M. Research.

M E X80Q. Topics in Mathematical Methods in Engineering.
Applications of mathematical analysis and numerical concepts to typical engineering problems.

M E X80Q.1. Engineering Analysis: Analytical Methods.
Analytical solutions for linear ordinary differential equations; numerical integration of ordinary differential equations; Fourier series and integrals; the Laplace transform; the solution of partial differential equations; vector analysis and linear transformations.

M E X80Q.2. Engineering Analysis: Advanced Analytical Methods.
Classification and solution of partial differential equations; includes linear superposition, separation of variables, Fourier and Laplace transform methods, Green's functions, similarity solution, and spectral methods; introduction to solution of nonlinear partial differential equations, including both exact and approximate techniques, with a strong emphasis on physical systems.

M E X80Q.3. Perturbation Methods.
Introduction to perturbation theory; regular expansions and sources of nonuniformities; method of strained coordinates and multiple scales; method of matched asymptotic and composite expansions. Places strong emphasis on the relationship between the physical and the mathematical basis and on the crucial role of nondimensionalization in problem solving.

M E X80Q.4. Numerical Methods for Differential Equations.
Numerical solution of ordinary differential equations, both initial and boundary value equations; includes quasilinearization, shooting methods, and method of adjoints; classification and solution of partial differential equations by the finite difference method; stability and convergence criteria for various schemes; special attention to nonlinear equations with a strong emphasis on the Navier-Stokes equations.

M E X80R. Robot Mechanism Design.
Examines analysis and synthesis of motions of mechanisms in order to design robotic systems. Motion properties of mechanisms including degrees of freedom, velocity, and acceleration will be studied. Discusses design ideas and motion analysis for robotic systems for a wide range of applications including spatial, industrial and medical robotics. Simulates and analyzes motions of multi-link mechanisms in the MATLAB programming environment. Design and build robots with interesting mechanisms and mechatronics elements as part of group projects. Studies machining, assembly, mechatronics and programming through the projects.

M E X81M. Statistical Methods for Process Control Manufacturing.
Covers fundamental methods for statistical monitoring of processes, including Shewhart control charts, control charts for individual measurements, CUSUM charts and attribute control charts. Explores

the design of experiments, including the statistical evaluation of main and interaction effects, as well as intelligent experimentation through reduced factorial experimental design. Outlines DOE-based search techniques for surface response based design optimization. Offers advanced research in model based and active process control in highly flexible and sophisticated manufacturing systems, such as semiconductor manufacturing lithography of flexible automotive assembly lines.

M E X81P. Topics in Dynamics of Fluids.
Detailed study of fluid dynamics, boundary layer phenomena, and incompressible flows.

M E X81P.1. Fundamentals of Incompressible Flow.
Fundamentals. Kinematic and dynamic equations for compressible viscous flow, incompressible flow criteria, viscous flow patterns, and solution methods.

M E X81P.2. Compressible Flow and Turbomachinery.
Two-dimensional flow at subsonic and supersonic Mach numbers, method of characteristics, shock tubes, oblique shocks, wave interactions.

M E X81P.3. Dynamics of Turbulent Flow.
Fundamentals of turbulence, including scaling, transport, and kinetic energy of turbulence; wakes, jets; wall-bounded flows; spectrum of turbulence.

M E X81P.4. Multiscale Flow and Transport Phenomena.
Fundamentals of flow and transport phenomena in multiscale systems, including momentum, energy, and mass transport phenomena at the microscale; surface tension (capillarity); electrokinetics; micro-scale transport in porous media; multi-phase flow; rheology; and complex fluids.

M E X81P.5. Applications of Incompressible Flow.
Dynamics of vorticity, inviscid flow; boundary layer theory and computational techniques, linear stability theory for parallel flow, flow at moderate Reynolds number.

M E X81Q. Topics in Thermodynamics.

M E X81Q.1. Advanced Thermodynamics.
Development of macroscopic thermodynamics from basic physical relationships; introduction to the thermodynamics of mixtures.

M E X81Q.4. Molecular Gas Dynamics.
Kinetic theory, chemical thermodynamics, statistical mechanics. Applications: equilibrium gas properties, chemical kinetics, interaction of matter with radiation, rarefied gas dynamics.

M E X81R. Topics in Heat Transfer and Rate Processes.

M E X81R.1. Advanced Conductive Heat Transfer.
Modeling approaches for composite systems; phase change in conduction-dominant heat transfer systems; analysis of complex source terms in conduction systems; conduction physics at material interfaces; coupled thermo-mechanical response in conduction systems; and solution techniques for multidimensional, unsteady conduction phenomena.

M E X81R.2. Advanced Convective Heat and Mass Transfer.
Fundamental study of momentum, energy, and mass transport in convective systems in laminar and turbulent regimes, and several flow configurations.

M E X81R.3. Radiation Heat Transfer.
Thermal radiation, blackbody properties, surface properties, radiant exchange, absorbing and emitting media, combined modes.

M E X81R.4. Fundamentals of Heat and Mass Transfer.
Fundamentals of conduction, convective heat transfer, diffusive and convective mass transfer, thermal radiative exchange.

M E X81R.5. Radiation in Participating Media.
Methods for treating thermal radiation in absorbing, transmitting, and scattering media.

M E X81R.6. Multiphase Flow and Heat Transfer.
Heat, mass, and momentum transfer in multi-phase flow systems: flows with particles, drops and bubbles, boiling, condensation, and absorption.

M E X81R.7. Nanoscale Energy Transport and Conversion.
Nanoscale transport phenomena and energy conversion processes. Parallel theoretical treatment of transport and conversion processes of electrons, phonons, photons, and molecules in various applications including photovoltaic and thermoelectric energy conversions, microelectronics, nanomaterials, and laser materials processing.

M E X81R.8. Microelectronics Packaging and Thermal Management.
Explore basics of semiconductor fabrication, microelectronics packaging techniques, thermomechanical issues in packaging, reliability-related aspects in packaging, thermal management conditions, Conduction-based cooling, air and liquid cooling, phase change-based cooling, role of packaging materials. Discuss challenges and solutions at multiple length scales, from transistors (nanometers) to data centers (10's of meters).

M E X82N. Topics in Computational Fluid Dynamics.
Numerical analysis applied to fluid flow and heat transfer problems.

M E X82N.1. Introduction to Computational Fluid Dynamics.
Applied numerical analysis, including solution of linear algebraic equations and ordinary and partial differential equations; modeling of physical processes, including fluid flow and heat and mass transfer; use of general-purpose computer codes, including commercial computational fluid dynamics software.

M E X82N.2. Computational Methods for Thermal Fluid Systems.
Introduction to the use of computational tools in the analysis of thermal-fluid systems, with particular emphasis on verification of results and error analysis. Included are interpolation, differentiation, quadrature, solution of linear and non-linear equations, optimization, differential equations and statistics.

M E X82P. Topics in Experimental Thermal/Fluid Systems.
Use of modern experimental techniques and instrumentation in the thermal/fluid sciences.

M E X82P.1. Advanced Experimental Methods for Thermal/Fluid Systems.
Design of experiments; fundamentals of electronic signal processing and optics; advanced experimental techniques, including flow measurements with laser-Doppler velocimetry, particle image velocimetry, and hot-wire anemometry; and thermal measurements with infrared cameras and thermocouples.

M E X82P.2. Optics and Lasers.
Fundamentals of geometric and physical optics; interaction of light with matter; spectroscopy; and laser and electro-optics applications.

M E X82Q. Topics in Design of Thermal and Fluid Systems.

M E X82Q.2. Solar Energy System Design.
Solar radiation, solar collectors, storage, and system analysis and design. Application to both thermal and photovoltaic systems.

M E X82Q.3. Advanced Thermo-Fluid Systems.
Project-based course addressing the design and analysis of systems in which thermal and fluid processes are central to function and performance. Advanced topics including transient system analysis, multicomponent nonreacting and reacting gas mixtures, phase change phenomena, and design principles based on entropy generation minimization are covered in the context of specific thermal-fluid applications.

M E X82Q.4. Energy Technology and Policy.
Multidisciplinary overview of energy technologies, fuels, environmental impacts, and public policies. Quantitative engineering analysis in energy, including the differences among fuels and energy technologies, the electricity sector, liquid fuels, conventional fuels, renewable fuels, impacts on the environment, basics of atmospheric chemistry, and water use for power plant cooling. Energy policy and the societal aspects of energy, such as culture, economics, war, and international affairs, are covered.

M E X82R. Topics in Combustion.
Fundamentals of combustion science, technology, and engineering.

M E X82R.1. Fundamentals of Combustion.
Combustion phenomena are examined from a fundamental perspective. Topics include equilibrium phenomena, chemical kinetics, explosions, detonations, and premixed and diffusion flames.

M E X82R.2. Chemical Kinetics.
The theory of combustion chemistry. Issues include physics of molecular interactions, the explosion peninsula, elementary reaction schemes, reduced reaction schemes, and global chemistry.

M E X82R.5. Advanced Combustion.
Presentation and analysis of multi-component and reacting conservation equations; examination of the theory of laminar flames (premixed and nonpremixed) using asymptotic methods; detailing of ignition and extinction phenomena; discussion of flame response to transport and flow modifications; and approaches to analyzing turbulent premixed and nonpremixed flames.

M E X82R.6. Combustion Engine Processes.
Principles of internal combustion engines, fuels, carburetion, combustion, exhaust emissions, knock, fuel injection, and factors affecting performance.

M E X82T. Fire Science.
Analysis of dynamics and consequences of fire in structures. Topics include combustion thermochemistry, premixed and diffusion flames, fluid mechanics of fire, human tenability in burning structures, computer modeling of fires.

M E X83D. Theory and Design for Mechanical Sensing and Measurements.
Explore fundamental aspects of measurement systems: sensing, signal processing, experimental methods, uncertainty analysis, detection, and estimation.

M E X83M. Heat Transfer in Industrial Systems.
Provides understanding of heat transfer physics and the tools to analyze a wide range of industrially relevant heat transfer problems. Analyzes heat transfer systems associated with a diversity of industrial applications, as well as how to use order of magnitude analysis to simplify complex problems and solution techniques for the three modes of heat transfer.

M E X83Q. Topics in Analysis of Mechanical Systems.
Detailed studies in the characteristics of mechanical systems.

M E X83Q.1. Vibrations.
Formulation of discrete and continuous models for mechanical systems in vibration; modal analysis; analytical solution methods for constant property linear systems; numerical solution methods.

M E X83Q.10. Modeling and Simulations of Multienergy Systems.
Methods for modeling and simulation of multienergy systems. Detailed study of applications in electromechanical systems, fluid power, chemical and biological processes, optimal control, and other areas of interest to the class.

M E X83Q.2. Dynamics of Mechanical Systems.
Advanced dynamics, including Newton-Euler, Lagrange, and Hamilton's principles; gyroscopic effects in mechanical systems; analysis of stability of systems; continuous bodies; introduction to Hamilton-Jacobi.

M E X83Q.4. Modeling of Physical Systems.
Development of models for mechanical, electrical, fluid, thermal, and chemical systems; circuit techniques; bond graphs; energy and variational methods; hardware examples.

M E X83Q.5. Wave Propagation.
Fundamentals of wave propagation; transverse waves on strings and membranes; compressional, torsional, and flexural waves in rods and plates; longitudinal, shear, and surface waves in elastic media; tube waves; and water waves.

M E X83Q.6. Fourier and Spectral Analysis in Dynamic Systems.
Fourier transformations (series, integrals, fast Fourier transforms) and their relationships. Sampling, aliasing, convolution, correlation, leakage, windowing, power spectra, frequency response functions, and coherence functions in one-dimensional digital signal processing. Cepstrum analysis, Hilbert transforms. Experimental techniques and applications include modal analysis, mechanical signature analysis, and path identification.

M E X83Q.8. Digital Signal Processing.
Sampling and quantizing processes; analog/digital and digital/analog conversion; digital Fourier analysis, including fast Fourier transform; z transform; design of finite impulse response and infinite impulse response digital filters.

M E X83Q.9. Applied Intelligence for Engineers.
Fundamental concepts of artificial neural systems; architecture, paradigms, topology, and learning algorithms. Introduction to the most popular networks and to their selection for engineering applications.

M E X83S. Topics in Lubrication, Wear, and Bearing Technology.
Theory of friction and wear; design of bearing systems, including hydrodynamic, rheodynamic, and direct contact devices.

M E X83S.1. Friction and Wear of Materials.
Theories of friction, theories of wear (adhesion, delamination), pitting, spalling, fretting, and galvanic corrosion.

M E X84D. Intermediate Dynamics.
Focus on efficient formulation and solution of equations of motion for complex 3D multi-body mechanical systems. Explore the formulation of the dynamical equations of motion using Kane's Method and use of symbolic and numerical simulation techniques to solve these equations.

M E X84E. Topics in Electromechanics.

M E X84M. Fluid Mechanics in Industrial Processes.
Offers practicing engineers and technology managers a comprehensive treatment of various fluid mechanics topics. Explores fluid flow and related phenomena in multiple application spaces. Benefit the design and analyses of various fluid-based systems.

M E X84N. Topics in Acoustics.

M E X84N.1. Acoustics I.
Plane waves in fluids; transient and steady-state reflection and transmission; lumped elements; refraction; strings, membranes, and rooms; horns; ray acoustics; absorption and dispersion.

M E X84N.2. Acoustics II.
Spherical and cylindrical waves, radiation and scattering, multipole expansions, Green's functions, waveguides, sound beams, Fourier acoustics, Kirchhoff theory of diffraction, and arrays.

M E X84N.3. Electromechanical Transducers.
Modeling, analysis, and design of transducers for reception and transmission of acoustic and vibration signals; dynamics of coupled electrical, mechanical, and acoustical systems; and the effects of transducer characteristics on fidelity and efficiency of transduction.

M E X84N.4. Nonlinear Acoustics.
Waveform distortion and shock formation, harmonic generation and spectral interactions, effects of absorption and dispersion, parametric arrays, Rankine-Hugoniot relations, weak shock theory, numerical modeling, radiation pressure, and acoustic streaming.

M E X84N.5. Underwater Acoustics.
Acoustic properties of the ocean; acoustic propagation, reflection, reverberation, scattering and target strength; ocean noise; introduction to array and signal processing; basics of sonar design.

M E X84N.6. Architectural Acoustics.
Human perception of sound, principles of room acoustics, sound-absorptive materials, transmission between rooms, and acoustical design of enclosed spaces.

M E X84N.7. Ultrasonics.
Acoustic wave propagation in fluids, elastic solids, and tissue; transducers, arrays, and beamforming; nondestructive evaluation; and acoustical imaging.

M E X84N.8. Wave Phenomena.
Fourier acoustics and angular spectra; nearfield acoustical holography; Fraunhofer, Fresnel, and parabolic approximations; sound beams; Green's functions; Born approximation; propagation and scattering in moving, periodic, and random media.

M E X84N.9. Acoustic Metamaterials.
Examine wave propagation in heterogeneous media displaying nonclassical effective properties. Introduction to effective medium theories including fundamental limits on effective properties, transmission and scattering matrices, waves in periodic media, localized resonance, and transformation acoustics.

M E X84Q. Topics in Design of Control Systems.

M E X84Q.1. Introduction to Modern Control.
State variable methods, eigenvalues, and response modes; controllability, observability, and stability; calculus of variations; optimal control; Pontryagin maximum principle; control of regulator and tracking servomechanisms; Hamilton-Jacobi, dynamic programming; deterministic observers, Kalman filter; discrete and continuous time.

M E X84Q.10. Real-Time Control System Labs.
Conduct design, implementation, hands-on experiments, and analysis of real-time estimation and control algorithms for physical systems.

M E X84Q.11. Estimation and Control of Ground Vehicle Systems.
Examine advanced control and estimation systems for ground vehicle propulsion, chassis, and automation systems. Discuss combinations of physical insight into ground vehicle systems with control and estimation methods.

M E X84Q.12. Digital Control.
Explore the concepts of sampling and discrete-time signals/systems; analysis of discrete-time systems; design of discrete-time controllers, including input/output approaches, polynomial methods, state space techniques, and linear quadratic optimal control design. Examine understanding of computer controlled systems, construction of discrete-time models, analysis of the open loop and closed-loop behavior, and design of digital control algorithms.

M E X84Q.2. Nonlinear Control Systems.
State space formulation; stability criteria; Liapunov functions; describing functions; signal stabilization; Popov and circle criteria for design.

M E X84Q.3. Time-Series Modeling, Analysis, and Control.
Methods for analytical modeling, analysis, prediction, and control of linear, stationary time series. Includes examples of advanced research in nonstationary time-series modeling and applications in manufacturing, financial engineering, geosciences, and other areas. Students complete a project on a topic of their choice.

M E X84Q.4. Automatic Control System Design.
Examine feedback principles; control components; industrial compensators; Routh, Nyquist, Bode, and root locus methods; controller design; continuous and discrete time control.

M E X84Q.7. Stochastic Systems, Estimation, and Control.
Probability and random variables; filtering theory; stochastic calculus; stochastic control; engineering applications; linear and nonlinear systems; spectral techniques.

M E X84Q.8. Propulsion Systems and Controls.
Study principles, modeling, analysis, system integration, control, and diagnosis of diverse ground vehicle propulsion and driveline systems.

M E X84Q.9. Advanced Vehicle Powertrain Systems and Control.
Explore the basic concept of vehicle powertrain systems and controller design, and discuss state of the art vehicle powertrain development. Examine modeling of system dynamics, and applying modern control strategies to achieve the desired system performance.

M E X84R. Topics in Robotics.

M E X84R.1. Robotics and Automation.
Component technologies for precision machines based on dynamic modeling and motion programming: cams, linkages, planar manipulators.

M E X84R.2. Design of Smart Mechanisms.
Design of reprogrammable multiple-degree-of-freedom architectures. The course addresses various mechanical configurations and stresses the integrated design approach to sensing/actuation/control architecture and control software. Includes design project.

M E X84R.3. Advanced Dynamics of Robotic Systems.
Treatment in depth of the dynamics of robotic systems. Discussion of modeling, analysis, and control of conventional serial robots, in-parallel manipulators, dual arms, and legged locomotion systems.

M E X84R.4. Geometry of Mechanisms and Robots.
Advanced topics in theoretical kinematics geometry: applications of screw system theory to the study of motion and force fields in spatial mechanisms and robotic systems; analytical and numerical schemes associated with kinematics geometry.

M E X84R.5. Planar Mechanism Synthesis.
Design of planar mechanisms for applications that require rigid body guidance, function generation, and path generation. Graphical and analytical techniques. Computer-aided design projects.

M E X84R.7. Brain, Body, and Robotics.
Examine computational models of brain control of human movement. Explore the roles of sensors, actuators, and neural circuits for biological movement control from an engineering perspective. Study current approaches to robotic and mechatronic devices that support and enhance human movements. Develop and test prototypes for robot modules that interact with the human body while studying the latest literature in neuromuscular controls, neuromotor recovery, and design and control of rehabilitation robots.

M E X84R.8. Algorithms for Sensor-Based Robotics.
Use advanced mathematical concepts in linear algebra and optimization to develop applied algorithms for robotic systems utilizing various imaging modalities and sensors. Explore all phases of kinematics/dynamics modeling, preparation, motion planning, and execution. Examine examples of such algorithms in various areas including, but not limited to, robotic surgery, mobile robotics, manipulation, and human-machine interaction systems.

M E X84R.9. Haptics and Teleoperated Systems.
Examine theory, analysis, and application of a variety of haptic and teleoperated systems, particularly in robotics and consumer electronics.

M E X85J. Topics in Biomedical Engineering.

M E X85J.1. Cell and Tissue Anatomy and Physiology for Engineers.
An overview of cellular biology, including functional cellular anatomy, DNA replication and the cell cycle, protein synthesis, membrane structure and function, energy metabolism, cellular homeostasis, and cell repair and death; and functional anatomy and physiology of the basic tissues.

M E X85J.10. Biomedical Application of Transport Phenomena.
Investigates radioisotopic methods for biological transport, including theory and experiments. Investigates artificial organ systems with clinical laboratory experiments to augment theory presented in lectures.

M E X85J.11. Biomedical Engineering Hospital Interfaces.
Students gain firsthand knowledge of the instrumentation, procedures, and organization of a modern hospital. Class sessions are held in the different clinical services and laboratories of the hospital.

M E X85J.12. Biomedical Heat Transfer.
Heat transfer in biological tissue; determination of thermodynamic and transport properties of tissue; thermal effects of blood perfusion; cryobiology; numerical modeling methods; clinical applications.

M E X85J.13. Molecular Recognition in Biology and Biotechnology.

M E X85J.15. Biosignal Analysis.
Theory and classification of biological signals such as EEG, EKG, and EMG. Data acquisition and analysis procedures for biological signals, including computer applications.

M E X85J.16. Laser-Tissue Interaction: Optical.
The optical behavior of random media such as tissue in interaction with laser irradiation. Approximate transport equation methods to predict the absorption and scattering parameters of laser light inside tissue. Port-wine stain treatment; cancer treatment by photochemotherapy; and cardiovascular applications.

M E X85J.17. Biomedical Instrumentation II: Real-Time Computer-Based Systems.
Design, testing, patient safety, electrical noise, biomedical measurement transducers, therapeutics, instrumentation electronics, and microcomputer interfaces. Several case studies are presented.

M E X85J.18. Biomedical Image Processing.
Physical principles and signal processing techniques used in thermographic, ultrasonic, and radiographic imaging, including image reconstruction from projections such as CT scanning, MRI, and millimeter wave determination of temperature profiles.

M E X85J.2. Organ System Anatomy, Physiology, and Pathology for Engineers.
The functional anatomy and physiology of the major human organ systems; representative pathologic disorders associated with these organs. An overview of general pathologic processes, with emphasis on the influences of normal and abnormal organ anatomy, physiology, and disease on the definition and solution of biomedical engineering problems.

M E X85J.20. Network Thermodynamics in Biophysics.
Modeling and simulation methods for nonlinear biological processes, including coupling across multienergy domains; practical implementation by bond graph techniques.

M E X85J.23. Optical Spectroscopy.
Measurement and interpretation of spectra: steady-state and time-resolved absorption, fluorescence, phosphorescence, and Raman spectroscopy in the ultraviolet, visible, and infrared portions of the spectrum.

M E X85J.24. Rehabilitation Engineering.
Explores use of robotic devices in physical therapy for neuromuscular injury. Clinicians lecture each week on a specific malady, followed by critical review of the literature of that malady from the perspective of rehabilitation engineering. Shadows therapists and develops a prototype of a device for therapy, assistance or diagnosis of patients, or conducts an experiment to test a hypothesis in the field using a device.

M E X85J.26. Therapeutic Heating.
Engineering aspects of electromagnetic fields that have therapeutic applications: diathermy (short wave, microwave, and ultrasound), electrosurgery (thermal damage processes), stimulation of excitable tissue, and electrical safety.

M E X85J.27. The Biotechnology Revolution and Engineering Ethics.
The history and status of genetic engineering; potential applications in medicine, agriculture, and industry; ethical and social issues surrounding the engineering of biological organisms; ethics in engineering practice in physical and biological realms.

M E X85J.28. Noninvasive Optical Tomography.
Basic principles of optical tomographic imaging of biological materials for diagnostic or therapeutic applications. Optical-based tomographic imaging techniques including photothermal, photoacoustic, and coherent methodologies.

M E X85J.29. Transport Processes in Biological Systems.
Introduction to engineering analysis of transport phenomena in living systems, including fluid flow, heat transfer, pharmacokinetics, and membrane fluxes with clinical applications.

M E X85J.3. Bioelectric Phenomena.
Examines the physiological bases of bioelectricity and the techniques required to record bioelectric phenomena both intracellularly and extracellularly; the representation of bioelectric activity by equivalent dipoles and the volume conductor fields produced.

M E X85J.30. Introduction to Biomechanics.
Modeling and simulation of human movement; neuromuscular control; computer applications; introduction to experimental techniques.

M E X85J.31. Biomedical Instrumentation I.
Application of electrical engineering techniques to analysis and instrumentation in biological sciences: pressure, flow, temperature measurement; bioelectrical signals; pacemakers; ultrasonics; electrical safety; electrotherapeutics.

M E X85J.32. Projects in Biomedical Engineering.
An in-depth examination of selected topics, such as optical and thermal properties of laser interaction with tissue; measurement of perfusion in the microvascular system; diagnostic imaging; interaction of living systems with electromagnetic fields; robotic surgical tools; ophthalmic instrumentation; noninvasive cardiovascular measurements.

M E X85J.33. Neurophysiology/Prosthesis Design.
The structure and function of the human brain. Discussion of selected neurological diseases in conjunction with normal neurophysiology. Study of neuroprosthesis treatments and design philosophy, functional neural stimulation, and functional muscular stimulation.

M E X85J.34. Biopolymers and Drug/Gene Delivery.
Introduction to different classes of biopolymers. Biodegradability and biocompatibility. Interaction of cells and tissues with polymers and polymeric implants; immunology of biomaterials. Applications of polymers in medicine and biology. Gene therapy and generic immunization. The use of biopolymers and drug/gene delivery in organ regeneration and tissue engineering.

M E X85J.35. Rehabilitation Robotics and Engineering.
Explores the use of robotic devices to support the strength of patients and therapists, quantitatively diagnose impairment, and augment function. Critically review the literature in rehabilitation engineering from both robotics and scientific perspectives. Students also shadow therapists and develop a prototype of a device for therapy, assistance or diagnosis of patients, or conduct an experiment to test a hypothesis in the field using a device.

M E X85J.36. Modeling and Simulation of Human Movement.
Examine a synthesis of neuromusculoskeletal properties and interactions with the environment to construct detailed musculoskeletal models and computer simulations that allow for the investigation of various aspects of human movement. Explore a review of rigid-body dynamics, inverse and forward dynamic analyses, muscle physiology and models, musculoskeletal anthropometrics, muscle induced acceleration and segment power analyses, contact models, optimal control, muscle force distribution solutions, and simulation applications.

M E X85J.5. Cardiovascular Dynamics.
Anatomy, physiology, pathophysiology, and dynamics of the cardiovascular system, with emphasis on the design and application of electrical and mechanical devices for cardiac intervention.

M E X85J.9. Laser-Tissue Interaction: Thermal.
The thermal response of random media in interaction with laser irradiation. Calculation of the rate of heat production caused by direct absorption of the laser light, thermal damage, and ablation.

M E X85M. Applied Thermodynamics.
Addresses the design and analysis of systems in which thermodynamic processes are central to function and performance. Reviews fundamental thermodynamic concepts, such as enthalpy, entropy, exergy, 1st & 2nd law, psychrometrics and combustion. Discusses practical topics, such as system-level thermodynamic processes for automotive engines, power plants, renewable energy production and HVAC systems. Gives real-world examples to cultivate skills of solving problems with basic knowledge of thermodynamics.

M E X86M. Modeling, Simulation, and Control of Physical Systems.
Reviews principles used to understand and model physical systems and introduces methods for building mathematical and simulation models of engineering systems. Emphasis on the development of

dynamic system models for predicting the behavior or performance of systems, models for efficient data reduction or test development, models for design, and the role of models in control development. Bond graph methods are introduced especially for analysis of systems having combinations of mechanical, electrical, magnetic, electromechanical, fluid, and thermodynamic effects. Covers the role and application of physical models in development and design of feedback controllers and estimation methods.

M E X86P. Topics in Materials Science: Fundamentals.

M E X86P.1. Introduction to Phase Transformations.
Basics of crystal structures and phase diagrams; diffusion; solidification; solid-state phase transformations.

M E X86P.2. Mechanical Behavior of Materials.
Elastic deformation; viscoelasticity; yielding, plastic flow, plastic instability; strengthening mechanisms; fracture, fatigue, creep; significance of mechanical properties tests. Microstructural mechanisms and macroscopic behavior of metals, polymers, ceramics, and composites.

M E X86P.3. Introduction to Thermodynamics of Materials.
Thermodynamic properties; reactions and chemical equilibrium in gases; solutions, phase equilibria, phase diagrams, reaction equilibria; surfaces and interfaces; point defects in crystals.

M E X86P.4. Introduction to Solid-State Properties of Materials.
Introduction to the electronic, magnetic, and optical properties of materials. Solid-state properties of metals, semiconductors, and ceramics; fundamental concepts needed for the description of these properties, using an introductory-level description of the electronic structure of solids.

M E X86P.5. Structure of Materials.
Essential crystallography of lattices and structures; symmetry; elements of diffraction and reciprocal lattices; point, line, and surface defects in crystals; crystalline interfaces; noncrystalline materials; polymers; glasses.

M E X86P.6. Kinetic Processes in Materials.
Review of irreversible thermodynamics and rate of entropy production to define the equilibrium state of a system; derivation of mathematical expressions to describe relaxation from a constrained state to equilibrium; diffusional processes in materials; calculation of diffusion coefficients from solid-state properties; dislocations and interfaces; kinetics of phase transformations.

M E X86Q. Topics in Materials Science: Structure and Properties.

M E X86Q.1. Theory of Materials.
Periodic behavior and the periodic table; historical approach to the principles of crystal structure; complex alloy phases; some aspects of phase stability.

M E X86Q.10. High-Temperature Materials.
Theory and practice in use of materials for high-temperature structural applications; case-study considerations of actual problems and requirements; interactive process-microstructure-property relationships in materials development and applications of superalloys, intermetallics, composites, and ceramics; prospective trends.

M E X86Q.11. Electroceramics.
Bonding; crystal structures; defects; phase diagrams; glass ceramics; electrical, dielectric, magnetic, and optical ceramics.

M E X86Q.14. Electrochemical Energy Materials.
Electrochemical cells; principles of electrochemical power sources; materials for rechargeable and nonrechargeable batteries, fuel cells, and electrochemical capacitors.

M E X86Q.15. Computational Materials Science and Engineering.
Examine theory and a hands-on tutorial for atomistic modeling of materials.

M E X86Q.16. Application Perspectives of Nanotechnology.
Subjects include standard top-down and the state-of-the-art bottom-up nanofabrication, manipulation, and assembling techniques, commonly used characterization instruments; applications of nanomaterials in biochemical sensing based on electric, optical, magnetic and mechanical effects; flexible nanoelectronics; nanomanipulation and nanorobotics, applications of nanomaterials in Nanoelectromechanical System (NEMS) devices, bioMEMS, and microfluidics. Emphasis on oral and written scientific communication skills.

M E X86Q.17. Failure Analysis.
Introduction to methodology of analyzing failures of engineering parts and devices. Explores a broad range of analysis, but the focus is on understanding fractography and relating this back to material and mechanics relevant to failure to determine the likely root cause(s). Lectures are primarily based on case studies and are supplemented by two hands-on class projects, one performed individually and the other larger project performed as a team project.

M E X86Q.18. Advanced Numerical Methods: Theory and Practice.
Apply the theory behind numerical simulation, optimization of electrochemical engineering, and other engineering models described by nonlinear differential, differential-algebraic, and partial differential equations. Explore a self-contained, fundamental and practical approach to the theory, algorithm development, and implementation relevant to engineering systems, in particular for electrochemical systems, and batteries.

M E X86Q.19. Nanotechnology for Sustainable Energy.
Explore an overview of emerging nanotechnology and how nanoscience can critically impact many energy technologies (from energy harvesting, conversion, to storage). Examine various types of energy devices covered, including solar cell, solar fuel, piezoelectrics, thermoelectrics, battery, supercapacitor, and fuel cell. Discuss basic device principles, current technology status, and new opportunities of nanotechnology for energy-related applications.

M E X86Q.2. Phase Diagrams.
Phase equilibria in materials systems; systematic treatment of unary, binary, and ternary phase diagrams.

M E X86Q.20. Polymer Nanocomposites.
Explore an overview of key technologies and processes in polymer nanocomposites. Examine a different property (structural, mechanical, thermal, flammability, ablation, and electrical) and relevant commercial and industrial applications. Discuss examples for a wide variety of usage for spacecraft and defense vehicles, medical and dental implants, flame-retardant and conductive polymers for additive manufacturing, and fire-resistant woven and nonwoven fabrics.

M E X86Q.23. Structural Ceramics.
Explore microstructure-mechanical property relationships in ceramics; principles of fracture mechanics, and static and dynamic fracture; static and cyclic fatigue; high-temperature behavior; strengthening and toughening mechanisms in monolithic ceramics; and particulate and fibrous ceramic composites.

M E X86Q.3. Fracture of Structural Materials.
Microscopic and macroscopic aspects of ductile and brittle fracture; fracture mechanisms and fracture prevention.

M E X86Q.4. Physical Metallurgy of Steels.
The iron-carbon system; transformations and structures of steels; properties of pearlite, bainite, and martensite; tempering; hardenability and the effect of alloying elements.

M E X86Q.7. Composite Materials.
The theory of structural composite materials, their physical and mechanical properties; processing associated with metal-ceramic-polymer composites.

M E X86Q.9. Crystalline and Composite Anisotropy.
Mathematical analysis of anisotropic materials, including single crystals, laminate composites, and deformation-hardened metals. Topics include

thermal and electrical conductivity, diffusivity, thermal expansion, elasticity, and yielding.

M E X86R. Topics in Materials Science: Physical and Electronic Properties.

M E X86R.1. Localized versus Itinerant Electrons in Solids.
Description of electrons, from free atoms to crystals; band theory contrasted with crystal-field theory; evolution of electronic properties on passing from magnetic insulators to normal metals, from ionic to covalent solids, from single-valent compounds to mixed-valent systems; electron-lattice interactions and phase transitions; many examples.

M E X86R.2. Localized-Electron Phenomena.
Analysis of the variation in physical properties versus chemical composition of several groups of isostructural transition-metal compounds.

M E X86R.3. Transport Properties of Transition-Metal Oxides.
Electronic and ionic transport in transition-metal oxides as they relate to battery cathodes, solid oxide cells, spin electronics, thermistors, and high-temperature superconductors.

M E X86R.4. Nanophotonics and Machine Learning.
Explore recent trend of applying artificial intelligence (AI) techniques, especially machine learning, to specific tasks which has revolutionized many research subjects in different fields. Examine the fundamentals of the most important concepts from both sides, such as deep neural networks that has been used to design and decode nanophotonic devices, and metasurfaces and photonic circuits that can perform optical computing.

M E X86S. Topics in Materials Science: Microelectronics and Thin Films.

M E X86S.1. Thin Films and Interfaces.
Application of thin films and interfaces in microelectronics; basic properties, deposition techniques, microstructures and defects, diffusion characteristics; materials reaction in thin films and at interfaces.

M E X86S.2. Metallization and Packaging.
Technology requirements and trends, impact of device scaling, multilayered interconnect structures, Schottky and ohmic contacts, contact reactions, silicide properties and applications, electromigration, thermal/mechanical properties, reliability.

M E X86S.3. Materials for Semiconductor Packaging and Heterogeneous Integration.
Explore the process of integrating separately manufactured components into a higher-level assembly. Examine how materials play a critical role in protecting the chips, ensuring reliable operation, efficient thermal management, and for the development of smaller, lighter, and more powerful devices. Focus on materials for package substrates, thermal interface materials, materials for interconnects and for encapsulation, and materials for thermal management and immersion cooling, as well as novel materials that are currently under development.

M E X86T. Topics in Materials Science: The Design of Technical Materials.
The process of designing a material for a specific engineering function as illustrated for various materials.

M E X86T.1. Ionic Conductors.

M E X86T.2. High-Temperature Superconductors.

M E X86T.3. Catalytic Electrodes.

M E X86T.4. Magnetic Materials.

M E X86T.5. Battery Systems Engineering.
Explore the development of models and algorithms to analyze, optimize, and improve the performance of batteries. Discuss the mathematical formulation for predicting the performance of batteries using physics-based models. Examine a self-contained, fundamental approach to modeling, analysis, operation, and control of batteries.

M E X87M. Applied Dynamics and Feedback Control.
Provides advanced tools for describing and controlling the motion of dynamical systems. Studies how to apply Newton's Second Law as well as Lagrange's equations to find equations of motion. Emphasis on rigid body dynamics as well as motion constraints arising in complex systems. Examines fundamental concepts in both the time and frequency domains to develop feedback controllers and thus advance from open loop simulation of dynamic systems to closed loop control. Introduces common control strategies and tools for designing and testing control systems. Uses MATLAB extensively throughout the course, and emphasizes applications to realistic systems, simulations and numerical solutions.

M E X87Q. Topics in Materials Science: Thermodynamics and Kinetics.

M E X87Q.1. Diffusion in Solids.
Atomic mechanisms and phenomenological basis for transport by diffusion.

M E X87Q.2. Kinetics and Phase Transformations.
Nucleation and growth, spinodal decomposition, transformations in alloy systems.

M E X87Q.3. Solidification.
Liquid to solid transformations in pure materials, alloys and eutectics; applications such as zone refining, composites, and castings.

M E X87Q.4. Corrosion.
Electrode kinetics and the theory of polarization, passivity, galvanic coupling, and high temperature oxidation.

M E X87Q.5. Thermodynamics of Materials.
First and second laws, fugacity, activity, chemical equilibrium, phase diagrams, and introductory statistical concepts.

M E X87Q.6. Statistical Thermodynamics of Materials.
Quantum mechanics applied to partition functions of condensed and gaseous phases; chemical equilibria; phase transitions; and lattice statistics including the Ising model.

M E X87Q.7. Group Theory and Phase Transformations.
Symmetry principles and the associated mathematics applied to the description of condensed phases and their transformations.

M E X87R. Topics in Materials Science: Experimental Techniques.

M E X87R.1. Nondestructive Testing.
Acoustic emission, ultrasonic, eddy current, dye penetrant, and magnetic methods.

M E X87R.3. Electron Diffraction and Microscopy.
Transmission electron microscopy, kinematic electron diffraction theory, reciprocal lattice, defect analyses, scanning electron microscopy.

M E X87R.4. Advanced Electron Microscopy Theory and Techniques.
Scanning transmission electron microscopy, microanalysis techniques, dynamical diffraction theory, convergent beam diffraction.

M E X87R.5. Materials Characterization Techniques.
Classification and selection of characterization techniques: principles and applications of diffraction, spectroscopic, quantitative chemical analysis, thermal analysis, and transport and magnetic measurement techniques.

M E X87R.6. High-Resolution Transmission Electron Microscopy Techniques.
Theory and practice of high-resolution phase contrast electron microscopy. Computer simulation of images and diffraction patterns.

M E X87R.7. Scanning Electron Microscopy.
Theory and practice of scanning electron microscopy; image formation, elemental analysis, sample preparation, and electron-sample interactions.

M E X87R.8. Practical Electron Microscopy.
Principles, operation, and techniques of transmission electron microscopy; acquiring and interpreting imaging, diffraction, and spectroscopy information; and hands-on experience with a transmission electron microscope.

M E X87R.9. Advanced Methods for Surface Analysis.
Examine the principles and operation of X-ray photoelectron spectroscopy (XPS) and atomic force microscopy (AFM). Explore

state-of-the-art methods for acquiring, processing and interpreting the analytical results. Perform hands-on experiments on XPS and AFM followed by data evaluation and interpretation.

M E X87S. Topics in Materials Processing.

M E X87S.2. Processing of Materials.

Principles, advantages, and problems of solid, liquid, and vapor materials processes; considerations of structural alloys, ceramics, engineering polymers, and composites.

M E X87S.3. Powder Processing.

Synthesis of powders, powder characterization, powder stabilization, consolidation of powders, sintering, densification, and grain growth.

M E X88C. Nuclear Power Engineering.

Fundamental principles of the design and analysis of nuclear systems; introduction to the physics of nuclear reactions, chain reactions, and nuclear energy generation; heat generation and conduction within nuclear systems; heat transfer and fluid flow in nuclear systems; the thermodynamics of nuclear power; the nuclear fuel cycle; and issues related to the materials aspect of reactor engineering.

M E X88D. Nuclear Reactor Theory I.

Principle concepts in the physics of nuclear systems, including radiation, radioactive decay, and the buildup and depletion of isotopes in nuclear systems; neutron-nucleus interactions and nuclear cross sections; transport or radiation using one-group and two-group diffusion theory; and concepts of criticality and time dependent reactors.

M E X88E. Nuclear Reactor Theory II.

Neutron-nucleus interactions and nuclear cross section calculations; transport of radiation using neutron transport theory and multigroup diffusion theory; heterogeneous reactor calculations; the kinetics of nuclear systems; perturbation theory; and the nuclear fuel cycle.

M E X88F. Computational Methods in Radiation Transport.

Transport equation, Monte Carlo method, energy and time discretization, discrete ordinates, integral methods, and even-parity methods.

M E X88G. Nuclear Radiation Shielding.

Radiation fields/sources; techniques in neutron and photon attenuation; transport description of radiation penetration.

M E X88H. Nuclear Safety and Security.

Examine probabilistic risk assessment models and nuclear arms nonproliferation, including failure classifications; failure mode, effects, and criticality analysis (FMECA); fault and event trees; and reliability block diagrams. Discuss specific areas from the Code of Federal Regulations.

M E X88J. Neutron Interactions and Their Applications in Nuclear Science and Engineering.

The fundamental principles of neutron interactions with matter and how these interactions are used in a variety of science and engineering research areas. Includes the history of neutron research, fundamental principles, dosimetry, depth profile, radiography, activation analysis, detection, homeland security, and scattering, with a significant emphasis placed on experimental design of these neutron techniques.

M E X88M. Mathematical Methods for Nuclear and Radiation Engineering.

Fundamental mathematics used in graduate studies in nuclear and radiation engineering. Topics include statistics, experimental data, propagation of error, detection limits, and differential and partial differential equations.

M E X88N. Design of Nuclear Systems.

Integration of fluid mechanics, heat transfer, thermomechanics, and thermodynamics with reactor theory for core design.

M E X88P. Applied Nuclear Physics.

Properties of the nucleus and its structure; binding energy and nuclear stability, and the liquid drop model of the nucleus; the shell model of the nucleus; deuteron bound-state wave function and energy, n-p scattering cross section, transition probability per unit time, and barrier transmission probability; nuclear conservation laws; the energetics and general cross section behavior in nuclear reactions; interactions of charged particles, neutrons, and gamma rays with matter; and alpha, beta, and gamma decay.

M E X88S. Modern Trends in Nuclear and Radiation Engineering.

Facilitates presentations on research topics in nuclear and radiation engineering outside any research with techniques in proposal writing; or specialized laboratory courses.

M E X89C. Nuclear Environmental Protection.

Ionizing radiation and its interactions with matter and living tissues; radioactive decay kinetics; external and internal dose measurement; transportation through the environment; managing radioactive waste streams; and safeguards.

M E X89F. The Nuclear Fuel Cycle.

A survey of the nuclear fuel cycle, including resource acquisition, fuel enrichment and fabrication, spent fuel reprocessing and repository disposal. Nuclear fuel management and reactor physics are addressed in the context of fuel burn-up calculations. Uses cross-disciplinary tools such as cost-benefit and environmental impact analyses. Includes fuel cycles currently in use, advanced fuel cycle concepts currently being presented in the technical literature, and a group project designed to research, analyze, and document the technical, economic, and/or environmental ramifications of one of these advanced fuel cycles.

M E X89M. Materials Processing.

Explores the principles, advantages, and problems of solid, liquid, and vapor materials processes. Studies the considerations of structural alloys, ceramics, engineering polymers, and composites.

M E X89Q. Topics in Nuclear and Radiation Engineering: Design of Systems.

Synthesis of engineering concepts, materials specifications, and economics in the design of nuclear systems.

M E X90. Vehicle System Dynamics and Controls.

Fundamentals of ground vehicle dynamics, tire-road mechanics, vehicle control systems, vehicle stability, and simulation of vehicle systems.

M E X90C. Cyber Vehicle Systems.

Study of the engineering principles of autonomous mobile robots. Subjects include understanding the dynamics of vehicle systems, and the principles and practical implementation of sensing, actuation, and control. Emphasis will be given to providing practical laboratory study of these subjects using mobile robot platforms, and the use of the commercial software package LabVIEW for programming of real-time data acquisition and control targets. Simulation studies may also be conducted in LabVIEW and/or the Matlab environment; some proficiency in use of both of these software packages is expected.

M E X90E. Nuclear Security System Design.

Explore the science and engineering associated with the design, evaluation, and implementation of systems to secure nuclear and radiological materials. Examine methods for planning and evaluating nuclear security activities at the state and facility level. Study the characterization of the adversary, categorization of targets and the consequences associated with failure to protect those targets, detection and delay technologies, on-site and off-site response as well as different response strategies, evaluation of insider threats, mathematical methods for evaluating risk due to the threat and the security system design, and methods for risk minimization and system optimization will also be studied.

M E X90F. Nuclear Analysis Techniques.

Thermal and fast neutron activation, scintillation and solid-state detectors, beta and gamma spectrometry, coincidence techniques.

M E X90G. Nuclear Engineering Laboratory.

Experiments using the TRIGA reactor and a subcritical assembly; measurement of reactor characteristics and operational parameters.

M E X90M. The Enterprise of Technology.

Uses early stage technologies to create new and original commercialization plans which include the best first market, establishing technology features in that market, and estimated benefits and costs

to deliver a future product to a customer. Includes in-person market research, a written semester journal, and engagement with multiple projects. Reviews later stages of technology entrepreneurship; includes forming a new company, building a business plan, building a team, getting funding, and scale up to manufacturing. Emphasis on gaining proficient knowledge on intellectual property protection and strategy, and the steps and processes necessary to the successful design and manufacture of a product or service.

M E X90N. Health Physics Laboratory.
The application of radiation and radiation protection instrumentation. Includes personnel monitoring; radiation detection systems; gamma-ray spectroscopy; determination of environmental radiation; counting statistics; and gamma and neutron shielding.

M E X90T. Nuclear and Radiochemistry.
Theory and application of nuclear and radiochemistry, including alpha, beta, and gamma ray processes; fission products; statistics; solvent extraction; absorption and teaching techniques; various counting methods; and radiation protection.

M E X90V. Advanced Nuclear Engineering.
Study radioactivity, fission reactors, nuclear power systems, nuclear power safety, and nuclear interactions: fission and fusion.

M E X90W. Proposal Writing.
Learn to write a full proposal on current research in any science or engineering discipline.

M E X91M. Introduction to Manufacturing Systems.
With an emphasis on continuous flow manufacturing, provides the knowledge and skill set to analyze and design production systems to decrease manufacturing costs, decrease defects, and shorten delivery time by reducing process cycle times.

M E X91R. Artificial Intelligence Programming for Engineers.
Provides a working knowledge of LISP and compares it with PROLOG; use of the Texas Instruments Explorer, and artificial intelligence techniques applied to engineering problems.

M E X92C. Design Optimization and Automation.
Optimization in mechanical design, including monotonicity analysis, gradient-based constrained optimization, tree-searching, and stochastic approaches.

M E X92G. Topics in Computer Graphics and Computer-Aided Design.
Studies in computer graphics and its application to design.

M E X92G.1. Introduction to Computer Graphics.
Two- and three-dimensional transformations, projections, and the graphics pipeline; fundamental algorithms for wire frame and hidden surface image generation; interactive techniques, geometric modeling, and realistic rendering using a standard graphics library.

M E X92G.2. Computer-Aided Geometric Design.
Introduction to techniques for representing geometry for computer-aided engineering design. Two- and three-dimensional curve formulations, techniques from algebraic and vector geometry, implicit versus parametric definitions; and free-form surface formulation and solid modeling.

M E X92G.3. Advanced Computer-Aided Design Applications.
Hardware and software for computer-aided design systems. Display devices, multidimensional graphics, optimization, use of artificial intelligence.

M E X92G.4. Advanced Topics in Computer-Aided Design.
Detailed execution of an independent computer-aided design project. Projects require significant development and emphasize application of techniques from computer-aided engineering and interactive computer graphics. Lectures deal with the subject matter of the projects.

M E X92M. Topics in Advanced Mechanical Design.

M E X92M.1. Analytical Techniques in Mechanical Design.
Analytical techniques and some computational techniques for the advanced stress and strength analysis of machine components and mechanical structures.

M E X92M.10. Computational Methods for Engineering Design.
Examine several categories of computational methods that are useful for engineering design applications. Implement the methods on example engineering design problems.

M E X92M.11. Data-Driven Design and Decision-Making in Complex Systems.
Explore state-of-the-art approaches for data-informed decision-making and modeling in complex systems design. Apply various data-driven and theory-driven models to model, estimate, analyze, and predict decision-making behaviors of stakeholders in representative complex engineered systems, such as air transportation networks, power grids, and market systems.

M E X92M.3. Advanced Design of Machine Elements.
Review of basic machine elements, properties, and stresses; fluid couplings and torque converters; thermal stresses, relaxation, and beneficial residual stressing; shells and rotors; plasticity.

M E X92M.6. Engineering Design Theory and Mathematical Techniques.
Design history and philosophy. Survey of current research areas in design theory, methodology, and manufacturing. Tools for solving engineering system design and synthesis problems. Reverse engineering design project.

M E X92M.7. Product Design, Development, and Prototyping.
Methodology and tools for the product development process. Functional designs based on real product needs. Product design project.

M E X92M.8. Medical Device Design and Manufacturing.
Explore how to solve medical device design problems using systematic design thinking and practices. Interpret clinical needs, define an open engineering medical device design problem, including formulating engineering requirements/specifications to address a marketable need. Generate concepts in a way that promotes both creativity and usefulness, make well-informed, well-justified design decisions in the early and later stages of design. Design and analyze experiments, follow statistical best practices in Design of Experiments(DoE), embody solutions with "Design for X" considerations, and communicate intermediate and final designs clearly and effectively in written and oral formats.

M E X92M.9. Precision Machine Design.
Discuss modeling, design, integration and best practices for use of machine elements such as bearings, springs, gears, cams and mechanisms. Model and analyze these elements based upon extensive application of physics, mathematics, and core mechanical engineering principles (solid mechanics, fluid mechanics, manufacturing, estimation, computer simulation, etc.).

M E X92Q. Topics in Manufacturing.
Topics that cut across departmental concentrations (mechanical systems and design, metallurgy and materials engineering, operations research and industrial engineering), including design for manufacturing, manufacturing machines and manufacturing processing, and production systems.

M E X92Q.1. Introduction to Manufacturing Systems.
Analysis and design of production systems to decrease manufacturing costs, decrease defects, and shorten delivery time by reducing process cycle times. Emphasis is on continuous flow manufacturing.

M E X92Q.10. Statistical Methods in Manufacturing.
Statistical monitoring of manufacturing processes; methods and applications of various control charts; formal design of experiments (DOE), including the statistical evaluation of main and interaction effects, as well as intelligent experimentation through reduced factorial experimental design; Taguchi's design philosophy as applied to response surface methods and gradient-based search techniques; and advanced issues in quality control and design of manufacturing systems.

M E X92Q.11. High Throughput Nanopatterning.
Introduction to the basic tools and materials involved in the patterning processes needed to create nano-scale structures and functional materials and discusses the relevance of these processes to applications in the electronics, display, and energy industries. Examine industry and research roadmaps that provide relevant metrics and timelines for fabrication, materials, nano-enabled components and devices. Explore novel nano-enabled components and devices using relevant computational modeling and simulation tools.

M E X92Q.12. Additive Manufacturing.
Explore, compare, and contrast the major categories of additive manufacturing processes and examine their impact on the design of engineered parts.

M E X92Q.13. Analytics and Control in Semiconductor Manufacturing.
Learn key data analytics and process control methods for turning metrology and sensing data into useful information and decisions in semiconductor manufacturing. Explore applications of statistical models for statistical process control, as well as applications of dynamic models for virtual metrology and run-to-run control in semiconductor manufacturing systems.

M E X92Q.14. Bioinspired Micro and Nanostructures.
Explore the unique properties, operating principles, and applications of micro/nanostructures that are found in nature. Examine naturally occurring organisms that have unique microscopic features, giving rise to novel behavior not observed in traditional bulk materials. Discuss the design and manufacturing of these bioinspired micro/nanostructures for engineered materials, highlighting applications in renewable energy, aerospace, and next-generation electronics and display.

M E X92Q.15. Optical Engineering.
Explore optics, with a focus on engineering applications. Review geometrical optics: ray-tracing, reflection, refraction, lens design, imaging optical systems, as well as subjects in wave optics: basic electrodynamics, scalar wave theory, interference, Fresnel and Fraunhofer diffraction, image formation, Fourier optics, and 4F systems. Examine optical systems and metrology instruments, such as the human eye, microscopes/telescopes, and interferometers. Discuss the role of optics in advanced nano/microscale manufacturing, as well as applications in more efficient solar energy systems, engineered materials, and nanotechnology.

M E X92Q.2. Computer Fundamentals for Manufacturing Systems.
Computer graphics, computer-aided design, direct numerical control, relationship between computer-aided design and manufacturing.

M E X92Q.4. Automation and Integration of Manufacturing Systems.
Integration of automated manufacturing components into a cohesive manufacturing system. Selection of automation strategy, communication and interaction between system components, economics and reliability of the resulting systems.

M E X92Q.5. Manufacturing Processing: Unit Processes.
Important unit processing operations in manufacturing: cutting, drilling, and grinding metals, ceramics, composites, and polymers. Deformation processes: forming and rolling. Laser machining.

M E X92Q.6. Mechatronics I.
Integrated use of mechanical, electrical, and computer systems for information processing and control of machines and devices. System modeling, electromechanics, sensors and actuators, basic electronics design, signal processing and conditioning, noise and its abatement, grounding and shielding, filters, and system interfacing techniques.

M E X92Q.7. Microcomputer Programming and Interfacing.
Microcomputer architecture and programming; microcomputer system analysis; interfacing and digital control.

M E X92Q.9. Mechatronics II.
Interfacing microcomputers with sensors and actuators; hybrid (analog/digital) design; digital logic and analog circuitry; data acquisition and control; microcomputer architecture, assembly language programming; signal conditioning, filters, analog-to-digital and digital-to-analog conversion.

M E X93M. Engineering Design Innovation.
Focuses on design methodology that includes a survey of current research in areas in design theory and methodology. Studies the tools used for solving engineering system designs and synthesis problems for application in a reverse engineering and redesign project.

M E X94M. Topics in Mechanical Engineering.
Topics in Engineering.

M E X95. The Enterprise of Technology.
Studies the basis for assessing emerging technologies. Describes the process of technology commercialization, including identifying marketable technologies, defining products, and matching products to markets. Also studies intellectual property protection and strategy, and the steps and processes necessary to the successful design and manufacture of a product or service.

M E X95M. Engineering Design and Innovation with Product Design.
Focuses on design methodology that includes a survey of current research in areas in design theory and methodology. Designed to help students acquire tools for solving engineering system designs and synthesis problems which they can apply in a reverse engineering and redesign project.

M E X96D. Decision and Control of Human-Centered Robots.
Geared toward students who would like to use Python for their engineering careers with a focus on sharing and development of open source software applications. Emphasis on the important areas of system modeling, simulation, data analysis, and software/data management. Students create mini-projects in Python where they apply basic knowledge on software design and organization, debugging, open source practices, and data visualization. It is expected that students have some experience in programming and would like to advance to the next level.

M E X96M. Materials Science and Engineering.
An exploration of the fundamental aspects of the relationships between processing, structure, properties and performance of engineering materials. Exploration of metals, ceramics, polymers, and composites.

M E X96P. Application Programming for Engineers.
Designed for students who have some experience in programming and are interested in the sharing and development of open source software applications. Provides an introduction to the Python programming language, an open source, flexible, and intuitive debug programming language, with an emphasis on system modeling, simulation, data analysis, and software/data management. Students create mini projects in Python that demonstrate software design and organization, debugging, open source practices, and data visualization.

M E X97. Topics in Current Engineering Studies.

M E X97.8. Energy and the Environment.

M E X97K. Topics in Graduate Seminar.

M E X97K.1. Acoustics Seminar.

M E X97K.2. Advanced Thermal/Fluid Seminar.

M E X97K.3. Materials Engineering.

M E X97K.4. Mechanical Systems and Design.

M E X97K.5. Nuclear Engineering.

M E X97K.6. Introductory Thermal/Fluid Seminar.

M E X97M. Graduate Research Internship.
Research associated with enrollment in the Graduate Research Internship Program (GRIP).

M E X97P. Projects in Mechanical Engineering.
Independent project carried out under the supervision of a mechanical engineering faculty member.

M E X97S. Introduction to Graduate Studies.
Introduction to graduate studies is a first year seminar course for new graduate students that cover topics such as finding a research advisor, how to apply for fellowships, how to select a research topic, how to conduct a literature review, research methods, and research ethics.
M E X98. Thesis.
M E X98C. Engineering Teaching Practicum.
M E X98M. Introduction to Automatic Control.
Gain a basic intuition for and understanding of linear feedback systems and develop the mathematical tools to understand the basics of design and analysis of single-input single-output feedback control systems. Builds on the system modeling skills developed in previous courses in order to better understand how to control a system's behavior.
M E X98P. Topics in Engineering Teaching Practicum.
Mentored teaching experience completed by arrangement with the instructor of record for an undergraduate engineering course. May be completed in the same semester as a Teaching Assistant or Assistant Instructor assignment with additional responsibilities.
M E X98Q. Topics in Teaching Portfolio Preparation.
Project course for students completing the Graduate Certificate in Engineering Education Program to prepare a portfolio highlighting their teaching qualifications and experiences. Not recommended for students with limited teaching experience or students who are within a few years of applying for full-time employment.
M E X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
M E X98S. Assessment and Curriculum Design in Engineering.
Develop curriculum design skills in preparation for engineering faculty positions, including writing learning outcomes, assessing student learning and aligning expectations to activities and outcomes. Assessment is framed as an integrated part of course design, considers the strengths and weaknesses of a variety of quantitative and qualitative assessment strategies. Practice engineering course design and learn important considerations in coordinating department or college resources in preparation for an ABET engineering accreditation review.
M E X98T. Supervised Teaching in Mechanical Engineering.
Application of learning and motivation theories to learning in engineering contexts. Practice teaching in nontraditional formats. Preparation of a teaching philosophy. Teaching under close supervision, group meetings or individual consultations, and reports as required.
M E X99W. Dissertation.

Professional Courses

M E X80M. Research.
M E X97P. Projects in Mechanical Engineering.
Independent project carried out under the supervision of a mechanical engineering faculty member.

M S - Military Science

Military Science: M S

Lower-Division Courses

M S X00. Leadership Laboratory.
Leadership responsibilities for planning, coordination, execution, and evaluation of training and other activities. Self-confidence and team-building leadership skills that can be applied throughout life.
M S X04. American Military History: 1775 to Present.
Covers development of American Profession of Arms from a "dual military tradition" evaluating military leadership at the tactical, operational, and strategic levels of war. Explores ways in which Industrial Revolution transformed the United States and other societies organized armed violence.
M S X09. Basic Military Science I-A.
M S X09K. Basic Military Science I-B.
M S X19. Basic Military Science II-A.
M S X19K. Basic Military Science II-B.
M S X19S. Topics in Military Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Military Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

M S X29. Advanced Military Science III-A.
M S X29K. Advanced Military Science III-B.
M S X29S. Topics in Military Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Military Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
M S X39. Advanced Military Science IV-A.
M S X39K. Advanced Military Science IV-B.
M S X79. Advanced Military Science V-A.
Advanced study of planning, executing, and assessing complex operations. Composed primarily of independent study, cadets are given opportunities to plan and execute events, assess risk, make ethical decisions, and lead fellow ROTC cadets.
M S X79K. Advanced Military Science V-B.
Advanced study of planning, executing, and assessing complex operations. Composed primarily of independent study, cadets are given opportunities to plan and execute events, assess risk, make ethical decisions, and lead fellow ROTC cadets.

Graduate Courses

Professional Courses

MAL - Malayalam

Malayalam: MAL

Lower-Division Courses

MAL X06. First-Year Malayalam I.
Standard Malayalam of Kerala.
MAL X07. First-Year Malayalam II.
MAL X12K. Second-Year Malayalam I.
MAL X12L. Second-Year Malayalam II.
MAL X19S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
MAL X29S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MAL X19S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAL X29S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAL X30. Topics in Malayalam Language and Literature.

MAL X30E. Modern Malayalam Drama.
Focus on 20th-century drama and plays in Malayalam. Examine both the text of the play and its status as socially relevant art, to develop an overview of theatre movements in Malayalam literature and Kerala society. Engage through speaking, listening, reading, and writing.

MAL X30F. Short Novels of Basheer.
Read and discuss two short novels by Vaikkom Muhammad Basheer, celebrated author and activist for Indian independence. Engage through speaking, listening, reading, and writing.

MAL X30G. Contemporary Malayalam Short Stories.
Focus on reading short story collections from mainstream and women writers from modern Malayalam literature dealing with social, political, and economic life context.

MAL X30J. Malayalam Cinema and Screenplays.
Focus on reading Malayalam screenplays to improve speaking and listening proficiency in conversational and colloquial Malayalam. Acquire a general knowledge of proverbs and sayings which are very commonly use in Malayali social life.

MAL X30K. Stories from Aithihyamaala.
Explore selected stories from Aithihyamala (Garland of Legends) written by Kottarathil Sankunni. Examine the history behind the famous persons and events in Kerala, including feudal rulers, Kalaripayattu martial art and Ayurveda in Kerala.

MAL X30L. Reform Movements in Kerala.
Focus on the foundations of social changes in Kerala in the nineteenth to twentieth centuries. Explore selected Malayalam articles related to Kerala history to acquire a general knowledge of prominent leaders of Kerala reformation and a brief history of revolts and movements in Kerala.

MAL X60. Conference Course in Malayalam Language and Literature.
Supervised individual study of selected problems in Malayalam language or literature.

Graduate Courses

MAL X19S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAL X29S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAL X81. Conference Course in Malayalam Language and Culture.
Supervised individual study in Malayalam language or culture.

MAL X84. Topics in Malayalam Language and Culture.
Study of various aspects and periods of Malayalam language and culture.

MAL X84.1. Contemporary Malayalam Short Stories.
Focus on Malayalam short stories from mainstream writers in modern Malayalam to explore contemporary Malayalam literature. Engage through speaking, listening, reading, and writing.

MAL X84.2. Malayalam Cinema and Screenplays.
Focus on reading Malayalam screenplays to develop speaking and listening proficiency with conversational Malayalam. Explore commonly-used proverbs and idioms. Engage through speaking, listening, reading, and writing.

MAL X84.3. Modern Malayalam Drama.
Focus on 20th-century drama and plays in Malayalam. Examine both the text of the play and its status as socially relevant art, to develop an overview of theatre movements in Malayalam literature and Kerala society. Engage through speaking, listening, reading, and writing.

MAL X84.4. Short Novels of Basheer.
Consider two short novels by Vaikom Muhammad Basheer, a beloved author and Indian independence activist. Explore how Basheer's works and unique style are foundational in the field of Malayalam language and literature. Engage through speaking, listening, reading, and writing.

MAL X84.5. Reform Movements in Kerala.
Focus on social change movements in Kerala in the nineteenth and twentieth centuries, through the examination of primary and secondary sources in Malayalam. Explore prose style as well as reform movements in Kerala. Engage through speaking, listening, reading, and writing.

MAL X84.6. Stories from Aithihyamaala.
Examine selected stories from Aithihyamala (Garland of Legends) by Kottarathil Sankunni, a collection of tales and legends from Kerala, to develop vocabulary and language proficiency as well as an understanding of the traditional views, practices, and traditions of Kerala. Engage through speaking, listening, reading, and writing.

Professional Courses

MAL X19S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAL X29S. Topics in Malayalam.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAN - Management

Management: MAN

Lower-Division Courses

MAN X01H. Leadership Challenges and Innovation: Honors.
Introduction to key factors in organizational success, including the roles of leadership and culture, the value of a diverse workforce and an inclusive environment, and the importance of creativity and innovation.

MAN X01S. Leadership Challenges and Innovation.
Introduction to key factors in organizational success, including the roles of leadership and culture, the value of a diverse workforce and an inclusive environment, and the importance of creativity and innovation.

MAN X01T. Leadership Challenges and Innovation.
Introduction to key factors in organizational success, including the roles of leadership and culture, the value of a diverse workforce and an inclusive environment, and the importance of creativity and innovation.

MAN X19S. Topics in Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MAN X20F. Foundations of Management and Organizational Behavior.
An introduction to the management of organizations. Issues are addressed from the perspectives of strategy and planning, organizational behavior, and operations management.

MAN X25. Strategic Human Resources Management.
Overview of the personnel function, covering recruitment, compensation, equal employment, job analysis, training, benefits, employee discipline, collective bargaining, safety, and health.

MAN X27. Innovation and Entrepreneurship.
Explores the theoretical foundations and research evidence underlying innovation and entrepreneurship. Subjects include discovering and creating new sources of value, recognizing and evaluating opportunities, generating business models, engaging stakeholders, shaping markets, and competing against larger competitors and entrenched institutions.

MAN X27E. New Venture Mechanics.
Starting up a new venture involves a wide range of decisions, activities, and processes such as those involved in identifying the potential of an idea, developing and protecting an idea, building a new venture team, creating a business plan, obtaining resources, and establishing a business entity. Covers the basic analytical tools and processes involved in all these aspects of founding a new business.

MAN X27H. Innovation and Entrepreneurship: Honors.
Examines the knowledge and skills used to discover and create new sources of value, develop ideas into viable businesses, recognize and shape opportunities, generate new business models, engage with the ecosystem of new ventures, launch new businesses, and manage an innovation portfolio. Draws on various theoretical foundations, research evidence, and business cases to develop an understanding of effectiveness in entrepreneurship and innovation.

MAN X28. Consulting and Change Management.
Designed to develop the fundamental change knowledge and consulting skills of students who plan to work with organizations as change agents, whether internally as managerial employees or externally as outside consultants.

MAN X29S. Topics in Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MAN X32F. Topics in Foundations of Management.

MAN X34M. Healthcare System Management.
Introduction to the business ecosystem of the U.S. healthcare industry using a multi-disciplinary approach to investigate business structures, processes, and outcomes of health services in America. Explores the functionality of various healthcare components.

MAN X36. Organizational Behavior.
The process of managing organizations and the behavior of individuals and groups within the organizational setting.

MAN X36H. Organizational Behavior: Honors.
An exploration of the process of managing organizations and the behavior of individuals and groups within the organizational setting.

MAN X38. Lean Startup Essentials.
Focus on the entrepreneurial process including problem identification, innovation, business plans, fund raising, legal aspects, launching, and management.

MAN X40. Leadership and Urban Engagement.
Explore leadership skills and goals in the urban context. Read and discuss leadership challenges that arise when stakeholders come together to plan, make decisions, and take action in organizational and community settings.

MAN X40S. Topics in Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

MAN X47C. Texas Startup Accelerator.
Support startups in an experiential leadership practicum through projects designed to accelerate the venture's development.

MAN X47I. Texas Startup Incubator.
Build and grow a new venture through an experiential leadership practicum, with advice and assistance on the entrepreneurial process.

MAN X47P. Entrepreneurship Practicum.
Application of entrepreneurship skills and focus on additional project management skills through individual or group assignments conducted in an entrepreneurial setting, focusing on new business development either within existing companies (corporate entrepreneurship) or as stand-alone ventures (entrepreneurship).

MAN X66P. Management Practicum: Social Entrepreneurship I.
Focuses on developing business plans through a semester-long project. Explores non-profit, for-profit, and hybrid organizations and how they deal with corporate social responsibility.

MAN X67P. Social Entrepreneurship II.
Apply skills and focus on readying chosen projects to increase awareness and understanding of business and economics issues, and prepare presentation teams for regional and national competitions based on criteria set by the international Enactus organization.

MAN X69P. Social Innovation Practicum.
Explores a broad overview of the field of social innovation, and examines concepts and tools that support the creation of social ventures. Includes creating a social venture, articulating its vision, creating a business plan, choosing an organizational form, and assessing the venture's financial and social impact.

MAN X71T. Topics in Management.

MAN X72T. Topics in Management.

MAN X72T.1. Intercultural Management.
Examine a conceptual framework and specific tools for interacting successfully in international teams, negotiations, and partnerships. Discuss cultural patterns characteristic of world regions and particular countries in terms of their implications for corporate management.

MAN X72T.10. Women in Entrepreneurship.

MAN X72T.11. Leading a Multicultural Workforce.
Discuss the complexity of diversity within a national and global framework and to explore the relationship of diversity in organizational change and development. Focus on developing the cross-cultural competence needed to lead effectively in the modern collaboration-

powered global marketplace and provide evidence-based insights, as well as proven individual, interpersonal, enterprise-level strategies to successfully harness the power of diversity and inclusion in teams, organizations, markets, and societies.

MAN X72T.18. People Analytics.
Explore the use of analytics in the creation and management of human capital. Examine recruiting, selecting, deploying, developing, and managing performance of employees.

MAN X72T.2. Interdisciplinary Entrepreneurship.
Focus on skill development and mentoring in start-up formation, technology development, market validation, marketing, sales, operations, human resources, program management, and finance. Discuss intellectual property, social issues in design, and ethical and safety considerations.

MAN X72T.20. Entrepreneurial Management.
Evaluate the life cycle of an entrepreneurial business, including the attractiveness of an idea, launching and growing the business, and harvesting the profits.

MAN X72T.21. The Art and Science of Negotiation.
Develop a broad array of negotiation skills in useful analytical frameworks with emphasis placed on simulations, role-playing, and cases.

MAN X72T.22. Women in Management.

MAN X72T.3. Developing and Pitching Ideas.

MAN X72T.4. Leading for Impact.
Explore leadership and personal development by engaging in personal assessments, action planning, peer discussion, and self-reflection in an interactive format.

MAN X72T.5. Technology Transfer and Entrepreneurship.
Explore creating wealth from scientific discovery, which is the core of any business enterprise. Design a business model grounded in the entrepreneurial process for wealth creation around a scientific patent, which includes business models, eco-systems, funding the enterprise, and business plans.

MAN X72T.6. Performance and Sports Analytics.
Examine the state of sports analytics in American sports.

MAN X72T.7. Entrepreneurial Leadership For Women.

MAN X72T.8. Energy Strategy.

MAN X72T.9. Leadership Issues.

MAN X74. General Management and Strategy.
Designed to enable students to analyze business situations from the point of view of the practicing general manager. Addresses key tasks involved in general management, including strategic decisions that ensure the long-term health of the entire firm or a major division.

MAN X74H. General Management and Strategy: Honors.
Designed to enable students to analyze business situations from the point of view of the practicing general manager. Addresses key tasks involved in general management, including strategic decisions that ensure the long-term health of the entire firm or a major division.

MAN X79C. Independent Research in Management.

Graduate Courses

MAN X83. Current Topics in Organization Science.

MAN X83.16. Leading People and Organizations.
Designed to increase the student's effectiveness as a manager through discussion of organizational behavior and design, and guidelines for applying these concepts.

MAN X83.17. Organizational Behavior for Executives.
Explore organizational behavior frameworks and concepts that leaders can use to get things done in their teams and organizations. Examine how leaders can design effective organizations and teams, engage employees, improve decision making, manage interpersonal and team dynamics, exercise influence, and adapt to changing internal and external contexts.

MAN X83.20. Art and Science of Negotiation.

MAN X83.23. People Analytics.
Covers issues related to making human resource decisions in a more effective manner. Uses a strategic perspective, with particular emphasis on the links between human resource decisions and a firm's competitive position.

MAN X83.24. Managing Human Capital.
Explore issues related to talent management processes, including how companies hire, socialize, appraise, reward, and retain talent. Use a strategic perspective of the impact of organizational context on how companies manage human capital and the practices and analytical frameworks that help managers leverage human capital.

MAN X83.25. Strategic Human Capital for Executives.
Examine a set of analytical approaches to leveraging data that exist within an organization to make strategic human capital decisions. Explore how leading companies are applying analytics within their people organizations, as well as how these approaches are driving important organizational outcomes.

MAN X83.26. Leading in High Stakes Environments.
Examine the art and science of securing an agreement between two or more interdependent parties who are seeking to maximize their outcomes. Explore research and theory that help improve understanding of the behavior of individuals, groups, and organizations in the context of competitive situations.

MAN X83.27. Advocacy for Executives.
Focus on how leaders, especially senior leaders, can better advocate for their ideas. Examine how executives can effectively and persuasively communicate their ideas to diverse audiences, enhance their reputations as innovative leaders, build partnerships around their ideas, and successfully influence others to adopt their innovative notions.

MAN X83.31. Organizational Change and Strategic Renewal.

MAN X85. Current Topics in Strategic Management.

MAN X85.1. Action Skills for Managers: Implementing Strategy.

MAN X85.10. Managing Corporate Restructuring.
Examine turnaround business situations, strategic and financial issues, and the operating manager's perspective.

MAN X85.13. Corporate Strategy for Executives.
Study the formulation and implementation of strategies specifically related to firm growth. Explore vertical integration, horizontal integration, diversification, acquisition, growth in platform ecosystems, technology-driven growth, and international growth.

MAN X85.18. New Venture Creation for Executives.
Examine what advantages start-ups have over existing organizations when it comes to identifying new opportunities and developing innovative solutions to address pain points and create value.

MAN X85.19. Management Sustainability Practicum.

MAN X85.2. The Art of Leadership.

MAN X85.20. Advanced Venture Development.

MAN X85.22. New Venture Creation.
Examine what advantages start-ups have over existing organizations when it comes to identifying new opportunities and developing innovative solutions to address pain points and create value.

MAN X85.23. Introduction to Entrepreneurship.

MAN X85.24. Entrepreneurial Growth.

MAN X85.25. Social and Economic Aspects of Entrepreneurship.

MAN X85.26. Managing Corporate Turnarounds, Restructuring, and Bankruptcy.
Examine turnaround business situations, i.e., established firms experiencing operational, financial and managerial difficulties. Consider strategy issues as well as financial ones with an emphasis on the operating manager's perspective.

MAN X85.27. Leading Innovation and Change.

MAN X85.33. Managing and Marketing in the Global Arena.

MAN X85.36. Power and Politics.

Covers skills and techniques to gain power and influence in organizations as political entities. Includes cases, business press, and theoretical articles.

MAN X85.38. Managing Diverse Workforce.

Develop skills to effectively manage and capitalize on diversity within today's global organizations. Examine multiple dimensions of diversity--including, but not limited to, race, gender, generational differences, neurodiversity, remote/hybrid work arrangements, and cross-cultural dynamics--while developing practical competencies through case studies and experiential learning. Discuss the strategic value of diversity, offering frameworks for cultivating inclusive environments, driving innovation, and implementing metrics to sustain impactful diversity initiatives.

MAN X85.39. Assessing Technologies and Innovations.

Explore integrated approaches for transitioning recent University of Texas research innovations from laboratory settings to market environments by bridging the dichotomy between technology push and market pull methodologies. Analyze the advancement of inventions developed by university inventors toward commercial viability, particularly where established demand is uncertain. Emphasize interactive engagement with inventors and extensive fieldwork involving industry experts, partners, and potential customers to investigate, evaluate, and test real-world opportunities and challenges in technology commercialization.

MAN X85.49. Strategic Management.

Designed to help students develop a general management orientation. Subjects include the role of the general manager, formulating business and corporate-level strategy, managing strategic change, strategy implementation, and developing general managers.

MAN X85.51. Global Management.

MAN X85.56. Healthcare Business Ecosystem.

Explore the dynamics of the health care environment and health care reform. Analyze and discuss how health care strategy, delivery, and payment differ with value-based competition.

MAN X85.6. Management Planning and Control in Complex Systems.

MAN X85.61. Perspectives on Public Policy.

Designed to prepare MBA students, both as individuals and in their professional careers as managers and leaders, for active and effective participation in the democratic process.

MAN X85.62. Corporate Governance.

Examines the roles and responsibilities of organizational leadership in a variety of settings, including large and small companies, startups and established companies, global, single-country, and single-region companies, and nonprofit entities.

MAN X85.63. Economics of Competitive Strategy.

Develops and uses concepts from microeconomics, game theory, and the economics of industrial organization and applies these concepts to competitive decision making, using a combination of case analyses and lectures.

MAN X85.64. Enterprise of Technology: From Mind to Market.

Focuses on moving an idea from the mind of the researcher to the marketplace by examining the activities involved in commercializing a technology from conception to profitable enterprise.

MAN X85.65. Management Consulting Practicum.

Students work in supervised teams and develop recommendations to solve a real business problem for a client firm.

MAN X85.67. Nutrition Entrepreneurship.

MAN X85.68. Performance and Sports Analytics.

Leverage sports analytics to address business complexities, demystify pathways to thriving in the sports business sector, and foster the creation of innovative analytical tools through the fusion of computer science, mathematics, and statistics. Explore sports as a business, including crucial lessons in leadership and ethics with universal applicability.

MAN X85.69. Social Innovation Practicum.

Overview of the field of social innovation, including concepts and tools that support the creation of social ventures. Hands-on application to develop a social venture, articulate its vision, create a business plan, choose an organizational form for the venture, and assess the venture's financial and social impact.

MAN X85.70. Strategic Innovation and Entrepreneurship.

Explore how existing and new firms can innovate strategically to discover and create new sources of value. Examine dynamic views of strategy that enable the creation of new markets, new business models, and growth opportunities.

MAN X85.71. Persuasive Communications.

Explore the best practices for persuasive communication. Examine and practice the fundamentals of strong communication in business settings.

MAN X85.73. Opportunity Identity and Analysis.

MAN X85.74. Technology Strategy.

MAN X85.75. Energy Technology and Policy.

Discuss energy technologies, fuels, environmental impacts, and public policies with an interdisciplinary framework. Explore quantitative and qualitative concepts in energy, such as fuels and energy technologies, energy policy levers, societal aspects of energy, culture, economics, war, and international affairs. Utilize historical examples, current events, and future looking predictions related to all aspects of the energy system.

MAN X85.76. Business of Healthcare.

MAN X85.77. Startup Consulting Practicum.

Develop skills to research the viability of a business idea, analyze results, and deliver strategic recommendations in a compelling stakeholder presentation. Gain real-world experience with early-stage startups while collaborating cross-functionally and learning strategic frameworks.

MAN X85.8. Managing Corporate Diversification and Renewal.

MAN X85.9. Strategic Analysis for High-Tech Industries.

MAN X85D. Global Practicum for Executives.

Examine the history, culture, politics, and economics of a region through direct experience with a study tour or global management seminar in the respective regional area.

MAN X85E. Directed Studies in Global Management and Business Practices.

Study global business practices through lectures on campus and trips to international partner schools.

MAN X85F. Leading for Impact.

Analysis and application of contemporary concepts and theories of principled leadership for work teams and organizations.

MAN X85G. Strategic Innovation and Entrepreneurship.

MAN X85H. Innovation in the New Economy: Entrepreneurial Mindset.

Examine approaches that executives can use for identifying and creating new business opportunities, and for designing organizations and processes to foster employee creativity and innovation.

MAN X85L. Leading for Impact for Executives.

Explore leadership and how to apply concepts in ways that have impact on the world and local community.

MAN X85S. Leading For Impact Capstone.

Explore leadership development and provide opportunities to practice leadership abilities through projects for real organizations.

MAN X85T. Leading for Impact I.

Analyze and apply contemporary concepts and theories of principled leadership for work teams and organizations.

MAN X85U. Leading for Impact II.

Explore leadership development and provide opportunities to practice leadership abilities through projects for real organizations.

MAN X90. Topics in Seminar: Organization Science.
Intensive analysis of organizational science issues.
MAN X90.1. Research in Organizational Science.
MAN X90.11. Management of Knowledge Workers.
The study of knowledge workers at four levels of analysis: as individuals, as team members, as organizational resources, and as national resources. Strong emphasis on theory building.
MAN X90.12. Longitudinal Analysis.
Conduct rigorous analyses of organizational and other phenomena that evolve and change across time.
MAN X90.2. Introduction to Research Methods in Management.
MAN X90.3. Research Methods in Management.
MAN X90.4. Seminar in Organizational Behavior.
MAN X90.5. Seminar in Organization Theory.
MAN X90.6. Organizational Decision Making.
MAN X90.9. Behavioral Decision Theory.
MAN X91S. Independent Study.
MAN X93. Topics in Seminar: Strategic Management.
Intensive analysis of strategic management issues.
MAN X93.1. Foundations of Strategic Management.
MAN X93.2. Contemporary Issues in Strategic Management.
MAN X93.3. Research in Strategic Management.
MAN X93.5. Executive Leadership.
MAN X93.6. Management of Diversification.
MAN X98. Thesis.
MAN X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
MAN X99W. Dissertation.

Professional Courses

MAS - Mexican American Studies

Mexican American Studies: MAS

Lower-Division Courses

MAS X01. Introduction to Mexican American and Latina/o Studies.
Introduction to the theoretical and substantive issues covered under the interdisciplinary rubric of ethnic studies. Explore the Mexican American and Latina/o experience through the methodological approaches of historical analysis, cultural critique, and social production.
MAS X07. Introduction to Mexican American Cultural Studies.
An introduction to the theoretical and substantive issues covered under the interdisciplinary rubric of cultural studies. Explores the Mexican American cultural experience through the methodological approaches of historical analysis, cultural critique, and literary production.
MAS X07C. Mexican American and Latina/o Folkore Across the United States.
MAS X08. Introduction to Mexican American Policy Studies.
Introduction to the basics of policy analysis, employing demographic and empirical information on the Mexican American and Latino populations in the United States. Explore current policy issues, such as bilingual education, affirmative action, the English-only movement, immigration, Latino consumers, Latino entrepreneurship, and Latino political participation.
MAS X08E. Police, Prisons, and Inequality.
Explore the ethical issues related to inequality and the United States criminal legal system. Examine the experiences of the poor, Indigenous people, immigrants, racial minorities, women, sexual minorities, and gender-nonconforming people.
MAS X11. Ethnicity and Gender: La Chicana.
MAS X14. Mexican American Literature and Culture.
Representative Chicano writers and genres, such as poetry, prose fiction, and theatre.
MAS X15. Latina Performance: From Celia to Selena.
MAS X16. History of Mexican Americans in the United States.
Examines the origin and growth of the Mexican American community in the United States.
MAS X16C. Immigration and Ethnicity.
Examine the changing population of the United States from colonial times to present.
MAS X16D. Latinas and Latinos and Segregation in the United States.
MAS X16E. The Places of Mexican American History.
Examine Mexican American history from the point of view of three distinct places: Los Angeles, the mountains of northern New Mexico, and the far southern tip of Texas.
MAS X16R. North American Borderlands.
Explore the formation of political borders in nineteenth- and twentieth-century North America, their contestation, and the multiple meanings attached to them.
MAS X18. Mexican American Culture.
Mexican American cultural distinctiveness in the areas of social organization, child rearing, food culture, folklore, language, and religion.
MAS X18C. Latina and Latino Media and Popular Culture.
Explore Latina/o media and popular culture from 1950 to the present.
MAS X18D. Introduction to Latinx Body Art.
Examine the social, historical, economic, and commercial contexts influencing the production, display, and circulation of Latinx body art.
MAS X18E. Latinx Digital Worlds.
Explore how Latinx communities (traditionally figured as on the wrong side of the "digital divide") have embraced, mobilized, and sometimes usurped emerging digital tools and spaces to forge community and create new forms of culture, memory, and activism.
MAS X18F. Black and Latinx Intersections.
Examine the complex relationships between and among Black and Latinx communities and the political and structural forces and contexts that shape their interactions. Explore Black identity within the Latinx population, racial politics, coalitions of Black American and Latinx groups, race among Latinxs, racial inequality, and the politics of immigration.
MAS X18G. The New Latinas/os/xs.
Explore the trajectories of various communities many have called the new Latinas/os/xs by identifying how race, gender, sexuality, class, indigeneity, language, migration, and geography influence the lives, identities, and sociopolitical incorporation of new Latinas/os/xs.
MAS X18J. Latinx Material Culture.
Discuss utilizing material culture as a method of analysis to highlight histories of oppression, struggles towards liberation, and the politics of everyday Latinx life in the U.S..
MAS X18P. Fighting for Latino Power.
Examine issues that affect Latino political representation in the United States, specifically three aspects that are critical to political power in this country: the decennial Census, voting rights and the legal system, and electoral politics and political campaigns.
MAS X19. Special Topics.
MAS X19.2. The Chicano Movement.
Analyzes the history and legacy of the Chicano Movement in order to understand its origins, strategies, challenges, and successes.
MAS X19.3. Latinx Histories.
Explore the cultures, politics, and policies that shape the many Latinx histories in the United States.
MAS X19.4. Mexican American Women, 1910-Present.
Examines the history of Mexican and Mexican American women in the United States from the twentieth century to the present.
MAS X19.5. Chicano Literature and Popular Culture.
Explores the ways in which Chicana/o creative writers have addressed their experiences in the United States.

MAS X19.6. Comparative Latina/o Immigration to the United States.

MAS X19S. Topics in Mexican American Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MAS X20C. Power and Place: Making Texas History.

MAS X20E. Texas before 1900.

Focus on the basic history of Texas from roughly 1450 to 1900. Investigate major events such as the Texas Revolution and Civil War with an emphasis on how and why Texas, its culture, and its groups of people changed or did not change over time.

MAS X20F. Texas, 1900 to the Present.

Examine the steady dissociation of Texas from its Old South status to a transitional state and a power in national politics.

MAS X20G. Native American Women's History.

Investigate the histories of Native American women to reaffirm and reclaim their place and role in the histories of Native Americans, indigenous peoples, women, Chican@/xs, Greater Mexico, and the United States. Contemplate how many understandings that center colonization, settler colonialism, genocide, race, and environmentalism are essential to examining Native American women's history. Explore the stories, struggles, and ideas of community-building, sovereignty, and liberation as integral to their genders and sexualities as Native American, Indian, First Nations, indigenous, and red and brown women.

MAS X20I. Mexican American Studies at UT.

Trace the origins and development of Mexican American Studies at the national, regional, and local levels. Collaborate to help preserve and recognize the significance of Mexican American Studies at the University in historical and contemporary contexts.

MAS X20J. Mexican Americans in Texas History.

Introduction to the historical experience of Mexican-American persons in Texas.

MAS X20T. Texas History's History.

Explore evolving ideas and meanings concerning the most significant events, personages, and social processes in Texas' history.

MAS X23C. Black Art, Brown Art.

MAS X23D. Contemporary Latinx Visual and Performance Art.

Explore contemporary visual and performance art by Latinx artists working since the 1970's to the present. Examine artists who began to engage with and in civil rights discourse to intervene through their art-making practices; and to align with contemporary trends in the art world that began to expand in the 1970's, such as performance art, installation art, video art, and, later, digital art.

MAS X23E. Latinidades: Art and Performance.

Contextualize and analyze diverse forms of Latina/o/x artistic expression, including visual art, music, dance, theatre, and film, or Latinidades".

MAS X29S. Topics in Mexican American Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

MAS X35M. Queer Migrations.

MAS X37C. Chicana Feminisms.

MAS X37D. Russian and Mexican Men in Popular Culture.

Study representations of masculinity in products of Mexican and Russian popular culture at the end of the twentieth and the beginning of the twenty-first centuries.

MAS X37F. Latina Feminism and Health.

MAS X37G. Disability, Race, and Sexuality in Literature and Culture.

MAS X37I. Tejana Cultural Studies.

Investigate the history of Tejanas to reaffirm and reclaim their place and role in the histories of Native Americans, women, Chican@/Chicanxs, Greater Mexico, and the United States. Explore how transborderism and transregionalism complicate this history. Contemplate how Tejanas' stories are fundamental to illuminating the struggles, resistance, and liberation of Chicanas, mestizas, and afromexicanas from precontact to decolonization.

MAS X37J. Latinx Sexualities.

Examine Latinx sexualities from a historical perspective to comprehend the social, cultural, political, and economic factors, which have shaped these experiences.

MAS X40S. Latina and Latino Spirituality.

MAS X45C. Julia Alvarez and Sandra Cisneros.

MAS X45D. Life and Literature of the US-Mexico Borderlands.

Examine the literature of the US-Mexico borderlands experience, with an emphasis on the historical and social conditions that characterize this unique region. Explore this in the context of prose fiction, as well as drama, film, and poetry.

MAS X45E. Latinx Short Story.

MAS X45F. Latinx Legend Tripping.

Explore narrative folklore from diverse traditions across the United States based Latinx diaspora. Focus on supernatural legends and the creation of the female "monster".

MAS X45G. Contemporary United States Latina/o Literature and Culture.

MAS X45I. Latinx Young Adult Literatures.

MAS X45J. 21st Century Latinx Literature.

Explore Latinx literature from the past two decades including both literary form and political engagement, with an emphasis on Latina, queer, and nonbinary writers.

MAS X47C. Transnational Latinx Popular Culture.

MAS X50C. Social Science Methods and Latina/o/x Communities.

Learn the methods and tools that social scientists use to make sense of the world, specifically as it pertains to understanding the Latina/o/x experience in the United States.

MAS X50F. Latino Urbanism in the United States City.

MAS X50L. Latinx Sociology.

Explore how institutions have shaped the gendered, racial, and class-based experiences of Latinxs from a sociological perspective, including historical patterns of Latinx migration to the United States, contestations over racial classifications, and problematic issues surrounding the term Latino. Review more recent studies that show how different institutions shape the Latinx experience and demonstrate how gendered, racial, and classed forces have shaped various Latinx communities. Examine Latinx agency and how Latinx communities have sought to reconfigure and push back on these social forces.

MAS X54. Latinx Austin.

Explore the city of Austin, the city's importance for Latino communities, and the importance of Latinos for the city.

MAS X61. Mexican American Cultural Studies Seminar.

Explores cultural studies literature as read through the experience of the Mexican-origin community in the United States. Discussions include race, class, and feminism. Students write a research paper and deliver a scholarly presentation.

MAS X62. Mexican American Policy Studies Seminar.
Profiles the current economic status of Mexican Americans in the United States. Examines two dimensions of public policy: historical trends and comparisons with other ethnic groups. Students write a policy report and deliver a professional presentation.

MAS X63. Sociolinguistics in Mexican American and Latina/o Studies.
Examines the presence and use of language in the United States with focus on aspects affecting Latina/o communities.

MAS X63R. Bad Language: Race, Class, and Gender.

MAS X64. History of the United States-Mexico Borderland.
Introduction to the history of the United States and Mexico border region.

MAS X64C. The Civil Rights Movement from a Comparative Perspective.
Focuses on African American and Mexican American struggles for civil rights. Asian American and Native American movements will also be addressed. Using a comparative approach the student will consider the distinctiveness of each of these struggles while also viewing them in relation to each other.

MAS X64D. Latino Migrations and Asylum.

MAS X64E. Policing Latinidad.

MAS X64F. Mexican Immigration Cultural History.
Examines the history of Mexican immigration to the United States, and provides an overview of migratory patterns dating back to the late prehistoric period through contemporary times.

MAS X64G. Latino Migration and Human Trafficking.
Critically examine the complexity and intersectionality of Latino migration and human trafficking from global, regional, and local perspectives.

MAS X64I. Mexican American Political Thought.
Critically explore the multiple complementary and contradictory intellectual expressions of Mexican American political thought. Pay particular attention to Texas from the mid-nineteenth century through the period of the Chicano Movement in the latter part of the twentieth century.

MAS X64J. Migration Crisis.

MAS X64K. Afro-Latinidades in the United States and Latin America.

MAS X64L. La Causa, The Farmworker Movement.
Examine the twentieth-century expansion of commercial agriculture and concomitant labor organizing struggles waged by agricultural workers in the United States, including Arkansas, California, Hawai'i, Puerto Rico, and Texas. Explore the role of the United Farm Workers of America.

MAS X64M. Latina/o/x Citizenship.
Explore the concepts of membership, belonging, immigration and citizenship in the Latina/o/x experience. Examine how historically, politically, socially and culturally, Latinas/os/xs have been construed as belonging or not belonging members of the United States society.

MAS X64N. Politics of Latino Identity.
Explore the creation of the pan-ethnic Latino group identity, differences between national origin groups from Latin America, and how Latino group and national origin identities influence political participation.

MAS X64O. Central Americans in the United States.
Examine the extensive and diverse histories, cultures, social and political movements of Central Americans in the United States, particularly through a Black, Indigenous, and Ethnic Studies framework.

MAS X64P. Puerto Rico In Crisis.

MAS X64Q. Race and Ethnicity Politics.
Explore racial and ethnic politics throughout the United States with a focus on Black and Latino politics. Examine group identity, racial inequality, policy making, activism, criminal justice system, and immigration.

MAS X64R. Race Politics and Caribbeans.
Examine racial and political themes among Spanish-speaking Caribbeans on the islands and in the United States. Explore racial politics in the three countries and compares notions of identity, experiences with racism and anti-racist protest with the United States

MAS X64S. Land in America.
Explore how the history of land helps explain the society we live in today and ideas about the human-nature relationship.

MAS X64U. United States Immigration Policy and Stories of Migration.
Explore the history of immigration policy to the United States with memoirs of migration, immigration policy, and incorporation to provide a fuller picture of how immigrants are affected by these policies in the United States.

MAS X64V. Rhetoric of Ethnic Studies.
Study the histories of ethnic (and gender) studies in both higher education and K-12 institutions, and the rhetoric of attacks on, and defenses of, ethnic and gender studies through an examination of primary and secondary source materials.

MAS X70D. Latinx Media, Arts, and Activism.
Investigate the ways in which Latinx activists have used mainstream, alternative, legacy, and new media (as well as other visual and performing arts), to affect social and political change in the United States.

MAS X70E. Chicana/o Cinema.

MAS X70F. Latina Filmmakers in the United States.

MAS X73. Independent Research.

MAS X74. Special Topics.

MAS X74.15. Latino Politics.
Explore the political experiences of the United States Latino populations.

MAS X74.22. Minorities and the Media.
Issues concerning minority or nondominant groups within the United States. Survey of minority communication problems: alienation, fragmentation, media and Internet access; criticism and feedback for minority groups based on racial/ethnic background, age, sex, disability, social or economic class, and sexual orientation.

MAS X74.23. Mexican American Indigenous Heritage.
The prehistory, history, and contemporary racial understanding of Mexican Americans.

MAS X74.32. Radical Latinos.
Examines the social positioning and history of Latinas/os in the United States. Analyzes the histories of Latinas/os who have gone against mainstream expectations, or who have challenged or critiqued the status quo in provocative and unexpected ways.

MAS X74.33. United States Latino and Latina Ethnographies.
Explores past and present anthropological representations of Latinos and Latinas in the United States.

MAS X74.34. Writing Border Narratives.
Examines the United States and Mexico border through the use of the personal essay in its various forms. Students write personal essays that focus on their relationships to the border.

MAS X74.37. United States Catholic History.
Examine how Catholicism and national identity work for Catholics in the United States, with an emphasis on Catholic women and Latino/as.

MAS X74.38. Feminist Interventions in Borderlands History.
Provides an in-depth understanding of the social, economic, and spatial transformations of the United States/Mexico borderlands in the nineteenth and early twentieth centuries.

MAS X74.40. Gender, Class, and Ethnicity American Literature and Film.
Examines the ways in which authors and filmmakers construct gender, class, and identity in each of their texts.

MAS X74.41. Border Control and Deaths.
Focus on enactment of border control policies, policy implementation and death patterns at the United States-Mexico border, patterns of unauthorized border crossings through dangerous border terrain, grassroots movements to support migrants and lessen deaths, and the ethics of coercive border control. Surveys the public sentiments

and attitudes that support new border control policies, the patterns of migrant deaths in deserts and in the Rio Grande River associated with border control strategies, movements and community efforts to support migrants in the Arizona border area, and legal and ethical arguments and concepts that frame discussions of migrant deaths at the United States-Mexico border.

MAS X74.42. United States Immigration.
Utilizes a sociological perspective to gain an understanding of what social forces drive migration to the United States, how migrants organize their migration, and how immigration affects United States' society.

MAS X75. Internship.
Participate in a nonpartisan, direct-service capacity in a community, civic, or government organization or program that facilitates the economic, political, and social development of the Mexican American community. Write a report based on the internship project under the supervision of a faculty member.

MAS X77. Mellon Mays Program Seminar.
Seminar designed as an interdisciplinary primer to the exploration of research, writing, and professionalization in preparation for doctoral study.

MAS X78. Capstone Seminar.
Pursue in depth the research interests and methodological skills developed in other Mexican American and Latina/o Studies classes.

MAS X79H. Honors Tutorial Course.
Supervised research, readings, and writing of a substantial paper on a Mexican American and Latina/o Studies topic.

Graduate Courses

MAS X82. Conference Course in Mexican American Studies.

MAS X90. Introduction to Mexican American and Latina/o Studies.
Examine an overview of Mexican American and Latina/o studies for graduate research.

MAS X92. Topics in Mexican American and Latina/o Studies.

MAS X95C. Theories in Mexican American and Latina/o Studies.
Examines the major theoretical foundations in Mexican American and Latina/o Studies.

MAS X95M. Interpretive Methods.
Examine interpretive methods used in Mexican American and Latina/o Studies.

MAS X96Q. Qualifying Exam Prep.
Prepare for qualifying examinations.

MAS X98. Thesis.

MAS X98F. Doctoral Forum.
Develop and present a course project, such as research papers, grant proposals, and dissertation chapters in a workshop environment.

MAS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

MAS X98T. Supervised Teaching in Mexican American and Latina/o Studies.
Methods of interdisciplinary teaching and professional work in Mexican American and Latina/o Studies.

MAS X99W. Dissertation.

Professional Courses

MBS - Molecular Biosciences

Molecular Biosciences: MBS

Lower-Division Courses

MBS X19L. Introduction to Biochemical Laboratory Practices and Skills.
Explore basic skills used by biochemists and an introduction to future career options. Examine basic biochemical concepts and laboratory, computational, and professional skills.

MBS X19S. Topics in Molecular Biosciences.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Biology Instructional Office. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MBS X20. Cell Biology.
Explore principles of eukaryotic cell structure and function. Examine macromolecules, membranes, organelles, cytoskeleton, signaling, cell division, differentiation, motility, and experimental methodologies.

MBS X20L. Cell Biology Laboratory.
Explore the complex structures and functions of cells through direct observation and experimentation. Discuss regulation of gene transcription and translation, protein sorting, organelles and membrane trafficking, cytoskeletal dynamics, and cell division. Use a combination of modern molecular biology, biochemistry, and microscopy techniques, with a strong emphasis placed on hypothesis-driven approaches, proper experimental design, and clear scientific writing and presentation.

MBS X25T. Human Genetics.
Examine genomics, cancer genetics, identification and analysis of human disease genes, and monogenic and multifactorial traits in humans.

MBS X26L. General Microbiology Laboratory.
Introduction to microbiology laboratory techniques and experimental demonstration of principles of microbiology.

MBS X26M. Introductory Medical Microbiology and Immunology.
Designed primarily for nursing and pre-pharmacy students. Explore an overview of the structure, function, and genetics of bacteria, viruses, and fungi, with emphasis on the interactions between micro-organisms and the human host. Examine principles of microbial pathogenesis, the host's innate and adaptive immune responses to infection, epidemiology, laboratory diagnosis, and antimicrobial chemotherapy and vaccines.

MBS X26R. General Microbiology.
Examine an overview of the major areas of microbiological study, including cell structure and function, genetics, host-microbe interactions, physiology, ecology, diversity, and virology.

MBS X27D. Emerging Infectious Diseases.
Examine genomic and proteomic tools used to understand the causes of human infectious diseases. Discuss genome sequencing, community sequencing, proteomics, microarrays, and human polymorphism analysis; and how these technologies have been applied to the study of important human viral diseases. Explore extensive coverage of the molecular and clinical biology of these diseases.

MBS X27G. Genomics.
Examine genome structure, organization, and function of model organisms; theory and methodology of genetic and physical mapping; sequencing analysis and annotation; genome duplication and evolution; and ethics for biotechnology and cloning.

MBS X28. Introductory Plant Physiology.
Examine general principles of the mineral nutrition, water relations, metabolic activities, growth, and development of green plants.

MBS X28D. Discovery Laboratory in Plant Biology.
Discuss methods of experimental design, data gathering, data interpretation, and data presentation, including original experiments relating to questions of current interest in plant physiology.

MBS X28L. Laboratory Experiments in Plant Physiology.
Introduction to experimental techniques used in the study of the mineral nutrition, water relations, metabolic activities, growth, and development of green plants.

MBS X29S. Topics in Molecular Biosciences.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Biology Instructional Office. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MBS X30. Molecular Biology of Animal Viruses.
Examine mechanisms by which viruses replicate and kill or transform cells.

MBS X30L. Virology Laboratory.
Examine basic experimental techniques applied to selected bacteriophages and animal viruses.

MBS X31L. Laboratory Studies in Molecular Biology.
Explore molecular biology methods, experimental design, and analyses applicable to both research and fields such as healthcare, biotechnology, and genetic analyses. Conduct experiments in a research project format.

MBS X36. Tumor Biology.
Discuss core aspects of cancer pathology, treatment, epidemiology, the discovery of oncogenes and tumor suppressors, and the molecular genetics underlying the characteristic features of malignant tumors (including metastatic behavior, genomic instability, angiogenesis, cell cycle regulation, and apoptosis). Examine the biochemical functions of cancer-related proteins and enzymes and therapeutic approaches based on our understanding of these proteins. Explore important experimental approaches that have influenced our current understanding of cancer.

MBS X37. Topics in Biology.
Examine recent developments and research methods in the biological sciences.

MBS X39M. Bacterial Behavior and Signaling Mechanisms.
Examine molecular, cellular, organismal, ecological, and evolutionary biology of bacteria. Focus on a large number of bacteria, both Gram-positive and Gram-negative from four major phyla, that live and survive both as free-living microbes, in groups, and in both beneficial and pathogenic associations with eukaryotic hosts. Explore evolution of organelles and behaviors, including receiving and transducing signals that produce a variety of outcomes such as chemotaxis and motility, morphogenesis and development, secretion and virulence, quorum sensing and biofilms, bacterial warfare, and antibiotic production and tolerance.

MBS X43. Advanced Cell Biology.
Explore current research in eukaryotic cell biology including vesicle trafficking, cytoskeletal dynamics, cell movement and organization within tissues, and cellular signal transduction and information processing. Focus on experimental reasoning, quantitative methods for studying cells, and reading primary literature.

MBS X44. Molecular Biology.
Examine molecular basis of cellular processes: gene structure and function, DNA replication, RNA and protein synthesis, viruses, molecular aspects of immunology and cancer, and recombinant DNA.

MBS X49L. Experiments in Developmental Biology.
Discuss methods and principles of developmental biology in a laboratory context, with emphasis on animal embryology using molecular techniques and microscopy.

MBS X50. Developmental, Stem Cell, and Regenerative Biology.
Explore the principles and mechanisms of embryonic development and the processes guiding stem cell differentiation and tissue repair.

MBS X50M. Plant Molecular Biology.
Discuss the fundamentals of plant molecular biology, including structure and expression of the chloroplast and mitochondrial genomes.

MBS X55. Microbial Biochemistry.
Study the function of bacterial proteins and their complexes, including their role in inter-bacterial interactions that shape multi-species communities.

MBS X56E. Epigenetics and Epitranscriptomics.
Explore epigenetic mechanisms that involve covalent modifications of the three major biomolecules: DNA, RNA, or proteins in the context of gene expression and genome stability. Examine how environmental and intrinsic factors regulate these mechanisms to impact normal and diseased cell functions, particularly as they relate to human health, aging, and behavior.

MBS X60K. Immunology.
Discuss the basic concepts of humoral and cell-associated immune phenomena, including innate immunity; the molecular basis of T cell and B cell antigen recognition; hematopoiesis and the development of lymphocytes; cellular and humoral immune responses; and the basics of immunodeficiency, autoimmunity, immunotherapy, and vaccination.

MBS X60L. Immunology Laboratory.
Examine current techniques in experimental cellular and humoral immunology.

MBS X61. Human Infectious Diseases.
Examine etiology, pathogenesis, diagnosis, and immunobiology of the major microbial diseases, with emphasis on their prevention.

MBS X61L. Clinical Bacteriology Laboratory.
Discuss techniques required for independent work in diagnostic and epidemiological bacteriology.

MBS X66. Microbial Genetics.
Examine molecular biology of nucleic acids. Explore biosynthesis of macromolecules, transfer of genetic material from cell to cell, recombination, mutagenesis, and regulatory mechanisms.

MBS X66R. Molecular Genetics and Medicine.
Discuss the implementation of molecular genetics techniques in medicine. Explore the application of diagnostic and therapeutic techniques for several genetic disorders and infectious diseases.

MBS X67C. Cellular and Molecular Bases of Neural Development.
Introduction to the principles by which the neural tube (brain and spinal cord) forms during embryonic development. Discuss the cellular and molecular mechanisms underlying the formation of a three-dimensional neural tube and its division into forebrain, midbrain, hindbrain, and spinal cord.

MBS X68C. Supervised Literature Review.
Conduct supervised literature review and written capstone thesis on a selected subject in biology by individual arrangement with the instructor.

MBS X68R. Supervised Capstone Research.
Conduct supervised independent research and written capstone thesis on a selected subject in Biology by individual arrangement with the instructor.

MBS X75C. Capstone Seminar.
Document and reflect on the capstone experience, present capstone work in a professional venue, and discuss plans for transitioning to post-graduation careers.

MBS X77. Undergraduate Research.
Perform laboratory or field research in the various fields of biological science under the supervision of one or more faculty members.

MBS X79H. Honors Tutorial Course.
Conduct an original laboratory or field research project under the direction of a faculty mentor, leading to a thesis or research presentation for students in the honors program in biology.

Graduate Courses
Professional Courses

MDV - Medieval Studies

Medieval Studies: MDV

Lower-Division Courses

Upper-Division Courses

Graduate Courses

MDV X92L. Topics in Readings in Medieval Latin.

MDV X92M. Topics in Seminar in Medieval Culture.

Major medieval historical developments and monuments of culture in thought, literature, art, architecture, and music.

MDV X92M.1. The Islamic City.

Explore the morphology, sociology, and historiography of cities in the Islamic world over time, from the medieval period to the present.

MDV X99W. Dissertation.

Professional Courses

MEL - Middle Eastern Languages and Cultures

Middle Eastern Languages and Cultures: MEL

Lower-Division Courses

Upper-Division Courses

Graduate Courses

MEL X80. Topics in Middle Eastern Cultures.

MEL X80.1. Gender, Clothing, and Identity in Muslim Societies.

MEL X80.2. Introduction to Islamic Studies.

Introduction to the academic field of Islamic Studies.

MEL X80C. Topics in Middle Eastern Languages.

Advanced studies in Middle Eastern languages.

MEL X80C.1. Targumic Aramaic.

Examines Aramaic translations of the Hebrew bible that contain many exegetical deviations from the Hebrew text, and provide a glimpse of Jewish theology at the time of their composition.

MEL X80C.2. Syriac.

Study of the eastern Aramaic dialect that was spoken in the ancient Near East until the Muslim occupation. Examines the use of the dialect as a vehicle for Christianity in the East; its use in poetry, science, and philosophy; and its influence on Arabic. Covers the essentials of Syriac grammar for the purpose of reading Syriac texts.

MEL X80C.3. Classical Ethiopic.

Study of the fourth-century language of the Semitic people who lived in what is now Ethiopia and Eritrea. Covers the alphabet and grammar needed for reading translations of the Bible and other texts.

MEL X80C.4. Ugaritic.

Study of the West Semitic languages from the city of Ugarit in what is now Syria, which was spoken from the fourteenth through twelfth century BC. Covers the essentials of grammar needed for reading Ugaritic texts.

MEL X80C.6. Akkadian I.

Introduction to the study of Akkadian, the principal language used in ancient Assyria, Babylonia, and their environs. Explore Old Babylonian grammar and the cuneiform writing system.

MEL X80C.7. Akkadian II.

Continue the study of Akkadian and Old Babylonian grammar, syntax, and signs.

MEL X80C.8. Akkadian III.

Read Akkadian texts from a variety of genres and time periods, including Assyrian and Babylonian letters and royal inscriptions.

MEL X80C.9. Akkadian IV.

Read Akkadian texts from a variety of genres and time periods, including Standard Babylonian literary texts.

MEL X81. Topics in Middle Eastern Literatures.

MEL X82. Topics in Middle Eastern Linguistics.

MEL X82.1. Teaching Middle Eastern Languages.

MEL X82.2. Introduction to the Structure of Semitic Languages.

Covers the grammatical structure of a number of ancient and modern Semitic languages (such as Akkadian, Biblical Hebrew, Ethiopic, and Modern Aramaic) and of the family of languages as a whole.

MEL X83. Topics in the Ancient Near East.

MEL X83.10. Critical Problems in New Testament.

Study foundational and emergent scholarly works and critical approaches in the study of Christian origins and the books of the New Testament in their ancient Jewish and Greco-Roman contexts.

MEL X83.6. Comparative Semitic Linguistics.

Examine the Semitic languages and review the basic features of their phonology, morphology, and syntax.

MEL X83.7. Art, Gender, and Religion in Late Antiquity.

Examine the gendered experience of religion in Late Antiquity using the evidence of artistic record, with a primary focus on the Mediterranean world.

MEL X83.8. Critical Problems in Second Temple Judaism.

Examine the literature and material culture of Second Temple Judaism (circa 520 BCE to circa 135 CE) in dialogue with recent scholarship on Jews and Judaism in Persian, Hellenistic, and early Roman contexts.

MEL X83.9. Critical Problems in Judaism in Late Antiquity.

Examine the literature and history of Judaism from the destruction of the Second Jewish Temple in 70 CE to the early Middle Ages, with a primary focus on classical Rabbinic Judaism as well as mystical and other writings beyond the canon.

MEL X83C. Current Issues in Hebrew Bible.

Examines the issues that are current in one major area of Hebrew Bible scholarship.

MEL X83D. Exegetical Seminar in Hebrew Bible.

Examines a biblical book (e.g. Song of Songs) or subject (e.g. Jubilee) applying history, philology, literary theory, poetics, history of interpretation, and linguistics.

MEL X89. Conference Course in Middle Eastern Languages and Cultures.

Supervised individual study of selected problems in Middle Eastern languages and cultures.

MEL X93. Comprehensive Examination Preparation.

MEL X94. Professional Development in Middle Eastern Languages and Cultures.

MEL X98. Thesis.

MEL X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

MEL X98T. Supervised Teaching in Middle Eastern Languages and Cultures.

Teaching under the close supervision of a faculty member; weekly group meetings with the instructor, individual consultation, and reports throughout the teaching period.

MEL X99W. Dissertation.

Professional Courses

MES - Middle Eastern Studies

Middle Eastern Studies: MES

Lower-Division Courses

MES X01C. Gateway to the Middle East.

MES X01J. The Ancient Middle East.

Survey the history of the Middle East from the beginning of the Neolithic period (9000 BCE) through the invasion of the region by Alexander the Great in 332 BCE and into the pre-Islamic era.

MES X01K. Introduction to the Middle East: Religious, Cultural, and Historical Foundations.
A survey of the history and civilization of the Middle East from the sixth to the fourteenth century.

MES X01L. Introduction to the Middle East: Adjustment and Change in Modern Times.
The responses of the societies of the Middle East and North Africa (Turkey, Iran, Afghanistan, Israel, and the Arab world) to Western cultural and political challenges, primarily since about 1800.

MES X04M. Ancient Cities.
Introduction to the urban centers of the ancient Mediterranean world.

MES X10. Topics in Middle Eastern Studies.
Studies of areas and issues in the Middle East and North Africa.

MES X10.4. Social Transformation of Love and Relationships.
Examination of the social, psychological, and spiritual perspectives toward the ideas of love and intimacy; how love and intimacy interact with rapid social, economic, and cultural change; and how the subsequent change transformed the social world and the meaning of love. Subjects include the aspects of self and identity; differentiation in the context of love in the modern age; the family and the individual; the impact of industrialization on private lives and the public order; gender, communication, love; intercultural love and intimacy; and personal choice and arranged marriages.

MES X10.5. Introduction to Music in World Cultures.
Exploration of practices, beliefs, and issues through the study of various musical genres in the regions of Asia, the Middle East, Africa, the Pacific, Europe, and the Americas.

MES X10.6. Jewish Civilization: Beginnings to 1492.
Introduction to the history, culture, and religion of the Jewish people from around 1000 BC to the end of the medieval period. Subjects may include ancient Israel, late Second Temple sectarianism, the rise of Christianity, rabbinic Judaism, medieval Jewish philosophy, Jewish mysticism, and Hebrew poetry.

MES X10.8. Introduction to Jewish Studies.

MES X10C. Introduction to the Old Testament.
Introduction to the many interpretations of the Hebrew Bible (the Old Testament) and its meaning in the context of its historical and cultural setting in the ancient Near East.

MES X10D. Introduction to Islam.
The beliefs, theology, history, and main social and legal institutions of Islam, including the concept of God and society, the role of women, and Islamic government and movements.

MES X10N. Introduction to Modern North Africa.
Introduction to the major themes of North African history from the sixteenth century to the present.

MES X10P. Revolution and Decolonization in North Africa.
Examine the history of anti-colonial struggles in North Africa and the victory over European colonial powers.

MES X10R. Introduction to Middle East Religions.
Introduction to the religious landscape of the Middle East including the various expressions of Eastern Christianity, Islam, and Judaism as well as Zoroastrianism.

MES X11. The History of Israel.
An introduction to the history of Israel, from the emergence of the modern Zionist movement beginning in 1881 to the present.

MES X11C. Judaism, Christianity, and Islam: An Introduction.
Examines the intertwined historical developments of the religions of Judaism, Christianity, and Islam, and explores the principal beliefs and practices of Jews, Christians, and Muslims.

MES X19S. Topics in Middle Eastern Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MES X29S. Topics in Middle Eastern Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MES X19S. Topics in Middle Eastern Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MES X23C. Engaging the Middle East.

MES X27. Middle Eastern Cultural Exchange.
Provides an opportunity for students to interact with peer groups in Middle Eastern countries in which Arabic, Hebrew, Persian, and Turkish are spoken. Students engage in a variety of cultural activities and correspond with peer groups via blogs and Internet discussion forums.

MES X28D. Material Cultures of Coexistence.
Dicuss Muslims living in regions where non-Islamic socio-political systems and infrastructures predominate, exploring the material cultures produced in places where Islam did not originate as, or is not, the dominant authority.

MES X29S. Topics in Middle Eastern Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MES X31C. History of the Ottoman Empire.
A survey of Ottoman society and culture and of the empire's place on the world scene.

MES X31O. Twentieth-Century Arab World.
Introduction to 20th-century Arab world history, primarily focusing on the Eastern Mediterranean, including Lebanon, Syria, Iraq, Jordan, Palestine, and Egypt. Explore the transformation of this region from a single cultural and political entity under imperial Ottoman rule, through colonial rule to the age of the nation-state and its struggles. Discuss key themes including colonial rule and relation to Europe and the US, Arab nationalism, revolutionary modernism, the impact of Zionism and Israel, the Palestinian revolution, the emergence of political Islam, civil wars, and the oil revolution. Examine internal and external forces and pivotal processes that have shaped the region over the past century through political, social, intellectual, and economic factors.

MES X34C. Music Cultures of the Middle East, Past and Present.
A historical and ethnomusicological survey of the Arab, Turkish, and Persian music cultures.

MES X41. Topics in the Middle East: Social Science.

MES X41.10. Cultural Geographies of Israel.
Examines critical spatial theory, landscape phenomenology, histories of Zionist architecture and urban planning as applied to Israel from the Yishuv period to the present.

MES X41.11. Rule of Law in the Middle East.
MES X41.12. Muslim Women in Politics.
MES X41.13. Sex and Sexuality in the Muslim World.
MES X41.18. Contemporary Jerusalem.
Explore what life is like in today's contested, rapidly growing, and increasingly diverse Jerusalem.
MES X41.19. Ottoman State and Society.
Explore the social and economic life, religion, law, government, ideology, arts, and sciences of the Ottomans. Examine the Ottoman political governance and the course of its development through a socio-historical lens.
MES X41.20. The Politics and Art of Iran's Woman, Life, Freedom Uprising.
Analyze the politics and art of Iran's 2022 Woman, Life, Freedom Uprising movement. Develop a digital humanities resource on the movement through collaboration.
MES X41.22. Veiling in the Muslim World.
MES X41.3. The Cities of the Middle East.
Anthropological and sociological analysis of space, with a special emphasis on urban theory and culture in the Middle East.
MES X41.5. Arab-Israeli Politics.
In-depth study of domestic, regional, and international factors involved in politics in the Middle East, including simulation of diplomatic interaction in the Arab-Israeli conflict.
MES X41.6. Negotiating Urbanization: Case Studies in Turkey.
Examines local and transnational forces that have driven and continue to drive contemporary urbanization in Turkey. Focuses on key issues that emerge in rapidly growing cities of the developing world, such as growing income inequality and socioeconomic exclusion, environmental challenges, and rising violence.
MES X41.7. Gender Politics in the Islamic World.
Study of the Islamic world and major sociological concepts such as gender, social organizations, culture, and politics. Examines how culture is mediated by politics, resulting in diverse interpretations of Islam and in different policies with respect to women's rights.
MES X41.8. Multicultural Israel.
Examines the complex social fabric that comprises contemporary Israeli society, and that shapes Israeli identity, practice and politics.
MES X41.9. Islam and Politics.
An introduction to Islamic political thought.
MES X42. Topics in the Middle East: Arts and Humanities.
MES X42.1. Introduction to Arabic Literature.
General survey of major themes, genres, and artists in the Arabic literary tradition from the sixth century to the modern era.
MES X42.10. Persian Literature, Past and Present.
MES X42.11. Iranian Women Writers.
MES X42.13. Iranian Literature in Exile.
MES X42.14. Iranian Film and Fiction.
MES X42.16. The Qur'an.
Explore the history, language, style, and themes of the Qur'an.
MES X42.19. Self-Revelation in Women's Writing.
MES X42.2. Loyalty and Rebellion in Arabic Literature.
MES X42.20. Autobiography: A Modern Literary Species.
MES X42.22. Biblical Archaeology.
MES X42.23. The Dead Sea Scrolls.
MES X42.25. Politics of Court Literature.
MES X42.26. Arab Women Poets.
MES X42.27. Islamic Law.
Designed to give students a foundation in the substantive teachings of the shariah, which comprises not only what we normally think of as law, but also ethics and etiquette.
MES X42.28. Gender in North and West Africa.
Examines gender discourses through North African and West African literary works by looking at the role(s) played by Islam and Christianity in the creation of the identities of African men and women. Includes discussion of the question of what gender is, and whether it is socially constructed.
MES X42.3. Memory and Identity in Ancient Arabia.
MES X42.31. Palestine and the Palestinians: A Journey Through Time.
MES X42.32. Women Filmmakers in the Middle East.
MES X42.33. Love in the East and West.
MES X42.35. Islamic Theology.
MES X42.36. Rumi and the Persian Sufi Tradition.
MES X42.37. Biblical Prophecy.
An introduction to the diversity of prophetic literature in the Old Testament, its historical development, social context, and Near Eastern parallels.
MES X42.38. Comparative Jewish Literature: Israel, France, and the United States.
MES X42.4. The Arabian Nights.
MES X42.40. Gender and Art in the Muslim World.
MES X42.42. Archaeology of Greek Prehistory.
Explore the development of complex societies in ancient Greece by studying its prehistory through archaeology.
MES X42.44. Graffiti and Poster Art in the Islamic World.
MES X42.45. Lost Languages and Decipherment.
MES X42.5. Israel Through Its Literature.
MES X42.51. Daily Life in Ancient Egypt.
Delve into all areas of Egyptian daily life from the dawn of the dynasties to the age of Cleopatra.
MES X42.52. Abraham and Abrahamic Religions.
Examines the figure of Abraham as portrayed in the Bible and the reception of that portrayal in Judaism, Christianity, and Islam.
MES X42.53. Angels, Demons, and Magic in Early Christianity.
Examine angelology, demonology and magic influence on the lives of early Christians and Christianity.
MES X42.54. Hermits, Monks, and Saints in Early Christianity.
Examine individual and communal forms of Christian monasticism from the first through fifth centuries CE. Explore the social, economic and religious factors that may have made a life of self-denial attractive to many early Christians and the role of authority in these movements.
MES X42.55. Ancient Egypt.
Discussion of Egypt's culture, language, and history from the prehistorical period (13,000 BC) to the New Kingdom (1069 BC).
MES X42.56. Israel and Palestine: A Cultural Perspective.
MES X42.57. Divine Persuasion in Biblical Times and Place.
Explore the use of persuasive strategies in an ancient and non-Western culture, that of the Hebrew Bible. Using rhetorical techniques, analyze three types of texts: narratives of interactions between ordinary people and God; interactions between people, God, and authorized prophets; and prayers in prose and poetry.
MES X42.58. Islamic Ethics.
MES X42.59. Classic Lyric Poems.
MES X42.6. Love and the State in Contemporary Israeli Literature.
MES X42.60. The Persian Epic and Popular Culture.
MES X42.61. Forugh Farrokhzad and Her Poetry.
MES X42.62. Iranian and Iranian-American Identity.
MES X42.63. Twentieth-Century Persian Literature.
MES X42.64. Youth and Violence in the Middle East and Eurasia.
MES X42.65. Debating Genesis.
MES X42.66. Law and Justice in the Bible.
Examine the legal traditions of the Torah (Pentateuch) and what they reveal about the practice of law and justice in ancient Israel and the wider biblical world.

MES X42.67. The Book of Job.

MES X42.68. The Five Books of Moses.

Study the socio-historical circumstances that gave shape to the first five books of the Bible: Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. Examine how these five books achieved the status of sacred literature.

MES X42.69. Cultural Translation.

Examine theoretical readings and concrete examples of how translation politics, translation-induced reconstruction of literary systems, censorship, manipulation, and market dynamics affect the production, distribution, and reception of translated products in the realm of arts and entertainment, news media and politics, and various academic disciplines in the Middle East, United States, and beyond.

MES X42.7. Postmodernist Israeli Literature.

Study of the first decades of Israeli literature. Themes include the establishment of a new state in the aftermath of the Holocaust, conflict between Israel and Arab nations, and conflict between Israelis and Palestinians.

MES X42.70. Soundtrack of Revolutions.

Examine the significance of music in the social and political uprisings of countries across the Middle East.

MES X42.71. Humor and Hardship in Arabic Literature.

Examine Arabic literary works (ninth through twentieth centuries) that display humor and its unspoken counterpart, hardship. Consult modern theories of humor and premodern Arabic-Islamic ideas of the jocular.

MES X42.72. Major Islamic Texts.

Introduction to key religious, philosophical, and political ideas from part of the Islamicate world through sustained readings of core texts.

MES X42.73. Contemporary Middle Eastern Cinema.

Introduction to some of the most pertinent social and political themes in celebrated films across Arab countries, Turkey, Iran, and Israel and Palestine.

MES X42.74. Global Cult Cinema.

Explore the relationship between movies and fans within a global perspective. Examine case studies from and through the Middle East to understand the resonance of cult media texts around the world.

MES X42.75. Envisioning Muslims: The Middle Ages and Today.

Examine representations of Muslims in the dominant cultural media of the European Middle Ages, and in cultural media of the twentieth- and twenty-first centuries. Explore how Europeans envisioned Muslims, and how Muslims envisioned themselves.

MES X42.76. Childrearing in Israel.

Examine the coalescence of educational theories and national aspirations in the process of shaping child-rearing practices within the Jewish population of Palestine under the Ottoman Empire and the British Mandate and into the first two decades of the State of Israel.

MES X42.77. The Shock of Modernity in the Middle East.

Explore cross cultural contacts between the East and the West during the modern period. Analyze Islamic civilization in the Middle East of the modern era by addressing the development of religion, law, government, and morality during and after the colonial period.

MES X42.78. Modern Egypt in Film and Fiction.

Explore the history and culture of modern Egypt through selected readings in twentieth-century film and fiction.

MES X42.79. Culture in Turkey: Myths and Realities.

Explore how Turkish culture is neither static nor monolithic but is continuously contested and redefined. Investigate tensions between secularism and Islam, Orientalist and Occidentalist fantasies, and imperialist and nationalist desires to better understand the sociopolitical dynamics that define Turkish society today.

MES X42.8. The Sacred and the Secular in Contemporary Jewish Literature.

MES X42.80. Cultures of Revolution in the Middle East.

Examine the cultural production that surrounds key moments of political and social change in the Middle East.

MES X42.81. Gender and Translation in the Arab World.

Examine complex politics and poetics behind the translation and marketing of Arab women's writing in the West.

MES X42.82. Arab Francophonie.

Explore French-language cultural production by authors of Arab origin in France and across France's former colonial and mandate territories. Examine the fraught relationship many of these authors have with French language, literature, and culture, in dialogue with postcolonial theory.

MES X42.83. Media and the Middle East.

Addresses the role of media in the Middle East, considering communication texts, processes and industries in political, social, economic, and cultural contexts.

MES X42.85. Myths and Legends of the Ancient Near East.

Explore myths and legends contained in a variety of ancient sources, including texts from Israel, Greece, Egypt, and Mesopotamia.

MES X42.86. Minorities in the Middle East.

Explore the diversity of ethnic and religious minorities found in the Middle East through their history, languages, beliefs, and cultures.

MES X42.88. Multiculturalism in Jordan.

Explore how past, present, local, and regional events inform current Jordanian culture and identity.

MES X42.89. Introduction to the Music of the Middle East.

MES X42.9. Mizrahi Writing in Israel.

MES X42C. Art and Architecture of Late Antiquity.

Examination of early Christian and late Roman art and architecture, including related traditions, such as Jewish, Coptic, Armenian, Georgian, Persian,and Syriac.

MES X42M. Ancient Mediterranean Religion and Astrology.

Explore the role of astrology in ancient Mediterranean religious life.

MES X42S. Sufism: Islamic Thought and Spirituality.

Explore Sufism and other Islamic mystical traditions that color cultural milieus spanning four continents and fourteen centuries. Focus on the historical developments in the Islamic theosophical tradition, as well as the relationship between Sufism and poetics, colonialism, and post-colonial resistance movements.

MES X43. Topics in the Middle East: History.

MES X43.1. Modern Egypt: A History.

Critically examines the social, political, and intellectual dynamics that shaped the different forms of political community, economic organization, and public culture over the past century. Covers colonialism, liberalism, Arab socialism, authoritarian capitalism, and Islamic republicanism.

MES X43.10. Origins of Monotheism.

MES X43.11. Medieval Middle East History in One Hundred Objects.

Survey the history of the medieval Middle East, from the period of Late Antiquity (in the seventh century) to the rise of early modern empires of the Safavids, Ottomans, and Mughals (in the seventeenth century), through close examination of the meaning and significance of 100 objects.

MES X43.12. Modern Middle East History in One Hundred Objects.

Survey the history of the medieval Middle East, from 1500 to the present, through close examination of the meaning and significance of 100 objects.

MES X43.13. Arabs and Vikings: Art and Culture.

Explore the art and culture of the global Middle Ages through close examination of recent films, popular and academic publications, and

works of art and architecture that reveal the interconnection between the European and the Islamic worlds.

MES X43.15. Africa and Rome.
Explore the history of Roman Africa with emphasis on what is now Tunisia and northern Algeria.

MES X43.16. Jews: Nation or People.

MES X43.17. Restitution and Restorative Justice after the Holocaust.
Examine attempts to find a measure of justice after the Holocaust. Explore themes of human rights and international law.

MES X43.2. Re-forming the Arab East, 1914-Present.
Introduction to the history of the Middle East in the twentieth century. Examines forces that transformed the area from a relatively peaceful region to a radicalized environment. Explores colonialism, nationalism, secular modernism, impact of Zionism, rise of political Islam, status of women, and the oil revolution.

MES X43.20. Islam in the Early Modern World: Religion and Culture.
Examine a history of the religious and cultural development across the Islamic world between the thirteenth and eighteenth centuries, stemming from the rise of the Mongols and the end of the caliphate. Explore the early modern Muslim empires of the Ottomans, Safavids, and the Mughals.

MES X43.21. Transnational Asia: From the Middle East to the Far East.
Examine how various groups of people understood, experienced, and imagined concepts such as "the East" and "Asia" with a primary focus on the nineteenth and twentieth centuries.

MES X43.22. French Empire: The West and Islam.
The development of regions within the Mediterranean, variously called the West and East or Europe and Islam, with an emphasis on the role of modern France and France's Mediterranean empire.

MES X43.23. Muslim Travelers and Traders.
Introduction to modern Middle Eastern and Islamic history in the broader context of globalization, with a primary focus on the nineteenth century to the present.

MES X43.24. Arab Citizens of Israel.
Examine the historical, social, and political processes of change experienced by the Palestinian-Arab community in Israel, including the fundamental aspects pertaining to the founding of Israel as "a Jewish and democratic state" and the relations between the Arab minority and the Jewish majority.

MES X43.25. The Arab-Israeli Conflict.
Examine the elements of the Arab-Israeli conflict, including the main figures involved, events, and turning-points in its history.

MES X43.26. The Levant: From Colonialism to Coexistence.
Examine the history of the Levant, a region that includes Syria, Israel, Palestine, and Jordan.

MES X43.27. Middle East Outlaws and Lawmen.
Explore the evolution of crime and law enforcement in the modern Middle East.

MES X43.28. Food History of Asia and the Middle East.
Explore the history of food and beverages in the Middle East and Asia, including Palestine/Israel, Egypt, Iran, India, China, and Japan. Investigate themes of identity, capitalism, and globalization to reflect on the role of food consumers in an interconnected world.

MES X43.29. History of Sephardi Jews.
Examine the early-modern networks established by the Sephardi Jews (Sephardim) across the Mediterranean and Atlantic, the rich Ladino Judeo-Spanish culture that thrived in the Ottoman Empire, and Sephardi encounters with the modern world.

MES X43.3. History of Iran to 1800.
A survey of the social, economic, and religious components unique to Iran from the pre-Islamic empire of the Achaemenids through the development of Iran as a medieval and premodern Islamic state.

MES X43.30. Archaeology of Jesus's World.
Explore archaeological methods in examining texts and artifacts from first century CE.

MES X43.31. Religions in the Ottoman Empire.
Examine Jewish, Christian, and Muslim communities in the Ottoman Empire (fourteenth to twentieth centuries), with a focus on dynamics both within and between the communities.

MES X43.4. Islamic Spain and North Africa to 1492.
An introduction to the impact of Islam on Spain and North Africa, with emphasis on social, economic, and cultural development.

MES X43.6. Modern Iran.
Explore the development of modern Iran; special attention is given to the impact of the West, the constitutional movement, nationalism, the oil crisis, and the Islamic Revolution of 1979.

MES X43.7. History of the Pilgrimage to Mecca, Hajj.
Survey of the Hajj, Islam's major pilgrimage to Mecca and the nearby Holy Places. It will examine the Islamic pilgrimage from its beginnings in the seventh century C.E. through today.

MES X43.8. Prophet of Islam: His Life and Times.
A detailed study of the prophet Muhammad's life and message, and of the means by which his life was recorded and popularized.

MES X51. Mediterranean Crossroads Seminar.
Reading and discussion about the lands, cultures, and societies of the eastern Mediterranean from a variety of disciplinary perspectives. Students prepare to study in the Middle East (in Middle Eastern Studies 352) and begin work on their individual research projects.

MES X52. Mediterranean Crossroads Study Abroad Seminar.
Students study and conduct research in the Middle East.

MES X53. Mediterranean Crossroads Conference Course.
Under supervision of a faculty member, students complete their research projects following participation in Middle Eastern Studies 352.

MES X60. Conference Course.
Supervised individual research, discussion, and writing of papers about various general and specialized Middle Eastern subjects.

MES X70. Practicum: Internships in Applied Middle Eastern Studies.
Research and staff experience working in an appropriate agency or business.

MES X79H. Honors Tutorial Course.
Supervised individual reading for one semester, followed by research and writing to produce a substantial paper on a special topic in middle eastern studies, to be completed during the second semester.

Graduate Courses

MES X19S. Topics in Middle Eastern Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MES X29S. Topics in Middle Eastern Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MES X80. International Business Fellows Seminar.
Multidisciplinary seminar for students in area studies, business administration, law, and public policy. The faculty includes both academics and business leaders.

MES X81. Topics in Seminar in Middle Eastern Civilizations and Cultures.
Advanced studies of various aspects of the civilizations and cultures of the Middle East and North Africa.

MES X81.11. Regional Geography of the Middle East and North Africa.
Topics include developmental activity and spatial change in the Middle East, comparative regional studies.

MES X81.22. Politics of the Middle East and North Africa.
Readings and research on the political systems of the Arab world, Israel, Turkey, Iran, and Afghanistan. Precise topics vary.

MES X81.26. Turkic Cultures and Languages in Central Asia.

MES X81.29. Environment and Development in the Middle East.

MES X81.30. Language and Politics in Language Planning.

MES X81.33. Translation: Theory, History, and Practice.

MES X81.37. Intellectual History of Indo-Iranian Islam.

MES X81.38. Music Cultures of the Middle East: Past and Present.

MES X81.39. Translating Arabic Texts.

MES X81.41. Gender, Clothing, and Identity in Muslim Society.

MES X83. Internships in Applied Middle Eastern Studies.
Students conduct research and participate in other work in an appropriate agency or business.

MES X84. Topics in the Middle East: Social Science.
Advanced studies of various aspects of social sciences in the Middle East.

MES X84.10. The Military in Politics.

MES X84.11. Nationalism and Gender.

MES X84.12. Comparative Middle Eastern Law.
Exploration of legal structures of the modern Middle East from a comparative approach.

MES X84.3. Law and Religion in the Modern Middle East.
Examine the laws that govern religion and religious expression in Middle Eastern national constitutions, with a special focus on both the free exercise and establishment clause of Islam as the religion of the state.

MES X84.6. Cities and Citizenship.

MES X84.7. Culture, History, and Power.

MES X84.8. Gender and Development.

MES X85. Topics in the Middle East: History.
Advanced studies of various aspects of history in the Middle East.

MES X85.1. Middle East Police and Criminals.
Examine scholarship on crime and criminals, as well as police and law enforcement across the Middle East. Discover how crime and law enforcement have evolved over the past two centuries in the Modern Middle East.

MES X85.10. Modern Arab Renaissance: An Inquiry.

MES X85.11. State and Society in the Middle East.

MES X85.12. European Imperialism: British Empire.
Study of the British empire in the Middle East, Asia and Africa.

MES X85.13. The Ideas of the East.
Examine the significance of the transnational movement of people, ideas, and goods in the process of constructing geocultural categories such as the West, the East, and Asia; and their subcategories such as the Middle East, Southeast Asia, and East Asia.

MES X85.14. Global Iran.
Examine modern Iranian history from the nineteenth century to the present, with an emphasis on a body of scholarship that critiques methodological nationalism.

MES X85.2. Nationalisms in the Middle East.
Examine theories, methods and debates associated with nationalism in the Modern Middle East, including the histories of national and translational manifestations of nationalism, as well as the nationalisms of minorities in the region, and thematic topics such as race and ethnicity, gender, historiography, and religion.

MES X85.3. Islamic Historiography.

MES X85.4. Islamic Revolution of Iran.

MES X85.5. Modern Iranian History and Historiography.

MES X85.6. Shi'ite Religious and Political Ideologues.

MES X85.7. Women in Islamic Societies.

MES X85.9. Method and Theory in Middle Eastern Studies.

MES X86. Topics in the Middle East: Arts and Humanities.
Advanced studies of various aspects of the arts and humanities in the Middle East.

MES X86.1. The Arabic Humanities.
Explore the traditions formed in pre-modern Islamic humanities.

MES X86.11. Islamic Ornament.

MES X86.12. Islamic Studies: Disciplinary Introduction.

MES X86.14. Mizrahi Writing in Israel.

MES X86.15. Post-Zionist Perspectives in Israeli Literature.

MES X86.16. Readings in Contemporary Persian Political Writings.

MES X86.18. Seminar in Music, Gender, and Sexuality.

MES X86.19. Women in Scripture.

MES X86.2. Iranian Film and Fiction.

MES X86.21. Middle Eastern Modernities.
Explore how Arabic literature and thought changed over the course of the nineteenth and twentieth centuries through extended studies of poetry and prose written in Arabic. Examine the relationship of modernity to modernist literature in order to define what modernism means in an Arab/ic context.

MES X86.22. Reading the Maghreb.
Examine Maghrebi literature and film of both French and Arabic expression, along with works of psychoanalytic and postcolonial theory.

MES X86.23. Late Ottoman State and Society.
Study of state and society in the late Ottoman Empire (c. 1700-1922), focusing on social and economic life, religion, law, government, ideology, arts, and sciences.

MES X86.24. Islamic Feminism.
Exploration of the idea, history, figures, and writings of Islamic feminism, covering the 20th and 21st century.

MES X86.25. Gender, Clothing, and Identity in Muslim Societies.

MES X86.26. The New Middle East: A Critical Approach.
Examine new analytical approaches to understanding the Middle East, including its social and political dynamics, utilizing an interdisciplinary approach.

MES X86.27. Gender, Islam and Representation in the Modern Middle East.
Examine representations of women across majority Muslim countries and explore how women producers and consumers navigate within the framework of regulations set by religious and governmental bodies.

MES X86.28. The Qur'an and Its Interpretations.

MES X86.3. Reading Arabic Literature.
Examine the canons of Arabic literature through readings in translation.

MES X86.30. Space and Place in Literature.
Examine how the representation of space and place in literature contributes to understanding the global, social, and cultural dynamics since the nineteenth century. Explore the poetics of space as expressed in literature from the Middle East, Europe, and the United States.

MES X86.5. Theory and Practice in Literary Translation.

MES X86.6. Modern Arabic Poetry.
Explore Arabic poetic production.

MES X86.7. Arab Women Poets.

MES X86.9. Classical Arabic Ahkbar.

MES X89. Conference Course.
Supervised individual study of selected problems in Middle Eastern Studies.

MES X90M. Applied Methods and Practice in Middle Eastern Studies.

MES X94. Professional Development in Middle Eastern Studies.

MES X97. Proseminar.

Introduces the incoming Master of Arts student cohort to the Center of Middle Eastern Studies' faculty and their research.

MES X98. Thesis.

MES X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

MES X98T. Supervised Teaching in Middle Eastern Studies.

Teaching under the close supervision of a faculty member; weekly group meetings with the instructor, individual consultation, and reports throughout the teaching period.

Professional Courses

MES X19S. Topics in Middle Eastern Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded to work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MES X29S. Topics in Middle Eastern Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MFG - Manufacturing Systems Engineering

Manufacturing Systems Engineering: MFG

Lower-Division Courses

MFG X97. Research Problems.

Problem selected by the student with approval of the graduate adviser.

Upper-Division Courses

MFG X97. Research Problems.

Problem selected by the student with approval of the graduate adviser.

Graduate Courses

MFG X97. Research Problems.

Problem selected by the student with approval of the graduate adviser.

MFG X97K. Topics in Advanced Manufacturing Systems Engineering.

Selection of topics based on needs of an adequate number of students.

MFG X97K.1. Advanced Packaging Materials.

MFG X97K.2. Signal Integrity in High-Speed Digital Systems.

MFG X97K.3. Thermal Management in Packaging.

MFG X97M. Graduate Research Internship.

Research associated with enrollment in the Graduate Research Internship Program (GRIP).

MFG X97S. Topics in Technical Communication: Graduate Seminar.

The master's degree program in manufacturing systems engineering includes three semester hours in this course. Practice and application of technical communication skills in engineering.

MFG X97S.1. Graduate Seminar in Technical Communication I.

MFG X97S.2. Graduate Seminar in Technical Communication II.

MFG X97S.3. Individual Instruction in Technical Communication.

MFG X98. Thesis.

MFG X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

MFG X97. Research Problems.

Problem selected by the student with approval of the graduate adviser.

MIC - Microbiology

Microbiology: MIC

Lower-Division Courses

Upper-Division Courses

Graduate Courses

MIC X83K. Topics in Advanced Microbiology.

Examine microbiology topics in-depth.

MIC X86. Topics in Problems and Methods in the Life Sciences.

Examine the questions addressed in modern life sciences research and the experimental methods used. Focus on experimental reasoning and on the application of different techniques to solve problems.

MIC X90C. Topics in Microbiology.

Discuss current topics in microbiology

MIC X92. Research Problems.

MIC X94M. Bacterial Behavior and Signaling Mechanisms.

Examine molecular, cellular, organismal, ecological, and evolutionary biology of bacteria. Focus on a large number of bacteria, both Gram-positive and Gram-negative from four major phyla, that live and survive both as free-living microbes, in groups, and in both beneficial and pathogenic associations with eukaryotic hosts. Explore evolution of organelles and behaviors, including receiving and transducing signals that produce a variety of outcomes such as chemotaxis and motility, morphogenesis and development, secretion and virulence, quorum sensing and biofilms, bacterial warfare, and antibiotic production and tolerance.

MIC X95G. Structure and Function of Proteins and Membranes.

Explore advanced biochemistry concepts and the scientific process. Examine a detailed consideration of the structure and function of proteins, carbohydrates, lipids and nucleic acids, as well as discussion of enzyme mechanisms and kinetics.

MIC X95H. Cell Biology.

Examine mechanisms of growth control, cell cycle regulation, mitosis, cell signaling, protein targeting, and the integration of these processes.

MIC X95J. Genes, Genomes, and Gene Expression.

Examine prokaryotic and eukaryotic mechanisms of DNA replication and transcription; posttranscriptional processing of transcription products; and mechanism and regulation of the translation of messenger RNAs.

MIC X95M. Advanced Microbiology.

Explore technical and conceptual aspects of microbiology. Focus on experimental methods and design. Discuss career opportunities and development with industry professionals.

MIC X98. Thesis.

MIC X98R. Master's Report.

Prepare a report to fulfill the requirement for the master's degree under the report option.

MIC X99W. Dissertation.

Professional Courses

MIS - Management Information Systems

Management Information Systems: MIS

Lower-Division Courses

MIS X01. Introduction to Information Technology Management.
Explores how information technology helps to achieve competitive advantage and improve decision making, business processes, operations, and organizational design. Uses a cross-functional perspective to recognize the role of technology across business activities of management, finance, marketing, human resources, and operations.

MIS X01H. Introduction to Information Technology Management: Honors.
Explores how information technology helps to achieve competitive advantage and improve decision making, business processes, operations, and organizational design. Uses a cross-functional perspective to recognize the role of technology across business activities of management, finance, marketing, human resources, and operations.

MIS X02F. Foundations of Information Technology Management.
Explores how information technology helps to achieve competitive advantage and improve decision making, business processes, operations, and organizational design. Uses a cross-functional perspective to recognize the role of technology across business activities of management, finance, marketing, human resources, and operations.

MIS X04. Introduction to Problem Solving and Programming.
Programming skills for creating easy-to-maintain systems for business applications. Object-oriented and structured methodologies with Python.

MIS X10. Introduction to Management Information Systems.
Basic computer terminology, hardware and software, communications technology, graphics, systems analysis and design, and issues arising out of the rapidly evolving field of information systems. Students are expected to achieve a working knowledge of personal computer software, including operating system software and environments, as well as spreadsheets, analytical graphics, databases, and presentation software. Hands-on experience with the Internet and use of electronic mail.

MIS X19S. Topics in Management Information Systems.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MIS X25. Database Management.
Beginning and intermediate topics in data modeling for relational database management systems.

MIS X29S. Topics in Management Information Systems.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MIS X32F. Topics in Foundations of Management Information Systems.

MIS X33K. Web Application Development.
Concepts and practices of information systems. Advanced programming techniques used to generate menu-driven applications.

MIS X40S. Topics in Management Information Systems.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

MIS X66P. Management Information Systems Practicum.
Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

MIS X71T. Topics in Management Information Systems.

MIS X72T. Topics in Management Information Systems.

MIS X72T.1. Open Innovation.

MIS X72T.11. Advanced Analytics Programming.
Focus on data analysis using the Python programming language. Explore machine learning tasks such as classification and clustering.

MIS X72T.12. Information Technology for Supply Chains.
Learn how information technology is used to coordinate supply chain activities across different industries.

MIS X72T.17. Health Care Analytics.
Explore key management challenges and how data may be leveraged to guide decisions and improve operations, with the unifying theme of providing health care services in a manner that leads to lower cost and higher quality.

MIS X72T.2. IT Audit and Security.

MIS X72T.22. Predictive Analytics and Data Mining.
Introduction to data mining problems and tools to enhance managerial decision making at all levels of the organization. Discuss scenarios, including the use of data mining to support customer relationship management (CRM) decisions, decisions in the entertainment industry, financial trading, and even professional sports teams.

MIS X72T.23. Social Media Analytics.
Introduction to social network analysis for business value using statistical optimization and decision theory. Analyze online search and conversation data for market sensing, sentiments, product quality, reputation, recommendations, and brand awareness.

MIS X72T.24. Data-Driven Revenue Management.
Use data-driven tactics and strategies to predict consumer demand and optimize price and capacity/inventory availability to maximize revenue or profit. Explore demand analytics and revenue management techniques, produce rigorous and practical insights, and develop data analysis and optimization skills, based on business cases, datasets, and exercises. Examine diverse contexts and industries, such as conventional retailing, e-commerce, airline/hotel, and contemporary platform and cloud services (e.g., Uber, Dropbox, Netflix, AWS), by utilizing software (Excel, R, or Python) to build models, conduct optimization, and develop insights for a variety of revenue management examples.

MIS X72T.25. User Generated Content Analytics.
Focus on a gamut of questions ranging from strategic to operational matters pertaining to a firm's social media initiatives, metrics to capture relevant outcomes, and predictive analysis to link social media chatter to business performance.

MIS X72T.3. Fundamentals of Health IT.

MIS X72T.4. Mobile Apps and Web Services.
Explore mobile and web services technology models and architectures.

MIS X72T.9. Enterprise Computing.

MIS X74. Business System Development.

Provides foundation in business system analysis, project management, planning, design, and implementation using basic business knowledge and computer skills.

MIS X75. Strategic Information Technology Management.

Designed to develop an understanding and appreciation for the role of information technology in the context of a firm's strategy. Explores the impact of information technology on the economy and business performance, the emergence of electronic business applications and organizational and market transformation, and the nature of technology-driven business models and strategies.

MIS X79. Independent Research in Management Information Systems.

Graduate Courses

MIS X80. Topics in Seminar in Organizational Communication.

Selected topics in organizational communication, written and oral.

MIS X80.1. Research Methodology in Business and Organizational Communication.

MIS X80.2. Projects, Proposals, and Presentations.

Communicating effectively in business using advanced writing and presentation concepts and techniques to increase individual and team effectiveness.

MIS X80.3. Advanced Report Writing, Professional Reports, and Other Scholarly Papers.

MIS X80D. Database Management.

Explore designing, building, and implementing a relational database to improve company operations and reporting. Examine how databases affect analytics and app development.

MIS X80N. Topics in Information Management.

MIS X80N.2. Managing Information.

Understanding, designing, and controlling the information processing activities of an organization. Complements Business Administration 380C by focusing on information systems rather than information technology. Includes business intelligence, knowledge management, data modeling, group decision support systems, and electronic commerce.

MIS X80N.3. Business Process Excellence.

Emerging technology, data and process modeling (flow focus for integrated applications), reengineering, and change management.

MIS X80N.4. Digital Economy and Commerce.

MIS X80P. Problem Solving and Programming.

Explore programming skills for creating easy-to-maintain systems for business applications. Examine object-oriented and structured methodologies with Python.

MIS X81N. Topics in Information Systems.

Selected topics in information technology and management of information systems development.

MIS X81N.1. Introduction to Data Management.

MIS X81N.10. Change Management Practicum II.

Project-oriented course focusing on implementation of organizational change.

MIS X81N.11. Research in Information Technology.

MIS X81N.12. Advanced Information Systems Readings.

MIS X81N.13. Advanced Data Communications.

MIS X81N.14. Global Information Technology Management.

MIS X81N.15. Introduction to Electronic Commerce.

MIS X81N.16. Information Systems Projects.

MIS X81N.17. Client/Server Development.

MIS X81N.18. Innovation, Technology, and Commercialization.

MIS X81N.19. Technology Transfer: Theory and Practice.

MIS X81N.2. Research in Information Systems: Organizational and Behavioral Perspectives.

MIS X81N.20. Cross-Cultural Issues in Information Systems.

MIS X81N.21. Seminar in Multimedia Systems.

MIS X81N.22. Information Technology Strategy and Services.

MIS X81N.23. E-Business: Strategy and Policy.

The responsibilities of the strategist for choosing, developing, and managing an overall e-business firm strategy in uncertain market, technology, and policy environments.

MIS X81N.24. Global E-Business: Theory and Cases.

Analysis of case studies, incorporating Oracle and other Web-based distributed computing solutions.

MIS X81N.25. E-Security and E-Forensic Frameworks.

Discussion and hands-on use of current Web and distributed computing security software and e-forensic solutions.

MIS X81N.26. Research Methods in Information Systems.

Overview of research methods used to study information systems problems. Fundamental concepts and criteria for use with and evaluation of quantitative and qualitative, positivist and interpretive research methods. Current state-of-the-art applications.

MIS X81N.27. Strategies for Networked Economy.

Analyzes the competitive dynamics of platform-mediated networks; explores innovations like cloud computing in supporting network-based competition, the implications of information technology-enabled global sourcing, and business intelligence for business value and competitive advantage; and discusses the role of information technology in business transformation and making a case for information technology investments.

MIS X81N.28. Data Management.

Explore general database concepts such as E-R modeling, relational database design, and advanced SQL. Design and develop mission-critical web-based business applications using databases. Explore data warehouse design and advanced analytics functions within SQL.

MIS X81N.29. Digital Strategies for Enterprise Transformation.

Analyze the competitive dynamics of platform-mediated business models; explore innovations such as cloud computing and Internet of things in supporting platform-based competition; study the implications of information technology-enabled disruption; understand applications of artificial intelligence and machine learning to develop competitive advantage; and discuss the role of information technology in business transformation.

MIS X81N.3. Strategic Analysis for High-Tech Industries.

MIS X81N.30. Privacy Preserving Analytics.

MIS X81N.31. Artificial Intelligence and Machine Learning for Managers.

Discuss artificial intelligence (AI) and machine learning (ML) through a review of AI and ML concepts, tools, and the complete AI/ML lifecycle in the context of tackling business and organizational challenges.

MIS X81N.32. Artificial Intelligence Strategies for Digital Transformation.
MIS X81N.33. Artificial Intelligence in Business and Society.
MIS X81N.34. Artificial Intelligence in Healthcare.
MIS X81N.35. Modern Data Management.
Explore modern data management practices, with a strong focus on design and implementation of scalable, cloud-native data systems. Learn to manage diverse data types--structured, semi-structured, and unstructured--across their full lifecycle. Examine the role of cloud infrastructure in enabling agile, secure, and scalable data solutions.
MIS X81N.4. Decision Support Systems.
MIS X81N.5. Information Systems Design and Implementation.
MIS X81N.6. Research Seminar.
MIS X81N.7. Information and Knowledge Management.
MIS X81N.8. Managing Disruptive Innovations.
Focuses on the management of disruptive technologies, including analyzing whether an emerging technology is sustaining or disruptive, identifying new markets for disruptive technologies, justifying investments in disruptive technologies, implementing disruptive technologies, and appropriating value from them.
MIS X81N.9. Change Management Practicum I.
Project-oriented course focusing on design of organizational change.
MIS X82N. Topics in Information Management.
MIS X82N.1. Managing Financial Information.
Data modeling and information management for investment analysis and financial systems.
MIS X82N.10. Data Mining for Marketing.
MIS X82N.11. Business Intelligence Capstone.
Explores foundations of business analytics related to database management, data analysis techniques, and business decision making to solve a business problem of a client.
MIS X82N.12. Social Media Analytics.
An introduction to social network analysis for business value using statistical optimization and decision theory, including the foundation for analyzing online search and conversation data for market sensing, sentiments, product quality, reputation, recommendations, and brand awareness.
MIS X82N.13. Predictive Analytics and Data Mining.
MIS X82N.14. Business Data Science.
An introduction to basic concepts, methodology, algorithms, and technology used in business analytics and decision making. Explore concepts from probabilistic modeling, analysis and experimental design. Examine the basics of modern regression and classification, clustering, visualization, dimensionality reduction, A/B Testing and an introduction to deep learning.
MIS X82N.15. Business Analytics Capstone.
MIS X82N.16. Fundamentals of Neural Networks and Machine Learning.
Explore an introduction to fundamental concepts, methodology, algorithms, and technology used in business analytics and decision making covering the most powerful concepts and algorithms from probabilistic modeling, analysis and machine learning.
MIS X82N.18. Digital Health Innovation.
Focus on digital innovation in the healthcare industry that is driven by advances in information technology and artificial intelligence. Learn about different types of IT-enabled innovations that are revolutionizing healthcare delivery, develop technology-enabled strategies to enhance innovation, and evaluate how new types of AI-enabled innovations create value for patients and other stakeholders.
MIS X82N.2. E-Business Change.
MIS X82N.3. E-Business Application Development.
MIS X82N.4. Cross-Functional Systems Integration.
MIS X82N.5. Managing Complexity.
MIS X82N.6. Computer Auditing and Systems Security.
MIS X82N.7. Project Management in Fast-Cycle Environments.
MIS X82N.8. Balanced Scoreboard: An Information Systems Perspective.
Theory and tools that support the design and implementation of balanced scoreboard evaluation systems.
MIS X83M. Supply Chain Management for Executives.
Examine frameworks for understanding how to transform supply chain strategy in the face of pressures from technological, social, and political disruption.
MIS X83N. Topics in Information-Intensive Business Processes.
Topics in management of information in specific industries or application areas.
MIS X83N.1. Health Care Management.
MIS X83N.10. Practicum in Multimedia Systems Development.
MIS X83N.12. E-Business Innovation.
MIS X83N.13. Managing Innovation in a Global Company.
Examines innovation-based business strategies that rely on internal and external sources, processes in different organization forms, and market structures.
MIS X83N.2. Health Services Seminar.
MIS X83N.3. Customer Insights.
MIS X83N.4. Supply Chain Management.
MIS X83N.5. Computer Tools for Investment Science.
MIS X83N.6. Trading-Floor Technology.
MIS X84N. Topics in Business Analytics.
Selected topics in business analytics.
MIS X85. Management Information Systems.
Overview of hardware and software life cycles; in-depth considerations of program design, including experience programming for large-scale computer systems in COBOL, FORTRAN, and/or BASIC.
MIS X85G. Machine Learning and Artificial Intelligence for Executives.
Introduction to artificial intelligence (AI) and machine learning (ML) through a review of AI and ML concepts, tools, and the complete AI/ML lifecycle in the context of tackling business and organizational challenges.
MIS X85N. Topics in Information Technology and Management.
Selected topics in information technology and management.
MIS X85N.1. Big Data and Distributed Programming.
Explore a range of subjects required for developing modern applications that operate over vast data sets that are potentially distributed in nature. Consider alternative technologies and architectures for working with big data, examining the pros and cons of the different approaches.
MIS X85N.10. User Generated Content Analytics.
Generate business and social insights from user-generated content (e.g., text, images, video, etc.) through the use of text analytics, sentiment analysis, visualization techniques, etc.
MIS X85N.11. Advanced Data Mining and Web Analytics.
Examine a variety of data mining and machine learning techniques for descriptive, predictive and prescriptive analytics. Explore approaches to analyzing different types of information from the Web (web structure, content, usage).
MIS X85N.12. Healthcare IT and Analytics.
Design new healthcare solutions using emerging information technologies such as Internet of Things, cognitive computing, artificial intelligence, the cloud, mobile, and 3D and 4D printing.

MIS X85N.13. Emerging Technologies II.
Build a strong business and technical foundation for blockchain. Discuss business inefficiencies that can be addressed by blockchain technology. Examine cryptology and distributed computing that blockchain systems rely on, including an overview of Bitcoin. Explore current research problems, perform programming assignments, lead discussions, and hear presentations from industry and academic researchers.

MIS X85N.14. Programming Blockchain.
Cover the development of the bitcoin protocol from scratch. Explore basic libraries to build the protocol using a step-by-step approach. Examine the primary and secondary aspects of scaling, mining and operating a bitcoin protocol based system.

MIS X85N.15. Unstructured Data Analytics.
Generate business and social insights from user generated content (e.g., text, images, video, etc.) through the use of text analytics, sentiment analysis, visualization techniques, etc.

MIS X85N.16. Math Foundations of Artificial Intelligence.
Explore the mathematical foundations of AI including probability theory and linear algebra, concepts necessary as foundational knowledge for other AI related courses in program.

MIS X85N.17. Advanced Programming and Application Development II.
Learn fundamentals of modern cloud native applications, including how to design, develop, and operate them, as well as distributed programming fundamentals. Examine machine learning design patterns for big data and distributed programming concepts.

MIS X85N.18. Problem Solving Unstructured Data Generative Artificial Intelligence.
Explore how modern enterprises can harness the combined power of GenAI and traditional unstructured data analytics to unlock business value. Learn a broad range of business questions and analytics driven use cases, spanning decision-making, process optimization, and innovation.

MIS X85N.19. Strategic Information Technology and Digital Transformation.
Examine information technology-enabled digital transformation and explore how digitalization impacts firm competition and enables industry transformation. Learn the role of digital business models, how firms can compete in disruptive ecosystems, to think critically about the benefit and challenge of strategic AI implementations and change management in real-world applications.

MIS X85N.2. Emerging Technologies I.
Explore all aspects of the Internet of Things (IoT) product life-cycle. Interface with the devices (sensors/actuators) that collect data and affect the environment. Explore network protocols for communication with these constrained devices. Examine programming of the back-end services that host, manipulate and disseminate the collected data. Study the development of apps that facilitate human interaction with these devices and the analysis of the data they produce. Examine security, privacy and performance considerations specific to IoT.

MIS X85N.20. Risk Governance Artificial Intelligence and Intelligent Automation.
Explore how to govern and control the complex cybersecurity, privacy, and IT risk organizations face in an era increasingly shaped by artificial intelligence (AI) and intelligent automation technologies. Discuss privacy-enhancing technology and ethical decision-making framework that help address the novel challenge posed by intelligent systems.

MIS X85N.21. Artificial Intelligence in the Enterprise.
Explore how to design and deploy artificial-intelligence (AI) capability across the enterprise, including mapping AI solutions to specific business requirements and align them with strategic goals. Learn how to identify, assess, and prepare high-quality data essential for AI success and how to select and scale a suitable model and integrate with existing systems and processes. Examine governance and continuous-improvement practices that keep AI initiative reliable and effective over the long term.

MIS X85N.22. Generative Artificial Intelligence I.
Explore a basic working knowledge of the latest algorithms, business applications and limitations of what data science and AI can accomplish. Learn about attention mechanism and the transformer, image and language embeddings, large language models, multi-modal models, and the important latest idea in reasoning, as well as some of the key emerging issues in security and reliability.

MIS X85N.23. Generative Artificial Intelligence II.
Learn about state-of-art Generative AI (GenAI) models for image, video and language generation and how they are used in a business setting. Explore their architecture and mathematical foundation. Learn about machine learning models for decision-making.

MIS X85N.24. Managing Data Production For Artificial Intelligence.
Explore the emerging discipline of managing data products designed to power GenAI applications. Learn how to curate, package, and deliver reusable datasets and APIs optimized for retrieval-augmented generation, synthetic data generation, and LLM prompt engineering. Examine fitness for use, economic value, and continuous improvement of data assets.

MIS X85N.25. Data Governance and Responsible Artificial Intelligence.
Apply data governance framework to ensure the integrity, transparency, and fairness of GenAI system. Learn how to embed observability into AI workflows–tracking provenance, bias, quality metrics, and access rights across the AI lifecycle. Connect the socio-technical principles of data governance with the operational reality of GenAI to implement trust-by-design practices within enterprise AI programs.

MIS X85N.26. Human Dimensions Of Cybersecurity.
Examine emerging security and privacy vulnerability in AI systems, with a focus on human manipulation vectors: prompt injection, phishing via AI-generated content, identity spoofing, and malicious feedback loops. Learn how adversaries exploit both model behavior and user trust, and how to counteract the risk through red teaming, user training, behavior-aware safeguards, and ethical AI design. Evaluate human-AI interaction security and apply layered defense that reinforce public trust in AI systems.

MIS X85N.27. Technical Foundation Artificial Intelligence Driven Cybersecurity.
Investigate the technical foundation of cybersecurity, with a particular focus on an emerging threat and challenge at the intersection of cybersecurity and artificial intelligence (AI). Explore how AI functions both as an enabler of a cyberattack and as a vulnerable target, requiring robust security defenses.

MIS X85N.28. Advanced Program and Application Development I.
Learn advanced programming and foundational software engineering concepts essential for developing robust, scalable web applications through practical, hands-on exploration using a traditional approach. Emphasis is on mastering the most popular full-stack framework, while reinforcing critical topics such as source code management, agile methodology, the software development life cycle (SDLC), and common design patterns.

MIS X85N.3. IT Security, Policy, and Compliance.
Explore the prevention and mitigation of data security and privacy risks in newly designed digital artifacts through IT governance, risk, and control frameworks as well as relevant laws, regulations, and industry standards.

MIS X85N.4. IT Capstone.
Develop real-life business and social solutions using emerging information technologies. Engage with industry partners to explore business context for IT Capstone projects.

MIS X85N.5. Cognitive Computing.
An overview of convolutional neural networks, recurrent neural networks and generative adversarial networks. Explore deep learning and artificial neural networks. Applications include computer vision, image and time series modeling as well as computational aspects of deep learning over big datasets. Utilize Python and Tensorflow, among other tools.
MIS X85N.6. Strategic IT and Change Management.
Explore the strategic management of new IT-embedded product and service innovations and their incorporation into the digital business ecosystems of organizations.
MIS X85N.7. IT and Supply Chain Management.
Examine the role of Information Technology in managing Supply Chains. Explore the IT capabilities needed by firms to coordinate their operations, collaborate with business partners and manage uncertainty. Illustrate the role of technologies and tools like ERP platform, ABAP programming, XML, web services, distributed computing and machine learning to improve the performance of supply chains.
MIS X85N.8. Design Methods.
Utilize design tools and methods to understand user needs, frame business opportunities, and design solutions. Examine design from both organizational and technical perspectives. Conduct research with end users, synthesize data, prototype solution ideas, and communicate compelling stories. Undertake design challenges that focus on emerging information technologies, including the internet of things (IoT), cognitive computing, AI, cloud, mobile, and 3D/4D printing.
MIS X85N.9. Advanced Programming and App Development.
Explore various approaches to modern app development, including required advanced programming and software engineering concepts. Explore approaches to app development ranging from native platform programming through programming frameworks that allow cross-platform development, to high-level approaches based on web frameworks.
MIS X91S. Independent Study.
MIS X98. Thesis.
MIS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
MIS X99W. Dissertation.

Professional Courses

MKT - Marketing

Marketing: MKT

Lower-Division Courses

MKT X19S. Topics in Marketing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Marketing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MKT X20F. Foundations of Marketing.
Introduction to basic concepts and terminology in marketing: the process of developing marketing strategy, the role of marketing activities within the firm, external influences that affect the development of marketing strategy, and basic analytical tools appropriate to marketing decision making.
MKT X29S. Topics in Marketing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Marketing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
MKT X32F. Topics in Foundations of Marketing.
MKT X37. Principles of Marketing.
Designed to expand understanding of the marketing system and basic marketing activities and to provide a framework for marketing strategy development and implementation of marketing tools and tactics.
MKT X37H. Principles of Marketing: Honors.
Designed to expand understanding of the marketing system and basic marketing activities and to provide a framework for marketing strategy development and implementation of marketing tools and tactics.
MKT X37N. Introduction to Marketing in New York.
Experience a globally connected city. Study in New York City, home to major industries including arts and entertainment, travel and hospitality, technology, and financial services, as well as major marketing firms and agencies. Consider the marketing strategies of New York industries and develop an understanding of the marketing system and basic marketing frameworks for marketing strategy creation, and implementation of marketing tools and tactics.
MKT X38. Promotional Policies.
Analysis of the use of promotional methods in marketing: advertising, personal selling, sales promotion, and indirect promotion; their social and economic consequences; their coordination and relationship to other business functions.
MKT X40S. Topics in Marketing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Marketing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.
MKT X54. Topics in Professional Sales and Business Development.
MKT X54.1. Building Sales Relationships.
Explore the theoretical and practical role of communication in the development of long-term client relationships. Examine the consultative sales process, including prospecting, assessing needs, handling objections, presenting, closing, and following up with clients. Investigate on how technology can help or hinder communication.
MKT X54.11. Strategy Consulting.
Introduction to the science and art of marketing strategy consulting. Explore the consulting industry and the key concepts of successful consulting. Execute a complete consulting engagement with an actual client.
MKT X54.2. Sales Strategy and Steering.
MKT X54.26. Data Analytics for Marketing.
Introduction to making more effective marketing decisions through the use of data. Examine sources, collecting and cleansing methods, conducting analyses, and presenting of data. Use real-world data and applications from a variety of industries.
MKT X54.3. Analytical Tools for Sales.
MKT X54.4. Marketing Channels.
Explore the critically important "fourth P" of marketing: how and where to make the value proposition available to customers. Discuss analysis of a direct channel versus the use of intermediaries, the decision to sell online and/or in brick and mortar locations, and many other current marketing channel topics.
MKT X54.5. Sales Management and Strategy.
MKT X54.6. Consumer Behavior.
MKT X54.7. Consumer Behavior in a Digital World.
Examine the core psychological processes underlying consumer decision-making and behavior, and the impact of recent technological advancements on consumer behavior in on and offline environments.

MKT X54.8. Integrated Marketing Communications.
Explore basic message development and dissemination across ever evolving media types; focusing on the brain and emotions, as well as an intense examination of persuasion and core belief formation.

MKT X54.9. Business to Business Marketing.
Focus on business to business marketing skills including: organizational buying and selling models; launching business to business products and services; pricing a product line; sales management and support; managing distribution partners; and social media for business to business promotion.

MKT X60. Information and Analysis.
The development and analysis of information for marketing management sources.

MKT X63. Professional Selling and Sales Management.
Policies, operation, coordination, and control of personal selling activities in marketing organizations.

MKT X66P. Marketing Practicum.
Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

MKT X70. Marketing Policies.
A capstone course focusing on case studies of advanced marketing problems, including analysis of markets, promotional planning, pricing, and distribution coordination. Designed to help the student develop a comprehensive understanding of marketing policy and strategy formulation.

MKT X70K. Retail Merchandising.
Designed to familiarize the student with all the activities associated with the sale of goods and services for final consumption and to provide an overview of the decisions involved in merchandising and management, including factors that influence and determine those decisions.

MKT X71T. Topics in Marketing.

MKT X72T. Topics in Marketing.

MKT X72T.1. Corporate Political Strategy.
Study how the political and regulatory environment enables and constrains business activity and how individual firms and groups of firms can ethically yet effectively lobby legislatures, negotiate with regulators, create industry associations, make campaign contributions, and engage in other political activity to gain competitive advantage.

MKT X72T.11. Brand Management.
Assess the strategic importance of building, leveraging, and defending strong brands through various branding, concepts, frameworks, and strategies. Explore current opportunities and challenges in a variety of industries and markets, including consumer packaged goods, business-to-business, services, technology, online, and global.

MKT X72T.13. Data Driven Marketing.
Explore marketing research analytics using various types of data analytics and statistical learning modes.

MKT X72T.14. Global Marketing.

MKT X72T.19. Pricing and Channels.
Explore the concept, theory, and latest thinking that bares on key issues in pricing and channels; taking the perspective of the marketing manager. Apply concepts and theory, through extensive case analyses, to solve pricing and channel problems in realistic business settings.

MKT X72T.21. Strategic Product Management.
Explore the principles of product management, including identifying new growth opportunities, assessing the health and profitability of a product portfolio, developing new products, and positioning and repositioning of current products. Utilize analytical tools, case discussions, and real-world derived projects.

MKT X72T.22. Predictive Analytics and Data Mining.
Introduction to data mining problems and tools to enhance managerial decision making at all levels of the organization. Discuss scenarios, including the use of data mining to support customer relationship management (CRM) decisions, decisions in the entertainment industry, financial trading, and even professional sports teams.

MKT X72T.24. Digital Marketing.
Explore online marketing strategies; navigate online advertising, search, social media, and online privacy; and design and implement an experiment to evaluate the effectiveness of online business decisions.

MKT X72T.25. Digital Marketing Strategy and Growth.
Analyze strategic frameworks that support effective digital marketing decision-making in fast-changing, AI-driven marketplaces. Examine customer value models, including Customer Lifetime Value and the "Jobs To Be Done" framework. Apply principles of entrepreneurial marketing, category design, and brand building using limited resources. Develop full digital marketing programs using proprietary tools to evaluate, implement, and optimize strategies across SEO, SEM, content, email, and social media channels.

MKT X72T.26. Corporate Governance.
Learn about serving as advisors to Boards of Directors or on Boards of Directors of business for profit and non-profit organizations.

MKT X72T.27. Reputational Risk and Crisis Management.
Explore what risk is, crisis management techniques, market communications, and reputational preservation.

MKT X72T.28. Science of Good Business.
Examine theory, data, insights, and empirical evidence from behavioral sciences to learn how individuals and organizations can achieve "good in a business context. Identify actionable, practical applications, based on design thinking principles, that can be implemented in the workplace.

MKT X72T.4. Small Business and Entrepreneurial Marketing.
Conduct market analysis aimed to unlock customer motivations, willingness to pay, and value creation; monetization/business models that entrepreneurial ventures can use; building a marketing plan for a start-up venture, including product, price, promotion, and channel considerations; and use data-driven analytics and metrics to drive entrepreneurial marketing decision making.

MKT X72T.5. Design Thinking for Business Innovation.
Focus on theoretical understanding of design thinking, which includes customer-focus, cross-functional collaboration, and an iterative process for refining products and services.

MKT X72T.8. Creativity and Leadership.

MKT X78. Marketing Micro-topics.
Focuses on contemporary, in-demand marketing topics to help develop the foundational knowledge, hands-on experience, and skills for today's marketing ecosystem.

MKT X78.1. Data Storytelling and Visualization.
Investigate data-driven marketing, identifying stories in data and utilizing visualizations to share that story. Explore Tableau, data literacy, visualization principles, and communicating effectively using data.

MKT X78.2. Negotiating Sales Solutions.

MKT X78.3. International Selling.

MKT X78.4. Sales Technology and Artificial Intelligence.

MKT X78.5. Selling in High Technology Industries.

MKT X78.6. Predictive Modeling in Sales.

MKT X78.7. Professional Purchasing and Procurement.
Explore the role of purchasing and procurement in a business. Examine goals and techniques of purchasing professionals; common structures of purchasing functions in a business; management of suppliers and vendors to achieve goals; cost, resource, and purchase timing management; bid proposal, negotiations, and other strategic purchasing decisions and associated marketing activities.

MKT X79C. Independent Research in Marketing.

Graduate Courses

MKT X82. Topics in Analysis of Markets.
Introduction to the data and tools used to analyze the business environment and enable marketing decision making. Uses real world data and problems to evaluate strategic market opportunities and assess the impact of marketing decisions in the marketplace.

Discusses analytical and empirical tools that address strategic issues of market sizing, market selection, and competitive analysis, as well as product management, customer management, and marketing function management decisions.

MKT X82.11. Quality and Competitiveness.
The globalization of competition, the challenge to the United States position in the world economy, and the total quality management movement as a competitive response.

MKT X82.12. Customer Strategy.
External resources for competitiveness, such as customer relationships that can help deliver superior quality and drive down costs. The course brings together experienced managers and students who have interned with them to explore issues underlying total quality in marketing.

MKT X82.13. Pricing and Distribution Channel Strategies.
Analysis of distribution and pricing decisions, factors that influence these decisions, and the role of pricing and distribution in the formulation of marketing strategy. Lecture/discussions, cases, and group projects.

MKT X82.14. Marketing of Services.
Organizations that market services rather than goods; differences between tangible goods and services; unique service-marketing problems and opportunities.

MKT X82.15. Marketing High-Tech Products.
The forces driving competition in industrial markets, with emphasis on technological products. This course focuses on honing students' analytical skills for leveraging marketing decision making.

MKT X82.16. Project Management in Fast-Cycle Environments.

MKT X82.18. Leveraging Marketing Metrics.
Examines the link between marketing decisions and financial performance.

MKT X82.19. Clients, Consulting, and Communication.

MKT X82.2. Analytical Methods in Marketing.
Basic analytical techniques that are used to improve market-oriented decisions: brand-switching, linear programming applications in advertising, competitive bidding, distribution and location models, conjoint measurement, and multivariate data analysis for strategy formulation. The course stresses the use of the models to deal with marketing variables and problems and the acquisition of relevant data. Case analyses and projects.

MKT X82.20. Human Insights.

MKT X82.21. Brand and Growth Strategy.
Examine the basic building blocks of growing and managing a brand while integrating it seamlessly into the overall marketing activities of the firm. Assess the health and profitability of a product portfolio, develop go-to-market strategies for new products, and discuss positioning and repositioning of current products.

MKT X82.22. Marketing Analytics.

MKT X82.23. Advanced Data Analytics in Marketing.

MKT X82.24. Consumer Well Being.

MKT X82.25. Data Visualization and Storytelling.

MKT X82.26. Predictive Analytics and Data Mining.

MKT X82.27. Behavioral Economics.

MKT X82.28. Connecting with Customers in a Digital World.

MKT X82.29. Consumer Behavior in a Digital World.

MKT X82.3. Business and Public Policy.
Provides a historical framework in which to study key issues in contemporary government and business relations in the United States and, to a limited extent, in other countries. Settings range from the Depression and the New Deal to more recent periods of social regulation of business; topics range from the role of the international oil companies to the deregulation of the airlines.

MKT X82.30. Brand and Growth Strategy.
Explore the principles of product management including assessing the health and profitability of a product portfolio, developing go-to-market strategies for new products, and positioning and repositioning of current products. Examine the basic building blocks

MKT X82.31. Corporate Governance.

MKT X82.32. Creativity and Leadership.

MKT X82.33. Design Thinking for Business Innovation.
Explore the overall design process, along with specific research tools and evaluation methodologies to build empathy and define key customer problems to solve. Discuss best practices for idea generation, prototyping potential solutions, and testing through iterative cycles.

MKT X82.34. Invisible Global Market.

MKT X82.35. Marketing for Nonmarketers.

MKT X82.36. Pricing and Channels.

MKT X82.37. Strategic Branding.

MKT X82.38. Science of Good Business.
Explore what good business means in multiple ways: doing well; being good; and feeling good. Examine theory, data, insights, and empirical evidence from behavioral sciences to learn how individuals and organizations can achieve "good" in a business context. Identify actionable practical applications, based on design thinking principles, that can actually be implemented in the workplace.

MKT X82.39. Experimental Design.

MKT X82.4. Strategic Marketing.
Strategic marketing decisions made at the corporate and business-unit levels, and organizational issues that affect the formulation and implementation of marketing strategy; an experiential course, taught primarily through the case method and a marketing strategy computer simulation game.

MKT X82.40. Data Analysis.

MKT X82.41. Advanced Marketing Management.

MKT X82.42. Digital Marketing and Measure.

MKT X82.43. Marketing Intelligence Capstone.

MKT X82.44. Digital Marketing.
Examine the strategies, frameworks, and platforms driving digital marketing success. Analyze how brands use data-informed insights, paid and organic channels, and evolving consumer behaviors to create measurable impact. Explore frameworks for digital strategy, content development, and performance optimization.

MKT X82.45. Influence of Marketing on Society.

MKT X82.46. Artificial Intelligence for Business Leaders.

MKT X82.49. Sales Management and Strategy.

MKT X82.5. Current Topics in Consumer Marketing.
Reasons for the shift in allocation from advertising to promotion, and implications of this shift for the structure of packaged-goods marketing.

MKT X82.51. Analysis of Markets.

MKT X82.52. Marketing Analytics and Information.

MKT X82.53. Analytical Tools for Marketing.

MKT X82.54. Data Driven Marketing.

MKT X82.55. Data Analytics and Dynamic Pricing.
Discuss nonlinear pricing, price customization, revenue management, bundling and versioning, channel pricing and auction designs in dynamic settings. Using real data sets and detailed exercises, apply these tools and concepts to diverse contexts and industries ranging from search engines to airlines, hotels and casinos to entertainment, and online retailing, utilities, social media, and self-improvement products. Explore analytical skills that can be applied in diverse settings ranging from business to policy issues and major global issues that confront an informed citizenry.

MKT X82.56. Marketing Analytics.
Explore an introduction to a variety of approaches to analyzing firm marketing actions. Discuss preference measurement, market segmentation and targeting, customer economics, product and brand policies, pricing, advertising, and digital marketing.

MKT X82.58. Product Management.

MKT X82.6. Buyer Behavior in Global Markets.

The application of marketing strategy and buyer behavior principles in the global environment.

MKT X82.7. Industrial Marketing.

Concepts, theories, and models from industrial marketing strategy provide the foundation for case analyses of a variety of technology-intensive firms, primarily in electronics, data processing, and pharmaceuticals.

MKT X82.71. CCIMS Marketing Fellows Practicum.

MKT X82.72. Marketing and Customer Insights Practicum.

MKT X82.8. Product Policy and Tactics.

Tactical and strategic product decisions, with emphasis on the former. Consumer goods, with some attention to the marketing needs of industrial products and service industries; decisions about a firm's product portfolio. Uses case analyses and personal computer-oriented analytical exercises.

MKT X82.9. Marketing Strategy for Small Business.

Basics of marketing strategy and marketing plan development; students develop such a plan for a beginning business.

MKT X82C. Product Management for Executives.

Explore product management with a focus on contemporary, in-demand marketing areas that provide the foundational knowledge, hands-on experience, and skills for today's marketing ecosystem.

MKT X82E. Strategic Marketing for Executives.

Explore how to think strategically about marketing issues; how to analyze a business situation; and how to formulate, implement, and monitor a marketing plan through a blend of lectures, case studies, and experiential simulations.

MKT X83. Acquisition, Consumption, and Disposition Behavior.

The acquisition, consumption, and disposition of goods, services, time, and ideas by individuals, families, and organizations, examined from a managerial viewpoint.

MKT X84. Marketing Research Methodology.

An applied approach to advanced marketing research, covering both the design and execution of marketing research projects and the management of the marketing research function.

MKT X86. Advanced Marketing Management.

Major marketing concepts and variables, their interrelationships, and their implications for policymaking, problem solving, and strategy formulation.

MKT X88. Marketing Micro-topics.

Focuses on contemporary, in-demand marketing topics to help develop the foundational knowledge, hands-on experience, and skills for today's marketing ecosystem.

MKT X88.1. Business Development Marketing Sales Leadership.

MKT X88.2. Data Storytelling and Visualization.

MKT X88.3. Leveraging New Media Channels.

Analyze the most important trends shaping media worldwide, ranging from the emergence of content creators to how people consume content to why generative search engines have an important place next to search engine optimization, such as GEO and SEO. Examine media models that are utilized by the public and private sector and explore how the current marketing offering will evolve in the next three to five years.

MKT X88.4. SQL for Business and Marketing.

MKT X91S. Independent Study.

MKT X97. Seminar: Current Topics in Marketing.

Survey and analysis of current marketing problems; their significance, evaluation, and probable outcome.

MKT X97.10. Marketing Models II.

Introduces state-of-the-art theoretical and empirical marketing models using deductive mathematical analysis and inductive statistical reasoning. Create novel quantitative marketing models and estimation methods and critically evaluate the models in the literature of quantitative marketing.

MKT X97.11. Causal Inference.

Examine empirical methods for causal inference with observational data.

MKT X97.2. Marketing Management and Strategy.

Examination from the marketing perspective of the process of strategy development and implementation at various levels of the organization: corporate, strategic business unit, and product line/brand.

MKT X97.3. Buyer Behavior.

Theoretical examination of the acquisition and consumption of goods, services, time, and ideas by individuals and groups.

MKT X97.4. Marketing Research Methods.

Advanced statistical procedures and analytical methods for data analysis; reliability and validity of data.

MKT X97.5. Research Topics in Marketing.

Current research issues, methods, and models in marketing; focus on both theory and methodology.

MKT X97.6. Advanced Research Methods in Marketing.

New methodological developments and research procedures; selected topics.

MKT X97.7. Marketing Models.

Analytical techniques and models developed by management scientists to aid marketing-oriented decisions in contexts such as marketing mix management, new product development, and product adoptions.

MKT X97.9. Behavioral Decision Research.

MKT X98. Thesis.

MKT X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

MKT X99W. Dissertation.

Professional Courses

MLS - Medical Laboratory Science

Medical Laboratory Science: MLS

Lower-Division Courses

MLS X01D. Practicum in Medical Laboratory Science.

Students participate in a twelve- to sixteen-month off-campus education program.

MLS X19S. Topics in Medical Laboratory Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Molecular Biosciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

MLS X29S. Topics in Medical Laboratory Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Molecular Biosciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MLS X55M. Topics in Medical Laboratory Science.

MLS X56M. Medical Laboratory Science Clinical Education Practicum.

Graduate Courses

Professional Courses

MNS - Marine Science

Marine Science: MNS

Lower-Division Courses

MNS X01. Seminar in Marine Science.
Overview of the depth and breadth of marine and freshwater science. Introduction to research opportunities at the university.

MNS X07. Introduction to Oceanography.
Introduction to the sciences of oceanography: geological, physical, and biological.

MNS X08. Humans and a Changing Ocean.
The consequences of human-induced alteration of the marine environment including the impact on fisheries, marine mammals, food-web changes, and changes in species composition and ecological function will be explored. Designed for non-science majors.

MNS X09. Topics in Marine Science.
Selected topics in marine science, including marine biology, marine chemistry, and physical oceanography.

MNS X10. Fundamentals of Marine Science.
Designed for students pursuing a degree option in Marine and Freshwater Science. In-depth introduction to physical, chemical, geological, and biological processes in marine systems.

MNS X19S. Topics in Marine Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Marine Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MNS X80. Research in Marine Science.

MNS X88. Marine Research Training Cruise.
Shipboard training in marine research through participation in research projects and completion of report.

Upper-Division Courses

MNS X20. Marine Ecology.
Study of ecological processes at different levels of integration in marine ecosystems.

MNS X20L. Laboratory Studies in Marine Ecology.
A laboratory course with two weekend field trips to the Marine Science Institute at Port Aransas to perform ecological studies in the Texas coastal zone.

MNS X29S. Topics in Marine Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Marine Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MNS X40. Limnology and Oceanography.
An introduction to the study of the interactions between aquatic organisms and their environments.

MNS X44K. Marine Mining and Minerals.
Overview of seafloor mineral deposits, their exploration, and mining.

MNS X48. Topics in Training Cruise(s).

MNS X48.1. Training Cruise(s): Research in Biological Oceanography.
One or more cruises of one to several days each to collect physical, chemical, oceanographic, and biological data relevant to biological processes in the sea. Preparatory instruction and post-cruise sample processing and analysis.

MNS X48.2. Marine Geology and Geophysics Field Course.
Hands-on, team-based instruction in the collection and processing of marine geological and geophysical data along the Gulf of Mexico coast.

MNS X52. Topics in Principles of Marine Science.
Lectures, laboratory, and fieldwork.

MNS X52.12. Adaptive Physiology of Marine Organisms.
Selected topics in the comparative physiology of marine organisms and their environmental adaptations.

MNS X52.13. Microclimatology.
Physical and thermal characteristics of the atmospheric surface layer, with particular reference to coastal environments.

MNS X52.16. Ocean Engineering.
Description of ocean waves and tides, methods of wave forecasting, classroom and field exercises.

MNS X52.18. Marine Atmospheric Chemistry.
Atmospheric particle chemistry; sea-surface films, atmospheric organic matter; air-sea chemical fractionation; carbon, nitrogen, sulfur cycles.

MNS X52.20. General Marine Phycology.
Survey of benthic algae and phytoplankton of the Texas coast; systematics, morphology, life history and culturing techniques.

MNS X52.21. Ecology of Marine Fungi.
Biology of the fungi with emphasis on ecological, morphological, and developmental aspects and culturing techniques.

MNS X52.22. Oceanography.
Consideration of current understanding of the chemistry and biology of the oceans.

MNS X52.9. Endocrinology.
Endocrinology, with special reference to lower vertebrates and evolution of control systems.

MNS X52C. Estuarine Ecology.
Explores general ecological principles of estuarine environments in Texas including physiography, hydrography, and plant and animal community structure and productivity.

MNS X52D. Marine Botany.
Exploration of the marine algae and seagrasses of the south Texas coast, with emphasis on their taxonomy, physiology, and ecology; may include field trips to representative coastal habitats.

MNS X52E. Marine Conservation Biology.
Explores how human activities influence the natural functioning and diversity of marine ecosystems and examines conservation efforts aimed to promote the sustainability of coastal habitats; may include several field excursions to local/regional marine ecosystems including sensitive coastal marshes and seagrass communities. Encourages the development of creative and critical thinking skills through numerous classroom activities focused on developing holistic understandings of marine ecosystems and the complexities of conservation science.

MNS X52L. Topics in Principles of Marine Science: Laboratory Studies.
A laboratory course with one-day field trips (which may include weekends) to local estuarine and coastal habitats. Includes pre- and post-field trip laboratory hours.

MNS X52M. Marine Community Ecology.
Explore the assembly and functioning of marine communities. Examine both traditional and newly-emerging techniques to study marine communities, from visual censuses to molecular approaches.

MNS X52R. Marine Science Research and Reporting.
Reviews the planning, conduct, and communication of marine science research, including hypothesis generation, experimental design, data analysis, and scientific writing and presentation.

MNS X52S. Topics in Principles of Marine Science: Undergraduate Seminar.
Guest lectures by local and visiting research scientists on a variety of topics in marine and environmental science. Each seminar is followed by a separate one-hour discussion to give students an opportunity to meet directly with the scientist.

MNS X52T. Principles of Marine Science: Special Topics.
Advanced research topics in marine science relevant to critical habitats, organisms, or processes.

MNS X53. Topics in Marine Science.

MNS X53.14. Marine Isotope Geochemistry.
The use of isotopes (stable, radiogenic, uranium series, and anthropogenic) in the study of marine science.

MNS X53.15. Interdisciplinary Classroom Field Methods.
Uses the interdisciplinary nature of marine science to focus on inquiry-based instruction, constructivist-oriented teaching strategies, and field explorations.

MNS X53.17. Marine Fish Physiology.
Physiology of major organ systems of marine fishes, with emphasis on adaptations to marine environments. Includes osmoregulation, nutrition, circulation, excretion, reproduction, sensory physiology, and endocrine control.

MNS X53.2. Fish Adaptations to Coastal Ecosystems.
Quantitative ecological comparisons of zoogeographical abundance and distribution with population, metabolic, and growth parameters.

MNS X53.4. Current Research.
Research instruction/participation in marine science. Laboratory and field activity with emphasis on faculty contact.

MNS X53.5. Seafloor Mining.
Study of seafloor mineral resources, including problems and policies related to exploration, mining, environmental concerns, assessment, and industrial development.

MNS X53.6. Marine Ecology.
Independent study in marine ecology, literature research, and comprehensive writing. Report required.

MNS X53.7. Marine Sedimentology.
Selected topics and problems concerning the depositional processes, controls, and distribution of marine sediments.

MNS X53.8. Marine Chemistry.
Study of the processes controlling the chemistry of natural waters, the oceans as a chemical system, and the impact of human activities on these systems.

MNS X54. Marine Invertebrates.
Study of invertebrate taxonomy, structure, behavior, and ecology; may include field sampling and laboratory studies of invertebrate habitats of the Texas coast.

MNS X54C. Biology of Fishes.
Anatomy, physiology, behavior, life history, taxonomy, and distribution of fishes; may include field sampling and laboratory studies of the coastal biota.

MNS X54E. Aquatic Microbiology.
Ecology, physiology, distribution, and growth of heterotrophic and autotrophic bacteria and fungi in waters and sediments.

MNS X54F. Marine Geology.
Survey of the origin, structure, stratigraphy, and sedimentology of marine basins and continental margins.

MNS X54J. Marine Chemistry.
Introduction to marine and environmental chemistry, including the distribution of elements in seawater, the geochemical and oceanographic processes controlling and affected by these distributions, and the effects of human activities on marine chemical processes.

MNS X54Q. Marine Environmental Science.
Application of the principles of marine science to the study of environmental issues: toxicology, biogeochemical cycles, and the biological and ecological impacts of zenobiotic materials in the coastal zone.

MNS X54T. Biological Oceanography.
Introduction to the organisms in the sea, their adaptations to the environment, and the factors that control their distribution and abundance; may include laboratory and field work with organisms found in the coastal waters of Texas.

MNS X54U. Biology of Sharks, Skates, and Rays.
Ecology, anatomy, and physiology of elasmobranch fishes.

MNS X55. Microplastics in Coastal Environments.
Examine microplastics in coastal environments. Discuss plastics, including composition and production of plastic polymers and additives, as well as environmental processes that affect the fate of plastics in waters, such as biodegradation and photooxidation.

MNS X55C. Physiology of Fishes.
Physiology of major organ systems of both marine and freshwater fishes.

MNS X55E. Marine Fisheries Ecology.
Explore a broad understanding of fish and fisheries science. Examine fundamental information on fish biology and ecology pertaining to diet, growth, and reproduction with fisheries' specific information that includes historical perspectives, methodology, and overall management strategies.

MNS X56. Ecosystem Oceanography.
An exploration of interconnections within and among marine ecosystems, as well as their linkages to climate, human activity, and adjacent freshwater and terrestrial environments. Emphasis will be placed on Gulf of Mexico ecosystems; may include hands-on field and laboratory activities.

MNS X57. Marine Phytoplankton Diversity.
The taxonomy of the major phytoplankton groups, their physiology, and their role in marine ecosystem; may include field and/or laboratory hours.

MNS X58. Marine Geoecology.
Discuss how life has become a primary driver of conditions in the Earth's geosphere, hydrosphere, and atmosphere, and explore the biological inventions with the most revolutionary impact on the planet as we know it today. Examine concepts from the fields of geology, chemistry, microbiology, and macroecology.

MNS X67K. Human Exploration and Exploitation of the Sea.
Review of the history of ocean exploration including major oceanographic expeditions. Discussion of current topics in ocean exploration and exploitation of marine resources, the impact of resource exploitation on biological systems, and the development of marine policy. An oral presentation is required.

MNS X70. Special Studies in Marine Science.
Supervised individual instruction and research in marine science field and laboratory techniques.

MNS X80. Research in Marine Science.

MNS X88. Marine Research Training Cruise.
Shipboard training in marine research through participation in research projects and completion of report.

Graduate Courses

MNS X80. Research in Marine Science.

MNS X81C. Marine Ecosystem Dynamics.
Interactions between organisms and the physical processes that regulate productivity and distribution of marine life in oceanic and coastal ecosystems.

MNS X82. Topics in Principles of Marine Science.

MNS X82.14. Biology of Seagrasses.
Analyses of plant and animal characteristics of seagrass ecosystems, including biomass, reciprocal salinity transplants, productivity.

MNS X82.6. Marine Ichthyology.
Systematics of fishes, including major classifications, comparative anatomy, embryology, and general distribution.

MNS X82.9. Endocrinology.
Endocrinology, with special reference to lower vertebrates and the evolution of control systems.

MNS X82C. Marine Biogeochemistry.
Study of chemical, biological, geological, and physical processes that influence cycling of bioactive elements in marine waters and sediments.

MNS X83C. Adaptations to the Marine Environment.
The physiological basis for organismal and population-level responses to marine environments.

MNS X84C. Benthic Ecology.
Interactions among organisms, sediments, and physical processes of estuarine and oceanic bottoms.

MNS X84E. Marine Microbial Ecology.
Metabolism of photosynthetic and chemosynthetic microorganisms in the sea.

MNS X84F. Marine Geology.
Development of ocean basins; marine and coastal depositional environments, processes, and sedimentary parameters; marine field techniques.

MNS X84J. Marine Ecology.

MNS X84K. Ecology of Fishes.
Organismal, population, and community ecology of marine and freshwater fishes.

MNS X84L. Marine Chemistry.
Chemical processes in the sea.

MNS X84T. Biological Oceanographic Processes.
An advanced course in biological processes in oceanic and coastal waters, with emphasis on empirical and theoretical concepts of marine ecosystem dynamics, primary and secondary production, and detrital cycling.

MNS X84U. Reproductive Physiology of Fishes.
Endocrine and environmental control of reproductive cycles in teleost fishes.

MNS X85E. Marine Macrophytes.
A lecture, laboratory, and field course that examines the systematics, ecology, and productivity of marine macroalgae and seagrasses, strategies and seasonal patterns of growth, photosynthesis, and carbon metabolism in relation to in situ light environments.

MNS X85F. Environmental Modeling.
Introductory course in modeling, with emphasis on the models used in ecology, oceanography, and earth sciences.

MNS X86. Phytoplankton Ecology.
The interactions of physiology, morphology, and behavior of microalgae with physical, chemical, and biological features of the environment as related to the distribution of marine phytoplankton.

MNS X87. Pelagic Ecosystems.
Advanced study of processes affecting the distribution and abundance of marine planktonic and nektonic organisms, primary and secondary production in marine pelagic environments, and food web interactions in the pelagia.

MNS X88. Marine Research Training Cruise.
Shipboard training in marine research through participation in research projects and completion of report.

MNS X91. Topics in Marine Science: Seminar.
Recent advances in the marine sciences, discussed by students, faculty and staff members, and guest lecturers. Topics to be announced.

MNS X93. Topics in Marine Science.
Lecture, laboratory, and fieldwork.

MNS X93.1. Biogeochemistry of Carbon.
Production, distribution, composition, and preservation of organic matter in the sea.

MNS X93.10. Zooplankton Ecology.
Advanced study of the morphological, physiological, and behavioral adaptations of zooplankton to their environment.

MNS X93.11. Coastal Watersheds.
Covers water use, land use and land cover change, and climate change as they relate to biological, physical, and geochemical processes in watersheds. Includes the impact of changing watershed export on coastal ocean ecosystems. Emphasizes case studies on different regions of the United States.

MNS X93.2. Isotope Ecology.
Consideration of the stable hydrogen, carbon, nitrogen, and sulfur stable isotope ratio variations in ecological settings, including chemical fundamentals; current literature on food-webs and source studies.

MNS X93.3. Benthic Plants and Animals.
Interactions among organisms, sediments, and physical processes of estuarine systems, including the factors that regulate primary and secondary productivity.

MNS X93.4. Methods in Marine Science.
Introduction through laboratory and field work to the methods of marine science and oceanographic research. Topics include small boat handling and safety; field collection of physical, chemical, and biological data; and laboratory analysis of seawater chemistry and marine organisms.

MNS X93.5. Global Change.
Study of natural and anthropogenically mediated changes in the earth's climate and biogeochemical cycles.

MNS X93.6. Larval Fish Ecology.
The ecology of marine fish larvae in relation to fisheries oceanography and aquaculture.

MNS X93.7. Marine Botany.
Introduction through lectures and field work to the diversity and importance of marine vegetation of the South Texas coast. Includes the evolution, taxonomy, ecology, physiology, and trophic importance of marine vegetation.

MNS X93.8. Marine Isotope Geochemistry.
The use of isotopes (stable, radiogenic, uranium series, and anthropogenic) in the study of marine science.

MNS X93.9. Molecular Methods in Marine Science.
Introduction to the principles and methods of molecular biology and the application of molecular techniques to research in marine science.

MNS X98. Thesis.

MNS X98T. Supervised Teaching in Marine Science.

MNS X99W. Dissertation.

Professional Courses

MNS X80. Research in Marine Science.

MNS X88. Marine Research Training Cruise.
Shipboard training in marine research through participation in research projects and completion of report.

MOL - Molecular Biology

Molecular Biology: MOL

Lower-Division Courses

MOL X92. Research Problems.

Upper-Division Courses

MOL X92. Research Problems.

Graduate Courses

MOL X80. Advanced Readings in Molecular Biology.
Individual instruction in the literature of molecular biology.

MOL X80M. Dual MD/PhD Program with UT Medical Branch.
Preclinical medical study at the University of Texas Medical Branch at Galveston.

MOL X81K. Cellular and Molecular Bases of Neural Development.
Introduction to the principles by which the neural tube (brain and spinal cord) forms during embryonic development. Discuss the cellular and molecular mechanisms underlying the formation of a three-dimensional neural tube and its division into forebrain, midbrain, hindbrain, and spinal cord.

MOL X82E. Epigenetics.
Examine how epigenetic modifications are covalent modifications of DNA or histones that cause changes in gene expression and how epigenetic modifications appear to be a method through which nurture or the environment can influence nature. Focus on how experience

or environmental factors epigenetically modify health or behavior of animals.

MOL X83K. Developmental, Stem Cell, and Regenerative Biology.
Explore the principles and mechanisms of embryonic development and the processes guiding stem cell differentiation and tissue repair.

MOL X84K. Topics in Advanced Molecular Biology.
Examine molecular biology topics in-depth.

MOL X84K.1. Integrative Omics in the Evolution of Development and Behavior.
Discuss the conceptual foundations and historical roots of research programs in evo-devo and evolutionary neuroscience including recent discoveries and limitations in these fields. Explore how -omics approaches and comparative methods enable novel insights into the diversification, convergence, and constraint of complex traits.

MOL X86. Topics in Problems and Methods in the Life Sciences.
Examine the questions addressed in modern life sciences research and the experimental methods used. Focus on experimental reasoning and on the application of different techniques to solve problems.

MOL X88M. Plant Molecular Biology.
Examine the fundamentals of plant molecular biology, including structure and expression of the chloroplast and mitochondrial genomes.

MOL X90C. Topics in Molecular Biology: Seminar.
Lectures and discussions on current topics in molecular biology.

MOL X90C.1. Seminar in Molecular Biology I.
Students read, present, and discuss current research papers based on speakers for the Institute for Cellular and Molecular Biology weekly seminar series. Students also will present short talks on their the research from one of their laboratory rotations.

MOL X90C.2. Seminar in Molecular Biology II.
Students write a mock grant proposal with their principle investigator and present a practice part one preliminary exam talk based on the proposal.

MOL X90C.3. Seminar in Molecular Biology III.
Students present a detailed seminar on their thesis research.

MOL X91. Grant Writing and Presentation Skills.
Designed for second-year doctoral students. Prepare a detailed proposal of the dissertation research goals of each student with a presentation in the form of a short talk. Focus on critical evaluation of research aims, methodology, and communication skills.

MOL X91P. Advanced Virology.
Explore the replication of and transformation by DNA and RNA animal viruses.

MOL X92. Research Problems.

MOL X94L. Immunology.
Introduction to the immune system for graduate students without prior coursework in immunology. Discuss innate immunity, the molecular basis of T cell and B cell antigen recognition, hematopoiesis and the development of lymphocytes, and cellular and humoral immune responses. Touch on immunodeficiency, autoimmunity, immunotherapy and vaccination. Explore current primary literature on select immunological topics in greater depth.

MOL X94M. Genomics.
Examine genome structure, organization, and function of model organisms; theory and methodology of genetic and physical mapping; sequencing analysis and annotation; genome duplication and evolution; and ethics for biotechnology and cloning.

MOL X95. Molecular Biology Conference Course.

MOL X95F. Genetics.
Basic principles of Mendelian and molecular genetics, and an exploration of the genetic toolbox using examples of analytic methods and modern manipulations. Focus on the genetic analysis of model organisms. Use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems.

MOL X95G. Structure and Function of Proteins and Membranes.
Explore advanced biochemistry concepts and the scientific process. Examine a detailed consideration of the structure and function of proteins, carbohydrates, lipids and nucleic acids, as well as discussion of enzyme mechanisms and kinetics.

MOL X95H. Cell Biology.
Detailed consideration of mechanisms of growth control, cell cycle regulation, mitosis, cell signaling, protein targeting, and the integration of these processes.

MOL X95I. Advanced Biochemistry.
Explore advanced biochemistry concepts and the scientific process. Consider the structure and function of proteins, carbohydrates, lipids and nucleic acids, and discuss enzyme mechanisms and kinetics.

MOL X95J. Genes, Genomes, and Gene Expression.
Detailed consideration of prokaryotic and eukaryotic mechanisms of DNA replication and transcription; posttranscriptional processing of transcription products; and mechanism and regulation of the translation of messenger RNAs.

MOL X95L. Laboratory Studies in Molecular Biology.
Explore modern molecular biology with a research project focus in a laboratory setting. Use methods such as eukaryotic RNA purification, quantitative PCR, CRISPR or site-directed mutagenesis cloning, cell fractionation, protein purification and Western blotting detection toward experimental goals.

MOL X98. Thesis.

MOL X98T. Supervised Teaching in Molecular Biology.
Teaching under close supervision of the instructor; weekly laboratory instruction of undergraduates, group meetings with the instructor, individual consultations, and reports throughout the teaching period.

MOL X99W. Dissertation.

Professional Courses

MOL X92. Research Problems.

MSE - Materials Science and Engineering

Materials Science and Engineering: MSE

Lower-Division Courses

MSE X97R. Research.

Upper-Division Courses

MSE X60M. Experiments in Materials Science and Engineering.
Hands-on lab-based course designed to teach practical techniques in the synthesis and characterization of materials and their properties, and to use experiments to explore fundamental and potentially abstract materials concepts.

MSE X97R. Research.

Graduate Courses

MSE X86P. Topics in Materials Science: Fundamentals.

MSE X86P.1. Introduction to Phase Transformations.
Basics of crystal structures and phase diagrams; diffusion; solidification; solid-state phase transformations.

MSE X86P.2. Mechanical Behavior of Materials.
Elastic deformation; viscoelasticity; yielding, plastic flow, plastic instability; strengthening mechanisms; fracture, fatigue, creep; significance of mechanical properties tests. Microstructural mechanisms and macroscopic behavior of metals, polymers, ceramics, and composites.

MSE X86P.3. Introduction to Thermodynamics of Materials.
Thermodynamic properties; reactions and chemical equilibrium in gases; solutions, phase equilibria, phase diagrams, reaction equilibria; surfaces and interfaces; point defects in crystals.

MSE X86P.4. Introduction to Solid-State Properties of Materials.
Introduction to the electronic, magnetic, and optical properties of materials. Solid-state properties of metals, semiconductors, and ceramics; fundamental concepts needed for the description of these properties, using an introductory-level description of the electronic structure of solids.
MSE X86P.5. Structure of Materials.
Essential crystallography of lattices and structures; symmetry; elements of diffraction and reciprocal lattices; point, line, and surface defects in crystals; crystalline interfaces; noncrystalline materials; polymers; glasses.
MSE X89. Topics in Materials Science and Engineering.
MSE X97. Graduate Seminar.
Presentation of research topics by invited speakers, faculty, and students.
MSE X97R. Research.
MSE X98. Thesis.
MSE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
MSE X99W. Dissertation.
Research leading to the Doctor of Philosophy in materials science and engineering.

Professional Courses

MSE X97R. Research.

MUS - Music

Music: MUS

Lower-Division Courses

MUS X01F. PIANO FOR TEACHERS.
MUS X01J. Beginning Class Piano for Nonmusic Majors.
MUS X01K. Second-Semester Class Piano for Nonmusic Majors.
MUS X01M. Beginning Music Performance: Class Piano.
MUS X01N. Beginning Music Performance: Second-Semester Class Piano.
Continuation of Music 201M.
MUS X01Q. Beginning Guitar Class.
Class instruction in beginning guitar performance for non-music majors or music majors studying a secondary instrument.
MUS X01S. Beginning Music Performance: Class Harp.
MUS X01T. Beginning Music Performance: Second-Semester Class Harp.
MUS X01V. Beginning Violin Class.
Class instruction in beginning violin performance for non-music majors or music majors studying a secondary instrument.
MUS X02L. An Introduction to Western Music.
Introduction to musical styles in the Euro-American art music tradition between the Middle Ages and the present day. Designed to foster critical listening and thinking about music, and deepen understanding of the vital role that music has played and continues to play in society and in individual lives.
MUS X02P. Introductory Topics in Western Music.
MUS X03C. Fundamentals of Music: Classroom Instruments.
Explores how music intelligently combines reading, analysis, discussion, composition, and active involvement in music making. Through analysis, performance, and practice of the pedagogy of music for children, explores the roles of music in human culture and examine music's contributions to human communication, creative expression, and well-being.
MUS X03D. Fundamentals of Music: Guitar.
Explores how music intelligently combines reading, analysis, discussion, composition, and active involvement in music making. Through analysis, performance, and discussion of the guitar in the folk and popular music of Western and non-Western cultures, explores music's contributions to human communication, creative expression, and well-being.
MUS X03E. Fundamentals of Music: Piano.
Explores how music intelligently combines reading, analysis, discussion, composition, and active involvement in music making. Through analysis, performance, and discussion of the piano in the folk and popular music of Western and non-Western cultures, explores music's contributions to human communication, creative expression, and well-being.
MUS X03M. Introduction to Music in World Cultures.
Exploration of practices, beliefs, and issues through the study of various musical genres in the regions of Asia, the Middle East, Africa, the Pacific, Europe, and the Americas.
MUS X03N. Introduction to Popular Music in World Cultures.
Exploration of practices, beliefs, and issues through the study of various mass-mediated and commercial musical genres in the regions of Asia, the Middle East, Africa, the Pacific, Europe, and the Americas.
MUS X03P. Topics in Music of World Cultures.
MUS X05. Musicianship.
Study of the fundamentals of music for music majors through tonal harmony, ear training, sight-singing, keyboard drill, analysis, and composition of music.
MUS X06M. Elements of Music.
Fundamentals of music including the study of notation and the elements of rhythm, melody, and harmony; development of elementary aural skills; and writing of simple compositions.
MUS X07. Topics in Popular Music.
Studies of the popular music of a selected culture or geographical area.
MUS X07.1. Music of African Americans.
Introduction to the variety of modes of expression of African American culture in music and other related genres.
MUS X07.2. History of Rock Music.
MUS X07.3. Jazz Appreciation.
MUS X07P. String Education: Teaching and Learning.
Discussion of curriculum planning, lesson observation, and program management topics, as well as guest pedagogues and master teacher presentations.
MUS X10C. Introduction to Music Education.
Introduction to the practice of music teaching and learning.
MUS X10J. Beginning Instruction in Music Performance: Third-Semester Class Piano.
Continuation of Music 201N.
MUS X10K. Beginning Instruction in Music Performance: Fourth-Semester Class Piano.
Continuation of Music 210J.
MUS X11. Ear Training and Sight-Singing.
Material drawn from all musical styles.
MUS X11E. English Diction and Phonetic Translation.
Study of English diction and phonetic translation specifically for musicians. Emphasis on the International Phonetic Alphabet.
MUS X11F. French for Musicians.
French language and diction specifically for musicians.
MUS X11G. German for Musicians.
German language and diction specifically for musicians.
MUS X11J. Italian for Musicians.
Italian language and diction specifically for musicians.
MUS X12. Structure of Tonal Music.
Elements of tonal harmony and form; tonal analysis.
MUS X12C. Music and Culture.
Issues in the performance, transmission, and reception of music in Western Europe and North America in global and comparative social and political contexts.
MUS X13M. History of Music I.
The history of music from the beginning of notation to the eighteenth century.

MUS X13N. History of Music II.
The history of music from the eighteenth century to the early twentieth century.

MUS X14C. Beginning Composition.
Introduction to contemporary composition through the analysis and writing of short studies and through supervised original projects.

MUS X15D. String Instrument Fundamentals.
Beginning instruction in string instrument performance and pedagogy. This course is offered in the following instruments: double bass, viola, violin, and violoncello.

MUS X15E. Brass Instrument Fundamentals.
Beginning instruction in brass instrument performance and pedagogy. This course is offered in the following instruments: euphonium, French horn, trombone, trumpet, and tuba.

MUS X15F. Woodwind Instrument Fundamentals.
Beginning instruction in woodwind instrument performance and pedagogy. This course is offered in the following instruments: bassoon, clarinet, flute, oboe, and saxophone.

MUS X15G. Guitar Fundamentals.
Beginning instruction in guitar performance and pedagogy.

MUS X15T. Lower-Division Reed Making.

MUS X18J. Beginning Jazz Improvisation.
Study of basic jazz improvisational skills through performance of standard literature.

MUS X19D. Foundations of Digital Sound and Music.
Introduction to the practice of creating music with computer technologies and the basic techniques of recording, editing and producing digital audio tracks, including introduction to musical acoustics and psychoacoustics, fundamentals of audio recording, editing, mixing, and processing, MIDI, digital audio workstations, and syncing sound to video.

MUS X19S. Topics in Music.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Music. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

MUS X64L. Advanced Ear Training.
Further development of techniques taught in Music 411, with emphasis on aural recognition of larger musical forms and of music of contemporary style.

MUS X76C. Special Topics in Music Performance.

MUS X76G. Special Topics in Music Literature.

MUS X76M. Special Topics in Music Studies.

MUS X94. Directed Reading.
Readings in the literature of music.

Upper-Division Courses

MUS X20J. Junior Jazz Recital.
Preparation and performance of a public recital in the major jazz instrument.

MUS X20P. Practicum in a World Music Tradition.
Advanced training on a non-Western musical instrument such as Javanese gender barung, Indian sitar, Arabic qanun, or Korean kayakeum, or advanced training in a non-Western vocal style, and other approved musical practices.

MUS X20R. Junior Recital.
Preparation and performance of a public recital in the major instrument.

MUS X21J. Twentieth-Century Musical Analysis.
Introduction to the theory and practice of music since 1900. Includes various analytical approaches to the wide range of musical styles developed over the course of the twentieth- and twenty-first centuries, as well as the music of mainstream twentieth century composers and living composers. Both analytical and aural skills are emphasized.

MUS X22J. Instrumental Conducting.
Includes rudimentary use of baton, regular and irregular beat patterns, subdivisions and beat pattern variations as applied to simple instrumental literature, and practical experience in conducting instrumental groups.

MUS X22K. Instrumental Conducting.
Continuation of Music 222J. Further technical study in irregular meters, polyrhythmic and polymetrical patterns and scores; emphasis on expressive gestures, phrasal and compound beat conducting.

MUS X23. Jazz Improvisation I.
Study and practice jazz improvisation and the harmonic, rhythmic, melodic and aural skills associated with the art form.

MUS X23J. Choral Conducting.
Includes regular and irregular beat patterns, subdivisions and beat pattern variations as applied to simple choral literature, and practical experience in conducting vocal groups.

MUS X23K. Choral Conducting.
Continuation of Music 223J. Further technical study in irregular meters, polyrhythmic and polymetrical patterns and scores; emphasis on expressive gestures, phrasal and compound beat conducting.

MUS X24. Jazz Improvisation II.
Examine advanced harmonic, rhythmic, melodic, and aural concepts.

MUS X24G. Intermediate Composition.

MUS X24L. Advanced Composition.

MUS X25L. Counterpoint.
Development of contrapuntal skill in sixteenth-century style and in related late-twentieth-century styles; the teaching of counterpoint, including Fuxian species.

MUS X25M. Counterpoint.
Analysis of eighteenth-century inventions, fugues, and passacaglias; development of contrapuntal skills in twentieth-century styles that draw on these historical models; the teaching of counterpoint.

MUS X26G. Orchestration and Arranging.
Techniques of instrumentation, arranging, and orchestration for band, orchestra, and chamber ensembles.

MUS X26J. Orchestration and Instrumentation.
Study of the characteristics of individual instruments; writing for various combinations; study of scores of different periods; listening to recordings and live performances.

MUS X26K. Orchestration and Instrumentation.
Continuation of Music 226J.

MUS X26N. Choral Arranging.
Techniques of voicing and arranging for choirs, vocal ensembles, and vocal chamber groups.

MUS X28C. Jazz Harmony in Practice I.
Study the harmonic language standardized in jazz and popular American music.

MUS X28D. Jazz Harmony in Practice II.
Explore the harmonic motion of jazz, ear training, and harmonic embellishment.

MUS X28P. Jazz Composition.
Experience the creative process of composition, involving the melodic, harmonic, and rhythmic components of various jazz styles.

MUS X29E. Introduction to Electronic Media.
Introduction to the fundamentals of recording, tape editing, and electronic music synthesis.

MUS X29F. Projects in Electronic Media.
Continuation of Music 329E for nontheory and noncomposition majors.

MUS X29G. Intermediate Electronic Composition.
Continuation of Music 329E for music theory or composition majors.

MUS X29J. Introduction to Computer Music.
An introduction to the basic concepts of digital music synthesis and signal processing.

MUS X29M. Intermediate Computer Music.
Continuation of Music 329J.

MUS X30L. History of Music III.
The history of music from the early twentieth century to the present.
MUS X31J. Advanced Topics in Music Theory.
MUS X34. Topics in The Music of the Americas.
Studies of both indigenous and borrowed traditions in the popular, folk, and art music of the Americas from the colonial period to the present.
MUS X34.1. Music of Mexico and the Caribbean.
Introduction to the history of Mexican and Caribbean traditional and commercial music, with some discussion of classical music as well. Attention will be given to music of indigenous, African, European, and mixed origin. Mexico and the Spanish-speaking Caribbean receive special attention. Class meetings will be divided into lecture/discussion segments, videos, listening, and performance instruction/demonstration.
MUS X34.2. Music of Latin America.
Consider Latin American music within a broad cultural and historical framework. Latin American musical practices are explored illustrating the many ways that aesthetics and society are embodied in and negotiated through performance. Concepts include diaspora, colonialism, mestizaje, hybridity, migration and globalization.
MUS X34.3. Music of Brazil and Argentina.
An introduction to Brazilian and Argentine music from samba, capoeira, and forro to tango, cumbia villera, and chacarera; examines such music making within its various historical, social, and political contexts. Uses course readings, lectures, listening assignments, performance attendance, and movie screenings to analyze themes including nationalism and ethnicity, globalization and development, and democracy and social justice.
MUS X34.4. Music of the Andean Countries.
Introduction to the music of Andean countries including Colombia, Ecuador, Peru, Bolivia, and Chile. Explores the role music plays in shaping historical and modern Andean societies, as well as how music comments upon national culture, society, and politics, with particular attention to the ways in which musicians and musical movements continue to influence Andean societies. Subjects include pre-Columbian and colonial music making; music representative of the tripartite indigenous, African, and Iberian heritage of Andean countries; aesthetics, identity, and musical expression; ritual, religion, and the politics of musical performance.
MUS X34.5. The Music of the African Diaspora.
The musical legacy of the African slave trade in the Americas, the social contexts in which black musical forms have developed, and their varied forms. Subjects include the shifting meanings of "black music" in various contexts; the notion of hybridity; the uses of African influenced music as a political or oppositional tool; and African ethnic groups represented prominently in the New World, the traditions they brought with them, and the ways they have been adapted to new ends.
MUS X34.6. History of Mariachi Music.
Explore historically, culturally and stylistically the chronological development of the modern mariachi, with close attention to historical and socio-cultural influences from indigenous, European and African people; nationalism and mass media; crossing borders and changing performance practices.
MUS X34.7. Music of Mexico and Borderlands.
Explore historically, culturally and stylistically the various regional styles of Mexican music and Mexican American music as it has developed along the southern border of the United States, with close attention to historical and socio-cultural influences from indigenous, European and African people; nationalism and mass media; stylistic change and mainstream acceptance.
MUS X34.8. Mexican Soundscapes.
Examine culturally and historically the music and sound cultures that exist in Mexico and in Mexican American communities in the United States. Explore the social, cultural, religious, and political currents that have impacted the development of the musical and aural cultures in Mexico and on the US-Mexico border, and how these currents have shaped conceptions of identity and cultural nationalism, using the concept of soundscape as the dominant framework. Engage with readings in popular culture, popular media (cinema and television), cultural theory, history and musicology.
MUS X37. Music and Film Sound.
History of music and the soundtrack; analysis of interactions between image and sound; and aesthetics and issues of production and postproduction.
MUS X38. Topics in Masterpieces of Music.
Study of the works of specific composers or of specific genres in the Western musical tradition.
MUS X42. Topics in Ethnomusicology Areas.
Studies of the musical traditions of selected cultures or geographical areas.
MUS X42.10. Romani Music and Representation.
MUS X42.11. Music of the Philippines.
MUS X42.3. Musics of India.
Explore the musical traditions of India, with emphasis on Hindustani and Carnatic musical styles, but including examination of other traditions.
MUS X42.5. Black Perspectives in Jazz.
Explores the social, cultural, political, and artistic relationships between jazz and the black experience, both within the African American context and throughout the diaspora.
MUS X42.6. Musics of East and Southeast Asia.
MUS X42.7. Introduction to the Music of the Middle East.
MUS X42.8. Music and Gender.
MUS X42.9. Introduction to Music of the Balkans.
MUS X43J. History of Jazz.
Survey of the history of jazz from its origins to the present.
MUS X46. Jazz Piano Techniques I.
Study basic skills in chord notation, chord interpretation and voicing, voice leading, and jazz piano styles.
MUS X46R. Music and Religious Identities in the US.
Examine religious music in Christianity and Judaism in relation to communities in religious context of Europe and the United States.
MUS X47. Jazz Piano Techniques II.
MUS X48. Studio Arranging I.
Study arranging for a variety of small group configurations, applying fundamental techniques, and scoring for large jazz ensemble.
MUS X49. Studio Arranging II.
Explore extended arrangements for large jazz ensemble and study of masterworks of the genre.
MUS X50S. Creating Music and Sound for Film, Video, and Games.
Designed to introduce students to concepts of music and sound for a variety of media with a primary focus on creating original music and/or soundtracks. Subjects include music structures, production and editing, film and video synchronization, game audio, and other sound for film related topics.
MUS X54. Musical Development of Children.
The processes of musical development in young children. Topics include music in multicultural contexts, music in the cognitive and social development of young children, and special issues concerning music and exceptional children.
MUS X54C. Children's Music Literature and Performance I.
Literature, materials, and music performance activities appropriate for young children.
MUS X54D. Children's Music Literature and Performance II.
Continuation of Music 354C.
MUS X54F. Music Performance, Listening, and Appreciation.
Techniques and materials for the development of skill in composition, arranging, performance, and aural discrimination; problems related to the adolescent voice.

MUS X54S. Game Development Capstone: Two-Dimensional Games.
Participation in an interdisciplinary team to gain a thorough understanding of the two-dimensional game development process, through modeling of the environment and practices that are used in game studios.

MUS X54T. Game Development Capstone: Three-Dimensional Games.
Participation in interdisciplinary teams to gain a thorough understanding of the three-dimensional game development process, through modeling of the environment and practices that are used in game studios.

MUS X55C. Techniques of Percussion Performance.
Percussion performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures.

MUS X55D. Techniques of String Performance.
String instrument performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures.

MUS X55E. Techniques of Brass Performance.
Brass instrument performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures.

MUS X55F. Techniques of Woodwind Performance.
Woodwind instrument performance techniques for individual and ensemble settings, including appropriate literature and rehearsal procedures.

MUS X55M. Marching Band Techniques.
Literature, materials, and techniques of the marching band.

MUS X55S. Vocal Techniques For Instrumentalists.
Explore vocal techniques for individual and instructional settings. Examine appropriate literature and rehearsal procedures.

MUS X55V. Techniques of Vocal Performance.
Technique of individual and ensemble singing practiced through the study of vocal literature.

MUS X56G. Choral Ensemble Literature and Performance.
Choral music literature; rehearsal and performance techniques for choirs and small ensembles.

MUS X56J. Instrumental Ensemble Literature and Performance.
Study of the literature and of performance and rehearsal techniques for heterogeneous instrumental ensembles.

MUS X59C. Chamber Music: Brass.

MUS X59E. Chamber Music: Percussion.

MUS X59J. Harp Repertoire.
Study and performance of the harp repertoire.

MUS X59L. Vocal Repertoire Coaching.

MUS X59N. Chamber Music: Strings and Piano.

MUS X59R. Chamber Music: Saxophone.

MUS X59T. Topics in Instrumental Technology.

MUS X59U. Chamber Music: Repertoire Before 1800.

MUS X59V. Chamber Music: Vocal.

MUS X59W. Chamber Music: Woodwinds.

MUS X60C. Senior Composition Recital.
Preparation and performance of a public recital of the student's original compositions.

MUS X60J. Senior Jazz Recital.
Preparation and performance of a public recital in the major jazz instrument.

MUS X60R. Senior Recital.
Preparation and performance of a public recital in the major instrument.

MUS X62C. Intermediate Instrumental Conducting.
Problems and interpretation of larger band and orchestral works; analytical study of musical form as it relates to conducting; a synthesis of musical understanding and expansion of comprehensive musicianship through conducting problems.

MUS X64L. Advanced Ear Training.
Further development of techniques taught in Music 411, with emphasis on aural recognition of larger musical forms and of music of contemporary style.

MUS X66P. Senior Piano Pedagogy Project.
Students complete a research paper on a piano pedagogy topic, such as methodology, skills development, or repertoire.

MUS X68L. Review of Music Theory.
An intensive review of the skills and concepts required for the study of music theory at the graduate level.

MUS X71P. Topics in Pedagogy.
Designed primarily for students planning teaching careers. Offered in piano, voice, and orchestral instruments. Methods include individual and class instruction through the use of music literature and the teaching repertoire. Practice teaching and laboratory for diagnostic and corrective methods are required.

MUS X71P.1. Pedagogy: Piano I.
Work with students in the Butler School of Music's Piano Project.

MUS X71P.2. Pedagogy: Piano II.
Work with students in the Butler School of Music's Piano Project.

MUS X71P.3. Pedagogy: Voice I.

MUS X71P.4. Pedagogy: Voice II.

MUS X71P.5. Pedagogy: Orchestral Instruments I.

MUS X71P.6. Pedagogy: Orchestral Instruments II.

MUS X75J. Twentieth-Century Music Techniques.
Review of techniques and methods for analyzing twentieth-century music.

MUS X75T. Teaching and Learning in Music.

MUS X76C. Special Topics in Music Performance.

MUS X76G. Special Topics in Music Literature.

MUS X76J. Special Topics in Music Theory.

MUS X76J.2. Performance, Analysis, and Interpretation.
Undergraduate music theory seminar applying theoretical and historical insights to performance and interpretation.

MUS X76M. Special Topics in Music Studies.

MUS X76R. Guitar Repertory.

MUS X76S. Bassoon Literature.

MUS X76T. Flute Literature.

MUS X76U. French Horn Literature.

MUS X76V. Oboe Literature.

MUS X78C. Independent Study: Music Performance.
Individual projects to be completed under faculty supervision.

MUS X78G. Independent Study: Music Literature.
Individual projects to be completed under faculty supervision.

MUS X78J. Independent Study: Music Theory.
Individual projects to be completed under faculty supervision.

MUS X78M. Independent Study: Music Studies.
Individual projects to be completed under faculty supervision.

MUS X79G. Capstone in Music.
Drawing from the chosen concentration for the Bachelor of Arts in Music, generate scholarly or creative work to enhance preparation for a post-baccalaureate education or career.

MUS X79K. Advanced Topics in Music Literature.
MUS X79K.1. Topics in Keyboard Literature.
MUS X79K.10. Topics in Mass and Motet.
MUS X79K.11. Topics in Choral Music.
MUS X79K.12. Topics in Cantata and Oratorio.
MUS X79K.13. Topics in Modern Music.
MUS X79K.14. Special Topics in the Western Musical Tradition.
MUS X79K.17. Band Literature.
MUS X79K.19. Sacred Chants.
MUS X79K.2. Piano Literature, Eighteenth Century to the Present.
MUS X79K.20. Historical Performance Practice Traditions.
MUS X79K.21. Global Music Cultures, 700-1400.
MUS X79K.22. Global Music Cultures, 1400-1650.
MUS X79K.24. Musicking and Disability.
MUS X79K.25. Popular Music.
MUS X79K.26. Afro-Modernisms in Black Popular Music.
MUS X79K.5. Topics in Instrumental Chamber Music.
MUS X79K.6. Topics in Symphonic Tradition.
MUS X79K.7. Topics in Instrumental Concerto.
MUS X79K.8. Topics in the Art Song.
MUS X79K.9. Topics in Opera and Music Drama.
MUS X79Q. Musical Acoustics.
Designed to help students develop the intuition and vocabulary for understanding the basic physical principles relevant to musical instruments and sound (e.g., mechanics, vibrations, acoustics, harmonics, acoustic-electronic conversions, speakers, hearing, perception, room acoustics) in order to be able to read basic articles on the subject of musical acoustics. Material is kept relevant to musical principles (e.g., performance techniques, scales/harmony) throughout.
MUS X94. Directed Reading.
Readings in the literature of music.

Graduate Courses

MUS X64L. Advanced Ear Training.
Further development of techniques taught in Music 411, with emphasis on aural recognition of larger musical forms and of music of contemporary style.
MUS X76C. Special Topics in Music Performance.
MUS X76G. Special Topics in Music Literature.
MUS X76M. Special Topics in Music Studies.
MUS X80. Advanced Topics in the History and Culture of Music.
Historical and cultural studies of the music of various periods or places.
MUS X80.1. Medieval.
MUS X80.11. Music of Mexico and the Caribbean.
Introduction to the history of Mexican and Caribbean traditional and commercial music, with some discussion of classical music as well. Explore music of indigenous, African, European, and mixed origin.
MUS X80.12. Music of Latin America.
Consider Latin American music within a broad cultural and historical framework. Latin American musical practices are explored illustrating the many ways that aesthetics and society are embodied in and negotiated through performance. Concepts include diaspora, colonialism, mestizaje, hybridity, migration and globalization.
MUS X80.13. Music of Brazil and Argentina.
An introduction to Brazilian and Argentinian music from samba, capoeira, and forro to tango, cumbia villera, and chacarera; examines such music making within its various historical, social, and political contexts.
MUS X80.14. Music of the Andean Countries.
Introduction to the music of Andean countries including Colombia, Ecuador, Peru, Bolivia, and Chile. Explore the role music plays in shaping historical and modern Andean societies, as well as how music comments upon national culture, society, and politics, with particular attention to the ways in which musicians and musical movements continue to influence Andean societies. Subjects include pre-Columbian and colonial music making; music representative of the tripartite indigenous, African, and Iberian heritage of Andean countries; aesthetics, identity, and musical expression; ritual, religion, and the politics of musical performance.
MUS X80.15. The Music of the African Diaspora.
Investigate the musical legacy of the African slave trade in the Americas, the social contexts in which black musical forms have developed, and their varied forms. Includes the shifting meanings of black music" in various contexts; the notion of hybridity; the uses of African influenced music as a political or oppositional tool; and African ethnic groups represented prominently in the New World, the traditions they brought with them, and the ways they have been adapted to new ends.
MUS X80.2. Renaissance.
MUS X80.3. Baroque.
MUS X80.4. Eighteenth Century.
MUS X80.5. Nineteenth Century.
MUS X80.6. Twentieth Century.
MUS X80D. Topics in Diction and Translation.
Advanced study in English, Italian, French, and German diction and translation.
MUS X80D.1. English Diction and Translation.
Study English diction and phonetic translation specifically for musicians. Discuss the International Phonetic Alphabet.
MUS X80D.2. French Diction and Translation.
Study French diction and phonetic translation specifically for musicians. Discuss the International Phonetic Alphabet.
MUS X80D.3. German Diction and Translation.
Study German diction and phonetic translation specifically for musicians. Discuss the International Phonetic Alphabet.
MUS X80D.4. Italian Diction and Translation.
Study Italian diction and phonetic translation specifically for musicians. Discuss the International Phonetic Alphabet.
MUS X80D.5. Russian Diction and Translation.
Study Russian diction and phonetic translation specifically for musicians. Discuss the International Phonetic Alphabet.
MUS X80G. Improvisation (Non-Jazz).
MUS X80M. Group Piano Pedagogy.
The development of skills in teaching group piano; examination and evaluation of methods and materials used in keyboard instruction; learning styles; research.
MUS X80N. Technology in Voice Study.
The integration of computer technology and audiovisual equipment into applied voice instruction.
MUS X80R. Vocal Repertoire Coaching.
MUS X80S. Contemporary Commercial Vocal Pedagogy.
MUS X80T. Accompanying.
MUS X80V. Collaborative Piano: Vocal and Instrumental.
MUS X81. Reference and Research Materials in Music.
MUS X81C. Chamber Music: Brass.
MUS X81D. Chamber Music: Artist Diploma.
MUS X81E. Chamber Music: Percussion.
MUS X81J. Topics in Introduction to Musicology and Ethnomusicology.
MUS X81J.1. Foundations of Musicology.
MUS X81J.2. Foundations of Ethnomusicology.
MUS X81J.3. Proseminar in Musicological Research.
MUS X81J.4. Analytical and Ethnographic Methods in Ethnomusicology.
MUS X81K. Chamber Music: Piano.
MUS X81M. Chamber Music: Masters Quartet.
MUS X81P. Topics in Graduate Pedagogy.
Intensive study of the principles and methods of teaching various instruments at the college level.

MUS X81P.1. Graduate Pedagogy: Piano I.
MUS X81P.2. Graduate Pedagogy: Piano II.
MUS X81P.3. Graduate Pedagogy: Voice I.
MUS X81P.4. Graduate Pedagogy: Voice II.
MUS X81P.5. Graduate Pedagogy: Orchestral Instruments I.
MUS X81P.6. Graduate Pedagogy: Orchestral Instruments II.
MUS X81R. Chamber Music: Saxophone.
MUS X81S. Chamber Music: Strings.
MUS X81V. Chamber Music: Vocal.
MUS X81W. Chamber Music: Woodwinds.
MUS X82J. Instrumental Conducting.
Designed for those who have had no experience in conducting. Explore rudimentary use of baton, regular and irregular beat patterns, subdivisions and beat pattern variations as applied to simple instrumental literature. Develop practical experience in conducting instrumental groups.
MUS X83L. Topics in Seminar in Music Education.
Individual and group studies of advanced topics.
MUS X84J. Advanced Topics in Music Education.
Review and criticism of research, acoustics, and psychology.
MUS X84J.1. History and Philosophy.
MUS X84J.3. Current Trends in Music Education.
MUS X84J.4. Research in Music Education I.
MUS X84J.5. Tests and Measurements in Music.
MUS X84J.8. Research in Music Education II.
MUS X84J.9. Music Learning and Behavior.
MUS X84P. Practicum in a World Music Tradition.
Advanced training on a non-Western musical instrument such as Javanese gender barung, Indian sitar, Arabic qanun, or Korean kayakeum, or advanced training in a non-Western vocal style, and other approved musical practices.
MUS X85. Special Topics in Musicology.
Research in depth on various topics.
MUS X85.1. History of Music Theory to 1750.
MUS X85.2. History of Music Theory.
MUS X85.3. Notational Systems before 1400.
MUS X85.4. Notational Systems since 1400.
MUS X85.5. Studies in Organology.
MUS X85J. Topics in Seminars: Musicology and Ethnomusicology.
Intensive studies of special problems and/or issues in music, broadly defined.
MUS X85R. Directed Research in Musicology.
MUS X86J. Topics in the History of Sacred Music.
Introduction to a significant body of choral works, from the thirteenth century to the present age, composed especially for religious occasions and venues.
MUS X86S. Topics in Music in Worship: Service Planning and Service Playing.
The art and practice of preparing, rehearsing, and performing specific works of sacred music for religious occasions.
MUS X87L. Advanced Topics in Music Literature.
Analytical and historical studies of a particular repertoire.
MUS X87L.1. Topics in the Solo Song.
MUS X87L.10. Topics in Jazz.
MUS X87L.11. Topics in Music Literature.
MUS X87L.12. Topics in Collaborative Piano Literature.
MUS X87L.13. Topics in Chamber Music.
MUS X87L.2. Topics in Music for Keyboard Instruments.
MUS X87L.20. Jazz Ensemble Literature.
Explore a selection of acclaimed albums of modern jazz, which by general consensus form a body of essential listening knowledge - the foundation of a recorded jazz canon.
MUS X87L.21. Jazz Perspectives.
Investigative chronological study of jazz history, aimed at gaining a better sense of jazz's ever-evolving "state of the art," through the experiences of its musicians within their own time.
MUS X87L.4. Topics in Music for String Instruments.
MUS X87L.5. Band Literature.
MUS X87L.6. Topics in Choral Music.
MUS X87L.7. Topics in Orchestral Music.
MUS X87L.8. Topics in Band Music.
MUS X87L.9. Topics in Opera.
MUS X88C. Composition.
MUS X88E. Electronic Composition.
MUS X88F. Film and Scoring Media.
MUS X88G. Graduate Media Project.
MUS X88J. Improvisation Styles and Techniques.
The study and analysis of jazz improvisation.
MUS X88K. Project in Jazz Composition.
MUS X88L. Advanced Studies in Choral Literature.
MUS X88M. Topics in Music Theory.
MUS X88M.1. Foundations of Music Theory.
MUS X88M.2. Form Theory.
MUS X88M.3. Contemporary Styles and Techniques.
MUS X88M.4. Current Trends in Music Theory.
MUS X88M.5. Heinrich Schenker's Theory of Tonal Music.
MUS X88M.6. Music and Meaning.
MUS X88M.7. Analysis of Popular Music.
MUS X88P. Jazz Pedagogy.
Research and study of the methods and materials essential to teaching and planning a comprehensive curriculum in jazz studies.
MUS X88R. Directed Research in Music Theory.
MUS X88S. Topics in Seminar in Music Theory.
MUS X88T. Analytical Techniques.
MUS X88V. Score Reading.
MUS X91. Foundations of Music Education.
Introduction to graduate study, history, philosophy, and basic concepts in music education.
MUS X92. Psychology of Music.
Psychological aspects of music, emphasizing perception, experimental aesthetics, music function, and the nature of musical ability.
MUS X93. Topics in Special Problems in Music Education.
MUS X93.1. General Music.
MUS X93.10. Computer Applications in Music Education.
MUS X93.11. Group Teaching: Materials and Methods.
MUS X93.12. Studio Piano: Goals and Procedures.
MUS X93.14. Music in Therapy and Special Education.
MUS X93.2. Elementary School Music.
MUS X93.3. Choral Technique.
MUS X93.5. Directed Research.
MUS X93.7. Music in Higher Education.
MUS X93.8. Music and Exceptional Children.
MUS X93.9. Instrumental Music.
MUS X94. Directed Reading.
Readings in the literature of music.
MUS X95W. Writing about Music.
Designed to develop and improve writing skills through required readings and through writing concert reviews, opinion pieces, essays, and articles about music.
MUS X98. Thesis.
MUS X98D. Artist Recital.
Preparation for and performance of a recital.
MUS X98M. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

MUS X98R. Master's Recital.

MUS X98T. Supervised Teaching in Music.

Supervised teaching for graduate students in music; two semesters under supervision; weekly meetings with instructor, consultations, reports throughout the teaching period.

MUS X99. Treatise.

Author a substantial research paper of a scholarly nature and perform associated post-candidacy doctoral recitals.

MUS X99N. Nontreatise Lecture Recital Document.

Author a research paper of a scholarly nature and perform associated post-candidacy doctoral recitals.

MUS X99W. Dissertation.

Professional Courses

MUS X64L. Advanced Ear Training.

Further development of techniques taught in Music 411, with emphasis on aural recognition of larger musical forms and of music of contemporary style.

MUS X76C. Special Topics in Music Performance.

MUS X76G. Special Topics in Music Literature.

MUS X76M. Special Topics in Music Studies.

MUS X94. Directed Reading.

Readings in the literature of music.

N - Nursing

Nursing: N

Lower-Division Courses

N X07. Topics in Nursing.

N X07R. Women's Reproductive Health for Nonscience Majors.

Overview of contemporary women's reproductive health issues, with emphasis on historical, physiological, psychosocial, and cultural influences that affect the reproductive health of women during adolescence, the childbearing years, and midlife.

N X09. Global Health.

Overview of global health, with emphasis on the determinants of health, health indicators, human rights, globalization, current socioeconomic factors, health care systems, and public health systems.

N X10. Communication in Health Care Settings.

Introduction to theories and models of communication in relation to health care; basic factors affecting interpersonal communication in health care settings.

N X17H. Introduction to Nursing Scholarship: Honors Seminar.

Introduction to the nature of nursing scholarship, along with related research and clinical and educational career opportunities. Topics include leadership, research, and ethics as they relate to nursing.

N X19. Topics in International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

N X19S. Topics in Nursing.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Nursing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

N X84C. Professional Nursing Foundations.

Introduction to fundamental nursing care concepts, processes, and skills, including communication and assessment.

Upper-Division Courses

N X20. Introduction into Patient-Centered Nursing Care.

Examines the profession of nursing and introduces the concept of nursing process as a framework for patient-centered care of younger and older adults. Special emphasis will be placed on topics that apply to the bio-psycho-social-spiritual needs of the aging adult.

N X21. Ethics of Health Care.

Examination of ethical issues of health care and related legal concerns; contradictions, inconsistencies, and competing views that lead to dilemmas in health care.

N X21H. Ethics of Health Care: Honors.

Ethical issues in health care and related legal concerns; contradictions, inconsistencies, and competing views that lead to dilemmas in health care. Emphasis on resolving ethical dilemmas through ethical reasoning and ethical obligations in health professional-patient relationships; and just allocation of scarce health care resources.

N X23. Genetics in Health Care.

The integration of genetic information into nursing practice, including ethical, legal, psychological, and social issues.

N X24. Health Assessment Skills.

Discussion, application, and documentation of health assessment skills needed to provide data for health promotion and nursing interventions.

N X25. Adult Health Nursing I.

Discussion of the concepts necessary to promote and restore the health of adults with biological problems including related physiological and psychological responses.

N X25P. Adult Health Nursing I (Practicum).

Application of the concepts and theories necessary to promote and restore health of adults with biological problems; related physiological and psychological responses.

N X27P. Clinical Nursing Skills I (Practicum).

Laboratory instruction and practice in clinical nursing skills.

N X28S. Topics in Nursing.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Nursing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

N X29M. Topics in International Learning Seminars.

Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.

N X37. Topics in Independent Study.

Study in a specific area; topic and mode of study are agreed upon by student(s) and instructor.

N X38. Complementary and Alternative Medicine in Health Care.

Overview of representative Complementary and Alternative Medicine (CAM) modalities and their role in shaping an emerging wellness-oriented, patient-centered model of care. Evaluation of current research evidence of CAM therapies in four domains: mind-body medicine, biologically based practices, manipulative and body-centered therapies, and energy medicine. Includes a hands-on experiential component for familiarization of some fundamental CAM concepts.

N X44. Perinatal Nursing Care.

Examine concepts, theories, and processes essential to understanding the health concerns and problems of women and their families during the childbearing years.

N X44P. Perinatal Nursing Care Practicum.

Apply concepts, theories, and processes pertinent to care of women and their families during the childbearing years.

N X47. Specialized Topics in Nursing.
N X47.1. Informatics in Health Care and Nursing.
N X47.10. Child Wellness Center (Practicum).
N X47.11. Children with Chronic Illness in the Community.
N X47.12. Clinical Nursing Preceptorship.
N X47.13. Community-Oriented Ambulatory Nursing.
N X47.14. Genetics in Clinical Nursing (Practicum).
N X47.15. Home Health Nursing.
N X47.16. Pediatrics in the Community.
N X47.17. Well Children in the Community.
N X47.2. Acute Care Pediatrics.
N X47.3. Cardiovascular Nursing.
N X47.4. Childbearing Nursing Elective.
N X47.5. Critical Care Nursing.
N X47.6. High-Risk Maternity.
N X47.7. Pediatrics.
N X47.8. Perioperative Nursing.
N X47.9. Special Topics in Pediatrics.

N X50. Interprofessional Collaborative Practice.
Focuses on developing the competencies needed for interprofessional collaborative practice among health care professionals. Core interprofessional competencies addressed include: values and ethics for interprofessional practice; knowledge of roles and responsibilities of different health professions; interprofessional communication; and teams and teamwork.

N X52. Career Planning and Professional Development.
Develop foundational knowledge and skills needed to launch a successful career in health care. Explore career management and professional development as a continuous lifelong process.

N X54. Spanish for Health Care Professionals.
Basic medical Spanish language skills and phrases related to assessment and nursing activities. Focus on the cultural values of Latino patients who seek health care in the United States.

N X55C. Adult Health Nursing IIA.
First of a two-part sequence in adult health nursing. Advanced concepts and theories to promote and restore health of adults with biological problems and related physiological and psychological responses.

N X55D. Adult Health Nursing IIB.
Second part of a two-part sequence in adult health nursing. Advanced concepts and theories to promote and restore health of adults with biological problems and related physiological and psychological responses

N X55P. Adult Health Nursing II (Practicum).
Application of advanced concepts and theories to promote and restore health of adults with biological problems and their related physiological and psychological responses.

N X56. Mental Health Nursing across the Life Span.
Biological, environmental, cultural, and interpersonal factors predisposing individuals across the life span to mental health problems. The course is organized around the nursing process, as well as multidisciplined therapeutic modalities, that assist the individual and family to adapt, recover, and grow through these problems. Current relevant research, and the sociocultural, legal, and ethical implications of providing nursing care to the mentally ill.

N X56P. Problems in Mental Health Nursing (Practicum).
Application of strategies for the care of individuals, groups, and families experiencing mental health problems.

N X57P. Clinical Nursing Skills II Practicum.
Laboratory instruction and practice in clinical nursing skills.

N X64. Nursing Research.
An introduction to key components of the research process, interpretation of basic statistics in research, and critical examination of patient-outcome research studies.

N X64H. Nursing Research: Honors.
An introduction to key components of the research process, interpretation of basic statistics in research, and critical examination of patient-outcome research studies.

N X66. Nursing Care of Children and Their Families.
Concepts, theories, and developmental processes essential to the health concerns and problems of children, adolescents, and their families.

N X66P. Nursing Care of Children and Their Families Practicum.
Application of concepts, theories, and developmental processes essential to the health concerns and problems of children, adolescents, and their families.

N X71. Disability over the Life Course.
An interdisciplinary introduction to the study of disability as a distinct social and clinical concept with practical and theoretical implications for health care. Focus on the changing needs of persons with disabilities over the life course. Explores how to understand the health needs of persons with disabilities and how to work with them and their families so they may negotiate environments with appropriate accommodations that meet their health care needs.

N X72. International Health Implications.
Explore global substantive and methodological content to enhance an understanding beyond the United States. Examine the cultural and socioeconomic variability between countries as part of key indicators of understanding.

N X73. Quality and Safety for Nursing Practice.
Designed to prepare students for professional nursing practice. Provides opportunities for synthesis of theoretical, evidence-based, and clinical knowledge with emphasis on quality care and patient safety.

N X74. Complex Nursing Care.
Addresses the management of complex and critical needs of patients and their families across the continua of care. The focus will be on people with multiple chronic conditions experienced by various populations such as age groups, disease/health conditions, and settings. In addition, transitional care, critical care concepts, palliative, and end-of-life care will be explored.

N X75. Public Health Nursing.
Presents public health nursing concepts, theories, and processes used in health promotion, disease or injury prevention, health protection, and risk reduction with individuals, families, groups, communities, and populations.

N X75P. Public Health Nursing Practicum.
Application of public health nursing concepts, theories, and processes used in health promotion, disease or injury prevention, health protection, and risk reduction with individuals, families, groups, communities, and populations.

N X77. Leadership and Management of Nursing Care.
Investigation,synthesis and application of laws,rules,theories and concepts in nursing leadership and management that promote professional nursing practice and healthcare leadership in diverse settings.

N X77H. Leadership and Management of Nursing Care: Honors.
Investigation,synthesis and application of laws,rules,theories and concepts in nursing leadership and management that promote professional nursing practice and healthcare leadership in diverse settings.

N X77P. Clinical Care Management Practicum.
Application of selected concepts and theories of management in the planning and delivery of health care.

N X79P. Capstone Preceptorship.
Designed to provide students with clinical experiences similar to those that confront newly employed registered nurses. Focuses on the role transformation of students and on clinical competence in

communication, collaboration, negotiation, delegation, coordination, and evaluation of interdisciplinary work.

N X84C. Professional Nursing Foundations.

Introduction to fundamental nursing care concepts, processes, and skills, including communication and assessment.

Graduate Courses

N X80C. Psychopharmacology for Advanced Practice Nurses.

Covers prescribing and monitoring medications commonly used with patients who have psychiatric or mental health problems.

N X80D. Family Care Concepts in Psychiatric-Mental Health Nursing.

Explore psychiatric-mental health nursing care for families with complex relational problems. Discover applications of theoretical, ethical, and evidence-based practices to formulate delivery of culturally sensitive care within the family context. Examine common practices, with emphasis on critical thinking skills inherent to the role of the Psychiatric-Mental Health Nurse Practitioner (PMHNP).

N X80F. Advanced Psychiatric and Mental Health Nursing I.

Studies the theory and evidence bases for diagnosis and management of a variety of common psychiatric and behavioral disorders. Emphasizes diagnostic reasoning, clinical decision-making, and therapeutic strategies appropriate for the role of the family psychiatric and mental health nurse practitioner. Considers the sociocultural and community context for patient care.

N X80G. Advanced Psychiatric and Mental Health Nursing I: Clinical.

A precepted, clinical environment in which to apply knowledge related to biological and psychosocial theories, pharmacology, health promotion, and ethics to patients and families with common psychiatric and behavioral disorders. Emphasis is placed on role development using standardized procedures and tools that assist in diagnosis, treatment, and developing beginning-level therapy skills in multiple modalities.

N X80H. Advanced Psychiatric-Mental Health Nursing II.

In-depth focus on the role of the family psychiatric and mental health nurse practitioner using theoretical bases for care of complex psychiatric and mental health patients with psychopathology in a variety of settings across the life span. Students integrate various biological and psychosocial theories with psychopharmacology, health promotion, and ethical decision-making to develop culturally sensitive care. Emphasizes evidenced-based practices, recommended practices and treatment protocols, ethical decision making, and critical thinking strategies that are integral to the role of the family psychiatric and mental health nurse practitioner.

N X80J. Advanced Psychiatric and Mental Health Nursing II: Clinical.

Studies the role of the advanced psychiatric and mental health nurse practitioner in providing care for patients and families with complex psychopathology and psychiatric and mental health problems in a variety of clinical settings. Knowledge from biological and psychosocial theories, psychopharmacology, health promotion, and ethics to develop culturally sensitive care. Emphasizes role development, evidenced-based practices, recommended practices and treatment protocols, ethical decision making, and critical thinking strategies.

N X80M. Topics in Historical and Philosophical Study of Nursing.

N X80M.1. Philosophical Aspects of Nursing.

Introduction to the analysis of nursing language: defining terms, detecting logical fallacies, analyzing meanings, and recognizing descriptive and normative aspects of judgments.

N X80M.2. Historical Development of Nursing.

In-depth study of the history of nursing, with emphasis on influences on the profession and changes that have occurred within it. Review of the association of nursing with related disciplines, its emergence into institutions of higher learning, organizational structure and hierarchy, changes in educational focus resulting from the preparation of educational leaders, and related topics.

N X80M.3. Philosophy of Nursing Theory.

Advanced seminar in the application of philosophical aspects of nursing theory.

N X80M.4. Philosophical and Theoretical Bases of Nursing Science.

Philosophical principles and theories that contribute to the ongoing evolution of nursing science. Explores the historical development of nursing as a professional discipline in the context of philosophy and science.

N X80Q. Psychiatric Assessment and Psychotherapy Skills.

Introduces psychiatric-mental health assessment of individuals and families throughout the life span, using established therapeutic communication techniques, individual psychotherapeutic modalities, and psychotherapy skills from evidence-based practices. Covers synthesis of theories and knowledge from nursing, biology, psychiatry, psychology, and socio-cultural studies as they apply to the comprehensive assessment of psychiatric clients. Focus on assessment and psychotherapy skills commensurate with the role of the PMHNP through didactic, experiential and observational practice in the classroom.

N X80T. PMHNP: Management of Chronic Illness.

Analysis and application of physiological, psychosocial, spiritual, and environmental concepts to treat selected patients with chronic illness. Focus on dynamics of chronic illness and related psychiatric mental health nurse practitioner roles. Explores concepts relevant to the management of complex and chronic health care problems often comorbid with psychiatric illness. Includes supervised instruction in clinical agencies.

N X80U. Spanish for Health Care Professionals.

Basic medical Spanish language skills and phrases related to assessment and nursing activities. Focus on the cultural values of Latino patients who seek health care in the United States.

N X81C. Health Informatics.

Information and communication technologies are increasingly being applied to the healthcare context, with many new jobs opening up in areas such as health information management, electronic health records, and consumer and public health informatics. Explores the challenges and career opportunities provided by these recent developments. Discusses major issues-social, cultural, political, economic, technological, historical, and ethical-associated with health informatics.

N X81D. Leadership Development for Healthcare Professionals.

Examines leader-follower partnerships in diverse healthcare settings. Uses theories, research findings, and expert opinions from several fields of study to explore the related concepts of power, authority, influence, leadership, followership, decisional involvement, structural empowerment, and emotional intelligence in the context of complex healthcare work environments. Special emphasis is placed on the use of effective leadership and followership behaviors to sustain high performing interprofessional teams and improve quality outcomes for patients, families, and healthcare organizations.

N X81F. Leadership in Diverse Settings Advanced Nursing Capstone II Practicum.

Focus on monitoring, closing, and evaluating the Capstone project that addressed organizational challenges, health issues, and/or enhance healthcare delivery effectiveness.

N X81M. Topics in Adult Health Nursing.

N X81M.6. Nursing Science: Domains of Inquiry and Interdisciplinary Perspectives.

Explore domains of nursing science through inquiry, shaped by the problems and perspectives of nursing as a practice and academic discipline. Includes critical review of theories that contribute to the

understanding of nursing practice and nursing research within an interdisciplinary context.

N X81P. Project Planning Practicum.
Discuss practical skills and experiences to initiate and lead quality improvement or evidence-based practice projects that address organizational challenges, health issues, and/or effective healthcare delivery.

N X81Q. Patient Care Practicum.
Apply advanced nursing concepts in a selected area of nursing. Develop individual goals and objectives for practicum activities. Address health issues in areas such as the care of individuals, families, communities, and systems.

N X81R. Theoretical Foundations of Aging.
Theories in gerontology as applied to nursing practice.

N X81S. Gerontological Nursing.
Physiological changes in the elderly, and their implications for nursing practice.

N X81V. Leadership in Diverse Settings Advanced Nursing Practicum.
Precepted practicum focusing on advanced nursing concepts and skills in a setting selected with consideration of the student's interest, needs, goals, and objectives. Assessments of individuals, families, or groups, and their environments, implementation of appropriate evidence-based specialized nursing interventions, and evaluation the role of master's prepared nurses in diverse practice settings.

N X81W. Leadership in Diverse Settings Advanced Nursing Capstone Practicum.
Focus on planning, implementing, and monitoring the Capstone project. Address organizational challenges, health issues, and/or enhance healthcare delivery effectiveness.

N X82. Sociocultural Influences on Health.
Focus on factors associated with inequities in health status, health care, and health policies. Use an ecological approach to explore relationships among individual characteristics such as gender, education, income, literacy, race, ethnicity, culture, acculturation, disability, age, and sexual orientation. Examine interpersonal factors such as communication with health care providers, family and social ties, and discrimination as well as societal-level factors such as neighborhood and community context, health care organizations, economics, politics, and policies. Seek to understand how those factors shape health behaviors, access to health care services, and health status locally, nationally, and globally.

N X82W. Informatics for Healthcare Professionals.
Explores subjects of health informatics that are specifically focused to healthcare professionals. Representative subjects include: key roles and responsibilities of health informaticians in American healthcare system; Informatics related theoretical foundations, research needs assessment and available information sources on EBP; Applications of health informatics by healthcare professionals (HCPs) in clinical settings; Implementation and evaluation of health informatics applications in clinical settings; Human-computer interaction (HCI), usability and ethical challenges and issues faced by HCPs; and new trends in health informatics technology to engage patients.

N X84C. Professional Nursing Foundations.
Introduction to fundamental nursing care concepts, processes, and skills, including communication and assessment.

N X84N. Genomic Applications in Nursing.
The ethical, legal, psychological, and social issues involved in the integration of genetic information into nursing practice.

N X84P. Aging and Disability.
Examines concepts and theories of aging and disability. Addresses the changing physical, psychological, social, economic, ethical, legal, and spiritual needs, environmental accommodations, and caregiver responsibilities and needs across the life course.

N X84T. Professional Nursing Management.
Examines selected concepts and theories of nursing leadership and management in the context of the nursing work environment and professional nursing career development.

N X85. Topics in Nursing.

N X85.1. Big Data in Health Sciences Research.

N X85E. End-of-Life Communication and Decision-Making.
Examine the scholarly research, theory, and practice associated with decision-making and communication at the end of life across diverse populations, including subjects of death and dying, loss, grief, bereavement, ethical principles, shared decision-making, advance directives, refusal or withdrawal of life-sustaining medical treatment, and family caregiving. Explore communication and conflict in the context of psychosocial, spiritual and cultural aspects of the lives of patients and families.

N X86F. Budget and Finance in Health Care.
Conceptual and practical applications of financial management, cost analyses, and budgeting in the contemporary health care delivery system.

N X86Q. Quality and Safety in Healthcare.
Examination of quality and safety in the U.S. healthcare system based on quantitative and qualitative research findings, expert opinions, and cultural surveys. Explores and evaluates strategies for creating and sustaining a culture of safety in healthcare.

N X86W. Foundations of Health Care Finance.
Explore conceptual and practical applications of financial management, cost analyses, and budgeting in the contemporary health care delivery system.

N X87F. Adult Health Nursing I.
Introduction to concepts, theories, and research findings essential for promoting and restoring the health of adults with selected commonly occurring physiological alterations and responses to health and illness.

N X87G. Psychiatric-Mental Health Nursing.
The biological, environmental, cultural, and interpersonal factors affecting individuals with psychiatric-mental health problems.

N X87H. Child Health Nursing.
Integrates concepts, theories, and processes essential to understanding the health and illness of children within the context of the family.

N X87K. Leading and Managing in Complex Healthcare Systems.
Concepts related to individual, group and organizational behavior are studied and applied to the processes of leading people and managing work in complex healthcare systems. Theories of nursing, economics, organizational psychology, management science, sociology, and complexity science are used to critically examine healthcare work environments. Theory application will focus on creating and sustaining healthy work environments, leading and managing organizational change, managing work processes, and administrative decision making. Relevant research in nursing and other behavioral sciences is reviewed.

N X87Q. Public Health Nursing.
Integration of nursing, public health, and social science concepts and theories essential for promoting and restoring health and preventing disease and disability in aggregates, populations, and communities.

N X87R. Adult Health Nursing II.
Advanced concepts, theories, and research findings essential for promoting and restoring health of adults with selected complex physiological alterations and responses.

N X87S. Integration of Nursing Knowledge.
Integration of nursing knowledge derived from didactic and clinical courses, with application in case studies and simulated patients across the life span and in a variety of settings.

N X87T. Perinatal Nursing.
Explore the normal processes and physiological alterations that occur before, during, and after pregnancy. Examine concepts, theories, and processes essential for promoting health and addressing health

concerns of women, neonates, and their families during the childbearing years.

N X89C. Adult-Gerontology Clinical Nurse Specialist: Role Dimensions.

Survey of the underlying values and the central and core competencies of the adult-gerontology clinical nurse specialist in adults (young adults through older adults) across the spheres of influence (patient, nursing practice, organization/system). Application of theory and research to advanced practice.

N X89D. Adult-Gerontology Clinical Nurse Specialist: Health Promotion and Illness Prevention.

Analysis of physiological, psychosocial, and environmental concepts and testing of assessments and interventions for select adult-gerontology (AG) populations across the life spectrum (young adults through older adults).

N X89E. Adult-Gerontology Clinical Nurse Specialist: Chronic Illness.

Analysis of physiological, psychosocial, spiritual, and environmental concepts and testing of assessment and interventions for select adult-gerontology (AG) populations with chronic illness conditions. The focus is on dynamics of multiple chronic illness and related Adult-Gerontology Clinical Nurse specialist (AG-CNS) roles.

N X89F. Adult-Gerontology Clinical Nurse Specialist: Acute Care.

Analysis of physiological, psychosocial, and environmental concepts and testing of assessments and interventions in select adult-gerontology populations experiencing acute illness. Focus on dynamics of acute illness and related Adult-Gerontology Clinical Nurse specialist (AG-CNS) roles.

N X89H. Diagnosis and Management of Adult-Gerontology Health Problems.

Theoretical and clinical content for management of health problems of adult patients across the life spectrum (young adults through older adults). Integration and application of skills and knowledge gained in previous adult-gerontology clinical nurse specialist coursework for adult patients in the acute or chronic setting. Pattern recognition, critical thinking, analysis, diagnostic testing, differential diagnosis, and medical management of common adult, older-adult health problems.

N X89M. Adult-Gerontology CNS: Practicum I.

Guided clinical application of Adult-Gerontology Clinical Nurse Specialist (AG-CNS) core competencies (expert coaching, collaboration, consultation, research, leadership, and ethical decision-making) in delivery of care for select adult-gerontology (AG) populations to promote health and manage acute and/or multiple chronic conditions at the patient, nurse, and system level. Preparation for certification and credentialing as an AG-CNS.

N X89N. Adult-Gerontology CNS: Practicum II.

Guided clinical application of Adult-Gerontology Clinical Nurse Specialist (AG-CNS) core competencies, such as expert coaching, collaboration, consultation, research, leadership, and ethical decision-making in the delivery of care for select adult-gerontology (AG) populations to promote health, and manage acute and/or multiple chronic conditions at the patient, nurse, and system level. Prepares students for certification and credentialing as an AG-CNS.

N X89P. Diagnosis and Management of Adult-Gerontology Health Problems.

This seminar course offers theoretical and clinical content for advanced nursing students to provide medical management of health problems for adult-gerontological patients. Students will learn pattern recognition, critical thinking, analysis, diagnostic testing, differential medical diagnosis, and medical management of common adult-gerontological health problems using an interprofessional team approach. This seminar is appropriate as a support course for other interprofessional graduate students.

N X90D. Public Health in a Global Context.

Advanced study of theory and research related to public health within a global context. Examines relationships among public health needs and resources, health services, health policy, law, and population health indices. Emphasis is on developing both the knowledge fundamental to population-based health and the research base for optimizing public health through community action.

N X90E. Global Health and Primary Care in Costa Rica.

Explore fundamental concepts of global health, including social, political, and economic determinants of health for Costa Rica. Examine culture, health care systems, and health outcomes. Assess disease management in these environments from a primary care perspective. Consider how to empower people within their communities to manage their health through evidence-based practice, research, and education.

N X90F. Adult Health Nursing I Practicum.

Application of concepts, theories, processes and skills pertinent to promoting and restoring the health of adults with selected commonly occurring physiological alterations and responses.

N X90G. Psychiatric-Mental Health Nursing Practicum.

Application of concepts, theories, processes, and skills that are pertinent to promoting mental health and providing nursing care for people with psychiatric and mental illnesses.

N X90H. Child Health Nursing Practicum.

Application of concepts, theories, processes, and skills pertinent to the care of children within the context of the family.

N X90Q. Public Health Nursing Practicum.

Application of public health nursing concepts, theories, and processes pertinent to the care of aggregates, populations, and communities.

N X90R. Adult Health Nursing II Practicum.

Application of advanced concepts, theories, processes, and skills essential for promoting and restoring the health of adults with selected complex physiological alterations and responses.

N X90S. Integration of Nursing Knowledge Practicum.

Designed to assist the student in the application and integration of knowledge from didactic and clinical courses in the care of multiple patients.

N X90T. Perinatal Nursing Practicum.

Apply concepts, theories, processes, and skills pertinent to the care of women, neonates, and their families during the childbearing years.

N X90U. Foundations of Nursing Education.

Examine essential elements of nursing education, including theoretical bases of culturally-relevant teaching, learning, and curriculum development. Explore approaches to the development of values integral for a novice nurse educator, including ethical and legal considerations and the importance of engaging in scholarship.

N X90V. The Art and Science of Teaching Nursing.

Examine the essentials of course, curriculum and program design for the nurse educator. Using educational technologies, explore teaching and learning strategies in varied formats, including face-to-face, online and hybrid. Explore diversity, inclusivity, and personal and professional values with regard to the art and science of nursing education and life-long learning.

N X90W. Role of the Nurse Educator.

Explore advanced role development for the nurse educator, including concepts and skills related to curriculum development and program evaluation, quality improvement, faculty governance and leadership, and the scholarship of teaching, research, and service.

N X91Q. Health Care Informatics.

Information and communication technologies are increasingly being applied to the healthcare context, with many new jobs opening up in areas such as health information management, electronic health records, and consumer and public health informatics. Explore the challenges and career opportunities provided by these recent developments. Discuss major issues-social, cultural, political, economic, technological, historical, and ethical-associated with health informatics.

N X91S. Alternate Entry Capstone Preceptorship.
Apply and integrate knowledge from didactic and clinical training in the care of multiple patients.

N X92E. Applications of Health Care Research.
Designed to prepare students to discover, examine, and evaluate knowledge, theories, and creative approaches to health care. Focuses on the skills needed to identify research questions in practice, evaluate existing practice in the light of research findings, and develop strategies to incorporate research findings into the clinical setting.

N X92P. Health Policy, Program Planning, and Evaluation.
Exploration of multilevel health care policy implementation, program development, and outcome evaluation. Focus on the application of policies from macro-level to micro-level systems.

N X93C. Advanced Pediatric Health Assessment.
Explore advanced developmental and health assessment of children (newborn through adolescent), with an emphasis on theories and skills applicable to the assessment of children.

N X93D. Advanced Pediatric Pharmacology.
Study pediatric pharmacotherapeutics, with emphasis on pharmacokinetics, pharmacodynamics, administration, and education.

N X93E. Pediatric Nurse Practitioner Primary Care I.
Study health promotion, anticipatory guidance, prevention of illness, and the assessment and management of acute illnesses commonly affecting children. Discuss concepts related to the advanced role development of nurse practitioners.

N X93F. Pediatric Nurse Practitioner Primary Care I Clinical.
Attain clinical experience in primary care settings, focusing on health promotion and management of well-child care and acute illnesses commonly encountered in children.

N X93G. Pediatric Nurse Practitioner Primary Care II.
Examine theoretical knowledge relevant to the management of complex and chronic primary health care problems from infancy through adolescence.

N X93H. Pediatric Nursing Practitioner Primary Care II Clinical.
Attain clinical experience in the management of complex or chronic health problems of infants, children, and adolescents in a specialty setting, as well as management in primary care.

N X93J. Pediatric Acute Care Management III and Role Transition.
Learn to recognize, interpret, and respond to emerging health crises and organ system dysfunction or failure of physiologic systems in children with complex acute, critical, and chronic health conditions. Examine patient stabilization, minimizing complications, and restoring maximal health potential. Explore core concepts such as team-based management of care and interprofessional collaboration; complex discharge planning; community and social influences of child and family health; advanced role development; and legal, political, and ethical issues that affect nurse practitioner practice.

N X93M. Topics in Maternal/Parent-Child Nursing.

N X93P. Pediatric Diagnostic Reasoning and Advanced Invasive Skills.
Interpretation of laboratory and diagnostic testing; and the development of diagnostic and psychomotor skills needed to care for acute or critically ill pediatric patients.

N X94. Topics in Independent Study in Nursing.
Detailed or in-depth study in a specific topic area. Topic and mode of study are agreed upon by student and instructor.

N X94E. Pediatric Primary Health Care Concepts I.
Study of health promotion, anticipatory guidance, prevention of illness, and the assessment and management of acute illnesses commonly affecting children. Concepts related to advanced role development of nurse practitioners.

N X94F. Pediatric Primary Health Care Concepts I Clinic.
Clinical experience in primary care settings, focusing on health promotion and management of well-child care and acute illnesses commonly encountered in children.

N X94G. Pediatric Acute Care Role Transition and Advanced Practicum.
Demonstrate role behaviors and clinical competence consistent with that of an advanced beginner acute care pediatric nurse practitioner. Experience a concentrated and supervised opportunity to make more independent and interdependent decisions in managing emerging crisis and organ system dysfunction in children with a variety of complex acute, critical, and chronic health conditions. Work collaboratively with faculty and preceptors in a variety of settings including emergency departments, intensive care units, inpatient medical/surgical units, and sub-specialty clinics.

N X94J. Pediatric Primary Health Care Concepts III.
Primary care management of complex conditions in children. Additional emphasis on advanced role development of the pediatric nurse practitioner.

N X94K. Pediatric Primary Health Care Concepts III Clinic.
Pediatric primary health care practicum in the advanced nursing management of the health of infants, children, and adolescents.

N X94Q. Pediatric Acute Care Management I.
Designed to prepare students to recognize, interpret, and respond to emerging health crises and organ system dysfunction or failure in children with complex acute, critical, and chronic health conditions. Emphasizes patient stabilization, minimizing complications, restoring maximal health potential through risk reduction, and providing physical and psychosocial support to the patient and family. Acute, critical, and chronic disorders within selected physiological systems are explored from a developmental and multicultural perspective.

N X94R. Pediatric Acute Care Management I: Clinical.
Provides an opportunity for the beginner acute care pediatric nurse practitioner student to apply advanced knowledge of pathophysiology, pharmacology, current research and evidence, and diagnostic and psychomotor skills to caring for children with complex acute, critical, and chronic health conditions, and their families.

N X94S. Pediatric Acute Care Management II.
Designed to prepare students to recognize, interpret, and respond to emerging health crises and organ system dysfunction or failure of physiological systems in children with complex acute, critical, and chronic health conditions. Emphasizes patient stabilization, minimizing complications, and restoring maximum health potential. Explores core concepts such as transport, complex discharge planning, rehabilitation, home care, and long-term care.

N X94T. Pediatric Acute Care Management II: Clinical.
Designed to prepare students for clinical competence consistent with that of a beginner acute care pediatric nurse practitioner. Under the supervision of faculty and preceptors, students integrate advanced knowledge of pathophysiology, pharmacology, current research and evidence, and diagnostic and psychomotor skills to create comprehensive management plans for children with complex acute, critical, and chronic health conditions.

N X94U. Pediatric Acute Care Advanced Practicum.
Designed to prepare students to demonstrate the clinical competence of an advanced beginner acute care pediatric nurse practitioner. Under the supervision of faculty and preceptors, students have the opportunity to make independent and interdependent decisions in managing emerging health crises and organ system dysfunction in children with a variety of complex acute, critical, and chronic health conditions. Students work in a variety of settings, including emergency departments, intensive care units, inpatient medical and surgical units, and subspecialty clinics. Explores the legal, political, and ethical issues affecting nurse practitioner practice.

N X94V. Child Adolescent Psychiatric Mental Health for Primary Care.
Examines foundational content relative to the care of children and adolescents with behavioral and psychiatric mental health disorders. Aspects of care examined will include health promotion, screening, treatment and referral to psychiatric mental health specialists. Focus on inter-professional and collaborative practice using evidence-based models for evaluation and management of common behavioral and psychiatric mental health disorders in the child and adolescent.

N X94W. Pediatric Clinical Pharmacology and Therapeutics in Acute Care.
Explore pediatric pharmacotherapeutics with emphasis on pharmacokinetics, pharmacodynamics, administration and education in acute care settings.

N X95. Topics in Nursing.
Areas of special interest.

N X95C. Clinical Pharmacology and Therapeutics.
Application of pharmacologic and pharmacokinetic principles to drug therapy management in family primary care nursing.

N X95D. Pediatric Clinical Pharmacology and Therapeutics.
The study of pediatric pharmacotherapeutics, with emphasis on pharmacokinetics, pharmacodynamics, administration, and education.

N X95F. Theoretical Foundations for Nursing Practice.
Examines the nature of theory and theory development for nursing practice; the application of theory to practice, practice change, and scholarship are also explored.

N X95N. Biostatistics.
Basic concepts in descriptive and inferential statistical methods. Explores intermediate statistical concepts including analysis of variance (ANOVA) with planned comparisons and post-hoc tests, factorial ANOVA, bivariate linear correlation and logistic and multiple regression, survival analysis, the chi-square tests for goodness of fit and association, the Mann-Whitney U test, and the essentials of sample size estimation.

N X95P. Health Care Economics.
Explores basic economic theory, market drivers and restraints, health care budget, financial management and reimbursement, cost/benefit analysis, and healthcare entrepreneurialism. Includes theory and application, with a particular focus on the clinical role of the Doctor of Nursing Practice within the contemporary healthcare environment.

N X95Q. Professional Practice of the FNP.
Explores concepts and theory from nursing, social, and biological sciences related to primary care management of complex health/illness conditions in adults and children as members of families. Emphasis is on community/social issues influencing individual and family health, complex individual, family and/or community interventions, advanced role development and legal, political, ethical issues affecting nurse practitioner practice.

N X96C. Advanced Pathophysiology.
Pathophysiologic concepts from the cellular level through major body systems and across the life span. Etiological, pathogenic, and presenting patterns. Fundamental concepts of anatomy and physiology. Students are expected to develop an understanding of nursing and medical interventions for common health problems and the ability to apply and design interventions based on pathophysiologic changes.

N X96J. Advanced Health Assessment.
Advanced knowledge and skills involved in the assessment of individuals throughout the life span, within the context of the family, to determine their health status.

N X96L. Primary Health Care Concepts I.
Theoretical and clinical knowledge needed for advanced nursing management within the context of the family and the community of individuals who are essentially well or who have minor health problems.

N X96M. Primary Health Care Concepts I Clinic.
Supervised experience in the nursing management of infants, children, and/or advanced adults and families who are well or who have common acute health problems.

N X96N. Primary Health Care Concepts II.
Theoretical and clinical knowledge needed for the management of complex and chronic health problems of individuals and families.

N X96P. Primary Health Care Concepts II Clinic.
Supervised experience in the nursing management of infants, children, adults, and families who have complex or chronic health problems.

N X96Q. Primary Health Care Concepts III.
Offers the FNP student the theoretical and clinical content for management of complex health problems throughout the lifespan. Focus is on the integration and application of skills and knowledge gained in prior FNP coursework for pediatric, adult, and aging clients in primary health care settings. Use pattern recognition, critical thinking, analysis, diagnostic testing, differential diagnosis and medical management of complex health problems throughout the lifespan.

N X96R. Primary Health Care Concepts III Clinic.
Advanced supervised experience as a direct primary health care giver in family practice clinical settings.

N X96S. Special Project in Advanced Practice.
Development of a special project in an area of research, policy, or clinical issues relevant to advanced practice.

N X96T. Ecological Approaches to Child Health.
The ecological approach to understanding individual, parental, family, and societal determinants of children's health. Students gain knowledge of developmental and family theories and use epidemiological principles to comprehend the complex dimensions and related conceptual factors that contribute to the health and well-being of children within families. Theoretical foundations for graduate students interested in health promotion and risk reduction for children and families.

N X96U. Pediatric Primary Health Care Concepts II.
Theoretical knowledge relevant to the management of complex and chronic primary health care problems from infancy through adolescence.

N X96V. Pediatric Primary Health Care Concepts II Clinic.
Clinical practice in the management of complex or chronic health problems of infants, children, and adolescents in a specialty setting as well as management in primary care.

N X97C. Doctoral Seminar I.
Introduction to nursing science. Explores the history, current priorities, and funding mechanisms of science development in nursing along with established programs of nursing research. Provides a forum for students to develop and exchange ideas regarding research topics.

N X97D. Doctoral Seminar II.

N X97L. Topics in Nursing Research Methods.

N X97L.1. Analysis and Interpretation of Data.
Critiquing, interpreting, disseminating, and using research findings.

N X97L.2. Instrumentation and Measurement.
Theoretical, methodological, and procedural aspects of measurement: norm-referenced and criterion-referenced measurement; data management and instrumentation.

N X97L.3. Conceptual Foundations of Research Design and Methods.
Theoretical approach to basic statistical and measurement concepts and their importance to research in health-related areas.

N X97L.4. Critical Review of the Literature.
Designed to assist the novice researcher in conducting a systematic and critical review of the literature in a substantial area of health-related scholarship.

N X97L.5. Quantitative Design, Methods, and Analysis.
The quantitative research design, methods, and analyses used in health care research. Includes descriptive, correlational, and experimental designs; related methods of analyses using statistical software; and interpretation of data.

N X97M. Qualitative Research.
Introduction to the theoretical and methodological aspects of qualitative research methods. Qualitative research approaches from a variety of disciplines and philosophical traditions, with emphasis on the application of research designs and data collection and analysis techniques to nursing studies.

N X97N. Correlation and Regression in Health Research.
Examine the principles and applications of statistical techniques using a linear model approach. Explore correlation, partial correlation, linear regression, multiple regression, and logistic regression.

N X97P. Nursing Research Practicum.
Guided experience in conceptual and methodological aspects of research: data management and analysis; critique and interpretation; instrumentation; and measurement.

N X97Q. Research Practicum I.
Examine essential aspects of the responsible conduct of research and beginning skills needed to initiate a research program. Transition into the role of the nurse scientist with emphasis on individual career development, sustaining a program of research, and evolving research trajectories. Focus on conceptual, methodological, and practical aspects of research within an ongoing faculty research project.

N X97R. Research Practicum II.
Examine essential procedural aspects of conducting health-related research and developing skills in scholarly leadership and service. Explore subjects such as drafting research questions, recruitment and retention of participants, data collection methods, and management of data. Focus on conceptual, methodological, and practical aspects of research within an ongoing faculty research project.

N X97S. Research Practicum III.
Focuses on essential skills needed to develop a research proposal and plan an independent research program. Students focus on conceptual, methodological, and practical aspects of research within an ongoing faculty research project.

N X97W. Developmental Writing.
Study writing skills for graduate level course work, including clarity and continuity of thought, use of proper grammar, and proper use of APA format.

N X98. Thesis.

N X98C. Theoretical Basis for Precision Health Implementation Science.
Examine a scoping review of the theoretical foundations of precision health and implementation science approaches. Explore biological, technological, behavioral, and social-ecological health contexts; and team science approaches and ethics related to implementing precision health approaches.

N X98D. Designing Precision Health and Implementation Science Research.
Analyze the scientific rigor of precision health approaches to intervention, data collection, and other study procedures. Examine cutting-edge strategies, emerging resources, and rigorous approaches to precision health research and their potential application to multiple chronic conditions.

N X98E. Precision Health Interventions for Self-Management.
Examine issues and approaches in design and implementation of precision health self-management interventions for multiple chronic conditions. Engage in hands-on practice with application of concepts to student-defined, instructor-approved projects.

N X98T. Supervised Teaching and Learning in Nursing.
Designed to introduce the student to the essential elements of nursing education prior to engaging in the role of assistant instructor. Critical elements include the theoretical bases of teaching and learning; teaching strategies for clinical and classroom settings; assessment and evaluation strategies for various educational settings; ethical and legal considerations; and the importance of engaging in the scholarship of teaching.

N X99W. Dissertation.

Professional Courses

N X84C. Professional Nursing Foundations.
Introduction to fundamental nursing care concepts, processes, and skills, including communication and assessment.

N E - Nuclear Engineering

Nuclear Engineering: N E

Lower-Division Courses

N E X19S. Topics in Nuclear Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Cockrell School of Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

Upper-Division Courses

N E X29S. Topics in Nuclear Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Cockrell School of Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

N E X36P. Concepts in Nuclear and Radiation Engineering.
Explore different aspects and applications of nuclear and radiation engineering/physics. Examine the history of nuclear development, basic concepts of radiation and radioactivity, radioactive waste management, global warming and the impact of nuclear power plants, industrial applications, health physics, nuclear medicine, job opportunities at power plants, non-proliferation, and nuclear security.

N E X37C. Introduction to Nuclear Power Systems.
Explore radioactivity, nuclear interactions: fission and fusion, fission reactors, nuclear power systems, nuclear power safety.

N E X37F. Nuclear Environmental Protection.
Explore ionizing radiation and its interactions with matter and living tissues; radioactive decay kinetics; external and internal dose measurement; transportation through the environment; managing radioactive waste streams; and safeguards.

N E X37G. Nuclear Safety and Security.
Explore policy and technical aspects related to nuclear safety and security. Evaluate the proliferation of risk from facilities within the nuclear fuel cycle. Examine the criticality conditions for a nuclear assembly and derive parent/daughter decay equations.

N E X61E. Nuclear Reactor Operations and Engineering.
Explore fission and chain reactions; neutron diffusion and moderation; reactor equations; Fermi Age theory; and multigroup and multiregional analysis.

N E X61F. Radiation and Radiation Protection Laboratory.
Introduction to the application of radiation and radiation protection instrumentation. Lecture and laboratory topics include personnel monitoring, radiation detection systems, gamma-ray spectroscopy, determination of environmental radiation, counting statistics, gamma and neutron shielding, and air sampling.

Graduate Courses

Professional Courses

N S - Naval Science

Naval Science: N S

Lower-Division Courses

N S X00. Drill.

N S X02. Introduction to Naval Science.
A general introduction to sea power and the naval service, including the mission, organization, regulations, warfare components, and personnel programs.

N S X12. Sea Power and Maritime Affairs.
A consideration of the influence of sea power, naval history, and maritime affairs on current events and national policy.

N S X15. Naval Engineering.
Introduction to types, structures, and purposes of naval ships and systems.

N S X16. Naval Weapons Systems.
Introduction to types, capabilities, and purposes of Naval weapons systems.

N S X19S. Topics in Naval Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Naval Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

N S X30. Leadership and Ethics.
Principles of leadership and ethics reinforced through seminar discussion and case studies. Discussion of the duties and responsibilities of a naval officer.

Upper-Division Courses

N S X12. Sea Power and Maritime Affairs.
A consideration of the influence of sea power, naval history, and maritime affairs on current events and national policy.

N S X26. Evolution of Warfare.
Explores the forms of warfare employed by great leaders in history as they relate to the evolution of warfare.

N S X29. Navigation and Naval Operations I.
An introduction to piloting, a survey of navigational aids, and a study of the Rules of the Nautical Road.

N S X29S. Topics in Naval Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Naval Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

N S X30. Leadership and Ethics.
Principles of leadership and ethics reinforced through seminar discussion and case studies. Discussion of the duties and responsibilities of a naval officer.

N S X35. Leadership and Management.
Study of leadership and management theory in organizations, with emphasis on examining the leadership process in the context of the dynamic interaction of the leader, the followers, and the situation.

N S X36. Fundamentals of Maneuver Warfare.
Intended for Naval ROTC students. Focuses on the evolution of the United States Marine Corps as a maneuver warfare organization, with particular attention devoted to the structure and capabilities of the present day USMC as a forward deployed and rapid deployment force and the development of Expeditionary Maneuver Warfare concepts.

N S X62. Amphibious Warfare.
Defines the concept of amphibious warfare, explores its doctrinal origins, and traces its evolution as an element of naval policy during the twentieth century.

N S X69. Navigation and Naval Operations II.
Study of the celestial sphere and nautical astronomy to determine positions on the earth by mathematical analysis, and an introduction to relative motion and the maneuvering board.

Graduate Courses

N S X12. Sea Power and Maritime Affairs.
A consideration of the influence of sea power, naval history, and maritime affairs on current events and national policy.

N S X30. Leadership and Ethics.
Principles of leadership and ethics reinforced through seminar discussion and case studies. Discussion of the duties and responsibilities of a naval officer.

Professional Courses

N S X12. Sea Power and Maritime Affairs.
A consideration of the influence of sea power, naval history, and maritime affairs on current events and national policy.

N S X30. Leadership and Ethics.
Principles of leadership and ethics reinforced through seminar discussion and case studies. Discussion of the duties and responsibilities of a naval officer.

NEU - Neuroscience

Neuroscience: NEU

Lower-Division Courses

NEU X19S. Topics in Neuroscience.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Neuroscience. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

NEU X20. Introduction to Neuroscience.
Introduction to the nervous system with an emphasis on brain organization, neuron physiology, perceptual systems, and motor systems. Designed for non-neuroscience majors.

NEU X29S. Topics in Neuroscience.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Neuroscience. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

NEU X30. Neural Systems I.
Introduction to the nervous system with an emphasis on brain organization, neuron physiology, perceptual systems, and motor systems.

NEU X35. Neural Systems II.
Introduction to the nervous system with an emphasis on neural development and on the neural mechanisms of memory, emotions, and other higher cognitive functions.

NEU X37. Selected Topics in Neuroscience.
Topics include recent developments and research methods in the field of neuroscience.

NEU X37.3. Neuroscience for Plan II.

NEU X37.6. Rigor in Neuroscience.
Explore the application and integration of many different approaches, from molecules to behavior. Includes statistics, experimental design,

and philosophy of science with a mixture of discussion and hands-on training.

NEU X40. Neural Systems III: Quantitative Tools.
Introduction to quantitative approaches central to the study of the brain, with an emphasis on mathematical and statistical methods required for the rigorous design and interpretation of neuroscience experiments and data.

NEU X61T. Comparative Animal Physiology.
Examine the physiology of organ systems in animal phyla, with special emphasis on the neural and behavioral adaptations of organisms to their environment.

NEU X65D. Principles of Drug Action.
Introduction to the basic principles of pharmacology; including how drugs get into the body, exert their actions, and are metabolized and excreted.

NEU X65E. Epigenetics of Neuroscience.
Explore how epigenetic modifications cause long-lasting changes in gene expression.

NEU X65L. Neurobiology Laboratory.
An introduction to physiological, morphological, and molecular techniques used for analysis of the nervous system. Experiments and computer simulations illustrate basics of information processing by the nervous system.

NEU X65M. Advanced Experimental Neurobiology.
Examine neocortical cell and circuit function through presentation and critique of research goals and strategies.

NEU X65N. Nerve Regeneration in Invertebrates and Vertebrates.
Explore use of nerve regeneration and degeneration in invertebrate vs vertebrate systems to synthesize concepts in neuroscience.

NEU X65P. Programming and Data Analysis for Modern Neuroscience.
Explore the basics of programming, statistics, and machine learning, and apply these techniques to the analysis of data from neuroscience experiments.

NEU X65T. Neurobiology of Disease.
The neurobiological basis of disorders of the brain, with the main focus on mental illness. Emphasizes the neural circuitries and neurochemical events that underlie specific mental processes and behaviors.

NEU X65W. Neurobiology of Addiction.
Study of the neurobiology of neurotransmitters, and the influence of alcohol and drugs of abuse on neurotransmitters.

NEU X66C. Ion Channels and the Molecular Physiology of Neuronal Signaling.
Explores the role of molecular conformational changes in higher-level neuronal function and sensory transduction, including the generation and regulation of diverse types of neuronal signaling characteristics. Emphasizes a quantitative approach and the use of models to study function.

NEU X66D. Synaptic Physiology and Plasticity.
Detailed study of the physiology of synaptic transmission in the mammalian central nervous system. Covers dendritic integration and various forms and mechanisms of synaptic plasticity.

NEU X66G. Functional and Synaptic Neuroanatomy.
Neuroanatomy and function of synapses as a basis for brain function and behavior. Examine the ultrastructure and function of synapses, dendrites and axons underlying basic synaptic transmission and plasticity. Laboratory projects involve three-dimensional reconstructions from serial section electron microscopy.

NEU X66L. Neuroimaging Laboratory.
Basic principles of image formation and techniques of fluorescent imaging and confocal laser-scanning microscopy. Includes image processing and analysis to extract quantitative information from digital images. Survey of imaging techniques, including electron microscopy and MRI.

NEU X66R. Rhythms in the Nervous System.
Explore the study of systems of oscillators in the nervous system including mechanisms of generation and theories about functions.

NEU X66S. Neuromolecular Genetics and Disease Laboratory.
Explores techniques used to study the molecular genetic basis for nervous system function and disease with a powerful invertebrate model system. Subjects will range from studying the conserved molecular basis for our senses and male/female-specific behaviors, to exploring how mutations of conserved neural genes cause neurological disorders, such as Parkinson's disease and Alzheimer's disease.

NEU X66T. Modeling and Theory in Neuroscience.
Examine the basic mathematical and computational tools central to the analysis of neural systems in a laboratory setting. Discuss linear algebra, differential equations, filtering, correlation, probability with an emphasis on quantitative methodology and applications to neuroscience.

NEU X66W. Neural Computation.
Examine why quantitative methods are so important in neuroscience. Learn how to apply basic mathematical concepts to neuroscience, with the goal of seeing the applications of these concepts more broadly and appreciating the interactions between neuroscience and other quantitative fields.

NEU X67C. Cellular and Molecular Bases of Neural Development.
Introduction to the principles by which the neural tube (brain and spinal cord) forms during embryonic development. Discuss the cellular and molecular mechanisms underlying the formation of a three-dimensional neural tube and its division into forebrain, midbrain, hindbrain, and spinal cord.

NEU X67F. Foundations of Human Neuroimaging.
Survey of methods for neuroimaging research. Describes the physics of MRI image acquisition, the physiology of neural responses, and the design and analysis of MRI studies.

NEU X67S. Analytical Skepticism.
Examine basic principles that allow accurate interpretation and depiction of scientific data, with an emphasis on notions of behavioral economics, probability and statistics, and experimental design.

NEU X67V. Evolutionary Neurobiology.
Examination of the nervous system in an evolutionary context.

NEU X70C. Topics in Neuroscience.
Supervised study of selected topics in Neuroscience, by individual arrangement with the instructor.

NEU X77. Undergraduate Research.
Laboratory or research in the various fields of neuroscience under the supervision of one or more faculty members.

NEU X79H. Honors Tutorial Course.
Original laboratory research project under the direction of a faculty mentor leading to a thesis or research presentation.

NEU X79N. Neuroscience and Computer Science Capstone.
Investigate questions at the intersection of neuroscience and computer science through collaborative projects. Develop computational tools and methods to study the brain and behavior. Explore how ideas from neuroscience and computer science can inform each other.

Graduate Courses

NEU X80C. Computational Neuroscience.
Introduction to computational neuroscience. Examines neural network and learning theory, coding, dynamics, memory, computation and learning in recurrent and feed forward neural circuits.

NEU X80E. Vision Systems.
Introduction to the anatomy, physiology, and psychophysics of human vision from an information-processing and computational perspective.

NEU X80M. Dual MD/PhD Program with UT Medical Branch.
Preclinical medical study at the University of Texas Medical Branch at Galveston.

NEU X81G. Grant Writing in the Behavioral and Biological Sciences.
Introduction to grant writing in the behavioral and biological sciences and development of grant writing skills. Subjects include: finding grant opportunities, planning proposal activities, successful grant writing strategies, and how to talk to grant program officers. Write grant proposals (e.g., proposals to federal agencies such as NSF or NIH) and revise proposals based on peer and instructor feedback. Explore how grant proposals are reviewed by participating in a mock review session.

NEU X81N. Basic Processes of Nerve Cells.
Degeneration and regeneration in nervous systems following traumatic injury; invertebrate versus vertebrate, peripheral nervous system versus central nervous system, axonal versus cell body, role of glia versus neurons.

NEU X81V. Mechanisms of Vision.
Physiology of the eye, the retina, and the visual pathways. Prospects for nutritional prevention of blinding eye diseases. Functional and ecological adaptations of primate and nonprimate vision.

NEU X82E. Epigenetics.
Study of how epigenetic modifications are covalent modifications of DNA or histones that cause changes in gene expression and how epigenetic modifications appear to be a method through which nurture or the environment can influence nature. Emphasis on how experience or environmental factors epigenetically modify health or behavior of animals.

NEU X82T. Principles of Neuroscience I.
Examines the core material on essential topics in molecular and cellular neuroscience, together with review and discussion of important early studies and contemporary literature.

NEU X82V. Neural and Computational Basis of Vision.
Introduction to the physiology, psychophysics and computational aspects of the visual system. Review linear systems analysis, information theory, Bayesian statistical decision theory, and other relevant mathematical areas.

NEU X83C. Functional Neuroanatomy.
An examination of the anatomy of the brain and spinal cord, emphasizing connections and functions of neural systems.

NEU X83D. Neuropharmacology.
An advanced survey of neurotransmitters and systems in the brain. Emphasis is on pharmacological analysis at the molecular level to determine mechanisms of action of drugs that act on the brain.

NEU X83E. Neuropharmacology II.
Explore neuropharmacological concepts related to brain development, organization and anatomy; neuroendocrinology, neuroimmunology and neuroinflammation; gut-brain axis; neurobiology of addiction; and others.

NEU X83M. Data Analysis and Statistics for the Neurosciences.
Statistical applications relevant to areas of research in neuroscience.

NEU X83T. Principles of Neuroscience II.
Examines the core material on essential subjects in systems and behavioral neuroscience, together with review and discussion of important early studies and contemporary literature.

NEU X84C. Bootstrap Statistics.
An introduction to modern methods of statistical analysis based on numerical computer simulation. Covers a range of common data analysis situations drawn mainly from the fields of neuroscience and experimental psychology. Techniques include point estimation, two-group and multiple group experiments, regression and curve fitting, and Bayesian analysis.

NEU X84M. Advanced Statistics: Inferential.
Covers t-test, chi-square, analysis of variance, and nonparametric tests.

NEU X85D. Responsible Conduct of Science.
Ethical considerations in the conduct of science, including issues of animal welfare, data analysis, fraud, publications, misconduct, intellectual property, grants, peer review, and mentor responsibility.

NEU X85L. Topics in Neuroscience.

NEU X85L.12. Quantifying Brain Structure.
Concepts and hands-on applications for quantifying aspects of brain and cellular structure, with a focus on stereological approaches.

NEU X85L.13. Neurobiology of Disease.
Examines the neurobiological basis of disorders of the brain, with a focus on mental illness. Emphasis on the neural circuitries and neurochemical events that underlie specific mental processes and behaviors.

NEU X85L.3. Addiction Biology.
Current research in addiction biology. Students present individual research papers and reports.

NEU X85L.5. Behavioral Neuroendocrinology.
Current research in neuroendocrinology, including action of neuroendocrine systems on behavior, assays of substances in the blood to identify gene products, and examination of stress from neuroendocrine, behavioral, health, and immunity perspectives.

NEU X85L.6. Foundations of Human Neuroimaging.
A survey of the foundations for neuroimaging research with a focus on cognitive neuroscience. Describes the physical methods of image acquisition and physiological mechanisms used for functional imaging. Emphasis on magnetic resonance methods for structural and functional imaging. Surveys other imaging modalities, including positron emission tomography (PET), optical, and EEG/MEG electrical source localization.

NEU X85L.7. Topics in Vision and Hearing.
Current research in human vision and hearing.

NEU X85L.8. Ion Channels and Neuronal Signaling.
Molecular properties of ion channels and the mechanisms of electrical signaling in neurons and other excitable cells.

NEU X85L.9. Synaptic Physiology and Plasticity in the Central Nervous System.
Detailed background in the physiology and plasticity of synaptic transmission in the mammalian central nervous system.

NEU X85P. Programming and Data Analysis for Modern Neuroscience.
Explore the basics of programming, statistics, and machine learning, and apply these techniques to the analysis of data from neuroscience experiments.

NEU X86D. Multivariate Pattern Analysis.
Explores cutting-edge techniques for finding meaningful patterns in large, noisy brain data sets, and how to use these techniques to address a variety of questions in cognitive neuroscience.

NEU X86T. Modeling and Theory in Neuroscience.
Examine the basic mathematical and computational tools central to the analysis of neural systems in a laboratory setting. Discuss linear algebra, differential equations, filtering, correlation, probability with an emphasis on quantitative methodology and applications to neuroscience.

NEU X87S. Analytical Skepticism.
Examine basic principles that allow accurate interpretation and depiction of scientific data, with an emphasis on notions of behavioral economics, probability and statistics, and experimental design.

NEU X88M. Fundamentals of Fluorescence Microscopy.
Explores optics, image formation, functioning of epifluorescent and confocal microscopes, detector technology (cameras and photomultiplier tubes), immunofluorescence techniques, image analyses, and image presentation for publication. Study of the technology and science behind widely-used high-end microscope systems.

NEU X88V. Career Development for Neuroscientists.
Explore a range of careers in neuroscience and career development. Discuss professional development and careers with scientists from industry, academia, and government agencies.

NEU X90. Research.

NEU X91. Graduate Seminar in Neuroscience.
Presentations and discussions of research topics in neuroscience.

NEU X91N. Learning and Memory.
Presentation of contemporary approaches to the study of conditioning and learning at the behavioral level. Focuses on empirical data and theoretical analysis of acquisition and performance in Pavlovian and instrumental conditioning. Includes discussion of habituation, sensitization, stimulus control, and other paradigms for studying cognitive processes in nonverbal organisms.

NEU X94I. Neuroinflammation in Health and Pathology.
Assess cutting-edge pre-clinical and clinical neuroimmune research, and interact with professors from across campus in special seminars.

NEU X94N. Neural Networks.
Biological information processing; architectures and algorithms for supervised learning, self-organization, reinforcement learning, and neuro-evolution; theoretical analysis; hardware implementations and simulators; applications in engineering, artificial intelligence, and cognitive science.

NEU X94P. Topics in Neuroscience: Seminar.

NEU X94P.1. Current Topics in Behavioral Neuroscience.
Brain-behavior relationships, particularly recent research in behavioral neuroscience, including the anatomical and neurochemical mechanisms of behavioral events, and behavioral influences on the brain.

NEU X94P.10. Statistical Methods in Computational Neuroscience.
Introduction to statistical and computational methods for understanding information processing in the nervous system, with emphasis on neural coding and statistical modeling of neural responses.

NEU X94P.11. Integrative Omics in the Evolution of Development and Behavior.
Discuss the conceptual foundations and historical roots of research programs in evo-devo and evolutionary neuroscience including recent discoveries and limitations in these fields. Explore how -omics approaches and comparative methods enable novel insights into the diversification, convergence, and constraint of complex traits.

NEU X94P.3. Neurobiology of Learning and Memory.
Neuroanatomical systems that are functionally related to basic forms of learning and memory in mammals.

NEU X94P.4. Advanced Topics in Neuroanatomy.
Neuroanatomical systems and function across species. Basic forms of neuroanatomy in mammals.

NEU X94P.7. Analysis of Functional Magnetic Resonance Imaging Data.
Functional magnetic resonance imaging experimental design and analysis.

NEU X94P.8. Topics in Systems Neuroscience.
Focuses on one or two topics and examines them in depth through group discussions of key scientific manuscripts. Discusses both classical studies and contemporary research.

NEU X94P.9. Perception and Action.
Current topics in visually guided behavior, including eye movements, attention, and motor control, from behavioral, computational, and neurophysiological approaches.

NEU X96D. Clinical Psychopharmacology.
Recent findings concerning the mechanisms of action and the behavioral effects of psychoactive drugs, particularly those used in psychiatry.

NEU X98. Thesis.

NEU X99W. Dissertation.

Professional Courses

NOR - Norwegian

Norwegian: NOR

Lower-Division Courses

NOR X04. Accelerated First-Year Norwegian.

NOR X12. Accelerated Second-Year Norwegian.

NOR X19S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

NOR X29S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

NOR X27. Advanced Norwegian I.
Norwegian language and culture with a focus on the skills of speaking, comprehension, reading, and writing Norwegian.

NOR X28. Advanced Norwegian II.
Continuation of Norwegian 327. Further study of Norwegian reading, writing, speaking, and aural comprehension. Readings include contemporary journalism, fiction, and other texts that promote the understanding of a modern Scandinavian society.

NOR X29S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

NOR X30D. Norwegian across Disciplines.
Read and discuss Norwegian language materials related to the subject matter of another designated course.

NOR X79. Conference Course in Norwegian Language or Literature.
Supervised individual study of selected problems in Norwegian language or literature.

Graduate Courses

NOR X19S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

NOR X29S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Professional Courses

NOR X19S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser for the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

NOR X29S. Topics in Norwegian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

NRP - Nurse Professional

Nurse Professional: NRP

Lower-Division Courses

Upper-Division Courses

Graduate Courses

Professional Courses

NRP X80D. Family Care Concepts in Psychiatric-Mental Health Nursing.
Explore psychiatric-mental health nursing care for families with complex relational problems in various clinical settings. Discover applications of theoretical, ethical, and evidence-based practices to formulate delivery of culturally sensitive care within the community context. Examine common practices and treatment protocols, with emphasis on critical thinking skills inherent to the role of the Psychiatric-Mental Health Nurse Practitioner (PMHNP).

NRP X80E. Psychopharmacology for Advanced Practice Nurses.
Discuss prescribing and monitoring medications commonly used with patients who have psychiatric or mental health problems.

NRP X80F. Advanced Psychiatric and Mental Health Nursing I.
Study the theory and evidence bases for diagnosis and management of a variety of common psychiatric and behavioral disorders with an emphasis on diagnostic reasoning, clinical decision-making, and therapeutic strategies appropriate for the role of the family psychiatric and mental health nurse practitioner. Discuss the sociocultural and community context for patient care.

NRP X80J. Advanced Psychiatric and Mental Health Nursing II: Clinical.
Study the role of the advanced psychiatric and mental health nurse practitioner in providing care for patients and families with complex psychopathology and psychiatric and mental health problems in a variety of clinical settings. Gain knowledge from biological and psychosocial theories, psychopharmacology, health promotion, and ethics to develop culturally sensitive care. Discuss role development, evidenced-based practices, recommended practices and treatment protocols, ethical decision making, and critical thinking strategies.

NRP X80K. Advanced Psychiatric and Mental Health Nursing I: Clinical.
Apply knowledge related to biological and psychosocial theories, pharmacology, health promotion, and ethics to patients and families with common psychiatric and behavioral disorders in a precepted, clinical environment. Focus on role development using standardized procedures and tools that assist in diagnosis, treatment, and developing beginning-level therapy skills in multiple modalities.

NRP X80L. Advanced Psychiatric and Mental Health Nursing II.
Focus on the role of the family psychiatric and mental health nurse practitioner using theoretical bases for care of complex psychiatric and mental health patients with psychopathology in a variety of settings across the life span. Integrate various biological and psychosocial theories with psychopharmacology, health promotion, and ethical decision-making to develop culturally sensitive care. Discuss evidenced-based practices, recommended practices and treatment protocols, ethical decision making, and critical thinking strategies that are integral to the role of the family psychiatric and mental health nurse practitioner.

NRP X80Q. Psychiatric Assessment and Psychotherapy Skills.
Introduction to psychiatric-mental health assessment of individuals and families throughout the life span, using established therapeutic communication techniques, individual psychotherapeutic modalities, and psychotherapy skills from evidence-based practices. Examine synthesis of theories and knowledge from nursing, biology, psychiatry, psychology, and socio-cultural studies as they apply to the comprehensive assessment of psychiatric clients. Focus on assessment and psychotherapy skills commensurate with the role of the Psychiatric-Mental Health Nurse Practitioner (PMHNP) through didactic, experiential, and observational practice in the classroom.

NRP X80T. Psychiatric-Mental Health Nurse Practitioner: Management of Chronic Illness.
Analyze and apply physiological, psychosocial, spiritual, and environmental concepts to treat selected patients with chronic illness under supervised instruction in clinical agencies. Focus on dynamics of chronic illness and related psychiatric mental health nurse practitioner roles. Explore concepts relevant to the management of complex and chronic health care problems often comorbid with psychiatric illness.

NRP X89D. Adult-Gerontology Clinical Nurse Specialist: Health Promotion and Illness Prevention.
Analyze physiological, psychosocial, and environmental concepts and testing of assessments and interventions for select adult-gerontology (AG) populations across the life spectrum (young adults through older adults).

NRP X89G. Adult-Gerontology Clinical Nurse Specialist: Acute Care.
Analyze physiological, psychosocial, and environmental concepts and testing of assessments and interventions in select adult-gerontology populations experiencing acute illness. Focus on dynamics of acute illness and related Adult-Gerontology Clinical Nurse specialist (AG-CNS) roles.

NRP X89H. Diagnosis and Management of Adult-Gerontology Health Problems.
Examine theoretical and clinical content for management of health problems of adult patients across the life spectrum (young adults through older adults). Integrate and apply skills and knowledge gained in previous adult-gerontology clinical nurse specialist coursework for adult patients in the acute or chronic setting. Discuss pattern recognition, critical thinking, analysis, diagnostic testing, differential diagnosis, and medical management of common adult, older-adult health problems.

NRP X89J. Adult-Gerontology Clinical Nurse Specialist: Chronic Illness.
Analyze physiological, psychosocial, spiritual, and environmental concepts and testing of assessment and interventions for select adult-

gerontology (AG) populations with chronic illness conditions. Focus on dynamics of multiple chronic illness and related Adult-Gerontology Clinical Nurse specialist (AG-CNS) roles.

NRP X89M. Adult-Gerontology Clinical Nurse Specialist: Practicum I.

Discuss the clinical application of Adult-Gerontology Clinical Nurse Specialist (AG-CNS) core competencies in delivery of care for select adult-gerontology (AG) populations to promote health and manage acute and/or multiple chronic conditions at the patient, nurse, and system level. Prepare for certification and credentialing as an AG-CNS.

NRP X89N. Adult-Gerontology Clinical Nurse Specialist: Practicum II.

Discuss the clinical application of Adult-Gerontology Clinical Nurse Specialist (AG-CNS) core competencies in the delivery of care for select adult-gerontology (AG) populations to promote health and manage acute and/or multiple chronic conditions at the patient, nurse, and system level. Prepare for certification and credentialing as an AG-CNS.

NRP X89R. Application of Adult-Gerontology Clinical Nurse Specialist Roles.

Explore the Adult-Gerontology Clinical Nurse Specialist (AG-CNS) roles through guided field experience and clinical application outside of direct patient sphere, including educator, leader, researcher, or advocate in the system or nursing spheres.

NRP X93C. Advanced Pediatric Health Assessment.

Explore advanced developmental and health assessment of children (newborn through adolescent), with an emphasis on theories and skills applicable to the assessment of children.

NRP X93D. Advanced Pediatric Pharmacology.

Study pediatric pharmacotherapeutics, with emphasis on pharmacokinetics, pharmacodynamics, administration, and education.

NRP X93E. Pediatric Nurse Practitioner Primary Care I.

Study health promotion, anticipatory guidance, prevention of illness, and the assessment and management of acute illnesses commonly affecting children. Discuss concepts related to the advanced role development of nurse practitioners.

NRP X93G. Pediatric Nurse Practitioner Primary Care II.

Examine theoretical knowledge relevant to the management of complex and chronic primary health care problems from infancy through adolescence.

NRP X93H. Pediatric Nursing Practitioner Primary Care II Clinical.

Attain clinical experience in the management of complex or chronic health problems of infants, children, and adolescents in a specialty setting, as well as management in primary care.

NRP X93K. Pediatric Nurse Practitioner Primary Care I Clinical.

Participate in clinical experience in primary care settings, focus on health promotion and management of well-child care and acute illnesses commonly encountered in children.

NRP X93N. Pediatric Diagnostic Reasoning and Advanced Invasive Skills.

Interpret laboratory and diagnostic testing. Discuss the development of diagnostic and psychomotor skills needed to care for acute or critically ill pediatric patients.

NRP X94J. Pediatric Primary Health Care Concepts III.

Explore primary care management of complex conditions in children. Focus on advanced role development of the pediatric nurse practitioner.

NRP X94K. Pediatric Primary Health Care Concepts III Clinic.

Participate in pediatric primary health care practicum in the advanced nursing management of the health of infants, children, and adolescents.

NRP X94Q. Pediatric Acute Care Management I.

Prepare to recognize, interpret, and respond to emerging health crises and organ system dysfunction or failure in children with complex acute, critical, and chronic health conditions. Discuss patient stabilization, minimizing complications, restoring maximal health potential through risk reduction, and providing physical and psychosocial support to the patient and family. Explore acute, critical, and chronic disorders within selected physiological systems from a developmental and multicultural perspective.

NRP X94R. Pediatric Primary Health Care Concepts I Clinic.

Participate in clinical experience in primary care settings, focusing on health promotion and management of well-child care and acute illnesses commonly encountered in children.

NRP X94S. Pediatric Acute Care Management II.

Prepare to recognize, interpret, and respond to emerging health crises and organ system dysfunction or failure of physiological systems in children with complex acute, critical, and chronic health conditions. Discuss patient stabilization, minimizing complications, and restoring maximum health potential. Explore core concepts such as transport, complex discharge planning, rehabilitation, home care, and long-term care.

NRP X94T. Pediatric Acute Care Management II: Clinical.

Prepare for clinical competence consistent with that of a beginner acute care pediatric nurse practitioner. Integrate advanced knowledge of pathophysiology, pharmacology, current research and evidence, and diagnostic and psychomotor skills to create comprehensive management plans for children with complex acute, critical, and chronic health conditions, under the supervision of faculty and preceptors.

NRP X94V. Child and Adolescent Psychiatric Mental Health for Primary Care.

Examine foundational content relative to the care of children and adolescents with behavioral and psychiatric mental health disorders. Discuss health promotion, screening, treatment, and referral to psychiatric mental health specialists. Focus on inter-professional and collaborative practice using evidence-based models for evaluation and management of common behavioral and psychiatric mental health disorders in the child and adolescent.

NRP X95. Topics in Nursing.

NRP X95C. Clinical Pharmacology and Therapeutics.

Apply pharmacologic and pharmacokinetic principles to drug therapy management in family primary care nursing.

NRP X95D. A Systems Approach to Health Promotion Across Diverse Populations.

Analyze the impact of social, cultural, and ecological factors on health decision-making, healthcare delivery, and health promotion behaviors among diverse populations and settings through application of theory, ethical principles, and health promotion methodologies.

NRP X95E. Health Policy for Diverse Systems and Populations.

Discuss the expanded role of clinical leaders in health policy advocacy at the organizational, community, state, national, and international level through examination of socio-political and economic contexts of health, advocacy, policy development, analysis, implementation, and evaluation.

NRP X95F. Health Care Economics and Finance.

Explore basic economic theory, market drivers and restraints, health care budgets, financial management and reimbursement in systems, cost/benefit analysis of programs or initiatives, and health care, entrepreneurism through theory, application, and clinical leadership principles.

NRP X95G. Translating Evidence into Nursing Practice.

Appraise literature critically and make recommendations for evidence-based practice changes, innovations, or guidelines to improve health care outcomes.

NRP X95K. Leadership in Organizations and Systems.

Explore leadership and systems theories, including philosophies, cultures, structures, processes, information management, interprofessional communication, and other areas relevant to healthcare organizations. Examine the role of the Doctor of Nursing Practice nurse within the larger context of the health care system.

NRP X95L. Quality Improvement and Safety Principles and Methods.
Apply the science of quality improvement and implementation to improve organizational effectiveness and health outcomes. Discuss strategies to enhance complex system thinking, process analysis, and measuring and monitoring quality and safety indicators. Explore developing and evaluating cost-effective improvement initiatives and implementation of evidence-based practices.

NRP X95M. Epidemiology and Population Health.
Explore the activities of international, national, state, and local entities in relation to population health, health disparities, and the needs of priority populations. Discuss basic epidemiological principles, disaster and emergency prevention and response, and inter-professional collaboration to identify, analyze, and evaluate key population health issues.

NRP X95O. Roles and Theory Foundations of the Nursing Practice Leadership Role.
Engage in both practicum experiences and self-directed scholarship to explore the development of the Doctor of Nursing Practice role and its unique contributions of clinical leadership within an interdisciplinary and dynamic healthcare environment. Refine and state the tenets of their personalized conceptual or theoretical framework derived from nursing theories and related sciences with the goal of improving healthcare practice outcomes and disseminating findings as a DNP clinical leader. Identify a clinical area of interest and begin to demonstrate standards of DNP practice, to improve healthcare outcomes for diverse populations.

NRP X95Q. Research and Evaluation Methods I.
Examine basic concepts in research and evaluation methods including quantitative and qualitative designs, descriptive and inferential statistics, reliability and validity, and data collection and extraction strategies that DNPs use to evaluate evidence-based literature.

NRP X95R. Research and Evaluation Methods II.
Apply research design, statistical and qualitative techniques, and data collection/extraction methods to the Doctor of Nursing Practice (DNP) Scholarly Project and other research, quality assurance, and program evaluation activities.

NRP X95S. Healthcare Information Systems.
Discuss interprofessional approaches to informatics by incorporating health specific disciplines (such as nursing and pharmacy), computer science, and information science. Examine resources and methods required to apply informatics and technology to implement clinical guidelines, support communication systems, and enhance safe health care delivery. Explore opportunities to analyze information requirements, design system alternatives, and consider the management of resources.

NRP X95T. Clinical Leadership Specialization Seminar and Practicum I.
Utilize practicum experiences and self-directed scholarship to conceptualize the area of clinical specialization and the Doctor of Nursing Practice (DNP) scholarly project. Propose evidence-based strategies for implementing and achieving health care outcomes, such as a pilot study, program evaluation, quality improvement, policy analysis, or practice-change initiative.

NRP X95U. Clinical Leadership Specialization Seminar and Practicum II.
Utilize practicum experiences and self-directed scholarship to assess the feasibility of conducting scholarly projects, which may consist of implementation of a significant pilot study, a program evaluation project, a quality improvement project, a policy analysis, or a practice change.

NRP X95V. Clinical Leadership Specialization Seminar and Practicum III.
Utilize practicum experiences and self-directed scholarship to implement a significant pilot study, a program evaluation project, a quality improvement project, a policy analysis, or a practice-change initiative in an identified area of clinical leadership specialization. Discuss implementation strategies, including incorporation of the most recent evidence-based practice in the management of patient care within an interdisciplinary practice model and utilization of evidence-based research in the clinical management of individuals, families, and communities. Explore leadership and systems analysis in complex organizations, managing interdisciplinary teams, improving educational systems, and developing and implementing quality improvement projects and evidence-based management systems to improve patient, population, and health systems outcomes.

NRP X95W. Clinical Leadership Specialization Seminar and Practicum IV.
Engage in both practicum experiences and self-directed scholarship to analyze, evaluate, and disseminate findings of the scholarly project (pilot study, a program evaluation project, a quality improvement project, a policy analysis, or a practice-change initiative) in an identified area of clinical leadership specialization.

NRP X96C. Advanced Pathophysiology.
Examine pathophysiologic concepts from the cellular level through major body systems and across the life span. Explore etiological, pathogenic, and presenting patterns. Discuss fundamental concepts of anatomy and physiology. Develop an understanding of nursing and medical interventions for common health problems and the ability to apply and design interventions based on pathophysiologic changes.

NRP X96G. Primary Health Care Concepts II Clinic.
Participate in supervised experience in the nursing management of infants, children, adults, and families who have complex or chronic health problems.

NRP X96H. Primary Health Care Concepts III Clinic.
Participate in advanced supervised experience as a direct primary health care giver in family practice clinical settings.

NRP X96J. Advanced Health Assessment.
Explore the advanced knowledge and skills involved in the assessment of individuals throughout the life span, within the context of the family, to determine their health status.

NRP X96K. Primary Health Care Concepts I Clinic.
Participate in supervised experience in the nursing management of infants, children, and/or advanced adults and families who are well or who have common acute health problems.

NRP X96L. Primary Health Care Concepts I.
Discuss theoretical and clinical knowledge needed for advanced nursing management within the context of the family and the community of individuals who are essentially well or who have minor health problems.

NRP X96N. Primary Health Care Concepts II.
Discuss theoretical and clinical knowledge needed for the management of complex and chronic health problems of individuals and families.

NRP X96Q. Primary Health Care Concepts III.
Focus on the integration and application of skills and knowledge gained in prior coursework for pediatric, adult, and aging clients in primary health care settings. Use pattern recognition, critical thinking, analysis, diagnostic testing, differential diagnosis and medical management of complex health problems throughout the lifespan.

NRP X98G. Advanced Leadership Practicum I.
Introduction to the steps of program planning with a focus on identification of evidence-based strategies for implementing interventions and improving health care outcomes as a Doctor of Nursing Practice (DNP)-prepared advanced practice nurse leader. Focus on application of theory, review of the literature and population data to frame the development of the DNP project.

NRP X98H. Advanced Leadership Practicum II.
Focus on the development of the Doctor of Nursing Practice (DNP) project proposal by applying advanced nursing competencies and integrating the best evidence into practice. Investigate financial costs, feasibility, outcomes, and sustainability of the project. Collaborate with team members and stakeholders to advance leadership skills and develop the DNP project proposal.

NRP X98J. Advanced Leadership Practicum III.
Focus on the implementation and evaluation of the Doctor of Nursing Practice (DNP) project demonstrating clinical judgment founded on a broad knowledge base, including integrating the best evidence into advanced nursing practice and optimizing system effectiveness. Utilize the application of innovation and evidence-based practice to improve patient, population, and health system outcomes.

NRP X98K. Advanced Leadership Practicum IV.
Focus on clinical scholarship and analytical methods to evaluate the Doctor of Nursing Practice (DNP) project and improve health outcomes of patients, communities, and systems. Disseminate the DNP project results to advance the scholarship of nursing and professional and leadership development and serve as a foundation for future scholarly practice.

NRP X98L. Epidemiology, Population Health, and Health Promotion.
Explore epidemiological statistics; examine patterns of health and disease in human populations; identify population health disparities and health inequities; examine models of health promotion; discuss primary, secondary, and tertiary prevention; examine the socioecological model, and social determinants of health; critique health promotion interventions and implementation strategies; and evaluate program outcomes for specific populations.

NRP X98M. Health Economics and Finance.
Explore basic economic theory, market drivers and restraints, cost/benefit analysis, health care budgets, accounting and financial management of healthcare services, and healthcare entrepreneurism to make effective financial, strategic, and operational decisions.

NRP X98N. Advanced Practice Nursing Advanced Practicum.
Explore the culmination of core competencies for knowledge of advanced nursing practice, person-centered care, interprofessional collaboration, and personal and professional nursing accountability for the respective Advanced Practice Nursing (APRN) concentration.

NRP X98P. Research Designs and Evaluation Methods for Evidence-Based Practice.
Focus on quantitative and qualitative research designs and evaluation methods to critically appraise studies as a basis for evidence-based practices. Differentiate design and methods that correspond to levels of evidence relevant to complex nursing decision-making for health care settings

NRP X98Q. Reviewing Evidence and Synthesizing Literature.
Build on knowledge of statistical and qualitative methods when evaluating research and quality improvement reports. Synthesize findings reported in health-related literature and conduct a critical review of the literature for a substantive area of health-related scholarship. Focus on using systematic approaches to searching, selecting, evaluating, synthesizing, and disseminating research evidence with particular attention to evaluation methods used.

NRP X98R. Foundations in Theory and Advanced Practice Nursing Roles.
Examine central and core competencies of advanced practice nursing roles in the context of the broader healthcare environment and interprofessional partnerships along with role expectations for practice with Doctor of Nursing Practice preparation. Understand and apply theory to guide practice, scholarship, and to facilitate excellence in healthcare.

NSC - Natural Sciences

Natural Sciences: NSC
Lower-Division Courses

NSC X01C. Freshman Seminar.
Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors.

NSC X01F. Experiential Learning.
Course may include research, career and networking events, student and community speakers, and other subjects related science. Emphasis on student participation.

NSC X01S. Natural Sciences Seminar.
Seminars may include study sessions, career and networking events, student and community speakers, and other subjects related to issues for students in science. Emphasis on student participation.

NSC X02. Texas Interdisciplinary Plan: Critical Thinking Seminar.
An examination of fundamental concepts in critical thinking, including the role of intellectual virtues, an analysis of the elements of thought, Socratic thinking, and the application of universal intellectual standards.

NSC X03. Creative Communication of Scientific Research.
Learn to communicate about science, technology, and medicine to broad audiences in order to increase understanding of the impact these fields have on human lives.

NSC X06. Dialogue Across Difference: Identity, Power, and Privilege.
Explore frameworks, terminology, critical thinking, and empathy tools for engaging in productive conversations around difficult subjects related to diversity, equity, and inclusion (DEI). Examine DEI resources, issues, and challenges across campus.

NSC X07. Diversity, Equity, and Inclusion Capstone.
Use critical, reflective thinking, and effective problem solving to: identify a diversity, equity, and inclusion (DEI) issue on campus or in the community to address and propose a solution or steps toward a solution; develop leadership in the DEI concentration; facilitate debriefs of DEI events and assist with concentration development.

NSC X07J. The Effective Health Care Professional.
Introduction to careers in the health professions. Discuss the intra- and inter- personal core competencies of the professions sought in healthcare providers. Work on the critical reasoning skills needed to succeed on reading comprehension and situational judgment tests found on traditional professional school placement exams.

NSC X07K. Thriving in a Collaborative Healthcare Environment.
Introduction to the collaborative relationship between the health professions. Work on the critical reasoning skills needed to succeed on reading comprehension and situational judgment tests found on traditional professional school placement exams.

NSC X07M. Introduction to the Health Professions Action Plan.
Discuss the steps necessary to complete a competitive application to professional school including the generation of an effective application, personal statement, and the refinement of skills for a successful professional school interview.

NSC X08. Topics in Natural Sciences.

NSC X08.1. Capstone Prospectus Seminar.
Seminar to prepare students for their capstone project by helping them develop a research prospectus, identify faculty mentors, and develop a target list of journals for publication of a report on their research.

NSC X08.2. Evidence and Inquiry Proposal Seminar.
Development of compelling, cross-disciplinary, and academically feasible questions of interest outside student's major area of study; design a field of study around those questions; and write a field proposal for faculty review.

NSC X09. Topics in Natural Science.

NSC X09.1. Planning Your Capstone Experience.
Develop a feasible capstone experience and consult with subject matter experts. Explore substantive writing instruction to develop a proposal that describes and justifies the capstone experience.

NSC X09.2. Health Science Scholars Capstone Experience Preparation.
Explore and determine a viable capstone experience to prepare for the honors thesis. Consult with subject matter experts. Receive substantial writing instruction to develop a written proposal that defends the capstone experience.
NSC X09.3. Natural Sciences Ethics Seminar.
NSC X09.4. Polymathic Capstone Field Invention.
Guidance in developing a feasible interdisciplinary field of study and consulting with faculty who are familiar with the field. Substantive writing instruction to develop a proposal that describes and justifies the interdisciplinary field of study.
NSC X09.5. Introduction to Applied Problem Solving.
Introduction to applied problem-solving with a focus on critical thinking and ethical reasoning on issues relevant to college students.
NSC X09P. Topics in Calculus for Emerging Scholars.
A workshop focusing on ideas more than computation and procedures, where students work in small groups on sets of problems designed to encourage advanced thinking about calculus.
NSC X10E. Internship in the Sciences.
Practical work experience related to the student's area of interest in natural sciences. Internships may be on or off campus, paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work.
NSC X10H. Topics in Natural Sciences Honors Seminar.
Emphasis on student participation. Format may include student speakers, outside speakers, discussions, visits to laboratories, or other enrichment activities.
NSC X10H.1. Dean's Scholars First-Year Seminar.
NSC X10H.2. Health Science Scholars First-Year Seminar.
NSC X10H.3. Polymathic Scholars First-Year Seminar.
NSC X11. Critical Reasoning.
An examination of the fundamental concepts in critical reasoning, including the analysis of argument, application of intellectual standards, and the role of intellectual virtues.
NSC X15. Women in Natural Sciences Seminar.
The work and lives of women scientists in a sociocultural context.
NSC X18C. Topics in Forum Seminar Series.
Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse.
NSC X19. Topics in International Learning Seminars.
Discussion of various issues related tot he academic, cultural, and personal aspects of completing academic work in international locations.
NSC X19S. Topics in Natural Science.
To record credit earned while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the College of Natural Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studied program.

Upper-Division Courses

NSC X20E. Internship in the Sciences.
Practical work experience related to the student's area of interest in Natural Sciences. Internships may be on or off campus, paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work.
NSC X21. Introduction to Peer Mentoring and Leadership.
Explores current theory and research related to peer mentoring and leadership within higher education. Includes interactive lectures; and the opportunity for students to identify and work through ethical choices as peer leaders; to study leadership concepts such as conflict resolution, diversity, and group dynamics; to work collaboratively; and to conduct independent research.
NSC X22. Natural Science Topics.
NSC X23. Natural Sciences Topics.
NSC X23.1. Polymathic Capstone Thesis Preparation Seminar.
Supports the research process to identify a faculty mentor, define appropriate thesis topics, develop an annotated bibliography, draft a thesis proposal, and develop an initial plan for drafting thesis.
NSC X24. Natural Sciences Topics.
NSC X25. Topics in Inventors Program Practicum.
Design, research, prototype, and test a STEM-related product or solution.
NSC X26. Introduction to Scientific Programming.
Introduction to programming using both the C and Fortran (95/2003) languages, with applications to basic scientific problems. Discuss common data types and structures, control structures, algorithms, performance measurement, and interoperability.
NSC X29. Topics in International Learning Seminars.
Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations.
NSC X29S. Topics in Natural Science.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the College of Natural Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
NSC X35. Scientific and Technical Computing.
Introduction to computing techniques and methods applicable to many scientific disciplines and technical applications. Discuss computer hardware and operating systems, systems software and tools, code development, numerical methods and math libraries, and basic visualization and data analysis tools.
NSC X71. Capstone Thesis Seminar.
Directed reading, research, and discussion followed by the writing of a substantial thesis.

Graduate Courses

NSC X88C. Science Communications Seminar.
Professional development supplemental to primary studies. Designed to develop skills in the effective communication of scientific concepts.
NSC X88D. Science Communications Practicum.
Professional development supplemental to primary studies. May be taking concurrently with the Science Communication Seminar. Opportunities to focus on skill development while receiving constructive assessment and evaluation.
NSC X88E. Professional Ethics and Social Responsibility in Research.
NSC X88G. Concentration on Science in Public Policy.
NSC X88J. Concentration in Science in Public Policy.
Identify and articulate the relevance of scientific scholarship to public policy.
NSC X88L. Introduction to Evidence-Based Teaching.
Designed for graduate students interested in learning to teach science and mathematics effectively in their own courses, rather than as Teaching Assistants. Subjects include defining learning objectives, designing learning tasks, observing classrooms to identify effective teaching strategies, and practice teaching. Intended for graduate students in the College of Natural Sciences.
NSC X88M. Mentoring Undergraduate Researchers.
Aims to develop graduate students' skills in mentoring undergraduates and other junior participants in STEM research. Explores how to define suitable projects, establish appropriate relationships, set expectations,

encourage communication, balance guidance with independence, and address diversity and ethical issues in mentoring.

NSC X88P. Leading People and Organizations.
Professional development supplemental to primary studies. Designed for graduate students in STEM disciplines. Explores the knowledge and skills necessary for scientists to manage and lead effectively within organizations.

NSC X88S. Strategic Management.
Professional development supplemental to primary studies. Designed to help students develop general management skills such as managing change strategically, implementing strategy, and addressing long-term health of an organization.

NSC X88T. Mentored Teaching.
Designed for graduate students who have completed NSC-088L Introduction to Evidence-Based Teaching, or its equivalent. Each student will design, teach, and conduct assessment of an instructional unit (~3 hours of class time) in an undergraduate CNS course, working in collaboration with the faculty member acting as instructor of record. Intended for graduate students in the College of Natural Sciences.

NSC X88V. STEM Professional Development.

NSC X98D. Investigating Career Options for STEM Advanced Degrees.

Professional Courses

NSC X80. Topics in Research for Independent Study.
Produce group and individual projects in research design, research methodologies, and research execution. Practice in a professional position under supervision.

NSP - National Security Policy

National Security Policy: NSP

Lower-Division Courses

NSP X09. Introduction to National Security.
Explore the actors, processes, and current challenges of U.S. national security. Examine policy formulation, the instruments of national security and their integration, and legal and ethical tensions. Learn about the array of current state and non-state actors threatening national and global security.

Upper-Division Courses

NSP X25. Topics in National Security Policy.
Survey various topics in national security policy.

NSP X30. Foundations of International Security: Theory and Practice.
Explore core foundational concepts and theoretical frameworks for explaining how state and non-state actors operate in the international arena. Learn how to identify, assess, and manage international security challenges.

NSP X31. National Security Institutions, Processes, and Politics.
Explore instruments of statecraft available to policymakers to advance and protect United States national security interests at home and abroad; departments, agencies, private sector elements, and branches of government with the authorities and equities to implement national security; and the politics, structures and processes of policy formulation.

NSP X32. Grand Strategy and Military Operations.
Learn to assess the integration of political, economic, and military factors to formulate comprehensive strategies that effectively achieve long-term objectives while navigating the intricacies of modern conflict. Explore the practical integration of national goals into the tactical execution of military campaigns. Examine historical precedents and contemporary case studies to understand the complex dynamics shaping strategic decision-making and operational planning in warfare.

NSP X34. Writing for National Security.
Develop the written and oral communication skills necessary for national security professionals. Explore the various genres of writing and presenting common in national security careers.

NSP X35. Economics for Foreign Policy.
Develop an understanding of economic power available to foreign policymakers. Explore the design and implementation of policies focused upon international trade, access to intellectual property, financial sanctions, and direct foreign investment by governments, private actors and multilateral lending organizations.

NSP X36. Analytical Methods for National Security.
Develop competency in the quantitative and qualitative techniques of research design and analysis widely used by professionals in the national security environment.

NSP X45. Advanced Topics in National Security Policy.
Examine various advanced topics in national security policy.

NSP X59. National Security Internship.
Participate in a supervised internship in an agency of government, a nonprofit organization, or a national security-related unit in the private sector.

NSP X70. Independent Study in National Security.
Undertake supervised individual research on a special subject in the field of national security policy.

Graduate Courses

NSP X80P. Topics in Policy Research Project on National Security Issues.
Conduct two semesters of interdisciplinary research on a contemporary national security policy problem involving interaction with sponsoring organizations.

NSP X83M. National Security Institutions, Processes, and Politics.
Explore instruments of statecraft available to policymakers to advance and protect United States national security interests at home and abroad; departments, agencies, private sector elements, and branches of government with the authorities and equities to implement national security; and the politics, structures and processes of policy formulation.

NSP X86W. Writing for National Security.
Develop the written and oral communication skills necessary for national security professionals. Explore the various genres of writing and presenting common in national security careers.

NSP X87M. Foundations of International Security: Theory and Practice.
Explore core foundational concepts and theoretical frameworks for explaining how state and non-state actors operate in the international arena. Learn how to identify, assess, and manage international security challenges.

NSP X89. Conference Course in National Security.
Individual instruction related to selected aspects of professional theory and practice in national security.

NSP X93M. Economics for Foreign Policy.
Develop an understanding of economic power available to foreign policymakers. Explore the design and implementation of policies focused upon international trade, access to intellectual property, financial sanctions, and direct foreign investment by governments, private actors and multilateral lending organizations.

NSP X95M. Grand Strategy and Military Operations.
Learn to assess the integration of political, economic, and military factors to formulate comprehensive strategies that effectively achieve long-term objectives while navigating the intricacies of modern conflict. Explore the practical integration of national goals into the tactical execution of military campaigns. Examine historical precedents and contemporary case studies to understand the complex dynamics shaping strategic decision-making and operational planning in warfare.

NSP X96K. Internship in National Security.
Participate in a supervised internship in an agency of government, a nonprofit organization, or a national security-related unit in the private sector.

NSP X97N. Analytical Methods for National Security.
Develop competency in the core quantitative and qualitative techniques of research design and analysis widely used by professionals in the national security environment.

NSP X98R. Master's Report.
Prepare a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

NTR - Nutrition

Nutrition: NTR

Lower-Division Courses

NTR X06. Fundamentals of Nutrition.
Essential food components and their functions in life processes.

NTR X07. Introductory Food Science.
Application of the principles of food chemistry to processing and preparation techniques.

NTR X07L. Introductory Food Science Laboratory.

NTR X12. Introduction to Nutritional Sciences.
Biochemical, physiological, and cellular functions of energy macronutrients, vitamins and minerals, and the scientific basis for current dietary and nutrient recommendations. Designed for science majors.

NTR X12H. Introduction to Nutritional Sciences: Honors.
Biochemical, molecular, and cellular functions of nutrients with emphasis on primary scientific literature and current methodology.

NTR X12L. Introduction to Nutritional Science Laboratory.
Collection and evaluation of dietary intake data, nutrient composition of food, and survey of dietetic practice.

NTR X12R. Research in Nutritional Sciences.
Introduction to biochemical and molecular biological techniques, enzyme and coenzyme assays, dietary analysis and assessment protocols, and statistical methods in nutritional sciences. Preparation of a scholarly paper and oral presentation of research findings.

NTR X15. Nutrition through the Life Cycle.
Adapting nutrition recommendations to physiological changes throughout the life span.

NTR X16. Culture and Food.
Influence of culture on foodways around the world.

NTR X17L. Introduction to Nutrition Assessment and Education.
Explore the fundamentals of nutrition assessment, nutrition education, and behavior change theories as well as their application to the care of individuals and groups in community and clinical settings. Analyze the use of anthropometric, biochemical, clinical, and dietary intake data assessments for effective care of individuals. Identify strategies for successful development and implementation of nutrition education planning using behavior change theory as the guide for development.

NTR X18. Assessment of Nutritional Status.
Assessment of nutritional status using anthropometric, biochemical, clinical, and dietary intake data, and development and implementation of effective care for individuals.

NTR X18L. Assessment of Nutritional Status Laboratory.

NTR X19S. Topics in Nutrition.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

NTR X55. Undergraduate Research in Nutrition.
Supervised individual undergraduate research in nutrition.

NTR X72C. Practicum in Clinical Dietetics.
Supervised practice in health care facilities.

NTR X72F. Practicum in Food Services Systems Management.
Supervised practice in food service facilities.

NTR X74P. Advanced Practicum in Dietetics.
Culminating experience in the practice of administrative, clinical, or community dietetics.

NTR X97C. Conference Course in Nutritional Sciences.

Upper-Division Courses

NTR X21. International Nutrition: The Developing World.
Nutrition-related issues in the developing world, including nutrient deficiency and disease, concerns in vulnerable populations (pregnancy, infancy, childhood, and old age), and food aid.

NTR X24. Advanced Food Science.
Application of the principles of food chemistry to the development of food products.

NTR X24L. Advanced Food Science Laboratory.
Individual research project on food product development and evaluation.

NTR X26. Intermediate Nutrition and Metabolism.
Integration of nutrition, genetics, cell biology, and molecular biology. Focuses on the cellular and molecular basis of nutrition-related diseases and nutrient-gene interactions.

NTR X26L. Nutritional Sciences Laboratory.
Basic laboratory techniques in nutritional sciences.

NTR X27L. Advanced Food Science Laboratory.
Apply fundamentals of nutrition science, food science, and chemistry to scientific research in creating a novel food product for a chosen target audience. Explore food science, food research and development, fundamentals of nutrition, ingredient functionality, food product sensory evaluation, scientific inquiry, study design, and science communication. Design and execute a scientific study by engineering a unique food product, create scientific abstracts, and create and participate in scientific poster sessions.

NTR X29S. Topics in Nutrition.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

NTR X30. Nutrition Education and Counseling.
Application of counseling and learning theories to the care of individuals and groups in community and clinical settings.

NTR X30L. Advanced Nutrition Assessment and Counseling.
Examine the fundamentals and application of nutrition assessment, nutrition education, counseling, and behavior change theories to the care of individuals and groups in community and clinical settings. Explore the use of nutrition focused physical exam, nutrition care process standardized language, anthropometric, biochemical, clinical, and dietary intake data assessments for effective care of individuals. Identify the implementation of nutrition counseling techniques and communication skills through the understanding of behavior change in individuals.

NTR X31. International Nutrition: Social and Environmental Policies.
Explores the nutritional concerns of different countries, environmental aspects of food supply, and social policies needed to balance supply with demand in a sustainable manner.

NTR X32. Community Nutrition.
National and international issues in public health and nutrition programs.

NTR X34. Foodservice Systems Management.
Procurement, production, and service delivery in foodservice systems.
NTR X34L. Laboratory in Foodservice Systems.
NTR X37. Principles of Epidemiology in Nutritional Sciences .
Introduction the role of epidemiology methods as the basis for selection of study design and data collection tools in nutrition research such as dietary tools, biomarkers of diet or disease, and anthropometric measurements like obesity. Emphasis on interpretation of study results in nutrition research.
NTR X38H. Issues in Nutrition and Health: Honors.
Identifying, reading, analyzing, writing, and presenting scientific research on selected subjects in nutrition and human health. Detailed literature review as preparation for an honors research thesis.
NTR X38W. Issues in Nutrition and Health.
Identifying, reading, analyzing, writing, and presenting scientific research on selected topics in nutrition and human health.
NTR X39L. Experimental Methods and Design in Nutritional Sciences.
Explore nutritional sciences methods and research. Examine overall study design, observational and intervention studies, animal and cell-based research in nutritional sciences, nutritional research assessment methods (such as dietary assessment and biomarkers), and research ethics. Practice assessing and interpreting research findings to evaluate scientific research in nutritional sciences and nutritional epidemiology.
NTR X42. Advanced Nutritional Sciences.
Biochemical and molecular biological aspects of carbohydrate, fat, and amino acid metabolism.
NTR X43. Vitamins and Minerals.
Biomedical, cellular and molecular, and clinical aspects of vitamins, minerals, and water.
NTR X44M. Advanced Nutrition II Laboratory.
Advanced laboratory techniques in nutrition assessment and research.
NTR X45C. Clinical Practice in Medical Nutrition Therapy I.
Application of principles of medical nutrition therapy to the care of clients in the practice setting.
NTR X45M. Clinical Practice in Medical Nutrition Therapy II.
Application of principles of medical nutrition therapy to the care of patients in health care facilities.
NTR X52. Topics in Field Experience in Nutrition.
NTR X53. Field Experience in International Nutrition.
Supervised study abroad experience designed to help students understand nutrition science issues, applications, related health care practices in a global environment, and other cultures. Students work in schools, hospitals, or similar settings to gain professional experience with food science and dietetics.
NTR X55. Undergraduate Research in Nutrition.
Supervised individual undergraduate research in nutrition.
NTR X55H. Honors Research.
Research in biological, biochemical, or nutritional science, coordinated with readings of scientific literature, and a written research report for each semester in which credit is sought.
NTR X55M. Advanced Food Systems Management.
Financial control, quality assurance, personnel administration, foodservice equipment, layout and design in foodservice operations. Analysis and evaluation of an organized foodservice operation.
NTR X60. Selected Topics in Applied Nutrition.
NTR X62. Standards, Ethics, and Credentialing for Dietetic Practice.
Identification of standards and discussion of current issues in ethics and credentialing for dietetics practice.
NTR X65. Selected Topics in Nutritional Sciences.
NTR X65.2. Nutrition and Genes.
Interactions between nutrients and gene expression, including heredity, gene regulation, metabolic disease, developmental abnormalities, and molecular techniques.
NTR X65.4. Obesity and Metabolic Health.
Examines the prevalence, prevention, and treatment of adult and childhood obesity, and the metabolic disorders related to obesity.
NTR X65.5. Principles and Applications in Community Engagement.
Implement community engagement activities, such as gardening, cooking, and nutrition lessons within a school or other community environment with the goal of improving nutrition and health. Explore evidence-based nutrition programs, such as fundamental principles of food gardening with an emphasis on central Texas, application of skills in the university teaching garden and school gardens, and application of nutrition curriculum in a school setting.
NTR X65.6. Sports Nutrition.
Explore the physiology of sports nutrition as well as its practical application such as summarizing physiological adaptations to exercise, and describing energy systems. Examine the role of sport specific body weight, composition measurement, and estimate macronutrient/hydration needs for athletes of different sports.
NTR X65.7. Nutritional Biochemistry: Busting Myths.
Introduction to the science of nutrition. Explore components of food (macro- and micronutrients), digestion and absorption, energy metabolism, micronutrients, supplements, energy balance, and the role of nutrition in the growing epidemics of obesity and chronic illnesses.
NTR X65L. Experiential Learning in Community Engagement.
Implement hands-on community engagement activities, such as gardening, cooking, and nutrition lessons through the experiential learning laboratory within community/school settings to improve nutrition and health and decrease the incidence of chronic diseases. Apply the fundamental principles of nutrition through activities such as food gardening to planting to maintaining a school garden; work within school cultures/constraints to improve the school nutrition/gardening culture; apply effective communication, classroom management/engagement, and teaching skills in working with the public, community leaders, and administrators; and evaluate nutrition programs in schools.
NTR X66L. Research Methods in Nutritional Sciences.
Focuses on state-of-the-art research in nutrition, including biochemistry and molecular biological techniques for nutrient-gene interactions, enzyme and coenzyme functions, and nutrient analysis of biologic materials. Includes data analysis and statistical methods.
NTR X67. Undergraduate Seminar in Nutritional Sciences.
NTR X70. Medical Nutrition Therapy I.
The role of nutrition in prevention and treatment of chronic disease such as diabetes and heart disease.
NTR X71. Medical Nutrition Therapy II.
Nutritional care of critically ill patients, including techniques of nutrition support.
NTR X72C. Practicum in Clinical Dietetics.
Supervised practice in health care facilities.
NTR X72F. Practicum in Food Services Systems Management.
Supervised practice in food service facilities.
NTR X73S. Practicum in Dietetic Administration.
Supervised practice in the administration of food and nutrition programs.
NTR X74C. Practicum in Community Dietetics.
Supervised practice in one or more community-based nutrition programs.
NTR X74P. Advanced Practicum in Dietetics.
Culminating experience in the practice of administrative, clinical, or community dietetics.
NTR X79H. Honors Tutorial Course.
Supervised individual research on a special topic in nutrition; oral presentation and preparation of a scholarly paper covering the research. May be based on laboratory, library, or field research.

NTR X97C. Conference Course in Nutritional Sciences.

Graduate Courses

NTR X55. Undergraduate Research in Nutrition.
Supervised individual undergraduate research in nutrition.

NTR X72C. Practicum in Clinical Dietetics.
Supervised practice in health care facilities.

NTR X72F. Practicum in Food Services Systems Management.
Supervised practice in food service facilities.

NTR X74P. Advanced Practicum in Dietetics.
Culminating experience in the practice of administrative, clinical, or community dietetics.

NTR X80K. Topics in Research Methods in Nutritional Sciences.

NTR X80K.1. Experimental Nutrition.

NTR X80K.2. Nutritional Immunology.

NTR X80K.3. Experimental Design and Statistics.

NTR X80K.4. Advanced Experimental Design and Statistics.

NTR X80K.5. Carcinogenesis.

NTR X80K.6. Nutritional Biochemistry.

NTR X90. Topics in Recent Advances in Nutritional Science.

NTR X90.1. Advances in Nutritional Sciences I.

NTR X90.10. Geriatric Nutrition and Metabolism.
Study of how aging influences nutrient requirements and metabolism at the biochemical and molecular level. Discussion of dietary changes to offset the effects of aging and to improve quality of life.

NTR X90.12. Nutritional Immunology.

NTR X90.13. Nutrigenomics.
Examine the interactions between nutrition and multi-level "omics (e.g., genome, transcriptome, methylome) as they relate to chronic disease and health. Includes a focus on gene-diet interactions in the context of population genetic variation and the bidirectional molecular interactions that influence gene and protein expression as well as epigenetic modification.

NTR X90.14. Theories of Nutrition Behavior.
Explore and examine nutrition-related behavior through the application of health behavior theories and models. Includes theories such as the Health Belief Model, Theory of Planned Behavior, Social Cognitive Theory, Diffusion of Innovations, Transtheoretical Model, Social Support, and Social Ecological Model. Investigate theoretical constructs, benefits and limitations of each theory/model, considerations needed for unique populations or behaviors, and how to develop a theory-based program plan.

NTR X90.15. Principles of Epidemiology in Nutritional Sciences.
Examine the role of epidemiological methods as the basis for selection of study design and data collection tools in nutrition research such as dietary tools, biomarkers of diet or disease, and anthropometric measurements like obesity. Examine the interpretation of study results in nutrition research.

NTR X90.2. Carbohydrates and Fiber.

NTR X90.3. Lipids.

NTR X90.4. Vitamins and Minerals.

NTR X90.5. Minerals.

NTR X90.6. Molecular Nutritional Sciences.

NTR X90.7. Advances in Nutritional Sciences II.

NTR X90.8. Clinical Nutrition.

NTR X92. Topics in Research Problems in Nutritional Sciences.

NTR X92.10. Nutrition and Metabolism.

NTR X92.11. Obesity.

NTR X92.12. Nutrition as Medicine.

NTR X92.13. Nutrition and Disease Prevention.
Explore the role of nutrition as a critical preventive measure for both acute and chronic disease. Examine and evaluate the current research supporting the role of nutrition as a preventative therapy.

NTR X92.14. Evidence Synthesis and Communications.
Introduction to evidence synthesis and communications in nutritional sciences and dietetics. Learn how to evaluate evidence from basic, clinical, and/or translational research and translate the findings and impact to those within your respective field of study as well as across disciplines. Explore hands-on experiences through the completion of article critiques, peer and self-reviews, and the development of scientific presentations to build skills in these areas.

NTR X92.2. Nutrient Requirements.

NTR X92.3. Nutrition and Cancer.

NTR X92.4. Nutrition and Immunology.

NTR X92.5. Food Sciences.

NTR X92.6. Clinical Nutrition.

NTR X92.7. Nutrition Education.

NTR X92.8. Developmental Nutrition.

NTR X92.9. Foodservice Systems.

NTR X92R. Research Hours in Nutritional Sciences.

NTR X94. Topics in Graduate Seminar in Nutritional Sciences.

NTR X94.2. Clinical Nutrition.

NTR X94.3. Molecular and Cellular Nutrition.

NTR X94.4. Nutrition, Immunology, and Disease.

NTR X94.5. Nutrition through the Life Cycle.

NTR X94.6. Study Design and Research Methods.

NTR X97C. Conference Course in Nutritional Sciences.

NTR X98. Thesis.

NTR X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

NTR X98T. Supervised Teaching in Nutrition.
Teaching under close supervision; group meetings, individual conferences, and reports.

NTR X99W. Dissertation.

Professional Courses

NTR X55. Undergraduate Research in Nutrition.
Supervised individual undergraduate research in nutrition.

NTR X72C. Practicum in Clinical Dietetics.
Supervised practice in health care facilities.

NTR X72F. Practicum in Food Services Systems Management.
Supervised practice in food service facilities.

NTR X74P. Advanced Practicum in Dietetics.
Culminating experience in the practice of administrative, clinical, or community dietetics.

NTR X97C. Conference Course in Nutritional Sciences.

O M - Operations Management

Operations Management: O M

Lower-Division Courses

O M X19S. Topics in Operations Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

O M X20F. Foundations of Operations and Supply Chain Management.

O M X29S. Topics in Operations Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

O M X32F. Topics in Foundations of Operations Management.

O M X34M. Healthcare Operations Management.
Overview of healthcare operations management. Focus on process diagramming, vocabulary, and analysis of effects of variability on healthcare operations in terms of increasing waiting lines, inventory, and patient safety issues. Focus on modern process improvement methodologies.

O M X35. Operations Management.
The operations or production function and the skills required for analyzing and solving related problems.

O M X35H. Operations Management: Honors.
An investigation of the operations or production function, and the skills required for analyzing and solving related problems.

O M X38. Supply Chain Modeling and Optimization.
Framing, formulating, and applying quantitative optimization and descriptive models to support supply chain and operations management decisions, using spreadsheets and other software. Requires familiarity with spreadsheets.

O M X50. Digital Transformation of Supply Chain Management.
Study strategic frameworks for facilitating the digital transformation of supply chains and operations management to align with a firm's business model. Explore the tactical deployment of digital capabilities and the use of data analytics to transform operational processes to improve efficiency, quality, and timing.

O M X60. Procurement and Supplier Management.
Explore strategic issues in procurement and supplier management; a review of competitive analysis and benchmarking; the purchasing role in fulfilling a firm's operational and competitive strategies; supplier evaluation, development, and relationship management; negotiating with suppliers for results; and commodity planning.

O M X66P. Operations Management Practicum.
Students apply skills in their major area and focus on additional project management skills through group projects conducted in a professional setting. Students may work with a private or a public enterprise.

O M X70. Supply Chain Design, Planning, and Execution.
Analyze the entire flow of information, materials, and services from suppliers through factories and warehouses to the end customer. Examine logistics, supplier selection, and inventory management using case studies, optimization, and simulation.

O M X71T. Topics in Operations Management.

O M X72T. Topics in Operations Management.

O M X72T.1. Total Quality Management.

O M X72T.12. Information Technology for Supply Chains.
Learn how information technology is used to coordinate supply chain activities across different industries.

O M X72T.17. Health Care Analytics.
Explore key management challenges and how data may be leveraged to guide decisions and improve operations, with the unifying theme of providing health care services in a manner that leads to lower cost and higher quality.

O M X72T.2. Sustainable Operations.

O M X72T.20. Supply Chain Analytics.
Study dynamic demand forecasting models based on both data aggregation as well as hierarchical aggregation of point-of-sale predictive analytics. Explore the use of developed predictive dynamic models for operations planning and operations decision maing.

O M X72T.21. Time Series Forecasting.
Examine statistical forecasting methods used in business. Discuss Box-Jenkins models; exponential smoothing models; ARCH/GARCH models for varying volatility in financial returns; seasonal adjustment of time series; tests for nonstationary of time series; and modeling multiple time series.

O M X72T.24. Data-Driven Revenue Management.
Use data-driven tactics and strategies to predict consumer demand and optimize price and capacity/inventory availability to maximize revenue or profit. Explore demand analytics and revenue management techniques, produce rigorous and practical insights, and develop data analysis and optimization skills, based on business cases, datasets, and exercises. Examine diverse contexts and industries, such as conventional retailing, e-commerce, airline/hotel, and contemporary platform and cloud services (e.g., Uber, Dropbox, Netflix, AWS), by utilizing software (Excel, R, or Python) to build models, conduct optimization, and develop insights for a variety of revenue management examples.

O M X72T.5. Project Management.

O M X72T.7. New Product Development.
Examine the integration of supply chain management into the product design and development process. Learn skills and knowledge involving product development and incorporating supply chain considerations with an emphasis on designing products that optimize the supply chain while maintaining the products vision from concept to customer.

O M X75. Supply Chain and Operations Management Strategy.
Discuss the role of supply chain management to increase a firm's competitive performance and understand how that performance affects the economy and society as a whole. Examine supply chain and operations design as well as environmental, social, and governance (ESG) issues. Explore the impact of new business models including e-commerce and automation; contracting; outsourcing and vertical integration, resiliency; and new delivery modalities.

O M X79. Independent Research in Operations Management.

Graduate Courses

O M X80. Topics in Seminar in Operations Management.

O M X80.1. Combinatorial Optimization.
Concepts of computational complexity; the foundation of discrete mathematics and combinatorial theory.

O M X80.10. Queueing Systems.
Deterministic queues, priorities, random walks, networks, approximations, and applications.

O M X80.11. Graduate Seminars.

O M X80.12. Logistics.
Tools and concepts for the management of the flow of information, material, product, and cash between the initial suppliers of raw material and the ultimate consumers of finished goods.

O M X80.13. Management Planning and Control of Complex Systems.
Designed to provide guidance to doctoral students interested in research on new approaches to management planning and control of complex systems, and to MBA students interested in evaluating new practices currently being used in management planning and control activities.
O M X80.15. Optimization I.
Introduction to operations research and optimization, including linear programming, network models, deterministic dynamic programming, decisions under uncertainty, game theory, inventory models, and simulation. Emphasis on mathematical programming models and algorithmic approach of operations research problems.
O M X80.16. Optimization II.
Designed to provide students, especially those involved in research, with more advanced optimization tools in several broad areas. Includes nonlinear programming, graph theory, integer programming, Markov chains, probabilistic dynamic programming, queueing theory, and metaheuristics. Emphasis on mathematical programming modeling and algorithmic approach of operations research problems.
O M X80.17. Supply Chain Analytics.
Supply chain analytics combines analytical tools with technology to identify trends, compare performance and highlight improvement opportunities in supply chain areas including sourcing, inventory management, manufacturing, quality, sales and logistics.
O M X80.2. Linear Programming.
Model formulation: solution algorithms; duality theory; decomposition; sparse matrix issues; sensitivity and parametric analysis; optimization and matrix generation computer software.
O M X80.4. Algorithms and Implementations.
Design, analysis, implementation, and use of computer algorithms. Introduction to fundamental data structures, sorting, recursive programs, dynamic data structures, memory management, algorithm design techniques and complexity analysis, and applications in optimization problems. Examples from linear and integer programming, covering, knapsack, graph-theoretic problems, network analysis, and scheduling.
O M X80.5. Business Process Simulation.
Modeling with simulation languages; random number generation; statistical analysis of input and output; variance reduction techniques; computer software applications.
O M X80.6. Integer Programming.
Mathematical programming models with discrete (integer) decision alternatives. Model formulation and solution algorithms.
O M X80.7. Nonlinear Programming.
Optimization of nonlinear functions of many variables subject to linear or nonlinear constraints. Basic theory, solution algorithms, applications, computer software.
O M X80.8. Large-Scale System Optimization.
Formulation and solution of large mathematical optimization models. Focus on algorithms that exploit special structure of linear and nonlinear programming models. Applications.
O M X80.9. Stochastic Processes.
Discrete stochastic systems, queueing processes, inventory models, replacement, renewal theory, Markovian processes.
O M X84. Topics in Business Analytics.
Selected topics in business analytics.
O M X86. Current Topics in Operations Management.
Strategic problems, policies, models, and concepts for the design and control of new or existing operations systems.
O M X86.1. Service Management.
O M X86.10. Sustainable Operations.
Discuss how the operations of creating value can be better managed to address the challenges of environmental sustainability. Learn about the trade-offs and challenges associated with measuring and reporting emissions, extended producer responsibility, closed-loop supply chains, and business model innovations. Develop critical thinking skills by learning economic theory related to environmental sustainability.
O M X86.11. Operations Bootcamp.
Explore real-world operations challenges through intensive, team-based case work with industry collaborators. Investigate problems such as supply chain disruptions, production planning, and service delivery improvements across multiple sectors. Design and present research-driven solutions to practitioners for review and discussion while strengthening analytical, problem-solving, and presentation skills in an operations context.
O M X86.2. Supply Chain and Operations Strategy.
O M X86.3. Strategic Quality Management.
O M X86.4. Operations Practicum.
O M X86.5. Managing Projects.
O M X86.6. Decision-Support Modeling.
Operations research and modeling to assist in decision making through building data models and operations research software systems.
O M X86.7. Data Driven Health Care Operations.
Explore operational challenges arising in outpatient clinics, hospitals, and drug development and production. Examine a combination of business cases and representative data sets. Utilize R as a supporting tool.
O M X86.8. Healthcare Analytics.
O M X86.9. Supply Chain Management.
Learn how to use analytical tools and conceptual frameworks to make decisions in supply chain contexts. Develop insights about major strategic issues and trade-offs that arise in supply chain management. Collaborate with others in simulated supply chain decision making environments.
O M X92. Topics in Seminar: Operations Management.
Intensive analysis of operations management issues.
O M X92.1. Operations Management Colloquium.
O M X92.2. Network Optimization.
Focus on theory, algorithms, and applications of network optimization with emphasis on supply chain operations and applications. Optimize the routing of flows on networks, discover the special structure and properties of network flow problems, and design effective solution methods that exploit these properties.

Professional Courses

ORI - Operations Research and Industrial Engineering

Operations Research and Industrial Engineering: ORI

Lower-Division Courses

ORI X19S. Topics in Operations Research and Industrial Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mechanical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
ORI X80M. Research.
ORI X97K. Graduate Seminar.
ORI X97P. Projects in Operations Research and Industrial Engineering.
Independent project carried out under the supervision of a faculty member in operations research and industrial engineering.

Upper-Division Courses

ORI X29S. Topics in Operations Research and Industrial Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Mechanical Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

ORI X65. Data Science for Engineers.
Learn data analysis and programming skills. Explore essential data science techniques, including regression, decision trees, classification, and neural networks.

ORI X66. Operations Research Models.
Formulation and solution-interpretation for operations research models requiring, for example, optimization, simulation, or analysis of Markov chains or queues. Applications include manufacturing design and control, routing and scheduling, plant location, inventory analysis, and management of queueing systems.

ORI X67. Simulation Modeling.
Basic concepts of discrete-event simulation. Statistical input and output analysis. Application of simulation software. Modeling of systems under uncertainty.

ORI X69. Decision Analysis.
Principles and application of techniques for the logical illumination of complex decision problems within any context. Subjects may include utility theory, probability as a statement of belief, risk preference, value of information and control, probability assessment, influence diagrams, risk sharing and scaling, and life-and-death decision making.

ORI X70. Statistical Methods in Manufacturing.
Contemporary concepts and methods for statistical quality design and control will be presented. These include: descriptive statistics, behavior of process over time, design and interpretation of control charts, process capability studies, measurement system analysis, correlation and regression analysis, design and analysis of two level factorial experiments, design and analysis of two level fractional factorial experiments, response surface methodology, and Taguchi approach to robust design.

ORI X73. Facility Planning and Logistics.
Design and analysis of production systems, including plant layout and location, material flow, and flexible manufacturing.

ORI X74. Production and Inventory Management.
Introduction to production and inventory models; basic factory dynamics; analysis of variability; push-and-pull production control; sequencing and dispatching.

ORI X77K. Projects in Operations Research and Industrial Engineering.
Independent project carried out under the supervision of a faculty member in operations research & industrial engineering. Student prepares a project proposal and a final report, each of which is evaluated by the faculty committee on individual projects.

ORI X80M. Research.

ORI X97K. Graduate Seminar.

ORI X97P. Projects in Operations Research and Industrial Engineering.
Independent project carried out under the supervision of a faculty member in operations research and industrial engineering.

Graduate Courses

ORI X80M. Research.

ORI X83. Healthcare Delivery Models.
Study the operations research literature on the use of models and techniques related to healthcare delivery. Discuss decomposition techniques for integer programs, simulation, Markov chains, and stochastic programming.

ORI X84. Emerging Trends in Operations Research and Industrial Engineering.
Explore the development and use of operations research and industrial engineering techniques via weekly presentations and speakers, including faculty and visiting experts.

ORI X90D. Topics in Analytics and Decision Making.
Discuss the tools and concepts to enable quantitative analysis and to support decisions under uncertainty.

ORI X90D.1. Analytics and Data Science.
Examine theory and methods to draw inferences from data and apply these insights to support decision making in uncertain environments.

ORI X90D.2. Decision Analysis.
Examine the theory and principles required to make good decisions in the face of uncertainty. Discuss expected utility theory, families of utility functions, Bayesian inference, value of information, probability elicitation, scoring rules, and the verification of probabilistic forecasts. Explore how these apply to areas including engineering, business, public policy, healthcare, and sports.

ORI X90D.3. Decision Engineering.
Examine the tools, methods, and processes required to apply decision analysis to applied problems. Explore creativity, framing, ideation, modeling, approximations, and decision biases that can degrade decision making.

ORI X90D.4. Decision Theory.
Explore the fundamental axioms supporting decision analysis and challenges to this approach. Examine behavioral decision making, subjective probability, alternative approaches to decision making, and advanced decision analytic tools.

ORI X90D.5. Markov Decision Processes.
Discuss the theory and application of Markov decision processes. Examine finite horizon models, average-cost and discounted-cost infinite horizon problems, discrete-time and continuous-time frameworks. Explore approximate dynamic programming, reinforcement learning, and stochastic bandit problems.

ORI X90D.6. Systems Modeling and Decision Making.
Explore the application of operations research, decision analysis, economics, and management science tools and concepts to the modeling of human-designed and natural systems with the goal of improving decisions that involve these systems. Examine models that integrate engineering, economics, natural science, and policy.

ORI X90Q. Topics in Industrial Engineering.
Industrial engineering techniques for quantitative solution of contemporary systems and management problems.

ORI X90Q.1. Project Management.
Methods for organizing, coordinating, and controlling resources to minimize risk and conflict and to maintain budgets and schedules. Topics include evaluation of competing alternatives, organization of a project, scheduling of tasks and resources, and the role of management over time.

ORI X90Q.10. Logistics Analytics.
Discuss strategic, tactical, and operational logistics decision making; exact and heuristic methods for logistics problems; optimization models; deterministic and stochastic logistics modeling; network design and routing; manufacturing, service, and transportation logistics; applications. Explore freight logistics, humanitarian logistics and disaster management.

ORI X90Q.2. Production and Inventory Control.
Issues in inventory control with known and unknown demand, materials requirement planning, just-in-time, pull control systems, operations scheduling, dispatching and aggregate planning, and the basic dynamics of production and inventory control.

ORI X90Q.4. Modeling and Analysis of Manufacturing Systems.
Applications of analysis to manufacturing processes, using mathematical models, optimization, and stochastic analysis. Economic

evaluation, identification of bottlenecks, estimation of resources requirements, and system design.

ORI X90Q.5. Scheduling Theory and Applications.
Modeling, analysis, and solution techniques for production and service scheduling problems, machine scheduling in deterministic and stochastic settings, exact and heuristic algorithms, and industrial applications, including semiconductor manufacturing and airlines applications.

ORI X90Q.7. Statistical Methods in Manufacturing.
Statistical monitoring of manufacturing processes; methods and applications of various control charts; formal design of experiments (DOE), including the statistical evaluation of main and interaction effects, as well as intelligent experimentation through reduced factorial experimental design; Taguchi's design philosophy as applied to response surface methods and gradient-based search techniques; and advanced issues in quality control and design of manufacturing systems.

ORI X90Q.9. Analytics and Control in Semiconductor Manufacturing.
Learn key data analytics and process control methods for turning metrology and sensing data into useful information and decisions in semiconductor manufacturing. Explore applications of statistical models for statistical process control, as well as applications of dynamic models for virtual metrology and run-to-run control in semiconductor manufacturing systems.

ORI X90R. Topics in Statistics and Probability.
Concepts of probability and mathematical statistics; application of these analytical methods to planning and evaluation of research and industrial experimentation.

ORI X90R.1. Applied Probability.
Basic probability theory, combinatorial analysis of random phenomena, conditional probability and independence, parametric families of distributions, expectation, distribution of functions of random variables, limit theorems.

ORI X90R.14. Special Topics in Probability, Stochastic Processes, and Statistics.
Study of specialized topics, such as advanced stochastic processes, Bayesian statistics, simulation, and stochastic optimization, intended to introduce and stimulate further research.

ORI X90R.2. Mathematical Statistics.
Sampling distributions, properties of estimators, point and interval estimation, hypothesis testing, introduction to multivariate and nonparametric statistics.

ORI X90R.3. Time-Series Modeling, Analysis, and Control.
Methods for analytical modeling, analysis, prediction, and control of linear, stationary time series. Includes examples of advanced research in nonstationary time-series modeling and applications in manufacturing, financial engineering, geosciences, and other areas. Students complete a project on a topic of their choice.

ORI X90R.4. Reliability Theory and Modeling.
Theory of probabilistic and statistical models of aging elements, reliability, replacement, and repair maintenance, and their integration in surveillance, quality control, and manufacturing problems.

ORI X90R.5. Applied Stochastic Processes.
Poisson process, renewal theory, discrete and continuous-time Markov chains, queueing and reliability applications.

ORI X90R.6. Regression and Analysis of Variance.
Fitting equations to data; joint confidence regions; partial correlation analysis; general linear hypotheses; dummy variables; diagnostics and remedial measures; design of experiments; fixed, random, and mixed models; factorial and nested designs.

ORI X90R.8. Queueing Theory.
Introduction to the classical and modern theories of queueing systems. Simple Markovian queues; the M/G/1 and G/G/1 queues; Jackson and Kelly networks; multiclass networks; stability, scheduling, and routing in queueing networks; fluid and diffusion approximations.

ORI X90R.9. Systems Simulation.
Random number generation, simulation experiments, statistical verification, clock routines, simulation language applications, industrial problems.

ORI X91Q. Topics in Optimization.
Mathematical optimization techniques with applications to engineering and industrial problems.

ORI X91Q.1. Nonlinear Programming.
Theory and solution techniques for nonlinear, continuous optimization problems. Topological properties of functions, general convexity, optimality conditions, line search methods, unconstrained techniques, and algorithms for constrained formulations. Lagrangian duality theory and bundle methods for nondifferentiable optimization.

ORI X91Q.10. Stochastic Optimization.
Optimization of mathematical programming models under uncertainty; model formulations; exact, bounding-and-approximation, and Monte Carlo sampling-based solution techniques that exploit special structures; applications; use of algebraic modeling language.

ORI X91Q.11. Advanced Mathematical Programming.
Advanced topics in modeling and algorithms for linear, integer, nonlinear, and network programming. Model formulation considerations, decomposition algorithms, interior point and active set methods, duality, modern optimization software.

ORI X91Q.12. Metaheuristics.
Reactive and adaptive tabu search methods, simulated annealing, genetic algorithms, and greedy randomized adaptive search methods. Emphasis on theoretical context of methods and on similarities and distinguishing characteristics.

ORI X91Q.14. Computational Optimization.
Computer programming methods and tools for implementing advanced optimization algorithms, working with data, and visualizing results. Code organization techniques, debugging, and building complex software.

ORI X91Q.15. Convex Optimization.
The fundamentals of convex optimization with a focus on modeling, computation and scale: convex sets and functions, unconstrained optimization via first and second-order methods, duality, constrained optimization, SDPs, stochastic and sub-gradient descent methods, ADMMs, and applications.

ORI X91Q.16. Optimization in Engineering Systems.
Formulation and solution of continuous optimization problems in engineering design and operations.

ORI X91Q.17. Optimization Under Uncertainty.
Introduction to optimization models and methodologies for addressing uncertainty-affected decision problems. Examine fundamental techniques from stochastic programming, robust optimization, and distributionally robust optimization. Explore theory through concrete examples from production planning, supply chain management, project management, portfolio selection, machine learning.

ORI X91Q.18. Computational and Variational Methods for Inverse Problems.
Introduction to the numerical solution of inverse problems that are governed by systems of partial differential equations (PDEs). Explore variational formulations, ill-posedness, regularization, adjoint methods for gradients and Hessians, variational discretization, and efficient large-scale optimization algorithms for inverse problems. Examine the Bayesian framework and draw connections between the classical and the Bayesian interpretations of inverse problems.

ORI X91Q.2. Dynamic Programming.
Systems that require sequential decisions. Problem modeling and solution algorithms for deterministic and stochastic systems.

ORI X91Q.3. Network Flow Programming.
Optimization problems related to network flows, shortest path, maximum flow, minimum cost flow, generalized networks, nonlinear costs. Modeling, theory, and computational methods.

ORI X91Q.4. Integer Programming.
Models, theory, and computational methods for problems with discrete decision alternatives. Greedy algorithms, branch and bound, cutting plane methods, Lagrangian relaxation, and heuristics.
ORI X91Q.5. Linear Programming.
Models, algorithms, and theory of linear programming. Linear programming geometry, primal, dual and revised simplex algorithms, duality theory, optimality conditions, sensitivity analyses, interior point methods, and computer implementations.
ORI X91Q.6. Algorithms for Mixed Integer Programming.
Methods and software for solving large-scale mixed integer programming problems: intelligent heuristics, decomposition, lower bounding schemes, limited enumeration, and simple methods for quickly finding good feasible solutions. Numerous examples taken from industry.
ORI X91Q.8. Combinatorial Optimization.
Optimization of combinatorial structures; computational complexity; stable marriages, shortest paths, maximum flows, minimum-cost flows, matching problems; approximation algorithms for NP-hard problems.
ORI X91Q.9. Large-Scale Systems Optimization.
Mathematical programs with special structure, Dantzig-Wolfe decomposition, partitioning and relaxation procedures, duality and decomposition, compact inverse methods, applications in engineering and management.
ORI X97. Current Topics in Operations Research and Industrial Engineering.
ORI X97K. Graduate Seminar.
ORI X97M. Graduate Research Internship.
Students conduct research in an industrial setting to gain practical experience in their area of interest.
ORI X97P. Projects in Operations Research and Industrial Engineering.
Independent project carried out under the supervision of a faculty member in operations research and industrial engineering.
ORI X98. Thesis.
ORI X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
ORI X99W. Dissertation.

Professional Courses

ORI X80M. Research.
ORI X97K. Graduate Seminar.
ORI X97P. Projects in Operations Research and Industrial Engineering.
Independent project carried out under the supervision of a faculty member in operations research and industrial engineering.

P A - Public Affairs

Public Affairs: P A

Lower-Division Courses

P A X01. Foundations of Public Affairs.
Explore key concepts and debates in the study of public policy. Review foundational historical texts, influential theoretical writings, and important case studies. Discover a range of policy issues, both domestic and international.
P A X05. Analysis of Policy Adoption and Implementation.
Examine how US policymakers and staff in local, state, and federal government formulate and manage public policy, including the processes for creating and adopting public policy and the processes for implementing and governing public policy.
P A X09. Introductory Topics in Policy.
Survey various introductory topics in public affairs and policy.
P A X09.1. Introduction to International Development Policy.
Explore the ideational landscape of international development, including the main "schools of thought" in development over time, as well how the beliefs and assumptions within these schools inform particular policy solutions. Analyze the institutional landscape with respect to the actors, organizations, and transnational communities that shape how global development has been practiced at the local, national and international levels. Examine the indicator landscape concerning how data on development can be found, interpreted and used to pursue evidence-based analysis and decision making in this space. Survey contemporary development policy issues.
P A X09.2. Introduction to National Security.
Explore the actors, processes, and current challenges of U.S. national security. Examine policy formulation, the instruments of national security and their integration, and legal and ethical tensions. Learn about the array of current state and non-state actors threatening national and global security.
P A X11L. Qualitative Methods for Public Affairs.
Survey a variety of qualitative empirical methods, drawn from the fields of history, anthropology, political science, and sociology, that are essential for making and evaluating public policies and programs.
P A X11N. Quantitative Methods for Public Affairs.
Survey a variety of quantitative empirical methods, drawn from the fields of data science and management science, that are essential for making and evaluating public policies and programs.
P A X15. Economic Analysis for Public Affairs.
Use the tools of microeconomics to analyze the public policymaking role of governments. Examine rationales for policy interventions including addressing market failures, distributional goals, generating revenue, among other objectives. Explore specific policy interventions and topics relevant to contemporary public policy debates such as taxation, health, social welfare, energy and the environment, and income inequality.
P A X19S. Topics in Public Affairs.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Lyndon B. Johnson School of Public Affairs. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
P A X80L. Topics in Public Policy and Law.
Various aspects of policy making, policy development, and communications at a variety of levels.
P A X80L.1. Policy Development and Law.
Examines effective policy making at all levels of government, including consideration of the legal process which provides critical context; the policy development process and its relationship to the rule of law; and key elements of public policy development, including ethics, decision making, leadership, and policy implementation.
P A X80L.2. Policy and Law Placement.
Thorough examination of ethical issues and professional responsibilities and development of written and oral communication skills that are preparatory for field placement in policy and law.
P A X80L.3. Law and Public Policy.
Examines the interconnection of public policy and law and how the two disciplines approach related issues; how legal structures and precedent shape and constrain policy choices; and how public policy informs the work of the courts.
P A X90D. Dissertation Proposal Preparation.
Development and preparation of the dissertation proposal.
P A X98T. Supervised Teaching in Public Affairs.
Group meetings with the instructor, individual consultations, and reports. Mandatory for students seeking teaching assistant positions.

Upper-Division Courses

P A X20. Communication for Public Affairs.
Develop strategies to engage with policy audiences outside of academic circles by practicing clear concise communication. Evaluate and practice

various genres of policy communication with an emphasis on learning by doing.

P A X25. Topics in Policy.
Survey various topics in public affairs and policy.

P A X29S. Topics in Public Affairs.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Lyndon B. Johnson School of Public Affairs. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

P A X36. Professional Development.
Practice entering the professional realm of policymaking through a series of workshops that focus on different aspects of professional development such as resume-writing, mock job interviews, drafting cover letters for jobs and internships, and professional networking.

P A X37. Leadership Laboratory.
Discover the basic skills of effective public and nonprofit leadership that promote well-being and strengthen civil society. Determine the characteristics of good leaders, including personal and social responsibility, inclusivity, and ethics. Develop and refine a guiding personal philosophy of leadership for navigating real world applications to advance social and policy change.

P A X45. Advanced Topics in Policy.
Examine various advanced topics in public affairs and policy.

P A X55. Advanced Topics in Policy Analysis Skills and Methods.
Explore advanced qualitative or quantitative methods to better shape and evaluate public policies.

P A X59. Public Affairs Internship.
Participate in fieldwork at an organization focused on public affairs.

P A X59R. Topics in Public Policy Issues.
Current issues in public policy.

P A X59R.1. UT Energy Symposium.

P A X65W. Topics in Policymaking in Washington, DC.
Explore various topics about the practice of policymaking by United States federal institutions, international organizations, and non-state actors in Washington, DC.

P A X68. Policy Simulation.
Apply principles of policy analysis and development, as well as skills in policy communication and leadership, to tackle a contemporary policy problem.

P A X70. Independent Study in Public Affairs.
Undertake supervised individual research on a special topic in the field of public affairs.

P A X80L. Topics in Public Policy and Law.
Various aspects of policy making, policy development, and communications at a variety of levels.

P A X80L.1. Policy Development and Law.
Examines effective policy making at all levels of government, including consideration of the legal process which provides critical context; the policy development process and its relationship to the rule of law; and key elements of public policy development, including ethics, decision making, leadership, and policy implementation.

P A X80L.2. Policy and Law Placement.
Thorough examination of ethical issues and professional responsibilities and development of written and oral communication skills that are preparatory for field placement in policy and law.

P A X80L.3. Law and Public Policy.
Examines the interconnection of public policy and law and how the two disciplines approach related issues; how legal structures and precedent shape and constrain policy choices; and how public policy informs the work of the courts.

P A X90D. Dissertation Proposal Preparation.
Development and preparation of the dissertation proposal.

P A X98T. Supervised Teaching in Public Affairs.
Group meetings with the instructor, individual consultations, and reports. Mandatory for students seeking teaching assistant positions.

Graduate Courses

P A X80L. Topics in Public Policy and Law.
Various aspects of policy making, policy development, and communications at a variety of levels.

P A X80L.1. Policy Development and Law.
Examines effective policy making at all levels of government, including consideration of the legal process which provides critical context; the policy development process and its relationship to the rule of law; and key elements of public policy development, including ethics, decision making, leadership, and policy implementation.

P A X80L.2. Policy and Law Placement.
Thorough examination of ethical issues and professional responsibilities and development of written and oral communication skills that are preparatory for field placement in policy and law.

P A X80L.3. Law and Public Policy.
Examines the interconnection of public policy and law and how the two disciplines approach related issues; how legal structures and precedent shape and constrain policy choices; and how public policy informs the work of the courts.

P A X80P. Policy Research Project.
Interdisciplinary research on a contemporary policy problem involving interaction with sponsoring organizations.

P A X80W. Apprenticeship in Public Policy.

P A X81W. Topics in the Foundations of Policymaking.

P A X82D. Policy Research Project.
Interdisciplinary research on a contemporary policy problem involving interaction with an agency of government.

P A X82G. Policy Research Project on Global Policy Issues.
Interdisciplinary research on a contemporary global policy problem involving interaction with sponsoring organizations.

P A X82W. Topics in Policy Analysis: Seminar.

P A X83C. Topics in Policy Development.
Introduction to how public policy is developed and adopted in government systems. Covers the role of politics and institutions in implementing and managing policy. Normally taken during the first year.

P A X83D. Politics and Process.
Introduction to how public policy develops and is adopted in the American government system.

P A X83G. Policymaking in a Global Age.
History, politics, and organization of how the United States makes and implements foreign policy decisions.

P A X84D. Public Management.
Covers the development and implementation of policy within an organization environment, including the role of political and institutional factors, organization and management concepts, and human information resource issues. Normally taken during the first year.

P A X85C. Topics In Public Management.
Develop and implement policy within an organizational environment in the public and nonprofit sectors including the role of political and institutional actors, organization and management concepts, and human resource information issues.

P A X85D. Advanced Topics in Public Management.
Explore various advanced public management topics related to the development and implementation of policy within an organizational environment in the public and nonprofit sectors including the role of political and institutional actors, organization and management concepts, and human resource information issues.

P A X87G. The Nature of the International System.
Introduces systematic analysis of global policy, factors that motivate foreign policies and private decisions, and instruments used in the conduct of international relations.

P A X87K. Advanced Topics in Public Policy.
Issues in political values and ethics and in natural resources, transportation, health, environmental, international, regulatory, urban, and labor and human resources policy.

P A X87W. Writing For Global Policy.

P A X88D. Advanced Topics in Public Policy.
Typical topics include issues in political values and ethics and issues in transportation, health, environmental, international, regulatory, urban, and labor and human resources policy.

P A X88D.1. Perspectives on Public Policy.
Covers the art and science of policy formulation in the areas of economics, national security, monetary policy, science, technology, and trade. Examines the relationships among policy development processes at the federal, state, and local levels of government.

P A X88D.2. Politics and Policies in an Aging Population.

P A X88D.3. Texas Health Policy.

P A X88F. Topics in Policy and Practice.

P A X88G. Topics in Global Policy Studies.

P A X88J. Writing for Policy.

P A X88K. Advanced Topics in Public Policy.
Typical topics include issues in political values and ethics and in natural resources, transportation, health, environmental, international, regulatory, urban, and labor and human resources policy.

P A X88K.10. Nonprofit Management and Strategy.

P A X88K.11. Qualitative Methods for the Social Sciences.

P A X88K.7. International Development.

P A X88K.8. Introduction to Geographic Information Systems.

P A X88K.9. Nongovernmental Organizations in Developing Worlds.

P A X88L. Advanced Topics in Management.

P A X88N. Invisible Global Market.

P A X88S. Advanced Topics in Public Policy.

P A X88W. Advanced Topics In Public Policy.

P A X89. Conference Course in Policy Analysis.
Individual instruction related to selected aspects of professional theory and practice.

P A X89C. Independent Study in Public Policy.
Individual instruction related to selected aspects of professional theory and practice.

P A X89D. Communications.

P A X89W. Policy Portfolio Internship.
Integrative portfolio course organized around a project incorporating previous studies, academic research and practical application of work in a professional internship.

P A X90C. Advanced Research Methods.
Study of research methods, with a focus on those needed by doctoral students in public policy. Includes discussions of broad controversies in social science methodology and subjects not commonly covered in other first-year graduate courses.

P A X90D. Dissertation Proposal Preparation.
Development and preparation of the dissertation proposal.

P A X90E. Research Design.
Designed to provide a structured framework in which students can develop and apply methods training and produce a research paper.

P A X90G. Writing for Global Policy Studies.
Instruction in the writing styles appropriate for professional careers in international settings.

P A X91. Public Financial Management.
The budget process, budgetary methods, governmental accounting analysis of financial statements, government revenues, debt management, and other financial management techniques for public and nonprofit programs.

P A X91G. Advanced Topics In Public Financial Management.
Explore various advanced public financial management topics that may include budgetary methods, government accounting analysis of financial statements, government revenues, debt management, and other financial management techniques for public and nonprofit programs.

P A X92C. Theory and Philosophy of Public Policy I.
Explores the theoretical foundations of public policy. Includes political philosophy concepts and various theoretical approaches to the policy-making process.

P A X92D. Theory and Philosophy of Public Policy II.

P A X93C. Foundations of Public Policy.

P A X93G. Microeconomics.
Principles of markets and market failures relevant to global policy studies.

P A X93H. International Economics.
Comparative advantage, international trade, international trade institutions, and agreements.

P A X93J. Topics in International Economics.
Comparative advantage, international trade, international trade institutions, and agreements.

P A X93K. Applied Microeconomics for Policy Analysis.
The use of economic reasoning in the development and implementation of public policy.

P A X93L. Topics in Advanced Policy Economics.
Advanced topics in the application of economic reasoning to the development and implementation of policy.

P A X94C. Research Design and Methods I.
Introduction to research and design methods in public affairs/policy.

P A X95. Public Affairs Colloquium.
Guest lectures on topics to be announced.

P A X95C. Supervised Policy Research.
Supervised, individual policy research experience on a topic chosen by the supervising faculty member.

P A X95D. Research Design and Methods II.
Continuing study of research and design methods for students at the doctoral level.

P A X95G. Global Policy Simulation.
Supervised role-playing exercises on global policy.

P A X95W. Policy Simulation.
Supervised role-playing exercises on public policy.

P A X96C. Supervised Public Service.
Supervised, individual practical public service experience in an area chosen by the supervising faculty member.

P A X96G. Internship in Global Policy Studies.
Supervised participation in and observation of international issues as a working member of the staff in an agency of government, a nonprofit organization, or a public policy-related unit in the private sector.

P A X96K. Internship in Public Policy.
Supervised participation and observation as a working member of the staff in an agency of government, a nonprofit organization, or a public policy-related unit in the private sector.

P A X97. Introduction to Empirical Methods for Policy Analysis.
Survey of the application of a broad range of quantitative models to policy analysis and managerial decision-making: optimization techniques based on calculus and linear programming, probability theory and decision analysis, sampling theory and hypothesis testing, regression analysis, and forecasting.

P A X97C. Topics in Advanced Empirical Methods for Policy Analysis.
Research methods, specialized empirical techniques, and data analysis as used in policy analysis and management.

P A X97D. Applied Quantitative Analysis I.

P A X97G. Analytical Methods for Global Policy Studies.
Descriptive statistics, inference, multivariate regression, qualitative methods, and case study methods applicable to global policy research.

P A X98J. Joint Programs with Partner Institutions.
Certification course for students enrolled in Lyndon B. Johnson School of Public Affairs interdisciplinary joint degree programs.

P A X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

P A X98T. Supervised Teaching in Public Affairs.
Group meetings with the instructor, individual consultations, and reports. Mandatory for students seeking teaching assistant positions.

P A X99W. Dissertation.

Professional Courses

P A X80L. Topics in Public Policy and Law.
Various aspects of policy making, policy development, and communications at a variety of levels.

P A X80L.1. Policy Development and Law.
Examines effective policy making at all levels of government, including consideration of the legal process which provides critical context; the policy development process and its relationship to the rule of law; and key elements of public policy development, including ethics, decision making, leadership, and policy implementation.

P A X80L.2. Policy and Law Placement.
Thorough examination of ethical issues and professional responsibilities and development of written and oral communication skills that are preparatory for field placement in policy and law.

P A X80L.3. Law and Public Policy.
Examines the interconnection of public policy and law and how the two disciplines approach related issues; how legal structures and precedent shape and constrain policy choices; and how public policy informs the work of the courts.

P A X90D. Dissertation Proposal Preparation.
Development and preparation of the dissertation proposal.

P A X98T. Supervised Teaching in Public Affairs.
Group meetings with the instructor, individual consultations, and reports. Mandatory for students seeking teaching assistant positions.

P B - Plant Biology

Plant Biology: P B

Lower-Division Courses

Upper-Division Courses

Graduate Courses

P B X80C. Advanced Conservation Biology.
Explore principles and concepts of ecology to the preservation of wild plant and animal species and to the preservation, management, and restoration of natural and semi-natural ecosystems. Focus on biological aspects of issues such as endangered species protection, invasive species, preserve design, and forest management, via a set of case studies.

P B X80E. Advanced Microbial Ecology.
Examine microbial population, community, and ecosystem ecology.

P B X80P. Population Genetics.
Introduction to population genetics. Focus on quantitative understanding of evolutionary change caused by selection, drift, mutation, and migration. Explore phenotypic and molecular evolution.

P B X80R. Advanced Readings in the Biological Sciences.

P B X80T. Topics in Current Biology Concepts.
Designed for beginning graduate students seeking a review of modern biological concepts.

P B X81E. Ecology Seminar.
Listen to and discuss presentations ranging from research progress reports to practice conference talks and well-versed presentations of long term research programs.

P B X81P. Advanced Plant Physiology.
Explore general principles of mineral nutrition, water relations, metabolic activities, growth, and development of green plants.

P B X82. Advanced Study and Research.

P B X82K. Topics in Computational and Statistical Biology.

P B X82K.4. Numerical Ecology in R.
Examine basic concepts and methods of laboratory and field analysis in various fields of biology. Explore systematics and ecology of natural populations.

P B X82K.5. Meta Analysis.
Explore a quantitative approach for synthesizing results from diverse research studies that address a similar hypothesis.

P B X82K.6. Programming for Biology.
Explore programming skills that are relevant to research in the biological sciences, including but not limited to programming in Python, R, Perl, C++.

P B X82K.7. Ecological Theory and Modeling.
Explore concepts and methods of modeling ecological systems including populations, communities, and ecosystems. Focus on the methodology and utility of ecological theory and modeling. Examine the basic techniques and classic insights derived from differential equation, statistical, and individual based models with emphasis on the ability to interpret and evaluate models in the literature.

P B X82K.8. Introduction to Biology for Data Science.
Explore biological concepts and methods (including its assumptions and limitations), particularly in the areas of systems biology, medical and evolutionary genomics, and neuroscience. Focus on approaches that produce a lot of data but are analysis-challenged.

P B X84K. Topics in Ecology, Evolution, and Behavior.
Examine basic concepts and methods of laboratory and field analysis in various fields of biology. Explore systematics and ecology of natural populations.

P B X84K.1. Chemical Ecology.
Explore the breadth of chemical ecology, from its historical focus on pheromonal communication, plant-insect interactions, and coevolution to new frontiers, including novel methods in metabolomics and the community and ecosystem effects of chemically mediated species interactions.

P B X84K.2. Recent Advances in Ecosystem Ecology.
Explore recent advances in ecosystem ecology.

P B X84K.3. Recent Advances in Ecological and Evolutionary Genetics.
Discuss and analyze current and classic literature related to ecological and evolutionary genetics.

P B X84L. Issues in Population Biology.
Analyze currently active areas of research in population biology.

P B X86K. Topics in Plant Sciences.

P B X86K.1. Advanced Subjects in Plant Systematics.

P B X87J. Advanced Plant Anatomy.
Examine plant anatomy in relation to development and differentiation, systematics, and evolution.

P B X87L. Laboratory in Advanced Plant Anatomy.
Review cellular details and tissue systems of plant organs and discuss the preparation of plant materials for histological examination.

P B X88D. Current Research in Plant Biology.
Introduction to various fields of plant biology. Attend seminars, faculty research presentations, and other meetings.

P B X88E. Plant Growth and Development.
Focus on whole plant physiology, especially growth and development, water relations, and mineral nutrition of vascular plants.

P B X88M. Plant Molecular Biology.
Explore the fundamentals of plant molecular biology, including structure and expression of the chloroplast and mitochondrial genomes.
P B X89D. Subjects and Skills for Graduate Students in Plant Biology.
Designed for first-year graduate students in ecology, evolution, and behavior. Introduction to the writing, presentation and appraisal skills needed to excel in all fields of biological research.
P B X90C. Fundamentals of Evolution.
Introduction to major principles and questions in evolutionary biology. Explore population genetics, genetic diversity, adaptation, origin of species, phylogenetics, molecular evolution, and macroevolution. Focus on identifying open questions, analysis and interpretation of data, and gaining familiarity with the primary scientific literature.
P B X90E. Fundamentals of Ecology.
Explore the fundamentals of ecology, ranging from organism physiology to population, species, community, and ecosystem-level processes across landscapes and biomes.
P B X98. Thesis.
P B X98R. Master's Report.
Prepare a report to fulfill the requirement for the master's degree under the report option.
P B X99W. Dissertation.

Professional Courses

P L - Public Leadership

Public Leadership: P L

Lower-Division Courses

Upper-Division Courses

Graduate Courses

P L X81E. Topics in Leadership and Management.
Discover the characteristic and traits of a strategic leader. Explore the skills needed for impactful change management and leadership of inclusive organizations in an ever-changing global environment.
P L X81E.1. Leadership and Management Foundations.
Explore facets of leading a public organization, drawing on research about the sources of success for leaders. Review management foundations and strategies - decision-making, self-awareness, goal setting, team building, and more. Create a personal leadership philosophy.
P L X81E.2. Leading Strategic Change.
Explore the skills and knowledge to plan and lead strategic change initiatives more effectively.
P L X81E.3. Public Leadership Ethics.
Research the concept of ethics and examine how to deploy value-driven decision-making in public organizations. Explore diversity, equity, and inclusion concepts. Determine steps for creating and leading an inclusive organization.
P L X82E. Topics in Strategic Communication and Engagement.
Develop an approach and toolkit for delivering effective public policy communications, managing risk management, and building collaboration among a diverse group of stakeholders.
P L X82E.1. Strategic Policy and Public Communications.
Examine policy and public messages. Use modern communication tools, and manage personal brands.
P L X82E.2. Managing Risks and Creating Shared Value.
Explore risk assessment, crisis management and practical tools and skills to use in the face of crises. Explore how effective leaders create shared value by building cross-sector partnership and engaging in negotiation with stakeholders to solve challenges.
P L X83E. Topics in Executive Analytics.
Explore the fiscal management, data and evaluation tools needed to lead 21st-century public organizations.
P L X83E.1. Financial Management for Decision-Makers.
Examine the theory and practice of public financial management, the principles of budget, finance, accounting, and fiscal administration.
P L X83E.2. Data Analytics and Program Evaluation.
Learn tools, skills, and experience needed to be a sophisticated data-driven decision maker.
P L X84E. Topics in Politics and Policy.
Explore how policymaking, politics, and emerging technologies impact public organizations and agencies.
P L X84E.1. Politics and Policymaking.
Explore how to develop and implement policy. Examine the relationship between policy and politics in developing and implementing policy. Delve into the intersections between national, state, and local politics and policymaking.
P L X84E.2. IT, Cybersecurity and the Public Sector.
Explore modern-day organizational and technology change processes in the public sector. Outline techniques for managing future-focused IT projects and policies in public organizations. Examine the knowledge and skills necessary to acquire, exploit, and protect digital and sensitive information entrusted to public sector organizations.
P L X89E. Research Capstone.
Develop a professional research capstone project that will contribute to leadership success in current or future employment. Create research, writing, and presentation components.

Professional Courses

P R - Public Relations

Public Relations: P R

Lower-Division Courses

P R X05. Fundamentals of Public Relations.
An introduction to public relations history and practice.
P R X05S. Introduction to Integrated Communication for Sports.
Examination of the mass media industry in relation to the field of sports. Focus on the "off-the-field" industries of advertising, marketing, and public relations that impact sports; rights fees contracts; pre-game shows; gameday production; in-stadium activities; and press coverage.
P R X09. Introduction to Advertising and Public Relations Research.
Introduction to concepts and methods of statistics, with emphasis on analyzing personal and group behaviors. Includes exploratory data analysis, correlation and regression, descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing.
P R X11. Topics in Public Relations.
P R X16. Creativity and American Culture.
A cross-disciplinary view of the creative process and creative products. The conceptual core of film, fine arts, advertising, architecture, and literature.
P R X17. Writing for Public Relations.
Introduction to writing skills for the media, including readability, clarity, verification, and style.
P R X19S. Topics in Public Relations.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Advertising and Public Relations. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

P R X20. Integrated Communication for Nonprofit Organizations.
Explores integrated communication and branding in a variety of nonprofit settings. Examines the strategic, integrated use of multiple

communication approaches, including advertising, public relations, new media, promotions, sponsorships, and special events.

P R X21. Leadership and Ethics.
Explores leadership, communication, ethics, and the ability to lead others ethically and effectively. Examine concepts and frameworks related to skills that are integral to ethical, effective leadership.

P R X22. Health Communication: Messages, Campaigns, and the Media.
Covers the development of effective health messages, the design of health campaigns, and investigate the role of the media in influencing people's health and perceptions of health.

P R X23. Public Communication of Science and Technology.
Explores the rapidly growing field of science communication. Examines the intersection of science, media, and society, focusing on media's impact on how people come to understand, perceive, and act relative to scientific issues. Special attention will be directed toward the strategic communication of science and maximizing scientists' engagement with public audiences.

P R X24. Communicating Sustainability.
Focuses on persuasion in the context of environmental attitudes and behaviors. Explores how humans think about and interact with the environment, paying particular attention to climate change. Drawing on theory and examples, examines the challenges and opportunities that arise when people try to communicate about the environment and change individual attitudes and behaviors.

P R X29S. Topics in Public Relations.
Enrollment in this course is to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Public Relations; transfer credit is awarded for work in an affiliated studies program. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

P R X32. Technology Marketing and Advertising.
Explores case histories, interviews with leading technology advertising and marketing executives, and latest trends in digital advertising, both mobile and social, as well as its impact across marketing segments and industries.

P R X32C. New Media Entrepreneurialism.
Covers real life experience/exposure with a series of interviews with real-life practitioners from social media, venture capital, and others with expertise in the field. Explores important trends in digital content and digital business models; a primer for those who wish to learn about entrepreneurialism, technology, and it's intersection with media.

P R X32D. Entrepreneurialism in Communication.
Project-oriented exercise where small teams conceptualize a business idea in communications, curate the insights and opinions of fellow team members, and ultimately develop a business plan around their new endeavor. A panel of local entrepreneurs will provide feedback and critique.

P R X39K. Digital Graphic Communication.
Introduction to the fundamentals of good graphic design, as well as production basics. Develops digital design skills using industry-standard software, from print (Adobe InDesign, Photoshop, Illustrator) to motion (Adobe Premiere, AfterEffects) and interactive (HTML, CSS, WordPress). Assumes no prior knowledge.

P R X39L. Brand Storytelling.
Examination of how classic elements of storytelling, semiotics, and symbolism can be used to create and manage a modern brand's story and 'meaning'. Create visual, verbal, and video examples of brand storytelling that go beyond traditional advertising and public relations.

P R X41S. Research in Sports Communication and Media.
An introduction to advertising and public relations research and methodology for sports.

P R X48. Public Relations Techniques.
Analysis and production of print, electronic, and oral messages to achieve organizational objectives; fundamentals of media relations; Internet applications.

P R X48S. The Business of Sports Media.
Examination of the business of sports-related media, including over-the-air television, cable, satellite television, print, radio, social media, and internet-based media, and the impact of such media on sports presentation and development, professional franchises, colleges, and conferences. Emphasis on how the business of sports media generates revenue and content, and the business models for each type of media, the challenges to such models, and the likely future changes to them.

P R X50. Public Relations Internship.
Internship to be arranged by student and approved by instructor.

P R X50S. Internship in Sports Media.
Practical work experience in sports media. Internship to be arranged by student and approved by instructor.

P R X51. Public Relations Internship.

P R X52. Strategies in Public Relations.
Strategies relating to public relations disciplines, including the management of external, internal, community, nonprofit, and media issues, and public relations marketing programs.

P R X53. Advertising and Public Relations Law and Ethics.

P R X60. Business Foundations for Public Relations.
Examine how communication professionals gain fluency in the language and issues of corporate/nonprofit organizations, discover how to build trust with C-suite leaders, and learn how to become strategic communications counselors for leadership.

P R X61. Creativity in Artificial Intelligence.
Explore the intersection of artificial intelligence (AI) and creative processes. Examine how AI can enhance and augment human creativity in various domains such as art, music, writing, and design. Discuss the latest AI technologies and techniques used to generate innovative content. Analyze the ethical implications and societal impacts of AI-driven creativity. Learn the knowledge and skills to harness the power of AI to push the boundaries of human creativity.

P R X63. Immersive Media Studio.
Explore the space of Immersive Technology. Conduct experimental projects over short periods of time and learn through discovery and sharing findings with others.

P R X64. Immersive Experiences.
Develop an understanding of an audience, the language of development, and awareness of the affordances of each medium to use them effectively in designing immersive user experiences. Work on a real-world client project, which will also be prepared for entry into an immersive storytelling competition.

P R X65. Audience Development and Engagement.
Examine the latest methods used to better understand audiences and their motivations. Explore new approaches and tools for engaging audiences in different content strategies, and what metrics can be used to measure their engagement in ways that prove valuable to content creators, marketers, and audiences.

P R X67. Integrated Communications Management.
Public relations as a managerial problem-solving process; strategic management of programs to enhance public-organizational relationships.

P R X67E. Experimental Storytelling.
Working with real-world clients, examine design thinking and human-computer interaction techniques while ideating, synthesizing concepts, creating user experiences, and developing a proof of concept (PoC) exemplary towards becoming an experience designer.

P R X69. Social Media.
Introduction to social networking platforms and their application in relation to media plans, brand building, and insights.

P R X77H. Integrated Communications Campaigns: Honors.
The concept of media mix; matching product, consumer, and media profiles; and the conception, research, planning, and execution of advertising campaigns. Special emphasis on advanced copywriting, layout, and production for print and broadcast media. Students usually participate in major national contests involving brand development in advertising strategies.

P R X77K. Integrated Communications Campaigns.
Integration of theory, research methods, and communication techniques for planning, implementing, and evaluating public relations campaigns; client proposal writing and presentation.

P R X77M. Topics in Media Studies.
Topics in media and its effects on advertising and public relations strategies.

P R X78. Advanced Topics in Public Relations.

P R X78.21. Semester in Los Angeles: Entertainment Promotion, Press, and Public Relations.
Consider the core disciplines of research, creative, distribution, advertising, publicity, and promotion as they apply to entertainment.

P R X78.3. Black Music and the Media.

P R X78.37. Social Enterprise Branding.
Focus on the development of strategic branding and communication for businesses focused on balancing purpose and profit. Explore components of brand identity and implementation as they relate to the success or failure of companies enacting social impact across a number of industries.

P R X78.38. Influencer Marketing.
Identify, analyze, approach, manage, and measure business goals. Differentiate between attention and influence.

P R X78.39. Pop Star Activism.
Engage with issues of diversity, political activism, public relations, and marketing communication through the lens of popular music.

P R X78.4. Health Communication: Theory and Practice.

P R X78.41. Advertising Intelligence.
Analyze how insights enhance decision making in advertising and public relations in areas such as campaign development, segmentation, positioning, product development, and promotion. Review advertising and public relations problems and processes in ways that will benefit from informed decision making.

P R X78.42. Issues in Black American Advertising and Public Relations.
Explore cultural critiques of the advertising and public relationship industry related to historical and contemporary challenges involving representation, systemic injustice, stereotypes, and social responsibility involving the Black American experience.

P R X78.43. Digital Social Media Analytics.
Explore cutting edge technologies that enable public relations and advertising professionals to better understand online conversations and audience behaviors. Examine how to recommend creative solutions for engaging key stakeholders. Determine how data, creative, and strategy intersect.

P R X78.6. Public Relations in Entertainment.

P R X78S. Special Topics in Sports Media.
Topics in sports media related to issues in traditional and new media as they affect sports and entertainment advertising and public relations.

P R X78S.1. Advertising and Public Relations for Sports.

P R X78S.10. Leadership and Administration in Sports Organizations.
Designed to develop marketing skills related to events, programs, products, and facilities in the sports management field.

P R X78S.11. Sports and Social Media.
Designed to provide an understanding of and experience with the components and best practices of social media, marketing, and communications as they relate to sports entities and the sports field as a whole.

P R X78S.12. Sports Audiences.
An exploration of marketing innovations in sports to attract audiences, and the use of sports media by advertisers, sponsors, and other entities to target various customer groups.

P R X78S.13. Business of Sports Television.

P R X78S.2. Legal Aspects of Sports and Media.

P R X78S.3. Return on Investment of Sports Media.

P R X78S.4. Analysis of Sports and Entertainment Audiences.

P R X78S.5. Ethics and Social Issues in Sports Branding.

P R X78S.6. Sports Audiences and Nontraditional Media.

P R X78S.7. Contributions of Sports and Entertainment to Education and Health.

P R X78S.8. College Sports Media.
An examination of the history of college sports media, with an emphasis on the evolution of sports coverage from NCAA-controlled limited broadcasting of football and basketball,to present day intercollegiate athletics coverage available via multiple outlets.

P R X78S.9. Sports Contract Negotiation Techniques.
Strategies and techniques for successfully negotiating contracts, with a special emphasis on the negotiation of sports contracts.

P R X79. Public Relations Problems.

Graduate Courses

P R X91K. Topics in Seminar in Public Relations.
Survey and analysis of current public relations issues and practices.

Professional Courses

P S - Physical Science

Physical Science: P S

Lower-Division Courses

P S X03. Introductory Physical Science I: Mechanics and Heat.
Inquiry laboratory approach to basic concepts of measurement, forces, motion, energy, temperature, and heat. Designed for students with minimum prior preparation in mathematics and physics. Especially appropriate for prospective elementary school teachers.

P S X04. Introductory Physical Science II: Electricity, Light, and Optics.
Inquiry laboratory approach to electricity, magnetism, waves, light, and optical instruments.

P S X10. Topics in Physical Science.

P S X19S. Topics in Physical Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

P S X29S. Topics in Physical Science.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

P S X41. Topics in Physical Science.

P S X50. Physical Science for Elementary and Middle School Teachers.
An inquiry laboratory in the basic concepts of light, electricity, and magnetism.

P S X67M. Physical Science: Methods of Astronomy.
An introductory, self-paced course in the methods of astronomy that emphasizes learning astronomical principles through observations.

P S X75. Topics in Physical Science: Individual Study.
Guided inquiry reading or laboratory research in physical science.

Graduate Courses

Professional Courses

PBH - Public Health

Public Health: PBH

Lower-Division Courses

PBH X17. Introduction to Public Health.
Overview and basic principles of public health, including the public health system, concepts and tools for measuring health in populations, the relationship between public health and the medical care system, and the role of law and government in public health.

PBH X19S. Topics in Public Health.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PBH X20. Topics in Health Informatics and Health Information Technology.
Concepts, theories, and issues in health informatics and health information technology.

PBH X20.1. Introduction to Health Informatics and Healthcare Analytics.
Consists of didactic lectures about the theoretical foundations of health informatics, database theory and management, healthcare standards, medical decision making, and healthcare analytics. Includes four hands-on workshops that relate to subjects taught in this course: HL7, SQL, Microsoft Excel, Microsoft Access, and Tableau. Also includes a research project over a six-eight week time period, production of a professional poster, and a presentation in a research poster forum judged by faculty, industry representatives, healthcare professionals, and policy makers.

PBH X20.2. Fundamentals of Health Information Technology.
Explores healthcare policy (including privacy and security), current technologies (telemedicine, hospital information systems and computer and networking technologies) and the interoperable exchange of healthcare data.

PBH X20.3. Project Management, Process Redesign and Quality Improvement.
Explores the basics of project management, including requests for proposals, scope, project planning, budgets and deliverables. Also discussed is an analysis of workflow processes and the impact of technology to improve these processes. Quality improvement, including tools to improve quality, is also presented. Includes several individual assignments and one team project.

PBH X20.4. Operational Models of Healthcare Systems.
Explores the complex United States (US) health care system and explains the manner by which health care is delivered along a continuum of care. A special emphasis is placed on the operational delivery of ambulatory care and the manner in which acute care facilitates are evolving. Subjects include a comparison of the US health care system to health care delivery in other countries, population health and health care finance/insurance - including discussion on public (Medicare and Medicaid) and private (Managed Care) coverage. Descriptions of current and emerging payment mechanisms, revenue cycle management, risk management, overhead reduction and practice management are covered in detail to allow students a robust understanding of business issues associated with health care delivery.

PBH X20.5. Technology Competencies in Health Informatics and Health Information Technology.
Hands-on laboratory, team-taught by program faculty and staff with support from industry partners. Utilization of multiple health informatics and health information technology systems, health information exchange and interoperability software, and key analytics tools. This laboratory builds upon concepts taught in Public Health 320, Topic 1 and Public Health 320, Topic 2.

PBH X20.6. Practicum and Professional Development in Health Informatics and Health IT.
Professional development lectures, activities, and a ten-day practicum experience off campus to experience working with industry, healthcare systems, policy makers, and other experts in the field.

PBH X23. Introduction to Health Informatics.
Introduces theoretical foundations of health informatics, database theory and management, healthcare standards, and medical decision making.

PBH X29S. Topics in Public Health.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PBH X30. Topics in Public Health.
Concepts, theories, and issues in public health.

PBH X34. Global Health.
An investigation of global health issues, including the principles of global health, the burden of morbidity and mortality, health determinants, health care and public health systems, socioeconomic development, and human rights.

PBH X37. Selected Topics in Public Health.
Recent developments and research methods in the field of public health will be explored.

PBH X37.1. Senior Seminar in Public Health.
Discuss public health importance, learn how to demonstrate scholarly and applied experience in public health, and prepare to enter the public health workforce or continue in advanced public health or other professional programs.

PBH X38. Environmental Health.
Introduction to the major areas of environmental health presented in the context of epidemiology, toxicology, and health effects. Subjects include water and air quality, solid and liquid waste, hazardous chemicals, radiation, infectious agents, food safety, and occupational health.

PBH X41R. Public Health Research.
Conduct research mentored by public health practitioners at governmental agencies, non-governmental organizations, or health care facilities.

PBH X54. Epidemiology I.
Introduction to basic principles and concepts in epidemiology, including descriptive epidemiology, association and causation, basic epidemiological study design, evidence-based decision analysis, and applications of epidemiology methods to basic and clinical science.

PBH X56. Health Behavior Theory and Practice.
An introduction to social and behavioral theories that inform the discipline of public health and applied public health practice, including practical examples of how these theories inform and influence health promotion to understand and modify health-related behaviors. Focus on health inequities and inequalities of populations living in the United States and how underlying cultures and social structures impact the health of individuals and communities.

PBH X58D. Health Policy and Health Systems.
Explore an overview of the U.S. health care system and the impact of policy and legislative actions on the essentials of organization, financing, management, and delivery of private and public health care.

PBH X61P. Public Health Internship.
Includes a public health research project off campus at a public health practice agency or a graduate school of public health.

PBH X62. Epidemiology II: Quantitative Methods.
Introduction to advanced applied statistical and analytical techniques used for public health research and practice. Examine both continuous and categorical data often used in public health research and apply appropriate data analysis techniques for purposes of data collection, analysis, and evaluation.

PBH X63. Project Management, Planning, and Evaluation.
Investigate the importance of and the key approaches used to lead, conduct and evaluate effective public health programs. Examine practical management and program evaluation tools and techniques such budgeting, proposal/application development and use of logic models. Apply these concepts and tools within the context of service delivery and policy making in the field of public health. Recommended for students who are interested in the Certified Associate in Project Management (CAPM) exam from the Project Management Institute.

PBH X64. Field Epidemiology.
Explore an overview and basic principles of field epidemiology including initiating operations, collecting and managing data, analyzing and interpreting data, developing interventions, and communicating during investigations

PBH X65. Public Health Informatics.
Examine fundamental concepts in the application of informatics and information technology to the practice of public health. Investigate how interoperable information systems are used to facilitate a variety of public health functions, including outbreak management, bio-surveillance, disease prevention, and electronic laboratory reporting.

PBH X66. Global Health in Action.
Interact with non-profit organizations to improve social determinants of health in communities globally. Participate in activities including needs assessments; Internal Review Board (IRB) applications; data collection, management, analysis, and visualization; report preparation; and resource identification as well as gain cultural understanding of the community.

PBH X67. Emerging and Re-emerging Infectious Diseases.
Explore, research, and present emerging and re-emerging infectious diseases, including factors in disease emergence, animal reservoirs, and the principles that govern the detection, mitigation and control of pandemic disease. Study a detailed analysis of host-pathogen interactions, illuminating how viral and bacterial pathogens defeat the host's immune defenses and cause disease. Examine representative emerging and re-emerging pathogens, case-based outbreak investigations, and individual case studies.

PBH X68. Maternal, Child, and Family Health.
Explore an overview of maternal, child, and family related services in the US and the historical and current paradigms in the field with a focus on the life course perspective, health equity, and social determinants of health.

PBH X69. Diverse Communities and Health Equity.
Examine historical and current subjects related to social disparities, structural and institutional inequalities, social determinants of health, racially and ethnically classified social groups, gender inequity, and other forms of inequality and disparities in society and their links with human health. Explore how to work towards health equity by addressing the historical, social, and political drivers of health disparities through implementation of community centered and culturally congruent health equity strategies across varies levels of intervention.

PBH X70. Local Health in Action.
Interact with non-profit organizations to improve social determinants of health in communities locally. Participate in activities including needs assessments; Internal Review Board (IRB) applications; data collection, management, analysis, and visualization; report preparation; and resource identification as well as gain cultural understanding of the community.

PBH X79H. Honors Tutorial Course.
Supervised individual research on a special topic in public health, leading to an honors thesis and an oral presentation. May be based on laboratory, library, or field research.

Graduate Courses
Professional Courses

PED - Physical Education

Physical Education: PED
Lower-Division Courses

PED X01J. Topics in Swimming.

PED X01J.1. Beginning Swimming I.
Elementary physical and mental adjustments, four basic strokes, water safety.

PED X01J.2. Beginning Swimming II.
Five basic strokes, elementary diving, water safety.

PED X01J.3. Intermediate Swimming.
Six power strokes, diving, water safety, introduction to conditioning.

PED X01J.5. Stroke Technique and Fitness Swimming.

PED X02G. Topics in Skin Diving and Scuba Diving.
Training in underwater safety, skin and scuba skills, care of equipment. Culminates in PADI certification.

PED X02G.1. Basic Scuba Diving.
Classroom, pool, and open water training with emphasis on underwater safety, the skills of skin and scuba diving, equipment, the underwater environment, planning for a dive. Culminates in nationally recognized certification.

PED X02G.2. Intermediate Scuba Diving.
Classroom, pool, and open water training with emphasis on navigation, air consumption, emergency procedures, night dives. Culminates in nationally recognized certification.

PED X02G.3. Advanced Scuba Diving.
Classroom, pool, and open water training with emphasis on deep dives, mapping, search and research diving, equipment rescue work. Culminates in nationally recognized certification.

PED X03L. Topics in Social Dance.

PED X03L.1. Beginning Social Dance: Leads.
Introduction to popular social dances, including swing, waltz, bachata, nightclub two-step, cross-step waltz, salsa, west coast swing, and tango. Emphasis on connecting with a dance partner and the art of leading and following. Must register for the role you want to learn: lead or follow.

PED X03L.2. Intermediate Social Dance.
An intermediate survey of popular social dances. Includes more complex partnering and variations in familiar and new dance styles.

PED X03L.3. Advanced Social Dance.
An advanced survey of popular social partner dances. Includes advanced partnering, role reversal, and an emphasis on creativity and style.

PED X03L.4. Intermediate Social Dance: Follows.
Continue exploring the skills learned in Beginning Social Dance. Examine intermediate variations and partnering as well as new dances.

PED X03L.5. Advanced Social Dance: Leads.
An advanced survey of popular social partner dances. Includes advanced partnering, role reversal, and an emphasis on creativity and style.

PED X03L.6. Advanced Social Dance: Follows.
An advanced survey of popular social partner dances. Includes advanced partnering, role reversal, and an emphasis on creativity and style.

PED X03L.7. Beginning Social Dance: Follows.
Introduction to popular social dances, including swing, waltz, bachata, nightclub two-step, cross-step waltz, salsa, west coast swing, and tango. Emphasis on connecting with a dance partner and the art of leading and following. Must register for the role you want to learn: lead or follow.

PED X03L.8. Intermediate Social Dance: Leads.
Continue exploring the skills learned in Beginning Social Dance. Examine intermediate variations and partnering as well as new dances.

PED X04P. Topics in Tennis.

PED X04P.1. Beginning Tennis.

PED X04P.2. Advanced Beginning Tennis.

PED X04P.3. Intermediate Tennis.

PED X04P.4. Advanced Intermediate Tennis.

PED X04P.5. Advanced Tennis.

PED X04R. Topics in Racquetball.

PED X04R.1. Beginning Racquetball.

PED X04R.2. Intermediate Racquetball.

PED X04R.3. Advanced Racquetball.

PED X05C. Topics in Handball.

PED X05C.1. Beginning Handball.

PED X05C.2. Intermediate Handball.

PED X05C.3. Advanced Handball.

PED X05C.4. Handball Doubles.

PED X05M. Topics in Fencing.

PED X05M.1. Beginning Fencing: Foil.

PED X05M.2. Beginning Fencing: Epee.

PED X05M.3. Intermediate Fencing: Foil.

PED X05M.4. Intermediate Fencing: Epee.

PED X05M.5. Intermediate Fencing: Saber.

PED X05M.6. Advanced Fencing: Foil.

PED X05R. Topics in Karate/Tae Kwon Do.
Includes self-defense.

PED X05R.1. Beginning Karate/Tae Kwon Do.
Explore basic hand strikes, kicks, blocks, and fighting combinations. Engage in strikes and kicks on pads and learn practical self-defense techniques. Examine physical conditioning, discipline, and respect.

PED X05R.2. Intermediate Karate/Tae Kwon Do.
Explore beginner and intermediate hand strikes, kicks, blocks, and fighting combinations. Engage in strikes on pads and learn practical self-defense techniques. Examine light sparring, form training, conditioning, respect, and discipline.

PED X05R.3. Advanced Karate/Tae Kwon Do.

PED X05T. Topics in Judo.
Includes self-defense.

PED X05T.1. Beginning Judo.

PED X05T.2. Intermediate Judo.

PED X05T.3. Advanced Judo.

PED X05U. Beginning Hapkido/Self-Defense.

PED X05V. Kickboxing and Self-Defense.
Explore basic karate and boxing hand strikes, kicks, and blocks. Work fighting combinations on pads and understand concepts of speed and power. Examine conditioning and practical self-defense strategies.

PED X06C. Topics in Conditioning.

PED X06C.1. Swim Conditioning.

PED X06C.10. Intermediate Yoga.
Explore yogic physical and subtle body anatomy through poses, breath and meditation techniques. Follow alignment-based instruction to deepen poses learned in Beginner's Yoga and to further explore new and more challenging poses. Employ breathing and meditation practices to experience increased self-regulation and self-awareness.

PED X06C.11. Advanced Yoga.
Continue exploring yoga poses, breathing, and meditation techniques. Discover the modern-day relevance and application of the ancient teachings of yoga as explored in the text The Yogi Sutras.

PED X06C.12. Beginning Yoga.
Explore the principles and benefits of mind-body fitness through the lens of yoga and examine the relationship between exercise, health, and wellness. Discover a yogic approach to cardio and strength training exercises through hatha and vinyasa styles of yoga, as well as mental focus and breathing techniques. Explore aerobic capacity, muscular endurance, muscular strength, mental focus, and overall flexibility.

PED X06C.13. Beginning Pickleball.
Learn to play pickleball: a racquet sport which merges elements of badminton, tennis, and table tennis. Work on the basic pickleball shots and discuss how to keep score, rules, ways to win or lose points, serve order, safety, and etiquette. Play singles and doubles matches.

PED X06C.2. Cardiovascular and Weight Training.

PED X06C.3. Aerobic Walking.

PED X06C.4. Aerobics.

PED X06C.5. Body Works.
Step training with emphasis on muscular/strength endurance work, and inclusion of yoga and pilates. Combines aerobic conditioning with muscular work for a shorter, more intense aerobic segment followed by a challenging muscular workout for the trunk and upper and lower body. Designed to improve body composition, aerobic capacity, muscular endurance, muscular strength, and overall flexibility.

PED X06C.6. Circuit Aerobics.

PED X06C.7. Weight Training.

PED X06D. Topics in Running.

PED X06D.1. Beginning Running.

PED X06D.2. Intermediate Running.

PED X06D.3. Advanced Running.

PED X07C. Topics in Archery.

PED X07C.1. Beginning Archery.
Basic form.

PED X07C.2. Intermediate Archery.
Bow mechanics and competition.

PED X07C.3. Intermediate Field Archery.

PED X07C.4. Advanced Archery.
Tournament shooting and psychology of competition.

PED X07D. Topics in Golf.

PED X07D.1. Beginning Golf.

PED X07D.2. Intermediate Golf.

PED X07D.3. Beginning Golf II.

PED X07L. Topics in Gymnastics.

PED X07L.1. Beginning Tumbling and Trampoline.

PED X07L.2. Intermediate Tumbling and Trampoline.

PED X07L.3. Rhythmic Gymnastics.
Combination of gymnastics and dance movements performed to music using the hand apparatus of balls, hoops, ribbons, or ropes.

PED X07L.4. Beginning Gymnastics I.
Apparatus work in either men's or women's Olympic gymnastics events.

PED X07L.5. Beginning Gymnastics II.
Apparatus work in either men's or women's Olympic gymnastics events.

PED X07L.6. Intermediate Gymnastics.
Apparatus work in either men's or women's Olympic gymnastics events.

PED X07L.7. Intermediate Advanced Gymnastics.
Apparatus work in either men's or women's Olympic gymnastics events. Intense activity.

PED X07L.8. Advanced Gymnastics.
Apparatus work in either men's or women's Olympic gymnastics events. Intense activity.

PED X08C. Topics in Basketball.
PED X08C.1. Beginning Basketball.
PED X08C.2. Intermediate Basketball.
PED X08C.3. Advanced Basketball.
PED X08C.4. Basketball: All Level.
PED X08S. Topics in Softball.
PED X08S.1. Beginning Softball.
PED X08S.2. Intermediate Softball.
PED X09D. Topics in Volleyball.
PED X09D.1. Beginning Volleyball.
Designed for students with few or no volleyball skills.
PED X09D.2. Intermediate Volleyball.
Designed for students with good basic skills: bump, set, spike, serve.
PED X09D.3. Advanced Volleyball.
Designed for students with high skills and knowledge of multiple offenses.
PED X09D.4. Sand Volleyball.
Explore basic motor skills and apply systems and skills of outdoor sand volleyball. Examine physical activity, service learning, cardiovascular health and fitness, and overall well-being.
PED X19S. Topics in Physical Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Kinesiology and Health Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PED X29S. Topics in Physical Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Kinesiology and Health Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PED X30S. Topics in Physical Education.

Graduate Courses

Professional Courses

PGE - Petroleum and Geosystems Engineering

Petroleum and Geosystems Engineering: PGE

Lower-Division Courses

PGE X01. Engineering, Energy, and the Environment.
Introduction to the field of petroleum engineering. Overview of energy supply and demand. Studies subsurface engineering and engineering problem-solving methods, with an emphasis on fossil energy exploitation and geologic CO2 storage. Includes aspects of basic petroleum geology.
PGE X09. Topics in Petroleum and Geosystems Engineering.
PGE X11. Numerical Methods and Programming.
Introduction to computer programming and mathematical equations typically encountered in petroleum and geosystems engineering; methods to visualize data and solve engineering and mathematical equations with numerical methods; and applications of computers to general problem solving.
PGE X12. Physical and Chemical Behavior of Fluids I.
Principles of organic chemistry; phase behavior; properties of hydrocarbon gases and liquids and oil field waters; overview of laboratory phase behavior measurements; material balance calculations.
PGE X19S. Topics in Petroleum and Geosystems Engineering.
Used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Petroleum and Geosystems Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PGE X80. Advanced Petroleum Laboratory for Master's Degree Candidates.
PGE X90. Advanced Laboratory for Doctoral Candidates.

Upper-Division Courses

PGE X21K. Physical and Chemical Behavior of Fluids II.
Applications of thermodynamics and physical chemistry to petroleum and geosystems engineering.
PGE X22K. Transport Phenomena in Geosystems.
Applications of mass, heat, and momentum balances to fluid flow problems; shell balances; non-Newtonian fluids; transport processes through permeable media.
PGE X23K. Reservoir Engineering I: Primary Recovery.
Classification of subsurface reservoirs by type and recovery mechanism; reserve estimates based on material balance; steady-state and transient fluid flow in permeable reservoir rocks as applied to subsurface engineering problems.
PGE X23L. Reservoir Engineering II: Secondary and Tertiary Recovery.
Introduction to reservoir displacement processes; water and gas injection; enhanced recovery.
PGE X23M. Reservoir Engineering III: Numerical Simulation.
Mathematical equations governing fluid flow in reservoirs; numerical methods to solve the equations; numerical reservoir simulation; treatment of wells; history matching; a simulation project performed using a commercial simulator.
PGE X24. Petrophysics.
Properties of rocks; measurement and interpretation of petrophysical properties; application of petrophysics to subsurface engineering problems; interaction of resident fluids with rocks. Extensive written reporting.
PGE X26. Thermodynamics and Phase Behavior.
Basics of phase behavior, classical thermodynamics in terms of material and energy balances, and applications to changes of state of petroleum fluids.
PGE X27. Properties of Petroleum Fluids.
Principles of organic chemistry, phase behavior of multicomponent mixtures, properties of hydrocarbon gases and liquids and oil field waters, overview of laboratory phase behavior measurements, and material balance calculations.
PGE X29S. Topics in Petroleum and Geosystems Engineering.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Petroleum and Geosystems Engineering. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PGE X30. Drilling and Well Completions.
Elements of rock mechanics, drilling fluids, factors affecting rate of penetration, and well completions, including casing and tubing design.
PGE X33T. Engineering Communication.
Advanced technical communication skills, with emphasis on writing strategies for technical documents, oral presentations, and visual aids.

PGE X34. Reservoir Geomechanics.
Basic stress and strain analysis; pore pressure and in situ stress estimation and measurement; deformation mechanisms in rock; rock fracture description and analysis; wellbore stresses and failure; wellbore stability analysis; fault stability analysis; depletion-induced reservoir deformation; and hydraulic fracturing. Emphasis on applications to petroleum engineering.

PGE X38. Geostatistics and Data Analysis.
Explore basic frequentist and Bayesian probability and statistics, confidence and significance models, multivariate and spatial correlated features, feature engineering, spatial debiasing and estimation, stochastic simulation, uncertainty modeling, basic machine learning, and optimum decision making in the presence of uncertainty. Examine applications to spatial problems such as geology and subsurface resource development.

PGE X58. Principles of Formation Evaluation.
Integrated petrophysical interpretation of well logs, core laboratory measurements, and geological data for static, dynamic, and geophysical appraisal of subsurface rock formations.

PGE X61. Advanced Reservoir Engineering.
Secondary recovery methods; computer simulation of reservoir performance; applications to field problems.

PGE X62. Production Technology and Design.
Analysis, specification, and characteristics of production systems; inflow performance; wellbore and tubing hydraulics; and artificial lift.

PGE X63. Petroleum Leasing Regulations and Practices.
Domestic and worldwide regulations associated with petroleum leasing, including offshore areas, and environmental provisions concerning petroleum exploration and production.

PGE X64. Natural Gas Engineering.
Production, transportation, and storage of gas; metering and gauging; performance of wells; estimation of gas reserves; prevention of waste and utilization of natural gas.

PGE X65. Resource Economics and Valuation.
Derivation of profitability criteria for earth resource investments, project analysis in terms of the interrelation of technical and economic factors, investment analysis in the presence of uncertainty, and project planning.

PGE X68. Fundamentals of Well Logging.
Principles, applications, and interpretation of well logs as used in exploration and evaluation of subsurface formations.

PGE X71. Energy Finance.
Fundamentals of finance as applied to the petroleum industry, including petroleum project financing techniques, investigating sources of capital, and methods used to evaluate an oil company's financial performance.

PGE X72. Advanced Drilling and Well Completions.
Applications of geomechanics in wellbore and near-wellbore problems encountered in drilling and completing high-pressure, high-temperature wells on land and water locations.

PGE X73L. Geosystems Engineering Design and Analysis.
Team-oriented design projects involving the application of geologic and engineering methods to the solution of subsurface problems, using field case histories. Projects are selected for each student based on his or her petroleum engineering technical area option.

PGE X75. Special Topics in Petroleum and Geosystems Engineering.
Explore recent developments in engineering.

PGE X76. Special Problems in Petroleum and Geosystems Engineering.
Independent investigation of an advanced subject in petroleum and geosystems engineering, for superior students only.

PGE X77. Deepwater Operations.
Overview of various technical, logistical, and managerial elements that are functionally integrated in deepwater operations, with emphasis on applications in the Gulf of Mexico.

PGE X78. Applied Reservoir Characterization.
Reservoir modeling using software tools for statistical analysis of reservoir data; variogram analysis and modeling; spatial interpolation (kriging); tools for data integration in kriging; stochastic simulation of rock-types (lithology), pay thickness/porosity, and permeability; inputting geological models into flow simulation; uncertainty assessment.

PGE X79. Topics in Petroleum and Geosystems Engineering.
Special courses or seminars on recent developments in engineering.

PGE X79.10. Artificial Lift.
Life of a well, well testing, gas and plunger lift, progressive cavity pumps, electric submersible pumps, and beam lift.

PGE X79.11. Facilities Management.
Petroleum fluid characteristics, process control, separators, metering, produced water, tanks, gas processing, gas compression, and liquid pumps.

PGE X79.12. Blowout Prevention and Control.
Background in hydrostatics, hydrodynamics, hydraulics, geomechanics, mechanical systems, and procedures as they apply to well control.

PGE X79.13. Fundamentals of Enhanced Oil Recovery Techniques.
Overview of the fundamental displacement concepts of chemical, miscible, and thermal enhanced oil recovery methods. Also includes the concept of phase behavior in each process.

PGE X79.14. High Performance Computational Engineering.
An introduction to the UNIX environment in a scientific computing context, including instruction in several import UNIX applications to improve user productivity. Examine the differences between various parallelization styles of computing and develop a basic working understanding of how to utilize the application programming interfaces (APIs) in scientific applications.

PGE X79.15. E4: The Earth, Natural Resources, and Sustainability.
Application of logic, common sense, the fundamental laws of mass and energy conservation, as well as more advanced thermodynamics to evaluate overall efficencies of major human energy supply schemes such as fossil, nuclear, solar, wind, and biomass to define and quantify the irreversible linear processes and sustainable/unsustainable cycles.

PGE X79.16. Hydraulic Fracture Design and Evaluation.
Overview of Formation evaluation; elasticity; in situ stress calculation and measurement; fracture initiation; basic equations of fracture mechanics; 2-and-3-dimensional fracture models; fluid rheology; proppant settling; pipe friction/surface pressure calculations; treatment pressure analysis; fracture diagnostics; fracturing from horizontal and deviated wells; and treatment design and completions.

PGE X79.17. Applied Subsurface Geology.
Principles and techniques for subsurface geologic interpretation, including subsurface mapping; construction of cross-sections; core description and analysis; stratigraphic interpretation of well logs; and stratigraphic and facies interpretation of seismic data.

PGE X79.18. Wellbore Mechanics and Managed Pressure Drilling.
Operational topics will draw from drilling fluids engineering; drilling system engineering; rig and wellbore hydraulics; ROP parameters and drilling optimizations; wellbore stability; fracture and pore pressure gradients; mud weight windows; in-situ and near-wellbore stress states; lost circulation; pressure control; pipe sticking; and other situations common to drilling operations.

PGE X79.19. Advanced Well Construction.
Focus on advanced topics in drilling fluids, cementing, hydraulics, managed pressure and dual gradient drilling, advanced well control and casing design, complex well design (DW, HPHT, Arctic), and well completions.

PGE X79.20. Drilling Engineering and Operations Management.
A broad overview of the key elements of today's drilling engineering discipline, including an understanding of rigs and rig equipment, familiarity with drilling fluids, cementing, directional drilling techniques etc., up to understanding of casing design, well control and the application of new & emerging drilling and completion technologies.

PGE X79.21. Wellbore to Reservoir Geomechanics.
Applications from offshore to unconventionals. Applications of fluid flow/geomechanics concepts at wellbore, near-wellbore and reservoir scales; vertical, inclined, and horizontal wells; drilling, completion, production and reservoir applications; sandstones, shales, carbonates

PGE X79.22. Global Carbon Monitoring Systems.
Review technologies that help us monitor the pulse of the planet. Learn about systems that directly measure carbon dioxide and methane emissions from both natural sources like wetlands and permafrost and human-made sources like agriculture and fossil fuels. Study how modern technologies - drones, satellites, aerial systems - are revolutionizing the way we measure carbon emission from energy production and use.

PGE X79.23. Subsurface Energy Storage.
Explore hydrogen, compressed air, and carbon storage in geological formations. Review ongoing projects and their relations to net-zero greenhouse emission targets. Discuss flow, transport, and geochemical interactions of different gases with site minerals.

PGE X79.3. Geothermal and Sustainable Energy Resources.
Explore energy resources including geothermal, solar thermal, and biomass. Examine the foundations of these energy resources and the engineering approaches to recovering them. Build on basic knowledge in thermodynamics, flow through porous media, and chemistry.

PGE X79.4. Carbon Capture and Storage.
Explore carbon dioxide emission into the atmosphere; carbon dioxide capture from industrial sources; and the utilization, underground storage, and monitoring of carbon dioxide.

PGE X79.5. Energy and the Environment.
Examine current and potential energy sources and how these might impact the earth's environment. Explore the consequences of energy production in terms of the environmental impact. Discuss carbon, water, and land footprints.

PGE X79.7. Small Scale Fluid Flow.
Examine the physics of fluid flow at the microscale in the context of pore-scale transport in subsurface systems and microfluidic models of subsurface systems. Review geological sediment deposition and how that motivates the appropriate microscopic length-scales. Explore equations of mass and momentum conservation for incompressible fluids. Develop simplifications towards the small-scale slow-flow limit to describe transport through pores and cover techniques in microfluidics and micromodels development.

PGE X79.8. Oil, Gas, and Mineral Law.
Explore basic oil and gas law concepts, the forms generally used in oil and gas transactions and the type of regulation commonly applied to the oil and gas industry with a focus on Texas oil and gas law and regulation.

PGE X79.9. Subsurface Machine Learning.
Explore fundamental probability and statistics; inference and prediction; and model training, testing, tuning, and validation. Examine workflows for integrating many features; workflows for anomaly detection, spatiotemporal prediction, and uncertainty integration. Communicate results within a project team to impact subsurface decision making.

PGE X79H. Undergraduate Honors Thesis.
Research performed during two consecutive semesters under the supervision of an engineering faculty member; topics are selected jointly by the student and the faculty member with approval by the director of the Engineering Honors Program. The student makes an oral presentation and writes a thesis.

PGE X80. Advanced Petroleum Laboratory for Master's Degree Candidates.

PGE X90. Advanced Laboratory for Doctoral Candidates.

Graduate Courses

PGE X80. Advanced Petroleum Laboratory for Master's Degree Candidates.

PGE X81. Drilling Engineering.
Basic drilling terminology and advanced drilling engineering topics.

PGE X81K. Engineering Analysis.
Application of classical methods of mathematical analysis to problems frequently encountered in engineering applications.

PGE X81L. Advanced Petrophysics.
Measurement, interpretation, and analysis of petrophysical properties of petroleum reservoir rocks.

PGE X81M. Transport Phenomena.

PGE X82. Basic Geological Concepts for Engineers.
Basic geological principles for students with little or no geological background.

PGE X82K. Theory and Application of Reservoir Transients.
Mathematical development and application of multiple pressure transients in well and reservoir systems.

PGE X82L. Numerical Methods in Petroleum and Geosystems Engineering.
The use of numerical methods and computers in the solution of petroleum and geosystems engineering problems.

PGE X83. Special Topics in Petroleum and Geosystems Engineering.
Recent literature on petroleum production practice and petroleum and geosystems engineering problems.

PGE X83.10. Numerical Solution of Time-Dependent Problems.

PGE X83.12. Near Wellbore Problems.

PGE X83.16. Topics in Computational Methods.

PGE X83.17. Naturally Fractured Reservoirs.

PGE X83.2. Advanced Drilling Fluids.

PGE X83.20. Geostatistics.

PGE X83.24. Natural Gas Engineering.

PGE X83.27. Rock Mechanics: Drilling, Completing, and Producing Applications.

PGE X83.28. Macroeconomics of Petroleum.

PGE X83.30. Fundamentals of Subsurface Environmental Engineering.

PGE X83.32. Hydraulic Fracture Design and Evaluation.

PGE X83.33. Advanced Drilling and Well Completion.

PGE X83.35. Advanced Production Engineering.

PGE X83.36. Advanced Numerical Methods.

PGE X83.38. Chromatographic Transport and Geochemical Modeling.

PGE X83.39. Design and Analysis of Pumping Systems.

PGE X83.41. Energy Finance.

PGE X83.46. International Petroleum Concessions and Agreements.

PGE X83.5. Thermal Recovery.

PGE X83.50. Reservoir Applications of Foam.

PGE X83.55. Pore-Level Petrophysics.
Geological and mathematical investigation of pore-scale basis for transport phenomena and petrophysical properties of sedimentary rocks.

PGE X83.56. Stochastic Methods for Reservoir Modeling.
Spatial interpolation and stochastic simulation techniques for reservoir characterization.

PGE X83.57. Deepwater Operations.
Overview of various technical, logistical, and managerial elements that are functionally integrated in deepwater operations, with emphasis on applications in the Gulf of Mexico.

PGE X83.58. Applied Reservoir Characterization.
Reservoir modeling using software tools for statistical analysis of reservoir data; variogram analysis and modeling; spatial interpolation (kriging); tools for data integration in kriging; stochastic simulation of rock types (lithology), pay thickness/porosity, and permeability; inputting geological models into flow simulation; uncertainty assessment.

PGE X83.59. Oil and Gas Production Facilities Design.
Applied theory relating to field processing of hydrocarbons and water, including hydrocarbon and gas separation, gas sweetening and dehydration, gas compression, fluid metering, process control, corrosion, and safety systems.

PGE X83.60. Energy and Earth Resource Economics.
Theoretical and applied topics in natural resource economics, including project analysis, production theory, industrial organization, markets and regulation, and environmental economics.

PGE X83.61. Project Management.
Overview of project management theory and practice in the natural resource sector, with a focus on exploration and production of energy resources.

PGE X83.62. Energy and the Environment.
A survey course covering current and potential energy sources, what the energy supply mix will be in the future, and how this might impact the environment.

PGE X83.63. Subsurface Machine Learning.
Explore the theory and practice of data analytics and machine learning for subsurface resource modeling. Examine fundamental probability and statistics; data preparation and feature engineering, inference (clustering, multidimensional scaling) and prediction (regression, naive Bayes, decision trees, random forest, support vector machines and artificial neural nets); and model selection, training, testing, tuning, and validation.

PGE X83.64. High Performance Computing for Engineers.
Explore an introduction to the UNIX environment in a high-performance scientific computing context. Examine several import UNIX applications that can help users be more productive. Discuss the basic differences between various parallelization styles of computing, as well as how to utilize the application programming interfaces (APIs) in scientific applications.

PGE X83.65. Formation Evaluation of Unconventional Reservoirs.
Explore advanced formation evaluation of unconventional reservoirs through experimental and computational/analytical methods and workflows. Discuss the rock physics of unconventional reservoirs. Examine multi-physics and multi-scale formation data (well logs, core data, and geological information) to construct hydrocarbon reservoir models amenable to production forecast and improved development of available reserves in unconventional reservoirs.

PGE X83.66. Data Analytics and Geostatistics.
Explore subsurface data analytics and geostatistics, from fundamental probability and statistics, univariate and multivariate analysis, representative sampling, spatial characterization and modeling, and uncertainty management to decision-making in the presence of uncertainty.

PGE X83.67. Applied Subsurface Geology.
Explore subsurface geology as a window into stratigraphy, depositional environments, depositional processes, tectonic influences, and other knowledge that can be applied to petroleum systems. Examine principles and techniques for subsurface geologic interpretation through inquiry-based, hands-on activities using petroleum-industry datasets.

PGE X83.68. Digital Rock Physics.
Examine current modalities used in imaging porous medium structure, transport within, or its deformation. Discuss the analysis and visualization of 2D or 3D images, quantifying properties of interest (such as porosity, tortuosity, areas or permeability) as well as the associated uncertainty. Delve into a combination of advanced image analysis algorithms, scientific visualization, and computation (based on the images). Explore digital rock physics: the images, their analysis, and using them in simulation of petrophysical properties of interest.

PGE X83.69. Geothermal and Sustainable Energy Resources.
Explore energy resources including geothermal, solar thermal, and biomass. Examine the foundations of these energy resources and the engineering approaches to recovering them. Build on basic knowledge in thermodynamics, flow through porous media, and chemistry.

PGE X83.70. Advanced Geomechanics.
Examine the fundamentals of theoretical geomechanics and its application to problems in petroleum engineering. Explore the mechanics of porous solids and saturated porous solids, mechanical properties of real reservoir geomaterials, plane strain solutions for typical applications and numerical solutions for particular problems, and thermo-hydro-mechanical coupled processes. Apply this knowledge to understand the deformational behavior of various geomaterials found in petroleum engineering, to recognize situations in which geomechanical effects are important, and to choose the proper tools to solve geomechanical problems.

PGE X83.71. Artificial Lift.
Explore the life of a well, well testing, gas and plunger lift, progressive cavity pumps, electric submersible pumps, and beam lift.

PGE X83.72. Carbon Capture and Storage.
Explore carbon dioxide emission into the atmosphere; carbon dioxide capture from industrial sources; and the utilization, underground storage, and monitoring of carbon dioxide.

PGE X83.73. Finite Element Methods.
Explore the basic concepts of the finite element method for two-point boundary value problems, elliptic and parabolic partial differential equations, and linear and nonlinear solvers. Examine the development of the method: weak formulations, approximating spaces, and construction and solution of linear systems.

PGE X83.74. Writing Technical Papers.
Explore how to write technical papers, theses, and dissertations. Practice writing and editing technical works.

PGE X83.75. Inverse Problems in Geophysics and Petroleum Engineering.
Explore the basics of multi-parameter linear and nonlinear inversion of noisy measurements. Discuss inversion methods including deterministic, stochastic approaches, and machine-learning approaches. Examine examples of application from the fields of subsurface geophysics and petroleum engineering.

PGE X83.76. Decision Analysis.
Explore the principles and application of techniques for the logical illumination of complex decision problems within any context. Examine utility theory, probability as a statement of belief, risk preference, value of information and control, probability assessment, influence diagrams, risk sharing and scaling, and life and death decision making. Discuss the principles and fundamental concepts for the normative theory of decision making under uncertainty. Develop a language, set of theories, and tools to transform complex decisions into ones where the course of action is clear.

PGE X83.77. Small-Scale Fluid Flow.
Examine the physics of fluid flow at the microscale in the context of pore-scale transport in subsurface systems and microfluidic models of subsurface systems. Review geological sediment deposition and how that motivates the appropriate microscopic length-scales. Explore equations of mass and momentum conservation for incompressible fluids. Develop simplifications towards the small-scale slow-flow limit to describe transport through pores and cover techniques in microfluidics and micromodels development.

PGE X83.78. Subsurface Energy Storage.
Explore hydrogen, compressed air, and carbon storage in geological formations. Review ongoing projects and their relations to net-zero

greenhouse emission targets. Discuss flow, transport, and geochemical interactions of different gases with site minerals.

PGE X83.79. Global Carbon Monitoring Systems.
Review technologies that help us monitor the pulse of the planet. Learn about systems that directly measure carbon dioxide and methane emissions from both natural sources like wetlands and permafrost and human-made sources like agriculture and fossil fuels. Study how modern technologies - drones, satellites, aerial systems - are revolutionizing the way we measure carbon emission from energy production and use.

PGE X84. Advanced Thermodynamics and Phase Behavior.
Thermodynamic study of pressure/volume/temperature/composition relationships in oil and gas mixtures.

PGE X85K. Advanced Multi-Well Formation Evaluation.
Advanced concepts in formation evaluation for the estimation of static and dynamic petrophysical properties of rocks from well logs, core data, and geological information. Multi-well data sets, seismic amplitude data, and regional geological studies are used to construct hydrocarbon reservoir models amenable to production forecast and improved development of available reserves.

PGE X85M. Advanced Well-Logging and Correlation.
Advanced well-logging for the geologist and engineer, involving working problems with suites of well logs to cover advanced mapping and logging techniques.

PGE X86K. Advanced Fluid Flow in Porous Media.
The hydrodynamic equations governing the steady state flow of homogeneous fluids in porous media and their application to petroleum and geosystems engineering problems.

PGE X87. Secondary Recovery of Petroleum.
Recovery by gas injection and water flooding.

PGE X87K. Fundamentals of Enhanced Oil Recovery I.
Recent innovations in the recovery of petroleum by injecting fluids miscible with the oil or by application of heat to the reservoir.

PGE X87L. Fundamentals of Enhanced Oil Recovery II.
Basic concepts and principles of chemical flooding methods of enhanced oil recovery, which include polymer flooding, surfactant-polymer flooding (SP), alkaline-sufactant-polymer flooding (ASP), chemical imbibitions by wettability alteration methods and surfactant-gas (SG) methods, and also some comparisons with other EOR methods such as miscible gas flooding when appropriate and as time permits.

PGE X88. Advanced Reservoir Engineering.
Basic concepts of reservoir engineering, with applications to the production of hydrocarbons from both gas and oil reservoirs. Examines the governing equations for flow in permeable media, as well as concepts such as streamline flow; pseudo-steady-state flow, fractional flow, and both immiscible and miscible flow. Uses black oil and compositional reservoir simulators.

PGE X89. Economic Analysis in the Petroleum Industry.
Engineering justification for capital outlay in the petroleum industry.

PGE X90. Advanced Laboratory for Doctoral Candidates.

PGE X92K. Numerical Simulation of Reservoirs.
Development and application of reservoir simulator models to primary and secondary recovery processes in reservoir engineering.

PGE X97M. Graduate Research Internship.

PGE X97R. Research in Petroleum and Geosystems Engineering.

PGE X98. Thesis.

PGE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

PGE X99W. Dissertation.

Professional Courses

PGE X80. Advanced Petroleum Laboratory for Master's Degree Candidates.

PGE X90. Advanced Laboratory for Doctoral Candidates.

PGS - Pharmacy Graduate Studies

Pharmacy Graduate Studies: PGS

Lower-Division Courses

Upper-Division Courses

Graduate Courses

PGS X80E. Concepts in Biomedical Pharmacology.
Explore fundamental concepts of pharmacology, pharmacologic agents and relevant physiology and disease pathophysiology in the areas of neuropharmacology; cardiovascular; gastrointestinal; renal; hematopoiesis; immune/asthma/allergy; endocrine; anti-virals and anti-retrovirals; cancer therapeutics and immunotherapy.

PGS X80J. Advanced Pharmaceutics: Laboratory Research.

PGS X80M. Topics in Advanced Pharmaceutics.

PGS X80S. Basic Principles in Experimental Design and Statistics.
Basic principles in experimental design and statistics with a focus on real world situations that may be encountered while performing scientific research.

PGS X80T. Texas Venture Labs Startup Practicum.
Places students in teams and connects them with Austin-area startup companies. The teams then execute business consulting projects for the startup companies. Explores how these projects help companies better understand their market, competition, business model, etc, in order to accelerate their path to market and funding decisions.

PGS X81F. Product Development.
Application of physical-chemical principles to the formulation and development of stable and bioavailable drug delivery systems.

PGS X81G. Advanced Manufacturing Pharmacy.
Physical-mechanical properties of compacts, drugs, and polymers. Properties of biodegradable and nonbiodegradable polymers in pharmaceutical formulations. Process validation and pilot plant scale-up.

PGS X81H. Advanced Pharmaceutical Processing.
Didactic and laboratory exposure to pharmaceutical processes used in the design, development, and optimization of drug delivery systems. Emphasis on equipment and machinery used in pharmaceutical manufacturing of these dosage forms, with discussion of other issues, such as technology transfer and scale-up.

PGS X81J. Advanced Pharmacy Administration: Laboratory Research.

PGS X81M. Topics in Advanced Pharmacy Administration.

PGS X81N. Health Care Systems.
Overview of the health care system in the United States and examination of the classic and contemporary literature on managed health care systems, with emphasis on pharmacy-related issues. Studies the advantages, disadvantages, and effects of these systems on patients, providers, and payers.

PGS X81V. Communication Skills for Translational Scientists.
Explores oral and written communication skills for scientists conducting translational research at the interface of basic and clinical science. Introduction to the skills necessary to successfully convey medication and healthcare-related data in a professional manner. Involves discussions addressing subjects such as medical writing, grant writing, abstract development, and poster design.

PGS X81W. Molecular and Pharmacological Basis of Therapeutics.
Broad issues of molecular pharmacotherapeutics, including potential and challenge for optimization of drug therapy, implications for drug development and regulation, ethical and social aspects of pharmacogenomics, signal transduction, use of knock-out mice, and informed consent process in pharmacogenomic research.

PGS X82F. Analytical Methods in Biologics Formulation.
Explore theory and practice of techniques used to characterize and analyze pre-formulated and formulated biologics, as well as basic biology specific to formulation sciences.

PGS X82J. Advanced Pharmacotherapy Seminar I.
Discussion of advanced pharmacotherapeutics topics, case presentations, and journal clubs at the advanced practitioner level.

PGS X82K. Advanced Pharmacotherapy Seminar II.
Discussion of advanced pharmacotherapeutics topics, case presentations, and journal clubs at the advanced practitioner level.

PGS X82R. Topics in Recent Advances in Pharmaceutics.
Presentation of topics of current research interest in physical pharmacy, biopharmaceutics, and pharmacokinetics.

PGS X82S. Advanced Biopharmaceutics.
Provides students with a more comprehensive background in biopharmaceutics and the drug approval process.

PGS X82T. Basic Concepts of Tumor Biology.
A survey of cancer biology that includes tumor pathology, initiation, progression and metastasis, genetic instability, DNA damage and repair, cell cycle control, oncogenes, tumor suppressor genes, and the immune response.

PGS X82U. Drug Discovery and Development.
Examine the fundamental principles of drug discovery and development including patenting, clinical trials, and marketing.

PGS X82V. Pharmaceutical Biotechnology.
Application of protein, oligonucleotide, and related molecules as therapeutic agents: stability, formulation, kinetics, dynamics.

PGS X82W. Ethics in Science and Clinical Practice.
Ethical considerations in the conduct of clinical research, including institutional review boards, adherence to protocol, Food and Drug Administration and related site reviews, protection of human subjects through informed consent and confidentiality, and the use of genetic banks in research.

PGS X83D. Neuropharmacology I.
An advanced survey of neurotransmitters and systems in the brain. Covers experimental approaches and pharmacological analysis at behavioral, neurochemical, and neuroanatomical levels to determine mechanisms of actions of drugs that act on the brain.

PGS X83E. Neuropharmacology II.
Explore neuropharmacological concepts related to brain development, organization and anatomy; neuroendocrinology, neuroimmunology and neuroinflammation; gut-brain axis; neurobiology of addiction; and others.

PGS X83G. Analytical Methods in Biologic Formulations.
Examine primary challenges in formulating biologics. Compare relevant techniques to characterize and analyze biopharmaceuticals and explore how they are applied in pre-formulated and formulated biologics.

PGS X83M. Health Innovation Entrepreneurship.
Explore a highly interactive and interdisciplinary approach for developing health innovation, including drug product, devices, and digital health solutions. Examine foundational entrepreneurial and innovation concepts for identifying and developing ideas, performing market validation, conducting customer discovery, assessing competition, and identifying skills for effectively working in teams.

PGS X83N. Solution Theory and Disperse Systems.
The theory and technology of solutions and heterogeneous systems; applications of scientific principles to the design of pharmaceutical products; a study of factors influencing physical chemical characteristics, stability, and biopharmaceutical activity of solutions and coarse dispersions; review of recent literature.

PGS X83P. Advanced Pharmacokinetics.
Study of the kinetics of absorption, distribution, metabolism, and excretion of drugs in the intact organism.

PGS X83Q. Statistics in Translational Science.
Pharmaceutical statistical analysis with a focus on choosing the appropriate statistical test to address both basic science and clinical research hypotheses. Students use the JMP software package to execute statistical analysis on their own pharmaceutical research projects.

PGS X83R. Rate Processes in Pharmaceutical Systems.
A study of decomposition and stabilization of drug molecules in solutions and in solid dosage forms; principles of kinetics and diffusion as applied to pharmaceutical systems.

PGS X83V. Research Design and Methods.
Explore a practical approach to classical experimental design, hypothesis generation, development of translational research methods that incorporate principles of basic and clinical science. Examine writing with a focus on grantsmanship and protocol development.

PGS X83W. Biopharmaceutical Analysis.
Analytical methods for the isolation and identification of drugs and their metabolites, specific genes, and proteins in biological fluids.

PGS X84G. Pharmacological Mechanisms of Addiction.
Overview of neurobiological and pharmacological mechanisms of addiction, with in-depth discussion of recent literature in the field of addiction and animal models of addiction

PGS X84K. Fundamentals of Toxicology.
An organ system approach to advanced topics in general toxicology.

PGS X84L. Biochemical and Molecular Toxicology.
Discussion of mechanisms of selected drugs and toxicants.

PGS X84N. Health Behavior Theory and Medication Use Process.
In-depth analysis of the social and behavioral issues that affect medication use, using the content, theories, and methodologies associated with patient compliance research.

PGS X84S. Introduction to Epidemiology.
Principles of epidemiology; descriptive analytic, and clinical epidemiology; epidemiologic perspective for health care management; epidemiology and the public policy process; pharmacoepidemiology.

PGS X84T. Advanced Epidemiology.
Review of major research methods and current issues within drug epidemiology. Emphasis on application of methods by reviewing historical and contemporary literature/examples. Areas presented include: how to read, interpret, design, conduct, review, critique and evaluate pharmacoepidemiology studies.

PGS X84U. Biopharmaceutical Analysis Laboratory.
Analytical methods for the isolation and identification of drugs and their metabolites, specific genes, and proteins in biological fluids.

PGS X85D. Responsible Conduct of Science.
Ethical considerations in the conduct of science, including issues of animal welfare and/or human subjects research, data analysis, fraud, publications, misconduct, intellectual property, grants, peer review, and mentor responsibility.

PGS X85G. Grant Writing for Pharmacology and Toxicology.
Subjects include federal and nonfederal grants, specific aims, preliminary data, hypothesis testing, experimental design, peer review, responding to critiques, biosketch, and budgeting.

PGS X85J. Advanced Pharmacotherapy Laboratory Research.

PGS X85L. Clinical Pharmacokinetics.
In-depth analysis of pharmacotherapeutic regimens, using complex mathematical models.

PGS X85M. Advanced Pharmacokinetics and Pharmacodynamics.
Continuation of Pharmacy Graduate Studies 385L. Advanced pharmacokinetic and pharmacodynamic concepts and their application.

PGS X85N. Translational Science PhD Seminar.
Explore the scientific and operational principles underlying each step of the translational process, with an emphasis on multi-disciplinary, collaborative research and methods to move discovery more efficiently and effectively into application.

PGS X85W. Advanced Topics in Pharmacotherapy.

PGS X86C. Cellular and Systems Physiology I.

Basic principles of human physiology and anatomy in relation to drug action. Includes cellular and subcellular physiology, membrane transport, electrophysiology, synaptic transmission, and autonomic, neurological, and cardiovascular physiology and anatomy.

PGS X86D. Cellular and Systems Physiology II.

Principles of cellular and systems physiology. Subjects include immunology, kidney function, respiration, acid-base balance, blood and hematopoiesis, general endocrinology, neuroendocrinology, and reproduction.

PGS X86J. Advanced Medicinal Chemistry: Laboratory Research.

Modern laboratory techniques used in medicinal and natural products chemistry.

PGS X86M. Pharmaceutical Industry and Marketing.

Subjects include the structure, size, and regulation of the pharmaceutical industry, including good manufacturing practices; drug development, pricing, marketing, and channels of distribution; and issues that impact the drug development industry, including generic drug competition, patent life, active ingredient importation and finished drug product importation, drug counterfeiting and safety concerns, direct-to-consumer advertising, and the drug approval process.

PGS X86N. Topics in Pharmacy.

Current issues in translational science.

PGS X87G. Manuscripts in Pharmaceutical Science.

Explore skills essential for scientific leaders including scientific reviewing, reasoning, and writing, and their application to critically reviewing and communicating research plans and data.

PGS X87Q. Communication Skills for Scientists.

Designed to enhance written and oral communication skills through lectures and practice. Covers grant writing, journal paper writing, poster presentation writing, and delivery.

PGS X88C. Introductory Bioorganic Chemistry.

Survey of enzyme-catalyzed reactions, with emphasis on mechanism, experimental design, and applications in natural products biosynthesis.

PGS X88G. Dialogue Across Difference.

Develop framework, terminology, and critical thinking and empathy tools for engaging in productive conversations around difficult topics. Explore both differences and commonalities across and within social identities, dialogue about issues pertaining to systems of oppression and enhance intercultural competencies. Examine the meaning of social identities and how they intersect, influence and/or are influenced by others.

PGS X88J. Advanced Pharmacology: Laboratory Research.

PGS X88K. Topics in Advanced Pharmacology.

PGS X88M. Fundamentals of Fluorescence Microscopy.

Explores optics, image formation, functioning of epifluorescent and confocal microscopes, detector technology (cameras and photomultiplier tubes), immunofluorescence techniques, image analyses, and image presentation for publication. Study of the technology and science behind widely-used high-end microscope systems.

PGS X89C. Pharmacy Association Management.

An introduction to the principles involved in managing pharmacy associations.

PGS X89J. Advanced Pharmacotherapeutics of Cardiovascular Disorders.

Designed to provide the student with a sound knowledge and comprehension of contemporary pharmacotherapeutic regimens used in treating cardiovascular diseases.

PGS X89M. Fundamentals of Health Innovations.

Explore foundational innovation and entrepreneurship concepts related to the process of developing novel drug therapies, medical devices, diagnostics, and digital health products and services.

PGS X89P. Advanced Pharmacotherapeutics of Infectious Diseases.

Designed to provide the student with a sound knowledge and comprehension of contemporary therapeutic principles used in treating infectious diseases.

PGS X89Q. Seminar in Alcohol Studies.

Presentations and discussion of current research topics in alcohol studies.

PGS X90G. Topics in Advanced Pharmacotherapeutics of Human Diseases and Illnesses.

A comprehensive analysis of disease processes and a determination of appropriate therapeutic interventions for the treatment of those diseases.

PGS X90H. Advanced Pharmaceutics Research Conference.

PGS X90J. Data Analysis in Health Care.

Statistical analysis of research data using the computer and various statistical software programs.

PGS X90K. Experimental Design and Research Methodology in Health Care.

Principles and procedures of experimental, quasi-experimental, and non-experimental research designs; includes reliability, validity, data collection methods, qualitative study designs, and survey methodologies.

PGS X90R. Topics in Pharmacotherapy: Special Problems.

Individual supervision of research problems in the clinical pharmacy sciences, including pharmacokinetics, pharmacodynamics, efficacy, safety, and pharmaceutical care.

PGS X90U. Advanced Research Methods in Health Care.

Advanced methodologies used in pharmacy administration research; designed to build upon the skills covered in Pharmacy 390K. Explores data management issues and statistical procedures, with emphasis on the application of research methodology concepts and principles.

PGS X91E. Advanced Hematology and Oncology Seminar I.

In-depth discussion of the contemporary pharmacotherapy and patient care relating to hematology, oncology, and bone marrow transplantation.

PGS X91F. Advanced Hematology and Oncology Seminar II.

In-depth discussion of the contemporary pharmacotherapy and patient care relating to hematology, oncology, and bone marrow transplantation.

PGS X91H. Advanced Health Outcomes and Pharmacy Practice Research Conference.

PGS X92E. Clinical Research Methods I.

Defining a research question, general study design issues, cross-sectional and case-control studies, and diagnostic test evaluation.

PGS X92F. Clinical Research Methods II.

Prospective observational studies; randomized controlled trials, nonrandomized intervention studies; meta-analysis; and data synthesis, evaluation, and application.

PGS X92Q. Interdisciplinary Collaboration and Career Development.

An overview of pharmacy and its primary disciplines of pharmaceutics, medicinal chemistry, pharmacy administration and practice, pharmacotherapy, and pharmacology/toxicology.

PGS X92T. Joint PhD Program with Partner Institutions.

Translational science study at partner institutions.

PGS X93Q. Health-Related Quality of Life.

Terms, concepts, procedures, methods, problems, and strengths associated with health-related quality of life (HRQOL) research.

PGS X93T. Pharmacoeconomics.

Terms, concepts, procedures, methods, problems, and strengths associated with pharmacoeconomics.

PGS X93U. Pharmacotherapy Master's Mentorship.

Experience in pharmacy practice, research, and/or administration.

PGS X94I. Internship in Pharmaceutical Sciences.

Work in a professional environment and apply research, analysis, communication, and other academic skills to practical work. Experience may be on- or off-campus, paid or unpaid, and may include work with

public or private corporations, nonprofit agencies, government offices, or academic laboratories. Internship to be arranged by the student and approved by their supervising professor.

PGS X94Q. Professional Development for Pharmaceutical Scientists.

Explore professional development skills (e.g., creating an individual development plan, understanding and capitalizing on strengths, curriculum vitae and resume writing, best practices in networking) and career pathways available to graduate students receiving advanced degrees in the pharmaceutical sciences.

PGS X95H. Advanced Pharmacotherapy Research Conference.

PGS X95S. Environmental and Molecular Mechanisms of Health and Disease.

Present and discuss current research topics in environmental and molecular mechanisms of health and disease.

PGS X96H. Advanced Medicinal Chemistry Research Conference.

PGS X96M. Medicinal Chemistry: General Principles, Pharmacological Classification, and Mechanism of Action.

Introduction to medicinal chemistry, covering drug classes according to their pharmacological classification, structural class, and mechanism of action.

PGS X96S. Seminar in Pharmacy.

PGS X96T. Seminar in Toxicology.

Presentations and discussion of current research topics in toxicology.

PGS X97. Fundamentals for Teaching Assistants.

Skills, behaviours, and strategies for effective college teaching, with emphasis on pharmacy-related courses.

PGS X97H. Advanced Pharmacology Research Conference.

PGS X97M. Drug Design and Synthetic Strategy.

A multiperspective approach to modern concepts and drug design and synthetic strategy.

PGS X97S. Seminar in Pharmacotherapy: Advanced Topics.

PGS X98. Thesis.

PGS X98T. College Teaching Methodology.

Interdisciplinary course intended to provide a foundation of theoretical and practical knowledge about teaching at the post-secondary level. Instructional methods; instructional design; practice teaching; teaching philosophy; instructional technology; assessment of learning; class discussions; individual consultations.

PGS X99W. Dissertation.

Professional Courses

PHL - Philosophy

Philosophy: PHL

Lower-Division Courses

PHL X01. Introduction to Philosophy.

A survey of principal topics and problems in areas such as ethics, theory of knowledge, and philosophy of religion.

PHL X01K. Ancient Philosophy.

An introduction to the philosophical achievements of the ancient world, concentrating on Plato and Aristotle.

PHL X01L. Early Modern Philosophy.

An introduction to the philosophical achievements of the seventeenth and eighteenth centuries, concentrating on such figures as Descartes, Hume, and Kant.

PHL X02. World Philosophy.

Basic issues of philosophy in Western and non-Western traditions, such as the nature of philosophy, its relation to religion and science, the self, knowledge, and virtue.

PHL X02C. Ethics and Enlightenment.

A study of non-Western ethics, especially in Hindu and Buddhist traditions.

PHL X03. Human Nature.

Theories of human nature, such as those of Plato, Christianity, Marxism, and existentialism. Modern psychological and biological theories are included, as the interplay of nature and nurture in determining human conduct is explored.

PHL X03M. Mind and Body.

Introduction to philosophical issues about the nature of mind and its relation to body: What is mind? Do people have free will? How does psychology relate to neuroscience?

PHL X04. Contemporary Moral Problems.

Philosophical examination of selected moral problems arising out of contemporary society and culture.

PHL X04T. Introduction to Technology Ethics.

Examine ethical challenges that have been introduced or exacerbated by recent technological advancements.

PHL X05. Introduction to the Philosophy of Religion.

A critical examination of various conceptions of God and of the relationship of the human and the divine.

PHL X06. Topics in Philosophical Thinkers.

An introduction to major areas of philosophy through the study of selected philosophical thinkers.

PHL X06D. Descartes.

Examine the philosophy of Rene Descartes.

PHL X06L. Mind, Matter, and Persons.

Examines the philosophy of John Locke.

PHL X10. Knowledge and Reality.

An introduction to basic issues in epistemology and metaphysics.

PHL X10Q. Problems of Knowledge and Valuation.

Methods and aims of selected sciences, arts, and philosophy in the attainment of knowledge and in providing the basis for valuation.

PHL X11. Argument.

Argument as a kind of discourse: deductive and inductive arguments; principles of reasoning; fallacies; practical applications.

PHL X11K. Games and Decisions.

Introduction to the theories of games and rational decision, with applications to ethical, social, and political issues.

PHL X12. Introduction to Logic.

Logical structure of sentences and arguments; elementary symbolic methods; applications.

PHL X13. Introductory Symbolic Logic.

Introduction to symbolic logic (through first-order predicate logic); interpretations; formal proofs, consistency; some practical applications.

PHL X13K. Logic, Sets, and Functions.

Sets, relations, functions, sentential and predicate logic, proof techniques, algorithms, and elementary metatheory. Mathematically oriented.

PHL X13Q. Logic and Scientific Reasoning.

Introduction to formal proofs, semantics, quantifiers, inductive methods, decision theory, and scientific reasoning.

PHL X15F. Philosophy and Film.

Formulation, analysis, and criticism of philosophical ideas in selected films.

PHL X15L. Philosophy and Literature.

Formulation, analysis, and criticism of philosophical ideas in selected works of literature.

PHL X16K. Science and Philosophy.

Introduction to scientific method, including discussion of the nature and goals of science.

PHL X17K. Introduction to the Philosophy of the Arts.

Classic issues in the philosophy of art and beauty, illustrated from the fine arts and contemporary media: literature, drama, music, painting, film, and television.

PHL X18. Introduction to Ethics.
Study of basic principles of the moral life, with critical examination of traditional and contemporary theories of the nature of goodness, happiness, duty, and freedom.

PHL X18K. Introduction to Political Philosophy.
Views of major political philosophers on humanity, nature, and society; discussions of contemporary political ideologies.

PHL X19S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHL X29S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PHL X19S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHL X21K. Theory of Knowledge.
Systematic and detailed study of major issues in the theory of knowledge, such as the distinction between knowledge and belief, the criteria of knowledge, the justification of knowledge-claims, and perception.

PHL X22. Science and the Modern World.
The historical development and impact of scientific ideas through the modern period to the present.

PHL X22K. History of Ethics.
Survey of ethical theories from ancient times through the nineteenth century.

PHL X23K. Metaphysics.
Problems of substance, change, categories of being, mind, body, space and time, approached either systematically or historically.

PHL X23M. Philosophy of Mind.
Problems concerning the nature of mind and mental phenomena: the relation between mind and body, knowledge of other minds, the computational model of mind, mental causation, intentionality, and consciousness.

PHL X23S. Philosophy of Science.
Examine philosophical issues pertaining to science, with an emphasis on the metaphysics and epistemology of science.

PHL X25D. Environmental Ethics and Philosophy.
Examine moral issues concerning the relation of human beings to the environment, including biodiversity, resource depletion, and animal rights.

PHL X25E. Biomedical Ethics.
Apply ethics to problems of medical practice and theory including abortion, euthanasia, sterilization, psychosurgery, genetic engineering, and concepts of health, cure, insanity, and death.

PHL X25J. Health and Justice.
Examines ethical, political, and legal issues surrounding medicine, society, and healthcare.

PHL X25K. Ethical Theories.
Major traditional and contemporary ethical theories discussed and critically examined.

PHL X25L. Business, Ethics, and Public Policy.
Issues in ethics and politics that are relevant to the organization of business and industry and the distribution of power in society; topics include the role of industry; concepts of profit, property, and moral responsibility.

PHL X25M. Medicine, Ethics, and Society.
Examine moral, legal, and socio-political implications of developments in the biomedical sciences. Explore health and disease, function and normalcy, evidence-based practice, gene editing and cloning, genetic testing, screening, and counseling, public health and compulsory vaccination.

PHL X25N. Organizational Ethics.
Examine the practical and theoretical aspects of ethical issues in organizations, including philosophical, psychological, anthropological, and strategic approaches.

PHL X28. Nineteenth-Century Philosophy.
Major figures in nineteenth-century European philosophy, including Hegel, Schopenhauer, Kierkegaard, Nietzsche, and Mill.

PHL X29C. Plato and His Philosophy.
Intensive study of selected works by Plato.

PHL X29D. Spinoza's Philosophical System.
Examine the significance of Benedict de Spinoza's philosophical system.

PHL X29E. Aristotle.
Study the philosophy of Aristotle through the examination of key texts.

PHL X29F. Squaring the Vienna Circle.
Traces the origin of the Vienna Circle of Logical Empiricism in nineteenth-century Europe, and introduces central texts and problems of intellectual history and historical epistemology at the roots of today's analytic philosophy.

PHL X29K. History of Ancient Philosophy.
Development of Western philosophy from the pre-Socratics to the early Christian era; emphasis on Plato and Aristotle.

PHL X29L. Early Modern Philosophy: Descartes to Kant.

PHL X29P. Kant's Critique of Pure Reason.
An intensive study of Kant's Critique of Pure Reason, focusing especially on his "Copernican Revolution," his theories of categories and concepts, and his rejection of metaphysics.

PHL X29S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHL X29T. Thomas Aquinas and His Philosophy.
Study the philosophy of Thomas Aquinas through the examination of key selected texts.

PHL X29U. Perspectives on Science and Mathematics.
An examination of five notable episodes in the history of science: Galileo's conflict with the Catholic Church, Isaac Newton's formulation of the laws of motion, Charles Darwin's proposal of the theory of evolution by natural selection, the development of the atomic bomb, and the discovery of the double helix structure of DNA.

PHL X32. Philosophy of Language.
Contemporary theories of meaning and linguistic structure, and their relationships to epistemology, metaphysics, and ethics.

PHL X32M. Interpretation and Meaning.
Examine issues concerning the nature of communication, interpretation, and meaning.

PHL X34F. Forensic Files: Philosophy Crimes.
Explore political philosophies from the continental tradition (Heidegger/Arendt, Nietzsche, Adorno/Horkheimer, and Agamben/Schmitt) implicated in radical politics and answering to political turning points, with a focus on research and reading in historical contexts.

PHL X34G. Hegel and His Heirs: Philosophy That Remade the West.
Explore how Hegel's philosophy contributed to the founding of the modern social sciences and led to innovations in the study of religion, psychology, education, social organizations, and social reform.

PHL X34M. Martin Heidegger.
Examine the work of Martin Heidegger, focusing especially on his views concerning truth, art, history, humanism, and technology.

PHL X34Q. German Scholars: US Exile.
Examine the migration of established European intellectuals into the US, due to the Second World War. Explore how they worked against their persecutors for their own cultural heritage and to influence US intellectual life. Investigate the ethical dilemmas faced in transplanting their lives and projects into new contexts.

PHL X42. Topics in Political Philosophy.
Critical examination of leading theories of the state, including analysis of such concepts as sovereignty, obligation, rights, and freedom.

PHL X42.1. Natural Law Theory.
Study of the fundamental moral principles that are built into the design of human nature and lie at the roots of conscience.

PHL X42C. Philosophy of Citizenship.
Explore central philosophical and ethical questions about citizenship.

PHL X42L. Origins of Liberalism.
Examine the theory of liberal democracy through a study of its development in historical, religious, and political contexts.

PHL X42M. Marx and Marxist Theory.
Introduction to the writings of Karl Marx as well as to those of his intellectual successors in Europe and around the globe in the nineteenth and twentieth centuries.

PHL X42P. Four Modern Political Theories.
Examine four modern political theories (classical liberalism, Marxism, social democracy, and traditional conservativism), with close reading and analysis of central texts.

PHL X42R. Philosophy of Race and Gender.
Examine philosophical issues pertaining to race and gender.

PHL X42T. Advanced Political Philosophy.
Examine one or more of the central subjects in political philosophy including liberty, justice, equality, democracy, and constitutionalism.

PHL X44K. Intermediate Symbolic Logic.
A second-semester course in symbolic logic: formal syntax and semantics, basic metatheory (soundness, completeness, compactness, and Loewenheim-Skolem theorems), and further topics in logic.

PHL X44M. Philosophy of Mathematics.
Philosophical issues concerning mathematics and its foundations, such as the correlation of mathematics to logic, mathematical truth, and mathematical knowledge.

PHL X46K. Aesthetics.
The nature and purpose of art and the aesthetic experience.

PHL X47. Philosophy of Law.
The significance and function of law in political and ethical contexts; comparison of common and statutory to scientific and moral law; readings from among Plato, Kant, Hegel, Bentham, Austin, Hart, Dworkin, Feinberg, and others.

PHL X48C. Classical Chinese Philosophy.
Introduction (in translation) to thinkers, texts, and ideas from the golden age of Classical Chinese philosophy (circa sixth-second centuries BCE), including how to apply their teachings to current sociopolitical issues.

PHL X48D. Chinese Ethics and Political Philosophy.
Examine Chinese ethical and political philosophy, with an emphasis on the Confucian tradition, through close reading of major works. Analyze ideas from the course both philosophically and historically.

PHL X48G. The Bhagavad Gita: Interpretation and Ethics.
Explore one of the most influential books in Indian and global contexts, the Bhagavad Gita, through interpretations, commentaries, and scholarly materials. Navigate ethical dilemmas in the Bhagavad Gita and real-life situations.

PHL X48P. Indian Philosophies.
Investigate the theories and arguments of major Indian philosophers, considering both their historical positioning and contemporary relevance.

PHL X49. History of Medieval and Renaissance Philosophy.
Philosophical thought from Augustine through Cusanus and Vico, with emphasis on its cultural bearing.

PHL X56C. Contemporary Christian Philosophy.
Study of recent work in philosophy written from a Christian point of view or that examines philosophical questions that arise within the framework of the Christian faith.

PHL X56D. History of Christian Philosophy.
Examines the history of Christian philosophy through classic Christian thought, concerning what can be known and how people should live.

PHL X56E. Buddhist Thought and Practice.
Explore important themes in Buddhist thought, various ways in which Buddhists practice their religion, and the relationships between religious concepts and practices.

PHL X58. Philosophical Logic.
Issues in philosophical logic and its applications, such as theories of meaning, logical paradoxes, epistemic logic, deontic logic, modal logic, existence, and identity.

PHL X61K. Philosophy in Literature.
Formulation, analysis, and criticism of philosophical ideas in selected literary works.

PHL X63. Scientific Method.
History, exposition, and analysis of such fundamental concepts in the natural and social sciences as explanation, prediction, discovery, confirmation, laws, hypotheses, theories.

PHL X63L. Topics in Philosophy of Science.

PHL X63L.1. The Philosophy of Biology.

PHL X63L.2. The Outer Limits of Reason.
Examines fundamental questions that appear to transcend the capacities of reason such as semantic paradoxes, theseus' ship, vagueness, infinities, computational intractability, quantum mechanics, fine-tuning arguments, and why mathematics applies to the physical world.

PHL X63L.3. Science and Metaphysics.
Examine questions about the nature of reality informed by science and metaphysics, such as the nature of time, space, minds, meanings, identity, infinity, abstract vs concrete objects.

PHL X63L.5. Biology and Society.
Explore how biological theorizing has influenced and, in turn, been modulated by social ideology from the early twentieth century to the present day.

PHL X63L.6. Philosophy and Computation.
Analyze fundamental results from the early theory of computation such as the unsolvability of the halting problem, uncomputability, computational complexity, and intractability. Question central notions such as 'implementation' of a program, what a program is, what an algorithm is, 'software' versus 'hardware' distinction, and other distinctions. Discuss issues surrounding the relation between computation, thought, and experience. Consider questions such as what artificial intelligence is, whether there is a relevant distinction between 'simulation' of a phenomenon such as intelligence versus the production of genuine intelligence, the ethics of AI, and the status of various 'virtual' entities, such as internet sites, the metaverse, and bitcoin.

PHL X65. Topics in Selected Problems in Philosophy.
PHL X65.2. Introduction to Cognitive Science.
PHL X65.6. Process Philosophy and Pragmatism.
PHL X65M. The Meaning of Life.
Investigate the meaning of life, exploring pre-modern perspectives, modern views including those of the nineteenth through twenty-first centuries, and contemporary problems such as whether AI poses new threats to meaning in life.
PHL X65N. The Nature of Visual Consciousness.
PHL X65P. The Pursuit of Happiness.
Investigate happiness and how it is attained. Examine contrasting perspectives on happiness or human flourishing offered by major thinkers, both religious and secular, representing different epochs, cultures, and theoretical approaches.
PHL X66K. Existentialism.
Existentialism and its relationship to literature, psychoanalysis, and Marxism.
PHL X75M. Topics in Major Seminar.
PHL X75M.1. Philosophy and Feminism.
PHL X75M.10. Philosophy of Action.
Study contemporary philosophy of action through a survey of some of its central questions and influential authors.
PHL X75M.11. Constitutional Law and Theory.
Explore issues surrounding constitutional theories and interpretations as they relate to the rule of law and the function of a constitution.
PHL X75M.2. Philosophy of David Hume.
Examine David Hume's contributions to Philosophy holistically: metaphysics, knowledge, morality and religion. Explore the systematic nature of his thought, as applied to specific problems including causation, induction, moral belief, and the existence of God.
PHL X75M.3. Wittgenstein.
Examine the later philosophy of Ludwig Wittgenstein in the context of the development of analytic philosophy in the early twentieth century.
PHL X75M.4. Philosophy of the First Amendment.
Examine the philosophical principles beneath the several freedoms protected by the First Amendment of the United States Constitution, as well as the applications of those freedoms (speech, religion, press, assembly, and petition) to concrete legal disputes.
PHL X75M.5. Major Ethical Theories.
Examine selected major works in ethical theory from ancient and modern philosophy. Explicate the argumentative structure of the texts, situate them in their historical contexts, and consider their significance for contemporary moral thought.
PHL X75M.6. Studies in Epistemology.
Examine one or more of the philosophical approaches to the study of knowledge and rational belief.
PHL X75M.7. Foundational Issues In Metaphysics.
Examine foundational questions in metaphysics, including being and existence, essence, real definition, grounding, ontological dependency, form and matter, explanation, causation, and parts and wholes.
PHL X75M.8. History of Metaphysics.
Examine selected major works of metaphysical inquiry from an earlier period, from the ancient Greeks to the twentieth century.
PHL X75M.9. The Philosophy of Privacy.
Explore the legal, political, and personal dimensions of privacy. Examine the nature of privacy and the value of privacy.
PHL X79H. Honors Tutorial Course.
Supervised individual reading for one semester, followed by research and writing to produce a substantial paper on a special topic in philosophy, to be completed during the second semester.
PHL X79K. Conference Course.
Intensive tutorial study of selected problems in philosophy.

Graduate Courses

PHL X19S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PHL X29S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PHL X80. Topics in Contemporary Philosophy.
Past topics include pragmatism; postmodernism; contemporary Marxism; critical theory.
PHL X80N. French-German Philosophy and Theory.
Explore core philosophical texts from the nineteenth and twentieth century that ground post-World War II French post-structuralism.
PHL X81. Topics in History of Philosophy.
Past topics include major figures and movements in ancient, medieval, early modern, and nineteenth- and twentieth-century philosophy.
PHL X82. Topics in Metaphysics.
Past topics include basic issues in metaphysics; particulars and universals; identity and individuation; realism and antirealism; mind-body issues.
PHL X83. Topics in Theory of Knowledge.
Past topics include basic issues in epistemology; theories of belief and rationality; justification and truth.
PHL X83C. Introduction to Cognitive Science.
PHL X84F. First-Year Seminar.
Central problems in philosophy.
PHL X84K. The Analytic Tradition.
A selective examination of works by major figures such as Frege, Moore, Russell, and Wittgenstein.
PHL X85. Topics in Theory of Value.
Past topics include basic issues in value theory; the objectivity of value; literature and philosophy; philosophy of art; literary criticism.
PHL X86. Topics in Philosophy of Science.
Past topics include basic issues in the philosophy of science; theories and explanations; philosophy of quantum mechanics; philosophy of the social sciences.
PHL X87. Topics in Ethical, Political, and Legal Philosophy.
Past topics include contemporary ethical theory; theories of justice; philosophy of law; social contract theories; political philosophy.
PHL X87C. Intersectionality: Identity and Politics.
Examine current theories of identity and identity politics from the US and Europe, deriving from theories of economic and class-based origins of identity.
PHL X88. Conference Course.
Mainly a reading course in the works of classical and modern philosophers.
PHL X88C. Prospectus Course.
Mainly a reading course for development of a dissertation prospectus.
PHL X89. Topics in Logic.
Rigorous definitions of syntax and semantics. Proofs of soundness and completeness of sentential and predicate logics; other topics in metatheory. May include extensions of and alternatives to classical logic. Philosophical significance of logic and metalogical results.

PHL X91. Topics in Logic and Philosophy.
Past topics include identity and substitutivity; philosophy of logic; discourse representation.
PHL X94K. Philosophy of Language.
PHL X96M. Job Market.
PHL X96W. Dissertation Seminar.
Intensive examination of selected dissertation topics: attention to research methods, presentation, structure, and argument. Student reports on current research.
PHL X98. Thesis.
PHL X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
PHL X98T. Supervised Teaching in Philosophy.
Teaching experience developed through an apprentice relationship between student and faculty member.
PHL X99W. Dissertation.

Professional Courses

PHL X19S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PHL X29S. Topics in Philosophy.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Philosophy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHM - Pharmacy PharmD

Pharmacy PharmD: PHM

Lower-Division Courses

PHM X10K. Drugs in Our Society.
Survey of drug development, distribution, and safety, including therapeutic categories of drugs, their actions and abuse potential, and the sociological aspects of drug use.
PHM X11K. Take your Medicine: Developing New Drug Products.
Explores the process, challenges, and issues in developing pharmaceutical products. An overview of drug development, approval, and consumer issues will be presented and discussed in the context of research practices, consumers, science, marketing, public welfare, and innovative practices.
PHM X19S. Topics in Pharmacy PharmD.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Pharmacy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PHM X29S. Topics in Pharmacy PharmD.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Pharmacy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PHM X38. Introduction to Pharmacology.
Survey of basic concepts and principles in pharmacology.
PHM X50K. Drugs in Our Society.
Survey of drug development, distribution, and safety, including therapeutic categories of drugs, their actions and abuse potential, and the sociological aspects of drug use. Essay papers required.
PHM X60J. Basic Study in Pharmaceutical Research for Nonmajors.
Original investigation in any area of the pharmaceutical sciences.
PHM X60R. Topics in Pharmaceutical Sciences for Nonmajors.
Explore any basic area of the pharmaceutical and clinical sciences.

Graduate Courses

Professional Courses

PHM X80. Pharmacotherapeutics of Vaccine-Preventable Diseases.
Examine the administration of safe and accurate immunization services to patients that will promote disease prevention and public health. Explore the national immunization standards through the Centers for Disease Control and Prevention.
PHM X80C. Human Normal Physiology/Pathophysiology and Basics in Pharmacology I.
Integrated approach consisting of normal physiology (with limited functional anatomy), pathophysiology, and basic principles in pharmacology to address the etiology of disease states affecting the nervous, gastrointestinal, visual/olfactory, skin, muscular, and cardiovascular systems.
PHM X80D. Human Normal Physiology/Pathophysiology II.
Integrated approach consisting of normal physiology (with limited functional anatomy), pathophysiology, and basic principles in pharmacology to address the etiology of disease states affecting the blood/immune system, renal, pulmonary, endocrine, and metabolic systems. Also includes multi-systemic diseases related to infectious disease and cancer.
PHM X80E. Reaching our World.
Explore global cultures through study of people, food, healthcare, economy, religions, and diversity of culture with a focus on comparing healthcare systems in different countries. Examine obstacles to healthcare and other daily challenges faced by societies and cultural groups. Utilize independent reflection and team-based learning to explore barriers faced by a cultural group in a third world country and create a final presentation.
PHM X80H. Landmark Studies in Cardiovascular Disease.
Evidence-based clinical studies in support of drug therapy recommendations in the treatment of cardiovascular diseases.
PHM X80J. Theory and Practice of Teaching in Pharmacy Education.
Explore teaching concepts, processes, and theories related to pharmacy education. Combine theory and practice to create a teaching portfolio.
PHM X80K. Medicinal Chemistry Principles.
Introduction to medicinal chemistry principles. Subjects include drug metabolism and the transition from organic to medicinal chemistry.
PHM X80L. Landmark Pharmacotherapy Studies in Primary Care.
Reviewing, evaluating, and applying the results of landmark studies in pharmacotherapy to primary care practice. An examination of disease states encountered in primary care including diabetes, hypertension, dyslipidemias, and psychological disorders.
PHM X80M. Introduction to Marketing in Pharmacy.
Explore tools and resources used to enhance marketing, communication, and branding strategies. Relate these tools to career advancement in the field of pharmacy.
PHM X80P. Basic Pharmaceutical Sciences Laboratory.
Laboratory exercises to support the basic pharmaceutical sciences courses.

PHM X80Q. Pharmaceutical Industry Fellowship Preparation.
Explore pharmaceutical industry fellowships and review skills needed for competitive fellowship applications.

PHM X80R. Basic Study in Pharmaceutical Research.
Basic exploration in any area of the pharmaceutical sciences.

PHM X80S. Tools to Enhance Academic Success.
Investigate tools and resources available for enhancing academic success in the professional pharmacy curriculum.

PHM X80T. Global Health.
An exploration of health care issues outside the United States with an inside look at different cultures and healthcare systems to enhance global awareness and cultural competence in the practice of pharmacy.

PHM X80W. Psychiatric Pharmacy Practice and Drug Treatment of Mental Disorders.
Advanced study in the pathophysiology of selected psychiatric disease states and the clinical presentation, phenomenology, diagnosis, and treatment of these disease states.

PHM X81. Pharmacotherapeutics of the Renal and Autonomic Systems.
An integrated approach to the etiology and treatment of disease states of the renal and autonomic systems.

PHM X81E. Introductory Spanish for the Pharmacy Professional.
Develop foundational skills for communicating with Spanish-speaking patients within pharmacy practice settings, including basic medication instruction use. Explore the pitfalls of online translators/apps and etiquette for using a medical translator. Discuss disparities in care for patients with limited English proficiency and other topics applicable to a pharmacy practice environment. Designed for students with little-to-no Spanish-speaking experience.

PHM X81J. Theory and Practice of Assessment in Pharmacy Education.
Explore current assessment concepts related to pharmacy education and apply those concepts to create an assessment portfolio.

PHM X81K. Pharmaceutical Marketing.
Concepts of marketing as they apply to the pharmaceutical industry, pharmaceutical products, and the health care environment.

PHM X81M. Pharmaceutical Biochemistry I.
Basic principles of intermediary metabolism, with emphasis on defects in pathways that result in disease and on identification of molecular targets for therapeutic control.

PHM X81N. Pharmaceutical Biochemistry II.
The biosynthesis and function of macromolecules (nucleic acids, lipids, proteins, and carbohydrates); sites of drug action, immunology, and applications of biotechnology and molecular biology to the pharmaceutical sciences.

PHM X81Q. Introduction to Pharmaceutical Industry.
Explore potential careers for pharmacists in the pharmaceutical industry.

PHM X81R. Research Opportunities in the Pharmaceutical Sciences.
An introduction to research in all divisions of the College of Pharmacy. Includes ethical issues in research, career paths in research, and subjects such as choosing a research mentor or project.

PHM X81S. Foundations of Professional Development I.
In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars and team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration.

PHM X81T. Foundations of Professional Development II.
In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration.

PHM X81V. Pharmacy Practice Lab I.
Navigate the pharmacists' patient care process in preparation for Introductory and Advanced Pharmacy Practice Experiences. Utilize critical-thinking, problem-solving and communication skills to collect, assess, plan, implement and follow-up on patients at an introductory level.

PHM X81W. PharmD Year 1 Administrative Session I.
Co-curricular and supplemental material for students in the first year of the Pharmacy (PharmD) program.

PHM X82. Pharmacotherapeutics of the Respiratory System.
An integrated approach to the etiology and treatment of disease states of the respiratory system.

PHM X82E. Nonprescription Pharmacotherapeutics and Self-Care I.
Study of nonprescription products and complementary and alternative medicine as it relates to the patient's ability to care for themselves with emphasis on the pharmacist's consultant role in product selection and nonpharmacologic recommendations.

PHM X82F. Nonprescription Pharmacotherapeutics and Self-Care II.
A continuation of Pharmacy PharmD 282E. The study of nonprescription products and complementary and alternative medicine as it relates to the patient's ability to care for themselves with emphasis on the pharmacist's consultant role in product selection and non-pharmacologic recommendations.

PHM X82G. Pharmacy Business Plan Development.
The fundamentals of writing a pharmacy business plan, including the mission statement, objectives, description of products and services, legal structure, location analysis, layout and design, pro forma financial statements, staffing, market analysis and strategies, and promotion and advertising plans, culminating in submission of the plan for national competition.

PHM X82I. Nonprescription Pharmacotherapeutics and Self-Care: Introductory Pharmacy Practice Experience.
Participate in a hands-on experience in a community pharmacy setting related to the pharmacist's consultant role in nonprescription product selection (including complementary and alternative medicine) and non-pharmacologic recommendations in self-care.

PHM X82K. Experimental Design and Research Methods in Health Care.
Concepts and procedures involved in designing and completing a research project.

PHM X82L. Clinical Toxicology.
A course in toxicology that focuses on common poisons and their management; designed for pharmacy students planning to enter general practice.

PHM X82M. Interprofessional Approach to Integrative Medicine.
Explore an overview of the fundamentals of integrative medicine, including Traditional Chinese Medicine (TCM). Examine an interprofessional perspective of the interview and assessment of patients and the clinical reasoning used to develop patient care plans.

PHM X82P. Nonprescription Pharmacotherapeutics and Self Care II Laboratory.
Laboratory practice related to the pharmacist's consultant role in nonprescription product selection (including complementary and alternative medicine) and non-pharmacologic recommendations in self-care; includes fieldwork in a community pharmacy.

PHM X82R. Topics in the Pharmaceutical Sciences.
Basic exploration in any area of the pharmaceutical and clinical sciences.

PHM X82S. Foundations of Professional Development III.
In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration.

PHM X82T. Foundations of Professional Development IV.
In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration.

PHM X82V. Pharmacy Practice Lab II.
Navigate the pharmacists' patient care process in preparation for Introductory Pharmacy Practice Experiences. Utilize critical-thinking, problem-solving and communication skills to collect, asses, plan, implement and follow-up on patients at an advanced introductory level.

PHM X82W. PharmD Year 1 Administrative Session II.
Co-curricular and supplemental material for students in the first year of the Pharmacy (PharmD) program.

PHM X83. Pharmacotherapeutics of the Cardiovascular System.
An integrated approach to the etiology and treatment of disease states of the cardiovascular system.

PHM X83E. Development of Interprofessional Education for Collaborative Practice.
A collaboration between students in pharmacy, nursing, social work, and medicine in the development of educational modules addressing interprofessional education in collaborative practice relating to error disclosure, service learning, healthcare quality improvement. Preprofessional introduction to interprofessional education competencies.

PHM X83F. Basic Intravenous Admixtures.
Basic principles of injectable and other sterile dosage forms; methods of preparation and evaluation that meet current pharmacy practice standards.

PHM X83G. Basic Intravenous Admixtures Laboratory.
Basic laboratory principles in the preparation and evaluation of injectable and other sterile dosage forms.

PHM X83I. Institutional Introductory Pharmacy Practice Experience.
Participate in a hands-on experience at an institutional practice care facility; examine pharmacy services, hospital pharmacy management, staff interaction, and the flow of information from pharmacy to bedside.

PHM X83K. New Concepts, Topics, and Issues in Pharmacy Practice.

PHM X83L. Health Behavior and Health Outcomes.
Explore the concepts and principles of health behavior and health outcomes in a multicultural U.S. population.

PHM X83M. Health Innovation Entrepreneurship.
Explore a highly interactive and interdisciplinary approach for developing health innovation, including drug product, devices, and digital health solutions. Examine foundational entrepreneurial and innovation concepts for identifying and developing ideas, performing market validation, conducting customer discovery, assessing competition, and identifying skills for effectively working in teams.

PHM X83R. Advanced Study in Pharmaceutical Research.

PHM X83S. Foundations of Professional Development V.
In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration.

PHM X83T. Foundations of Professional Development VI.
In-depth education and training to promote personal and professional development of students. Built on six interdependent pillars: Self-Awareness, Professionalism, Leadership, Career Development and Planning, Contemporary Issues in Practice, and Interprofessional Collaborative Practice (ICP). Employs a series of seminars, team-based workshops, and interprofessional learning experiences to inculcate students into the College of Pharmacy and profession of pharmacy. Focuses on self-awareness, professionalism, leadership development, career planning and decision-making, contemporary issues in pharmacy practice, and interprofessional collaboration.

PHM X83U. Multidisciplinary Pain Management.
Problem-based instruction to help health professions students acquire knowledge and skills in the care of patients with acute and chronic pain. Taught by faculty members in medicine, pharmacy, and nursing.

PHM X83V. Pharmacy Practice Lab III.
Navigate the pharmacists' patient care process in preparation for Introductory Pharmacy Practice Experiences. Utilize critical-thinking, problem-solving and communication skills to collect, asses, plan, implement and follow-up on patients at an intermediate level.

PHM X83W. PharmD Year 2 Administrative Session I.
Co-curricular and supplemental material for students in the second year of the Pharmacy (PharmD) program.

PHM X84. Pharmacotherapeutics of the Gastrointestinal System and Nutrition.
An integrated approach to the etiology and treatment of disease states of the gastrointestinal system. Also includes nutrition.

PHM X84D. Antimicrobics: Mechanism of Action and Clinical Use.
Mechanisms of antimicrobial activity and the development of bacterial resistance, and their relationship to clinical therapy.

PHM X84E. Pharmacy Law.
State and federal pharmacy laws.

PHM X84H. Antimicrobics: Advanced Inquiry.
Designed to give students additional insight, beyond Pharmacy PharmD 384D, into the development of antimicrobial agents and the interactions of these agents with each other, the pathogen, and the patient. Students explore a self-selected topic for research and presentation.

PHM X84I. Community Introductory Pharmacy Practice Experience.
Participate in a hands-on experience in a community pharmacy setting. Explore medication therapy management training, the development of patient care plans, the ability to develop and conduct a public health project, carry out patient exercises, and complete prescription management activities such as patient counseling.

PHM X84K. Community Pharmacy Management.
Advanced concepts in community pharmacy management for the student who plans to become a pharmacy owner or manager. Covers operational, personnel, and financial management; marketing; layout and design; and the delivery of pharmaceutical care in a community pharmacy setting.

PHM X84L. Pharmacy and the Health Care System.
The health care system in the United States; principles of managed care; application of pricing policies; and an overview of pharmacy services.

PHM X84M. Pharmacy Professional Communications.
Professional communication skills in interacting with patients and other health care professionals.

PHM X84S. Quality and Patient Safety Interprofessional Education.
Concepts of patient safety and quality improvement. Current and past quality improvement projects are used to demonstrate the model of clinical safety and effectiveness. Reducing and preventing medical errors using the TeamSTEPPS approach; working in interprofessional teams on a quality improvement project.

PHM X84V. Pharmacy Practice Lab IV.
Navigate the pharmacists' patient care process in preparation for Introductory Pharmacy Practice Experiences. Utilize critical-thinking, problem-solving and communication skills to collect, assess plan, implement and follow-up on patients at an advanced intermediate level.

PHM X84W. PharmD Year 2 Administrative Session II.
Co-curricular and supplemental material for students in the second year of the Pharmacy (PharmD) program.

PHM X85. Pharmacotherapeutics of Diabetes.
An integrated approach to the etiology and treatment of diabetes.

PHM X85I. Ambulatory Introductory Pharmacy Practice Experience.
Participate in a hands-on experience in an ambulatory pharmacy setting. Work on patient care plans, review and evaluate patient medication lists, identify goals for common chronic disease states, utilize formularies in making drug therapy decisions, and assess appropriate resources to respond to drug information questions in an ambulatory setting.

PHM X85K. Applied Pharmacy Management.
Examination and application of principles of pharmacy management, with emphasis on human resource management. Subjects include interviewing and selection techniques, assessing job performance, improving the work environment, leadership skills, management skills, managing medication errors, and quality improvement of pharmacy services.

PHM X85M. Patient-Centered Diabetes Care.
Explore a practice-based approach to the non-pharmacologic and pharmacologic management of diabetes in multiple pharmacy practice settings.

PHM X85N. Biomedical and Professional Ethics.
Explore biomedical and professional ethics and the implications and challenges for pharmacy practice. Examine core principles and theories in biomedical and professional ethics including the pharmacy code of ethics and codes of ethics for other healthcare practitioners.

PHM X85V. Pharmacy Practice Lab V.
Navigate the pharmacists' patient care process in preparation for Introductory Pharmacy Practice Experiences. Utilize critical-thinking, problem-solving and communication skills to collect, assess plan, implement and follow-up on patients at an advanced level.

PHM X85W. PharmD Year 3 Administrative Session I.
Co-curricular and supplemental material for students in the third year of the Pharmacy PharmD) program.

PHM X86. Pharmacotherapeutics of Infectious Diseases.
An integrated approach to the etiology and treatment of infectious disease.

PHM X86E. Careers in Academic Pharmacy.
Examine pharmacy education with a focus on the three pillars of academia: teaching, service, and scholarship.

PHM X86G. Spanish for the Pharmacy Professional.
Intermediate communication skills in Spanish.

PHM X86H. Institutional Clinical Skills.
Hands-on experience in an institutional practice care facility; examines pharmacy services, hospital pharmacy management, staff interaction, and the flow of information from pharmacy to bedside.

PHM X86I. Contemporary Pharmacy Practice Introduction to Pharmacy Practice Experience I.
Participate in a hands-on experience in a contemporary pharmacy setting.

PHM X86K. Pharmacy Association Management.
An introduction to the principles involved in managing pharmacy associations. Students gain practical experience in a community pharmacy.

PHM X86M. Advanced Oncology.
Review supportive care and symptom management for oncology patients, cancer types and treatments. Examine clinical trials, new cancer types, and palliative care/end-of-life. Discuss and debate clinical controversies in oncology treatment.

PHM X86Q. Experiential Pharmacy Practice and Patient Counseling.
Medication use and dispensing in a practice environment. Counseling skills and techniques for a better understanding of disease states and positive medication outcomes.

PHM X86R. Advanced Contemporary Compounding.
The art and science of compounding pharmaceutical preparations to develop an advanced understanding of formulation, stability, and quality standards of compounded pharmaceuticals. Focuses on pharmaceutical elegance; developing professional judgement based on limited data to assess the stability and efficacy of a compound before dispensing the preparation; the regulations governing compounding, including those outlined by the United States Pharmacopeial Convention, the Pharmacy Compounding Accreditation Board, and other scientific and professional organizations; mechanisms for evaluation and analysis of the quality of a compounded formulation; and marketing and promotion of compounding services.

PHM X86S. Advanced Contemporary Compounding Laboratory.
Advanced compounding methods with respect to pharmaceutical dosage forms and formulations, with emphasis placed on creating formulations that satisfy unique patient needs, and a discussion of equipment used by compounding pharmacists to formulate preparations that satisfy those needs. Pharmacy PharmD 186S builds upon compounding skills taught in Pharmacy PharmD 188P.

PHM X86V. Pharmacy Practice Lab VI.
Navigate the pharmacists' patient care process in preparation for Introductory Pharmacy Practice Experiences. Utilize critical-thinking, problem-solving and communication skills to collect, asses, plan, implement and follow-up on patients.

PHM X86W. PharmD Year 3 Administrative Session II.
Co-curricular and supplemental material for students in the third year of the Pharmacy (PharmD) program.

PHM X87. Pharmacotherapeutics of the Endocrine System.
An integrated approach to the etiology and treatment of disease states of the endocrine system.

PHM X87E. Emotions, Ethics, and Empathy.
Explore emotions, ethics, and what it means to be an empathetic pharmacist.

PHM X87F. Foundations of Patient-Centered Care I.
Explore a broad overview of the pharmacist's role in patient-centered care through lectures, simulations, activities, and writing assignments.

PHM X87G. Foundations of Patient-Centered Care II.
Continue to explore a broad overview of the pharmacist's role in patient-centered care through lectures, simulations, activities, and writing assignments.

PHM X87H. Community Care Clinical Skills.
Clinical work in a community-based pharmacy practice setting. Includes medication therapy management training, participation in the development of patient care plans, the ability to develop and conduct a public health project, carry out patient exercises, and complete prescription management activities such as patient counseling.

PHM X87I. Contemporary Pharmacy Practice Introduction to Pharmacy Practice Experience II.
Participate in continued hands-on experience in a contemporary pharmacy setting.

PHM X87J. Advanced Problems in Pharmacy Education.
Laboratory course examining professional education issues and techniques for students exploring an academic career.

PHM X87K. Pharmacy Association Management Residency.
Experience working in a pharmacy association, including active involvement in some managerial aspect of the association.

PHM X87M. Physical and Chemical Principles of Drugs.
Fundamental, introductory principles of pharmaceutics, including thermodynamics, kinetics, and other basic chemical principles related to drugs.

PHM X87N. Biopharmaceutics.
Complements the basic pharmaceutics principles covered in Pharmacy PharmD 387M. Subjects include core concepts in biopharmaceutics of drugs.

PHM X87R. Exploratory Research in Pharmacy.
The student participates in ongoing in-depth research activities in pharmaceutics, medicinal chemistry, toxicology, pharmacology, pharmacy administration, pharmacy practice, or pharmacotherapy.

PHM X88. Pharmacotherapeutics of Oncology and Transplant.
An integrated approach to the etiology and treatment of disease states related to oncology and transplants.

PHM X88E. Clinical Drug Development: Regulatory Perspectives.
Explore the regulatory affairs involved in the review, submission, and design of clinical trials for compounds being considered for Food and Drug Administration approval.

PHM X88G. Dialogue Across Difference.
Develop framework, terminology, and critical thinking and empathy tools for engaging in productive conversations around difficult topics. Explore both differences and commonalities across and within social identities, dialogue about issues pertaining to systems of oppression and enhance intercultural competencies. Examine the meaning of social identities and how they intersect, influence and/or are influenced by others.

PHM X88H. Pharmacy Honors Proposal and Tutorial Course.
Honors seminar; development of laboratory research proposal for approval by the Honors Program Committee.

PHM X88K. Hospital Pharmacy.
Basic principles, standards, and procedures involved in providing professional pharmaceutical services in hospitals.

PHM X88M. Pharmaceutics.
General introduction to dosage forms, and the technology and pharmaceutical rationale fundamental to their development.

PHM X88P. Pharmaceutics Laboratory.
Laboratory course supporting the subjects discussed in Pharmacy PharmD 388M.

PHM X89. Pharmacotherapeutics of the Reproductive System.
An integrated approach to the etiology and treatment of disease states related to reproductive health.

PHM X89E. Modern Trends in Drug Design.
Examine drug metabolism, pharmacogenomics, mechanisms of drug action, and approaches used in modern drug discovery and development.

PHM X89H. Pharmacy Honors Thesis and Tutorial Course.
Honors seminar; laboratory research project conducted under the supervision of one or more faculty members.

PHM X89K. Social Media and Consumer Healthcare.
An exploration of how social media is transforming healthcare and improving patient outcomes.

PHM X89M. Fundamentals of Health Innovations.
Explore foundational innovation and entrepreneurship concepts related to the process of developing novel drug therapies, medical devices, diagnostics, and digital health products and services.

PHM X89S. Community Service Learning.
Community-based participatory projects designed to connect coursework and community service experiences. Past and present health issues specific to the Texas region (such as United States-Mexico border issues), national and regional health initiatives, service challenges and opportunities, as well as personal/professional identities and responsibilities to the community. Projects developed in consultation with a faculty mentor and a selected community site. Includes an academic service-learning component.

PHM X90. Pharmacotherapeutics of Dermatology and Inflammatory Processes.
An integrated approach to the etiology and treatment of disease states of the dermis. Includes inflammatory responses.

PHM X90C. Communication Skills for Health Professionals.
Designed for pharmacy, pre-pharmacy, premedical, predental, and nursing students. Enhancement of verbal communication skills for professional and public presentations, patient consultations, and interviewing.

PHM X90D. Nutritional Aspects of Clinical Pharmacy.
Explores the interrelationships of nutrition, disease, and drug therapy, including aspects of both normal and clinical nutrition, nutritional deficiencies, and the metabolic consequences or diseases associated with malnutrition. Patient case studies examine both the effects of drug therapy on nutrition and the effects of nutrition on drug therapy. Disease states covered include cardiovascular disease, diabetes, hepatic and renal failure, and anemia.

PHM X90E. Controlled Substances: Violations, Investigations, and Enforcement.
Explore violations of federal and state-controlled substances laws and rules, and analyze the pharmacist's role in enforcement.

PHM X90H. Pharmacy Research Honors Proposal.
Write a research proposal and conduct a research project under the supervision of one or more faculty members.

PHM X90K. Clinical Management of Drug-Drug Interactions.
Group discussions with an emphasis on clinically relevant drug-drug interactions, mechanisms, significance, and clinical management.

PHM X90L. Introduction to Nuclear Pharmacy.
An overview of nuclear pharmacy, a recognized specialty area of pharmacy practice focusing on the compounding and dispensing of radioactive materials for use in nuclear medicine procedures (therapeutic, diagnostic, and imaging).

PHM X90M. Inpatient Adult Medicine.
Clinical therapeutic management of adult patients in an inpatient, institutional (primarily hospital) setting.

PHM X90N. Integrated Basic and Applied Pharmacokinetics.
Introduction to pharmacokinetic principles; and the application of principles to specific drugs and patient situations.

PHM X90S. Interprofessional Community Service Learning.
Integration of community service with contemporary pharmacy practice, with a focus on social justice and social determinants of health care.

PHM X90T. Pharmacy International Exchange.
Work in an exchange program with international colleges and schools of pharmacy as partners. Examination of similarities and differences between pharmacy education, professional practice, and/or research in the hosting country and in the United States.

PHM X90V. Patient Safety.
Covers methods to ensure patient safety, prevent misadventures, and develop policy associated with patient safety and misadventure prevention.

PHM X90W. Health Leadership.
Develops skills necessary to identify and establish professional goals, build and lead teams, delegate effectively, resolve conflicts, network for career advancement, document leadership experiences/abilities on curriculum vitae and in recommendation letters, and demonstrate leadership abilities during job interviews.

PHM X91. Pharmacotherapeutics of Pain and Addiction.
An integrated approach to the etiology and treatment of disease states related to pain and addiction.

PHM X91H. Pharmacy Research Honors Report.
Continue to conduct a research project and complete a laboratory research report under the supervision of one or more faculty members.

PHM X91K. Pediatric Pharmacotherapy.
Pathophysiology and pharmacotherapy of selected pediatric diseases. Designed to expose students to pediatric pharmacy as a potential area of focus, and to prepare them for a potential residency or practice in providing pharmaceutical care in a pediatric setting.

PHM X91L. Leadership in Community Service Learning.
Designed for students enrolled in Pharmacy PharmD 193U who elect to serve in a leadership role for the community service-learning project. Coordinate and organize responsibilities at each phase of the project, communicate with community partners, and additional outreach based on the needs of the community partner. Develop a plan and disseminate the project outcomes.

PHM X91M. Introduction to Ambulatory Care Pharmacy.
Clinical and non-clinical topics relevant to treating commonly encountered disease states, effectively communicating with patients, and managing a clinical pharmacy practice in an ambulatory setting. Emphasis on application of concepts learned in previous classes to real-world situations.

PHM X91U. Foundations for Interprofessional Collaborative Practice I.
Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team.

PHM X91V. Foundations for Interprofessional Collaborative Practice II.
Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team.

PHM X91W. Leadership and Advocacy in Pharmacy.
A discussion forum for exploring current legislative and regulatory issues influencing the pharmacy profession. Focuses on retrieving legislative and regulatory information, interpreting legislation, regulations and their potential impacts, engaging in discussion on various perspectives of the issues and presenting information on legislation and regulations that impact pharmacy practice.

PHM X92. Pharmacotherapeutics of Psychiatric Disorders.
An integrated approach to the etiology and treatment of disease states related to psychiatrics.

PHM X92G. Herbal and Botanical Supplements.
A practice-based approach to learning about the most common herbal and botanical supplements in a pharmacy practice setting, including review of studies of popular uses, clinical indications, pharmacological effects, mechanisms of action, side effects, contraindications, and common dosage guidelines. Discussion of the legal, regulatory, and ethical aspects, in addition to analyzing manufacturing quality issues and counterfeit products is also addressed.

PHM X92H. Pharmacy Research Honors Project.
Continue to conduct a research project and complete a review of a research article, under the supervision of one or more faculty members.

PHM X92L. Leadership in Community Service Learning II.
Designed for students enrolled in Pharmacy PharmD 193V who elect to serve in a leadership role for the community service-learning project. Coordinate and organize responsibilities at each phase of the project, communicate with community partners, and additional outreach based on the needs of the community partner. Develop a plan and disseminate the project outcomes.

PHM X92M. Introduction to Specialty Pharmacy Practice.
Explore the basic principles, standards, and procedures involved in providing professional pharmaceutical services in a specialty pharmacy.

PHM X92U. Foundations for Interprofessional Collaborative Practice III.
Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team.

PHM X92V. Foundations for Interprofessional Collaborative Practice IV.
Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team.

PHM X93. Pharmacotherapeutics of Neurologic Disorders.
An integrated approach to the etiology and treatment of disease states related to neurology.

PHM X93C. Ambulatory Care Pharmacy Practice.
Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of ambulatory patient care.

PHM X93E. Elective in Pharmacy Practice I.
Experience in pharmacy practice, research, or administration.

PHM X93F. Pharmacoeconomics and Pharmacy Management.
Explore the terms, concepts, procedures, methods, problems, and strengths associated with pharmacoeconomics. Examine and utilize health information resources to manage medication use and minimize medication errors. Evaluate information regarding the financial status of the pharmacy and implications of the decisions faced by managers in reaching financial goals for the pharmacy.

PHM X93H. Pharmacy Research Honors Thesis.
Conduct a research project and write an honors thesis under the supervision of one or more faculty members.
PHM X93M. Pharmacy Residency Preparation.
Explore pharmacy residency and the skills needed to be competitive residency applicants.
PHM X93N. Advanced Hospital Pharmacy Practice.
Analysis of pharmacotherapy, evaluation of drug use, synthesis of rational drug regimens, and dispensing of medications in the context of institutional patient care.
PHM X93P. Advanced Community Pharmacy Practice.
Analysis of pharmacotherapy, evaluation of drug use, synthesis of rational drug regimens, and dispensing of medications in the context of community-based patient care.
PHM X93R. Supplemental Rotation in Pharmacy Practice I.
Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of patient care.
PHM X93S. Selective in Pharmacy Practice I.
Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in a selected pharmacy practice environment.
PHM X93U. Foundations for Interprofessional Collaborative Practice V.
Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team.
PHM X93V. Foundations for Interprofessional Collaborative Practice VI.
Introduces and reinforces interprofessional education core competencies delivered through classroom-based interactive sessions, simulations, field-based immersive experiences, and experiential learning with students and members of other professions. Imparts the foundational knowledge and skills necessary for the delivery of quality and safe patient-centered and population-oriented care as a contributing member of a healthcare team.
PHM X93W. Elective International Pharmacy Experience.
Competitive placement for an international advanced pharmacy experience.
PHM X94. Pharmacotherapy of Viral and Fungal Infections.
Explore an integrated approach to the etiology and treatment of viral and fungal infections.
PHM X94C. Inpatient General Medicine Pharmacy Practice.
Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of acute patient care.
PHM X94E. Elective in Pharmacy Practice II.
Experience in pharmacy practice, research, or administration.
PHM X94F. Pharmacoeconomics.
Terms, concepts, procedures, methods, problems, and strengths associated with pharmacoeconomics.
PHM X94M. Veterinary Pharmacotherapy.
Explore veterinary medicine from a pharmacist's perspective.
PHM X94R. Supplemental Rotation in Pharmacy Practice II.
Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in the context of patient care.
PHM X94S. Selective in Pharmacy Practice II.
Analysis of pharmacotherapy, evaluation of drug use, and synthesis of rational drug regimens in selected pharmacy practice environments.
PHM X95. Pharmacotherapy of Bacterial Infections.
Explore an integrated approach to the etiology and treatment of viral and fungal infections.
PHM X95E. Elective in Pharmacy Practice III.
Experience in pharmacy practice, research, or administration.
PHM X95P. Drug Information and Evidence-Based Practice Laboratory.
Practical application of the concepts presented in Pharmacy 195Q. Includes assignments, projects, and oral presentations.
PHM X95Q. Drug Information and Evidence-Based Practice.
Knowledge and skills needed to retrieve and interpret drug information. Interpretation of biomedical literature and an introduction to concepts of evidence-based practice.
PHM X95R. Advanced Evidence-Based Practice.
Research methodology and biostatistical concepts as they relate to the interpretation and critical evaluation of biomedical literature. Designed to build upon the material covered in Pharmacy PharmD 295Q.
PHM X98T. College Teaching Methodology.
Interdisciplinary course intended to provide a foundation of theoretical and practical knowledge relating to teaching at the postsecondary level. Subjects include instructional methods, instructional design, practice teaching, teaching philosophy, instructional technology, and assessment of learning. Includes class discussions and individual consultations.

PHY - Physics

Physics: PHY

Lower-Division Courses

PHY X01. Mechanics.
Designed for students who intend to major in science or mathematics.
PHY X01L. Laboratory for Physics 301.
PHY X02K. General Physics Technical Course: Mechanics, Heat, and Sound.
Noncalculus technical course in physics. Completion of high school trigonometry or Mathematics 305G is highly recommended.
PHY X02L. General Physics Technical Course: Electricity and Magnetism, Light, Atomic and Nuclear Physics.
Noncalculus technical course in physics.
PHY X02M. Laboratory for Physics 302K.
PHY X02N. Laboratory for Physics 302L.
PHY X03E. Electromagnetic, Quantum, and Semiconductor Physics.
Discuss electricity, magnetism, electromagnetic waves, photons, matter waves, atomic physics, band structure, semiconductors, diodes, and transistors.
PHY X03K. Engineering Physics I.
A general survey of physics; primarily laws of motion, heat, and wave phenomena.
PHY X03L. Engineering Physics II.
Electricity and magnetism, optics, and atomic phenomena.
PHY X03M. Laboratory for Physics 303K.
PHY X03N. Laboratory for Physics 303L.
PHY X04. Introductory Physics Seminar.
Discussion of the development of important ideas in physics, with emphasis on their relevance to contemporary research.
PHY X05M. Laboratory For Physics 302K, 303K, and 317K.
Participate in an introductory mechanics laboratory.
PHY X05N. Laboratory For Physics 302L, 303L, and 317L.
Participate in an introductory electricity, magnetism, and optics laboratory.
PHY X06. Elementary Physics Methods.
Designed for students who have not had high school physics, have weak problem-solving skills, and need preparation for Physics 301 or 303K.
PHY X08. Introduction to Research.
Introductory laboratory experience; use of tools and test equipment; beginning apprenticeship in active physics research.
PHY X08F. Introduction to Research.
Introductory laboratory experience; use of tools and test equipment; beginning apprenticeship in active physics research.

PHY X09K. Elementary Physics for Nontechnical Students.
Mechanics, heat, and sound. Designed for students who do not intend to do further work in natural sciences, engineering, mathematics, or medicine.

PHY X09L. Elementary Physics for Nontechnical Students.
Electricity and magnetism, light, atomic and nuclear physics. Designed for students who do not intend to do further work in natural sciences, engineering, mathematics, or medicine.

PHY X10. Topics in Physics.

PHY X10C. Topics in Conference Course.
Supervised study of selected topics in physics, by individual arrangement with department and instructor.

PHY X15. Wave Motion and Optics.
Study of general properties of waves; examples include sound, electromagnetic, and mechanical waves; special emphasis on light and optics.

PHY X15L. Laboratory for Physics 315.

PHY X16. Electricity and Magnetism.

PHY X16L. Laboratory for Physics 316.

PHY X17K. General Physics I.
Mechanics, heat, and sound, with biomedical applications. An introductory course designed and recommended primarily for premedical students and others in the biomedical sciences whose professional or preprofessional training includes an introductory course in calculus. Satisfies most medical and dental school requirements for physics.

PHY X17L. General Physics II.
Electricity and magnetism, light, atomic and molecular physics, nuclear physics, and their biomedical applications. Designed and recommended primarily for premedical students and others in the biomedical sciences whose professional or preprofessional training includes an introductory course in calculus. Satisfies most medical and dental school requirements for physics.

PHY X17M. Laboratory for Physics 317K.

PHY X17N. Laboratory for Physics 317L.

PHY X19S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHY X29S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PHY X19S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHY X21. Modern Physics: Plan II.
Conceptual foundations of modern physics. Examines quantum mechanics, quantum field theory, relativity, and general relativity, including large-scale structure and cosmology; and the development of analytic problem-solving skills, including estimation.

PHY X29. Introduction to Computational Physics.
Computational methods for problem solving and research in physics; numerical analysis and computer simulation methods for physics applications using different types of computers.

PHY X29S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHY X29W. Cooperative Physics.
Covers the work period of physics students in the Cooperative Education Program, which provides supervised work experience by arrangement with the employer and the supervising instructor.

PHY X33. Modern Optics.
Review of geometrical optics, polarization, interference, and optical instruments. Subjects include Fourier optics, light propagation in fibers, quantum optics, and coherence.

PHY X33L. Laboratory for Physics 333.

PHY X36K. Classical Dynamics.
Elementary linear vector algebra, Newtonian mechanics, Lagrangian mechanics, central force motion, dynamics of rigid bodies, and theory of small oscillations.

PHY X36L. Fluid Dynamics.
Fundamental concepts of fluid mechanics developed and applied to laminar and turbulent flows. Subjects include the Navier-Stokes equations, pipe and channel flow, drag, boundary layers, convection, and rotating fluids.

PHY X38K. Electronic Techniques.
Elementary circuit theory, amplifiers, feedback, pulse and digital techniques, signal processing, and microprocessors as applied to physics instrumentation.

PHY X39C. Physics Cognition and Pedagogy.
Investigate physics-specific education literature, and think about how the results of these studies apply to teaching practice. Discuss obstacles to students' academic success such as stereotype threat, identity, implicit bias, and mindset. Reflect on how to make a difference in students' learning as a physics learning assistant.

PHY X41. Selected Topics in Physics.

PHY X41.1. Energy Production.
The various means that exist or have been suggested for generating energy; comparison in terms of efficiency, safety, and effects on the environment.

PHY X41.3. Musical Acoustics.
Study of the production, transmission, and perception of the special kind of sound called music, based on the application of elementary principles of physics.

PHY X41.4. The Nature of Things.
A qualitative survey of all of physics, from falling bodies to quarks, making heavy use of classroom demonstrations.

PHY X41.5. Pseudoscience.
Study of a variety of ideas treated very seriously by the communications media but having no basis in fact, including astrology, extrasensory perception, and flying saucers; why such areas are not part of science.

PHY X41.6. Writing.

PHY X41.7. Research Methods: UTeach.

PHY X41T. Topics in Physics.

PHY X45. Biophysics.
Basic concepts of physics developed and applied to biological systems. Subjects include energy in living systems, entropic interactions, molecular forces and self-assembly, biopolymers, bio-membranes, cell-cell interactions, pattern formation, collective behavior, higher order systems, population dynamics and evolution.

PHY X52K. Classical Electrodynamics I.
Electrostatic fields, magnetostatic fields, derivation of Green's theorems and functions and of Maxwell's equations.

PHY X52L. Classical Electrodynamics II.
A continuation of Physics 352K, emphasis is placed on conservation laws, electromagnetic waves, potentials and fields, radiation, and Lorentz invariance. One or more special subjects, such as Rayleigh scattering and energy loss by relativistic charged particles in matter will be developed.

PHY X53L. Modern Physics Laboratory.
Laboratory experiments investigating the breakdown of classical physics for microscopic phenomena. Includes absorption and emission spectra, the photoelectric effect, blackbody radiation, the Compton effect, X-ray diffraction, and other experiments in modern physics.

PHY X55. Modern Physics and Thermodynamics.
Introduction to modern physics and thermodynamics: photons (spectra, photoelectric effect, blackbody radiation, Compton effect), atoms (Rutherford, Bohr), matter waves (Planck, deBroglie, probability interpretation, Schroedinger), nuclei, particles, special relativity, the laws of thermodynamics, and statistical physics.

PHY X62K. Quantum Physics II: Atoms and Molecules.
The two-electron atom; spin and statistics; coupling schemes for many-electron atoms; atoms and the radiation field; perturbation methods for decay and collisions; thermal, electrical, and magnetic properties of solids; and free-electron metal and band theory. May include subjects such as superconductivity, Josephson tunneling, and others.

PHY X62L. Quantum Physics III: Particles and Nuclei.
Nuclei and nucleons, their gross properties; the hadrons; symmetries and conservation laws; nuclear stability; electromagnetic, weak, and hadronic interactions; nuclear reactions at low, medium, and high energies; nucleon structure; tools of experimental nuclear physics; models of theoretical nuclear physics; nuclear technology.

PHY X69. Thermodynamics and Statistical Mechanics.
Basic concepts of thermal physics; entropy, enthalpy, free energy, phase transitions, equilibrium distribution functions, applications.

PHY X70T. Senior Thesis.
Individual research with faculty supervision. First half involves preparation of proposal; second involves completion of written thesis.

PHY X71C. Individual Study in Physics.
Supervised reading or research in physics.

PHY X73. Quantum Physics I: Foundations.
Postulates of quantum mechanics, the bound states of the finite square well, the harmonic oscillator, operator-eigenvalue formulism and selected examples, the hydrogen atom, angular momentum, rigid rotor, and spin. May include simple scattering theory.

PHY X74. Advanced Laboratory I.
Modern experimental techniques, theory of error, and analysis of experiments; both modern and classical experiments in atomic and nuclear physics, electricity and magnetism, optics and heat.

PHY X75C. Cosmology and AstroParticle Physics.
Discuss the physics of the expanding universe, Einstein's equations, inflationary expansion, the basics of nuclear physics and big bang nucleosynthesis, and the content of the Universe: the known particles and forces of the standard model of particle physics as well as the unknown dark matter and dark energy.

PHY X75P. Introductory Plasma Physics.
Orbit theory and drifts, introduction to plasma stability and waves, applications to plasma confinement and heating.

PHY X75R. Introduction to Relativity.
Overview of the special and general theories of relativity, with emphasis on recent developments in gravitation.

PHY X75S. Introductory Solid-State Physics.
Crystal structure, classification of solids, cohesion, thermal and electrical properties of solids, magnetic properties of solids, imperfections.

PHY X79H. Honors Tutorial Course.

Graduate Courses

PHY X19S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHY X29S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHY X80L. Plasma Physics I.
Particle drifts, equations for plasmas, magnetohydrodynamics, waves and instabilities in the two-fluid model, Vlasov equation, Landau damping, controlled thermonuclear research, plasma diagnostics.

PHY X80M. Plasma Physics II.
Plasma containment, stability theory in fluid models, derivation of Vlasov and Fokker-Planck equations, the dielectric tensor, velocity space and gradient instabilities, Nyquist diagrams.

PHY X80N. Experimental Physics.
Experimental work to provide exposure to physics research techniques.

PHY X80T. Topics in Advanced Physics.
Special topics for physics teachers.

PHY X81C. Computational Physics.
Dynamical and statical descriptions and solutions of many-body, nonlinear physical systems by computation. Theory of computation and applications to various branches of physics.

PHY X81M. Methods of Mathematical Physics I.
Theory of analytic functions; linear algebra and vector spaces; orthogonal functions; ordinary differential equations; partial differential equations; Green's functions; complex variables.

PHY X81N. Methods of Mathematical Physics II.
Continuation of Computational Science, Engineering, and Mathematics 385M and Physics 381M. Topology, functional analysis, approximation methods, group theory, differential manifolds.

PHY X82M. Fluid Mechanics.
Flow of ideal and viscous fluids; introduction to turbulence; boundary layers; sound and shock waves.

PHY X82N. Nonlinear Dynamics.
Basic concepts of evolution and stability, examples of instabilities, low dimensional dynamical systems, chaos, characterization of temporal chaos, pattern formation, Hamiltonian systems.

PHY X82P. Biophysics I.
The cell, small molecules and chemical kinetics, forces on the molecular scale, proteins, lipids and membranes, biopolymers, neurons and electrical signal transduction, and complex pattern formation in cells and cell aggregates.

PHY X82Q. Biophysics II.
Advanced biophysics with emphasis on biologically relevant questions addressed with physical approaches. Biopolymer mechanics, protein-nucleic acid interaction, protein structure and dynamics, membrane dynamics, cytoskeletal dynamics, motor proteins, cell shape and motility, cell communication, tissue mechanics.

PHY X82S. Seminar in Nonlinear Dynamics.

PHY X85K. Classical Mechanics.
Classical and relativistic Hamiltonian mechanics; Hamilton-Jacobi theory; Lagrangian mechanics for continuous media; symmetry principles and conservation laws.

PHY X85L. Statistical Mechanics.
Equilibrium statistical mechanics; introduction to nonequilibrium concepts; ensembles; classical and quantum gases; statistical physics of solids.

PHY X85S. Seminar in Statistical Physics.
Topics to be announced.

PHY X85T. Special Topics in Statistical Physics.
Topics to be announced.

PHY X86K. Physics of Sensors.
Physical principles of acoustic, optical, electromagnetic, radiation, and motion sensors.

PHY X86N. Technical Seminar.
Physics for applied and industrial purposes.

PHY X86S. Seminar in Applied Physics.
Topics to be announced.

PHY X87K. Electromagnetic Theory I.
Electrostatics and magnetostatics; boundary value problems; Maxwell's equations; plane waves; wave guides; diffraction; multipole radiation.

PHY X87L. Electromagnetic Theory II.
Magnetohydrodynamics and plasmas; relativity; collisions of charged particles; radiation from moving charges; radiation damping.

PHY X87M. Relativity Theory I.
Explore tensor calculus, differential geometry, special and general relativity, black holes, and gravitational waves.

PHY X87N. Relativity Theory II.
General relativity theory; gravitational field equations; weak field approximations; Schwarzschild solution, observable consequences; other topics.

PHY X88M. Graduate Colloquy.
Reviews of current topics in physics research.

PHY X88S. Seminar in Teaching Physics.
Topics to be announced.

PHY X89K. Quantum Mechanics I.
Hilbert space and operators; Schroedinger and Heisenberg equations; solutions for systems in one and three dimensions; theory of spin and orbital angular momentum; the effect of symmetries; approximation techniques; elementary scattering theory.

PHY X89L. Quantum Mechanics II.
Perturbation techniques; systems of identical particles; quantum theory of radiation; emission and absorption of photons; selection rules; life times; scattering theory for light and particles, S-matrix; relativistic corrections to electron motion.

PHY X90. Graduate Research.

PHY X91M. Nonlinear Plasma Theory.
Quasi-linear theory, weak turbulence, large amplitude waves, plasma radiation, shock waves, shock structure, computer techniques.

PHY X91S. Seminar in Plasma Physics.
Topics to be announced.

PHY X91T. Special Subjects in Plasma Physics.
Subjects to be announced.

PHY X91U. Seminar in Plasma Theory.
Current topics in plasma theory.

PHY X92K. Solid-State Physics I.
Lattice vibrations and thermal properties of solids; band theory of solids; transport properties of metals and semiconductors; optical properties; magnetic properties; magnetic relaxation; superconductivity.

PHY X92L. Solid-State Physics II.
Elementary excitations: phonons, electrons, spin waves; interactions: phonon-phonon, electron-electron, electron-phonon; theory of metals and semiconductors; transport theory; optical properties.

PHY X92N. Many-Body Theory.
Overview of many-body theory; second quantization; Green's functions and Feynman diagrams; finite-temperature, imaginary-time Green's functions; the disordered metal; path integrals; broken symmetries; and local moments.

PHY X92P. Advanced Optical Spectroscopy.
Examine the foundational principles and cutting-edge applications of advanced optical spectroscopy methods. Analyze the electrodynamics of solids (metals, insulators, semiconductors), which exhibit complex and rich electromagnetic behavior. Study the key components of a basic optical spectroscopy setup. Explore advanced spectroscopy techniques and current research frontiers in the field.

PHY X92Q. Density Functional Theory.
Examine the quantum theory of many-electron systems from the point of view of first-principles atomic-scale calculations. Develop the conceptual foundations of density functional theory and its uses in computational materials modeling, design, and discovery. Perform predictive calculations of structural, electronic, optical, vibrational, and magnetic properties of solids using high-performance computing environments.

PHY X92S. Seminar in Solid-State Physics.
Topics to be announced.

PHY X92T. Special Topics in Solid-State Physics.
Topics to be announced.

PHY X93S. Seminar in Relativity.
Topics to be announced.

PHY X93T. Special Topics in Relativity.
Topics to be announced.

PHY X94U. Special Topics in Theoretical Physics.
Topics to be announced.

PHY X95. Topics in Survey of Atomic and Molecular Physics.
Spectra of atoms and diatomic molecules; quantum electronics; experimental techniques.

PHY X95K. Nonlinear Optics and Lasers.
Gaussian beam optics, interaction of electromagnetic radiation with matter, semiclassical laser theory, experimental laser systems, nonlinear optical susceptibilities, harmonic generation, wave mixing, electro-optic and acousto-optic effects, coherent transient effects, optical breakdown, laser-plasma interactions.

PHY X95M. Laser Physics.
Continuation of Physics 395K. Advanced atomic physics of various laser systems, optical coherence and diffraction theory, pulse propagation and dispersion effects, advanced laser oscillator and amplifier physics, laser amplifier chain design, and chirped-pulse amplification.

PHY X95S. Seminar in Atomic and Molecular Physics.
Topics to be announced.

PHY X95T. Special Topics in Atomic and Molecular Physics.
Topics to be announced.

PHY X96G. Cosmology.
Explore inflationary cosmology, the formation of element abundances during Big Bang nucleosynthesis, cosmological perturbations and structure formation, the cosmic microwave background, and the content of the universe (including dark matter and dark energy). Examine unresolved problems in cosmology (such as the origin of the matter/antimatter asymmetry), the possibility of extra dimensions, what happened before the Big Bang, "big data" in cosmology, observational probes of dark energy, and inflation models and tests.

PHY X96J. Introduction to Elementary Particle Physics.
Historical introduction to elementary particles, elementary particle dynamics, relativistic kinematics, symmetries, bound states, the Feynman calculus, quantum electrodynamics, electrodynamics of quarks and hadrons, quantum chromodynamics, weak interactions, gauge theories.

PHY X96K. Quantum Field Theory I.
Quantization of the Klein-Gordon, Dirac, and electromagnetic field theories; theory of interacting fields, perturbation theory, and renormalization.

PHY X96L. Quantum Field Theory II.
Path-integral formalism, massless particles, electrodynamics, nonperturbative methods, one-loop calculations in quantum

electrodynamics, general renormalization theory, soft photons, bound statics in quantum electrodynamics.

PHY X96P. String Theory I.
Introduction to string theory and conformal field theory. The free string, conformal invariance and conformal field theory, supersymmetry and string interactions.

PHY X96Q. String Theory II.
Advanced conformal field theory, perturbative string theory and compactification. Introduction to nonperturbative aspects of string theory.

PHY X96S. Topics in Particle Physics: Seminar.
Topics to be announced.

PHY X96T. Special Topics in Particle Physics.
Topics to be announced.

PHY X96V. High Energy and Astroparticle Physics.
Review quantum field theory, aspects of the standard model and beyond, the naturalness problem, dark matter, early universe cosmology, and other selected subjects.

PHY X97K. Nuclear Physics.
Systematics of stable nuclei; nuclear structure; decay of the nucleus; cross sections and reaction mechanisms; the elementary particles.

PHY X97S. Seminar in Nuclear Physics.
Topics to be announced.

PHY X97T. Special Topics in Nuclear Physics.
Topics to be announced.

PHY X97U. Graduate Seminar in Nanoscience.
Various seminar topics in nanoscience.

PHY X98. Thesis.

PHY X98R. Master's Report.
Prepare a report to fulfill the requirement for the master's degree under the report option.

PHY X98S. Seminar in High Energy Theory.

PHY X98T. Supervised Teaching in Physics.
A review of physics teaching strategies, administrative procedures, and classroom responsibilities. Includes a review and critique of each participant's classroom teaching.

PHY X99W. Dissertation.

Professional Courses

PHY X19S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PHY X29S. Topics in Physics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Physics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POL - Polish

Polish: POL

Lower-Division Courses

POL X01C. Intensive Polish I.
Emphasis on developing oral proficiency in Polish using intensive methods of instruction.

POL X06. First-Year Polish I.
Emphasis on four-skills proficiency.

POL X07. First-Year Polish II.
Emphasis on four-skills proficiency.

POL X11C. Intensive Polish II.
Continuing intensive development of proficiency in Polish, with a focus on speaking and the reading of authentic texts.

POL X12K. Second-Year Polish I.
Emphasis on four-skills proficiency.

POL X12L. Second-Year Polish II.
Emphasis on four-skills proficiency.

Upper-Division Courses

POL X25. Third-Year Polish I.
Oral expression, reading, and composition.

POL X26. Third-Year Polish II.
Continuation of Polish 325: Oral expression, reading, and composition.

POL X28. Topics in Advanced Polish.

POL X79. Conference Course in Polish Language or Literature.

Graduate Courses

POL X92. Topics in Polish Language.

POL X95. Conference Course.
Study of individual problems in Polish language, literature, and culture.

Professional Courses

POR - Portuguese

Portuguese: POR

Lower-Division Courses

POR X01D. First-Year Portuguese I.
Development of speaking, listening, reading, and writing skills; building vocabulary, learning basic rules and terminology of grammar; and gaining a better understanding of Portuguese-speaking cultures, with focus on Brazil, in order to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations.

POR X10D. First-Year Portuguese II.
Development of speaking, listening, reading, and writing skills; building vocabulary, learning basic rules and terminology of grammar; and gaining a better understanding of Portuguese-speaking cultures, with focus on Brazil, in order to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations.

POR X10S. Portuguese for Spanish Speakers I.
Designed to provide qualified Spanish-speaking students a rapid introduction to Portuguese language. Development of speaking, listening, reading, and writing skills; building vocabulary, learning basic rules and terminology of grammar; and gaining a better understanding of Portuguese-speaking cultures, with a focus on Brazil, in order to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations.

POR X11C. Portuguese Conversation and Culture.
Explore the development of speaking, listening, reading, and writing skills, and build vocabulary. Review rules and terminology of Portuguese grammar. Examine complex grammar structures and Portuguese speaking cultures, with a focus on Brazil.

POR X11D. Second-Year Portuguese.
Focuses on the development of speaking, listening, reading, and writing skills while building vocabulary. Reviews rules and terminology of Portuguese grammar. Introduces complex grammar structures and Portuguese speaking cultures, with a focus on Brazil, in order to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations.

POR X11J. Portuguese Conversation and Culture for Spanish Speakers.
Designed for qualified Spanish-speaking students. Explore speaking and listening skills. Build vocabulary. Examine Portuguese-speaking cultures, with a focus on Brazil.

POR X11S. Portuguese for Spanish Speakers II.
Continuation of Portuguese 610S.

POR X12. Accelerated Second-Year Portuguese: Oral Expression, Reading, and Composition.
Covers the same material as Portuguese 312K and 312L, but in one semester.

POR X14C. Intermediate Writing and Grammar in Context.
Review rules and terminology of Portuguese grammar. Explore complex grammar structures in the context of reading and writing. Build vocabulary in the context of Portuguese speaking cultures, with a focus on Brazil.

POR X14J. Intermediate Writing and Grammar for Spanish Speakers.
Designed for qualified Spanish-speaking students. Review rules and terminology of Portuguese grammar. Explore complex grammar structures in the context of reading and writing. Build vocabulary in the context of Portuguese speaking cultures, with a focus on Brazil.

POR X19S. Topics in Portuguese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POR X29S. Topics in Portuguese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

POR X19S. Topics in Portuguese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POR X21P. Portuguese Pronunciation.
Explore Portuguese pronunciation and the fundamental principles of phonetic analysis. Examine how Portuguese sounds are produced, how they fall into patterns, and how they change in different environments.

POR X22C. Conference Course in Luso-Brazilian Civilization.

POR X22L. Conference Course in Luso-Brazilian Literature.

POR X27C. Advanced Grammar and Writing in Context.
Study and practice of Portuguese grammar, including reading exercises and guided composition designed to develop writing skills across styles. Students will be exposed to various topics in Portuguese language, literature, and culture.

POR X28C. Introduction to Literatures and Cultures.
Overview of Luso-Brazilian literatures and cultures, including the arts and popular expressions from a multidisciplinary perspective. Among the regions studied are Brazil, Portugal, and related areas in Africa.

POR X29S. Topics in Portuguese.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POR X30L. Introduction to Language and Linguistics in Society.
Examines the dynamics of language structure and use throughout the Portuguese-speaking world. Covers topics such as sound systems, grammatical structures, historical developments, language learning and loss, dialect differences, and their social significance.

POR X44C. Luso-Migrations: Portugal and Brazil.
Explore post-colonial political and cultural relations between Portugal and Brazil. Examine nineteenth and twentieth century Portuguese travelogues, memoirs, films, and fiction.

POR X50C. Brazilian Film and Culture.
Explore a critical overview of Brazilian cinema, from the silent era to the present day, with an emphasis on the late twentieth and early twenty-first centuries.

POR X52. Brazilian and Spanish American Literature.
Explore Brazilian and Latin American literature and culture from the twentieth century and later. Examine the literary trends and social roles in the region while comparing and contrasting the culture and history from both Spanish America and Brazil.

POR X53. Sociolinguistics.
Explores the interrelationship of language and society with reference to the Portuguese-speaking world. Examines how socio-economic , political, and anthropological factors like race, social class, gender, age, and identity influence linguistics forms.

POR X54. United States Latino Literatures and Cultures in Context.
Examines the United States Latino literary and cultural production from a multidisciplinary perspective, through literature, film, music, and performance. Analyzes the literatures and experiences of Brazilian American writers and artists in their historical and cultural specificities.

POR X64L. Applied Linguistics.
Introduction to the linguistic structure of Portuguese; application of linguistic principles to the teaching of Portuguese.

POR X67C. Business in Brazilian Life and Culture.
Explore cultural aspects of business practices in Brazil.

POR X68T. Topics in Linguistics.

POR X75D. Global Brazil.
Examine twentieth-century literature, films, and other cultural artifacts of the multicultural Brazilian society. Critique the image of Brazil as a unified, harmonious, racially-mixed nation. Explore contemporary textual and visual representations of the Brazilian diaspora in the United States and Europe.

POR X75E. Popular Music in Brazil.
Explore Brazilian cultural politics through the message and performance of live and recorded song, including samba, bossa nova, protest song, Tropicalist counter-cultural song, Brazilian funk, hip hop, and manguebeat.

POR X77C. Topics in Portuguese.
Examine important themes in Brazilian society related to cultural production including literature, audiovisual, and media production.

POR X79C. Capstone Seminar in Literatures and Cultures.
Central issues, concepts, and themes that define Luso-Brazilian literatures and cultures. Focus on a specific case study or case studies that result in the production of a research paper on a particular topic of interest.

POR X79H. Honors Tutorial Course.
Supervised individual research on a literary, linguistic, or cultural problem, culminating in a written thesis.

POR X79L. Capstone Seminar in Linguistics.
Central issues, concepts, and themes that define linguistics. Focus on a specific case study or case studies that result in the production of a research paper on a particular topic of interest.

Graduate Courses

POR X19S. Topics in Portuguese.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POR X29S. Topics in Portuguese.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POR X81. Topics in Brazilian Literature.

POR X81.1. Comparative Studies in the Literatures of Brazil and Spanish America.

POR X85L. Conference Course in Luso-Brazilian Literatures and Linguistics.

For students with special interests not met by other courses offered in any one semester.

POR X96K. Topics in Comparative Romance Linguistics.

POR X96K.1. Comparative Romance Linguistics.

POR X96K.2. Introduction to Romance Linguistics.

POR X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

POR X19S. Topics in Portuguese.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

POR X29S. Topics in Portuguese.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PPE - Philosophy, Politics, and Economics

Philosophy, Politics, and Economics: PPE

Lower-Division Courses

PPE X01. Introduction to Philosophy, Politics, and Economics.

Cultivate an awareness of the relevance of ethics, politics, and economics, as well as an appreciation for the limitations of each discipline and the necessity of thinking through their interactions.

PPE X19S. Topics in Philosophy, Politics, and Economics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Government. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PPE X20. Foundations of Philosophy, Politics, and Economics.

Examine distributive justice, collective action, and the rule of law. Reflect on how these approaches amplify and limit civil discourse.

PPE X29S. Topics in Philosophy, Politics, and Economics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PPE X79. Capstone Course.

Practice researching and prepare to share findings for public discourse related to philosophy, politics, and economics.

University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PRC X20E. Topics in Brazilian Studies.

Focus on issues in Brazilian society and Portuguese society and culture.

PRC X20E.1. Samba to Hip Hop: Brazilian Popular Music.

Examines the role of popular music in relationships of power with subordination and the impact of music as a form of cultural expression.

PRC X20E.2. Global Brazil: Immigration and Diaspora in Brazilian Culture.

Examination of twentieth-century literature, films, and other cultural artifacts that capture the multicultural reality of Brazilian society and challenge the image of Brazil as a unified, harmonious, racially-mixed nation. Subjects include contemporary textual and visual representations of the Brazilian diaspora in the United States and Europe.

PRC X20E.3. Afro-Luso-Brazilian Worlds.
Examine the myths and realities in the Afro-Luso-Brazilian worlds and the connections and contrasts between them.

PRC X21. Spectacular Brazil.
Explore the global, historical, thematic, and performative aspects of Brazilian culture using cultural texts, film, popular music, art, and photography.

PRC X25. Modern Brazil.
Explore modern Brazilian urban culture and the processes and contexts that led to the modernization of Brazil.

PRC X27. Black Digital Feminisms in Brazil.
Explore online expressions of Black feminisms in Brazil, highlighting transnational resonances with other Black cultural movements while examining the socio-political particularities of Brazil's current digital landscape.

PRC X29S. Topics in Portuguese Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

PRF - Performance

The following instruments are offered under PRF: Bassoon (BSN), Clarinet (CLA), Double Bass (D B), Drum Set (DRS), Euphonium (EUP), Flute (FLU), French Horn (F H), Guitar (GUI), Harp (HAR), Harpsichord (HSC), Oboe (OBO), Opera (OPR), Organ (ORG), Percussion (PER), Piano (PIA), Recorder (REC), Saxophone (SAX), Trombone (TRO), Trumpet (TRU), Tuba (TBA), Vibraphone (VIB), Viola (VIA), Violin (VIO), Violoncello (V C), Voice (VOI).

Performance: PRF

Lower-Division Courses

PRF X01. Lower-Division Music Performance: Secondary.
Music performance for nonmusic majors and music majors studying a secondary instrument. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, recorder, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X02. Topics in Lower Division Piano: Secondary.

PRF X10. Lower-Division Music Performance: Principal.
Principal instrument performance. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X12. Lower-Division Music Performance: Major.
Music performance for music performance or music performance pedagogy majors. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, and violoncello.

PRF X12J. Lower-Division Music Performance: Improvisation.
This course is offered in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, trumpet, and vibraphone.

Upper-Division Courses

PRF X51. Upper-Division Music Performance: Secondary.
Music performance for nonmusic majors and for music majors studying a secondary instrument. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, recorder, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X60. Upper-Division Music Performance: Principal.
Principal instrument performance. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X62. Upper-Division Music Performance: Major.
Music performance for music performance majors. This course is offered in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X62J. Upper-Division Music Performance: Improvisation.
Improvisation for jazz composition and jazz performance majors. This course is offered in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, trumpet, and vibraphone.

Graduate Courses

PRF X80. Graduate Course in Performance.
Music performance offered in opera and in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X80J. Graduate Course in Performance: Jazz Improvisation.
Jazz improvisation in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, trumpet, and vibraphone.

PRF X80V. Graduate Course in Performance: Collaborative Piano.
Collaborative piano (accompanying) performance.

PRF X90. Advanced Graduate Course in Performance.
Music performance offered in opera and in the following instruments: bassoon, clarinet, double bass, euphonium, flute, French horn, guitar, harp, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

PRF X90J. Advanced Graduate Course in Performance: Jazz Improvisation.
Jazz improvisation in the following instruments: double bass, drum set, guitar, piano, saxophone, trombone, trumpet, and vibraphone.

PRF X90V. Advanced Graduate Course in Performance: Collaborative Piano.
Music performance in collaborative piano (accompanying).

Professional Courses

PRS - Persian

Persian: PRS

Lower-Division Courses

PRS X01C. Intensive Persian I.
First semester of intensive Persian language instruction.

PRS X06. First-Year Persian I.
Elementary colloquial Persian.

PRS X07. First-Year Persian II.
Continuation of Persian 506. Elementary literary Persian.

PRS X11C. Intensive Persian II.
Second semester of intensive Persian language instruction.

PRS X12C. Intensive Persian for Heritage Speakers.
Designed for heritage speakers with prior exposure to Persian speaking and listening. This may include heritage Persian language speakers who have had little or no formal instruction in the language, and speakers who understand at a near-native level but have no knowledge or limited knowledge of reading and writing.

PRS X12K. Second-Year Persian I.

PRS X12L. Second-Year Persian II.
Continuation of Persian 512K.

PRS X19S. Topics in Persian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PRS X29S. Topics in Persian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

PRS X06. First-Year Persian I.
Elementary colloquial Persian.

PRS X07. First-Year Persian II.
Continuation of Persian 506. Elementary literary Persian.

PRS X19S. Topics in Persian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PRS X22K. Intermediate Persian I.
First semester of intermediate Persian language instruction.

PRS X22L. Intermediate Persian II.
Second semester of intermediate Persian language instruction.

PRS X29. Topics in Persian Language, Literature, and Culture.
Study of various aspects of Persian linguistics, literature, and culture. Conducted in Persian.

PRS X29.1. Ferdowsi's Shahnameh.

PRS X29.10. Iranian Women Poets.

PRS X29.11. Media and Migration in Iran.
Explore the evolving meanings of leaving the homeland in Persian modern media.

PRS X29.12. Cops and Criminals in Iran.
Examine the theme of cops, criminals, and prisons in Iran, explore Persian language skills by reading Persian texts, watching or listening to media samples, participating in discussions, giving presentations, writing papers.

PRS X29.13. Cultural History of Contemporary Iran.
Conducted in Persian (Farsi). Describe and analyze the main trends and patterns in a variety of the cultural aspects of modern Iran, including literary arts, visual arts, performing arts, architecture, sports, etc.

PRS X29.2. Sa'di's Golestan.

PRS X29.3. Hafez's Ghazals.

PRS X29.4. Sadeq Hedayat and Twentieth-Century Persian Fiction.

PRS X29.5. Forugh Farrokhzad and Modernist Persian Poetry.

PRS X29.6. Persian Prose Nonfiction.

PRS X29.7. The Classics of Persian Poetry.
Conducted in Persian.

PRS X29.8. Iranian Cinema.

PRS X29.9. Media Persian.
Introduction to the language of media in Iran and the rest of the Persianate world.

PRS X29S. Topics in Persian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PRS X30D. Persian across Disciplines.
Students read and discuss Persian language materials related to the subject matter of another designated course.

PRS X69. Conference Course in Persian Language and Literature.
Supervised individual study of selected problems in Persian language or literature.

Graduate Courses

PRS X06. First-Year Persian I.
Elementary colloquial Persian.

PRS X07. First-Year Persian II.
Continuation of Persian 506. Elementary literary Persian.

PRS X19S. Topics in Persian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PRS X29S. Topics in Persian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PRS X80C. Topics in Persian Language.

PRS X81H. Intensive Graduate Language Instruction I.
Intensive cultural and literacy-focused training in Persian at the beginning level in preparation for research with Persian sources. Includes an independent project component. Incoming students are placed in the appropriate level by means of a departmental placement test.

PRS X81J. Intensive Graduate Language Instruction II.
Intensive cultural and literacy-focused training in Persian at the low-intermediate level in preparation for research with Persian sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

PRS X81K. Intermediate Graduate Language Instruction I.
Intensive cultural and literacy-focused training in Persian at the intermediate level in preparation for research with Persian sources. Includes an independent project component. Incoming students are placed in the appropriate level by means of a departmental placement test.

PRS X81L. Intermediate Graduate Language Instruction II.
Intensive cultural and literacy-focused training in Persian at the high-intermediate level in preparation for research with Persian sources. Includes an independent project component. Incoming students are placed in the appropriate level by means of a departmental placement test.

PRS X82C. Topics in Persian Linguistics and Philology.

PRS X84C. Topics in Persian Literature.
Study of various aspects and periods of Persian language and literature.

PRS X84C.1. Ferdowsi's Shahnameh.

PRS X84C.10. Iranian Film and Fiction.

PRS X84C.2. Sa'di's Golestan.

PRS X84C.3. Hafez and Classical Persian Lyric Poetry.

PRS X84C.4. Sadeq Hedayat and Twentieth-Century Persian Prose Fiction.

PRS X84C.5. Forugh Farrokhzad and Modernist Persian Poetry.

PRS X84C.6. Iranian Women Writers.

PRS X84C.7. Persian Prose Nonfiction, Past and Present.

PRS X84C.9. Iranian Drama.

PRS X89. Conference Course in Persian Studies.
Supervised individual study of selected problems in Persian studies.

PRS X98. Thesis.

PRS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

PRS X99W. Dissertation.

Professional Courses

PSC - Prevention Science

Prevention Science: PSC

Lower-Division Courses

Upper-Division Courses

Graduate Courses

PSC X86. Applied Research Methods.
Explore disciplines of research methods, research design, data-producing techniques, treatment, interpretation of data and reporting on research.

PSC X90. Introduction to Prevention Science.
Introduction to prevention science and to the logic of prevention as preferable to care or management of health problems.

PSC X91. Theories of Change.
Examine personal, social, and environmental factors that influence health-related behavior as well as the role of individuals, groups, institutions, and social structures in encouraging and discouraging healthy behavior. Focus on behavior change theories and the practical application of these theories.

PSC X92. Prevention Science Across the Lifespan.
Introduction to the theories and applications of developmental science and the lifespan approach to prevention science. Learn how to integrate principles of developmental science into a prevention science framework.

PSC X93. Foundations of Epidemiology.
Introduction to the basic tenets of epidemiology as well as the different types of epidemiological study designs.

PSC X94. Community Engaged Intervention Design.
Develop culturally responsive, theory-based prevention and treatment practices in school, community, and family settings. Discuss prevention science research and practice to contextualize the tension between theory and evidence-based design and community contextual fit when developing, refining, and disseminating intervention programs.

PSC X95. Topics in Prevention Science.
Examine advanced topics in prevention science; critique and synthesize research findings and literature.

PSC X95.1. Advanced Methods in Prevention Science.
Explore analytic reasoning and research design, execution, analysis, interpretation, and appraisal for prevention scientists. Examine complex study designs, analytic techniques, issues of bias, moderation and mediation, and causal inference.

PSC X95.10. Psychology of Immigration and Cultural Adaption.
Discuss psychology of immigration and cultural adaptation. Examine immigration and cultural adaptation from the perspectives of demography, sociology, anthropology, developmental psychology, family psychology, vocational studies, and other disciplines.

PSC X95.11. Mind, Body, and Health.

PSC X95.12. Fundamentals of Health Coaching.

PSC X95.2. Implementation Science.
Discuss the theory and practice of Dissemination and Implementation (D&I) Sciences. Explore conceptual and theoretical foundations of implementation science, methodologies for evaluating implementation and dissemination strategies, and examining case examples from literature.

PSC X95.3. The Design and Conduct of Randomized Controlled Trials.
Conduct randomized controlled trials (RCTs) of preventive intervention and health promotion programs.
PSC X95.4. Social Determinants of Health.
Explore social determinants of health and health disparities in the United States and globally, as well as strategies to address them.
PSC X95.5. Research Ethics.
Explore ethical issues in research.
PSC X95.6. Impact of Marketing on Public Health.
Introduction to research on the impact of marketing from a public health perspective, with a focus on youth and young adults. Explore theoretical approaches to understanding marketing's influence, impacts on public health, and disproportionate impact on vulnerable groups.
PSC X95.7. Physical Activity and Public Health Practice.
Practice strategies for implementation of public health programming related to physical activity, approached through review of the current research literature. Focus on evidence-based strategies, and key approaches to program development, implementation, and evaluation.
PSC X95.8. Risk and Resilience in Children and Adolescents.
Introduction to the theories and methods of child and adolescent risk and resilience. Examine resilience processes in populations at elevated risk for negative outcomes. Explore how empirical research contributes to the development of programs aimed at strengthening resilience in at-risk youth.
PSC X95.9. Child and Adolescent Health Psychology.
Introduction to the psychological, social, and physical aspects of childhood and adolescence. Examine issues from a developmental-contextual perspective.
PSC X96. Doctoral Seminar.
Produce individual or shared project research with reports evaluated by seminar participants and the instructor.
PSC X96T. Directed Research in Prevention Science.
Investigate assigned problems under the direction of a Graduate Studies Committee member; develop and demonstrate competence in research design and execution; produce an acceptably written research report.
PSC X97. Research Problems.
Examine individual or group research in a specialized area of health education.
PSC X97P. Graduate Internship.
Practice in a professional organization or institution under supervision.
PSC X98. Thesis.
PSC X98T. Teaching in Higher Education.
Explore diverse instructional strategies, common issues in teaching and learning, short and long-term planning, practical aspects of course design and management, as well as assessment and grading practices. Review historical perspectives on the research in teaching and learning.
PSC X99W. Dissertation.

Professional Courses

PSF - Public Safety

Public Safety: PSF

Lower-Division Courses

PSF X11. Social Work and Public Safety.
Focuses on the intersection between social work, public safety, law, and human services.

Upper-Division Courses

PSF X60K. Public Safety Field Immersion.
Explores the intersection of social work and public safety. Experiential learning in approved public safety-related settings and a weekly one-hour seminar.

Graduate Courses

Professional Courses

PSY - Psychology

Psychology: PSY

Lower-Division Courses

PSY X01. Introduction to Psychology.
Basic problems and principles of human experience and behavior.
PSY X04. Introduction to Child Psychology.
General introduction to physical, social, and cognitive development from conception onward.
PSY X05. Introduction to Cognitive Psychology.
Introduction to the study of how people perceive, act, communicate, and reason.
PSY X06. Introduction to Human Sexuality.
Introduction to the science of sex and mating. Provides an overview of the psychological, biological, and social factors that contribute to sexual well-being and human sexual attraction.
PSY X08. Biopsychology.
Introduction to the biological bases of psychological processes and behavior. Overview of the physiology and anatomy of the nervous system, followed by a survey of brain mechanisms of perception, cognition, learning, and emotion; biological perspectives on drug action and mental disease.
PSY X09. Personality.
Research and theory concerning personality structure, dynamics, development, and assessment.
PSY X17. Statistical Methods in Psychology.
Measures of central tendency and variability; statistical inference; correlation and regression.
PSY X17L. Introduction to Statistics for the Behavioral Sciences.
Explore the R programming language, data visualization, data wrangling, descriptive statistics (measures of central tendency and variation), measures of association (correlation, regression). Examine inferential statistics including parametric tests (such as t-tests and ANOVA) and non-parametric tests (such as Kruskal-Wallis and chi-squared tests).
PSY X19K. Social Psychology.
Theory and research on the analysis of human conduct in social settings.
PSY X19R. Introductory Research Experience.
Learn broad knowledge about laboratory goals and observe how scientific studies are conducted. Develop entry-level firsthand supervised research experience in psychology in collaboration with projects' principal investigators or graduate/medical students.
PSY X19S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PSY X29S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PSY X82K. Internship in Clinical Psychology.
Supervised practical experience in clinical assessment and treatment.

Upper-Division Courses

PSY X19S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study

Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PSY X20M. Psychological Methods and Statistics.
Explore the basic and intermediate scientific methods and statistical techniques commonly employed in psychological research.

PSY X20R. R Programming for Behavioral Sciences.
Introduction to the R programming language.

PSY X23. Perception.
Theory and research in the ways we extract information from the environment.

PSY X23P. Perceptual Systems: Neurons, Behavior, and Evolution.
An introduction to perceptual systems, with an emphasis on perception in human and nonhuman primates. Subjects include the physics of perceptual stimuli, the neural processing of perceptual information, the performance of human and other primates in perceptual tasks, and the evolution of perceptual systems.

PSY X23S. Sex Differences in Cognition and Perception.
Examination of facts, theories, and implications of sex differences in human cognition and perception. Subjects include genetic and hormonal origins of sex differences, structural differences in the body and brain, verbal abilities, spatial abilities, learning, memory, sensory-motor abilities, and the auditory, olfactory, visual, and other sensory systems.

PSY X23V. Seeing and Acting in a Virtual World.
Methods of experimentation and discovery for examining one's own perceptions and actions in ordinary life.

PSY X25K. Advanced Statistics.
Advanced statistical theory and methods for analysis of behavioral sciences data; subjects include analysis of variance and covariance, regression, and nonparametric techniques.

PSY X26K. Principles of Conditioning and Learning.
Explore how people learn emotional and motor responses without conscious intent.

PSY X29S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PSY X32. Behavioral Neuroscience.
Neuroscientific study of behavioral functions: fundamental structure and function of the human nervous system, sensory systems and perception, motor systems and behavior, motivation and learning, brain disorders and maladaptive behavior.

PSY X32C. Hormones and Behavior.
Neuroscientific study of hormones and behavior in animals and humans. Includes sexual behavior, sexual differentiation, parental behavior, aggressive behavior, feeding and drinking, stress, learning, and memory.

PSY X32D. Human Brain Imaging in Psychology.
Study of human brain imaging technologies such as fMRI and electrophysiology.

PSY X32E. Ethics, Genetics, and the Brain.
Discuss the ethical, legal, and societal implications of advances in the understanding of neuroscience and genetics.

PSY X32J. The Developing Brain.
Explore the process of brain development from prior to fertilization through to old age with focus on the molecular, cellular, neurobiological, and behavioral changes that occur.

PSY X32M. The Neuroscience of Motivation and Reward.
Examination of mechanisms of the brain that control behaviors such as incentive motivation, reward, aversion, and addiction.

PSY X32P. Neural Plasticity And Behavior.
Examine basic concepts and current research directions in brain plasticity. Includes theory and research on how animals learn and remember, how brain areas and neurons adapt to life experiences, trauma, injury, and aging and new treatment directions based on neural plasticity principles.

PSY X32S. Psychology and Neuroscience of Sleep.
Discuss the scientific literature on neuroscience underlying sleep, psychological influences on sleep, and sleep habits and interventions.

PSY X32T. Biological Clocks and Behavior.
Explore the role of biological clocks in health and disease.

PSY X32U. Diversity in Cognitive Aging.
Discuss biological, sociocultural, and environmental factors underlying cognitive aging. Explore how each of these factors dynamically shapes cognitive functioning, brain health, and late-life dementia risk from a life course perspective.

PSY X32W. Vision and Action.

PSY X33C. Controversial Issues in Development.
An exploration of questions in developmental psychology that are currently in dispute. Subjects may include stem cell research, treatment of juveniles in the legal system, physician-assisted suicide, and methods of sex education.

PSY X33D. Introduction to Developmental Psychology.
Physical, social, and cognitive development in humans.

PSY X33E. Identity Formation.
An introduction to historical theories of and current research on identity, with particular focus on identity development in the domains of occupation, religion, politics and morality, gender, ethnicity, and adoption.

PSY X33F. Fantasy and Reality.
Examination of how children and adults decide what is real and what is not. Subjects include the fantasy-reality distinction, magical thinking, and religious cognition.

PSY X33G. The Development of Attachment Relationship.
Study of the attachment relationship.

PSY X33M. Infant Development.
Examine the development of motor, perceptual, cognitive, language and socio-emotional capacities during the infancy and toddler years (0-2years). Discuss theoretical foundations, empirical findings, and methodological advances related to these areas.

PSY X33N. Cognitive Development.
Overview of the development of thinking from infancy through childhood.

PSY X33P. Child Language.
Examination of theory and research concerning the development of language in the child.

PSY X33R. Social Development in Children.
Development of social behavior (for example, sex typing and aggression) and social relationships.

PSY X33S. Developmental Science of Adolescence.
An in-depth exploration of what it means to be an adolescent - how the brain, hormones and cognitive development change motivation and behavior, and how institutions (schools, governments, police) help or hinder young people's development.

PSY X33T. Adolescent Development.
Physical, cognitive, social, and personality development during adolescence.

PSY X33W. Moral Development.
An introduction to theory and research on morality. Subjects include culture and morality, Freudian and social learning perspectives on moral development, Kohlberg's theory of morality, challenge to Kohlberg's theory, and cognitive, familial, and emotional influence on morality.

PSY X34D. Psychology of Human Mating.
Mate selection, sources of conflict, and mating over the life span, studied in the context of evolutionary psychology and sexual selection theory.

PSY X34E. Evolutionary Psychology.
Fundamentals of evolutionary psychology, including issues of natural and sexual selection, adaptation, and domain-specific psychological mechanisms.

PSY X37. Psychology of Language.
Consideration of approaches to the study of language, its development in children, and its functioning; important research from psychology and linguistics.

PSY X37P. Language Processing.
Introduction to psycholinguistics, which uses methods and theories from cognitive psychology and cognitive science to understand how people speak, comprehend, and learn language(s).

PSY X38K. Psychology of Reading.
Theory and research on the reading process and its acquisition.

PSY X39. Behavior Problems of Children.
Adjustment difficulties during childhood and adolescence; causation and treatment.

PSY X40M. Industrial Psychology.
A general introduction to organizational behavior and issues in industrial/organizational psychology. Subjects include organizational structure, selection and placement, leadership, job satisfaction, training, and change.

PSY X41K. Selected Topics in Psychology.
Topics of contemporary interest that may vary from semester to semester.

PSY X41K.12. Personality Assessment.
Theoretical and methodological issues involved in trying to understand and measure personality.

PSY X41K.14. Robot Cognition.

PSY X41K.15. History of Modern Psychology.
A survey of the diverse roots of modern psychology, the competing schools that influenced psychology's development, and the perspectives that guide scholarship in present-day psychology.

PSY X41K.16. Psychology of Fundamentalism.
Psychological research and theory on religious fundamentalism. Considers the nature of different forms of religious fundamentalism, and possible psychological mechanisms that motivate fundamentalism. Includes topics such as the development of fundamentalism, the movement from fundamentalism to terrorism, and fundamentalism and the family.

PSY X41K.17. Psychology and Religion.
An exploration of the psychological processes involved in religion. Discusses seminal psychological theories of religion, such as the work of James, Freud, Jung, and Maslow. Discussion of empirical work includes topics such as the development of religion across the life span, religious experience, conversion, and the effects of religion on mental and physical health.

PSY X41K.18. Language and Thought.

PSY X41K.19. Psychology of Literature.
Delves into the relation between literature and psychological research. Addresses this relation in terms of character development, plot devices, and historical influences. Broadly explore why people are interested in reading literature that might be subjective or wholly fictional in nature. Explore the extent to which authors create characters that 'ring true' to what psychological science has learned about human nature and how this affects the reader's enjoyment of the literature.

PSY X41K.4. Health Psychology.

PSY X41K.7. Epidemiology.

PSY X41K.8. Learning and the Brain.

PSY X43K. Substance Abuse.
Causes of substance abuse: the evolutionary perspective, sex differences, predisposition, biological and cognitive theories; emphasis on food and alcohol.

PSY X44C. Growing up Latine.
Examine the multiple dimensions of Latine development across the lifespan. Discuss theoretical foundations, empirical findings, and methodological advances in the field.

PSY X45. Individual Differences.
Study of person-to-person variation in intelligence, personality, and interests, with an emphasis on genetic and environmental determinants, developmental processes, and their relation to real-world outcomes.

PSY X46K. Psychology of Sex.
Development of sex from genes to human behavior.

PSY X50. Motivation.
Theory and research on motivation; biological and social determinants.

PSY X52P. Psychopathology.
Explore biological and social factors in the development and treatment of psychopathology.

PSY X53K. Psychopharmacology.
The pharmacology and the neurochemical, neurophysiological, and psychological effects of psychoactive drugs, with regard to their use as therapeutic and behavioral research tools.

PSY X55. Cognition.
Theoretical and critical analysis of the development, nature, and function of the thought process.

PSY X55C. Development of Categories and Concepts.
Study of the historical and contemporary knowledge about the ways that people learn about concepts.

PSY X55D. Animal Cognition.
An introduction to animal intelligence and the evolution of mind. Examines what is known about intelligence in other animals, how intelligence is revealed in social and problem-solving behavior, and the ways in which human intelligence is structured by its evolutionary past.

PSY X55E. Psychology of Consciousness.
Introduction to the scientific study of consciousness from the perspective of psychology and neuroscience.

PSY X55M. The Cognitive Psychology of Music.
Cognitive foundations of music in terms of physics of sound, the psychophysics of musical experience, perceptual organization of musical scenes, the perception of time through rhythm, and the ways in which music reflects natural form.

PSY X55N. Cognitive Neuroscience.
Exploration of the link between the brain, mind, and behavior and cognitive neuroscience techniques.

PSY X55Q. Cognitive Science of Religion.
Explore cognitive and evolutionary approaches to understanding religion. Examine cutting-edge research on the cognitive science of religion from disciplines including anthropology, psychology, philosophy, and religious studies.

PSY X55R. Reasoning and Decision Making.
Survey of psychological research on how people reason and make decisions. Subjects include mental models, causality, analogy, heuristics, emotion, motivation, culture, and decision making.

PSY X55S. Social Cognition.
Examine major theories and research findings in social cognition.

PSY X57. Undergraduate Research.
Supervised research experience.

PSY X57R. Advanced Undergraduate Research.
Deepen supervised research experience in psychology. Implement advanced laboratory experience and skills within a leadership role in

collaboration with principal investigators and a team to assist with research projects.

PSY X58. Experimental Psychology.
Techniques of psychological research illustrated in a series of laboratory experiments.

PSY X58H. Honors Research Tutorial.

PSY X59. Selected Topics: Readings: Tutorial.
Supervised reading in selected topics of significance; area of intensive study is chosen by the student in consultation with the instructor.

PSY X59H. Honors Research I.

PSY X64. Introduction to Clinical Psychology.
Introduction to techniques of assessment and treatment of psychopathology.

PSY X64C. Childhood Trauma and Adversity.
Focus on how childhood trauma impacts behavioral, emotional, cognitive, and biological functioning across the lifespan.

PSY X64F. Forensic Psychology.
Examine the study and practice of psychology as it applies to issues relating to the law and legal system, such as: determination of competency and insanity, expert testimony, jury selection and the social psychology of the courtroom, eyewitness testimony, and false confessions.

PSY X64M. Mental Illness and the Brain.
Introduction to the brain dysfunction and cognitive impairment often associated with mental illness and how its recognition and assessment can be used to help with differential diagnosis, prognosis, and treatment planning.

PSY X64P. Positive Psychology and the Good Life.
Analyze how to live a more satisfying life based on modern psychological science. Survey the emerging field of positive psychology, including assessment and determinants of well-being; human strengths and virtues; the good life considered from evolutionary, economic, sociological, and cross-cultural perspectives; and applications to issues such as social change.

PSY X64S. Human Sexuality.
Human sexuality from a clinical and evolutionary perspective with a focus on the assessment, diagnoses, and treatment of sexual dysfunctions.

PSY X64T. Multicultural Psychotherapy.
Introduction to multicultural approaches to personality assessment and counseling psychotherapy.

PSY X65D. Behavioral Science, Equity, and Inclusion.
Apply the principles of experimental behavioral science to problems of creating an equitable and inclusive society in the twenty-first century.

PSY X65E. Emotion.
Examination of the scientific literature on the psychology of human and animal emotion.

PSY X65G. Gender and Racial Attitudes.
Advanced introduction to the psychological study of gender and racial attitudes in children and adults, with emphasis on the causes, consequences, and revision of an individual's gender and racial stereotypes.

PSY X65L. Advanced Social Psychology.
Experimental research in social psychology, social influence, decision making, affiliation, risk taking, stress, and other subjects.

PSY X71. Learning and Memory.
Analysis of theory and research in learning.

PSY X71E. Psychological Data Science Foundations I.
Introduction to foundational concepts and techniques in data science.

PSY X71F. Psychological Data Science Foundations II.
Explore foundational concepts and techniques in data science, including in-depth Python programming, advanced plotting techniques, curve/model fitting, computer simulations, and machine learning.

PSY X71M. Introduction to Machine Learning.
Introduction to the fundamental concepts and algorithms that enable computers to uncover the underlying patterns from different types of behavioral data.

PSY X71N. Natural Human Behavior in the Real World.
Design experiments that will be conducted in the real world, use mobile sensing technology to collect behavioral data, and discover behavioral patterns by analyzing fine-grained data. Conduct a behavioral study with the aim to provide research evidence to overcome the challenges that the real world poses.

PSY X71P. Applied Data Science.
Explore the fundamentals of data science. Discuss the current trends and subjects in data science.

PSY X71Q. Ethics in Behavioral Data Science.
Examine and discuss important ethical issues in the context of behavioral data science in real-world case-studies such as emotion recognition, surveillance, targeted marketing, and more.

PSY X71R. Brain Mechanisms and Learning Theory Applied to Real World Scenarios.

PSY X71S. Bayesian Data Analysis.
Introduction to Bayesian data analysis and inference.

PSY X71T. Text Analysis for Behavioral Data Science.
Introduction to various methods of text analysis, with a focus on extracting psychological insights. Discuss the underlying scientific basis that supports various use-cases.

PSY X73N. The Neurobiology of Attention.
Examination of behavioral and brain mechanisms of attention in humans and other animals.

PSY X79H. Honors Research II.

PSY X82K. Internship in Clinical Psychology.
Supervised practical experience in clinical assessment and treatment.

Graduate Courses

PSY X19S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PSY X29S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

PSY X80C. Human Neuropsychology.
Basic issues in normal and abnormal human brain function reviewed with emphasis on disorders of higher cerebral functioning.

PSY X80F. Fundamentals of Evolutionary Psychology.
Survey of important theories and research in evolutionary psychology, with emphasis on current problems.

PSY X80G. Grant Writing.
Examine grant writing for fellowships and research funds from a variety of different funding sources. Create and workshop drafts for applications for pre-doctoral fellowships (for example, NSF, NRSA), postdoctoral fellowships, dissertation grants, or general research funds. Generate discussion, contribute peer feedback, draft and revise grant components, and participate in a mock study section.

PSY X80W. Writing Workshop.
Explore tools to create and maintain a consistent writing practice and meet research goals. Track writing, discuss challenges and progress in a supportive community, and receive feedback on written work.

PSY X81C. Methods of fMRI: From Design to Data Analysis.
Methods behind all common fMRI data preprocessing steps and data analysis models, including how to properly implement and evaluate their performance.

PSY X81D. Advanced Topics in Neuroimaging.
Addresses the latest developments in the design, analysis, and interpretation of neuroimaging data.

PSY X81E. Introduction to Psychophysiology.
An overview of the principles, theory, and applications of using physiological measures to study mental processes. Covers the philosophical and theoretical foundations of brain/behavior relations and introduces basic electrical principles and human neurophysiology. A core course option.

PSY X81F. Grant Writing for the National Science Foundation.
Explore the application and review procedures when requesting funding from the National Science Foundation.

PSY X81G. Grant Writing in the Behavioral and Biological Sciences.
Introduction to grant writing in the behavioral and biological sciences and development of grant writing skills. Subjects include: finding grant opportunities, planning proposal activities, successful grant writing strategies, and how to talk to grant program officers. Write grant proposals (e.g., proposals to federal agencies such as NSF or NIH) and revise proposals based on peer and instructor feedback. Explore how grant proposals are reviewed by participating in a mock review session.

PSY X81H. Professional Development for Careers in Psychological Science.
Explore professional development issues that arise in academic and non-academic careers for psychological scientists.

PSY X82E. Area Seminar in Cognitive Science.
Current issues in cognitive science.

PSY X82F. R Programming in Behavioral Sciences.
Design reproducible behavioral data analysis using R and RStudio. Emphasis on coding skills to organize, analyze, and visualize data.

PSY X82H. Promoting Wellbeing and Thriving.
Examine empirically-supported strategies for promoting well-being and thriving through graduate study and beyond. Explore emotions, stress response, coping, gratitude, health behaviors, sleep, resilience, and mindfulness.

PSY X82K. Internship in Clinical Psychology.
Supervised practical experience in clinical assessment and treatment.

PSY X82V. Neural and Computational Basis of Vision.
Introduction to the physiology, psychophysics and computational aspects of the visual system. Review linear systems analysis, information theory, Bayesian statistical decision theory, and other relevant mathematical areas.

PSY X83C. Functional Neuroanatomy.
An examination of the anatomy of the brain and spinal cord, emphasizing connections and functions of neural systems.

PSY X83E. Area Seminar in Cognitive Neuroscience.
Current issues in cognitive neuroscience.

PSY X83M. Fundamentals of Physiological Psychology.
Survey of important theories and research in physiological psychology, with emphasis on current problems.

PSY X83P. Proseminar: Professional Development.
Explore the hidden curriculum of graduate training and future career prospects. Examine work/life balance, writing skills, grants, and issues to consider while in the job market.

PSY X83T. Principles of Sensory and Behavioral Neuroscience.
A proseminar covering the core material on essential topics in sensory and behavioral neuroscience.

PSY X84C. Bootstrap Statistics.
An introduction to modern methods of statistical analysis based on numerical computer simulation. Covers a range of common data analysis situations drawn mainly from the fields of neuroscience and experimental psychology. Techniques include point estimation, two-group and multiple group experiments, regression and curve fitting, and Bayesian analysis.

PSY X84E. Area Seminar in Clinical Psychology.

PSY X84K. Advanced Statistics: Experimental Design.
Consideration of problems of analysis and design commonly encountered in psychological research.

PSY X84M. Advanced Statistics: Inferential.
Covers t-test, chi-square, analysis of variance, and nonparametric tests.

PSY X84P. Regression Analysis.
Offers thorough coverage of all major aspects of regression. Coverage includes linear model theory and application, polynomial and interaction models, multivariate linear and logistic regression, and all related diagnostics.

PSY X84Q. Advanced Applied Statistics I.
Coverage of advanced statistical techniques useful in the social sciences and beyond. Specific areas of focus include non-linear regression, robust analysis, mixed-model regression (hierarchical linear models), and principal components/factor analysis.

PSY X84R. Data analysis with R.
Using R for a variety of data analyses following the topics covered in Psychology 384M including: reading data into R, generating graphs, ANOVA, ANCOVA, and regression.

PSY X84S. Advanced Applied Statistics II.
Coverage of advanced statistical techniques useful in the social sciences and beyond. Specific areas of focus include semi-parametric regression, categorical data modeling, resampling and permutation techniques, monte carlo simulation, time-to-event analysis, and structural equations modeling.

PSY X84T. Structural Equation Modeling.
Introduction to structural equation modeling.

PSY X85E. Area Seminar in Developmental Psychology.
Current issues in developmental psychology.

PSY X85J. Linear Models: Regression and ANOVA Methods.
Explores linear modeling from both conceptual and applied perspectives. Focuses on ANOVA, including multi-factor designs, post-hoc testing, and analysis of covariance, as well as on regression, including univariate and multivariate regression, polynomial and interaction models, logistic regression, and related diagnostics.

PSY X85N. Fundamentals of Personality Psychology.
Survey of important theories and research in personality psychology, with emphasis on current problems.

PSY X85P. Fundamentals of Social Psychology.
Survey of important theories and research in social psychology, with emphasis on current problems.

PSY X86D. Multivariate Pattern Analysis.
Explores cutting-edge techniques for finding meaningful patterns in large, noisy brain data sets, and how to use these techniques to address a variety of questions in cognitive neuroscience.

PSY X86E. Area Seminar in Individual Differences and Evolutionary Psychology.
Current issues in individual differences and evolutionary psychology.

PSY X86N. Fundamentals of Psycholinguistics.
Survey of important theories and research in psycholinguistics, with emphasis on current problems.

PSY X87C. Human Language Processing.
An overview of current psycholinguistic research, primarily in the production and comprehension of spoken language by adults. A core course option.

PSY X87E. Area Seminar in Perception, Brain, and Behavior Psychology.
Current issues in perception, brain, and behavior psychology.

PSY X87N. Perceptual Systems.
Overview of theory and research in visual perception and perceptual information processing.

PSY X87S. Principles of Cognitive Neuroscience.
Introduction of graduate students to the methods, theories, and research of cognitive neuroscience across a broad range of mental domains such as attention, memory, language, and decision making. A core course option.

PSY X88D. Individual Differences Psychology.
Person-to-person differences in cognitive abilities and personality, with emphases on genetic and environmental influences, developmental processes, and relations to real world outcomes. A core course option.

PSY X88E. Area Seminar in Social and Personality Psychology.
Current issues in social and personality psychology.

PSY X88K. Conference on Special Topics.
Readings, conferences, and other work on individually selected topics.

PSY X89E. Area Seminar in Cognition, Brain and Behavior.
Explore current issues in cognition, brain, and behavior.

PSY X89K. Theory and Techniques of Assessment I.
Introduction to intelligence and personality testing procedures, test interpretation, and ethical issues pertaining to clinical interviewing and testing. Includes instruction and feedback on clinical report writing.

PSY X89L. Theory and Techniques of Assessment II.
Clinical interviewing with adults and children. Observation and feedback for test administration and clinical skills.

PSY X90. Research.

PSY X91E. Area Seminar in Behavioral Neuroscience.
Explore current issues in behavioral neuroscience.

PSY X91N. Learning and Memory.
Presentation of contemporary approaches to the study of conditioning and learning at the behavioral level. Focuses on empirical data and theoretical analysis of acquisition and performance in Pavlovian and instrumental conditioning. Includes discussion of habituation, sensitization, stimulus control, and other paradigms for studying cognitive processes in nonverbal organisms.

PSY X91P. Issues and Controversies in Statistical and Scientific Inquiry.
Selected topics on the design and analysis of psychological research.

PSY X92N. Fundamentals of Comparative Psychology.
History and current status of comparative psychology, emphasizing several biological disciplines, including behavior genetics, ethology, evolutionary biology, and sociobiology.

PSY X93. Clinical Practicum I.
Supervised practical experience in the use of clinical techniques.

PSY X93K. Clinical Practicum II.
Continuation of supervised practical experience in the use of clinical techniques.

PSY X94I. Neuroinflammation in Health and Pathology.
Assess cutting-edge pre-clinical and clinical neuroimmune research, and interact with professors from across campus in special seminars.

PSY X94K. Fundamentals of Social and Personality Development.
Survey of important theories, issues, and research in social and personality development.

PSY X94N. Fundamentals of Cognitive Development.
Survey of important theories, issues, and research in the development of perception, language, and cognition.

PSY X94P. Topics in Seminars in Behavioral Neuroscience and Biopsychology.

PSY X94P.1. Current Topics in Behavioral Neuroscience.
Brain-behavior relationships, particularly recent research in behavioral neuroscience, including the anatomical and neurochemical mechanisms of behavioral events, and behavioral influences on the brain.

PSY X94P.13. Foundations of Human Neuroimaging.
A survey of the foundations for neuroimaging research with a focus on cognitive neuroscience. Describes the physical methods of image acquisition and physiological mechanisms used for functional imaging. Emphasis on magnetic resonance methods for structural and functional imaging. Surveys other imaging modalities, including positron emission tomography (PET), optical, and EEG/MEG electrical source localization.

PSY X94P.16. Quantifying Brain Structure.
Concepts and hands-on applications for quantifying aspects of brain and cellular structure, with a focus on stereological approaches.

PSY X94P.17. Behavioral Neuroendocrinology.
Current research in neuroendocrinology, including action of neuroendocrine systems on behavior, assays of substances in the blood to identify gene products, and examination of stress from neuroendocrine, behavioral, health, and immunity perspectives.

PSY X94P.2. Clinical Psychopharmacology.
Recent findings concerning the mechanisms of action and the behavioral effects of psychoactive drugs, particularly those used in psychiatry. Various drug types (such as sedative-hypnotics, hallucinogens, and drugs used to treat depression, schizophrenia, Parkinson's disease, and anxiety) and pathways in the brain are discussed to examine the neurochemical basis of psychiatric disorders and substance abuse.

PSY X94P.3. Neurobiology of Learning and Memory.
Neuroanatomical systems that are functionally related to basic forms of learning and memory in mammals.

PSY X94P.4. Animal Communication.

PSY X94P.7. Advanced Topics in Neuroanatomy.
Neuroanatomical systems and functions across species; advanced forms of neuroanatomy in mammals.

PSY X94Q. Topics in Seminars in Clinical Psychology.

PSY X94Q.17. Seminar in Positive Psychology.
A survey of the emerging field of positive psychology and well-being. Topics include character strengths and virtues, positive emotion, personality influences, motivation and goals, the happiness set point, and the issue of whether happiness can or should be changed.

PSY X94Q.18. Research Methods in Clinical Psychology.
Advanced training in research methodology as it pertains to the field of clinical psychology.

PSY X94Q.19. History and Professional Issues in Clinical Psychology.
History and development of clinical psychology as a profession. Includes clinical psychology before World War II, the recognition of stress, the rise of evidence-based practice, professional psychology, and multicultural diversity.

PSY X94Q.2. Empirically Supported Interventions with Adults.

PSY X94Q.20. Diversity Issues in Research and Practice.
Methodological considerations involved in designing research projects, and clinical assessment and treatment concerns that arise when working with diverse populations.

PSY X94Q.21. Neuropsychological Assessment.
Examine the administration and scoring of a wide variety of neuropsychological measures, as well as test interpretation, case conceptualization and report writing skills. Includes a variety of neurological syndromes and grand rounds case presentations.

PSY X94Q.4. Advanced Practicum in Clinical Psychology.
PSY X94Q.5. Advanced Practicum in Clinical Neuropsychology.
PSY X94Q.6. Empirically Supported Interventions with Children.
PSY X94S. Topics in Seminars in Developmental Psychology.
PSY X94S.2. Children's Racial/Gender Schemata.
PSY X94S.3. Literacy Acquisition.
PSY X94S.4. Psychological Processes in Family Violence.
PSY X94S.5. Language and Conceptual Development.
PSY X94S.6. Infant Perception and Cognition.
PSY X94S.7. Professional Issues in Academia.
PSY X94T. Topics in Seminars in Evolutionary Psychology.
PSY X94U. Topics in Seminars in Cognitive or Perception Psychology.
PSY X94U.12. Knowledge Representation.
Psychological approaches to the ways in which information is stored and processed, focusing on how particular assumptions and mental representation make tasks either easy or difficult to perform.
PSY X94U.13. Reasoning and Decision Making.
High-level cognitive processes of reasoning and decision making. Explores human rationality, analogical reasoning, causal reasoning, heuristics, and decision making in naturalistic settings.
PSY X94U.14. Topics in Systems Neuroscience.
Focuses on one or two topics and examines them in depth through group discussions of key scientific manuscripts. Discusses both classical studies and contemporary research.
PSY X94U.15. Cognitive Neuroscience.
Readings, results, and discussion regarding cutting-edge work in the field. Emphasis on how computational models can be used to bridge brain and behavior.
PSY X94U.16. Perception and Action.
Current topics in visually guided behavior, including eye movements, attention, and motor control, from behavioral, computational, and neurophysiological approaches.
PSY X94U.17. Models of Cognition.
Formal models of cognition and related analysis, such as model selection statistics and Bayesian hierarchical parameter fitting.
PSY X94U.18. Advanced Topics in Perceptual Systems.
Readings, talks, and discussions on perceptual systems.
PSY X94U.19. Statistical Methods in Computational Neuroscience.
Introduction to statistical and computational methods for understanding information processing in the nervous system, with emphasis on neural coding and statistical modeling of neural responses.
PSY X94U.20. Methods for fMRI.
Covers preprocessing and statistical analysis methods of fMRI data with tutorials and laboratory exercises.
PSY X94U.3. Introduction to Cognitive Science.
PSY X94U.4. Cognition.
PSY X94U.6. Memory.
PSY X94U.7. Speech Perception.
PSY X94U.8. Topics in Vision and Hearing.
Current research in human vision and/or hearing.
PSY X94U.9. Visual Perception.
PSY X94V. Topics in Seminars in Social and Personality Psychology.
PSY X94V.10. Close Relationships.
Social psychological theory and research on the topic of close relationships.
PSY X94V.11. Social Neuroscience.
Introduction to psychological and neural foundational concepts in social neuroscience. Surveys current work in the field to examine how it may or may not contribute to the study of social psychology.
PSY X94V.12. Self and Identity.
Broad overview of self-related theory and research, with an emphasis on recent developments in the field. Includes the nature and structure of the self and forms of self-knowledge. Also explores the relationship between the self and group processes, close relationships, and gender.
PSY X94V.13. Theory and Explanation in Social Psychology.
Examine different theoretical approaches in social psychology and the ability to critically evaluate the range and the limits of social psychological explanations from a meta-theoretical perspective. Address meta-theoretical principles in the construction and evaluation of social psychological theories, classic and contemporary approaches to understanding social psychological phenomena, and current directions in social psychological theorizing.
PSY X94V.6. The Self.
PSY X94V.7. Social Stereotypes.
PSY X94V.8. Psychosomatic Processes.
Survey of theories and findings concerning the links between psychological states and health. Includes emotion, stress, coping, psychoneuroimmunology, disclosure, and the social correlates of health and illness.
PSY X94V.9. Language and Personality.
An exploration into computer-based methods used to study the links between word use and basic social and personality processes.
PSY X94W. Foundations of Social Psychology.
Examine key theories and research in social psychology, from classic to current approaches.
PSY X95S. Fundamentals of Developmental Psychology.
Emphasizes understanding the major theoretical approaches to the field, with an introduction to empirical work inspired by these theoretical perspectives.
PSY X96. Advanced Behavior Pathology.
Evaluation of the experimental and theoretical literature concerning major behavioral disorders.
PSY X96C. Child and Adolescent Psychopathology.
The epidemiology, etiology, associated features, developmental course, and prognosis of childhood and adolescent behavior disorders.
PSY X96D. Clinical Psychopharmacology.
Recent findings concerning the mechanisms of action and the behavioral effects of psychoactive drugs, particularly those used in psychiatry.
PSY X98. Thesis.
PSY X98T. Supervised Teaching in Psychology.
Introduction to the teaching of psychology, including basic principles of adequate preparation, clear organization, student-teacher rapport, effective use of class time, clear and engaging communication of course content, fair and effective evaluation of students' understanding of subject matter, and ethical behavior. Also addresses issues concerning the relations of individual courses to other college courses, specific types of instruction (e.g., writing instruction), and the broad goals of colleges and universities.
PSY X99W. Dissertation.

Professional Courses

PSY X19S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
PSY X29S. Topics in Psychology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in

residence. Transfer credit is awarded for work in an affiliated studies program.

PSY X82K. Internship in Clinical Psychology.
Supervised practical experience in clinical assessment and treatment.

R E - Real Estate

Real Estate: R E

Lower-Division Courses

R E X19S. Topics in Real Estate.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

R E X29S. Topics in Real Estate.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

R E X40S. Topics in Real Estate.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Finance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

R E X58. Introduction to Real Estate and Urban Land Development.
An examination of the principles of real estate and urban land economics. Subjects include investment, valuation, financing, and public policy in real estate and mortgage markets.

R E X64. Real Estate Development.
Provides an interdisciplinary experience with the entire development process including finance, branding, architecture, planning, entitlements, engineering, among others; and an opportunity to work with a multi-disciplinary team on real-world commercial real estate projects. Includes various guest speakers from the development industry that represent different aspects and phases of the development process. Additionally, time is provided for project work sessions with teammates, faculty and professional mentors which will include progress reports, workshops and group presentations. Culminates in a presentation of each group's work, including branding, business plan and pro-forma along with site diagrams.

R E X66P. Real Estate Practicum.
Apply skills in real estate finance to focus on private equity opportunities conducted in a professional setting with private companies.

R E X67. Real Estate Investment Trust Investing.
Apply skills in real estate finance to study and invest in a publicly traded Real Estate Investment Trust (REIT) portfolio.

R E X72T. Topics in Real Estate.

R E X72T.13. Taxation of Real Estate Investments.
Identify accounting practices in the real estate industry.

R E X76G. Real Estate Investment.
Study of the setting and measurement of property values in real estate markets and an analysis of real estate assets as investments.

R E X78K. Real Estate Finance and Syndication.
An examination of debt and equity financing of residential and commercial properties; mortgage markets and instruments; lender and investor decisions in real estate financing.

Graduate Courses

R E X86. Topics in Seminar in Real Estate Analysis.

R E X86.1. Real Estate Markets.
Overview of real estate principles, markets, and valuation. Introduction to the major types of commercial property, methods of analyzing real estate markets and investments, urban economics, and real estate institutions.

R E X86.2. Real Estate Investment Decisions.
In-depth coverage of approaches used to analyze real estate investments, including debt and equity.

R E X86.3. Real Estate Analysis.

R E X86.7. Real Estate Decision Making.

R E X88. Seminar in Real Estate Finance.
Current aspects of real estate finance as they affect lenders, borrowers, and investors. Institutional changes affecting trends in real estate finance are presented within a decision-making framework. Special emphasis on real estate capital markets, public and private debt, and equity.

R E X89. Real Estate Practicum.
Project-based study with a focus on the application of real estate and finance principles to practical problems.

Professional Courses

R M - Risk Management

Risk Management: R M

Lower-Division Courses

R M X19S. Topics in Risk Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

R M X29S. Topics in Risk Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

R M X40S. Topics in Risk Management.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.

R M X57E. Introduction to Risk Management.
Principles of risk management for individuals and organizations, financial aspects of insurance companies and markets, industry structure, managerial aspects of underwriting and pricing, and public policy issues.

R M X69K. Managing Employee Risks and Benefits.
Risk management issues involving financial consequences of life and health contingencies, health care finance, company management, pension planning, economics of industry structure, and public policy issues.

R M X76. Quantitative Methods in Finance.
Explores quantitative methods and techniques in optimization and simulation, and their use in financial decision making. Discusses theory and application in portfolio selection, options and other derivative

pricing, index tracking, risk measures, volatility estimating. Specific topics will include linear, quadratic, nonlinear, and integer programming; dynamic programming; robust optimization; Monte Carlo methods and variance reduction techniques. Emphasis will be placed on problem solving with advanced computational programming languages.

R M X77. Property-Liability Risk Management and Planning.
Analysis of property-liability risks of businesses, risk management tools, risk financing, and insurance contracts for financial planning purposes; investment and underwriting operations, market structures, and insurance regulation.

R M X79. Independent Research in Risk Management.

Graduate Courses

R M X91. Topics in Decision Analysis.

R M X91.1. Decision Analysis.
Descriptive and normative principles of decision making.

R M X91.2. Managing Decisions under Risk.
State-of-the-art methods and tools to analyze risky decisions and design optimal strategies. Practical knowledge and practice are emphasized.

R M X91.3. Research Issues in Decision Making.
Talks by students and faculty members with research interests in decision making, and group discussion of the talks and of students' decision-related research.

R M X91.4. Behavioral Decision Theory.
The psychology of decision making: how and why our judgments are more fallible than we ordinarily suppose, and the extent to which predictive judgment can be improved through use of normative strategies that tell us how we should make judgments and decisions.

R M X92. Topics in Quantitative Finance.

R M X92.1. Modeling and Optimization in Finance.

R M X92.2. Statistics for Finance.

R M X92.3. Financial Engineering.

R M X92.4. Mathematical Finance.

R M X92.5. Computational Finance.

R M X94. Topics in Business Analytics.
Selected topics in business analytics.

R M X94.1. Optimization I.

R M X94.2. Optimization II.

R M X95. Topics in Seminar: Risk Management.

R M X95.1. Corporate Risk Management.
Analysis of risk management and security needs of businesses and individuals; related insurance coverages and other tools available to deal with risk.

R M X95.2. Financial and Economic Aspects of Risk Management.
Analysis of risk management techniques and insurance company operations. Similarities between insurance pricing techniques and risk management methodology.

R M X95.3. Risk Management and Finance.
Examination of theories underlying risk management techniques for business and insurance mechanisms; theoretical analysis of problems and practices in risk management.

R M X95.5. Managing Environmental Risk.

R M X95.6. Risk Analysis and Management.

R M X95.7. Managing International Risk.
The global aspects of risk management; basic risk and crisis management principles pertinent to multinational firms; financially, legally, and culturally multinational marketplaces such as reinsurance markets, captive offshore insurance.

R M X95.8. Managing Employee Risks and Benefits.
Corporate planning and public policy issues associated with employee benefits.

Professional Courses

R S - Religious Studies

Religious Studies: R S

Lower-Division Courses

R S X02. History of the Religions of Asia.
Eastern religions: an introduction to the basic forms and the historical development of the religious traditions of India, China, and Japan.

R S X04. Judaism, Christianity, and Islam: An Introduction.
Examines the intertwined historical developments of the religions of Judaism, Christianity, and Islam, and explores the principal beliefs and practices of Jews, Christians, and Muslims.

R S X04G. Jews, Pagans, and Christians.
Investigate, using a range of primary and secondary readings, how religious identity was imagined and expressed in the 4th-6th centuries CE. Examine the complex interactions of, in particular, Jews, Christians, and Pagans.

R S X05. Introduction to the Philosophy of Religion.
A critical examination of various conceptions of God and of the relationship of the human and the divine.

R S X06C. Comparative Religious Ethics.

R S X06D. The Roots of Religious Toleration.
Examines how freedom of conscience and religion crystallized in western and central Europe, both as a pragmatic practice and as a matter of principle.

R S X06E. Ethics of Space Exploration.
Examine cultural and ethical questions related to the exploration of space and the emerging field of astrobiology.

R S X07. Introduction to Interreligious Dynamics.
Introduction to the diverse dynamics of interreligious encounters, from armed conflicts to interreligious dialogue.

R S X07F. Gods and Goddesses of India.
Explore a variety of gods and goddesses who have dominated the sacred landscapes of India and beyond, especially North America, from the past until now. Examine various issues relating to patriarchy, power, gender, sexuality, social hierarchy, and devotion.

R S X09C. Medieval Material Culture.
Explore the history of medieval Europe primarily through the lens of material culture.

R S X10. Introduction to the Study of Religion.
Introduction to scholarly methods in the study of religion.

R S X10R. Introduction to Middle East Religions.
Introduction to the religious landscape of the Middle East including the various expressions of Eastern Christianity, Islam, and Judaism as well as Zoroastrianism.

R S X10S. Introduction to Yoruba Religions.
Introduction to the cosmological world of the Yoruba of southwestern Nigeria, covering history, societal organization, myths, legends, customs, and cultural traditions.

R S X11. Topics in Religious Studies.

R S X11E. Religion and the Environment.
Explore the relationship between religions and the environment from multidisciplinary perspectives.

R S X11F. Ethical Food Systems.
Examine the environmental impact of industrial agriculture from the ethical perspectives of religious and secular traditions that promote sustainable and equitable food production.

R S X12C. Introduction to Buddhism.
A structural and historical overview of Buddhism through the examination of various schools, doctrines, biographical narratives, and contemporary ethical issues.

R S X12E. Yoga Past and Present.
Survey yogic practices in South Asian civilization and trace the development of yogic thought and embodied practices in Hindu,

Buddhist, and tantric traditions from early history to the modern-day's social and legal complexities and controversies.

R S X13C. Introduction to the Old Testament.
Introduction to the many interpretations of the Hebrew Bible (the Old Testament) and its meaning in the context of its historical and cultural setting in the ancient Near East.

R S X13D. Introduction to Jewish Studies.

R S X13E. Introduction to Jewish Latin America.
Historical and cultural analysis of how Jews constructed lives and communities in predominantly Hispanic, Catholic countries of Latin America.

R S X13M. Jewish Civilization: Beginnings to 1492.
Introduction to the history, culture, and religion of the Jewish people from around 1000 BC to the end of the medieval period. Subjects may include ancient Israel, late Second Temple sectarianism, the rise of Christianity, rabbinic Judaism, medieval Jewish philosophy, Jewish mysticism, and Hebrew poetry.

R S X13N. Jewish Civilization: 1492 to the Present.
Subjects may include trends toward secularization, the emancipation of European Jewry, the emergence of American Jewry, the Holocaust, the establishment of the State of Israel, and the Arab-Israeli conflict.

R S X14K. Introduction to the Middle East: Religious, Cultural, and Historical Foundations.
A survey of the history and civilization of the Middle East from the sixth to the fourteenth century.

R S X15C. The Bible and Its Interpreters.
Seeks to develop a wide-ranging familiarity with the Jewish and Christian Bibles and with the dominant modes of ancient, medieval, and early modern biblical interpretation. Readings include an extensive range of primary sources, including both the Scriptures themselves and some of their most influential exegetes.

R S X15J. The Conversion of Pagan Europe.
Examine the familiar and unfamiliar fragments of what remains from pre-Christian European culture--the limited written records, the artifacts, and the folklore--as well as the more plentiful anti-pagan writings of early Christian missionaries. Test many of the popular claims about how Europe's pre-Christian inhabitants lived, what they believed, and how Christianization impacted their lives against the limits of what we can actually know, using the tools from the study of history, cultural studies, and religious studies.

R S X15K. Russian Icons and Propaganda.

R S X15M. Luther's World.

R S X15N. Introduction to the New Testament.
Examines representative examples of the texts found in the Christian New Testament and selected noncanonical writings. Focuses on historical setting and systematic methods of interpretation.

R S X15O. The Faust Legend: From the Magus to Today.
Examine a broad selection of the (re)tellings of the Faust legend, i.e., the "bargain with the Devil," to reveal how this particular narrative forms a pillar of the cultural heritage of the European Christendom.

R S X16C. History of Religion in the United States.
Explores instances of religious dominance and religious diversity in United States history. Moving from the pre-colonial period to the present, it examines the changing circumstances of several religious communities, including American Indians and Puritans, Protestant evangelicals, Mormons, Roman Catholics, Jews, Muslims, and Hindus.

R S X16E. American Jews: The Yiddish Experience.
Focuses on over a century of Yiddish-based contributions to American literature, music, and film, including works by Isaac Bashevis Singer, Michael Chabon, Woody Allen, and the Marx Brothers.

R S X16L. Introduction to Religions of Latin America.
Examine a survey of religious practice across Latin America and the Caribbean.

R S X16M. Early Mesoamerican Religions.
Introduction to the study of indigenous religions in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, from approximately 250 BC - AD 1700. Examine the role of religion and ritual in daily life, as well as the lines of evidence available today for understanding them.

R S X17N. Introduction to Modern North Africa.
Introduction to the major themes of North African history from the sixteenth century to the present.

R S X18. The Rise of Christianity.
Introduction to the origins and development of Christianity.

R S X19. Introduction to Islam.
The beliefs, theology, history, and main social and legal institutions of Islam, including the concept of God and society, the role of women, and Islamic government and movements.

R S X19S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

R S X29S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated program.

Upper-Division Courses

R S X19S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

R S X20. Introduction to Research Methods in the Study of Religion.
Introduction to research methods in the study of religion, including, historical, social scientific, cultural studies, and digital humanities approaches.

R S X20J. The Bhagavad Gita: Interpretation and Ethics.
Explore one of the most influential books in Indian and global contexts, the Bhagavad Gita, through interpretations, commentaries, and scholarly materials. Navigate ethical dilemmas in the Bhagavad Gita and real-life situations.

R S X21. History of Hindu Religious Traditions.
History of major doctrines, practices, and institutions that shaped the development of Hinduism; how religions adapt to social and cultural change and often provide the catalyst for change.

R S X22. History of Indian Buddhism.
The institutional, social, economic, and doctrinal history of Buddhism in India.

R S X25. Prophet of Islam: His Life and Times.
A detailed study of the prophet Muhammad's life and message, and of the means by which his life was recorded and popularized.

R S X25C. Russia's Soul: Spiritual Traditions.
Explore complex history of Orthodox Christianity, Judaism, Islam, and Buddhism in Russia. Examine important worship sites, including monasteries and pilgrimage destinations. Have discussions with Russian scholars of religion and practitioners of different faiths.

R S X25G. The Qur'an.
Explore the history, language, style, and themes of the Qur'an.
R S X26. History of Religion in America since 1800.
Introduction to the history of religion in the United States of America from the nineteenth century to the present. Focuses on how diverse peoples imagined and transformed the landscape, interacted with one another at different sites, and moved within and across national borders.
R S X29S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated program.
R S X30G. Food and Religion in Asia.
Use the lens of food to approach study of religious communities, values, and identity formation in Asia's past and present, covering South Asia, China, Japan, Taiwan, South Korea, and Southeast Asia. Explore questions involving what is eaten and what is not, taboo, hunger, anomaly, gender, food security, and recent ethical problems regarding bio-engineered foods (GMOs).
R S X35. Jesus in History and Tradition.
Critical issues, scholarly debates, and historical methods in studying the development of the Christian tradition regarding the figure of Jesus.
R S X35C. Political Ideologies and Manifestos.
Survey major political ideologies like socialism, capitalism, and fascism; as well as the more recent so-called "Fourth Political Theory of Russian ideologue Aleksandr Dugin, (variable) popular ideologies, and internet manifestos. Explore each ideology through original texts and utopian/dystopian representations in popular culture (e.g., literature, film, music, graphic art, architecture, design).
R S X35D. Queering Black Religions.
Explore the ways Africana religion practitioners disrupt and reframe dominant western discourses of gender and sexuality. Examine concepts of temporality, spirit manifestation, subjectivity, corporeality, and Africana religious epistemologies.
R S X37. Religion and Society.
The growth and decline of religious groups and traditions; "cults" and new religions; comparative sociology of religion; the United States religious landscape; religion and individual health and well-being; spirituality and other aspects of social life.
R S X40C. Shrines and Sanctuaries.
Survey Greek and Roman religious architecture and sacred space from the Bronze Age to the Hellenistic and Roman Empires.
R S X41C. Gandhi and Gandhism.
Explore Gandhi's life, work, philosophy, and influence, as well as his historical and cultural context.
R S X41E. The Taj Mahal and the Diversity of Indian Art.
Examination of the period when Islamic dynasties controlled much of the subcontinent and how a unique mix of forms and cultural practices shaped the development of monuments such as the Taj Mahal.
R S X41F. Jainism: Religion of Non-Violence.
Survey of the history, doctrines, institutions, and practices of Jainism from its origins to the present.
R S X41I. Formation of Indian Art.
Examine the artistic traditions of South Asia up to the fifth century C.E., with an emphasis on social and religious factors shaping its development.
R S X41K. Karma: Ethical Theories of India.
R S X41M. Gender, Sexuality, and the Family in Indian Religions and Cultures.
A comprehensive historical overview of gender issues as they are represented in the textual traditions of South Asia.
R S X41P. Indian Poetry and Religions.
Explores the intersections of religion and poetry in the history of Indian literature as expressed in multiple settings and variations including hymns, chants, bhajans, poetic narratives, and new poetic conventions that deal with caste and gender identities.
R S X41T. Buddhist Art.
Explores the development of Buddhist art in South Asia, the land of its origin as well as its spread elsewhere. Focus on the question of "what is" Buddhist art.
R S X41U. Devotional Literature of India.
Discuss the songs of major saints. Examine how holy men and women expressed their religiosity through the medium of songs and poetry over the centuries and consider the role these songs had in shaping the religious communities of India. All works will be studied in translation.
R S X41V. Indian Philosophies.
Investigate the theories and arguments of major Indian philosophers, considering both their historical positioning and contemporary relevance.
R S X42C. Major Islamic Texts.
Introduction to key religious, philosophical, and political ideas from part of the Islamicate world through sustained readings of core texts.
R S X42F. Buddhist Thought and Practice.
Explore important themes in Buddhist thought, various ways in which Buddhists practice their religion, and the relationships between religious concepts and practices.
R S X43D. Muslim Travelers and Traders.
Introduction to modern Middle Eastern and Islamic history in the broader context of globalization, with a primary focus on the nineteenth century to the present.
R S X44. The Age of Reformation.
Examines late medieval religion, the rise of Protestant movements, and the Catholic response in their cultural, political, and social contexts.
R S X45. Islamic Spain and North Africa to 1492.
An introduction to the impact of Islam on Spain and North Africa, with emphasis on social, economic, and cultural development.
R S X46C. Religion and Visual Culture in the United States.
Focuses on artifacts or "visual culture," and considers how religion mediates artifacts and how artifacts mediate religion.
R S X46D. Native American Religions.
Examination of religious developments in Native American communities from the precolonial period through the present day. Focus on the changing forms of ritual practice and the relationship between religion and community life.
R S X46E. Religion and Film.
Survey of representations of religious beliefs, practices, persons, and institutions in popular film. Examination of film as a vehicle to reflect how a shared religious imagination shaped the way Americans understand themselves.
R S X46F. United States Catholic History.
Examine how Catholicism and national identity work for Catholics in the United States, with an emphasis on Catholic women and Latino/as.
R S X46G. Religion in the American West.
R S X46I. Unbelief in America.
Examine the history of unbelief and the role that it has played in US history.
R S X46J. Evangelical Christianity.
An introduction to the intellectual and social sources of evangelical Protestant traditions in the United States, their varieties of belief and practice, and their role in the wider Christian community and American society.
R S X46K. The Black Church in African American Politics.
Explore the political role of the Black church in the African American experience.

R S X46L. Representation of Jews in the American Public Sphere.
Examines how Jews have been represented and constituted in American public culture as a race, religion, and/or nation through distinct institutions and display practices.

R S X46M. Music and Religious Identities in the US.
Examine religious music in Christianity and Judaism in relation to communities in religious context of Europe and the United States.

R S X46N. American Jewish Material Culture.
Examines the interplay between material culture and Jewish identity and thought in contemporary America.

R S X46O. Religion and Food.
Examine the material relationships between religion and food, by comparing the ritual functions of food in religious traditions and the collective constructions of religious identities in traditional foodways.

R S X46P. Religion in American Political Thought.
Explore religion and politics in the United States through reading of mostly primary sources addressing religious arguments taking positions on historical and contemporary issues.

R S X46R. Religion and Social Justice in United States.

R S X46S. Debating the Bible in the Twenty-First Century.
Examine the ways in which individuals, primarily in the United States, have regarded the Bible as relevant or irrelevant to contemporary life. Discuss contemporary controversial issues in which the Bible has played a role and how these relate to earlier controversies, such as the position of the Bible on slavery.

R S X46U. The History of Islam in the United States.
A brief introduction to Islam. Defines the role of Islam and views of Muslims in the early history of the United States, and introduces students to major issues concerning contemporary American Muslims.

R S X46V. African American Religions.
Survey the history and variety of religion as practiced by Americans of African descent. Examine the social construction of African religion, black religion, and the black church, within the cultural context of the United States.

R S X52D. Japanese Religion and Western Imagination.
Examines Japanese religious traditions, with a focus on Zen, through the perspective of people living in non-Japanese societies since the end of World War II. Explores different ways in which non-Japanese have imagined Japanese religious and ethical ideas and both explained Japanese behavior and adopted ideas about Japan into their writings about philosophy and life.

R S X52E. Confucianism.
Explore the philosophical and historical context of Confucianism, from its origins in ancient China through the early empire and beyond.

R S X52F. Religion and Family in Japanese Society.
Explores the structures of family, kinship, and religion in Japan since 1868 and their roles in the creation and expression of national and individual identities.

R S X52G. Shamanism and the Primitive.

R S X52R. Ritual and Religion in Korea.
Examine major religious traditions of Korea; focus on the recent history and contemporary practice, and the relation between religion and politics during Korea's colonial (1910-1945) and postcolonial eras.

R S X52S. Japanese Concepts of Body and Self.
Exploration of anthropological literature describing Japanese conceptions of self and body, and analysis of the intersection of these conceptions of self with Japanese ideas about religion, morality, aging, and medicine.

R S X53C. Angels, Demons, and Magic in Early Christianity.
Examine angelology, demonology and magic influence on the lives of early Christians and Christianity.

R S X53D. The Dead Sea Scrolls.

R S X53E. Beyond the New Testament.
Study of early Christian writings that were not included in the Christian Bible. Examines issues such as the effect of narrative, religion and violence, gendered expectations for women and men, the uses of fantasy literature, and religious authority. Emphasis on systematic methods for disciplined interpretation.

R S X53F. Interpretation of Jesus' Death and Resurrection.
Examine the narratives of Jesus' death and resurrection and their subsequent interpretation over the last two thousand years. Analyze historical Christian and Islamic texts, contemporary debates and cultural context.

R S X53G. Abraham and Abrahamic Religions.
Examines the figure of Abraham as portrayed in the Bible and the reception of that portrayal in Judaism, Christianity, and Islam.

R S X53I. Ancient Mediterranean Religion and Astrology.
Explore the role of astrology in ancient Mediterranean religious life.

R S X53J. Revelation and Apocalyptic Literature.
Examine the Book of Revelation in the context of early Christian and Jewish literature. Study other apocalyptic texts, methods of textual analysis, and the ongoing effects of Revelation in modern American culture.

R S X53K. Law and Justice in the Bible.
Examine the legal traditions of the Torah (Pentateuch) and what they reveal about the practice of law and justice in ancient Israel and the wider biblical world.

R S X53L. The Sacred and the Secular in Contemporary Jewish Literature.

R S X53M. Debating Genesis.

R S X53N. Biblical Prophecy.
An introduction to the diversity of prophetic literature in the Old Testament, its historical development, social context, and Near Eastern parallels.

R S X53P. Paul and His Social World.
Examine the life and letters of the first-century Jewish missionary Paul by interpreting his writings within the context of diaspora Judaism and the broader Greco-Roman world. Explore his legacy within the context of early church history.

R S X53R. The Five Books of Moses.
Study the socio-historical circumstances that gave shape to the first five books of the Bible: Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. Examine how these five books achieved the status of sacred literature.

R S X53U. Slavery and the New Testament.
Examine slavery in the New Testament.

R S X53V. Archaeology of Jesus's World.
Explore archaeological methods in examining texts and artifacts from first century CE.

R S X54D. The Bible and History.
The critical uses of biblical and extrabiblical data in the reconstruction of the history of the biblical period.

R S X54J. History of Jewish Thought.
Examine major thinkers and movements in both Jewish philosophy and Jewish mysticism since the Middle Ages, with a focus on the importance of modern Jewish thought in the twentieth and twenty-first centuries.

R S X55. The Bible as Literature.
In-depth literary study of the Bible, with emphasis on the formal features of narrative, hymn, prophecy, apocalypse, gospel, and epistle.

R S X55K. The Bible in British and American Literature.
The reading of biblical masterpieces as literature; consideration of different versions of the Bible and their influence on British and American literature.

R S X56C. Italian Renaissance, 1350-1550.
Survey of political, socioeconomic, religious, and intellectual trends during the Italian Renaissance.

R S X56D. Satan and the Idea of Evil.
Explore the history and breadth of Satan's role as a character (or background presence) in literature while developing close-reading techniques for literary analysis that can be applied across diverse eras, forms, and genres.

R S X56F. Twelfth-Century Renaissance: 1050-1200.
An examination of social, cultural, and intellectual developments in eleventh- and twelfth-century Europe.

R S X56J. Northern Renaissance: Religion, Magic, and Humanism.
Explore Northern Europe's transition from medieval to Early Modern in and through the northern Renaissance. Examine humanist culture and its many tensions with the Church, technological breakthroughs and their social and economic consequences, the connections between the discovery of new lands and the recovery of ancient learning, and the formation of the early modern state.

R S X56M. Christian Quest for Meaning.
Study classic Christian texts throughout history.

R S X56P. People of the Midnight Sun - Sami Culture and Civilization.
Examine the indigenous people of Scandinavia, the Sami, including their history, culture, and self-expression. Explore issues of indigeneity, decolonization, and religious repression.

R S X56R. Ritual and Belief in Ancient Greece.
Investigate the practices, premises, and cultural contexts of ancient Greek religion through direct study of ancient sources informed by modern critical approaches.

R S X57C. Machiavelli: Politics and Culture.
Through Niccolo Machiavelli's chief writings, consider the local, regional, Mediterranean, European, and global aspects of his work.

R S X57D. Heresy and the Inquisition.

R S X57E. Jews of Eastern Europe.
Explores the history and culture of Jews in Eastern Europe.

R S X57F. Heretics and Freedom Fighters, 1350-1650.
Explores the theologies, politics, and personal identities that emerged and passed away in this era.

R S X57G. Geography of Religion in Eastern Europe and Russia.
A comprehensive overview of major religious culture regions in the former Eastern bloc countries.

R S X57I. Byzantine Art.
Examination of the medieval art and architecture of the eastern Roman empire, including related traditions (Coptic, Armenian, Georgian, Crusader, Norman).

R S X57J. Northern Renaissance Art, 1350-1500.
Northern European art from the International Style to van Eyck and Hieronymus Bosch.

R S X57K. Northern Renaissance Art, 1500-1600.
Art and cultural development in the sixteenth century; artists include Duerer, Gruenewald, Holbein, and Brueghel.

R S X57L. The Spanish Inquisition.

R S X57M. Spinoza and Modernity.
Introduction to the core of Spinoza's writings and the diverse reactions they have elicited. Examines Spinoza's refusal of mind-body dualism, as well as a transcendent god or ideal as a way of understanding Spinoza's concepts and ideas.

R S X57N. Northern Gods, Northern Faiths: The Conversion of Scandinavians, Finns, Northern Slavs and Shamans.
An introduction to the basic source texts for several pre-Christian belief systems evolving in geographic proximity and their influence on one another including pre-Christian Slavic; pre-Christian Scandinavian; pre-Christian Sami and Finnish; and ancient and modern Siberian shamanism.

R S X57O. The Church and the Jews.
Examination of the complex relationship between the Western Church and Jews over two millenia.

R S X57P. Jewish Folklore.

R S X57Q. Gothic Cathedral: Amiens.
An examination of the cathedral at Amiens, its meaning, structure, political and financial contexts, and sculptural programs, as well as its influence on other buildings in France and Germany.

R S X57R. The Age of Rembrandt and Rubens: Northern Baroque Art.
Northern European art in the seventeenth century, stressing the Netherlands and Flanders.

R S X57S. The Sacred and the Secular in Modern European Thought.
Introduces key themes and methodologies of intellectual history and social theory by exploring the dueling approaches to secularization and sacralization in modern European thought.

R S X57T. Introduction to Germanic Religion and Myth.
Survey of the sources and main features of Germanic religion and of the transition from paganism to Christianity in northern Europe and the Germanic territories of western Europe. Subjects include cosmogonic myths; the origin of man and of society; the concept of the soul; gods and goddesses and their mythology; and the organization of worship.

R S X57U. Medieval Women Mystics.
The life and writings of Saint Birgitta of Sweden, fourteenth-century visionary, religious reformer, and pilgrim, examined and compared with her predecessor Hildegard of Bingen (Germany), her successor Margery Kempe (England), as well as Margery's mentor, Julian of Norwich. Social and historical contexts for all four of these women mystics will be explored in depth.

R S X57V. Holocaust Aftereffects.
Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.

R S X57W. Russian Orthodox Religion and Culture.
Examine the role and force of the Orthodox Church in Russian history, from the Christianization of the pagan Slavs in the 10th century, through the Russian Revolution into the Soviet era, and up to the present, while considering the prescriptive tenets of the Orthodox faith (religion) alongside descriptive experiences of life within and under Russian Orthodoxy (religiosity).

R S X58C. Islam and Politics.
An introduction to Islamic political thought.

R S X58D. Muslim Women in Politics.

R S X58F. French Empire: The West and Islam.
The development of regions within the Mediterranean, variously called the West and East or Europe and Islam, with an emphasis on the role of modern France and France's Mediterranean empire.

R S X58G. Gender Politics in the Islamic World.
Study of the Islamic world and major sociological concepts such as gender, social organizations, culture, and politics. Examines how culture is mediated by politics, resulting in diverse interpretations of Islam and in different policies with respect to women's rights.

R S X58I. Sufism: Islamic Thought and Spirituality.
Explore Sufism and other Islamic mystical traditions that color cultural milieus spanning four continents and fourteen centuries. Focus on the historical developments in the Islamic theosophical tradition, as well as the relationship between Sufism and poetics, colonialism, and post-colonial resistance movements.

R S X58J. Sex and Sexuality in the Muslim World.

R S X58K. Islamic Law.
Designed to give students a foundation in the substantive teachings of the shariah, which comprises not only what we normally think of as law, but also ethics and etiquette.

R S X58L. Rule of Law in the Middle East.

R S X58O. Origins of Monotheism.

R S X58P. History of the Pilgrimage to Mecca, Hajj.

Survey of the Hajj, Islam's major pilgrimage to Mecca and the nearby Holy Places. It will examine the Islamic pilgrimage from its beginnings in the seventh century C.E. through today.

R S X58Q. Supervised Research.

R S X58R. Islamic Ethics.

R S X58S. Saints and Shrines in Islam.

R S X58U. Islamic Theology.

R S X58V. Veiling in the Muslim World.

R S X58W. Gender and Art in the Muslim World.

R S X59C. Graffiti and Poster Art in the Islamic World.

R S X59D. Islam in the Early Modern World: Religion and Culture.

Examine a history of the religious and cultural development across the Islamic world between the thirteenth and eighteenth centuries, stemming from the rise of the Mongols and the end of the caliphate. Explore the early modern Muslim empires of the Ottomans, Safavids, and the Mughals.

R S X59E. Shia Islam.

Examine how the first century of Islamic history inaugurated debates concerning authority, piety, and justice and how these debates have continued to the present. Explore the social forces and ideologies that shaped Shiism.

R S X59J. Multiculturalism in Jordan.

Explore how past, present, local, and regional events inform current Jordanian culture and identity.

R S X59K. The Shock of Modernity in the Middle East.

Explore cross cultural contacts between the East and the West during the modern period. Analyze Islamic civilization in the Middle East of the modern era by addressing the development of religion, law, government, and morality during and after the colonial period.

R S X59L. Myths and Legends of the Ancient Near East.

Explore myths and legends contained in a variety of ancient sources, including texts from Israel, Greece, Egypt, and Mesopotamia.

R S X59M. Arts of Islam, 650-1500.

Early Islamic art and architecture, with an emphasis on interconnections between the Islamic world and Europe. Examines unique ways Islamic visual culture developed out of the classical and late antique world. Artworks will be contextualized within early Islamic history, religion, and culture.

R S X59N. Arts of Islam 1500-Present.

Later Islamic art and architecture, beginning with the world empires of the Ottomans, Safavids, and Mughals, and extending into the modern and contemporary periods. Subjects include the social and historical context of Islamic art in these periods and its unique visual culture.

R S X59O. Minorities in the Middle East.

Explore the diversity of ethnic and religious minorities found in the Middle East through their history, languages, beliefs, and cultures.

R S X59P. Religions in the Ottoman Empire.

Examine Jewish, Christian, and Muslim communities in the Ottoman Empire (fourteenth to twentieth centuries), with a focus on dynamics both within and between the communities.

R S X59Q. Art and Architecture of Late Antiquity.

Examination of early Christian and late Roman art and architecture, including related traditions, such as Jewish, Coptic, Armenian, Georgian, Persian,and Syriac.

R S X59R. Material Cultures of Coexistence.

Dicuss Muslims living in regions where non-Islamic socio-political systems and infrastructures predominate, exploring the material cultures produced in places where Islam did not originate as, or is not, the dominant authority.

R S X60C. African Religious Culture and Creativity.

Examine religion as an aesthetic practice and explore the inventiveness of the imagination that underlines African religious practices. Study religious practices spanning from the pre-colonial and post-colonial eras to the contemporary period particularly in urban centers.

R S X61. Topics in Religious Studies.

R S X62. Independent Research in Religious Studies.

Faculty-directed research.

R S X65D. Hermits, Monks, and Saints in Early Christianity.

Examine individual and communal forms of Christian monasticism from the first through fifth centuries CE. Explore the social, economic and religious factors that may have made a life of self-denial attractive to many early Christians and the role of authority in these movements.

R S X65G. Death and the Afterlife in Graeco-Roman Antiquity.

Explore the afterlife from Near Eastern myths and Homer through Greek and Roman antiquity to the early Church Fathers.

R S X65J. The Book of Job.

R S X65K. Contemporary Jerusalem.

Explore what life is like in today's contested, rapidly growing, and increasingly diverse Jerusalem.

R S X66C. The Bible in the Colonial Americas.

Varied perspectives on the central role played by the Old Testament in the construction of colonial cultures in the Americas.

R S X66D. Religions of the Caribbean.

Examine the histories and politics of religious practices in the Greater Caribbean, encompassing the islands and Central American coasts as well as the continental diasporas, from Vodou and Rastafari to popular Hinduism.

R S X66E. Jewish Cuba.

R S X66M. Colonial Encounters in Mesoamerica.

Study European-indigenous encounters in Mesoamerica, a geographic and cultural area spanning north-central Mexico through western Honduras, between approximately 1450-1750. Examine strategies of contact, accommodation, and resistance that indigenous communities and European colonizers used to communicate with each other and negotiate the conduct of daily life in colonial society.

R S X66N. African Religion in the New World.

Explore the contributions of scholars and artists who engage African diaspora religions in their work through multiple conceptual approaches.

R S X68C. When Christ was King.

The history of Catholicism in twentieth-century Mexico, often seen as Latin America's most "Catholic" nation.

R S X68D. Church and State in Latin America.

History of Church-state relations and religious politics in modern Latin America, with emphasis on the nineteenth to early twentieth-century periods.

R S X68F. Religion, Conquest, and Conversion in Colonial Latin America.

Focuses on the histories of the Catholic Church and religious devotion in colonial Latin America between 1521 and 1821.

R S X73C. Religious Ethics and Human Rights.

Examine the grounds for human rights, and the relations between rights and religions.

R S X73D. The History of Christmas.

A historical and cross-cultural examination of the evolution of the modern Christmas holiday, beginning with the birth stories of Jesus in the New Testament and concluding with the supposed "War on Christmas" in the 21st Century America.

R S X73E. Anthropology Of Religion.

Examine a genealogy of the anthropology of religion around the globe from the nineteenth century to the present.

R S X73G. Goddesses in World Religions and Cultures.
Historical and cross-cultural overview of the relationship between feminine and religious cultural expressions through comparative examinations and analyses of various goddess figures in world religions.

R S X73I. Race, Gender, Sex, and Religion.
Use an intersectional feminist framework to examine the construction and maintenance of normative categories of race, gender, sex, and sexuality within United States religious discourse.

R S X73J. Creation and Evolution: Human Origins in Scientific and Religious Discourses.
Examines evolutionary theory, intelligent design, and creationism, and how they interact.

R S X73K. Extraterrestrial Intelligence: Culture, Religion, and Imagination.
Focusing primarily on the 20th and 21st Centuries, explores the search for extraterrestrial intelligence (SETI) and considers how these ideas have intersected with other aspects of society, particularly religion, including recent arguments that SETI itself has developed into a religion. Examines meanings and motivations behind issues such as Percival Lowell's quest to prove the existence of canals on Mars and the development of Scientology.

R S X73L. Science, Magic, and Religion.
Historical and cross-cultural overview of the constructed concepts of magic, science, and religion through comparative examinations of cultural contexts from the Islamic world, western Europe, the Caribbean, the U.S., and Mozambique.

R S X73M. Biomedicine, Ethics, and Culture.
Examines ethical questions such as the allocation of medical resources, stem cell research and cloning, organ transplantation, abortion, human experimentation, prolonging life and the right to die, suicide, euthanasia, and diagnosis and treatment of illnesses, explored from a global perspective.

R S X73N. Religions in Contact.
Critically examine the theories (religious othering, conversion, reinterpretation, appropriation, etc.) of how one religion responds to contact with another. Explore the ways in which religious actors grapple with religious plurality, draw or ignore boundaries, and form religious identities.

R S X73S. Sport, Religion, and Society.
Explore sport as it relates to ritual and religious practice and examine the meaning and nature of sport in cross-cultural perspectives.

R S X73T. Talk, Text, and God.
Introduction to the anthropological study of Christianity, particularly in colonial and post-colonial settings.

R S X75S. Topics in Advanced Seminars in Religious Studies.
Discussion and research-based study of topics in religious studies. Includes theoretical approaches to the study of religion.

R S X75S.1. What is Religion?.
Examines classic theories about religion from the last 150 years of academic study: psychological, sociological, economic, phenomenological, and anthropological.

R S X75S.11. Space, Time, and Religion.
Examine religions through the concepts of space and time.

R S X75S.12. Death and the Afterlife in Ancient China.
Investigate ancient Chinese beliefs and practices surrounding death and the afterlife from the Neolithic era to the arrival of Buddhism. Explore tombs, burial objects, and funeral rites; philosophical essays and historical accounts; medical practices; religious relics, tokens, and talismans; ghost stories; poetry; and paintings.

R S X75S.2. Comparing Religions.
A discussion of major comparative approaches in the study of religion.

R S X75S.4. Radical Religion: Ascetics and Holy Persons.
Explores asceticism and the concepts, practices, and goals associated with this radical way of life through case studies from various religions. Subjects include theories of the body and of culture, as well as issues of social status, gender, devotion, and violence.

R S X75S.5. Religion, the Supernatural, and the Paranormal.
Examination of extraordinary events, such as miracles, exorcisms, ghosts, psychic abilities, UFOs, and other related phenomena. Discussion of the similarities and dissimilarities between religious and non-religious contexts for such happenings, as well as possible explanations for them.

R S X75S.6. Religion in the American South.
Examines the social construction and cultural meaning of southern religion using fictional characterizations, philosophical reflections, historical accounts, and theoretical comparisons.

R S X75S.7. Religions Of No Religion.
Examine religious practices that are not religion and critical analysis of the category of religion and its contested borders.

R S X75S.8. The Crusades.
An exploration of the religious encounters between eastern and western Christians, Christian heretics, Jews, Muslims, and polytheists; political, military, and cultural changes of the high middle ages; and the ways that crusading ideas and symbols have been reused in contemporary politics and popular culture.

R S X75S.9. Religion in the Workplace.
Examine the role of religion in the formation of the workplace in the United States. Survey a range of case studies in order to explore how religion has shaped how Americans understand the relationship between human labor and moral community.

R S X79H. Honors Tutorial Course.
Supervised individual reading for one semester, followed by research and writing to produce a substantial paper on a specific topic in religious studies, to be completed during the second semester.

Graduate Courses

R S X19S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

R S X29S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated program.

R S X80. Topics in Proseminar.
An introduction to the research methodology and ancillary disciplines used in current religious studies.

R S X80R. Topics in Readings in Religious Studies.

R S X81. Conference Course in Religious Studies.

R S X83C. Topics in Comparative Religion.
Advanced treatment of selected problems, topics, or themes concerning comparative approaches to the study of religion.

R S X83C.1. Violence, Sovereignty, and Religion.
Explore the relationships among violence, sovereignty, and religion.

R S X83E. Ethnographic Methods for the Study of Religion.
Explore the use of ethnographic research methods for the study of religion.

R S X83M. Theory and Method in the Study of Religion.
Introduction to the history of the discipline, discussion of classical interpretative works, and examination of current theoretical and methodological developments in the field.

R S X83T. Topics in Theoretical Approaches to the Study of Religion.
Advanced treatment of selected problems, topics, or themes concerning theoretical approaches to the study of religion.

R S X83T.3. Reading Arabic Literature.
Examine the canons of Arabic literature through readings in translation.

R S X84D. Doctoral Seminar in Religious Studies.
Advanced seminar designed to introduce students to the profession of religious studies. Includes development and preparation of a dissertation proposal, placing scholarship within a broader theoretical context,and pedagogical issues in teaching religious studies at the undergraduate college level.

R S X85K. Early Jewish and Christian Literature I.
A survey of major categories of early Jewish and Christian literature by genre in light of comparative historical research.

R S X85L. Early Jewish and Christian Literature II.
A survey of major categories of early Jewish and Christian literature by genre in light of comparative historical research.

R S X86C. Topics in Critical Issues in Christian Origins.
Studies of key scholarly works in and critical approaches to the study of Christian origins in their historical, social, and cultural contexts.

R S X86H. Topics in Critical Issues in the Hebrew Bible.
Advanced studies of critical issues in research on key areas of study in the Hebrew Bible and its environment.

R S X86M. Topics in Critical Issues in Ancient Mediterranean Religions.
Studies of key scholarly works in and critical approaches to the study of ancient Mediterranean religions in their historical, cultural, and archaeological contexts.

R S X86M.1. Religion and Economics in Ancient Mediterranean.
Study the intersections of religion and economics in the ancient Mediterranean through the advanced treatment of primary sources and scholarly approaches.

R S X86M.3. Critical Problems in Second Temple Judaism.
Examine the literature and material culture of Second Temple Judaism (circa 520 BCE to circa 135 CE) in dialogue with recent scholarship on Jews and Judaism in Persian, Hellenistic, and early Roman contexts.

R S X86M.4. Critical Problems in Judaism in Late Antiquity.
Examine the literature and history of Judaism from the destruction of the Second Jewish Temple in 70 CE to the early Middle Ages, with a primary focus on classical Rabbinic Judaism as well as mystical and other writings beyond the canon.

R S X86M.5. Critical Problems in New Testament.
Study foundational and emergent scholarly works and critical approaches in the study of Christian origins and the books of the New Testament in their ancient Jewish and Greco-Roman contexts.

R S X87M. Topics in Seminars in Ancient Mediterranean Religions.
Advanced treatment of selected problems, topics, or themes in the study of the religions of the ancient Mediterranean world.

R S X87M.2. Seeing Gods.
Examine textual and theoretical accounts of the religious phenomenon of epiphany across various belief systems.

R S X87M.3. Art, Gender, and Religion in Late Antiquity.
Examine the gendered experience of religion in Late Antiquity using the evidence of artistic record, with a primary focus on the Mediterranean world.

R S X89R. Topics in Research Seminars on Religion in Europe and the Middle East.

R S X90R. Research and Grant Proposal Writing for Social Sciences and Humanities.
Draft and revise proposals for dissertation research or write-up grants with peer review, learn about research design, methods, data collection, and analysis, as well as strategies for presenting one's project within the genre of grant proposal within the scope of social science and humanities research areas.

R S X90T. Topics in European and Middle Eastern Religion.
Advanced treatment of selected problems, topics, or themes concerning religion in Europe and the Middle East.

R S X90T.1. Islamic Studies: Discipline Intro.

R S X90T.2. Sovereignty in Islam: Theory Practice.
A historical and comparative survey of the concepts and rituals of sovereignty in Muslim societies across the Middle East, Central Asia, and South Asia, with an emphasis on the pre-modern era.

R S X90T.4. The Arabic Humanities.
Explore the traditions formed in pre-modern Islamic humanities.

R S X90T.5. Gender, Islam and Representation in the Modern Middle East.
Examine representations of women across majority Muslim countries and explore how women producers and consumers navigate within the framework of regulations set by religious and governmental bodies.

R S X90T.6. The Qur'an and Its Interpretations.

R S X90T.7. Law and Religion in the Modern Middle East.
Examine the laws that govern religion and religious expression in Middle Eastern national constitutions, with a special focus on both the free exercise and establishment clause of Islam as the religion of the state.

R S X91L. Approaches to the Study of Religion in Latin America.
An introduction to the history of scholarship about religion in Latin America and the Caribbean.

R S X91N. Approaches to the Study of Religion in the United States.
An introduction to the history of scholarship about religion in the United States, including recent research on the Atlantic world, the Pacific world, and the Western Hemisphere.

R S X92T. Topics in Religion in the Americas.
Advanced treatment of selected problems, topics, or themes concerning religion in the Americas.

R S X93F. Topics in the Foundations of Asian Religions.
Introduction to and analysis of primary sources for the study of religion in Asia.

R S X94T. Topics in Religion in Asia.
Advanced treatment of selected problems, topics, or themes concerning religion in Asia.

R S X94T.1. The Body in Indian Medicine and Myth.
Examines issues of embodiment in South Asia in various life stages, including conception, infancy, childhood, adulthood, and death drawn from various historical periods, medical traditions, religious narratives, and sociological and anthropological studies.

R S X94T.2. Intellectual History of Indo-Iranian Islam.

R S X96E. Examination Preparation.
Designed for religious studies doctoral students preparing for qualifying examinations.

R S X96P. Dissertation Prospectus.
Designed for Religious Studies doctoral students preparing a dissertation proposal.

R S X98. Thesis.

R S X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

R S X98T. Supervised Teaching in Religious Studies.
Weekly group meetings with the supervising instructor, individual consultations, and reports.

R S X99W. Dissertation.

Professional Courses

R S X19S. Topics in Religious Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser

in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

R S X29S. Topics in Religious Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Religious Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated program.

RBT - Robotics

Robotics: RBT

Lower-Division Courses

RBT X10. Topics in Robotics.

RBT X19S. Topics in Robotics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Natural Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

RBT X20. Topics in Robotics.

RBT X29S. Topics in Robotics.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Natural Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RBT X50. Gateway to Robotics.

Explore math, hardware, and programming needed for advanced robotics. Discuss hardware; programming; modeling and control; sensing, perception, and control; and AI and machine learning.

Graduate Courses

Professional Courses

REE - Russian, East European, and Eurasian Studies

Russian, East European, and Eurasian Studies: REE

Lower-Division Courses

REE X01. Introduction to Russian, East European, and Eurasian Studies.

An introduction to the former Soviet Union and Eastern Europe through each of the major disciplines represented in the program: language, literature, anthropology, geography, history, government, sociology, and economics.

REE X01L. Introduction to Russian Literature.

Introduction to Russian literature of the modern period, from the late eighteenth century to the present. Explores a variety of genres, from fairy tales to the works of Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Bulgakov, and Pelevin. All reading and instruction is in English.

REE X01M. Introduction to Eastern European Literature.

Introduction to major works by 20th-century Eastern and Central European writers. Explore the history and cultures of the region, including imperial legacies, World Wars, totalitarianism(s), fall of communism, and borderlands.

REE X02. Topics in Russian, East European, and Eurasian Studies.

REE X02.1. The Vampire in Slavic Cultures.

Examines the vampire in the cultures of Russia and Eastern Europe, including manifestations in literature, religion, art, film, and common practices from its origins to present.

REE X02.2. Prague, Magic, and the Struggle for Power.

Examines historical texts from four different magical traditions to find the truth behind the fiction and the historical events that sometimes permitted and sometimes persecuted the religions, philosophies, and sciences that some call magic.

REE X02.3. Introduction To Czech History and Culture: Puppets, Pubs, And Polyglots.

Survey of Czech history and culture from the middle ages to the present day. Subjects include the culture of daily life, literature, history, philosophy, and the arts.

REE X02C. Cuisine and Culture of Central and Eastern Europe.

An in-depth survey of the culinary traditions, history, and practices of Central and Eastern Europe.

REE X02D. Russian Icons and Propaganda.

REE X02E. War in Comics and Photography: Southeast Europe.

Examine different ways to show and tell stories of armed conflict and state-sponsored violence, drawing on a variety of modern media forms - such as comics, cinema, novels, and photography - as well as contemporary digital platforms including social media. Focus on the 1990s conflicts in the former Yugoslavia (Bosnia, Croatia, and Serbia).

REE X02F. Dissent in Twentieth-Century Ukraine.

Survey Ukrainian authors from the 1920s to the present, examining writings from "Executed Renaissance," underground literature, and postmodernism. Focus specifically on works that challenge the paradigm of socialist realism by discussing forbidden subjects (famine, religion, Gulag) or accentuating themes that are not considered "major" (personal life).

REE X02G. The Soviet Hero in Literature and Culture.

Consider Soviet Culture by examining "heroes" from both real life and works of literature, cinema, and folklore. Explore the period from the Russian 19th century throughout the Soviet Era.

REE X02J. The Conversion of Pagan Europe.

Examine the familiar and unfamiliar fragments of what remains from pre-Christian European culture--the limited written records, the artifacts, and the folklore--as well as the more plentiful anti-pagan writings of early Christian missionaries. Test many of the popular claims about how Europe's pre-Christian inhabitants lived, what they believed, and how Christianization impacted their lives against the limits of what we can actually know, using the tools from the study of history, cultural studies, and religious studies.

REE X18Q. Supervised Research.

REE X19S. Topics in Russian, East European, and Eurasian Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

REE X29S. Topics in Russian, East European, and Eurasian Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be

counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

REE X19S. Topics in Russian, East European, and Eurasian Studies.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

REE X25. Topics in Language, Literature, and Culture.

REE X25.10. The Major Works of Dostoevsky.

Explores the dilemmas of homicide, suicide, patricide, and redemption in the novels of Fyodor Dostoevsky.

REE X25.11. Contemporary Russian Cinema.

Uses contemporary Russian film both as a means of exploring the confusion that resulted from the demise of the Soviet Union in 1991 and the search for a new sense of identity in Russia throughout the 1990s and early 2000s.

REE X25.13. Medieval Russian Literature and Culture.

Medieval and early modern Russian literature and culture, including literary texts from Kievan and Muscovite Russia.

REE X25.16. The Major Works of Tolstoy.

Explores Russian writer Lev Nikolaevich Tolstoy, particularly his progression from idealizing family life and the Russian state to renouncing sexual love and national allegiances.

REE X25.18. War and Revolution in Russian Literature and Culture.

Examines Russian narratives of war and revolution as represented in fiction, cinema, and journalism.

REE X25.19. Russian Youth Culture, Late Soviet to Present.

Examines the history and cultural products (films, music, writings) of Russia's youth, and their impact on contemporary society and politics.

REE X25.2. Living a Catastrophe: Chernobyl.

Examine different ways of narrating the Chernobyl disaster and general disasters through history, environmental history, sociology, art, film, fiction, and science.

REE X25.22. Russian Myths and Folktales.

Examination of the Russian folktale, its roots in ancient, pre-Christian Slavic religious tradition, its connections with other forms of folklore such as myth and legend, and its transformation in modern Russian literature. Subjects include the continuing influence of folklore explored through various aspects of Russian culture, including literature, music, ballet, film, and popular culture.

REE X25.24. Rebels and Revolutionaries in Russian History and Literature.

Study of fictional and real rebels and revolutionaries across almost a century of Russian literature.

REE X25.25. Literature and Art of Russian Modernism and Avant-Garde.

Focusing on literary and artistic expressions of Russian modernist and avant-garde esthetics, this course explores various responses to Russian cultural modernity between 1890s, when Russian Symbolists first published their works, and the Party decree of 1932 that established the Writers' Union and outlawed all other literary organizations.

REE X25.29. Bulgakov's Master and Margarita.

Explores the novel in the context of other literary works by Bulgakov and its varied sources in world literature, music, and the visual arts.

REE X25.31. Chechnya: the Politics, Power, and People.

History, culture, religions, and recent upheaval of the region of the northern Caucasus called Chechnya.

REE X25.32. Bad Language: Race, Class, and Gender.

REE X25.33. Russia's Soul: Spiritual Traditions.

Explore complex history of Orthodox Christianity, Judaism, Islam, and Buddhism in Russia. Examine important worship sites, including monasteries and pilgrimage destinations. Have discussions with Russian scholars of religion and practitioners of different faiths.

REE X25.34. Russian Cinema From Potemkin to Putin.

REE X25.35. Russian Fairytales.

REE X25.36. Women and Resistance in Contemporary Eastern Europe.

REE X25.37. Soviet Romance in Film.

Examine the construction of the ideology of love, intimate relations, and gender roles, deemed appropriate for a Soviet citizen, as it is demonstrated in a selection of films.

REE X25.38. Punks and Divas in Southeast Europe.

Examine popular music and its role in political struggle and collective identity formation in the Balkans. Analyze music genres in this region in the context of the historical changes it underwent in the twentieth and twenty-first centuries, including the fall of Communism and -- in the case of former Yugoslavia -- the formation of seven new nation-states through a series of bloody and brutal wars.

REE X25.39. Memory and Place After the Holocaust.

Examine the literature of Eastern European Jewish Holocaust survivors and their artistic successors. Engage novels, short stories, memoirs, essays, and even song lyrics with questions of memory and of place.

REE X25.40. Russian and Mexican Men in Popular Culture.

Study representations of masculinity in products of Mexican and Russian popular culture at the end of the twentieth and the beginning of the twenty-first centuries.

REE X25.41. Russian Orthodox Religion and Culture.

Examine the role and force of the Orthodox Church in Russian history, from the Christianization of the pagan Slavs in the 10th century, through the Russian Revolution into the Soviet era, and up to the present, while considering the prescriptive tenets of the Orthodox faith (religion) alongside descriptive experiences of life within and under Russian Orthodoxy (religiosity).

REE X25.42. Youth and Violence in the Middle East and Eurasia.

REE X25.43. Traveling Culture.

Examine mobility as a point of inquiry into questions of identity, community, belonging, place and landscape, art, representation, cultural difference, experience, and history.

REE X25.45. Russia Through American Eyes.

Examine a wide array of American attitudes towards Russia and Russians. Using a variety of political, social, and cultural events and encounters, analyze the ways in which nationalism, imperialism, and geopolitics informed American narratives about Russia and Russians, assessments that range from enthusiasm and curiosity to condemnation and outright hostility.

REE X25.46. Queer Eastern Europe.

Explore LGBTQI stories and political struggles in Eastern Europe with a focus on the region's queer culture: literature, cinema, and the arts.

REE X25.47. Cultural Translation.

Examine theoretical readings and concrete examples of how translation politics, translation-induced reconstruction of literary systems, censorship, manipulation, and market dynamics affect the production, distribution, and reception of translated products in the realm of arts and entertainment, news media and politics, and various academic disciplines in the Middle East, United States, and beyond.

REE X25.48. Identity, Codes, and Culture.

Explore how to read identities as patterns in literary texts, linguistic and cultural corpora with digital methods, and come to a deeper understanding of individual texts and textual phenomena. Examine digital research methods, tools, and use cases. Work hands-on with literary and linguistic sources.

REE X25.9. The Russian Novel.
A survey of classic Russian authors as well as experimental works from the nineteenth through the twenty-first century.
REE X25C. Russian Food Ways.
REE X29S. Topics in Russian, East European, and Eurasian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
REE X35. Topics in History, Economics, and Government.
REE X35.10. The Military in Politics.
REE X35.11. Germany in the Twentieth Century.
Survey of German political and military institutions, economic development, culture, and society.
REE X35.12. Stalinist Russia.
REE X35.13. Russian Economic Development since 1917.
The growth of the planned economy in industry, agriculture, and labor.
REE X35.14. Political Economy of International Crises.
Examines several dimensions of the ongoing crises in the world economic order and the interrelationships among them. Problem areas covered are neoliberalism, international money, debt, famine, immigration, and energy shocks.
REE X35.16. Eastern Europe in the Twentieth Century.
Examines the major political, social, and cultural events that shaped Eastern European society in the twentieth century.
REE X35.18. Southeast Europe in the Twentieth Century.
Explores the key events and developments of Southeastern Europe, the region commonly referred to as the Balkans, in the twentieth century.
REE X35.19. World War II in Eastern Europe.
Examines the war in Eastern Europe with a particular emphasis on occupation, collaboration, and resistance; the Holocaust; and the connection between ethnic cleansing, population transfer, and the establishment of communism in postwar Eastern Europe.
REE X35.2. Governments and Politics of Eastern Europe.
REE X35.20. German Nationalisms.
History of diverse views and movements regarding German national identity within their respective contexts, 1800-present.
REE X35.21. Causes of War.
REE X35.23. Jews of Eastern Europe.
Explores the history and culture of Jews in Eastern Europe.
REE X35.24. Political Warfare and Propaganda.
Examine the phenomenon of political warfare in a contemporary global context, focusing on Russia and Eastern Europe. Explore the evolution of techniques of political warfare, including psychological warfare and propaganda.
REE X35.25. Revolutionary Russia.
An in depth examination of the political, social, economic, and cultural dynamics at work in early twentieth-century Russia.
REE X35.26. Criminal Punishment in Russia.
Examine the theories of criminal responsibility from a legal perspective. Explore the application of criminal punishment in Russia in the Imperial, Soviet and modern eras.
REE X35.27. Reacting to Revolutionary Ideas.
Explore revolutionary themes in Western and non-Western countries during the nineteenth and twentieth centuries.
REE X35.29. Environmental History of Eastern Europe.
Explore and relate commodification of nature, the climate crisis, and preserving biodiversity from the past and present. Investigate how human societies have changed their environments and how the environment has influenced the courses of societies through case studies from the ecological impact of the Teutonic Crusades to nuclear waste management in Chernobyl.
REE X35.3. Governments and Politics of Russia.
Issues of nationalism and state-building facing Russia and its neighbors. Evaluation of the post-Soviet experience from the perspectives of both domestic and foreign policy.
REE X35.30. Technology and Society in Modern Eastern Europe and Russia.
Learn how technologies and social changes shape each other. Use case studies from Eastern Europe and Russia from the Industrial Revolution to the Era of AI. Explore the industrialization of production and consumption, the professionalization of engineering, the emergence of multidivisional industrial enterprises, the relationship between humans and machines, the uses of "cheap nature", and technological utopianism.
REE X35.31. Security and Policy in Eastern Europe and Russia.
Examine key contemporary security issues and policy dilemmas through the perspective of post-communist Eastern European countries in the context of European Union (EU) enlargement waves, and in the framework of their membership in supranational organizations. Consider the transformation of regional states' national security strategies, threat perception, and priorities transitioning from former Warsaw pact to full-fledged EU and NATO membership in shaping their respective national security priorities.
REE X35.32. European Espionage 1914-1989.
Examine the development and transformation of espionage, intelligence, and surveillance in Europe from the first World War to the end of the Cold War.
REE X35.33. Political Ideologies and Manifestos.
Survey major political ideologies like socialism, capitalism, and fascism; as well as the more recent so-called "Fourth Political Theory of Russian ideologue Aleksandr Dugin, (variable) popular ideologies, and internet manifestos. Explore each ideology through original texts and utopian/dystopian representations in popular culture (e.g., literature, film, music, graphic art, architecture, design).
REE X35.34. Populism in Central and Eastern Europe.
Survey the political nature, profile, and patterns of populism in selected post-communist democracies of Central and Eastern Europe. Examine populism in terms of impact on agenda setting, political process, and governance of the region in focus at specific national and European Union-wide levels.
REE X35.35. Socialism's Past and Futures.
Examine ordinary people's experience of socialism in the Soviet Union and the plural interpretations of this experience after the USSR's collapse.
REE X35.36. Intelligence and Espionage in the Eastern Bloc.
Examine the specific national approaches to foreign and domestic intelligence and espionage of former Communist bloc countries from early twentieth century to the collapse of communism in Eastern Europe.
REE X35.37. Geography in Eastern Europe and Eurasia.
Explore alternatives to nation-state imaginaries across Eastern Europe and Eurasia. Examine spatial thinking, utopia, dystopia, the history of geosciences, counter-mapping, and the decolonial geopoetics of space.
REE X35.38. East European Transnational Worlds to 1914.
Examine an overview of major developments in the economic, political, social, cultural, and gender and sexuality fields of East European history before 1914. Explore diplomacy, institutional legacies of war and peace, urban and rural developments and inequalities, spaces of language and religion, race, labor migration, and the arts.
REE X35.39. Cold War Eastern Europe.
Discover the primary historical developments of the post-war period in Eastern Europe from the imposition of communism in 1945 until its collapse in 1989. Explore political, economic, and cultural transformations of the Cold War.

REE X35.40. Economic Development in Post-Communist States.
Relate broad issues of economic development across the post-communist space since the collapse of the Soviet Union. Question and explore concepts, assumptions, and tools we use to assess development.

REE X35.41. Nature and Politics in Post-Communist States.
Explore the key issues related to the political economy of human-nature interactions in post-communist countries, including politics of point-source natural resources, diffuse resources, and the commons.

REE X35.42. Russia and Ukraine in World History.
Focus on multicultural history, shared imperial and national spaces, and geopolitics of entangled Russian-Ukrainian relations.

REE X35.43. Central Asian Politics and Economies.
Relate major political and economic issues of post-Soviet Central Asia from Soviet legacy and regime types to state-business relations and investment environment. Learn about the characteristics that unite and distinguish the Central Asian region.

REE X35.44. War and Genocide: The Holocaust.
Examine the Holocaust as part of Nazi Germany's quest to build a new racial order.

REE X35.45. Legacies of World War II in Eastern Europe.
Examine the complex and dynamic legacies of World War II and questions of memory, identity, and politics from 1945 to the present.

REE X35.5. History of Russia to 1917.
Survey of Russian history from seventeenth-century Muscovy to the fall of the Romanovs in 1917.

REE X35.6. History of Russia since 1917.
A survey of Russian history from the revolution of 1917 to the collapse of the Soviet Union.

REE X45. Topics in Sociology, Geography, and Anthropology.

REE X45.10. Politics and Performance.
Consider the power struggles of the democratic process by closely attending to language, rhetoric and performance.

REE X45.11. Indigenous Peoples of Russia and the USSR.
Examine an introduction to theories of colonial critique and visual culture studies. Explore the history of the Indigenous peoples of the Eurasian north.

REE X45.12. Shamanism and the Primitive.

REE X45.13. Power and Resistance in Putin's Russia.
Introduction to Russian political and protest cultures--beyond the headlines and outside the Kremlin walls.

REE X45.14. Eastern Europe on American TV.
Focus on ways Eastern Europe is depicted on American television screen. Use anthropological framework to study multiple types of television shows, including reality tv, network dramas, and miniseries. Analyze ethnic, racial, national, and gender representation and what these constructions tell us about the ways that Eastern Europe is imagined.

REE X45.16. Comparative White Nationalisms.
Consider critical questions about the constructions of whiteness and nationalism across the globe. Examine, through an anthropological lens, how the boundaries of whiteness changed throughout history, and its relationship to far-right political groups, to trace the history of white nationalism and its present-day global resurgence.

REE X45.17. Global Perspectives of Health, Illness, and Inequality.
Use an anthropological framework to think critically and analytically about global past and contemporary issues in health. Examine the root causes of health, illness, and inequality.

REE X45.18. The Anthropology of Disinformation and Conspiracy Theories.
Develop an anthropological perspective on disinformation and conspiracy theories and examine how these phenomena are embedded in cultural, social, and political contexts. Explore the ways in which disinformation is constructed, disseminated, and maintained within different media ecologies.

REE X45.19. The Politics of Insult.
Examine how linguistic practices of (im)politeness and verbal aggression shape--and are shaped by--social hierarchies, cultural contexts, and political dynamics across different contexts, from liberal to anti-liberal. Analyze how seemingly neutral concepts of "civility" and appropriate speech" often mask power relations while exploring how taboo language, conflict talk, and transgressive communication can both challenge and reinforce existing social orders.

REE X45.2. Regions and Cultures of Europe.
Spatial patterns in Europe, with emphasis on cultural, historical, and political geography.

REE X45.4. Geography of the Former Soviet Union.
A systematic introduction to cultural, physical, political, and economic geography of the former Soviet Union. Focus on the fundamental transformation that the former Socialist Union Republics, now sovereign states, have undergone since 1991.

REE X45.6. Northern Lands and Cultures.
Develops geographical understanding of the Circumpolar region of the North, an ancient human habitat, home to distinct millennia-old civilizations.

REE X45.7. Northern Gods, Northern Faiths: The Conversion of Scandinavians, Finns, Northern Slavs and Shamans.
An introduction to the basic source texts for several pre-Christian belief systems evolving in geographic proximity and their influence on one another including pre-Christian Slavic; pre-Christian Scandinavian; pre-Christian Sami and Finnish; and ancient and modern Siberian shamanism.

REE X45.8. Cultures and Ecologies.
Examines the anthropology of "nature" and "natural resources," with particular attention to the communities in the arctic and subarctic regions. Use ethnographies to learn about the cultures of peoples who inhabit northern latitudes, especially their cosmological modes of belief and their ecological ways of life.

REE X45.9. Geography of Religion in Eastern Europe and Russia.
A comprehensive overview of major religious culture regions in the former Eastern bloc countries.

REE X58Q. Supervised Research.

REE X79C. Conference Course.

REE X79H. Honors Tutorial Course.
Intensive reading and research planned with and approved by the honors adviser, followed by completion of a thesis.

Graduate Courses

REE X19S. Topics in Russian, East European, and Eurasian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

REE X29S. Topics in Russian, East European, and Eurasian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

REE X80. International Business Fellows Seminar.
Multidisciplinary seminar for students in area studies, business administration, law, and public policy. The faculty includes both academics and business leaders.

REE X81. Seminar in Russian, East European, and Eurasian Civilizations and Cultures.
Core course.

REE X82. Conference Course in Russian, East European, and Eurasian Studies.
Individual instruction on some aspect of the former Soviet Union or Eastern Europe.

REE X85. Topics in Russian, East European, and Eurasian Studies.

REE X86. Topics in Literature and Culture.

REE X86.1. Chechnya: Politics, Power, and People.
The history, culture, religions, and recent upheaval of Chechnya.

REE X86.2. Bulgakov's Master and Margarita.

REE X86.3. Russian Literature and the Devil.
Examines Russian literature's extensive reflection on the nature and place of evil in human existence.

REE X86.4. Madness and Madmen in Russian Literature.

REE X86.5. Stalinism: Ideology and Culture.
Examine Stalinism as a complex historical, ideological, and cultural phenomenon that crucially shaped Russia's destiny from the twentieth century to the present moment. Consider this phenomenon beyond popular stereotypes (blood-thirsty tyrant; miserable and terrorized population; total propaganda; etc).

REE X86.6. Memory and Archive in the European Novel.
Examine 20th-century European novels that function as archives of cultural memory to retrieve individual and collective memories that lay hidden and forgotten by 20th-century history. Consider critically acclaimed writers, such as W. G. Sebald, Dubravka Ugresic, Danilo Kis, Witold Gombrowicz, and Dasa Drndic.

REE X86.7. Conspiracy Culture in the United States and Russia.
Examine a wide spectrum of conspiracist expression, from such historical texts as The Protocols of the Elders of Zion to the fictions of Don DeLillo, Thomas Pynchon, Fyodor Dostoevsky, Viktor Pelevin, and others. Consider a number of pop culture artifacts that thematize conspiracy and paranoia, as well as secondary works by contemporary scholars working in the field of conspiracy studies.

REE X86.8. Satire and Politics.
Explore several contemporary novels, featuring comedy or satire, from different Eastern European regions (Russia, Ukraine, Poland, Dagestan, Slovenia, Romania) to consider how complex history and politics are often intertwined with fantastical, humorous, and grotesque elements.

REE X86.9. Post-Communist Protest in Ukraine and Eastern Europe.
Consider the range of protest movements and revolutions resulting from the collapse of communism in the former Soviet Union. Examine the dismantling of the "socialist realism" paradigm in literature and the arts, using a range of literary and non-fiction texts and films to explore these developments in Ukraine, Poland, Belarus, Russia, and other countries.

REE X87. Topics in Economics, History, and Government.

REE X87.1. Security and Policy in Eastern Europe and Russia.
Consider key foreign policy challenges and security issues facing post-communist Eastern European countries from the perspective of their respective NATO and EU memberships. Examine contemporary policy debates regarding a resurgent Russian, Chinese foreign policy outreach, and non-state actors, as well as challenges and concerns on terrorism, extremism, and ethnic, religious, and political radicalization.

REE X87.2. Protest and Revolution in Eastern Europe.
Explore the causes, and the patterns and modes of mobilization, of protest and regime change in Eastern Europe from the 1956 Hungarian Revolution to the 2014 Ukrainian revolution. Examine and compare the specific national roots of discontent, the mechanics of mass mobilization, and the patterns of democratic uprisings, as well as the responses of national elites and external actors, in the context of these countries' socialist and post-socialist pathways.

REE X87.3. Communism in Eastern Europe.
Explore the complicated nature of communist rule in Eastern Europe in its many forms, from Poland in the North to Yugoslavia in the South. Examine the variety of lived experiences of citizens of Eastern Europe, from the imposition of communism in the region after World War II to the collapse of the system in 1989. Discuss the most recent scholarship on the region that ties regional developments to the broader Cold War context, and covers issues ranging from state-society dynamics, to religion, consumer culture, urban change, and collectivization.

REE X88. Topics in Anthropology, Sociology, and Geography.

REE X88.1. Post-Soviet Geopolitics.
Examine the major geopolitical issues in the post-Soviet space, including the history of formation of ethnic and cultural identities, nation-building, and challenges to the regional development. Consider the influences of the 'new world order' on the former Soviet Union republics and their political, demographic, and socio-economic patterns, with special attention on the development of foreign relations by the newly independent countries with their neighbors.

REE X88.2. Global Race and Racism.
Trace the concept of race over time and in its various socio-racial configurations across the globe. Consider race and racism from a global perspective, and utilize anthropological frameworks to analyze the historical and contemporary aspects of racism, racialization, white supremacy, and racial belonging.

REE X88.3. Ethnography of Digital Media.
Investigate new digital technologies and their impact on social worlds, survey old media paradigms (the novel, the newspaper), and explore new social kinds (the troll, the hashtag, the GIF archive, the emoticon, the TikTok challenge). Focus on the "practical" contributions to conversations about media, but also consider classical theoretical text to develop a rigorous understanding of new media forms, and to design ethnographic data collection methods for projects that can answer a variety of questions about digitally mediated interaction.

REE X89. Master's Writing Colloquium.
Receive guidance and assistance through the process of writing a Master's thesis or report. Intended for Master of Arts candidates in the final year of their graduate studies.

REE X98. Thesis.

REE X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

REE X19S. Topics in Russian, East European, and Eurasian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

REE X29S. Topics in Russian, East European, and Eurasian Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Center for Russian, East European, and Eurasian Studies. University credit is awarded for work in an exchange program; it may be

counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RHE - Rhetoric and Writing

Rhetoric and Writing: RHE

Lower-Division Courses

RHE X06. Rhetoric and Writing.
An introductory writing course that includes instruction in practical reasoning and the principles of rhetoric.

RHE X06Q. Rhetoric and Writing for Nonnative Speakers of English.
An introductory writing course that includes instruction in practical reasoning and the principles of rhetoric, as well as grammar and mechanics of standard American English.

RHE X09J. Topics in Writing.
Study and practice methods of rhetorical analysis within the contexts of disputed issues of academic, political, or cultural significance.

RHE X09J.1. Rhetoric of the Gospels.
Examine the gospels as rhetorical texts, applying historical method and literary analysis to gain an understanding of how the image of Jesus Christ has been shaped from early Christianity to the present day.

RHE X09J.2. Rhetoric of Animals.
Explore the ethical, political, philosophical, scientific, and artistic reasons humans have created representations of animals and the potential repercussions of these representations.

RHE X09J.3. Rhetoric of the Essay.
Explore the different structures and rhetorical poses authors have taken across five hundred years of the essay form's contemporary existence.

RHE X09S. Critical Reading and Persuasive Writing.
A writing course designed to teach advanced rhetorical analysis and advocacy on public issues.

RHE X10. Intermediate Expository Writing.
An intensive writing workshop, focusing on style and readability.

RHE X12. Writing in Digital Environments.
A writing course focused on using, interpreting, and analyzing traditional and emerging technologies. Taught using networked computers.

RHE X14. Computer Programming for the Humanities.
Introduction to the fundamentals of computer programming and practice in computation as a rhetorical activity.

RHE X15. Introduction to Visual Rhetoric.
A writing course designed to teach students to analyze and produce visual and nonverbal forms of rhetoric.

RHE X17. Technical Writing.
Reading and writing in professional and technological environments.

RHE X19S. Topics in Rhetoric and Writing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Rhetoric and Writing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

RHE X21. Principles of Rhetoric.
Examine major terms, issues, and approaches in the discipline of rhetoric and writing. Practice analysis and application.

RHE X25M. Advanced Writing.
An advanced course designed to improve and refine writing.

RHE X28. Topics in Professional and Technical Writing for Liberal Arts Majors.
Examine genres, processes, contexts, and practices of technical and professional communication.

RHE X28.1. Magazine Writing and Publishing.
Introduction to magazine writing, editing, and publishing, with an emphasis on the nonfiction article.

RHE X28.2. Writing for Nonprofits.
Studies the writing genres and rhetorical strategies that are routinely used in nonprofit organizations. Covers business reports, grant writing, and feature writing.

RHE X28.4. Writing for Entrepreneurs.
Studies the genres and rhetorical strategies that entrepreneurs use to persuade stakeholders, including heuristics for developing business models, market reports, and pitches.

RHE X28.5. Writing for Digital Media.
Examine the concepts, practices, and technologies associated with composing in digital spaces.

RHE X28.6. Technical Communication and Wicked Problems.
Examine the nature of wicked problems and the roles for technical communicators, including effective strategies for engaging public audiences and facilitating stakeholder dialogue.

RHE X28.7. Nature, Travel, and Environmental Writing.
Examine nature, travel, and environment through writing that centers on social, environmental, and ecological justice.

RHE X29S. Topics in Rhetoric and Writing.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Rhetoric and Writing. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RHE X30C. Advanced Topics in Digital Rhetoric.
Examine the role of information technologies in communication and culture.

RHE X30C.10. Access Designed.
An introduction to disability studies and accessible design by reading, discussing, designing, and practicing with the technologies and techniques that compose accessible writing and devices.

RHE X30C.11. Mobile Environments.
Examine the principles of user experience (UX) design, specifically the creation of low-fidelity mobile application solutions, which are designed to help users explore and create meaningful and personally relevant experiences within their environments.

RHE X30C.12. Information Design.
Examine the fundamental principles of document and information design that inform practical and theoretical skills related to desktop publishing, visual communication, and publication production.

RHE X30C.13. Rhetoric and Data Visualization.
Explore the principles for designing tables, graphs, and figures that are accessible and persuasive to readers and that are accountable to the data. Examine and critique visualizations from academic and popular media. Create visualizations from real-world data sets.

RHE X30C.14. Rhetorical Metrics.
Explore an introduction to text analytics with a focus on computational and statistical methods within rhetorical studies.

RHE X30C.15. Rhetoric, Risk, and Environmental Justice.
Explore the intersection of rhetoric, social justice, and environment through the theoretical lens of environmental justice.

RHE X30C.16. Rhetoric and Algorithms.
Explore the nature of Artificial Intelligence (AI), its current and possible roles in society, and the rhetoric about it.

RHE X30C.17. Podcasts and Paradigm Shifts.
Explore storytelling's influence on public perceptions and policies via podcasting.

RHE X30C.18. Text Mediation and Time Management.
Examine how texts mediate human activity and how they can be used to manage time, effectiveness, and productivity at individual and group levels.

RHE X30C.19. Environmental Media.
Explore the relationship between rhetoric, digital storytelling, documentary, and environment. Learn basic skills in documentary filmmaking and produce a short video suitable for broadcast.

RHE X30C.2. Designing Text Ecologies.
Explores the function and interaction of texts in the workplace. Emphasis on research, analysis, and design of the strategic, tactical, and operational aspects of texts.

RHE X30C.20. User Experience Design.
Introduction to user experience (UX) design. Apply concepts of UX and usability to design, research, and testing practices in digital interfaces.

RHE X30C.4. Writing and Photography.
Examination of issues in the history of photography and how images and words work in combination. Emphasis on improving skills in analysis, writing, and photography.

RHE X30C.5. Ethics and New Media.
Exploration of contemporary ethical dilemmas and principles arising with emergent technologies, and their impact on rhetoric and writing.

RHE X30C.6. Networked Writing.
Examines how writers present themselves and their arguments across a range of media and genres. Practices rhetorical skills within digital networks.

RHE X30C.7. Digital Storytelling.
Examines and practices the development of narrative through multiple media (audio, visual, video, et al).

RHE X30C.8. Writing with Sound.
Introduces sound studies and practices techniques for recording, editing, and publishing writing for and with sound.

RHE X30C.9. Digital Self and Rhetoric.
Examines the pervasiveness of digital culture and cultivates strategies for presenting one's digital self through academic, professional, and civic venues.

RHE X30D. Topics in History of Rhetoric.
Geographically and historically situate and examine figures, movements, traditions, and productions in rhetoric and public argument.

RHE X30D.1. Sophistry and the Invention of Rhetoric.
Examines the role of sophists and sophistry in the development and practice of rhetoric as an art, from antiquity to modern times.

RHE X30D.10. Arguing with Liberals.
A survey of liberal political theory from the late seventeenth through the twentieth centuries with special attention to theories and practices of public argumentation.

RHE X30D.11. Cicero, Rhetoric, and Ancient Rome.
An exploration of Marcus Tullius Cicero's writings on rhetoric, his major political speeches, and his philosophical dialogues in the context of the late Roman republic and the Roman Revolution (ca. 133-40 BCE).

RHE X30D.12. Women's Rhetorical Traditions.
Examine how popular rhetorical theories and pedagogies were adapted to fit specific social, cultural, and political contexts and thus shaped the communication practices of girls and women in 19th and early 20th century America. Consider why females were excluded from the rhetorical tradition and the challenges scholars face in writing historical accounts.

RHE X30D.13. Augustine and Christian Rhetoric.
Study Augustine's writings on language, rhetoric, and epistemology with attention paid to contemporary Roman and Greek philosophical and rhetorical movements, such as skepticism, Platonic idealism, the second sophistic, and the Christian homiletic tradition.

RHE X30D.14. Rhetoric of Latinx Social Movement.
Examine Latinx social movements and their rhetorical features in the Americas from the nineteenth to the twenty-first centuries.

RHE X30D.15. Feminist Rhetoric.
Explore the intersection between feminism and rhetoric with emphasis on historical figures.

RHE X30D.16. Transgender Rhetorics.
Examine rhetorics that (re)shape normative and transgressive conceptions of gender, emphasizing their effects on the lives of transgender people

RHE X30D.17. Arguing with Conservatives.
Explore American conservative political tradition with special attention to the 1964 Barry Goldwater presidential campaign.

RHE X30D.18. Medical Rhetorics, Race, and Gender.
Examine how health and illness are defined through rhetorics about and within medicine. Focus on race and gender, consider how communication and language shape understandings of health, access to health care, and experiences of illness and disability.

RHE X30D.19. 1960s Liberation Rhetoric.
Explore the rhetoric of liberation in the United States in the 1960s, looking in detail at the words and actions of activists in the Civil Rights movement, the anti-war/anti-imperialist movement, Black Power, women's liberation, gay liberation, the Chicano movement/el movimiento, and other noteworthy phenomena of the era.

RHE X30D.2. Kairos and the Rhetorical Situation.
Introduction to kairos, a key concept in rhetorical theory from ancient to modern times, that focuses attention on making a text appropriate for its historical situation. Explores why some writing succeeds at attracting attention and inspiring action, while some writing fails.

RHE X30D.3. Deliberating War.
Studies the recurrent means of making arguments for and against war, and the role of rhetoric in public deliberation.

RHE X30D.4. Rhetoric and Racism.
Explores theories of rhetoric by examining arguments about group identity, from Athenian discussions of "barbarism" in the fourth century BC to nineteenth-century arguments about citizenship.

RHE X30D.5. History of Public Argument.
A survey of the practice and theory of argumentation, with particular attention to its civic and political uses and implications.

RHE X30D.6. Classical to Modern Rhetoric.
Surveys the works of major rhetorical theorists and practitioners in the Western tradition from the ancient Greeks to the present.

RHE X30D.7. Rhetoric Invented, Revised, Retold.
Survey of figures, movements, and debates in the history of rhetoric and exploration of the rise of revisionist historiography and comparative rhetoric in the twenty-first century.

RHE X30D.8. Philosophy Versus Rhetoric.
Study of the co-emergence and subsequent split between rhetoric and philosophy in the classical period and their potential reunification in a contemporary context.

RHE X30D.9. Rhetoric in the English Renaissance.
Examination of how the art of rhetoric, developed in ancient times by the Greeks and Romans, was understood and debated during the European Renaissance, particularly in England.

RHE X30E. Topics in Rhetorical Theory and Analysis.
Critically explore contemporary rhetorical theories and their analytical applications.

RHE X30E.10. Peacemaking Rhetoric.
Examine the nature, features, exigences, and functions of peacemaking rhetoric.

RHE X30E.11. Film as Rhetoric.
Examine films as rhetorical acts that serve a powerful function in American society.

RHE X30E.12. Rhetoric and Narrative.
Examine features, exigences, and functions of different types of rhetorical narratives.

RHE X30E.13. Divine Persuasion in Biblical Times and Place.
Explore the use of persuasive strategies in an ancient and non-Western culture, that of the Hebrew Bible. Using rhetorical techniques, analyze three types of texts: narratives of interactions between ordinary people and God; interactions between people, God, and authorized prophets; and prayers in prose and poetry.

RHE X30E.14. Animal Rhetorics.
Examine research on the diverse rhetorical practices of nonhuman animals and its implications for rhetorical theory.

RHE X30E.15. Rhetoric, Feminism, and Science.
Explore the rhetorical dimensions and tensions between feminism and science, focusing on feminist and scientific inquiry, interventions, and ethics.

RHE X30E.16. Disability Rhetorics.
Explore the role of communication in constructing disability and challenging ableism.

RHE X30E.17. Publics and Counterpublics.
Examine how the concept of the "public sphere" informs discussions of the generation, negotiation, and control of information, power, and community values.

RHE X30E.2. Demagoguery.
Examines material produced by rhetors commonly considered demagogues and assesses the scholarly discussions of these individuals.

RHE X30E.3. Democracy and the Media.
Rhetorical analysis, with particular attention to the effects of technologies and journalistic institutions on public deliberation.

RHE X30E.4. Modern Rhetorical Criticism.
Use of contemporary critical methods to investigate, interpret, and explain rhetorical acts and artifacts.

RHE X30E.5. Comparative Rhetoric.
Examination of rhetorical concepts and practices in various rhetorical traditions, and how they underline the functions of rhetoric in their different historical and cultural contexts.

RHE X30E.6. Nonargumentative Rhetoric in Zen.
Exploration of unconventional uses of language including contradiction, negation, story, surprise, gesture, and silence are used in Zen training as resources for transformational change.

RHE X30E.7. Psychology of Writing and Persuasion.

RHE X30E.8. Pathos.
Examines the persuasive power of emotion in critical thinking and prudent judgment.

RHE X30E.9. Rhetoric and the Law.
Examine legal rhetoric and how gender, race, class, ability, and nationality constitute the law and subjects before the law.

RHE X60M. Rhetoric and Writing for Teachers of English.
An advanced course that examines theories of writing and writing pedagogy.

RHE X66. Internship in Rhetoric and Writing.
Research and staff experience working in an appropriate nonprofit, public-, or private-sector entity.

RHE X67R. Conference Course in Rhetoric and Writing.
Supervised work on specific projects in rhetoric and writing.

RHE X68C. Writing Center Internship.
Intensive reading, writing, and discussion in writing center theory and philosophy, tutoring methods, and writing pedagogy, as well as a review of standard American English usage and mechanics; followed by a supervised apprenticeship as a peer consultant in the University Writing Center.

RHE X68E. Topics in Editing for Publication.
Advanced instruction in revising and editing for publication.

RHE X68E.1. The Book: Prospectus to Proofs.
Designed to make students better writers and more careful editors, the course includes creation of a simulated book from proposal stage to editing of final page proofs.

RHE X68E.2. Grammar for Writers, Editors, and Teachers.
Examines the grammar of written English by assessing grammatical issues, handbooks, and controversies.

RHE X75. Topics in Capstone Seminars in Rhetoric.
Allows the student to integrate the knowledge gained in rhetoric and writing through a major independent project.

RHE X79C. Advanced Topics in Rhetoric and Writing.
An advanced course focused on specific theories or practices of rhetoric and writing.

RHE X79H. Honors Tutorial Course.
Research and development of a thesis/project topic and proposal followed by the writing and defense of an honors thesis or development and defense of an honors project.

Graduate Courses

RHE X80. Conference Course in Rhetoric and Writing.
Explore specialized subject areas in rhetoric and writing studies in an individualized format.

RHE X81. Research Methods in Rhetoric and Writing.
Examine fundamental assumptions and procedures for conducting research in rhetoric and writing studies, including the links between theory and methods, qualitative, quantitative, archival, critical approaches, assessment, and research ethics.

RHE X82. Rhetoric and Writing Theory.
Examine major theoretical movements in rhetorical studies, writing studies, and related areas.

RHE X83. Histories of Rhetoric and Writing.
Explore persuasive traditions, disciplinary histories, and historiographic considerations in rhetoric and writing studies.

RHE X84. Public Rhetorics.
Examine the theory, practice, and study of public rhetorics, including social movement rhetorics, community advocacy, and professional/technical communication.

RHE X85. Digital Writing and Research Studio.
Examine and apply the tools, techniques, and theories of digital research and pedagogy in an experiential format.

RHE X89E. Area Exam and Prospectus Hours.
Prepare for required Field and Prospectus examinations under the supervision of a faculty member.

RHE X89R. Master's Report.
Prepare a report to fulfill the requirement for the master's degree under the report option.

RHE X91. Topics in Rhetoric and Writing.
Examine specialized topics in rhetoric and writing studies.

RHE X98T. Supervised Teaching in Rhetoric and Writing.

RHE X99W. Dissertation.

Professional Courses

RIM - Race, Indigeneity, and Migration

Race, Indigeneity, and Migration: RIM

Lower-Division Courses

RIM X01. Introduction to Race, Indigeneity, and Migration.
Conceptually explore key terms in the study of race, indigeneity and migration. Examine how race, indigeneity and migration have been central to the development of modern nations, economies and cultures through different epochs in United States history.

RIM X19S. Topics in Race, Indigeneity, and Migration.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

RIM X20C. Power and Place: Making Texas History.

RIM X29S. Topics in Race, Indigeneity, and Migration.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RIM X30N. Migration Crisis.

RIM X50. Contemporary Issues in Race, Indigeneity, and Migration.

Explore how race, indigeneity and migration function as ongoing "events which determine present-day governmental policies, markets and cultural logics.

RIM X78. Capstone Seminar.

Identify a research question and conduct a semester-long research project on a specific issue related to race, indigeneity and migration. Examine an overview of the major theoretical and methodological schools of thought across the fields of racial and ethnic studies, indigenous studies and migration studies.

ROM - Romanian

Romanian: ROM

Lower-Division Courses

ROM X01. Topics in Romanian.

ROM X06. First-Year Romanian I.

ROM X07. First-Year Romanian II.

ROM X12K. Second-Year Romanian I.

ROM X12L. Second-Year Romanian II.

ROM X19S. Topics in Romanian.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

ROM X25. Third-Year Romanian I.

ROM X26. Third-Year Romanian II.

ROM X28. Topics in Advanced Romanian.

ROM X29S. Topics in Romanian.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

ROM X80. Topics in Advanced Romanian.

ROM X95. Conference Course.

Study of individual projects in Romanian language, literature, or culture.

Professional Courses

RTF - Radio-Television-Film

Radio-Television-Film: RTF

Lower-Division Courses

RTF X01C. Comics and Cartoons.

Explore techniques, conventions, history, and cultural space of comics and cartoons.

RTF X01D. Media Storytelling and Analysis.

Explore fundamentals of screenwriting and narrative storytelling form. Analyze media, such as film, television, and video games.

RTF X01I. Fundamentals of Filmmaking.

RTF X01N. Introductory Topics in Radio-Television-Film.

RTF X01R. Topics in Radio-Television-Film.

RTF X01S. Social Activism in Film.

Explores ways filmmakers express ideas about important movements and social issues.

RTF X02D. History of Media Industries.

Examine the historical development of the film, radio, television, and cable industries and roots of the digital. Investigate cultural, technological, and economic contexts to study production, distribution, and reception.

RTF X02I. Fundamentals of Producing Film and Television.

RTF X03C. Introduction to Media and Entertainment Industries.

Introduction to Media and Entertainment Industries provides a foundational social science understanding of media and entertainment industries. Drawing on insights from media studies, management, and sociology, uses social science theories, methods, and practices to examine social, political, and economic forces that shape and are shaped by media production, distribution, and monetization.

RTF X03D. Media and Culture.

Explore cultural values, beliefs, and ideologies that shape media. Examine how individuals and communities interpret media. Evaluate politics, economics, and social relationships that shape and reflect media, culture, and society.

RTF X04. Storytelling in Film and Television.

RTF X04D. Introduction to Film Production.

Explore the fundamentals of film, television, and digital production concepts and techniques.

RTF X06. Introduction to World Cinema History.

Survey of the aesthetic, cultural, economic, political, and technological trends impacting motion pictures around the world from their origins in the late nineteenth century through the present.

RTF X19S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RTF X29S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

RTF X19S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser

in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RTF X20I. Film and Broadcasting History to 1975.

RTF X21C. History of American Television.

Survey of the evolution of United States television programming, aesthetics, production, and policy.

RTF X21D. Film History to 1960.

Introductory survey of the history of world cinema to 1960. Explores the development of film as a narrative medium, key filmmakers, films, and of the origins of the main elements of film grammar.

RTF X21I. Film and Broadcasting History 1975 to Present.

RTF X22D. Film History 1960 to Present.

RTF X22I. Producing Film and Television Fundamentals.

RTF X23C. Screening Race.

Introduction to the study of race and ethnicity in U.S. film, television, and new media. Includes focus on media histories, media criticism, production strategies, and U.S. audiences.

RTF X24C. Introduction to Global Media.

Introduces the role of global media as a set of texts, technologies, and industries that shape our identities, our social worlds, and our political practices.

RTF X24L. Topics in the Entertainment Professions.

Contemporary issues, practices, and skills related to communication and the entertainment industries, including studies in the business of entertainment, the entertainment professions, the creative process, and contemporary Hollywood cinema.

RTF X24L.5. Careers in Entertainment-Los Angeles.

Explores specific career interests with a focus on skills, experience, training, and contacts that are required in Los Angeles. Taught in Los Angeles, California.

RTF X27C. Digital Remix Cultures.

Introduction to the study of digital remix cultures. Subjects will include medium specific mash-up cultures and platforms (image, audio, video), authorship and ownership, political remix and culture jamming, and memes. Assignments will merge theory and practice.

RTF X28C. Gender and Media Culture.

Critical analysis of media and its interrelation with issues of gender.

RTF X29C. Digital Media Production.

Interactive course designed to teach foundational Digital Media Production tools. Apply digital media tools and techniques to a variety of tasks in the pipeline of production from concept, storyboard, layout to compositor, VFX, CG and interactive design.

RTF X29S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RTF X30C. Semester in Los Angeles: Principles of Production.

RTF X30N. Internship in Media Industries.

Practical work experience related to media industries. Internships to be secured by students.

RTF X30P. Topics in Radio, Film, and Television Career Exploration.

RTF X31C. Media Content Management.

RTF X31K. Topics in Film, Video, and Television Theory.

Survey of basic theories that seek to explain the relationships between film, video, television, and their respective audiences.

RTF X31K.7. Stardom and Celebrity Culture.

Survey of the construction and meanings of stardom in film, television, and new media. Subjects include links with the media industries; stardom and race, class, gender, and sexuality; and new permutations of celebrity culture.

RTF X31K.8. Transmedia Storytelling.

RTF X31P. Topics in New Communication Technologies.

Applications and potential effects of new telecommunications and information technologies in the home, workplace, and in education, social services, and politics.

RTF X31P.3. Internet Cultures.

RTF X31P.4. Video Game Culture and Criticism.

RTF X31P.5. Digital Media Platforms.

RTF X31P.6. Video Game Industry.

RTF X31Q. Topics in Digital Media.

Survey, analyze, and assess current and emergent digital and social media technologies and cultures.

RTF X31R. Topics in New Media.

Students produce projects in either film, video, computer animation, collage, sculpture, assemblage, soundscape, or performance. Prior experience in one or more media is helpful but not necessary.

RTF X33. Introduction to Screenwriting.

An introduction to screenwriting for features, short films, documentaries, and television. Lectures explore the basic theory of story, character, and structure. Students write original screenplays during workshop hours.

RTF X35. Topics in Television Analysis and Criticism.

Analysis of critical methods, selected television programs, and selected critics.

RTF X35.2. Race, Class, and Gender in American Television.

Surveys history and contemporary debates regarding the construction of race, class, gender and sexual orientation in U.S. television from the late 1940s through the present day and related issues of television aesthetics, production practices, audiences, and advocacy.

RTF X35.3. Contemporary Television Criticism.

RTF X35.4. Queer Television.

RTF X36. Special Projects in Radio-Television-Film.

Comprehensive research or creative projects in areas of special interest developed and executed by the student under faculty supervision.

RTF X37. Topics in Radio Fundamentals.

Fundamentals of audio program production. Students create either brief or long audio programs.

RTF X40. Topics in Studio Production.

Introduction to production of television programs, including the multicamera format.

RTF X40.4. Multi-Camera Television Directing.

RTF X40D. Topics in Design.

Explore the role of design and how the creation and selection of sets, locations, and environments contribute to the visual language of film. Analyze fundamental elements of story, production, critical analysis, and the collaborative process of film making from the design perspective.

RTF X40M. Music Video and Film Production.

RTF X41D. Advanced Topics in Design.

Develop designs that will contribute to effective storytelling, from conceptualization to execution based on the needs of a script.

RTF X42. Topics in Global Media.

Study of political, social, cultural, and economic factors affecting the use and impact of communication systems in an international context.

RTF X42.10. Digital Mainland China and Taiwan.

RTF X42S. Topics in Global Media.

Study of political, social, cultural, and economic factors affecting the use and impact of communication systems in an international context.

RTF X42S.1. Global Hollywood.

RTF X42S.2. Indian Cinema.

RTF X43. Topics in Advanced Video Production.

Advanced study in film, television, and media production.

RTF X43.1. Advanced Narrative Production.
Individual and group production of short films using high-definition video.
RTF X43.2. Advanced Documentary Production.
Individual and group production of a documentary, from research and preproduction to completion.
RTF X43.5. Developing Independent Feature Films.
Group research and lectures about producing an independent feature film.
RTF X43.8. Cinema Laboratory.
Explores the cinematic form on an elemental level through the making of several short films. Utilizes cinema-making skills through attention to process and experimentation in order to move to a higher level of precision.
RTF X43C. Acting for Filmmakers.
Explores core elements of acting technique through scene study, improvisation, and other exercises.
RTF X43D. Cinematography.
Visual storytelling and the art of cinematography through practice in a workshop environment.
RTF X43N. Advanced Three-Dimensional Production.
Carries the principles developed in Radio-Television-Film 366M into a variety of hands-on production settings and projects, including large-crew productions at Austin City Limits Live at the Moody Theater, as well as smaller shoots in a variety of other studios and locations.
RTF X44C. Topics in Animation.
RTF X44M. Topics in Special Applications of Digital Media Production.
Special topics in digital media theory, design, or development. May include visual effects and motion graphics or digital media and digital art.
RTF X44M.1. Interactive Digital Storytelling.
Use of digital tools to create original web-based audiovisual productions and the study of impact of digital media and technology on traditional film and video production.
RTF X44M.3. Introduction to Visual Effects and Motion Graphics.
Designed to introduce students to the core concepts and techniques used in visual effects and motion graphics. Subjects include, but are not limited to, compositing, animation, particles, and greenscreen.
RTF X44M.4. Interactive Media and Game Development.
RTF X44M.5. Writing for Interactive Games and Media.
Explores storytelling possibilities of interactive mediums. Develop the skills and knowledge necessary to create characters, storylines, and dialogue for digital mediums.
RTF X44M.6. Introduction to 3D Animation.
RTF X44M.7. Post Production Techniques.
RTF X44M.8. CGI for Film and Games.
RTF X44N. Topics in Advanced Applications of Digital Media Production.
Advanced topics in digital media theory, design, and development.
RTF X44N.4. Undergraduate Animation Thesis.
Each student will produce a two- to ten-minute animated short film.
RTF X44N.8. Immersive Filmmaking.
RTF X44N.9. Motion Capture Studio.
RTF X44T. Topics in Game Development Capstone.
Capstone courses in game development.
RTF X44T.1. Game Development Capstone: Two Dimensional Games.
RTF X44T.2. Game Development Capstone: Three Dimensional Games.
RTF X45. Topics in Film History.
Critical assessment of major genres, periods, movements, and personalities in United States and international film history.
RTF X45.10. Chinese Auteurs.
RTF X45.11. Contemporary Horror.
RTF X45.12. Screwball Comedy.
RTF X45.13. Landscape Cinemas.
RTF X45.14. Documentary and Creative Non-Fiction.
RTF X45.2. Israeli Cinema and Television.
RTF X45.3. History of Mexican Cinema.
RTF X45.4. Latin American Cinema.
RTF X45.5. Third World Cinema: Africa and the Americas.
RTF X45.6. Experimental Film and Video.
Critical assessment of the history and current trends in experimental film and video.
RTF X45.7. British Film and Television.
RTF X45.8. Social Documentary.
RTF X45.9. Women Behind The Camera.
RTF X46. Introduction to Editing.
Theory and practice of video and film editing techniques.
RTF X47C. Topics in The Business of Media.
Survey of business practices in film, television, music, and digital media industries: development, production, distribution, and exhibition.
RTF X47C.1. Semester in Los Angeles: How Hollywood Works.
Explores the commercial challenges that face producers and network and studio executives, and addresses the continual struggle between creativity and the bottom line. Taught in Los Angeles, California.
RTF X47C.2. Introduction to the Music Business.
RTF X47D. Advanced Topics in Media Industries.
RTF X47E. Advanced Editing.
In-depth look at the principles, techniques, and aesthetics of editing; building a broad background for students' future professional development. Designed to provide a basic-to-intermediate level of familiarity with Avid editing software, by discussing and working on provided narrative, documentary, and technical exercises; various approaches to editing style in each case.
RTF X47F. Topics in Media Studies.
RTF X47F.1. Indian Cinemas: Bollywood and Beyond.
Focus on Indian cinema, primarily Hindi popular cinema--many times known as Bollywood. Examine major works of Hindi cinema and explore independent film making and regional cinema.
RTF X47F.2. Cinematic Cities: Mumbai.
Explore political, social, and artistic transformations of the global city of Mumbai from the early 20th into the 21st century using cinema as the primary text complemented by theoretical, creative, and historical readings.
RTF X47G. Topics in Media Industries with Screening.
RTF X47P. The Business of Hollywood.
Explores contemporary media industries: how media industries operate,and the "big picture" of the contemporary film, television, and digital media landscape. Large-scale issues being faced by those working in the entertainment industry - including the impact of conglomerate ownership, regulation, globalization, and digitization on creative practices and work roles.
RTF X47S. Topics in Media Studies with Screening.
RTF X47S.1. Offbeat Asian Cinema.
Explore South Asian cinema, focusing on innovative and boundary-pushing films. Draw from a diverse range of countries including India, Afghanistan, Sri Lanka and Pakistan, and languages like Hindi, Urdu, Marathi, Tamil, Malayalam, and Dari.
RTF X48. Topics in Media Industries.
Examination of the economics and the production, research, management, and distribution practices of the film and electronic media industries.

RTF X48.1. Semester in Los Angeles: Telling and Selling the Story.
Explore the development of skills in the process by which literary material makes it from page to screens.

RTF X48.2. Semester in Los Angeles: Development Process of Film and Television.
Examines the development process in both film and television; preparing pitches, coverage, and development notes; identifying strengths and weaknesses of literary material typical of that submitted to studios, networks, and production companies. Taught in Los Angeles, California.

RTF X48.3. Semester in Los Angeles: Inside the Music Industry.
Examine how the music industry really works, how it relates to other divisions of the entertainment industry, and the effects that changing technologies have on it.

RTF X48.4. Semester in Los Angeles: New Media and Emerging Entertainment.
Explores burgeoning areas of digital entertainment including broadband, video-on-demand, interactive television, mobile entertainment, and interactive digital gaming. Taught in Los Angeles, California.

RTF X48.5. Semester in Los Angeles: Working Hollywood Writer.

RTF X48C. Introduction to Digital Production.
Introduction to fundamental production concepts and techniques through lectures, projects, and lab experiences. Develop a storyteller's point of view and explore the ability to create works with visual, aural, and narrative structures.

RTF X50L. Semester in Los Angeles Internship.
Practical work experience related to the study of film, television, radio, or other media. Students must make their own arrangements to secure relevant internships.

RTF X50N. Semester in New York Internship.
Internships to be arranged by student and approved by instructor.

RTF X52. Topics in Global Media and Area Studies.
Study of political, social, cultural, and economic factors affecting the use and impact of communication systems in selected regions, such as South Asia, Latin America, Middle East, Europe, East Asia, and Africa.

RTF X52.1. Media and the Middle East.
Addresses the role of media in the Middle East, considering communication texts, processes and industries in political, social, economic, and cultural contexts.

RTF X52.2. German Media: Print to Television.
Examine the history of media technology and its cultural and political implication in the German (speaking) context.

RTF X52.3. Modern Egypt in Film and Fiction.
Explore the history and culture of modern Egypt through selected readings in twentieth-century film and fiction.

RTF X59. Advanced Topics in Media and Culture.
Special topics related to the critical analysis of media in cultural contexts.

RTF X59.11. Apertures: Film and Photography Through Greater Mexico.
Exploration of the historical and aesthetic linkages and affinities between filmmakers and photographers working in greater Mexico, including prominent visitors and Americans of Mexican descent. Considers how Mexican culture is represented but also how borders between Mexico and the wider world--as well as among media--were blurred or brought into sharper focus by these exchanges.

RTF X59.3. Asian American Media Cultures.
Examine popular and critical roles, representations, and politics of Asian Americans in U.S. media including Hollywood cinema, U.S. network and cable television, Asian American independent film, and online media.

RTF X59.6. Gender, Race, and Sexuality in Sports Media.

RTF X59.7. Race and Digital Media Culture.

RTF X59.8. Women and Sports Media.

RTF X59C. Media Archaeology.
Exploration of the media as artifacts as opposed to narratives or texts. Focuses on the materiality of media within specific socio-cultural, economic, and technological time periods each with their own modes of historic and futuristic discourse.

RTF X59S. Topics in Media and Culture.
Special topics related to the critical analysis of media in cultural contexts.

RTF X59S.10. Gender and Media in the '60s.

RTF X59S.11. Brazilian Media.

RTF X59S.12. Gender and Fan Culture.

RTF X59S.13. Latin American Television.

RTF X59S.14. Latino Images in Film.

RTF X59S.15. Black Television Comedy.

RTF X59S.16. Fan Identities and Cultures.

RTF X59S.17. Chicana/o Cinema.

RTF X59S.18. Latina Filmmakers in the United States.

RTF X59S.5. Queer Media Studies.
Critical analysis of queer media. Read key queer (media) theory texts and explore dominant strategies used by the media industries, as well as those utilized by LGBTQ+ independents/subcultures, paying close attention to contested discourses of identity, politics, activism and desire. Explore historical shifts in the representation of LGBTQ+ individuals.

RTF X59S.7. Mixed Race US Film/Media.
An introduction to the evolving representation of mixed-race individuals, romance, and families and to mixed-race stars and producers in U.S. film, television, and new media since the silent film era.

RTF X59S.8. Latina/os and U.S. Media.
Survey of the representation and participation of Latinas and Latinos in U.S. English-language film and television from the silent film era to the present. Also focuses on issues Latina/os face as media producers, media consumers, and media activists.

RTF X59S.9. Latina Feminisms and Media.
Survey of Chicana and Latina feminist scholarship, activism, and creative expression with an emphasis on Latina media production and representation in U.S. entertainment media.

RTF X65. Topics in Media and Society.
Advanced topics addressing media, communication, and society.

RTF X65.10. Globalization and Social Media.
Issues surrounding the hype, myth, paradox, and reality of social media in a global context.

RTF X65.12. Mapping Latino Culture in East Austin.

RTF X65.13. Activist Media.

RTF X65.14. Queer Media and Activism.

RTF X65.15. Latinx Media, Arts, and Activism.
Investigate the ways in which Latinx activists have used mainstream, alternative, legacy, and new media (as well as other visual and performing arts), to affect social and political change in the United States.

RTF X65.4. History of United States Latino Media.

RTF X65.5. Latin American Media.

RTF X65.8. Migration and Media.
Advanced study of global media issues, including traditional and digital media use, social inclusion, and migration to the United States from Latin America, Asia, and elsewhere. Students conduct research on the relationships between media and migration.

RTF X65.9. Media Industries and Entrepreneurship.
Examination of the social, political, and economic contexts in which media and culture are produced, distributed, and monetized. Emphasis on new media and communication technologies.

RTF X65C. Topics in Media and Policy.
Advanced topics addressing media and policy in society.
RTF X66K. Topics in Introductory Production.
RTF X66K.2. Narrative Production.
A workshop in visual storytelling and non-dialogue filmmaking.
RTF X66K.3. Documentary Production.
Workshop in contemporary documentary practice, including directing, producing, cinematography, editing, sound recording, and distribution.
RTF X66K.4. East Austin Stories.
Students work in small production groups and make documentaries in and about East Austin for public screening at the end of the semester and for Webcasting.
RTF X66K.6. Experimental Film.
RTF X66K.7. Creating a Web Series.
RTF X66K.8. Collaborative Fan Content.
Meet creative and business executives from Rooster Teeth. Create original short content while learning how social media entertainment company Rooster Teeth thinks about the things they make. Examine how to bring an audience into the creative process from the start, learn from Rooster Teeth's success in emerging social media entertainment, and explore the role of community in the future of digital media.
RTF X66K.9. Latinx Filmmaking.
RTF X66S. Topics in Audio Production.
RTF X66S.1. Audio Production into Post.
RTF X66S.2. Sound Design and Mixing.
RTF X66S.3. Audio Storytelling.
RTF X67D. Directing Workshop.
Explores the role of the director, focusing on the director-actor relationship, narrative structure, and visual language.
RTF X67K. Producing Film and Television.
Examine the roles and responsibilities of a producer; including development, financing, pre-production, production, post-production, marketing, and distribution.
RTF X68. Advanced Production Topics.
Study production crafts in film, television, and other digital media.
RTF X68.3. Advanced Production.
RTF X68.6. Immersive Media Production.
Exploration of the theory and practice of immersive media: stereoscopy, artificial environments, and virtual reality.
RTF X68C. Advanced Directing.
Creation of collaborative, performance-based works that emphasize simplicity and ingenuity in image and sound choices. Works will adhere to a production code that is a modified version of the Dogme 95 Vow of Cinematic Chastity.
RTF X68D. Advanced Cinematography.
Study of the art of cinematography beyond the basic principles of camera and lighting. Group production of short films to explore the cinematic tools used to create an overall visual approach to storytelling. Examination of film genre, color, texture, lens continuity, aspect ratio, and practical on set strategies and challenges.
RTF X68P. Topics in Producing.
Explore various aspects of film and television producing.
RTF X68P.1. Producing Short Films.
RTF X68S. Topics in Undergraduate Thesis.
Advanced film production or media studies research.
RTF X68S.1. Film Production Thesis.
Intensive production workshop, designed for students who wish to produce a film for a portfolio.
RTF X68S.2. Media Studies Thesis.
An independent research project based on primary data, resulting in a written summary of theoretical foundations, methodological approach, results, and a discussion.
RTF X68S.3. Screenwriting Thesis.
Advanced screenwriting for film or television. Intensive writing workshop, designed for students who wish to produce a polished script suitable for submission to agents and competitions.
RTF X68S.4. Emergent Cinematic Arts Thesis.
RTF X69. Topics in Advanced Screenwriting.
Students develop and write original screenplays. Includes advanced study of screenplay structure, critical analysis of student and professional work, and intensive writing each week toward a completed script.
RTF X69.1. Advanced Screenwriting for Feature Films.
RTF X69.2. Advanced Screenwriting for Television.
RTF X69.3. Advanced Screenwriting: Television Pilots.
RTF X69.4. Advanced Screenwriting: Television Specs.
RTF X69.5. Advanced Screenwriting: Independent Films.
RTF X69.6. Advanced Screenwriting: Science Fiction and Horror.
RTF X69P. Topics in Advanced Producing.
Examine the behind-the-scenes production of feature films, commercials, and other media including scripts, shot lists, storyboards, shooting schedules, and visual effects.
RTF X69P.1. Script to Screen: Commercials.
Examine the behind-the-scenes creation and production of commercials for national brands including creative briefs, consumer insights, scripts, shot lists, storyboards, shooting schedules, visual effects, and behind-the-scenes footage.
RTF X69P.2. Script to Screen: Features.
RTF X69P.3. Script to Screen: Production.
Produce film projects developed in Radio-Television-Film 369P (Topic 1) or 369P (Topic 2).
RTF X70. Topics in Film Analysis and Criticism.
Analysis of critical methods, selected films, and selected critics.
RTF X70.1. Comedy in Film and Media.
RTF X70.10. Black Filmmakers after Blaxploitation.
RTF X70.11. Films of Billy Wilder.
RTF X70.2. Animation Studies.
RTF X70.3. Asian Horror Film.
RTF X70.4. Film Noir.
RTF X70.5. Films of Clint Eastwood.
RTF X70.6. Films of Alfred Hitchcock.
RTF X70.7. Films of Martin Scorsese.
RTF X70.8. Independent American Cinema.
RTF X70.9. Asian American Film.
RTF X77H. Advanced Topics in Media Studies.
Focus on specialized topics and issues in media history, theory, and criticism.
RTF X77H.1. Media and Popular Culture.
RTF X77H.3. Global Sports Media.
RTF X77S. Advanced Topics in Media Studies with Screenings.
Focus on specialized topics and issues in media history, theory, and criticism.
RTF X77S.1. Landscape and Cinema.
RTF X78H. Honors Tutorial Course.
Intensive reading, research, and/or production project.

Graduate Courses

RTF X19S. Topics in Radio-Television-Film.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RTF X29S. Topics in Radio-Television-Film.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RTF X80. Topics in Research Theory and Design.
Introduction to research theory and design. Designed to help students develop skills in understanding and critiquing current research, and in designing and proposing research projects.

RTF X80C. Screenwriting for Directors.
Introduction to the study and practice of writing for film and television.

RTF X80D. Topics in Media Industries.
Examine history, theory, and methods used in studying the media industries in different national and regional contexts.

RTF X80D.1. The Business of Hollywood.

RTF X80E. Topics in Media History.

RTF X80G. Topics in Research Practices.
Introduction to research implementation. Designed to help students develop skills in conducting a variety of research approaches.

RTF X80J. Topics in Theory and Principles of Dramatic Writing.
Introduction to theory and practice in narrative writing for film and electronic media.

RTF X80J.1. First-Year Screenwriting.

RTF X80J.2. First-Year Rewriting.

RTF X80M. Topics in Advanced Screenwriting.
Creation and development of written work for film and television production. Students will develop a major work, such as a full-length screenplay or television pilot.

RTF X80M.3. Advanced Screenwriting I.

RTF X80M.4. Advanced Screenwriting II.

RTF X80N. Screenwriting Topics.
Creation and realization of professional materials for film and television.

RTF X80N.1. Adaptation.
Covers adapting a screenplay from existing material. Write a film adaptation of a short story or similar source material, which will be assigned by the instructor. Create an outline or treatment, revise their writing extensively, and engage in weekly discussions of each other's work.

RTF X80N.2. Television Specs.
Introduction to the fundamentals of writing for television. Develop and write both a one-hour and half-hour television 'spec' based on an existing series.

RTF X80N.3. Writers Room Workshop.
Develop and write an entire season of an original television series. At the end of the semester, the show will be sent out for consideration by major networks and students will get full writing credit for their episodes.

RTF X80N.4. Writing for Series Television.
Covers how to write for both network and cable television. Analyze the dramatic elements of each genre, with each student completing a "spec script for a current sit-com and drama. Develop an original TV pilot as a class, from the original "franchise" premise through a completed story-outline for the pilot episode.

RTF X80N.5. Television Pilots.

RTF X80P. Production Workshop for Writers.
Exploration of cinematic storytelling through the production of short digital videos.

RTF X80S. Topics in Media History with Screening.

RTF X81K. Principles of Film and Television Production.
Study of film and video production aesthetics and techniques. Production costs borne by the student.

RTF X84I. Internship in Media Industries.
Participate in an internship at a media company or in an adjacent field.

RTF X85K. Topics in History of Film.
Survey of the history of the motion picture. Lectures and readings; screenings are required for some topics.

RTF X85K.1. Media, Memory, and the Archive.

RTF X85L. Topics in Seminar in Film History.
Advanced study and research in major directors, genres, periods, and movements of film history.

RTF X86. Topics in Analysis and Criticism of Film and Electronic Media.
Analysis and explication of representative critics, critical systems, genres, and artists.

RTF X86.2. Black Popular Culture.

RTF X86C. Topics in Seminar: Media Theory and Criticism.
Advanced study in media theory and criticism.

RTF X86C.1. Fan Identities and Cultures.

RTF X86C.2. Art and Activism.

RTF X86C.3. Race, Class, and Gender in American Television.

RTF X87C. Topics in Global Media.
Study of global media systems, theories, and processes.

RTF X87C.1. Media and Diaspora.

RTF X87C.2. Global Sports Media.

RTF X87D. Topics in Communication for Development and Social Change.
Study of how development institutions use communication strategies for social change, and how development discourse communicates assumptions about social change.

RTF X87W. Global Media: Study Abroad.
Research, analysis, and criticism of global media systems and issues. Students study at institutions outside the United States.

RTF X88. Research Problems in Specialized Fields of Radio-Television-Film.
Research project chosen from area of student's major interests.

RTF X88C. Research Problems: Doctoral Exam Preparation.
Research and reading in preparation for doctoral examinations.

RTF X88D. Research Problems in Specialty Fields of Radio-Television-Film.
Research project chosen from area of student's major interests.

RTF X88E. Research Problems in Specialized Fields of Radio-Television-Film.
Research project chosen from area of student's major interests.

RTF X88F. Topics in Radio-Television-Film Production.

RTF X88M. Topics in Practicum in Film and Television Production.
Production of projects in film and video. Production costs borne by the student.

RTF X88M.1. Pre-Thesis Production.

RTF X88M.3. Thesis Production.

RTF X88M.4. Thesis Postproduction.

RTF X88M.5. Pre-Thesis Film: Post-Production.

RTF X88P. Topics in Film and Video Production.
Production costs borne by the student.

RTF X88P.1. Cinematography.

RTF X88P.2. Acting for Filmmakers.
Explore core elements of acting technique through scene study, improvisation, and other exercises.

RTF X88P.3. Cinema Laboratory.

RTF X88P.4. Advanced Cinematography.

RTF X88P.5. Advanced Directing.
Create collaborative, performance-based works that emphasize simplicity and ingenuity in image and sound choices, adhering to a production code that is a modified version of the Dogme 95 Vow of Cinematic Chastity.

RTF X88P.6. Ears Only: Audio Storytelling.

RTF X88R. Project in a Specialized Field of Radio-Television-Film.

Completion of a research or creative project required for the report option of the master's degree.

RTF X88S. Research Problems in Specialized Fields of Radio-Television-Film: Production.

RTF X88T. Producing Film and Television.

Comprehensive consideration of the production process from the standpoint of fiscal and creative management; preproduction and production planning using computer budgeting and scheduling. Software costs borne by the student.

RTF X89. Topics in Media and Society.

Study of selected issues related to media and society.

RTF X89K. Topics in History of Broadcasting.

Principal eras of broadcast development, audience patterns, legal and industrial precedents of broadcast practices, contemporary industrial and institutional perspectives in radio and television.

RTF X89P. Topics in Producing.

Explore various aspects of film and television producing.

RTF X90C. Topics in Introduction to Editing Processes.

Introductory editing topics designed to build the foundation for later postproduction practice. Incorporates technical, aesthetic, and practical considerations into an overall view of editing as a process.

RTF X90C.1. Editing for Directors.

Introduction to editing designed to build the foundation for later postproduction practice and directorial work. Incorporate technical, aesthetic, and practical considerations into an overall view of editing as a process from the perspective of a director.

RTF X90E. Topics in Advanced Video Postproduction: Audio.

Theory and application of audio for screen image.

RTF X90F. Topics in Production Crafts.

Professional-level experiences in various topics in the production crafts.

RTF X90G. Introduction to Media Aesthetics and Techniques.

Introduction to physical and aesthetic aspects of sound, light, and image and to the science and technologies that record and reproduce them.

RTF X90N. Topics in Issues in New Media.

Issues in new media theory and practice.

RTF X93Q. Special Topics in Digital Media.

Applications and impact of digital media technologies.

RTF X95. Topics in Theory and Literature.

Advanced seminar surveying the literature of media and communication theories.

RTF X95.1. Theory and Literature for Doctoral Students: Social Science Approaches.

Surveys the literature of social science approaches to communication study.

RTF X95.2. Theory and Literature: Humanities Approaches.

Surveys the literature of humanities approaches to media studies.

RTF X95.3. Theory and Literature in Media Studies for Master's Students.

RTF X95.4. Theory and Literature I.

RTF X95.5. Theory and Literature II.

RTF X95C. Research Colloquium.

Lectures on subjects to be announced.

RTF X96. Portfolio in Media Production.

RTF X96P. Portfolio in Media Production.

RTF X98. Thesis.

RTF X98M. Master's Research and Writing.

Research and writing to complete masters thesis.

RTF X98R. Master's Report.

Preparation of a report to fulfill the requirement for the master's degree under the report option.

RTF X98T. Supervised Teaching in Radio-Television-Film.

Study of the teaching/learning process; practice in classroom presentation.

RTF X99W. Dissertation.

Professional Courses

RTF X19S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RTF X29S. Topics in Radio-Television-Film.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Radio-Television-Film. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RUS - Russian

Russian: RUS

Lower-Division Courses

RUS X01C. Intensive Russian I.

Emphasis on developing oral proficiency in Russian using intensive methods of instruction.

RUS X06. First-Year Russian I.

Emphasis on four-skills proficiency: listening, speaking, reading, and writing.

RUS X07. First-Year Russian II.

Emphasis on four-skills proficiency: listening, speaking, reading, and writing.

RUS X11C. Intensive Russian II.

Continuing intensive development of proficiency in Russian, with a focus on speaking and the reading of authentic texts.

RUS X12K. Second-Year Russian I.

Listening, speaking, reading, and writing at the second-year level.

RUS X12L. Second-Year Russian II.

Listening, speaking, reading, and writing at the advanced, second-year level.

RUS X19S. Topics in Russian.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RUS X29S. Topics in Russian.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

RUS X19S. Topics in Russian.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University

credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RUS X22C. Intermediate Russian Through Conversation.
Development of the basic skills of listening, speaking, reading, and writing, with special emphasis on oral communication.

RUS X22W. Intermediate Russian Through Writing.
Development of the basic skills of listening, speaking, reading, and writing, with a special emphasis on written expression.

RUS X26. Topics in Advanced Russian.
Designed to enhance the student's skills in a variety of functional areas. Topics may include advanced oral communication, stylistics, Russian for business, literary translation of legal and business documents, scientific and technical translation.

RUS X26.1. Vysotsky: His Life and Works.
An overview of the songs, films, and stage performances of Russia's premiere singer/song writer, Vladimir Vysotsky. Focus on his use of language and the cultural context of the times.

RUS X26.2. Russia at the Movies: 1936-1979.
Development of listening, speaking, and reading in Russian, while addressing stylistic shifts in the spoken language. Material will be drawn from a series of popular films from early to late Soviet cinema.

RUS X26.3. Russian Media, Business, and Public Policy.
Advanced writing and oral communication skills in the Russian language based on both tradition approach to grammatical and lexical studies of the language and innovative use of current Russian media, including newspaper and magazine articles, news programs, DVD clips, and short films. Development of ability to master both formal and informal knowledge of contemporary Russian and to discuss the most important issues of the Russian society.

RUS X26.4. Russia at the Movies since 1980.
Development of listening, speaking, and reading in Russian, while addressing stylistic shifts in the spoken language. Material will be drawn from a series of popular films from the late Soviet period to contemporary Russian cinema.

RUS X26.5. The Russian Short Story.
Introduction to short works of Russian literature by Pushkin, Gogol, Turgenev, Leskov, Dostoevsky, Tolstoy, Chekhov, Babel, Bulgakov, Solzhenitsyn, Tolstaya, Pelevin, and others. All readings and discussions are in Russian.

RUS X26C. Russian through Drama.
Focus on improving pronunciation, intonation, and public speaking skills in order to develop advanced proficiency in Russian. Explore an introduction to the life and works of Russian writer Anton Chekhov, and consider Chekhov's theater, the Stanislavsky method of acting, and the social context in which they developed.

RUS X26D. Russian through Global Debate.
Focus on developing an advanced level of spoken proficiency in Russian through the construction and delivery of arguments in a debate format. Explore the specialized lexicon and rhetoric of argumentation and debate discourse, while working within the subject frames of contemporary global issues: politics, economics, environment, social issues, and human rights.

RUS X26E. Advanced Russian Through History.
Practice Russian language skills in all areas of cultural and linguistic proficiency (speaking, listening, reading, and writing) while introducing major events and figures in Russian history from Kyivan Rus to the early twentieth century.

RUS X26F. Russian through Mass Media.
Examine societal, environmental, demographic and political issues in Russian-speaking countries.

RUS X29S. Topics in Russian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RUS X30D. Russian across Disciplines.
Read and discuss Russian language materials related to the subject matter of another designated course.

RUS X65T. The Art of Russian to English Translation.
Introduction to the art of translation from Russian to English and English to Russian. The focus is on translation of a variety of fiction and non-fiction texts, but instruction and practice in oral interpretation will also be available. Exposure to the variety of contemporary opportunities in the professional field of translation.

RUS X79. Conference Course in Russian Language or Literature.

RUS X79H. Honors Tutorial Course.
Supervised individual research on a literary or linguistic problem, which culminates in an honors paper of some length.

Graduate Courses

RUS X19S. Topics in Russian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RUS X29S. Topics in Russian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

RUS X80E. Topics in Advanced Russian.

RUS X80E.1. Cultural Geography of Russia.
Culture, history, and traditions of diverse people and ethnic groups of Russia from a geographical perspective.

RUS X80E.2. Russian through Drama.
Focus on improving pronunciation, intonation, and public speaking skills in order to develop advanced proficiency in Russian. Explore an introduction to the life and works of Russian writer Anton Chekhov, and consider Chekhov's theater, the Stanislavsky method of acting, and the social context in which they developed.

RUS X80E.3. Russian through Global Debate.
Focus on developing an advanced level of spoken proficiency in Russian through the construction and delivery of arguments in a debate format. Explore the specialized lexicon and rhetoric of argumentation and debate discourse, while working within the subject frames of contemporary global issues: politics, economics, environment, social issues, and human rights.

RUS X80E.4. Vysotsky: His Life and Works.
Explore the songs, films, and stage performances of Russia's premiere singer-songwriter, Vladimir Vysotsky. Focus on his use of language and the cultural context of the times.

RUS X80E.5. Russian Media, Business, and Public Policy.
Explore advanced writing and oral communication skills in the Russian language based on both a traditional approach to grammatical and lexical studies of the language and innovative use of current Russian media, including newspaper and magazine articles, news programs, DVD clips, and short films. Build both formal and informal knowledge of contemporary Russian and discuss the most important issues of Russian society.

RUS X80E.6. Advanced Russian Through History.
Practice Russian language skills in all areas of cultural and linguistic proficiency (speaking, listening, reading, and writing) while introducing major events and figures in Russian history from Kyivan Rus to the early twentieth century.

RUS X85. Topics in Russian Linguistics.
Sample topics include Old Russian and the history of the Russian literary language, as well as more specialized topics in synchronic, historical, or applied perspective.

RUS X92. Topics in Slavic Languages and Literatures other than Russian.
Topics include Bulgarian, Macedonian, Serbian/Croatian, Slovenian, Czech, Sorbian, Polish, Slovak, Ukrainian, and Belorussian.

RUS X95. Conference Course.
Study of individual problems in Slavic languages.

RUS X97P. Topics in Applied Linguistics and Pedagogy.
Study of topics in applied linguistics related to the teaching of Russian and other Slavic languages.

RUS X98T. Supervised Teaching in Russian.
Principles and methods of teaching Russian. Analysis of relevant foreign language teaching theories and methodologies, curriculum and curricular materials development for university and secondary school teachers of Russian.

Professional Courses

RUS X19S. Topics in Russian.

Graduate Courses

Professional Courses

S W - Social Work

Social Work: S W

Lower-Division Courses

S W X10. Introduction to Social Work and Social Welfare.
Introduction to the profession of social work including its fields of practice; values and ethics; its history and the social welfare policies that undergird it; its interactions with contexts which shape practice; and its promotion of social and economic justice to advance human rights, alleviate critical social problems, and promote wellbeing. Discuss engaging diversity and differences in social work practice.

S W X11. Introductory Topics in Social Work.
Selected introductory topics in the social work profession.

S W X11.3. Introduction to the Criminal Justice System.

S W X12. Generalist Social Work Practice: Knowledge, Values, and Skills.
Introduction to the fundamental values, ethics, skills, and knowledge relevant to generalist social work practice.

S W X13. Social Work Research Methods.
Introduction to social work values, the research process, problem formulation and conceptualization, measurement, research design and inference, single-subject design and practice evaluation, sampling, alternative data gathering techniques and analyses, and uses of research in social work.

S W X18. Social Work Statistics.
Introduction to the conceptual and quantitative tools used to describe and interpret data in the conduct of social work practice and research. Select, calculate, and interpret appropriate statistics applicable to common data analysis situations related to direct practice, administration and planning, and policy. Explore R statistical software to calculate statistics and present results.

S W X19S. Topics in Social Work.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Steve Hicks School of Social Work. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

S W X23K. Social Welfare Programs, Policies, and Issues.
Analyze contemporary social welfare policy issues and programs and discuss the relationship between social policy and social work practice. Explore the historical, political, economic, and social conditions that influence policy development in the United States. Use policy analysis

tools in order to examine how policy influences practice and planning decisions and how social workers can influence social welfare policy.

S W X27. Human Behavior and Social Environment.

Explore the biopsychosocial and cultural functioning of human beings across the life span using an ecological-systems lens and major developmental theories as a framework to guide the processes of assessment, intervention, and evaluation. Discuss the impact of the family, social groups, organizations, communities, and society on individuals during these stages of the life span. Examine empirically-based research reflecting a risk and resilience perspective in making client assessments and recommending appropriate interventions.

S W X29. Transformative Teams In Health Care.

Engage in interprofessional team work, including an examination of the backgrounds and contributions of different professions and teams. Identify examples of highly functional vs. dysfunctional team interactions. Explore integrated behavioral health for patient care.

S W X29S. Topics in Social Work.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Steve Hicks School of Social Work. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

S W X31. Applied Social Ethics.

Explore how membership in vulnerable population groups influences an individual's life experiences, world view, and increases risk factors for exposure to discrimination, economic deprivation, and oppression. Analyze human and civil rights and global interconnections of oppression. Examine the impact of discrimination and oppression by individuals and society on people of different backgrounds and orientations.

S W X32. Social Work Practice with Individuals and Families.

Examine the helping process within the context of an ecosystems developmental framework. Explore engaging clients in an appropriate working relationship; communication skills; identifying issues, problems, needs, resources, and assets; and planning for service delivery. Pay special attention to understanding, affirming, and respecting people from diverse backgrounds, including (but not limited to) groups distinguished by race, ethnicity, culture, class, gender, sexual orientation, religion, physical or mental ability, age, and national origin.

S W X33. Social Work Practice with Groups.

Explore group dynamics and effective leadership skills, through social work values and the ethical decision-making process. Discuss both task and treatment groups utilizing an ecosystems developmental framework. Pay special attention to understanding, affirming, and respecting groups with diverse backgrounds, including (but not limited to) race, ethnicity, culture, class, gender, sexual orientation, religion, physical or mental ability, age, and national origin. Explore social work group facilitation using empirically-based theories and interventions to achieve client goals.

S W X34. Social Work Practice in Organizations and Communities.

Examine the organizational context within which social services are delivered, including how funding, mandate, and organizational arrangements influence service delivery and factors to consider in efforts to modify existing organizational arrangements. Explore the interlocking and complex nature of culture and personal identity, discussing vulnerable populations and examining the factors that contribute to and constitute being at risk. Define, design, and implement strategies for effective practice with persons from diverse backgrounds.

S W X35. Facilitating Dialogues on LGBTQ Oppression: Peers for Pride in Action.

The second part of the Peers for Pride facilitation program; serves as a way for students in the program to use the information and skills learned in "Confronting LGBTQ Oppression." Students will continue to fine-tune their facilitation skills and continue learning about LGBTQ people on the UT campus and beyond.

S W X45. Social Work Applied Practice.

Explore the integration of theory and practice to strengthen the relationship between the classroom content and field. Examine the processes common to all social work practice, gender and cultural issues, and their impact on service delivery. Explore issues related to social and economic justice, vulnerable populations, cultural diversity, alleviating social problems, and the enhancement of human well-being.

S W X45F. Social Work Practicum Instruction I.

Participate in a practicum to apply knowledge and develop skills of social work practice.

S W X45G. Social Work Practicum Instruction II.

Apply knowledge and develop skills in social work.

S W X50. Special Topics in Generalist Social Work.

S W X55. Topics in Disability Studies.

S W X60K. Current Social Work Topics.

Designed to enable each student to undertake intensive study of selected aspects of social work practice.

S W X60K.10. Methods of Play Intervention.

S W X60K.11. Communication Skills in Interdisciplinary Settings.

S W X60K.12. Social Work in the Legal System.

S W X60K.13. Social Work in the School Setting.

S W X60K.14. Working with Youth Gangs.

S W X60K.16. Roots of Social and Economic Justice: An International Perspective.

S W X60K.17. Principles of Recovery and Relapse Prevention.

S W X60K.18. Mental Health Issues in Public Safety.

Designed to provide a basic understanding of mental health intervention and treatment related issues for students planning to work in the field of public safety.

S W X60K.21. Juvenile Justice: Systems, Policy, and Practice.

Introduction to the socio-historical context of the juvenile justice system and key micro, mezzo, and macro level issues for social service providers working with juvenile justice system-involved populations. Examine social theories used to explain why youth engage in behaviors deemed "delinquent;" social inequality in the juvenile justice system; juvenile justice system procedures; and practitioner and policy efforts to facilitate positive youth development within the juvenile justice system.

S W X60K.22. Parenting Interventions for Diverse Populations.

An overview of evidence-based interventions aimed at enhancing parenting across diverse populations. Explore advances and limitations in efforts to support parents in raising healthy and successful children from different backgrounds.

S W X60K.23. Introduction to Sport Social Work.

Examine social work practice in sporting environments and explore how to assist athletes at all levels of sports. Includes a focus on physical and mental health, parenting, youth, foster care, bereavement, and social services.

S W X60K.26. Death, Dying, and Practitioner Resilience.

Examine cultural, historical, and theoretical components of death, dying, and resilience in healthcare. Explore communicative, psychological, and sociological approaches to terminally ill patient communication and care. Discuss methods of achieving wellness and resilience in the face of adversity.

S W X60K.3. Treatment of Substance Use Disorders.
S W X60K.4. Social Work Practice with Abused and Neglected Children and Their Families.
S W X60K.5. Advanced Topics in Social and Economic Justice.
S W X60K.6. Contemporary Issues in Domestic Violence.
S W X60K.7. International Social Work.
S W X60K.8. Leadership in the Community.
S W X60K.9. Loss and Grief: Individual, Family, and Cultural Perspectives.
S W X67M. Social Justice and Change: A Critical International Perspective.
Explore the historical and contemporary contexts of the British welfare state, social work practice, and institutional efforts to address social injustice. Examine British culture and how the United Kingdom and the United States address pressing social issues. Discuss the rights, responsibilities, and actions of global citizenship in an increasingly global society.
S W X79H. Honors Tutorial Course.
Individual conference course in social work research and writing.

Graduate Courses

S W X81R. Human Behavior and the Social Environment.
Focuses on empirically based theories and conceptual approaches that form the foundation for social work practice and research with individuals and families in social systems.
S W X81S. Foundations of Social Justice: Values, Diversity, Power, and Oppression.
History, demographics, and cultures of various populations at risk with an emphasis on self-awareness and understanding the impact of discrimination and oppression by individuals and society on people of diverse backgrounds, abilities, and orientations.
S W X81T. Dynamics of Organizations and Communities.
The organizational and community context within which social services are delivered and the influence of funding, mandate, and organizational arrangements on service delivery, with attention given to populations at risk.
S W X82R. Social Policy Analysis and Social Problems.
Explore a historical perspective on the development of social welfare institutions, programs, and policies. Study current methods of policy analysis, evaluation of social problems, and advocacy for policy change.
S W X83C. Dual MSSW Program with Partner Institutions.
Social Work study at partner institutions.
S W X84F. Foundations of Social Work Practice I.
Introduction to social work practice methodology and the professional use of self in generalist practice with individuals, families, groups, organizations, and communities. Explore the generalist approach in social work practice in preparation for work with a variety of client systems including individuals, families, groups, organizations, and communities.
S W X84G. Foundations of Social Work Practice II.
Explore the application of theory and practice methods for effective and ethical service delivery to individuals, families, groups, organizations, and communities.
S W X85F. Generalist Practicum Instruction I.
Develop a social work perspective and skill in working with individuals, families, groups, organizations, and communities.
S W X85G. Generalist Practicum Instruction II.
Explore an advanced application of theory to practice and consider special issues.
S W X85R. Social Work Research Methods.
Examine and understand research processes and methods in social work, with the focus on consuming and analyzing research at all levels of social work practice.
S W X85T. Advanced Integrative Capstone in Social Work Knowledge and Practice.
Applies knowledge, skills, and theories to values and ethics, diversity, populations at risk, social and economic justice, human behavior and the social environment, social welfare policy, social work practice, research, and field education. Designed to be taken concurrently with Social Work 694R.
S W X87D. Direct Practice Immersion.
Learn through working in a professional agency and assisting clients.
S W X87G. Global Practicum Seminar: Critical Learning for Ethical Practice.
Explore foundational knowledge about global social work ethics, practice, and international dynamics.
S W X87R. Topics in Special Issues.
S W X87R.1. Loss and Grief: Individual and Family Perspectives.
S W X87R.13. Aging and Disability.
S W X87R.14. Family Support, Self-Determination, and Disability.
S W X87R.15. Introduction to Gerontology.
S W X87R.16. Developmental Disabilities and Self-Advocacy.
S W X87R.17. Making Systems Work for People with Disabilities.
S W X87R.18. The Social Construction of Disability.
S W X87R.19. Spirituality in Social Work Practice.
S W X87R.20. Dynamics of Substance Use Disorders.
S W X87R.22. Social Work in the School Setting.
S W X87R.23. Social Work Practice with Older Adults.
S W X87R.26. Spanish for Social Workers.
S W X87R.27. Women with Disabilities.
S W X87R.30. Contemporary Practice with Older Adults.
S W X87R.32. Psychosocial Oncology Practice and Research.
S W X87R.33. Child and Adult Attachment in Clinical Practice.
S W X87R.34. Introduction to Sport Social Work.
S W X87R.35. Ethical Dilemmas in Social Work Practice.
S W X87R.36. Social Work in Health Care.
S W X87R.38. Social Work with Military Personnel and Families.
S W X87R.39. Parenting Interventions for Diverse Populations.
S W X87R.40. Mindfulness and Social Work Practice.
S W X87R.42. Meaning Making and Resilience in Illness and Suffering.
S W X87R.43. Women's Health Policy.
S W X87R.44. Substance Use and Social Work Practice.
S W X87R.45. Suicide Prevention.
S W X87R.46. Incarceration and Disability.
S W X87R.47. Sexuality and Disability.
S W X87T. Transformative Teams in Health Care.
S W X88R. Topics in Advanced Research in Social Work: Seminar.
S W X88R.10. Quantitative Data Analysis I.
Introduction to fundamental concepts and statistical procedures used in social work research. Focus on computer applications for data analysis and development of basic skills in data file construction, management, and statistical analysis. Primary focus is on developing a conceptual and mathematical understanding of statistics needed for advanced work in research design, model development, model fitting and estimation, hypothesis testing, multivariate techniques, and interpretation of data.
S W X88R.11. Quantitative Data Analysis II.
Builds on the concepts and procedures introduced in Social Work (Topic 10). Designed to enable students to do a more thorough job of data analysis by introducing multivariate statistical procedures into their repertoire of statistical techniques. The primary focus is on using the

SPSS statistical package for calculating multivariate statistics, and the utilization of the statistical output in research findings.

S W X88R.12. Hierarchical Linear Modeling.

Provides an introduction to the basic concepts and applications of Hierarchical Linear Modeling (HLM). Subjects will include multilevel data structures, model building and testing, fixed and random effects, and interpretation of results.

S W X88R.13. Grant Writing For Prevention and Clinical Intervention Research.

Explore principles of grant writing with special focus on standards expected by leading federal funding agencies, e.g. National Institutes of Health. Conceptualize grant proposals according to social justice principles with the goal of benefiting under-served populations. Produce an exploratory/developmental grant proposal with an explicit focus on prevention or clinical intervention.

S W X88R.14. Research Methods in Minoritized Populations.

Examine scholarly discourse with respect to social science research methods that include race, ethnicity, and other minoritized identities as variables, or that is conducted in and with minoritized communities.

S W X88R.15. Quantitative Research Methods.

Introduction to the basic elements and process of quantitative research design in the social sciences, with particular attention to social work research.

S W X88R.16. Qualitative Data Analysis.

Focus on the epistemological and practical issues of analyzing qualitative data and writing up the results. Gain expertise in analyzing qualitative data through four major approaches: thematic analysis, phenomenological analysis, grounded theory, and narrative analysis.

S W X88R.17. Qualitative Research Methods.

Introduction to the philosophical and methodological issues of qualitative research which covers epistemologies, theoretical perspectives, mixed methods research, and systematic research approaches.

S W X88R.18. Policy Theories and Social Context: Applications for Research.

Explore policy theory, its application, and critique, being equipped with the conceptual and analytical tools necessary for policy-focused research. Focus on both skill development and the critical understanding of theoretical frameworks, preparing to engage in advanced research in public policy. Investigate the processes and mechanisms through which policies are developed, implemented, evaluated, and evolved.

S W X88R.19. Community Engaged Research Methods.

Introduction to the philosophical, methodological, and ethical issues of conducting community engaged research. Explore types of community-based participatory approaches to research, key methodological aspects of these approaches, and insights from projects across different cultural contexts and academic disciplines, showing ways in which community participants and citizen scientists can be involved in co-designing different stages of the research cycle. Examine key issues to consider when involving community participants at each step of the research process, including the voices of people with lived experience directly, and draw out conclusions and point ways forward for future research.

S W X88R.2. Research Methods II.

Designed to provide students with the knowledge and competence needed to successfully design, conduct and publish quantitative studies in peer-reviewed journals. Designed to be concrete and to use a "hands-on approach to gaining mastery over the technical, narrative, and strategic elements of conducting original research with quantitative data.

S W X88R.5. Structural Equation Modeling.

Introduction to the basic concepts and applications of Structural Equation Modeling (SEM) using the AMOS program. Explores conducting factor analysis, testing causal structures, testing model structure invariance and mean invariance through multigroup analyses, and examining change over time with growth curve modeling.

S W X88R.9. Secondary Data Analysis.

Introduction to the advantages and challenges of working with secondary data, involving hands on experience with the preparation and data analysis of large data sets. Subjects include the basics of Confirmatory Factor Analysis, Structural Equation Modeling, and Multi-group analyses using AMOS software.

S W X90N. Topics in Strategies of Intervention: Seminar.

A critical evaluation of social work intervention strategies in human services, using alternative theoretical perspectives.

S W X90N.2. Theories of Social Work Practice.

Conceptualization, development, and application of social work theories and major theoretical paradigms are covered. Examination of philosophical, theoretical, and empirical underpinnings of different social work practice theories with an emphasis on understanding and critically analyzing the philosophical assumptions and scientific basis of various theories. Explores the historical context of different theories covered and research on their effectiveness within social work. Discussion of major theories from diverse disciplines.

S W X92R. Topics in Social Welfare Policy Analysis.
S W X92R.1. Integrated Health Care Policy.
S W X92R.2. Children and Families.
S W X92R.3. Poverty and Public Policy.
S W X92R.4. Social Policy for the Aging Population.
S W X92R.5. Social Determinants of Health and Health Policy.
S W X93R. Topics in Advanced Clinical Practice.
S W X93R.1. Clinical Assessment and Differential Diagnosis.
S W X93R.13. Cognitive-Behavioral Therapy.
S W X93R.15. Couples Counseling.
S W X93R.16. Coexisting Psychiatric and Substance Use Disorders.
S W X93R.18. Grief Counseling.
S W X93R.20. Methods of Play Intervention.
S W X93R.21. Motivational Interviewing.
S W X93R.22. Neurobiology and Social Work Practice.
S W X93R.23. Treatment of Substance Use Disorders.
S W X93R.24. Treatment of Children and Adolescents.
S W X93R.26. Theories and Methods of Group Intervention.
S W X93R.29. Crisis Intervention.
S W X93R.3. Theories and Methods of Family Intervention.
S W X93R.30. Solution-Focused Brief Therapy.
S W X93R.31. Neurodevelopment and Trauma.
S W X93R.9. Assessment and Treatment of Traumatized Populations.
S W X93T. Topics in Advanced Macro Practice.
S W X93T.11. International Social Work.
S W X93T.14. Psychiatric Disabilities: From the Inside Out.
S W X93T.16. Social Work Leadership in Human Service Systems.
S W X93T.18. Nonprofit Management in Human Services.
S W X93T.20. Information Systems and Communication in Social Work.
S W X93T.22. Community Building.
S W X93T.23. Advanced Policy Practice.
S W X93T.25. Social Change and Community Practice.
S W X93T.26. Cross-Disciplinary Global Project Development in the United States and Abroad.
S W X93T.28. Program Evaluation.
S W X93T.29. Financial Management in Human Services.
S W X93T.30. Grant Writing and Resource Development.
S W X93T.31. Collaborative Leadership through Public and Private Partnerships.
S W X93T.32. Social Work Leadership for the Public Good.
S W X93T.8. Community Engagement and Management of Volunteers.
S W X93T.9. Community Organizing and Social Change.
S W X93U. Topics in Social Justice and Populations at Risk.
S W X93U.1. Social Work Practice with Abused and Neglected Children and Their Families.
S W X93U.10. Women and Substance Use Disorders: Contemporary Issues.
S W X93U.16. Assessment and Treatment of Juvenile Offenders.
S W X93U.18. Restorative Justice.
S W X93U.22. Contemporary Issues in Domestic Violence.
S W X93U.23. Contemporary Issues and Practice in Sexual Assault.
S W X93U.24. Advanced Issues in Social and Economic Justice.
S W X93U.32. Communication Skills in Interdisciplinary Settings.
S W X93U.33. Community Participatory Research on Health Disparities.
S W X93U.34. Mitigation Matters.
S W X93U.36. Juvenile Justice: Systems, Policy, and

S W X95F. Colloquium on Issues in Social Work Education and Research I.
Focus on professional development and program requirements and expectations. Explore core topics and cohort-specific sessions using readings, reflection exercises, and discussions.
S W X95J. Research in Social Work.
Individually supervised development of the comprehensive research paper.
S W X95K. Topics in Conference Course in Social Work.
Introduction to the diversity of topics and methods pursued by researchers and academicians in social work education and allied fields. Topics covered are broad and include information that facilitates the learning of research methods and the development of knowledge and skills needed to participate in the PhD program and within a community of scholars.
S W X95L. Research Practicum.
Individually supervised research experience.
S W X95N. Colloquium on Issues in Social Work Education and Research II.
Focus on the development of essential knowledge and skills in the social work field. Explore critical issues and diverse methodologies that enhance understanding of research practices pursued by researchers and academicians.
S W X95S. Area of Specialization Course.
Demonstrate knowledge in the substantive issues, key research questions, theory, empirical evidence, and implications in an area of specialization.
S W X95W. Writing Practicum.
Individually supervised development of publishable written material.
S W X97M. Social Justice and Change: A Critical International Perspective.
Explore the historical and contemporary contexts of the British welfare state, social work practice, and institutional efforts to address social injustice. Immerse in British culture and explore how the U.K. and the U.S. address pressing social issues. Discuss the rights, responsibilities, and actions of global citizenship in an increasingly global society.
S W X98T. Pedagogy in Social Work.
Focus on learning theory, the science of higher education teaching, social work curriculum and accreditation, course development, and creating supportive classroom environments.
S W X99W. Dissertation.

Professional Courses

SAL - South Asian Languages

South Asian Languages: SAL

Lower-Division Courses

SAL X06. Topics in First Year South Asian Languages I.
Emphasis on four-skills proficiency: listening, speaking, reading, and writing.
SAL X07. Topics in First Year South Asian Languages II.
Emphasis on four-skills proficiency: listening, speaking, reading, and writing.
SAL X12K. Topics in Second Year South Asian Languages I.
Listening, speaking, reading, and writing at the second-year level.
SAL X12L. Topics in Second-Year South Asian Languages II.
Listening, speaking, reading, and writing at the advanced, second-year level.
SAL X19S. Topics in South Asian Languages.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken

in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SAL X29S. Topics in South Asian Languages.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

Professional Courses

SAN - Sanskrit

Sanskrit: SAN

Lower-Division Courses

SAN X06. First-Year Sanskrit I.
Introduction to basic grammatical principles, with reading of Ramayana episodes as illustrations.

SAN X07. First-Year Sanskrit II.
Detailed study of problems of grammar and syntax; reading of extracts from Hitopadesha and the Bhagavad Gita.

SAN X12K. Second-Year Sanskrit I.
Introduction to classical Sanskrit prose literature; readings from the Epics and Kathasaritsagara.

SAN X12L. Second-Year Sanskrit II.
Introduction to classical Sanskrit poetry and philosophical literature; readings from the Upanishads and Kalidasa's Meghaduta.

SAN X19S. Topics in Sanskrit.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SAN X29S. Topics in Sanskrit.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

Upper-Division Courses

SAN X19S. Topics in Sanskrit.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SAN X25K. Advanced Sanskrit Readings and Composition I.

SAN X25L. Advanced Sanskrit Readings and Composition II.

SAN X29S. Topics in Sanskrit.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

SAN X30. Topics in Sanskrit Language and Literature.

SAN X30.1. Sanskrit Drama.
Provides students with a firmer foundation in Sanskrit grammar, syntax, and vocabulary; and an appreciation of the aesthetics of Sanskrit drama.

SAN X30.2. Vedic Poetry.
Religious and literary features of Vedic poetry, the development of Vedic Sanskrit, and the relation of Vedic to Classical Sanskrit.

SAN X30C. Bhagavata Purana.
Examine the famous Bhagavata-Purana, a collection of stories and theologies of Vaisnava Hinduism, with a focus on selected readings from the tenth book or canto of the text, which contains a theological biography of Krsna. Develop both broad and deep knowledge of the text, and explore its significance within Sanskrit intellectual, literary, and religious histories.

SAN X30D. Kumarasambhava of Kalidasa.
Focus on the third and fifth cantos of the Kumarasambhava of Kalidasa, a poetic masterpiece of Sanskrit literature. Consider the poetics and compositional style of the text, the style of Sanskrit commentary, and the translation of complex Sanskrit verse into English, as well as the mythological assumptions, social perspectives, and cultural concerns that inform the text.

SAN X30E. Dharmasastra.
Examine selected topical readings from the genre of Sanskrit literature called Dharmasastra, also known loosely as Hindu law, with focus on legal and religious topics of dharma from the earliest sutras to the smrtis to the later commentaries and digests.

SAN X30F. Buddhist and Jain Sanskrit.
Examine selections from important texts of Buddhist and Jain traditions with a focus on the Sanskrit vocabulary and style of these traditions, as well as their conceptual, doctrinal, and narrative foundations. Focus on both systematic expositions of religious doctrine (sastra, darsana), and on narrative theologies (katha, carita, avadana) to facilitate comparison between the two religious traditions.

SAN X30G. Purva-Mimamsa.
Examine the Purva-Mimamsa, the system of hermeneutics developed to interpret the intricate ritual prescriptions of the Brahmana texts in the Vedic corpus. Explore this system through study of a primer of Mimamsa hermeneutics in Sanskrit, and through secondary readings providing context and broader background to the influence of Mimamsa.

SAN X30J. Vedanta.
Explore the multiplicity of "Vedanta," the collection of philosophical and hermeneutic systems that became influential in India since the second millennium.

SAN X30U. The Upanishads.

SAN X60. Conference Course in Sanskrit Language and Literature.
Supervised individual study of selected problems in Sanskrit language or literature.

Graduate Courses

SAN X19S. Topics in Sanskrit.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SAN X29S. Topics in Sanskrit.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken

in residence. Transfer work is awarded for work in an affiliated studies program.

SAN X81. Conference Course in Sanskrit Language and Culture.

Supervised individual study in Sanskrit language or culture.

SAN X84S. Topics in Sanskrit Language and Culture.

Study of various aspects and periods of Sanskrit language and culture.

SAN X84S.1. Advanced Readings in Sanskrit.

SAN X84S.10. Purva-Mimamsa.

Examine the Purva-Mimamsa, the system of hermeneutics developed to interpret the intricate ritual prescriptions of the Brahmana texts in the Vedic corpus. Explore this system through study of a primer of Mimamsa hermeneutics in Sanskrit, and through secondary readings providing context and broader background to the influence of Mimamsa.

SAN X84S.11. Vedanta.

Explore the multiplicity of "Vedanta", the collection of philosophical and hermeneutic systems that became influential in India since the second millennium.

SAN X84S.2. Readings in Classical Sanskrit Prose and Literature.

SAN X84S.3. Sanskrit Drama.

Provides students with a firmer foundation in Sanskrit grammar, syntax, and vocabulary; and an appreciation of the aesthetics of Sanskrit drama.

SAN X84S.4. Vedic Poetry.

Religious and literary features of Vedic poetry, the development of Vedic Sanskrit, and the relation of Vedic to Classical Sanskrit.

SAN X84S.5. The Upanishads.

SAN X84S.6. Bhagavata Purana.

Examine the famous Bhagavata-Purana, a collection of stories and theologies of Vaisnava Hinduism, with a focus on selected readings from the tenth book or canto of the text, which contains a theological biography of Krsna. Develop both broad and deep knowledge of the text, and explore its significance within Sanskrit intellectual, literary, and religious histories.

SAN X84S.7. Kumarasambhava of Kalidasa.

Focus on the third and fifth cantos of the Kumarasambhava of Kalidasa, a poetic masterpiece of Sanskrit literature. Consider the poetics and compositional style of the text, the style of Sanskrit commentary, and the translation of complex Sanskrit verse into English, as well as the mythological assumptions, social perspectives, and cultural concerns that inform the text.

SAN X84S.8. Dharmasastra.

Examine selected topical readings from the genre of Sanskrit literature called Dharmasastra, also known loosely as Hindu law, with focus on legal and religious topics of dharma from the earliest sutras to the smrtis to the later commentaries and digests.

SAN X84S.9. Buddhist and Jain Sanskrit.

Examine selections from important texts of Buddhist and Jain traditions with a focus on the Sanskrit vocabulary and style of these traditions, as well as their conceptual, doctrinal, and narrative foundations. Focus on both systematic expositions of religious doctrine (sastra, darsana), and on narrative theologies (katha, carita, avadana) to facilitate comparison between the two religious traditions.

Professional Courses

SAN X19S. Topics in Sanskrit.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SAN X29S. Topics in Sanskrit.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

SCI - Science

Science: SCI

Lower-Division Courses

SCI X19S. Topics in Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Science Education Center. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SCI X29S. Topics in Science.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Science Education Center. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SCI X60. Topics in Recent Advances in Science: Seminar.

Recent advances in the life, earth/space, and physical sciences.

SCI X60.1. Life Science.

SCI X60.2. Earth Science.

SCI X60.3. Physical Science.

SCI X65. Physics by Inquiry.

Investigates two areas of natural sciences and technology: electric circuits, an engineered phenomenon, and optics, the interaction of light and vision, physical and biological natural phenomena.

Graduate Courses

Professional Courses

SDS - Statistics and Data Sciences

Statistics and Data Sciences: SDS

Lower-Division Courses

SDS X01. Elementary Statistical Methods.

Covers the fundamental procedures for data organization and analysis. Subjects include frequency distributions, graphical presentation, sampling, experimental design, inference, and regression.

SDS X02F. Foundations of Data Analysis.

Introduction to data analysis and statistical methods. Subjects include random sampling; principles of observational study and experimental design; data summaries and graphics; and statistical models and inference, including the simple linear regression model and one-way analysis of variance.

SDS X13. Introduction to Data Science.

Introduction to the principles and practice of data science. Explore R and reproducible data analysis; summarizing data using descriptive statistics; data visualization and storytelling; data wrangling and relational data; basic prediction and classification using regression models; and programming in R.

SDS X15. Statistical Thinking.

Introduction to the fundamental ideas of statistical thinking with R programming. Explore survey, experimental, and observational study design; common sources of random and systematic error in data; the

bootstrap as a tool for quantifying uncertainty; hypothesis testing; regression; and the role of statistics in an ethical and just society.

SDS X19S. Topics in Statistics and Data Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Statistics and Data Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SDS X20E. Elements of Statistics.

Introduction to statistics. Subjects include probability; principles of observational study and experimental design; statistical models and inference, including the multiple linear regression model and one-way analysis of variance. R programming is introduced.

SDS X20H. Elements of Statistics: Honors.

Introduction to statistics. Subjects include probability; principles of observational study and experimental design; statistical models and inference, including the multiple linear regression model and one-way analysis of variance. R programming is introduced.

SDS X21. Introduction to Probability and Statistics.

Covers fundamentals of probability, combinatorics, discrete and continuous random variables, jointly distributed random variables, and limit theorems. Using probability to introduce fundamentals of statistics, including Bayesian and classical inference.

SDS X22E. Elements of Data Science.

Explore data science tools and examine data wrangling; exploratory data analysis and data visualization; markdown and data workflow; simulation-based inference; and classification methods. R programming is emphasized and Python programming is introduced.

SDS X24E. Elements of Regression Analysis.

Explore the use of regression analysis in applied research and learn about multiple linear regression; ANOVA; logistic regression; random and mixed-effects models; and models for dependent data. Engage in the identification of appropriate statistical methods and interpretation of software output. R programming is introduced.

SDS X25H. Honors Statistics.

An introduction to the fundamental theories, concepts, and methods of statistics. Emphasizes probability models, exploratory data analysis, sampling distributions, confidence intervals, hypothesis testing, correlation and regression, and the use of statistical software.

SDS X26E. Elements of Statistical Machine Learning.

Introduction to the concepts and tools of data science, statistics, and machine learning used to draw inferences about large-scale and real-world data. Explore data visualization, linear and nonlinear models, regularization, classification, resampling, tree-based methods, support vector machines, and unsupervised learning.

SDS X29S. Topics in Statistics and Data Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Statistics and Data Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SDS X31. Probability and Statistical Inference.

Introduction to probability and statistical inference. Examine events and random experiments; basic rules of probability; joint, conditional, and marginal probability and independence; discrete and continuous random variables; random sampling and estimation; large-sample theory results and central limit theorem-based inferential summaries; and maximum likelihood estimation.

SDS X34. Intermediate Statistical Methods.

Introduction to applied regression analysis. Explore estimation and inference in multiple regression models; logistic regression; regression for count data; time-to-event models; and case studies in regression modeling in published work, emphasizing both the use and limitations of regression modeling in advancing scientific knowledge.

SDS X36. Practical Machine Learning.

Introduction to machine learning for data science with an emphasis on Python programming. Explore comparing algorithm performance; decision-tree algorithms; classification algorithms; model averaging; unsupervised learning; and neural networks.

SDS X54. Advanced Statistical Methods.

Explore advanced methods in statistics and data science. Examine modeling data with multilevel (hierarchical) structure and causal inference, including design and analysis strategies. Discuss smoothing methods; spatial and time series models; additive models; and models for network data.

SDS X57. Case Studies in Data Science.

Explore advanced case studies in data science, with an emphasis on the full data analysis pipeline. Examine data collection, identification of data limitations; data privacy; data preparation and exploration; building, using, and evaluating models; creating data products; and communication and persuasion with data.

SDS X64. Bayesian Statistics.

Introduction to the Bayesian approach for statistical inference. Explore prior, posterior, and predictive distributions: conjugate priors; informative and non-informative priors; models for normal, categorical, and count data; Bayesian computation, including MCMC and the Gibbs sampler; hierarchical models; and Bayesian model checking and model selection.

SDS X65. Special Topics in Statistics and Data Science.

Examine concepts of statistics and data science.

SDS X65.1. Sports Analytics.

Explore fundamental principles and methods of sports analytics. Participate in practical experience in collecting and analyzing sports data. Discuss data collection, metric estimation and evaluation, predictive modeling, match-up models, game simulation, and in-game decision making.

SDS X65.2. Data Product Development.

Learn the fundamentals of creating data products using technologies like Shiny, R packages, and interactive graphics tools. Explore interactive maps, machine learning application programming interfaces, dashboards, and data storytelling. Focus on both the statistical details and the design process for building effective data products.

SDS X66. Data Visualization.

Explore how to visualize data sets. Reason about, and communicate with, data visualizations.

SDS X68. Statistical Theory.

Introduction to the mathematical theory of statistics. Explore maximum likelihood estimation, confidence intervals, hypothesis tests and statistical decision theory, tail and concentration bounds, concentration of measure, and nonparametric statistics.

SDS X74C. Parallel Computing for Science and Engineering.

Study of parallel computing principles, architectures, and technologies; and parallel application development, performance, and scalability. Designed to help prepare students to formulate and develop parallel algorithms to implement effective applications for parallel computing systems.

SDS X74E. Visualization and Data Analysis for Science and Engineering.

Scientific visualization principles, practices, and technologies, including remote and collaborative visualization. Introduces statistical analysis, data mining, and feature detection.

SDS X75. Special Topics in Scientific Computation.

SDS X78. Introduction to Mathematical Statistics.

Sampling distributions of statistics, estimation of parameters (confidence intervals, method of moments, maximum likelihood, comparison of estimators using mean square error and efficiency, sufficient statistics), hypothesis tests (p-values, power, likelihood ratio tests), and other topics.

SDS X78P. Decision Analytics.

Examine decision theory with utility functions, including the use of probability, optimization, constrained optimization, and linear algebra.

SDS X79H. Honors Undergraduate Research.

Design an individual research project under the supervision of one or more faculty members.

SDS X79R. Undergraduate Research.

Students work on an individual research project under the supervision of one or more faculty members.

Graduate Courses

SDS X80C. Statistical Methods I.

Introduction to the fundamental concepts and methods of statistics. Includes descriptive statistics, sampling distributions, confidence intervals, and hypothesis testing. May include simple and multiple linear regression, analysis of variance, and categorical analysis. Use of statistical software is emphasized.

SDS X80D. Statistical Methods II.

Continuation of Statistics and Data Sciences 380C (or Statistics and Scientific Computation 380C). Surveys advanced statistical modeling and may include random and mixed effects models, time series analysis, survival analysis, Bayesian methods, and multivariate analysis of variance. Use of statistical software is emphasized.

SDS X81M. Topics in Statistics and Data Science Foundations.

Examine core concepts of statistics and data science.

SDS X83C. Statistical Modeling I.

An introduction to core applied statistical modeling ideas from a probabilistic, Bayesian perspective. Topics include exploratory data analysis, programming in R, Bayesian probability models, an introduction to the Gibbs sampler, applied regression analysis, and hierarchical models.

SDS X83D. Statistical Modeling II.

Use of structured, probabilistic models that incorporate multiple layers of uncertainty to describe real-world systems. Topics include multivariate normal distribution, mixture models, nonparametric Bayesian analysis, advanced hierarchical models and latent-variable models, generalized linear models, and advanced topics in linear and nonlinear regression.

SDS X83K. Topics in Data Analysis Applications.

Introduction to the use of statistical or mathematical applications for data analysis.

SDS X84. Topics in Statistics and Probability.

Concepts of probability and mathematical statistics with applications in data analysis and research.

SDS X84.1. Applied Probability.

Basic probability theory, combinatorial analysis of random phenomena, conditional probability and independence, parametric families of distributions, expectation, distribution of functions of random variables, and limit theorems.

SDS X84.10. Stochastic Processes.

Concepts and techniques of stochastic processes, with emphasis on the nature of change of variables with respect to time. Includes characterization, structural properties, and inference.

SDS X84.11. Theoretical Statistics.

Examination of asymptotic theory and empirical processes. The former would include minimax theory, Bernstein von Mises theorem, and Bayesian asymptotics. The latter, would include U statistics and robust estimation.

SDS X84.2. Mathematical Statistics I.

The general theory of mathematical statistics. Includes distributions of functions of random variables, properties of a random sample, principles of data reduction, an overview of hierarchical models, decision theory, Bayesian statistics, and theoretical results relevant to point estimation, interval estimation, and hypothesis testing.

SDS X84.3. Mathematical Statistics II.

Continuation of Computational Science, Engineering, and Mathematics 384R and Mathematics 384C.

SDS X84.4. Regression Analysis.

Simple and multiple linear regression, inference in regression, prediction of new observations, diagnosis and remedial measures, transformations, and model building. Emphasis on both understanding the theory and applying theory to analyze data.

SDS X84.6. Design and Analysis of Experiments.

Design and analysis of experiments, including one-way and two-way layouts; components of variance; factorial experiments; balanced incomplete block designs; crossed and nested classifications; fixed, random, and mixed models; and split plot designs.

SDS X84.7. Bayesian Statistical Methods.

Fundamentals of Bayesian inference in single-parameter and multi-parameter models for inference and decision making, including simulation of posterior distributions, Markov chain Monte Carlo methods, hierarchical models, and empirical Bayes models.

SDS X84.8. Time Series Analysis.

Introduction to statistical time series analysis. Includes autoregressive integrated moving average (ARIMA) and more general models, forecasting, spectral analysis, time domain regression, model identification, estimation of parameters, and diagnostic checking.

SDS X84.9. Computational Statistics.

Modern, computation intensive statistical methods, including simulation, optimization methods, Monte Carlo integration, maximum likelihood estimation and expectation-maximization parameter estimation, Markov chain Monte Carlo methods, resampling methods, and nonparametric density estimation.

SDS X85. Topics in Applied Statistics.

Theories, models, and methods for the analysis of quantitative data.

SDS X86M. Topics in Statistics and Data Science Extensions.

Examine concepts of statistics and data science.

SDS X86M.1. Data Visualization.

SDS X87. Linear Models.

An exploration of practical applications of the projection approach to linear models, building from a review of essential linear algebra concepts to the theory of linear models from a projection-based perspective. Introduction to Bayesian ideas. Additional topics include analysis of variance, generalized linear models, and variable selection techniques.

SDS X89R. Graduate Research.

Individual research project supervised by one or more faculty members.

SDS X90. Readings in Statistics.

Faculty directed research seminar. Activities may vary, but will include readings of cutting-edge research papers, discussion of on-going student and faculty projects, and consulting projects.

SDS X91P. Topics in Statistics and Data Science Foundations.

Examine advanced core concepts of statistics and data science.

SDS X91P.1. Advanced Statistical Modeling and Applications I.

SDS X91P.2. Advanced Statistical Modeling and Applications II.

Examine the use of structured, probabilistic models that incorporate multiple layers of uncertainty to describe real-world systems. Analyze generalized linear models, Gaussian processes, advanced hierarchical models and latent-variable models, and advanced linear and nonlinear regression.

SDS X91P.3. Theory of the Linear Model.
Explore the mathematical underpinnings and theory of linear regression modeling in likelihood and assumption-lean settings. Discuss linear algebra, regularization, asymptotic statistics, and minimax optimality.

SDS X91P.4. Computational Inference.
Examine computational methods for inference in statistical models. Explore inference methods, their properties, and their applicability. Discuss deterministic and stochastic optimization, Monte Carlo methods, and variational inference.

SDS X91P.5. Concepts in Mathematical Statistics.
Examine key concepts and ideas behind the mathematics associated with statistical procedures. Analyze derivations of well-known practices, such as point estimation, uncertainty quantification, hypothesis testing, nonparametric methods, and the analysis of various types of models, and their asymptotic properties.

SDS X91P.6. Theoretical Statistics and Machine Learning.
Examine concentration inequalities and asymptotic theory. Explore Hoeffding, Chernoff, Bernstein, Martingale-based methods, the Efron-Stein inequality, the Gaussian Lipschitz theorem, U statistics, uniform laws of large numbers, VC dimension, covering and packing. Practice high-dimensional covariance estimation and resampling.

SDS X93C. Numerical Analysis: Linear Algebra.
Survey of numerical methods in linear algebra: floating-point computation, solution of linear equations, least squares problems, algebraic eigenvalue problems.

SDS X93D. Numerical Analysis: Interpolation, Approximation, Quadrature, and Differential Equations.
Survey of numerical methods for interpolation, functional approximation, integration, and solution of differential equations.

SDS X96P. Topics in Statistics and Data Science Extensions.
Examine advanced concepts of statistics and data science.

SDS X96P.1. Statistical Machine Learning Optimization.
Introduction to machine learning and optimization methods from a statistical perspective with an emphasis on mathematical theory and applications.

SDS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

SDS X98T. Supervised Teaching in Statistics and Data Sciences.
Supervised teaching experience; weekly group meetings, individual consultations, and reports.

SDS X99W. Dissertation.

Professional Courses

SED - Special Education

Special Education: SED

Lower-Division Courses

SED X02. Topics in Special Education.

SED X03. Autism Spectrum Disorder: Truths and Consequences.
Focus on approaches and strategies that help improve the lives of people with ASD. Examines the role research plays in what people know about various claims. Explores how research findings are communicated, and how to best translate research findings into everyday language.

SED X19S. Topics in Special Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Special Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SED X97P. Graduate Internship.
Supervised practice in a professional position.

Upper-Division Courses

SED X22C. Individual Differences.
Explore individual differences among people through the life span. Examine areas of exceptionality within the context of typical development: current research trends; theoretical and legal considerations; and practice-related issues, including family involvement, cultural and linguistic diversity, and educational perspectives.

SED X27. Sociocultural Influences on Learning.
Discuss human learning in multisocial, multilingual, and multicultural contexts; realities of society and their impact on learning; and social concerns such as prejudice, stereotyping, cross-cultural attitudes, bilingual issues, and parent and community involvement.

SED X29S. Topics in Special Education.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Special Education. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SED X32. Field Experiences in Special Education.
Observation and participation in a variety of educational settings that serve children with disabilities.

SED X37. Intercultural Communication and Collaboration.
Basic principles of interpersonal and intergroup communication in culturally and linguistically diverse educational settings. Designed to help students understand the relationship between culture, language, and disability using a variety of formats, including discussion, dialogue, journals, simulations, case studies, and field-based assignments.

SED X60R. Teaching Residency and Seminar.
Participate in a supervised practicum in special education classroom teaching, conducted in cooperating schools, as part of the teacher preparation program including teaching, analysis, and evaluation.

SED X72. Assessment of Individuals with Mild to Moderate Disabilities.
Assessment and high-stakes testing policies, procedures, and practices in special education; curriculum-based measurement used to monitor academic outcomes for students with disabilities; and principles and procedures used to reduce misidentification of individuals from culturally and linguistically diverse backgrounds and with limited English proficiency. Assessment data and individualized education plan development is also covered.

SED X75E. Teaching Practicum and Seminar.
Explore instructional practices associated with improved outcomes for students with mild to moderate disabilities receiving services in general and special education classrooms. Focus on teaching reading in content areas, such as mathematics, science, and social studies.

SED X76. Foundations and Issues in Special Education.
Key issues affecting decision-making and practices by special education teachers, assessment personnel, and administrators related to the treatment and education of students with disabilities.

SED X77. Transition and the Exceptional Learner.
An overview of the transitions within the life span, particularly the transition to postsecondary school settings for individuals with disabilities. Designed to help students develop the ability to infuse transition-related topics into curricula, assess transition needs, develop transition plans, and become knowledgeable about existing vocational and community services.

SED X78C. Teaching Students with Intense Support Needs.
Explore assessment and instructional strategies for educating students with autism and other developmental and physical disabilities. Focus on implementation and evaluation of instructional procedures for teaching

a range of adaptive behaviors, such as self-care, and communication, social, and community living skills.

SED X78G. Teaching Reading and Writing II.

Explore the knowledge and skills associated with assessing, instructing, and monitoring the progress of students who experience mild to moderate difficulties with reading, as well as students with dyslexia. Focus on reading, spelling, and writing for kindergarten through grade five.

SED X78I. Advanced Early Childhood Special Education.

Acquire in-depth knowledge of early childhood intervention, particularly related to services within the state of Texas, including an understanding of the legal policies related to serving young children with disabilities and their families.

SED X78J. Assessment Practices.

Learn assessment practices for developing and evaluating educational programs for individuals with autism and developmental disabilities. Examine the theoretical orientations that underlie the major assessment strategies, including standardized, behavioral, and informal practices.

SED X78T. Topics in Special Education.

SED X78T.1. Language-Minority Students in Special Education.

SED X78T.10. Teaching Bilingual/Multilingual Learners.

SED X78T.11. Positive Behavior Supports.

SED X78T.12. Teaching Mathematics I.

SED X78T.7. Autism Spectrum Disorder.

Explore Autism Spectrum Disorder (ASD) including the nature and diagnosis of ASD, available resources, and evidence-based practice service. Examine strategies implemented by professionals to help families and children navigate their environment and create a more inclusive and supportive environment for persons with ASD. Conducted in Spanish.

SED X78T.8. Teaching Reading and Writing I.

SED X78T.9. Teaching Mathematics II.

SED X79. Seminar in Special Education.

Specialized study in an identified area of interest in education of the exceptional child.

SED X97P. Graduate Internship.

Supervised practice in a professional position.

Graduate Courses

SED X80. Topics in Multicultural Special Education.

Study of critical issues in culture, language, and disability.

SED X80.1. Language Acquisition and Assessment in Multicultural Special Education.

Language acquisition among culturally and linguistically diverse learners in general and special education, with emphasis on effective assessment and instruction.

SED X80.11. Educational Planning for Multicultural Special Education.

SED X80.12. Educational Leadership in Multicultural Special Education.

Overview of issues affecting equal access to quality education for culturally and linguistically diverse learners with disabilities.

SED X80.13. Sociocultural Foundations of Special Education.

An in-depth examination of key knowledge, including sociocultural theory and conceptual models, used in teaching culturally and linguistically diverse students with disabilities in special education and inclusive settings.

SED X80.15. Addressing Critical Questions in Special Education Using National Datasets.

Considers how the federal government and local educational agencies collect a range of data on the educational experiences of children, including those with disabilities and special needs. Analyzes how these large datasets provide a unique opportunity to examine not only macro-level trends in identification rates, racial disparities, and student achievement, but also the influence of school and home contextual factors. Examines how to use these datasets and address important questions in special education today. Explores how to access, prepare, and analyze these datasets.

SED X80.16. Second Language Literacy Development and Assessment.

Examines essential concepts related to language and literacy. Discussion of past and present sociocultural factors that impact research in terms of both what is researched and how it is researched and the implications of that research on instruction and assessment. Analyzes the socio-cultural foundations of schooling and society to better understand the complex, dynamic interrelationships between culture, language, literacy, and disability.

SED X80.17. Diversity and Disability: Contemporary Perspectives.

SED X80.18. Cultural and Linguistic Diversity.

An overview of issues, problems, and emerging practices related to culturally and linguistically diverse students served in special education.

SED X80.4. Assessment in Multicultural Special Education.

Cultural and linguistic factors related to the assessment of language-minority students; the best practices in psychoeducational procedures.

SED X80.6. Advanced Research Topics in Multicultural Special Education.

Current and emerging research on individuals with disabilities who are from culturally and linguistically diverse backgrounds. Provides students with opportunities to review research literature on topics of interest to them, and to explore their writing skills. A process approach to writing is used to familiarize students with the APA guidelines for preparing scholarly manuscripts.

SED X80.7. Cross-Cultural Interactions in Multicultural Special Education.

Introduction to principles of intercultural communication for educators. Emphasis on strategies for effective cross-cultural communication in a variety of educational settings, including general and special education.

SED X80.8. School-Community Relations in Multicultural Special Education.

Traditional methods of parent and school relations; emerging and innovative models for communication between the school and the community; the intent of the course is to explore school-community interactions in the context of the dynamics of culture, race, language, politics, history, economics, and religion.

SED X80.9. Development of Personnel Preparation and Programming in Multicultural Special Education.

Designed to prepare students to develop standards-based multicultural personnel preparation programs that emphasize research-based practices and that improve student outcomes and promote recruitment, retention, and quality of personnel for teaching culturally and linguistically diverse populations with disabilities in pluralistic settings.

SED X83. Topics in Learning Disabilities.

Nature of the characteristics of learning disabilities and their effect on learning; assessment and progress monitoring measures; and individualized, differentiated strategies, interventions, technologies, and materials.

SED X83.1. Introduction to Learning Disabilities.

Basic terms and definitions, the nature of specific learning disorders, theoretical models, and empirical classification systems.

SED X83.10. Intensive Interventions for Students with Reading Disabilities.

Design, implementation, and evaluation of instruction for elementary- and secondary-level students with mild to moderate disabilities who receive special education services for reading.

SED X83.11. Intensive Interventions for Students with Math Disabilities.

Issues in the education of students with mild to moderate disabilities, including assessing students, evaluating instruction and instructional

materials, and adapting and implementing instruction with an emphasis on math.

SED X83.12. Intervention Research in Learning Disabilities.

SED X83.6. Teaching Students with Dyslexia and Reading Difficulties.

Theories and practices associated with dyslexia; terminology, assessment, and remedial strategies are emphasized.

SED X83.7. Assessment in Special Education.

The basic concepts related to the assessment of exceptional individuals.

SED X83C. High Incidence Disabled Student Teaching.

Nature of the characteristics of learning disabilities and their effect on learning; assessment and progress monitoring measures; and individualized, differentiated strategies, interventions, technologies, and materials.

SED X84. Topics in Early Childhood Special Education.

Education variables related to educational services and research for young children are investigated in terms of etiology, assessment, curriculum models, educational settings, and interdisciplinary programming.

SED X84.1. Overview of Early Childhood Special Education.

The educational and emotional needs of young disabled children (birth to age six) and the techniques for implementing a "whole child educational approach to meet the needs of the child and the family.

SED X84.10. Medical/Educational Programming: Birth to Age Three.

Medical information on pre-, peri-, and postnatal effects of medical problems and extended hospital stays. Impact of medical intervention on the infant's and the family's development.

SED X84.11. Medical/Educational Practicum in Early Childhood Special Education.

Early intervention in a neonatal intensive care unit or on a follow-up team for medically fragile high-risk children.

SED X84.13. Early Language Intervention.

SED X84.14. Family Support and Intervention.

SED X84.16. Medical and Educational Assessment and Intervention.

SED X84.17. Functional Motor and Vision Assessment and Intervention.

SED X84.3. Parent Education Models.

The grief stages of parents; parent involvement models available to promote optimum parent-child and parent-professional relationships.

SED X84.4. Practicum in Early Childhood Special Education.

Teaching experience with disabled children in a center setting. Assessment and curriculum procedures are applied in developing an appropriate education for an individual child or small groups of children.

SED X84.5. Advanced Practicum in Early Childhood Special Education.

Teaching experience with a large group of children in a center setting. Program management and evaluation procedures are applied to a total curriculum, so that the student assumes a lead teacher and/or consultant role during training.

SED X84.6. Assessment and Programming of Early Childhood Special Education.

Experience in assessing a disabled child in a naturalistic setting. Formal and informal assessment procedures for children from birth through age six.

SED X84.7. Medical/Educational Overview: Birth to Age Three.

Overview of hospital-to-school early intervention techniques for meeting the medical and educational needs of preterm, low-birth-weight, and at-risk children and their parents.

SED X84.8. Medical/Educational Parent Education and Involvement: Birth to Age Three.

Research, design, and implementation of a functional child-parent program. Students develop their own programs for working with parents of children with specific problems or disabilities.

SED X84.9. Medical/Educational Assessment: Birth to Age Three.

Experience planning, assessing, and implementing educational programs for at-risk infants and toddlers. Emphasis is on interagency coordination and the use of the transdisciplinary team to meet the family's and the child's needs with a minimum of personnel.

SED X84T. Topics in Intervention Research in Learning Disabilities.

Examine the nature of the characteristics of learning disabilities and their effect on learning; assessment and progress monitoring measures; and individualized, differentiated strategies, interventions, technologies, and materials.

SED X86. Topics in Behavioral Disorders.

Discussion of behavioral disorders, contributory factors; psychological and educational diagnoses applied to educational programming.

SED X86.10. Introduction to Behavioral Disorders.

Introduction to the nature and needs of children with behavior disorders and to effective management methods and teaching strategies. The admission, review, and dismissal process is described and practiced so that students can work as members of an interdisciplinary team.

SED X86.11. Positive Behavioral Interventions Support and Classroom Management.

Study of the basic principles of human behavior, and the application of those principles to teaching positive behavior support and designing effective classrooms. Designed to prepare teachers and clinicians who will be in general and special education settings with children of all ages with and without disabilities.

SED X86.13. Educating Students with Significant Behavioral Support Needs.

Designed to provide students with an overview of promising and preferred practices for educating children and youth with emotional and behavioral disorders (EBD). Emphasis on children and youth whose behaviors challenge the prevailing social and educational traditions and values of schools, communities, and families.

SED X86C. Topics in Trends and Issues in Learning Disabilities and Behavioral Disorders.

An examination of current trends and issues in areas within special education and rehabilitation counselor education that influence policies and procedures in the public schools, teacher preparation programs, and community agencies.

SED X88. Topics in Autism and Developmental Disabilities.

An intensive study of the psychological, sociological, physiological, and educational factors relating to the assessment, learning, and teaching of children with autism and other developmental disabilities. Includes affective, cognitive, and psychomotor development of individuals with physical disabilities.

SED X88.10. Advances in the Understanding and Treatment of Autism.

Review of recent advances in the understanding and treatment of autism and related developmental disorders. The social forces that shape research and scientific understanding and the political forces that influence the delivery of education and related services, as well as implications for effective leadership in special education.

SED X88.11. Intervention Research in Autism and Developmental Disabilities.

How research is used to develop interventions for those with developmental disabilities. Students consider the role of basic research and theory in the development of interventions and the use of experimental design to demonstrate the effectiveness of an intervention program, explore the development of empirically validated intervention

programs, and undertake qualitative and quantitative reviews of intervention research.

SED X88.13. Practicum in Severe and Multiple Disabilities.

SED X88.14. Practicum in Professional Ethical Practices.

SED X88.3. Teaching Individuals with Autism and Developmental Disabilities.

Development of highly specialized skills needed to teach those with developmental disabilities. Emphasis is on the basic principles of learning that underlie effective instructional strategies and on ways to structure the environment to promote learning.

SED X88.5. Enhancing Communication Potential in People with Autism and Developmental Disabilities.

Communication intervention for those with developmental disabilities. Designed to help students learn to assess communication behavior and to create intervention programs that enhance existing communication skills and teach new skills. Hands-on experience with a variety of augmentative and alternative communication systems.

SED X88.6. Educational Implications of Autism and Developmental Disabilities.

Introduction to the learning and behavioral characteristics of those with developmental disabilities, including autism and related developmental disorders. Designed to give students an understanding of the educational needs of those with developmental disabilities and of ways to address those needs through special education and related services.

SED X88.7. Challenging Behavior and Developmental Disabilities.

The nature, assessment, and treatment of the challenging behaviors that are prevalent in individuals with developmental disabilities, such as aggression, self-injury, property destruction, tantrums, and stereotyped movements.

SED X88.8. Research on Inclusion for Students with Autism and Developmental Disabilities.

Literature relevant to the inclusion of students with developmental disabilities, including classic readings on the history and philosophy of inclusion; analysis of the evidence supporting current best-practice models. Emphasis on critical reading of empirical studies on the efficacy of inclusive education.

SED X88.9. Assessment Research in Autism and Developmental Disabilities.

Research related to the assessment of students with developmental disabilities, examined in the context of the theoretical orientations that underlie the major assessment strategies. Includes a review of studies related to the development and validation of contemporary assessment instruments and discussion of the scientific process involved in developing and validating assessment tools.

SED X89. Topics in Special Education Administration.

Study of the content and process of special education administration, including technological forecasting methods, case law as it applies to people with disabilities, management of problem employee styles, and related topics.

SED X89.1. Administration of Special Education Programs.

Application of principles of administration and leadership to problems associated with special education and instruction for special populations.

SED X89.2. Educational Futures.

Students are directed toward career goals: affective change toward the future and change processes; acquisition of knowledge about several technological forecasting methods and of skill in the use of one method.

SED X89.3. Special Education Administration Seminar: Current Issues in Special Education.

SED X89.4. Law and Disabilities.

An examination of case law that covers definitions, equal educational opportunity, employment, accessibility, freedom of choice, freedom from residential confinement, housing and zoning restrictions, equal access to medical services, procreation, marriage, children, contracts, ownership and transfer of property, voting, and holding public office.

SED X89.5. Special Populations.

Leadership issues associated with serving school-age children through federal and state "title" programs, including English as a second language, bilingual education, and Chapters I and II. Also covered are alternative schools; programs for juvenile offenders, pregnant students and young mothers, and at-risk students such as those who have potential for suicide; and services for the homeless, the abused, and chemical abusers. Students read the significant literature and develop knowledge and skill in planning and designing delivery models.

SED X93. Topics in Special Education: Graduate Seminar.

Discussion of critical issues; critiques of literature; development of theories and models regarding disabling conditions.

SED X93.17. Instructional Designs Using Assistive Technology.

The design of instruction for students with disabilities by using assistive and instructional technologies.

SED X93.18. Collaboration.

Strategies such as collaborative consultation and teamwork models, which are used to improve learning outcomes for students with diverse learning needs.

SED X93.20. Applied Research.

SED X94. Practicum in Special Education.

Supervised field placement in specialized settings serving exceptional children and youth.

SED X95. Topics in Independent Study.

Individual research planned, executed, and reported under supervision.

SED X95.1. Independent Study in Special Education Administration.

SED X95.15. Independent Study in Multicultural Special Education.

SED X95.2. Independent Study in Behavioral Disorders.

SED X95.4. Independent Study in Learning Disabilities.

SED X95.7. Independent Study in Early Childhood Special Education.

SED X95.8. Independent Study in Autism and Developmental Disabilities.

SED X95D. Topics in Special Education and Rehabilitation Counselor: Doctoral Seminar.

SED X95D.2. Seminar in Behavioral Disorders.

SED X95D.3. Seminar in Learning Disabilities.

SED X95D.5. Early Childhood Special Education.

SED X95D.6. Autism and Developmental Disabilities.

SED X95D.7. Multicultural Special Education.

SED X95S. Professional Seminar.

Forum for students to become familiar with the areas of study, research, and professional practice within special education. Students also refine their professional writing and communication skills, critically evaluate current and emerging research in the field, and examine the historical, legal, philosophical, and theoretical foundations of special education.

SED X96. Research Mentoring.

Designed to develop the knowledge and skills students need in order to conduct research. Under the supervision of a three-member committee, students develop a publishable-quality synthesis of the professional literature on a topic related to their research interests.

SED X96C. Topics in Trends and Issues in Special Education.

An examination of current trends and issues in areas within special education and rehabilitation counselor education that influence policies and procedures in the public schools, teacher preparation programs, and community agencies.

SED X96C.1. Trends and Issues in Early Childhood Special Education.
SED X96C.2. Trends and Issues in Learning Disabilities/ Behavioral Disorders.
SED X96C.5. Trends and Issues in Special Education Administration.
SED X96C.7. Trends and Issues in Autism and Developmental Disabilities.
SED X96R. Topics in Research Methods and Data Analysis.
SED X96R.1. Research Methodology in Special Education.
SED X96R.2. Single-Subject Research Design.
The use of single-subject research designs to make data-based decisions about program effectiveness and student outcomes; integration of applied research into classroom instruction as part of evidence-based professional practice in educating students with severe and multiple disabilities.
SED X96R.3. Advanced Data Analysis in Special Education.
SED X96T. Directed Research in Special Education.
SED X96T.1. Directed Research in Special Education Administration.
SED X96T.13. Directed Research in Multicultural Special Education.
SED X96T.2. Directed Research in Behavioral Disorders.
SED X96T.4. Directed Research in Learning Disabilities.
SED X96T.7. Directed Research in Early Childhood Special Education.
SED X96T.8. Directed Research in Severe and Multiple Disabilities.
SED X97C. Advanced College Teaching.
Supervised teaching experience at the college level.
SED X97P. Graduate Internship.
Supervised practice in a professional position.
SED X97S. Supervised Teaching in Special Education.
Instruction in the supervision of student teachers and observers at the undergraduate level.
SED X98. Thesis.
SED X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.
SED X98T. College Teaching in Special Education.
SED X99W. Dissertation.

Professional Courses

SED X97P. Graduate Internship.
Supervised practice in a professional position.

SEE - Subsurface Energy Engineering

Subsurface Energy Engineering: SEE

Lower-Division Courses

Upper-Division Courses

Graduate Courses

SEE X80. Topics in Subsurface Energy Engineering.
SEE X81K. Subsurface Water Management.
Examine methods for treating, utilizing and disposing of water produced from the subsurface. Discuss the chemistry and engineering principles involved in water treatment and reinjection.
SEE X81L. Nuclear Waste Storage.
Introduction to engineering and science of nuclear waste storage and disposal with emphasis on geological methods. Review current methods and new solutions to safely dispose of radioactive waste resulting from nuclear energy generation.
SEE X81M. Advanced Well Integrity.
Focus on the unique challenges in the construction and integrity of special purpose wells, such as geothermal wells, carbon capture and underground storage (CCUS) wells, and nuclear storage and waste injection wells. Consider the entire lifecycle of these wells, from initial drilling and well construction all the way to their long-term plugging and abandonment. Explore how to maintain well integrity to prevent premature failure of geothermal wells, CO2 leakage in CCUS wells, and nuclear and other waste leakage in waste injection/storage wells for an indefinite period.
SEE X82. Subsurface Energy Storage.
Introduction to hydrogen, compressed air, and carbon storage in geological formations as well as review of ongoing projects and their relations to net-zero greenhouse emission targets. Discuss flow, transport, and geochemical interactions of different gases with site minerals. Gain insights and quantify storage capacity, deliverability, dissolution, trapping, and other loss mechanisms, using hands-on numerical simulation training and exercises.
SEE X82K. Global Carbon Monitoring Systems.
Introduction to the myriad of ways we measure global greenhouse gas emissions, from ubiquitous ground sensors to low-earth orbit satellites. Explore how new technologies are revolutionizing our ability to monitor global energy flows, track progress on emissions reduction goals, and enable new policy approaches to addressing climate change.
SEE X88. Data Analytics and Geostatistics.
Examine fundamental probability and statistics to derive and demonstrate the fundamental deterministic and stochastic spatial modeling paradigms, including kriging, sequential Gaussian simulation, indicator methods, object-based processes, multiple point simulation and generative AI. Discuss uncertainty modeling, model diagnostics and checking, and decision making in the presence of uncertainty.
SEE X88K. Applied Reservoir Simulation for Low-Carbon Energy Projects.
Introduction to geothermal, hydrogen, and carbon capture-storage-utilization (CCUS) projects. Review the key physics, mathematics, and engineering for each process, such as thermal modeling, equation of state for gas projects, and storage and recovery mechanisms for CCUS. Focus on how to build a numerical model with geological description and proper gridding, fluid models based on the fluid types, and energy production mechanisms, followed by uncertainty analysis.
SEE X89. Legal and Technical Issues in Subsurface Trespass.
Examine legal and technical issues related to subsurface trespass on state and federal lands. Discuss how courts define actionable subsurface trespass and explore the implications of fluid injections that cross property boundaries.
SEE X98. Thesis.
SEE X98R. Master's Report.
Prepare a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

SEL - Slavic and Eurasian Languages

Slavic and Eurasian Languages: SEL

Lower-Division Courses

SEL X01C. Topics in Intensive Slavic and Eurasian Languages I.
Emphasis on basic communication skills in Slavic and Eurasian languages: listening, speaking, reading, and writing. Includes introduction to Slavic and Eurasian cultures.

SEL X06. Topics in First-Year Slavic and Eurasian Languages I.
Emphasis on four-skills proficiency: listening, speaking, reading, and writing.
SEL X07. Topics in First-Year Slavic and Eurasian Languages II.
Emphasis on four-skills proficiency: listening, speaking, reading, and writing.
SEL X11C. Topics in Intensive Slavic and Eurasian Languages II.
Continuing intensive development of communication abilities in Slavic and Eurasian languages with emphasis on the four basic skills: listening, speaking, reading, and writing. Includes an introduction to Slavic and Eurasian cultures.
SEL X12K. Topics in Second-Year Slavic and Eurasian Languages I.
Listening, speaking, reading, and writing at the second-year level.
SEL X12L. Topics in Second-Year Slavic and Eurasian Languages II.
Listening, speaking, reading, and writing at the advanced, second-year level.
SEL X19S. Topics in Slavic and Eurasian Languages.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SEL X29S. Topics in Slavic and Eurasian Languages.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Slavic and Eurasian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
SEL X30. Topics in Slavic and Eurasian Languages.
Intermediate or advanced language instruction in a range of individual Slavic and Eurasian languages. Slavic and Eurasian language texts in the original language, writing assignments, and conversation practice to improve language proficiency in all of these modes of communication.
SEL X79. Conference Course in Slavic and Eurasian Languages.

Graduate Courses

SEL X85. Topics in Slavic and Eurasian Languages.
SEL X85.1. Accelerated Romanian for Research.
Explore a variety of grammatical and idiomatic features of the Romanian language, and apply this knowledge to the translation of various representative literary, historical, and academic texts from Romanian into English. Survey Romanian history and a limited selection of significant Romanian texts in English translation.
SEL X95. Conference Course in Slavic and Eurasian Languages.

Professional Courses

SLE - Second Language Education

Second Language Education: SLE

Lower-Division Courses

Upper-Division Courses

Graduate Courses

SLE X80. Translation Theory and Practice and the Role of AI in Second Language Acquisition.
Explore the relationship between translation and language learning in today's AI-driven world. Examine how centuries-old translation theories intersect with new technologies, fundamentally changing how we understand language acquisition and intercultural fluency.
SLE X81. Proficiency-Based Language and Culture Instruction: Theory and Practice.
Learn about the proficiency movement in language teaching and the role of culture and technology in language instruction that promotes proficiency in L2 classrooms. Conduct an in-depth review of the ACTFL guidelines and Standards for Foreign Language Learning to establish the common ground for looking at proficiency from multiple angles: aspects, type of learner, and kinds of settings.
SLE X82. Effective Teaching and Learning Design in the Foreign Language Classroom.
Examine how, in foreign language classrooms, effective teaching and learning design centers around creating engaging, communicative, and learner-centered experiences. Explore backward design, design thinking, and Universal Design for Learning (UDL), all of which aim to foster deeper language proficiency and intercultural competence.

Professional Courses

SLH - Speech, Language, and Hearing Sciences

Speech, Language, and Hearing Sciences: SLH

Lower-Division Courses

SLH X06K. Introduction to Speech, Language, and Hearing Sciences.
Introduction to the study of processes and disorders of speech, language, and hearing.
SLH X08. Topics in Speech, Language, and Hearing Sciences.
SLH X08K. Perspectives on Deafness.
Examine deafness from a number of perspectives: social and psychological meanings of deafness, the deaf community, education of deaf children, sign languages, and historical trends.
SLH X11K. Phonetic Description of Speech.
Examine speech production, physiological analysis and description of speech sounds, voice quality, and voice dynamics; notation; phonetic theory; applications of phonetics.
SLH X12. Developmental Language Science.
Introduction to language and literacy development from birth through adolescence.
SLH X13L. Hearing Science.
Examine acoustical, physiological, and psychological bases of normal human hearing. Explore theories of audition.
SLH X13P. Hearing Science: Laboratory.
Examine laboratory techniques in hearing science research.
SLH X14L. Sociocultural Bases of Communication.
An introduction to the influences of social and cultural factors, such as ethnicity, socioeconomic status, and geographic region, on

communication acquisition and use, with a focus on cross-cultural communication issues in a diverse society.

SLH X15S. Speech Science.

Neurophysiological mechanisms underlying the encoding and decoding of speech.

SLH X18L. Development Language Science: Laboratory.

Examine child language in a clinical laboratory setting.

SLH X19S. Topics in Speech, Language, and Hearing Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SLH X29S. Topics in Speech, Language, and Hearing Sciences.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SLH X31E. Instructional Methods for Deaf Students.

Examine methods of assessment, curriculum organization, lesson planning, instruction, and classroom management in education of deaf children.

SLH X40P. Clinical Observation in Speech Language Pathology.

Explore evidence-based practice in speech and language pathology through guided observation.

SLH X41. Principles of Audiology.

Explore the causes of hearing disorders and examine diagnostic procedures and treatment.

SLH X50. Language and the Brain.

Explore the neuroanatomical and functional operations of the major brain structures that underlie speech/language. Examine hemispheric dominance for language, neurological and language breakdowns in aphasia, and brain imaging methods and studies of language representation.

SLH X52. Topics in Speech, Language, and Hearing Sciences.

SLH X52.1. Bilingualism: Language Development and Disorders.

Examine bilingual language development and the manifestation of speech and language disorders in bilingual children with a special focus on Spanish-English bilingualism. Explore disorder areas including developmental language disorders, speech sound disorders, fluency, and reading disabilities. Consider bilingual language development in cultural and linguistic contexts. Discuss communication disorders including evidence-based practices in interventions for bilingual children.

SLH X52.2. Augmentative and Alternative Communication.

Examine augmentative and alternative communication (AAC) approaches for individuals with severe communication impairments. Explore foundational information for providing or referring services in AAC.

SLH X52.3. Bilingualism Across the Lifespan.

Explore the consequences of bilingualism on brain and mind across the lifespan. Survey current issues related to bilingualism as they pertain to speech-language pathology.

SLH X58. Anatomy and Physiology of the Speech and Hearing Mechanism.

Examine the anatomy and physiology of structures involved in speech, language, hearing, and swallowing in-depth. Explore anatomical and physiological mechanisms of respiration, phonation, articulation, and hearing; and the central nervous system and blood supply to the speech and hearing mechanism.

SLH X58L. Anatomy and Physiology of Speech and Hearing: Laboratory.

Examine anatomy and physiology of structures involved in speech, language, hearing, and swallowing in a laboratory setting. Explore anatomical and physiological mechanisms of respiration, phonation, articulation, and hearing; and the central nervous system and blood supply to the speech and hearing mechanism.

SLH X60M. Communication and Deaf People.

Examine forms of face-to-face communication used with deaf people, including speech and listening, systems of manual communication, and natural sign language, with an emphasis on child development issues and the use of different methods in educational practice.

SLH X64. Deaf Education Internship.

Explore deaf education through field experience at the Texas School for the Deaf or public school programs including directed observation and participation with teachers and students in the instructional process.

SLH X67K. Introduction to Speech and Language Disorders Assessment and Treatment in Children.

Introduction to assessment procedures and treatment strategies for children with speech and language disorders.

SLH X67M. Clinical Practicum in Speech-Language Pathology and Audiology.

Engage in a supervised clinical practicum in speech-language pathology and audiology.

SLH X70. Clinical Research Internship.

Supervised participation in clinical research internships.

SLH X70N. Internship.

SLH X71. Introduction to Speech and Language Disorders Assessment and Treatment in Adults.

Introduction to assessment procedures and treatment strategies for adults with speech and language disorders.

SLH X73. Principles of Aural Rehabilitation.

Examine the rationale, methods, materials, procedures, and criteria for aural rehabilitation for hearing-impaired persons.

SLH X75N. Deaf Education Seminar.

Discuss social, political, and educational aspects of deafness.

SLH X78. Clinical Audiology.

Explore differential diagnostic procedures for evaluation of auditory disorders. Examine theoretical concepts and clinical applications.

SLH X78C. Experiential Learning in Clinical Research.

Explore experiential learning opportunities within the clinical environment observe clinical research, connect concepts, and reflect on processes that promote translation of theory to practice for stuttering and/or cluttering.

SLH X78D. Quality of Life in Clinical Care.

Engage in an intensive experiential learning opportunity that emphasizes the positive role of counseling, empathy, self-compassion, and the therapeutic alliance in clinical care for persons who stutter and/or clutter and their loved ones.

SLH X78K. Studies in Speech Language Pathology, Audiology.

Supervised individual research.

SLH X78L. Clinical Laboratory Experience in Audiology.

Examine audiology in a clinical laboratory setting.

Graduate Courses

SLH X80E. Conference Course.

Examine readings in the literature of speech, language, and hearing sciences designed to expand opportunity for individual consultation both in research and in informational aspects of the work.

SLH X81L. Clinical Practicum.

Engage in a supervised clinical practicum in speech, language, and hearing sciences.

SLH X83C. Augmentative and Alternative Communication.
Examine an overview and a critical analysis of augmentative and alternative communication approaches and how they can best be used for the benefit of individuals with severe communication impairments.

SLH X83N. Topics in Speech, Language, and Hearing Sciences for Doctoral Studies.
Selected topics on speech, language, and hearing sciences will be explored through reading of current research in the field. Topics include developmental language disorders, speech and language perception, speech production, fluency disorders, dysphagia, neural bases of adult communication disorders, bilingualism, advanced auditory research, and augmentative and alternative communication.

SLH X85F. Knowledge and Skills in Clinical Science I.
Develop the knowledge and skills needed in clinical areas across the scope of practice and lifespan.

SLH X85S. Knowledge and Skills in Clinical Science II.
Develop the knowledge and skills needed in clinical areas across the scope of practice and lifespan.

SLH X86F. Fundamental Principles in Clinical Practicum.
Practice the fundamental knowledge and skills in speech language pathology.

SLH X86R. Advanced Research Design and Statistics.
Explore various aspects of research design and analysis that are commonly practiced within the field of speech-language pathology and audiology.

SLH X86S. Advanced Applications in Clinical Practicum.
Apply the developed advanced knowledge and skills in speech language pathology.

SLH X91C. Cultural and Linguistic Diversity.
Explore current issues in provision of speech-language pathology services to children from bilingual backgrounds and adapting procedures to meet the needs of culturally and linguistically diverse families.

SLH X91D. Cognitive and Linguistic Foundations of Language Development and Disorders.
Examine a framework for understanding the cognitive and linguistic mechanisms that underlie language development and disorders, including linguistic and psycholinguistic theories of language development.

SLH X91E. Bilingualism: Typical and Disordered Communication in Adults.
Examine the characteristics, assessment, and treatment practices of bilingual adults with acquired cognitive-communication disorders.

SLH X91K. Bilingualism: Typical and Disordered Communication in Pediatrics.
Examine bilingual language development and speech and language disorders in bilingual children with a special focus on Spanish-English bilingualism. Explore disorder areas including developmental language disorders, speech sound disorders, and fluency. Consider bilingual language development in cultural and linguistic contexts. Explore current issues in provision of speech-language pathology services to children from bilingual backgrounds and adapting procedures to equitably meet the needs of culturally and linguistically diverse families.

SLH X91P. Anatomy and Physiology of the Auditory System.
Explore the structure and function of the auditory system, including hearing and balance mechanisms.

SLH X92C. Counseling.
Examine both speech-language pathology and audiology counseling roles when implementing patient-centered and family-centered care in a variety of settings.

SLH X93D. Dysphagia.
Examine anatomy and physiology relevant to normal swallowing in adults and pediatrics, as well as pathophysiology associated with dysphagia of differing etiologies. Explore various methods to evaluate swallowing function, and practice beginner-level clinical interpretation, with an emphasis on evidence-based practice for dysphagia management.

SLH X93F. Stuttering, Cluttering, and Typical Disfluency.
Review theories, research, and emerging evidence pertaining to stuttering, cluttering and typical disfluency and their translation to practice.

SLH X93G. Developmental Speech Disorders.
Examine research in articulation and phonological development and the application of theories of development to assessment and intervention procedures with children with deficits in articulation and/or phonology.

SLH X93J. Acquired Cognitive Communication Disorders II.
Examine the characteristics, assessment, and clinical management of acquired neurogenic disorders of cognition and communication, such as traumatic brain injury (TBI) and dementia.

SLH X93M. Acquired Cognitive Communication Disorders I.
Examine characteristics, assessment, and clinical management of acquired neurogenic disorders of cognition and communication, such as aphasia and right hemisphere disorders.

SLH X93P. Preschool Language Disorders.
Examine communication deficits unique to children from birth to age five.

SLH X93Q. Acquired Speech Disorders.
Examine the neurological foundations of speech, speech disorders that can develop as a result of damage to the nervous system, and the ways in which motor speech disorders can be diagnosed and managed.

SLH X93S. School-Age Language Disorders.
Examine communication deficits unique to children age five and beyond.

SLH X93V. Voice Disorders.
Examine normal and disordered voice production, as well as assessment and treatment of voice. Explore the anatomy and physiology of voice, pathologies of voice, instrumental and non-instrumental methods for voice assessment, and interdisciplinary voice management.

SLH X94C. Amplifying Systems in Aural Rehabilitation.
Examine the principles of hearing aid circuitry and looped systems, ear molds and their acoustic properties, and electroacoustic properties of hearing aids and selection procedures.

SLH X94D. Hearing Conservation.
Examine auditory and non-auditory effects of noise; damage-risk criteria; federal and state laws governing noise and noise control; acoustic measurement procedures; identification audiometry; ear protection; and non-organic hearing loss and evaluative procedures.

SLH X94E. Auditory Electrophysiology.
Review the auditory nervous system and evaluate electrodermal, electroencephalographic, and electrocardiographic audiometry in depth.

SLH X95M. Applied Machine Learning and Data Analytics.
Introduction to the fundamental concepts of machine learning with a focus on its practical use for those who have no engineering or computer science background. Explore basic mathematics (e.g., vector and matrix), specialized programming skills (e.g., Matlab for data processing, visualization, and analysis), and other data analysis techniques (e.g., principal component analysis).

SLH X95N. Neurobiological Perspectives on Speech and Language.
Explore an overview of sensory, motor, and neurophysiological correlates of speech and language. Examine neuroanatomy and neurophysiology of the human brain, with an emphasis on motor pathways, representation in the brain, neuroimaging, neurophonetic processing, and hemispheric specialization.

SLH X96C. Advanced Amplifying Systems.
Explore the fitting of advanced amplification systems, including digital hearing aids, frequency modulation and other wireless systems, and assistive listening devices.

SLH X96D. Auditory Processing Disorders.
Examine the assessment and treatment of disorders of the central auditory nervous system in children and adults.

SLH X96E. Advanced Auditory Electrophysiology.
Explore advanced diagnostic tools, including acoustic immittance, otoacoustic emissions, auditory evoked potentials, intraoperative monitoring, and vestibular function.

SLH X96M. Signals and Systems in Hearing and Speech.
Explore electrophysiological and electroacoustic procedures in the study of communication behaviors.

SLH X98. Thesis.

SLH X98T. Supervised Teaching.

SLH X99W. Dissertation.

Professional Courses

SOC - Sociology

Sociology: SOC

Lower-Division Courses

SOC X02. Introduction to the Study of Society.
The nature of human societies, social processes, social interaction, and the sociological approach.

SOC X02P. Physical Activity and Society.
Explores the way in which people are physically active in a social context - primarily in the United States. Examines how social forces influence physical activity including cultural, economic, historical, and demographic considerations. Examines physical activity on both the individual and population levels to better understand benefits and barriers to activity through the social context.

SOC X03S. Introduction to the Asian Diaspora.
Examine the global dispersal of Asian populations from the mid-1800s to the present.

SOC X04. Introductory Topics in Sociology.
A sociological perspective of contemporary social subjects.

SOC X07C. American Families Past and Present.
Examines trends over time in specific aspects of family life, including marriage, cohabitation, mate selection, divorce, parenthood, family structure, and work-family balance. Study of the methods that sociologists and demographers use to study the family.

SOC X07D. Capital Punishment in America.
Uses various historical, legal and social perspectives to examine the shifting rationales and nature of contemporary United States death penalty debates: public opinion; racial disparities and the historical legacy of lynching; United States Supreme Court decisions; the death penalty's efficacy as a criminal punishment, its personal impacts, and contemporary problems with its current application.

SOC X07E. Contemporary United States Social Problems.
Examines contemporary social issues confronting the United States, using sociological concepts and perspectives to analyze the nation's most pressing social problems, ranging from social inequality to crime, terrorism and war, and environmental degradation.

SOC X07F. Diversity in American Families.
Examination of the diversity of American families and current debates on family life from a sociological perspective with an emphasis on how diverse family forms came to exist and what these changes mean for adults and children in contemporary society. Study of recent trends in several aspects of family life, including dating and courtship, cohabitation, marriage, divorce, parenthood, family structure, and work-family balance. Overview of theoretical perspectives on family life with a focus on gender, race/ethnicity, and sexuality.

SOC X07G. Culture and Society in the United States.
Introduction to theoretical perspectives, methodological issues, and empirical work in the sociological study of culture. Examination of sociological accounts of the production, reproduction, and reception of culture, with an emphasis on a critical understanding of culture in relation to other sociological phenomena such as power, inequality, and identities.

SOC X07J. Education and Society.
Further study of the ways that schooling shapes the opportunities available to children and youth, and how educational attainment influences the lives and well-being of adults. Subjects include historical development and organization of the American educational system; factors that shape achievement and learning; differential access to educational opportunities along race, class, and gender lines; and the effects of educational stratification.

SOC X07K. Fertility and Reproduction.
Explores the when, why, how, and with whom Americans bear children, and how the United States compares to other developed and developing countries in the world. Subjects include infertility and its treatments, the ethics of surrogacy and international adoption, voluntary childlessness, the rapid rise of nonmarital childbearing in the United States and other countries, the politics of childbirth, the risks of maternal morbidity and mortality in developed and developing countries, and the declining populations and rapid aging of rich countries including Japan, Italy, and Spain where many women have stopped having children.

SOC X07L. Gender, Race, and Class in American Society.
Use of the sociological perspective to analyze how the structure of American society, individual life, and group life chances are shaped by broader structures of privilege and disadvantage based on gender, race, and class. Examination of these in institutional arenas such as work, the family, education, health, the criminal justice system, sexuality, popular culture, and more.

SOC X07P. Introduction to the Sociology of Health and Well-Being.
Examination of the social causes and context of illness, death, longevity, and health care today in the United States. Subjects include historical perspectives on health and mortality, social class, race/ethnicity, gender, religious involvement, marital status, family, age, and psychosocial factors. Emphasis on the tension between individualistic and public health perspectives on illness.

SOC X07Q. Environmental Inequality and Health.
Examines the social roots and impacts of environmental contamination and natural disasters, with particular focus on how environmental health inequalities are linked to race, class, gender, and nation, and how residents of areas prone to environmental risks respond to hazards.

SOC X07S. Judaism and Christianity in Sociological Perspective.
Study of Christianity's historic roots in Judaism, the texts that Jews and Christians share, what Jews believe, how and why the two faiths diverged and evolved, how institutionalized Christianity addresses its Jewish origins, and the relationship between Jews and Christians throughout history. Focus on the social, historical, and intellectual contexts and forces which have shaped these processes up to the present day, as well as religious evolution of how systems and ways of thought and action change, why, and how Christians and Jews have dealt with such changes.

SOC X07T. Punishment and Society.
Focus on society's responses to crime. Introduction to the sociology of punishment and the death penalty, the American model of criminal punishment, and contextualization of the United States system and critical analysis of penal systems in general. Special emphasis on the nature of penal control in contemporary America.

SOC X08D. Ethnicity and Gender: La Chicana.

SOC X08G. The Rich and the Poor in America: Sociological Perspective.
Review of classical and contemporary theories of inequality and stratification; examination of recent ethnographic accounts of experiences of the rich and poor in United States society. Development of critical thinking about social class in contemporary society, and study of how one's own experiences are both the products and producers of larger stratification systems.

SOC X08J. Romantic Relationships and Family Formation.
Examination of romantic relationships and family formation from a cultural framework. Subjects include: historical transformations of romance; socioeconomic perspectives on sexual relationships and family formation; the impact of demographic transitions on the emergence of cohabitation as a relationship form; the economics undergirding relationship decision making; common narratives, practices, and gender differences about entry into marriage in the West; and population-level implications of contemporary patterns.

SOC X08K. Social Change and the Future.
Study of the effects of conflict on society, culture, technology, and economy practices through comparative analysis and historical dimension with a focus on institutions responsible for managing and handling conflict such as warfare and the military. Conflict-related issues include social institutions, gender identities and roles, economy, health issues, technological changes, collective memory, and culture.

SOC X08L. Social Transformation of Love and Relationships.
Examination of the social, psychological, and spiritual perspectives toward the ideas of love and intimacy; how love and intimacy interact with rapid social, economic, and cultural change; and how the subsequent change transformed the social world and the meaning of love. Subjects include the aspects of self and identity; differentiation in the context of love in the modern age; the family and the individual; the impact of industrialization on private lives and the public order; gender, communication, love; intercultural love and intimacy; and personal choice and arranged marriages.

SOC X08M. Sociology of Identity.
Examination of the ways that identities are socially produced and the study of how that social construction results in power and privilege for some groups at the expense of others.

SOC X08N. Comparative Religion, Politics, and Culture.
Investigation of the relationship between religion and politics through the central concept of culture. Subjects include religion as a form of culture and its effect on political life, the impact of the local culture of a society on religion and politics, and how historical conditions affect the religion-culture-politics relationship.

SOC X08S. Introduction to Health and Society.
A broad, multidisciplinary overview that introduces students to the study of health and society.

SOC X09C. Creating the Sustainable Society.
Overview of sustainability as something human beings must strive to create in an era of global warming and ever greater social inequalities, both between and within countries.

SOC X09D. Black and Latinx Intersections.
Examine the complex relationships between and among Black and Latinx communities and the political and structural forces and contexts that shape their interactions. Explore Black identity within the Latinx population, racial politics, coalitions of Black American and Latinx groups, race among Latinxs, racial inequality, and the politics of immigration.

SOC X09G. The New Latinas/os/xs.
Explore the trajectories of various communities many have called the new Latinas/os/xs by identifying how race, gender, sexuality, class, indigeneity, language, migration, and geography influence the lives, identities, and sociopolitical incorporation of new Latinas/os/xs.

SOC X10S. Women's Reproductive Health for Nonscience Majors.
Overview of contemporary women's reproductive health issues, with emphasis on historical, physiological, psychosocial, and cultural influences that affect the reproductive health of women during adolescence, the childbearing years, and midlife.

SOC X11C. Social Determinants of Health.
Considers the social factors that influence health and longevity, including sex/gender, race and ethnicity, socioeconomic status, and social integration. Examines the link between social position and health patterns in the United States.

SOC X12S. Society, Health, and Happiness.
Examine the scientific study of happiness, integrating findings from a variety of fields, including psychology, sociology, neuroscience, and economics. Includes the nature and measurement of happiness, the bidirectional relationship between physical health and happiness, the social or collective dimensions of happiness, and the role of various institutions and the well-being of society.

SOC X13K. Introduction to the Sociology of Religion.
Introduction to sociological methods in the study of religion.

SOC X17L. Introduction to Social Statistics.
Measures of central tendency and dispersion, the binomial and chi-square distributions, tests of hypotheses and parameter estimation, and simple correlation and regression.

SOC X18. Juvenile Delinquency.
Environments in which juvenile delinquency develops; delinquent subcultures and peer groups; societal reactions in schools, courts, and other agencies.

SOC X19. Introduction to Social Demography.
Social consequences of changes in fertility, mortality, migration, population growth and composition.

SOC X19S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SOC X29S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SOC X90K. Proposal Preparation.
Preparation of proposal for the doctoral dissertation.

Upper-Division Courses

SOC X19S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SOC X20C. Cancerland.
Explores the social and cultural terrain of cancer research, treatment, and public policy in the United States.

SOC X20K. Political Sociology.
A survey of approaches to the study of the state as a social structure; political power and power systems; ideology; political parties and elites.

SOC X20S. Soundtrack of Revolutions.
Examine the significance of music in the social and political uprisings of countries across the Middle East.

SOC X20T. Qualitative Methods for Social Research.
Explore hands-on training in qualitative methods used in mixed methods research in contemporary social science. Examine the application and use of case studies; archival analysis; content analysis; participant observation and ethnography; key informant ("elite") interviewing; focus groups; social psychological testing; and how to design and run surveys.

SOC X21C. Consumption in Latin America.
Study of the role consumption plays in social, economic, and political relations in Latin America, as well as contesting ideas about this role.

SOC X21D. Demography of Crime and Punishment.
Intensive seminar exploring data sources and conceptual and measurement issues surrounding the study of racial and ethnic differences in crime and punishment, with a particular focus on how the distinct neighborhood and school contexts in which different racial and ethnic groups participate explain variations in criminal outcomes. Special emphasis on the role of the criminal justice system in producing and eliminating disparities in criminal justice outcomes.

SOC X21E. Economy, Culture, and Society.
Introduction to sociological research and theories of culture and the economy, with a special focus on gift giving. Study of gift giving behaviors will explore the core issues of sociology: social organization and social structure, social norms, the relationship between individual and society, the nature of economic and noneconomic exchange, reciprocity, obligation, cultural meanings, and power, among others.

SOC X21F. Fundraising and Philanthropy.
Introduction to theories of the nonprofit sector and individual pro-social motivations and behavior, while also covering basic principles and techniques of fundraising. Receive practical instruction from fundraising professionals in the local nonprofit community on all aspects of a successful fundraising operation, from building a solid base of annual contributors to cultivating relationships with major gift prospects. Attention will be given to behind-the-scenes activities required to have a successful development program, including appropriate donor stewardship, prospect research, database maintenance, and donor analytics.

SOC X21G. Global Health Issues and Health Systems.
Overview of current global health challenges and issues from biological, cultural, and environmental perspectives. Examination, comparison, and contrasting of various health systems in the six World Health Organization geographic regions and countries within those regions, with regard to the specific health challenges they face.

SOC X21K. Contemporary Issues in Sociology: Special Topics.

SOC X21L. Sociology of Education.
Education as a societal institution, with emphasis on the United States educational system: how the system works; the effects of the system; recent changes.

SOC X21P. Politics and Society in Latin America.
Introduction to present-day Latin American politics and society with a focus on drug-trafficking and urban destitution in Brazil; party politics, protest, and collective violence in Argentina; the current political situation in Venezuela; and migration from Central America and the Caribbean to the United States. Also includes a general overview of revolutions and revolutionary movements in Latin America, and the effects of United States intervention in the region during the twentieth century.

SOC X21Q. Social Inequality.
Study of social inequality as the unequal distribution of scarce but commonly desired resources and the processes by which these resources are allocated to individuals and groups. Examination of income and wealth inequality, occupational and class hierarchies, inequality of educational opportunity, poverty, social mobility between and within generations, gender and racial/ethnic inequality, and the consequences of inequality. Overview of the concepts, theories, facts, and methods of analysis used by sociologists to understand the social production and reproduction of inequality.

SOC X21R. The Sociology of Race and Work.
Critical examination of work in the United States over the twentieth and twenty-first centuries through a gendered, Asian American lens, using a comparative race perspective. Subjects include the sociological examination of concepts such as labor markets, globalization, care work, and gender/racial segregation in the workplace along with the ways race and gender shape how and where individuals are fitted into the workplace, how skills are evaluated, and how labor markets emerge.

SOC X21S. Anti-Semitism.
Surveys trends in Judeophobia/anti-Semitism over 2,500 years in both Christian and non-Christian societies. Designed to use anti-Semitism as way to explore more general ideas in social theory such as boundary making; models of racial, ethnic, and cultural conflict; and the role of intellectual and scientific elites.

SOC X21T. Sociology of Africa.
An introduction to the sociological study of sub-Saharan Africa. Major themes include: sources of knowledge about Africa; characteristics of African states and societies, from origin to internal social boundaries (religion, ethnicity, class); kinship and family; and development and change.

SOC X21U. Urban Sociology.
Introduction to the study of the city and the suburbs. Specific focus on inequality in urban space, with emphasis on three major United States cities (New York, Chicago, and Los Angeles) and on several third world cities.

SOC X21V. Environmental Sociology.
Investigation of the ways human social patterns and ideologies shape the environment, how the environment shapes human lives, and the ways humans and the natural environment interrelate. The city of Austin will be used as a case study to examine the relationship between the natural and built environments (city space). Special emphasis on the process of global warming and its effects on human society and these relationships.

SOC X22C. Sociology of Creativity.
Introduction to varying aspects of creative insights, human consciousness, social processes, and the 'invention of reality.' Use of the elements of mindfulness, intuition, and creativity at individual, organizational, societal, and environmental levels, drawing on lectures, group discussions, books, articles, artistic films, and documentaries in order to better understand and appreciate the interconnectedness and interrelationship between 'inner' (personal) reality and 'other' (social) reality.

SOC X22D. Race and the Digital.
Review of theoretical developments in the sociological study of "race, including an examination of processes of racialization and cultural texts, in order to better understand the ways in which identities are socially produced. Attention will be placed on forms of popular culture, black cultural production, and political action to question how such practices are shaped by migrations within the African diaspora.

SOC X22F. Mental Health in Social Context.
Examines the social causes of mental health in the areas of social epidemiology of mental health; social and psychological factors in mental health; and treatment for psychological problems. Explores definitions of mental health and mental illness, and how they are measured. Contrasts the social view with the medical, psychiatric, and psychological views and explores social psychological factors in mental health, including perceived control over life, mastery, fatalism, social support, meaning, self-esteem, coping, trust, inequity, commitment, and flexibility.

SOC X22G. Politics, Power, and Society.
Explores the nature and dynamics of political life through classical works in political philosophy, contemporary sociological essays, fiction, and film. Discussion of the relationship between individual rights and state authority; what it means to belong to a group; the nature and dimensions of power and freedom; whether violence is compatible with democracy; and how and when revolutions take place.

SOC X22J. Economic Sociology of Health.
Provides a look at the economics of health and health care through a sociological lens. Examines how the multidimensional nature and distribution of health and healthcare are shaped by a variety of social

and economic factors. Gain an understanding of the power of incentives, markets, and cost-benefit analysis, as well as the limits of these tools, in creating effective health care policy.

SOC X22K. Race and Ethnicity Politics.

Explore racial and ethnic politics throughout the United States with a focus on Black and Latino politics. Examine group identity, racial inequality, policy making, activism, criminal justice system, and immigration.

SOC X22L. Law and Organizations.

Examine the intersection of law and organizational/workplace practices. Explore how law regulates the workplace (e.g., laws about sexual harassment), how organizations do or do not comply with the law, and the ways that organizational practices may affect legal standards.

SOC X22M. Sociology of Masculinities.

Sociological examination of the most important debates and discussions about men's experiences of masculinity in contemporary patriarchal societies. Exploration of social and individual meanings of masculinity, the dominant paradigms of masculinity that are taken as the norm, and the problems, contradictions, and paradoxes men experience in modern society.

SOC X22N. Race Politics and Caribbeans.

Examine racial and political themes among Spanish-speaking Caribbeans on the islands and in the United States. Explore racial politics in the three countries and compares notions of identity, experiences with racism and anti-racist protest with the United States

SOC X22P. Sex and Violence in Popular Culture.

Overview of the cultural framing of sex and violence through realistic and hyper-realistic representations of sex, love, violence, and war in popular culture. Examination of the ethical implications, including the ways in which these representations rely on and further social inequalities and the sociological concepts, methods, and theoretical approaches to understanding sex and violence in popular culture.

SOC X22T. Latino Migration and Human Trafficking.

Critically examine the complexity and intersectionality of Latino migration and human trafficking from global, regional, and local perspectives.

SOC X22U. United States Immigration.

Utilizes a sociological perspective to gain an understanding of what social forces drive migration to the United States, how migrants organize their migration, and how immigration affects United States' society.

SOC X22V. Race, Gender, and Surveillance.

Overview of theories in the sociology of social control, with a focus on risk, power, ethics, and surveillance. Examines historical transformations in social control and the distributions of power in the United States and global contexts, with attention to race, gender, and class. Subjects include: the transatlantic slave trade; prisons and punishment; the gaze, voyeurism, and reality television watching; the Internet; travel and state borders; privacy; and biometrics and the body.

SOC X23. The Family.

The American family in historical and comparative perspective. Family history and origins; comparative family systems; social antecedents of family structure and process; family formation and dissolution; family and society; recent family changes and prospects for the future.

SOC X23C. Policing.

Examines the purposes and structure of policing and the shifting roles and powers of police officers. Focuses on several critical issues in modern-day policing, including the effectiveness of various police strategies as well as their legitimacy. Considers limits on the ability of the police to control crime, and the ways in which individuals and communities work to police themselves.

SOC X23D. Border Control and Deaths.

Focus on enactment of border control policies, policy implementation and death patterns at the United States-Mexico border, patterns of unauthorized border crossings through dangerous border terrain, grassroots movements to support migrants and lessen deaths, and the ethics of coercive border control. Surveys the public sentiments and attitudes that support new border control policies, the patterns of migrant deaths in deserts and in the Rio Grande River associated with border control strategies, movements and community efforts to support migrants in the Arizona border area, and legal and ethical arguments and concepts that frame discussions of migrant deaths at the United States-Mexico border.

SOC X23E. Economic Sociology.

Examine sociological perspectives on a range of economic matters including money, activities of firms and corporations, consumption of goods and services, market behavior, organizational malfeasance and economic crisis, and the production of labor market inequality, as well as economic behavior in less traditional settings such as markets for intimacy and markets for human goods. Learn about some of the major economic transformations that have reshaped social life in recent decades, including financialization, rising income inequality, corporate decline, and shareholder value management. Consider how sociologists have contributed to understanding the causes or consequences of these trends.

SOC X23F. Food and Society.

Explores the social context of food; including food and identity, social class and culture, as well as who plans, purchases, and prepares food for our families. Food production and policies in the United States and government assistance for the hungry are also covered.

SOC X23G. Globalization and the Coronavirus Pandemic.

Examine the modern globalization process that also incorporates a description of the current Coronavirus pandemic as a phenomenon that is inextricably linked with modern globalization.

SOC X23L. Latina/o/x Citizenship.

Explore the concepts of membership, belonging, immigration and citizenship in the Latina/o/x experience. Examine how historically, politically, socially and culturally, Latinas/os/xs have been construed as belonging or not belonging members of the United States society.

SOC X23S. Building the Sustainable City.

SOC X24K. Social Change in Developing Nations.

Overview of changing social structure in the Third World.

SOC X24L. Latinx Sociology.

Explore how institutions have shaped the gendered, racial, and class-based experiences of Latinxs from a sociological perspective, including historical patterns of Latinx migration to the United States, contestations over racial classifications, and problematic issues surrounding the term Latino. Review more recent studies that show how different institutions shape the Latinx experience and demonstrate how gendered, racial, and classed forces have shaped various Latinx communities. Examine Latinx agency and how Latinx communities have sought to reconfigure and push back on these social forces.

SOC X24M. Sociology of Money.

Explore the social meanings of money, the distribution of economic resources, why some workers are paid more than others, how prices are determined, the modern financial system, unconventional markets, the connection between price and value, and money in personal relationships.

SOC X24P. International Political Economy of Lower-Income Countries.

Explore the ways that China, India, Brazil and other lower-income countries are transforming the patterns in global finance, trade, aid, women's empowerment, and the control or corruption.

SOC X25F. African American Family in Historical and Contemporary Contexts.

Examine how African Americans managed to maintain a sense of family from the time of slavery to the present trend of mass incarceration.

SOC X25K. Criminology.

An investigation into the nature of criminal events, including homicide, rape, robbery, property crimes, and white-collar crimes. Also examines the United States criminal justice system.

SOC X25L. Sociology of Criminal Justice.
Examination of the police, courts, and prisons: how they work, their impact on those who pass through them. Introduction to the American criminal justice system, its policies and procedures. The primary focus will be on the roles and functions of the police, the courts, and corrections, with a special emphasis on how well or not so well the system operates.

SOC X26D. Data Science for the Social World.
Introduction to data science for the political and economic world. Explore a variety of political and economic data and develop proficiency in R and Excel.

SOC X27M. Social Research Methods.
Collect data to answer research questions by focusing on the meaning of variables, understanding causation, study design, basic sampling, and modes and methods in data collection.

SOC X29. Social Stratification.
The types and levels of social inequality; the institutional and group processes that generate inequality; the interplay of social, organizational, economic, and political forces that affect the degree of differential opportunities and rewards in society.

SOC X29S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SOC X30C. Death and Dying: Sociological Perspectives.
Sociological perspectives on definitions of death; group differences in mortality rates and causes of death; social meanings of death and dying; treatment of the dying and the dead; and grief and bereavement.

SOC X30G. Food and Religion in Asia.
Use the lens of food to approach study of religious communities, values, and identity formation in Asia's past and present, covering South Asia, China, Japan, Taiwan, South Korea, and Southeast Asia. Explore questions involving what is eaten and what is not, taboo, hunger, anomaly, gender, food security, and recent ethical problems regarding bio-engineered foods (GMOs).

SOC X30P. Sociology and Social Psychology.
Examines how individuals perceive, interact with, and affect other individuals from the perspectives of both psychology and sociology.

SOC X33K. Sociology of Gender.
Inequality between the sexes; men's and women's changing roles in society.

SOC X35R. Reproductive Justice and Race.
Examine the links between reproductive care and social inequality, and explore reproductive outcomes for women in the context of social justice.

SOC X36C. American Dilemmas.
Examination of critical American social problems, including problems in the economic, political, and health care systems, as well as inequities based on income, gender, and race. Exploration of how these problems are a natural outgrowth of the existing social structure.

SOC X36D. Race, Class, and Health.
Designed to introduce students to the complex relationships among race, class, gender, and health status. Investigates how health is linked to individual behaviors and to the interaction between people and their social, cultural, and physical environments.

SOC X36G. Gender Politics in the Islamic World.
Study of the Islamic world and major sociological concepts such as gender, social organizations, culture, and politics. Examines how culture is mediated by politics, resulting in diverse interpretations of Islam and in different policies with respect to women's rights.

SOC X36P. Social Psychology and the Law.
How courts make use of social science, as well as how social scientists study the legal system. Considers the uses of social science across multiple types of legal domains, such as eyewitnesses to crime, jury trials, punishment, children in the courts, and a variety of public policy issues.

SOC X40C. Globalization.
A sociological analysis of the interrelated economic, political, and cultural aspects of globalization. Examines the consequences of globalization for nations around the world and for groups within these nations.

SOC X40D. Violence.
An overview of the different theories of interpersonal and group violence. Includes criminological theories of violent crime, as well as feuding, ethnic and nationalist violence, political violence, and aggression in intimate relations.

SOC X40G. Sociology of Sexualities.
Review of sociological perspectives on sexuality. Examines how social institutions in United States society shape sexual values, beliefs, and practices. Subjects include changing cultural images of sexuality, sexual identities, and social movements.

SOC X40L. Aging and the Life Course.
The biological, social, and psychological aspects of human aging from adolescence until death, with special emphasis on cultural norms and the social and demographic context in which aging occurs. Includes the challenges and problems of adjustment at each life stage, and the social, political, and economic consequences of increased longevity and changes in the age structure of the populations of modern societies.

SOC X40S. Race and United States Social Policy.
Examine the relationship between race and the development of United States social policy. Explore how specific social policies affect racial and ethnic inequality.

SOC X41C. Medical Sociology.
Explores the social context of health, illness, and the health care system in American society. Discussion of the processes of medicalization and demedicalization, social factors influencing health and health care, the organization of the health care delivery system and patient outcomes, and the social meaning and experiences of illness.

SOC X41D. The Politics and Art of Iran's Woman, Life, Freedom Uprising.
Analyze the politics and art of Iran's 2022 Woman, Life, Freedom Uprising movement. Develop a digital humanities resource on the movement through collaboration.

SOC X42N. Social Inequality and Health in the United States.
Examine how socioeconomic status and social inequality shape health and mortality across the United States. Consider various possible explanations including stress, health behaviors, violence, and other factors.

SOC X42S. Sex and Sexuality in the Muslim World.

SOC X43. Religion and Society.
The growth and decline of religious groups and traditions; "cults" and new religions; comparative sociology of religion; the United States religious landscape; religion and individual health and well-being; spirituality and other aspects of social life.

SOC X44. Racial and Ethnic Relations.
Contemporary racial and ethnic problems; emphasis on minority groups in the United States.

SOC X44C. Race, Science, and Race Science.
Explore the broad history of how race has shaped the development of science in the United States from the 1800s to the present, including medical treatments, diagnostic criteria, technological developments, and business ventures.

SOC X45D. Inequality in the United States Educational System.
Examine how inequality has developed and is maintained within the American public education system.

SOC X50G. Guns in America.
Examine firearms in the United States. Engage with literature drawn from the social sciences, law, medicine, and public policy to develop a holistic understanding of the historical and contemporary role of firearms in the cultural, social, and political landscape of the U.S.

SOC X50M. Sociology Internship Seminar.
Intern in an agency, organization, or business under supervision. Apply the knowledge and skills acquired in sociology courses.

SOC X52. Social Movements.
Characteristics of crowds, publics, and social movements; their role in social organization and social change.

SOC X52E. Media Industries and Entrepreneurship.
Examination of the social, political, and economic contexts in which media and culture are produced, distributed, and monetized. Emphasis on new media and communication technologies.

SOC X52S. Globalization and Social Media.
Issues surrounding the hype, myth, paradox, and reality of social media in a global context.

SOC X54K. Sociology of Health and Illness.
Application of sociological concepts and principles to the study of health professions, medical institutions, community medical organization, and the distribution of illness.

SOC X54L. Latinx Austin.
Explore the city of Austin, the city's importance for Latino communities, and the importance of Latinos for the city.

SOC X59. Labor and Labor Movements.
Overview of work organizations in the United States, with emphasis on globalization, inequality, and labor movements.

SOC X66. Deviance.
Analysis of social norms, conformity, and reactions to norm violations. Topics include behavioral forms of deviance such as suicide and drug abuse and nonbehavioral forms of deviance such as physical abnormality.

SOC X69K. Population and Society.
The study of populations, including their growth, age structure, and patterns of fertility, mortality, and migration; the social causes and consequences of these phenomena.

SOC X79H. Honors Tutorial Course.
Research into and development of a thesis topic and proposal followed by the writing and defense of a thesis.

SOC X79M. Sociological Theory.
Critical examination of major sociological theories and their relevance to current research and social conditions.

SOC X79N. Conference Course.
Supervised individual study of selected problems in sociology.

SOC X79P. Undergraduate Research Opportunity.
Perform research-related activities with faculty members in the sociology department. Collect interview or survey data, analyze statistics, synthesize research literature, and code qualitative data.

SOC X90K. Proposal Preparation.
Preparation of proposal for the doctoral dissertation.

Graduate Courses

SOC X19S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SOC X29S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SOC X80. Conference Course.
Sociological topics not otherwise offered at the graduate level.

SOC X83K. Topics in Seminars in Social Psychology.
Substantive issues and current topics in social psychology.

SOC X83K.1. History and Theories of Social Psychology.

SOC X84J. Special Topics in Social Statistics.

SOC X84L. Social Statistics: Basic Concepts and Methods.
Review of descriptive statistics; probability concepts; statistical inference, bivariate correlation and regression, multiple regression, dummy variables, analysis of variance, analysis of covariance; applications of statistical computing packages to social science data.

SOC X84M. Topics in Seminar in Data Analysis.
Quantitative sociological research integrating the use of statistical analysis with computer applications and survey data.

SOC X84M.1. Evaluation of Social Policy.

SOC X85K. Social Statistics: Discrete Multivariate Models.
Assumptions, estimation, testing, and parameter interpretation for models using categorical data; applications of statistical computing packages and programs to social science data.

SOC X85M. Social Statistics: Linear Models.
Explore model specification; a review of simple regression; scale construction; missing values; ordinary and generalized least squares; measurement error and unobserved variables.

SOC X85N. Causal Inference.
Analyze key concepts and methods of causal inference. Examine strategies for isolating the relationship between a given predictor and dependent variable of interest from potential confounders to determine whether any quantitative social science study is employing causal inference or naive" methods; articulate the pros, cons, and assumptions made by different causal inference strategies; and understand how to engineer a causal study.

SOC X86L. Social Statistics: Dynamic Models and Longitudinal Data Analysis.
Applications of dynamic models to data collected at successive points in time. Dynamic structural equation models; statistical time-series analysis; stochastic processes, panel, and event-history analysis.

SOC X87C. Special Topics in Social Research Methods.

SOC X87J. Fundamentals of Research Methods.
Fundamental assumptions and procedures for conducting sociological research, including the logic of science, the links between theory and methods, measurement, experiments, sampling, surveys, qualitative methods, and ethics.

SOC X87L. Qualitative Methods for the Social Sciences.
Qualitative survey research methods, approaches, and designs, including participant observational techniques, semistructured interviewing, and formal questionnaire and census-type surveys.

SOC X88J. Readings in Ethnography.
This reading-intensive seminar has four major objectives: 1) to become familiar with some classic and contemporary ethnographies, 2) to acquaint students with the methodological tenets of ethnography, 3) to consider theoretical and epistemological issues in ethnographic research, 4) to discuss narrative strategies in ethnographic writing.

SOC X88K. Field and Observational Methods.
Rationale and logic for field research; participant and nonparticipant observation; informant and conversational interviewing; personal documents, records, and physical traces; life histories; sources of error and bias; personal and ethical dilemmas; modes of analysis.

SOC X88L. Historical and Comparative Methods.
Scope and methods of historical and comparative sociology; application of historical sources to answer sociological questions; logic of comparative analysis in theory construction.

SOC X88N. Ethnographic Theory and Practice.
Explore the epistemology of ethnographic methods, crafting an ethnographic study, and conducting and analyzing field observations and in-depth interviews.

SOC X89E. Event History Analysis.
Evaluate survival methods for the analysis of change in time-dependent discrete dependent variables, drawing on methodological and empirical research from the social sciences. Explore the relationship between theories of social change, life course events, and dynamic models.

SOC X89K. Topics in Seminars in Demography.
Substantive issues and current topics in population studies and social demography.

SOC X89K.1. General Approaches to the Study of Population.

SOC X89K.12. Demography of Health and the Life Course.
An in-depth introduction to the major conceptual frameworks and empirical research that examine distal and proximate social factors influencing adult health. Includes the assessment of key social and biological pathways linking social conditions at particular points in the life course with adult health outcomes.

SOC X89K.14. Sociology of Families and Households.
Examine family research literature describing change and variation in family behavior. Explore cohabitation, marriage, divorce, kinship, parenthood, gender, and sexuality.

SOC X89K.2. Human Fertility.

SOC X89K.3. Human Mortality.

SOC X89K.4. International Migration.

SOC X89K.6. Training Seminar in Demography.

SOC X89K.9. Immigration Policy.

SOC X90K. Proposal Preparation.
Preparation of proposal for the doctoral dissertation.

SOC X91L. Basic Demographic Methods and Materials.
Population composition, change, and distribution; methods of standardizing and decomposing rates; life tables and population models; analysis of data from advanced and developing countries; applications of computer programs for demographic analysis.

SOC X94K. Topics in Seminars in Sociological Theory.
Development of social thought; the emergence of systematic sociological theory; interrelations with other social sciences.

SOC X94K.12. Sociology of Culture.
An overview of some of the major contemporary research in the sociology of culture. Includes discussion of meaning systems and their transformations; symbolic nature of consumption; relationship between culture and social stratification; cultural bases of power; culture industry; and sociology of the arts.

SOC X94K.13. Cultural Studies.
Examines the history, debates, and key developments within the trans-disciplinary field of cultural studies. Considers the significance of the intellectual work produced in Britain from the 1940s to the present and the relationship today between the sociology of culture and cultural sociology.

SOC X94K.14. Theories of Power.
Examines the social theory controversy over the definition of the terms power and domination. Considers the classical and contemporary theoretical understandings of power and domination and studies the diverse ways in which these concepts have been deployed in empirical research.

SOC X94K.2. Contemporary Sociological Theory.

SOC X94K.3. Classical Sociological Theory.
A review of classic works in sociological theory, focusing on the work of nineteenth-century and early twentieth-century theorists. Critically examines the historical and theoretical context of sociology's founding ideas. Explores the promises and problems of the relationship between sociological theory and the modern era.

SOC X95E. Topics in Seminars in Education.
In-depth theoretical and policy discussions designed to give students intensive exposure to specific issues in education.

SOC X95E.1. Sociology of Education.
Provides an overview of the field of sociology of education. Examines the ways in which schools reproduce, reinforce, and challenge the prevailing social, economic, and political relationships in society. Includes discussions of why people go to schools, who has access, and the effects of schools on individuals, communities, and society.

SOC X95E.2. Poverty, Race, and Schools.
Focuses on children's academic outcomes within the contexts of poverty, race, and schools in K-12 education. Includes an assessment of a number of student groups in an effort to understand why some children have higher quality schooling experiences than others. Considers the roles of teachers and parents in affecting children's academic outcomes, with primary emphasis placed on their importance in elementary and middle school.

SOC X95E.3. High School and Transition to Adulthood.
Focuses on how education is related to adolescents' transition to adulthood in modern society. Examines the structure of schooling and the life course stages of adolescence and early adulthood, societal stratification, and intergenerational mobility.

SOC X95E.4. International Issues in Education.
Introduction to key theoretical and empirical work on education and social stratification from an international perspective. Focuses on studies of school access, educational attainment and achievement, and inequality of educational opportunity in Africa, Asia, and Latin America. Includes discussion of comparative and case study readings that explore specific themes such as education and social mobility, gender, race and ethnicity, and school contexts.

SOC X95E.5. Social Contexts of Education.
Explores school as a social context by delving into the informal processes of education, such as socialization and the organization of social relations. Includes discussion of the school as a site of social relations, social psychological influences on educational trajectories, and the social psychological consequences of educational experiences.

SOC X95F. Topics in Seminars in Family.

SOC X95F.2. Marriage, Family, and Kinship.

SOC X95F.3. Family and Health.

SOC X95F.7. Aging and the Life Course.
Concepts and controversies about aging and the adult life course in the United States. Includes discussion of the biology of aging as it relates to current social issues and trends, population aging and related demographic trends, the economics and politics of aging, the trajectories and transitions of the adult life course, healthy aging, age as a social status, health care rights and responsibilities, retirement as a social institution, generational equity, and the conditions and choices at the end of life.

SOC X95F.8. Gender, Marital Status, and Well-Being.
Examines gender and relationships from social psychological perspectives. Considers how and why intimate relationships differ for men and women as well as the gendered consequences of relationships for mental and physical health.

SOC X95G. Topics in Seminars in Gender.

SOC X95G.10. Sociology of Sexual Violence.
Examines the different social forces and dynamics responsible for a variety of expressions of sexual violence existing in contemporary society. Designed to examine these processes promoting social violence from feminist-informed sociological perspectives; explore and analyze the historical, economic, and socio-cultural contexts responsible for these processes; study the issues and concerns with regard (but not limited) to gender, race and ethnicity, class, sexuality, and political activism associated with sexual violence research in the social sciences;

and discuss and critique published sexual violence research based on qualitative methodologies across disciplines.

SOC X95G.11. Qualitative Methods and Sexuality Research.
Examines major qualitative approaches to the study of sexuality from a sociological perspective; issues and concerns with regard to gender, race and ethnicity, class, same-gender sexualities, and activism associated with sexuality research in the social sciences; and published sexuality research based on qualitative methodologies.

SOC X95G.12. Women and the Changing World of Work.
Explores the nature and causes of gender stratification in industrial societies. Examines theoretical and empirical issues regarding gender inequality in the labor market. Includes changes in female labor force participation, gender segregation in the workplace, gender gaps in earnings and promotions, and gender differences in career processes. Addresses how social institutions that vary from one country to another shape men's and women's economic opportunities and the degree of gender inequality in the society.

SOC X95G.3. Gender and Family.
Review of basic theoretical perspectives and empirical evidence concerning gender and family relationships. Considers how and why family relationships differ for men and women as well as the gendered consequences of relationships for men's and women's well-being. Includes discussion of marital status, marital transitions, marital quality, same sex intimate relationships, cohabiting relationships, and parent/child relationships.

SOC X95G.4. Gender and Health.

SOC X95G.5. Gender and Development.

SOC X95G.6. Gender and Work.
Examines theoretical and empirical issues regarding gender inequality in the labor market. Includes discussion of changes in female labor force participation, gender segregation in the workplace, gender gaps in earnings and promotions, as well as gender differences in career processes.

SOC X95G.7. Feminist Theory.
Examines social categories such as the state, citizenship, nationalism, and globalization from a feminist perspective.

SOC X95G.8. Readings in Gender and Sexuality.
Presents an overview of sociological theories of sexuality and provides a forum for discussion of recently published works in the sociology of gender and sexuality.

SOC X95G.9. Gender and Society.
Examines the social construction of gender inequality, paying special attention to how divisions by race, class, and sexuality contribute to and occasionally undercut men's power and privilege over women. Emphasis is also placed on moments of resistance and change in gender arrangements.

SOC X95J. Topics in Seminars in Health.

SOC X95J.1. Sociology of Health and Illness.

SOC X95J.10. Structural Equations Modeling of Health and the Life Course.

SOC X95J.12. Education, Socioeconomic Status, and Health.
Examines why people with higher socioeconomic status have better health than lower status individuals. Explores the links between aspects of social status and health and how education influences health in ways that are varied, present at all stages of adult life, cumulative, self-amplifying, and uniformly positive.

SOC X95J.13. Gender, Health, and Society.
Focuses on the gender dimensions of health, illness, and the medical care industry in the United States, with some international comparisons. Examines the role of women as major actors in changing the health-care system, reducing health risks for themselves and their families, and their roles as health-care providers, public administrators, and leaders in the health-care establishment. Also examines the role of different levels and branches of government and the relative power of key nongovernmental actors and the media in the formation of public policy and the definition and framing of our health agenda.

SOC X95J.6. Sociology of Mental Health.
Examines the social causes of mental health. Explores what mental health and mental illness are and how they can be measured, contrasting the social view with the medical, psychiatric, and psychological views.

SOC X95J.7. Health and the Life Course.
Health across the life course; the timing and sequencing of life-course experiences and events with respect to health.

SOC X95J.8. Biosocial Approaches to Health.
Examines the relationships between the natural and social environments and human health and behavior. Explains how disease, functional problems, and disability are not simply biomedical problems but are reflective of a complex array of behavioral factors and social forces. Focuses on the biologically informed sociological models of health in order to understand how genetics and major biological systems interact with social conditions and experiences to influence health and health-related behaviors.

SOC X95J.9. Race and Health.
Study the links between social conditions, including racial discrimination, and objective indicators of health. Discover the new body of literature documenting how racism becomes embodied and requires new tools and vocabulary to explore such connections. Conduct a detailed survey of the interdisciplinary discrimination-health literature integrating sociological and biological understandings of discrimination exposure, stress physiology, and the links to morbidity and mortality over the life course.

SOC X95L. Topics in Seminars in Race and Ethnicity.
Sociological theories and findings concerning various aspects of race and ethnicity.

SOC X95L.1. Comparative Perspectives in Race and Ethnicity.

SOC X95L.10. Critical Theories of Race and Racism.
Introduction to global perspectives on race, ethnicity, and racism. Examines the historical relationship between the emergence of ideas about race and Western modernity: importance of slavery and European colonialism in producing modern understandings of race and racial difference; contemporary racial formation in the period after the anticolonial struggles of the mid-twentieth century.

SOC X95L.8. Race, Media, and Culture.

SOC X95L.9. Race and the Body.
Explores theories and research methodologies in the sociological study of the body, with a focus on race, racism, gender, and sexualities.

SOC X96L. Topics in Seminars in Work, Occupations, and Organizations.

SOC X96L.10. Stratification and Social Mobility.

SOC X96L.15. Nongovernmental Organizations in the Developing World.
Explores how nongovernmental organizations reflect local and international initiatives related to human rights, the environment, sustainable development, health, education, and much more.

SOC X96L.16. Sociology of Poverty in the United States.
Review of selected sociological literature on poverty and related aspects of inequality, mostly in the United States but with some comparisons made with other developed nations. Both quantitative and qualitative research on American poverty are considered.

SOC X96L.17. Entrepreneurship and Incubation.

SOC X96N. Topics in Seminars in Crime, Law, and Deviance.
Substantive issues and current topics in the study of crime, law, and deviance.

SOC X96N.1. Criminology.
Examines major topics in the social scientific study of crime, including the measurement of crime, profiles of criminals, criminal behavior across the life course, and public perceptions of and reactions to crime.

SOC X96N.2. Theories of Crime Causation.
Focuses on the major theories of criminal behavior and whether and in what ways empirical data support or refute various theoretical perspectives.
SOC X96N.3. Criminal Justice.
Designed to provide an overview of research on how the penal system works in practice by examining the empirical literature on sentencing, prisons, recidivism, and evaluation research of penal programs.
SOC X96N.4. Introduction to Law and Society.
Focuses on the noncrime aspects of the legal system, especially civil justice; the pursuit of perceived legal entitlements and grievances; studies of legal professionals and legal decision makers; and the use of the legal system to advance social change.
SOC X96N.5. Law, Legitimacy, and Control.
Explores the interconnections between law, morality, and the sense of injustice. Examines the attributes of a moral system as they influence the collective assessment of legitimacy, the emergence of social movements for reform, and the resulting efficacy of law as an instrument of control.
SOC X96N.6. Deviance.
Examines the characteristics, causes of, and societal reactions to several types of deviant behavior.
SOC X96P. Topics in Seminars in Political Sociology, Development, and Globalization.
SOC X96P.1. Political Sociology.
SOC X96P.10. Introduction to the Sociology of Latin America.
SOC X96P.11. Mexican Political System in Transition.
SOC X96P.12. Gender and Politics.
Provides a comprehensive introduction to the history of women's entry into politics internationally, the current state of women's political representation across countries and regions, and contemporary debates on why and how women's access to political power varies across countries. May include discussion of the ways in which gender intersects with other social identities, such as race, ethnicity, class, and sexual orientation.
SOC X96P.13. Housing Practices and Public Policy in Latin America.
SOC X96P.14. Citizenship and Social Policy.
SOC X96P.15. Economic Sociology.
SOC X96P.16. Urbanization.
SOC X96P.17. Poverty and Marginality in the Americas.
Review of the past and present ethnographic analyses of the nature and experiences of poverty and marginality in Latin America and in the United States. Examines some of the most controversial issues and debates, and explores emerging research topics north and south of the border.
SOC X96P.19. Bourdieu and the Craft of Sociology.
Examines Bourdieu's key notions as they become articulated in the craft of research and writing in his work, and that of others, with an underlying objective of learning how to think and conduct sociological research with or against Bourdieu.
SOC X96P.2. Social Movements.
SOC X96P.20. Prosocial Behavior.
Instruction steers away from traditional focus of sociology and considers pro-social behavior - actions intended to help or benefit others. Similar to the "positive psychology" movement, which asks what makes individuals resilient and happy rather than abnormal or depressed, examines what makes individuals, groups, and communities sacrifice, trust, volunteer, and generally work together.
SOC X96P.3. Social Change.
SOC X96P.6. Elites.
SOC X96P.7. Peace, Conflict, and Violence.
SOC X96P.8. Cultural Sociology.
SOC X96P.9. Economic Development and Social Change.
SOC X96Q. Topics in Seminars in Law and Human Rights.
Theory and research on those instances in which legal regimes and/or legal institutions, such as prisons, raise human rights issues.
SOC X97D. Publishing Papers in Sociology.
SOC X97P. Proseminar.
A review of the requirements and responsibilities of professional sociologists.
SOC X98. Thesis.
SOC X98T. Supervised Teaching in Sociology.
Explore the purposes and significance of teaching, teacher identity, student perceptions, and working as a Teaching Assistant. Examine critical pedagogy such as cultural, disability, and classroom interventions. Identify your emerging "Teaching Philosophy".
SOC X99W. Dissertation.

Professional Courses

SOC X19S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
SOC X29S. Topics in Sociology.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Sociology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
SOC X90K. Proposal Preparation.
Preparation of proposal for the doctoral dissertation.

SPB - Sports Production and Broadcasting

Sports Production and Broadcasting: SPB Lower-Division Courses

SPB X01. Introduction to Sports Production and Broadcasting I.
Introduction to the foundational aspects of the sports broadcasting industry and the essential production skills required to be successful in the field.
SPB X02. Introduction to Sports Production and Broadcasting II.
Explore foundational aspects of sports broadcasting and production with an emphasis on editing.
SPB X10. Topics in Sports Production and Broadcasting.
Explore contemporary issues and practices in sports production and broadcasting.
SPB X19S. Topics in Sports Production and Broadcasting.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Texas Global Office. Credit is recorded as assigned by the study abroad advisor in Sports Production and Broadcasting. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SPB X20. Topics in Sports Production and Broadcasting.
Explore contemporary issues and practices in sports production and broadcasting.

SPB X21. Independent Study.
Pursue special supervised individual research studies.

SPB X22. Storytelling in Sports Production and Broadcasting.
Explore the art of storytelling in live and other forms of sports production.

SPB X29S. Topics in Sports Production and Broadcasting.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Texas Global Office. Credit is recorded as assigned by the study abroad advisor in Sports Production and Broadcasting. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPB X70. Topics in Advanced Sports Production and Broadcasting.
Discuss advanced skills and practice in production and/or broadcasting in a range of environments.

SPC X20C. Topics in Iberian or Latin American Studies.
Significant issues in Iberian or Latin American societies and cultures.

SPC X20C.10. Cuba in Question.
Explore Cuba's peoples, cultures, ethnicities, and the social and historical processes that go far beyond the common media stereotypes.

SPC X20C.11. History of Sephardi Jews.
Examine the early-modern networks established by the Sephardi Jews (Sephardim) across the Mediterranean and Atlantic, the rich Ladino Judeo-Spanish culture that thrived in the Ottoman Empire, and Sephardi encounters with the modern world.

SPC X20C.2. Mediascapes: Literature and Media in the Caribbean.
Analyzes the relationship between literature and media technologies in contemporary Caribbean cultures.

SPC X20C.4. Spanish Storytelling.
Explore the Spanish storytelling tradition, with a focus on famous Spanish language authors who have enjoyed a broad reception in the English-speaking world.

SPC X20C.5. The United States in Latin American Culture.
Explore how Latin American and Latinx writers and artists have used the United States and globalization tropes, not just to come to terms with politics, popular culture, crime, technology, gender, and race, but also to talk about themselves.

SPC X20C.6. Jews of the United States, Canada, and Latin America.
Explore the cultural history of Jews in the United States, Latin America, and Canada through a representative sample of short literary texts, film clips, and musical recordings.

SPC X20C.7. Latinx Caribbeans: Culture and Diaspora in the United States.
Explore prominent Latinx poets, writers, performers, and media artists connected to several diaspora communities from the Hispano-, Franco-, and Anglophone Caribbean in the United States.

SPC X20C.8. Music, Power, and Politics in Latin America.
Analyze how popular music and more sound-related media in Latin America have played central roles in the expression of global citizenship, national and transnational identities, social justice, race, gender, and sexuality.

SPC X20C.9. Indigenous Relations.
Explore the multi-layered relations of Indigenous Peoples to the land in the context of late twentieth- and early-twenty-first century Latin America.

SPC X29S. Topics in Spanish Civilization.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN - Spanish

Spanish: SPN

Lower-Division Courses

SPN X01. Spanish for Graduate Students in Other Departments.

Purpose: To introduce fundamentals of grammar and lexicon to enable students to read texts in their areas of specialization. Primary aim: To allow students to acquire reading proficiency. Also presents audio-aural aspect.

SPN X01D. First-Year Spanish I.

Explore the development of speaking, listening, reading, and writing skills; build vocabulary, review basic rules and terminology of grammar; and examine Spanish-speaking cultures.

SPN X04. Accelerated Introductory Spanish for Heritage Learners.

Designed primarily for students who have a cultural and linguistic connection to Spanish (i.e. native and near-native speakers, Spanish as home language).

SPN X10D. First-Year Spanish II.

Continue to explore the development of speaking, listening, reading, and writing skills; build vocabulary, review basic rules and terminology of grammar; and examine Spanish-speaking cultures.

SPN X11. Intermediate Spanish.

Focus on the development of speaking, listening, reading, and writing skills while building vocabulary. Review rules and terminology of Spanish grammar. Examine complex grammar structures and Spanish-speaking cultures.

SPN X11D. Second-Year Spanish.

Focus on the development of multilingual literacy through the analysis and use of Spanish to achieve linguistic competence (aspect, mood, compound tenses, passive voice), communication and interactional competence (pragmatics, cultural perspectives), and metalinguistic competence (critical analysis of oral and written texts, dialectal differences).

SPN X11J. Intermediate Spanish for Heritage Learners.

Designed primarily for students who have a cultural and linguistic connection to Spanish (i.e. native and near-native speakers, Spanish as home language).

SPN X14. Spanish Conversation and Culture.

Explore the development of oral skills and speaking strategies in different discourse genres including informal, formal, academic, and travel.

SPN X14J. Writing and Culture in Context for Heritage Learners.

Designed for students with a cultural and linguistic connection to Spanish (i.e. native and near-native speakers, Spanish as a home language). Examine Hispanic cultures and sociopolitical experiences and explore communicative abilities through a variety of interactive, student-centered activities.

SPN X19S. Topics in Spanish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN X29S. Topics in Spanish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SPN X19S. Topics in Spanish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN X27C. Advanced Grammar and Writing in Context.

Study and practice of Spanish grammar that includes reading exercises and guided composition designed to develop writing skills across styles. Students will be exposed to various topics in Spanish language, literature, and culture.

SPN X27N. Academic Writing for Heritage Speakers.

Designed specifically for heritage speakers of Spanish and includes a wide range of cultural readings and writing tasks. Aims to strengthen the clarity and organization of writing, promote critical thinking, and master grammar points of particular concern to heritage speakers.

SPN X27V. Advanced Writing and Service Learning.

Explore the ethical perspectives on issues in education, immigration, and community service.

SPN X28. Spanish Civilization.

A survey of the social, political, and cultural history of Spain.

SPN X28C. Introduction to Literatures and Cultures.

Overview of Iberian and/or Latin American literatures and cultures, including the arts and popular expressions, from a multidisciplinary perspective. Among the regions studied are Spain; North, Central, and South America; the Caribbean; and related areas in Africa.

SPN X29S. Topics in Spanish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN X30D. Spanish across Disciplines.

Students read and discuss Spanish language materials related to the subject matter of another designated course.

SPN X30L. Introduction to Language and Linguistics in Society.

Examines the dynamics of language structure and use throughout the Spanish-speaking world, and covers topics such as sound systems, grammatical structures, historical developments, language learning and loss, and dialect differences and their social significance.

SPN X46C. Spanish Pronunciation.

Review Spanish pronunciation. Examine the fundamental principles of phonetic analysis in order to show how Spanish sounds are produced, how they fall into patterns, and how they change in different environments.

SPN X48V. Research through Community Engagement.
Reflect on issues of education, community, and the process of learning utilizing a mixture of volunteer and research work.

SPN X50C. Gender Issues in Contemporary Latin American Cinema.
Studies Latin American cinema as a device of gender system formation and reinforcement, and as criticism of patriarchal hegemony; discusses questions related to sexuality depicted in Latin American films. Subjects covered include: maternity, prostitution, machismo, children's sexuality, homosexuality, heterosexuality, and gender violence in films from the 1930s to present. Conducted in Spanish.

SPN X50D. Latin American Film and Culture.
Review Latin American cinema from the silent era to present, with an emphasis on the last forty years. Discuss the development of the film industry (particularly in Argentina and Mexico in the 1930s and 1940s), the "New Wave" of Latin American cinema in the 1960s, and contemporary trends.

SPN X50E. Mediascapes: Literature and Media in the Caribbean.
Analyze the relationship between literature and media technologies in contemporary Caribbean cultures. Examine the notion and uses of Caribbean mediascapes. Discuss the uses of media technologies derived from film, television, the internet and YouTube, and the ways they are used and read in the Spanish Caribbean.

SPN X50F. Latin Noir: Film and Crime in Latin America.
Examine the contributions of Latin America to film noir, in the context of criminality and urbanization in contemporary society.

SPN X50G. Cuban Revolution.
Explore diverse accounts and interpretations of the Cuban Revolution in fictional and documentary film and narrative produced in the island and abroad by pro-and counter-revolutionary, island and diaspora, Cuban and non-Cuban, local and international directors and writers.

SPN X50I. Latin American Literary and Artistic Environmental Activism.
Explore literary and artistic works that engage in questions of environmental care and justice in the context of twentieth- and twenty-first century Latin America.

SPN X51. Don Quijote and the Early Modern World.
Study of Cervantes's Don Quijote in depth in the original Spanish. Examines the author's views on artistic freedom, as well as his manipulation of literary genres and conventions, with his questions regarding the dominant political, religious, and literary discourses of early modern Spain.

SPN X51C. Globalization, Film, and Media in Latin America.
Explore globalization in Latin America through the lens of film and mass media.

SPN X51D. Spanish Cinema and Cultural Identity.
Explore how Spanish Cinema from the Francoist period until present-day enter a cultural dialogue with issues related to national identity, gender, class, and immigration.

SPN X52C. Contemporary Caribbean Literature.
Explore themes and major authors from the Spanish Caribbean, since 1980 to contemporary United States Caribbean authors (Cuba, Puerto Rico, Dominican Republic). Discuss themes such as national identities, history, intersectionality of race, gender and sexuality, exile and displacement, urban and city enclaves, and the richness and complexity of Caribbean cultures in the United States.

SPN X52D. History, Discourse, and Language in Latin America.
Explore the articulation between history and discourse in Latin American languages.

SPN X53. Sociolinguistics.
Explores the interrelationship of language and society, with reference to the Spanish-speaking world. Studies how socioeconomic, political, and anthropological factors like race, social class, gender, age, and identity influence linguistics forms.

SPN X53C. Journalism and Human Rights in Latin America.
Explore the traditional definitions of Human Rights and the way those definitions have taken shape in the last two decades in Latin America.

SPN X54C. Literature and Exile in the Spanish Caribbean.
Explore literary texts (e.g., poetry, chronicles, narratives, and short stories) that describe exile as a trope. Examine themes, such as literature, culture and colonialism, nationality and belonging (i.e., nation, transnation, and post-nation), nature, the sensorial and subjectivity, identity politics (i.e., race, gender, and sexuality), and the ethics of writing.

SPN X55C. Fantastic Fiction from Latin America.
Analyze short stories by Latin American writers that in some way represent an alternative to realism.

SPN X55D. Jewish Voices from Latin America.
Overview of popular Jewish writers from Brazil and Spanish America, with special emphasis on those who portray in their work the situation of the Jewish communities of their respective cities and countries. Conducted in Spanish.

SPN X55E. Revolutionary Imagination in Latin American Cultures.
Explore literary expressions in Latin America that reflect a dissident or transgressive imaginary published during the revolutionary period (1960-1990). Examine how different socio-historical experiences require new narrative forms, and innovative ways of exploring and codifying collective community identities.

SPN X55F. Violence in Contemporary Mexican Culture.
Studies the representation of violence in contemporary literary and cultural production in Mexico in order to understand social, political, and cultural implications of current violence there. Taught in Spanish.

SPN X55G. Memory and Writing in Caribbean Culture.
Examine literary works from the greater Caribbean basin (with a focus on Cuba and Puerto Rico) in which the act of remembering is emphatically dramatized and described.

SPN X55I. Migrations and Exiles in Latin American Literature and the Arts.
Explore how internal and international displacement and migration have been represented in Latin American arts.

SPN X55J. Cultures in Contact in Colonial Spanish America.
Explore how Indigenous and European cultures represent their often-unequal encounters in colonial Spanish America. Analyze alphabetic and visual texts to examine the complex issues of mapping and representations of self and others; intercultural interpretations and exchanges; rituals and performances of domination, subordination, and negotiation; and the construction of social identities in an evolving geographic and cultural space.

SPN X55K. Body Politics in Latin American Poetry.
Explore poetic discourse as it relates the experience of the body to social, political and cultural contexts.

SPN X55L. From El Che to Evita.
Explore approaches and views from disciplines such as literature, music, film, history, and politics, and fields such as cultural studies, media studies, performance, gender and queer politics, critical race theory, and indigenous studies. Analyze different technologies of representation, from writing and visual materials to voices and sounds.

SPN X55M. Garcia Marquez.
Examine the literary movement of magical realism from the 1940s through the 1960s when "Cien anos de soledad" by Garcia Marquez became a seemingly overnight sensation, through later writers such as Isabel Allende and Laura Esquivel. Explore the development of this Spanish American tradition.

SPN X55N. Hip Hop Culture in Latin America.
Examine the development of the culture of hip hop in Latin America. Utilize a variety of materials including rap lyrics, graffiti, urban muralism,

break dance, sound design, and entrepreneurship to discuss media and migratory factors of hip hop expansion in the region; the notions of youth culture conveyed by these expressions; aesthetic debates around hip hop; the public intervention of hip hop groups and their political influence.

SPN X55Q. Gender and Modernity in Mexican Literature and Culture.
Explore the representation of body in Mexico in the period comprehended between Porfirio Diaz's regime and the post-revolutionary era (1880s to 1930s).

SPN X55R. East, West, and New World Encounters.
Examine works mostly in the Latin American and Hispanic literary tradition in which images or themes related to the East (Asia, Eastern Africa, the Middle East) are developed.

SPN X56C. Indigenous Voices in Latin American Literature.
Examine how indigenous intellectuals and writers have creatively established their own voices in writing and other modern and contemporary media in Latin America over time. Discuss works by Guaman Poma, Tito Cusi Yupanqui, Nezahualcoyotl, Jose Maria Arguedas, Rigoberta Menchu, Pascual Cona, as well as contemporary Nahuatl, Mayan, Quechua, and Mapuche poetry and narrative, films and samples of radio programs.

SPN X56D. Indigenous Resurgence.
Analyze and discuss the ways in which re-telling, documentation and invocation of the past shapes different forms of self-representation by indigenous authors as a response to colonialism in late twentieth and early twenty-first century Latin American societies.

SPN X56E. Hispanic Short Films, Stories, and Poems.
Explore the work of Spanish-language filmmakers, prose writers, and poets who have faced the challenge of expressing themselves in very few words or minutes.

SPN X57C. Writing on the Edge: Literature and Incarceration.
Explore the critical potential of literature to interrogate mass incarceration and its relationship to systemic inequalities, including access to education, as well as the limits and possibilities of prison writing as a social and restorative endeavor to reimagine society.

SPN X57D. Cultures in Contact in Medieval Spain.
Explore works of literature that reflect the three cultures which coexisted for almost eight centuries in medieval Spain: the Islamic, the Jewish, and the Christian.

SPN X57E. Spanish Translation and the Social Sciences.
Explore the development of translation and interpretation skills, in speaking, reading, and writing, in the disciplines of the social sciences.

SPN X57F. Writing the Other in Spain and Latin American Texts.
Explore the subjective encounter with "the other" as expressed in literary and cultural texts of early modern Spain and Latin American texts directed toward or received by a transatlantic audience during the Colonial period.

SPN X57G. Spain on the Red Carpet.
Explore the intersections of cinema, celebrity glamour, and global politics by focusing on the case study of Spain and the projection of its film industry abroad.

SPN X58C. Brevity in Spanish-Language Literature and Film.
Explore the work of Spanish and Spanish American filmmakers, prose writers, and poets who have accepted the challenge of expressing themselves in a brief span of time.

SPN X58D. Spanish Creative Writing Fiction.
Explore the creative process in different genres to improve creative writing skills.

SPN X58E. Spanish Creative Writing Nonfiction.
Explore the methods for writing about issues studied as non-fiction works.

SPN X58F. The Imagined Andes.
Examine the ways in which the cultural, social, and geographical space of the Andes has been "imagined" through literary texts, visual and audiovisual artworks by writers and artists from Bolivia, Ecuador, Chile and Peru.

SPN X59. United States Latino Literatures and Cultures in Context.
Examines the United States Latino literary and cultural production from multidisciplinary perspectives, such as literature, film, music, and performance. Analysis of the literatures and experiences of United States Latino writers and artists in their historical and cultural specificities.

SPN X64L. Linguistics and the Spanish Learner.
Focuses on instructed and naturalistic second language (L2) development among adults. Subjects include: L2 acquisition theories, Spanish learners' difficulties, learners' and teachers' beliefs about L2, learners' motivations and needs, and heritage language learners.

SPN X65G. Conference Course in Hispanic Linguistics.

SPN X65L. Conference Course in Hispanic Literature.

SPN X67C. Spanish for Health Care Professions.
Explore both spoken and written language in health care situations. Focus on complex grammatical concepts and cultural issues that affect professional activities in Spanish-speaking communities.

SPN X67D. Business in Hispanic Life and Culture.
Explore business Spanish. Practice verbal communication in the context of meetings, exchanges, video conferences, presentations, and professional discussion, in Spanish and in areas related to finance, marketing, accounting, operations.

SPN X67T. Advanced Oral and Written Expression for Teachers.
Designed to help teacher candidates prepare to pass the state oral and written proficiency exams at the advanced level to obtain certification. Focus on oral proficiency for various genres of speaking with an emphasis on writing and reading of different genres.

SPN X68D. Contact Spanish in the United States.
Examine the linguistic situation of persons of Spanish language heritage in the United States. Focus on the social and cultural factors that are implicated in their language behaviors.

SPN X68E. Bilingualism.
Examine bilingualism in the Spanish-speaking world from the perspective of individuals in societies.

SPN X68F. Spanish in Mental Health Contexts.
Develop the Spanish language skills needed to perform multiple interventions in the mental health field when providing care to Hispanic/Latino limited English proficiency patients.

SPN X68G. Spanish for Law.
Explore Spanish skills oriented to the legal field to achieve confidence for communicating in Spanish in professional legal settings.

SPN X69C. African Diasporas.
Analyze the sociocultural contexts of the African diaspora in the Americas with particular focus on the Caribbean and Brazil. Explore the contributions of the African diasporic populations and the stylistic strategies through which they constructed their social, political, and cultural agency.

SPN X77C. Topics in Spanish.

SPN X77H. Honors Tutorial Course.
Supervised individual research on a literary, linguistic, or cultural problem, culminating in a written thesis.

SPN X79C. Capstone Seminar in Literatures and Cultures.
Brings together central issues, concepts, and themes that define Iberian or Latin American literatures and cultures, while focusing on a specific case-study or case-studies.

SPN X79H. Honors Tutorial Course.
Supervised individual research on a literary, linguistic, or cultural problem, culminating in a written thesis of fifty to eighty typewritten pages.

SPN X79L. Capstone Seminar in Linguistics.
Brings together central issues, concepts, and themes that define linguistics, while focusing on a specific case-study or case-studies, that allow for the necessary depth and rigor to produce a research paper on a particular topic of interest.

Graduate Courses

SPN X19S. Topics in Spanish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN X29S. Topics in Spanish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN X80K. Topics in Spanish American Literature.
Topics include Modernismo; the short story; contemporary trends of the Spanish American novel; the literary prose of Sarmiento; gaucho literature; Ruben Dario; contemporary Argentine fiction.

SPN X80K.1. Comparative Studies in the Literatures of Brazil and Spanish America.

SPN X85L. Conference Course in Hispanic Literatures and Linguistics.
For students needing specialized courses not normally or not often included in the regular course offerings.

SPN X96K. Topics in Comparative Romance Linguistics.
General survey of the development of spoken Latin in Italy, Spain, Portugal, and France; main traits of phonology, morphology, and syntax of each modern derivative language.

SPN X96K.1. Comparative Romance Linguistics.

SPN X96K.2. Introduction to Romance Linguistics.

SPN X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

SPN X19S. Topics in Spanish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SPN X29S. Topics in Spanish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Spanish and Portuguese. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SSE - Semiconductor Science and Engineering

Semiconductor Science and Engineering: SSE

Lower-Division Courses

SSE X01. Topics in Semiconductor Manufacturing.

SSE X03. Topics in Circuits and Systems.

SSE X05. Topics in Heterogeneous Integration.

SSE X07. Topics in Semiconductor Devices.

SSE X09. Digital Logic Design.
Explore semiconductor digital design and optimization.

SSE X10. Circuit Theory.
Explore circuit theory in semiconductors.

Upper-Division Courses

SSE X60. Introduction to Semiconductor Science and Engineering.
Introduction to semiconductor science and engineering.

SSE X60S. Advanced Packaging Manufacturing.

SSE X77K. Projects in Semiconductor Science and Engineering.
Produce an independent project carried out under the supervision of a faculty member in semiconductor science and engineering. Prepare a project proposal and a final report, each of which is evaluated by the faculty committee on individual projects.

Graduate Courses

SSE X80. Introduction to Semiconductors.
Survey fundamental and important areas in semiconductor science and engineering including semiconductor device design, semiconductor manufacturing techniques, metrology and process control.

SSE X80C. Topics in Semiconductor Science and Engineering.

SSE X81. Semiconductor Processes.
Explore a theoretical and practical introduction to contemporary fabrication techniques and methods.

SSE X82. Semiconductor Devices.
Examine the design and physics underlying modern semiconductor devices.

SSE X83. Topics in Semiconductor Manufacturing.

SSE X84. Topics in Semiconductor Circuits and Systems.

SSE X85. Topics in Heterogeneous Integration and Advanced Packaging.

SSE X85C. Microelectronics Packaging and Thermal Management.
Explore microelectronics packaging and thermal management in the semiconductor industry.

SSE X85D. Materials for Packaging and Heterogeneous Integration.
Explore techniques of applied aspects of materials used in packaging semiconductors including heterogeneous integration, reliability, cooling, and role of materials.

SSE X86. Topics in Semiconductor Devices.

SSE X90. Semiconductor Manufacturing Laboratory.
Explore how to operate fabrication tools in the cleanroom.

SSE X91. Semiconductor Metrology and Characterization Laboratory.
Explore various different metrology techniques for analyzing materials and structures.

SSE X95. Research.
Prepare for an independent research project in semiconductor science and engineering through developing literature review and technical writing skills.

SSE X97P. Projects in Semiconductor Science and Engineering.
Produce an independent project carried out under the supervision of a semiconductor science and engineering faculty member.
SSE X98R. Master's Report.
Prepare a report to fulfill the requirement for the master's degree.

Professional Courses

STA - Statistics

Statistics: STA

Lower-Division Courses

STA X01. Introduction to Data Science.
An introduction to the principles and practice of data science for business applications. Explore tidying, summarizing, and visualizing data; statistical computing in R; linear regression; introduction to predictive modeling and out-of-sample model validation; uncertainty quantification using resampling methods; basic probability models, including the normal and binomial distributions; and statistical hypothesis testing.
STA X01H. Introduction to Data Science: Honors.
An introduction to the principles and practice of data science for business applications. Explore tidying, summarizing, and visualizing data; statistical computing in R; linear regression; introduction to predictive modeling and out-of-sample model validation; uncertainty quantification using resampling methods; basic probability models, including the normal and binomial distributions; and statistical hypothesis testing.
STA X09. Elementary Business Statistics.
Training in the use of data to gain insight into business problems; describing distributions (center, spread, change, and relationships), producing data (experiments and sampling), probability and inference (means, proportions, differences, regression and correlation).
STA X09H. Elementary Business Statistics: Honors.
Training in the use of data to gain insight into business problems; describing distributions (center, spread, change, and relationships), producing data (experiments and sampling), probability and inference (means, proportions, differences, regression and correlation).
STA X19S. Topics in Statistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
STA X87. Business Analytics and Decision Modeling.
Introduction to some of the basic concepts in quantitative business analysis that are used to support organizational decision making over various time frames. Explores methods that apply to all areas of an organization, with emphasis on financial decision making.

Upper-Division Courses

STA X29S. Topics in Statistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
STA X35. Data Science for Business Applications.
Examine data science for business applications at the intermediate level. Explore building and validating predictive models; advanced regression modeling, including an in-depth treatment of regression; models for binary outcomes; and causal inference.
STA X35H. Data Science for Business Applications: Honors.
Examine data science for business applications at the intermediate level. Explore building and validating predictive models; advanced regression modeling, including an in-depth treatment of regression; models for binary outcomes; and causal inference.
STA X40S. Topics in Statistics.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office or the school's BBA Exchange Programs. Credit is recorded as assigned by the study abroad adviser in the Department of Information, Risk, and Operations Management. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence.
STA X71G. Statistics and Modeling.
Focuses on methods used to model and analyze data. Explores multiple regression models and their application in the functional areas of business, time-series models, decision analysis and the value of information, and simulation-based methods.
STA X71H. Statistics and Modeling: Honors.
Focuses on methods used to model and analyze data. Explores multiple regression models and their application in the functional areas of business, time-series models, decision analysis and the value of information, and simulation-based methods.
STA X72T. Topics in Statistics.
STA X72T.11. Computational Finance.
Introduction to the analysis and implementation of numerical methods used in finance. Explore numerical techniques in derivative pricing and optimal asset allocation, such as Monte Carlo and quasi-Monte Carlo simulation, methods for solving partial differential equations, and dynamic programming.
STA X72T.16. Optimization Method in Finance.
Explore quantitative methods and techniques in optimization and simulation, and their use in financial decision making. Discuss theory and application in portfolio selection, options and other derivative pricing, index tracking, risk measures, volatility estimating. Examine linear, quadratic, nonlinear, and integer programming; dynamic programming; robust optimization; Monte Carlo methods and variance reduction techniques. Emphasis will be placed on problem solving with advanced computational programming languages.
STA X72T.21. Time Series Forecasting.
Examine statistical forecasting methods used in business. Discuss Box-Jenkins models; exponential smoothing models; ARCH/GARCH models for varying volatility in financial returns; seasonal adjustment of time series; tests for nonstationary of time series; and modeling multiple time series.
STA X75. Statistics and Modeling for Finance.
Methods used to model and analyze data, especially as applied to problems related to finance. Explores regression models, time-series models, decision analysis and simulation-based methods.
STA X75H. Statistics and Modeling for Finance: Honors.
Methods used to model and analyze data, especially as applied to problems related to finance. Explores regression models, time-series models, decision analysis and simulation-based methods.
STA X76. Intermediate Statistics.
Analysis of forecasting techniques and theory; macroeconomic models; long-range and short-term forecasting; forecasting for the firm, using case material.
STA X87. Business Analytics and Decision Modeling.
Introduction to some of the basic concepts in quantitative business analysis that are used to support organizational decision making over various time frames. Explores methods that apply to all areas of an organization, with emphasis on financial decision making.

Graduate Courses

STA X80. Topics in Seminar in Business Statistics.
Selected topics in the applications of statistical methods to business problems.

STA X80.1. Correlation and Regression Analysis.

STA X80.10. Mathematical Statistics for Applications.
Applications-oriented treatment of mathematical statistics for graduate students who plan to use statistical methods in their research but do not need a highly mathematical development of the subject. Major focus on regression models and related methods. Extensive use of statistical software for data analysis and modeling. Emphasis on understanding how the mathematics of probability and statistics both enables and limits the data analysis that can be done.

STA X80.11. Analysis of Variance.

STA X80.12. Applied Multivariate Methods.

STA X80.13. Statistical Decision Theory.
Development of the mathematical basis of statistical decision theory from both the Bayesian and the frequentist point of view.

STA X80.14. Risk Analysis and Management.
The quantification and analysis of risk, considered from several perspectives: financial risk measures, strategic risk measures, stochastic dominance rules, chance constrained programming, and safety-first approaches.

STA X80.15. Research on Probabilistic Judgment.
Research training and experience for graduate students and advanced Canfield Business Honors Program undergraduate students who are interested in probabilistic judgment.

STA X80.16. Probability and Science in the Courtroom.
The role of probability and scientific reasoning in legal judgments: differences between probability evidence and other types of evidence; legal and psychological implications of these differences; the role of statistics, formal analyses, and expert opinions in legal decisions; their impact on judges and jurors.

STA X80.17. Predictive Modeling.
Introduction to statistical methods for prediction including regression analysis, logistic and multinominal regression, classification and regression trees, bias-variance trade-off, cross validation, variable selection, principal component regression and partial least squares regression.

STA X80.18. Learning Structures and Time Series.
Introduction to exploring data analysis, clustering, dimension reduction, networks, text timing, and time series.

STA X80.19. Time Series.

STA X80.2. Design of Experiments.

STA X80.3. Statistical Computing with SAS.

STA X80.4. Nonparametric Methods.

STA X80.5. Statistical Consulting.

STA X80.6. Survey Research Methods.

STA X80.7. Forecasting.
Development of forecasting techniques for use in business applications.

STA X80.8. Cybernetics and the Law: Societal, Economic, and Other Problems.

STA X80.9. Applied Linear Models.
Theory and application of linear models in empirically oriented research in business.

STA X80N. Topics in Statistics.

STA X80N.1. Advanced Statistics and Econometrics with R.

STA X81. Sampling.
Theory of sampling; sample design, including stratified, systematic, and multistage sampling; nonsampling errors.

STA X84N. Topics in Business Analytics.
Selected topics in business analytics.

STA X87. Business Analytics and Decision Modeling.
Introduction to some of the basic concepts in quantitative business analysis that are used to support organizational decision making over various time frames. Explores methods that apply to all areas of an organization, with emphasis on financial decision making.

STA X87C. Business Analytics and Decision Modelling for Executives.
Examine risky decision-making with an emphasis on case studies that show how Excel models can be used to improve decision-making.

Professional Courses

STA X87. Business Analytics and Decision Modeling.
Introduction to some of the basic concepts in quantitative business analysis that are used to support organizational decision making over various time frames. Explores methods that apply to all areas of an organization, with emphasis on financial decision making.

STC - Science and Technology Commercialization

Science and Technology Commercialization: STC

Lower-Division Courses

Upper-Division Courses

Graduate Courses

STC X80C. Assessing Technologies and Innovations.
Explore the first step in the commercialization process: generating or identifying ideas and technologies that have market potential. Apply multiple methodologies to assess the market potential of new ideas and technologies.

STC X81C. Strategic Career Planning.

STC X82. Marketing Technological Innovations.
Examine how taking a technology from idea to market requires persuasion and marketing skills. Develop a persuasive proposal and marketing plan for taking a product to market.

STC X83C. Art and Science of Negotiation.
Explore negotiation through the application of analytical frameworks in practical negotiation exercises.

STC X84C. New Venture Strategies.
Develop strategies for commercializing technologies as new ventures or within existing firms.

STC X85. Creative and Innovative Management.
Apply critical reasoning techniques to analyze, diagnose, and respond to organizational design and leadership issues in a new venture.

STC X86. Topics in Technology Commercialization.
The process of technology commercialization, managing technology, and other topics that include the commercialization of technology.

STC X86.1. Financing New Ventures.
Methods for determining capital requirements and ways of crafting financial and fund-raising strategies. Forms of financing, including angels and informal investors, venture capital, debt capital, and inside and outside equity.

STC X86.2. Managing Technology and Business Risks.
Explore decision and risk analysis, including methods for structuring and modeling decision problems. Apply methods to problems that involve risk and uncertainty in the commercialization of new technologies.

STC X87. New Venture Accounting.
Analyze and create financial statements as a critical tool in decision-making for a new venture.

STC X88. Financing New Ventures.
Prepare financial projections and develop a financial plan for funding a new venture.

STC X89. Problems in Specialized Fields.

STC X91C. Technology Commercialization in the Global Economy.
Examine technology commercialization in the global context, assessing global markets and positioning for competitive advantage within them.

Develop a plan for commercializing a technology within a foreign country.

STC X94C. Managing Product Development and Production.
Develop a plan for taking an innovation from idea to a product ready for market.

STC X95. New Venture Creation.
Explore how to raise capital, either from outside investors or internal corporate sources, by validating the market potential of the new technology, developing a business model, determining financial requirements, and communicating the opportunity convincingly. Develop a business plan to address these key elements.

STC X96. New Venture Design and Implementation.
Develop a business implementation plan for a technology enterprise or project by establishing operational roles and processes.

Professional Courses

STM - Science, Technology, Engineering, and Mathematics Education

Science, Technology, Engineering, and Mathematics Education: STM

Lower-Division Courses

Upper-Division Courses

Graduate Courses

STM X80. Topics in Teaching Science, Technology, Engineering, and Mathematics.
Classroom applications of research in science, technology, engineering, and mathematics education, and related policy issues.

STM X80.1. Quantitative Research Methods for STEM Educators.
Survey of quantitative research methods in STEM education with applications to critical issues in teaching and learning. Methods reviewed include t-test, ANOVA, Chi-squared, and correlation and regression.

STM X80.2. Qualitative Research Methods for STEM Educators.
Survey of qualitative research methods in STEM education with applications to critical issues in teaching and learning. Methods reviewed include grounded analysis, case studies, ethnographies, clinical interviews and surveys. Students read and critique examples from the published literature, and design (but do not necessarily implement) a study of their own.

STM X85. Knowing and Learning in STEM Education.
Different approaches to theorizing and studying science, technology, engineering, and mathematics (STEM) learning and epistemology and synthesis of the scientific basis of learning. A major research project will focus on studying students' thinking in a particular STEM related domain.

STM X85G. Topics in Program Development and Research: Seminar.
Advanced investigations of selected topics and problems in curriculum theory, program design, and research design at one of the following levels: elementary school, secondary school, higher education, all-level.

STM X86. Curriculum History and Development in STEM Education.
Historical development of school mathematics and science curricula in the United States in the last 150 years, and examination of current curricular trends. A summative project consisting of a research paper and a presentation will allow students to delve deeper into a topic of individual interest.

STM X90. Topics in Critical Issues in STEM Education.
In-depth study of issues that are central to understanding and improving STEM education at one of the following levels: elementary school, secondary school, higher education, or all-level.

STM X90.1. Equity in STEM Education.
Study of the meaning of equity in STEM education and how interpretations align with frameworks for viewing equity. Research, practice, and strategies designed to make STEM education equitable for students of diverse genders, ethnicities, linguistic and cultural backgrounds, socioeconomic status, and physical and learning abilities. History of multicultural education, mathematics, and science teaching for social justice.

STM X90.2. Research on Teaching and Teacher Development in STEM Education.
Scholarship related to STEM teaching and how it can be used to address problems in K-12 school instruction. Research on teaching, teacher knowledge and beliefs, and teacher education and professional development; relationships among research, theory, and practice; and consideration of a variety of critical issues, including the meaning of effective instruction and evidence-based arguments about teaching, and how research on student thinking and theories of learning inform our understanding of teaching.

STM X90.3. Systemic Reform in STEM Education.
Overview of the major efforts at systemic reform in STEM education. Development and testing of models of reform initiatives.

STM X90.4. Equitable and Inclusive Teaching in STEM Education.
Research and apply equitable and inclusive teaching practices in STEM Education.

STM X90T. Advanced Topics in STEM Education.
Advanced investigations of selected topics and critical issues in STEM education aligned with STEM education faculty research interests. Students will typically produce a product (paper, presentation, proposal) that can be submitted to professional or funding agencies.

STM X90T.1. Science, Technology, Engineering, Art, and Mathematics Content and Methods.
Focus on teaching of science and mathematics, as well as the arts; state standards for teacher preparation are covered.

STM X90T.2. Craft of Academic Writing.
Develop confidence in one's scholarly voice by assessing strengths and areas for improvement. Discover the varied ways in which the scholarly voice can be shared for Science, Technology, Engineering, and Mathematics Education academic publications.

STM X95. Classroom Interactions and Project Based Instruction.
Students are assigned to a mentor teacher classroom where they might continue as apprentice teachers the next semester. At least three hours a week of observation and teaching in the classroom, in addition to the six contact hours per week. Preparation, implementation, and assessment of inquiry- and project-based lessons, focusing on student thinking and participation, and meeting the needs of students with reading and writing difficulties, those learning in a second language, and those with behavioral and psychological issues.

STM X96. STEM Education Forum.
Seminar highlighting current research in STEM education.

STM X96T. Directed Research in Science, Technology, Engineering and Mathematics Education.

STM X97V. Independent Study.
Involves syntheses of literature, field investigations on selected topics, or other individual research topics.

STM X98. Thesis.

STM X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

STM X98T. Supervised Teaching in Science, Technology, Engineering, and Mathematics Education.
STM X99W. Dissertation.

Professional Courses

STR - Strategy and Statecraft

Strategy and Statecraft: STR

Lower-Division Courses

STR X01. Perennial Challenges in Strategy and Statecraft.
Examine diplomatic, military, and intelligence related responsibilities and challenges inherent in strategy and state leadership.

STR X02. Foundations of American Strategy and Statecraft.
Explore the history of diplomacy and war in the American regime. Examine the practice of American statecraft in relation to foreign affairs and the permanent principles of grand strategy.

STR X03. Classic Texts of Strategy and Statecraft I.
Examine the texts and ideas that shape foreign affairs and war in the preclassical era and antiquity through the European Renaissance. Explore issues such as the justice of war and peace, the relationship between the regime and strategic imperatives, the philosophic arguments for just war, and the ontological nature of conflict. Study sources such as Herodotus, Sun Tzu, Augustine, and Machiavelli.

STR X12. Topics in Strategy and Statecraft.
Examine one or more topics in foreign affairs, diplomacy, intelligence, and war.

STR X14C. American Military and Diplomatic History I.

STR X14D. European Military and Diplomatic History I.

STR X19S. Topics in Strategy and Statecraft.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

STR X23. Classic Texts of Strategy and Statecraft II.
Examine the texts and ideas that shape foreign affairs and war from the Reformation through the present. Explore questions such as the nature of victory, the relationship between politics, technology, and war in the modern state, the possibility of order during conflict, and the psychology of conflict. Study works such as Clausewitz, Tolstoy, Alfred Mahan, Reinhold Niebuhr, and contemporary reflections on grand strategy and war.

STR X24. Strategy, Statecraft, and Justice.
Examine problems of justice in the context of war, defense, and diplomacy. Explore the relationship between a society's moral foundations and foreign policy, questions of ethical conduct and warfare, and the challenges of citizenship with respect to foreign policy decisions. Discuss readings that may include Reinhold Niebuhr, Hans Morgenthau, Henry Kissinger, as well as memoirs and contemporary scholarship.

STR X25C. American Military and Diplomatic History II.

STR X25D. European Military and Diplomatic History II.

STR X29S. Topics in Strategy and Statecraft.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the School of Civic Leadership. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

STR X31. Topics in Classic Texts of Strategy and Statecraft.

STR X31C. Statecraft and War in Literature.
Discuss the challenges of strategy, statecraft, and war through literature. Explore issues such as the individual and society, narrative voice, historical memory, technology, and ethics. Discuss readings that may include works such as the Hebrew Bible, Homer, Shakespeare, Hugo, or Heinlein.

STR X31D. Grand Strategy in Theory and Practice.
Explore great power competitions of both the past and the present and the ways states seek to achieve their goals in the international system today. Evaluate how political regimes shape military and diplomatic policy. Analyze the role of economic power in the global system.

STR X32. Topics in Military and Diplomatic History.

STR X36. Topics in Practice of Statecraft.
Examine themes and case studies in war, defense, diplomacy, intelligence, or law.

STR X36.1. Practice of Statecraft.
Examine themes and case studies in war, defense, diplomacy, intelligence, or law.

STR X41. Advanced Topics in Military and Diplomatic History.
Analyze one or more eras in diplomatic and military history.

STR X41.1. Advanced Military and Diplomatic History.
Examine one or more eras in military and diplomatic history.

STR X43. Advanced Topics in Classic Texts in Strategy and Statecraft.

STR X43.1. Advanced Classic Texts in Strategy and Statecraft.
Discuss classic texts in war and foreign affairs at an advanced level.

STR X47. Advanced Topics in Practice of Statecraft.
Discuss themes and case studies related to war, defense, diplomacy, intelligence, and law at an advanced level.

STR X47.1. Advanced Practice of Statecraft.

STR X62. Strategic Analysis.

STR X63. Capstone in Strategic Analysis.

STR X64H. Honors Strategic Analysis.

STR X65H. Honors Capstone in Strategic Analysis.

STR X66. Advanced Topics in Strategic Analysis.

STR X66.1. Advanced Strategic Analysis.

STR X77I. Internship in Strategy and Statecraft.
Participate in a professional internship. Reflect on internship to improve ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

STR X78H. Honors Thesis I in Strategy and Statecraft.

STR X78I. Internship in Strategy and Statecraft.
Participate in a professional internship. Reflect on internship to improve ability to both articulate preferences and skills, and to match them with appropriate career-related choices.

STR X79H. Honors Thesis II in Strategy and Statecraft.

Graduate Courses

Professional Courses

SUS - Sustainability Studies

Sustainability Studies: SUS

Lower-Division Courses

SUS X01. Introduction to Sustainability Studies.
Introduction to basic concepts in sustainability, including the varied disciplinary approaches used to theorize and practice sustainability. Explore these concepts through foundational sustainability scholarship, place-based experiential learning opportunities, and team-based projects.

SUS X19S. Topics in Sustainability Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's

Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SUS X20. The American Athlete: Dying to Compete.
Explore the environmental health issues affecting athletes, including toxic exposure in sports equipment, chemical-laden sports fields, and the broader impact of these substances, emphasizing the need for sustainable alternatives and ethical considerations in decision-making surrounding chemical exposure in sports.

SUS X29S. Topics in Sustainability Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SUS X30. Topics in Sustainability Studies.

SUS X74. Capstone Experience in Sustainability Studies.
Work independently to complete a research project that assembles and integrates knowledge and skills acquired across your university career. Current concerns and methodology in the field of Sustainability Studies; an introduction to theory and research in Sustainability topics.

SUS X79H. Honors Tutorial Course.
Read selected works individually for one semester, followed in the second semester by the writing of an honors thesis. Participate in regular conferences with the faculty supervisor.

SUS X79L. Directed Internships in Sustainability.
Experience working in an appropriate government agency, non-governmental organization, or private business.

Graduate Courses

Professional Courses

SWA - Swahili

Swahili: SWA

Lower-Division Courses

SWA X01C. Intensive Swahili I.

SWA X06. First-Year Swahili I.

SWA X07. First-Year Swahili II.

SWA X11C. Intensive Swahili II.

SWA X12. Accelerated Second-Year Swahili.

SWA X12K. Second-Year Swahili I.

SWA X12L. Second-Year Swahili II.

SWA X19S. Topics in Swahili.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SWA X29S. Topics in Swahili.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of African and African Diaspora Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

SWA X60. Conference Course in Swahili Language and Literature.
Supervised individual study of selected problems in Swahili language or literature.

Graduate Courses

Professional Courses

SWE - Swedish

Swedish: SWE

Lower-Division Courses

SWE X04. Accelerated First-Year Swedish.

SWE X12. Accelerated Second-Year Swedish.

SWE X19S. Topics in Swedish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer work is awarded for work in an affiliated studies program.

SWE X29S. Topics in Swedish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

SWE X19S. Topics in Swedish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. T C - Tutorial Course

Tutorial Course: T C

Lower-Division Courses

T C X02. First-Year Signature Course: Plan II.
Small-group seminar involving reading, discussion, writing, and oral reporting around a central interdisciplinary topic. Designed to introduce undergraduates to scholarly analysis from an interdisciplinary perspective. Includes an introduction to University resources, such as research facilities, museums, and attendance at University lectures or performances as assigned. Multiple sections may be offered in the fall and spring with various topics and instructors.

T C X03C. Plan II World Literature Part I.
Reading of masterpieces of world literature and intensive training in writing and in critical analysis of literature.

T C X03D. Plan II World Literature Part II.
Reading of masterpieces of world literature and intensive training in writing and in critical analysis of literature.

T C X10. Modes of Reasoning.
Introduction to forms of quantitative reasoning: computer science, game theory, operations research, or statistics and probability.

T C X19S. Topics in Tutorial Course.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

T C X25. Topics in the Arts and Sciences.
Analysis of various topics within the arts and sciences through reading, research, written reports, and discussion.

T C X25K. Subjects in the Arts and Sciences.
Analysis of subjects in the arts, sciences, and social sciences through reading, discussion, and lectures.

T C X26. Plan II/Knowledge Is Power Program Charter Schools Partnership.
Mentorship of younger students attending an Austin-area Knowledge Is Power Program (KIPP) school. Through mentoring and class meetings, students will be deeply immersed in issues related to education reform, (in)equality of educational opportunity, and in promising strategies, such as those used by KIPP, for addressing such issues.

T C X27. Civic Viewpoints.
Explores civic engagement and innovative solutions for societal justice.

T C X28K. Volunteer Service Orientation.
Designed for those who want to mentor or tutor a student at a school that serves first generation college-going students. Receive training to volunteer at one of the KIPP (Knowledge is Power Program) Texas-Austin schools, within one of the existing Plan II/KIPP Partnership service programs, KAL Mentoring or Plan Tutoring.

T C X29S. Topics in Tutorial Course.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the College of Liberal Arts. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

T C X30. Special Topics in Plan II.

T C X30K. College to Career Connections.
Connect with resources and create a plan to achieve academic and career goals.

T C X58. Topics in Plan II Junior Seminar.
Seminar sections of about fifteen students. The subjects vary, but in each the attempt is made through careful reading, discussion, and written work to analyze and compare varied approaches to topics of lasting importance.

T C X59T. Essay Course.
Directed reading followed by the writing of an essay.

T C X60H. Thesis Course: Honors.
Directed reading followed by the writing of a substantial essay.

Graduate Courses

Professional Courses

T D - Theatre and Dance

Theatre and Dance: T D

Lower-Division Courses

T D X01. Introduction to Theatre.
A study of theatrical texts and practices of the past and present.

T D X02S. Arts Integrations for Multidisciplinary Connections.
Through readings, videos, in-class activities, discussion, field trips, micro-teaching, and written reflection, designed to develop a practical understanding of the techniques and skills associated with integrating the arts into various contexts. Provides experience in each art content area (dance, music, theatre arts, and visual arts) to develop an introductory understanding of each of these disciplines.

T D X02T. Topics in Dance Technique.
Fundamental study of principles and vocabulary of dance.

T D X02T.1. Ballet I.
A study of the elements of classical ballet through exploration of movement principles as defined by traditional ballet technique.

T D X02T.10. Yoga: Moving into Stillness.
A study of yoga in order to develop the ability to coordinate movement and breathing in dance.

T D X02T.11. Hip-Hop for Beginners.

T D X02T.2. Ballet II.
A continuation of the study of the elements of classical ballet through exploration of movement principles as defined by traditional ballet technique.

T D X02T.3. Modern I.
A study of the multiple aspects of modern dance technique including Humphrey-Limon, Release Technique, Laban Movement Analysis, and Bartenieff Fundamentals.

T D X02T.4. Modern II.
A continuation of the study of the multiple aspects of modern dance technique as developed in Modern I.
T D X02T.5. Jazz I.
An introduction to four styles of twentieth and twenty-first century jazz dance through exploration of the fundamental principles of movement with a parallel study of the historical development of the jazz dance aesthetic.
T D X02T.6. Jazz II.
A continuation of the study of jazz dance as developed in Jazz I.
T D X02T.7. Afro-Contemporary Dance.
The study of contemporary dance informed by African aesthetics and vernacular movement found throughout the African diaspora.
T D X02T.8. Improvisational Dance.
The study and practice of improvisational dance.
T D X02T.9. Yoga for Dance.
The study of yoga as it pertains to movement in dance.
T D X03. Fundamentals of Acting.
Basic principles of acting and practical work in scenes from plays.
T D X03C. Training the Speaking Voice.
Exercising the fundamental principles of vocal production and speech.
T D X03V. Acting for Voice Performance Majors I.
Fundamental inquiry into the acting process.
T D X03W. Acting for Voice Performance Majors II.
Techniques for playing and shaping action within scene structures.
T D X05S. Topics in Black Theatre and Dance.
T D X05S.2. The Revolution Will Be Dramatized.
T D X05S.3. Toni Morrison and August Wilson.
T D X06. Introduction to Improvisational Drama.
General introduction to improvisational activities with application to the theatre.
T D X07K. Dance, Identity and Cultural Expression.
Analyze dance as a significant tool for defining and articulating the many varied and intersecting facets of identity such as gender, sexuality, race, class, and nationality among others. Examine many forms of dance occurring in diverse contexts from the modern dance innovators of the 1950s, to vogue and ballroom culture of the 1980s, to representations of dance across contemporaneous media platforms like Instagram. Explore how distinct dance communities enact a multicultural and non-static notion of identity in American culture.
T D X08K. Costume, Culture, and Change on Stage and Screen.
Explore costuming and costume design as an agent in our social reality, both reflecting and constructing the identities which we interact with daily. Engage with a wide range of archival materials, streaming video, live performances, creative group work, and interviews with locally and internationally renowned artists.
T D X09C. Musical Theatre Performing Ensemble.
Rehearsing and performing solo and group numbers from musical theatre and other genres in cabaret-style entertainment and musical revues for on- and off-campus events.
T D X09D. Studio Voice I.
Establishes foundational vocal technique for musical theatre singing. Develops successful vocal practice strategies and effective, healthy technique through the study of a comprehensive range of musical theatre styles including musical comedy, Golden Age musical drama, and concept and rock musicals.
T D X09E. Studio Voice II.
Continuation of Theatre and Dance 109D. Focus on vocal range, flexibility, and endurance. Text analysis through the study of music and lyrics, using these components as the basis of character development.
T D X09K. Musical Theatre on Stage and Screen.
Examine the various histories explored by musical theatre. Investigate the conventions utilized by musical theatre during their development and original productions. Consider the various types of musicals, and how these musicals explore historical and cultural events and persons through this unique medium.
T D X11. Languages of the Stage.
Introduction to the ways that performance communicates meaning, as a foundation for further study in theatre and dance.
T D X11C. Performance as Public Practice.
Examines current and historical performance policy in order to understand how the entertainment industry operates nationally.
T D X11D. Performance as a Collaborative Practice.
Explores and defines the creative process of performance collaboration.
T D X11T. Introductory Topics in Theatre and Dance.
Introductory topics in theatre and dance, including basic research methods, contemporary and local performance, the role of the artist in society, the philosophy of a fine arts education, and the exploration of campus resources.
T D X12. Freshman Movement and Physical Conditioning.
Principles and techniques of physical conditioning.
T D X12M. Movement Improvisation.
Exploration and study of elements of movement design.
T D X12N. Movement Composition.
Continuation of Theatre and Dance 312M.
T D X12P. Fundamental Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.
T D X12T. Topics in Dance Technique.
T D X12T.1. Somatic Practice.
T D X13C. Acting I.
Approaches to incorporating Stanislavski-based principles in acting, including dramatic action, given circumstances, subtext, sense memory, the magic if, and tempo/rhythm.
T D X13D. Acting II.
Continuation of Acting I. Application of Stanislavksi-based principles to scene work selected from realistic genres.
T D X13E. Acting III.
Continuation of Acting II, with greater emphasis on personalization of character needs, given circumstances, actor-to-actor communication, and emotional life.
T D X13F. Voice and Movement I.
Understanding the relationship between voice and body in acting, with a focus on freeing tension, releasing vocal power, and enabling physical expression.
T D X13G. Voice and Movement II.
Continuation of Voice and Movement I. Deeper understanding of the vocal-physical connection as a means of playing dramatic action.
T D X13K. Voice Laboratory I.
Advanced voice and speech work in breath, support, placement, focus, range, resonance, articulation and endurance. Emphasis placed on personalization of language and text from selected plays.
T D X13L. Voice Laboratory II.
Continuation of Voice Laboratory I. Advanced voice and speech work connected to personalization and truth in classical and heightened text.
T D X13M. Movement Laboratory I.
Using the body as an instrument for playing action and bringing the actor to a deeper understanding of physical stage presence.
T D X13N. Movement Laboratory II.
Continuation of Movement Laboratory I. The practice of physical theatre disciplines as a means of deepening the actor's understanding of character and behavior.
T D X13P. Projects in Acting and Directing.
Preparation and performance laboratory related to production.
T D X14C. Design for Performance.
Introduction to the techniques, practices, and processes in costume, lighting, scenic, and sound design.

T D X14M. Technical Theatre.
Introduction to the technical aspects of theatrical performance–in costumes, lighting, scenery, and media.

T D X14P. Production Laboratory.

T D X14Q. Production Shop.
Assist in the creation of props, lighting, costumes, projection, audio, or scenery for department productions.

T D X15. Playwriting I.
The study and practice of writing plays.

T D X15C. Foundations of Narrative Design.

T D X16D. Directing I.
Study and practice of the fundamentals of stage directing: composition, dramatic action, movement, and textual analysis.

T D X17C. Theatre History through the Eighteenth Century.

T D X17D. Theatre History since the Eighteenth Century.

T D X17M. Dance History I.
An exploration of world dance as an expression of cultural identity and change.

T D X17N. Dance History II.
Continuation of Theatre and Dance 317M.

T D X19S. Topics in Theatre and Dance.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Theatre and Dance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

T D X22P. Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.

T D X23P. Advanced Projects in Acting and Directing.

T D X25P. Projects in Playwriting.

T D X26P. Projects in Theatre Studies.

T D X27P. Projects in History, Criticism, and Performance Studies.

T D X32P. Advanced Projects in Dance Performance and Repertory I.

T D X32Q. Advanced Projects in Dance Performance and Repertory II.

T D X52P. Projects in Dance Movement Studies.

Upper-Division Courses

T D X12P. Fundamental Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.

T D X13P. Projects in Acting and Directing.
Preparation and performance laboratory related to production.

T D X20J. Introduction to Creating New Media.
Introduces student actors to strategies to grow as generative artists and master the basics of a few common media production tools to give their creative voice a broader reach in the world.

T D X22. Dance Pedagogy.
Techniques and materials used in the teaching of dance.

T D X22C. Contemporary Dance Technique.
Intensive study of principles, technique, and vocabulary of contemporary dance.

T D X22D. Intermediate Contemporary Dance Technique.
Intensive study of intermediate-level theory, technique, and vocabulary of contemporary dance.

T D X22F. Ballet Technique.
Intensive study of principles, technique, and vocabulary of ballet.

T D X22G. Intermediate Ballet Technique.
Study of intermediate-level theory, technique, and vocabulary of ballet as a supporting style.

T D X22P. Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.

T D X23C. Directing I.
Study and practice of the fundamentals of stage directing: composition, picturization, movement, gesture, and unit structure.

T D X23D. Directing II.
Dramatic and environmental analysis of full-length plays.

T D X23E. Directing III.
Theory and techniques of play directing, with practical applications in projects and scenes.

T D X23F. Acting Shakespeare.
Incorporating language as action by applying basic acting principles to the demand of Shakespearean text.

T D X23G. Acting in Period Plays.
Exploration of classical and idiosyncratic texts to enable personal and artistic growth in actors.

T D X23P. Advanced Projects in Acting and Directing.

T D X24. Design and Technology for Performance.
Exploration of aspects of design and technology in performance, including costume, lighting, scenery, and sound.

T D X24E. Acting III.
Continuation of Acting II, with greater emphasis on personalization of character needs, given circumstances, actor-to-actor communication, and emotional life.

T D X24P. Advanced Production Laboratory.

T D X25. Playwriting II.
Emphasis on the form and writing of the full-length play or equivalent.

T D X25P. Projects in Playwriting.

T D X26. Dramatic Activities for the Classroom.
Theory, materials, and practice, including story dramatization, storytelling, puppets, pantomime, shadow plays, role-playing, and theatre games.

T D X26C. Theatre Studies: Creative Drama.
Theory and practice of creative drama for children, both as an art form and as a process for emphasizing creative expression and aesthetic growth.

T D X26D. Theatre Studies: Theatre for Young Audiences.
Theory and practice of all phases of play production for young audiences.

T D X26E. Theatre Studies: Directing the Young Performer.
Introduction to the theory and practice of directing and producing theatre with young performers, with emphasis on appropriate literature.

T D X26F. Creative Drama II.
Advanced investigation of drama and drama-based instructional strategies. Observation, teaching and/or co-teaching in one or more practical contexts during the semester as a way to hone skills needed to successfully plan, implement, and evaluate drama-based lessons.

T D X26P. Projects in Theatre Studies.

T D X26Q. Directing Project in Theatre Studies.
Producing and directing a play in an elementary or secondary school.

T D X27P. Projects in History, Criticism, and Performance Studies.

T D X29C. Musical Theatre Performance Workshop.
Private coaching, master classes, and small and large group rehearsals, culminating in staged public performances of musical revues and/or chamber musicals.

T D X29D. Studio Voice III.
Continuation of Theatre and Dance 109E. Emphasizes the synthesis of singing and acting skills.

T D X29E. Studio Voice IV.
Continuation of Theatre and Dance 129D. Refines, expands, and strengthens the specialized performance skills required of a musical theatre performer, including studio recording techniques.

T D X29S. Topics in Theatre and Dance.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser

in the Department of Theatre and Dance. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

T D X32M. Choreography.
Advanced study of the principles and practices of choreography.

T D X32N. Choreography: Design for Dance and Movement Theatre.
Continuation of Theatre and Dance 332M.

T D X32P. Advanced Projects in Dance Performance and Repertory I.

T D X32Q. Advanced Projects in Dance Performance and Repertory II.

T D X32R. Dance Pedagogy.
Principles, techniques, and materials used in the teaching of dance.

T D X32S. Dance Pedagogy Practicum.
Practical application techniques and materials used in the teaching of dance.

T D X40D. Advanced Techniques in Acting.
Explore advanced work with text and personal connection to character.

T D X50J. Topics in Performance Lab.
Subjects in acting including voice/speech, movement, character, composition and collaboration with directors.

T D X50J.1. Spectacle.

T D X50J.2. Classics.

T D X50J.3. Contemporary Plays.

T D X50J.4. Composition.

T D X50J.5. Actors.
Offers students experience and training in performance techniques and methods for working collaboratively with directors in rehearsal.

T D X50J.6. Language.
Offers students experience and training in performance techniques and methods for working collaboratively with directors in rehearsal.

T D X51F. Teaching Artists in Schools and Community Settings.
Explores how to use the arts to educate in arts and non-arts settings (professional arts organizations, after-school programs, schools, museums, and community sites). Engagement with a variety of local arts organizations that hire and train teaching artists including dancers, visual artists, and theatre professionals through service learning projects. Includes outside service learning projects with local community organizations or schools.

T D X51S. Seminar in Theatre and Dance.

T D X51T. Topics in Theatre and Dance.

T D X51T.2. Digital Storytelling with Youth and Communities.
Explores digital storytelling and applied theatre as tools for reflecting on self, building community, and fostering cultural engagement. Engagement in creative writing and devising through drama and digital technologies; collaborative development and documentation of digital stories and performance collages. Extra lab hours may be required for digital documenting and editing.

T D X51T.3. Drama and Theatre in Museums.
Explores the history and multiple contexts of drama/theatre applications in museum settings in the U.S. and international sites.

T D X51T.4. Immersive Theatre Lab Practice and Production.

T D X51T.5. Devised Theatre Lab.

T D X52. Experiential Anatomy.
Principles and techniques of physical conditioning with practical applications to injury prevention for dance and theatre practitioners.

T D X52P. Projects in Dance Movement Studies.

T D X52T. Topics in Dance and Movement.
Fundamental study of principles and vocabulary of dance.

T D X52T.1. Musical Theatre Dance I.
Explores original repertoire from a wide variety of musical theatre styles.

T D X52T.10. Intermediate/Advanced Hip-Hop.
Continued introduction to the foundation of street dance styles, specifically old school Hip Hop and House dance techniques. Exploration of these dance styles and their cultural origins through an investigation of movement principles, history, and philosophy of street dance.

T D X52T.11. Hip-Hop History.
Introduction to Hip-Hop dance as a culturally significant form. Explores history, the social and political forces at work, and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis on the social, political, and economic environment in which it was fashioned.

T D X52T.12. Kinetic Storytelling.
Making use of tools found in Africanist performance traditions to explore issues and experiment with ways to craft a movement-based performance that expresses a specific point of view and draws out questions about our chosen issue or effort.

T D X52T.13. Advanced Tap.

T D X52T.14. Theory and Practice Pilates-Evolved Lab.
Explore daily mind/body practice of efficient alignment, core strengthening, movement re-education and execution using Pilates-evolved techniques, equipment, and readings to enhance movement expressivity in performance.

T D X52T.15. Yoga.

T D X52T.2. Musical Theatre Dance II.
Explores original musical theatre choreography from a variety of styles. Repertoire will require a higher level of skills.

T D X52T.3. Broadway Jazz I.
Refines and expands dance technique and skills essential to Broadway-style choreography. Original Broadway choreography requiring a high level of technique and character development.

T D X52T.4. Broadway Jazz II.
Continues to refine and expand dance technique and skills essential to Broadway style choreography. Original Broadway choreography requiring a high level of technique and character development.

T D X52T.5. Pointe.
A study and practice of classical and contemporary ballet pointe technique. Distinguishes between and practice various 'schools' of pointe technique, study its anatomical principles, and learn repertoire ranging from the nineteenth century to the current day. Increasingly complex combinations of movements, positions, and rhythms will be applied toward developing physical skills, cognitive skills, and performance quality. Individual expression and artistry is encouraged.

T D X52T.6. Tap.

T D X52T.7. Advanced Pilates: Evolved Lab.
Utilizes Pilates-evolved techniques, equipment, and readings to investigate a daily mind/body practice of efficient alignment, core strengthening, movement re-education and execution to enhance movement expressivity in performance.

T D X52T.8. Gyrokinesis.

T D X52T.9. Beginning Hip-Hop.
Introduction to the foundation of street dance styles, specifically old school Hip Hop. Exploration of the teachings of Philadelphia-born street dance pioneer, Rennie Harris, and his codification terminology and stylized movement vocabulary. Study of these dances and understand their cultural origins through an exploration of movement principles, history, and philosophy of street dance. Foundational House dance technique may also be introduced.

T D X53C. Devised Work.
A survey of contemporary devising techniques. Work explores present-day parallels for making performance for both individual and collaborative practices.

T D X53D. Acting and the Camera I.
Fundamentals of acting for the camera; adjusting from the stage to the demands of the camera.

T D X53E. Acting and the Camera II.
Advanced technique for the camera. Professional audition protocols and career preparation.

T D X53G. Application for Rehearsal.

T D X53K. Voice-Over and Narration.
Microphone technique and the use of the voice to create character in various media applications such as narration, video games, and commercial copy.

T D X53Q. Portfolio Preparation.
Selection and rehearsal of materials in preparation for professional acting interviews and auditions.

T D X53R. Business of Acting.
Survey of marketing oneself as an actor, the actor's relationship to agents and casting directors, and methods for initiating and maintaining a professional acting career.

T D X53T. Topics in Acting and Directing.
Topics in acting including voice/speech, movement, and directing.

T D X53T.1. Acting Shakespeare.
Incorporating language as action by applying basic acting principles to the demand of Shakespearean text.

T D X53T.11. Introduction to Creating New Media For Actors.
Introduces student actors to strategies to grow as generative artists and master the basics of a few common media production tools to give their creative voice a broader reach in the world.

T D X53T.2. Comedy Acting.
Focus on issues of acting in comedy. Address the problems that confront the actor when rehearsing and performing in extant comedy play scripts. Uses improvisational, non-theatrical, and original material for developing comedy skills. Participation as an actor is mandatory.

T D X53T.3. Dialects for the Stage.
Emphasizes dialect skills and good vocal production for actors pursuing professional work. Emphasis is placed on independent dialect study projects.

T D X53T.4. Advanced Singing in Musical Theatre.
Explore the significance of music, composers, shows, and singers as they relate to the use of voice.

T D X53T.5. Stage Combat for the Actor.
Introduction to theatrical fighting and violence. Explores the techniques used to create the illusion of stage fighting and violence both with and without weapons. Focus on the practical application of violence to tell stories on the stage and/or screen. An opportunity to have work observed in front of a Fight Master of the Society of American Fight Directors.

T D X53T.6. Audition Techniques.
Developing skills for bringing your personal self to acting and to the audition.

T D X54F. Foundations of Acting.

T D X54T. Topics in Design and Technology.

T D X54T.10. Costume Design Skills.
Fundamentals of research, drawing, rendering, and script/character analysis and critique for costume design.

T D X54T.11. Lighting Design Skills.
Fundamentals of research, paperwork communication, and technology for lighting designers.

T D X54T.12. Scenery Design Skills.
Fundamentals of designing, drafting, and model building of scenery for theatrical and film designers.

T D X54T.13. Stage Makeup.
Tools and products used by professional makeup artists. Includes techniques for natural, character, and special effects makeup in theatre, opera, dance, film, and TV.

T D X54T.14. Figure and Fabric Rendering.
Principles of figure and fabric painting from life.

T D X54T.15. Scene Painting.
Scene painting techniques for theatrical designers.

T D X54T.16. Automated Lighting II.
Advanced automated and computer-aided lighting theory and techniques.

T D X54T.17. Game Development Capstone: Two-Dimensional Games.
Participation in an interdisciplinary team to gain a thorough understanding of the two-dimensional game development process, through modeling of the environment and practices that are used in game studios.

T D X54T.18. Game Development Capstone: Three-Dimensional Games.
Participation in interdisciplinary teams to gain a thorough understanding of the three-dimensional game development process, through modeling of the environment and practices that are used in game studios.

T D X54T.19. Sound Design I.
Introduction to sound design for live performance.

T D X54T.2. Fabric Painting and Dyeing.
Fundamentals of textile surface design.

T D X54T.20. Sound Design II.
Advanced instruction in sound design for live performance.

T D X54T.21. Classical Tutu Design and Construction.
Fundamentals of classical tutu construction, including draping, pattern making, fitting techniques on a live model.

T D X54T.22. Puppet Design and Construction.
Theory and technique of puppet creation and performance. May include marionettes, hand and rod, and body puppets.

T D X54T.23. Armour and Fabrication.
Exploring the uses of leather as a medium for armour making. Shaping, tooling, coloring application for uses in theatre and film.

T D X54T.24. Design Skills: Scenic Renderings.
Fundamentals of drawing and color for renderings of scenery for theatre and film.

T D X54T.25. Portfolio for Designers.
Fundamentals of self-marketing for theatre artists.

T D X54T.26. Media Creation for Live Performance.
Introduction to the particulars of producing and integrating media into live performance environments.

T D X54T.27. Festival and Event Management.
Fundamentals of the stage management process for large public events.

T D X54T.28. Tailoring I.
Fundamental theory and techniques in tailoring for the live performer.

T D X54T.29. Tailoring II.
Advanced theory and techniques in tailoring for the live performer.

T D X54T.3. Mask Making.
Fundamentals of mask theory, design, and construction for theatre and live performance.

T D X54T.30. Wig Making and Styling.
Fundamentals of building and styling wigs for use in the theatre.

T D X54T.31. Scenic Design.
Introduction to the conceptualization and design of scenery for the theatre.

T D X54T.32. Stage Craft.
Fundamentals of scenery construction and assembly.

T D X54T.33. Projection Design.
Introduction to the field of projection design in live performance.

T D X54T.34. Entertainment Systems Design.
Explores interconnectedness between lighting, projection, and media that is commonly found in live entertainment environments.

T D X54T.36. Stage Management.
Fundamentals of the stage management process for theatrical production.

T D X54T.37. Advanced Stage Management.
Advanced instruction in stage management for theatrical production.
T D X54T.4. Millinery.
Fundamentals of hat design, fitting, and construction techniques.
T D X54T.5. Scenery Technology I.
T D X54T.6. Costume Rendering.
Fundamentals of costume research and drawing.
T D X54T.7. Drawing for Theatre Designers.
T D X54T.8. Painting.
T D X54T.9. Automated Lighting I.
Fundamentals of automated and computer-aided lighting for theatre and live performance.
T D X55. Playwriting III.
Focus on experiments in revising dramatic text in order to create a common vocabulary around narrative structure. Revision often includes the creation of multiple new drafts, digging through past drafts for abandoned themes, lost focus, and new inspiration as well as exploring character, narrative, and/or language.
T D X55T. Topics in Playwriting.
T D X56T. Topics in Theatre Studies.
Topics in theatre studies, including creative drama, theatre for children and youth, and theatre with young adults.
T D X56T.1. Puppetry.
T D X56T.2. Latino Theatre for Young Audiences.
T D X56T.3. Creative Drama in the Museum.
The application of creative drama methods in museum settings.
T D X57D. Dramaturgy.
T D X57T. Topics in History, Criticism, and Performance Studies.
T D X57T.1. Latin American Theatre and Drama.
T D X57T.11. Gwendolyn Brooks.
T D X57T.12. Reading Cannon.
T D X57T.14. Queer/Trans Performance.
Explore the ways performance serves as an alternative space of expression and worldmaking, a site of activism and resistance, and a creative outlet for queer and trans people in specific socio-cultural contexts.
T D X57T.2. Gender And Sexuality in Performance.
Consider what physical performance and dance tell us about gender, sexuality and the body. Previous knowledge of performance or gender studies is not required.
T D X57T.3. Theatre for Dialogue.
T D X57T.4. Confronting LGBTQ Oppression.
Serves two primary functions: to increase participant's knowledge on the issues facing the Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) community; and to learn facilitation skills in order to talk about these issues on campus. Enrolled students will become peer educators in a team, and will give workshops across campus around LGBTQ issues during the spring semester.
T D X57T.5. Writing for Black Performance.
T D X57T.6. Performing LGBTQ+.
T D X57T.7. African Religious Culture and Creativity.
Examine religion as an aesthetic practice and explore the inventiveness of the imagination that underlines African religious practices. Study religious practices spanning from the pre-colonial and post-colonial eras to the contemporary period particularly in urban centers.
T D X57T.9. Greek Tragedies and Postcolonial Dramas.
Study the adaptation of great dramatic literature of the Greek civilizations to their phenomenal evolution into popular African performances. Putting classical writings from Ancient Greek in dialogue with texts that formed the background of African anti-colonial revolutions, analyze how Africans have used these works to re-shape literary canon and given their world and their histories universal purchase.
T D X72. Industry Internship.
Professional internship position in business and/or production.
T D X75H. Honors Seminar.
Comprehensive introduction to research in the area of theatre and dance.
T D X76H. Reading Tutorial in Theatre and Dance Problems.
Individual projects to be completed under faculty supervision.
T D X79H. Thesis Course for Departmental Honors.

Graduate Courses

T D X12P. Fundamental Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.
T D X13P. Projects in Acting and Directing.
Preparation and performance laboratory related to production.
T D X22P. Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.
T D X23P. Advanced Projects in Acting and Directing.
T D X25P. Projects in Playwriting.
T D X26P. Projects in Theatre Studies.
T D X27P. Projects in History, Criticism, and Performance Studies.
T D X32P. Advanced Projects in Dance Performance and Repertory I.
T D X32Q. Advanced Projects in Dance Performance and Repertory II.
T D X52P. Projects in Dance Movement Studies.
T D X80G. Topics in Production Skills for Actors.
T D X80M. Performance Studio.
Exploration and practice in the skills and craft of acting, voice, dance, directing, and playwriting.
T D X80N. Topics in Acting.
Topics, restricted or broad in scope, related to the theory of acting, stage combat, movement, and voice.
T D X80P. Advanced Projects in Performance.
Projects inappropriate to organized courses but pertinent to students' training and development in acting, directing, dance, and playwriting.
T D X81D. Seminar in Directing Theory.
Application of aesthetic and creative principles to directing theory; application of directing theory to textual analysis and production concept.
T D X81E. Topics in Directing Theory.
Topics, restricted or broad in scope, related to the theory of directing.
T D X81F. Topics in Advanced Acting and Directing.
Problems in the theory and practice of acting and directing for the theatre.
T D X81F.1. Advanced Acting.
Full exploration of the sources of dramatic action that reside in the self.
T D X81F.2. Classical Acting.
Training in the acting skills needed for the performance of Shakespeare and other verse dramatists.
T D X81F.3. Voice Studies I.
Training the actor in vocal coaching, voice anatomy, muscularity of speech, and vocal health.
T D X81F.4. Voice Studies II.
Application of vocal techniques.
T D X81G. Topics in Advanced Acting and Directing Laboratory.
Practical application of acting and directing techniques for the theatre.
T D X81G.1. Voice, Speech, and Movement I.
The basics of speech, phonetics, and mind and body awareness for the actor.
T D X81G.2. Voice, Speech, and Movement II.
The physical side of acting, and articulation as it is applied to various types of text.
T D X81G.3. Voice, Speech, and Movement III.
Stage dialects and physical character development.

T D X81G.4. Voice, Speech, and Movement IV.
Individual research projects and advanced movement techniques.
T D X81G.5. Acting for the Camera.
Fundamentals of on-camera acting techniques.
T D X81G.6. Acting Showcase.
Scenes and monologues to be used in the New York and Los Angeles evaluation showcases.
T D X81G.7. Directing.
Practical application of directing techniques for the theatre.
T D X81J. Directing: Modern Drama.
Theory, analysis, and practice in directing plays from the modern period.
T D X81L. Directing: Period Drama I.
Theory, analysis, and practice in directing plays from historical periods of drama.
T D X81M. Directing: Period Drama II.
Continuation of Theatre and Dance 381L. Theory, analysis, and practice in directing plays from historical periods of drama.
T D X82K. Seminar in Secondary School Theatre Curriculum.
Theory and design of secondary school theatre curriculum.
T D X83M. Topics in Theatre Outreach.
Topics, restricted or broad in scope, related to the theory and practice of theatrical outreach.
T D X83M.1. Theatre Outreach Methods.
Theory and design of a variety of outreach offerings.
T D X83P. Topics in Drama and Theatre for Youth.
Topics pertinent to students' training and development in drama and theatre for youth.
T D X83P.1. Puppetry.
Design, construction, and performance of puppets in children's theatre.
T D X83P.10. Myth, Legend, and Tale.
T D X83P.11. Creative Drama in the Museum.
The application of creative drama methods in museum settings.
T D X83P.19. Digital Storytelling with Youth and Communities.
Explores digital storytelling and applied theatre as tools for reflecting on self, building community, and fostering cultural engagement. Engagement in creative writing and devising through drama and digital technologies; collaborative development and documentation of digital stories and performance collages.
T D X83P.2. Children's Dramatic Literature.
Comprehensive study of dramatic literature for children.
T D X83P.3. Children's Dramatic Literature--International.
Comprehensive study of international dramatic literature for children. Material is studied in translation.
T D X83P.4. Theatre in Education.
Theory and practice of interactive theatre in education.
T D X83P.5. Creative Drama.
Advanced theory and practice of creative drama in field and educational settings.
T D X83P.6. Practicum in Drama and Theatre for Youth.
Practical applications of approaches to drama and theatre for youth.
T D X83P.7. Youth Theatre Tour.
Rehearsal, production, and performance of theatre for children in schools.
T D X83P.8. Issues and Practices in Youth Theatre.
Issues in professional and community theatres for children.
T D X83P.9. Special Problems: Directing for Young Audiences.
Challenges in staging plays for young audiences.
T D X84. Topics in Special Problems in Theatre and Dance.
T D X85C. Topics in Theatre History.
Topics, restricted or broad in scope, chosen from the history of theatre, both Western and non-Western.
T D X85C.1. Theatre History, 1660-1900.
T D X85C.2. Medieval and Renaissance Theatre History.
European theatrical history from the medieval and Renaissance periods.
T D X85C.3. Classical and Asian Theatre History.
Survey of ancient Greek, Roman, and Asian theatrical history.
T D X85C.4. 20th-Century Theatre History.
T D X85C.5. French Theatre, 1945-2000.
T D X85C.6. Contemporary Theatre History.
T D X85D. Topics in Dramaturgy.
Topics pertinent to students' training and development in dramaturgical theory and practice.
T D X85D.1. Dramaturgy.
T D X85D.2. New Play Dramaturgy.
T D X85D.3. Production Dramaturgy.
T D X86. Topics in Dance.
Topics pertinent to students' training and development in dance and choreography.
T D X86.1. Dance in Academia.
T D X86C. Topics in the History, Theory, and Criticism of Dance.
Topics pertinent to students' training and development in the history and theory of dance and choreography.
T D X87D. Topics in Performance Studies.
Topics, restricted or broad in scope, related to performance studies.
T D X87D.1. Applied Drama and Theatre.
Survey of various applications of drama and theatre for communitarian and educational purposes.
T D X87D.10. Performance and Politics in the 1960s.
T D X87D.11. Performative Criticism.
T D X87D.12. Performing Black Feminisms.
T D X87D.13. Theatre of the Oppressed.
Overview of the movement inspired by Augusto Boal's Theatre of the Oppressed.
T D X87D.14. American Musical Theatre.
T D X87D.15. Body, Culture, and Performance.
T D X87D.16. Dance, Women, and Narrative.
T D X87D.17. Feminist Theory and Performance.
T D X87D.18. Performance and Activism.
T D X87D.19. Performance and Cultural Studies.
T D X87D.2. Performance Analysis.
T D X87D.20. Performance Theory Analysis.
T D X87D.21. Performative Writing.
T D X87D.22. Performing America, 1840-1940.
T D X87D.23. Queer Performance and Theory.
Current theories and practices of queer performance.
T D X87D.3. Performance Ethnography.
T D X87D.4. Performing Autobiography.
The overlapping territory between performing the self and performing the biographical other.
T D X87D.5. Seminar in Theatre History and Performance Studies.
T D X87D.6. Historical Case Studies.
T D X87D.8. Women and American Performance.
T D X87D.9. Adaptation for Stage and Screen.
T D X87M. Topics in Dramatic Theory and Criticism.
Topics, restricted or broad in scope, concerning theory and criticism as they relate to drama or theatre.
T D X87M.1. Dramatic Theory and Criticism, Ancient Greece to the Eighteenth Century.
T D X87M.2. Dramatic Theory and Criticism, the Eighteenth Century to 1960.
T D X87M.3. World Theatre in Context.
Practical application of dramaturgical case study for the actor.

T D X87N. Topics in Dramatic Form and Structure.
T D X87N.2. Devised Work.
T D X87P. Playwriting Workshop.
Theory and practice of dramatic writing.
T D X87R. Playwriting For Youth.
Advanced study and practice of writing plays for children and youth.
T D X88. Research Methods and Resources.
Theory and practice of academic research for theatre artists.
T D X88J. Topics in Advanced Design and Technology Studio.
Problems in the theory of scenic design, costume design, lighting design, and theatre technology.
T D X88J.1. Costume Design.
T D X88J.2. Costume Technology.
T D X88J.3. Lighting Design.
T D X88J.4. Scenic Design.
Fundamentals of scenic design.
T D X88J.5. Theatre Technology.
Theory and application of the technical direction process.
T D X88K. Topics in Advanced Design and Technology Laboratory.
Practical applications of production theory for theatrical designers and technicians.
T D X88K.1. Lighting Laboratory.
Practical and individual design experience in lighting.
T D X88K.2. Technology Laboratory.
Practical and individual design experience in theatrical technology.
T D X88K.3. Scenery Laboratory.
Practical and individual design experience in scenery.
T D X88K.4. Costuming Laboratory.
Practical and individual design experience in costuming.
T D X88L. Advanced Topics in Design and Technology.
Topics that are related to and support the study of theatrical design and technology.
T D X88L.1. Costume Rendering.
Fundamentals of costume research and drawing.
T D X88L.10. Draping II.
Advanced clothing construction for theatrical productions.
T D X88L.11. Mask Making II.
Mask theory, design, construction for theatrical and live productions.
T D X88L.12. Automated Lighting II.
Advanced automated and computer-aided lighting theory and techniques.
T D X88L.13. Scenic Rendering.
T D X88L.14. Millinery I.
Fundamentals of hat design, fitting, and construction techniques.
T D X88L.16. Rigging for the Theatre.
Historical and modern practices of theatrical rigging systems.
T D X88L.17. Tailoring I.
Fundamental theory and techniques in tailoring for the live performer.
T D X88L.18. Tailoring II.
Advanced theory and techniques in tailoring for the live performer.
T D X88L.19. Concert Lighting.
Use of automation, computers, and remote control in lighting for live performance.
T D X88L.2. Drawing for Theatre Designers.
Fundamentals of drawing and drafting for theatrical designers.
T D X88L.23. Fabric Painting and Dyeing II.
Advanced textile surface design.
T D X88L.24. Millinery II.
Advanced hat design, fitting, and construction techniques.
T D X88L.25. Audio Production.
Fundamentals of audio production for the stage and other live performances.
T D X88L.26. Costume Design Skills.
Fundamentals of research, drawing, rendering, and script and character analysis and critique for costume design.
T D X88L.27. Lighting Design Skills.
Fundamentals of research, paperwork communication, and technology for lighting designers.
T D X88L.28. Scenery Design Skills.
Fundamentals of drawing, drafting, and model building for theatrical designers.
T D X88L.29. Figure and Fabric Rendering.
Principles of figure and fabric painting from life.
T D X88L.3. Painting.
Painting techniques for theatrical designers.
T D X88L.30. Scene Painting.
Scene painting techniques for theatrical designers.
T D X88L.4. Automated Lighting I.
Fundamentals of automated and computer-aided lighting for theatre and live performance.
T D X88L.5. Mask Making I.
Fundamentals of mask theory, design, and construction for theatre and live performance.
T D X88L.6. Advanced Makeup.
Advanced theatrical makeup theory and techniques.
T D X88L.7. Fabric Painting and Dyeing I.
Fundamentals of textile surface design.
T D X88L.9. Draping I.
Basic clothing construction for theatrical productions.
T D X88R. Topics in Research and History for the Visual Theatre.
Study of the development of dress and decor, as seen in a general historical context, with an introduction to research methods appropriate for theatrical designers and technicians.
T D X90C. Professional Development Workshop.
New project development workshop for second year Playwrights and Directors who will collaborate with other students in teams to explore and develop new works.
T D X90K. Play Readings.
Weekly readings of plays in various stages of development.
T D X90L. New Playwriting Studio.
T D X91. Topics in Performance as Public Practice.
Topics, restricted or broad in scope, related to performance as public practice.
T D X91.1. Historiography.
The history of history, in practice, as a discipline, and in writing.
T D X91.2. Proseminar: Performance as Public Practice.
T D X91.3. Public Intellectuals and the Arts.
T D X91.4. Community-Based Theatre.
The practice of theatre as a tool for community and social change.
T D X91.5. Cultural Policy and the Arts.
T D X93. Topics in Seminar in Theory, Criticism, and Analysis.
T D X95. Topics in Readings in History, Theory, Criticism, and Performance Studies.
In-depth exploration of literature in specialized areas of interest, primarily as preparation for doctoral examinations and dissertation proposals.
T D X98. Thesis.
T D X98T. Supervised Teaching in Theatre and Dance.
Theory and practice of pedagogy in theatre and dance.
T D X99W. Dissertation.

Professional Courses

T D X12P. Fundamental Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.
T D X13P. Projects in Acting and Directing.
Preparation and performance laboratory related to production.

T D X22P. Projects in Dance Performance and Repertory.
Preparation and performance laboratory related to production.
T D X23P. Advanced Projects in Acting and Directing.
T D X25P. Projects in Playwriting.
T D X26P. Projects in Theatre Studies.
T D X27P. Projects in History, Criticism, and Performance Studies.
T D X32P. Advanced Projects in Dance Performance and Repertory I.
T D X32Q. Advanced Projects in Dance Performance and Repertory II.
T D X52P. Projects in Dance Movement Studies.

TAM - Tamil

Tamil: TAM

Lower-Division Courses

TAM X04. Accelerated First-Year Tamil.
Designed for students who understand or speak but do not read or write Tamil.
TAM X06. First-Year Tamil I.
TAM X07. First-Year Tamil II.
TAM X12. Accelerated Second-Year Tamil.
Continuation of Tamil 604. Designed for students who understand or speak but do not read or write Tamil.
TAM X12K. Second-Year Tamil I.
TAM X12L. Second-Year Tamil II.
TAM X19S. Topics in Tamil.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TAM X29S. Topics in Tamil.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

TAM X20K. Advanced Tamil I.
TAM X20L. Advanced Tamil II.
TAM X29S. Topics in Tamil.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TAM X30. Topics in Tamil Language and Literature.
Study of specific subjects related to South Asian culture as reflected in Tamil literary productions and other modes of expression.
TAM X60. Conference Course in Tamil Language and Literature.
Supervised individual study of selected problems in Tamil language and literature.

Graduate Courses

TAM X29S. Topics in Tamil.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TAM X81. Conference Course in Tamil Language and Culture.
Supervised individual study in Tamil language or culture.
TAM X84. Topics in Tamil Language and Culture.
Study of various aspects and periods of Tamil language and culture.

Professional Courses

TAM X29S. Topics in Tamil.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. TUR - Turkish

Turkish: TUR

Lower-Division Courses

TUR X01C. Intensive Turkish I.
First semester of intensive Turkish language instruction.
TUR X06. First-Year Turkish I.
Modern Standard Turkish.
TUR X07. First-Year Turkish II.
Modern Standard Turkish. Continuation of Turkish 506.
TUR X11C. Intensive Turkish II.
Second semester of intensive Turkish language instruction.
TUR X12K. Second-Year Turkish I.
Conversational Turkish and readings in contemporary Turkish literature and newspapers. Review of the grammar covered in Turkish 506 and 507, and introduction of more complex grammatical patterns.
TUR X12L. Second-Year Turkish II.
Continuation of Turkish 412K.
TUR X19S. Topics in Turkish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TUR X29S. Topics in Turkish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

TUR X19S. Topics in Turkish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TUR X20K. Intermediate Turkish I.
Intermediate to high-level Turkish in four basic language skills: speaking, listening, reading, and writing. Turkish culture.
TUR X20L. Intermediate Turkish II.
Continuation of Turkish 320K.
TUR X25K. Advanced Turkish I.
TUR X25L. Advanced Turkish II.
Advanced Turkish language instruction.
TUR X29. Topics in Turkish Language, Literature, and Culture.
Conducted in Turkish.
TUR X29C. Turkish Cinema.
TUR X29D. Turkish Society and Culture.
Explore aspects of contemporary Turkish society and culture while building intercultural communicative competence in modern Turkish through listening, speaking, reading, and writing activities in and outside of class. Focus on daily life and material culture, and guides students to develop efficient reading, listening, and viewing strategies.
TUR X29S. Topics in Turkish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TUR X30D. Turkish across Disciplines.
Students read and discuss Turkish language materials related to the subject matter of another designated course.
TUR X69. Conference Course in Turkish Language and Literature.
Supervised individual study of selected problems in Turkish language or literature.

Graduate Courses

TUR X19S. Topics in Turkish.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.
TUR X29S. Topics in Turkish.

TUR X80. Topics in Turkish Language and Literature.
Study of various aspects or eras of Turkish language and literature.
TUR X81H. Intensive Graduate Language Instruction I.
Intensive cultural and literacy-focused training in Turkish at the beginning level in preparation for research in the Turkic-speaking world or with Turkish sources. Incoming students are placed in the appropriate level by means of a departmental placement test.
TUR X81J. Intensive Graduate Language Instruction II.
Intensive cultural and literacy-focused training in Turkish at the low-intermediate level in preparation for research in the Turkic-speaking

world or with Turkish sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

TUR X81K. Intermediate Graduate Language Instruction I.
Intensive cultural and literacy-focused training in Turkish at the intermediate level in preparation for research in the Turkic-speaking world or with Turkish sources. Includes an independent project component. Incoming students are placed in the appropriate level by means of a departmental placement test.

TUR X81L. Intermediate Graduate Language Instruction II.
Intensive cultural and literacy-focused training in Turkish at the high-intermediate level in preparation for research in the Turkic-speaking world or with Turkish sources. Includes an independent project component. Incoming students are placed in the appropriate level by means of a placement test.

TUR X81M. Advanced Language Instruction I.
Intensive cultural and literacy-focused training in Turkish at the advanced level in preparation for research in the Turkic-speaking world or with Turkish sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

TUR X81N. Advanced Language Instruction II.
Intensive cultural and literacy-focused training in Turkish at the advanced level in preparation for research in the Turkic-speaking world or with Turkish sources. Incoming students are placed in the appropriate level by means of a departmental placement test.

TUR X82. Topics in Turkish Culture.

TUR X89. Conference Course in Turkish Studies.
Supervised individual study of selected problems in Turkish studies.

TUR X90K. Advanced Turkish I.
Intermediate to high-level Turkish in four basic language skills: speaking, listening, reading, and writing. Turkish culture.

TUR X90L. Advanced Turkish II.
Continuation of Turkish 390K.

Professional Courses

TUR X19S. Topics in Turkish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Middle Eastern Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

TXA - Textiles and Apparel

Textiles and Apparel: TXA

Lower-Division Courses

TXA X01. Clothing the Planet.
Study of the role textiles and apparel play in human lives. Introduction to the textile and apparel industries, and the broad perspective and core skill sets that characterize the field. Subjects include terminology, fibers and fabrics, textile technology, product development through fashion design and retail merchandising, global sourcing and manufacturing, international promotion and marketing, and textile conservation, exhibition, and collection management.

TXA X01C. Introduction to the Fashion Industry.
Explore the apparel and textiles industry with an emphasis on ethical and sustainable issues related to the industry. Examine a broad view of the interrelated fields of design, merchandising, product development, and textiles alongside emerging themes in the field.

TXA X03. Topics in Textiles and Apparel.

TXA X05. Textiles.
Chemical and physical properties of fibers and yarns, fabric construction, and finishes.

TXA X05L. Textiles Laboratory.

TXA X12K. Apparel Industry.
Introduction to the integrated apparel design industry from the creative and merchandising perspective.

TXA X12L. Apparel Product Development and Design Laboratory.

TXA X13. Aesthetics: Theory and Practice.
Introduction to the theoretical and practical aspects of the principles of design and visual literacy in the field of textiles and apparel. Introduction to the principles and theories that define what is aesthetically pleasing and the vocabulary necessary to identity, describe, and critique them.

TXA X14C. Computer-Aided Design for Apparel.
Explore computer technology used to create textile prints, weaves, illustrations, flat patterns, promotional pieces, and pattern markers.

TXA X14K. Product Development.
Introduction to all stages of product development involved in fashion and functional design with an emphasis on target market identification, cost analysis, material selection, and the organization of product development within the industry structure. Apply product development skills and strategies involved in fashion and functional design.

TXA X14L. Product Development Laboratory.
Application of product development skills and strategies involved in fashion and functional design. Emphasis on target market identification, cost analysis, material selection, and the position of product development within the industry structure.

TXA X16L. Apparel I.
Industrial techniques of pattern design and garment construction.

TXA X16Q. Sewn Products Analysis.
Evaluation of soft goods, including materials, quality of work, and costs.

TXA X16R. Sewn-Product Analysis and Manufacturing.
Explore apparel production and manufacturing processes, including an evaluation of soft goods, materials, quality of work, and costs. Examine conceptual framework of the manufacturing process for future apparel professionals. Discuss the apparel production cycle: how apparel products are designed, created, and distributed. Analyze garment design and construction features to understand their relationship to apparel cost and quality.

TXA X17D. Fashion Design Thinking.
Introduction to the process of primary and secondary research, design, and construction.

TXA X17R. Merchandising Math I.
Explore foundational concepts in retail math using Excel. Build analytical skills and a foundation in merchandising systems.

TXA X17T. Textiles Fabrication.
Apply textile theory and properties to create yarn and fiber based materials such as woven, knit, and non-woven textiles.

TXA X18E. Fashioning America.
Explore the history of the United States from pre-Civil War to contemporary society as reflected through targeted as well as changing styles in costume and dress. Examine the ability of dress as a device that can communicate political, social, economic, aesthetic and cultural change. Analyze clothing choices as related to exterior motivations including protection, gender, status and decoration. Relate the power of dress to particular demographic groups throughout history. Acquire a vocabulary with which to describe apparel and related items.

TXA X18T. Medical Textiles.
Explore special and functional textiles to address medical applications and public health challenges such as artificial organs and tissue

scaffolds, medical aid devices, the use of antiviral and antibacterial materials, and personal protection equipment.

TXA X19C. Applied Art in Visual Presentation.
Explore the principles and elements of design as related to merchandising presentation, display planning, execution, and coordination.

TXA X19L. Applied Art in Visual Presentation Laboratory.
Application of the principles and elements of design as related to merchandise presentation, display planning, execution, and coordination.

TXA X19R. Merchandise Presentations in Retail Environments.
Explore an integrated approach to communicating, presenting and evaluating two-and three-dimensional design strategies for merchandise presentation (both digital and brick and mortar environments). Examine components of both design and execution rooted in a foundation of visual merchandising theory, skills, and terminology.

TXA X19S. Topics in Textiles and Apparel.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

TXA X52D. Field Experience in Apparel Design.
Application of apparel design techniques and principles in a professional environment.

TXA X65. Advanced Topics in Textiles and Apparel.

Upper-Division Courses

TXA X03. Topics in Textiles and Apparel.

TXA X25K. Culture, Gender, and Appearance.
Social, economic, aesthetic, and political aspects of historic costume and of the evolution of modern dress.

TXA X25L. History of Dress and Cultural Change I.
Social, economic, aesthetic, and political aspects of costume evolution from ancient times through the Renaissance.

TXA X25M. History of Dress and Cultural Change II.
Social, economic, aesthetic, and political aspects of costume evolution from the Baroque period through modern times.

TXA X26. Apparel II.
Advanced apparel construction techniques using industry standards and portfolio development.

TXA X26L. Apparel II Laboratory.
Advanced apparel construction techniques using industry standards and portfolio development.

TXA X27. Clothing and Human Behavior.
The social, psychological, and nonverbal significance of clothing and the influence of clothing on behavior.

TXA X27C. Social Psychology of Dress and Appearance.
Explore cultural, social, and psychological significance of dress and appearance. Examine theories related to the ways individuals communicate and interpret the self, identity, and social roles through dress and appearance in contemporary society.

TXA X28. Research Methods in Textiles and Apparel.
Basic research methodology and academic writing.

TXA X29S. Topics in Textiles and Apparel.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Human Ecology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

TXA X31. Textiles and Apparel in a Global Market.
Overview of the textiles and apparel industry including apparel industry standards, labor costs, economics, distribution, and structure in the modern global marketplace. Subjects include the analysis of consumption patterns and retailing systems to inform product development; exploring cross-cultural comparisons between global consumer markets; understanding importing and exporting systems and other procedures involved in modern supply chain activities; and grasping the collaborative nature of innovation and design, manufacturing and distribution, retailing, and customer satisfaction leading to sales in the global market.

TXA X31E. Textiles and Apparel in the Global Marketplace.
Explore global textile and apparel industries and the factors affecting global sourcing from product concept to distribution with an emphasis on global issues. Examine the textile and apparel complex and its history, international trade and the effects of trade policy, the sourcing process, selection of sourcing locations and partners, sourcing regions of the world, and current trends.

TXA X40E. Paris: Fashion, History, and Techniques.
Explore workshops and tours focused on fashion, its history, and techniques.

TXA X40T. Sustainable Textile Manufacturing.
Explore sustainable textile manufacturing practices including renewable fiber manufacturing, textile circular manufacturing, and apparel recycling.

TXA X41E. Accessory Design, Product Development, and Merchandising.
Connect with industry partners to explore design and product development processes through the brand's commercial lens.

TXA X42E. New York: Apparel Industry.
Explore significant apparel-related businesses such as major retailers, fashion designers, lifestyle brands, apparel and beauty product manufacturers, and licensing firms. Interact with industry leaders such as C-Suite Leaders, Directors, Presidents, VP's Merchants, and museums such as The Metropolitan Costume Institute.

TXA X50. Advanced Apparel Design Portfolio.
Extensive sociological, cultural, and historic visual research for apparel design. Through a range of projects that incorporate computer-aided design, product illustration, technical packets, proposed production plans, and target market identification, students will produce a professional level, hard copy and online, portfolio that will help prepare them for a career in the apparel industry.

TXA X50D. Advanced Apparel Portfolio.
Examine sociological, cultural, and historic visual research for apparel design. Explore a range of projects that incorporate computer-aided design, product illustration, technical packets, proposed production plans, and target market identification.

TXA X51. Pre-Internship Seminar.
Preparation course for students seeking internships. Subjects include application, internship interview process, effective professional communication, ethical decision making, leadership development, site expectations, and the impact of business environments on personal and career effectiveness in the field of textiles and apparel.

TXA X51D. Advanced Apparel Design.
Expand range of expertise in developing design proposals to include knitted or printed textiles, other apparel categories, menswear, size inclusivity, children's wear, and accessories. Focus on expanding depth and breadth of skills as relevant to career opportunities.

TXA X51R. Merchandising Technology.
Examine various technologies relevant to merchandising and retailing.

TXA X52C. Field Experience in Textile Conservation Internship.
Participation in an approved internship after completion of all conservation science stream coursework. Students will be placed in an appropriate site under the supervision of an available professional such that students may experience collection management, artifact

storage and conservation, exhibit planning/installation, environmental monitoring, and/or other museum or conservation activities. A formal agreement between the faculty supervisor and internship sponsor will govern activities and be monitored throughout the experience through assignments, regular electronic communication, and a site visit.

TXA X52D. Field Experience in Apparel Design.
Application of apparel design techniques and principles in a professional environment.

TXA X52E. Historic Apparel Collections and Exhibit Management.
Explore the history of fashion, design thinking, visual display design, and execution.

TXA X52M. Field Experience in Retail Merchandising.
Application of merchandising techniques and principles in a professional environment.

TXA X53. Field Experience I.
Application of merchandising strategic planning in a professional environment with faculty and site director supervision.

TXA X53D. Apparel Design Mentorship.
Connect with a Textiles and Apparel design alum - a professional designer- as a mentor. Build awareness of current apparel industry practices and standards expected for entry level design positions.

TXA X54C. Material Properties and Deterioration.
Overview of the major mechanisms of textile deterioration from a variety of sources including light, dirt, various insects and microorganisms, as well as mechanical wear and tear. Examination of the peculiarities of these deterioration phenomena through the study of the basic chemical and physical properties of the fibers constituting the textiles.

TXA X54D. Instrumental Methods for Conservation Assessment.
Overview of primary instrumental methods for evaluating historical textiles in terms of physical characteristics, chemical content, strength loss, structural deterioration, color change, and overall structural integrity and status of impact of environmental factors. Focus on instrumental features, measuring procedures, and interpretation of instrumental data.

TXA X54E. Conservation Planning and Preventive Treatments.
Implementation and management of textile conservation. Subjects include general requirements for preserving historical textiles, procedures for planning textile conservation projects, and major physical and chemical methods of preventive and postdamage treatments for historical textiles.

TXA X54F. Advanced Exhibit Planning and Installation.
Planning and implementation of a full museum exhibit including budget, selection and preparation of artifacts, prop construction, signage, educational and promotional materials, donor/supporter communication, and opening event. Serves as a pre-internship/capstone course for conservation science majors.

TXA X55. Topics in Problems Course.
Intensive study of selected problems of an interdisciplinary nature.

TXA X55C. Computer-Aided Design for Apparel.
Computer technology used to create textile prints, weaves, illustrations, flat patterns, promotional pieces, and pattern markers.

TXA X55D. Textiles Artifact Management and Conservation.
Principles and techniques in the identification, documentation, conservation, and exhibition of textile-based artifacts.

TXA X55K. Textile and Apparel Economics.
Economic and regulatory aspects of the textile and apparel industries.

TXA X55N. History of Textiles.
Role of textiles in the social, economic, aesthetic, and technological development of society; including production and design of textiles throughout history.

TXA X55P. Problems in Retail Merchandising.
Intensive study of selected problems related to field experience; development of analytical and problem-solving skills for retailing.

TXA X56. Internship.
Reflect on the internship and faculty mentorship.

TXA X59H. Honors Reading Course.
Supervised individual reading on special subjects.

TXA X60. Textile Testing.
Analyze and evaluate textile performance.

TXA X60L. Advanced Textiles.
Composition, structure, and properties of textile products; contributions of textile research.

TXA X61. Consumer Behavior in the Marketplace.
Internal and external factors that influence consumer behavior in the marketplace. Application of concepts and theories from the social sciences to the areas of textiles, clothing, and appearance; experience in conducting market and consumer research.

TXA X61T. Biopolymers and Biomaterials.
Examine bio-fibers, bio-materials, and membrane formation and applications from a textile foundation.

TXA X62D. CLO 3D.
Explore technology, pattern-making and garment construction intertwined with a modern approach to garment design. Utilize CLO 3D software for 3D rendering and flat pattern design on a virtual croquis.

TXA X62T. Smart Textiles and Apparel Systems.
Explore advanced technologies of conductive yarns, e-textiles and wearable technology integration.

TXA X63D. Jewelry Design and Technology.
Explore 3D CAD software, such as Fusion 360 to create renderings and models. Utilize technology equipment such as 3D printing and laser cutting to create a real life sample of original designs.

TXA X63T. Nanotechnologies in Textiles.
Examine the role of nanotechnology in the evaluation, development and fabrication of textiles and fibers. Explore characterization tools used in nanotechnology, general chemistry employed in fabrication, and properties found in different nano-materials, nano-fibers, nano-coatings. Discuss products in the market and functionality. Propose potential innovations with nanotechnologies in textiles.

TXA X64K. Topics in Advanced Problems in Clothing.
Creative application of flat pattern or draping processes.

TXA X64L. Topics in Advanced Problems in Apparel Laboratory.

TXA X65. Advanced Topics in Textiles and Apparel.

TXA X66D. Flat Pattern.
Explore the creative application of flat pattern processes.

TXA X67D. Draping.
Examine advanced apparel design. Explore the creative application of draping processes.

TXA X68D. Capstone Collections.
Examine advanced apparel design. Explore the creation of an apparel collection.

TXA X70. New York City Fashion and Sustainability.
Examine multiple facets of the apparel industry in New York City, including fashion design, manufacturing processes and technology, retailing and sales, marketing, and post-consumer services. Explore the industry through the lens of sustainability highlighting current innovations for the purpose of reducing fashion's environmental impact.

TXA X76. Principles of Retail Merchandising.
Retail strategic planning and implementation for soft goods and apparel.

TXA X76R. Concepts and Innovations in Retailing.
Develop understanding of retail strategy, channels of distribution, private labels, innovation in retail, and the key issues impacting growth in retail firms including exposure to issues facing retailers in international settings.

TXA X77. Merchandising Systems.
Application course focusing on the calculation and analysis of the selling price, profitability, assortment planning, purchasing, and inventory control. Includes spreadsheet application and exercises.

TXA X77R. Merchandising Math II.

TXA X78H. Topics in Textiles and Apparel: Honors Seminar.

TXA X79H. Honors Tutorial Course.

Supervised individual research on a special topic in textiles and apparel; oral presentation and preparation of a scholarly paper covering the research. May be based on laboratory, library, or field research.

TXA X79R. Strategic Brand Management.

Examine strategic brand management and trademark protection. Explore the process of how an institution strategically manages a product category and grants rights to a specific group of licenses.

Graduate Courses

TXA X03. Topics in Textiles and Apparel.

TXA X52D. Field Experience in Apparel Design.

Application of apparel design techniques and principles in a professional environment.

TXA X65. Advanced Topics in Textiles and Apparel.

TXA X92. Topics in Research Problems in Textile and Apparel Technology.

Directed research in various topics in the area of textile and apparel technology.

TXA X94. Topics in Recent Advances in Textile and Apparel Technology.

An in-depth study of textile and apparel topics. Students may read original research papers and carry out fieldwork assignments.

TXA X94.1. Advances in Product Development and Technical Design.

Development of specification, sizing, grading systems, and quality control methodology.

TXA X94.10. Global Textile and Apparel Business Dynamics.

Elements of competitive strategy and planning methods within the textile complex, with an emphasis on the concepts of strategy in a mature industry, defining business in a global industry, allocating resources through strategic planning methods, and implementing strategy in single- and multi-business firms.

TXA X94.11. Market Research in Textiles.

Study and analysis of quantitative methods employed in market research in the textile industry, including the function of market research and its proper orientation to management and decision making.

TXA X94.12. Color Science.

The basis of modern techniques for color specification, measurement, control, and communication. Applications of color science to textiles, plastics, color reproduction, computer-based imaging, and display systems. Basic concepts are taught using computer color graphics.

TXA X94.2. International Sourcing and the Global Economy.

Economic, social, and public issues related to international production and sourcing of textiles and apparel.

TXA X94.3. E-Commerce and Direct Marketing.

Recent developments and evaluation of nontraditional retailing of apparel.

TXA X94.4. Textile Instrumentation.

Application of image analysis, neural networks, and wavelet transforms to textile and apparel products.

TXA X94.5. Digital Design and Printing.

Principles and elements of digital design and printing. Recent developments in digital knits, weaves, prints, and nonwoven textiles.

TXA X94.6. Textile Functional Finishes.

Study of the application and adaptation of functional finishes to textiles.

TXA X94.7. Textile Microscopy and Image Analysis.

Basic techniques for characterizing fiber properties visually with a microscope and using technology and computer analysis.

TXA X94.8. Digital Modeling of Textiles.

Recent developments in two- and three-dimensional modeling.

TXA X94.9. Production Mechanics and Properties of Woven Fabrics.

The relationship between the mechanics of production and mechanical properties of woven fabric; the unit operations required to prepare yarns for weaving and the mechanisms employed in weaving; fabric structure, geometry, and mechanical properties; designing for specific fabric properties.

TXA X95. Topics in Textiles and Apparel: Seminar.

Lectures and discussions on current topics in textiles and apparel.

TXA X95.1. Mass Customization of Apparel.

The principles and implementation of newly developed three-dimensional technology for apparel mass customization.

TXA X95.2. Advanced Functional Textiles.

Current science and technology concerning functional textiles. Emphasis is on the relationship between materials, development, structure, and properties.

TXA X98. Thesis.

Professional Courses

TXA X03. Topics in Textiles and Apparel.

TXA X52D. Field Experience in Apparel Design.

Application of apparel design techniques and principles in a professional environment.

TXA X65. Advanced Topics in Textiles and Apparel.

U D - Urban Design

Urban Design: U D

Lower-Division Courses

Upper-Division Courses

Graduate Courses

U D X80C. Topics in Visual Communication and Representation.
U D X80C.1. Diagramming the City.
U D X80C.2. Reality Capture for Architecture.
U D X80C.3. Rendering and Animation in the Built Environment.
U D X80C.4. Photography and the Urban Landscape.
U D X80C.5. Geographic Information Systems in Planning.
U D X80C.6. Urban Geographic Information Systems.
U D X80Q. Topics in Urban Design.
U D X81E. Topics in Landscape and Ecology.
U D X81E.1. History and Theories of Landscape Architecture I.
U D X81E.2. History and Theories of Landscape Architecture II.
U D X81E.3. Introduction to Urban Ecology.
U D X81E.4. Latin American Landscapes.
U D X82M. Topics in Urban Development and Real Estate.
U D X82M.1. Financing Real Estate Development.
U D X82M.2. Real Estate Practicum.
U D X82M.3. Urban Land Institute Workshop.
U D X83M. Topics in Urban Geography.
U D X83M.1. The Modern American City.
U D X83M.2. The Healthy, Livable City.
U D X83M.3. Smart, Green, and Just.
U D X83M.4. Sustainable Development.
U D X84M. Topics in Urban Housing.
U D X84M.1. Housing Practice and Policy in Latin America.
U D X84M.2. Urban Housing: Typology and Invention.
U D X84M.3. Affordable Housing Planning and Policy.
U D X85M. Topics in Transportation Planning.
U D X85M.1. Land Use and Transportation Planning.
U D X85M.2. Bicycle and Pedestrian Transit Planning.
U D X85M.3. Transit-Oriented Development.
U D X85M.4. Transportation Planning and Policy.
U D X86M. Topics in Community and Regional Planning.
U D X86M.1. Race and the Built Environment.
U D X86M.2. Design and Informal City.
U D X86M.3. Race and Urban Development.
U D X86M.4. Migratory Urbanism.
U D X86M.5. Nature of Public Spaces.
U D X86M.6. Disasters and Resilience: Planning and Response.
U D X86M.7. Foundations of Planning Law.
U D X86M.8. Readings in International Planning.
U D X86M.9. Smart Cities.
U D X87C. Urban Design Independent Research.
U D X87D. Urban Design Honors Research.
U D X88. Urban Design History, Theory, and Criticism.
Examine critical theories and practices that affect the built environment.
U D X88K. Post-Professional Seminar Readings.
U D X88R. Topics in Urban Design History and Theory.
U D X88R.1. Futures and Cities.
U D X88R.2. Design of New Communities.
U D X88R.3. Mexican Architecture and Urbanism.
U D X88R.4. Architecture Computation.
U D X89K. Post-Professional Seminar.
U D X89R. Topics in Historic Preservation.
U D X89R.1. History of American City Building.
U D X90. Urban Design Planning Project.
Complete the terminal research project in urban design.
U D X96. Topics in Urban Design Studio.
U D X96.1. Advanced Urban Design Studio I.
U D X96.2. Advanced Urban Design Studio II.
U D X96.3. Advanced Urban Design Studio III.
U D X96C. Urban Design Options Studio.
U D X96D. Urban Design Terminal Studio.
U D X96E. Urban Design Honors Project.
U D X98. Thesis.

Professional Courses

UGS - Undergraduate Studies

Undergraduate Studies: UGS

Lower-Division Courses

UGS X02. First-Year Signature Course.
Seminar class focusing on a contemporary issue. Designed to introduce undergraduates to scholarly analysis from an interdisciplinary perspective. Includes an introduction to University resources, such as research facilities, museums, and attendance at University lectures or performances as assigned. Multiple sections may be offered in the fall and spring with various topics and instructors.
UGS X02D. Topics in Undergraduate Studies.
UGS X03. First-Year Signature Course.
Large-group lecture and discussion class focusing on a contemporary issue. Designed to introduce undergraduates to scholarly analysis from an interdisciplinary perspective. Includes an introduction to University resources, such as research facilities, museums, and attendance at University lectures or performances as assigned. Multiple sections may be offered in the fall and spring with various topics and instructors.
UGS X04. First-Year Interest Group Mentor Seminar.
Issues and research in various areas of leadership, communication, student development, and the transition from high school to college.
UGS X04R. First-Year Interest Group Returning Mentor Seminar.
Explore issues and research in various areas of leadership, communication, student development, and the transition from high school to college.
UGS X04T. Transfer Year Interest Group Mentor Seminar.
Issues and research in various areas of leadership, communication, student development, and transfer student success.
UGS X06C. DSP Spring Seminar.
Basic issues in various interdisciplinary fields of study.
UGS X07D. Topics in Undergraduate Studies.
Topics in undergraduate major and course exploration.
UGS X07D.1. Spatial Visualization.
Research has shown that students with developed spatial visualization skills are more successful in physics, chemistry and calculus courses. Focus on how to 'see' things in 3-D, improving their success in these subjects and their ability to problem solve.
UGS X07D.2. Exploring Careers and Majors.
Aimed at undeclared students who are choosing a major or in the early stages of career exploration. Learn skills to make an informed and meaningful career decision and begin the process of career development. Use self-exploration activities and learn about resources

to identify majors and careers that fit with their values, interests, personality and skills. Explores professional skills such as resume writing and internship planning to continue career development strategies.

UGS X08. Undergraduate Research Experience.
Supervised research with a faculty member. Research may consist of a student-led project or assisting a faculty research project.

UGS X09. Analytical Reading and Writing.
Examine fundamental concepts in analytical reading from different disciplinary perspectives, with an emphasis on sociocultural influences on comprehension and writing styles.

UGS X10K. Undergraduate Research Experience.
Supervised research with a faculty member. Research may consist of an individual project or assisting a faculty research project.

UGS X12. Topics in Research Methods.
Interdisciplinary introduction to research methods, designed to lead students through the process of designing an undergraduate research project.

UGS X14M. Fundamentals.
Learn skills to increase academic potential. A specialized course facilitated by a Learning Specialist from the Sanger Learning Center designed to support students experiencing academic difficulty by providing structured academic support.

UGS X16. First-Year Interest Group Seminar.
Explore basic issues in various interdisciplinary fields of study.

UGS X16C. First-Year Connection Seminar.
Explore basic issues in various interdisciplinary fields of study.

UGS X16S. Sophomore Interest Group Seminar.
Explore basic issues in various interdisciplinary fields of study.

UGS X16T. Transfer-Year Interest Group Seminar.
Explore basic issues in various interdisciplinary fields of study.

UGS X19. Topics in International Learning Seminar.
Discussion of various issues related to the academic, cultural, and personal aspects of studying abroad in particular locations.

UGS X19S. Topics in Undergraduate Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Undergraduate College. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

UGS X20K. Undergraduate Research Experience.
Supervised research with a faculty member. Research may consist of an individual project or assisting a faculty research project.

UGS X20L. Undergraduate Research Experience.
Supervised research with a faculty member. Research may consist of an individual project and must meet the criteria for the independent inquiry flag.

UGS X21C. Topics in Research Skill Development and Support.
Introduction to research skills and professionalization.

UGS X21C.1. Project development.
Match with a mentor and develop research subjects.

UGS X21C.2. Research communication.
Communicate research and next steps in professionalization.

UGS X23. Organized Group Research.
Supervised research with a faculty member as part of an organized research program. Research may consist of a student-led project or assisting a faculty research project.

UGS X29S. Topics in Undergraduate Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Undergraduate College. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

UGS X30. Topics in Undergraduate Studies.

Graduate Courses

Professional Courses

UKR - Ukrainian

Ukrainian: UKR

Lower-Division Courses

UKR X06. First-Year Ukrainian I.
Explore listening, speaking, reading, and writing.

UKR X07. First-Year Ukrainian II.
Continue to explore listening, speaking, reading, and writing.

UKR X08. Ukrainian for Slavic Learners I.
Introduction to the Ukrainian language for those with a very basic background in one or more Slavic languages, who can read Cyrillic, and are familiar with some grammatical concepts. Explore listening, speaking, reading and writing skills, and integrate information on Ukrainian culture and life.

UKR X09. Ukrainian for Slavic Learners II.
Continued introduction to the Ukrainian language for those with a very basic background in one or more Slavic languages. Continue to explore listening, speaking, reading and writing skills, as well as grammar. Read authentic texts and write responses to them, while integrating information on Ukrainian culture and life.

UKR X12K. Second-Year Ukrainian I.
Explore listening, speaking, reading, and writing at the second-year level.

UKR X12L. Second-Year Ukrainian II.
Explore listening, speaking, reading, and writing at the advanced second-year level.

UKR X19S. Topics in Ukrainian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

UKR X25. Third-Year Ukrainian I.
Explore oral expression, reading, and composition.

UKR X26. Third-Year Ukrainian II.
Continue to explore oral expression, readings, and composition.

UKR X29S. Topics in Ukrainian.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad advisor in the academic unit. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Graduate Courses

Professional Courses

URB - Urban Studies

Urban Studies: URB

Lower-Division Courses

URB X01. Introduction to Urban Studies.
A multidisciplinary study of cities and complex urban environments; historical and contemporary issues from both national and international perspectives.

URB X04M. Ancient Cities.
Introduction to the urban centers of the ancient Mediterranean world.

URB X05. Introductory Topics in Urban Studies.
An introduction to urban studies within the framework of different disciplines. Topics include urban history, urban education, politics and governance, economics, design and planning, and society and culture.

URB X15. Urban Studies Research Methods.
An introduction to urban studies research methodologies. Includes sources of urban data, the use of the library in urban research, formulating research questions, research design, methods commonly used in urban research, the use of computers to store and manipulate quantitative urban data, and an introduction to data analysis and theoretical and practical applications of urban research.

URB X19S. Topics in Urban Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

URB X20E. Sensing: Elemental Media.
Explore a sensory ethnographic investigation of urban ecology, organized around air, water, earth, and fire as themes for engaging with the city through media and the senses.

URB X20F. Latinx Austin.
Explore the city of Austin, the city's importance for Latino communities, and the importance of Latinos for the city.

URB X20M. Modernism in American Design and Architecture.
A historical survey of artifacts, buildings, and urban environments, focusing on responses to machine-age civilization.

URB X20T. The Culture of Cities.
Examines the social, geographical, and cultural evolution of the United States from a rural and small-town society to an urban and suburban nation. Subjects may include the segregation of public and private space; the formation of urban subcultures organized by gender, work, race, religion, and sexuality; social and spatial divisions between rich and poor and native-born and immigrant; and the increasing importance of cultural capital" in reshaping urban politics and in conflicts over revitalization and gentrification.

URB X21D. Development Economics.
Introduction to theories of economic development. Economic analysis of leading issues.

URB X21G. African Cities Since 1500.
Explore Africa's past through the story of urbanization beginning with an overview of African cities around 1500--a time of increasing human migration and global trade. Assess African cities in the modern period, focusing on the advent of European colonialism in the 1800s and its aftermath.

URB X21M. Urban Imaginaries.
Use science fiction literature, film, and other cultural artifacts as a platform to launch an examination into the central concept of urban imaginaries. Discuss the politics (and potential) of urban representation as well as understand how urban imaginaries influence everyday urban life and the ongoing production of urban space and place.

URB X21R. Introduction to Risk Management.
Principles of risk management for individuals and organizations, financial aspects of insurance companies and markets, industry structure, managerial aspects of underwriting and pricing, and public policy issues.

URB X21U. Urban Sociology.
Introduction to the study of the city and the suburbs. Specific focus on inequality in urban space, with emphasis on three major United States cities (New York, Chicago, and Los Angeles) and on several third world cities.

URB X22C. Vienna: Memory and the City.
Examines the ways in which cultural memory has shaped, and continues to shape, urban life in Vienna, Austria.

URB X22E. Urban Economics.
Economic analysis of urban areas, emphasizing current problems, such as spatial concentration of poverty, lack of access to jobs and financial services, and transportation systems. Examines the role of policy in addressing these problems.

URB X22P. Anthropology of Infrastructure.
Explore how infrastructure creates relationships between resources, energy, built form, information, and people.

URB X22R. Race, Social Justice, and the City.
Examine the way that race and inequality are built into the structures and ideas surrounding urban life through the spatial and racial structures of capitalist development, racialized migration, and redevelopment and gentrification campaigns. Analyze how United States cities are racial geographies.

URB X22T. Texas, 1900 to the Present.
Examine the steady dissociation of Texas from its Old South status to a transitional state and a power in national politics.

URB X22U. Negotiating Urbanization: Case Studies in Turkey.
Examines local and transnational forces that have driven and continue to drive contemporary urbanization in Turkey. Focuses on key issues that emerge in rapidly growing cities of the developing world, such as growing income inequality and socioeconomic exclusion, environmental challenges, and rising violence.

URB X23S. Building the Sustainable City.

URB X24C. Urban Publics.
The concept of the public in the city and how it has shifted over time along the lines of gender, ethnicity, race, and class. Examines contemporary struggles over defining the urban public and how those struggles are linked to social, cultural, political, and economic forces. Subjects include uses of public space, the public sphere, eminent domain, urban politics, civic engagement, and political participation.

URB X24G. Global Cities in the United States.
Engage with the history of the global city at various levels, using text from disciplines including history, geography, anthropology, and sociology, as well as primary sources, images, readings, and films. Define the global city in the past and present and explore questions of race, class, gender, the politics of space, the culture of empire, and the changing shape of U.S. capitalism.

URB X25. Special Topics in Urban Studies.

URB X25E. The Healthy, Livable City.
Explore the design of the built environment and its potential for addressing and preventing many childhood and adult health concerns in the United States. Examine how to create healthy, walkable, vital communities for all.

URB X25L. Sociology of Criminal Justice.
Examination of the police, courts, and prisons: how they work, their impact on those who pass through them. Introduction to the American criminal justice system, its policies and procedures. The primary focus will be on the roles and functions of the police, the courts, and corrections, with a special emphasis on how well or not so well the system operates.

URB X25R. Introduction to Real Estate and Urban Land Development.
An examination of the principles of real estate and urban land economics. Subjects include investment, valuation, financing, and public policy in real estate and mortgage markets.

URB X26F. Berlin.

URB X27D. African American History since 1860.
Survey of the history of African Americans in the United States from 1860 to the present: Emancipation, Reconstruction politics, migration and urbanization, and the evolution of African American culture; kinds of

sources and methods valuable for analyzing African American life and culture.

URB X27U. Urban Unrest.
Analysis of the roots of urban unrest, exploring a range of origins: joblessness, state violence, white flight, backlash against civil rights gains, new immigration, and interracial strife. Beyond race and class, subjects include exploring unrest as a mode of pushing the normative boundaries of gender and sexuality in public space. Course material will draw from film, literature, history, geography, and anthropology.

URB X28C. Principles of Physical Planning.
Introductory course in the physical dimension of urban planning.

URB X28E. Environmental History of North America.
The history of humanity's influence on the plants, animals, microlife, soils, water, and air of North America, and vice versa, from the arrival of the proto-Indians to the contemporary environmental crisis.

URB X28L. Latino Urbanism in the United States City.

URB X29S. Topics in Urban Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

URB X30F. Urban Experiences In East Asia.
Explores the process of urbanization in East and Southeast Asia focusing on the politics of capital accumulation and distribution.

URB X30G. The Global City.

URB X32D. Human Health and the Environment.
Introduction to environmental health concepts. Examine current events to explore the relationship between environment and health and whether an environmental condition is or is not an important threat to health. Discuss the complexity of determining "proof" in this field.

URB X35F. City Architecture.
Introduction to city architecture, urban design, and planning.

URB X37. The Modern American City.
Issues facing residents of United States cities, such as transportation and housing, poverty and crime, metropolitan finance, environmental and architectural design; historical/comparative urban evolution.

URB X40. Contemporary Cultural Geography.
Recent theoretical developments in cultural geography, with a focus on landscapes and the everyday practices that imbue them with meaning; the ways those meanings are contested and are the foci of struggle; and how the relationship between culture and space plays a central role in the social construction of identity.

URB X42C. Water and the Roman City.
Examine Roman urban development, design, and adaption from the perspective of hydrology, hydraulics, and cult and culture.

URB X52C. American Dilemmas.
Examination of critical American social problems, including problems in the economic, political, and health care systems, as well as inequities based on income, gender, and race. Exploration of how these problems are a natural outgrowth of the existing social structure.

URB X55U. Urban Politics.
Examine politics in American cities.

URB X60. Internship and Service Learning.
Internship experience in an urban studies-related public or nonprofit agency. The opportunity to apply the knowledge, theory, and understanding gained from courses in areas of specialization to urban issues in a professional setting. Includes an academic service-learning component.

URB X70. Senior Project.
Students identify an urban issue, develop a position paper, and work closely with a faculty adviser on a project. Students may use text or other media (such as video or portfolio) to present their arguments.

URB X79. Conference Course.
Supervised individual study of selected problems in urban studies.

URB X79H. Honors Tutorial Course.
Directed reading and research or creation of an honors project, followed by the writing of a thesis.

URD - Urdu

Urdu: URD

Lower-Division Courses

URD X04. Accelerated First-Year Urdu.
Designed for students who have some knowledge of spoken Urdu but have not studied Urdu formally.

URD X06. First-Year Urdu I.

URD X07. First-Year Urdu II.

URD X12. Accelerated Second-Year Urdu.
Continuation of Urdu 604.

URD X12K. Second-Year Urdu I.
Introduction to the Urdu script, followed by Urdu reading, composition, and conversation.

URD X12L. Second-Year Urdu II.
Continuation of Urdu 312K.

URD X18K. Practice in Spoken Urdu I.
Instruction and practice in conversation for intermediate-level students.

URD X18L. Practice in Spoken Urdu II.

URD X19S. Topics in Urdu.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

URD X29S. Topics in Urdu.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

URD X29S. Topics in Urdu.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

URD X30. Topics in Urdu Language and Literature.
Study of specific subjects related to Urdu culture as reflected in literary productions and other modes of expression.

URD X30.1. Female Voices in Urdu Literature.
Survey of prose and poetry written in Urdu by women during the last three centuries.

URD X30.2. Love and Devotion in Urdu Literature.
Examination of various literary genres that are shaped by discourses on the love of God and devotion to the prophet Muhammad.

URD X30.3. Philosophy and Poetry of Iqbal.
Explores the prose and poetry written by the most influential twentieth-century Muslim reformer in South Asia, Muhammad Iqbal.

URD X30.4. Urdu Aesthetics.
Intensive overview of the most popular lyrical genre of Urdu poetry, the ghazal, and the standards used to judge a good ghazal.
URD X30.5. Urdu Short Stories: Manto.
Survey of the writings of Sadat Hasan Manto. Primary texts in Urdu, secondary materials in English.
URD X30.6. Qawwali Aesthetics.
Examination of the devotional currency of Qawwali, and issues of gender, class, religious differences, and nationalism. Explores the relationship between oral and written literature and tensions between local aesthetics and the process of globalization.
URD X30.7. Partition in Literature and Film.
URD X30D. Urdu Across Disciplines.
Reading of Urdu language materials related to the subject matter of another designated course in Asian studies.
URD X30G. Gender and Sexuality in Urdu-Hindi.
URD X32. Style and Register in Urdu.
Practice of skills in reading, listening, writing, and speaking for everyday social situations and some formal situations. Relevant to students working toward the "Advanced" level on the American Council for the Teaching of Foreign Languages (ACTFL) proficiency scale, equivalent to level 2 on the Interagency Language Roundtable (ILR) scale.
URD X60. Conference Course in Urdu Language and Literature.
Supervised individual study of selected problems in Urdu language or literature.

Graduate Courses

URD X29S. Topics in Urdu.

UTL - UTeach-Liberal Arts

UTeach-Liberal Arts: UTL

Lower-Division Courses

UTL X01. Introduction to the Teaching Profession.
Weekly seminar with a University faculty member plus a field experience in an area elementary school under the supervision of a cooperating teacher. Course readings and instruction complement the field experience. Seminar topics include basic classroom management, lesson design, assessment, technology, diversity, and special student populations.
UTL X02. Introduction to Teaching in the Middle School.
Weekly seminar with a University faculty member plus a field experience in an area middle school under the supervision of a cooperating teacher. Course readings and instruction complement field experience. Seminar topics include classroom management, lesson design, assessment, technology, diversity, special student populations, conferencing techniques, and school organization.
UTL X03E. Teaching English in the High School.
Weekly seminar with a University faculty member, plus field experience in an area high school under the supervision of a cooperating teacher. Course readings and instruction complement field experience. Seminar topics include state and national standards, curriculum design and implementation, the role of technology in education, and teaching strategies with a special focus on innovative strategies for teaching literature and writing.
UTL X03L. Teaching Languages Other Than English in the High School.
Weekly seminar with a University faculty member, plus field experience in an area high school under the supervision of a cooperating teacher. Course readings and instruction complement the field experience. Seminar topics include state and national standards and their implementation, teaching for proficiency, curriculum design, assessment, best practices, the instructional environment, and the role of technology in teaching languages other than English.
UTL X03S. Teaching Social Studies in the High School.
Weekly seminar with a University faculty member, plus field experience in an area high school under the supervision of a cooperating teacher. Course readings and instruction complement the field experience. Seminar topics include social studies topics, standards, curriculum design and implementation, teaching strategies, technology, and vertical and horizontal teaming in social studies.
UTL X04. Middle School Teaching for Postbaccalaureate Certification.
Designed for college graduates seeking teacher certification. Students observe and teach in a middle school under the supervision of a mentor teacher, and participate in a weekly seminar. Seminar topics may include classroom management, lesson design, assessment, technology,

diversity, special student populations, conference techniques, and professional development.

Upper-Division Courses

UTL X20. Topics in Teaching the Liberal Arts.
Introduction to various topics related to middle grades, secondary, and all-level teaching certification. Topics may include history, social studies, English language arts, and languages other than English.

UTL X40. Teaching in Secondary Schools.
Course readings and instruction complement the field experience. Seminar topics include theoretical foundations for subject-specific methods, state and national standards and their implementation, teaching for proficiency, curriculum design, assessment, best practices, the instructional environment, and the role of technology in teaching.

UTL X41R. Overcoming Reading Difficulties.
Subjects may include the basic terminology related to special needs students, recognizing differences in learning disabilities, evaluating teaching methods and materials, and teaching strategies that address the needs of special needs students, with a special focus on reading strategies.

UTL X60. Problems and Principles of Secondary Education.
Draws upon resources found in the directed-teaching environment; considers problems and issues in four broad areas: students in the school, the teacher's professional responsibilities, curriculum understandings, and administrative and organizational problems.

UTL X70. Directed Teaching in Secondary Schools.
Observation and teaching in secondary school classrooms as well as an exploration of other roles of the secondary school teacher, under the joint supervision of University and public school personnel.

Graduate Courses

Professional Courses

UTS - UTeach-Natural Sciences

UTeach-Natural Sciences: UTS

Lower-Division Courses

UTS X01. Secondary Teacher Education Preparation: Step 1.
Introduction to mathematics, computer science, and science teaching as a career. Discussions include standards-based lesson design and various teaching and behavior management strategies. Fieldwork consists of five visits to a local elementary school, including planning and teaching three inquiry-based lessons to students in grades three to six.

UTS X06J. Hands-On Science I.
The first of an integrated sequence of laboratory-based courses. Subjects include energy and motion, electrical circuits, atomic theory, waves, and sound.

UTS X06K. Hands-On Science II.
The second of an integrated sequence of laboratory-based courses. Subjects include physical and chemical properties of matter, Earth's building blocks, plate tectonics, landforms, weathering, and geologic time.

UTS X06L. Hands-On Science III.
The third of an integrated sequence of laboratory-based courses. Subjects include properties of life, compartments of living organisms, inheritance, adaptations, variations, and disease.

UTS X06M. Hands-On Science IV.
The fourth of an integrated sequence of laboratory-based courses. Subjects include astronomy and the earth's climate.

UTS X10. Secondary Teacher Education Preparation: STEP 2.
Topics may include routes to teacher certification in mathematics, computer science, and science teaching; various teaching methods that are designed to meet instructional goals; and learner outcomes. Students develop and teach three inquiry-based lessons in their field in a middle school, and participate in peer coaching.

UTS X11. Secondary Teacher Education Prep: Advanced Steps.
Accelerated introduction to mathematics, computer science, and science teaching as a career. Discuss standards-based lesson design and various teaching and behavior management strategies. Plan and teach inquiry-based lessons to students in grades three to eight while visiting local elementary and middle schools.

UTS X14F. Topics in Teaching Math and Science.

UTS X18. Introduction to Making: STEM, Design, and The Arts.
Introduction to the philosophical and historical origins of making and maker-centered education. Use a variety of tools to bring unique creations to life.

Upper-Division Courses

UTS X20. Pedagogy for Inquiry-Based, Hands-on-Science Instruction.
Integrate educational theory, pedagogy, and practice. Explore a wide body of science education literature, pedagogy application, and social and ethical issues.

UTS X20F. Topics in Teaching Math and Science.

UTS X21F. Explorations in STEM Education.
Earn independent field hours through classroom observations, watching and reflecting on teaching videos, and teaching or tutoring students in the schools.

UTS X50. Knowing and Learning in Math and Science.
Psychological foundations of learning; problem solving in mathematics and science education utilizing technology; principles of expertise and novice understanding of subject matter; implications of high-stakes testing; and foundations of formative and summative assessment.

UTS X55. Classroom Interactions.
Principles of delivering effective instruction in various formats (lecture, lab activity, collaborative settings); examination of gender, class, race, and culture in mathematics and science education; overview of policy related to mathematics and science education.

UTS X60. Project-Based Instruction.
Foundations of project-based, case-based, and problem-based learning environments; principles of project-based curriculum development in mathematics and science education; classroom management and organization of project-based learning classrooms.

UTS X70. Student Teaching Seminar.
Discussions include student teaching experiences, contemporary critical issues in education, and preparation for the state certification exam.

UTS X70F. Undergraduate Reading and Research.
Participate in supervised study of selected problems in STEM, by individual arrangement with supervising instructor.

UTS X71. UTeach Induction Support.
Engage in individualized, job-embedded activities to support student learning and analyze the impact of their work.

UTS X75. Student Teaching for Secondary and Middle Grades.
Closely supervised field coursework in a cooperating school. Experience includes carrying out the duties of a secondary or middle grades teacher.

UTS X75C. Computer Science Pathways.
Prepare for the subjects of computer science certification exams that are not covered by other computer science courses. Review existing high school computer science curriculum. Create or find a computational thinking exercise in order to lead the class through the activity.

Graduate Courses

Professional Courses

WGS - Women's and Gender Studies

Women's and Gender Studies: WGS

Lower-Division Courses

WGS X01. Introductory Topics in Women's and Gender Studies.

WGS X01.11. United States Women, Sexuality, and Gender to 1865.

WGS X01.12. Gay and Lesbian Literature and Culture.
American writing by gay, lesbian, bisexual, transgender, or queer authors and/or with gay, lesbian, bisexual, transgender, or queer themes.

WGS X01.13. Mexican American Women, 1910-Present.
Examines the history of Mexican and Mexican American women in the United States from the twentieth century to the present.

WGS X01.14. Performance, Feminism, and Social Change.
Exploration of the ways that engaged performance and feminist practice generate space for social change, including the basic principle that social transformation requires individual awareness, and that awareness necessitates a rigorous examination of race, gender, class, and sexuality.

WGS X01.16. Introduction to Black Women's Studies.
Interdisciplinary examination of the complexities of black womanhood in America through an investigation of history, identity, popular culture, and black feminism/womanism, as well as social and political activism.

WGS X01.17. Black Queer Art Worlds.
Exploration of over two decades of work produced by and about black queer subjects throughout the circum-Atlantic world. Provides an introduction to various artists and intellectuals of the black queer diaspora, as well as an examination of the viability of black queer aesthetic practice as a form of theorizing.

WGS X01.19. Diversity in American Families.
Examination of the diversity of American families and current debates on family life from a sociological perspective with an emphasis on how diverse family forms came to exist and what these changes mean for adults and children in contemporary society. Study of recent trends in several aspects of family life, including dating and courtship, cohabitation, marriage, divorce, parenthood, family structure, and work-family balance. Overview of theoretical perspectives on family life with a focus on gender, race/ethnicity, and sexuality.

WGS X01.20. Fertility and Reproduction.
Explores the when, why, how, and with whom Americans bear children, and how the United States compares to other developed and developing countries in the world. Subjects include infertility and its treatments, the ethics of surrogacy and international adoption, voluntary childlessness, the rapid rise of nonmarital childbearing in the United States and other countries, the politics of childbirth, the risks of maternal morbidity and mortality in developed and developing countries, and the declining populations and rapid aging of rich countries including Japan, Italy, and Spain where many women have stopped having children.

WGS X01.21. Gender, Race, and Class in American Society.
Use of the sociological perspective to analyze how the structure of American society, individual life, and group life chances are shaped by broader structures of privilege and disadvantage based on gender, race, and class. Examination of these in institutional arenas such as work, the family, education, health, the criminal justice system, sexuality, popular culture, and more.

WGS X01.24. Race, Immigration, and Family.
Introduction to family systems in the United States in a post-WWII framework with a central focus on Asian Americans. Students will investigate how gender, race, and ethnicity intersect and inform our understanding of the institution of the family.

WGS X01.25. The Revolution Will Be Dramatized.

WGS X01.26. Toni Morrison and August Wilson.

WGS X01.27. Women, Gender, Literature, and Culture.
An introduction to literary analysis focusing on women's and gender studies.

WGS X01.28. History of Human Sexuality.
The history of human sexuality is approached from four angles: sexual behaviors; sexual consequences; sexual regulation, and sexual science.

WGS X01.29. Latina Performance: From Celia to Selena.

WGS X01.3. Introduction to Latinx Body Art.
Examine the social, historical, economic, and commercial contexts influencing the production, display, and circulation of Latinx body art.

WGS X01.30. Latina and Latino Media and Popular Culture.
Explore Latina/o media and popular culture from 1950 to the present.

WGS X01.31. Introduction to Gender and Sexuality.
Explore social, emotional, cognitive, and physical aspects of gender and sexuality within the contexts of individual human development, families, and cultures.

WGS X01.32. Rights in Modern America.

WGS X01.33. Female Voices in China.
Introduction (in translation) to the most important texts and other sources by, for, and about women in Chinese intellectual, political, social, and cultural history.

WGS X01.34. Introduction to African American Women's History.

WGS X01.35. Introduction to Yoruba Religions.
Introduction to the cosmological world of the Yoruba of southwestern Nigeria, covering history, societal organization, myths, legends, customs, and cultural traditions.

WGS X01.36. Police, Prisons, and Inequality.
Explore the ethical issues related to inequality and the United States criminal legal system. Examine the experiences of the poor, Indigenous people, immigrants, racial minorities, women, sexual minorities, and gender-nonconforming people.

WGS X01.6. Ethnicity and Gender: La Chicana.

WGS X01.7. Women's Reproductive Health for Nonscience Majors.
Overview of contemporary women's reproductive health issues, with emphasis on historical, physiological, psychosocial, and cultural influences that affect the reproductive health of women during adolescence, the childbearing years, and midlife.

WGS X03. Introduction to Lesbian, Gay, Bisexual, Transgender, and Queer Studies.
Explore concepts of gender and sexuality, race, class, religion, and nation; as well as skills in theory, history, and research methods relevant to LGBTQ studies. Survey the making of modern understandings of sexual and LGBTQ identities in the last one hundred years and the implications of this history for broader understandings of gender and sexuality.

WGS X05. Introduction to Women's and Gender Studies.
Introduction to the role of gender identity and representation in key social institutions and processes, including borders, displacements, and diasporas. Analysis of the social narratives of gender, race, and sexuality.

WGS X19S. Topics in Women's and Gender Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Women's, Gender, and Sexuality Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

Upper-Division Courses

WGS X22C. Sociology of Gender.
Inequality between the sexes; men's and women's changing roles in society.

WGS X22D. Population and Society.
The study of populations, including their growth, age structure, and patterns of fertility, mortality, and migration; the social causes and consequences of these phenomena.

WGS X22E. Sociology of Masculinities.
Sociological examination of the most important debates and discussions about men's experiences of masculinity in contemporary patriarchal societies. Exploration of social and individual meanings of masculinity, the dominant paradigms of masculinity that are taken as the norm, and the problems, contradictions, and paradoxes men experience in modern society.

WGS X22F. The Sociology of Race and Work.
Critical examination of work in the United States over the twentieth and twenty-first centuries through a gendered, Asian American lens, using a comparative race perspective. Subjects include the sociological examination of concepts such as labor markets, globalization, care work, and gender/racial segregation in the workplace along with the ways race and gender shape how and where individuals are fitted into the workplace, how skills are evaluated, and how labor markets emerge.

WGS X22G. Race and the Digital.
Review of theoretical developments in the sociological study of "race, including an examination of processes of racialization and cultural texts, in order to better understand the ways in which identities are socially produced. Attention will be placed on forms of popular culture, black cultural production, and political action to question how such practices are shaped by migrations within the African diaspora.

WGS X22I. Sociology of Sexualities.
Review of sociological perspectives on sexuality. Examines how social institutions in United States society shape sexual values, beliefs, and practices. Subjects include changing cultural images of sexuality, sexual identities, and social movements.

WGS X22J. Race, Gender, and Surveillance.
Overview of theories in the sociology of social control, with a focus on risk, power, ethics, and surveillance. Examines historical transformations in social control and the distributions of power in the United States and global contexts, with attention to race, gender, and class. Subjects include: the transatlantic slave trade; prisons and punishment; the gaze, voyeurism, and reality television watching; the Internet; travel and state borders; privacy; and biometrics and the body.

WGS X22K. Sex and Violence in Popular Culture.
Overview of the cultural framing of sex and violence through realistic and hyper-realistic representations of sex, love, violence, and war in popular culture. Examination of the ethical implications, including the ways in which these representations rely on and further social inequalities and the sociological concepts, methods, and theoretical approaches to understanding sex and violence in popular culture.

WGS X23. Topics in Introduction to Women's and Gender Studies in the Natural Sciences.
Examination of gendered constructs such as gender and sexual development, male and female differences and similarities, and feminist or alternative scientific epistemologies using approaches from the natural sciences.

WGS X23C. Primate Social Behavior.
Studies primate behavior and why primates do what they do, including basic theoretical principles and the models used to explain primate behavior.

WGS X23D. Sex and Human Nature.
Provides an introduction to the scientific study of sexual behavior, mate choice, and reproduction in humans from the perspective of evolutionary biology; examines a wide range of genetic, ecological, social, physiological, and behavioral aspects of human sexuality.

WGS X24. Topics in Introduction to Women's and Gender Studies in Communication.
Multidisciplinary course examining issues of women, gender, and sexuality in media industries, texts, and audiences.

WGS X24C. Gender and Media Culture.
Critical analysis of media and its interrelation with issues of gender.

WGS X24D. Race, Class, and Gender in American Television.
Surveys history and contemporary debates regarding the construction of race, class, gender and sexual orientation in U.S. television from the late 1940s through the present day and related issues of television aesthetics, production practices, audiences, and advocacy.

WGS X24E. Gender and Fan Culture.

WGS X24F. Gender, Race, and Sexuality in Sports Media.

WGS X24G. Gender and the News.
Historical and contemporary exploration of gender and the news. Examination of the role of marginalized gender groups in producing news and the construction of gender within news texts.

WGS X24J. Stardom and Celebrity Culture.
Survey of the construction and meanings of stardom in film, television, and new media. Subjects include links with the media industries; stardom and race, class, gender, and sexuality; and new permutations of celebrity culture.

WGS X25. Special Topics in Women's and Gender Studies.
Analysis of special topics in women's and gender studies through reading, discussion, and lectures.

WGS X29S. Topics in Women's and Gender Studies.
This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Women's, Gender, and Sexuality Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

WGS X33D. Introduction to Developmental Psychology.
Physical, social, and cognitive development in humans.

WGS X33R. Social Development in Children.
Development of social behavior (for example, sex typing and aggression) and social relationships.

WGS X35. Topics in Lesbian, Gay, Bisexual, Transgender, and Queer Studies.
The perspectives, experiences, and cultural contributions of lesbian, gay, bisexual, transgender, and queer people, examined from different disciplinary and/or interdisciplinary perspectives according to the topic.

WGS X35.1. Confronting LGBTQ Oppression.
Serves two primary functions: to increase participant's knowledge on the issues facing the Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) community; and to learn facilitation skills in order to talk about these issues on campus. Enrolled students will become peer educators in a team, and will give workshops across campus around LGBTQ issues during the spring semester.

WGS X35.10. HIV and AIDS Activism and the Healing Arts.

WGS X35.11. Beyonce Feminism and Rihanna Womanism.

WGS X35.12. Transgender Feminisms.

WGS X35.13. Queer Art and Activism.

WGS X35.14. Sexuality in Global Perspective.
Explore the ways in which sexuality intersects with money, intimacy, power, and labor in the context of global economic processes.

WGS X35.15. Queer Migrations.

WGS X35.17. Disability, Race, and Sexuality in Literature and Culture.

WGS X35.18. Twentieth-Century United States Lesbian and Gay History.
Examines classic texts and recent and varied writings on LGBT history, focused on experiences, ideas, and conflicts that have shaped modern LGBT identities.

WGS X35.2. Facilitating Dialogues on LGBTQ Oppression: Peers for Pride in Action.
The second part of the Peers for Pride facilitation program; serves as a way for students in the program to use the information and skills learned

in "Confronting LGBTQ Oppression." Students will continue to fine-tune their facilitation skills and continue learning about LGBTQ people on the UT campus and beyond.

WGS X35.20. Sex and Sexuality in the Muslim World.

WGS X35.22. Queer Visual Culture.

WGS X35.23. Performing LGBTQ+.

WGS X35.24. United States Masculinities.

WGS X35.25. Queering Black Religions.

Explore the ways Africana religion practitioners disrupt and reframe dominant western discourses of gender and sexuality. Examine concepts of temporality, spirit manifestation, subjectivity, corporeality, and Africana religious epistemologies.

WGS X35.26. Queer Eastern Europe.

Explore LGBTQI stories and political struggles in Eastern Europe with a focus on the region's queer culture: literature, cinema, and the arts.

WGS X35.28. Race, Gender, Sex, and Religion.

Use an intersectional feminist framework to examine the construction and maintenance of normative categories of race, gender, sex, and sexuality within United States religious discourse.

WGS X35.29. Medical Rhetorics, Race, and Gender.

Examine how health and illness are defined through rhetorics about and within medicine. Focus on race and gender, consider how communication and language shape understandings of health, access to health care, and experiences of illness and disability.

WGS X35.3. African Queer Studies.

Examines the development of African queer studies as the interdisciplinary study of sexuality on the African continent, and its impact on the academic and activist realm. Focus on intersectional feminist and queer theory and how this field offers tools that can be used to rethink issues of oppression and domination in relationship to race, nation, sex, gender, and sexuality on the African continent. Of particular interest will be LGBTQ activism and the ways in which queer Africans engage and shape their sexuality, and create forms of belonging in their countries and their communities.

WGS X35.30. Queer of Color Critique.

WGS X35.32. Queer/Trans Performance.

Explore the ways performance serves as an alternative space of expression and worldmaking, a site of activism and resistance, and a creative outlet for queer and trans people in specific socio-cultural contexts.

WGS X35.6. Gender Issues in Contemporary Latin American Cinema.

Studies Latin American cinema as a device of gender system formation and reinforcement, and as criticism of patriarchal hegemony; discusses questions related to sexuality depicted in Latin American films. Subjects covered include: maternity, prostitution, machismo, children's sexuality, homosexuality, heterosexuality, and gender violence in films from the 1930s to present. Conducted in Spanish.

WGS X35.7. Queer Study in Low Culture.

Examines representations of sexual and gender non-conformity in popular culture since the mid-twentieth century in the United States.

WGS X35.9. Movements for Sexual and Reproductive Justice.

Charts the historical development of various struggles for sexual and reproductive justice in the United States since the nineteenth century.

WGS X35C. Queer Media Studies.

Critical analysis of queer media. Read key queer (media) theory texts and explore dominant strategies used by the media industries, as well as those utilized by LGBTQ+ independents/subcultures, paying close attention to contested discourses of identity, politics, activism and desire. Explore historical shifts in the representation of LGBTQ+ individuals.

WGS X35D. Queer Television.

WGS X35J. Latinx Sexualities.

Examine Latinx sexualities from a historical perspective to comprehend the social, cultural, political, and economic factors, which have shaped these experiences.

WGS X35L. The Black Figure in American Art and Popular Culture.

Examine how popular culture and artistic practices facilitate or challenge social constructions of "Blackness" in the United States.

WGS X35P. Preserving Austin's Queer History.

Explore Austin's queer history since World War II and write on the practice of oral history and LGBTQ oral history in particular. Build the foundation for an ongoing Austin LGBTQ Oral History Project to be housed at the Briscoe Center for American History.

WGS X40. Cross-Cultural Topics in Women's and Gender Studies.

Multidisciplinary course examining experiences and issues of gender in different cultures.

WGS X40.1. Contemporary Latinx Visual and Performance Art.

Explore contemporary visual and performance art by Latinx artists working since the 1970's to the present. Examine artists who began to engage with and in civil rights discourse to intervene through their art-making practices; and to align with contemporary trends in the art world that began to expand in the 1970's, such as performance art, installation art, video art, and, later, digital art.

WGS X40.11. Veiling in the Muslim World.

WGS X40.13. Law and Society in Early Modern Europe.

Research seminar on how historians have explored the significance of law, criminal and civil, in the lives of early modern Europeans. Topics include infanticide, fornication, drunkenness, theft, debt, slander, and family disputes.

WGS X40.20. Violence in Contemporary Mexican Culture.

Studies the representation of violence in contemporary literary and cultural production in Mexico in order to understand social, political, and cultural implications of current violence there. Taught in Spanish.

WGS X40.25. Gender, Sexuality, and the Family in Indian Religions and Cultures.

A comprehensive historical overview of gender issues as they are represented in the textual traditions of South Asia.

WGS X40.27. Islamic Law.

Designed to give students a foundation in the substantive teachings of the shariah, which comprises not only what we normally think of as law, but also ethics and etiquette.

WGS X40.29. Contemporary African American Women's Fiction.

WGS X40.30. Goddesses in World Religions and Cultures.

Historical and cross-cultural overview of the relationship between feminine and religious cultural expressions through comparative examinations and analyses of various goddess figures in world religions.

WGS X40.35. South Asian Migration to the United States.

Examine the South Asian diaspora in the United States.

WGS X40.37. Tolerance in Dutch Culture.

The historical roots of Dutch "tolerance" and how it plays a role in current Dutch culture and attitudes towards religious, gender, and sexual differences, as well as drug use, prostitution, and euthanasia. Exploration of the stereotypes and the actuality of these Dutch attitudes and policies from an international comparative perspective.

WGS X40.4. 21st Century Latinx Literature.

Explore Latinx literature from the past two decades including both literary form and political engagement, with an emphasis on Latina, queer, and nonbinary writers.

WGS X40.40. Historical Imagining of Africa in Films.
WGS X40.44. Gender Politics in the Islamic World.
Study of the Islamic world and major sociological concepts such as gender, social organizations, culture, and politics. Examines how culture is mediated by politics, resulting in diverse interpretations of Islam and in different policies with respect to women's rights.
WGS X40.45. Feminist Interventions in Borderlands History.
Provides an in-depth understanding of the social, economic, and spatial transformations of the United States/Mexico borderlands in the nineteenth and early twentieth centuries.
WGS X40.46. Africana Women's Art.
Analysis of the diverse modes of presentation, mediums, definitions, and influences of Africana women artists in the diaspora. Designed to use critical theory and art history found in oral and written literatures, music, films, and other formal and informal documents.
WGS X40.48. Diaspora Visions.
An exploration of border crossing by cultures and groups including Yorubas, Jews, Armenians, Tibetans, Hamish, Pakistanis, and Indians and the production of images by immigrants, exiles, and nomads in alien lands.
WGS X40.49. Contemporary African Popular Culture.
WGS X40.51. Medieval Women Mystics.
The life and writings of Saint Birgitta of Sweden, fourteenth-century visionary, religious reformer, and pilgrim, examined and compared with her predecessor Hildegard of Bingen (Germany), her successor Margery Kempe (England), as well as Margery's mentor, Julian of Norwich. Social and historical contexts for all four of these women mystics will be explored in depth.
WGS X40.52. Sex and Power in the African Diaspora.
Exploration of various experiences and theories of sex, intimacy, and desire alongside intellectual and artistic engagements with power hierarchies and spirituality across transnational black communities. Subjects include the concept of "erotic subjectivity" from various theoretical and methodological angles, principally within African diasporic contexts.
WGS X40.53. Women and Social Movements in the Twentieth-Century United States.
Examines women's participation in well-known and lesser-known social movements during the twentieth century.
WGS X40.54. The Qur'an.
Explore the history, language, style, and themes of the Qur'an.
WGS X40.56. Muslim Women in Politics.
WGS X40.58. Queer Ethnographies.
Anthropological analysis of gender and sexuality that critically evaluates formative concepts and theories that have been subject to recent debates within anthropology, gender studies, and queer theory.
WGS X40.60. Women and Resistance in Contemporary Eastern Europe.
WGS X40.62. Gender and Art in the Muslim World.
WGS X40.66. Holocaust Aftereffects.
Explores the historical, political, psychological, theological, and cultural fallout of the Holocaust, as well as literary and cinematic responses in Europe and the United States.
WGS X40.67. Graffiti and Poster Art in the Islamic World.
WGS X40.69. Black Women on Trial.
Using press coverage of historical and contemporary court cases and trials of women ranging from Angela Davis to Marissa Alexander, explores how media shapes public and popular perceptions of race, class, gender, sexuality, and the law.
WGS X40.7. Black Women and the State.
Surveys black women's experiences living with and confronting state oppression around the world. Takes an historical, social, and theoretical look at the roots of this oppression and inequality, and how black women have chosen to respond to it locally and globally.
WGS X40.74. Bad Language: Race, Class, and Gender.
WGS X40.75. Gender and Modern India.
Examine gender and the shifting nature of modernity between precolonial and colonial periods in the Indian subcontinent.
WGS X40.77. Theorizing the Human.
Trace the continuities and transformations in constructions of populations as more or less human, from settler-colonial conquest to the post-Trump era. Examine what logics mark racialized populations as disposable during the colonization of the Americas, and which systematically condition racialized subjects to a state of enduring siege.
WGS X40.78. Reproductive Justice and Race.
Examine the links between reproductive care and social inequality, and explore reproductive outcomes for women in the context of social justice.
WGS X40.81. Iranian and Iranian-American Identity.
WGS X40.82. Race, Capitalism, and the Environment.
WGS X40.83. Black Middle Class.
WGS X40.84. Fashion And Desire.
WGS X40.85. Technologies of United States Empire.
Investigate the various technologies that the United States has used to maintain imperial geographies at "home" and abroad. Focus on imperial entanglements of global capital, liberalism, and technological systems.
WGS X40.86. Julia Alvarez and Sandra Cisneros.
WGS X40.87. Chicana Feminisms.
WGS X40.89. Transnational Latinx Popular Culture.
WGS X40.9. Black Women in America.
Uses primary sources, historical monographs, and essays to provide a chronological and thematic overview of the experiences of black women in America from their African roots to the circumstances they face in the present era.
WGS X40.90. Latinx Short Story.
WGS X40.91. Sexuality and Gender in Latin America.
Explore gender as a broad analytical tool to understand key problems concerning social organization, power relations, and inequality in contemporary Latin America.
WGS X40.92. Italian Television Advertising.
Analysis of Italian television commercials in order to identify changes that have taken place at the level of language, with some attention to socio-cultural dynamics.
WGS X40.94. African-American Women's Political Activism.
Explore Black feminism and African-American women's political participation.
WGS X40.95. Policing Latinidad.
WGS X40.96. Latinx Legend Tripping.
Explore narrative folklore from diverse traditions across the United States based Latinx diaspora. Focus on supernatural legends and the creation of the female "monster".
WGS X40.97. Tejana Cultural Studies.
Investigate the history of Tejanas to reaffirm and reclaim their place and role in the histories of Native Americans, women, Chican@/Chicanxs, Greater Mexico, and the United States. Explore how transborderism and transregionalism complicate this history. Contemplate how Tejanas' stories are fundamental to illuminating the struggles, resistance, and liberation of Chicanas, mestizas, and afromexicanas from precontact to decolonization.
WGS X40F. Latina Feminism and Health.
WGS X40L. Black Queer Literature and Film.
Analyzes written works, films, and videos by and about lesbians, bisexual, transgender, and gay black people, with an emphasis on understanding the historical and theoretical construction of sexual and gender identities and sexual/cultural practices in black communities.
WGS X40N. Native American Women's History.
Investigate the histories of Native American women to reaffirm and reclaim their place and role in the histories of Native Americans, indigenous peoples, women, Chican@/xs, Greater Mexico, and the United

States. Contemplate how many understandings that center colonization, settler colonialism, genocide, race, and environmentalism are essential to examining Native American women's history. Explore the stories, struggles, and ideas of community-building, sovereignty, and liberation as integral to their genders and sexualities as Native American, Indian, First Nations, indigenous, and red and brown women.

WGS X40S. Topics in Cross-Cultural Feminisms.
Examine experiences and issues of gender in different cultures.

WGS X40S.1. Gender and Translation in the Arab World.
Examine complex politics and poetics behind the translation and marketing of Arab women's writing in the West.

WGS X40S.2. Black Women and Mass Incarceration.
Examine the history of Black women and mass incarceration in America. Explore how race, class, and gender have historically influenced the production of crime and unfair criminal justice policies. Investigate why mass incarceration matters, what its historical legacy is, and how it impacts Black women today.

WGS X40S.3. Slavery and Its Legacies.
Explore how slavery has evolved in the United States since the end of the Civil War.

WGS X40S.4. Black Digital Feminisms in Brazil.
Explore online expressions of Black feminisms in Brazil, highlighting transnational resonances with other Black cultural movements while examining the socio-political particularities of Brazil's current digital landscape.

WGS X40S.5. The Politics and Art of Iran's Woman, Life, Freedom Uprising.
Analyze the politics and art of Iran's 2022 Woman, Life, Freedom Uprising movement. Develop a digital humanities resource on the movement through collaboration.

WGS X40S.6. Central Americans in the United States.
Examine the extensive and diverse histories, cultures, social and political movements of Central Americans in the United States, particularly through a Black, Indigenous, and Ethnic Studies framework.

WGS X40W. Writing Slavery.
Explores the controversial rewriting of slavery in a presentist context by contemporary authors. Addresses challenges that archival limitations and revisionist writings about slavery pose for academic disciplines, literary instruction, and/or pedagogy.

WGS X41. The Roots of Social and Economic Justice.

WGS X45. Topics in Women's and Gender Studies.

WGS X45.21. Male-Female Communication.
Studies of speech patterns related to the concepts of male and female, including sexism in speaking, patterns of male and female speaking, patterns of listening to males and females, speech in courtship and family, speech and sexual discrimination in careers.

WGS X45.26. American Dilemmas.
Examination of critical American social problems, including problems in the economic, political, and health care systems, as well as inequities based on income, gender, and race. Exploration of how these problems are a natural outgrowth of the existing social structure.

WGS X45.27. Southern Cultures.
Investigation of multiple, fluid, and diverse southern cultures through topics such as NASCAR, biscuits and cornbread, mega-churches, beauty pageants, jazz, country music, southern hip hop, migrant farm cultures, matzo ball soup with collards, the Trail of Tears, Gullah, Tara, Graceland, and more. Includes discussion of stereotypes and the individual truths about women, men, and southern in the context of this discussion.

WGS X45.29. Witches, Workers, and Wives.
Explores the role of families and concepts of gender as expressed in key economic, social, political, and cultural patterns in early modern Europe.

WGS X45.3. Women in Sickness and Health.
Explores medical and biological views throughout the nineteenth and twentieth centuries of women and women's health, the social context of those views, the development of medical practices, and the treatment of illness and debility.

WGS X45.31. Gender and Slavery in the United States.
Examines the gendered experience of chattel slavery in the United States. Includes critical analysis of classic and contemporary texts, films, and songs that focus on slave labor, family, community, sexuality, and the economy.

WGS X45.36. Feminist Media Theory.
Survey of basic theories related to the structure and process of film and video communication.

WGS X45.38. History of Sexuality in America.

WGS X45.41. American Food.
Studies diverse American food cultures from a humanities perspective, exploring connections between global, national, and local communities. Uses scholarship in the field of food studies as well as cookbooks, novels, poetry, photographs, songs, documentaries, and oral histories to investigate the past and present of American food communities.

WGS X45.42. Nature and Gender in America.
Study of the connections between nature and gender in American national narratives. Explores how Americans of differing classes, races, genders, sexual orientations, and ages have shaped and experienced changing ideas of America, wilderness, domestication, and society over time and in different regions of the country.

WGS X45.44. Women Radicals and Reformers.
Traces traditions of women's radical activism and reform beginning with the Enlightenment and the American Revolution and continuing to the present, with concentration on the twentieth century.

WGS X45.49. History of American Feminism.

WGS X45.56. Gender And Sexuality in Performance.
Consider what physical performance and dance tell us about gender, sexuality and the body. Previous knowledge of performance or gender studies is not required.

WGS X45D. Punks and Divas in Southeast Europe.
Examine popular music and its role in political struggle and collective identity formation in the Balkans. Analyze music genres in this region in the context of the historical changes it underwent in the twentieth and twenty-first centuries, including the fall of Communism and -- in the case of former Yugoslavia -- the formation of seven new nation-states through a series of bloody and brutal wars.

WGS X45E. Lesbian, Gay, Bisexual, Transgender, and Queer Literature and Culture.

WGS X45G. Virginia Woolf.
Examines critical and fictional works of Virginia Woolf and the author's continuing legacy and influence. Explores the value and limitations of high modernism; English literary heritage and tradition; feminism; creative and critical definitions of gender and sexuality; intellectual activism, including Woolf's critiques of patriarchy, war, and fascism; and Woolf and imperialism and colonialism.

WGS X45I. Toni Morrison.
An examination of select novels by the Nobel Laureate and Pulitzer Prize-winning novelist focuses on the positional uniqueness that womanism shares with a predominant feminism, which surfaces in historicized familial relationships.

WGS X45J. Women's Autobiographical Writing.
Examines the autobiographical impulse in women's writing by exploring the concept of the individualistic self versus the sense of self as a part of community and duty, and the way in which that communal self can both partake of humankind and participate in self-actualization.

WGS X45K. American Literary Masculinities.
Explores constructions of masculinity in American literature from a generally, but not exclusively, feminist perspective. Subjects include what masculinity has meant at different times in United States history, and how it has varied in meaning and significance according to broad categories of identity such as social class, race, region, and queerness.

WGS X45M. Gender and Politics in a Comparative Perspective.
Examine the patterns of women's representation over time, and in different regions of the world. Explore why gender equality in political institutions is important, tracing the evolution of feminism over time.

WGS X45N. Women and Sports Media.

WGS X45O. Gender and Speculative Fiction.
Examine how writers have used speculative fiction--including science fiction, utopia, and dystopia--as a tool to explore gender, race, sexuality, humanity, ethics, disability, and the environment.

WGS X45P. American Women Writers.

WGS X45Q. Displacement and Resistance.
Explore technologies of displacement, as well as tactics, digital media work, mapping projects, and activism that communities engage with to resist dispossession. Examine, locally and globally, the displacement and resistance effects of various events including infrastructure projects and gentrification.

WGS X45R. Bradstreet and Wheatley.
Explore the works of Anne Bradstreet and Phillis Wheatley.

WGS X45S. Elena Ferrante: Politics and Passion.

WGS X45T. Race, Gender, and Political Economy in United States Literature.
Explore the intersection of race, class, and gender relations, gender expression, and gender norms as constitutive of real and imagined political economies in literature and films by black, indigenous, and Latine authors and producers in the United States.

WGS X45U. Women and Sport.
Examine the role sport and exercise has played in the lives of women since ancient times with an emphasis on events influencing American women in sport, their fight for access to sport, and the International Olympic Games.

WGS X45W. Women in Postwar America.

WGS X46C. Animals and American Culture.
Explores the role of animals in American history, culture, and society.

WGS X46G. American Popular Culture, 1682-Present.
Explores the evolution of American popular culture and its relationship to national consolidation, and at times, disunion, over the last 330 years.

WGS X46J. Gender and Labor in Global Asia.

WGS X46K. Women and the Holocaust.
Introduction to both the history of Jewish and German women during World War II and the Holocaust, and to women's narratives and self-representations of this period. Historical sources, memoirs, films, and interviews will be used as source material.

WGS X46L. Arendt and de Beauvoir.

WGS X46M. Social Dramas of Henrik Ibsen.
A detailed introduction to Ibsen's social dramas (1877-1899), emphasizing their unity as a prolonged commentary on the society of his era and the variety of its human problems. Special emphasis on subjects such as: the family and the home; the public world of reputation, work, and citizenship; the predicaments of men and women in a male-dominated society; and the motives of our interventions into the lives of others.

WGS X50. Feminist Theory.
Feminist theory with selections from women's and gender studies scholars. Recommended feminist theory course for women's and gender studies majors.

WGS X52R. Rhetoric of Ethnic Studies.
Study the histories of ethnic (and gender) studies in both higher education and K-12 institutions, and the rhetoric of attacks on, and defenses of, ethnic and gender studies through an examination of primary and secondary source materials.

WGS X56. Introduction to Feminist Research Methods.
Introduction to feminist research methods across a range of traditional disciplines. Designed to prepare students to analyze research within gender studies and to develop their own research skills.

WGS X58Q. Supervised Research.
Supervised individual research on an issue in women's and gender studies.

WGS X60. Research and Thesis in Women's and Gender Studies.
Individual project or paper to be completed under the direction of a women's and gender studies faculty member.

WGS X79H. Honors Tutorial Course.
Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis.

WGS X79L. Internship in Women's and Gender Studies.
Experience working in the community or for a nonprofit agency.

WGS X79S. Senior Seminar.
Intensive study of selected topics in women's and gender studies.

Graduate Courses

WGS X81. The Roots of Social and Economic Justice.

WGS X84N. Internship in Women's and Gender Studies.
Practical working involvement with participating nonprofit and research agencies.

WGS X90. Introduction to Women's and Gender Studies.
Introduction to the interdisciplinary women's and gender studies graduate program.

WGS X90W. Writing Workshop.
Introduction to feminist writing practice.

WGS X91. Feminist Theories.
Selected readings of feminist theories from an interdisciplinary perspective.

WGS X92. Research Methods Seminar in Women's and Gender Studies.
Introduction to select feminist research methods used in various disciplines and how these methods inform interdisciplinary perspectives in the student's own field of study in preparation for a report, thesis, or dissertation.

WGS X93. Seminar: Topics in Women's and Gender Studies.

WGS X93L. Topics in International Women's and Gender Studies.
Explore intersectional and interdisciplinary topics in women's and gender studies. Conducted in languages other than English.

WGS X93S. Topics in Specialized Women's and Gender Studies.

WGS X94. Conference Course in Women's and Gender Studies.
Individual directed readings and conferences on selected problems or topics in women's and gender studies.

WGS X95. Special Projects in Women's and Gender Studies.
Interdisciplinary projects to support the women's and gender studies graduate student coursework.

WGS X98. Thesis.

WGS X98R. Master's Report.
Preparation of a report to fulfill the requirement for the master's degree under the report option.

Professional Courses

WRT - Writing

Writing: WRT

Lower-Division Courses

WRT X82. Independent Projects.

Upper-Division Courses

WRT X82. Independent Projects.

Graduate Courses

WRT X80. First-Year Seminar.

WRT X80S. Studies in Creative Writing.

Subjects include the study of literature, creative theory, and criticism in the genres of fiction, nonfiction, poetry, playwriting, and screenwriting.

WRT X80W. Workshop in Creative Writing.

Subjects include writing fiction, writing poetry, playwriting, and screenwriting.

WRT X82. Independent Projects.

WRT X90. Master's Report.

WRT X98. Thesis.

Professional Courses

WRT X82. Independent Projects.

YID - Yiddish

Yiddish: YID

Lower-Division Courses

YID X04. Accelerated First-Year Yiddish.

YID X06. First-Year Yiddish I.

Introduction to the spoken and written language, the literature, and the culture of the East European Jews and their descendants.

YID X07. First-Year Yiddish II.

Examine the spoken and written language, the literature, and the culture of the East European Jews and their descendants.

YID X12. Accelerated Second-Year Yiddish.

Speak, listen, read, and write at the second-year level. Focus on authentic texts and oral communication.

YID X19S. Topics in Yiddish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

YID X29S. Topics in Yiddish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

YID X79. Conference Course in Yiddish Language or Literature.

Supervised individual instruction course in which students engage in special studies necessary to expand their acquaintance with any subject in Yiddish language or literature.

Upper-Division Courses

YID X19S. Topics in Yiddish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

YID X27. Advanced Yiddish I.

YID X28. Advanced Yiddish II.

YID X29S. Topics in Yiddish.

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Germanic Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program.

YID X30D. Yiddish across Disciplines.

Read and discuss Yiddish language materials related to the subject matter of another designated course.

YID X79. Conference Course in Yiddish Language or Literature.

Supervised individual instruction course in which students engage in special studies necessary to expand their acquaintance with any subject in Yiddish language or literature.

Graduate Courses

YID X19S. Topics in Yiddish.
