

Chemistry, Materials Chemistry (BSCh)

Total Hours Required: 120

Plan of Study

The Plan of Study is a suggested four-year course sequence to support academic planning and serves as a helpful guide. Currently enrolled students should meet with their academic advisor to tailor their course selections and timelines to their individual goals and circumstances.

Course	Title	Hours

CH 378L	Capstone Research and Thesis	3
Hours chosen from:		9
CH 341	Special Topics in Laboratory Chemistry	
CH 354P	Advanced Chemistry: Molecular Biophysics	
CH 354S	Elements of Spectroscopy	
CH 365N	Structures and Function of DNA Materials	
CH 366C	Advanced Inorganic Chemistry: Organometallics Catalysis	
CH 366D	Bio-inorganic Chemistry and Spectroscopy	
CH 366E	Chemistry of the s-, p-, d-, and f-Block Elements	
CH 367P	Introduction to Polymer Science	
CH 368	Advanced Topics in Chemistry	
CH 369K	Techniques of Research	
CH 375C	Physical Organic Chemistry	
CH 375K	Individual Study in Chemistry	
CH 375P	Advanced Topics in Polymer Science	
CH 379H	Chemistry Honors Tutorial Course	
CHE 322	Thermodynamics	
CHE 323	Chemical Engineering for Micro- and Nanofabrication	
CHE 343	Molecular Simulation of Materials	
ECE 334K	Quantum Theory of Electronic Materials	
ECE 339	Solid-State Electronic Devices	
ECE 339S	Solar Energy Conversion Devices	
E S 360M	Experiments in Materials Science and Engineering	
M E 349	Corrosion Engineering

Degree-Bachelor of Science in Chemistry (BSCh)

Six degree plans lead to the Bachelor of Science in Chemistry. Chemical Physics & Instrumentation, Molecular Theory & Simulation, Materials Chemistry, and Synthesis & Chemical Biology are intended to prepare students for professional careers, either upon graduation or after graduate study in chemistry or related fields. Teaching is intended to prepare students to enter the teaching profession. Chemistry Honors is intended to prepare students for academic or research careers. Students who plan to follow Chemistry Honors must be admitted to the [Dean's Scholars, Health Science Scholars, or Polymathic Scholars Honors Program](#).

The six degree plans may also serve as the basis for work in many areas outside pure chemistry, such as materials science, medicine and other health-related fields, pharmacology, patent law, business, computation, or environmental science. Supporting work in mathematics and physics is an integral part of the degree programs. Compared to the program leading to the bachelor of science and arts degree, the Bachelor of Science in Chemistry degree programs are more thorough and demanding and potentially more rewarding to the student planning a career in chemistry.

CH 153K	Physical Chemistry Laboratory	1
CH 354	Quantum Chemistry and Spectroscopy	3
All students must complete at least 36 semester hours of upper-division coursework; at least 21 semester hours of upper-division coursework in chemistry must be completed in residence at the University.		
Total Hours		47

Additional Requirements and Policies

Students in all concentrations must fulfill both the University's [General Requirements](#) for graduation and the [college requirements](#). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the [General Information Catalog](#).

Order and Choice of Work

Students begin the Bachelor of Science in Chemistry degree program with eight or nine hours of introductory chemistry for science majors (CH 401 or CH 401C, and CH 402, CH 402C, or CH 302 and CH 204), as well as M 408C or M 408N. Students should consult with their academic advisors about planning to choose a chemistry degree focus area, appropriate course in mathematics and physical sciences, and about course load and balance between laboratory and lecture courses. Most

students will select a degree focus area by the end of the second year and take at least 21 hours of upper-division coursework in the major requirements in the third and fourth years.

E S 301; and M E 377K upon approval of the project by the UTeach Program.
