

Management Information Systems (BBA)

The objective of the BBA in Management Information Systems is to equip students with the foundational skills to understand the complexity of information system design. Students develop technical and managerial skills needed to address key business problems in areas such as inventory control, production, forecasting, finance, and cost accounting. Courses are designed to provide a foundation in the integration of hardware, software, networking, and business functional analysis for business systems.

Total Hours Required: 120

Plan of Study

The Plan of Study is a suggested four-year course sequence to support academic planning and serves as a helpful guide. Currently enrolled students should meet with their academic advisor to tailor their course selections and timelines to their individual goals and circumstances.
